Interdisciplinary analysis of the scientific basis and policy development to regulate and manage environmental pollutants in coastal waters. Focuses on case studies involving aspects of environmental toxicology and policy including environmental monitoring and regulatory programs; ecosystem restoration; and regulating the environmental impacts of coastal development. Enrollment restricted to sophomores, juniors, seniors, and graduate students. *M. Connor, G. Griggs, A. Flegal*

170. Frontiers in Drug Action and Discovery. S

Lectures and case studies explore principles and approaches in drug discovery and development, emphasizing concepts in pharmacology; medicinal chemistry; and genomics- and bioinformatics-based approaches to drug discovery to illustrate pathways from discovery through development for clinical use. Cannot receive credit for this course and course 270. (Also offered as Biomolecular Engineering 170. Students cannot receive credit for both courses.) Prerequisite(s): Biology 100 and Biology 100K; or Chemistry 103; or Biochemistry 100A, 100B, 100C, and Biology 100K. Biology 110 and 130/L or 131/L are recommended. Enrollment restricted to juniors and seniors. *D. Smith, T. Holman, M. Camps, R. Linington, P. Berman*

195. Senior Thesis. F,W,S

An individually supervised course, with emphasis on independent research culminating in a senior thesis. May be repeated for credit. *The Staff*

198. Independent Study. F,W,S

Provides for individual programs of study (a) by means other than the usual supervision in person or (b) when the student is doing all or most of the course work off campus. With permission of the department, two or three courses may be taken concurrently, or the course repeated for credit. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Reading, discussion, written reports, and laboratory research on selected topics. May be repeated for credit. *The Staff*

Graduate Courses

200. Interdisciplinary Approaches in Environmental Toxicology. F

Introduction to interdisciplinary, case-based approaches to problem-solving. Course demonstrates how important, current problems in environmental and human health have been addressed and solved. Assigned problems that integrate the different organization levels (environmental, molecular/cellular, organismal/public health) inherent to environmental and human health are presented. Students work in collaborative teams to analyze each problem and create a proposal for a research plan/solution. Enrollment restricted to graduate students. *D. Smith, M. Camps, K. Ottemann*

201. Sources and Fates of Pollutants. S

Presents in-depth important principles of environmental toxicology related to the introduction, transport, and fate of toxicants in aquatic and terrestrial environments including environmental chemistry and biogeochemical cycles as well as exposure pathways and uptake by organisms. Additional emphasis will be placed on the susceptibility and effects of toxicants across organ systems, toxicokinetics and biomarkers of exposure, and effects at the ecosystem level. Students cannot receive credit for this course and course 101. Enrollment restricted to graduate students; qualified undergraduate science majors may enroll with permission of instructor. *A. Flegal*

202. Cell and Molecular Toxicology. F

Emphasizes biochemical, cellular, and organ system basis of intoxication, including dose-response relationships, biotransformation of toxicants, biochemical mechanisms underlying toxicity, factors influencing toxic action, and biomarkers of exposure. Emphasizes effects of various classes of toxins, including heavy metals and persistent synthetic organics, with a focus on susceptible biochemical/cellular processes of the central nervous, immune, hepatic, and renal target organ systems. Students cannot receive credit for this course and Microbiology and Environmental Toxicology 102 or BIOL 122.. (Formerly "Cellular and Organismal Toxicology.") Enrollment restricted to graduate students. *D. Smith*

203. Cellular and Molecular Toxicology. *

Presents in-depth cellular and molecular principles of environmental toxicology. These include modes of action and cellular and molecular targets of toxicants, as well as mechanisms of cellular and molecular responses to toxicants and their detoxification. State-of-the-art biological methodologies and approaches to identify and study cellular targets of toxicants. Designed to provide students with a broad and deep understanding of the biological aspects of toxicology at both cellular and molecular levels, and the skills to approach emerging challenges in the field. Enrollment restricted to graduate students; qualified undergraduates may enroll with instructor's permission. *(FWS) The Staff*

205. Scientific Skills, Ethics, and Writing. W

Course provides fundamental training of graduate students in the scientific method, experimental design, ethics in science, grant proposal and scientific writing, data presentation, and scientific speaking. Students are evaluated on class participation, performance, and a written NIH/NSF style research proposal. Enrollment restricted to graduate students. *The Staff*

206A. Advanced Microbiology. F

Focuses on aspects of bacterial molecular biology. Covers four main areas: (1) metabolism-catabolism, anabolism, building-block precursors; (2) transcription/signal transduction; (3) replication/plasmid biology/division; (4) translation/protein processing/secretion/cell structure. Strong focus on experimental techniques and approaches used in molecular biology, and on model bacteria, such as *Escherichia coli* and *Bacillus subtilis*. Enrollment restricted to graduate students. Advanced undergraduates may enroll with permission of instructor. *K. Ottemann, V. Stone, C. Saltikov*

210. Molecular and Cellular Basis of Bacterial Pathogenesis. S

Focuses on the molecular basis of bacterial pathogenesis with specific emphasis on gene expression, regulation, and ecology and evolution. Advanced undergraduates with extensive background in microbiology and biology may enroll with permission of instructor. Enrollment restricted to graduate students. Advanced undergraduates with extensive background in microbiology and biology may enroll with permission of instructor. *F. Yildiz*

215. Seminar in Advanced Prokaryotic Molecular Biology (2 credits). *

Seminar focuses on aspects of prokaryotic molecular biology. Specific topics include transcriptional regulation, translational regulations, DNA replication, secretion of proteins, transport of small molecules, bacterial differentiation, signal transduction, biofilm formation, and motility. Discussions focus on model bacteria such as *Escherichia coli* and *Bacillus subtilis*. Enrollment restricted to graduate students. *F. Yildiz, C. Saltikov, K. Ottemann*

238. Pathogenesis: Molecular Mechanisms of Disease. *

Overview of the pathogenic mechanisms underlying human disease at the physiological and molecular levels, with their implications for epidemiology, diagnosis, and treatment. Includes discussion of clinical cases and of emerging areas of research. Geared toward students interested in research or clinical careers in the area of human or animal health. Students cannot receive credit for this course and course 138. Enrollment restricted to graduate students. *M. Camps*

240. Molecular Biology of Prokaryotes. *

Focuses on several aspects of prokaryotic molecular biology. Covers transcriptional regulation, translational regulation, DNA replication and segregation, protein secretion, transport of small molecules, control of metabolism, stress response, bacterial differentiation, signal transduction, biofilm formation, and motility. Strong focus on experimental techniques and approaches used in prokaryotic molecular biology. Focus on model bacteria such as *Escherichia coli* and *Bacillus subtilis*. Students cannot receive credit for this course and course 140. *K. Ottemann*

250. Environmental Microbiology.

How microbes interact with their environments. Topics include anaerobic metabolism; biotransformation of toxic metals and organic pollutants; geomicrobiology; life in extreme environments; water quality. Advanced undergraduates with extensive background in microbiology and biology may enroll with permission of instructor. Enrollment restricted to graduate students. Offered in alternate academic years. *C. Saltikov*

270. Frontiers in Drug Action and Discovery. S

Lectures and case studies explore principles and approaches in drug discovery and development, emphasizing concepts in pharmacology; medicinal chemistry; and genomics- and bioinformatics-based approaches to drug discovery to illustrate pathways from discovery through development for clinical use. Cannot receive credit for this course and course 170. (Also offered as Biomolecular Engineering 270. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. *D. Smith, T. Holman, M. Camps, R. Linington, P. Berman*

281A. Topics in Environmental Toxicology. *

Selected topics in environmental toxicology. Topics vary from year to year. Enrollment restricted to graduate students; qualified upper-division science majors may enroll with instructor's permission. May be repeated for credit. *The Staff*

281C. Topics in Environmental Microbiology (2 credits). F,W,S

Seminar and discussion focusing on mechanism of microbial transformation of metals. Participants present results from their research projects in a seminar format. Relevant journal articles presented and discussed. Enrollment restricted to graduate students; qualified undergraduates may enroll with instructor's permission. *C. Saltikov*

281F. Topics in Aquatic Toxicology. F,W,S

Analyses of the sources and fates of aquatic pollutants. Discussions on processes at the air-water interface, within the water column, and in aquatic sediments. Topics vary from year to year. Enrollment restricted to graduate students; qualified upper-division science majors may enroll with instructor's permission. May be repeated for credit. *A. Flegal*

281M. Topics in Molecular Toxicology (2 credits). F,W,S

Seminar and discussion on the mechanisms of toxicity in DNA alkylating agents. Participants present results from their research, and relevant journal articles are discussed. Enrollment restricted to graduate students. Undergraduates may enroll with instructor's permission. Enrollment limited to 5. May be repeated for credit. *M. Camps*

281O. Topics in Bacterial Pathogenesis (2 credits). F,W,S

Intensive seminar focusing on mechanisms of bacterial pathogenesis of the ulcer-causing bacterium *Helicobacter pylori*. Participants are required to present results from their own research and relevant journal articles. (Also offered as Biology: Molecular Cell & Dev 2800. Students cannot receive credit for both courses.) Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. Enrollment limited to 20. May be repeated for credit. *K. Ottemann*

281S. Cellular and Organismal Responses to Toxicants. F,W,S

Intensive research seminar on the concepts, theory, and techniques in deriving physiologically based pharmacokinetic models of toxin exposure, metabolism, and efficacy of therapeutic treatment in mammalian models of human metal toxicity. Enrollment restricted to graduate students; qualified undergraduates may enroll with permission of instructor. May be repeated for credit. *D. Smith*

281V. Topics in Bacterial Pathogenesis and Innate Immunity (2 credits). F,W,S

Focuses on the interplay between the human gut bacterial pathogen *Yersinia pseudotuberculosis* and the innate immune system of the host. Participants are required to present the goals, results, and conclusions from their own research. Participation in the general discussion during others' presentations is also required. Enrollment restricted to graduate students. Qualified undergraduates performing research under the supervision of the instructor may enroll with instructor's permission. May be repeated for credit. *V. Stone*

281Y. Biofilms: Processes and Regulation (2 credits). F,W,S

Intensive seminar series focusing on the most current work on genes and the processes that regulate biofilm development dynamics as well as on the recent developments on visualization of biofilms. Presentation and discussion based. Enrollment restricted to graduate students. Qualified undergraduate students may enroll with instructor's permission. May be repeated for credit. *F. Yildiz*

282. Current Approaches to Molecular Pathogenesis (2 credits). *

Graduate level seminar focusing on the mechanisms by which bacterial pathogens cause disease. Specific topics include basic concepts of virulence and virulence factors, virulence factor regulation, toxins, and interactions of pathogens with mammalian cells and organs. Discussions focus on several key pathogens, including *Helicobacter pylori*, *Vibrio cholerae*, *Salmonella typhimurium*, and *Listeria monocytogenes*. May be repeated for credit. *K. Ottemann*

290. Proseminar. *

Special topics offered from time to time by faculty, visiting professors, or staff members. Enrollment restricted to graduate students; qualified undergraduates may enroll with instructor's permission. May be repeated for credit. *The Staff*

290A. Epidemiology and Risk Assessment. *

Approaches different techniques of biological monitoring and the exposure and effect of biomarkers related to occupational and environmental exposure to chemicals. Available methods for risk assessment and identification of protective exposure limits also considered. (Formerly *Biological Impact of Chemical Exposures*.) *The Staff*

292. Introductory Graduate Seminar (no credit). F,W,S

Weekly seminars by academic and research faculty on their areas of special interest. Students write weekly abstracts on articles covered by the seminars. Enrollment restricted to graduate students; qualified undergraduates may enroll with instructor's permission. *The Staff*

297. Independent Study. F,W,S

Independent study for graduate students who have not yet settled on a research area for the thesis. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

*Not offered in 2011-12

[Program Description](#) | [Changes to 2010-12 Catalog Highlighted](#) | [Faculty](#) | [Course Descriptions](#)

Program Description

The UCSC music curriculum is distinctive in developing musicians who integrate scholarship with performance. Although this rigorous program primarily addresses Western art music, it also incorporates the study of world music cultures in both their art and vernacular traditions. A major in music establishes a substantial foundation for further academic or performance studies. Two undergraduate majors are offered: the bachelor of music (B.M.), which especially develops the student's attainment in performance, and the bachelor of arts (B.A.), which cultivates greater breadth in the student's academic achievement. Two minors in music are also offered: one in electronic music, and one in jazz. The electronic music and jazz minors are open to music majors, as well as to students pursuing other majors.

The music program provides courses for both general education and the music major/minor curriculum. Students from all disciplines are encouraged to enroll in music courses, including performance groups and private instruction.

The Music Center includes a 400-seat recital hall that has recording facilities, specially equipped classrooms, individual practice and teaching studios, a student computer laboratory, rehearsal space for ensembles, a gamelan studio, and studios for electronic and computer music. McHenry Library has a separate music section and listening rooms that have individual audio and video facilities. Recording and media equipment is available from the Learning Technologies center.

Letter Grade Requirement

All upper-division courses applied toward the music majors must be taken for a letter grade, except Music 120 and ensembles, which may be taken Pass/No Pass.

Requirements for the Bachelor of Arts

The course requirements for the bachelor of arts (B.A.) in music include the following:

- Music 30A, 30B, and 30C (lower-division core theory); Music 101A, 101B, and 101C (core history); Music 130 (upper-division core theory);
- One each of the Music 105 series (topics in history and culture), the Music 150 series (topics in advanced theory), and Music 180 series (topics in world music);
- Choice of one of the following: Music 121 (orchestration), Music 124 (sound synthesis), or an additional 150 or 180 course;
- Choice of one capstone course, either Music 120 (composition) or an additional Music 105 course by permission of instructor.

Basic keyboard skills are required as a component of the music theory curriculum. Music majors are required to enroll in a minimum of six quarters of evaluated instrumental or choral ensembles, as well as a minimum of six quarters of evaluated individual instrumental or vocal lessons. Students who demonstrate insufficient potential when auditioning for individual instruction may have limited access to lessons, and they may be denied entry into the major. It is strongly recommended that these ensembles and lessons be taken every quarter from the beginning of the core curriculum (course 30 sequence). Music majors in the B.A. program must successfully complete the proficiency audition (see below).

Although a foreign language is not required for completion of the B.A. in music, students planning graduate work are strongly advised to study a language pertinent to their research area at least equivalent to level 3 at UCSC or be able to pass the level-4 entrance examination.

To be considered for highest honors in the major, B.A. students must complete a senior project which may take one of three forms: a full senior recital, a full senior thesis, or a partial recital with

a related shorter thesis.

Music B.A. Sample Planners

Sample academic plans are found in the [Music Student Handbook](#), available online at the Music Department web site.

General Examinations

All students majoring in the B.A. program are required to take the following examinations, which are discussed in greater detail in the *Music Student Handbook*.

Core Curriculum Placement Examination (a sample of the examination can be viewed at <http://music.ucsc.edu/undergrad/>). Students are tested in the areas of theory, music literature, and ear training. The examination is given before the fall quarter on the same day as the music orientation meeting. Transfer students who demonstrate acceptable competency on the placement examination may be recommended for advanced placement based on a further examination (including testing in keyboard and sight-singing skills).

Advisory audition. Students are required to take an advisory audition on their major instrument or in voice at the conclusion of course 30A.

Proficiency audition. Students are required to demonstrate at least an upper-intermediate level of proficiency on their major instrument or in voice around the time they complete 130.

Capstone course. Students in the B.A. program are required to enroll in a capstone course consisting of either Music 120 (composition) or any additional Music 105 course by permission of the instructor.

Requirements for the Bachelor of Music

The bachelor of music degree (B.M.) is designed for those who intend to pursue a career in performance. Acceptance to the program is by audition during fall quarter. These auditions are open to registered UCSC students only, although prospective students may submit a tape to the Music Department and ask to receive an informal opinion about their chances for acceptance into the major.

B.M. students major in an instrument or in voice. For the audition, students should prepare three pieces or movements of a contrasting nature from at least two different stylistic periods. (Two contrasting movements from the same sonata or concerto may count as two of the three required pieces.) Prospective students' optional tapes should also meet these specifications to receive an unofficial evaluation from the Music Department.

The requirements for the B.M. include courses 30A-B-C, 101A-B-C, any 105, any 150, any 180, and 196B. In addition, students are required to enroll in a minimum of 12 quarters of evaluated instrumental or vocal ensembles, as well as a minimum of 11 quarters of evaluated instrumental or vocal lessons. Transfer students must enroll in lessons and ensembles every quarter in residence. A senior recital (course 196B) is required in the final quarter. Students are required to take the music core curriculum placement examination. Basic keyboard skills are required as a component of the music theory curriculum. B.M. students take a jury examination in their major instrument or in voice at least twice a year and perform one piece in public at least once a year. In addition to these requirements, voice majors are required to take French 1, German 1, and Italian 1. For students who wish to concentrate in jazz, the following changes for the B.M. requirements apply: students will take Music 111B instead of a 180 course; Music 174 (Jazz Improvisation) is required and may replace one quarter of ensembles; Music 175 (Jazz Theory) is required.

The B.M. program differs from the B.A. program in requiring more credits in performance and slightly fewer in theoretical disciplines. The senior exit requirement for B.M. students is a senior recital. To be considered for highest honors, B.M. students must also complete, on an excellent level, a capstone course Music 120 (composition) or an additional Music 105 course by permission of the instructor.

B.M. Four-Year Sample Study Planner for Students Concentrating in an Instrument

Sample academic plans are found in the [Music Student Handbook](#), available online at the Music Department web site.

Note: It is typical of B.M. programs at all institutions to spread general education requirements throughout a student's four years to allow for early specialization.

Students should check with the department office for the most up-to-date course schedules and program planning advice, since courses are not necessarily taught in the same quarters each academic year. Voice majors need to work closely with an adviser to schedule general education courses because of the added language requirements; a Summer Session may be necessary. It is recommended that voice majors take a language course each fall quarter during the first three years and that vocal repertory in that language be stressed throughout the academic year. For example, instead of enrolling in a general education course during the fall quarter of the first, sophomore, and junior years, a student concentrating in voice might enroll in Italian 1, German 1, and French 1, respectively.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in music is satisfied by completing courses 101A and 101C.

Minors

Electronic Music

The electronic music minor focuses on the study of creating music using the tools of modern technology. It is designed to complement the music major or programs in other media by providing instruction in advanced skills of audio production, sound synthesis, and computer-assisted composition. A student may obtain a minor in electronic music by completing the following:

- any course in the 11 series;
- Music 15;
- courses 80C, 123, 124, 125, and two quarters of 167;
- one of the following: course 80L, 80M or 80R (or a similar music course that has a technical focus as approved by the department), or Film 171A or Theater Arts 114;
- one of the following: Physics 80A or 160; or Computer Science 5C, 5J, 5P, or 12A; or Electrical Engineering 70, 153, or 171

Jazz

The jazz minor focuses on the study of the history, theory, and performance of jazz. In addition, students may be introduced to musical styles that have had profound influences on this uniquely American art form: folk and popular musics of Africa, Europe, and the United States and Western classical music. The jazz minor is limited to students who have sufficient performance proficiency to pass auditions for entry into the jazz ensembles. The required courses for the minor in jazz are the following:

- course 11A;
- course 15;
- course 75 and 175 or 150J;
- course 111B (students not qualified to take course 111B must also take course 11B);
- course 11C, 11D, 80J, or 80Q;
- six quarters of ensembles, including at least three quarters of the jazz ensembles (courses 3 and/or 164). At least two quarters must be upper-division. Students who repeat course 174 for credit can use the second and subsequent quarters of course 174 to fulfill a portion of the ensemble requirement; used in this way, course 174 counts as a jazz ensemble;
- course 174 (may be repeated for credit).

Detailed information about the music majors and minors may be obtained from the Music Department office.

Honors

Honors in the major are conferred by vote of the music faculty. B.A. or B.M. students can be awarded honors for excellent work in individual areas, including course work, senior project (thesis or recital), or a capstone course 105Z or 120. Excellent work in any two of these areas normally results in honors in the major.

To be considered for highest honors in the major, B.A. students must complete a (non-required) senior project and B.M. students must complete the (non-required) capstone course. Honors in all three areas—coursework, senior project, and capstone course normally results in highest honors in the major.

Transfer Students

The Music Department requires transfer students to take the core curriculum placement examination and seek academic counseling before transfer (a sample of the exam can be viewed at <http://music.ucsc.edu/undergrad/>). Transfer students who have some background in music theory normally test into 30A (which is only offered in the fall quarter). Students who require course 15 for music theory preparation should take this course in their first year to prepare for 30A the following fall. Transfer students who have completed all of their general education requirements and who test into course 30A upon transfer may be able to complete the music major in two years.

B.A. transfer students should note that upon completion of course 130, they need to perform on a musical instrument or voice at an upper-intermediate level. Prospective students wishing to have their performance skill level assessed by faculty in preparation for entry to the program are encouraged to send a tape for faculty review.

B.M. transfer students should prepare to audition in the fall quarter after enrollment. (For audition requirements, see the Requirements for the Bachelor of Music section above.) In certain cases, some or all of the applied music requirement may be waived based on prior coursework.

B.M. Sample Study Planner for Transfer Students Concentrating in an

Instrument

Sample academic plans are found in the *Music Student Handbook*, available online at the Music Department web site: http://music.ucsc.edu/undergrad/handbook_ug_current.pdf.

This plan assumes that all general education requirements have been met. The music core curriculum placement examination generally places junior transfer students in Music 30A (which is only offered during fall quarter).

Students should check with the department office for the most up-to-date course schedules and program planning advice, since courses are not necessarily taught in the same quarters each academic year.

A transfer student concentrating in voice could enroll in Italian 1 and German 1 in the fall and winter quarters, respectively, of the junior year, and in French 1 in the spring quarter of the senior year. Such a transfer student would complete any desired electives prior to arrival at UCSC and/or in Summer Session. However, transfer students should try to satisfy as many of the language requirements as possible before entering the program.

Individual Instruction

Lessons in the instruments listed below are available on a fee basis and by audition with the instructor. Depending on whether a student is pursuing a particular music undergraduate degree program (B.A. or B.M.), or a music minor, concurrent enrollment in an appropriate ensemble is required for a stipulated number of quarters. Consult the Undergraduate Music Student Handbook for details.

Authorization from the performance instructor is a requirement for entry into the music majors. Students who demonstrate insufficient potential when auditioning for individual instruction may have limited access to lessons, and they may be denied entry into the major.

Courses 61, 62, and 161 carry partial course credit. Each quarter of enrollment in course 61 is equivalent to 2 credits; each quarter of enrollment in course 62 or 161 is equivalent to 3 credits. Course 162, open to advanced students only, carries 5 credits.

Class instruction for partial credit (courses 60 and 63) is available on some instruments but may not be used to fulfill the individual lesson requirements for the major.

Bass
Bassoon
Cello
Clarinet
Flute
Guitar, classical
Harpsichord
Horn
Oboe
Percussion
Piano, classical
Saxophone
Trombone and tuba
Trumpet
Violin and viola
Voice

Performance Groups

The participants in some groups are selected by auditions open to the entire university community. Students receive two course credits for each quarter of enrollment in any of the ensembles.

University Orchestra
University Concert Choir
Women's Chorale
Chamber Singers
University Opera Theater
Opera Workshop
Early Music Consort
Chamber Music
Large Jazz Ensemble
Small Jazz Ensembles
Latin American Ensembles
Contemporary Music Ensemble
West Javanese Gamelan
Balinese Gamelan
Wind Ensemble
Classical Guitar Ensemble
North Indian Music Workshop
Eurasian Ensemble

Graduate Programs

Master of Arts

The master of arts (M.A.) degree program in music has emphases in composition, musicology/ethnomusicology, or performance practice, and integrates studies in performance, composition/analysis, and research. In consultation with a faculty adviser, the student pursues a two-year course of studies culminating in a final project that combines an original composition, written thesis, or essay with a related public performance or lecture recital.

Requirements

A minimum of 60 course credits completed at UCSC is required for the degree. All M.A. students are required to complete Music 200, 201, and 202, as well as 252 during each quarter in residence (for students entering the program fall 2007 and thereafter).

Students with an emphasis in composition also complete Music 219, 220, and one 203 course.

Students with an emphasis in musicology/ethnomusicology or performance practice also select three courses from Music 203A-H (course 206D meets the requirement for one 203 course). It is possible in some cases to substitute a course from the Music 253 or 254 series for one 203 course.

The final project for the degree includes both performing and scholarly components, which vary according to the degree emphasis.

Students with a composition emphasis submit a thesis composition together with an essay that addresses historical, technical, and/or interpretive issues of the music (course 299); and they complete a full-length recital (course 298) of their compositional work.

Students with a musicology/ethnomusicology emphasis complete a thesis (course 299) and a short performance or lecture-recital related to the thesis (course 298).

Students with a performance practice emphasis complete a full-length recital (course 298) and an accompanying short essay that addresses historical, technical, and/or interpretive aspects of the music performed in the recital. Students in this emphasis whose main area is conducting complete a full-length recital (course 298) and one of the following: a shorter lecture-recital, a short analytical or contextual essay on a different topic, or collaboration with a graduate student composer or faculty composer on a premiere public performance. Students are encouraged to create a program involving corollary studies such as computer studies, area cultural studies, linguistics, anthropology, theater arts, and visual arts.

Graduate students must take all core courses for a letter grade. These courses include the following: Music 200, 201, 202, 203A-H, 206A-D, 219, 220, 253A-D, and 254A-M. Independent study courses (Music 261, 265, 295, 297, 298, and 299) and the colloquium course (Music 252) may still be taken with the Satisfactory/Unsatisfactory grade option.

Current skill in reading and comprehension of a relevant foreign language must be demonstrated upon enrollment by attainment of level 3 on the UCSC language placement examination or, during the first year of enrollment, by satisfactory completion of level 3 of the language at UCSC, or by submission of an official transcript documenting successful completion of one year of university-level foreign language. With the approval of the primary adviser, students whose emphasis is algorithmic composition may complete three quarters/one year of university-level instruction in computer programming in lieu of fulfillment of the foreign-language requirement. Knowledge of languages not offered at UCSC must be demonstrated as determined by the Music Graduate Committee.

Prior to the start of classes each fall quarter, each incoming M.A. student is required to complete a three-hour diagnostic examination which is intended to identify areas in which supplementary coursework may be needed, in addition to the courses listed above.

Doctor of Musical Arts

The doctor of musical arts (D.M.A.) degree program in music composition has tracks in computer-assisted composition and world music composition. The track in computer-assisted composition includes algorithmic techniques for the generation of musical materials and structures to be realized in the creation of instrumental, vocal, and digitally synthesized music. The track in world music composition addresses a variety of compositional approaches influenced by indigenous world musics, with a focus upon those musics taught by faculty composers, ethnomusicologists, and applied instructors. The D.M.A. program seeks to develop accomplished, active, and articulate composers who have a broad awareness of the diverse styles, cultural influences, media, venues, and technical means available to them in the 21st century.

Requirements

For students entering with the bachelor's degree, a minimum of 102 credits in coursework at UCSC will be required. All students must be in residence for a minimum of nine quarters. Students must enroll in a minimum of 12 credits each quarter until they advance to candidacy. After advancing to candidacy, students remaining in residence must take a minimum of one five-credit course each quarter.

For students entering with a master's degree from another institution, a minimum of 72 credits in coursework at UCSC will be required. All students must be in residence for a minimum of six

quarters. Students must enroll in a minimum of 12 credits each quarter until they advance to candidacy. After advancing to candidacy, students remaining in residence must take a minimum of one five-credit course each quarter. D.M.A. students are expected to complete the degree within a maximum of six calendar years (leaves of absence are **not** excluded from this count) from entrance to the program.

Required courses include Music 200, 201, and 202 (students entering with a master's degree from another institution may petition to waive one or more of these courses by submitting documentation for equivalent courses completed elsewhere). Students in the computer-assisted composition track complete Music 206B, one 203 course, and two quarters of 267 or another 206 course. Students in the world music composition track complete Music 206A, 203H, and 203G or another 206 course. All students are required to complete Music 219, 220, 252 each quarter in residence, and five quarters of enrollment in independent study, including Music 297, 298, and 299.

Graduate students must take all core courses for a letter grade. These courses include the following: Music 200, 201, 202, 203A-H, 206A-D, 219, 220, 253A-D, and 254A-M. Independent study courses (Music 261, 265, 295, 297, 298, and 299) and the colloquium course (Music 252) may still be taken with the Satisfactory/Unsatisfactory grade option.

Current skill in reading and comprehension of a relevant foreign language must be demonstrated upon enrollment by attainment of level 3 on the UCSC language placement examination or, during the first year of enrollment, by satisfactory completion of level 3 of the language at UCSC, or by submission of an official transcript documenting successful completion of one year of university-level foreign language. With the approval of the primary adviser, students whose emphasis is algorithmic composition may complete three quarters/one year of university-level instruction in computer programming in lieu of fulfillment of the foreign-language requirement. Knowledge of languages not offered at UCSC must be demonstrated as determined by the Music Graduate Committee.

Prior to the start of classes in fall quarter, each incoming D.M.A. student is required to complete a three-hour diagnostic examination which is intended to identify areas in which supplementary coursework may be needed, in addition to the courses listed above.

A D.M.A. student who entered the D.M.A. program with a bachelor's degree may apply for a M.A. degree, whether he/she is leaving the D.M.A. program or continuing toward completion of the D.M.A. degree, by fulfilling the following requirements:

- Completion of a minimum of five quarters at UCSC.
- Completion of a minimum of 35 graduate or upper-division course credits (including all courses required for the M.A. degree with an emphasis in composition).
- Successful completion of the qualifying recital (course 298).

Pre-qualifying Reviews

Before the end of the first year of study, all D.M.A. students must present a half recital of their compositions from that year, and submit the scores and recital recording as a portfolio, which faculty will use to assess the student's progress in the program. Faculty may also consider the student's performance in courses 200, 201, and/or 202. In unusual cases, when progress has been minimal, faculty reserve the right to terminate a student's enrollment in the program. Typically, the half recital is satisfied by a combination of 1) participation in a concert of graduate-student compositions sponsored each April by Porter College and the Music Department, and 2) participation in a public reading of graduate-student final projects from courses 219 and 220. The Qualifying Recital

At the end of their second year of study, all students admitted to the D.M.A. program must present a half-recital (perhaps 35-40 minutes of music) representing their best work since entering the program. The D.M.A. qualifying recital will be evaluated by the student's primary adviser and by a second faculty member (generally a second composer) selected by the student in consultation with the primary adviser.

Dissertation Prospectus

The dissertation prospectus must be submitted 12 months before the scheduled qualifying examination. The prospectus must include a proposal describing the scope and nature of the dissertation composition and the accompanying essay. In addition to defining the parameters of the dissertation itself, the dissertation prospectus will suggest to the student's qualifying examination committee those areas of study that should be emphasized in the student's qualifying examination.

Qualifying Examination

Advancement to candidacy is contingent upon the passing of a written examination and an oral examination normally administered at the end of year three for students entering with a bachelor's degree, and the end of year two or the beginning of year three for students entering with a master's degree from another institution. For the written portion of the examination, the qualifying examination committee provides questions on the three topics assigned as areas of emphasis. The oral examination is administered by the student's qualifying examination committee and may concern any aspect of the assigned topics with an emphasis on those issues addressed in the written portion of the examination. Advancement to candidacy will be granted after successful completion of the written and oral examinations, acceptance of the dissertation reading committee form, satisfactory completion of course work and the foreign language requirement, and the

payment of the necessary fees.

Dissertation

D.M.A. students must complete a dissertation consisting of a substantial musical composition accompanied by an essay. One to two years of work beyond the qualifying examinations should be sufficient for the completion of the dissertation, except in cases where extended fieldwork is required.

Final Examination

The final examination will be a public oral defense of the dissertation. After an oral presentation by the candidate, the candidate will be questioned by the Dissertation Committee.

Doctor of Philosophy in Music

The doctor of philosophy (Ph.D.) degree in music has an emphasis in cross-cultural studies, and aims to provide doctoral students with an integrative framework for music scholarship, emphasizing the ways in which musicology and ethnomusicology interact and complement one another.

In addition to cultural approaches to musical style, the program also encourages the integration of scholarly research with musical performance, emphasizing the manner in which performance serves both rhetorical and symbolic ends within various cultural settings. To this end the concept of "performance practice" plays a significant role in this program, given that the concept of historically or culturally informed performance is applicable to music from the earliest times to the present day in all geographical and cultural regions, and can encompass research activities as diverse as fieldwork, historical editing, and recording, as well as publishing of books and articles on the traditions of composition and performance.

Requirements

Students entering the Ph.D. program with a bachelor's degree are required to complete the following courses: Music 200, 201, 202, three courses from Music 253, three courses from Music 254, three courses from Music 203 (Music 206D or a 254 course may each substitute for one 203 course), Music 252 during each quarter of residence, and Music 299.

Students entering the Ph.D. program with a master's degree are required to complete following courses: three courses from Music 253 series, three courses from the Music 254 series, Music 252 during each quarter of residence, and Music 299.

All students in the Ph.D. program, whether or not they are entering the program with a master's degree, should plan to take at least two, and preferably three of the following courses in addition to the regular requirements: Music 201, Music 202, Music 203H, or Anthropology 208A. The decision about which of these courses to take should be made in consultation with the student's adviser and the chair of the Graduate Committee.

Graduate students must take all core courses for a letter grade. These courses include the following: Music 200, 201, 202, 203A-H, 206A-D, 219, 220, 253A-D, and 254A-M. Independent study courses (Music 261, 265, 295, 297, 298, and 299) and the colloquium course (Music 252) may still be taken with the Satisfactory/Unsatisfactory grade option.

Students entering the Ph.D. program are expected to have reading knowledge of a foreign language equivalent to at least one year of course work. In addition, students must acquire reading knowledge, equivalent to one year of coursework, of a second foreign language relevant to their area of interest during their first year of enrollment, or to demonstrate equivalent knowledge as determined by the Music Graduate Committee.

Prior to the start of classes in fall quarter, each incoming Ph.D. student is required to complete a three-hour diagnostic examination that is intended to identify areas in which supplementary course work may be needed.

Ph.D. students entering the program with a bachelor's degree are required to submit a research paper by the beginning of the fourth quarter in residence, which will be revised that quarter under the supervision of the student's faculty adviser, and will be evaluated at the end of the quarter by the adviser and an additional faculty member. Students whose paper is assessed as unsatisfactory will not be allowed to continue in the Ph.D. program.

Students may devise a program of study that includes additional music courses, and courses from other disciplines suited to their special areas of concentration, in addition to the required courses. Students who entered the Ph.D. program with a bachelor's degree may apply for the M.A. degree after completion of a minimum of five quarters in residence, the fourth-quarter research paper, and the following courses: 200, 201, 202, one course from 203A-H, and one course each from the 253 and 254 seminar series, and course 297.

Pre-qualifying reviews

At the end of the first year of study, all students accepted into the Ph.D. program will submit a brief report on work completed during that year. This report will inform a consideration by the music faculty of the student's status in the graduate program. Faculty will offer comments and suggestions to be communicated to the student either directly or through the student's adviser.

However, if progress is minimal, faculty reserve the right to terminate a student's enrollment in the program.

Qualifying Examinations

Advancement to candidacy is contingent upon passing both written and oral examinations. The written qualifying examination will test knowledge absorbed through the two years of coursework as well as material in the student's field of concentration. The oral examination will focus on the previously completed written exams well as the student's developed expertise in her/his chosen specialization. Students must be registered in the quarter in which they take their qualifying examination.

The examinations will normally be administered in year 4 for students entering with a bachelor's degree, and in year 3 for students entering with a master's degree.

Advancement to candidacy will be granted after successful completion of the written and oral examinations, acceptance of the dissertation reading committee form, satisfactory completion of coursework and the foreign-language requirement, and the payment of the necessary fees.

Dissertation

To satisfy requirements for the degree, a student must complete a dissertation and present a related formal lecture or lecture-recital. The student will develop a dissertation prospectus, which will be due six months after advancement to candidacy. Guidelines for the format and content of the prospectus can be found in the Ph.D. in Music Handbook. The dissertation must embody substantial and original scholarly work based on a clearly distinguishable contemporary or historical music-cultural tradition, in any music-culture(s) of the world in which the UCSC program offers expertise. The public lecture or performance must demonstrate the student's grasp of the pertinent music-cultural performance tradition or music-cultural and/or music-historical concepts.

Final Examination

The final examination will be an oral defense of the dissertation open to the university faculty.

Successful completion of this examination will be determined by a majority vote of the dissertation reading committee.

Additional information about the program, including application and admission, is available from the Division of Graduate Studies and on the department web site: <http://music.ucsc.edu/>.

244 Music Center

(831) 459-2292

music@ucsc.edu<http://music.ucsc.edu>***Program Description***

The UCSC music curriculum is distinctive in developing musicians who integrate scholarship with performance. Although this rigorous program primarily addresses Western art music, it also incorporates the study of world music cultures in both their art and vernacular traditions. A major in music establishes a substantial foundation for further academic or performance studies. Two undergraduate majors are offered: the bachelor of music (B.M.), which especially develops the student's attainment in performance, and the bachelor of arts (B.A.), which cultivates greater breadth in the student's academic achievement. Two minors in music are also offered: one in electronic music, and one in jazz. The electronic music and jazz minors are open to music majors, as well as to students pursuing other majors.

The music program provides courses for both general education and the music major/minor curriculum. Students from all disciplines are encouraged to enroll in music courses, including performance groups and private instruction.

The Music Center includes a 400-seat recital hall that has recording facilities, specially equipped classrooms, individual practice and teaching studios, a student computer laboratory, rehearsal space for ensembles, a gamelan studio, and studios for electronic and computer music. McHenry Library has a separate music section and listening rooms that have individual audio and video facilities. Recording and media equipment is available from the Learning Technologies center.

Letter Grade Requirement

All upper-division courses applied toward the music majors must be taken for a letter grade, except Music 120 and ensembles, which may be taken Pass/No Pass.

Requirements for the Bachelor of Arts

~~The course requirements for the bachelor of arts (B.A.) in music include courses 30A/L-B/M C/N, 100A B C, 101A B C D; either course 180A or 180B; another course selected from either 120, 124, 130, or the 180A or 180B course not already taken; and 197.~~

The course requirements for the bachelor of arts (B.A.) in music include the following:

-

1. Music 30A, 30B, and 30C (lower-division core theory); Music 101A, 101B, and 101C

(core history); Music 130 (upper-division core theory);

- 2. One each of the Music 105 series (topics in history and culture), the Music 150 series (topics in advanced theory), and Music 180 series (topics in world music)
- 3. Choice of one of the following: Music 121 (orchestration), Music 124 (sound synthesis), or an additional 150 or 180 course

4. Choice of one Capstone Course, either Music 120 (composition) or an additional Music 105 course by permission of instructor.

Basic keyboard skills are required as a component of the music theory curriculum. ~~Many students will need to take Music 60, Group Instruction in Piano, concurrently with the Music 30 sequence to achieve the appropriate level of skill. In addition, M~~music majors are required to enroll in a minimum of six quarters of evaluated instrumental or choral ensembles, as well as a minimum of six quarters of evaluated individual instrumental or vocal lessons. Students who demonstrate insufficient potential when auditioning for individual instruction may have limited access to lessons, and they may be denied entry into the major. It is strongly recommended that these ensembles and lessons be taken every quarter from the beginning of the core curriculum (course 30 sequence). Music majors in the B.A. program must successfully complete the proficiency audition (see below).

Although a foreign language is not required for completion of the B.A. in music, students planning graduate work are strongly advised to study a language pertinent to their research area at least equivalent to level 3 at UCSC or be able to pass the level-4 entrance examination.

To be considered for highest honors in the major, B.A. students must complete a senior project.~~Students are encouraged to prepare a senior project,~~ which may take one of three forms: a full senior recital, a full senior thesis, or a partial recital with a related shorter thesis. ~~To be considered for highest honors in the major, B.A. students must complete, on an excellent level, a senior project.~~

Music B.A. Sample Planners

Sample academic plans are found in the *Music Student Handbook*, available online at the Music Department web site: http://music.ucsc.edu/undergrad/handbook_ug_current.pdf.

-

~~The following are two recommended academic plans for students to complete during their first two years as preparation for the music major. Plan One is a guideline for students who are committed to the major early in their academic career; Plan Two is for students who are considering the major. Four year plans may be found in the *Music Student Handbook*, available at the Music Department office or on the Music Department web site at http://music.ucsc.edu/undergrad/handbook_ug_current.pdf.~~

~~Students should check with the department office for the most up to date course schedules and program planning advice since courses are not necessarily taught in the same quarters each academic year.~~

Plan One			
Year	Fall	Winter	Spring
1st (frsh)	MUSC 11A (recommended)	MUSC 30B/M	MUSC 30C/N

	MUSC 30A/L	lessons	lessons
	ensemble	ensemble	ensemble
	ensemble		
	(group piano, MUSC 60, may be required; see courses 30A/L)		
2nd (soph)	MUSC 100A	MUSC 100B	
	lessons	lessons	lessons
	ensemble	ensemble	ensemble

Plan Two			
Year	Fall	Winter	Spring
1st (frsh)	MUSC 11A (recommended)	MUSC 13 (recommended)	MUSC 14-15 (recommended)
	lessons	lessons	lessons
	ensemble	ensemble	ensemble
2nd (soph)	MUSC 30A/L	MUSC 30B/M	MUSC 30C/N
	(group piano, MUSC 60, may be required; see courses 30A/L)		

General Examinations

All students majoring in the B.A. program are required to take the following examinations, which are discussed in greater detail in the *Music Student Handbook*.

Core Curriculum Placement Examination (a sample of the examination can be viewed at <http://music.ucsc.edu/undergrad/>). Students are tested in the areas of theory, music

literature, and ear training. ~~Success on this exam (or a score of approximately 85 percent or higher on the final examination of Music 14) is a prerequisite to course 30A/L. Students should also take the examination to place out of course 13 or to place into course 14.~~ The examination is given ~~before the~~ during fall quarter on the same day as the music orientation meeting. Transfer students who demonstrate acceptable competency on the placement examination may be recommended for advanced placement based on a further examination (including testing in keyboard and sight-singing skills).

Advisory audition. Students are required to take an advisory audition on their major instrument or in voice at the conclusion of course 30A/L.

Proficiency audition. Students are required to demonstrate at least an upper-intermediate level of proficiency on their major instrument or in voice ~~before enrolling in course 100B.~~ around the time they complete 130.

~~Senior exit seminar. Students in the B.A. program are required to take the exit seminar (course 197), which encompasses material from all segments of the required curriculum.~~

Capstone Course: Students in the B.A. program are required to enroll in a ~~Capstone Course~~ consisting of either Music 120 (composition) or any additional Music 105 course by permission of the instructor.

-

Requirements for the Bachelor of Music

The bachelor of music degree (B.M.) is designed for those who intend to pursue a career in performance. Acceptance to the program is by audition during fall quarter. These auditions are open to registered UCSC students only, although prospective students may submit a tape to the Music Department and ask to receive an informal opinion about their chances for acceptance into the major.

B.M. students major in an instrument or in voice. For the audition, students should prepare three pieces or movements of a contrasting nature from at least two different stylistic periods. (Two contrasting movements from the same sonata or concerto may count as two of the three required pieces.) Prospective students' optional tapes should also meet these specifications to receive an unofficial evaluation from the Music Department.

The requirements for the B.M. include courses ~~30A/L, B-/M-C/N, 30A-B-C, 100A-B-C,~~ 101A-B-C ~~D,~~ any 105, any 150, ~~any 180~~ 180A or 180B, and 196B. In addition, students are required to enroll in a minimum of 12 quarters of evaluated instrumental or vocal ensembles, as well as a minimum of 11 quarters of evaluated instrumental or vocal lessons. Transfer students must enroll in lessons and ensembles every quarter in residence. A senior recital (course 196B) is required in the final quarter. Students are required to take the ~~The~~ music core curriculum placement examination. ~~(see above), or passing course 14 with a final examination score of approximately 85 percent or higher, is a prerequisite to course 30A/L.~~ Basic keyboard skills are required as a component of the music theory curriculum. ~~some students will need to take course 60, Group Instruction in Piano, concurrently with the course 30A/L sequence to achieve the appropriate level of skill.~~ B.M. students take a jury examination in their major instrument or in voice at least twice a year and perform one piece in public ~~the regular UCSC student recital series~~ at least once a year. In addition to these requirements, voice majors are required to take French 1, German 1, and Italian 1. For students who wish to concentrate in jazz, the following changes for the B.M. requirements apply: students will take Music 111B instead of ~~a 180 course A or B~~; Music 174 (*Jazz Improvisation*) is required and may replace one quarter of ensembles; Music 175 (*Jazz Theory*) is required.

The B.M. program differs from the B.A. program in requiring more credits in performance

and slightly fewer in theoretical disciplines. ~~B.M. students are not required to take course 120, 124, or 130.~~ The senior exit requirement for B.M. students is a senior recital. To ~~receive~~ be considered for highest honors, B.M. students must also complete, on an excellent level, ~~the Senior Exit Seminar (Music 197).~~ a capstone course Music 120 (composition) or an additional Music 105 course by permission of the instructor.

B.M. Four-Year Sample Study Planner for Students Concentrating in an Instrument

Sample academic plans are found in the *Music Student Handbook*, available online at the Music Department web site: http://music.ucsc.edu/undergrad/handbook_ug_current.pdf.

Note: It is typical of B.M. programs at all institutions to spread general education requirements throughout a student's four years to allow for early specialization.

Students should check with the department office for the most up-to-date course schedules and program planning advice, since courses are not necessarily taught in the same quarters each academic year. ~~Numbers of quarter credits are in parentheses.~~

Plan One			
Year	Fall	Winter	Spring
1st (frsh)	lessons (3)	lessons (3)	lessons (3)
	ensemble (2)	ensemble (2)	ensemble (2)
	gen ed/college core (5)	gen ed (5)	MUSC 14 (5) 15
	gen ed (5)	gen ed (5)	gen ed (5)
2nd (soph)	lessons (3)	lessons (3)	lessons (3)
	ensemble (2)	ensemble (2)	ensemble (2)
	MUSC 09A (5)	MUSC 30B (5)	MUSC 30C (5)
	MUSC 30L (2)	MUSC 30M (2)	MUSC 30N (2)
	MUSC 60 (2)*	gen ed (5)	gen ed
	gen ed (5)		
3rd (jr)	lessons (3)	lessons (3)	lessons (3)
	ensemble	ensemble	ensemble

	(2)	(2)	(2)
	MUSC 100A (5)	MUSC 100B (5)	MUSC 100C (5)
	gen ed/elective (2)	MUSC 101A (5)	MUSC 101B (5)
4th (sr)	lessons (3)	lessons (3)	MUSC 196B (5)
	MUSC 101C (5)	MUSC 101D (5)	MUSC 180A or B (5)
	gen-ed	gen-ed/elective (2-5)	

~~*Music 60 (Group Instruction in Piano) is not a course requirement for the major but should be taken if the student needs preparation for the keyboard proficiency examination. The course is geared to Music 30A/L. (Current music majors frequently take 17-20 credits in this configuration of courses.)~~

Voice majors need to work closely with an adviser to schedule general education courses because of the added language requirements; a Summer Session may be necessary. It is recommended that voice majors take a language course each fall quarter during the first three years and that vocal repertory in that language be stressed throughout the academic year. For example, instead of enrolling in a general education course during the fall quarter of the first, sophomore, and junior years, a student concentrating in voice might enroll in Italian 1, German 1, and French 1, respectively.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in music is satisfied by completing courses ~~-101A-, 101B-, and 101C-, and 101D-~~.

Minors

Electronic Music

The electronic music minor focuses on the study of creating music using the tools of modern technology. It is designed to complement the music major or programs in other media by providing instruction in advanced skills of audio production, sound synthesis, and computer-assisted composition. A student may obtain a minor in electronic music by completing the following:

- any course in the 11 series;
- ~~course 13 (may be satisfied through the music core curriculum placement examination);~~
- ~~course 14 (or course 30A/L placement);~~
- Music 15
- courses 80C, 123, 124, 125, and two quarters of 167;
- one of the following: course 80L, 80M or 80R (or a similar music course that has a technical focus as approved by the department), or Film 171A or Theater Arts 114;
- one of the following: Physics 80A or 160; or Computer Science 5C, 5J, 5P, or 12A; or Electrical Engineering 70, 153, or 171

Jazz

The jazz minor focuses on the study of the history, theory, and performance of jazz. In addition, students may be introduced to musical styles that have had profound influences on this uniquely American art form: folk and popular musics of Africa, Europe, and the United States and Western classical music. The jazz minor is limited to students who have sufficient performance proficiency to pass auditions for entry into the jazz ensembles. The required courses for the minor in jazz are the following:

- course 11A;
- ~~course 14 (students not qualified to take course 14 must also take course 13 as a prerequisite);~~
- course 15
- course 75 and 175 or 150J;
- course 111B (students not qualified to take course 111B must also take course 11B);
- course 11C, 11D, 80J, or 80Q;
- ~~five~~ six quarters of ensembles, including at least three quarters of the jazz ensembles (courses 3 and/or 164). At least two quarters must be upper-division. Students who repeat course 174 for credit can use the second and subsequent quarters of course 174 to fulfill a portion of the ensemble requirement; used in this way, course 174 counts as a jazz ensemble;
- course 174 (may be repeated for credit).

Detailed information about the music majors and minors may be obtained from the Music Department office.

Honors

Honors in the major are conferred by vote of the music faculty. B.A. or B.M. students can be awarded honors for excellent work in individual areas, including course work, senior project (thesis or recital), or ~~Senior Exit Seminar (Music 197).~~ a capstone course 105Z or 120. Excellent work in any two of these areas normally results in honors in the major.

To be considered for highest honors in the major, B.A. students must complete a (non-required) senior project and B.M. students must complete the (non-required) ~~Senior Exit Seminar.~~ capstone course. Honors in all three areas—coursework, senior project, and ~~Senior Exit Seminar~~ —capstone course normally results in highest honors in the major.

Transfer Students

The Music Department ~~encourages~~ requires transfer students to take the core curriculum placement examination and seek academic counseling before transfer (a sample of the exam can be viewed at <http://music.ucsc.edu/undergrad/>). Transfer students who have some background in music theory normally test ~~either into course 14 or~~ into 30A/~~L~~ (which is only offered in the fall quarter). Students who require course 15 for music theory preparation should take this course in their first year ~~test into course 13 or 14 take one or both of these courses in their first year~~ to prepare for 30A/~~L~~ the following fall. Transfer students who have completed all of their general education requirements and who test into course 30A/~~L~~ upon transfer may be able to complete the music major in two years.

B.A. transfer students should note that upon completion of course ~~100A~~ 130, they need to perform on a musical instrument or voice at an upper-intermediate level. Prospective students wishing to have their performance skill level assessed by faculty in preparation for entry to the program are encouraged to send a tape for faculty review.

B.M. transfer students should prepare to audition in the fall quarter after enrollment. (For audition requirements, see the Requirements for the Bachelor of Music section above.) In certain cases, some or all of the applied music requirement may be waived based on prior coursework.

B.M. Sample Study Planner for Transfer Students Concentrating in an Instrument

Sample academic plans are found in the *Music Student Handbook*, available online at the Music Department web site: http://music.ucsc.edu/undergrad/handbook_ug_current.pdf.

This plan assumes that all general education requirements have been met. The music core curriculum placement examination generally places junior transfer students in Music 30A/L (which is only offered during fall quarter).

Students should check with the department office for the most up-to-date course schedules and program planning advice, since courses are not necessarily taught in the same quarters each academic year. ~~Numbers of quarter credits are in parentheses.~~

3rd (jr)	lessons (3)	lessons (3)	lessons (3)
	ensemble (2)	ensemble (2)	ensemble (2)
	MUSC-30A (5)	MUSC-30B (5)	MUSC-30C (5)
	MUSC-30L (2)	MUSC-30M (2)	MUSC-30N (2)
	MUSC-60 (2)*	MUSC-101A (5)	MUSC-101B (5)
4th (sr)	lessons (3)	lessons (3)	MUSC-106B (5)
	ensemble (2)	ensemble (2)	ensemble (2)
	MUSC-100A (5)	MUSC-100B (5)	MUSC-100C (5)
	MUSC-101C (5)	MUSC-101D (5)	MUSC-100A or B (5)
		elective (5)	

*Music 60 (*Group Instruction in Piano*) is not a course requirement for the major but should be taken if the student needs preparation for the keyboard proficiency examination. The course is geared to Music 30A/L. (Current music majors frequently take 17–20 credits in this configuration of courses.)

A transfer student concentrating in voice could enroll in Italian 1 and German 1 in the fall and winter quarters, respectively, of the junior year, and in French 1 in the spring quarter of the senior year. Such a transfer student would complete any desired electives prior to arrival at UCSC and/or in Summer Session. However, transfer students should try to satisfy as many of the language requirements as possible before entering the program.

Individual Instruction

Lessons in the instruments listed below are available on a fee basis and by audition with the instructor. Depending on whether a student is pursuing a particular music undergraduate degree program (B.A. or B.M.), or a music minor, concurrent enrollment in an appropriate ensemble is required for a stipulated number of quarters. Consult the Undergraduate *Music Student Handbook* for details.

Authorization from the performance instructor is a requirement for entry into the music majors. Students who demonstrate insufficient potential when auditioning for individual instruction may have limited access to lessons, and they may be denied entry into the major.

Courses 61, 62, and 161 carry partial course credit. Each quarter of enrollment in course 61 is equivalent to 2 credits; each quarter of enrollment in course 62 or 161 is equivalent to 3 credits. Course 162, open to advanced students only, carries 5 credits.

Class instruction for partial credit (courses 60 and 63) is available on some instruments but may not be used to fulfill the individual lesson requirements for the major.

Bass: ~~B. Green, S. Poplin~~

Bassoon: ~~E. Irvine~~

Cello: ~~V. Ruotolo~~

Clarinet: ~~M. Brandenburg~~

Class Piano: ~~E. Arulanantham~~

Flute: ~~G. Ellison Wolfson~~

Guitar, classical: ~~W. Coulter, M. Özgen~~

Harpsichord: ~~L. Burman Hall~~

Horn: ~~S. Vollmer~~

Oboe: ~~P. Mitchell~~

Percussion

~~± G. Marsh, W. Winant~~

Piano, classical

~~± M. J. Cope, M. Ezerova, A. Leikin~~

Saxophone

~~± P. Contos~~

Trombone and tuba: ~~W. Solomon~~

Trumpet: ~~R. Roper~~

Violin and viola: ~~R. Malan~~

Voice: ~~P. Maginnis, B. Staufenberg~~

Performance Groups

The participants in some groups are selected by auditions open to the entire university community. Students receive two course credits for each quarter of enrollment in any of the ensembles.

University Orchestra: ~~N. Paiement~~

University Concert Choir: ~~N. Berman~~

Women's Chorale: ~~Staff~~

Chamber Singers: ~~N. Paiement~~

University Opera Theater: ~~B. Staufenberg~~

Opera Workshop: ~~P. Maginnis, B. Staufenberg~~

Early Music Consort: ~~L. Burman Hall, L. Miller, N. Treadwell~~

Chamber Music: ~~Staff~~

Large Jazz Ensemble: ~~R. Klevan~~

Small Jazz Ensembles: ~~S. Poplin~~

Latin American Ensembles: ~~staff~~

Contemporary Music Ensemble: ~~A. Beal~~

West Javanese Gamelan: ~~U. Sumarna~~

Balinese Gamelan: ~~L. Burman Hall~~

Wind Ensemble: ~~R. Klevan~~

Classical Guitar Ensemble: ~~Mesut Özgen~~

North Indian Music Workshop: ~~D. Neuman, A. Khan~~

Eurasian Ensemble: ~~T. Merchant~~

Graduate Programs

Master of Arts

The master of arts (M.A.) degree program in music has emphases in composition, musicology/ethnomusicology, or performance practice, and integrates studies in performance, composition/analysis, and research. In consultation with a faculty adviser, the student pursues a two-year course of studies culminating in a final project that combines an original composition, written thesis, or essay with a related public performance or lecture recital.

Requirements

A minimum of 60 course credits completed at UCSC is required for the degree. All M.A. students are required to complete Music 200, 201, and 202, as well as 252 during each quarter in residence (for students entering the program fall 2007 and thereafter).

Students with an emphasis in composition also complete Music 219, 220, and one 203 course.

Students with an emphasis in musicology/ethnomusicology or performance practice also select three courses from Music 203A-H (course 206D meets the requirement for one 203 course). It is possible in some cases to substitute a course from the Music 253 or 254 series for one 203 course.

The final project for the degree includes both performing and scholarly components, which vary according to the degree emphasis.

Students with a composition emphasis submit a thesis composition together with an essay that addresses historical, technical, and/or interpretive issues of the music (course 299); and they complete a full-length recital (course 298) of their compositional work.

Students with a musicology/ethnomusicology emphasis complete a thesis (course 299) and a short performance or lecture-recital related to the thesis (course 298).

Students with a performance practice emphasis complete a full-length recital (course

298) and an accompanying short essay that addresses historical, technical, and/or interpretive aspects of the music performed in the recital. Students in this emphasis whose main area is conducting complete a full-length recital (course 298) and one of the following: a shorter lecture-recital, a short analytical or contextual essay on a different topic, or collaboration with a graduate student composer or faculty composer on a premiere public performance. Students are encouraged to create a program involving corollary studies such as computer studies, area cultural studies, linguistics, anthropology, theater arts, and visual arts.

Graduate students must take all core courses for a letter grade. These courses include the following: Music 200, 201, 202, 203A-H, 206A-D, 219, 220, 253A-D, and 254A-M. Independent study courses (Music 261, 265, 295, 297, 298, and 299) and the colloquium course (Music 252) may still be taken with the Satisfactory/Unsatisfactory grade option.

Current skill in reading and comprehension of a relevant foreign language must be demonstrated upon enrollment by attainment of level 3 on the UCSC language placement examination or, during the first year of enrollment, by satisfactory completion of level 3 of the language at UCSC, or by submission of an official transcript documenting successful completion of one year of university-level foreign language. With the approval of the primary adviser, students whose emphasis is algorithmic composition may complete three quarters/one year of university-level instruction in computer programming in lieu of fulfillment of the foreign-language requirement. Knowledge of languages not offered at UCSC must be demonstrated as determined by the Music Graduate Committee.

Prior to the start of classes each fall quarter, each incoming M.A. student is required to complete a three-hour diagnostic examination which is intended to identify areas in which supplementary coursework may be needed, in addition to the courses listed above.

Doctor of Musical Arts

The doctor of musical arts (D.M.A.) degree program in music composition has tracks in computer-assisted composition and world music composition. The track in computer-assisted composition includes algorithmic techniques for the generation of musical materials and structures to be realized in the creation of instrumental, vocal, and digitally synthesized music. The track in world music composition addresses a variety of compositional approaches influenced by indigenous world musics, with a focus upon those musics taught by faculty composers, ethnomusicologists, and applied instructors. The D.M.A. program seeks to develop accomplished, active, and articulate composers who have a broad awareness of the diverse styles, cultural influences, media, venues, and technical means available to them in the 21st century.

Requirements

For students entering with the bachelor's degree, a minimum of 102 credits in coursework at UCSC will be required. All students must be in residence for a minimum of nine quarters. Students must enroll in a minimum of 12 credits each quarter until they advance to candidacy. After advancing to candidacy, students remaining in residence must take a minimum of one five-credit course each quarter.

For students entering with a master's degree from another institution, a minimum of 72 credits in coursework at UCSC will be required. All students must be in residence for a minimum of six quarters. Students must enroll in a minimum of 12 credits each quarter until they advance to candidacy. After advancing to candidacy, students remaining in residence must take a minimum of one five-credit course each quarter. D.M.A. students are expected to complete the degree within a maximum of six calendar years (leaves of absence are **not** excluded from this count) from entrance to the program.

Required courses include Music 200, 201, and 202 (students entering with a master's

degree from another institution may petition to waive one or more of these courses by submitting documentation for equivalent courses completed elsewhere). Students in the computer-assisted composition track complete Music 206B, one 203 course, and two quarters of 267 or another 206 course. Students in the world music composition track complete Music 206A, 203H, and 203G or another 206 course. All students are required to complete Music 219, 220, 252 each quarter in residence, and five quarters of -enrollment in independent study, including Music 297, 298, and 299.

Graduate students must take all core courses for a letter grade. These courses include the following: Music 200, 201, 202, 203A-H, 206A-D, 219, 220, 253A-D, and 254A-M. Independent study courses (Music 261, 265, 295, 297, 298, and 299) and the colloquium course (Music 252) may still be taken with the Satisfactory/Unsatisfactory grade option.

Current skill in reading and comprehension of a relevant foreign language must be demonstrated upon enrollment by attainment of level 3 on the UCSC language placement examination or, during the first year of enrollment, by satisfactory completion of level 3 of the language at UCSC, or by submission of an official transcript documenting successful completion of one year of university-level foreign language. With the approval of the primary adviser, students whose emphasis is algorithmic composition may complete three quarters/one year of university-level instruction in computer programming in lieu of fulfillment of the foreign-language requirement. Knowledge of languages not offered at UCSC must be demonstrated as determined by the Music Graduate Committee.

Prior to the start of classes in fall quarter, each incoming D.M.A. student is required to complete a three-hour diagnostic examination which is intended to identify areas in which supplementary coursework may be needed, in addition to the courses listed above.

A D.M.A. student who entered the D.M.A. program with a bachelor's degree may apply for a M.A. degree, whether he/she is leaving the D.M.A. program or continuing toward completion of the D.M.A. degree, by fulfilling the following requirements:

- Completion of a minimum of five quarters at UCSC.
- Completion of a minimum of 35 graduate or upper-division course credits (including all courses required for the M.A. degree with an emphasis in composition).
- Successful completion of the qualifying recital (course 298).

Pre-qualifying Reviews

Before the end of the first year of study, all D.M.A. students must present a half recital of their compositions from that year, and submit the scores and recital recording as a portfolio, which faculty will use to assess the student's progress in the program. Faculty may also consider the student's performance in courses 200, 201, and/or 202. In unusual cases, when progress has been minimal, faculty reserve the right to terminate a student's enrollment in the program. Typically, the half recital is satisfied by a combination of 1) participation in a concert of graduate-student compositions sponsored each April by Porter College and the Music Department, and 2) participation in a public reading of graduate-student final projects from courses s 219 and -220. ~~at the end of spring quarter.~~

The Qualifying Recital

At the end of their second year of study, all students admitted to the D.M.A. program must present a half-recital (perhaps 35-40 minutes of music) representing their best work since entering the program. The D.M.A. qualifying recital will be evaluated by the student's primary adviser and by a second faculty member (generally a second composer) selected by the student in consultation with the primary adviser.

Dissertation Prospectus

The dissertation prospectus must be submitted **by the beginning of spring quarter one year 12 months** before the scheduled qualifying examination. The prospectus must include a proposal describing the scope and nature of the dissertation composition and the accompanying essay. In addition to defining the parameters of the dissertation itself, the dissertation prospectus will suggest to the student's qualifying examination committee those areas of study that should be emphasized in the student's qualifying examination.

Qualifying Examination

Advancement to candidacy is contingent upon the passing of a written examination and an oral examination normally administered at the end of year three for students entering with a bachelor's degree, and **the end of year two or the beginning of year three** for students entering with a master's degree from another institution. For the written portion of the examination, the qualifying examination committee provides questions on the three topics assigned as areas of emphasis. The oral examination is administered by the student's qualifying examination committee and may concern any aspect of the assigned topics with an emphasis on those issues addressed in the written portion of the examination. Advancement to candidacy will be granted after successful completion of the written and oral examinations, acceptance of the dissertation reading committee form, satisfactory completion of course work and the foreign language requirement, and the payment of the necessary fees.

Dissertation

D.M.A. students must complete a dissertation consisting of a substantial musical composition accompanied by an essay. One to two years of work beyond the qualifying examinations should be sufficient for the completion of the dissertation, except in cases where extended fieldwork is required.

Final Examination

The final examination will be a public oral defense of the dissertation. After an oral presentation by the candidate, the candidate will be questioned by the Dissertation Committee.

Doctor of Philosophy in Music

The doctor of philosophy (Ph.D.) degree in music has an emphasis in cross-cultural studies, and aims to provide doctoral students with an integrative framework for music scholarship, emphasizing **the ways in which** ~~how~~ musicology and ethnomusicology interact and complement one another.

In addition to cultural approaches to **musical style** ~~world musics~~, the ~~new~~ program also encourages the integration of scholarly research with musical performance, emphasizing **the manner in which** ~~how~~ performance serves both rhetorical and symbolic ends within various cultural settings. To this end the concept of "performance practice" plays a significant role in this program, given that the concept of historically or culturally informed performance is applicable to music from the earliest times to the present day in all geographical and cultural regions, and can encompass research activities as diverse as fieldwork, historical editing, and recording, as well as publishing of books and articles on the traditions of composition and performance.

Requirements

Students entering the Ph.D. program with a bachelor's degree are required to complete the following courses: Music 200, 201, 202, three courses from Music 253, three courses from Music 254, three courses from Music 203 (Music 206D or a 254 course may each substitute for one 203 course), Music 252 during each quarter of residence, and Music 299.

Students entering the Ph.D. program with a master's degree are required to complete following courses: three courses from Music 253 series, three courses from the Music 254 series, Music 252 during each quarter of residence, and Music 299.

All students in the Ph.D. program, whether or not they are entering the program with a master's degree, should plan to take at least two, and preferably three of the following courses in addition to the regular requirements: Music 201, Music 202, Music 203H, or Anthropology 208A. The decision about which of these courses to take should be made in consultation with the student's adviser and the chair of the Graduate Committee.

Graduate students must take all core courses for a letter grade. These courses include the following: Music 200, 201, 202, 203A-H, 206A-D, 219, 220, 253A-D, and 254A-M. Independent study courses (Music 261, 265, 295, 297, 298, and 299) and the colloquium course (Music 252) may still be taken with the Satisfactory/Unsatisfactory grade option.

Students entering the Ph.D. program are expected to have reading knowledge of a foreign language equivalent to at least one year of course work. In addition, students must acquire reading knowledge, equivalent to one year of coursework, of a second foreign language relevant to their area of interest during their first year of enrollment, or to demonstrate equivalent knowledge as determined by the Music Graduate Committee.

Prior to the start of classes in fall quarter, each incoming Ph.D. student is required to complete a three-hour diagnostic examination ~~that which~~ is intended to identify areas in which supplementary course work may be needed. ~~in addition to the courses listed above.~~

Ph.D. students entering the program with a bachelor's degree are required to submit a research paper by the beginning of the fourth quarter in residence, which will be revised that quarter under the supervision of the student's faculty adviser, and will be evaluated at the end of the quarter by the adviser and an additional faculty member. Students whose paper is assessed as unsatisfactory will not be allowed to continue in the Ph.D. program.

Students may devise a program of study that includes additional music courses, and courses from other disciplines suited to their special areas of concentration, in addition to the required courses.

Students who entered the Ph.D. program with a bachelor's degree may apply for the M.A. degree after completion of a minimum of five quarters in residence, the fourth-quarter research paper, and the following courses: 200, 201, 202, one course from 203A-H, and one course each from the 253 and 254 seminar series, and course 297.

Pre-qualifying reviews

At the end of the first year of study, all students accepted into the Ph.D. program will submit a brief report on work completed during that year. This report will inform a consideration by the music faculty of the student's status in the graduate program. Faculty will offer comments and suggestions to be communicated to the student either directly or through the student's adviser. However, if progress is minimal, faculty reserve the right to terminate a student's enrollment in the program.

Qualifying Examinations

Advancement to candidacy is contingent upon passing both written and oral examinations. The written qualifying examination will test knowledge absorbed through the two years of coursework as well as material in the student's field of concentration. The oral examination will focus on the previously completed written exams well as the student's developed expertise in her/his chosen specialization. Students must be registered in the quarter in which they take their qualifying examination.

The examinations will normally be administered in year ~~4~~ ~~four~~ for students entering with a bachelor's degree, and in year ~~3~~ ~~three~~ for students entering with a master's degree.

Advancement to candidacy will be granted after successful completion of the written and oral examinations, acceptance of the dissertation reading committee form, satisfactory completion of coursework and the foreign-language requirement, and the payment of the necessary fees.

Dissertation

To satisfy requirements for the degree, a student must complete a dissertation and present a related formal lecture or lecture-recital. The student will develop a dissertation prospectus, which will be due six months after advancement to candidacy. Guidelines for the format and content of the prospectus can be found in the Ph.D. in Music Handbook.

The dissertation must embody substantial and original scholarly work based on a clearly distinguishable contemporary or historical music-cultural tradition, in any music-culture(s) of the world in which the UCSC program offers expertise. The public lecture or performance must demonstrate the student's grasp of the pertinent music-cultural performance tradition or music-cultural and/or music-historical concepts.

Final Examination

The final examination will be an oral defense of the dissertation open to the university faculty. Successful completion of this examination will be determined by a majority vote of the dissertation reading committee.

Additional information about the program, including application and admission, is available from the Division of Graduate Studies and on the department web site: <http://music.ucsc.edu/>.

Faculty and Professional Interests

Professor

AMY C. BEAL

American music, 20th-century music, experimental and improvisatory performance practices, postwar and Cold War culture, German new music festivals and radio stations, piano performance, contemporary music ensemble

LINDA C. BURMAN-HALL

Baroque music and performance practices; historic and new keyboard repertoire (harpsichord, organ, and fortepiano); Indonesian music cultures; ethnomusicology, biomusic

DAVID H. COPE, EMERITUS

SHERWOOD DUDLEY, EMERITUS

KARLTON E. HESTER

Premeditated, electroacoustic, and spontaneous composition; flutes, saxophones, and interdisciplinary performance; improvisational and Afrocentric music theory, analysis and history. Artistic Director, Global African Music and Arts Festival/Symposium; UCSC/ISIM International Improvisation Festival/Conference.

EDWARD F. HOUGHTON, EMERITUS

DAVID EVAN JONES

Instrumental and computer-assisted composition, electro-acoustic music, world music composition, chamber opera, language and music, timbre and orchestration

HI KYUNG KIM

Composition, theory, contemporary music, analysis, orchestration, Korean music, world music composition, Founder and Artistic Director, Pacific Rim Music Festival

ANATOLE LEIKIN

Classical and romantic music history, theory, and performance practices, piano and fortepiano, Russian music

FREDRIC LIEBERMAN

Ethnomusicology; composition; the music industry and legal/ethical issues; American vernacular musics; musics of east, Southeast, and south Asia; organology

LETA E. MILLER

Twentieth-century American music in the United States, 16th-century chanson and madrigal, music and science in the baroque period; C.P.E. Bach, Lou Harrison, music in San Francisco, modern and baroque flute

GORDON MUMMA, EMERITUS

PAUL NAUERT

Theory, composition; rhythm and meter; music cognition; mathematical and computer models of the compositional process

NICOLE A. PAIEMENT

Conducting; world premiere performance and recordings; contemporary chamber opera; interdisciplinary art; Founder and Artistic Director, Ensemble Parallèle

JOHN M. SCHECHTER, EMERITUS

Associate Professor

BENJAMIN L. CARSON

Theory and composition, music perception, empiricism and subjectivity, Schoenberg, popular

music, improvisation

NINA TREADWELL

Renaissance through early baroque music history and performance practices, early plucked-string instruments (theorbo, renaissance, and baroque guitar; renaissance lute), 16th- and 17th-century Italian theatrical music, gender studies, women and music, literary and critical theory

Assistant Professor

TANYA H. MERCHANT

Ethnomusicology, musics of Central Asia and the former Soviet Union, music and gender, identity, nationalism, globalization, and the institutionalization of music

DARD NEUMAN, KAMIL AND TALAT HASAN ENDOWED CHAIR IN CLASSICAL INDIAN MUSIC

Ethnomusicology; Hindustani music; colonialism, nationalism, technology and performance; sitar

Lecturer

NATHANIEL A. BERMAN

Concert choir

BILL KALINKOS

Clarinet

PAUL D. CONTOS

Saxophone

MARY JANE COPE

Piano, fortepiano

WILLIAM D. COULTER

Classical guitar

GREER ELLISON

Flute, baroque and classical flutes

PETER Q. ELSEA

Electronic music and music technology

MARIA V. EZEROVA

Piano

BARRY L. GREEN

String bass

THOMAS HORNING

Trombone

ERIN IRVINE

Bassoon

ROBERT KLEVAN

Wind ensemble, large jazz ensemble

PATRICE L. MAGINNIS

Voice

ROY T. MALAN

Violin, viola

GEORGE E. MARSH

Drumset, improvisation, rhythm theory, Inner Drumming, game theory, polyrhythms, Deep listening

PATRICIA L. MITCHELL

Oboe

MESUT ÖZGEN

Classical guitar, classical guitar ensemble

STAN E. POPLIN

String bass, jazz ensembles

RICHARD ROPER

Trumpet

VANESSA RUOTOLO

Cello

BRIAN J. STAUFENBIEL
Voice, university opera theater

UNDANG SUMARNA
West Javanese gamelan

AVI TCHAMNI
Theory, ethnomusicology

SUSAN C. VOLLMER
Horn

WILLIAM K. WINANT
Orchestral percussion, percussion ensemble

THE STAFF
Latin American ensembles

DISTINGUISHED ADJUNCT PROFESSOR
ALI AKBAR KHAN (DECEASED)
North Indian classical music

VISITING PROFESSOR
AASHISH KHAN
North Indian classical musicg

[Program Description](#) | [Faculty](#) | [Course Descriptions](#)

Lower-Division Courses**1A. Women's Chorale (2 credits). ***

Study of vocal and choral techniques in the context of ensemble rehearsals, often culminating in public performance. Repertoire to include varied works for treble choir, both a cappella and with instrumental accompaniment. Familiarity with basic music notation recommended. Some additional rehearsal time, both individually and with the group is required. Students are billed a materials fee. Admission by audition with conductor prior to first class meeting. See enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. (General Education Code(s): A.) *N. Paiement*

1C. University Concert Choir (2 credits). F,W,S

A study of selected works for mixed chorus, with emphasis on masterworks for chorus and orchestra, culminating in one or more public concerts. Familiarity with basic music notation recommended. Admission by audition with conductor prior to first class meeting. See enrollment conditions section of the quarterly *Schedule of Classes*. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): PR-E, A.) *The Staff*

2. University Orchestra (2 credits). F,W,S

A study of selected works for orchestra, culminating in one or more public concerts. Admission by audition with conductor prior to first class meeting. See enrollment conditions section of the quarterly *Schedule of Classes*. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): PR-E, A.) *N. Paiement*

3. Large Jazz Ensemble (2 credits). F,W,S

Instruction in performance in large jazz ensembles with written arrangements. Prepares a specific repertoire for public performance. Admission by audition with instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Students are billed a materials fee. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): A.) *R. Klevan*

4A. Latin American Ensemble: "Voces" (2 credits). *

Instruction in diverse musical traditions, and their culturally-grounded performance contexts, of Native American, Ibero-American, and African American music cultures of Latin America, including textured music in Spanish and Quechua or other regional languages. The class forms an ensemble that prepares varying cultural and national repertoires for public performance. Some Spanish language ability is recommended. Attend first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): A.) *The Staff*

4B. Latin American Ensemble: "Taki Ñan" (2 credits). *

Development of Latin American, Native American, Ibero-American, African American, and/or *Nueva Canción* (New Song) repertoire in a small ensemble setting. Three quarters of course 4A or previous enrollment in course 4B required prior to enrolling in this course. Admission by audition with instructor at first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Enrollment limited to 10. May be repeated for credit. (General Education Code(s): A.) *The Staff*

5A. West Javanese Gamelan Ensemble: Beginning (2 credits). F,W,S

Instruction in practice and performance of gamelan music from Java or Sunda. Preparation of several works for public presentation. Attend first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. (General Education Code(s): A.) *U. Sumarna*

5B. West Javanese Gamelan Ensemble: Intermediate (2 credits). F,W,S

Instruction in practice and performance of gamelan music from Java or Sunda. Preparation of several works for public presentation. Attend first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. (General Education Code(s): A.) *U. Sumarna*

5C. West Javanese Gamelan Ensemble: Advanced (2 credits). F,W,S

Instruction in practice and performance of gamelan music from Java or Sunda. Preparation of

several works for public presentation. Attend first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. (General Education Code(s): A.) *U. Sumarna*

6. Classical Guitar Ensemble (2 credits). F

Study of selected repertoire and instruction in performance for classical guitar ensemble. Ensembles for guitar and other instruments will prepare works for public performances both on and off campus. All students enrolled in individual guitar lessons are expected to enroll. Students of other instruments or voice may also audition. Some additional rehearsal time, individually and with the group, is required. Admission by audition with instructor prior to first class meeting. May be repeated for credit. (General Education Code(s): A.) *M. Ozgen*

8. Balinese Gamelan Ensemble (2 credits). F,W,S

Instruction in practice and performance of gamelan music from Bali and Indonesia, including ritual and new music. Preparation of several works for public presentation. Attend first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Prerequisite(s): course 5A or 5B or 5C or 8, or by permission of instructor at first class meeting. May be repeated for credit. (General Education Code(s): A.) *L. Burman-Hall*

9. Wind Ensemble (2 credits). F,W,S

A study of selected advanced-level works for wind ensemble, culminating in one or more public concerts. Admission by audition with conductor prior to first class meeting. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): PR-C, A.) *R. Klevan*

10. Eurasian Ensemble (2 credits). W,S

Performing ensemble focusing on the vernacular and art musics of the Eurasian continent, with emphasis on Central Asia. Admission by instructor determination at first class meeting. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): PR-C, A.) *T. Merchant*

11A. Classical Music from the Middle Ages to the Present. F

A study of selected masterworks in relation to the historical periods which they represent. Emphasis upon the listening experience and awareness of musical style and structure. Illustrated lectures and directed listening. (Formerly Introduction to Western Art Music.) (General Education Code(s): IM, IH, A.) *A. Leikin, N. Treadwell, L. Miller*

11B. Introduction to Jazz. F

Designed to provide students with thorough and comprehensive background in history and roots of jazz as a musical style from its African roots to the present. Essential jazz styles and traditions are discussed through lectures, required listening, readings, lecture demonstrations, and film presentations. (General Education Code(s): IH, A, E.) *K. Hester*

11C. Introduction to American Popular Music. *

Survey of American popular music, from the beginnings of mass media to the late-twentieth century and beyond. Areas of focus will include early African-American styles (the blues, gospel and ragtime), vaudeville songs, a variety of immigrant traditions and folk movements, rock and roll, soul, R & B, hip-hop, and others. Musical experience helpful but not required. (General Education Code(s): IH, A.) *B. Carson*

11D. Introduction to World Music. *

Covers topics reflecting distinctive features of selected world music cultures. Introduces content, scope, and method of ethnomusicology. Focuses on understanding the musical styles, performance practices, and cultural functions of these musical traditions. Incorporates live class performance of selected music. (General Education Code(s): CC, IH, A, E.) *T. Merchant*

15. Preparatory Musicianship. S

Basic studies in musicianship related to Western European notation and literature. Students with prior training in music notation develop literacy in basic tonal melody and harmony. Skills include dictation and sight-reading. Simple composition and analysis exercises accompany the training. Enrollment by placement examination and permission of instructor. May be repeated for credit. *B. Carson, H. Kim, L. Burman-Hall*

30A. Theory, Literature, and Musicianship. F

Integrated musicianship, theory, and analysis. Species counterpoint and fundamentals of tonal harmony. Analysis of literature from the Middle Ages and Renaissance. Ear-training, taught in smaller sections, emphasizes recognition of triad and dominant-seventh inversions, dictation of diatonic melodies, and aural analysis of simple diatonic interval and chord progressions. Most of the ear-training materials consist of homophonic and polyphonic examples from music literature performed live in class. Prerequisite: admission by core curriculum placement examination. (Formerly Theory, Literature, and Musicianship I.) Enrollment limited to 60. *The Staff*

30B. Theory, Literature, and Musicianship. W

Integrated musicianship, theory, and analysis. Diatonic harmony and fundamentals of chromatic harmony and musical form, with an emphasis on early 18th-century styles. Ear-training, taught in smaller sections, emphasizes recognition of triad and seventh-chord qualities and inversions, dictation of moderately complex melodies and multi-voice chorales, and aural analysis of chord progressions including secondary functions. Most of the ear-training materials consist of homophonic and polyphonic examples from music literature performed live in class. Prerequisite(s): course 30A; instructor determination at first class meeting. (Formerly Theory, Literature, and Musicianship I.) Enrollment limited to 60. *The Staff*

30C. Theory, Literature, and Musicianship. S

Integrated musicianship, theory, and analysis. Chromatic harmony and large forms, with emphasis on late 18th- and early 19th-century styles. Ear-training, taught in smaller sections, emphasizes melodic and multi-voice dictation, as well as aural analysis of chord progressions, with materials including digressions, modulations, and advanced chromatic idioms. Most of the ear-training materials consist of homophonic and polyphonic examples from music literature performed live in class. Prerequisite(s): course 30B; instructor determination at first class meeting. (Formerly Theory, Literature, and Musicianship I.) Enrollment limited to 60. *The Staff*

42. Student-Directed Seminar. *

Seminars taught by upper-division students under faculty supervision. (See course 192.) Students submit petition to sponsoring agency. *The Staff*

51. Vocal Repertoire Class (2 credits). F,W,S

The study and performance of vocal repertoire from 1400 to the present, including solo song, oratorio, opera, ensemble music. Emphasis is given to the development of effective performance skills, culminating in public performance. Attend first class meeting; concurrent enrollment in individual voice lessons with instructor of this course is required. See the enrollment conditions section of the quarterly *Schedule of Classes*. Enrollment limited to 20. May be repeated for credit. (General Education Code(s): A.) *P. Maginnis, B. Staufenbiel*

54. North Indian Music Workshop (2 credits). S

A course covering the music of North India taught using the oral traditions of Indian music. For beginners as well as more experienced students, this course is well suited for instrumentalists and vocalists. Interview; instructor determination at first class meeting. May be repeated for credit. (General Education Code(s): A.) *A. Khan*

61. Individual Lessons: Half Hour (2 credits). F,W,S

One-half hour of individual instrumental or vocal instruction. Repertory, technique, and performance practice. A minimum of six hours per week of individual practice is required. Concurrent enrollment in an ensemble in the lesson instrument or voice is required. Students are billed a course fee. Admission by audition with the instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Enrollment priority given to music majors and minors. May be repeated for credit. *The Staff*

62. Individual Lessons: One Hour (3 credits). F,W,S

One hour of individual instrumental or vocal instruction. Repertory, technique, and performance practice. A minimum of nine hours per week of individual practice is required. Concurrent enrollment in an ensemble in the lesson instrument or voice is required. Students are billed a course fee. Admission by audition with the instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Enrollment priority given to music majors and minors. May be repeated for credit. *The Staff*

63. Group Instrumental and Vocal Lessons (2 credits). *

Elementary group instruction in instrumental (excluding piano) or vocal techniques, including group and individual performance experience. A minimum of six hours per week of individual practice is required. Students are billed a course fee. Admission by audition with the instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Enrollment limited to 6. May be repeated for credit. *The Staff*

75. Beginning Improvisational Theory. *

Studies in the modes, scales, chord alternations and extensions, chord voicings, chord progressions, and forms that underlie jazz improvisation, composition, and arranging in a variety of styles. (Formerly *Jazz Theory I.*) Enrollment limited to 30. May be repeated for credit. (General Education Code(s): A.) *The Staff*

80A. Music of the Silk Road. S

Exploration of the commonalities between music cultures found along ancient trade routes through Asia. (General Education Code(s): CC, T4-Humanities and Arts, A, E.) *T. Merchant*

80C. History, Literature, and Technology of Electronic Music. F

This survey of electronic music from previous centuries to the present studies the works and aesthetics of important composers, acoustics, musical perception, the effects of technological innovation on cultural evolution, and the development of synthesizers and computer music. (General Education Code(s): T6-Natural Sciences or Humanities and Arts, A.) *The Staff*

80E. Race and American Music. *

Survey of American music and its dynamic formation through cultural constructions of racial difference. Students hear music as contentious signals of identity, power, and transgressions, contextualized by wide-ranging testimony on racial difference, ethnicity, gender, sexuality, and musical practice. (General Education Code(s): ER.) *B. Carson*

80F. Music in Latin American Culture: Regional Traditions. *

In-depth study of select music cultures of Mexico, Central America, and Caribbean, Brazil, Chile, Argentina, Colombia, and Peru. Characteristic regional genres, ensembles, instruments, and music rituals. Case studies by ethnomusicologists with expertise in specific regional musics. Also Latin American Nueva Canción, women's musics, and overarching themes in Latin American music, as a whole. Offered on a rotational basis with other non-Western courses in the 80 series. (General

Education Code(s): T4-Humanities and Arts, A, E.) *The Staff*

80G. American Musical Theater. *

Surveys American musicals from operetta through rock musicals with a historical approach focusing on selected examples from the literature. Music reading or musical experience helpful but not required. Offered in alternate academic years. (General Education Code(s): T4-Humanities and Arts, A.) *F. Lieberman*

80H. The Hollywood Musical. W

Introductory study of the Hollywood music film, exploring the theory of film sound, the musical genre, and representative works from the 1920s to the present. Students expected to view about two films each week, read assigned section of texts, and contribute to class discussions. (General Education Code(s): T4-Humanities and Arts, A.) *F. Lieberman*

80I. Music of Modern Israel. W

Historical, musicological, and anthropological study of the many (and often conflicting) worlds brought together by Israeli popular and art music: Jewish and Arabic traditions, Western ideals, and modern beats. Enrollment limited to 40. (General Education Code(s): CC, T4-Humanities and Arts, A, E.) *A. Tchamni*

80J. American Folk Music. *

Surveys American folk music, both instrumental and vocal, by region and period. Approach is primarily through listening. Previous musical experience helpful, but not required. Offered in alternate academic years. (General Education Code(s): T4-Humanities and Arts, A.) *F. Lieberman*

80L. Artificial Intelligence and Music. F

An introduction to basic concepts in music and artificial intelligence, and to algorithmic composition (composition by a set of explicit instructions, often using the computer). Other topics include basic introductions to related concepts in linguistics, mathematics, neural nets, pattern matching, genetic algorithms, fuzzy logic, and interactive systems. Previous experience in one or more of these topics is helpful but not required. Students produce a project based on one of the models presented in class. Offered in alternate academic years. (General Education Code(s): T6-Natural Sciences or Humanities and Arts, A.) *The Staff*

80M. Film Music. S

A survey of film music including a discussion of current trends and film composers. Techniques and styles of film music are explored through lectures, required listenings, readings, and viewing of relevant films. A musical background, including the ability to read music, is helpful but not necessary. Offered in alternate academic years. (General Education Code(s): T4-Humanities and Arts, A.) *N. Treadwell, D. Cope*

80N. Music of the Grateful Dead. S

In-depth exploration of the music of the Grateful Dead. Contextual study of the sociology and history of the late 1960s psychedelic movement supplies background for study of the music as the band evolved through time. Offered in alternate academic years. (General Education Code(s): IM, T4-Humanities and Arts, A.) *F. Lieberman*

80O. Music, Politics, and Protest. S

Examination of relationship between music, politics, and protest in the U.S. in the 20th century, with focus on how music commented upon and reflected different eras in American cultural and political life. (General Education Code(s): T4-Humanities and Arts, A.) *D. Neuman*

80P. History of Jewish Music. *

Survey of the diverse and rich musical traditions of Jewish music in the diaspora from biblical times to the present. Examines the historical, social, and anthropological aspects of the different communities from sacred music through art and popular songs. Enrollment limited to 40. (General Education Code(s): CC, T4-Humanities and Arts, A, E.) *A. Tchamni*

80Q. A Survey of African Music. S

Traces the various stylistic musical areas throughout the African continent and explores the development of traditional African music from antiquity into the 20th century. Offered in alternate academic years. (General Education Code(s): T4-Humanities and Arts, A, E.) *K. Hester*

80R. Music and the World Wide Web. *

A survey of musical applications of the World Wide Web and the technologies they employ: tools for musical research, playback, composition, performance, and publishing. Historical perspectives and artistic ethics also discussed. Students prepare a creative project using software tools, techniques, sound sources available on the web, and learn how to publish the results on the web. Enrollment limited to 44. Offered in alternate academic years. (General Education Code(s): T6-Natural Sciences or Humanities and Arts, A.) *The Staff*

80S. Women in Music. *

An exploration of the sociological position of women as composers and performers in Western and non-Western musics, with a focus on both ethnographic and historical sources. (Also offered as Feminist Studies 80S. Students cannot receive credit for both courses.) Offered in alternate academic years. (General Education Code(s): CC, T4-Humanities and Arts, A.) *T. Merchant*

80V. The Music of the Beatles. *

The most significant group in the history of popular music, the Beatles spanned the gamut of styles

from hard-edged R & B to sophisticated art-rock. This course explores their work in detail, in its own terms, and in the historical/cultural/technological contexts. Students cannot receive credit for both this course and course 180V in the same quarter. Course 11C is recommended but not required as preparation. (General Education Code(s): T4-Humanities and Arts, A.) *F. Lieberman*

80W. Music Business. F

Explores the many facets of the music industry: history, technology, economics, sociology, and legislation. Provides both a broad understanding of the industry and a pragmatic survey of available career paths. Students cannot receive credit for both this course and course 180W in the same quarter. Offered in alternate academic years. (General Education Code(s): T4-Humanities and Arts, A.) *F. Lieberman*

80X. Music of India. W

A survey course in Hindustani (North Indian) and Karnatak (South Indian) music covering the Raga (modal system) and Tala (metric system) as they have developed in the two traditions. Consideration is given to the historical development of the music, from Vedic chanting to the modern Raga system; social functions of the music throughout history; and instrumental and vocal forms with an emphasis on listening. (General Education Code(s): T4-Humanities and Arts, A, E.) *D. Neuman*

94. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Admission requires approval of department. *The Staff*

99. Tutorial. F,W,S

A program of directed study arranged with a department faculty member. Students submit petition to sponsoring agency. *The Staff*

99F. Tutorial (2 credits). F,W,S

A program of directed study arranged with a department faculty member. Class time is proportionally less than a five-credit course. Students submit petition to sponsoring agency. *The Staff*

Upper-Division Courses

101A. History of Western Art Music. W

First quarter of a three-quarter chronological study of Western art music. Coordinated lectures, readings, listening, and analysis of representative works: Medieval, Renaissance, Baroque. Prerequisite(s): course 30A and satisfaction of the Entry Level Writing and Composition requirements. *L. Miller*

101B. History of Western Art Music. S

Second quarter of a three-quarter chronological study of Western art music. Coordinated lectures, readings, listening, and analysis of representative works: Baroque, Classical, Romantic. Prerequisite(s): course 30B. *N. Treadwell, A. Leikin*

101C. History of Western Art Music. F

Third quarter of a three-quarter chronological study of Western art music. Coordinated lectures, readings, listening, and analysis of representative works: Romantic, 20th Century. Prerequisite(s): course 30C and satisfaction of the Entry Level Writing and Composition requirements. *A. Beal*

102. University Orchestra (2 credits). F,W,S

A study of selected works for orchestra, culminating in one or more public concerts. Admission by audition with conductor prior to first class meeting; see the enrollment conditions section of the quarterly *Schedule of Classes*. Students are billed a materials fee. Enrollment restricted to juniors and seniors. May be repeated for credit. (General Education Code(s): A.) *Y. Samet, N. Palement*

103. University Concert Choir (2 credits). F,W,S

A study of selected works for orchestra, culminating in one or more public concerts. Prerequisite(s): admission by audition with conductor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): A.) *N. Berman*

105. Special Topics in History.

105I. Improvisation and Collaborative Practices in the 20th Century. W

Study of music repertoires and performance practices based on improvisation and collaborative approaches to real-time composition in the areas of jazz and other new music. Prerequisite(s): courses 30A, 30B, and 30C, and at least one course from the 101 series. Enrollment restricted to music majors. Enrollment limited to 40. *A. Beal, K. Hester*

105Q. The String Quartet from Haydn to Shostakovich. S

Traces the development of the string quartet from its origins in the mid-18th Century through the works of the mid-late 20th Century. Emphasis is on listening and analysis with significant research and writing component. Prerequisite(s): course 30C and course 101B, or by permission of instructor. Enrollment limited to 35. *L. Miller*

111B. Seminar in Jazz Analysis. F

Analytic exploration of the evolution of "jazz" in America. The process involves independent listening, analysis, transcription, weekly seminar discussions, and oral presentation to students in course 11B. Prerequisite(s): course 30B and course 11B. Enrollment limited to 20. *K. Hester*

120. Seminar in Music Composition. W

Instruction in individual composition offered in the context of a group; composition in traditional large and small forms. Counts as one of two choices for a capstone course. Prerequisite(s): course 30C. Enrollment limited to 20. *H. Kim*

121. Orchestration. F

A study of the nature of each instrument of the orchestra. Scoring for various small instrumental combinations, culminating in a transcription for full orchestra. (Formerly course 130.) Prerequisite(s): course 30C. Enrollment limited to 20. *H. Kim*

123. Electronic Sound Synthesis. W

Introduction to electronic music studio techniques, relevant electroacoustical studies, and procedures of electronic music composition. Practical experience in the UCSC electronic music studio with an analog synthesizer; mixing, equalization, multitrack recording equipment, and other sound processing. Application form available at department office during last two weeks of the previous quarter. Preference given to music majors, students in the film/video major, and those with substantial musical experience. Prerequisite(s): instructor determination via application; course 80C or course 30A placement. Enrollment limited to 25. *P. Elsea, D. Jones*

124. Intermediate Electronic Sound Synthesis. S

Composition with the use of small computers in the electronic music studio. Techniques covered include hybrid synthesis, digital synthesis, and MIDI-controlled systems. No programming is involved, but basic computer literacy is helpful. Prerequisite(s): course 123. Enrollment limited to 25. *P. Elsea, P. Nauert*

125. Advanced Electronic Sound Synthesis. F

Continuing study in the electronic music studio, with concentration on compositional development. Includes advanced applications of skills developed in courses 123 and 124, expansion of background knowledge and relevant electroacoustical studies. Prerequisite(s): course 124. Enrollment limited to 25. *P. Elsea*

130. Theory, Literature, and Musicianship II. F

Tonal counterpoint and advanced tonal analysis. Techniques of 18th-century counterpoint and compositional practice. Advanced concepts in harmony, form, and the structure of melody in tonal music. (Formerly course 100A.) Prerequisite(s): courses 30C and 30N and Piano Proficiency Exam. Enrollment limited to 20. (General Education Code(s): MF.) *J. Sackett, B. Carson*

150. Special Topics in Theory.**150P. Special Topics in Music Theory: 20th-Century Popular Song. W**

Analysis and composition in two 20th-century popular song genres. Part one (of two) is drawn from 1930s swing or Tin-Pan-Alley standards. Part two varies according to instructor and may include genres outside the United States. Prerequisite(s): course 30C or permission of instructor. Enrollment restricted to music majors. (General Education Code(s): IM.) *B. Carson*

150X. Theoretical Practices of American Music. W

Examines theoretical practices and compositional methods of 20th-Century American composers including Charles Ives, Henry Cowell, Ruth Crawford, Johanna Beyer, Harry Patch, Conlon Nancarrow, John Cage, James Tenney, Kenneth Gaburo, George Russell, and Ornette Coleman. Prerequisite(s): courses 30A, 30B, and 30C. Enrollment restricted to music majors. Enrollment limited to 25. (General Education Code(s): IM.) *A. Beal, D. Jones*

159A. Opera Workshop (2 credits). F

A workshop for singers, accompanists, and directors, the course develops a wide variety of skills related to opera through scenework. Attention will be given to movement, acting, coaching, and operatic stage-directing technique. Instruction culminates in studio productions of scenes from operas and musicals. Admission by permission of vocal instructor, or by audition with instructor prior to first class meeting. Students are billed a materials fee. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): A.) *B. Staufenbiel*

159B. Opera Workshop (3 credits). W

A workshop for singers, accompanists, and directors, the course develops a wide variety of skills related to opera through scenework. Attention will be given to movement, acting, coaching, and operatic stage-directing technique. Instruction culminates in studio productions of scenes from operas and musicals. Admission by permission of vocal instructor, or by audition with instructor prior to first class meeting. Students are billed a materials fee. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): A.) *B. Staufenbiel*

160. University Opera Theater. S

A production workshop, culminating in one or more staged performances of an entire opera or selected scenes from the operatic repertory. Admission by audition with instructor prior to first class meeting; auditions usually take place in fall quarter. See the enrollment conditions section of

the quarterly *Schedule of Classes*. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): A.) *B. Staufenbiel*

161. Individual Lessons: One Hour (3 credits). F,W,S

One hour of individual instrumental or vocal instruction. Repertory, technique, and performance practice. A minimum of nine hours per week of individual practice is required. Concurrent enrollment in an ensemble in the lesson instrument or voice is required. Students are billed a course fee. Admission by audition with the instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Enrollment priority given to music majors and minors. May be repeated for credit. *The Staff*

162. Advanced Individual Lessons: One Hour. F,W,S

One hour of individual instruction for advanced students. Study of repertory, technique, and performance practice. A minimum of 18 hours per week of individual practice and at least one 30-minute recital are required. May be taken three times for credit. Concurrent enrollment in an ensemble in the lesson instrument or voice is required. Students are billed a course fee. Admission by audition. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. *The Staff*

163. Early Music Consort (2 credits). W,S

A study of selected works for varied early music instrumental and vocal resources, culminating in one or more public concerts. Individual lessons are recommended in conjunction with consort work. Recommended for students who have instrumental or vocal competence and music literacy. Admission by audition with instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. (General Education Code(s): PR-C.) *N. Treadwell, L. Burman-Hall*

164. Jazz Ensembles (2 credits). F,W,S

Instruction in combo performance and techniques of the jazz idiom. The class forms several ensembles that prepare a specific repertory for public performance. Admission by audition with instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. *S. Poplin*

165. Chamber Music Workshop (2 credits). F,W,S

A study of selected works for various small combinations of instruments, culminating in one or more public concerts. Admission by audition with instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. *The Staff*

166. Chamber Singers (2 credits). F,S

The study of selected works for small vocal ensemble from the 15th through 20th centuries, with performances on and off campus throughout the academic year. Students must have demonstrated vocal and music reading skills. Admission by audition with instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): PR-C, A.) *N. Paiement*

167. Workshop in Electronic Music (2 credits). F,W,S

Continuing studio work in electronic music. Students carry out individual projects, meeting in weekly seminar to share problems and discoveries. Relevant advanced topics are covered, including new developments in the art. Prerequisite(s): course 124. Enrollment limited to 20. May be repeated for credit. *P. Elsea*

168. Contemporary Music Ensemble (2 credits). W,S

A study of selected works for various small combinations of instruments and voice, culminating in one or more public concerts. Admission by audition with instructor prior to first class meeting. See the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. *A. Beal, L. Miller*

174. Intermediate Jazz Improvisation. W

Develops basic skills through a range of advanced bop, quasi-modal and post-bop styles—including selected free jazz and "avant-garde" repertoire. Prerequisite(s): course 75; audition with instructor at first class meeting. Enrollment limited to 20. May be repeated for credit. *K. Hester*

175. Jazz Theory II. *

Through transcription, analysis, and performance of "jazz" standards, composition, arranging, improvisation, and spontaneous creation explored. Students write a series of improvisations, short compositions, and arrangements throughout the course. Prerequisite(s): course 75. Enrollment limited to 30. *M. Low, K. Hester*

180A. Studies in World Musics: Asia and the Pacific. W

In-depth ethnomusicological studies of selected music cultures of East Asia, Southeast Asia, and the Pacific. Emphasizes comparison of historical, theoretical, contextual, and cultural features. Includes basic ethnomusicological points of reference, as regards organology, music ritual, notation and transcription, and aspects of field research. Prerequisite(s): course 30B. Concurrent enrollment in a non-Western performing ensemble is strongly recommended. Enrollment restricted to music majors and graduate students. Anthropology majors may enroll with permission of instructor. Enrollment limited to 30. (General Education Code(s): A, E.) *T. Merchant, D. Neuman*

180B. Studies in World Musics: Africa and the Americas. *

In-depth ethnomusicological studies of selected music cultures of sub-Saharan Africa and South and North America, including Native America. Emphasizes comparison of historical, theoretical, contextual, and cultural features. Includes basic ethnomusicological points of reference, as regards organology, music ritual, notation and transcription, and aspects of field research. Prerequisite(s): course 30B; concurrent enrollment in a non-Western performing ensemble is strongly recommended. Enrollment restricted to music majors and graduate students. Anthropology majors may enroll with permission of instructor. Enrollment limited to 30. (General Education Code(s): A, E.) *The Staff*

180C. Studies in World Musics: Central Asia. *

In-depth, ethnomusicologically oriented course on select music cultures in Central Asia. Compares theoretical, historical, and cultural aspects of music and culture from Uzbekistan, Tajikistan, Afghanistan, Kyrgyzstan, Kazakhstan, the Xinjiang region of China, Mongolia, and Tuva. Prerequisite(s): course 30A. Enrollment restricted to music majors. Enrollment limited to 36. *T. Merchant*

180N. Seminar on Music of the Grateful Dead. *

Detailed study of the Grateful Dead's music, history, and sociology. Course 80N introduces the Dead to general students, but this course is for music majors or minors; non-majors who can read music; and Deadheads who have extensive touring/concert experience. Prerequisite(s): Course 11C (formerly 80H), or 80N, or equivalent experience. Admission by consent of instructor: personal interview before first class recommended. Students cannot receive credit for both this course and 80N in the same quarter. Enrollment limited to 30. *F. Lieberman*

180V. Seminar in the Music of the Beatles.

Detailed study of the Beatles' music. While course 80V introduces the Beatles to general students, this course is designed for music majors, music minors, students able to read music, or non-majors with strong knowledge of the Beatles' repertory. Interview only; instructor determination at or before first class meeting. Prerequisite(s): course 11C or equivalent experience; basic knowledge of Beatles repertory. Students cannot receive credit for both this course and course 80V in the same quarter. Enrollment limited to 30. *F. Lieberman*

180W. Seminar in Music Business. F

An exploration of the many facets of the music industry: history, technology, economics, sociology, and legislation. Intended to provide both a broad understanding of the industry and a pragmatic survey of available career paths. While designed for general students, this seminar is specifically directed to those students desiring to pursue a music business career, whether in performance, management, the record business, writing about music (journalism, criticism), or entertainment law. Students cannot receive credit for both this course and course 80W in the same quarter. Admission by permission of instructor at or before first class meeting. Enrollment limited to 25. *F. Lieberman*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision. (See course 42.) Upper-division standing and a proposal supported by a music faculty member willing to supervise required. *The Staff*

195A. Senior Thesis. F,W,S

Preparation of senior thesis over one or two quarters. If taken as a multiple-term course, the grade and evaluation submitted for the final quarter applies to the previous quarter. Students submit petition to sponsoring agency. *The Staff*

195B. Senior Thesis. F,W,S

Preparation of senior thesis over one or two quarters. If taken as a multiple-term course, the grade and evaluation submitted for the final quarter applies to the previous quarter. Students submit petition to sponsoring agency. *The Staff*

196A. Senior Recital Preparation (without individual lessons). F,W,S

Prerequisite(s): juried audition or approved composition portfolio. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

196B. Senior Recital Preparation (with individual lessons). F,W,S

Students are billed a course fee. Prerequisite(s): juried audition. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

A program of directed study arranged with a department faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

A program of directed study arranged with a department faculty member. Class time is proportionally less than a five-credit course. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

200. Introduction to Research Methods. F

Practical introduction to graduate study in music focusing on research methods, music sources and

bibliography, techniques of scholarly writing, and critical readings in the discipline. Culminates in a public oral presentation on the model of a professional conference paper. *N. Treadwell, L. Miller*

201. History of Music Theory from the Greeks Through Rameau. *

Study and analysis of pre-tonal and tonal music from the Greeks through the 18th century. Course combines a history of theory with analyses that utilize contemporaneous theoretical concepts. (Formerly *Pretonal and Tonal Analysis*.) Enrollment restricted to graduate students. Offered in alternate academic years. *L. Miller*

202. Tonal and Posttonal Analysis. W

Encompasses various forms of linear analysis, set theory, and selected topics in current analytical practice. Offered in alternate academic years. *P. Nauert, H. Kim, D. Jones*

203. Special Topics in Performance Practice. *

Investigation of primary and secondary sources of information about the culturally and historically accurate performance of music in various times and places. Undergraduates who have completed the appropriate course 101 courses may enroll in 203 courses by interview with the instructor. *The Staff*

203A. Performance Practice in the Middle Ages. *

A study of performance practices in medieval music from Gregorian chant to the 14th century. History of instruments and notation. Rhythmic interpretations of chant and a study of improvised practices in organum. Editing and performance of representative works. Offered on a rotational basis with other courses in the 203 series. *L. Miller*

203B. Performance Practice in the Renaissance. *

A study of performance practices in Renaissance music, including concepts of mode, musica ficta, ornamentation, text underlay, tempo, and articulation. Basic principles of white notation and a brief history of instruments. Transcription, editing, and performance of a Renaissance work. Offered on a rotational basis with other courses in the 203 series. *N. Treadwell, L. Miller*

203C. Performance Practice in the Baroque. *

An examination of historically informed performance practice techniques in Baroque music, with attention to aspects of ornamentation, articulation, figured bass realization, dance choreography, rhythm and tempo, and organology. In-class performances and editing of source materials are included. Offered on a rotational basis with other courses in the 203 series. *L. Burman-Hall*

203D. Performance Practice in the Classic Period. *

Issues in performance practice focusing on selected topics and styles from the time of C.P.E. Bach through Haydn. Development of selected genres and ensembles, sources and editing, and interpretation and improvisation. Offered on a rotational basis with other courses in the 203 series. *L. Burman-Hall*

203E. Performance Practice in the Romantic Period. W

Interpretation of music from Beethoven to Scriabin through examinations of both the musical texts (form, genre, harmony, texture, orchestration, etc.) and the period performance practices. Topics range from interpretative analyses of selected compositions to critical assessments of modern as well as documented 19th- and early 20th-century performances. Offered on a rotational basis with other courses in the 203 series. *A. Leikin*

203F. Performance Practice in the 20th Century. *

Projects in analysis, notational studies, extended instrumental techniques, and the aesthetics and performance practices associated with composers from Debussy to the present. Reading and listening focuses on the writings and performances of the composers themselves and upon interpretive writings by informed performers of 20th-century music. Offered on a rotational basis with other courses in the 203 series. May be repeated for credit. *B. Carson, A. Beal, D. Jones*

203G. Concepts, Issues, and the Practice of Ethnomusicology. *

Ethnomusicological field methodology; vocal and instrumental performance practices as related to the ethnomusicological endeavor. Specific topics: philosophical paradigms, historical overview, and definitional issues of ethnomusicology; field research concepts and procedures; studies in instrumental and vocal performance practices of diverse cultures; selected writings of Charles Seeger; transcription and analysis issues; studies in micromusics. Offered on a rotational basis with other courses in the 203 series. *The Staff*

203H. Area Studies in Performance Practice. F

Intensive examination of the vocal and instrumental performance practices of living musical traditions of Indonesia, Latin America, or other regions. Topics may incorporate soloistic and ensemble traditions, secular and sacred traditions. Research rubrics include tuning, tone quality, performance posture and rhetoric, and improvisational and fixed patterns, as dictated by regional norms. May be repeated for credit in a different area. Offered on a rotational basis with other courses in the 203 series. May be repeated for credit. *L. Burman-Hall, D. Neuman, H. Kim*

206A. World Music Composition. *

Studies in the history, structure, and cultural function of music from cultures as diverse as Global African, central European, Korean, Latin American, Indonesian, and Indian traditions. Examines ways in which composers such as Bartok, Anthony Braxton, Chou Wen-Chung, Lou Harrison, and Takemitsu sought and integrated such influences. Students choose to write critical and analytic essays on musics exhibiting diverse cultural influences, or to compose music that takes a

vernacular or non-European music as a model for a compositional/improvisational approach. Enrollment restricted to graduate students. Enrollment limited to 12. May be repeated for credit. *K. Hester*

206B. Computer-Assisted Composition. F

Study of techniques of algorithmic and computer-assisted composition in a variety of contemporary idioms. Topics may include stochastic methods, generative grammars, search strategies, and the construction of abstract compositional designs and spaces. Final project for course involves students formulating and algorithmically implementing their own theoretical assumptions and compositional strategies. *D. Cope*

206D. Music Perception and Cognition. *

Investigations in the psychology of musical listening and awareness. Topics include time and rhythm perception, auditory scene analysis, pattern recognition, and theories of linguistics applied to harmony, melody, and form in the music of diverse cultures. Explores applications of the cognitive sciences to music transcription, analysis, composition, interpretation, and performance practice. Students apply existing knowledge in the cognitive sciences to a developing creative or analytical project, or develop and conduct new experiments. Enrollment restricted to graduate students. Enrollment limited to 16. May be repeated for credit. *B. Carson*

219. Techniques in Composition. F

Short compositional exercises incorporating diverse contemporary techniques with emphasis on problem-solving and development of compositional skills. Exercises focus on particular strategies for organizing and coordinating aspects of pitch, rhythm, timbre, and other musical dimensions, depending on interests of instructor and students. (Formerly course 219A.) Enrollment restricted to graduate students. May be repeated for credit. *D. Jones*

220. Graduate Seminar in Music Composition. S

Instruction in individual composition offered in the context of a group; composition in large forms of the 20th century with emphasis on techniques since 1950. May be taken by upper-division undergraduates for credit. Interview with instructor at first class meeting. Prerequisite(s): course 219. Enrollment limited to 16. May be repeated for credit. *H. Kim*

228. Techniques of Modernity and Aesthetic Formations. *

Explores the transformations and aesthetic possibilities of the digital age through a study of perceptual shifts of the past, from orality to literacy, gift to commodity, pre-colonial to colonial, "pre-modern" to "modern," and the technological revolutions that accompanied these shifts. (Also offered as Digital Arts and New Media 228. Students cannot receive credit for both courses.) Enrollment restricted to graduate students; upper-division undergraduates may enroll with permission of instructor. Enrollment limited to 18. *D. Neuman*

252. Current Issues Colloquium (2 credits). F,W,S

An interactive colloquium featuring presentations by faculty, graduate students, and visiting scholars on research projects in composition, musicology / ethnomusicology, and performance practice, followed by focused discussion. Enrollment restricted to graduate students. Undergraduate students may enroll with permission of instructor. May be repeated for credit. *L. Burman-Hall, A. Beal*

253A. Pitch, Melody, and Tuning Systems. W

Focuses on pitch systems from Western and non-Western cultures, and on scholarly perspectives about them throughout the 20th and 21st centuries. Enrollment restricted to graduate students. Enrollment limited to 20. *T. Merchant*

253B. Rhythm, Time, and Form. *

Traditional and experimental rhythmic and temporal systems representing diverse cultures, with emphasis on unmeasured, divisive, additive, and multilayer practices in cultural context. Students examine rhythmic composition, improvisation, and rubato performance in selected cultures, including rhythmic notation and transcription systems. Prerequisite(s): course 200 or the equivalent, or consent of instructor. Enrollment restricted to graduate students. Enrollment limited to 10. *L. Burman-Hall*

253C. Music and Discourse. F

Addresses both song and musical performance as modes of discourse. For song: musical and textual phrase and verse structures and their interrelationships. For musical performances: musical performance as rhetoric and emblem. Enrollment restricted to graduate students. Enrollment limited to 5. *F. Lieberman*

253D. Issues in the Ethnography of Music. S

Explores ethnography—the description of culture—as it relates to musicology and ethnomusicology, particularly where "culture" and cultural production are historically dynamic and geographically porous. Examines music with sensitivity to such complexities of context, and the disciplinary points of reference from which cultural difference is calculated. Considers the ideological imprint of methodology on cultural analysis: how to study an unfamiliar music in a way that transcends the measure of "difference from the familiar," and, conversely, how to conduct an "objective" study of a familiar music. Enrollment restricted to graduate students. Enrollment limited to 10. *D. Neuman*

254C. Performance Theory and Practice. S

"Performance" can describe activities in the arts, humanities, and social sciences. Recognizing the mappings of this concept, this course examines selected performances and performative behavior

through theoretical and critical lenses. Emphasis is on investigating the act and practice of musical performance in multicultural context, and on analyzing scholarly writing as performative discourse. Enrollment restricted to graduate students. Enrollment limited to 10. *N. Treadwell*

254D. Organology and Acoustics. *

Comprehensive study of musical instruments including, but not limited to, physical and engineering concepts; theory and methods of description, analysis, systematic, and cultural classifications; physiology and performance techniques; cultural significance; anthropomorphic and zoomorphic symbolism; ritual usage; and more. Previous enrollment in introductory ethnomusicology course (e.g., course 11D) helpful, but not required. Enrollment by interview only, except music M.A. and Ph.D. students. Enrollment restricted to junior and senior music majors, electronic music minors, anthropology majors, or physics majors, and graduate students. Enrollment limited to 15. *F. Lieberman*

254E. Asian Resonances in 20th-Century American and European Music. W

Explores the influence of Asian musics on Western composers from Debussy to Britten to American experimentalists such as Harrison, Cage, Riley, and Rudyard. Questions of cultural appropriation and originality are addressed through specific examples and critical readings. Enrollment restricted to graduate students. Enrollment limited to 10. *L. Miller*

254I. Empirical Approaches to Art Information. *

Reading and practice in empirical methods, as applied to the study of music, visual art, multimedia production, and performance arts. Topics include semiotics, critiques of empiricism, cultural determinants and contingents of perception, the psychophysics of information, sensory perception (visual and auditory), memory, pattern recognition, and awareness. Students apply existing knowledge in the cognitive sciences to a developing creative project, or develop and conduct new experiments. (Also offered as Digital Arts and New Media 254I. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Enrollment limited to 17. May be repeated for credit. *B. Carson*

254J. Jazz Historiography. *

Introduces the ways jazz history has been conceptualized, evaluated, and transmitted. Examines the social, intellectual, and cultural formations that have influenced this historiography. Considers the interdisciplinary project of "new jazz studies" in relation to established and alternative historical narratives. Enrollment restricted to graduate students. Enrollment limited to 10. *The Staff*

254K. Music, Gender, and Sexuality. *

Seminar focuses on musicological and ethnomusicological work incorporating feminist and queer theories published since the late 1980s. Cross-cultural approach to the examination of music, gender, and sexuality, drawing examples from both Western and non-Western traditions. Enrollment restricted to graduate students. Enrollment limited to 10. *T. Merchant*

254L. John Cage: Innovation, Collaboration, and Performance Technologies. *

In-depth examination of John Cage's interdisciplinary work, his pioneering activity in live electronic technology, and his influence in current multimedia creativity. Approximately one-half of the seminar is devoted to student research and creative projects and reflect Cage's legacy. (Also offered as Digital Arts and New Media 254L. Students cannot receive credit for both courses.) Enrollment restricted to juniors, seniors, and graduate students. Upper-division undergraduates may enroll with permission of instructor. Enrollment limited to 12. *A. Beal*

254M. Music in San Francisco, 1850-1950. *

Explores San Francisco's musical life during the city's first century, including opera, symphony, Chinese music, musical theater, and other genres. Considerable emphasis on music and society, including issues of race. Enrollment restricted to graduate students. Enrollment limited to 15. *L. Miller*

254Q. Dialogues and Questions in Digital Arts and Culture. S

Students engage in dialogues at the intersection of theory and practice with the goal of producing a pre-thesis proposal and essay. Readings and seminar discussions inform the development of project proposals and essays, which theoretically contextualize students' work. (Formerly Digital Arts and New Media 203.) (Also offered as Digital Arts and New Media 202. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. *B. Carson*

261. Graduate Applied Instruction (3 credits). F,W,S

One hour of individual instrumental or vocal instruction for graduate students. Repertory, technique, and performance practice. A minimum of nine hours per week of individual practice is required. Students are billed a course fee. Admission by audition with the instructor prior to first class meeting; see the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. *The Staff*

265. Graduate Ensemble Participation (2 credits). F,W,S

Participation by graduate students in ensembles. Enrollment limit appropriate to the size of each ensemble. Admission by audition with the instructor prior to first class meeting; see the enrollment conditions section of the quarterly *Schedule of Classes*. May be repeated for credit. *The Staff*

267. Workshop in Computer Music and Visualization (2 credits). *

Graduate-level techniques and procedures of computer music composition and visualization. Practical experience in the UCSC electronic music studio with computer composition systems and software, including visualization and interactive performance systems. Extensive exploration of

music and interactive graphic programs such as Max/MSP/Jitter. Enrollment by permission of instructor; appropriate graduate experience required. Enrollment restricted to graduate students. (Also offered as Digital Arts and New Media 267. Students cannot receive credit for both courses.) Enrollment limited to 12. May be repeated for credit. *P. Elsea*

295. Directed Reading. F,W,S

Directed reading which does not involve a term paper. May be repeated once for credit. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Independent study, creative work, or research for graduate students who have not yet begun work on their thesis. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

298. Graduate Recital. F,W,S

A public performance in the student's primary area of interest, related to the thesis or dissertation project, under the supervision of a faculty member. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. *The Staff*

299. Thesis Research. F,W,S

A thesis consisting of a substantive and original creative or scholarly work, related to the graduate recital, under the supervision of a faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

*Not offered in 2011-12

Lower-Division Courses**10. Academic Success (2 credits). W**

Provides opportunity to assess and revise methods of and purposes in studying. Critical, effective approaches to reading, writing, participating in lectures and sections, taking exams, balancing competing responsibilities, and utilizing campus resources explored. Enrollment by permission of college adviser. *The Staff*

30. Thesis Writing and Editing (2 credits). S

Substantial writing and revision for a piece of writing relevant to a student's field. Focuses on academic research, documentation, editing, and revision. Enrollment restricted to junior and senior college members. Enrollment by permission of instructor. Enrollment limited to 20. May be repeated for credit. *The Staff*

42. Student-Directed Seminar.

Seminars taught by upper-division Oakes students under faculty supervision. (See course 192.)
The Staff

60. Oakes Literary Journal: Further Reflections on a Diverse Society (2 credits). W

For publication in an Oakes College literary journal, students significantly refine an essay from the fall quarter Oakes College core course. Course work includes consideration of a substantive text that engages core course themes and promotes the focus of the essay. Prerequisite(s): course 80A or 80B. Enrollment restricted to first-year students. Enrollment limited to 20. May be repeated for credit. *The Staff*

67. The Politics of Food: Labor and Social Justice (2 credits). S

Engages the themes of Oakes College (respect for diversity and social justice) and the interests of UCSC's Center for Agroecology and Sustainable Food Systems. Topics include the racial politics of food, farm labor, organic farming, and activism. Prerequisite(s): successful completion of college core course 80A, 80B, 80C, 80D, or 80H. Enrollment restricted to college members. Enrollment limited to 25. May be repeated for credit. *R. King, M. Baker*

75. Oakes Student Development and Leadership Theory (2 credits). S

Overview of theories, methods, applications, skills, and special topics focusing on college student development and leadership. Uses a variety of learning modes including lecture, discussion, case studies, small group interaction, and presentations. Interview only: see Oakes coordinator for residential education during spring enrollment period. Enrollment restricted to Oakes College members. Enrollment limited to 30. May be repeated for credit. *The Staff*

80A. Introduction to University Discourse: Communicating Diversity for a Just Society. F

Explores rhetorical principles and conventions of university discourse providing intensive practice in analytical writing, critical reading, and speaking. Examines historical and contemporary aspects of multiculturalism in the U.S. Explores how social inequality based on ethnicity, race, class, and gender occurs among all levels of society. Students cannot receive credit for this course and course 80B. (Formerly Introduction to University Discourse: Values and Change in a Diverse Society.) Enrollment restricted to first-year college members who have not satisfied the C1 requirement. Enrollment limited to 22. (General Education Code(s): T5-Humanities and Arts or Social Sciences, C1, E.) *K. Lau*

80B. Rhetoric and Inquiry: Communicating Diversity for a Just Society. F

Explores intersections of investigation, interpretation, and persuasion and hones strategies for writing and research. Examines historical and contemporary aspects of multiculturalism in the U.S. Explores how social inequality based on ethnicity, race, class, and gender occurs among all levels of society. Students cannot receive credit for this course and course 80A. (Formerly Rhetoric and Inquiry: Values and Change in a Diverse Society.) Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment restricted to first-year college members. Enrollment limited to 22. (General Education Code(s): T5-Humanities and Arts or Social Sciences, C2, E.) *K. Lau*

80C. Introduction to University Discourse: Communicating Diversity for a Just Society Writing Intensive 1. F

Explores rhetorical principles and conventions of university discourse and provides intensive practice in analytical writing, critical reading, and speaking. Examines historical and contemporary aspects of multiculturalism in the U.S. Explores how social inequality based on ethnicity, race, class, and gender occurs among all levels of society. More writing-intensive than course 80A; prerequisite to course 80D. Enrollment restricted to first-year college members who have not satisfied the C1

requirement. Enrollment limited to 22. *The Staff*

80D. Introduction to University Discourse: Communicating Diversity for a Just Society Writing Intensive 2. W

Continues to provide practice in analytical writing, critical reading, and speaking, and to examine issues relating to multiculturalism, diversity, and power. Prerequisite(s): course 80C. Enrollment restricted to first-year college members who have not satisfied the C1 requirement. Enrollment limited to 22. (General Education Code(s): C1.) *The Staff*

80H. Rainbow Theater Cultural Studies. S

Introduction to multicultural theater and multicultural plays that aims to bring cultural awareness to all students interested in theater discipline. Students are required to read and critically analyze contemporary plays of color with emphasis on race and culture in contemporary American society. Enrollment limited to 40. May be repeated for credit. (General Education Code(s): T4-Humanities and Arts, E.) *D. Williams*

93. Field Study. F,W,S

Supervised off-campus study conducted under the immediate and direct guidance of a faculty supervisor. To be used primarily by lower-division students doing part-time off-campus study. Prerequisite(s): approval of student's adviser, certification of adequate preparation, approval of provost. May be repeated for credit. *The Staff*

94F. Group Tutorial (2 credits). F,W,S

A program of independent study arranged between a group of students and a faculty instructor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

95. Directed Reading. F,W,S

Directed reading on selected topics in literature. Students submit petition to sponsoring agency. *The Staff*

99. Tutorial. F,W,S

Individual study for lower-division students directed by a fellow of Oakes. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99F. Independent Study (2 credits). F,W,S

Independent study on various topics to be arranged between student and instructor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Upper-Division Courses

150. Gays and Lesbians in the United States. W

Examines the diverse social and cultural contexts in which gay and lesbian identities are constructed and expressed. Provides an overview of current themes in gay and lesbian history: the sex-gender system, sexuality and sexual identity, the coming-out experience, gay and lesbian subcultures, sexual roles, politics, legal recognition of relationships, religion, mental and physical health in the gay/lesbian community, and gay activism. Enrollment restricted to junior and senior Oakes College members. Enrollment limited to 30. *K. Simonton*

192. Directed Student Teaching. F,W,S

Teaching a lower-division seminar under faculty supervision. (See course 42.) Prerequisite(s): upper-division standing in Oakes; a proposal supported by a faculty member willing to supervise. *The Staff*

193. Field Study. F,W,S

Supervised off-campus study conducted under the immediate and direct guidance of a faculty supervisor. To be used primarily by upper-division students doing part-time off-campus study. Prerequisite(s): approval of student's adviser, certification of adequate preparation, approval of provost. If taking two or more such courses in any one quarter, must obtain approval of academic adviser. *The Staff*

195. Senior Thesis. F,W,S

Senior thesis related to college-sponsored individual majors. Students submit petition to sponsoring agency. Sponsoring faculty must be member of individual major committee. May be repeated for credit. *The Staff*

198. Independent Field Study. F,W,S

College-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. Prerequisite(s): approval of the student's adviser, certification of adequate preparation, and approval by provost. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Individual study for junior and senior members of Oakes College directed by a fellow of Oakes. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Independent Study (2 credits). F,W,S

Independent study on various topics to be arranged between student and instructor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Ocean Sciences

A312 Earth and Marine Sciences Building
(831) 459-4730
<http://oceansci.ucsc.edu/>

[Program Description](#) | [Changes to 2010-12 Catalog Highlighted](#) | [Faculty](#) | [Course Descriptions](#)

Program Description

The Ocean Sciences Department includes faculty and students involved in oceanography and other marine sciences and sponsors undergraduate and graduate courses in these disciplines. Through faculty sponsors, students have access to a wide variety of research facilities and equipment, including on-campus analytical chemistry, geology, and molecular biology laboratories for marine research; computing and imaging facilities; an onshore marine laboratory two miles from campus (Long Marine Laboratory), with aquariums and holding tanks that are supplied with running sea water; and a unique field station on Año Nuevo Island (19 miles north of Santa Cruz), especially suited for studies on pinnipeds and marine birds. The department supports collaborative studies utilizing the innovative technologies of the nearby Monterey Bay Aquarium Research Institute, the Naval Postgraduate School, Stanford University's Hopkins Marine Station, California State University (CSU) Moss Landing Laboratory, and others. Students may also work at other University of California facilities, including the Bodega Marine Laboratories and Scripps Institute of Oceanography.

In addition to research and instructional activities along the California coast, interests of the core faculty and their students include biological, chemical, and physical oceanography; plus sediment, marine, organic, and trace metal biogeochemistry; marine plankton, phytoplankton ecology, paleoceanography, aquatic microbial ecology, ecological modeling, and remote sensing (satellite oceanography); numeric modeling of coastal and basin-scale dynamics; and midwater ecology, climatology, and many more.

Ocean sciences affiliated faculty in other departments represent a deep resource of research interests and methodologies including those pertaining to coral reef and kelp forest ecology, plate tectonics and continental margins, marine mammal behavior and physiology, and natural products from marine organisms. Student research projects have included participation in major scientific expeditions to various marine environments ranging from polar regions to the tropics.

Undergraduate Programs

Although offering a range of undergraduate courses, the Ocean Sciences Department presently offers only graduate degrees. The undergraduate major in marine biology, sponsored by the Biological Sciences Departments, includes required and elective courses in ocean sciences; and there is an ocean sciences concentration in Earth sciences for undergraduates. Students interested in ocean sciences should major in a discipline such as biology, marine biology, chemistry, Earth sciences, physics, or mathematics and take ocean sciences-related electives. Students with a bachelor's degree in one of these disciplines or equivalent coursework may apply directly for admission to the graduate program through the Division of Graduate Studies.

Graduate Programs

The graduate programs in ocean sciences are designed to prepare students for careers in research, teaching, and other environmentally related endeavors. The fundamental requirement for admission to the program is substantial evidence of superior scholarship and aptitude for original research. Preparation for admission to the graduate program in Ocean Sciences (master of science (M.S.) or doctor of philosophy (Ph.D.)) should comprise an undergraduate degree in the discipline of one of the program specialty areas (e.g., biology or marine biology, geology or earth sciences, chemistry, or physical science), or an equivalent background. If a student does not have a degree in one of these areas, the student must show their sponsor that they have taken the classes necessary to do their research. This preparation includes certain courses or prerequisites).

The prerequisites for entering the Ph.D. program are a minimum of two quarters or two semesters in each of the following: a calculus series; chemistry, and physics with labs. In addition, one course in each of the following is required: earth sciences or geological principles; biology; and statistics or biostatistics.

Ocean Sciences Ph.D. Degree Program

The program leading to a doctorate in ocean sciences is designed with a core training in oceanography for all students, supplemented and focused by advanced training in oceanography and in the traditional disciplines (biology, chemistry, Earth sciences, and physics) as chosen by the student and her or his advisers. The core training is provided through core courses in ocean sciences; a subset of which is taken by all students in the first two years and reinforced by the student's seminars throughout the program. In addition to core courses in ocean sciences, preparation includes upper-division/graduate courses in ocean sciences and in the specialty discipline, graduate seminars, independent research credits, participation in departmental student seminar series, and a minimum requirement of two quarters as a teaching assistant. There is no formal language requirement.

The results of a scheduling meeting in the first quarter of enrollment are used to map out the course program in the first year. The course program is determined by a faculty advisory committee in consultation with the student; and courses are drawn from ocean sciences and other science departments (e.g., biology, chemistry, Earth sciences, physics). No later than fall quarter of their second year, students must take a departmental oral examination that tests knowledge of ocean sciences and general expertise in their parent discipline. An oral and a written qualifying examination are required, generally in the second or third year of graduate study. A dissertation based on original research is required, and the final examination is a public oral defense of the dissertation. Students are encouraged to prepare their dissertation, or certain chapters of it, in a form suitable for publication.

Sample Pathways

The pathways within the ocean sciences Ph.D. program are differentiated from related degrees in the traditional disciplines by their focus on global-scale problems and interactions, a focus on the ocean, and their inherently interdisciplinary approach. Interdisciplinary projects across and between pathways are encouraged, as are interactions with faculty in related departments.

- Biological oceanography

This area involves the interactions of organisms with their chemical and physical environments. It includes research on the physiology and ecology of organisms, but differs from marine biology in the focus on the oceanographic setting of the organism in relationship to, for example, biogeochemical cycling and the effects of ocean currents on distributions of organisms. The focus is mainly on small oceanic life-forms (plankton and bacteria, molecular ecology) and their roles in the biogeochemical cycles of marine systems.

- Chemical oceanography

Chemical interactions of trace metals and radionuclides in the sea are the focus of this group. Research includes development of analytical techniques and measurement of trace species in seawater and investigation of the effects and interactions of trace elements on biological processes using analytical and isotopic approaches.

- Geological oceanography

Paleoceanography, paleoclimatology, and sediment geochemistry are the focus in this pathway. Research areas include the history of global geochemical cycles and composition of the ocean on various timescales, the fate and diagenesis of materials in sediments and their contribution to the paleoceanographic record, understanding ocean and climate history by the use of records of stable isotopes and trace elements, and paleoclimate modeling.

- Physical oceanography

The physics and dynamics of the ocean and atmosphere are the main aspects of this program. Research includes observational, computational, theoretical, and experimental physical oceanography, geophysical fluid dynamics, ocean acoustics, dynamical meteorology, climate, and global change.

Requirements for Ph.D. Students in the Ocean Sciences Department

To introduce students to the breadth and depth of the field of ocean sciences, students will be required to complete the following.

1. Four core courses. These courses are expected to be completed in the first year of the program (and prior to taking the departmental examination) in the sequence listed below:

fall	OCEA 200, <i>Physical Oceanography</i> OCEA 280, <i>Marine Geology</i>
winter	OCEA 220, <i>Chemical Oceanography</i>
spring	OCEA 230, <i>Biological Oceanography</i>

A minimum of three graduate-level or upper-division elective courses to provide depth in the chosen area of emphasis or supporting disciplines. These courses are chosen in

consultation with the student's adviser and department graduate advising committee (a maximum of one course can be a graduate-level seminar (OCEA 290); at least two courses must be graduate or upper-division undergraduate lecture courses).

- OCEA 296, *Teaching in Ocean Sciences*, to be taken prior to or concurrent with being a teaching assistant.
- Teaching experience satisfied by two quarters of teaching assistant experience in Ocean Sciences or supporting departments.
- OCEA 293, a 2-credit *Graduate Research Seminar*, required to be taken yearly by all Ph.D. students.
- OCEA 292, attendance at the Ocean Sciences Seminar series each quarter of enrollment.
- A minimum of three courses in Thesis Research (course 299) under direction of a sponsor. Each quarter in residence a student should take 15 credits of classes; students beyond their first year will usually take 10 or 15 credits of Thesis Research each quarter.
- Comprehensive departmental examination. This oral examination, covering material from the core courses, is usually taken at the beginning of a student's second year in the program. This examination must be completed successfully within two years of entering the program.
- Pass the qualifying examination to advance to candidacy. This examination requires a written research proposal to be defended orally in front of the student's dissertation committee and is normally taken at the beginning of the third year of the program. This examination is expected to be completed successfully within three years of entering the program.
- Ph.D. dissertation. The Ph.D. dissertation, demonstrating original thought and research, must be written, presented in an open seminar, and defended to the student's thesis committee. Chapters of the dissertation may be written in publication format, but must conform to university publication guidelines for submission.

Ocean Sciences Master's Degree Program

The Ocean Sciences Department offers a master of science (M.S.) degree in ocean sciences. The degree combines core courses and electives to provide depth and breadth in ocean sciences, with a focused thesis to provide experience in original research. Graduates from the program are excellently prepared to take research or management positions in organizations concerned with the marine environment, become educators, or enter doctoral programs in ocean sciences or related fields.

Whereas the doctoral program has an oceanographic orientation, the marine sciences master's program is even broader and has traditionally attracted many students in marine biology and ecology. As with the doctoral program, students are encouraged to select a course of study and a research program that draws on the expertise of the core ocean sciences faculty and any of the affiliated faculty in other departments. Customized programs of study that combine related disciplines are supported in the master's program.

Course Requirements for the Ocean Sciences Master's Degree

To introduce students to the breadth and depth of the field of ocean sciences, students will be required to complete the following:

- Complete three of the four core courses (one of which must be course 200, *Physical Oceanography*). Students are expected to complete all three of these courses in the first year of the program, and they should be taken in the order listed below. All four core courses are recommended. If taken, the fourth course counts as an elective.

fall	OCEA 200, <i>Physical Oceanography</i> OCEA 280, <i>Marine Geology</i>
winter	OCEA 220, <i>Chemical Oceanography</i>
spring	OCEA 230, <i>Biological Oceanography</i>

- A minimum of three graduate-level or upper-division elective courses to provide depth in the chosen area of emphasis. These courses are chosen in consultation with an adviser and department graduate advising committee (only one of these can be a graduate seminar (OCEA 290); at least two must be lecture courses).
- A minimum of three courses in *Thesis Research* (OCEA 299) under direction of a sponsor. Each quarter a student should take 15 credits of classes. Students beyond their first year will usually take 10 or 15 credits of *Thesis Research* each quarter.
- OCEA 296, *Teaching in Ocean Sciences*, to be taken prior to or concurrent with being a teaching assistant
- Teaching experience satisfied by one quarter of teaching assistant experience
- Attendance at the *Ocean Sciences Seminar* series (OCEA 292) each quarter of enrollment
- Complete a master's thesis, and present it at an open seminar.

Details regarding admission to graduate standing, financial aid, examinations, and the requirements for the master of science and doctor of philosophy degrees are available from the Division of Graduate Studies (http://graddiv.ucsc.edu/student_affairs/).

Program Description

The Ocean Sciences Department includes faculty and students involved in oceanography and other marine sciences and sponsors undergraduate and graduate courses in these disciplines. Through faculty sponsors, students have access to a wide variety of research facilities and equipment, including on-campus analytical chemistry, geology, and molecular biology laboratories for marine research; computing and imaging facilities; an onshore marine laboratory two miles from campus (Long Marine Laboratory), with aquariums and holding tanks that are supplied with running sea water; and a unique field station on Año Nuevo Island (19 miles north of Santa Cruz), especially suited for studies on pinnipeds and marine birds. The department supports collaborative studies utilizing the innovative technologies of the nearby Monterey Bay Aquarium Research Institute, the Naval Postgraduate School, Stanford University's Hopkins Marine Station, California State University (CSU) Moss Landing Laboratory, and others. Students may also work at other University of California facilities, including the Bodega Marine Laboratories and Scripps Institute of Oceanography.

In addition to research and instructional activities along the California coast, interests of the core faculty and their students include biological, chemical, and physical oceanography; plus sediment, marine, organic, and trace metal biogeochemistry; marine plankton, phytoplankton ecology, paleoceanography, aquatic microbial ecology, ecological modeling, and remote sensing (satellite oceanography); numeric modeling of coastal and basin-scale dynamics; and midwater ecology, climatology, and many more.

Ocean sciences affiliated faculty in other departments represent a deep resource of research interests and methodologies including those pertaining to coral reef and kelp forest ecology, plate tectonics and continental margins, marine mammal behavior and physiology, and natural products from marine organisms. Student research projects have included participation in major scientific expeditions to various marine environments ranging from polar regions to the tropics.

Undergraduate Programs

Although offering a range of undergraduate courses, the Ocean Sciences Department presently offers only graduate degrees. The undergraduate major in marine biology, sponsored by the Ecology and Evolutionary Biology Department, includes required and elective courses in ocean sciences; and there is an ocean sciences concentration in Earth sciences for undergraduates. Students interested in ocean sciences should major in a discipline such as biology, marine biology, chemistry, Earth sciences, physics, or

mathematics and take ocean sciences-related electives. Students with a bachelor's degree in one of these disciplines or equivalent coursework may apply directly for admission to the graduate program through the Division of Graduate Studies.

Graduate Programs

The graduate programs in ocean sciences are designed to prepare students for careers in research, teaching, and other environmentally related endeavors. The fundamental requirement for admission to the program is substantial evidence of superior scholarship and aptitude for original research. Preparation for admission to the graduate program in Ocean Sciences (master of science (M.S.) or doctor of philosophy (Ph.D.)) should comprise an undergraduate degree in the discipline of one of the program specialty areas (e.g., biology or marine biology, geology or earth sciences, chemistry, or physical science), or an equivalent background. If a student does not have a degree in one of these areas, the student must show their sponsor that they have taken the classes necessary to do their research. ~~This preparation should normally include courses (prerequisites) in calculus, statistics, physics, chemistry, general biology or ecology, and geology for all majors (see below for the number of courses~~ This preparation includes certain courses or prerequisites).

~~1 year of a calculus series~~

~~1 year of chemistry with laboratories~~

~~1 year of physics with laboratories~~

~~1 course in Earth sciences or geologic principles~~

~~1 course in biology~~

~~1 course in statistics or biostatistics for all majors~~

The prerequisites for entering the Ph.D. program are a minimum of two quarters or two semesters in each of the following: a calculus series; chemistry, and physics with labs. In addition, one course in each of the following is required: earth sciences or geological principles; biology; and statistics or biostatistics.

Ocean Sciences Ph.D. Degree Program

The program leading to a doctorate in ocean sciences is designed with a core training in oceanography for all students, supplemented and focused by advanced training in oceanography and in the traditional disciplines (biology, chemistry, Earth sciences, and physics) as chosen by the student and her or his advisers. The core training is provided through core courses in ocean sciences; a subset of which is taken by all students in the first two years and reinforced by the student's seminars throughout the program. In addition to core courses in ocean sciences, preparation includes upper-division/graduate courses in ocean sciences and in the specialty discipline, graduate seminars, independent research credits, participation in departmental student seminar series, and a minimum requirement of two quarters as a teaching assistant. There is no formal language requirement.

The results of a scheduling meeting in the first quarter of enrollment are used to map out the course program in the first year. The course program is determined by a faculty advisory committee in consultation with the student; and courses are drawn from ocean sciences and other science departments (e.g., biology, chemistry, Earth sciences, physics). No later than fall quarter of their second year, students must take a departmental oral examination that tests knowledge of ocean sciences and general expertise in their parent discipline. An oral and a written qualifying examination are required, generally in the second or third year of graduate study. A dissertation based on original research is required, and the final examination is a public oral defense of the dissertation. Students are

encouraged to prepare their dissertation, or certain chapters of it, in a form suitable for publication.

Sample Pathways

The pathways within the ocean sciences Ph.D. program are differentiated from related degrees in the traditional disciplines by their focus on global-scale problems and interactions, a focus on the ocean, and their inherently interdisciplinary approach. Interdisciplinary projects across and between pathways are encouraged, as are interactions with faculty in related departments.

Biological oceanography

This area involves the interactions of organisms with their chemical and physical environments. It includes research on the physiology and ecology of organisms, but differs from marine biology in the focus on the oceanographic setting of the organism in relationship to, for example, biogeochemical cycling and the effects of ocean currents on distributions of organisms. The focus is mainly on small oceanic life-forms (plankton and bacteria, molecular ecology) and their roles in the biogeochemical cycles of marine systems.

Chemical oceanography

Chemical interactions of trace metals and radionuclides in the sea are the focus of this group. Research includes development of analytical techniques and measurement of trace species in seawater and investigation of the effects and interactions of trace elements on biological processes using analytical and isotopic approaches.

Geological oceanography

Paleoceanography, paleoclimatology, and sediment geochemistry are the focus in this pathway. Research areas include the history of global geochemical cycles and composition of the ocean on various timescales, the fate and diagenesis of materials in sediments and their contribution to the paleoceanographic record, understanding ocean and climate history by the use of records of stable isotopes and trace elements, and paleoclimate modeling.

Physical oceanography

The physics and dynamics of the ocean and atmosphere are the main aspects of this program. Research includes observational, computational, theoretical, and experimental physical oceanography, geophysical fluid dynamics, ocean acoustics, dynamical meteorology, climate, and global change.

Requirements for Ph.D. Students in the Ocean Sciences Department

To introduce students to the breadth and depth of the field of ocean sciences, students will be required to complete the following.

Four core courses. These courses are expected to be completed in the first year of the program (and prior to taking the departmental examination) in the sequence listed below:

fall	OCEA 200, <i>Physical Oceanography</i>
	OCEA 280, <i>Marine Geology</i>
winter	OCEA 220, <i>Chemical Oceanography</i>
spring	OCEA 230, <i>Biological Oceanography</i>

A minimum of three graduate-level or upper-division elective courses to provide depth in

the chosen area of emphasis or supporting disciplines. These courses are chosen in consultation with the student's adviser and department graduate advising committee (a maximum of one course can be a graduate-level seminar (OCEA 290); at least two courses must be graduate or upper-division undergraduate lecture courses).

OCEA 296, *Teaching in Ocean Sciences*, to be taken prior to or concurrent with being a teaching assistant.

Teaching experience satisfied by two quarters of teaching assistant experience in Ocean Sciences or supporting departments.

OCEA 293, a 2-credit *Graduate Research Seminar*, required to be taken ~~yearly each spring quarter~~ by all Ph.D. students.

OCEA 292, attendance at the *Ocean Sciences Seminar* series each quarter of enrollment.

A minimum of three courses in *Thesis Research* (course 299) under direction of a sponsor. Each quarter in residence a student should take 15 credits of classes; students beyond their first year will usually take 10 or 15 credits of *Thesis Research* each quarter.

Comprehensive departmental examination. This oral examination, covering material from the core courses, is usually taken at the beginning of a student's second year in the program. This examination must be completed successfully within two years of entering the program.

Pass the qualifying examination to advance to candidacy. This examination requires a written research proposal to be defended orally in front of the student's dissertation committee and is normally taken at the beginning of the third year of the program. This examination is expected to be completed successfully within three years of entering the program.

Ph.D. dissertation. The Ph.D. dissertation, demonstrating original thought and research, must be written, presented in an open seminar, and defended to the student's thesis committee. Chapters of the dissertation may be written in publication format, but must conform to university publication guidelines for submission.

Ocean Sciences Master's Degree Program

The Ocean Sciences Department offers a master of science (M.S.) degree in ocean sciences. The degree combines core courses and electives to provide depth and breadth in ocean sciences, with a focused thesis to provide experience in original research. Graduates from the program are excellently prepared to take research or management positions in organizations concerned with the marine environment, become educators, or enter doctoral programs in ocean sciences or related fields.

Whereas the doctoral program has an oceanographic orientation, the marine sciences master's program is even broader and has traditionally attracted many students in marine biology and ecology. As with the doctoral program, students are encouraged to select a course of study and a research program that draws on the expertise of the core ocean sciences faculty and any of the affiliated faculty in other departments. Customized programs of study that combine related disciplines are supported in the master's program.

Course Requirements for the Ocean Sciences Master's Degree

To introduce students to the breadth and depth of the field of ocean sciences, students will be required to complete the following:

Complete three of the four core courses (one of which must be course 200, *Physical Oceanography*). Students are expected to complete all three of these courses in the first year of the program, and they should be taken in the order listed below. All four core

courses are recommended. If taken, the fourth course counts as an elective.

fall	OCEA 200, <i>Physical Oceanography</i> OCEA 280, <i>Marine Geology</i>
winter	OCEA 220, <i>Chemical Oceanography</i>
spring	OCEA 230, <i>Biological Oceanography</i>

A minimum of three graduate-level or upper-division elective courses to provide depth in the chosen area of emphasis. These courses are chosen in consultation with an adviser and department graduate advising committee (only one of these can be a graduate seminar (OCEA 290); at least two must be lecture courses).

A minimum of three courses in *Thesis Research* (OCEA 299) under direction of a sponsor. Each quarter a student should take 15 credits of classes. Students beyond their first year will usually take 10 or 15 credits of *Thesis Research* each quarter.

OCEA 296, *Teaching in Ocean Sciences*, to be taken prior to or concurrent with being a teaching assistant

Teaching experience satisfied by one quarter of teaching assistant experience

Attendance at the *Ocean Sciences Seminar* series (OCEA 292) each quarter of enrollment

Complete a master's thesis, and present it at an open seminar.

Details regarding admission to graduate standing, financial aid, examinations, and the requirements for the master of science and doctor of philosophy degrees are available from the Division of Graduate Studies (http://graddiv.ucsc.edu/student_affairs/).

Faculty and Professional Interests

Professor

KENNETH W. BRULAND

Chemical oceanography, biogeochemistry of trace metals and radionuclides, aquatic chemistry, geochemistry

MARGARET L. (PEGGY) DELANEY

Paleoceanography, marine geochemistry

ROBERT E. GARRISON (Emeritus)

RAPHAEL M. KUDELA

Ecological modeling and remote sensing, satellite oceanography, phytoplankton ecology and harmful algal blooms

ANDREW M. MOORE

Physical oceanography; numerical ocean modeling; air-interaction; ocean prediction

A. CHRISTINA RAVELO

Stable isotope geochemistry and chemical oceanography, paleoclimatology

MARY W. SILVER (Emeritus)

JONATHAN P. ZEHR

Aquatic microbial ecology, biological oceanography

Associate Professor

CHRISTOPHER A. EDWARDS

Physical oceanography, numerical modeling of coastal- and basin-scale dynamics

MATTHEW D. MCCARTHY

Organic geochemistry, marine organic geochemistry, global biogeochemical cycles

Adjunct Professor

KENNETH L. SMITH

Pelagic-benthic coupling in the abyssal Eastern North Pacific

SHARON E. STAMMERJOHN

Polar oceanography and climate; interdisciplinary approaches to understanding environmental and ecosystem response to climate variability

RANDALL S. WELLS

Behavioral ecology and conservation biology of small cetaceans

Associate Adjunct Professor

STEVEN H. HADDOCK

Ecology of bioluminescence and gelatinous zooplankton from blue-water and deep-sea environments

JEFFREY D. PADUAN

Coastal ocean dynamics: surface currents, wave heights, wind and tidal forcing from high-frequency radar data

Assistant Adjunct Professor

MICHAEL BECK

Marine conservation, regional biodiversity planning, habitat restoration, marine proprietary rights

JOHN CARLOS GARZA

Population and ecological genetics of marine organisms

SEAN A. HAYES

Behavior, ecology, genetics, and population dynamics with a particular interest in salmon and pinnipeds

ROGER LININGTON

Marine natural products; drugs for neglected diseases; chemical biology; chemical probes

ALEXANDRA WORDEN

Mechanisms and controls of microbial population dynamics with an emphasis on carbon cycling in marine ecosystems

Lecturer**BALDO MARINOVIC**

Plankton biology, Euphausiid (krill) population biology, zooplankton ecology, pelagic food web dynamics, climate change potential impacts on zooplankton and fisheries

ADINA PAYTAN

Biogeochemistry, paleoceanography, environmental and aquatic chemistry

COLLEEN REICHMUTH

Pinniped cognition and perception, including cross-modal (auditory-visual) emergent learning in sea lions and behavioral and electrophysical assessment of hearing in several marine mammal species

SCOTT SHAFFER

Links between ecology, morphology, and physiological adaptations of marine vertebrates, particularly how animals use and allocate energy

**Professor****GIACOMO BERNARDI (Ecology and Evolutionary Biology)**

Fish biology, phylogenetics, evolution

MARK CARR (Ecology and Evolutionary Biology)

Marine ecology, applied marine ecology

DANIEL P. COSTA (Ecology and Evolutionary Biology)

Physiological ecology of marine mammals and birds

PHILLIP CREWS (Chemistry and Biochemistry)

Marine natural products chemistry, bioorganic chemistry, organic structural analysis by NMR, natural products of marine macro- and microorganisms

DONALD CROLL (Ecology and Evolutionary Biology)

Foraging ecology of marine birds and mammals, island conservation/ecology

ANDREW T. FISHER (Earth and Planetary Sciences)

Hydrogeology, crustal studies, coupled flows, modeling

STANLEY M. FLATT (Emeritus, Physics)**A. RUSSELL FLEGAL (Microbiology and Environmental Toxicology)**

Anthropogenic perturbations of biogeochemical cycles, applications of isotopic tracers in anthropology and archaeology

LAUREL R. FOX (Ecology and Evolutionary Biology)

Terrestrial population and community ecology, plant-animal interactions

JAMES B. GILL (Earth and Planetary Sciences)

Igneous petrology, geochemistry of island arcs

GARY B. GRIGGS (Earth and Planetary Sciences)

Coastal processes, hazards and engineering

MARC S. MANGEL (Applied Mathematics and Statistics)

Mathematical modeling of biological phenomena, especially the evolutionary ecology of growth, aging, and longevity; quantitative issues in fishery management; mathematical and computational aspects of disease

DONALD C. POTTS (Ecology and Evolutionary Biology)

Coral reef ecology, genetics, evolution, and geological history; marine biodiversity; tropical biology, global change, and remote sensing

GRANT H. POGSON (Ecology and Evolutionary Biology)

Molecular population genetics, ecological genetics, marine invertebrates and fishes

PETER RAIMONDI (Ecology and Evolutionary Biology)

Marine ecology, evolutionary ecology, experimental design, applied ecology

ELI A. SILVER (Earth and Planetary Sciences)

Marine geology and geophysics, active tectonics, remote sensing

LISA SLOAN (Earth and Planetary Sciences)

Paleoclimatology, climate change, Earth system science, surficial processes

DONALD R. SMITH (Microbiology and Environmental Toxicology)

Neurotoxicity, cellular and organismal responses to environmental toxins

TERRIE M. WILLIAMS (Ecology and Evolutionary Biology)

Vertebrate locomotor and thermoregulatory physiology; marine biodiversity; comparative vertebrate energetics, exercise physiology

JAMES C. ZACHOS (Earth and Planetary Sciences)

Paleoceanography, marine stratigraphy, geochemistry

[Program Description](#) | [Faculty](#) | [Course Descriptions](#)

Lower-Division Courses

1. The Oceans. F,S

An interdisciplinary introduction to oceanography focusing on biological, chemical, geological, and physical processes. Covers topics such as origins and structure of planet Earth and its oceans, co-evolution of Earth and life, plate tectonics, liquid water and the hydrologic and hydrothermal cycles, salinity and elemental cycles, ocean circulation, primary production and nutrient cycles, plankton and nekton, life on the sea floor, near shore and estuarine communities, future environmental problems our oceans face. Students may also enroll in and receive credit for Earth Sciences 1. (Note: General Education credit will not be granted for this course and Biology 80D.) (General Education Code(s): SI, IN, Q.) *M. McCarthy, C. Edwards*

80A. Life in the Sea. S

The ecology of plants and animals in oceans and coastal areas. Consideration of life in various marine habitats, including the open ocean, rocky shores, estuaries, and the sea. Includes field trips. High school biology and chemistry courses are recommended prior to taking this course. (General Education Code(s): SI, T-2 Natural Sciences.) *The Staff*

80B. Our Changing Planet. F,W

Interdisciplinary scientific perspective on Earth system, focusing on human impacts on global environment. Introduces concepts of Earth system science and explores topics such as global warming, ozone depletion, pollution, deforestation, and future climate change. Prerequisite(s): high school chemistry course recommended. (General Education Code(s): PE-E, T2-Natural Sciences.) *The Staff, A. Moore, M. McCarthy*

Upper-Division Courses

101. The Marine Environment. W

An introduction to the marine environment stressing the interaction of physical, chemical, and geological factors in the ocean. Provides the oceanographic background needed for studies in marine biology. Students taking the prerequisite math courses concurrently may enroll in the course with permission from instructor. Prerequisite(s): Chemistry 1C and Mathematics 11B or 19B. Students taking the prerequisite math courses concurrently may enroll in the course with permission from instructor. *A. Moore, J. Zehr*

102. Oceans and Climate: Past, Present, and Future. *

An introduction to Earth's environment, particularly its oceanic and climatic components. Emphasizes interactions between chemical, physical, biological, and geological processes, and fundamentals of past, present, and future global environmental change. Provides backgrounds for specialized courses in oceanic or climatic change. Prerequisite(s): Chemistry 1C. *A. Ravelo*

118. Marine Microbial Ecology. S

The study of marine bacteria and their role in the marine ecosystem. Emphasis on biochemistry and physiology in relation to metabolic activity and elemental cycles, trophic interactions, and flows of material and energy in marine food webs. Exams and term paper required. Students cannot receive credit for this course and Ocean Sciences 218. Prerequisite(s): Biology 20C or 21C, and Chemistry 1C. *J. Zehr*

120. Aquatic Chemistry: Principles and Applications. S

An integrated study of the chemical behavior of natural waters with an emphasis on both principles and applications. Topics include chemical equilibrium, kinetics, acids/bases, oxidation/reduction, complexation, solid dissolution and precipitation, and reactions on solid surfaces. Prerequisite(s): Chemistry 108B or 112C. *K. Bruland*

124. Aquatic Organic Geochemistry. W

Introduction to organic geochemistry with emphasis on aquatic environments. Explores how non-living organic matter shapes biogeochemical cycles by carrying and sequestering reduced carbon and major nutrients and examines influence of chemical structure and environmental factors on transport and fate of organic molecules. Provides an introduction to organic biomarkers. Students cannot receive credit for this course and course 224. Prerequisite(s): basic college chemistry (Chemistry 1B, 1C); at least one quarter of college level organic chemistry required (e.g., Chemistry 7). *M. McCarthy*

130. Biological Oceanography. S

Biological description of sea, with emphasis on processes and patterns. Topics include microbial dynamics, phytoplankton and zooplankton production, and ecology of marine food webs. Emphasis placed on understanding how physical, chemical, and geological environment shapes biology and ecology of oceans, including such topics as harmful algal blooms, global estimates of productivity, and effects of humans on environment. Students may not receive credit for this course and Ocean Sciences 230. Prerequisite(s): previous course in ocean sciences recommended. Enrollment restricted to juniors (with instructor approval), seniors, graduate students. *R. Kudela*

172. Geophysical Fluid Dynamics. W

Introduces fluid motion influenced by rotation. Topics include the Coriolis force, geostrophic flow, potential vorticity, the shallow water model, quasigeostrophic approximation, planetary waves, Ekman theory, thermal wind, models of the large-scale oceanic and atmospheric circulation, and equatorial dynamics. Taught in conjunction with course 272. Students cannot receive credit for this course and course 272. (Also offered as Earth Sciences 172. Students cannot receive credit for both courses.) Prerequisite(s): Physics 107; Mathematics 22 or 23B recommended. Offered in alternate academic years. *C. Edwards*

199. Independent Study. F,W,S

Students submit petition to sponsoring agency. *The Staff*

Graduate Courses**200. Physical Oceanography. F**

Introduction to the physics of the ocean-atmosphere system. Structure of the ocean and atmosphere. Energy balance and radiative transfer. Atmospheric circulation; weather and climate. Physical properties of seawater, air-sea interaction, mixing, water masses, ocean circulation, waves; CO₂ and global change. Designed for beginning graduate students in ocean sciences and upper-division science majors. Calculus and physics recommended as preparation. *A. Moore*

211. Climate Dynamics. *

Introduction to the dynamics of the Earth climate system. Topics: climate system components; the global energy balance; radiative transfer; the hydrological cycle; general circulations of the atmosphere and ocean; El Niño; the North Atlantic Oscillation; the Pacific Decadal Oscillation. Enrollment restricted to graduate students. Undergraduates may enroll by permission of instructor. Previous courses in calculus and ocean sciences or earth sciences are recommended. *A. Moore*

213. Biogeochemical Cycles. *

Overview of biogeochemical cycles, present and past, and geochemical models. Topics include: marine, terrestrial, and global views of the carbon, nitrogen, phosphorus, silicon, sulfur, and oxygen cycles, and the evolution of these cycles and Earth's redox balance through geologic time. (Also offered as Earth Sciences 213. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Upper-division undergraduates may enroll with instructor approval. College-level chemistry and an upper-division course in at least one relevant discipline are recommended. *M. Delaney*

215. Predicting the Atmosphere, Ocean, and Climate. *

Introduction to the theory and practice of operational prediction in meteorology, oceanography, and climate. Topics: observations and estimation theory; dynamic adjustment and initialization; estimation theory; data assimilation; forecast verification; predictability; ocean state estimation; seasonal forecasting. Enrollment restricted to graduate students. Undergraduates may enroll with instructor approval. Courses 200, 264, Earth Sciences 272, or equivalents are recommended. *A. Moore*

218. Marine Microbial Ecology. S

Recent developments in the study of marine bacteria and their role in the marine ecosystem. Emphasis on biochemistry and physiology in relation to metabolic activity and elemental cycles, trophic interactions and flows of material and energy in marine food webs. Exams and research paper required. Students cannot receive credit for this course, course 118, and Biology 171. Biology 20C and Chemistry 1C recommended. *J. Zehr*

220. Chemical Oceanography. W

A chemical description of the sea; emphasis on the chemical interactions of the oceans with the biosphere, atmosphere, and lithosphere. Topics include biogeochemical cycles and the use of chemical tracers to study oceanic and coastal processes. Course designed for graduate students; available to upper-division science majors. *K. Bruland*

224. Aquatic Organic Geochemistry. W

Introduction to organic geochemistry with emphasis on aquatic environments. Explores how non-living organic matter shapes biogeochemical cycles by carrying and sequestering reduced carbon and major nutrients and examines influence of chemical structure and environmental factors on transport and fate of organic molecules. Provides an introduction to organic biomarkers. Students cannot receive credit for this course and course 124. *M. McCarthy*

230. Biological Oceanography. S

Biological description of sea, with emphasis on processes and patterns. Topics include microbial dynamics, phytoplankton and zooplankton production, and ecology of marine food webs. Emphasis placed on understanding how physical, chemical, and geological environment shapes biology and ecology of oceans, including such topics as harmful algal blooms, global estimates of productivity, and effects of humans on environment. Students may not receive credit for this course and course

130. Prerequisite(s): previous course in ocean sciences recommended. Enrollment restricted to graduate students. *R. Kudela*

260. Introductory Data Analysis in the Ocean and Earth Sciences. S

Introduces data analysis methods regularly encountered within the ocean and earth sciences. Topics include: error propagation; least squares analysis; data interpolation methods; empirical orthogonal functions; and Monte Carlo methods applied to problems drawn from oceanographic and earth sciences datasets. Introduces and uses a high-level computing and visualization package, MATLAB. Student project consists of analysis of the student's own dataset. (Also offered as Earth Sciences 260. Students cannot receive credit for both courses.) Prerequisite(s): previous course in ocean or earth sciences is recommended. Enrollment restricted to graduate students; undergraduates with permission of instructor. *C. Edwards*

272. Geophysical Fluid Dynamics. W

Introduces fluid motion influenced by rotation. Topics include the Coriolis force, geostrophic flow, potential vorticity, the shallow water model, quasigeostrophic approximation, planetary waves, Ekman theory, thermal wind, models of the large-scale oceanic and atmospheric circulation, and equatorial dynamics. Students cannot receive credit for this course and course 172. (Also offered as Earth Sciences 272. Students cannot receive credit for both courses.) Physics 227 is recommended as preparation. Enrollment restricted to graduate students. Offered in alternate academic years. *C. Edwards*

280. Marine Geology. F

Geology of the marine environment. Topics include controls on the types, origin, and distribution of marine sediments; geology of oceanic crust; evolution of continental margins and plate boundaries; introduction to paleoceanography. Students cannot receive credit for this course and Earth Sciences 102. Enrollment restricted to graduate students. *M. Delaney, A. Ravelo*

285. Past Climate Change. S

Reviews the fundamentals of climate dynamics and explores how Earth's environment is a product of the interaction of its components. Uses examples of climate change from historical and geologic records, and from predictions of the future. Recommended for junior, senior, and graduate students in the sciences. *A. Ravelo*

286. Introduction to Ocean Modeling. *

Fundamental concepts and ideas that underpin numerical modeling of the ocean. Topics include numerical methods and solutions of partial differential equations (PDEs), ocean circulation, wave dynamics, ocean ecosystem model, and MATLAB programming. Enrollment restricted to graduate students, or to seniors by permission of instructor. *A. Moore*

290. Proseminar.

290A. Topics in Chemical Oceanography. *

A weekly seminar series covering recent developments in chemical oceanography. Different topics and approaches will be stressed from year to year. May be repeated for credit. *K. Bruland*

290B. Topics in Biological Oceanography. *

Explores different problems of special interest in biological oceanography. Different topics and approaches will be stressed from year to year. May be repeated for credit. *M. Silver*

290C. Topics in Marine Geochemistry. *

Selected topics in geochemistry. Discussion of theoretical models, different approaches, and recent research. Topics vary from year to year. May be repeated for credit. *M. Delaney*

290D. Topics in Marine Microbiology. *

A weekly seminar series covering topics in environmental microbiology. Topics vary from year to year, and will include research in ecology, methodology, biochemistry and physiology of bacteria. Emphasis on the role of bacteria in biogeochemical cycling from microzone to global scales, with particular focus in marine systems. May be repeated for credit. *J. Zehr*

290E. Topics in Climatic and Oceanic Change. *

Weekly seminar series covering recent developments in climatic and oceanic change. Different topics and approaches stressed from year to year. Prerequisite(s): interview with instructor prior to first class meeting. May be repeated for credit. *A. Ravelo*

290G. Topics in Physical Oceanography. *

Weekly seminar series covering topics in physical oceanography as well as biological-physical interactions in the oceans. Different topics and approaches stressed from year to year. Enrollment restricted to graduate students; undergraduates may enroll with permission of instructor. May be repeated for credit. *The Staff*

290H. Topics in Ocean Optics. *

Examines recent developments and application of bio-optics to the marine environment, including theory, instrumentation, and remote sensing. Different topics and approaches emphasized from year to year. Prerequisite(s): previous course in ocean sciences recommended. Enrollment restricted to graduate students; senior

undergraduates with permission of instructor. May be repeated for credit. *R. Kudela*

290J. Topics in Marine Organic Geochemistry. *

Examines recent developments in uses of organic geochemistry to trace oceanographic and biogeochemical processes. Focuses on introduction to organic biomarkers, current literature, and evolving applications. Different topics and approaches emphasized from year to year. Prerequisite(s): previous course in ocean sciences and organic chemistry are recommended. Enrollment restricted to graduate students; seniors with instructor's permission. May be repeated for credit. *M. McCarthy*

292. Seminar (no credit). F,W,S

Weekly seminar on various topics attended by faculty, graduate, and upper-division undergraduate students. *J. Zehr, M. McCarthy, C. Edwards*

293. Graduate Research Seminar (2 credits). W

Weekly seminar series covering a spectrum of topics in oceanography. Designed for Ph.D. program graduate students in ocean sciences and those in biology, Earth sciences, chemistry, and physics with research interests in oceanography. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

296. Teaching in Ocean Sciences (2 credits). F

For new and/or relatively inexperienced graduate students in pedagogy of ocean sciences. Role and responsibilities of teaching in ocean sciences described and developed. Includes discussions about effective teaching methods; hands-on issues for work in the laboratory; university expectations; and regulations regarding teaching, organizational strategies, time management, and working with instructors and staff. Prerequisite(s): graduate standing or permission of instructor. Enrollment restricted to graduate students. *C. Edwards*

297. Independent Study.

Independent reading, research, and written reports not related to thesis research. Students submit petition to sponsoring agency. *The Staff*

299. Thesis Research.

Students submit petition to sponsoring agency. *The Staff*

*Not offered in 2011-12

Physical and Biological Sciences

204 Natural Sciences 2 Annex
(831) 459-2931
<http://pbsci.ucsc.edu>

(There were no substantive changes to the Physical and Biological Sciences Division's Program Description from the General Catalog 2010-12.)

Program Description

A broad range of majors is offered through the physical and biological sciences. The intellectual rigor of these majors ensures that our graduates are well prepared for further studies in graduate and professional schools, as well as careers in scientific research, environmental research, medicine, law, engineering, technology, and business.

The Division of Physical and Biological Sciences' interdisciplinary framework provides students with the opportunity to attend classes and pursue research that ranges from the study of atoms to the examination of distant galaxies. From abstract number theory to the development of new chemical compounds, from evolution to plate tectonics, we provide students not only with the skills to explore and discover the world but also to define and improve it.

Departments and programs affiliated with the Division of Physical and Biological Sciences include the Departments of Astronomy and Astrophysics; Chemistry and Biochemistry; Earth and Planetary Sciences; Ecology and Evolutionary Biology; Microbiology and Environmental Toxicology; Mathematics; Molecular, Cell, and Developmental Biology; Ocean Sciences; Physics; and the Science Communication Program. Our undergraduate affairs office helps students understand and manage the breadth and diversity of academic programs and resources that are available to students in the physical and biological sciences. The Undergraduate Affairs Advising Center is located on the third floor of Thimann Laboratories, room 387.

Philosophy

Cowell College
(831) 459-2070
<http://philosophy.ucsc.edu>

[Program Description](#) | [Changes to 2010-12 Catalog Highlighted](#) | [Faculty](#) | [Course Descriptions](#)

Program Description

Philosophy inquires into assumptions about and theories of the most basic facets of rational thought, e.g., what to believe (epistemology), what is (metaphysics), what to value (morality). Such questions can be studied by looking at answers that contemporary philosophers propose, by investigating the principles that other disciplines use to legitimate claims, or by learning how, historically, philosophers approached these issues. In this respect, "philosophy" names not only a historically defined subject matter, but also inquiry into any of the fundamental determinants of all forms of rational thought. Thus, students of philosophy can pursue a broad range of topics of the greatest historical, intellectual, and personal interest.

The department offers courses that relate these traditional philosophical questions to contemporary work in literature and the social and natural sciences. In addition, the department offers several courses that make a careful study of the classic texts in philosophy, ancient and modern. Moreover, the curriculum covers all the dominant contemporary schools of philosophy in the Anglo-American and European traditions.

The study of philosophy enables students to expand their abilities in critical thinking and reasoning as well as to improve their skills in verbal and written communication. Students may major or minor in philosophy.

Philosophy prepares students for many careers as well as for most professional schools, including law. Students who wish to go to graduate school in philosophy are encouraged to study logic at both the introductory and intermediate levels and any languages that are necessary for advanced scholarship in the different historical eras of philosophy.

Major Requirements

Courses

Eleven courses are required: two at the introductory level, two in the history of philosophy sequence (100A, 100B, 100C), and seven additional upper-division courses (including one advanced seminar). For some of the lower-division required courses, students may petition to substitute courses taken at other institutions. These 11 courses must meet the following distribution requirements:

Introductory. Course 9 and at least one of courses 11, 22 or 24;

History of philosophy. Two of 100A, 100B, or 100C (all three strongly recommended for students who anticipate graduate work in philosophy). Taking any two from the sequence Philosophy 100A, 100B, and 100C will satisfy the Disciplinary Communication (DC) requirement.

At least seven additional courses numbered 100A and above, one of which must be an advanced seminar numbered 190. Note that the two courses counted toward fulfilling the history of philosophy requirement cannot be counted among these seven additional courses. Courses 195A, 195B, and 199 also cannot be counted among these seven additional courses. All upper-division courses must be completed at UCSC unless a petition for an exception is approved by the undergraduate program adviser.

Courses must be satisfied in the following sequence. Before being eligible to enroll in any course in the history sequence (Philosophy 100A-100C), a student must have completed all required introductory courses, e.g., Philosophy 9 and at least one from Philosophy 11, 22, 24. Before being eligible to enroll in any philosophy course above Philosophy 100C, prospective majors must have taken at least one of the required history of philosophy courses (e.g., either Philosophy 100A, 100B, or 100C). Transfer students wishing to major in philosophy should consult with the Philosophy Department undergraduate adviser as soon as possible.

Disciplinary Communication Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC Requirement in philosophy is met by completing any two from the sequence Philosophy 100A, 100B, and 100C.

Comprehensive Requirement

In the fourth year, students satisfy the comprehensive (exit) requirement by taking one course numbered 190. This advanced seminar meets the standards of the senior-year level of achievement in philosophy. Students who do superior work in an advanced seminar can be awarded a notation of Honors in the evaluation for that course. In addition to Honors in an advanced seminar, graduating seniors with a distinguished record of achievement in their philosophy courses may be awarded Honors or Highest Honors in the philosophy major.

Graduation with Honors in Philosophy requires at least a 3.7 average in all philosophy courses taken at UCSC. Graduation with Highest Honors in Philosophy requires at least a 3.9 average in all philosophy courses taken at UCSC. Students with an average between 3.8 and 3.9 may be awarded Highest Honors by vote of the Philosophy Department.

Minor Requirements

A minor in philosophy consists of any nine of the 11 courses required for the major. At least five of these must be upper-division. There is no senior exit requirement for the minor.

Program Planning Notes

When a faculty member thinks that a student has done exceptional work that could be carried to a more advanced level, the student may be given the option of writing a senior essay (course 195A). Normally, the senior essay is completed in one quarter; in unusual circumstances, it can be continued for a second quarter (course 195B), but only if the writing requirements for course 195A are completed successfully and on time. The senior essay, like individual studies more generally, does not count toward the 11 courses required for the major.

After undergraduates have taken the requisite introductory courses, they have a wide range of upper-division courses from which to choose. Those who are considering advanced study are encouraged to consult regularly with any member of the philosophy faculty about the courses that would best prepare them for graduate work. Preparation for graduate work ought to begin before senior year. The Philosophy Department sponsors workshops in the fall quarter for students contemplating graduate school in philosophy.

Course Requirements

Fourteen courses are required: two introductory philosophy courses; two in the history of philosophy sequence; six upper-division philosophy courses; and four courses in the area of religious thought.

These 14 courses must meet the following distribution requirements:

- *Introductory.* Course 9 and at least one of 11, 22, 24.
- *History of Philosophy.* Philosophy 100A (*Ancient Greek Philosophy*) and either Philosophy 100B (*The Rationalists*) or Philosophy 100C (*The Empiricists*).
- *Upper-Division and/or Graduate Courses.* Six five-credit philosophy courses at UCSC, including one advanced seminar, and excluding Philosophy 199. These courses must include three advanced courses in philosophy of religion: either Philosophy 170 (*Interpretation of Religion*) or Philosophy 171 (*Faith and Reason*), and two other upper-division or graduate courses that involve philosophy of religion. The director of the concentration in religious thought will determine which philosophy courses count as involving philosophy of religion.
- *Transfer Students.* Students can petition the department for credit in the major for coursework done elsewhere. In general, equivalent introductory courses in philosophy may be substituted for UCSC philosophy introductory courses. One upper-division course taken at another four-year university may also be substituted by petition—submit a syllabus and supporting material from the class to the Philosophy Department office (Cowell 220). Only courses for which the student has received a B or better grade will be accepted for the major. The requirement of three upper-division or graduate philosophy of religion courses cannot be substituted with courses taken elsewhere; they must be taken at UCSC.

Graduate Program

The Department of Philosophy conceives of philosophy as a broad and inherently cross-disciplinary enterprise. The department has a particular emphasis in philosophy of science, broadly conceived. This embraces a wide range of topics, including those questions of value and normativity that naturally arise in connection with policies and applications of science and technology. Graduate students are able as well to take advantage of a wide range of courses in the history of philosophy, including ancient, early modern, Kantian, 19th-century, continental, American, and the history of 20th-century philosophy (analytic, continental, and combined). In addition to philosophical questions concerning science and in the history of philosophy, faculty research has also focused recently on metaphysics, epistemology, the philosophy of mind, the philosophy of language, moral

philosophy, moral psychology, environmental ethics, the philosophy of religion, philosophical logic, and the philosophy of history.

Both the master of arts (M.A.) and the doctor of philosophy (Ph.D.) programs encourage interaction with other fields.

Graduate Program Requirements

Breadth Requirements in the First Year

During their first year, all graduate students are expected to fulfill a set of breadth requirements. These requirements are designed to provide both a common experience on which students can build their individual projects and a shared framework within which they can exchange ideas. In addition to Philosophy 201, *First Year Seminar*, students must take at least one course in the area of metaphysics and epistemology and one course in the area of value theory according to a list determined annually by the graduate committee. During their first year of study all students must pass a logic competency examination with a grade of B or better. This examination will cover material typically taught in a first course in formal logic. For further details, see the graduate program statement on the department's web page or consult with the department's graduate adviser.

Ph.D. Program

The Ph.D. program provides students with closely monitored training in philosophy. The program is designed to be completed in six years or less. Graduate work in philosophy can lead to careers both inside and outside academia. Because most doctoral students will be preparing for a career that involves teaching philosophy, they are encouraged to be teaching assistants for at least three quarters.

Courses. A minimum of 12 graduate courses. Up to two courses may be taken from the offerings of other departments, and up to two courses may be independent studies.

Language requirement. The foreign language will be individually determined based on the relevance of such linguistic skills to the research interests of the student. Proficiency can be demonstrated either by passing a written examination administered by the department or by successfully completing a language course approved by the graduate committee.

Qualifying examination. Near the end of the required coursework, doctoral students will develop a research project. The qualifying examination, normally taken during the third year of enrollment, is centered on a qualifying essay that demonstrates the candidate's ability to do extended, dissertation-level research and analysis relevant to the proposed thesis topic and dissertation plan. The examination focuses on the student's research project and on the fields of scholarship it presupposes.

Dissertation. The final requirement for the Ph.D. degree is a dissertation representing a contribution to philosophical research.

M.A. Program

Applications to the M.A. program are welcomed from talented students with diverse academic backgrounds. The program is open not only to applicants who majored in philosophy as undergraduates, but also to applicants from other disciplines, who have a significant background in philosophy and who now want to study philosophy more intensively. The program is designed to be completed in one or two years.

Courses. A minimum of nine graduate courses. Up to two courses may be taken from the offerings of other departments, and up to two courses may be independent studies.

Languages. There is no foreign language requirement for M.A. students.

Master's paper. By the end of the second year of study and the completion of 45 credits, M.A. students will submit a master's paper, which will normally be defended orally before a committee of two faculty members.

Relationship of the M.A. and Ph.D. Programs

Students in the M.A. and Ph.D. programs will be in the same classes and work on the same course distribution requirements. Enrollment in the M.A. program confers no advantage for admission to the Ph.D. program.

Applications and Admissions

Application materials are available online at <http://graddiv.ucsc.edu>. Further information regarding the program may be requested from the Department of Philosophy at (831) 459-4578, fax: (831) 459-2650. Visit the web site at <http://philosophy.ucsc.edu>.

Philosophy

Cowell College

(831) 459-2070

<http://philosophy.ucsc.edu>**Program Description**

Philosophy inquires into assumptions about and theories of the most basic facets of rational thought, e.g., what to believe (epistemology), what is (metaphysics), what to value (morality). Such questions can be studied by looking at answers that contemporary philosophers propose, by investigating the principles that other disciplines use to legitimate claims, or by learning how, historically, philosophers approached these issues. In this respect, "philosophy" names not only ~~an~~ historically defined subject matter, but also inquiry into any of the fundamental determinants of all forms of rational thought. Thus, students of philosophy can pursue a broad range of topics of the greatest historical, intellectual, and personal interest.

The department offers courses that relate these traditional philosophical questions to contemporary work in literature and the social and natural sciences. In addition, the department offers several courses that make a careful study of the classic texts in philosophy, ancient and modern. Moreover, the curriculum covers all the dominant contemporary schools of philosophy in the Anglo-American and European traditions.

The study of philosophy enables students to expand their abilities in critical thinking and reasoning as well as to improve their skills in verbal and written communication. Students may major or minor in philosophy. ~~The department also offers a major in philosophy with a concentration in religious thought.~~

Philosophy prepares students for many careers as well as for most professional schools, including law. Students who wish to go to graduate school in philosophy are encouraged to study logic at both the introductory and intermediate levels and any languages that are necessary for advanced scholarship in the different historical eras of philosophy.

Major Requirements**Courses**

Eleven courses are required: two at the introductory level, two in the history of philosophy sequence (100A, 100B, 100C), and seven additional upper-division courses (including one advanced seminar). For some of the lower-division required courses, students may petition to substitute courses taken at other institutions. These 11 courses must meet the following distribution requirements:

Introductory. Course 9 and at least one of courses 11, 22, ~~or~~ 24, ~~28, or any Philosophy 80 course;~~

History of philosophy. Two of 100A, 100B, or 100C (all three strongly recommended for

students who anticipate graduate work in philosophy). Taking any two from the sequence Philosophy 100A, 100B, and 100C will satisfy the Disciplinary Communication (DC) requirement.

At least seven additional courses numbered 100A and above, one of which must be an advanced seminar numbered 190. Note that the two courses counted toward fulfilling the history of philosophy requirement cannot be counted among these seven additional courses. Courses 195A, 195B, and 199 also cannot be counted among these seven additional courses. All upper-division courses must be completed at UCSC unless a petition for an exception is approved by the undergraduate program adviser.

~~In order to be a philosophy major,~~ ~~C~~ourses must be satisfied in the following sequence. Before being eligible to enroll in any course in the history sequence (Philosophy 100A-100C), a student must have completed all required introductory courses, e.g., Philosophy 9 and at least one from Philosophy 11, 22, 24, ~~28, or any 80-sequence course~~. Before being eligible to enroll in any philosophy course above Philosophy 100C, prospective majors must have taken at least one of the required history of philosophy courses (e.g., either Philosophy 100A, 100B, or 100C). Transfer students wishing to major in philosophy should consult with the Philosophy Department undergraduate adviser as soon as possible.

Disciplinary Communication Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC Requirement in philosophy is met by completing any two from the sequence Philosophy 100A, 100B, and 100C.

Comprehensive Requirement

In the fourth year, students satisfy the comprehensive (exit) requirement by taking one course numbered 190. This advanced seminar meets the standards of the senior-year level of achievement in philosophy. Students who do superior work in an advanced seminar can be awarded a notation of Honors in the evaluation for that course. In addition to Honors in an advanced seminar, graduating seniors with a distinguished record of achievement in their philosophy courses may be awarded Honors or Highest Honors in the philosophy major. Graduation with Honors in Philosophy requires at least a 3.7 average in all philosophy courses taken at UCSC. Graduation with Highest Honors in Philosophy requires at least a 3.9 average in all philosophy courses taken at UCSC. Students with an average between 3.8 and 3.9 may be awarded Highest Honors by vote of the Philosophy Department.

Minor Requirements

A minor in philosophy consists of any nine of the 11 courses required for the major. At least five of these must be upper-division. There is no senior exit requirement for the minor.

Program Planning Notes

When a faculty member thinks that a student has done exceptional work that could be carried to a more advanced level, the student may be given the option of writing a senior essay (course 195A). Normally, the senior essay is completed in one quarter; in unusual circumstances, it can be continued for a second quarter (course 195B), but only if the writing requirements for course 195A are completed successfully and on time. The senior essay, like individual studies more generally, does not count toward the 11 courses required for the major.

After undergraduates have taken the requisite introductory courses, they have a wide range of upper-division courses from which to choose. Those who are considering advanced study are encouraged to consult regularly with any member of the philosophy faculty about

the courses that would best prepare them for graduate work. Preparation for graduate work ought to begin before senior year. The Philosophy Department sponsors workshops in the fall quarter for students contemplating graduate school in philosophy.

~~Philosophy Major with Concentration in Religious Thought~~

~~This program is for students who wish to use the discipline of philosophy as a basis for pursuing an interest in religious thought. It consists of an individually planned sequence of at least four courses dealing with religious thought, supplementing a core of courses in philosophy. Admittance into the program requires consultation with the faculty director of the concentration and approval by the department undergraduate adviser. A sequence of upper-division courses is needed to fulfill the religious thought concentration. Students should plan to meet with the director and the undergraduate adviser at least once a year to discuss their progress.~~

~~To major in this concentration, the student petitions the department through the normal major declaration process by the established campus quarterly deadlines.~~

Course Requirements

Fourteen courses are required: two introductory philosophy courses; two in the history of philosophy sequence; six upper-division philosophy courses; and four courses in the area of religious thought.

These 14 courses must meet the following distribution requirements:

- *Introductory.* Course 9 and at least one of 11, 22, 24, ~~28, or any Philosophy 80 course.~~
- *History of Philosophy.* Philosophy 100A (Ancient Greek Philosophy) and either Philosophy 100B (The Rationalists) or Philosophy 100C (The Empiricists).
- *Upper-Division and/or Graduate Courses.* Six five-credit philosophy courses at UCSC, including one advanced seminar ~~(190 series)~~, and excluding Philosophy 199. These courses must include three advanced courses in philosophy of religion: either Philosophy 170 (*Interpretation of Religion*) or Philosophy 171 (*Faith and Reason*), and two other upper-division or graduate courses that involve philosophy of religion. The director of the concentration in religious thought will determine which philosophy courses count as involving philosophy of religion.
- ~~Concentration in Religious Thought. Four courses in the area of religious thought from programs on campus such as anthropology, literature, history, history of art and visual culture, philosophy, psychology, and sociology. The director of the concentration in religious thought must approve these courses.~~
- *Transfer Students.* Students can petition the department for credit in the major for coursework done elsewhere. In general, equivalent introductory courses in philosophy may be substituted for UCSC philosophy introductory courses. One upper-division course taken at another four-year university may also be substituted by petition—submit a syllabus and supporting material from the class to the Philosophy Department office (Cowell 220). Only courses for which the student has received a B or better grade will be accepted for the major. The requirement of three upper-division or graduate philosophy of religion courses cannot be substituted with courses taken elsewhere; they must be taken at UCSC.

Graduate Program

The Department of Philosophy conceives of philosophy as a broad and inherently cross-disciplinary enterprise. The department has a particular emphasis in philosophy of science, broadly conceived. This embraces a wide range of topics, including those questions of value and normativity that naturally arise in connection with policies and applications of science and technology. Graduate students are able as well to take advantage of a wide range of courses in the history of philosophy, including ancient, early modern, Kantian, 19th-century, continental, American, and the history of 20th-century philosophy (analytic, continental, and combined). In addition to philosophical questions concerning science and in the history of philosophy, faculty research has also focused recently on metaphysics,

epistemology, the philosophy of mind, the philosophy of language, moral philosophy, moral psychology, environmental ethics, the philosophy of religion, philosophical logic, and the philosophy of history.

Both the master of arts (M.A.) and the doctor of philosophy (Ph.D.) programs encourage interaction with other fields.

Graduate Program Requirements

Breadth Requirements in the First Year

During their first year, all graduate students are expected to fulfill a set of breadth requirements. These requirements are designed to provide both a common experience on which students can build their individual projects and a shared framework within which they can exchange ideas. In addition to Philosophy 201, *First Year Seminar*, students must take at least one course in the area of metaphysics and epistemology and one course in the area of value theory according to a list determined annually by the graduate committee. During their first year of study all students must pass a logic competency examination with a grade of B or better. This examination will cover material typically taught in a first course in formal logic. For further details, see the graduate program statement on the department's web page or consult with the department's graduate adviser.

Ph.D. Program

The Ph.D. program provides students with closely monitored training in philosophy. The program is designed to be completed in six years or less. Graduate work in philosophy can lead to careers both inside and outside academia. Because most doctoral students will be preparing for a career that involves teaching philosophy, they are encouraged to be teaching assistants for at least three quarters.

Courses. A minimum of 12 graduate courses. Up to two courses may be taken from the offerings of other departments, and up to two courses may be independent studies.

Language requirement. The foreign language will be individually determined based on the relevance of such linguistic skills to the research interests of the student. Proficiency can be demonstrated either by passing a written examination administered by the department or by successfully completing a language course approved by the graduate committee.

Qualifying examination. Near the end of the required coursework, doctoral students will develop a research project. The qualifying examination, normally taken during the third year of enrollment, is centered on a qualifying essay that demonstrates the candidate's ability to do extended, dissertation-level research and analysis relevant to the proposed thesis topic and dissertation plan. The examination focuses on the student's research project and on the fields of scholarship it presupposes.

Dissertation. The final requirement for the Ph.D. degree is a dissertation representing a contribution to philosophical research.

M.A. Program

Applications to the M.A. program are welcomed from talented students with diverse academic backgrounds. The program is open not only to applicants who majored in philosophy as undergraduates, but also to applicants from other disciplines, who have a significant background in philosophy and who now want to study philosophy more intensively. The program is designed to be completed in one or two years.

Courses. A minimum of nine graduate courses. Up to two courses may be taken from the offerings of other departments, and up to two courses may be independent studies.

Languages. There is no foreign language requirement for M.A. students.

Master's paper. By the end of the second year of study and the completion of 45 credits, M.A. students will submit a master's paper, which will normally be defended orally before a committee of two faculty members.

Relationship of the M.A. and Ph.D. Programs

Students in the M.A. and Ph.D. programs will be in the same classes and work on the same course distribution requirements. Enrollment in the M.A. program confers no advantage for admission to the Ph.D. program.

Applications and Admissions

Application materials are available online at <http://graddiv.ucsc.edu>. Further information regarding the program may be requested from the Department of Philosophy at (831) 459-4578, fax: (831) 459-2650. Visit the web site at <http://philosophy.ucsc.edu>.

Lower-Division Courses

8. Logic, Numbers, and Emotion: Thinking Clearly in Everyday Life. *

Students practice distilling and critically assessing the barrage of argument and rhetoric with which they are confronted every day--on the Internet, in the media, on campus--and learn to subject their own beliefs to more rigorous, logical standards. (General Education Code(s): MF, Q.) *J. Ellis*

9. Introduction to Logic. F,W,S

A study of correct reasoning, concentrating on developing the skills necessary to distinguish logically correct from logically incorrect arguments. The emphasis is on modern symbolic logic, although the traditional theory of the syllogism is also covered. (General Education Code(s): MF, IH, Q.) (F) *J. Bowin*, (W) *R. Otte*, (S) *P. Roth*

11. Introduction to Philosophy. F,W,S

An introduction to the main areas of philosophy through critical reflection on and analysis of both classical and contemporary texts. Focuses on central and enduring problems in philosophy such as skepticism about the external world, the mind-body problem, and the nature of morality. (General Education Code(s): TA, IH.) (F) *D. Guevara*, (W) *A. Stone*, (S) *R. Winther*

22. Introduction to Ethical Theory. S

A consideration of ethical issues and theories focusing on the foundation of moral value and the principles governing character and behavior. Designed to extend and develop the student's abilities in philosophical reasoning about ethics. (General Education Code(s): CC, IH.) *The Staff*

24. Introduction to Ethics: Contemporary Moral Issues. W

An examination of the conceptual and moral issues that arise in connection with such topics as abortion, racism and war and violence, world hunger, humans and their interactions with the nonhuman environment. The readings are drawn from recent philosophical articles on these topics. (General Education Code(s): PE-H, IH.) *The Staff*

26. Existentialism and After. *

A survey of recent movements in European thought, such as phenomenology, existentialism, hermeneutics, critical theory, continental feminism, and poststructuralism, with some attention to their 19th-century precursors. Selections from major philosophical treatises are supplemented with literary works. (General Education Code(s): IH.) *The Staff*

28. Environmental Ethics. *

This course is an introduction to the moral issues raised by our interactions with nonhuman animals and with the rest of the natural environment. The course will relate traditional moral theories to contemporary literature on the ethics of nature conservation and environmental protection. The course is intended as a first course in philosophy as well as a first course in ethics; therefore, questions concerning the nature of philosophical inquiry and the ways in which philosophical inquiry is different from inquiries conducted within other disciplines will also be addressed. (General Education Code(s): PE-E, IH.) (FWS) *The Staff*

80E. Latin American Philosophy. *

Is there a general school of philosophy endemic to Latin America? Would it have to appeal to quintessential Western philosophical questions regarding knowledge, values, and reality? If not, why not, and would it then still count as philosophy? What difference do ethnic and national diversity, as well as strong political and social inequality, make to the development of philosophical questions and frameworks? Course explores a variety of historically situated Latin American thinkers who investigate ethnic identity, gender, and socio-political inequality and liberation, and historical memory, and who have also made important contributions to mainstream analytical and continental philosophy. (Also offered as Latin American&Latino Studies 80E. Students cannot receive credit for both courses.) (General Education Code(s): T4-Humanities and Arts, E.) *R. Winther*

80F. Philosophical Puzzles, Paradoxes, and Conundrums. *

Many philosophical problems have origins in puzzles and paradoxes. One of the most famous is Zeno's paradox of motion. Among others are paradox of the heap (Sortes paradox), Newcomb's puzzle (puzzle about rational decision making), Problem of the Many (problem about material

objects), and Liar paradox (paradox for semantics). Over long history of philosophy, many such puzzles and paradoxes have been discovered; some have been solved, and others have yet to be solved. (General Education Code(s): T4-Humanities and Arts.) *The Staff*

80G. Bioethics in the 21st Century: Science, Business, and Society. F

Serves science and non-science majors interested in bioethics. Guest speakers and instructors lead discussions of major ethical questions having arisen from research in genetics, medicine, and industries supported by this knowledge. (Also offered as Biomolecular Engineering 80G. Students cannot receive credit for both courses.) (General Education Code(s): PE-T, T6-Natural Sciences or Humanities and Arts.) *The Staff*

80L. Life, Logic, and Learning. *

Develops students' thinking and intellectual know-how in three ways of practical value to them: 1) the basic principles of logical thinking-standard rhetorical maneuvers, common fallacies of probability, features of persuasive argument, etc.; 2) stronger skills for approaching learning activities through hands-on practice with strategies from learning sciences; 3) exploration, in a personal yet academically rigorous way, of the difficult "life" questions that preoccupy many students: What should I do after college? What makes for a happy and fulfilling life? (General Education Code(s): T4-Humanities and Arts.) *J. Ellis*

80M. Philosophical Foundations of Science Studies. *

Provides a philosophical perspective concerning the revolution in the understanding of science that generated the so-called "science wars." Introduces the changed philosophical understanding of science shared and presupposed in the fields of science, technology, and society. (Formerly *Science and Society*.) (General Education Code(s): T5-Humanities and Arts or Social Sciences.) *P. Roth*

80S. The Nature of Science. F

A survey of what philosophers have said about the nature of science and scientific change. Emphasis is placed on whether science is best characterized as the gradual accumulation of truth or whether truth is irrelevant to scientific change. (General Education Code(s): T6-Natural Sciences or Humanities and Arts.) *The Staff*

99. Tutorial. F,W,S

The Staff

Upper-Division Courses

100. Vienna Circle and American Philosophy. *

Study of philosophical movement called the Vienna Circle, named so chiefly for intellectual excellence of its members, but also for external historical reasons. Course pays careful attention to intercultural aspects of ideas of the Vienna Circle: intellectual climate under which these ideas were formed, how thoughts of its members found an echo outside of Austria, and how they made a lasting influence on philosophical thinking in England and in U.S. *The Staff*

100A. Ancient Greek Philosophy. F

Survey of ancient Greek philosophy of the Classical and Hellenistic periods. Begins with Socrates and the pre-Socratics, then undertakes an intensive study of Plato and Aristotle. Course then surveys the main developments that follow: Epicureanism, Stoicism, and Scepticism. (Formerly course 91.) (General Education Code(s): W satisfied by taking this course and either course 100B or 100C.) Prerequisite(s): course 9; courses 11 or 22 or 24 or 28 or any 80 course; and satisfaction of the Entry Level Writing and Composition requirements. *J. Bowin*

100B. The Rationalists. W

A study of the historical background and the present relevance of Descartes, Spinoza, and Leibniz. (Formerly course 93.) (General Education Code(s): W satisfied by taking this course and either course 100A or 100C.) Prerequisite(s): course 9; courses 11 or 22 or 24 or 28 or any 80 course; and satisfaction of the Entry Level Writing and Composition requirements. *A. Stone*

100C. The Empiricists. S

A critical study (based on original texts) of Locke, Berkeley, and especially Hume on the nature of knowledge, perception, causation, morality, religion, and political society. (Formerly course 94.) (General Education Code(s): W satisfied by taking this course and either course 100A or 100B.) Prerequisite(s): course 9; courses 11 or 22 or 24 or 28 or any 80 course; and satisfaction of the Entry Level Writing and Composition requirements. *D. Guevara*

106. Kant. S

Intensive study of Kant's philosophy, particularly his epistemology and metaphysics developed in his *Critique of Pure Reason*. Prerequisite(s): course 100A or 100B or 100C. Enrollment limited to 70. *A. Stone*

107. Nineteenth-Century Philosophy. *

A study of some European philosophers of the 19th century, with particular attention to Hegel, Schopenhauer, and Nietzsche. (Formerly course 108.) Prerequisite(s): course 100A or 100B or 100C. *J. Hoy*

108. Phenomenology. W

French phenomenology includes primarily the work of Jean-Paul Sartre, Simone de Beauvoir, and Maurice Merleau-Ponty. Additional topics include the nature of consciousness and agency. Course

includes discussion of French feminists' reactions to Simone de Beauvoir and Emmanuel Levinas. Prerequisite(s): course 100A or 100B or 100C. *J. Hoy*

109. Poststructuralism and After. *

The three major poststructuralist philosophers are Michel Foucault, Jacques Derrida, and Gilles Deleuze. After studying their rejection of phenomenological accounts of consciousness and agency—as well as their program for studying power, bio-power, multiplicity, difference, and repetition,—current critics, such as Slavoj Žižek and Judith Butler, are also read for contrast between the methods of phenomenology, genealogy, and critical theory. Prerequisite(s): course 100A or 100B or 100C. *The Staff*

110. Heidegger. *

A close study of early and late texts by Martin Heidegger, especially *Being and Time*. Prerequisite(s): course 106 or 107 or 108 or 109 or 111. Enrollment limited to 45. *The Staff*

111. Continental Philosophy. *

Study of recent work in continental philosophy. Topics vary. Prerequisite(s): course 100A or 100B or 100C. Enrollment restricted to junior and senior philosophy majors. *W. Godzich*

112. American Philosophy. *

Study of classical American philosophers, specifically Emerson, Peirce, James, and Dewey, with emphasis on their views of metaphysics, epistemology, ethics, and philosophy of religion. Some attention is also paid to recent pragmatic tendencies in American philosophy. Prerequisite(s): course 100A or 100B or 100C. *R. Winther*

113. The Origins of Analytic Philosophy. W

An examination of the beginnings of analytic philosophy, with primary interest in the reformulation of traditional philosophical problems by Frege, Russell, and the early Wittgenstein. Some attention is also paid to the development of Vienna Circle logical positivism (Schlick, Carnap, Waismann). Prerequisite(s): course 100A or 100B or 100C. Enrollment limited to 39. May be repeated for credit. *P. Roth*

114. Probability and Confirmation. *

Studies the philosophical foundations of probability, induction, and confirmation. Different interpretations of probability studied, and solutions to various problems and paradoxes investigated. Students cannot receive credit for this course and course 214. Prerequisite(s): course 9, and course 100A or 100B or 100C. *R. Otte*

115. Formal Methods in Philosophy. *

Study of formal methods commonly used in analytic philosophy. Emphasis is on developing the technical tools to enable one to read and do modern analytic philosophy. Applications of various formal tools to philosophical problems will also be discussed. Prerequisite(s): course 9, and course 100A or 100B or 100C. *R. Otte*

116. Logic, Sets, and Functions. *

Introduction to basic set theory, recursive definitions, and mathematical induction. Provides a bridge between course 9 and courses 117 and 119. Strong emphasis on proving theorems and constructing proofs, both formal proofs and proofs in the customary, informal style used by mathematicians. Prerequisite(s): course 9; and two from courses 100A, 100B, and 100C. *J. Bowin*

117. Non-Classical Logic. *

Investigation of non-classical logic. Several propositional non-classical logics, such as various model logics, multi-valued logics, and relevance logics studied. Meta-theoretic results, including soundness and completeness, investigated for each logic studied. Prerequisite(s): course 9, and course 100A or 100B or 100C. Enrollment limited to 40. *The Staff*

119. Intermediate Logic. *

Detailed treatment of the semantics of first order logic and formal computability. Completeness, undecidability of first order logic and Lowenheim-Skolem results also proven. Nature and formal limits of computability and introduction to incompleteness also investigated. Students cannot receive credit for this course and course 219. Prerequisite(s): course 9, and course 100A or 100B or 100C. *R. Otte*

120. Philosophical Writing. *

Training in philosophical thinking and its expression in written form. Prerequisite(s): at least one of course 100A or 100B or 100C; and satisfaction of Entry Level Writing and Composition requirements. Enrollment restricted to philosophy majors. Enrollment limited to 54. (General Education Code(s): W.) *The Staff*

121. Knowledge and Rationality. F

An investigation of modern theories of knowledge, justification, and rationality. One course in philosophy is strongly recommended prior to taking this course. Prerequisite(s): course 100A or 100B or 100C. *P. Roth*

122. Topics in Metaphysics. S

Topics vary each quarter, and may focus on one or more sub-fields of metaphysics, e.g., philosophy of time, philosophy of persistence, etc.; or the course may be taught as a general survey of metaphysics. Prerequisite(s): course 9, and course 100A or 100B or 100C. *J. Bowin*

123. Philosophy of Language. *

Current theories of the nature and preconditions of language, the nature of meaning, and the nature of truth. Prerequisite(s): course 100A or 100B or 100C; or consent of instructor. Enrollment limited to 82. *J. Ellis*

125. Philosophy of Science. S

An examination of various topics that arise in thinking about science. Different philosophical problems, such as realism, instrumentalism, confirmation, explanation, space and time, and rational decision making are extensively discussed and criticized. Prerequisite(s): course 100A or 100B or 100C. *R. Winther*

126. Philosophy of Social Sciences. *

Examines philosophical concerns regarding the methods and assumptions of the social sciences. For example, must the methods of the social sciences differ in some important ways from those used by the natural sciences? Another issue concerns problems arising from studying groups where the very notion of rationality appears to vary from culture to culture or over historical periods. Prerequisite(s): at least one of course 100A or 100B or 100C. *P. Roth*

127. Philosophy of Biology. *

Can developmental processes be reduced to gene expression? Does the history of life exhibit trends (e.g. increasing complexity)? How are we to understand key concepts such as "fitness," "species," "adaptation," and "gene?" Is there such a thing as human nature? Course surveys these and other core philosophical topics in the biological sciences. Prerequisite(s): course 100A or 100B or 100C; satisfaction of Entry Level Writing and Composition requirements. Enrollment limited to 39. (General Education Code(s): W.) *The Staff*

133. Philosophy of Mind. *

Focuses on philosophical questions, both historical and contemporary, concerning the relation between body and mind. Particular attention is given to whether consciousness can be totally explained in physical terms. Prerequisite(s): course 100A or 100B or 100C. *J. Ellis*

135. Philosophy of Psychology. *

Looks at philosophical issues raised by current research on the nature of perception, cognition, and consciousness in psychology and cognitive science. Can there be a science of the mind? Could machines be conscious? Do animals have minds? How did the mind evolve? These and a host of related questions form the subject matter of this course. Students cannot receive credit for this course and course 235. Prerequisite(s): course 100A or 100B or 100C, or by consent of instructor. Enrollment restricted to sophomores, juniors, and seniors. *The Staff*

137. Practical Rationality. *

Examines challenges to what has been a dominant understanding of practical rationality: the claim that reason can never guide action in itself; that acting against one's better judgment is necessarily irrational; that emotions disrupt rather than facilitate practical reasoning. Prerequisite(s): course 100A or 100B or 100C. *The Staff*

138. Wittgenstein. *

Focuses on the writings of the Austrian philosopher Ludwig Wittgenstein. Wittgenstein's work is typically divided into three time periods: early, middle, and late. Prerequisite(s): course 100A or 100B or 100C. Enrollment restricted to junior and senior philosophy majors. *J. Ellis*

139. Freud. F

The development of Freud's concept of mind. Extensive reading tracing the origins and development of Freud's theories and concepts (e.g., abreaction, psychic energy, defense, wish-fulfillment, unconscious fantasy, dreams, symptoms, transference, cure, sexuality) and emphasizing the underlying model of the mind and mental functioning. (Also offered as Psychology 163. Students cannot receive credit for both courses.) Offered in alternate academic years. *J. Neu*

140. History of Ethics. *

A careful study of any one or a number of select primary texts in the history of moral philosophy, with some emphasis on the relation to contemporary issues. Prerequisite(s): course 100A or 100B or 100C. *D. Guevara*

141. Epistemology and Cognition. F

Epistemology is preoccupied with *skepticism*, the view that knowledge is unobtainable. Recently, there has been skepticism voiced about the status of *epistemology* itself; philosophers conversant in cognitive science suggest that epistemology is beset with dubious presuppositions. We survey epistemology, cognitive science, and their interface. Students cannot receive credit for this course and course 241. Prerequisite(s): at least one of course 100A or 100B or 100C. Enrollment restricted to junior and senior philosophy majors. *The Staff*

142. Advanced Ethics. W

An examination of central issues in ethical theory including the nature of and justification for the moral point of view, the place of reason in ethics, the status of moral principles, and the nature of moral experience. Prerequisite(s): course 22, 24, or 28, and course 100A or 100B or 100C. *D. Guevara*

143. Applied Ethics: Ethics Bowl. F

Intensive application of ethics through debate as preparation to participate in the California Regional Ethics Bowl. Covers major modern ethical theories and areas of applied ethical theory

relevant to the 15 cases created annually by the Association for Practical and Professional Ethics. Students develop oral advocacy skills and have the opportunity to compete for a position on the UCSC Ethics Bowl team. Two teams of five are sponsored by the Philosophy Department and Stevenson College. Enrollment by permission of instructor. Enrollment limited to 15. May be repeated for credit. *The Staff*

144. Social and Political Philosophy. *

A study of selected classical and contemporary writings dealing with topics such as the nature and legitimacy of the liberal state, the limits of political obligation, and theories of distributive justice and rights. (Also offered as Legal Studies 144. Students cannot receive credit for both courses.) Prerequisite(s): course 100A or 100B or 100C. Offered in alternate academic years. *The Staff*

145. Brave New World: Ethical Issues in Genetics. *

Study of ethical issues involved in recent and upcoming advances in genetic research and technology such as genetic engineering, cloning, human embryo research, genetic experimentation, use of an individual's genetic information, and the manipulation of human evolution. Also discusses fundamental issues such as the moral responsibility of scientists, our obligations to future generations, and the notion of human perfectability. Prerequisite(s): course 100A or 100B or 100C. *The Staff*

146. Philosophy of Law. *

Exploration of selected problems in jurisprudence: "legal reasoning" and social policy, rules and individual cases, the mental element in the law, punishment and responsibility, causation and fault, liberty and paternalism, etc. (Also offered as Legal Studies 146. Students cannot receive credit for both courses.) Prerequisite(s): course 100A or 100B or 100C. *J. Neu*

147. Topics in Feminist Philosophy. *

Topics in feminist philosophy, which may include: the nature of feminist philosophy, feminist approaches to philosophical issues, social and political philosophy, theories of knowledge, ethics, aesthetics, and science, technology, and medicine studies. Presupposes some familiarity with philosophy or feminist scholarship. (Also offered as Feminist Studies 168. Students cannot receive credit for both courses.) Prerequisite(s): course 100A or 100B or 100C. *J. Hoy*

148. The Holocaust and Philosophy. *

By using the historiography of the Holocaust as a case study, examines the epistemology and ontology of historical knowledge, i.e., how the past is known, and what about it there is to know. Prerequisite(s): course 100A or 100B or 100C. Enrollment restricted to juniors and seniors. *P. Roth*

150. Moral Aspects of Decision Making. *

How should you act when any course of action would contradict the rules of morality? This situation is "the question of dirty hands." It is connected to the doctrine of double effect: the claim that although willing evil as a means to some good result is always wrong, it is permissible to cause evil as a side effect while aiming at a good result. Discussions include practical issues, such as democracy's combat against terrorism; and theoretical issues, such as the difference between action and omission, and the connection between goodwill and good (or bad) results. Prerequisite(s): course 100A or 100B or 100C; or consent of instructor. *The Staff*

151. Modern Theories of Justice. *

Questions of social and distributive justice are as ancient as Aristotle; yet, modern philosophy, with its developing notions of democracy and quality, has added much sophistication and subtlety to these questions, especially since the publication of John Rawls' *A Theory of Justice* (1971). Issues discussed include: personal relations, concept of community, the notion of the State, and global justice. Prerequisite(s): at least one of course 100A or 100B or 100C; or consent of instructor. *The Staff*

152. Aesthetics. *

Problems about form, meaning, and interpretation in art, as found in major aesthetic theories from the philosophical tradition, and also in a variety of encounters between recent philosophy and the arts. One course in philosophy is strongly recommended prior to taking this course. Prerequisite(s): course 100A or 100B or 100C. (General Education Code(s): A.) *The Staff*

153. Philosophy of Race. *

Topics include conceptual-analytical and political-social issues. Selected topics may include: the ontology of race; race as real or constructed; scientific understandings of race; race and identity; and color-blind versus color-sensitive theories of justice and political policy. Prerequisite(s): course 100A or 100B or 100C; or consent of instructor. *The Staff*

154. Philosophy in Literature. *

Story, drama, and poetry considered as sources of philosophical perspective or as particular challenges to philosophical interpretation. Also, discussion of literary and imaginative elements in philosophical writing. One course in philosophy is strongly recommended prior to taking this course. Prerequisite(s): course 100A or 100B or 100C. *The Staff*

170. The Interpretation of Religion. S

A study of different philosophical responses to religious belief and practice, from the classical "proofs" of religion, to skeptical critiques of religious experience, to conceptual issues in the interpretation of religious texts. Prerequisite(s): course 100A or 100B or 100C. *The Staff*

171. Faith and Reason.

Recent work in analytic philosophy of religion, concentrating on traditional theism. Topics include arguments for and against the existence of God, religious experience, miracles, the relation of faith and reason, and problems such as freedom and divine foreknowledge. Prerequisite(s): course 9, and course 100A or 100B or 100C. *R. Otte*

180R. Readings in Philosophy (2 credits).

Discussion-based course centered on readings in contemporary philosophy. Readings change each term and are a mixture of books, chapters from books, and articles. Readings are primarily in analytic philosophy, and student input is strongly encouraged. Prerequisite(s): One philosophy course. Enrollment by permission of instructor. Enrollment limited to 20. May be repeated for credit. *R. Otte*

190. Advanced Seminar.

190A. Topics in Ancient Greek Philosophy. S

Topics will vary each quarter and will focus on a major ancient Greek philosophical figure or work. Prerequisite(s): two from courses 100A, 100B, and 100C; or consent of instructor. Enrollment restricted to senior philosophy majors. Enrollment limited to 22. *J. Bowin*

190C. Advanced Topics in Contemporary Ethics. *

Examines one or more leading ethical theories, such as Kantianism, Virtue Theory, Consequentialism, and Humean ethical theory. Examines different foundational ethical principles and arguments for those principles, contrasting accounts of moral action and moral motivation, as well as epistemological and motivational role of emotions in ethical theory. Students cannot receive credit for this course and course 290C. Prerequisite(s): course 140 or 142; and two from courses 100A, 100B, and 100C. Enrollment restricted to senior philosophy majors. Enrollment limited to 22. *D. Guevara*

190D. Kant's Moral Theory. *

A careful study of Kant's moral theory, with an emphasis on the Groundwork for the Metaphysics of Morals, the Critique of Practical Reason, and the Metaphysics of Morals. Recent secondary sources are considered as well. Prerequisite(s): two from courses 100A, 100B, and 100C. Enrollment restricted to senior philosophy majors. Enrollment limited to 22. *D. Guevara*

190E. Major Figures in 19th-Century Philosophy. F

Focuses on philosophical writings and the significance of a single figure in 19th-century philosophy. May include, but not be limited to, Emerson, Hegel, Kierkegaard, Marx, Schopenhauer, Nietzsche, and Thoreau. Enrollment restricted to senior philosophy majors. Enrollment limited to 22. *A. Stone*

190F. Topics in Philosophy of Biology. W

Philosophy of biology is one of the fastest-growing areas of philosophy of science. Course gives advanced seniors an overview of many diverse topics currently under discussion in modern philosophy and biology and provides a foundation for further research, regardless of previous experience with the biological sciences. Students cannot receive credit for this course and course 290F. Prerequisite(s): two from courses 100A, 100B, and 100C. Enrollment restricted to senior philosophy majors. Enrollment limited to 22. *R. Winther*

190G. Wittgenstein. *

Focuses on the writings of the Austrian philosopher Ludwig Wittgenstein. Wittgenstein's work is typically divided into three periods: early, middle, and late. Topics covered include writings from one or more periods. Students cannot receive credit for this course and course 290G. Prerequisite(s): two from courses 100A, 100B, and 100C. Enrollment restricted to senior philosophy majors. Enrollment limited to 22. *J. Ellis*

190J. Advanced Topics in the History of Ethics. *

A careful study of any one of the main moral theories in the history of philosophy, with some emphasis on the relation to contemporary moral philosophy. Prerequisite(s): two from courses 100A, 100B, and 100C. Enrollment restricted to senior philosophy majors. Enrollment limited to 22. *D. Guevara*

190L. The Emotions. W

Analysis of particular emotions (e.g., jealousy, boredom, regret) and exploration of general theoretical issues (e.g., expression, control) with emphasis on moral psychology. Satisfies seminar requirement. Admission by interview with instructor. Prerequisite(s): two from courses 100A, 100B, and 100C; satisfaction of Entry Level Writing and Composition requirements. Enrollment restricted to juniors and seniors. Prerequisite(s): two from courses 100A, 100B, and 100C. Enrollment restricted to senior philosophy majors. Enrollment limited to 23. (General Education Code(s): W.) *J. Neu*

190M. William James. *

Intensive study of James's philosophy, including his philosophical psychology and pragmatic method. Covers James's epistemology, metaphysics, ethics, and philosophy of religion. Prerequisite(s): two from courses 100A, 100B, and 100C; and satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to senior philosophy majors. Enrollment limited to 22. (General Education Code(s): W.) *The Staff*

190N. Philosophy of Religion. *

An examination of recent work in philosophy of religion. The approach may vary between an analytic and continental approach in different years. Topics might include the rationality of belief in

God, religious epistemology, hermeneutics, and religious experience. Prerequisite(s): course 171 and two from courses 100A, 100B, and 100C. Enrollment restricted to senior philosophy majors. Enrollment limited to 22. *R. Otte*

190O. Topics in Epistemology. *

An examination of recent work in epistemology. May focus on topics such as perception, naturalized epistemology, probabilistic epistemology, theories of justification, a priori knowledge, and memory. (Formerly *Epistemology*.) Prerequisite(s): course 9; and two from courses 100A, 100B, and 100C. Enrollment limited to senior philosophy majors. Enrollment limited to 22. *R. Otte*

190P. Major Figures in Contemporary Philosophy. *

Focuses on philosophical writings and significance of a single figure in contemporary (20th- and 21st-century) philosophy. May include, but not be limited to, Russell, Whitehead, Wittgenstein, Husserl, Carnap, Murdoch, Quine, Irigaray, Derrida, and Davidson. Students cannot receive credit for this course and course 290P. Prerequisite(s): two from courses 100A, 100B, and 100C. Enrollment restricted to senior philosophy majors. Enrollment limited to 22. *A. Stone*

190Q. Philosophy of Mathematics. *

Introduction to problems of contemporary analytic philosophy of mathematics. Do mathematical objects exist? Are mathematical statements true? How can we know? Examines the historical background to contemporary debates and the positions which have been taken within them. Students cannot receive credit for this course and course 290Q. Prerequisite(s): course 9; and two from courses 100A, 100B, and 100C; and Mathematics 19A or 20A, or AP score of 4 on the BC exam, or Mathematics Placement Exam score of 40. Enrollment limited to senior philosophy majors. Enrollment limited to 22. *A. Stone*

190S. Philosophy of Science. *

An examination of a topic in current philosophy of science. The material for the course is chosen from topics such as realism and instrumentalism, scientific explanation, space and time, the confirmation of theories, laws of nature, and scientific abstraction. Students cannot receive credit for this course and course 190S. Prerequisite(s): course 9, and course 100A or 100B or 100C; satisfaction of Entry Level Writing and Composition requirements; enrollment restricted to senior philosophy majors. Enrollment limited to 22. (General Education Code(s): W.) *R. Otte*

190T. Advanced Feminist Philosophy. *

Focuses on issues in epistemology and ontology: the construction of knowledge and objectivity, rationality and emotions, subjectivity and personal identity, and the body and sexuality. (Also offered as Feminist Studies 194J. Students cannot receive credit for both courses.) Prerequisite(s): course 147 or Feminist Studies 100; and two from courses 100A, 100B, and 100C. Enrollment limited to 22. *J. Hoy*

190U. Conceptual Schemes. *

Reference to "conceptual schemes" has become commonplace in and out of the philosophical literature. Course examines the philosophical foundations for talk about conceptual schemes and the philosophical and historical arguments that frame and make plausible such discussions. Prerequisite(s): two from courses 100A, 100B, and 100C. Enrollment restricted to senior philosophy majors. Enrollment limited to 22. *P. Roth*

190V. Hermeneutics. *

Intensive study of the tradition of philosophical hermeneutics, which is concerned with the theory of understanding and interpretation. Readings drawn from Martin Heidegger, Hans-Georg Gadamer, and possibly Paul Ricoeur. Prerequisite(s): two from courses 100A, 100B, and 100C. Enrollment restricted to senior philosophy majors. Enrollment limited to 22. *The Staff*

190W. History of Consciousness. *

Historical study of philosophical theories of consciousness and self-consciousness. Problems include the relation of self and other, consciousness and body, and self-consciousness and ethical agency. Readings will be selected from some of the following: Kant, Hegel, Nietzsche, and Heidegger, followed by phenomenologists, poststructuralists, and analytic philosophy. Students cannot receive credit for this course and course 290W. Prerequisite(s): two from courses 100A, 100B, and 100C. Enrollment restricted to senior philosophy majors. Enrollment limited to 22. *The Staff*

190X. The Good Life. *

Study of alternative conceptions of the elements of a good life, including topics such as courage, loyalty, devotion to ideals, personal flourishing, commitment to a community or tradition, spiritual enlightenment, integrity, compassion, and intellectual understanding. Also covered are fundamental questions such as the meaning of life, the relationship of "living right" to "living well," and the role of feelings in the justification of action. Prerequisite(s): two from courses 100A, 100B, and 100C. Enrollment restricted to senior philosophy majors. Enrollment limited to 22. *J. Ellis*

190Y. On Insults. W

The schoolyard wisdom about "sticks and stones" does not take one very far: insults not only take the form of words, and even words have effects. What kind of injury is an insult? Is it infliction determined by the insulter or the insulted? What does it reveal of the character of each and of the character of society and its conventions? What is its role in social and legal life (from play to jokes to ritual to war and from blasphemy to defamation to hate speech)? Philosophical, anthropological, psychoanalytic, and legal approaches to the questions are emphasized. Students cannot receive credit for this course and course 290Y. Prerequisite(s): two from courses 100A, 100B, and 100C; and satisfaction of Entry Level Writing and Composition requirements. Enrollment restricted to

senior philosophy majors. Enrollment limited to 22. (General Education Code(s): W.) *J. Neu*

195A. Senior Essay. F,W,S

Preparation of senior essay (approximately 25 pages) during one quarter. Students submit petition to sponsoring agency. *The Staff*

195B. Senior Essay. F,W,S

Under exceptional circumstances, a second senior essay continuing the work of the first essay is permitted but only when the first senior essay has been completed. Students submit petition to sponsoring agency. *The Staff*

199. Tutorial. F,W,S

May be repeated for credit. *The Staff*

199F. Independent Study (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

201. First Quarter Seminar. *

First quarter required course for philosophy graduate students. Introduces the work of the philosophy faculty members to the new graduate students. Helps new students form a cohort. Each week different faculty members will visit the class and discuss materials of their own as well as materials or topics that they study. Enrollment restricted to philosophy graduate students. *P. Roth*

202. Topics in Ancient Greek Philosophy. *

Topics will vary each quarter and will focus on some major ancient Greek philosophical figure or work. Enrollment restricted to philosophy graduate students. Enrollment limited to 20. *J. Bowin*

214. Probability and Confirmation. *

Studies the philosophical foundations of probability, induction, and confirmation. Different interpretations of probability studied, and solutions to various problems and paradoxes investigated. Students cannot receive credit for this course and course 114. Enrollment restricted to graduate students. *R. Otte*

219. Intermediate Logic. *

Natural deduction and semantics of first order predicate logic. Metatheory, including completeness theorems for propositional and predicate logic. Students cannot receive credit for this course and course 119. (Formerly course 217.) Prerequisite(s): course 9. Enrollment restricted to graduate students. (S) *The Staff*

222. Metaphysics. *

Advanced introduction to topics in 20th century and contemporary analytic metaphysics. Divided into five main parts dealing, respectively, with issues about the nature of existence, properties, time, change and persistence, and material constitution. Students cannot receive credit for this course and course 122. Enrollment restricted to philosophy graduate students. *A. Stone*

223. Recent European Philosophy. *

Seminar on recent developments in European philosophy, with particular attention to German theorists such as Nietzsche, Heidegger, Gadamer, Horkheimer, Adorno, or Habermas. Theorists such as Sartre, Merleau-Ponty, Derrida, Foucault, Bourdieu, Levinas, Laclau, or Vattimo may be read as well. (Also offered as History of Consciousness 223. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

224. Philosophy of Language. *

Advanced introduction to issues in the philosophy of language—primarily concerning the nature of reference, meaning, and truth. Works from such 20th-century figures as Russell, Wittgenstein, Kripke, Lewis, and Putnam discussed. Topics include what it is for a sign or a bit of language to be meaningful, or for it to identify or represent something; what it is for a statement to be truthful; what it is to be a language; and how reference works when attributed to beliefs. Cannot receive credit for this course and course 123. Enrollment restricted to philosophy graduate students. *The Staff*

231. Metaphysics and Epistemology. *

Focuses on topic or topics in metaphysics and/or epistemology. May focus on topics such as perception, naturalized epistemology, probabilistic epistemology, theories of justification, a priori knowledge, and memory. Topics might include one or more of causation, possible worlds, identity, necessity, time, realism, universals, and existence. Enrollment restricted to philosophy graduate students. *J. Ellis*

232. Advanced Topics in Value Theory. *

Considers topics central to philosophical questions about value: ethics, normativity, practical reason, relativism, skepticism, responsibility, motivation, emotion, and so forth. In some instances, the investigation will proceed through influential historical figures, ancient to modern. Enrollment restricted to philosophy graduate students. Enrollment limited to 22. *D. Guevara*

233. Seminar in Philosophy of Mind. *

Focuses on topics in the philosophy of mind. Topics may include consciousness, mental content, the

mind-body problem, and mental causation. Enrollment restricted to graduate students. May be repeated for credit. *J. Ellis*

235. Philosophy of Psychology. *

Looks at philosophical issues raised by current research on the nature of perception, cognition, and consciousness in psychology and cognitive science. Can there be a science of the mind? Could machines be conscious? Do animals have minds? How did the mind evolve? These and a host of related questions form the subject matter of this course. Students cannot receive credit for this course and course 135. Prerequisite(s): One course in philosophy, psychology, or linguistics. Enrollment restricted to graduate students. *The Staff*

237. Making Up the Mind. *

How does the mind come to be a thing which science can study? Readings focus on how diagnostic categories, for example, multiple personality disorder, attain scientific cachet and what issues surround the "medicalization" of the mind. Enrollment restricted to graduate students. *P. Roth*

239. Philosophy of Religion. F

Investigation of various topics in philosophy of religion. Enrollment restricted to philosophy graduate students or by permission of instructor. Enrollment limited to 20. May be repeated for credit. *R. Otte*

245. Brave New World: Ethical Issues in Genetics. *

Ethical issues in genetic research and technology, including genetic engineering, cloning, stem cell research, uses of genetic information, and manipulation of human evolution. Also considers the moral responsibility of scientists, obligations to future generations, and the concept of human perfectibility. Students cannot receive credit for this course and course 145. Enrollment restricted to philosophy graduate students. *The Staff*

252. Poststructuralism. *

French poststructuralism, with particular attention to the main philosophical texts of Jacques Derrida and Michel Foucault. Other representative theorists as well as critics of poststructuralism are studied as time permits. (Also offered as History of Consciousness 252. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. May be repeated for credit. *D. Hoy*

254. Politics of Temporality. *

Temporality is the way humans experience time. Examines how continental philosophers have described temporality and how they have explained the relation of temporality to objective clock-time. Phenomenologists such as Husserl, Heidegger, Sartre, and Merleau-Ponty discussed in light of their differences with Kant, Hegel, and Bergson regarding the relation of temporality and subjectivity. Examine Hegel, Benjamin, and Derrida on the relation of temporality and historicity. Enrollment restricted to graduate students. *The Staff*

256. History of Consciousness. *

Examination of contemporary theories of consciousness in both analytic and continental traditions. Among those who deflate modern philosophy's preoccupation with consciousness are not only Dennett, Davidson, and Rorty, but also Heidegger, Foucault, and Derrida. Among those who argue for irreducibility of subjectivity are not only Searle, Nagel, and Chalmers, but also Sartre, Merleau-Ponty, and Levinas. Discussion of parallel readings from both philosophical perspectives. (Also offered as History of Consciousness 224. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. *The Staff*

280. Graduate Colloquia Course (2 credits). F,W,S

This colloquia series sponsors speakers each quarter. Students must attend all colloquia and are encouraged to form discussion groups after each lecture. Enrollment restricted to philosophy graduate students. *The Staff*

290C. Advanced Topics in Contemporary Ethics. S

Examines one or more leading ethical theories, such as Kantianism, Virtue Theory, Consequentialism, and Humean ethical theory. Examines different foundational ethical principles and arguments for those principles, contrasting accounts of moral action and moral motivation, as well as epistemological and motivational role of emotions in ethical theory. Students cannot receive credit for this course and course 190C. Enrollment restricted to philosophy graduate students. *D. Guevara*

290F. Topics in Philosophy of Biology. *

Philosophy of biology is one of the fastest-growing areas of philosophy of science. Course is designed to give seniors and graduate students an overview of many of the diverse topics currently under discussion in modern philosophy of biology and provide a foundation for further research, regardless of previous experience with the biological sciences. Students cannot receive credit for both this course and course 190F. Enrollment restricted to graduate students. May be repeated for credit. *R. Winther*

290G. Wittgenstein. *

Focuses on the writings of the Austrian philosopher Ludwig Wittgenstein. Wittgenstein's work is typically divided into three periods: early, middle, and late. Topics covered include writings from one or more periods. Students cannot receive credit for this course and course 190G. Enrollment restricted to graduate students. *J. Ellis*

290H. Environmental Ethics. *

What is our proper moral stance toward the natural environment? This question encompasses our ethical relations to individual non-human animals, to other species of living beings, and toward the biotic community as a whole. It leads us to consider the broader question: What makes anything at all worthy of our moral respect or even our moral consideration? How are we to understand the very idea of the environment, the distinction between the human world, and the natural world, and the relationships between them. Students cannot receive credit for this course and course 190H. Enrollment restricted to graduate students. *The Staff*

290J. Advanced Topics in the History of Ethics. S

Careful study of any one of the main moral theories in the history of philosophy, with some emphasis on the relation to contemporary moral philosophy. Students cannot receive credit for this course and course 190J. Enrollment restricted to graduate students. *D. Guevara*

290K. Philosophical Matters of Scientific Practice. *

Considers the relevance of philosophical matters to the practice of science. Using quantum physics as a case study, explores historical and contemporary perspectives on issues such as those raised by the Schrodinger cat paradox, Bell's inequalities, and quantum erasers. Students cannot receive credit for this course and course 190K. Enrollment restricted to graduate students. *K. Barad*

290M. Advanced Graduate Seminar: William James. *

Intensive study of James's philosophy, including his philosophical psychology and pragmatic method. Covers James's epistemology, metaphysics, ethics, and philosophy of religion. Recent critical analyses of the issues raised in James's philosophy will also be highlighted. Enrollment restricted to graduate students. *The Staff*

290P. Major Figures in Contemporary Philosophy. *

Focuses on philosophical writings and significance of a single figure in contemporary (20th- and 21st-century) philosophy. May include, but not be limited to, Russell, Whitehead, Wittgenstein, Husserl, Carnap, Murdoch, Quine, Irigaray, Derrida, and Davidson. Students cannot receive credit for this course and course 190P. Enrollment restricted to philosophy graduate students. May be repeated for credit. *A. Stone*

290Q. Philosophy of Mathematics. *

Introduction to the problems of contemporary analytic philosophy of mathematics. Do mathematical objects exist? Are mathematical statements true? How can we know? We will examine the historical background to contemporary debates and the positions which have been taken within them. Students cannot receive credit for both this course and course 190Q. Enrollment restricted to graduate students. *A. Stone*

290S. Topics in the Philosophy of Science. *

An examination of a topic in current philosophy of science. The material for the course is chosen from topics such as realism and instrumentalism, scientific explanation, space and time, the confirmation of theories, laws of nature, and scientific abstraction. Students cannot receive credit for this course and course 190S. Enrollment restricted to graduate students. *R. Winther*

290W. History of Consciousness. *

Historical study of philosophical theories of consciousness and self-consciousness. Problems include the relation of self and other, consciousness and body, and self-consciousness and ethical agency. Readings are from Kant, Hegel, Nietzsche, and Heidegger, followed by phenomenologists, poststructuralists, and analytic philosophy. Students cannot receive credit for this course and course 190W. Enrollment restricted to graduate students. *The Staff*

290X. The Good Life. *

Proposed elements of a good life, e.g., courage, loyalty, devotion to ideals, personal flourishing, integrity, compassion, and intellectual understanding. Also discusses fundamental questions such as the meaning of life, the relationship of "living right" to "living well." Students cannot receive credit for this course and course 190X. Enrollment restricted to philosophy graduate students. *The Staff*

290Y. On Insults. *

What is the role of insult in social and legal life (from play to jokes to ritual to war and from blasphemy to defamation to hate speech)? Emphasizes philosophical, anthropological, psychoanalytic, and legal approaches to the issues. Enrollment restricted to graduate students and by permission of instructor. Students cannot receive credit for this course and course 190Y. (Formerly course 236.) *J. Neu*

294. Teaching-Related Independent Study. F,W,S

Directed graduate research and writing coordinated with the teaching of undergraduates. May be repeated for credit. *The Staff*

295. Directed Reading. F,W,S

Directed reading which does not involve a term paper. May be repeated for credit. *The Staff*

295F. Readings in Philosophy (2 credits). F,W,S

Focuses on selected philosophical areas and/or specific philosophers. Students meet with the instructor to discuss readings and deepen their knowledge on a particular subject. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

296. Special Student Seminar. F,W,S

A seminar for graduate students arranged between students and a faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

297F. Independent Study (2 credits). F,W,S

Students submit petition to course sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Enrollment restricted to students who have advanced to candidacy. May be repeated for credit. *The Staff*

*Not offered in 2011-12

(There were no substantive changes to the Physical Education Program Description from the General Catalog 2010-12.)

Program Description

Physical education offers students an opportunity to learn and improve skills in a variety of areas while gaining knowledge about the relationship between fitness and wellness. With this information, participants will be better prepared to make important choices leading to healthy lifestyles.

Physical education courses at UCSC, which are elective and without academic credit, are offered in a wide variety of activities. The courses consist of instruction, practice, and full participation consistent with each student's ability. While many of the courses are for students at the beginning level, some are designed for the more advanced student. Most courses involve class meetings of one hour's length, twice a week; but some consist of one and one-half hours twice a week or a single two-hour meeting per week. Students may enroll in as many courses as they desire and are permitted to repeat any course.

Lower-Division Courses

5A. Aquatics: Swimming Level I (no credit). F,W,S

Coeducational. Water exploration and primary skills development. Course is designed to teach only "non-swimmers" how to swim. The following is taught: Red Cross swimming instruction in overcoming fears, water adjustment, floating, breath holding, and rhythmic breathing. Skills to be learned are: water entries, sculling, treading, elementary backstroke, freestyle, methods of water safety, and survival techniques. Students pay a course fee. Prerequisite(s): instructor determines skill level at first class meeting. Enrollment limited to 15. *J. Kimball*

5B. Aquatics: Swimming Level II (no credit). F,W,S

Coeducational. Stroke readiness and development. Course is for those who have completed Swimming Level I or who can swim freestyle and demonstrate elementary backstroke. Skills to be learned are underwater swimming, turns, improvement of freestyle and elementary backstroke, beginning side stroke, backstroke, breaststroke, diving, personal safety skills, and basic rescue techniques. Prerequisite(s): instructor determines skill level at first class meeting: pass Swimming Level I course or demonstrate equivalent skills. Students pay a course fee. Enrollment limited to 20. *J. McCallum, J. Kimball*

5C. Aquatics: Swimming Level III (no credit). F

Coeducational. Stroke refinement and skill proficiency. Course teaches refinement of basic strokes and introduces butterfly, plus backstroke, surface diving, turns, endurance swimming, and survival techniques. Students pay a course fee. Prerequisite(s): instructor determines skill level at first class meeting: pass in Swimming Level II course or possess equivalent skills in freestyle, sidestroke, elementary backstroke, and breaststroke. Enrollment limited to 30. *J. McCallum*

5D. Aquatics: Swimming Level IV (no credit). W,S

Coeducational. Advanced skills. Designed to perfect the techniques and skills of all basic strokes plus butterfly, surface dives, survival swimming, basic diving, endurance swimming, and personal and rescue skills. Students pay a course fee. Prerequisite(s): pass in Swimming Level III course or possess equivalent swimming skill requirements in freestyle, backstroke, sidestroke, or competitive swimming; instructor determines skill level. Enrollment limited to 30. *J. McCallum*

5E. Aquatics: Lifeguard Training (LT) (no credit). F,S

Red Cross certified lifeguard training. Provides the necessary minimum skills training to qualify as a non-surf lifeguard. Certification includes CPR Pro, AED, PDT, D2, ADMIN, and Title 22 First Aid. Candidates must successfully pass final skill tests and written final exam with 80 percent score. Students are billed for a course fee. Prerequisite(s): must have ability to swim 500 yards in ten minutes, tread water for one minute, strong swimming skills in free, back, breast, side, and elementary backstroke; must purchase Red Cross LT text book. Enrollment limited to 10. *K. Musch, J. McCallum*

5F. Water Safety Instructor (WSI) (no credit). S

Coeducational. A Red Cross course designed to certify students who complete all required work as swimming instructors. Instruction in teaching techniques, stroke analysis, skilled swimming, class organization, pool safety, and pool maintenance. Practice teaching assignments outside of class with practical and written final exams. Screening test given at first class meeting. Prerequisite(s): must be 17 years old, possess valid ARC Instructor Candidate Training card (ICT), and ARC swimmers-level skills. (Emergency Water Safety (EWS), or Lifeguard Training (LT) certificate is highly recommended). Students pay a course fee. Enrollment limited to 10. *K. Musch, J. McCallum*

5G. Aquatics: Swimming/Conditioning (no credit). F,W,S

Open to all students who wish to explore swimming as a conditioning and fitness exercise. Students should know three competitive strokes, and should be able to swim fifteen minutes without stopping. Short health and fitness lectures precede some classes. Students pay a course fee. Prerequisite(s): instructor determination at first class meeting. Enrollment limited to 40. *The Staff, K. Musch, J. McCallum*

5H. Aquatics: Competitive Swimming (no credit). W

Emphasis on competitive swimming and conditioning techniques. For students who want instruction at the competitive level of swimming. Three hours per week. Students pay a course fee.

Prerequisite(s): instructor determination at first class meeting. Enrollment limited to 50. *K. Musch*

5R. Aquatics: Basic Scuba Diving (no credit). F,W,S

Coeducational. Sections geared toward the successful completion of NAUI Scuba Diver Certification. The course is divided into three parts: lecture, pool lab, and open water experience. Four open water training dives are offered. Emphasis is on training for open water scuba diving, using the beach as a base of operation. Students pay a course fee. Prerequisite(s): pass swimming skills tests and medical clearance. It is strongly recommended that students enroll in course 5S. Enrollment limited to 24. *C. Shin*

5S. Aquatics: Advanced Scuba Diving (no credit). F,S

Coeducational. Sections are offered to facilitate the development of the basic scuba diver's open water techniques. A minimum of six open water experiences is offered. Course is geared toward successful completion of NAUI Advanced Scuba Diver Certification. Students pay a course fee. Prerequisite(s): course 5R or pass swimming skills test and medical clearance. (Formerly course 5T.) Enrollment limited to 25. *C. Shin*

5T. Scuba Rescue Diving (no credit). F,W,S

Coeducational. Course geared toward the successful completion of NAUI Rescue Diver Certification. Course consists of lecture, pool laboratory, and open-water experience. Emphasis is on training divers to manage risks and effectively handle limited in-water problems. Prerequisite(s): Scuba certification and medical clearance. Enrollment limited to 10. *C. Shin*

5U. Aquatics: Scuba Divemaster (no credit). F,W,S

Coeducational. A diving-leadership certification course for the experienced scuba student who wishes to assist with the scuba-instruction program at UCSC. Topics include teaching techniques, skin and scuba techniques, rescue techniques, and safety procedures. Specialty laboratories also offered with this course which cover a variety of diving skills. Students pay a course fee. Prerequisite(s): Basic Scuba Certification and special prerequisite checking by instructor. (Formerly *Aquatics: Scuba Instruction.*) Enrollment limited to 20. *C. Shin*

9B. Boating: Beginning Dinghy Sailing (no credit). S

Coeducational. Introductory course in practical boating safety using 15-foot sailboats. Includes introduction to rigging, nomenclature, seamanship, proper boat-handling techniques, and general boating and aquatic safety. Satisfactory completion meets prerequisites for intermediate-level dinghy course. Students pay a course fee. Prerequisite(s): swimming ability. (Formerly *Boating: Basic Sailing*) Enrollment limited to 18. *R. Kingon, The Staff*

9C. Boating: Intermediate Dinghy Sailing (no credit). F,W,S

Coeducational. Course includes a review of basic sailing with an emphasis on the further development and refinement of small-boat sailing techniques. Fifteen-foot sailboats are used with two students per boat. Students pay a course fee. (Formerly *Boating: Intermediate Sailing*) Prerequisite(s): course 9B or equivalent skills. Enrollment limited to 16. *R. Kingon, The Staff*

9D. Boating: Advanced Dinghy Sailing (no credit). F,S

Coeducational. For students interested in high-performance sailing using Flying Juniors and Coronado 15s. Includes special techniques used in racing conditions. Students pay a course fee. (Formerly *Boating: Advanced Sailing*) Prerequisite(s): course 9C or equivalent skills. Enrollment limited to 12. *R. Kingon, The Staff*

9E. Boating: Competitive Sailing (no credit). F

Coeducational. Instruction and coaching at the advanced sailing level in racing dinghies and keelboats. Emphasis on the physical and mental requirements for racing sailboats and the technical aspects of sail racing. Students will be involved in intercollegiate competition. Students pay a course fee. Prerequisite(s): advanced sailing ability. *R. Kingon*

9H. Boating: Basic Rowing (no credit). F,W,S

Coeducational. Course designed to cover types of rowing boats, nomenclature, fundamental skills, and specific safety and rescue aspects related to the activity. Students will row singly as well as in groups using 15-foot to 22-foot rowing dories. (Formerly course 9J.) Students pay a course fee. Prerequisite(s): swimming ability. Enrollment limited to 12. *R. Kingon*

9J. Boating: Intermediate Rowing (no credit). F,S

Coeducational intermediate course designed to cover more advanced rowing techniques and the skills needed for safe open water rowing. Students pay a course fee. Students pay a course fee. Prerequisite(s): basic rowing or permission of instructor. (Formerly course 9H.) Enrollment limited to 11. *R. Kingon, The Staff*

9K. Boating: Ocean Kayaking (no credit). F,W,S

Co-educational course that teaches novice kayakers the skills to safely use UCSC kayaks in the Monterey Bay. Topics include: basic paddling strokes and maneuvers; self and assisted deep-water rescues; beach launching; landing through surf; and marine hazards and navigation. Students pay a course fee. Enrollment limited to 12. *R. Kingon, D. Johnston*

9S. Boating: Intermediate Keelboat Sailing (no credit). F,W,S

Coeducational. Combines hands-on rigging and docking practice in the harbor and sailing practice on Monterey Bay with instruction in sail-trimming, de-powering, powering-up, person-overboard recovery techniques, boating safety, weather, ocean conditions, sailing theory, rigging, navigation, and the maritime rules of the road. Twenty-seven foot, ultralight, displacement keelboats are used.

Students pay a course fee. Enrollment limited to 16. *R. Kingon*

9T. Boating: Advanced Keelboat Sailing (no credit). F,S

Coeducational. Further development and refinement of boat-handling techniques, including advanced maneuvering, anchoring, and racing with an introduction to the use of spinnakers. Students pay a course fee. Prerequisite(s): course 9S. Enrollment limited to 12. *R. Kingon*

15B. Court Sports: Basketball (no credit). F,W,S

Coeducational. Instruction in fundamentals, offensive and defensive strategies, rules, and conditioning designed primarily for beginning and intermediate level players. Students pay a course fee. Enrollment limited to 20. *The Staff*

15H. Court Sports: Racquetball (no credit). F,W,S

Coeducational. The beginning section provides an introduction to the basic knowledge and skills involved in this indoor racquet sport. The advanced beginning section continues the development of the basic skills emphasizing increased shot variety and advanced strategy. The intermediate section offers the opportunity for further skill development and introduces more advanced offensive skills. Students pay a course fee. Enrollment limited to 18. *C. George, J. Bardos*

15N. Court Sports: Tennis (no credit). F,W,S

Coeducational. The beginning section introduces the basics of forehand, backhand, and serve. Advanced beginning section reviews these basics and introduces the volley, overhead, and lob. The intermediate section reviews all stroke mechanics and covers basic singles and doubles strategy. The advanced section includes use of spins, practice principles, detailed stroke analysis, and advanced play situations. Competitive Tennis is a year-long program for members of the intercollegiate tennis teams. Students pay a course fee. Enrollment limited to 24. *The Staff*

15T. Court Sports: Volleyball (no credit). F,W,S

Coeducational. Beginning/intermediate, intermediate, and advanced sections are offered for students who desire to learn and improve the basic skills, as well as to understand the rules. Competitive section is open to students interested in participation in the UCSC NCAA Women's Volleyball team. It covers information and practice in all aspects of the competitive volleyball season. Students pay a course fee. Enrollment limited to 25. *T. Hollenbeck*

20A. Dance: Ballet (no credit). F,W,S

Coeducational. Sections offered at various technical levels graded from I to III. Emphasis on principles of movement, style, and execution of ballet technique. Section in ballet repertory where advanced students have the opportunity to perform is offered in the spring quarter. Students pay a course fee. *L. Norris, The Staff*

20B. International Folk Dance (no credit). F,W,S

Coeducational. International folk dance with an emphasis on Balkan and Israeli dances. Sections are also offered periodically in Mexican dance. Students pay a course fee. *R. Cochlin*

20C. Dance: Jazz (no credit). F,W,S

Coeducational. Sections offered at various technical levels graded from I to III. Exploration of jazz dance emphasizing basic technique, styling, rhythm, and isolations. Jazz and contemporary music is used as accompaniment. Some background in ballet strongly recommended before continuing to Jazz II or III. Section in jazz dance repertory where advanced students have the opportunity to perform is offered in spring quarter. Students pay a course fee. Enrollment limited to 40. *L. Norris, The Staff*

20D. Dance: Modern (no credit). F,W,S

Coeducational. Sections offered at various technical levels graded from I to III. Emphasis on basic techniques and building phrases of movement. Section in choreography and improvisation offered in spring quarter. Section in dance repertory offered periodically. Students pay a course fee. *R. Cochlin, The Staff*

20F. Dance: Individual Studies in Dance (no credit). F,W,S

Coeducational. Designed to give students the opportunity of pursuing their particular interests in the field of dance with the support and direction of a faculty member. Prerequisite(s): instructor determination at first class meeting. *L. Norris, R. Cochlin*

25A. Fencing: Épée (no credit). F,W,S

Coeducational. Basic instruction in the techniques, strategy, and general methodology of modern épée fencing. Emphasis on épée fencing as a development from the traditional French and Italian dueling sword styles as they have evolved to form the modern electrical épée game. Students pay a course fee. *C. Blackburn*

25B. Fencing: Foil (no credit). F,W,S

Coeducational. Instruction in modern competitive French-Italian foil techniques for beginning, intermediate, and advanced levels. Emphasis on physical and mental conditioning leading to improved skill in recreational and competitive areas of involvement. Students pay a course fee. *C. Blackburn*

25C. Fencing: Sabre (no credit). F,W,S

Coeducational. Instruction and practice in basic offensive and defensive skills of modern Hungarian sabre technique. Emphasis on physical and mental conditioning as a foundation for more advanced levels of instruction. Preparation for recreational and competitive involvement. Students pay a

course fee. *C. Blackburn*

28K. Field Sports: Soccer (no credit). F,W,S

Coeducational/Women's. Sections are offered in field soccer and indoor soccer. Instruction in the basic techniques, tactics, laws of the game, and injury prevention for beginners and advanced players. Students pay a course fee. Prerequisite(s): determination at first class meeting. *M. Runeare, The Staff*

30G. Fitness Activities: Physical Conditioning (no credit). F,W,S

Coeducational. An exercise course designed to increase the participants' strength, flexibility, coordination, and cardiovascular endurance. Special attention is given to understanding and utilizing sound and safe principles of body alignment and movement. Courses include, but not limited to: Pilates, cardio boxing, stretch and strengthen, and aerobics. Students pay a course fee. *The Staff, R. Andrews, D. Lewis, R. Cochlin, C. Mori*

30H. Fitness Activities: T'ai Chi Ch'uan (no credit). F,W,S

Through balanced movement and breath control, T'ai Chi Ch'uan attempts to forestall many processes of aging by cultivating greater strength of body, mind, and spirit. Students pay a course fee. *C. Blackburn*

30J. Fitness Activities: Strength Training (no credit). F,W,S

Coeducational. An introduction to safe and effective methods of weight training and other personal conditioning activities. Topics covered include proper weight-training techniques, care of body and equipment, and elementary exercise physiology. Students pay a course fee. (Formerly *Fitness Activities: Weight Training*.) *The Staff, R. Andrews, T. Hammonds, D. Lewis, C. Mori*

30L. Fitness Activities: Yoga Exercises (no credit). F,W,S

Coeducational. Sections offered at beginning, continuing beginning, and advanced beginning levels of Hatha Yoga. Students pay a course fee. *J. Kimball, R. Cochlin, C. Mori*

43A. Martial Arts: Aikido (no credit). F,W,S

Coeducational. A nonviolent, noncompetitive Japanese martial art emphasizing mind-body harmony, balance, relaxation, and the understanding of vital energy. Aikido self-defense techniques aim toward the creative resolution of conflict and the growth of the individual. Sections offered at beginning and experienced levels. Students pay a course fee. *Y. Shibata*

43G. Martial Arts: Tae Kwon Do (Karate) (no credit). F

Coeducational. Sections offered at the beginning and intermediate/advanced levels. Covering basic skills, knowledge, and philosophy of Tae Kwon Do and providing instruction in the following aspects of martial arts study: fundamental techniques of self-defense, physical conditioning, emotional control, self-discipline, and self-confidence. Students pay a course fee. Enrollment limited to 35. *S. Song*

Program Description

Physics seeks to discover the fundamental regularities or “laws” that govern our universe and to apply these laws to explain the behavior of fundamental and complex systems. The same underlying principles describe the behavior of atoms, lasers, living cells, and galaxies. Physics is, therefore, at the base of all modern science and technology, and, even at an elementary level, this fundamental nature can be appreciated.

The Physics Department offers majors in physics, physics (astrophysics), applied physics, and physics education. These programs prepare students for graduate work in physics, astrophysics, and astronomy, for engineering and other technical positions in industry, and for careers in education. With appropriate courses in other disciplines, these majors provide excellent preparation for advanced study in technical subjects such as biology, chemistry, engineering, geophysics, and the philosophy of science. The applied physics major is excellent preparation for positions in industry directly upon graduation.

Physics students and faculty often interact closely in both formal and informal settings. All undergraduate physics majors have the opportunity to work individually with a faculty member in completing the senior thesis requirement.

The main areas of physics research at UCSC are the study of fundamental particles and interactions (high-energy physics), the study of condensed matter physics, and astrophysics/cosmology.

Efforts in high-energy physics are aided by the presence of an organized research unit, the Santa Cruz Institute for Particle Physics (SCIPP). The SCIPP experimentalists play significant roles in experiments at some of the major accelerator laboratories in the world, including the Stanford Linear Accelerator Center (SLAC) at Stanford University and the European centers at CERN (European Organization for Nuclear Research) and DESY (Deutsches Elektronen Synchrotron). The SCIPP theorists are active in the phenomenology of high-energy particle interactions, the theory of strong and electroweak interactions, electroweak symmetry breaking and Higgs bosons, and theories of supersymmetry, superstrings, and gravity. SCIPP also maintains a vigorous program in particle astrophysics. SCIPP theorists are involved in research in high-energy astrophysics, dark matter, formation of galaxies and large-scale structure in the universe, and theories of cosmology. SCIPP experimentalists are playing an important role in creating the next major satellite for gamma-ray astronomy, the Fermi Gamma-ray Space Telescope. In addition, SCIPP experimentalists, working with colleagues at Los Alamos, conduct a thriving particle astrophysics program detecting TeV gamma rays.

The presence of the strong astrophysics group from the Astronomy and Astrophysics Department in the same building provides a healthy symbiosis in this area. Note that the Astronomy and Astrophysics Department does not offer an undergraduate major. UCSC is the headquarters for the University of California Observatories, which include Lick Observatory near San Jose and the Keck Observatory in Hawaii; these provide additional opportunities for collaboration between researchers in physics and astronomy.

Condensed matter physics research at UCSC covers a range of topics including the behavior of exotic many-electron systems (for example, superconductors); the study of magnetic phase transitions; the organization of complex systems (proteins, DNA, and polymers); the development of new electronic devices using novel materials and research in biophysics.

The experimental program uses X-ray and synchrotron radiation techniques at facilities such as the Stanford Synchrotron Radiation Laboratory (SSRL); neutron scattering techniques at various national laboratories; and optical, X-ray, and specific heat techniques at UCSC. Undergraduate students are actively involved in several condensed matter physics laboratories.

Courses

An undergraduate physics education is broad and basic. Undergraduate students, even in

introductory classes, are exposed to new ideas associated with explorations at the boundaries of human knowledge.

The lower-division introductory courses in the major programs (Physics 5A, 5B, 5C, and 5D sequence) are well suited to students in the physical sciences and engineering. The 6A, 6B, 6C sequence, which also provides a calculus-based introduction to the basic concepts in physics, is better suited to students in the life sciences. The Physics 6 sequence is also appropriate for students who have a calculus background. Students who take Physics 6A instead of Physics 5A, and do very well in it, may contact the department chair for permission to enter the major. The laboratory courses, 5L-5M-5N and 6L must be taken concurrently with the corresponding lecture courses.

Major Program

The physics, astrophysics, and applied physics major programs provide a comprehensive coverage of the field and the background necessary for graduate school or industrial careers. The physics education major provides the necessary background to enter a rigorous credential program and, ultimately, a career in high-school science education. Students earn a bachelor of science (B.S.) degree. The UCSC physics, astrophysics, applied physics, and physics education programs begin with a four-quarter presentation of the introductory concepts of the subject, *Introduction to Physics*. (Note: the applied physics program also requires completion of a general chemistry course.)

This is followed by courses which provide an introduction to relativity and quantum physics. The programs continue with a three-quarter sequence in mathematical methods of physics designed to provide the mathematics preparation necessary for most of the upper-division physics courses required for the majors. Included in the upper-division programs are two intensive laboratory courses designed to illustrate both historical experiments in the development of physics, astrophysics, and applied physics, and modern experimental methods. Advanced and especially motivated students may enroll in some graduate courses with the approval of the instructor and department chair.

The senior thesis, required of all physics, astrophysics, applied physics, and physics education majors at UCSC, provides the opportunity for students to apply their skills to problems of interest to them, either theoretical or experimental, usually with technical advice from a faculty member. The senior thesis may be based on research with a faculty member. Topics have included particle physics, condensed matter physics, astrophysics, biophysics, and various applied technologies. The senior thesis is a distinctive part of the UCSC physics major program and entails a substantial investment of both student and faculty time. The learning experience involved in the thesis, as well as the thesis itself, has proven extremely valuable to students in enhancing employment opportunities upon graduation or in gaining admission to graduate school.

The physics education major is designed to provide future K-12 physics and mathematics teachers with the necessary coursework aligned with the K-12 physics and mathematics standards necessary to pass the California Subject Matter Examinations for Teachers (CSET) in Physics and Mathematics. It also includes a thorough introduction to educational theory and practice including a sequence of three classroom-based internships. Students will be well prepared to enter a rigorous teaching credential program and ultimately a career in high school education. The senior comprehensive requirement involves a curriculum development project overseen by the Physics/Astronomy faculty, with co-supervision from CalTeach/Education faculty as needed.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. Students in physics, applied physics, physics (astrophysics), and physics education satisfy the DC requirement by completing courses 195A, 195B, and the senior thesis.

Admissions Policy

In order to be admitted to the physics, astrophysics, applied physics, or physics education majors students must pass Physics 5A, 5B and 5C with an average grade point average (GPA) in these three courses of 2.7 or higher. At least two of these three courses must be passed in the first attempt. If the third course is repeated, the grade from the second attempt will be considered. Students failing to meet these criteria must meet with a faculty adviser. The faculty adviser will make a recommendation to the department chair, who will then either finalize the denial of admission or specify further conditions for admission.

Letter Grade Policy

For all students entering UCSC in fall 2009 and later, all courses used to satisfy any of the physics majors must be taken for a letter grade.

Course Requirements

Physics

The requirements for the major include Physics 5A/L, 5B/M, 5C/N, and 5D; Mathematics 19A or 20A, 19B or 20B, 23A, and either 23B or Physics 14; plus the following upper-division courses: 101A-B, 105, 110A-B, 112, 116A-B-C, 133, 134, and 139A.

In addition, students must pass at least two upper-division electives chosen from physics or the following astronomy and astrophysics courses: 111 through 118. At least one of the two electives must be from the following physics courses: 129, 139B, 155, or 171. In some cases, the second elective requirement may be satisfied by an approved upper-division science or engineering course.

Students have to satisfy a computer programming requirement by taking one of the courses, Computer Science 5C, Earth and Planetary Sciences 119, or Physics 115. Computer Science 5C teaches programming in C/C++ for students with no prior experience. Earth and Planetary Sciences 119 teaches programming in IDL (commonly used by astronomers) and simple applications. Physics 115 does not teach programming; it assumes basic programming ability in C, C++ or Fortran and discusses numerical techniques relevant to physics. Students may also satisfy the computer programming requirement by demonstrating their knowledge of programming to a faculty member designated by the Physics Department.

Physics (Astrophysics)

The requirements for the major include Physics 5A/L, 5B/M, 5C/N, and 5D; Mathematics 19A or 20A, 19B or 20B, 23A, and either 23B or Physics 14; plus the following upper-division courses: 101A-B, 105, 110A-B, 112, 116A-B-C, 133, 135, and 139A.

In addition, students must pass at least three upper-division electives selected from the following upper-division courses: Astronomy and Astrophysics 111 through 118 or 171 (cross-listed with Physics 171).

Students have to satisfy a computer programming requirement by taking one of the courses Computer Science 5C, Earth and Planetary Sciences 119, or Physics 115. Computer Science 5C teaches programming in C/C++ for students with no prior experience. Earth and Planetary Sciences 119 teaches programming in IDL (commonly used by astronomers) and simple applications. Physics 115 does not teach programming; it assumes basic programming ability in C, C++ or Fortran and discusses numerical techniques relevant to physics. Students may also satisfy the computer programming requirement by demonstrating their knowledge of programming to a faculty member designated by the Physics Department.

Applied Physics

The requirements for the major include Physics 5A/L, 5B/M, 5C/N, and 5D; Mathematics 19A or 20A, 19B or 20B, 23A, and either 23B or Physics 14; Chemistry 1A or 1B; plus the following upper-division physics courses: 101A-B, 105, 110A-B, 112, 116A-B-C, 133, and 134.

In addition, students must pass at least three upper-division applied physics electives selected from the following approved list of courses: Physics 107, 115, 120, 129, 139A, 139B, 152, 155, 156, and 160, 171, 180, Electrical Engineering 101, 103, 115, 130, 145, 154, 171, 172, 178; or other courses with approval from a faculty adviser.

Students have to satisfy a computer programming requirement by taking one of the courses Computer Science 5C, Earth and Planetary Sciences 119, or Physics 115. Computer Science 5C teaches programming in C/C++ for students with no prior experience. Earth and Planetary Sciences 119 teaches programming in IDL (commonly used by astronomers) and simple applications. Physics 115 does not teach programming; it assumes basic programming ability in C, C++ or Fortran and discusses numerical techniques relevant to physics. Students may also satisfy the computer programming requirement by demonstrating their knowledge of programming to a faculty member designated by the Physics Department.

Physics Education

The requirements for the major include Physics 5A/L, 5B/M, 5C/N, 5D, 101A and 101B, 133, and 134 or 135; Mathematics 19A or 20A, 19B or 20B, 23A, 23B or Physics 14; Mathematics 100, 128A, 181; Education 50B or 50C, 100B or 100C, 185L, 185B or 185C and one upper-division course dealing with issues of diversity in education; Applied Mathematics and Statistics 5 or 7; and Astronomy 12 or 13. One elective course must be taken from physics, astronomy, mathematics or education courses, or other courses with approval of the department.

Sample Physics Major Planner

The following is a recommended academic plan for students to complete during their four years to fulfill requirements for the physics major.

Year	Fall	Winter	Spring
1st (frsh)	MATH 19A or 20A	MATH 19B or 20B	MATH 23A
	PHYS 5A/L	PHYS 5B/M	PHYS 5C/N
	PHYS 10 (recommended)		CMPS 5C
2nd (soph)	PHYS 101A	PHYS 101B	PHYS 116B
	PHYS 5D (2 credits)	PHYS 116A	PHYS 133*
	MATH 23B		
	PHYS 105	PHYS 110A	PHYS 110B

3rd (jr)	PHYS 116C	PHYS 112	PHYS 139A
		PHYS 134*	
4th (sr)	PHYS 195A	PHYS 195B	
	PHYS elective**	PHYS elective**	

* Course 133 is offered winter and spring quarters. Course 134 is offered winter and spring quarters and may be taken junior or senior year after completing course 133.

**Students should look into taking electives earlier where possible, as some courses are only offered every alternate year.

Sample Physics (Astrophysics) Major Planner

Year	Fall	Winter	Spring
1st (frsh)	MATH 19A or 20A	MATH 19B or 20B	MATH 23A
	PHYS 5A/L	PHYS 5B/M	PHYS 5C/N

	Thesis	Thesis	

*Physics 133 is offered winter and spring quarters. Physics 134 is offered in winter and spring quarters and may be taken in the junior or senior year after completing Physics 133. Physics 135 is offered some academic years as a multiple-term course: 135A in fall and 135B in winter or spring, depending on astronomical conditions.

Students who take Physics 6A instead of Physics 5A, and do very well in it, may contact the department chair for permission to enter the major.

Depending on the student's interests, further preparation for graduate school in physics, astrophysics, applied physics, or for other careers is obtained by electing more specialized or applied courses (see the descriptions of courses below). In addition, again depending on the student's academic focus, elective courses may be selected in mathematics, astronomy and astrophysics, and/or other areas of physical science.

For further information about the physics program, please request the undergraduate handbook, *A Physics Major's Guide*, from the Physics Department office, or look for it online at <http://physics.ucsc.edu>.

Comprehensive Requirement

The comprehensive exit requirement is normally satisfied by the submission and approval of a thesis. To satisfy the comprehensive requirement via a thesis Physics 195A and 195B are required. Note that successful completion of 195A and 195B satisfies the Disciplinary Communication requirement or Writing Intensive general education requirement.

In special cases, minor modifications of these requirements may be granted to suit the specific program of a particular student. Before embarking on a program needing such waivers, students should discuss their plans with a physics adviser and seek approval by petition from the Physics Department office.

Honors

The department awards "honors" (3.5 grade point average or better) and "highest honors" (3.8 GPA or better) to top graduating students each year. Recommendations for these awards are made by the department chair and are based upon excellence of academic performance, particularly in upper-division physics courses, as reflected in grades and the narrative evaluations. The department also awards "honors" for outstanding work on the senior thesis, made upon the recommendation of the senior thesis supervisor and the thesis technical adviser.

Minor Requirements

Requirements for the minor in physics include Physics 5A/L, 5B/M, 5C/N, 5D (or Physics 6A/L, 6B/M, 6C/N with minimum GPA of 3.5); Mathematics 19A or 20A, 19B or 20B, 23A, 23B or Physics 14; Physics 101A, 101B, 133, and one upper division elective (and any prerequisites) from physics or from a list of courses from other departments approved by the Physics Undergraduate Committee. See the Physics Department for the listing.

Advising and Preparation for the Major

Because the courses for the physics major are sequential, it is strongly advised that students declare their major in physics, astrophysics, or applied physics as early as possible (either at initial registration or by the end of the first year). Students who do not begin the lower-division requirements during their first year may have difficulty completing the program within four years. Transfer students may also have problems completing the program within the usual time, depending upon whether they took equivalent courses at their previous institutions. The department adviser works closely with students interested in pursuing the major to ensure that they begin the program immediately and follow the appropriate steps toward its completion.

High school students coming directly to UCSC should emphasize their mathematics preparation with

the expectation that they will take calculus in their first quarter at UCSC in order to concurrently take the Physics 5 series, calculus-based physics for physics majors.

Students transferring to UCSC as junior physics, astrophysics, or applied physics majors should have completed three quarters of introductory calculus-based physics with laboratory and three quarters of calculus. It is also desirable to have an introductory course in modern physics as well as mathematics courses in linear algebra, vector calculus, and differential equations. The Physics Department advises each junior transfer student individually upon their arrival.

Graduate Programs

The Physics Department offers graduate programs leading to the master of science (M.S.) and/or the doctor of philosophy (Ph.D.) degrees. In the first year of study, Ph.D. students are expected to take two core graduate-level courses per quarter, including the courses required for the Ph.D. degree (210, 212, 214, 215, 216, 219) and other courses specific to the student's field of interest. All first-year students also take 205, *Introduction to Research*. All graduate students also attend a weekly colloquium, 292. Each student has a faculty adviser who helps to determine which courses are most appropriate, taking into account the student's background and interests. The student-faculty ratio is low so that M.S. and Ph.D. students can work closely with faculty and pursue programs that fit their individual needs. Research is currently conducted in theoretical and experimental particle physics, theoretical and experimental condensed matter physics (including materials physics and biophysics), and in theoretical and experimental high-energy astrophysics (including cosmology). After passing a written qualifying examination, Ph.D. students pursue independent research leading to an oral examination and completion of a doctoral dissertation.

Students may obtain a master's degree through course work (eight physics graduate courses) and submission of an approved thesis. The thesis may be waived by passing four sections of the written Ph.D. qualifying examination. Master's candidates are encouraged to write a research thesis and may do so in any of the research fields in the program, thereby developing laboratory and computational skills in areas such as electronics design, computer simulation and visualization, cryogenics, X-ray scattering, complex novel materials and devices, or materials science. Each M.S. student is assigned a faculty adviser who helps to design a course work plan suited to the interests of the student.

Physics students and faculty use a number of UCSC research facilities (described at the beginning of this section and elsewhere in this catalog): the Santa Cruz Institute for Particle Physics (SCIPP) and Lick Observatory (headquartered at UCSC). There is strong interaction with other disciplines, especially astronomy and astrophysics, biology, chemistry, Earth sciences, electrical engineering, and mathematics. Proximity to the Stanford Linear Accelerator Center and the Stanford Synchrotron Radiation Laboratory provides additional local research opportunities. UCSC faculty and graduate students also participate in research programs at CERN in Geneva, Los Alamos, Oak Ridge National Laboratory, NASA, Ames, NREL, Lucent, Xerox, IBM, Bell Labs, and other national and international laboratories.

Application materials and brochures describing the physics M.S. and Ph.D. graduate programs in more detail may be obtained by visiting our web site at <http://physics.ucsc.edu/> or by contacting the Division of Graduate Studies at <http://graddiv.ucsc.edu>.

Five-year B.S./M.S. program

The new five year combined B.S./M.S. in physics program provides highly motivated undergraduate majors the opportunity to earn a M.S. degree in five years. The program provides the additional level of preparation and experience that students need to pursue careers in industry and government. Students in the B.S./M.S. physics program can pursue concentrations in materials and device physics, energy and the environment, computational physics, finance and economics, and medical biophysics. Students apply to be admitted to the B.S./M.S. program, in consultation with their faculty or undergraduate advisor, no later than the end of the second quarter of the junior year. To be accepted to the program, students will need to have demonstrated solid performance in general and in the major, as demonstrated by: 1) a G.P.A. in physics courses of at least 3.0; 2) an overall G.P.A. of at least 3.0; and 3) a recommendation from a faculty member attesting to the student's promise for the M.S. degree in physics.

Course Requirements

All students in the 5 year BS/MS program will be expected to take a core set of four physics courses, including:

PHYS 212. *Electromagnetism I*;

PHYS 215. *Introduction to Non Relativistic Quantum Mechanics*;

PHYS 216. *Advanced Topics in Non Relativistic Quantum Mechanics*

PHYS 219. *Statistical Physics*;

plus four electives in the concentration areas described below. Typically, at least one of these electives will be another physics graduate course. One of the elective courses can be an upper-division undergraduate course upon approval of the faculty coordinator and Graduate Committee.

Two of these elective courses can also serve to fulfill the elective requirement for the B.S. degree.

Materials and Device Physics

This concentration prepares students who are interested in pursuing industrial jobs in the areas of materials science, semiconductors, and optoelectronic devices.

Energy and the Environment

This concentration prepares students who are interested in pursuing industrial or government jobs in the areas of sustainable-energy technologies, environmental and climate change and scientific policy related to these areas.

Finance and Economics

This concentration prepares students who are interested in pursuing industrial or government jobs in the areas of finance, monetary policy, and economics.

Computational Physics

This concentration prepares students who are interested in pursuing industrial or government jobs in the areas related to using computational methods to solve applied problems as well as computer based visualization methods for data presentation. Students interested in computational methods in biology could also consider the concentration in medical biophysics.

Medical BioPhysics

This concentration prepares students who are interested in pursuing industrial and hospital jobs in the areas of medical technology, biomolecular engineering, and biophysics.

211 Interdisciplinary Sciences Building

(831) 459-3744

<http://physics.ucsc.edu/>***Program Description***

Physics seeks to discover the fundamental regularities or “laws” that govern our universe and to apply these laws to explain the behavior of fundamental and complex systems. The same underlying principles describe the behavior of atoms, lasers, living cells, and galaxies. Physics is, therefore, at the base of all modern science and technology, and, even at an elementary level, this fundamental nature can be appreciated.

The Physics Department offers majors in physics, physics (astrophysics), applied physics, and physics education. These programs prepare students for graduate work in physics, astrophysics, and astronomy, for engineering and other technical positions in industry, and for careers in education. With appropriate courses in other disciplines, these majors provide excellent preparation for advanced study in technical subjects such as biology, chemistry, engineering, geophysics, and the philosophy of science. The applied physics major is excellent preparation for positions in industry directly upon graduation.

Physics students and faculty often interact closely in both formal and informal settings. All undergraduate physics majors have the opportunity to work individually with a faculty member in completing the senior thesis requirement.

The main areas of physics research at UCSC are the study of fundamental particles and interactions (high-energy physics), the study of condensed matter physics, and astrophysics/cosmology.

Efforts in high-energy physics are aided by the presence of an organized research unit, the Santa Cruz Institute for Particle Physics (SCIPP). The SCIPP experimentalists play significant roles in experiments at some of the major accelerator laboratories in the world, including the Stanford Linear Accelerator Center (SLAC) at Stanford University and the European centers at CERN (European Organization for Nuclear Research) and DESY (Deutsches Elektronen Synchrotron). The SCIPP theorists are active in the phenomenology of high-energy particle interactions, the theory of strong and electroweak interactions, electroweak symmetry breaking and Higgs bosons, and theories of supersymmetry, superstrings, and gravity. SCIPP also maintains a vigorous program in particle astrophysics. SCIPP theorists are involved in research in high-energy astrophysics, dark matter, formation of galaxies and large-scale structure in the universe, and theories of cosmology. SCIPP experimentalists are playing an important role in creating the next major satellite for gamma-ray astronomy, the Fermi Gamma-ray Space Telescope. In addition, SCIPP experimentalists, working with colleagues at Los Alamos, conduct a thriving particle astrophysics program detecting TeV gamma rays.

The presence of the strong astrophysics group from the Astronomy and Astrophysics

Department in the same building provides a healthy symbiosis in this area. Note that the Astronomy and Astrophysics Department does not offer an undergraduate major. UCSC is the headquarters for the University of California Observatories , which include Lick Observatory near San Jose and the Keck Observatory in Hawaii ; these provide additional opportunities for collaboration between researchers in physics and astronomy.

Condensed matter physics research at UCSC covers a range of topics including the behavior of exotic many-electron systems (for example, superconductors); the study of magnetic phase transitions; the organization of complex systems (proteins, DNA, and polymers); the development of new electronic devices using novel materials and research in biophysics.

The experimental program uses X-ray and synchrotron radiation techniques at facilities such as the Stanford Synchrotron Radiation Laboratory (SSRL); neutron scattering techniques at various national laboratories; and optical, X-ray, and specific heat techniques at UCSC. Undergraduate students are actively involved in several condensed matter physics laboratories.

Courses

An undergraduate physics education is broad and basic. Undergraduate students, even in introductory classes, are exposed to new ideas associated with explorations at the boundaries of human knowledge.

The lower-division introductory courses in the major programs (Physics 5A, 5B, 5C, and 5D sequence) are well suited to students in the physical sciences and engineering. The 6A, 6B, 6C sequence, which also provides a calculus-based introduction to the basic concepts in physics, is better suited to students in the life sciences. The Physics 6 sequence is also appropriate for ~~non-science~~ students who have a calculus background. Students who take Physics 6A instead of Physics 5A, and do very well in it, may contact the department chair for permission to enter the major. The laboratory courses, 5L-5M-5N and 6L must be taken concurrently with the corresponding lecture courses.

Major Program

The physics, astrophysics, and applied physics major programs provide a comprehensive coverage of the field and the background necessary for graduate school or industrial careers. The physics education major provides the necessary background to enter a rigorous credential program and, ultimately, a career in high-school science education. Students earn a bachelor of science (B.S.) degree. The UCSC physics, astrophysics, applied physics, and physics education programs begin with a four-quarter presentation of the introductory concepts of the subject, *Introduction to Physics*. (**Note:** the applied physics program also requires completion of a general chemistry course.)

This is followed by courses which provide an introduction to relativity and quantum physics. The programs continue with a three-quarter sequence in mathematical methods of physics designed to provide the mathematics preparation necessary for most of the upper-division physics courses required for the majors. Included in the upper-division programs are two intensive laboratory courses designed to illustrate both historical experiments in the development of physics, astrophysics, and applied physics, and modern experimental methods. Advanced and especially motivated students may enroll in some graduate courses with the approval of the instructor and department chair

The senior thesis, required of all physics, astrophysics, applied physics, and physics education majors at UCSC, provides the opportunity for students to apply their skills to problems of interest to them, either theoretical or experimental, usually with technical advice from a faculty member. The senior thesis may be based on research with a faculty

member. Topics have included particle physics, condensed matter physics, astrophysics, biophysics, and various applied technologies. The senior thesis is a distinctive part of the UCSC physics major program and entails a substantial investment of both student and faculty time. The learning experience involved in the thesis, as well as the thesis itself, has proven extremely valuable to students in enhancing employment opportunities upon graduation or in gaining admission to graduate school.

The physics education major is designed to provide future K-12 physics and mathematics teachers with the necessary coursework aligned with the K-12 physics and mathematics standards necessary to pass the California Subject Matter Examinations for Teachers (CSET) in Physics and Mathematics. It also includes a thorough introduction to educational theory and practice including a sequence of three classroom-based internships. Students will be well prepared to enter a rigorous teaching credential program and ultimately a career in high school education. The senior comprehensive requirement involves a curriculum development project overseen by the Physics/Astronomy faculty, with co-supervision from CalTeach/Education faculty as needed.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. Students in physics, applied physics, physics (astrophysics), and physics education satisfy the DC requirement by completing courses 195A, 195B, and the senior thesis.

Admissions Policy

In order to be admitted to the physics, astrophysics, applied physics, or physics education majors students must pass Physics 5A, 5B and 5C with an average grade point average (GPA) in these three courses of 2.7 or higher. At least two of these three courses must be passed in the first attempt. If the third course is repeated, the grade from the second attempt will be considered. Students failing to meet these criteria must meet with a faculty adviser. The faculty adviser will make a recommendation to the department chair, who will then either finalize the denial of admission or specify further conditions for admission.

Letter Grade Policy

For all students entering UCSC in fall 2009 and later, all courses used to satisfy any of the physics majors must be taken for a letter grade.

Course Requirements

Physics

The requirements for the major include Physics 5A/L, 5B/M, 5C/N, and 5D; Mathematics 19A or 20A, 19B or 20B, 23A, and either 23B or Physics 14; plus the following upper-division courses: 101A-B, 105, 110A-B, 112, 116A-B-C, 133, 134, and 139A.

In addition, students must pass at least two upper-division electives chosen from physics or the following astronomy and astrophysics courses: 111 through 118. At least one of the two electives must be from the following physics courses: 129, 139B, 155, or 171. In some cases, the second elective requirement may be satisfied by an approved upper-division science or engineering course.

Students have to satisfy a computer programming requirement by taking one of the courses, Computer Science 5C, Earth and Planetary Sciences 119, or Physics 115. Computer Science 5C teaches programming in C/C++ for students with no prior experience. Earth and Planetary Sciences 119 teaches programming in IDL (commonly used by astronomers) and simple applications. Physics 115 does not teach programming; it

assumes basic programming ability in C, C++ or Fortran and discusses numerical techniques relevant to physics. Students may also satisfy the computer programming requirement by demonstrating their knowledge of programming to a faculty member designated by the Physics Department.

Physics (Astrophysics)

The requirements for the major include Physics 5A/L, 5B/M, 5C/N, and 5D; Mathematics 19A or 20A, 19B or 20B, 23A, and either 23B or Physics 14; plus the following upper-division courses: 101A-B, 105, 110A-B, 112, 116A-B-C, 133, 135 or 136, ~~7~~ and 139A.

In addition, students must pass at least three upper-division electives selected from the following upper-division courses: Astronomy and Astrophysics 111 through 118 or 171 (cross-listed with Physics 171).

Students have to satisfy a computer programming requirement by taking one of the courses Computer Science 5C, Earth and Planetary Sciences 119, or Physics 115. Computer Science 5C teaches programming in C/C++ for students with no prior experience. Earth and Planetary Sciences 119 teaches programming in IDL (commonly used by astronomers) and simple applications. Physics 115 does not teach programming; it assumes basic programming ability in C, C++ or Fortran and discusses numerical techniques relevant to physics. Students may also satisfy the computer programming requirement by demonstrating their knowledge of programming to a faculty member designated by the Physics Department.

Applied Physics

The requirements for the major include Physics 5A/L, 5B/M, 5C/N, and 5D; Mathematics 19A or 20A, 19B or 20B, 23A, and either 23B or Physics 14; ~~a computer programming requirement, Computer Science 5C;~~ Chemistry 1A or 1B; plus the following upper-division physics courses: 101A-B, 105, 110A-B, 112, 116A-B-C, 133, and 134.

In addition, students must pass at least three upper-division applied physics electives selected from the following approved list of courses: Physics 107, 115, 120, 129, 139A, 139B, 152, 155, 156, and 160, 171, 180, Electrical Engineering 101, 103,~~127, 128, 115, 130, 145, 154, 171, 172, 178; 145, Physics 107, 109, 115, 152, 155, 156, and 160;~~ or other courses with approval from a faculty adviser.

Students have to satisfy a computer programming requirement by taking one of the courses Computer Science 5C, Earth and Planetary Sciences 119, or Physics 115. Computer Science 5C teaches programming in C/C++ for students with no prior experience. Earth and Planetary Sciences 119 teaches programming in IDL (commonly used by astronomers) and simple applications. Physics 115 does not teach programming; it assumes basic programming ability in C, C++ or Fortran and discusses numerical techniques relevant to physics. Students may also satisfy the computer programming requirement by demonstrating their knowledge of programming to a faculty member designated by the Physics Department.

Physics Education

The requirements for the major include Physics 5A/L, 5B/M, 5C/N, 5D, 101A and 101B, 133, and 134 or 135; Mathematics 19A or 20A, 19B or 20B, 23A, 23B or Physics 14; Mathematics 100, 128A, 181; Education 50B or 50C, 100B or 100C, 185L, 185B or 185C and one upper-division course dealing with issues of diversity in education; Applied Mathematics and Statistics 5 or 7; and Astronomy 12 or 13. One elective course must be taken from physics, astronomy, mathematics or education courses, or other courses with approval of the department.

Sample Physics Major Planner

The following is a recommended academic plan for students to complete during their four years to fulfill requirements for the physics major.

Year	Fall	Winter	Spring
1st (frsh)	MATH 19A or 20A	MATH 19B or 20B	MATH 23A
	PHYS 5A/L	PHYS 5B/M	PHYS 5C/N
	PHYS 10 (recom- mended)		<u>CMPS 5C</u>
2nd (soph)	PHYS 101A	PHYS 101B	PHYS 116B
	PHYS 5D (2 credits)	PHYS 116A	PHYS 133*
	MATH 23B		
3rd (jr)	PHYS 105	PHYS 110A	PHYS 110B
	PHYS 116C	PHYS 112	PHYS 139A
	PHYS 135*	<u>PHYS 134</u>	
4th (sr)	PHYS 195A	PHYS 195B	
	PHYS elective**	PHYS elective**	

* Course 133 is offered winter and spring quarters. Course 134 is offered ~~fall and~~ winter and spring quarters and may be taken junior or senior year after completing course 133.

**Students should look into taking electives earlier where possible, as some courses are only offered every alternate year.

*Sample Physics (Astrophysics)
Major Planner*

Year	Fall	Winter	Spring

1st (frsh)	MATH 19A or 20A	MATH 19B or 20B	MATH 23A

4th (sr)	EDUC diversity course	elective	
	Thesis	Thesis	

*Physics 133 is offered winter and spring quarters. Physics 134 is offered in ~~fall and~~ winter and spring quarters and may be taken in the junior or senior year after completing Physics 133. Physics 135 is offered some academic years as a multiple-term course: 135A in fall and 135B in winter or spring, depending on astronomical conditions.

Students who take Physics 6A instead of Physics 5A, and do very well in it, may contact the department chair for permission to enter the major.

Depending on the student's interests, further preparation for graduate school in physics, astrophysics, applied physics, or for other careers is obtained by electing more specialized or applied courses (see the descriptions of courses below). In addition, again depending on the student's academic focus, elective courses may be selected in mathematics, astronomy and astrophysics, and/or other areas of physical science.

For further information about the physics program, please request the undergraduate handbook, *A Physics Major's Guide*, from the Physics Department office, or look for it online at <http://physics.ucsc.edu>.

Comprehensive Requirement

The comprehensive exit requirement is normally satisfied by the submission and approval of a thesis. To satisfy the comprehensive requirement via a thesis Physics 195A and 195B are required. Note that successful completion of 195A and 195B satisfies the Disciplinary Communication requirement or Writing Intensive general education requirement.

In special cases, minor modifications of these requirements may be granted to suit the specific program of a particular student. Before embarking on a program needing such waivers, students should discuss their plans with a physics adviser and seek approval by petition from the Physics Department office.

Honors

The department awards "honors" (3.5 grade point average or better) and "highest honors"(3.8 GPA or better) to top graduating students each year. Recommendations for these awards are made by the department chair and are based upon excellence of academic performance, particularly in upper-division physics courses, as reflected in grades and the narrative evaluations. The department also awards "honors" for outstanding work on the senior thesis, made upon the recommendation of the senior thesis supervisor and the thesis technical adviser.

Minor Requirements

Requirements for the minor in physics include Physics 5A/L, 5B/M, 5C/N, 5D (or Physics 6A/L, 6B/M, 6C/N with minimum GPA of 3.5); Mathematics 19A or 20A, 19B or 20B, 23A, 23B or Physics 14; Physics 101A, 101B, 133, and one upper division elective (and any prerequisites) from physics or from a list of courses from other departments approved by the Physics Undergraduate Committee. See the Physics Department for the listing.

Advising and Preparation for the Major

Because the courses for the physics major are sequential, it is strongly advised that students declare their major in physics, astrophysics, or applied physics as early as possible (either at initial registration or by the end of the first year). Students who do not begin the lower-division requirements during their first year may have difficulty completing the program within four years. Transfer students may also have problems completing the program within the usual time, depending upon whether they took equivalent courses at their previous institutions. The department adviser works closely with students interested in pursuing the major to ensure that they begin the program immediately and follow the appropriate steps toward its completion.

High school students coming directly to UCSC should emphasize their mathematics preparation with the expectation that they will take calculus in their first quarter at UCSC in order to concurrently take the Physics 5 series, calculus-based physics for physics majors.

Students transferring to UCSC as junior physics, astrophysics, or applied physics majors should have completed three quarters of introductory calculus-based physics with laboratory and three quarters of calculus. It is also desirable to have an introductory course in modern physics as well as mathematics courses in linear algebra, vector calculus, and differential equations. The Physics Department advises each junior transfer student individually upon their arrival.

Graduate Programs

The Physics Department offers graduate programs leading to the master of science (M.S.) and/or the doctor of philosophy (Ph.D.) degrees. In the first year of study, Ph.D. students are expected to take two core graduate-level courses per quarter, including the courses required for the Ph.D. degree (210, 212, 214, 215, 216, 219) and other courses specific to the student's field of interest. All first-year students also take 205, *Introduction to Research*. All graduate students also attend a weekly colloquium, 292. Each student has a faculty adviser who helps to determine which courses are most appropriate, taking into account the student's background and interests. The student-faculty ratio is low so that M.S. and Ph.D. students can work closely with faculty and pursue programs that fit their individual needs. Research is currently conducted in theoretical and experimental particle physics, theoretical and experimental condensed matter physics (including materials physics and biophysics), and in theoretical and experimental high-energy astrophysics (including cosmology). After passing a written qualifying examination, Ph.D. students pursue independent research leading to an oral examination and completion of a doctoral

dissertation.

Students may obtain a master's degree through course work (eight physics graduate courses) and submission of an approved thesis. The thesis may be waived by passing four sections of the written Ph.D. qualifying examination. Master's candidates are encouraged to write a research thesis and may do so in any of the research fields in the program, thereby developing laboratory and computational skills in areas such as electronics design, computer simulation and visualization, cryogenics, X-ray scattering, complex novel materials and devices, or materials science. Each M.S. student is assigned a faculty adviser who helps to design a course work plan suited to the interests of the student.

Physics students and faculty use a number of UCSC research facilities (described at the beginning of this section and elsewhere in this catalog): the Santa Cruz Institute for Particle Physics (SCIPP) and Lick Observatory (headquartered at UCSC). There is strong interaction with other disciplines, especially astronomy and astrophysics, biology, chemistry, Earth sciences, electrical engineering, and mathematics. Proximity to the Stanford Linear Accelerator Center and the Stanford Synchrotron Radiation Laboratory provides additional local research opportunities. UCSC faculty and graduate students also participate in research programs at CERN in Geneva , Los Alamos, Oak Ridge National Laboratory, NASA, Ames , NREL, Lucent, Xerox, IBM, Bell Labs, and other national and international laboratories.

Application materials and brochures describing the physics M.S. and Ph.D. graduate programs in more detail may be obtained by visiting our web site at <http://physics.ucsc.edu/> or by contacting the Division of Graduate Studies at <http://graddiv.ucsc.edu>.

Five-year B.S./M.S. program

The new five year combined B.S./M.S. in Pphysics program provides highly motivated undergraduate majors the opportunity to earn a M.S. degree in five years. The program provides the additional level of preparation and experience that students need to pursue careers in industry and government. Students in the B.S./M.S. Pphysics program can pursue concentrations in materials and device physics, energy and the environment, computational physics, finance and economics, and medical biophysics. Students apply to be admitted to the B.S./M.S. program, in consultation with their faculty or undergraduate advisor, no later than the end of the second quarter of the junior year. To be accepted to the program, students will need to have demonstrated solid performance in general and in the major, as demonstrated by: 1) Aa G.P.A. in Pphysics Courses of at least 3.0; 2) Aa overall G.P.A .of at least 3.0; and 3) Aa recommendation from a faculty member attesting to the student's promise for the M.S. degree in Pphysics.

Course Requirements

All students in the 5-year BS/MS program will be expected to take a core set of four Pphysics courses, including:

PHYS 212. Electromagnetism I:

PHYS 215. Introduction to Non-Relativistic Quantum Mechanics:

PHYS 216. Advanced Topics in Non-Relativistic Quantum Mechanics

PHYS 219. Statistical Physics:

plus four electives in the concentration areas described below. Typically, at least one of these electives will be another physics graduate course. One of the elective courses can be an upper-division undergraduate course; upon approval of the faculty coordinator and Graduate Committee. Two of these elective courses can also serve to fulfill the elective requirement for the B.S. degree.

Materials and Device Physics

This concentration prepares students who are interested in pursuing industrial jobs in the areas of materials science, semiconductors, and optoelectronic devices.

Energy and the Environment

This concentration prepares students who are interested in pursuing industrial or government jobs in the areas of sustainable--energy technologies, environmental and climate change and scientific policy related to these areas.

Finance and Economics

This concentration prepares students who are interested in pursuing industrial or government jobs in the areas of finance, monetary policy, and economics.

Computational Physics

This concentration prepares students who are interested in pursuing industrial or government jobs in the areas related to using computational methods to solve applied problems as well as computer-based visualization methods for data presentation. Students interested in computational methods in biology could also consider the concentration in medical biophysics.

Medical BioPhysics

This concentration prepares students who are interested in pursuing industrial and hospital jobs in the areas of medical technology, biomolecular engineering, and biophysics.

Faculty and Professional Interests

Professor

THOMAS BANKS

String and particle theory, quantum gravity, and cosmology

DAVID P. BELANGER

Experimental condensed matter physics, phase transitions

FRANK G. BRIDGES, Emeritus

GEORGE BROWN, Emeritus

SUE A. CARTER

Experimental condensed matter physics, polymer physics, molecular electronics, phase transitions, electronic and optical properties of materials

JOSHUA M. DEUTSCH

Condensed matter theory

MICHAEL DINE

Theory of elementary particles

DAVID E. DORFAN, Emeritus

GEORGE D. GASPARI, Emeritus

HOWARD E. HABER

Theory and phenomenology of fundamental particles and their interactions

CLEMENS A. HEUSCH, Emeritus

ROBERT P. JOHNSON

Experimental high-energy physics, astrophysics

ONUTTOM NARAYAN

Theoretical condensed matter physics

MICHAEL NAUENBERG, Emeritus

JOEL R. PRIMACK

Cosmology, galaxy, formation and evolution, particle astrophysics, nature of dark matter, gamma ray astronomy

STEVEN RITZ

Particle physics and astrophysics

BRUCE ROSENBLUM, Emeritus

MATTHEW SANDS, Emeritus

ZACK SCHLESINGER

Experimental condensed matter physics, infrared and optical spectroscopy, strongly correlated electron systems, novel materials, negative thermal expansion, underconstraint and geometrical frustration

BRUCE SCHUMM

Experimental particle physics

PETER L. SCOTT, Emeritus

ABRAHAM SEIDEN

Experimental high-energy physics

SRIRAM SHASTRY

Condensed matter physics, strongly correlated matter, Mott-Hubbard physics, high T_c superconductivity, quantum magnetism, exactly integrable systems, exactly solvable models of many-body systems and in statistical mechanics, quantum chaos, geometric frustration

A. PETER YOUNG

Condensed matter theory, statistical mechanics

Associate Professor**ANTHONY AGUIRRE**

Cosmology of the early and late universe: inflation and the global structure of cosmological models; the intergalactic medium and its enrichment with heavy elements; galaxy formation, evolution, and feedback processes; dark matter; theories of modified gravity

DAVID M. SMITH

High-energy astrophysics; X-ray and gamma-ray detectors and instrumentation; solar, terrestrial, and planetary sources of gamma radiation

Assistant Professor**GEY-HONG GWEON**

Experimental condensed matter physics

TESLA JELTEMA

High-energy astrophysics and cosmology

JASON NIELSEN

Experimental high-energy physics

STEFANO PROFUMO

Theory of particle physics and particle astrophysics

ALEXANDER SHER

Development of experimental techniques for recording and stimulation of activity at hundreds of neurons and use of these techniques to study neural function, structure, and development

Lecturer**RACHEL DEWEY**

Astrophysics, radio astronomy, neutron stars, science education

FRED KUTTNER

Foundations of quantum mechanics; physics education

ADRIANE STEINACKER

Planet formation, MHD simulations

**Professor****GEORGE R. BLUMENTHAL (Astronomy and Astrophysics)**

Cosmology, galaxy formation, high-energy astrophysics

WENTAI LIU (Electrical Engineering)

Retinal prosthesis, biomimetic systems, integrated neuro-electronics, molecular electronics, CMOS and SOI transceiver design, current mode band limited signaling, microelectronic sensor, timing/clock recovery and optimization, noise characterization and modeling, and computer vision/image processing

WILLIAM G. MATHEWS, Emeritus**RICHARD MONTGOMERY (Mathematics)**

Celestial mechanics, differential geometry, gauge theory, mechanics (quantum and classical), and control theory

ARTHUR RAMIREZ (Dean, Baskin Engineering) (Electrical Engineering)

Experimental materials physics encompassing a broad range of systems including semiconductors, superconductors, magnets, thermoelectrics, and dielectrics. Research that connects materials and devices, with a focus on oxides and organics. Many-body physics that arises from geometrical frustration of low energy degrees of freedom. Techniques include ultra-low temperatures and high magnetic fields, thermodynamic and transport measurements, defect spectroscopy, and device characterization.

ALI SHAKOURI (Electrical Engineering)

Quantum electronics, nano- and microscale heat and current transport in semiconductor devices; thermoelectric/thermionic energy conversion; renewable energy sources; thermal imaging; micro-refrigerators on a chip; and optoelectronic integrated circuits

Associate Professor

JOEL A. KUBBY (Electrical Engineering)

Micro-Electro-Mechanical-Systems (MEMS), adaptive optics, integrated optics, bio-MEMS

Assistant Professor

PASCALE GARAUD (Applied Mathematics and Statistics)

Astrophysics, geophysics, fluid dynamics, numerical resolutions of differential equations, and mathematical modeling of natural flows

HOLGER SCHMIDT (Electrical Engineering)

Integrated optics for biomedicine and quantum optics, nano-magenta-optics, semiconductor physics, optoelectronic and photonic devices, ultrafast optics, quantum interference

JOHANNES WALCHER (Mathematics)

String theory, mirror symmetry, mathematical and particle physics

Adjunct Professor

WILLIAM ATWOOD

DONALD COYNE, Emeritus

ALAN LITKE

MICHAEL RIORDAN

HARTMUT F.-W. SADROZINSKI

TERRY L. SCHALK

DAVID A. WILLIAMS

Research Physicist

AL EISNER, Emeritus

VITALIY FADEYEV

ALEXANDER GRILLO

WILLIAM LOCKMAN

[Program Description](#) | [Faculty](#) | [Course Descriptions](#)

Lower-Division Courses

1. Conceptual Physics. W

Topics in classical and quantum physics and their relation to physical phenomena in the world around us, including modern electronics. Concepts are stressed, but some practical calculational techniques are developed. Working knowledge of high school algebra and geometry is essential. (General Education Code(s): SI, IN, Q.) *The Staff*

2. Elementary Physics of Energy. S

The physics of energy developed in a course accessible to non-science majors as well as science majors. Fundamental principles and elementary calculations, at the level of basic algebra, developed and applied to the understanding of the physics of energy. Topics include fossil fuels, renewable energy, solar cells and waste energy, waste-energy recovery, nuclear power, and global greenhouse effects. (General Education Code(s): PE-E.) *The Staff*

5A. Introduction to Physics I. F

Elementary mechanics. Vectors, Newton's laws, inverse square force laws, work and energy, conservation of momentum and energy, and oscillations. Corequisite(s): concurrent enrollment in course 5L and Mathematics 19A or 20A is required. (General Education Code(s): MF, IN, Q.) *D. Smith*

5B. Introduction to Physics II. W

A continuation of 5A. Wave motion in matter, including sound waves. Geometrical optics, interference and polarization, statics and dynamics of fluids. Prerequisite(s): courses 5A/L and Mathematics 19A or 20A; concurrent enrollment in course 5M is required. Corequisite: Mathematics 19B or 20B. (General Education Code(s): SI, IN.) *R. Johnson*

5C. Introduction to Physics III. S

Introduction to electricity and magnetism. Electromagnetic radiation, Maxwell's equations. Prerequisite(s): courses 5A/L and Mathematics 19B or 20B. Concurrent enrollment in 5N is required. Corequisite: Mathematics 22 or 23A. Courses 5B/M recommended. (General Education Code(s): SI, IN.) *A. Sher*

5D. Heat, Thermodynamics, and Kinetics (2 credits). F

Introduction to temperature, heat, and thermal conductivity, ideal gases, the first and second laws of thermodynamics, and an introduction to kinetic theory. Prerequisite(s): courses 5A/L and Mathematics 19B or 20B. *J. Primack*

5I. Introduction to Physics Honors I (2 credits). F

Weekly 90-minute section covering advanced and modern topics. Topics may include the theory of relativity; complicated dynamics (air resistance, planetary dynamics, etc.); fallacies in perpetual-motion machines; the Euler disk and unusual tops; elasticity of materials applied to structures. Concurrent enrollment in course 5A is required. *J. Primack*

5J. Introduction to Physics Honors II (2 credits). W

Weekly 90-minute section covering advanced and modern topics. Topics may include nonlinear oscillators and chaos; waves in deep water and inside the earth; redshift in astronomy; negative refractive index materials; photons and matter waves; holography; viscosity; and turbulence. Concurrent enrollment in course 5B is required. *F. Kuttner*

5K. Introduction to Physics Honors III (2 credits). S

Weekly 90-minute section covering advanced and modern topics. Topics may include atmospheric electricity; shielding; tensor polarization; alternative energy sources; semiconductor devices; particle accelerators and relativistic electrodynamics; Thomson scattering; digital and analog communication. Concurrent enrollment in course 5C is required. *J. Primack*

5L. Introduction to Physics Laboratory (1 credit). F

Laboratory sequence illustrating topics covered in course 5A. One three-hour laboratory session per week. Prerequisite(s): concurrent enrollment in course 5A is required. *The Staff*

5M. Introduction to Physics Laboratory (1 credit). W

Laboratory sequence illustrating topics covered in course 5B. One three-hour laboratory session per week. Prerequisite(s): courses 5A/L; concurrent enrollment in course 5B is required. *The Staff*

5N. Introduction to Physics Laboratory (1 credit). S

Laboratory sequence illustrating topics covered in course 5C. One three-hour laboratory session per week. Prerequisite(s): courses 5A/L. Concurrent enrollment in 5C is required. Courses 5B/M recommended. *The Staff*

6A. Introductory Physics I. F,W,S

Elementary mechanics. Vectors, Newton's laws, inverse square force laws, work and energy, conservation of momentum and energy, and oscillations. Prerequisite(s): Concurrent enrollment in course 6L required. Corequisite(s): Mathematics 11A or 19A or 20A or Applied Mathematics and Statistics 15A. (General Education Code(s): MF, IN, Q.) (F) *S. Carter*, (W) *R. Dewey*, (S) *T. Jeltema*

6B. Introductory Physics II. W,S

A continuation of 6A. Geometric optics; statics and dynamics of fluids; introduction to thermodynamics, including temperature, heat, thermal conductivity, and molecular motion; wave motion in matter, including sound waves; introduction to electricity and magnetism. Prerequisite(s): course 6A and Mathematics 11A or 19A or 20 or Applied Mathematics and Statistics 15A. Corequisite(s): Mathematics 11B or 19B or 20B or Applied Mathematics and Statistics 15B. (General Education Code(s): SI, IN.) (W) *A. Steinacker*, (W) *S. Ritz*, (S) *R. Dewey*

6C. Introductory Physics III. F,S

Introduction to electricity and magnetism. Elementary circuits; Maxwell's equations; electromagnetic radiation; interference and polarization of light. Prerequisite(s): courses 6A/L and Mathematics 11B or 19B or 20B or Applied Mathematics and Statistics 15B. (General Education Code(s): SI, IN.) (F) *J. Nielsen*, (S) *F. Kuttner*

6L. Introductory Physics Laboratory (1 credit). F,W

Laboratory sequence illustrating topics covered in course 6A. One three-hour laboratory session per week. Prerequisite(s): Previous or concurrent enrollment in course 6A required. *The Staff*

6M. Introductory Physics Laboratory (1 credit). W,S

Laboratory sequence illustrating topics covered in course 6B. One three-hour laboratory session per week. Prerequisite(s): courses 6A and 6L or courses 7A and 7L and previous or concurrent enrollment in course 6B. *The Staff*

6N. Introductory Physics Laboratory (1 credit). F,S

Laboratory sequence illustrating topics covered in course 6C. One three-hour laboratory session per week. Prerequisite(s): courses 6A and 6L; previous or concurrent enrollment in course 6C; courses 6B and 6M are recommended. *The Staff*

8. The Quantum Enigma. F

Addressed to non-science majors; may interest science majors. After a brief overview of classical physics concepts, some philosophical interpretations of quantum mechanics, which revolutionized our description of nature, are discussed. Concepts are stressed, but some calculation techniques are developed. Enrollment limited to 210. (General Education Code(s): SI.) *B. Rosenblum*

10. Overview of Physics (2 credits). *

One lecture per week providing a descriptive overview of major areas in the discipline. These include fundamental particles, solid state, fluids, nonlinear dynamics, biophysics, and cosmology. Lectures by various faculty with research interests in these fields. The course is suggested for prospective physics majors, or others, before they enroll in the Physics 5 sequence. *F. Kuttner*

11. The Physicist in Industry (2 credits). S

One two-hour meeting per week. Subjects include roles of the physicist in industry, the business environment in a technical company, economic considerations, job hunting, and discussions with physicists with industrial experience. Enrollment by permission of instructor. Priority given to applied physics upper-division students; other majors if space available. Enrollment limited to 15. *B. Rosenblum*, *F. Kuttner*

14. Introduction to Vector Calculus with Applications (2 credits). *

Partial differentiation, the chain rule, multiple integrals, Jacobians, surface integrals and the divergence, line integrals and the curl, Stokes theorem, gradients and directional derivatives. Prerequisite(s): Mathematics 22 or 23A. *The Staff*

42. Student-Directed Seminar.

Seminars taught by upper-division students under faculty supervision. (See course 192.) *The Staff*

75. The Observer in Quantum Mechanics (2 credits). W

Non-mathematical seminar discussing the mysteries arising with the role of the observer in quantum mechanics. Addressed to majors in the physical or biological sciences. Covers material largely untreated in the usual science curriculum. Enrollment restricted to sophomores, juniors, seniors, and graduate students. Enrollment limited to 14. *B. Rosenblum*

80D. The Quantum Century. *

Survey of 20th-century physics, emphasizing quantum theory and its impact upon science and culture. Includes relativity, atomic and nuclear structure, and applications in transistors, lasers, and nuclear weapons. Ends with discussions of elementary particle physics and quantum cosmology.

Aimed at non-science majors as it stresses historical and philosophical perspectives rather than calculations (only non-calculus math will be used), but will also be of interest to science majors. (General Education Code(s): T6-Natural Sciences or Humanities and Arts, Q.) *E. Riordan*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. *The Staff*

Upper-Division Courses

101A. Introduction to Modern Physics I. F

Special theory of relativity. Early experiments and models in quantum physics. Introduction to concepts and calculations in quantum mechanics. Single-electron atoms. Prerequisite(s): courses 5A/L, 5B/M, and 5C/N or 6A/L, 6B/M, and 6C/N. *S. Ritz*

101B. Introduction to Modern Physics II. W

Topics in quantum physics, including angular momentum and spin, the Pauli exclusion principle, and quantum statistics. Applications in multi-electron atoms, molecules, solid state physics, and nuclear and particle physics. Prerequisite(s): course 14 or Mathematics 23B; course 101A; 5A/L, 5B/M, and 5C/N or 6A/L, 6B/M, and 6C/N. *F. Kuttner*

105. Mechanics. F

Particle dynamics in one, two, and three dimensions. Conservation laws. Small oscillations, Fourier series and Fourier integral solutions. Phase diagrams and nonlinear motions, Lagrange's equations, and Hamiltonian dynamics. Prerequisite(s): courses 5A/L, 5B/M, 5C/N, and 116A-B. *G. Gweon*

107. Introduction to Fluid Dynamics. *

Covers fundamental topics in fluid dynamics: Euler and Lagrange descriptions of continuum dynamics; conservation laws for inviscid and viscous flows; potential flows; exact solutions of the Navier-Stokes equation; boundary layer theory; gravity waves. Students cannot receive credit for this course and Applied Mathematics and Statistics 217. (Also offered as Applied Math and Statistics 107. Students cannot receive credit for both courses.) Prerequisite(s): Mathematics 107 or Physics 116C or Earth and Planetary Sciences 111. *The Staff*

110A. Electricity, Magnetism, and Optics. W

Maxwell's equations, electrostatics, magnetostatics, induction, electromagnetic waves, physical optics, and circuit theory. Prerequisite(s): 116A-B-C. *J. Deutsch*

110B. Electricity, Magnetism, and Optics. S

Maxwell's equations, electrostatics, magnetostatics, induction, electromagnetic waves, physical optics, and circuit theory. Prerequisite(s): course 110A, and 116A-B-C. *A. Seiden*

112. Thermodynamics and Statistical Mechanics. W

Consequences of the first and second laws of thermodynamics, elementary statistical mechanics, thermodynamics of irreversible processes. Prerequisite(s): courses 5B/M, 5C/N, 5D, 101A, 101B, 105, and 116A-B. *A. Young*

115. Computational Physics. S

This course will apply efficient numerical methods to the solutions of problems in the physical sciences which are otherwise intractable. Examples will be drawn from classical mechanics, quantum mechanics, statistical mechanics, and electrodynamics. Students will apply a high-level programming language, such as Mathematica, to the solution of physical problems and develop appropriate error and stability estimates. Prerequisite(s): courses 101B, 105, 116A-B-C, or equivalent. Basic programming experience in C or Fortran. No previous experience with Mathematica is required. *A. Young*

116A. Mathematical Methods in Physics. W

Infinite series, power series and asymptotic series, complex numbers and complex functions, topics in linear algebra including vector spaces, matrices and determinants, systems of linear equations, eigenvalue problems and matrix diagonalization, tensor algebra, asymptotic expansions, and special functions defined by integrals.. Prerequisite(s): courses 5A/L, 5B/M, 5C/N; Mathematics 23A, 23B. *S. Profumo*

116B. Mathematical Methods in Physics. S

Fourier series and transforms, ordinary differential equations, calculus of variations, and functions of a complex variable. Prerequisite(s): courses 5A/L, 5B/M, 5C/N, 116A; and Mathematics 23A and 23B. *M. Dine*

116C. Mathematical Methods in Physics. F

Series solutions of ordinary equations, Legendre polynomials, Bessel functions, sets of orthogonal functions, partial differential equations, probability and statistics. Prerequisite(s): courses 5A/L, 5B/M, 5C/N, 116A-B, Mathematics 23A and 23B. *H. Haber*

120. Polymer Physics. *

Statistical properties polymers; scaling behavior, fractal dimensions; random walks, self avoidance; single chains and concentrated solutions; dynamics and topological effects in melts; polymer networks; sol-gel transitions; polymer blends; application to biological systems; computer simulations will demonstrate much of the above. Students cannot receive credit for this course and course 240. Prerequisite(s): courses 112, 116A-B-C. Offered in alternate academic years. *J.*

129. Nuclear and Particle Physics. W

Properties and classification of the elementary particles, their weak and strong interactions, nuclear physics, high energy phenomena analyzed by quantum mechanical methods, experimental methodology. Prerequisite(s): courses 116A-B-C and 139A; students with equivalent course work may contact instructor for permission to enroll. Offered in alternate academic years. *A. Seiden*

133. Intermediate Laboratory. W,S

Demonstration of phenomena of classical and modern physics. Development of a familiarity with experimental methods. Special experimental projects may be undertaken by students in this laboratory. Prerequisite(s): course 101A. (W) *A. Sher*, (S) *D. Belanger*

134. Physics Advanced Laboratory. W,S

Individual experimental investigations of basic phenomena in atomic, nuclear, and solid state physics. Prerequisite(s): courses 133 and 101B. May be repeated for credit. (W) *S. Carter*, (S) *D. Smith*

135. Astrophysics Advanced Laboratory. *

Introduction to the techniques of modern observational astrophysics at optical and radio wavelengths through hands-on experiments. Offered in some academic years as a multiple-term course: 135A in fall and 135B in winter, depending on astronomical conditions. (Also offered as Astronomy and Astrophysics 135. Students cannot receive credit for both courses.) Prerequisite(s): course 133 and at least one astronomy course. Intended primarily for juniors and seniors majoring or minoring in astrophysics. *R. Dewey*

135A. Astrophysics Advanced Laboratory (3 credits). F

Introduction to techniques of modern observational astrophysics at optical and radio wavelengths through hands-on experiments. Intended primarily for juniors and seniors majoring or minoring in astrophysics. Offered in some academic years as single-term course 135 in fall, depending on astronomical conditions. (Also offered as Astronomy and Astrophysics 135A. Students cannot receive credit for both courses.) Prerequisite(s): course 133 and at least one astronomy course. *R. Dewey*

135B. Astrophysics Advanced Laboratory (2 credits). W

Introduction to techniques of modern observational astrophysics at optical and radio wavelengths through hands-on experiments. Intended primarily for juniors and seniors majoring or minoring in astrophysics. Offered in some academic years as single-term course 135 in fall, depending on astronomical conditions. (Also offered as Astronomy and Astrophysics 135B. Students cannot receive credit for both courses.) Prerequisite(s): course 133 and at least one astronomy course. *R. Dewey*

136. Advanced Astronomy Laboratory. S

Introduces the techniques of modern observational astrophysics at optical wavelengths through hands-on experiments and use of remote observatories. Students develop the skills and experience to pursue original research. Course is time-intensive and research-oriented. Prerequisite(s): Earth Sciences 119 and Physics 133. Enrollment restricted to junior and senior astrophysics majors. Enrollment limited to 12. *J. Prochaska*

139A. Quantum Mechanics. S

The principles and mathematical techniques of nonrelativistic quantum mechanics: the Schrödinger equation, Dirac notation, angular momentum, approximation methods, and scattering theory. Offered in spring. Prerequisite(s): courses 101A, 101B, 116A-B-C. *J. Nielsen*

139B. Quantum Mechanics. F

The principles and mathematical techniques of nonrelativistic quantum mechanics: the Schrödinger equation, Dirac notation, angular momentum, approximation methods, and scattering theory. Offered in fall. Prerequisite(s): courses 101A, 101B, 116A-B-C and 139A. *R. Johnson*

143. Supervised Teaching (2 credits). F,W,S

Supervised tutoring in selected introductory courses. Students should have completed course 101A and 101B as preparation. Students submit petition to sponsoring agency. *The Staff*

152. Optoelectronics. *

The first half of the course covers the theory of optoelectronics including wave, electromagnetic, and photon optics, modulation of light by matter, and photons in semiconductors. The second half covers applications including displays, lasers, photodetectors, optical switches, fiber optics, and communication systems. Prerequisite(s): courses 101A, 101B, and 110A. *The Staff*

155. Solid State Physics. W

Interatomic forces and crystal structure, diffraction, lattice vibrations, free electron model, energy bands, semiconductor theory and devices, optical properties, magnetism, magnetic resonance, superconductivity. Prerequisite(s): courses 112 and 139A; students with equivalent course work may contact instructor for permission to enroll. *D. Belanger*

156. Applications of Solid State Physics. S

Emphasizes the application of condensed matter physics to a variety of situations. Examples chosen from subfields such as semiconductor physics, lasers, superconductivity, low temperature physics, magnetism, and defects in crystals. Prerequisite(s): courses 101A and 101B. *G. Gweon*

160. Practical Electronics. S

Provides a practical knowledge of electronics that experimentalists generally need in research. The course assumes no previous knowledge of electronics and progresses according to the interest and ability of the class. Based on weekly lectures. However, with the aid of the instructor, the students are expected to learn mainly through the design, construction, and debugging of electronics projects. Students are billed a materials fee. Prerequisite(s): courses 5C and 5N or 6C and 6N. Offered in alternate academic years. *R. Johnson*

171. General Relativity, Black Holes, and Cosmology. F

Special relativity is reviewed. Curved space-time, including the metric and geodesics, are illustrated with simple examples. The Einstein equations are solved for cases of high symmetry. Black-hole physics and cosmology are discussed, including recent developments. (Also offered as Astronomy and Astrophysics 171. Students cannot receive credit for both courses.) Prerequisite(s): courses 105, 110A, 110B, and 116A-B-C. *A. Aguirre*

180. Biophysics. S

Physical principles and techniques used in biology: X-ray diffraction; nuclear magnetic resonance; statistics, kinetics, and thermodynamics of macromolecules; viscosity and diffusion; DNA/RNA pairing; electrophoresis; physics of enzymes; biological energy conversion; optical tweezers. (Also offered as Biology: Molecular Cell & Dev 140. Students cannot receive credit for both courses.) Prerequisite(s): course 112; students who have a biochemistry background may contact instructor for permission. Enrollment restricted to juniors and seniors. *J. Deutsch*

191. Teaching Practicum. F,W,S

Designed to provide upper-division undergraduates with an opportunity to work with students in lower division courses, leading discussions, reading and marking submissions, and assisting in the planning and teaching of a course. Prerequisite(s): excellent performance in major courses; instructor approval required; enrollment restricted to senior physics majors. *The Staff*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision. (See course 42.) Prerequisite(s): upper-division standing; submission of a proposal supported by a faculty member willing to supervise. *The Staff*

195A. Senior Thesis Research (3 credits). F

A seminar course to help students explore their theses topics and plan, organize, and develop their theses. Choosing a thesis topic, preparing a work plan for the research, assembling an annotated bibliography, and writing a draft outline of the thesis. Students must complete 5 credits in the 195 series to satisfy the writing intensive (W) general education requirement. Prerequisite(s): Entry Level Writing and Composition requirements. *A. Steinacker*

195B. Senior Thesis Research (2 credits). W

Seminars to help students explore their theses topics and plan, organize, and develop their theses. Refining the thesis outline; preparing draft sections, preparing a written progress report; delivering an oral progress report. Students must complete 5 credits in the 195 series to satisfy the writing intensive (W) general education requirement. Prerequisite(s): Entry Level Writing and Composition requirements. (General Education Code(s): W.) *A. Steinacker*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits).

Tutorial. May be repeated for credit. *The Staff*

Graduate Courses

205. Introduction to Research in Physics (2 credits). W

Introduction to current research opportunities at UCSC for graduate students. Topics include: elementary particle physics, condensed matter and solid state physics, high energy astrophysics, biophysics, and cosmology. Selected topics related to career development may also be included. Enrollment restricted to graduate students or by permission of instructor. *J. Primack*

210. Classical Mechanics. F

Generalized coordinates, calculus of variations, Lagrange's equations with constraints, Hamilton's equations, applications to particle dynamics including charged particles in an electromagnetic field, applications to continuum mechanics including fluids and electromagnetic fields, introduction to nonlinear dynamics. Enrollment restricted to graduate students only, except by permission of instructor. *S. Profumo*

212. Electromagnetism I. F

Electrostatics and magnetostatics, boundary value problems with spherical and cylindrical symmetry, multipole expansion, dielectric media, magnetic materials, electromagnetic properties of materials, time-varying electromagnetic fields, Maxwell's equations, conservation laws, plane electromagnetic waves and propagation, waveguides and resonant cavities. Enrollment restricted to graduate students only, except by permission of instructor. *O. Narayan*

214. Electromagnetism II. W

Lorentz covariant formulation of Maxwell's equations, dynamics of relativistic charged particles and electromagnetic fields, scattering and diffraction. Topics in classical radiation theory: simple radiating systems radiation by moving charges, multipole radiation, synchrotron radiation, Cerenkov radiation, bremsstrahlung and radiation damping. Prerequisite(s): course 212. Enrollment restricted to graduate students only, except by permission of instructor. Offered in alternate academic years. *H. Haber*

215. Introduction to Non-Relativistic Quantum Mechanics. W

Mathematic introduction; fundamental postulates; time evolution operator, including the Heisenberg and Schrodinger pictures; simple harmonic oscillator and coherent states; one-dimensional scattering theory, including S-matrix resonant phenomena; two-state systems, including magnetic resonance; symmetries, including rotation group, spin, and the Wigner-Eckart theorem; rotationally invariant problems, including the hydrogen atom; gauge invariance, including Landau levels; introduction to path integral. Enrollment restricted to graduate students only, except by permission of instructor. *B. Schumm*

216. Advanced Topics in Non-Relativistic Quantum Mechanics. S

Approximate methods: time-independent perturbation theory, variational principle, time-dependent perturbation theory; three-dimensional scattering theory; identical particles; permutation symmetry and exchange degeneracy, anti-symmetric and symmetric states; many-body systems and self-consistent fields: variational calculations; second quantized formalism, including Fock spaces/number representation, field operators and Green functions; applications: electron gas; quantization of the electromagnetic field and interaction of radiation with matter: absorption, emission, scattering, photoelectric effect, and lifetimes. Prerequisite(s): course 215. Enrollment restricted to graduate students only, except by permission of instructor. *H. Haber*

217. Quantum Field Theory I. F

Lorentz invariance in quantum theory, Dirac and Klein-Gordon equations, the relativistic hydrogen atom, Green functions and canonical approach to field theory, quantum electrodynamics, Feynman diagrams for scattering processes, symmetries and Ward identities. Students learn to perform calculations of scattering and decay of particles in field theory. Prerequisite(s): course 216. Enrollment restricted to graduate students only, except by permission of instructor. *M. Dine*

218. Quantum Field Theory II. W

Path integral approach to quantum field theory. Theory of renormalization and the renormalization group, introduction to gauge theories and spontaneously broken field theories. Applications to the standard model of strong, weak, and electromagnetic interactions. Prerequisite(s): course 217. Enrollment restricted to graduate students only, except by permission of instructor. *T. Banks*

219. Statistical Physics. S

The basic laws of thermodynamics, entropy, thermodynamic potentials, kinetic theory of gases, quantum and classical statistical mechanics, virial expansion, linear response theory. Applications in condensed matter physics. Enrollment restricted to graduate students only, except by permission of instructor. *B. Shastry*

220. Theory of Many-Body Physics. F

Finite temperature Green functions, Feynman diagrams, Dyson equation, linked cluster theorem, Kubo formula for electrical conductivity, electron gas, random phase approximation, Fermi surfaces, Landau fermi liquid theory, electron phonon coupling, Migdal's theorem, superconductivity. Prerequisite(s): courses 216 and 219. Enrollment restricted to graduate students only, except by permission of instructor. Offered in alternate academic years. *B. Shastry*

221A. Introduction to Particle Physics I. F

First quarter of a two-quarter graduate level introduction to particle physics, including the following topics: discrete symmetries, quark model, particle classification, masses and magnetic moments, passage of radiation through matter, detector technology, accelerator physics, Feynman calculus, and electron-positron annihilation. Prerequisite(s): course 217 or concurrent enrollment. Enrollment restricted to graduate students only, except by permission of instructor. *B. Schumm*

221B. Introduction to Particle Physics II. W

Second quarter of a two-quarter graduate level introduction to particle physics, including the following topics: nucleon structure, weak interactions and the Standard Model, neutrino oscillation, quantum chromodynamics, CP violation, and a tour of the Stanford Linear Accelerator Center. Prerequisite(s): course 221A; course 217 or concurrent enrollment. Enrollment restricted to graduate students only, except by permission of instructor. *J. Nielsen*

222. Quantum Field Theory III. S

Focuses on the theoretical underpinnings of the standard model, including the spontaneous symmetry breaking, the renormalization group, the operator product expansion, and precision tests of the Standard Model. Prerequisite(s): courses 218 and 221B. Enrollment restricted to graduate students only, except by permission of instructor. Offered in alternate academic years. *T. Banks*

224. Origin and Evolution of the Universe. S

Introduction to the particle physics and cosmology of the very early universe: relativistic cosmology, initial conditions, inflation and grand unified theories, baryosynthesis, nucleosynthesis, gravitational collapse, hypotheses regarding the dark matter and consequences for formation of galaxies and large scale structure. (Also offered as Astronomy and Astrophysics 224. Students cannot receive credit for both courses.) Enrollment restricted to graduate students only, except by permission of instructor. Offered in alternate academic years. *J. Primack*

226. General Relativity. W

Develops the formalism of Einstein's general relativity, including solar system tests, gravitational waves, cosmology, and black holes. (Also offered as Astronomy and Astrophysics 226. Students cannot receive credit for both courses.) Enrollment restricted to graduate students only, except by permission of instructor. *A. Aguirre*

227. Advanced Fluid Dynamics. *

Fundamentals of heat transfer and fluid flow: thermal convection, gravity waves, vortex dynamics, viscous flows, instabilities, turbulence, and compressible flows. Students develop computer program for simulating thermal convection and gravity waves. Vector calculus and computer programming experience required. (Formerly *Fluid Dynamics*.) An introductory course in fluid dynamics recommended as preparation. Enrollment restricted to graduate students. Offered in alternate academic years. *The Staff*

231. Introduction to Condensed Matter Physics. F

Crystal structures, reciprocal lattice, crystal bonding, phonons (including specific heat), band theory of electrons, free electron model, electron-electron and electron-phonon interactions, transport theory. Prerequisite(s): course 216. Enrollment restricted to graduate students only, except by permission of instructor. *A. Young*

232. Condensed Matter Physics. W

Magnetism (para, ferro, anti-ferro, ferri), spin waves, superconductivity, introduction to semiconductors. Prerequisite(s): course 231. Enrollment restricted to graduate students only, except by permission of instructor. *Z. Schlesinger*

233. Advanced Condensed Matter Physics. *

A special topics course which includes areas of current interest in condensed matter physics. Possible topics include superconductivity, phase transitions, renormalization group, disordered systems, surface phenomena, magnetic resonance, and spectroscopy. Prerequisite(s): course 231. Enrollment restricted to graduate students only, except by permission of instructor. Offered in alternate academic years. *S. Carter*

234. Soft Condensed Matter Physics. *

A selection of topics from: liquid crystals, biological systems, renormalization group and critical phenomena, stochastic processes, Langevin and Fokker Planck equations, hydrodynamic theories, granular materials, glasses, quasicrystals. Prerequisite(s): courses 219 and 232. Enrollment restricted to graduate students. *A. Young, O. Narayan*

240. Polymer Physics. *

Statistical properties polymers. Scaling behavior, fractal dimensions. Random walks, self avoidance. Single chains and concentrated solutions. Dynamics and topological effects in melts. Polymer networks. Sol-gel transitions. Polymer blends. Application to biological systems. Computer simulations demonstrating much of the above. Students cannot receive credit for this course and course 120. Enrollment restricted to graduate students only, except by permission of instructor. Offered in alternate academic years. *J. Deutsch*

242. Computational Physics. S

This course will apply efficient numerical methods to the solution of problems in the physical sciences which are otherwise intractable. Examples will be drawn from classical mechanics, quantum mechanics, statistical mechanics, and electrodynamics. Students will apply a high-level programming language such as Mathematica to the solution of physical problems and will develop appropriate error and stability estimates. Prerequisite(s): basic programming experience in C or Fortran. No previous experience with Mathematica is required. Enrollment restricted to graduate students only, except by permission of instructor. *A. Young*

250. Mathematical Methods. *

Probability theory with applications to data analysis, complex variables, Cauchy's residue theorem, dispersion relations, saddle-point type asymptotic methods for integrals, integral transforms, ordinary differential equations and orthogonal polynomials, partial differential equations and boundary value problems, and Greens functions. Integral equations also included if time permits. Enrollment restricted to graduate students. *A. Young*

251. Group Theory and Modern Physics. *

Finite and continuous groups, group representation theory, the symmetric group and Young tableaux, Lie groups and Lie algebras, irreducible representations of Lie algebras by tensor methods, unitary groups in particle physics, Dynkin diagrams, Lorentz and Poincaré groups. Enrollment restricted to graduate students only, except by permission of instructor. Offered in alternate academic years. *H. Haber*

290. Special Topics. *

A series of lectures on various topics of current interest in physics at UC Santa Cruz. Enrollment restricted to graduate students only, except by permission of instructor. May be repeated for credit. *T. Banks*

291A. Cosmology (2 credits). F,W,S

Intensive research seminar on cosmology and related topics in astrophysics: nature of dark matter; origin of cosmological inhomogeneities and other initial conditions of the big bang; origin and evolution of galaxies and large scale structure in the universe. Enrollment restricted to graduate

students only, except by permission of instructor. *The Staff*

291C. Developments in Theoretical Particle Physics (2 credits). F,W,S

Seminar on the current literature of elementary particle physics, ranging from strong and weak interaction phenomenology to Higgs physics, supersymmetry, and superstring theory. Students may present their own research results. Prerequisite(s): course 218; enrollment restricted to graduate students. May be repeated for credit. *M. Dine, H. Haber*

291D. Experimental High-Energy Collider Physics (2 credits). F,W,S

Seminar on current results in experimental high-energy particle physics. Topics follow recently published results, including design of experiments, development of particle detector technology, and experimental results from new particle searches, quantum chromodynamics, and properties of heavy flavor quarks. Enrollment restricted to graduate students. May be repeated for credit. *J. Nielsen*

291E. Applied Physics (2 credits). F,W,S

Intensive research seminar on applied physics and related topics in materials science, including semiconductor devices, optoelectronics, molecular electronics, magnetic materials, nanotechnology, biosensors, and medical physics. Students may present their own research results. Enrollment restricted to graduate students. May be repeated for credit. *G. Alers, S. Carter*

291F. Experimental High-Energy and Particle Astrophysics Seminar (2 credits). F,W,S

Survey of current research in experimental high-energy and particle astrophysics. Recent observations and development in instrumentation for x-rays, gamma rays, and neutrinos, and evidence for dark matter and other new particles. Students lead discussion of recent papers. Enrollment restricted to seniors and graduate students. Enrollment limited to 15. May be repeated for credit. *D. Smith*

291G. Condensed Matter Physics Research Seminar (2 credits). F,W,S

Weekly seminar series covering topics of current interest in condensed matter physics. Local and external speakers discuss their work. Enrollment restricted to graduate students. May be repeated for credit. *A. Young*

292. Seminar (no credit). F,W,S

Weekly seminar attended by faculty and graduate students. Directed at all physics graduate students who have not taken and passed the qualifying examination for the Ph.D. program. Enrollment restricted to graduate students only, except by permission of instructor. *D. Belanger*

297. Independent Study. F,W,S

Enrollment restricted to graduate students only, except by permission of instructor. *The Staff*

298. Theoretical and Experimental Research Project. F,W,S

Enrollment restricted to graduate students only, except by permission of instructor. *The Staff*

299. Thesis Research. F,W,S

Enrollment restricted to graduate students only, except by permission of instructor. *The Staff*

* Not offered in 2011-12

[Program Description](#) | [Changes to 2010-12 Catalog Highlighted](#) | [Faculty](#) | [Course Descriptions](#)

Program Description

In describing the department and major at UCSC, the term politics (rather than political science or government) is used because the study of political life requires a far more inclusive approach than that which is associated with conventional political science methods, and because politics happens in places other than governments. More specifically, the study of politics is the study of the way human communities shape and share a common life through their institutional practices, ideas, interests, and expectations. It looks at the way collective decisions are made and at the obstacles citizens meet as they try to forge a shared and just life. Courses address issues central to public life, such as democracy, power, freedom, political economy, social movements, international law and conflict, institutional reforms, and how public life, as distinct from private life, is constituted.

A major in politics is appropriate for students interested in careers in law, journalism, or teaching; in political and governmental work from local to international settings; and in corporations dealing with global issues. Many UCSC politics graduates have also gone on to do advanced work in distinguished graduate and professional schools. Others have found active and challenging careers in business and community organizing. Still others have turned to scholarship and writing. But regardless of career direction, the most significant purpose of the politics major is to help educate a reflective and activist citizenry capable of sharing power and responsibility in a contemporary democracy.

The study of politics is a critical part of a liberal arts education. Since political issues and practices are embedded in and reflective of the whole experience of a community, the study of politics can constitute the center of a broad-based course of study drawing on history, sociology, anthropology, philosophy, economics, literature, and law.

The programs offered by the UCSC Politics Department are designed to acquaint students with a broad range of issues studied by those in the field. The department offers an undergraduate major, a minor, a combined Latin American and Latino studies/politics major, and a doctoral degree. The Politics Department also houses a program in legal studies; see the Legal Studies Department, for details.

UCSC politics students have many opportunities for field work and for internship placements. Students are encouraged to develop their own extensive independent research projects. Politics faculty members give students individual attention to help them in their studies. Faculty members are firmly committed to the value of a liberal arts education, but they are also actively engaged in programs of research and writing. The research interests of the faculty range from the theory of justice to the problem of war, from campaign strategy to relations between the rich and the poor countries of the world.

No specific courses at the high school level are required for admission to the major in politics at UCSC. Courses in history, literature, philosophy, and the social sciences, whether taken at the high school or college level, are appropriate background and preparation for the politics major.

Major Requirements as Follows

Two lower-division politics courses. All students are required to complete and pass two courses from those numbered 1 through 79, as a prerequisite to upper-division courses in politics and prior to declaring the major. These courses are normally taken during the first year.

A student who has not been able to satisfy the pre-declaration requirement (a passing grade in two politics lower-division classes) may petition the department for an exception. The letter of petition must explain and document the circumstances that might justify an exception. The department will consider the request and notify the student of its decision within two weeks of receiving the petition or within 10 days of the start of the following quarter, whichever is later.

Four upper-division politics core courses. The following four groups of courses constitute the core of

the politics major. Four courses are required: two courses from one group, one course from a second group, and one course from a third group. In general, upper-division courses are not recommended for freshmen.

Theory

- 105A *Ancient Political Thought*
- 105B *Early Modern Political Thought*
- 105C *Modern Political Thought*
- 105D *Late 20th Century Political Thought*

U.S. Politics

- 120A *Congress, President, and the Court in American Politics*
- 120B *Society and Democracy in American Political Development*
- 120C *State and Capitalism in American Political Development*

Comparative

- 140A *Politics of Advanced Industrialized Societies*
- 140B *Comparative Post-Communist Politics*
- 140C *Latin American Politics*
- 140D *Politics of East Asia*

International

- 160A *International Politics*
- 160B *International Law*
- 160C *Security, Conflict, Violence, War*
- 160D *International Political Economy*

Politics 160A, normally offered fall quarter, is very strongly recommended prior to taking the other international core courses.

Five upper-division politics electives. Courses are to be selected from those numbered 101–190 in the politics curriculum. One of these courses may satisfy the senior comprehensive requirements.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement for politics majors is satisfied by completing any three of the four required core courses. The politics core course list is detailed above in the major requirement.

Comprehensive Requirements

The comprehensive requirement in the Politics Department can be satisfied in any of the following methods:

- Successful completion of a politics senior seminar (190-series) that includes the writing of an extensive paper (no less than 15 pages) with a substantial research content. To enroll in a specific 190 seminar, students must have successfully completed the prerequisite courses listed in the seminar's catalog course description;
- Successful completion of a politics graduate core seminar (enrollment in which is contingent on the written recommendation of two politics faculty) that includes the writing of an extensive paper (no less than 15 pages) with a substantial research content;
- Successful completion of a senior thesis (Politics 195A-B-C) of a minimum of 50 pages. This option is for students interested in working on original research and writing under the supervision of a politics faculty member;
- Successful completion of one additional politics upper-division course. In addition to the existing requirements of this course the student must receive faculty approval for and enroll in a two-credit independent study, Politics 199F, which requires completion of a substantial writing component.

Honors

Honors in the politics major are awarded to graduating seniors, based primarily on a review of grades and narrative evaluations, whose academic performance is judged to be consistently excellent by a committee of politics faculty. Highest honors in the major are reserved for students with consistently outstanding academic performance.

Minor Requirements

All students are required to complete and pass one lower-division politics course from those numbered 1 through 79, as a prerequisite to upper-division courses in politics and prior to declaring the minor. Additionally, five upper-division politics courses are required. Of these, four are to be selected from the core courses: two from one subfield and two from another subfield; these courses are listed above. The fifth course is to be selected from courses numbered 101-199.

General Undergraduate Information

Combined major. The Politics Department offers a combined major with the Latin American and Latino Studies Department. Requirements may be reviewed in the Latin American and Latino Studies section of the catalog.

Double majors. The department accepts proposals for double majors. A student pursuing a double major meets the full requirements of the politics major as well as the full requirements of the other major subject.

Advising. Declaring the major in politics is a four-step process: 1) complete and pass two lower-division politics courses (numbered 1-79) with a grade of C or better; 2) attend a declaration orientation workshop, 3) meet with your faculty adviser, and 4) meet with the politics undergraduate adviser. Each student meets with an assigned faculty adviser to discuss an intended program of study, including its breadth and purpose. The faculty adviser may suggest additional courses so that the student can achieve greater breadth or concentration. Students are encouraged to select related courses from other departments which complement their interests in politics.

Course credit from other institutions. Courses from another institution may be considered only if they appear on the student's Transfer Credit Summary. Students who wish to substitute courses taken elsewhere for the Politics Department's requirements should discuss the procedure with the department adviser.

Transfer students. A student transferring to UCSC must meet with the politics undergraduate adviser as early as possible to discuss declaring the major and course enrollment. This will ensure a smoother transition. Students should bring a copy of their UCSC Transfer Credit Summary which may be printed from the student portal.

A junior transfer student may satisfy the requirement for one of the two lower-division courses by completing an equivalent course in a political science or equivalent department with a grade of C or better. Courses from another institution may be considered only if they appear on the UCSC Transfer Credit Summary.

Graduate Program

The Faculty

The UCSC Politics Department's faculty provides a distinctive mix of senior scholars whose work has led the field toward interdisciplinary and engaged research, and junior scholars whose work represents the diverse cutting edge of U.S. and international political research. The small size of the program encourages close interaction among faculty and students.

The department enjoys several areas of special strength, including American political development and a focus on the social foundations of democratic politics and democratization. Clusters of faculty also specialize in the study of varieties of capitalism and post-communist politics and economy; the politics of Southeast Asia and Latin America; the study of race and politics; the politics of language; post-colonial theory and nationalist discourse; early modern political thought; and informal and translocal political organization.

The Curriculum

The Politics Department is impressed by the fact that many of the best studies of politics today disregard the conventional boundaries of the political science's disciplinary subfields. Therefore, the core graduate curriculum and qualifying examination process are structured around four interrelated themes central to political inquiry. Each of these areas of emphasis focuses, in a different way, on the relations among material life, institutional authority, collective mobilization, and political vision at all levels of politics.

Political and Social Thought. Brings together the history of political thought; contemporary social and critical theory; and the contributions of legal and institutional analysis of various kinds. This area of inquiry emphasizes the critical study of political practices that are experienced or understood as in some way limiting, oppressive, or wrong. The work of political and social theory as we see it is to transform our understanding of these practices; to see their contingent conditions; and to articulate the possibilities of governing ourselves differently.

States and Political Institutions. Emphasizes the comparative and international study of political institutions as instruments of collective decision-making and action. This area of inquiry focuses on the state and on transnational, subnational, and regional political institutions. In this area, we emphasize historical patterns of institutional development in relation to domestic political conflict and the changing contours of international political economy and patterns of conflict and cooperation among states.

Political Economy. Focuses on the relationship between states, markets, and societies. This area of inquiry explores the various understandings of political economy that have emerged within a number of different theoretical perspectives, including Marxism, realism, and liberalism. At subnational, national, and supranational levels, this area seeks to understand political economy outcomes as the result of the mutual interactions between political institutions, societal interests, and ideas and norms.

Political and Social Forces. Concerns the interaction of social forces and political forces, drawing upon the work of scholars focused on social mobilizations and histories. Accordingly, this area of inquiry focuses on the articulation and organization of political interest and identities. This area studies the mutual interaction of these interests and identities with structure (states, discourses, public policy, and the law) uniting substantive and theoretical concerns across regional, national, and global politics.

The politics graduate curriculum works critically upon and within conventional social science research and also ranges beyond its methods, drawing upon cultural studies, historical sociology, and history as they inform the study of politics. Students in the politics graduate program also work with faculty in other distinguished departments at UCSC, including literature, history of consciousness, history, Latin American and Latino studies, environmental studies, philosophy, international economics, and feminist studies.

Scholars and students in the program emphasize the articulation of important questions prior to the development of methods for grappling with them, while recognizing the importance of appropriate methodological tools for doing meaningful political research.

Graduate students may also obtain a parenthetical notation on the politics doctor of philosophy (Ph.D.) diploma indicating that they have specialized in Latin American and Latino studies or feminist studies. This notation recognizes the scholarly expertise obtained after the completion of additional curriculum that is required by these departments.

Teaching

Throughout its history, the department has been strongly committed to undergraduate teaching. The graduate program offers graduate students the opportunity to work closely with faculty and undergraduates as teaching assistants. The Politics Department's faculty is committed to "the teaching of teaching": its training of college educators emphasizes the importance of civic education in undergraduate instruction.

See our web site, <http://politics.ucsc.edu>, for details about the policies for admission to graduate standing as well as the application, and information about financial-support opportunities. For more information, refer to the Graduate Division web site.

Ph.D. Program Requirements

The graduate curriculum in politics includes seven stages: 1) three core seminars plus Politics 201, *Logics of Inquiry*; 2) five other graduate-level Politics Department courses; 3) three additional graduate-level courses that may be from politics or other departments, along with further training as appropriate in language and methodology; 4) teaching assistant seminar and graduate colloquia; 5) a qualifying examination consisting of written and oral parts; 6) the research and writing of the dissertation; and 7) its oral defense.

Note: Please check with the department office for updated listings of course offerings and the appropriate year in which to undertake specific electives.

M.A. Degree

Our program is intended to lead to a Ph.D. in politics; there is no separate master of arts (M.A.) program. All curricular requirements are aimed at preparing students for timely and successful completion of a doctoral dissertation. However, all students will be eligible to receive an M.A. upon successfully passing the coursework requirements and completing an acceptable 30-page, journal-quality paper, either within the context of a course or independently, although not the written qualifying exam. Students will be advanced to candidacy only upon successful completion of the coursework requirements and the qualifying examination.

Program Description

In describing the department and major at UCSC, the term politics (rather than political science or government) is used because the study of political life requires a far more inclusive approach than that which is associated with conventional political science methods, and because politics happens in places other than governments. More specifically, the study of politics is the study of the way human communities shape and share a common life through their institutional practices, ideas, interests, and expectations. It looks at the way collective decisions are made and at the obstacles citizens meet as they try to forge a shared and just life. Courses address issues central to public life, such as democracy, power, freedom, political economy, social movements, international law and conflict, institutional reforms, and how public life, as distinct from private life, is constituted.

A major in politics is appropriate for students interested in careers in law, journalism, or teaching; in political and governmental work from local to international settings; and in corporations dealing with global issues. Many UCSC politics graduates have also gone on to do advanced work in distinguished graduate and professional schools. Others have found active and challenging careers in business and community organizing. Still others have turned to scholarship and writing. But regardless of career direction, the most significant purpose of the politics major is to help educate a reflective and activist citizenry capable of sharing power and responsibility in a contemporary democracy.

The study of politics is a critical part of a liberal arts education. Since political issues and practices are embedded in and reflective of the whole experience of a community, the study of politics can constitute the center of a broad-based course of study drawing on history, sociology, anthropology, philosophy, economics, literature, and law.

The programs offered by the UCSC Politics Department are designed to acquaint students with a broad range of issues studied by those in the field. The department offers an undergraduate major, a minor, a combined Latin American and Latino studies/politics major, and a doctoral degree. The Politics Department also houses a program in legal studies; see the Legal Studies Department, for details.

UCSC politics students have many opportunities for field work and for internship placements. Students are encouraged to develop their own extensive independent research projects.

Politics faculty members give students individual attention to help them in their studies. Faculty members are firmly committed to the value of a liberal arts education, but they are

also actively engaged in programs of research and writing. The research interests of the faculty range from the theory of justice to the problem of war, from campaign strategy to relations between the rich and the poor countries of the world.

No specific courses at the high school level are required for admission to the major in politics at UCSC. Courses in history, literature, philosophy, and the social sciences, whether taken at the high school or college level, are appropriate background and preparation for the politics major.

Major Requirements as Follows

Two lower-division politics courses. All students are required to complete and pass two courses from those numbered 1 through 79, as a prerequisite to upper-division courses in politics and prior to declaring the major. ~~(These have an IS general education code.)~~ These courses are normally taken during the first year.

A student who has not been able to satisfy the pre-declaration requirement (a passing grade in two politics lower-division classes) may petition the department for an exception. The letter of petition must explain and document the circumstances that might justify an exception. The department will consider the request and notify the student of its decision within two weeks of receiving the petition or within 10 days of the start of the following quarter, whichever is later.

Four upper-division politics core courses. The following four groups of courses constitute the core of the politics major. Four courses are required: two courses from one group, one course from a second group, and one course from a third group. In general, upper-division courses are not recommended for freshmen.

Theory

- 105A *Ancient Political Thought*
- 105B *Early Modern Political Thought*
- 105C *Modern Political Thought*
- 105D *Late 20th Century Political Thought*

U.S. Politics

- 120A *Congress, President, and the Court in American Politics*
- 120B *Society and Democracy in American Political Development*
- 120C *State and Capitalism in American Political Development*

Comparative

- 140A *Politics of Advanced Industrialized Societies*
- 140B *Comparative Post-Communist Politics*
- 140C *Latin American Politics*
- 140D *Politics of East Asia*

International

- 160A *International Politics*
- 160B ~~Global Organization~~ International Law
- 160C *Security, Conflict, Violence, War*
- 160D *International Political Economy*

Politics 160A, normally offered fall quarter, is very strongly recommended prior to taking the other international core courses.

Five upper-division politics electives. ~~Five additional politics~~ Courses are to be selected from ~~courses~~ those numbered 101–~~199~~–190 in the politics curriculum. One of these courses may satisfy the senior comprehensive requirements.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement for politics majors is satisfied by completing any three of the four required core courses. The politics core course list is detailed above in the major requirement.

Comprehensive Requirements

The comprehensive requirement in the Politics Department can be satisfied in any of the following methods:

- Successful completion of a politics senior seminar (190-series) that includes the writing of an extensive paper (no less than 15 pages) with a substantial research content. To enroll in a specific 190 seminar, students must have successfully completed the prerequisite courses listed in the seminar's catalog course description;
- Successful completion of a politics graduate core seminar (enrollment in which is contingent on the written recommendation of two politics faculty) that includes the writing of an extensive paper (no less than 15 pages) with a substantial research content;
- Successful completion of a senior thesis (Politics 195A-B-C) of ~~approximately a~~ minimum of 50 pages. ~~with a substantial research content, supervised by a politics faculty member with a second reader~~ This option is for students interested in working on original research and writing under the supervision of a politics faculty member;
- Successful completion of one additional politics upper-division course. In addition to the existing requirements of this course the student must receive faculty approval for and enroll in a two-credit independent study, Politics 199F, which requires completion of a substantial writing component.

Honors

Honors in the politics major are awarded to graduating seniors, based primarily on a review of grades and narrative evaluations, whose academic performance is judged to be consistently excellent by a committee of politics faculty. Highest honors in the major are reserved for students with consistently outstanding academic performance.

Minor Requirements

All students are required to complete and pass one lower-division politics course from those numbered 1 through 79, as a prerequisite to upper-division courses in politics and prior to declaring the minor. Additionally, five upper-division politics courses are required. Of these, four are to be selected from the core courses: two from one subfield and two from another subfield; these courses are listed above. The fifth course is to be selected from courses numbered 101-199.

General Undergraduate Information

Combined major. The Politics Department offers a combined major with the Latin American and Latino Studies Department. Requirements may be reviewed in the Latin American and

Latino Studies section of the catalog.

Double majors. The department accepts proposals for double majors. A student pursuing a double major meets the full requirements of the politics major as well as the full requirements of the other major subject.

Advising. Declaring the major in politics is a four-step process: 1) complete and pass two lower-division politics courses (numbered 1-79) with a grade of C or better; 2) attend a declaration orientation workshop, 3) meet with your faculty adviser, and 4) meet with the politics undergraduate adviser. Each student meets with an assigned faculty adviser to discuss an intended program of study, including its breadth and purpose. The faculty adviser may suggest additional courses so that the student can achieve greater breadth or concentration. Students are encouraged to select related courses from other departments which complement their interests in politics.

Course credit from other institutions. Courses from another institution may be considered only if they appear on the student's Transfer Credit Summary. Students who wish to substitute courses taken elsewhere for the Politics Department's requirements should discuss the procedure with the department adviser.

~~*Senior thesis.* Students interested in working on original research and writing under the supervision of a faculty member may pursue an independent study, Politics 195A-B-C. Completion of the senior thesis satisfies the comprehensive requirement.~~

Transfer students. A student transferring to UCSC must meet with the politics undergraduate adviser as early as possible to discuss declaring the major and course enrollment. This will ensure a smoother transition. Students should bring a copy of their UCSC Transfer Credit Summary which may be printed from the student portal.

A junior transfer student may satisfy the requirement for one of the two lower-division courses by completing an equivalent course in a political science or equivalent department with a grade of C or better. Courses from another institution may be considered only if they appear on the UCSC Transfer Credit Summary.

Graduate Program

The Faculty

The UCSC Politics Department's faculty provides a distinctive mix of senior scholars whose work has led the field toward interdisciplinary and engaged research, and junior scholars whose work represents the diverse cutting edge of U.S. and international political research. The small size of the program encourages close interaction among faculty and students.

The department enjoys several areas of special strength, including American political development and a focus on the social foundations of democratic politics and democratization. Clusters of faculty also specialize in the study of varieties of capitalism and post-communist politics and economy; the politics of Southeast Asia and Latin America; the study of race and politics; the politics of language; post-colonial theory and nationalist discourse; early modern political thought; and informal and translocal political organization.

The Curriculum

The Politics Department is impressed by the fact that many of the best studies of politics today disregard the conventional boundaries of the political science's disciplinary subfields. Therefore, the core graduate curriculum and qualifying examination process are structured around four interrelated themes central to political inquiry. Each of these areas of emphasis focuses, in a different way, on the relations among material life, institutional authority, collective mobilization, and political vision at all levels of politics.

Political and Social Thought. Brings together the history of political thought; contemporary social and critical theory; and the contributions of legal and institutional analysis of various kinds. This area of inquiry emphasizes the critical study of political practices that are experienced or understood as in some way limiting, oppressive, or wrong. The work of political and social theory as we see it is to transform our understanding of these practices; to see their contingent conditions; and to articulate the possibilities of governing ourselves differently.

States and Political Institutions. Emphasizes the comparative and international study of political institutions as instruments of collective decision-making and action. This area of inquiry focuses on the state and on transnational, subnational, and regional political institutions. In this area, we emphasize historical patterns of institutional development in relation to domestic political conflict and the changing contours of international political economy and patterns of conflict and cooperation among states.

Political Economy. Focuses on the relationship between states, markets, and societies. This area of inquiry explores the various understandings of political economy that have emerged within a number of different theoretical perspectives, including Marxism, realism, and liberalism. At subnational, national, and supranational levels, this area seeks to understand political economy outcomes as the result of the mutual interactions between political institutions, societal interests, and ideas and norms.

Political and Social Forces. Concerns the interaction of social forces and political forces, drawing upon the work of scholars focused on social mobilizations and histories. Accordingly, this area of inquiry focuses on the articulation and organization of political interest and identities. This area studies the mutual interaction of these interests and identities with structure (states, discourses, public policy, and the law) uniting substantive and theoretical concerns across regional, national, and global politics.

The politics graduate curriculum works critically upon and within conventional social science research and also ranges beyond its methods, drawing upon cultural studies, historical sociology, and history as they inform the study of politics. Students in the politics graduate program also work with faculty in other distinguished departments at UCSC, including literature, history of consciousness, history, Latin American and Latino studies, environmental studies, philosophy, international economics, and feminist studies.

Scholars and students in the program emphasize the articulation of important questions prior to the development of methods for grappling with them, while recognizing the importance of appropriate methodological tools for doing meaningful political research.

Graduate students may also obtain a parenthetical notation on the politics doctor of philosophy (Ph.D.) diploma indicating that they have specialized in Latin American and Latino studies or feminist studies. This notation recognizes the scholarly expertise obtained after the completion of additional curriculum that is required by these departments.

Teaching

Throughout its history, the department has been strongly committed to undergraduate teaching. The graduate program offers graduate students the opportunity to work closely with faculty and undergraduates as teaching assistants. The Politics Department's faculty is committed to "the teaching of teaching": its training of college educators emphasizes the importance of civic education in undergraduate instruction.

See our web site, <http://politics.ucsc.edu>, for details about the policies for admission to graduate standing as well as the application, and information about financial-support opportunities. For more information, refer to the Graduate Division web site.

Ph.D. Program Requirements

The graduate curriculum in politics includes ~~six-seven~~ stages: 1) ~~five-three~~ core seminars plus Politics 201, *Logics of Inquiry*; 2) ~~seven-five~~ other graduate-level Politics Department courses; ~~four of which must be Politics Department courses~~ 3) three additional graduate-level courses that may be from politics or other departments, along with further training as appropriate in language and methodology; ~~3)4)~~ teaching assistant seminar and graduate colloquia; ~~4)5)~~ a qualifying examination consisting of written and oral parts; ~~5)6)~~ the research and writing of the dissertation; and ~~6)7)~~ its oral defense.

Note: Please check with the department office for updated listings of course offerings and the appropriate year in which to undertake specific electives.

M.A. Degree

Our program is intended to lead to a Ph.D. in politics; there is no separate master of arts (M.A.) program. All curricular requirements are aimed at preparing students for timely and successful completion of a doctoral dissertation. However, all students will be eligible to receive an M.A. upon successfully passing the coursework requirements and completing an acceptable 30-page, journal-quality paper, either within the context of a course or independently, although not the written qualifying exam. Students will be advanced to candidacy only upon successful completion of the coursework requirements and the qualifying examination.

Faculty and Professional Interests

Professor

MICHAEL K. BROWN, Emeritus

J. PETER EUBEN, Emeritus

KENT EATON, CHAIR

Comparative politics, international relations, political economy, public policy, territorial conflict, federalism, decentralization, party and electoral systems, Latin America, the Philippines

ISEBILL V. GRUHN, Emerita

BRUCE D. LARKIN, Emeritus

RONNIE D. LIPSCHUTZ

International relations; global political economy; globalization; foreign policy; resource/environmental politics; global political networks; global civil society and social movements; popular culture and politics; technology and society; risk society, state transformation and global governmentality

JOHN A. MARCUM, Emeritus

JOHN H. SCHAAR, Emeritus

MICHAEL E. URBAN

Russian politics, postcommunist transitions, U.S.-Russian relations, political language and ideology, revolution

DANIEL J. WIRLS

American politics, including national political institutions (Congress) and the President; public policy (military and foreign policy) and political history

Associate Professor

EVA C. BERTRAM

American politics, including the welfare state and social policy; political economy and the politics of labor markets; civil society and non-governmental organizations; public policy, including drug-control policy

DEAN MATHIOWETZ

Political theory, philosophy of language, classical political economy

Eleonora Pasotti

Comparative urban politics, democratization, public policy, sub-national political economy and party politics

VANITA SETH

Early modern and modern political theory, feminist theory, cultural history, race politics, postcolonial theory

DAVID J. THOMAS, Emeritus

MEGAN THOMAS

Political theory, especially of the 19th century; nationalist thought; Orientalism; comparative colonialism; Southeast Asia

GEORGE E. VON DER MUHLL, Emeritus

Assistant Professor

MARK FATHI MASSOUD

Law and society; politics of human rights; international law and development, with a special interest in Sudan; field research, with an emphasis on qualitative and ethnographic methods

ELEONORA PASOTTI

Comparative urban politics, democratization, public policy, sub-national political economy and party politics

BENJAMIN READ

Comparative politics with special interest in the politics of China ; theories of associations and social networks; communist and post-communist states; political participation and collective action

ROGER SCHOENMAN

Post-socialism, political economy, comparative capitalism, politics of pipelines, politics of memory, political networks, politics and money, Balkan and East European politics, Central Asian transitions

[Program Description](#) | [Faculty](#) | [Course Descriptions](#)

Lower-Division Courses

1. Politics: Power, Principle, Process, and Policy. *

Systematic introduction to the nature of politics and government, organized around the dynamic relationship between power, principle, and process in democratic politics. Provides historic and contemporary overview; explores the interactions among government, laws, and societies at the national and international levels. (Formerly Democratic Politics.) (General Education Code(s): PE-H, IS.) *D. Wirls*

3. Keywords: Concepts in Politics. F

Introduces key concepts in political discourse and key debates generated by contested terms such as "powers," "ideology," and "multiculturalism." Students read from canonical texts, feminist scholarship, historical materials, and contemporary cultural and postmodernist writings. (General Education Code(s): IS.) *The Staff*

4. Citizenship and Action. W

What does a citizen do? Uses political theory to answer this question as it relates to a number of issues, such as voting rights, diversity, gay marriage, and revolution. Draws on texts ranging from Aristotle to contemporary legal and cultural debates, to bear on the relationship of citizen action and identity. Other readings include Thoreau, Ellison, Rousseau, Marx, Arendt, and Socrates. (General Education Code(s): TA, IS.) *The Staff*

7. Politics of Religion. *

Considers both the religious sources of political ideas and the political sources of religious ideas, addressing topics such as sovereignty, justice, love, reason, revelation, sacrifice, victimhood, evil, racism, rebellion, reconciliation, and human rights. (General Education Code(s): IS.) *R. Meister*

10. Nationalism. S

Surveys contemporary academic approaches to the study of nationalism and writings of nationalist theorists from the 18th through 20th centuries. A few historical cases are considered. (General Education Code(s): TA.) *M. Thomas*

15. Digital Democracy. *

Links the study of democratic theories with an interdisciplinary approach to issues at the intersection of democracy and technology, such as participation, freedom of speech, access with regard to diversity, and income inequality. (General Education Code(s): PE-T, IS.) *E. Pasotti*

17. U.S. and the World Economy. F

Explores intellectual and empirical trends shaping the U.S. relationship with the global economy. Traces debates about liberalism and interventionism, surveys post-war American foreign economic policy and discusses varieties of capitalism emerging around the world. (General Education Code(s): IS.) *R. Schoenman*

20. American Politics. *

Analysis of the development and operation of American political institutions, focusing on the constitutional powers of the Congress, presidency, and Supreme Court; and the development of the American political parties. Topics include the ideological underpinnings of American democracy; the changing balance of power between the executive, legislative, and judicial branches; the expansion of national government power; the expansion of the right to vote and political representation; and the rising power of "non-governmental" forces. (Formerly *Democracy and Liberalism in American Politics*.) Satisfies American History and Institutions Requirement. (General Education Code(s): TA, IS.) *The Staff*

25. American Social Policy. *

Examines role of ideas, interests, and institutions in shaping contemporary social policy in the U.S. Focuses on political struggles and policy debates in the areas of crime and drug control, health care, and income security. (General Education Code(s): TA, IS.) *E. Bertram*

43. Eurasian Politics. W

Following a survey of the development of the former USSR that emphasizes those factors

responsible for its dissolution, focuses on the politics of nation building and international reintegration, and the prospects of democratic or authoritarian futures. (General Education Code(s): CC, IS.) *M. Urban*

60. Comparative Politics. S

Introduces the study of politics through the analysis of national political systems within or across regions from the developing world to post-industrial nations. Typical topics include: authoritarian and democratic regimes; state institutions and capacity; parties and electoral systems; public policies; social movements; ethnic conflict; and globalization. (General Education Code(s): CC, IS.) *B. Read*

70. Global Politics. F

Can common global interest prevail against particular sovereign desires? Surveys selected contemporary issues in global politics such as wars of intervention, ethnic conflict, globalization, global environmental protection, and some of the different ways in which they are understood and explained. (General Education Code(s): PE-H, IS.) *The Staff*

75. The Nation: State and Global Politics. *

Examines role of nation-state in global politics by studying processes of state formation in four regions: Europe, Africa, Asia, and Latin America. Evaluates recent challenges to the state that have begun to emerge from above and below. (General Education Code(s): TA, IS.) *K. Eaton*

Upper-Division Courses

103. Feminist Interventions. S

Situates ongoing debates around feminist theory and practice within the context of political theory, the role of the state, and the position of women in contemporary (predominantly Western) society. Engages with classical political theory, second wave feminism, and the role of the state on matters pertaining to pornography and prostitution. Enrollment restricted to politics, legal studies, and Latin American and Latino studies/politics combined majors during priority enrollment only. *V. Seth*

104A. American Political Thought. *

Basic problems of political theory within the American setting. The course explores both the mainstream tradition and some branches of the counter tradition of political ideas in America, focusing on the themes of authority, community, equality, and liberty. Enrollment restricted to politics, legal studies, and Latin American and Latino studies/politics combined majors during priority enrollment only. Satisfies American History and Institutions Requirement. *J. Schaar*

105A. Ancient Political Thought. S

Ancient political ideas in context of tension between democracy and empire, emergence of the psyche, and shift from oral to written culture. Emphasis on Athens, with Hebrew, Roman, and Christian departures and interventions. Includes Sophocles, Thucydides, Socrates, Plato, Aristotle, Stoics, the Bible, and Augustine. (Also offered as Legal Studies 105A. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *D. Mathiowetz*

105B. Early Modern Political Thought. W

Studies republican and liberal traditions of political thought and politics. Authors studied include Hobbes, Locke, and Rousseau. Examination of issues such as authorship, individuality, gender, state, and cultural difference. (Also offered as Legal Studies 105B. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *V. Seth*

105C. Modern Political Thought. F

Studies in 19th- and early 20th-century theory, centering on the themes of capitalism, labor, alienation, culture, freedom, and morality. Authors studied include J. S. Mill, Marx, Nietzsche, Foucault, Hegel, Fanon, and Weber. (Also offered as Legal Studies 105C. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. *M. Thomas*

105D. Late 20th Century Political Thought. *

The politics of identity and recognition as the basis for institutional legitimacy and social struggles in the late 20th century. Conflicting views of Hegel's master-slave dialectic are used to relate, e.g., Sartre, Fanon, Bataille, Merleau-Ponty, Foucault, Lacan, Levinas, Derrida, Deleuze, Zizek, and Badiou to present-day concerns. (Also offered as Legal Studies 105D. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment. *R. Meister*

106. Marxism as a Method. W

Examines Marx's use of his sources in political philosophy and political economy to develop a method for analyzing the variable ways in which social change is experienced as a basis for social action. Provides a similar analysis of contemporary materials. Contrasts and compares Marxian critiques of these materials and readings based on Nietzsche, psychoanalysis, cultural studies, and rational choice materialism. (Also offered as Legal Studies 106. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics

combined majors during priority enrollment only. *The Staff*

107. After Evil: Political Morality of Survivorship and Recovery. *

What are the continuing relationships between victims, perpetrators, and beneficiaries of a past that is recognized as evil? Focus on contrast between the competing moral logics of struggle and reconciliation, and various rationales for allowing beneficiaries to keep their gains in order to bring closure to the past. Theoretical perspectives drawn from law, philosophy, theology, and psychoanalysis. (Also offered as Legal Studies 107. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Meister*

108. Political Theologies of Milton and Dante. *

Focuses on reading texts written by Milton and Dante, including *Paradise Lost* and *Purgatorio*. Topics of political theology, medieval and reformation Christian thought and related historical studies are examined. Enrollment restricted to politics majors. *R. Meister*

109. Orientalism. F

Studies "Orientalism" as a concept of political theory and as a historical practice. Considers how "Western" views of the peoples, cultures, and governments of "the East" influenced political, intellectual, and aesthetic projects of the 18th and 19th centuries, with attention to the themes of colonialism, nationalism, language, and gender. Also considers Orientalism as a subject of post-colonial thought. Prerequisite(s): course 105A, or 105B, or 105C, or 105D; or by permission of instructor. Enrollment restricted to politics majors. *M. Thomas*

110. Law and Social Issues. *

Examines current problems in law as it intersects with politics and society. Readings are drawn from legal and political philosophy, social science, and judicial opinions. (Also offered as Legal Studies 110. Students cannot receive credit for both courses.) Enrollment restricted to politics, legal studies, and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

111A. Constitutional Law. S

An introduction to constitutional law, emphasizing equal protection and fundamental rights as defined by common law decisions interpreting the 14th Amendment, and also exploring issues of federalism and separation of powers. Readings are primarily court decisions; special attention given to teaching how to interpret, understand, and write about common law. (Formerly *Problems in Constitutional Law*.) (Also offered as Legal Studies 111A. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

112. Women and the Law. W

Interdisciplinary approach to study of law in its relation to category "women" and production of gender. Considers various materials including critical race theory, domestic case law and international instruments, representations of law, and writings by and on behalf of women living under different forms of legal control. Examines how law structures rights, offers protections, produces hierarchies, and sexualizes power relations in both public and intimate life. (Also offered as Feminist Studies 112. Students cannot receive credit for both courses.) Enrollment restricted to politics, feminist studies, legal studies, and Latin American and Latino studies/politics combined majors during priority enrollment only. *G. Dent*

114. Thinking Green: Politics, Philosophies, and Practices of Sustainability. *

A course on the political and philosophical sources of ecological and social sustainability and how they affect and inflect the design, implementation, and practices of sustainability. Asks whether they offer a "realistic" alternative to liberalism and other political and economic ideologies and practices. (Formerly Thinking Green: Politics, Ethics, Political Economy.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Lipschutz*

115. Foundations of Political Economy. S

Examines how ideas about labor, rights, exchange, capital, consumption, the state, production, poverty, luxury, morality, procreation, and markets were woven in political-economic discourse from 1690-1936. Readings include Locke, Mandeville, Smith, Malthus, Mill, Hegel, Marx, Lenin, and Veblen. Particular focus given to theoretical origins of and justifications for property and implications of economic interdependence for politics. Prerequisite(s): course 105B, 105C, or 120C. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *D. Mathiowetz*

116. Comparative Law. *

Explores legal systems and legal rules around the world, for a better understanding of the factors that have shaped both legal growth and legal change. Particular attention given to differences between common and civil law systems, changes brought about by the European Union, and expansion of legal norms around the globe. (Also offered as Legal Studies 116. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

117. U.S. Telecommunications Law and Policy. *

Surveys the U.S. telecommunications and broadcasting law and policy from the mid-19th century through the present. Offers a range of perspectives from the vantage point of the telecommunications industry, government, and the media-reform movement. Enrollment restricted

to politics majors during priority enrollment only. *The Staff*

120A. Congress, President, and the Court in American Politics. F

Study of political development, behavior, performance, and significance of central governmental institutions of the U.S. Emphasizes the historical development of each branch and their relationship to each other, including changes in relative power and constitutional responsibilities. (Also offered as Legal Studies 120A. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Satisfies American History and Institutions Requirement. *D. Wirls*

120B. Society and Democracy in American Political Development. W

Examines role of social forces (e.g., race, class, and gender) in development of the American democratic processes and in the changing relationship between citizen and state. Course materials address ideas, social tensions, and economic pressures bearing on social movements, interest groups, and political parties. (Also offered as Legal Studies 120B. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics and Latin American and Latino studies/politics majors during priority enrollment period. Satisfies American History and Institutions Requirement. *The Staff*

120C. State and Capitalism in American Political Development. S

Examines the relationship between state and economy in the U.S. from the 1880s to the present, and provides a theoretical and historical introduction to the study of politics and markets. Focus is on moments of crisis and choice in U.S. political economy, with an emphasis on the rise of regulation, the development of the welfare state, and changes in employment policies. (Also offered as Legal Studies 120C. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics, Latin American and Latino studies/politics, and legal studies majors during priority enrollment only. Satisfies American History and Institutions Requirement. *E. Bertram*

121. Black Politics and Federal Social Policy. F

Examination of changes in the political and economic status of African Americans in the 20th century; particular focus on the role of national policies since 1933 and the significance of racism in 20th-century U.S. political development. (Also offered as Legal Studies 121. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. (General Education Code(s): E.) *M. Brown*

122. Politics, Labor, and Markets in the U.S.. W

Examines political and social dimensions of recent transformations in the U.S. labor market. Includes classical and contemporary theoretical debates over the nature and functions of work under capitalism. Focuses on shifts in the organization and character of work in a globalizing economy. Addresses recent trends in economic inequality, low-wage and contingent work, job mobility and security, and work/family relations. Includes attention to the roles and responses of business, labor, government, and social movements. Enrollment restricted to politics and Latin American and Latino studies/politics combined major during priority enrollment. *E. Bertram*

124. Politics, Poverty, and Inequality in America. S

Investigation of the causes and consequences of poverty and income inequality in the U.S., including racial and gender inequality. Consideration of the origins of contemporary anti-poverty policies and evaluation of current policy alternatives. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *E. Bertram*

125. Political Organizations in American Politics. F

Introduces the literature on interest groups and attempts to answer the question: Do such groups promote or hinder American democracy? Class readings and lectures review and assess the participation of interest groups in the electoral process and in Congress, the executive branch, and the courts. Pays particular attention to the role business and environmental groups play in American politics and policy. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *S. Kamieniecki*

129. Policies and Politics of American Defense. *

Examines the evolution of the policy and politics of American national security, from the Cold War to the present. Content of military policy explored with analytic focus on formation of policy and interactions between military policies and domestic policies. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *D. Wirls*

132. California Water Law and Policy. F

Explores the rich history and fundamental legal concepts surrounding water in California. Students identify, evaluate, and debate some critical water policy questions faced by Californians today and in the future. (Also offered as Legal Studies 132. Students cannot receive credit for both courses.) *R. Langridge*

133. Law of Democracy. S

Explores the role of law in both enabling and constraining the actions of elected politicians in the U.S. Among issues examined are voting rights, redistricting, and campaign finance. Course asks how the law shapes and limits our ability to choose our elected leaders, and in turn, how the law is shaped by political forces. (Also offered as Legal Studies 133. Students cannot receive credit for

both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

135. Immigration Policy and Debate in the U.S.. S

Course charts the history of immigration policy and debate in the U.S., highlighting the ways economic, social, and geopolitical factors influenced the processes and outcomes of immigration debate and policy making. Focuses on interaction between society and state in formulation and implementation of immigration policy, and the ways policy outcomes may differ from expectations. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

139. Market Crisis and the Future of Capitalism. *

Examines the development and role of late 20th- and early 21st-Century financial technologies in modern market crises. Overview of financial markets, modern finance theory, related regulatory institutions, financial crises, financial technologies, and the relation of human behavior. What is the future of market capitalism? Enrollment restricted to politics and politics/Latin American and Latino studies combined majors. *The Staff*

139B. Materialism and Financial Markets. *

Seminar builds on Market Crisis and Future of Capitalism curriculum, with the objective of developing a political economy of 21st-century finance capitalism. Analyzes structured debt and derivatives, and their relation to money and capital markets. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

140A. Politics of Advanced Industrialized Societies. W

Explores the political and economic systems of advanced industrialized societies. In addition to specific comparisons between the countries of western Europe and the United States, covers important themes and challenges, including immigration, globalization, and the crisis of the welfare state. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority period. *E. Pasotti*

140B. Comparative Post-Communist Politics. F

Comparative study of revolutionary transformations of East European, Soviet, and former Soviet nations to post-Communist political orders. Focus on reemergence of political society, social and economic problems of transition, and maintenance of many cultural norms and authority patterns associated with previous regime. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. *M. Urban*

140C. Latin American Politics. S

Overview of major approaches to the study of Latin American politics. Introductory survey of historical and contemporary democratic, populist, authoritarian, and revolutionary regimes. Special attention to local, national, and global forces shaping development strategies and public policies; changing institutional arrangements and shifting discourses of domination; and social movements and strategies of resistance among subaltern social groups and classes. Students cannot receive credit for this course and course 241. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics, Latin American and Latino studies, and politics/Latin American and Latino studies combined majors during priority period. (General Education Code(s): E.) *K. Eaton*

140D. Politics of East Asia. *

Explores dynamics of political and economic development in Northeast and Southeast Asia following WWII. Students apply theories of comparative politics to empirical case studies, integrating statist, social, and cultural factors into their understanding of development. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. (General Education Code(s): E.) *The Staff*

140E. Postcolonial States and Societies. *

Explores key contemporary issues and conflicts in postcolonial states and societies from a range of methodological and theoretical perspectives. While readings focus on South Asia, Middle East, and southeast Asia, they reflect issues of broad theoretical and comparative significance, emphasizing constitutive role of colonialism, modernist projects, and social movements in shaping both postcolonial politics and scholarship. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. (General Education Code(s): E.) *The Staff*

141. Politics of China. *

Introduces themes of Chinese politics from 1949 to present, including: the establishment and substantial dismantling of socialism; movements and upheavals, such as the Cultural Revolution and 1989; and issues, such as Tibet and Taiwan. Surveys current institutions, leaders, and policies. (Formerly *China*.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. (General Education Code(s): E.) *B. Read*

142. Russian Politics. S

Historical-political survey of Russia within the U.S.S.R. is followed by examination of the 1991 revolution, the attempt to recover a national identity and establish a unified Russian state. Highlighted in this course are cultural and political factors central to the Russian experience:

personalistic modes of political organization, a remote and corrupt state apparatus, collectivist forms of thought and self-defense. *M. Urban*

144. Andean Politics. F

Examines similar political trends in four Andean countries: Bolivia, Colombia, Ecuador, and Peru. Trends include mobilization of indigenous populations, breakdown of traditional party systems, and reconstruction efforts in post-conflict environments. Students who have taken prior courses in Latin American politics, including course 140C, will be best prepared for this course. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *K. Eaton*

146. The Politics of Africa. *

Comparative study of contemporary sub-Saharan African states. Selected issues and countries. Internal and external political institutions and processes are studied in order to learn about politics in contemporary Black Africa and to learn more about the nature of politics through the focus on the particular issues and questions raised by the African context. Enrollment restricted to politics majors during priority enrollment only. (General Education Code(s): E.) *The Staff*

148. Social Movements. *

Overview of social movements by analysis of specific theories and examples. Course connects the study of theories and movements to larger political processes. Topics may include: New Social Movement theory; gender and social movement; democratic, historical, transnational, global and/or local social movements. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

149. Democratic Transitions. F

Explores democratization processes from a variety of historical and geographical perspectives. Examines the role of foreign influences, economic development, civil society, elites, and institutions in the transition and consolidation of democratic systems. Enrollment restricted to politics and Latin American and Latino studies/politics majors during priority enrollment only. *E. Pasotti*

150. Democratization, Citizenship, and Human Rights in South America. *

Examines military regimes, transitions to civilian rule, and politics of democratization in contemporary Brazil, Argentina, and Chile. Focus on the contradictions and legacies of transition politics, the challenges of democratizing political institutions, and the political and social consequences of neoliberalism. Emphasis on human rights, citizens' movements (especially feminisms), changing dynamics of civil society, and contemporary efforts to deepen democracy and extend meaningful citizenship to subaltern social groups and classes. Prerequisite(s): course 140C or permission of instructor. *The Staff*

151. Politics of Law. F

Uncovers the important debates in politics and law around the functions of courts, litigation, and rights--and the political nature of law itself. Course is interdisciplinary, and draws from literature in political science, law, and sociology. (Also offered as Legal Studies 151. Students cannot receive credit for both courses.) Enrollment restricted to politics, legal studies, and Latin American and Latino studies/politics combined majors during priority period. *The Staff*

160A. Theories of International and World Politics. S

Examination of analytical perspectives on international and world politics, international and global political economy, war and conflict, corporations and civil society. Explores theoretical tools and applications, recurring patterns of global conflict and cooperation, the nexus between domestic politics, foreign policy and international and world politics. This is not a current events course. (Formerly International Politics.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Lipschutz*

160B. International Law. W

Origins and development of international law: international law is examined both as a reflection of the present world order and as a basis for transformation. Topics include jurisdiction and sovereignty, treaties, the use of force, and human rights. (Formerly course 173.) (Also offered as Legal Studies 160B. Students cannot receive credit for both courses.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics and Latin American and Latino studies/politics majors during priority enrollment. *The Staff*

160C. Security, Conflict, Violence, War. W

Genesis and theories of conflict and war and their avoidance (past, present, future). Relationship between foreign policy and intra- and interstate conflict and violence. National security and the security dilemma. Non-violent conflict as a normal part of politics; violent conflict as anti-political; transformation of conflict into social and interstate violence. Interrelationships among conduct of war, attainment of political objectives, and the end of hostilities. Civil and ethnic wars. Political economy of violence and war. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

160D. International Political Economy. F

Introduction to the politics of international economic relations. Examines the history of the international political economy, the theories that seek to explain it, and contemporary issues such as trade policy, globalization, and the financial crisis. (Formerly course 176.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to

politics and Latin American and Latino studies/politics combined majors. *R. Schoenman*

161. Foreign Relations of China. F

Surveys China's foreign policy from 1949 to today, including the Korean War; Sino-Soviet ties; relations with the United States; tension with Taiwan; and China's rise to geopolitical prominence. Introduces the major theoretical approaches to international relations. (Formerly course 143) Enrollment restricted to politics and politics/Latin America and Latino studies combined majors during priority enrollment. *The Staff*

162. Political Integration in Europe, The Atlantic Community and Africa. *

Analyzes concepts, movements, and institutions fostering transnational community. Compares and contrasts functional and federal approaches; the roles of the European, Atlantic Union, and Pan-African Movements; and explores efforts at socio-economic transformation via institutions such as the European Union, Council of Europe, NATO, OSCE, and African Union. Enrollment restricted to politics and politics/Latin American and Latino studies combined majors during priority enrollment. *J. Marcum*

163. U.S. Foreign Policy. *

Provides overview of U.S. foreign policy formulation: considers how U.S. political culture shapes foreign policy; examines governmental actors involved: the president, executive branch agencies, and Congress; then considers non-governmental actors: the media, interest groups, and public opinion. (Formerly *How U.S. Foreign Policy Gets Made.*) Enrollment restricted to politics and politics/Latin American and Latino studies combined majors. *The Staff*

165. Global Organization. W

Addresses whether and how global organizations are changing the international system. Examines multilateral institutions, regional organizations, and nonstate actors. Overriding aim is to discern whether these global organizations are affecting the purported primacy of the state. (Formerly course 160B.) Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

166. Politics of Migration. W

Examines the magnitude and the political, economic, cultural, environmental, and social impact of today's movement of millions of people within and amongst states. Enrollment restricted to politics majors and Latin American and Latino studies/politics combined majors during priority enrollment. (General Education Code(s): CC.) *I. Gruhn*

171. Law of War. *

Examines legal regulation of international violent conflict. Students examine development of normative standards within international law and creation of institutions to both adjudicate violations and regulate conduct. (Also offered as Legal Studies 171. Students cannot receive credit for both courses.) Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *The Staff*

172. Liberalism, the State, and the War on Terror. *

Examines the relation between the liberal State and perceived challenges to State sovereignty posed by transnational terrorism. How does terrorism as both a symbol and empirical phenomenon fit within the horizon of liberal ideology? What claim to sovereignty does the State make in the face of acts of terror? What political logic is required in/for a War on Terror? Students may not take both course 72 and this course for credit in the major. Enrollment restricted to politics and politics/Latin America and Latino studies majors during priority enrollment. *The Staff*

174. Global Environment Politics. W

Focus on global environmental "problematique" and how it is being played out in a variety of political arenas. Includes technical overview of global environmental movement; perspectives on alternative political approaches to environmental problems. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Lipschutz*

175. Human Rights. *

Embraces an interdisciplinary approach to the study of human rights. Captures the malleable nature of human rights and the contours of its dual role as both law and discourse. (Also offered as Legal Studies 175. Students cannot receive credit for both courses.) Prerequisite(s): course 173 or Legal Studies 173. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment. *M. Massoud*

177. The United States and the World. *

Examines political, economic, and cultural relationship between the U.S. and the rest of the world, including historical background and foreign policy. Special focus on U.S. involvement in the Middle East and Persian Gulf and the politics of economics of that region. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Lipschutz*

178. U.S. Foreign Economic Policy. *

Theoretical and historical survey of U.S. foreign economic policy. First part explores theoretical frameworks and covers historical events in the U.S.'s relationship with world economy. The second part focuses on postwar foreign economic policy; surveys different theoretical approaches to U.S. foreign policy; and examines fundamental developments and issues in trade, monetary,

development, and investment policies. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Schoenman*

179. The Atomic Enterprise: Nuclear Physics, History, Strategy, Policy. *

Informs and educates about "The Atomic Enterprise," that panoply of science, technology, projects, events, policies, health effects, industry, and controversies related to the discovery, development, deployment, and domestication of nuclear fission and fusion. Enrollment restricted to politics or politics/Latin American and Latino studies majors during priority enrollment only. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only. *R. Lipschutz*

183. Asian Security. *

Explores the sources of cooperation and conflict in modern Asia from the waning years of the Imperial Age to the present, with stops en route such as the three Indo-Pakistani wars and conflicts in the Taiwan Strait. Enrollment restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment. *The Staff*

190. Senior Comprehensive Seminar.

These courses, offered at different times by different instructors, focus on current problems of interest across the discipline. Courses offer a flexible framework within which those mutually interested in specific issues can read, present papers, and develop their ideas. Students who do not meet the restrictions and prerequisites may contact the instructor for permission to enroll. *The Staff*

190A. State and Revolution. F

Investigates the process of rapid and fundamental political change from the standpoint of both the structures of states in which revolutions have occurred and the structures of states issuing from revolutions. A number of cases are examined, but particular emphasis is given to the "classic" revolutions in France (1789) and Russia (1917). Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors; major restrictions lifted during open enrollment. Enrollment limited to 20. *M. Urban*

190B. Humanity, Sovereignty, and War. W

Examines how enmity, the state, and war serve as limits for political conceptions of who "we" are, and the liberal and humanitarian efforts to surmount these limits. Students examine works written prior to the liberal period (Hobbes), in response to it (Hegel and Schmitt) and finally a 20th-Century liberal revival (Rawls), and discuss rights, conscience, political obligation, war, and the state. (Formerly The Juridical and the Political.) Prerequisite(s): two of the following: course 103, 105A, 105B, 105C, 105D, 107, 109, or 115. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *D. Mathiowetz*

190C. U.S.-Russian Relations. *

Examines the cold war and its aftermath. Focuses on interstate conflict and its roots in domestic politics. Topics include issues of national security, military competition, transnational movements, regional and global hegemony. Prerequisite(s): one of the following: 140B, 141, or 142. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *M. Urban*

190D. Early Anarchist and Socialist Thought. *

Studies in 19th- and early 20th-century anarchist and socialist thought. Themes covered include property, labor, marriage, and the state. Readings drawn from Bakunin, Goldman, Fourier, Kropotkin, Perkins-Gilman, Proudhon, and Stirner. Prerequisite(s): two of the following: courses 103, 105A, 105B, 105C, 105D, 109, or 115; or by permission of instructor. Enrollment restricted to senior politics majors. Enrollment limited to 20. *M. Thomas*

190E. Transitions in the Information Age. W

Explores the role of new media in political protest; whether and how new media technologies such as social networking, text messaging, Twitter, and YouTube have changed the way opposition movements develop. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors. Enrollment limited to 20. *R. Schoenman*

190G. Issues in International Law. *

Explores theory and reality of international law; how it determines or governs or modifies policies of government. Emphasis on contemporary political and economic forces and international law in nuclear age, competing areas for new law, law of seas, human rights, new international economic issues, the environment. Enrollment restricted to senior legal studies, politics, and Latin American and Latino studies/politics combined majors during priority enrollment only; major restrictions will be lifted during open enrollment. Enrollment limited to 20. *The Staff*

190H. The Substance of Democracy. W

What is democracy? Why do we care about it? How can we identify it? Through political science, law, and philosophy, the course explores these questions and the issues of patronage, media manipulation, lobbying, campaign finance reform, and participation. Enrollment restricted to senior politics and combined politics/Latin American and Latino studies majors. Enrollment limited to 20. *E. Pasotti*

190J. Politics and Inequality. *

Considers causes and consequences of inequality in modern societies. Emphasizes empirical

analysis of contemporary forms of class, racial, and gender inequality and examination of normative theories of distributive justice. Major restrictions lifted during open enrollment. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *D. Wirls*

190L. Poverty Politics. F

Examines theoretical, historical, and contemporary sources of poverty, politics, and policies in the U.S. Explores competing theories of the causes of poverty and the consequences of social provision. Focuses on successive historical reform efforts and contemporary dilemmas of race, gender, low-wage labor, and the politics of welfare reform. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *E. Bertram*

190M. American Politics Through American Literature. *

Most major American writers offer perspectives outside "official" mainstream political culture; the raising of countervoices; concern about common, public lives, not just personal experience; exploring persistent tensions (dualisms) and deeper meanings, how we really live, how it is concealed from understanding, and political/moral costs. Prerequisite(s): course 101, 105A, 105B, 105C, 120B, or 120C. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *J. Schaar*

190N. Congress: Representation and Legislation in Comparative Perspective. *

Examination of U.S. Congress in theoretical, comparative, and historical perspective. Topics include tension between representative and legislative processes, parliamentary versus presidential systems, party organization versus the new entrepreneurship. Special attention given to nature and consequences of bicameralism. (Formerly Congress: The Politics of Representation and Legislation) Prerequisite(s): course 120A. Enrollment restricted to senior legal studies, politics, and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *D. Wirls*

190O. Women and Politics: Electoral Influence and Policymaking. *

Focuses on the impact women have on the political process in the U.S. Examines women's mass-level political participation with focus on the gender gap; women as candidates, women officeholders and their impact, and expectations for the future. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *The Staff*

190P. Race: History of a Concept. F

Examines how we came, by the late 19th century, to classify humanity into racial categories. In an effort to trace emergence of this very modern phenomenon, explores historical shifts that informed Europe's representation of cultural difference from the writings of ancient Greeks to the social Darwinism of 19th-century Britain. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment. Enrollment limited to 20. *V. Seth*

190Q. Theorizing Modernity. *

Introduces central categories and material implications that underwrite discourses on modernity since the late 18th century. Students read across the disciplines in fields such as political theory, postcolonialism, history, science studies, anthropology, and feminist criticism. Prerequisite(s): any two of the following courses: 105A, 105B, 105C, 105D. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment. Enrollment limited to 20. *V. Seth*

190S. Empire and After. *

Examines the literature on American empire, beginning with the founding parents (e.g., Jefferson), continuing through the revisionist literatures (e.g., Williams) and more recent work (e.g., Hardt and Negri), and ending with contemporary critiques and predictions. Enrollment restricted to senior politics majors. Enrollment limited to 20. *R. Lipschutz*

190T. Governance and Conflict in East Asia. S

Students read recent books on East Asian countries (emphasis on China) that engage the long-standing themes of state power and societal resistance. Prerequisite(s): course 141 or 143 or 109, or by permission of instructor. Enrollment restricted to senior politics majors. Enrollment limited to 20. *B. Read*

190V. Problems in Latin American Politics. *

Research seminar allows advanced students to engage in current scholarly debates in the sub-field of Latin American politics. Topics and countries covered vary from year to year but may include civil society, citizenship and cultural politics in Latin/o America, comparative perspectives on democratization, politics and culture in Brazil, feminisms and women's movements in Latin America, the politics of race and ethnicity in the Americas, and human rights and social justice in a neoliberal era. Prerequisite(s): course 140C or 144. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Students with equivalent course work may enroll with permission of instructor. Enrollment limited to 20. *K. Eaton*

190W. Living in the Aftermath of Evil. *

Draws on a variety of sources to understand metaphors of war and peace as potentially appropriate attitudes toward evil and as potentially rational compromises with evil; investigates

respects in which constitutional regimes of post-traumatic societies can be understood as "peace programs" that preserve and transcend the identities of the victims and perpetrators of past atrocities while creating a new identity based on their common survivorship; explores the constraints placed on "nation in recovery" by the public commitment to create an official version of a past that must be remembered so that it will not be repeated. Prerequisite(s): two of the following: course 105A, 105B, 105C, 106, and 107. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *R. Meister*

190X. Global Capital and Capitalism. *

Examines the history and organization of global capital and capitalism, through political economy, with a focus on major historical works and recent writings, especially in relation to the crisis of globalization and the global economy. (Formerly *Global Civil Society--Theories, Debates, Practices.*) Prerequisite(s): One of course 115, 120C, 160A, 176, or 178. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors during priority enrollment only. Enrollment limited to 20. *The Staff*

190Y. Political Theories of Luxury. W

Examines conceptions of luxury as they have appeared in classical, Christian, early modern, and contemporary discourses and debates. How have people sought to define luxury; for what political purposes; and what promise and peril do such definitions have? What is the shape and power of luxury in political communities today? (Formerly *Political Theory of Luxury.*) Enrollment restricted to senior politics and politics/Latin American studies majors. Enrollment limited to 20. *D. Mathiowetz*

190Z. International Security. *

Examination of selected issues, controversies, and theories relevant to "security" between and among nations. Topics vary, but may include: war, peace, nuclear proliferation, arms control, military and foreign policies, alternative conceptions of security. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors. Enrollment limited to 20. *The Staff*

193. Field Study in Politics. F,W,S

Individual studies undertaken off campus with direct faculty supervision. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Various topics to be announced before each quarter. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

195A. Senior Thesis. F,W,S

Preparation of a senior thesis over two or three quarters, beginning in any quarter. The grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency. *The Staff*

195B. Senior Thesis. F,W,S

Preparation of a senior thesis over two or three quarters, beginning in any quarter. The grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency. *The Staff*

195C. Senior Thesis. F,W,S

Preparation of a senior thesis over two or three quarters, beginning in any quarter. The grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency. *The Staff*

198. Independent Field Study. F,W,S

Individual studies undertaken off-campus for which faculty supervision is not in person (e.g. supervision is by correspondence). Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

198F. Independent Field Study (2 credits). F,W,S

Individual studies undertaken off-campus for which faculty supervision is not in person, but by correspondence. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

A student normally approaches a member of the staff and proposes to take a course 199 on a subject he or she has chosen which is not offered in other politics courses. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

A student normally approaches a member of the faculty and proposes to take a course 199 on a subject he or she has chosen which is not offered in other politics courses. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

200A. Interpretive Problems in Political Theory: Language and Power. S

Examines intersections of philosophy of language, language philosophy, political theory, and politics. How can we read texts and discourses in a manner both historically and textually grounded? Must these readings be compatible with a democratic ethos? If so, how? (Formerly *Interpretive Methods in Political Theory: Language and Politics*.) Enrollment restricted to graduate students. Enrollment limited to 15. *M. Thomas*

200B. Social Forces and Political Change Core Seminar. *

Concerns transformation of social forces into political ones. Focuses on formation, articulation, mobilization, and organization of political interests and identities, their mutual interaction, and their effects on state structures and practices and vice versa. Major themes are 1) social bases of political action: class, gender, race, and other determinants of social division and political identity and 2) relevant forms of political agency and action, including development of political consciousness and representation of interests and identities in the public sphere. Enrollment restricted to graduate students. Enrollment limited to 15. *B. Read*

200C. States and Political Institutions Core Seminar. F

Introduces study of political institutions as instruments of collective decision making and action. Explores alternative theoretical approaches to development of political institutions, state and political economy, and security dilemmas. Enrollment restricted to graduate students. Enrollment limited to 15. *E. Pasotti*

200D. Political Economy Core Seminar. *

Introduction to the theories and methodologies of political economy. Focuses on the relationship between states and markets and considers the politics of economic choices and institutions germane to both national and global political institutions. Addresses origins and development of markets and capitalism; historical evolution of states and their economies; relationship between labor, capital, production, and consumption; regulation of production; macroeconomics and management of economies; and issues of national and global social welfare. Enrollment restricted to graduate students. Enrollment limited to 15. *R. Schoenman*

201. Logics of Inquiry. *

Investigates approaches to study of politics and to enterprise of social science in general. Works from positivist, interpretive, historical, and critical approaches provide examples held up to critical and epistemological reflection. Enrollment restricted to graduate students. Enrollment limited to 15. *R. Lipschutz*

203. Making of the Modern. *

Introduces, at the graduate level, some of the central conceptual categories and material implications that underwrite the world of the modern. Explores concepts including the individual, historicism, contract, and objectivity. Enrollment restricted to graduate students. Enrollment limited to 15. *V. Seth*

204. Bodies in History. *

The human body has been productive of a wide range of varied and competing discourses. Among the themes covered are sexuality, hygiene, the grotesque, and criminality. Enrollment restricted to graduate students. Enrollment limited to 15. *V. Seth*

205. Political and Social Thought: Politics of Recognition. *

Investigates issues about identity and recognition as basis for claims about institutional legitimacy and social struggle. Paradigm is Hegel's account of relation of master and slave in *Phenomenology of Spirit*. Contemporary political philosophy examines differing accounts of reason, power, resistance, liberation, morality, difference, and the other. Concludes with discussion of identity and interest politics, multiculturalism and assimilation, and moral bases of struggle, reconciliation, and compromise in the political arena. Enrollment restricted to graduate students. Enrollment limited to 15. *R. Meister*

206. Topics in Political Theology. *

Readings focus on the early 20th-century rediscovery of political theology; its use in theorizations of the Holocaust; and its return in 21st-century debates on empires, war, terror, enmity, reconciliation, fanaticism, human rights, political economy, and global catastrophe. Enrollment restricted to graduate students. Enrollment limited to 15. *B. Meister*

207. Political Economies of Affect. *

Explores the intersections of classical and philosophical political economy and theories of affect, from emotion to aesthetics and sensibility, in early modern and late modern contexts. Readings include Deleuze, Hobbes, Hume, Negri, Massumi, Sedgwick, Smith, Spinoza. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Mathiowetz*

211. Marxism. *

Examines how Marx arrived at his substantive political standpoint through a critique of the modes of theory through which state and society are interpreted from within. Also considers how far it is possible to apply the methods Marx used, in learning from the sources available in our own contemporary material, and whether this process of interpretation will lead us to similar conclusions. Enrollment restricted to graduate students. Enrollment limited to 15. *R. Meister*

214. Thinking Green: Politics, Ethics, Political Economy. *

Green political thought, philosophy, debates, and practices; history of ecological thought and comparative study of competing ideas and proposals. Critical examination of neo-liberal environmentalism. Enrollment restricted to graduate students. Enrollment limited to 15. *R.*

222. Conflict and Change in American Politics and Policy. *

Explores the dynamic and contested interaction between politics and policy in the U.S. context, through examining the historical development of key contemporary policy debates and political conflicts. Introduces recent scholarship, drawing on history, sociology, and political economy that has challenged traditional behaviorist approaches to understanding American politics and policy development. Enrollment restricted to graduate students. Enrollment limited to 15. *E. Bertram*

232. United States Political History. F

Covers several important themes and sets of readings from the literature on American political development. Topics include the origins and development of American political institutions, the evolution of democratic mechanisms, the rise and fall of social movements, and debates about the sources of policy regimes and political change, including the role of war. Enrollment restricted to graduate students. Enrollment limited to 15. *D. Wirls*

233. Interrogating Race. *

Critically examines alternative theoretical and methodological approaches to study of race and racism. Considers alternative explanations for origins and persistence of racism and racial inequality and suggests the relevance of a socio-political understanding. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

245. Latin American Politics. *

Surveys the Latin American political literature by studying: 1) critical moments in political development (e.g., state formation, democratization); 2) important political institutions (e.g., presidentialism, party, and electoral systems); and 3) influential political actors (e.g., unions, business associations, social movements). Enrollment restricted to graduate students. Enrollment limited to 15. *K. Eaton*

247. Comparative Urban Politics. *

Focuses on local government structures and the relationships with other levels of government. Examines institutions and administration; urban political economy (fiscal strain, poverty, inequality, and the efforts to attract economic investment); political machines; race and ethnicity. Enrollment restricted to graduate students. Enrollment limited to 15. *E. Pasotti*

251. Discourse. *

Utilizing a variety of approaches—discourse analysis, semiotics, critical theory, and linguistics—analyzes how language constructs the political world. Focuses on the symbolic mediation, normalization, and reproduction of power and subjugation present in the discourses through which they are apprehended and expressed. Enrollment restricted to graduate students. Enrollment limited to 15. *M. Urban*

255. Comparative Anti-Colonialisms. *

Political thought of anti-colonial movements in comparative, historical perspective, including 18th- to 20th-Century European colonies of America and Asia. Focuses both on the contemporary political thought of these movements as well as on historiographical approaches of secondary literature. Enrollment restricted to graduate students. Enrollment limited to 15. *M. Thomas*

265. Nationalism. *

Survey of theories of nationalism, with selected nationalist thinkers and case studies. Emphasis on historical analyses and cases. Topics include: origins and typologies of nationalisms, racism, gender, revolution, and the state. Enrollment restricted to graduate students. Enrollment limited to 15. *M. Thomas*

272. Critical Interventions in IR Theory and Global Political Economy. S

Seminar examines selections from the canonical literature in international relations theory and global political economy through a number of critical lenses, including constructivist, feminist, historical materialist, and subaltern approaches. Enrollment restricted to graduate students. Enrollment limited to 15. *R. Lipschutz*

275. Contemporary Capitalism. W

Examines genesis of new institutions within the force of social ties and networks. Studies how social and organizational relationships achieve individual or group goals in political and economic life, and influence institutional design. Considers when and what ties contribute to governance and economic performance, and when informal and formal organizations constitute an obstacle. (Formerly New Approaches to the Study of Capitalism.) Enrollment restricted to graduate students. Enrollment limited to 15. *R. Schoenman*

291. Teaching Assistant Seminar (2 credits). F

Two-hour weekly seminar required of teaching assistants in which pedagogic and substantive issues will be considered. The experience of performing teaching assistant duties constitutes subject matter for discussion. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

293. Field Study. F,W,S

Individual study undertaken off campus with direct faculty supervision. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

295A. Research Colloquium (2 credits). *

Weekly venue for Ph.D. students to present current research, exchange information on sources and resources, discuss and critique epistemologies and methods, and to formulate topics for QE field statements and the dissertation. There are no assigned readings. May be repeated for credit twice. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *The Staff*

295B. Advanced Research Seminar. *

Weekly seminar for Ph.D. students in which to develop and write extended research papers on selected topics, to present current work, to discuss methods, data sources, and fieldwork, and to receive critiques and assessments from fellow students. May be repeated for credit twice. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *The Staff*

297. Independent Study. F,W,S

A student approaches a member of the staff and proposes to take a course 297 on a subject he or she has chosen that is not covered in other politics graduate courses or plans a graduate independent study that includes an undergraduate course. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Enrollment restricted to graduate students and permission of instructor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

*Not offered in 2011-12

[Program Description](#) | [Changes to 2010-12 Catalog Highlighted](#) | [Faculty](#) | [Course Descriptions](#)

Program Description

Students interested in acquiring proficiency in Portuguese may choose to enroll in either of two accelerated introductory tracks: courses 1A-B are designed as a two-quarter sequence for students who have no previous experience with the Romance languages; courses 60A-B are a two-quarter sequence designed for students who have a strong background in the Romance languages (typically Spanish) or some previous rudimentary knowledge of Portuguese. Both sequences are accelerated. A second-year Portuguese sequence, also accelerated, courses 65A-B, follows the first-year sequence, and is offered over two quarters. The completion of this sequence fulfills the two-year language requirement for study abroad programs.

The program is aimed at enabling students to gain proficiency in listening comprehension, speaking, reading, and writing. Instruction takes place in Portuguese from the beginning and draws heavily on Brazilian culture through popular music and cinema.

Campus Language Laboratories and Placement Exams

Information about these topics can be found under [Language Program](#).

Study Abroad

Students may apply to spend time either in Rio de Janeiro, Brazil or in Salvador (Bahia) through the Office of International Education (OIE). Courses taken abroad can, with approval of an adviser, be applied to major requirements. For a list of current programs and requirements, visit their web site, <http://oie.ucsc.edu>. For information on credit applied to a major, contact the appropriate department.

Lower-Division Courses

1A. Intensive Elementary Portuguese. F

Intensive instruction in elementary Portuguese, emphasizing oral proficiency as well as reading and writing skills. Taken together, courses 1A and 1B are equivalent to first-year instruction. Enrollment limited to 25. *The Staff*

1B. Intensive Elementary Portuguese. W

Sequential to course 1A, completes first-year accelerated instruction. Intensive instruction in elementary Portuguese, emphasizing oral proficiency as well as reading and writing skills. Taken together, courses 1A and 1B are equivalent to first-year instruction. Prerequisite(s): course 1A. Enrollment limited to 25. *The Staff*

60A. Advanced Beginning and Intermediate Portuguese. F

This sequence is designed for students with an equivalent of four quarters of college level study of Spanish, French, Italian, or Catalan or for native speakers of these Romance languages (including heritage speakers of Portuguese). Prepares students in all language skills. Prerequisite(s): Spanish 4 or Spanish for Spanish Speakers 61 or French 4 or Italian 4 or Spanish Placement Examination score of 50. *The Staff*

60B. Advanced Beginning and Intermediate Portuguese. W

Sequential to course 60A, completes first-year accelerated instruction of Portuguese for speakers of Spanish and other Romance languages. This sequence is designed for students with an equivalent of four quarters of college level study of Spanish, French, Italian, or Catalan or for native speakers of these Romance languages (including heritage speakers of Portuguese). Prepares students in all language skills. Prerequisite(s): course 60A or placement by examination. (General Education Code(s): IH.) *The Staff*

65A. Intermediate Portuguese. S

A systematic grammar review is combined with literacy and cultural readings, while communicative exercises focus on improving students' ability to understand and hold sustained conversations. Students expand their vocabulary and knowledge of Brazil and other Portuguese-speaking cultures through films, popular music, and other cultural authentic materials. Prerequisite(s): course 1B or 60B, or by instructor approval. (General Education Code(s): CC, IH.) *The Staff*

65B. Intermediate Portuguese. F

Sequential to course 65A, completes second-year accelerated instruction. A systematic grammar review is combined with literacy and cultural readings, while communicative exercises focus on improving students' ability to understand and hold sustained conversations. Students expand their vocabulary and knowledge of Brazil and other Portuguese-speaking cultures through films, popular music, and other cultural authentic materials. Prerequisite(s): course 65A or by instructor approval. (General Education Code(s): CC, IH.) *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. *The Staff*

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. *The Staff*

Upper-Division Courses

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. *The Staff*

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. *The Staff*

Lower-Division Courses**12. The ArtsBridge Experience (2 credits). ***

Weekly meetings on pedagogy in the arts, lesson planning for arts teaching in schools, and submission of teaching portfolio core of this class. Prerequisite(s): permission of instructor; student must be an ArtsBridge scholar. May be repeated for credit. *M. Foley*

14. Jazz Vocal Ensemble (2 credits). *

Study of vocal techniques in the context of ensemble rehearsals, often culminating in public performance. Familiarity with musical notation recommended. Admission by audition. May be repeated for credit. (General Education Code(s): A.) *The Staff*

19. Chicana/Latina Identity (2 credits). *

An exploration of Chicana/Latina identity within the context of developmental theories and heterogenous cultural influences on identity formation, including the acculturation process. Students explore their own identities within the previously stated context. Enrollment limited to 20. *The Staff*

20. Dance/Theater Practicum.

The practice of dance/theater in a particular world area (i.e., Philippines, Mexico, U.S.). Students learn the dance or theater art of one world area and study the associated cultural background. *The Staff*

20A. Filipino Dance Practicum (2 credits). *

Students are introduced to the different folk dances of the Philippine Islands. Folk dances of the tribal mountain region, of the Spanish Era in the Philippines (Maria Clara Era), and dances of the regional and rural countryside are emphasized. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): A.) *W. Manuntag*

20C. Korean Dance Practicum (2 credits). *

Students are introduced to the different dances of Korea related to folk tradition. Movement concepts of music and the relation to culture are explored through demonstration, practice, and performance. Enrollment limited to 15. Offered in alternate academic years. (General Education Code(s): A.) *The Staff*

20D. Dance Improvisation (2 credits). *

Dance practicum emphasizing spontaneous movement in response to diverse media including visual art and music. Special emphasis given to the conceptual approaches taken by American artists such as Merce Cunningham, John Cage, and Robert Rauschenberg. Enrollment limited to 25. (General Education Code(s): A.) *The Staff*

21. Music Practicum.**21A. Korean Music and Culture (2 credits). ****

Introduction to the farmers band tradition. Theory and practice of drumming are emphasized, resulting in a group performance. Enrollment limited to 20. Offered in alternate academic years. (General Education Code(s): A.) *The Staff*

21C. Gospel Choir (2 credits). W,S

Instruction in vocal performance in the tradition of gospel choirs. Music is transmitted aurally rather than by notation. The ensemble prepares a range of traditional and contemporary gospel music for performance. Ensemble performs publicly at least once each quarter. Enrollment limited to 60. May be repeated for credit. (General Education Code(s): PR-C, A.) *V. Fiddmont*

22. Art Practicum (2 credits). W

The practice of art in a particular world area (i.e., Japan, Pacific Islands, U.S.). Explores the art and craft of one world area and studies the associated cultural background. Enrollment restricted to college members. Enrollment limited to 15. (General Education Code(s): A.) *The Staff*

22A. Day of the Dead (2 credits). F

Day of the Dead: Creating an Exhibition—an exploration of art created to celebrate death in Mexican, Chicano, and American culture. Culminates in the creation of a Day of the Dead ceremony and community altar including students' individual art pieces. Enrollment restricted to college members. Enrollment limited to 25. (General Education Code(s): A.) *E. Sanchez*

22F. Vietnamese Festivals (2 credits). *

Vietnamese festivals and the arts they generate, from carving to water puppetry, will be explored for cultural, aesthetic, and iconographic principles, through viewing, discussion and a creative project. Enrollment limited to 20. (General Education Code(s): A.) *The Staff*

22G. Literary Magazine Publishing (3 credits). *

Learn about and practice basics in publishing a national literary magazine with focus on poetry and the arts. Three-part focus: soliciting/editing, design/publishing, and publicizing/distributing. Students decide which poems published and awarded prizes in the "Viz. 25 and Under Awards" section. Audition for admission at first class with demonstrated experience in related field: creative writing, desk top publishing, art, graphic design, business, etc. Enrollment limited to 20. May be repeated for credit. (General Education Code(s): A.) *R. Hamilton*

23. Film/Theater Practicum.

The practice of film/theater from the perspective of a particular culture, genre, or technical approach. *The Staff*

23A. Film Practicum: Talking in Pictures (2 credits). *

Introductory survey of the language of film and television. Considers the roles these media play in the shaping of cultural identity. Creative projects in the conceptual preparation for the making of films and videos. Enrollment limited to 25. (General Education Code(s): A.) *The Staff*

23B. Personal Narratives in Theater and Film (2 credits). *

Considers filmmakers and monologue performers as they come to terms with their identity in autobiographical works. Students write responses to texts and create their own brief personal narratives. Priority given to college members. Others by permission of instructor. Enrollment limited to 25. (General Education Code(s): PR-C, A.) *R. Giges*

23C. Documentary/Mockumentary Films (2 credits). *

The mockumentary grows out of the documentary tradition, but instead of pretending to truthfully capture reality, it blatantly distorts, revealing the subjectivity inherent in cinematic representation. Includes ethnographic, music, political and Hollywood mockumentaries, and critical readings on documentary film. Enrollment limited to 25. (General Education Code(s): A.) *R. Giges*

28. Sound Art (2 credits). S

Several composers and performers of contemporary "art music" discuss the processes by which works are conceived in imagination, transcribed in notation, and realized in sound. After a brief introduction to contemporary music aesthetics, students attend a series of related presentations, seminars, and concerts. Enrollment restricted to college members. Enrollment limited to 18. (General Education Code(s): A.) *The Staff*

32A. Queering the Arts (2 credits). S

Exploration of the arts as a way to understand and experience how queerness has been expressed, repressed, denigrated, and celebrated in visual arts, music, film, poetry, and dance. Enrollment restricted to college members. Enrollment limited to 30. (General Education Code(s): A.) *The Staff*

33. Seminar in Arts (2 credits). W

Theoretical and historical aspects of the arts from one culture or world area are explored through seminar discussion, library research, and film/video presentations. Priority given to college members. Others by permission of instructor. Enrollment limited to 20. (General Education Code(s): A.) *The Staff*

33A. African Global Art and Music (2 credits). *

The theme of "Changing the Global Community Through the Arts" explored in African global art and music through readings, listening sessions, and interactions with academics and performers. Culmination will be the African Global Festival and Symposium in April. Enrollment limited to 25. (General Education Code(s): A.) *E. Cameron*

34B. Fractals, Chaos Theory, and the Arts (2 credits). *

A consideration of chaos theory and fractal geometry as applied by 20th-century artists in all media. All necessary math and computer skills are covered. Students complete essays or art projects. Enrollment restricted to college members. Enrollment limited to 25. (General Education Code(s): PR-C, A.) *R. Abraham*

35. Experiencing Live Performance (2 credits). *

Students' attendance at live regional theater performances informed by artists' talks, class lectures, and readings. Students participate in informal performance workshops and write short critical essays. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): A.) *The Staff*

38. Working in . . . Series.

Writers, directors, technical workers, visual artists, and professionals in a diverse range of media discuss current work, paths that led to their creative endeavors, and constraints to working in the industry. *The Staff*

38B. Working in TV and Film (2 credits). W

Writers, directors, and technical workers in areas of TV and film discuss current work, paths that led to their creative endeavors, and constraints of working in the industry. Students research aspects of film and TV professional work. Cannot be repeated for credit. Priority given to college members. Others by permission of instructor. (General Education Code(s): A.) *L. Steck*

39. Jewish Personal Narratives on Film (2 credits). *

Considers Jewish-American filmmakers as they come to terms with their identity in autobiographical works. Students write responses to texts and create their own brief personal narratives. Enrollment restricted to college members. Enrollment limited to 25. (General Education Code(s): PR-C, A.) *R. Giges*

80A. Introduction to University Discourse: Writing Across the Arts. F

Explores rhetorical principles and conventions of university discourse, providing intensive practice in analytical writing, critical reading, and speaking. Study, discuss, and write about social, political, and aesthetic issues raised by selected works of literature and art in a variety of media. Students cannot receive credit for this course and course 80B. Enrollment restricted to first-year college members who have not satisfied the C1 requirement. (General Education Code(s): T4-Humanities and Arts, C1.) *The Staff*

80B. Rhetoric and Inquiry: Writing Across the Arts. F

Explores the intersections between rhetoric (persuasion) and inquiry (investigation) and hones strategies for effective reading, writing, speaking, and research. Read, discuss, research, and write about social, political, and aesthetic issues raised by selected works of literature and art in a variety of media. Students cannot receive credit for this course and course 80A. Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment restricted to first-year college members. (General Education Code(s): T4-Humanities and Arts, C2.) *The Staff*

80E. Arts Education in the Community. W

Organized in small teams, participants engage with students from public elementary classrooms to develop fully-staged group performance projects by end of term. Students are guided by instructor's models of teaching techniques, designed to stimulate the imagination, and by diverse readings. Priority given to college members. Others by permission of instructor. Enrollment limited to 30. (General Education Code(s): T4-Humanities and Arts, A.) *T. Beal*

80G. Making Poetry: Readings/Writing (2 credits). *

Guest poets read work and discuss their approaches to writing. Students develop their own poems and the class culminates in a poetry reading of student work. Enrollment limited to 25. (General Education Code(s): A.) *The Staff*

80K. Ways of Knowing. W

Creativity in different disciplines is developed via different ways of knowing. Musical, visual, scientific, and spatial literacy demand understanding which is not primarily logocentric. Explores how practitioners of arts and science develop their work and conceptualize its execution. Enrollment restricted to college members. (General Education Code(s): T6-Natural Sciences or Humanities and Arts.) *J. Todd*

80L. Documenting Oral History. *

Students learn basic techniques of interview and camera work to document on film oral histories collected from community elders. Students develop their skills in writing, theater, visual art, music, or film to reinterpret oral histories as artwork. Priority given to college members. Others by permission of instructor. Enrollment limited to 30. (General Education Code(s): T5-Humanities and Arts or Social Sciences, A.) *T. Beal*

80W. Writing Across the Arts. *

Explores the intersections between rhetoric (persuasion) and inquiry (investigation) and hones strategies for effective reading, writing, speaking, and research. Students read, discuss, research, and write about social, political, and aesthetic issues raised by selected works of literature and art in a variety of media. Prerequisite(s): satisfaction of the Entry Level Writing Requirement, and C1 and C2 requirements. Enrollment restricted to college members. Enrollment limited to 22. (General Education Code(s): T4-Humanities and Arts, W.) *The Staff*

83. Pacific Rim Film Festival: Viewing Across Cultures (2 credits). F

Involves viewing Asian and Pacific films at the annual Pacific Rim Film Festival, participating in post-screening discussions with area experts, and writing on the issues of cross-cultural viewing/reading of film. Enrollment restricted to college members. Enrollment limited to 20. May be repeated for credit. (General Education Code(s): A.) *M. Foley*

99. Tutorial.

Various topics to be arranged. Students submit petition to sponsoring agency. *The Staff*

99F. Tutorial (2 credits).

Various topics to be arranged. Students submit petition to sponsoring agency. *The Staff*

Upper-Division Courses

120. Advanced Dance/Theater Practicum (2 credits). *

The practice of dance/theater in a particular world area or culture. Students learn the art of one world area or era and the associated cultural background. Prerequisite(s): audition; prior training in the discipline is required. Enrollment limited to 15. May be repeated for credit. (General Education Code(s): A.) *The Staff*

121. Advanced Music Practicum (2 credits). F

The practice of music in a particular area of the world at an advanced level. Students learn the music of one world area or culture over the quarter and study the associated cultural background. Enrollment limited. May be repeated for credit. (General Education Code(s): A.) *The Staff*

121C. Opera Workshop/Music Practicum (2 credits). F

Rehearsal of the principal vocal parts of an opera in preparation for a full production. Consideration of the dramatic aspects of each role and the interrelationships of the characters. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): A.) *N. Paiement*

126. South Asia Seminar (2 credits). *

South Asian issues in arts, technology, culture, and history will be presented in weekly seminar. Students will attend lectures, read supplementary articles, and write a short paper on a South Asian topic. Enrollment limited to 15. *M. Foley*

141. New Works Research Laboratory. *

Artists from different disciplines (i.e., art and music, design and creative writing, performance art and dance, etc.) collaborate with students to research and create new pieces. Students are involved in phases of the development from the conception to presentation of the work. Enrollment limited to 20. May be repeated for credit. *The Staff*

180. Writing Across the Arts: Pedagogical Practicum. F

Advanced undergraduates selected for this course lead small group sections that explore social, political, and aesthetic issues raised by selected works of art in a variety of media. Participants also tutor first-year students in writing about these arts texts. Apply and interview for this course in the spring. Enrollment limited to 25. (General Education Code(s): IM.) *R. Giges*

194. Group Tutorial.

A program of independent study arranged between a group of students and a faculty instructor. *The Staff*

199F. Tutorial (2 credits).

Individual projects carried out under the supervision of a Porter faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

*Not offered in 2011-12

[Program Description](#) | [Changes to 2010-12 Catalog Highlighted](#) | [Faculty](#) | [Course Descriptions](#)

Program Description

Psychology majors at UCSC are introduced to theory and scientific research in the field. Students begin with lower-division courses that include introductory psychology, pre-statistics, statistics, and introduction to developmental psychology. Majors take a total of nine upper-division courses. These include Psychology 100, Research Methods in Psychology; seven courses in the four areas of psychology—developmental, cognitive, social, and personality psychology; and one upper-division course outside the major from an approved list.

Cognitive psychology focuses on topics such as perception; brain and behavior; motor control; learning and memory; thinking, feeling, and emotions; psycholinguistics; and computational modeling. Our cognitive psychologists extend traditional boundaries in the study of cognition to encompass bodies, physical environments, sociocultural contexts, and information technologies. Social psychology addresses topics such as persuasion and influence, motivation, group processes, intergroup relations, psychology and law, and social justice. Developmental psychology is concerned with processes of cognitive, language, social, emotional, and personality development across the life span. Additionally, both developmental and social psychology are concerned with issues of diversity including ethnicity, culture, gender, income, and family structure. Personality psychology focuses on person-centered processes including creativity, attachment, depression, and life stories.

In addition to the general psychology major, an intensive major and a minor (described below) are also available. The department also administers a major in cognitive science (see separate listing in this catalog under cognitive science). Students primarily interested in clinical and counseling psychology should realize that training in these areas does not occur at the undergraduate level but requires professional training through an advanced degree. UCSC does not offer advanced degrees in clinical psychology or counseling.

Students are encouraged to carry out research projects. Interested psychology majors will find research opportunities in courses, as research assistants in faculty members' research programs, or through faculty-sponsored independent study. This research may be carried out in specialized research laboratories or in the field. Students usually join an ongoing project in which a faculty member is engaged. Students who are especially interested in a career involving empirical research should become involved in a professor's ongoing research by their junior year. Some recent research topics include "Making Decisions," "How Do You Organize Your World?" "I'm Every Woman: A Look at Female Perspectives," "Family Story Telling," and "Friendship and the College Transition."

Preparation for the Major

Students interested in pursuing the psychology major should complete Psychology 1, 2, and the pre-statistics mathematics requirement. Psychology 1 and 2 should be taken for a letter grade. After completing these three lower-division required courses, students may then petition to declare the psychology major subject to the grade-point average requirement described in the Major Admission Requirements section below.

High school students considering psychology as their university major find that the best preparation is a solid general education in English, mathematics through precalculus, natural sciences, social sciences, and writing.

Transfer Students

Junior transfer students should express an interest in psychology on their UCSC application for admission.

It is expected that prospective transfer students will have completed most, if not all, of the lower-division requirements. The psychology faculty recommends that all lower-division requirements be completed by the end of the sophomore year. In order to declare the major, transfer students

must meet the grade-point-average requirement described in the Major Admission Requirements section below.

Students who want to fulfill requirements with courses taken at other colleges must petition for the substitution of their transfer courses at an orientation session or at an appointment with the department adviser. Psychology 100, *Research Methods in Psychology*, must be taken at UCSC. Students planning to transfer to UCSC should check with the advising office of their present college, or refer to www.assist.org.

Transfer students are strongly encouraged to speak with an academic adviser at the Psychology Department office prior to enrolling in classes in order to determine their status and begin the actual declaration of major process.

General Psychology Major

Thirteen courses are required for the general major: four lower-division courses in preparation for the major and nine upper-division courses. The lower-division courses are prerequisites for virtually all of the upper-division courses and should be completed as early as possible, or by the end of the sophomore year. Some upper-division courses have additional prerequisites.

Lower-Division Requirements

Psychology

1 *Introduction to Psychology* (or equivalent)

2 *Introduction to Psychological Statistics* (or equivalent, including Applied Mathematics and Statistics 5 or 7/L)

10 *Introduction to Developmental Psychology*

Applied Mathematics and Statistics 2, *Pre-Statistics* (or equivalent, including Applied Mathematics and Statistics 2 or 3 or Mathematics 3 or 4 or 11A)

Psychology 20, 40, and 60 are strongly recommended.

Upper-Division Requirements

Students must complete at least nine upper-division courses (a minimum of 47 credits), including appropriate substitutions noted below. The courses include Psychology 100, *Research Methods in Psychology*; two courses from each of any three of the following subfields, one course from the remaining subfield; and one course from outside the major.

Psychology 100, *Research Methods in Psychology*

Developmental (courses numbered 102-119)

Cognitive (courses numbered 120-139)

Social (courses numbered 140-159)

Personality (courses numbered 160-179)

Upper-division courses and their catalog descriptions are grouped within each of the subfields. At least one upper-division seminar course must be completed; these courses are identified within their catalog description by the phrase "satisfies seminar requirement." No more than two psychology courses numbered 193, 194, and 195 may be used toward the upper-division requirements; however, these 190 series courses cannot be substituted for 102-179 courses in the same subfield as each other, or in a subfield in which the student has not taken a course in the 102-179 series. The ninth upper-division requirement must be a five-unit UCSC course outside of psychology chosen from a list of courses approved by the subfield in which students may have taken only one upper-division course. If students have taken two upper-division psychology courses in each of the four subfields, their required outside course can be chosen from a list approved by any of the four subfields. These lists of approved non-psychology courses are posted on the Psychology Department web site. At least seven of the nine courses must be taken through the psychology program at UCSC, not transferred from elsewhere; this requirement occasionally affects the plans of transfer students arriving at UCSC with many psychology courses on their transcript. An exception will be made so that students can receive credit for up to three preapproved EAP courses toward their upper-division major requirements. Students requesting this exception would be required to take at least six of their nine upper-division courses through the psychology program at UCSC. After all substitutions have been made, students must satisfy the fundamental requirement that they take at least one upper-division UCSC psychology course from each of the four subfields.

The Psychology Department recommends that students take substantive courses in related disciplines such as anthropology, biology, community studies, computer science, education, linguistics, philosophy, and sociology.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC)

requirement. The DC requirement in psychology is satisfied by completing Psychology 100, Research Methods in Psychology, and a seminar. Seminar courses are designated in the campus catalog with the text "satisfies seminar requirement."

Program Planning Notes

Because some upper-division courses have additional prerequisites, students should read the descriptions of the upper-division courses carefully, noting the prerequisites for courses of interest to them.

Psychology Major Planners

Following are two recommended academic plans for students to complete during their first two years as preparation for the psychology major. Plan One is a suggested guideline for students who are committed to the major early in their academic career. Plan Two is for students who are considering the major or who need more preparation. Students should note that Applied Mathematics and Statistics 2 is a requirement for the major and a prerequisite for Psychology 2 and Psychology 100. Courses 20, 40, and 60 are recommended electives and are prerequisites for some upper-division psychology courses.

Plan One

Year	Fall	Winter	Spring
1st (frsh)	AMS 2	PSYC 2	PSYC 10
	PSYC 1	PSYC 40 (recommended)	PSYC 60 (recommended)
2nd (soph)	PSYC 100	(Begin upper-division coursework)	
	PSYC 20 (recommended)		

Plan Two

Year	Fall	Winter	Spring
1st (frsh)	MATH 2		PSYC 1
2nd (soph)	PSYC 40	PSYC 2	PSYC 10
	AMS 2		PSYC 60
3rd (jr)	PSYC 100	(Begin upper-division coursework)	

The Intensive Psychology Major

The intensive major is an option that any psychology major may choose to undertake. The intensive major would be advantageous for a student intending to go on to a graduate program in any area of psychology. Students intending to take the intensive major should declare this on their proposed study plan during the junior year, outlining their plan for completing the requirements. The intensive major requires 18 courses.

Requirements for the Intensive Major

Lower-Division Requirements

Psychology 1 *Introduction to Psychology* (or equivalent)

Psychology 2 *Introduction to Psychological Statistics* (or equivalent, including Applied Mathematics and Statistics 5 or 7/L)

Psychology 10 *Introduction to Developmental Psychology*

Applied Mathematics and Statistics 2 *Pre-Statistics* (or equivalent, including Applied Mathematics and Statistics 3, or Mathematics 3 or 4 or 11/A)

Upper-Division Requirements

Fourteen upper-division courses are required for the intensive major. These courses must include Psychology 100 and two courses from each of the following four subfields, one of which must be a seminar:

Developmental (courses numbered 102–119)

Cognitive (courses numbered 120–139)

Social (courses numbered 140–159)

Personality (courses numbered 160–179)

Psychology 181, Psychological Data Analysis, Psychology 182, Advanced Research Methods, or an equivalent course approved by the department

Two quarters of Psychology 194, Advanced Research or 195, Senior Thesis

Two upper-division courses from one or more related areas outside of psychology from lists of courses pre-approved by the Psychology Department and posted on the department's web site, <http://psych.ucsc.edu>. These two courses will not count toward the nine upper-division requirements listed above. (These courses may not include psychology courses cross-listed with other programs or taught by psychology faculty.) These courses also cannot be counted twice in cases of double majors or minors.

Cognitive Science Major

The Psychology Department is the administrative home for the cognitive science major. Requirements for the cognitive science major may be reviewed under its separate entry in this catalog.

Minor in Psychology

To obtain a minor in psychology, a student must complete the following courses:

- Psychology 1 (or equivalent), 2 (or equivalent), and 10
- Applied Mathematics and Statistics 2 (or equivalent)
- six (32 units) upper-division courses in psychology. These courses must include Psychology 100 and at least two of the four subfields: developmental, cognitive, social, and personality.

Once Psychology 1, 2, and mathematics required lower-division courses have been completed, a student may petition to declare the minor in psychology.

No more than one psychology course numbered 191–199 may be used toward the upper-division requirements. At least three of the upper-division psychology courses (102–199 range) must be taken through the psychology program at UCSC, not transferred from elsewhere; this requirement occasionally affects the plans of transfer students arriving at UCSC with many psychology courses on their transcript.

Major and Minor Admission Requirements

Students may petition to declare the psychology major or the psychology minor once they have completed three lower-division courses: the pre-statistics mathematics requirement, Psychology 1, and Psychology 2 (or Applied Mathematics and Statistics 7/L). To be admitted to the major or minor, students must demonstrate the attainment of foundational skills by receiving a grade of at least B- (2.7) in (a) Psychology 1 and (b) Psychology 2 or Applied Mathematics and Statistics 5 or 7/L. Students who pass these courses but do not achieve the required level of proficiency (i.e., who receive a grade of C, C+, or P) have alternative means of demonstrating foundational skills by: (a) completing Psychology 10 with a grade of B- or higher (if the student did not receive a B- or higher in Psychology 2); (b) completing Applied Mathematics and Statistics 5 or 7/L with a grade of B- or higher (if the student did not receive a B- or higher in Psychology 2; or (c) completing Psychology 2 with a grade of B- or higher if the student did not receive a grade of B- or higher in Applied Mathematics and Statistics 5 or 7/L).

Every student who satisfies the major admission requirements and who petitions to declare the major by the major declaration deadline will be admitted to the major. Students who satisfy the major admission requirements but who petition to declare the major after the major declaration deadline will be considered on a case-by-case basis for admission to the major; admission is not guaranteed. Students who did not satisfy the major admission requirements but believe that there are extenuating circumstances concerning their performance in the foundational courses may file a written appeal describing these circumstances; however, such appeals are rarely granted.

Comprehensive Requirement

UCSC requires that every student satisfy a senior exit/comprehensive requirement prior to graduation. Psychology students will satisfy this requirement by receiving a passing grade in one of our seminars. Passing a seminar course is also required for the major. Courses that meet this requirement are designated as seminars in the campus catalog as "satisfies seminar requirement."

Academic Advising

Students are encouraged to approach faculty in their area of interest for further advising no later than the first quarter of their junior year to discuss an upper-division program of study and to plan for graduate training in psychology. As a supplement to academic advising offered by faculty members, the Psychology Department has an advising office located at 273 Social Sciences 2 Building, (831) 459-2002. The adviser assists students in obtaining information regarding major requirements and petitions, course planning, substitution of transfer courses for advance enrollment, careers, and graduate schools. Students can also get advice about the Graduate Record Examination and assistance in initiating a senior thesis and independent studies. Students

are encouraged to take advantage of the advising office throughout their college career.

Senior Thesis

Students with adequate substantive and methodological preparation and a consistent record of strong academic performance may be eligible to apply to write a senior thesis. Students should initiate plans for a thesis no later than the first quarter of their senior year. Most faculty prefer to sponsor senior theses that are integrated with faculty research, so students are encouraged to talk with faculty before choosing a senior thesis topic. Information and applications are available in the department office, 273 Social Sciences 2.

Honors

Honors in the psychology major are awarded to graduating seniors whose academic performance is judged to be consistently excellent by a committee of psychology faculty. Highest honors in the major are reserved for students with consistently excellent academic performance and an honors-level senior thesis.

Psychology Field-Study Program

The Psychology Field-Study Program provides qualified students an opportunity to apply classroom learning to direct experience in a community agency. Each year about 200 students develop new skills and clarify personal and professional goals by working as interns in schools, corporations, law enforcement agencies, research organizations, mental health services, and other social service agencies where they are supervised by professionals. Psychology faculty members sponsor the students' field study helping them to integrate their field experience with course work and guiding them in related academic projects.

The two-quarter program is open to junior and senior psychology majors who must apply at least one quarter in advance. There are information meetings and individual meetings to help students develop a learning plan, select a placement, and choose an academic project. Application information is included in the information meetings.

Graduate Program

The psychology program offers three areas of specialization leading to the doctoral degree: cognitive, developmental, and social psychology. The program does not offer courses, training, or supervision in clinical psychology. The program prepares students for research, teaching, and administrative positions in colleges and universities as well as for positions in schools, government, and other public and private institutions. Each student is primarily associated with one of the three research areas and participates in the courses and research forums sponsored by the faculty in that area. The program requires full-time enrollment as a graduate student. Although applicants for a master's degree are not accepted, students in the doctor of philosophy (Ph.D.) program may obtain a master of science (M.S.) degree by fulfilling specific requirements.

Graduate training in cognitive psychology emphasizes experimental methods and approaches from cognitive science. Faculty have specific expertise in psycholinguistics, memory, and perception. Research interests of the cognitive psychologists in our program extend traditional boundaries in the study of cognition to encompass bodies, physical environment, sociocultural contexts, and information technologies.

Graduate work in developmental psychology addresses the integration of individual, interpersonal, and cultural processes of development. Our faculty study these developmental processes in diverse communities and institutions, including families, peer groups, schools, museums, and close relationships. We use a mixture of quantitative and qualitative methods. This integrative training has enjoyed the support of the National Institutes of Health (NIH) training grant that provides funding for graduate students and post-doctoral trainees. Some research interests of the faculty include: learning by observing, overhearing, and participating; infants' and children's cognitive and language development; conversation, narrative, and memory sharing; academic achievement and career aspirations; family/peer/school links; gender development and discrimination; development of personal and social identities; intergroup relations; ethnicity, culture, and development; social policy and educational practice.

The social psychology graduate program at UCSC has a unique mission and focus. We use Kurt Lewin's model of "full-cycle" (theory-application-action) social psychology to study a broad range of topics related to social justice. Our students learn to apply psychological theories and data to the analysis and solution of a wide range of social problems. Knowledge gained in action-oriented research leads, in turn, to the development of new theory. We examine justice-related issues in different cultural, political, and policy contexts, through a variety of research methods. Our students are trained in laboratory, field, and survey methods; they are encouraged to attend to issues of race, class, sexuality, ethnicity, gender, and physical ableness; and, in addition to traditional social psychological approaches, are steeped in critical theoretical perspectives such as feminist theory. Our graduates go on to successful careers in academia as well as in community, government, and non-profit settings. Our approach to research and training, combined with the quality and competencies of our faculty, make our program among the nation's best for the psychological study of social justice issues. Current faculty research interests include educational access, sexuality, poverty and economic justice, psychology and law, aggression and trauma, peace psychology, intergroup relations, social identity, social policy analysis, structural inequality, intersectionality, political psychology, institutional analysis, and feminisms.

Students in all three research areas acquire teaching experience as teaching assistants for a minimum of two courses during their graduate career.

Graduate students in psychology may obtain a designated emphasis the psychology Ph.D. diploma indicating that they have specialized in feminist studies and/or Latino American and Latino Studies (LALS) if they meet requirements spelled out by a committee composed of psychology and feminist studies faculty, or psychology and LALS faculty.

Details on the policies for admission to graduate standing and requirements for the Ph.D. degree, as well as the online application can be found on the Division of Graduate Studies web site. The department's graduate program brochure, and faculty research are available on the department web site.

Students enrolled in the psychology graduate program will complete a first-year and second-year research project. All graduate students must enroll and participate in the colloquium series each quarter (Psychology 230 for cognitive, Psychology 242 for developmental, and Psychology 231 for social.) First-year students must take two courses in statistics (Psychology 204 and Psychology 214A) and a two-quarter proseminar sequence during fall and winter quarters. (Psychology 224A and 224B for cognitive, Psychology 244A and 244B for developmental, and Psychology 211A and 211B for social.) Students are also required to serve as a teaching assistant for at least two courses during their graduate career (one of which must be Psychology 10 for developmental and Psychology 40 for social).

Additional requirements for the cognitive area include: three advanced cognitive graduate courses, a graduate course in developmental psychology, a graduate course in social psychology, and a substantive advanced course in a discipline other than psychology.

Additional requirements for the developmental area include: Psychology 225A, Psychology 225B, Psychology 246, one other advanced developmental graduate seminar course, a graduate course in cognitive psychology, a graduate course in social psychology, and a substantive advanced course in a discipline other than psychology. Developmental graduate students are also required to complete a professional practicum between the end of their second year and end of their third year.

Additional requirements for the social area include: Psychology 210, Psychology 248, Psychology 249, or Psychology 261, one other advanced social graduate seminar, a graduate course in cognitive psychology, a graduate course in developmental psychology, and a substantive advanced course in a discipline other than psychology.

After satisfying the formal course and research requirements, psychology graduate students must take an oral examination to qualify as a candidate for the Ph.D., usually by the end of their third year. The qualifying examination is intended to assess a student's knowledge of psychology and competence to conduct the dissertation research. For the qualifying examination, students write a major paper that reflects a conceptual analysis of their main research area, prepare a list of readings representative of their expertise in three areas of psychology, and satisfactorily complete an oral qualifying examination.

Within two quarters of advancing to candidacy, students will prepare a written dissertation proposal that should demonstrate the student's in-depth knowledge of some research topic, along with a detailed outline of the empirical research to be conducted for the dissertation. The student's dissertation committee reviews the proposal, and the student will orally defend the proposal for approval by the committee. After the final draft of the dissertation has been completed and submitted to the faculty committee members, students must defend their thesis in an oral exam.

The Ph.D. degree is awarded upon successful completion and submission of the dissertation.

Psychology

273 Social Sciences 2 Building

(831) 459-2002

<http://psych.ucsc.edu>**Program Description**

Psychology majors at UCSC are introduced to theory and scientific research in the field. Students begin with lower-division courses that include introductory psychology, ~~precalculus~~ [pre-statistics](#), statistics, and introduction to developmental psychology. Majors take a total of nine upper-division courses. These include Psychology 100, *Research Methods in Psychology*; seven courses in the four areas of psychology—developmental, cognitive, social, and personality psychology; and one upper-division course outside the major from an approved list.

Cognitive psychology focuses on topics such as perception; brain and behavior; motor control; learning and memory; thinking, feeling, and emotions; psycholinguistics; and computational modeling. Our cognitive psychologists extend traditional boundaries in the study of cognition to encompass bodies, physical environments, sociocultural contexts, and information technologies. Social psychology addresses topics such as persuasion and influence, motivation, group processes, intergroup relations, psychology and law, and social justice. Developmental psychology is concerned with processes of cognitive, language, social, emotional, and personality development across the life span. Additionally, both developmental and social psychology are concerned with issues of diversity including ethnicity, culture, gender, income, and family structure. Personality psychology focuses on person-centered processes including creativity, attachment, depression, and life stories.

In addition to the general psychology major, an intensive major and a minor (described below) are also available. [The department also administers a major in cognitive science \(see separate listing in this catalog under cognitive science\).](#) ←Students primarily interested in clinical and counseling psychology should realize that training in these areas does not occur at the undergraduate level but requires professional training through an advanced degree. UCSC does not offer advanced degrees in clinical psychology or counseling. →

Students are encouraged to carry out research projects. Interested psychology majors will find research opportunities in courses, as research assistants in faculty members' research programs, or through faculty-sponsored independent study. This research may be carried out in specialized research laboratories or in the field. Students usually join an ongoing project in which a faculty member is engaged. Students who are especially interested in a career involving empirical research should become involved in a professor's ongoing research by their junior year. Some recent research topics include "Making Decisions," "How Do You Organize Your World?" "I'm Every Woman: A Look at Female Perspectives," "Family Story Telling," and "Friendship and the College Transition."

Preparation for the Major

Students interested in pursuing the psychology major should complete Psychology 1, 2, and the ~~precalculus-pre-statistics~~ mathematics requirement. ~~After completing these three lower-division required courses, students may then declare the psychology major.~~ Psychology 1 and 2 should be taken for a letter grade. After completing these three lower-division required courses, students may then petition to declare the psychology major subject to the grade-point average requirement described in the Major Admission Requirements section below.

High school students considering psychology as their university major find that the best preparation is a solid general education in English, mathematics through precalculus, natural sciences, social sciences, and writing.

Transfer Students

Junior transfer students should express an interest in psychology on their UCSC application for admission.

It is expected that prospective transfer students will have completed most, if not all, of the lower-division requirements. The psychology faculty recommends that all lower-division requirements be completed by the end of the sophomore year. In order to declare the major, transfer students must meet the grade-point-average requirement described in the Major Admission Requirements section below.

~~Several measures are taken to control over enrollment in the psychology major. At the time of transfer, students must have a 3.0 or higher grade point average in all UC-transferable course work, with at least a 3.1 in all psychology courses. Junior-level students with 120+ quarter credits will not be admitted into the pre-major. This occasionally affects transfer students who have many credits on their records. It can also affect students who want to change their major in mid-junior year. Senior-level students with 135+ quarter credits will not be admitted into the major. This affects seniors who want to add a minor or double major in psychology; (it does not affect those who have already declared a pre-psychology major).~~ Students who want to fulfill requirements with courses taken at other colleges must petition for the substitution of their transfer courses at an orientation session or at an appointment with the department adviser. Psychology 100, Research Methods in Psychology, must be taken at UCSC. Students planning to transfer to UCSC should check with the advising office of their present college, or refer to www.assist.org.

Transfer students are strongly encouraged to speak with an academic adviser at the Psychology Department office prior to enrolling in classes in order to determine their status and begin the actual declaration of major process.

General Psychology Major

Thirteen courses are required for the general major: four lower-division courses in preparation for the major and nine upper-division courses. The lower-division courses are prerequisites for virtually all of the upper-division courses and should be completed as early as possible, or by the end of the sophomore year. Some upper-division courses have additional prerequisites. ~~Once Psychology 1, 2, and mathematics required lower-division courses have been completed, a student may petition to declare the psychology major.~~

Lower-Division Requirements

Psychology

- 1 *Introduction to Psychology* (or equivalent)
- 2 *Introduction to Psychological Statistics* (or equivalent ~~1~~, including Applied Mathematics and Statistics 5 or 7/L)

~~Mathematics 3-Precalculus~~ Applied Mathematics and Statistics 2, Pre-Statistics (or equivalent, including Applied Mathematics and Statistics 2 or 3 or Mathematics 3 or 4 or 11A)

Psychology 20, 40, and 60 are strongly recommended.

Upper-Division Requirements

Students must complete at least nine upper-division courses (a minimum of 47 credits), including appropriate substitutions noted below. The courses include Psychology 100, *Research Methods in Psychology*; two courses from each of any three of the following subfields, one course from the remaining subfield; and one course from outside the major.

Psychology 100, Research Methods in Psychology

Developmental (courses numbered 102~~4~~-119)

Cognitive (courses numbered 120-139)

Social (courses numbered 140-159)

Personality (courses numbered 160-179)

Upper-division courses and their catalog descriptions are grouped within each of the subfields. At least one upper-division seminar course must be completed; these courses are identified within their catalog description by the phrase "satisfies seminar requirement." No more than two psychology courses numbered 193, 194, and 195 may be used toward the upper-division requirements; however, these 190 series courses cannot be substituted for ~~101-102~~ 102-179 courses in the same subfield as each other, or in a subfield in which the student has not taken a course in the ~~101-102~~ 102-179 series. The ninth upper-division requirement must be a five-unit UCSC course outside of psychology chosen from a list of courses approved by the subfield in which students may have taken only one upper-division course. If students have taken two upper-division psychology courses in each of the four subfields, their required outside course can be chosen from a list approved by any of the four subfields. These lists of approved non-psychology courses are posted on the Psychology Department web site. At least seven of the nine courses must be taken through the psychology program at UCSC, not transferred from elsewhere; this requirement occasionally affects the plans of transfer students arriving at UCSC with many psychology courses on their transcript. An exception will be made so that students can receive credit for up to three preapproved EAP courses toward their upper-division major requirements. Students requesting this exception would be required to take at least six of their nine upper-division courses through the psychology program at UCSC. After all substitutions have been made, students must satisfy the fundamental requirement that they take at least one upper-division UCSC psychology course from each of the four subfields.

The Psychology Department recommends that students take substantive courses in related disciplines such as anthropology, biology, community studies, computer science, education, linguistics, philosophy, and sociology.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in psychology is satisfied by completing Psychology 100, *Research Methods in Psychology*, and ~~one of the following psychology courses: 110, 119E, 119F, 119H, 119M, 139G, 139H, 140G, or 159H.~~ a seminar. Seminar courses are designated in the campus catalog with the text "satisfies seminar requirement."

Program Planning Notes

Because some upper-division courses have additional prerequisites, students should read the descriptions of the upper-division courses carefully, noting the prerequisites for courses of interest to them.

Psychology Major Planners

Following are two recommended academic plans for students to complete during their first two years as preparation for the psychology major. Plan One is a suggested guideline for students who are committed to the major early in their academic career. Plan Two is for students who are considering the major or who need more preparation. Students should note that ~~Mathematics 3~~ Applied Mathematics and Statistics 2 is a requirement for the major and a prerequisite for Psychology 2 and Psychology 100. Courses 20, 40, and 60 are recommended electives and are prerequisites for some upper-division psychology courses.

Plan One			
Year	Fall	Winter	Spring
1st (frsh)	MATH 3 <u>AMS 2</u>	PSYC 2	PSYC 10
	PSYC 1	<u>PSYC 40</u> (recommended)	<u>PSYC 60</u> (recommended)
2nd (soph)	PSYC 100	PSYC 40 (recommended) <u>(Begin upper-division coursework)</u>	PSYC 60 (recommended)
	<u>PSYC 20</u> (recommended)	(Begin upper-division coursework)	

Plan Two			
Year	Fall	Winter	Spring
1st (frsh)	MATH 3 <u>2</u>	PSYC 1 (recommended)	PSYC 1 (recommended)
2nd (soph)	PSYC 40	PSYC 2	PSYC 10 0
	<u>AMS 2</u>		PSYC 60
<u>3rd</u> (jr)	<u>PSYC 100</u>	<u>(Begin upper-division coursework)</u>	

The Intensive Psychology Major

The intensive major is an option that any psychology major may choose to undertake. The intensive major would be advantageous for a student intending to go on to a graduate program in any area of psychology. Students intending to take the intensive major should declare this on their proposed study plan during the junior year, outlining their plan for completing the requirements. The intensive major requires 18 courses.

Requirements for the Intensive Major

Lower-Division Requirements

Psychology 1 *Introduction to Psychology* (or equivalent)

Psychology 2 *Introduction to Psychological Statistics* (or equivalent, including Applied Mathematics and Statistics 5 or 7/L)

Psychology 10 *Introduction to Developmental Psychology*

~~Mathematics 3–Precalculus~~ Applied Mathematics and Statistics 2 Pre-Statistics (or equivalent, including Applied Mathematics and Statistics 3, or Mathematics 3 or 4 or 11/A)

~~Once Psychology 1, 2, and mathematics required lower-division courses have been completed, a student may petition to declare the psychology major.~~

Upper-Division Requirements

Fourteen upper-division courses are required for the intensive major. These courses must include Psychology 100 and two courses from each of the following four subfields, one of which must be a seminar:

Developmental (courses numbered 102~~1~~–119)

Cognitive (courses numbered 120–139)

Social (courses numbered 140–159)

Personality (courses numbered 160–179)

Psychology 181, Psychological Data Analysis, Psychology 182, Advanced Research Methods, or an equivalent course approved by the department

Two quarters of Psychology 194, Advanced Research or 195, Senior Thesis

Two upper-division courses from one or more related areas outside of psychology from lists of courses pre-approved by the Psychology Department and posted on the department's web site, <http://psych.ucsc.edu>. These two courses will not count toward the nine upper-division requirements listed above. (These courses may not include psychology courses cross-listed with other programs or taught by psychology faculty.) These courses also cannot be counted twice in cases of double majors or minors.

Cognitive Science Major

The Psychology Department is the administrative home for the cognitive science major. Requirements for the cognitive science major may be reviewed under its separate entry in this catalog.

Minor in Psychology

To obtain a minor in psychology, a student must complete the following courses:

- Psychology 1 (or equivalent), 2 (or equivalent), and 10
- ~~Mathematics 3~~ Applied Mathematics and Statistics 2 (or equivalent)
- six (32 units) upper-division courses in psychology. These courses must ~~be~~ include Psychology 100 and at least two of the four subfields: developmental, cognitive, social, and personality.

Once Psychology 1, 2, and mathematics required lower-division courses have been completed, a student may petition to declare the minor in psychology.

No more than one psychology course numbered 191–199 may be used toward the upper-division requirements. At least three of the upper-division psychology courses (~~101~~ 102–199 range) must be taken through the psychology program at UCSC, not transferred from elsewhere; this requirement occasionally affects the plans of transfer students arriving at UCSC with many psychology courses on their transcript.

Major and Minor Admission Requirements

Students may petition to declare the psychology major or the psychology minor once they have completed three lower-division courses: the pre-statistics mathematics requirement, Psychology 1, and Psychology 2 (or Applied Mathematics and Statistics 7/L). To be admitted to the major or minor, students must demonstrate the attainment of foundational skills by receiving a grade of at least B- (2.7) in (a) Psychology 1 and (b) Psychology 2 or Applied Mathematics and Statistics 5 or 7/L. Students who pass these courses but do not achieve the required level of proficiency (i.e., who receive a grade of C, C+, or P) have alternative means of demonstrating foundational skills by: (a) completing Psychology 10 with a grade of B- or higher (if the student did not receive a B- or higher in Psychology 2); (b) completing Applied Mathematics and Statistics 5 or 7/L with a grade of B- or higher (if the student did not receive a B- or higher in Psychology 2; or (c) completing Psychology 2 with a grade of B- or higher if the student did not receive a grade of B- or higher in Applied Mathematics and Statistics 5 or 7/L).

Every student who satisfies the major admission requirements and who petitions to declare the major by the major declaration deadline will be admitted to the major. Students who satisfy the major admission requirements but who petition to declare the major after the major declaration deadline will be considered on a case-by-case basis for admission to the major; admission is not guaranteed. Students who did not satisfy the major admission requirements but believe that there are extenuating circumstances concerning their performance in the foundational courses may file a written appeal describing these circumstances; however, such appeals are rarely granted.

Comprehensive Requirement

UCSC requires that every student satisfy a senior exit/comprehensive requirement prior to graduation. Psychology students will satisfy this requirement by receiving a passing grade in one of our seminars. Passing a seminar course is also required for the major. Courses that meet this requirement are designated as seminars in the campus catalog as “satisfies seminar requirement.”

Academic Advising

Students are encouraged to approach faculty in their area of interest for further advising no later than the first quarter of their junior year to discuss an upper-division program of study and to plan for graduate training in psychology. As a supplement to academic advising offered by faculty members, the Psychology Department has an advising office located at 273 Social Sciences 2 Building, (831) 459-2002. The adviser assists students in obtaining information regarding major requirements and petitions, course planning, substitution of transfer courses for advance enrollment, careers, and graduate schools.

Students can also get advice about the Graduate Record Examination and assistance in initiating a senior thesis and independent studies. Students are encouraged to take advantage of the advising office throughout their college career.

~~Disqualification from the Major/Minor~~

~~Students who receive a No Pass, D, and/or F twice in any one of courses Psychology 1, 2, 10, or Mathematics 3 (or equivalent), or who receive a No Pass, D, and/or F in three or more of these courses combined, will be considered to be not making normal progress in the major or minor and will be subject to disqualification from the major or minor.~~

~~Students who feel that there were extenuating circumstances surrounding their failure of a course for the second time or their failure in three courses may appeal their disqualification from the major or minor and/or later petition the department for reinstatement. For further information regarding the disqualification process, contact the Psychology Department office.~~

Senior Thesis

Students with adequate substantive and methodological preparation and a consistent record of strong academic performance may be eligible to apply to write a senior thesis. Students should initiate plans for a thesis no later than the first quarter of their senior year. Most faculty prefer to sponsor senior theses that are integrated with faculty research, so students are encouraged to talk with faculty before choosing a senior thesis topic. Information and applications are available in the department office, 273 Social Sciences 2.

Honors

Honors in the psychology major are awarded to graduating seniors whose academic performance is judged to be consistently excellent by a committee of psychology faculty. Highest honors in the major are reserved for students with consistently excellent academic performance and an honors-level senior thesis.

Psychology Field-Study Program

The Psychology Field-Study Program provides qualified students an opportunity to apply classroom learning to direct experience in a community agency. Each year about 200 students develop new skills and clarify personal and professional goals by working as interns in schools, corporations, law enforcement agencies, research organizations, mental health services, and other social service agencies where they are supervised by professionals. Psychology faculty members sponsor the students' field study helping them to integrate their field experience with course work and guiding them in related academic projects.

The two-quarter program is open to junior and senior psychology majors who must apply at least one quarter in advance. There are information meetings and individual meetings to help students develop a learning plan, select a placement, and choose an academic project. Application information is included in the information meetings.

Graduate Program

The psychology program offers three areas of specialization leading to the doctoral degree: cognitive, developmental, and social psychology. The program does not offer courses, training, or supervision in clinical psychology. The program prepares students for research, teaching, and administrative positions in colleges and universities as well as for positions in schools, government, and other public and private institutions. Each student is primarily associated with one of the three research areas and participates in the courses and research forums sponsored by the faculty in that area. The program requires full-time enrollment as a graduate student. Although applicants for a master's degree are not

accepted, students in the doctor of philosophy (Ph.D.) program may obtain a master of science (M.S.) degree by fulfilling specific requirements.

~~Graduate work in cognitive psychology trains students in the traditional methods of experimental psychology while mastering contemporary knowledge of cognitive psychology. The cognitive faculty have specific expertise in psycholinguistics, memory, and perception. Research interests of the faculty include human information processing, cognitive and social processes in learning and memory, language and discourse comprehension, reading, speech perception and production, computer simulation and mathematical modeling of cognitive processes, spatial vision, and visual psychophysics.~~ Graduate training in cognitive psychology emphasizes experimental methods and approaches from cognitive science. Faculty have specific expertise in psycholinguistics, memory, and perception. Research interests of the cognitive psychologists in our program extend traditional boundaries in the study of cognition to encompass bodies, physical environment, sociocultural contexts, and information technologies.

Graduate work in developmental psychology ~~is concerned with~~ addresses the integration of individual, interpersonal, and cultural processes of development. Our faculty study these developmental processes in diverse communities and institutions, including families, peer groups, schools, museums, and close relationships. We use a mixture of quantitative and qualitative methods. This integrative training ~~is supported by a~~ has enjoyed the support of the National Institutes of Health (NIH) training grant that provides funding for graduate students and post-doctoral trainees. Some research interests of the faculty include: learning by observing, overhearing, and participating; infants' and children's cognitive and language development; conversation, narrative, and memory sharing; academic achievement and career aspirations; family/peer/school links; gender development and discrimination; ~~personality development;~~ of personal and social identities; intergroup relations; ethnicity, culture, and development; social policy and educational practice.

The social psychology graduate program at UCSC has a unique mission and focus. We use Kurt Lewin's model of "full-cycle" (theory-application-action) social psychology to study a broad range of topics related to social justice. Our students learn to apply psychological theories and data to the analysis and solution of a wide range of social problems. Knowledge gained in action-oriented research leads, in turn, to the development of new theory. We examine justice-related issues in different cultural, political, and policy contexts, through a variety of research methods. Our students are trained in laboratory, field, and survey methods; they are encouraged to attend to issues of race, class, sexuality, ethnicity, gender, and physical ableness; and, in addition to traditional social psychological approaches, are steeped in critical theoretical perspectives such as feminist theory. Our graduates go on to successful careers in academia as well as in community, government, and non-profit settings. Our approach to research and training, combined with the quality and competencies of our faculty, make our program among the nation's best for the psychological study of social justice issues. Current faculty research interests include educational access, sexuality, poverty and economic justice, psychology and law, aggression and trauma, peace psychology, intergroup relations, social identity, social policy analysis, structural inequality, intersectionality, political psychology, institutional analysis, and feminisms.

Students in all three research areas acquire teaching experience as teaching assistants for a minimum of two courses during their graduate career.

Graduate students in psychology may obtain a ~~notation on~~ designated emphasis the psychology Ph.D. diploma indicating that they have specialized in feminist studies and/or Latino American and Latino Studies (LALS) if they meet requirements spelled out by a committee composed of psychology and feminist studies faculty, or psychology and LALS

faculty.

Details on the policies for admission to graduate standing and requirements for the Ph.D. degree, as well as the online application can be found on the Division of Graduate Studies web site. The department's graduate program brochure, and faculty research are available on the department web site.

Students enrolled in the psychology graduate program will complete a first-year and second-year research project. All graduate students must enroll and participate in the colloquium series each quarter (Psychology 230 for cognitive, Psychology 242 for developmental, and Psychology 231 for social.) First-year students must take two courses in statistics (Psychology 204 and Psychology 214A) and a two-quarter proseminar sequence during fall and winter quarters. (Psychology 224A and 224B for cognitive, Psychology 244A and 244B for developmental, and Psychology 211A and 211B for social.) ~~Each student~~ Students are also required to serve as a teaching assistant for at least two courses during ~~his or her~~ their graduate career (one of which must be Psychology 10 for developmental and Psychology 40 for social).

Additional requirements for the cognitive area include: three advanced cognitive graduate courses, a graduate course in developmental psychology, a graduate course in social psychology, and a substantive advanced course in a discipline other than psychology.

Additional requirements for the developmental area include: Psychology 225A, Psychology 225B, Psychology 246, one other advanced developmental graduate seminar course, a graduate course in cognitive psychology, a graduate course in social psychology, and a substantive advanced course in a discipline other than psychology. Developmental graduate students are also required to complete a professional practicum between the end of their second year and end of their third year.

Additional requirements for the social area include: Psychology 210, Psychology 248, Psychology 249, or Psychology 261, one other advanced social graduate seminar, a graduate course in cognitive psychology, a graduate course in developmental psychology, and a substantive advanced course in a discipline other than psychology.

After satisfying the formal course and research requirements, psychology graduate students must take an oral examination to qualify as a candidate for the Ph.D., usually by the end of their third year. The qualifying examination is intended to assess a student's knowledge of psychology and competence to conduct the dissertation research. For the qualifying examination, students write a major paper that reflects a conceptual analysis of their main research area, prepare a list of readings representative of their expertise in three areas of psychology, and satisfactorily complete an oral qualifying examination.

Within two quarters of advancing to candidacy, students will prepare a written dissertation proposal that should demonstrate the student's in-depth knowledge of some research topic, along with a detailed outline of the empirical research to be conducted for the dissertation. The student's dissertation committee reviews the proposal, and the student will orally defend the proposal for approval by the committee. After the final draft of the dissertation has been completed and submitted to the faculty committee members, students must defend their thesis in an oral exam. The Ph.D. degree is awarded upon successful completion and submission of the dissertation.

Faculty and Professional Interests

Professor

NAMEERA AKHTAR

Cognitive and social cognitive processes in early language development, social-cognitive development in infants

MARGARITA AZMITIA

How culture, peers, family, and schools provide a context for children's and adolescents' development. Special emphasis on how close relationships influence the educational pathways and identity development of ethnically and socioeconomically diverse populations

HEATHER E. BULLOCK

Poverty and economic inequality, welfare policy, feminist psychology, intersections of classism, racism, and sexism

MAUREEN A. CALLANAN

Cognitive and language development in the social context of family activities, development of word meanings and concepts, the construction of causal explanations in parent-child conversations

CATHERINE R. COOPER

Cultural perspectives on child and adolescent development; linkages among families, peers, schools, and work; issues of diversity, ethnicity, and gender in identity; research, practice, and policy in university outreach programs; linking qualitative and quantitative research

FAYE J. CROSBY

Gender, social identity, and social justice, especially affirmative action

JEAN FOX TREE

Psycholinguistics: production and comprehension of spontaneous speech, disfluencies and discourse markers in speech, gestures, the effects of communicative technologies on how people communicate

RAYMOND W. GIBBS JR.

Language, thought, and embodiment; special emphasis on metaphor, pragmatics, and cognitive science

CRAIG W. HANEY

Applications of social psychological principles to legal settings, assessment of the psychological effects of living and working in institutional environments, social contextual origins of violence, development of alternative legal and institutional forms

AIDA HURTADO

Social identity, feminist theory, social psychology of education, survey methodology

CAMPBELL LEAPER

Social construction and socialization of gender in childhood, adolescence, and adulthood; self-concept and social identity; language and social interaction; social relationships, gender bias and academic achievement; images of gender in the media; perceptions and consequences of sexism

ANTHONY R. PRATKANIS

Social influence; attitude structure, function, and change

BARBARA ROGOFF

Human development in sociocultural activity; informal and formal arrangements for learning; adult/child and peer communication in families and schools in diverse cultural communities (especially in Guatemala Mexico and the U.S.); learning through observation and collaboration

AVRIL THORNE

Identity development in adolescence and young adulthood, especially in the context of conversations with family and friends; autobiographical memories; storytelling and the development of a sense of self; affordances of introverted and extraverted friends

STEPHEN J. WHITTAKER

Human Computer Interaction: The design, development and evaluation of computational tools to support memory and conversation

EILEEN L. ZURBRIGGEN

Connections between power and sex; sexual aggression and abuse; trauma; sexual decision-making; sexuality and media, the sexualization of girls and women; authoritarianism; feminist political psychology; motivation, especially power and affiliation-intimacy motives

Associate Professor

ALAN H. KAWAMOTO

Empirical and computer simulation approaches to the study of perceptual and cognitive processes, reading, speech production

REGINA D. LANGHOUT

School-community-university collaboration; how schooling and neighborhood experiences are informed by social class, race, and gender; participatory action research

TRAVIS L. SEYMOUR

Role of immediate memory, consciousness, and executive control on the human performance of laboratory and applied tasks; cognitive processes amenable to strategic control and how they influence the way in which we maintain situational awareness; high levels of performance in complex and cognitive tasks

SU-HUA WANG

Cognitive development, infant cognition, mental representations, theory of mind, how experience shapes early learning, parental child-rearing beliefs, cross-cultural perspectives on children's learning

AARONETTE WHITE

Adult feminist-identity development; personality correlates of feminist activism; feminist masculinities studies; feminist perspectives on peace and violence; narrative psychology and adult personality change; Black feminist political psychology in the U.S. and abroad; critical psychology

MARGARET L. WILSON

Embodied cognition, broadly defined. Specific interests include person perception, imitation, visual cognition, working memory, sign language, and the evolution of cognition

Assistant Professor

SHELLY A. GRABE

Sexual objectification of women and women's bodies as a pervasive global phenomenon played out in different ways across different cultures; how "embodied oppression" affects women's psychological well-being and empowerment

PHILLIP L. HAMMACK

Cultural psychology, culture and identity, conflict and intergroup relations, political violence, political psychology, narrative, sexual identity

Lecturer

DAVID A. "TONY" HOFFMAN

Child and adolescent development, developmental psychopathology, child and adolescent assessment, school psychology, pediatric psychology, children and war, children in high risk situations

RALPH H. QUINN

Clinical psychology, moral development, psychology and religion, existential-humanistic psychology

DONALD T. SAPOSNEK

Childhood psychopathology, special needs children, parenting and family interactions, socialization of children, children and divorce, family mediation, conflict resolution

VERONICA K. TONAY

Clinical psychology, psychotherapy outcome, community mental health, dreams, personal narratives, creativity

Emeriti

ELLIOT ARONSON, Emeritus

BRUCE BRIDGEMAN, Emeritus

MARTIN M. CHEMERS, Emeritus

G. WILLIAM DOMHOFF, Emeritus

PER F. GJERDE, Emeritus

DAVID M. HARRINGTON, Emeritus

MICHAEL KAHN, Emeritus

PAVEL MACHOTKA, Emeritus
DOMINIC W. MASSARO, Emeritus
MELANIE J. MAYER, Emeritus
BARRY McLAUGHLIN, Emeritus
THOMAS F. PETTIGREW, Emeritus
M. BREWSTER SMITH, Emeritus

DANE ARCHER, **PROFESSOR EMERITUS**, Sociology

SRI KURNIAWAN, Associate Professor, School of Engineering

Human-computer interaction; human factors and ergonomics; accessibility; assistive technology; usability; empirical studies; user-centered design

JEROME NEU, **PROFESSOR**, Humanities

Philosophy of mind, emotions and culture, philosophy of law, psychoanalytic theory

ROLAND G. THARP, Professor Emeritus, Education and Psychology

revised 09/01/11

[Program Description](#) | [Faculty](#) | [Course Descriptions](#)

Lower-Division Courses**1. Introduction to Psychology. F,W,S**

Introduces prospective majors to the scientific study of behavior and mental processes and also provides an overview for non-majors. Emphasizes social, cognitive, developmental, and personality psychology and their interrelations. (General Education Code(s): PE-H, IS.) (F) *M. Callanan*, (W) *T. Seymour*, (S) *A. White*

2. Introduction to Psychological Statistics. W,S

An introduction to elementary statistical principles and techniques relevant to psychological research. Topics covered include basic parametric and nonparametric statistics, analysis of variance, and simple factorial designs. This course is prerequisite to course 181. Prerequisite(s): course 1 or 20, and Applied Mathematics and Statistics 2 or 3 or Mathematics 3 or 4 or 11A or satisfactory placement score on math placement exam or CEEB Advanced Placement Calculus AB exam. Enrollment limited to 165. (General Education Code(s): SR, Q.) (W) *K. Cardilla*, (S) *S. Whittaker*

10. Introduction to Developmental Psychology. F,W,S

Psychological development from conception to adolescence. A broad introduction to the field of developmental psychology. Prerequisite(s): course 1. Enrollment restricted to psychology and pre-psychology majors. (F) *M. Azmitia*, (W) *D. Hoffman*, (S) *S. Wang*

20. Introduction to Cognitive Psychology. F,S

Introduces basic concepts in cognitive psychology. Topics include thinking, consciousness, perceiving, language, remembering, reasoning, problem solving, and decision-making. *M. Wilson*

40. Introduction to Social Psychology. F

An analysis of contemporary research in social psychology and of what that research can teach us about the world we live in. Problems of conformity, propaganda, prejudice, attraction, and aggression. Focuses on a person's relationship with other people, how he or she influences them and is influenced by them. *A. Pratkanis*

42. Student-Directed Seminar. F,W,S

Seminars taught by upper-division or graduate students under faculty supervision. (See course 192.) *The Staff*

60. Introduction to Personality Psychology. F,S

An overview of major personality theories from Freud to the modern day, and an introduction to contemporary personality research and assessment. Prerequisite(s): course 1. (F) *P. Gjerde*, (S) *A. Thorne*

65. Introduction to Humanistic Psychology. S

Humanistic psychology is seen here as those contemporary aspects of the field which are explicitly directed toward life-enrichment for members of the culture. The course does not attempt a complete survey of these aspects, but rather explores some of them in depth and attempts to begin working toward an overall theory of the humanistic movement. (General Education Code(s): IS.) *R. Quinn*

80A. Psychology and Religion. F

Topics covered include myth and the unconscious, the varieties of religious experience, dualism, women and religion, the role of authority, transpersonal experience, conversion, disaffiliation, self and community. (General Education Code(s): T3-Social Sciences.) *R. Quinn*

Upper-Division Courses**100. Research Methods in Psychology (7 credits). F,W,S**

An introduction to research methods used to investigate human psychology. Course emphasizes critical thinking, designing and conducting research, analyzing and interpreting data, and writing a professional research report. (Formerly course 3.) Prerequisite(s): Entry Level Writing and Composition requirements; course 2 or Applied Mathematics and Statistics 5 or Applied Mathematics and Statistics 7/7L. (F) *C. Leaper*, (W) *The Staff*, (S) *F. Crosby*

Developmental

101. Topics in Developmental Psychology.

These topics, offered at different times by different instructors, examine selected topics in developmental psychology. (Formerly course 100.) *The Staff*

102. Adolescent Development: Adolescence into Young Adulthood. W

Focuses on individual and relational development from early adolescence into young adulthood. Emphasis on the mutual influences of family relationships and adolescent development, and on the interface of family, peer group, and school experience in cultural contexts. Prerequisite(s): courses 3 or 100 and course 10. *D. Hoffman*

103. Adult Development and Aging. S

An introduction to cultural, biological, interpersonal, and cognitive processes that influence adult development and aging. We discuss how each of these processes promotes stability and change during adulthood. (Formerly course 109.) Prerequisite(s): courses 3 or 100 and course 10. *M. Azmitia*

104. Development in Infancy. S

Focuses on psychological development in infancy. Presents research on perceptual, cognitive, and social-emotional development during the first two years of life. (Formerly course 101.) Prerequisite(s): courses 3 or 100 and 10. Enrollment restricted to psychology and cognitive science majors. *N. Akhtar*

105. Children's Thinking. S

Cognition in children from infancy through adolescence. Basic and current research on children's understanding of the social and physical world. Focus on major theoretical perspectives: Piaget's constructivist approach, information processing approach, and sociocultural approach. (Formerly course 117.) Prerequisite(s): courses 3 or 100 and 10. *The Staff*

106. Social and Emotional Development. W

An examination of contemporary theory and research on social and emotional development from infancy through childhood. Prerequisite(s): courses 3 or 100 and 10. *C. Leaper*

107. Gender and Development.

Examines the developmental psychology of gender in childhood and adolescence. Prerequisite(s): course 3 or 100, and course 10. Enrollment restricted to psychology majors. *C. Leaper*

110. Culture and Human Development (6 credits). W

Examines theory, research, and methods of studying the inherent cultural basis of human development and variations and similarities in human lives and activities in different communities worldwide. The approach draws on ideas and observations from psychology, anthropology, linguistics, sociology, and history. Course includes lab exercises using interview and observation methodologies and presentations of library research. (Formerly course 113.) Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and one of the following: course 3 or 100; Anthropology 1 or 2; Education 92A, 92B, or 92C; Latin American Studies 1; or Sociology 1. (General Education Code(s): W, E.) *B. Rogoff*

115. Lifespan Developmental Psychopathology. F

Examines theory and research on developmental psychopathology. Emphasizes the origin and longitudinal course of disordered behavior. Explores the processes underlying continuity and change in patterns of adaptation and age-related changes in manifestations of disorders. Prerequisite(s): courses 3 or 100, 10, and 170. *K. Cardilla*

118. Special Topics in Developmental Psychology.

118A. Children and War. S

Examine development and behavioral ecology of children affected by war. Discuss development of displaced children, abandoned children, orphaned children, children living in protracted conflict, and child soldiers. Review child protection strategies and psychosocial intervention. (Formerly course 118.) Prerequisite(s): courses 3 or 100 and 10. *D. Hoffman*

118B. Children in Extreme Circumstances. F

Reviews child survival in life-threatening contexts. Examines the lives of street children, institutionalized children, orphans, children in extreme poverty, enslaved children, war-affected children, abandoned children, and children whose parents have HIV/AIDS and other life-threatening illnesses. Prerequisite(s): courses 3 or 100 and 10. Enrollment limited to 60. *D. Hoffman*

118C. Children's Understanding of the Human Mind. *

Reviews recent research on how children come to understand aspects of the human mind, such as desire, belief, goals, and intention. Also discusses the implications of this research on typically and atypically developing children. Prerequisite(s): courses 3 or 100, and 10. Enrollment restricted to psychology majors. Enrollment limited to 60. *S. Wang*

119. Senior Seminars in Developmental Psychology.

119A. Development as a Sociocultural Process. F

Examines theory and research in sociocultural approaches to how people (especially children) learn and develop through participating in activities of their communities with other people. Emphasizes the organization of social interactions and learning opportunities, especially in communities where schooling has not historically been prevalent. Satisfies seminar requirement. Satisfies senior comprehensive requirement. (Formerly course 100L.) Prerequisite(s): satisfaction of Entry Level Writing, Composition requirements; course 1, Anthropology 1 or 2, Education 92A, 92B, or 92C, Latin American and Latino Studies 1, or Sociology 1. Enrollment restricted to seniors or permission of instructor. Enrollment limited to 30. (General Education Code(s): W.) *B. Rogof*

119B. Cultural Psychology. W

Critically analyzes relations among culture, ethnicity, identity, and the nation-state in a world characterized by globalization, migration, and social change. Examines the relevance of these features for the development of children and youth through examples from both Western and non-Western "cultures." Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology and anthropology majors. Enrollment limited to 30. (General Education Code(s): E.) *P. Gjerde*

119D. Cultural Perspectives on Adolescent Development. S

Examines cultural influences on adolescence from the perspective of current interdisciplinary theory and research, focusing on identity, changes from early adolescence to adulthood, linkages from family to community experiences, gender, immigration, biculturalism, and implications for social policy. Includes research practicum. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology majors or permission of instructor. Enrollment limited to 30. *C. Cooper*

119E. The World of Babies. *

Focuses on how infants learn about intuitive physics, naive psychology, and shared culture. Also discusses possible ways to facilitate this learning. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and course 3 or 100. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *S. Wang*

119F. Language Development. W

An introduction to language development in children. Explores current theory and research in language development; focuses on the preschool years. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and course 3 or 100. Enrollment restricted to senior psychology and cognitive science majors. Enrollment limited to 30. *N. Akhtar*

119H. Developmental Psychology Research and "Real World" Problems. S

Explores ways that research in developmental psychology can be used to address "real-world" problems facing children. With an analytical focus on evidence and generalizability, we will investigate research-policy connections in topics of popular interest (e.g., child custody, poverty). Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and course 3 or 100. Enrollment restricted to senior psychology majors. Enrollment limited to 30. (General Education Code(s): W.) *M. Callanan*

119I. Special Topics in Narrative Development. *

Examines a special topic of current interest in developmental psychology centering on features of development that unfold during free-flowing discourse, e.g., interviews, conversations, and reminiscences. Topics may include the development of self-narratives, personal memories, family stories, attachment, identity, or achievement. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology majors. Course 60 recommended. Enrollment limited to 30. *A. Thorne*

119M. Identity Development in Social and Cultural Contexts. W

Senior seminar that focuses on identity development in adolescence and young adulthood. Discusses theory and research on the development of personal and social identities and the sociocultural contexts in which these personal and social identities are negotiated. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and course 3 or 100; course 102 strongly recommended. Enrollment restricted to senior psychology majors or by permission of instructor. Enrollment limited to 30. (General Education Code(s): W.) *M. Azmitia*

Cognitive**120. Visual and Spatial Cognition. ***

Focuses on visual and spatial representation as elements of human cognition. Topics include imagery, visual attention, mental models, spatial language, the body schema, near-body space, and brain organization for representing space. Prerequisite(s): course 3 or 100; course 20 or any

upper-division cognitive course is highly recommended. *M. Wilson*

120D. Deafness and Sign Language. *

Explores what we can learn about human cognition by studying sensory loss and language in a different sensory modality. Topics include brain organization, sensory compensation, working memory, visual cognition, and psycholinguistics. Course 20 strongly recommended. (Formerly course 139A.) Prerequisite(s): course 3 or 10; course 20 strongly recommended. Enrollment restricted to senior psychology and cognitive science majors and minors. Enrollment limited to 30. *M. Wilson*

121. Perception. S

Basic perceptual psychology, emphasizing the relationships between perception and cognition. Topics include shape, color, and depth; hearing, taste, smell, and touch; and perceiving faces, voices, and language. Prerequisite(s): course 3 or 100 or Biology 70. *The Staff*

123. Behavioral Neuroscience. W

An examination of the physiological mechanisms of psychological processes, including sensory systems, motor systems, control systems, and memory and learning. Principles of nervous system organization are discussed at each level. Prerequisite(s): course 3 or 100 or Biology 70 and one course in statistics (course 2 or Applied Mathematics and Statistics 5 or 7). *B. Bridgeman*

124. Psychology of Reading. W

Focuses on the cognitive processes that underlie reading in adults. Additional topics include different writing systems, learning to read, and reading deficits. Recommended for upper-division students. Prerequisite(s): course 3 or 100. *A. Kawamoto*

125. The Psychology of Language. F

A study of human communication as a function of psychological, linguistic, and social factors. Topics covered include language comprehension and production, language and reasoning, and language as a social activity. Prerequisite(s): course 3 or 100. *N. Wilson*

126. Aging and the Human Brain. *

How does the brain change as we age? Course covers new developments in research on cognitive neuroscience and aging, with a focus on the consequences for memory, emotion, and decision-making. Prerequisite(s): course 3 or 100, and 20, 121, 123, 129 or Biology 70. *Q. Liu*

127. Computer Mediated Communication. *

Provides an introduction to perception and cognition as it relates to how people communicate with each other using computers and the Internet. Focuses on cognitive/perceptual aspects of communication. Prerequisite(s): course 3 or 100 or 20 or consent of instructor. Course 20 highly recommended. Enrollment limited to 40. *A. Kawamoto*

128. Human Factors. S

Human factors psychology studies human-machine interaction and computer usability, and involves diverse topics including displays and controls; human error; decision-making; psycholinguistics; and the role of fatigue, environmental stressors, and social/team factors that directly impact human performance. Prerequisite(s): course 3 or 100. *The Staff*

129. Human Learning and Memory. S

Examines basic theories, models, methods, and research findings in human memory. Both traditional and nontraditional topics are covered. Prerequisite(s): course 3 or 100. *T. Seymour*

130. Deception, Brain, and Behavior. *

Focuses on behavioral and brain manifestations of deception. Topics include developmental changes that allow us to understand and to use deception, physical implications of lying expressed in the face, voice, posture, and brain activity. Also covers mechanical or behavioral techniques used in deceptive behavior, whether in the form of overt behavior or brain activity. Prerequisite(s): course 3 or 100; course 20 or any upper-division cognitive course strongly recommended. *T. Seymour*

135. Feelings and Emotions. F

Focuses on contemporary research in the psychology of human emotions. Special attention given to work in cognitive science, including psychology, linguistics, philosophy, and anthropology, on how emotions are central to understanding human action and mental life. Prerequisite(s): course 3 or 100, or major standing in linguistics, philosophy or anthropology. *R. Gibbs*

137. Mind, Body, and World. W

Psychologists primarily view the mind as being separate from the body, and the body as being separate from the external world. This course questions this widely held position and explores the way that minds arise from individuals' bodily interactions with others and the world around them. Particular attention is paid to the role of human embodiment in language use and everyday cognition. Prerequisite(s): course 3 or 100, or major standing in linguistics, philosophy or anthropology. *R. Gibbs*

139. Senior Seminars in Cognitive Psychology.

139B. Consciousness. S

Provides a psychological study of human consciousness. Aim is to explore the following questions: What is consciousness? Where does consciousness come from? What functions does consciousness have in everyday cognition? How do we best

scientifically study consciousness? These issues are examined from the perspective of contemporary research in cognitive science. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology, philosophy, anthropology, linguistics, and cognitive science majors. Enrollment limited to 30. *R. Gibbs*

139C. The Psychology of Lying and Deception. *

Discusses why and how people lie. Using scientific articles, movies, and our everyday lives as source material, explores the nature of lying; then focuses on various approaches to behavioral and mechanical "lie detection." Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to psychology and cognitive science majors. Enrollment limited to 30. *T. Seymour*

139D. Modeling Human Performance. F

Hands-on experience using computational modeling to understand human cognitive-task performance by comparing simulated and human data. Satisfies senior seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to junior and senior psychology, cognitive science, computer science, and computer engineering majors, or by permission of instructor. Prerequisite(s): at least one of the following: course 121 or 123 or 128 or 129; or Computer Science 5C or 5J or 11 or 12A or 13H or 130 or 140. Enrollment limited to 30. *T. Seymour*

139F. Psychology and Evolutionary Theory. S

Human psychology is examined from the viewpoint of evolutionary theory, including perspectives from ethnology, anthropology, and neuropsychology. Upper-division students from diverse backgrounds are encouraged to enroll. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology, anthropology, biology, philosophy, sociology, cognitive science, and feminist studies majors, or by permission of instructor. Prerequisite(s): Entry Level Writing and Composition requirements, and course 3 or 100. Enrollment limited to 30. *B. Bridgeman*

139G. Conversations. W

Explores how conversations work and how speakers accomplish their goals in an interaction. Topics include conversational structure, turn-taking, variation in language use, and the functions of discourse markers (words like "um," "uh," and "you know"). Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and course 3 or 100. Enrollment restricted to senior psychology and cognitive science majors. Enrollment limited to 30. *J. Fox Tree*

139H. Weird Science. S

Explores the relationship between science and pseudoscience from a cognitive psychological perspective, including discussion of collection and selection of data, statistical assessment of data, cognitive illusions, memory distortions, reasoning, and decision-making. Also highlights the dissemination of scientific knowledge. Satisfies seminar requirement. Satisfies comprehensive requirement. (Formerly course 134.) Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and course 3 or 100. Enrollment restricted to senior psychology and cognitive science majors. Enrollment limited to 30. *J. Fox Tree*

Social

140. Topics in Social Psychology.

140A. Women's Lives in Context: Community Practicum (2 credits). *

Provides link between course 140G and community organizations that work with women. Students complete internships with relevant agencies and participate in seminar meetings. Concurrent enrollment in course 140G required. Enrollment limited to 20. *H. Bullock*

140B. African American Psychology. F

Incorporates historical and conceptual foundations; issues of social psychology; individual and developmental processes; and adjustment and clinical issues. Readings expose students to attributes of African American culture that have an impact on the psychology of African Americans as well as methodological issues relevant to key psychological topics. Prerequisite(s): course 3 or 100 or declaration of major in one of the following programs: feminist studies, sociology, community studies, or politics. Enrollment limited to 60. (General Education Code(s): E.) *A. White*

140C. Health Psychology. *

Course examines the psychological aspects of health, illness and healing. Focuses primarily on etiology, treatment and prevention; specific topics include stress and the immune response, social support, compliance, health beliefs, and the healing relationship. Prerequisite(s): courses 3 or 100 and 40. *J. Kaupp*

140G. Women's Lives in Context. F

Examines gender as a psychological and social factor that influences women's experiences in different contexts. Cuts across other areas of psychology by taking a women-centered approach. Emphasis also placed on understanding how intersections

between gender, race and ethnicity, sexual orientation, socioeconomic status, etc., impact women's psychological well-being. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and course 3 or 100, or sociology 103B, or feminist studies 100, or community studies 100. Enrollment restricted to junior and senior psychology, feminist studies, sociology, and community studies majors. (General Education Code(s): W.) *S. Grabe*

140H. Sexual Identity and Society. S

Presents an integrative approach to the study of sexual identity. Focuses on the regulation of sexual desire through medical, psychological, and legal discussions. Examines social movements, social policy, and ongoing debates on the meaning and social organization of desire. Prerequisite(s): course 3 or 100. *P. Hammack*

140L. Women's Bodies and Psychological Well-Being. W

Examines how women's bodily experiences (e.g., sexual objectification, violence, menarche, sexual health) are uniquely tied to their subordinate status and impacts their psychological well-being. Theories of gender inequality will address how social control directed at women's bodies through power relations imbedded in societal institutions contributes to women's marginalized status. Prerequisite(s): courses 3 or 100. Enrollment limited to 60. *S. Grabe*

140Q. Social Psychology of Gender. S

Considers individual, interpersonal, and cultural influences on gender similarities and differences in thinking, motivation, and behavior. Emphasizes factors related to power and status inequalities between women and men. (Formerly Social Psychology of Sex and Gender.) Prerequisite(s): courses 3 or 100 and course 40. *C. Leaper*

140T. Psychology of Trauma. *

Overview of psychological theory and research on trauma and traumatic stress, including responses to childhood trauma (especially sexual abuse), combat, and natural disasters. Variety of theoretical frameworks presented, including developmental, cognitive, neuropsychological, clinical, and social/contextual. Prerequisite(s): course 3 or 100 or permission of instructor. *E. Zurbriggen*

142. Psychology of Oppression and Liberation. W

Provides theoretical frameworks for understanding interlocking systems of oppression from the perspective of "the oppressed" as well as "the oppressor" nationally and internationally. Goes beyond mainstream (traditional) psychology and emphasizes critical psychological perspectives that include micro- and macro-level theories of oppression; importance of ideology in oppressive systems; and theories of social change and liberation across contexts. Prerequisite(s): course 3 or 100 or declaration of major in one of the following programs: feminist studies, sociology, community studies, or politics. (General Education Code(s): E.) *A. White*

143. Intergroup Relations. *

Introduces the study of conflict and intergroup relations. Examines historical and cultural foundations of group psychology and social psychological theory and research on conflict between groups, cultures, and nations. Surveys work on multiculturalism, race relations, and global political conflict. Applies social psychological theories to cases of intergroup conflict. Prerequisite(s): course 3 or 100, or major standing in politics, community studies or anthropology, or by permission of instructor. Enrollment limited to 120. (General Education Code(s): E.) *P. Hammack*

145. Social Influence. W

An advanced course for upper-division undergraduates interested in the study of the persuasion process. The course investigates common influence tactics and how those tactics are used in various settings. Prerequisite(s): course 3 or 100. *A. Pratkanis*

145D. Social Psychology of Autocracy and Democracy. S

Humans are the only animal capable of living in both authoritarian and democratic regimes. Course explores the nature of these forms of social relationships with a goal of promoting democracy. Topics include: obedience to authority, conformity, self-justification, propaganda, power, and conflict resolution. (Formerly course 159G.) Prerequisite(s): course 3 or 100. Enrollment restricted to junior and senior psychology majors. *A. Pratkanis*

146. The Social Context. *

A systematic analysis of the social and contextual determinants of human behavior, with special attention given to concepts of situational control, social comparison, role and attribution theories, as well as the macrodeterminants of behavior: cultural, historical, and sociopolitical context. Prerequisite(s): courses 3 or 100 and course 40; or Sociology 136. *The Staff*

147A. Psychology and Law. W

Current and future relationships between law and psychology, paying special attention to gaps between legal fictions and psychological realities in the legal system. Topics include an introduction to social science and law, the nature of legal and criminal responsibility, the relationship between the social and legal concepts of discrimination, and the nature of legal punishment. (Also offered as Legal Studies 147A. Students cannot receive credit for both courses.) Prerequisite(s): courses 3 or 100; and course 40 is highly recommended prior to taking this course. Enrollment restricted to psychology, pre-psychology, and legal studies majors. *C. Haney*

147B. Psychology and Law. S

Continuing discussion of current and future relationships between law and psychology and to

contrasting psychological realities with legal fictions. Special attention is given to the criminal justice system including crime causation, the psychology of policing and interrogation, plea bargaining, jury selection and decision making, eyewitness identification, and the psychology of imprisonment. (Also offered as Legal Studies 147B. Students cannot receive credit for both courses.) Prerequisite(s): course 147A. *C. Haney*

149. Community Psychology: Transforming Communities. *

Introduction to community psychology, a discipline that blends social psychology, sociology, and anthropology. Class topics include levels of analysis, ecologies, prevention, intervention, feminism, empowerment, sense of community, coalition building, and social justice and action. Prerequisite(s): course 3 or 100. Enrollment restricted to juniors and seniors. *R. Langhout*

150. Social Psychology of Flimflam. F

Why do we believe strange things? This course investigates such flimflams as beliefs in the Loch Ness Monster, quack health care, and racial superiority to illustrate the underlying social psychological principles that lead us to adopt weird attitudes. (Formerly course 159I.) Prerequisite(s): course 3 or 100. (General Education Code(s): SI.) *A. Pratkanis*

153. The Psychology of Poverty and Social Class. *

Examines how social class shapes attitudes, beliefs, and behaviors. Emphasis is placed on structural barriers and their impact on the well-being of low-income groups. Strategies for reducing classist discrimination and improving interclass relations are discussed. Prerequisite: course 3 or 100, or major standing in anthropology, community studies, economics, legal studies, politics, sociology, or feminist studies. *H. Bullock*

153A. Psychology of Poverty and Social Class Community Practicum (2 credits). *

Provides a link between course 153 and community organizations with an antipoverty mission. Students complete internships with nonprofit agencies and participate in seminar meetings. Prerequisite(s): concurrent enrollment in course 153. Enrollment limited to 20. *H. Bullock*

157. Chicana Feminism. *

Students are introduced to the writings of Chicana feminists to identify the gender issues that produce conflict and cooperation in their communities. The course also makes linkages to gender issues in other U.S. communities of color and Latin America. (Also offered as Feminist Studies 151A. Students cannot receive credit for both courses.) Prerequisite(s): course 3 or 100 or Feminist Studies 1. (General Education Code(s): E.) *A. Hurtado*

158. Latinos in the Media. *

Introduces portrayals of Latinos in the U.S. media including magazines, film, and television. Covers the most recent social psychological research on media representations and implications for identity. Prerequisite(s): course 3 or 100 or Latin American and Latino Studies 1. (General Education Code(s): E.) *A. Hurtado*

159. Senior Seminars in Social Psychology.

159D. Psychology of Sexual Aggression. S

An overview of psychological theory and research related to sexual aggression, focusing on both perpetration and victimization. Includes a discussion of the social construction of masculinity and femininity, media representations of sexual violence, and alternative (non-aggressive) visions of sexuality. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): Entry Level Writing and Composition requirements; and course 3 or 100. Enrollment restricted to senior psychology or feminist studies majors or permission of instructor. Enrollment limited to 30. *E. Zurbruggen*

159E. Peace Psychology. F

Is war inevitable? What is peace? Is it more than the absence of violence? Explore how psychology—the study of human behavior—can help to decrease violence and enhance cooperation at multiple levels including the personal, interpersonal, community, and international arenas. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): Entry Level Writing and Composition requirements; and course 3 or 100. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *A. White*

159H. Community-Based Interventions. S

Topics include: what makes a successful intervention; what happens before the formal intervention begins; the ethics involved with interventions; different methods for assessing interventions; and different praxis models. Satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and course 3 or 100. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *R. Langhout*

159P. Social-Community Psychology in Practice. W

This service-learning course requires time in the classroom and the field. Students gain a deep understanding of social justice paradigms, community-based collaborative research, ethics, field-based research, reflexivity, and socio-cultural development modes. Courses 149 and 182 are recommended prior to taking this course. Satisfies senior comprehensive requirement. Admission by application and interview only. Enrollment limited to 15. *R. Langhout*

163. Freud. F

The development of Freud's concept of mind. Extensive reading tracing the origins and development of Freud's theories and concepts (e.g., abreaction, psychic energy, defense, wish-fulfillment, unconscious fantasy, dreams, symptoms, transference, cure, sexuality) and emphasizing the underlying model of the mind and mental functioning. (Also offered as Philosophy 139. Students cannot receive credit for both courses.) Offered in alternate academic years. *J. Neu*

Personality**165. Systems of Psychotherapy. W**

A review of methods of psychotherapy, with attention to the underlying assumptions about personality, health, and disease. Prerequisite(s): course 3 or 100; course 60 or 170 recommended. *V. Tonay*

166. Personality Assessment. S

How do we really know a person? Course provides hands-on experience with assessing such individual differences as intimacy motivation, dominance, paranoia, and well-being. Students construct their own personality test and learn to critique the kinds of self-report, observational, and interview techniques that are used in organizational and counseling contexts. Prerequisite(s): course 3 or 100; course 60 highly recommended as preparation. *V. Tonay*

167. Clinical Psychology. W

Serves as an in-depth introduction to the field of clinical psychology. Covers issues of clinical assessment, interviewing, testing, and a range of therapeutic modalities. Prerequisite(s): courses 3 or 100, and 60 or 65; course 170 is recommended as preparation. *R. Quinn*

169. Community Mental Health. F

Examines theory and research on outreach and prevention for application with various populations in community settings (e.g., victims of violence, immigrants, severely mentally ill); presents characteristics of successful agencies and agency development. Surveys interventions currently used in community mental health. Prerequisite(s): course 3 or 100. Courses 60 and 170 recommended. *V. Tonay*

170. Abnormal Psychology. S

Survey of theory and research on the nature of behavioral disorders. Covers psychological, biological, developmental, and socio-cultural approaches. Prerequisite(s): course 3 or 100; course 60 highly recommended as preparation. *D. Hoffman*

171. Childhood Psychopathology. F

A critical and intensive exploration of a wide variety of specific disorders within their biological, developmental, and social contexts. Concepts of psychopathology in childhood, major and minor diagnostic systems, and a variety of theories of etiology are explored. General intervention strategies and a wide range of specific psychotherapy systems for treatment are closely examined and demonstrated. Prerequisite(s): courses 3 or 100; and courses 10, and 170. *D. Saposnek*

175. Personality, Relationships, and Emotions. S

Explores the nature, origins, and development of human personality as it relates to emotions in the context of close relationships. Prerequisite(s): course 3 or 100. Courses 10 and 60 recommended as preparation. *K. Cardilla*

179. Senior Seminars in Personality Psychology.**179A. Theories of Moral Psychology. W**

A seminar course with focus on theories of moral development from the psychoanalytic, social learning, cognitive-developmental, and humanistic perspectives. Students confront and discuss moral dilemmas from the four perspectives, working toward their own individual theories of pro-social behavior. Course satisfies seminar requirement. Satisfies senior comprehensive requirement. Prerequisite(s): essay required on a moral issue or dilemma relevant to the student's life. Prerequisite(s): Entry Level Writing and Composition requirements; and course 3 or 100. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *R. Quinn*

179B. Children and Divorce. S

Explores history and psychology of divorce and the short- and long-term effects of divorce on children. Examines wide range of findings that have drawn diametrically opposed conclusions; delves into social attitudes and legal structures that have impeded and enhanced divorce transitions for children and parents; investigates future models for divorcing that are child-friendly and consistent with findings from newly emerging longitudinal research on children and divorce. Satisfies seminar and senior comprehensive requirements. Prerequisite(s): course 3 or 100. Enrollment restricted to senior psychology majors. Enrollment limited to 30. *D. Saposnek*

179D. Psychological Interpretation. F

Seminar explores ego, Jungian, and object relations interpretive systems in-depth, applying them to film, music, literature, dreams, art, as well as traditional psychological measures, such as the TAT and interview protocols. Interprets psyche of author, audience, and engendering culture. Prerequisite(s): courses 3 or 100, and course 60; satisfaction of the Entry Level Writing and Composition requirements.

General Statistics and Research Methods

181. Psychological Data Analysis. S

Intermediate statistical methods widely used in psychology (e.g., n-way, ANOVA, ANCOVA, multiple-comparison, repeated-measures, nested-designs, correlational analysis, bivariate regression), corresponding SAS programs, and elements of measurement theory. Prerequisite(s): course 3 or 100. (General Education Code(s): Q.) *E. Cunningham*

182. Advanced Research Methods. W

Designed to equip students with the ability to evaluate, conceive, and carry out psychological research. A variety of techniques (observational, ethnographic, and field) examined and experienced. Students carry out research projects. Prerequisite: course 3 or 100. Enrollment limited to 30. (General Education Code(s): PR-E.) *R. Langhout*

183. History and Systems of Psychology. F

An overview of the history of psychology. Examines issues of paradigm and philosophy of science. Reviews central paradigms in the history of the discipline. Assumes a critical-historical approach, linking scientific knowledge produced to prevailing societal beliefs about mind and behavior. (Formerly course 180) Prerequisite(s): course 3 or 100. *P. Hammack*

Senior Seminars and Independent Study

190. Senior Seminars.

Special topics with a format varying each quarter. *The Staff*

191. Teaching College Psychology.

A series designed to provide undergraduates at the upper-division level with an opportunity to participate in planning and teaching college-level psychology. May not be repeated for credit. *The Staff*

191A. Introduction to Teaching Psychology. F,W,S

Students lead discussion groups and provide one-to-one tutoring for courses 1 or 3 or 100. Admission requires essay describing interest in becoming a course assistant, copies of psychology evaluations, and a letter of recommendation from a psychology faculty member; completion of some upper-division psychology courses prior to enrollment in this course. Prerequisite(s): course 3 or 100. Enrollment restricted to psychology majors. (Formerly "Introduction to Psychology.") Enrollment limited to 20. (F) *M. Callanan*, (W) *T. Seymour*, (S) *A. White*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar (course 42) under faculty supervision. Available only to upper-division or graduate students. Students submit petition to sponsoring agency. *The Staff*

193. Field Study. F,W,S

Series designed to provide advanced psychology undergraduates opportunity to apply what they have learned in the classroom to direct experience in a community agency. Students earn academic credit by working as interns at a variety of psychological settings where they are trained and supervised by a professional within the agency. Faculty also supervise the students' academic work by providing guidance and helping them integrate psychological theories with their hands-on intern experience. A two-quarter commitment. Students submit petition to sponsoring agency. Prerequisite(s): courses 3 or 100. Enrollment restricted to junior and senior psychology majors. May be repeated for credit. (General Education Code(s): PR-S.) *The Staff*

193A. Developmental Field Study. F,W,S

Work in a community-based setting while completing self-directed academic work focused in the developmental area under the guidance of a faculty member. Students submit petition to sponsoring agency; applications due one quarter in advance to the Psychology Field Study Office. Prerequisite(s): courses 3 or 100. Enrollment restricted to junior and senior psychology majors. Enrollment limited to 100. May be repeated for credit. (General Education Code(s): PR-S.) *The Staff*

193B. Cognitive Field Study. F,W,S

Work in a community-based setting while completing self-directed academic work focused in the cognitive area under guidance of a faculty member. Students submit petition to sponsoring agency; applications due one quarter in advance to the Psychology Field Study Office. Prerequisite(s): courses 3 or 100. Enrollment restricted to junior and senior psychology majors. May be repeated for credit. (General Education Code(s): PR-S.) *The Staff*

193C. Social Field Study. F,W,S

Work in community-based setting while completing self-directed academic work focused in the social area under guidance of a faculty member. Students submit petition to sponsoring agency; applications due one quarter in advance to the Psychology Field Study Office. Prerequisite(s): courses 3 or 100. Enrollment restricted to junior and senior psychology majors. May be repeated for credit. (General Education Code(s): PR-S.) *The Staff*

193D. Clinical/Personality Field Study. F,W,S

Work in community-based setting while completing self-directed academic work focused in clinical or personality area under guidance of a faculty member. Students submit petition to sponsoring

agency; applications due one quarter in advance to the Psychology Field Study Office.
Prerequisite(s): courses 3 or 100. Enrollment restricted to junior and senior psychology majors.
May be repeated for credit. (General Education Code(s): PR-S.) *The Staff*

194. Advanced Research in Special Topics.

Provides a means for a small group of students to do research on a particular topic in consultation with a faculty sponsor. *The Staff*

194A. Advanced Developmental Research. F,W,S

Provides students with intensive experience conducting current research in developmental psychology. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194B. Advanced Cognitive Research. F,W,S

Provides students with intensive experience conducting current research in cognitive psychology. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194C. Advanced Social Research. F,W,S

Provides students with intensive experience conducting current research in social psychology. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

195A. Senior Thesis. F,W,S

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students contemplating a senior thesis should have a superior academic record and be well prepared with a suitable background of previous course work or independent study for performing their proposed research. Students must file a petition with the Psychology Office the quarter in which they would like to begin the thesis. Senior thesis petitions are available in the Psychology Department Office. Check with office for enrollment conditions. *The Staff*

195B. Senior Thesis. F,W,S

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students contemplating a senior thesis should have a superior academic record and be well prepared with a suitable background of previous course work or independent study for performing their proposed research. Students must file a petition with the Psychology Office the quarter in which they would like to begin the thesis. Senior thesis petitions are available in the Psychology Department Office. Check with office for enrollment conditions. *The Staff*

195C. Senior Thesis. F,W,S

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students contemplating a senior thesis should have a superior academic record and be well prepared with a suitable background of previous course work or independent study for performing their proposed research. Students must file a petition with the Psychology Office the quarter in which they would like to begin the thesis. Senior thesis petitions are available in the Psychology Department Office. Check with office for enrollment conditions. *The Staff*

198. Independent Field Study. F,W,S

Provides psychology majors with the opportunity to apply what has been learned in the classroom to direct experience in a community agency outside the local community. Students earn academic credit by working as interns at a variety of psychological settings, where they are trained and supervised by a professional on site. Faculty also supervise the students' field study, providing guidance and help integrating psychological theories with their hands-on experience. Two-quarter commitment required. Admission requires completion of lower-division psychology major requirements; students submit petition to sponsoring agency. Applications are due one quarter in advance to the Psychology Field Study Office. Enrollment restricted to junior and senior psychology majors. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Individual directed study for upper-division undergraduates. Students must file a petition with the Psychology Office the quarter in which they would like to take the tutorial. Petitions may be obtained in the Psychology Department Office. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Specialized study with individual faculty as psychology peer advisors. May not be applied toward major requirements. Students submit petition to sponsoring agency. Application and interview required during the previous quarter. Enrollment restricted to junior and senior psychology majors. May be repeated for credit. *The Staff*

199G. Tutorial (3 credits). F,W,S

Specialized study with individual faculty. May not be applied toward major requirements. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

204. Quantitative Data Analysis. F

Intermediate statistical methods widely used in psychology (e.g., n-way, ANOVA, ANCOVA, multiple-comparisons, repeated-measures, nested-designs, correlational analyses, bivariate regression), corresponding SAS programs, and elements of measurement theory. Enrollment restricted to graduate students. Enrollment limited to 20. *R. Langhout*

210. The Experimental Method in Social Psychology. W

Explores the philosophy and practice of the experimental method in social psychology. Enrollment restricted to graduate students. *E. Zurbriggen*

211A. Proseminar: Social Justice and the Individual. F

Provides an introduction to social psychology, focusing on various individual-level social justice topics, including the self, social comparison, individual and collective identity, social historical and social structural determinants of behavior and various policy and social change-related issues. Enrollment restricted to psychology graduate students; undergraduates planning graduate work in social psychology may enroll with permission of instructor. Enrollment limited to 20. *E. Zurbriggen*

211B. Social Justice, Society, and Policy. W

Provides an introduction to social psychology, focusing on empirical and theoretical developments related to social justice and group and intergroup dynamics. Topics include: prejudice and discrimination, power, collective action, and psychology's relationship to social policy. (Formerly *Proseminar: Groups in Society*.) Enrollment restricted to psychology graduate students. Undergraduates planning graduate work in social psychology may enroll with permission of instructor. Enrollment limited to 20. *C. Haney*

213. Special Topics in Social Psychology. *

Focuses on particular issues of theoretical and practical importance in social psychology. Topics vary from year to year and often concentrate on issues of social justice, social identity, intergroup relations, and social policy. Enrollment restricted to graduate students. May be repeated for credit. (FWS) *The Staff*

214A. Multivariate Techniques for Psychology. W

Provides introduction to multiple regression (MR) and multivariate analysis of variance (MANOVA) as data analytic methods. Both methodological and statistical aspects of multivariate data analysis discussed. Practical problems in estimating and testing regression and ANOVA models addressed. Gain experience in carrying out and interpreting analyses using SPSS. Prerequisite(s): course 204. Enrollment limited to graduate students. Enrollment limited to 20. *E. Cunningham*

214B. Advanced Multivariate Techniques for Psychology. *

Provides introduction to factor analysis and structural equation modeling (SEM). Develop skills in defining, estimating, testing, and critiquing models. Topics include rationale of SEM, model identification, goodness of fit, and estimation. Learn how to use relevant software packages (SPSS, LISREL, EQS, and/or AMOS) to conduct exploratory and confirmatory factor analyses, path analyses, and full ("hybrid") analyses with latent variables. Prerequisite(s): course 214A. *E. Zurbriggen*

215. Production and Comprehension of Spontaneous Speech. *

Seminar on the use of collateral signals as backchannels, discourse markers, and enquoting devices, including discussion of historical origins, cross-linguistic borrowing and second-language learning, children's acquisition, and the use of signals as markers of culture and identity. Enrollment restricted to psychology graduate students. *J. Fox Tree*

220. Special Topics in Human Memory. *

Topics announced when offered. Seminars involve discussion and critical evaluation of current, historical, and interdisciplinary readings relevant to topic. Emphasis on development of research ideas. Enrollment restricted to graduate students. Enrollment limited to 12. *The Staff*

221. Visual Perception. *

Seminar to study human perception, its methodology, and driving issues as illustrated by selected research topics (e.g., adaptation to unusual sensory environments). Where possible, parallels with other areas of psychology are drawn. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

222. Topics in Lexical Organization. *

The recognition of words is a critical step in natural language processing. Discusses a range of contemporary issues related to the representation of a word and the access of this information from the perspective of psychology, linguistics, and artificial intelligence. Enrollment restricted to psychology graduate students; undergraduates who have completed course 124 may enroll with permission of instructor. Enrollment limited to 10. *A. Kawamoto*

224A. Proseminar: Cognitive I. F

A proseminar reviewing current topics in cognitive psychology, designed to introduce new graduate students to the field. Enrollment restricted to psychology graduate students. Enrollment limited to 10. *R. Gibbs, M. Wilson*

224B. Proseminar: Cognitive II. W

A proseminar reviewing current topics in cognitive psychology, designed to introduce new graduate students to the field. Enrollment restricted to psychology graduate students. Enrollment limited to 10. *S. Whittaker, J. Fox Tree*

225A. Introduction to Developmental Research I (3 credits). F,W

Surveys the rationale and techniques of research in developmental psychology. Students build skills in evaluating published research, in translating theoretical ideas into researchable hypotheses, and in selecting appropriate research designs, measurement, and statistical approaches for research problems. Multiple-term course; students receive 6 credits in the second quarter of attendance; the grade and evaluation submitted for the final quarter applies to both quarters. Enrollment restricted to psychology graduate students or with instructor's permission. May be repeated for credit. *C. Cooper*

225B. Introduction to Developmental Research II. S

Focuses on drawing reasonable conclusions from research findings by focusing on students' first-year research projects and critiques of existing research. Enrollment restricted to psychology graduate students. *S. Wang*

227. Contemporary Issues in Psychology of Language. *

Special topics in thought and language are examined from the perspectives of cognitive science. Particular attention given to embodied experience and higher-order cognition. Enrollment restricted to graduate students. May be repeated for credit. *R. Gibbs*

229. Computer Simulation Models. *

Course analyzes various computer simulation techniques and how they can be used to model perception and cognition. Parallel processing in networks is emphasized. Enrollment restricted to graduate students; undergraduates who have completed course 132 may enroll with permission of instructor. Offered in alternate academic years. *A. Kawamoto*

230. Research in Cognitive Psychology Seminar. F,W,S

Seminar to study, critique, and develop research in perception and cognition, including topics in psychobiology, psycholinguistics, and memory. Enrollment restricted to psychology graduate students. May be repeated for credit. *(F) M. Wilson, (W) S. Whittaker, (S) J. Fox Tree*

231. Research in Social Psychology Seminar. F,W,S

Seminar to study, critique, and develop research in social psychology. Enrollment restricted to psychology graduate students. May be repeated for credit. *S. Grabe*

232. Evolution of Cognition. *

Explores current research on evolution of human cognition, drawing on findings from other species and from the archaeological record. Topics include language, working memory, episodic memory, numerical abilities, and social cognition. Enrollment restricted to graduate students. *The Staff*

235. Infant Development in Contexts. *

Seminar on how contextual factors influence the development in infancy, especially on cognitive domains. Discusses at least four types of contextual factors: cultural, experiential, event, and interpersonal contexts. Enrollment restricted to psychology graduate students. *S. Wang*

236. Paradigms of Culture. *

Integrative seminar on the relationship between individual psychological experience and its social, cultural, and institutional context. Explores various paradigms of "culture" in social science literature, including psychoanalytic theory, culture and personality, cultural psychology, Marxism, symbolic interactionism, poststructuralism, postcolonial theory, narrative, and Vygotsky's sociocultural theory. (Formerly *Person, Culture, Society*.) Enrollment restricted to graduate students. Enrollment limited to 10. *P. Hammack*

242. Research in Developmental Psychology Seminar. F,W,S

Seminar to study, critique, and develop research in developmental psychology. Enrollment restricted to psychology graduate students. May be repeated for credit. *(S) S. Wang, (FW) C. Cooper*

244A. Proseminar I: Cognitive and Language Development. F

Explores major theories and research in the fields of cognitive development and language development. Begins with classic theories, such as Piaget's theory of cognitive development, and proceeds to theories and research on topics of current interest, such as the relation between culture and cognitive and language development. Enrollment restricted to graduate students. *M. Callanan*

244B. Proseminar II: Social and Personality Development. W

An examination of contemporary theory and research on socioemotional and personality development across the lifespan. (Formerly "Proseminar II: Social, Emotional, and Personality Development.") Enrollment restricted to graduate students. *C. Leaper*

245. Computational Models of Discourse and Dialogue. S

Focuses on classic and current theories and research topics in the computational modeling of discourse and dialogue, with applications to human-computer dialogue interactions; dialogue interaction in computer games and interactive story systems; and processing of human-to-human conversational and dialogue-like language such as e-mails. Topics vary depending on the current research of the instructor(s) and the interests of the students. Students read theoretical and technical papers from journals and conference proceedings and present class lectures. A research project is required. (Also offered as Linguistics 245. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. Undergraduates may enroll with permission of

instructor. May be repeated for credit. *M. Walker*

246. Cultural Diversity in Human Development. *

Focuses on issues of culture and ethnicity in our theoretical and empirical understanding of human development. Particular attention paid to issues of language, culture, and socialization as they relate to social institutions, such as education, that affect children and families. Enrollment restricted to graduate students. Enrollment limited to 20. *C. Cooper*

247. Special Topics in Developmental Psychology. F,S

Focuses on particular issues of theoretical importance in developmental psychology. Topics vary from year to year. Particular issues in language, culture, cognitive, social, and personality development may be covered. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. (F) *N. Akhtar*, (S) *M. Azmitia*

248. Survey Methods. S

Practicum to give students hands-on experience with survey methods by conducting their own survey on the topic of their choice. Course requires the survey to be conducted off campus at a local agency or program chosen by student with approval of instructor. Enrollment restricted to graduate students. Enrollment limited to 10. *S. Grabe*

249. Field Methodologies and Social Ethnography. *

Designed to train graduate students in applied field methods. Emphasis is on gaining knowledge and experience with actual field methods, by conducting social ethnography in the community. Field research in community placements required. Enrollment restricted to graduate students. Enrollment limited to 10. Offered in alternate academic years. *C. Haney*

250. Prejudice and Social Relations. *

Examines the ways in which the various branches of psychology have approached the issue of prejudice. Attention paid to the assumptions underlying each approach and their relation to core psychological ideas such as the self and emotion. Enrollment restricted to graduate students. *The Staff*

251. Feminist Theory and Social Psychology. *

Course bridges feminist theory and social psychological research to explore connections between theory covered and empirical studies on various topics in social psychology. Seminar format allows students opportunity for extensive discussion. (Also offered as Feminist Studies 251. Students cannot receive credit for both courses.) Enrollment restricted to graduate students. *A. Hurtado*

252. Special Topics in Cognitive Psychology. F,S

Focuses on particular issues in cognitive psychology. Topics vary from year to year. Particular issues in language, memory, perception, attention, judgment and decision making, problem solving, reasoning, emotion, cognitive modeling, cognitive neuroscience, and cognition and aging covered. Enrollment restricted to graduate students. May be repeated for credit. (F) *S. Whittaker*, (S) *M. Wilson*

253. Theory and Research in Intergroup Relations. *

Examines, compares, and contrasts a variety of theories in intergroup relations while examining relevant empirical research. The relevance of both theory and research findings to contemporary social issues is explored. Enrollment restricted to psychology graduate students; undergraduates considering graduate work in social psychology are encouraged to enroll with permission of instructor. Enrollment limited to 12. Offered in alternate academic years. *The Staff*

254. Psychology of Gender. *

Course reviews recent theory, research, and applications in the psychology of gender. Developmental, social-psychological, cultural, and feminist approaches are emphasized. Enrollment restricted to graduate students. *C. Leaper*

256. Psychology of Social Class and Economic Justice. *

Course examines the social psychological antecedents, correlates, and consequences of economic inequality in contemporary U.S. society. The impact of social class on attitudes, beliefs, and behaviors is assessed. Strategies for reducing classist discrimination and improving interclass relations are discussed. Enrollment restricted to graduate students. Enrollment limited to 10. *H. Bullock*

261. Participatory Action Research. *

Participatory Action Research (PAR) is a theoretical standpoint and collaborative methodology that is designed to ensure that those affected by the research project have a voice in that project. Topics include philosophies of science; defining and evaluating PAR; ethics; and reflexivity. Enrollment restricted to graduate students. Enrollment limited to 10. *R. Langhout*

264. Transnational Feminism, Development, and Psychology. *

A transnational feminist lens examines international development as linked to broader ideologies that transform gender relations and enhance women's empowerment. A social-psychology framework brings theoretical and practical import to the issues and examines how research can contribute to social justice and women's human rights. Enrollment restricted to graduate psychology students, or by permission of instructor. *S. Grabe*

290. Proseminar.

Various topics to be offered throughout the year. *The Staff*

290B. Advanced Developmental Research and Writing (2 credits). F,W,S

Tailored to graduate students' interests among topics involving research and scholarship in sociocultural approaches to development, methods for research design, data collection, coding, and analysis, and preparing and reviewing grant proposals and journal manuscripts. Multiple-term course; students receive 6 credits in the third quarter of attendance; the performance evaluation and grade submitted for the final quarter applies to all three quarters. Enrollment restricted to graduate students. May be repeated for credit. *B. Rogoff*

290C. Professional Development (3 credits). *

Designed to aid advanced psychology graduate students with development of competence in professional activities (e.g., preparing a vita, making job and conference presentations, submitting and reviewing manuscripts and grant proposals, professional communication, career decisions). Multiple-term course; students receive 6 credits in the second quarter of attendance; the grade and evaluation submitted for the final quarter applies to the previous quarter. Enrollment restricted to advanced psychology graduate students. May be repeated for credit. *B. Rogoff*

290E. Grant Writing for Psychologists. *

Discusses how to write and put together a grant proposal for psychological research, culminating in a completed proposal. Geared toward more complex proposals (dissertation and higher). Enrollment restricted to psychology graduate students. *J. Fox Tree*

293. Field Study. F,W,S

Student-designed and student-conducted research carried out in field settings. *The Staff*

297. Independent Study. F,W,S

Independent study and research under faculty supervision. *The Staff*

299. Thesis Research. F,W,S

The Staff

(There were no substantive changes to the Queer and Sexuality Studies Program Description from the General Catalog 2010-12.)

Program Description

Scholarship pertaining to the critical study of gender and sexuality can be found across a broad range of departments at UCSC. This presence is manifested in a diverse faculty, in course offerings, and in research programs. Courses with queer content can be found in American studies, anthropology, community studies, feminist studies, film and digital media, history, history of consciousness, legal studies, literature, sociology and theater arts.

For more specialization, departments such as Community Studies, Feminist Studies, and Literature have sufficient flexibility to allow students to design a course of study within those majors to explore these interests. For students who prefer to take a more self-directed approach, there is the option of designing an individual major.

Research activities are sponsored by the Queer Theory research cluster (a part of the Center for Cultural Studies), the Queer and Sexuality Studies Working Group, and many campus departments and student organizations.

The Lionel Cantú GLBTI Resource Center serves as a clearinghouse for queer activities on the UCSC campus. Each quarter, the center prepares a list of all course offerings with queer content. Information is available at <http://queer.ucsc.edu> or via e-mail at queer@ucsc.edu.

More information may be obtained from members of the faculty working group: Anjali Arondekar (Feminist Studies), Carla Freccero (Literature, Feminist Studies, History of Consciousness), Irene Gustafson (Film and Digital Media), Marcia Ochoa (Feminist Studies), B. Ruby Rich (Community Studies and Film and Digital Media), Gabriela Sandoval (Sociology). Additional faculty contacts: Julie Bettie (Sociology), Benjamin Carson (Music), Sheila Crane (History of Art and Visual Culture), Jody Greene (Literature, Feminist Studies), Herbert Lee (Applied Mathematics and Statistics), Peter Limbrick (Film and Digital Media), Catherine S. Ramírez (American Studies), Jenny Reardon (Sociology), Lisa Rofel (Anthropology), Danny Scheie (Theater Arts), Daniel Selden (Literature), Elizabeth Stephens (Art).

Please contact Anjali Arondekar in the department of Feminist Studies in the Humanities Division (aarondek@ucsc.edu) for information about course offerings and resources.

Religious Studies

[Program Description](#) | [Changes to 2010-12 Catalog Highlighted](#)

Religious studies is not a separate program at UCSC, but students interested in the study of religion can select a degree plan from several majors and complement the requirements from a broad array of courses that focus on religion. Majors particularly appropriate for the study of religion at UCSC include the following: anthropology, history, history of art and visual culture, literature, and philosophy. The Department of History of Art and Visual Culture offers a concentration in religion and visual culture.

Students interested in the study of religion may build an independent program of study by fulfilling the requirements of one of the majors listed above and, under the guidance of a member of the faculty, use elective courses to develop a concentration of study appropriate to their interests and needs. One of the following faculty should be contacted to discuss a course of study in religion at UCSC: Murray Baumgarten (literature), Raoul Birnbaum (history of art and visual culture), Gildas Hamel (history), Susan Harding (anthropology), Ralph Quinn (psychology), Ric Otte (philosophy), Triloki N. Pandey (anthropology), Cynthia Polecristi (history), and Marilyn Westerkamp (history). Students seeking information on an individual major in religious studies should contact their college academic preceptor.

Lower-Division Courses

1. Instruction in the Russian Language. F

Aural comprehension, speaking, reading, and writing. Recitation and laboratory. Elementary sequence (1-2-3) begins in the fall quarter only. *The Staff*

2. Instruction in the Russian Language. W

Aural comprehension, speaking, reading, and writing. Recitation and laboratory. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. Prerequisite(s): course 1, or by permission of instructor. *The Staff*

3. Instruction in the Russian Language. S

Aural comprehension, speaking, reading, and writing. Recitation and laboratory. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. Prerequisite(s): course 2, or by permission of instructor. *The Staff*

4. Intermediate Russian. F

Second-year courses designed to improve functional competence in speaking, listening, reading, and writing by activating basic grammar covered in introductory courses. Grammatical explanations and exercises supplemented with short readings and films. Prerequisite(s): course 3; or permission of instructor. (General Education Code(s): CC, IH.) *The Staff*

5. Intermediate Russian. W

Second-year courses designed to improve functional competence in speaking, listening, reading, and writing by activating basic grammar covered in introductory courses. Grammatical explanations and exercises supplemented with short readings and films. Prerequisite(s): course 4; or permission of instructor. (General Education Code(s): CC, IH.) *The Staff*

6. Intermediate Russian. S

Second-year courses designed to improve functional competence in speaking, listening, reading, and writing by activating basic grammar covered in introductory courses. Grammatical explanations and exercises supplemented with short readings and films. Prerequisite(s): course 5, or permission of instructor. (General Education Code(s): CC, IH.) *The Staff*

94. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. *The Staff*

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. *The Staff*

Upper-Division Courses

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. Enrollment limited to 10. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Science Communication

Kresge Annex A
(831) 459-4475
<http://scicom.ucsc.edu>

[Program Description](#) | [Changes to 2010-12 Catalog Highlighted](#) | [Faculty](#) | [Course Descriptions](#)

Program Description

The Science Communication Program is a graduate certificate program composed of one track: science writing. Students combine a background in science with a desire to communicate science to the general public. The program focuses on the practice of conceiving, reporting, writing, and editing articles on scientific, medical, environmental, and technological subjects for newspapers, magazines, and special publications directed at general readers. The program in science writing offers intensive training in news, features, multimedia storytelling, essays, and investigative reporting. Graduates receive a certificate in science writing.

Graduate Certificate in Science Writing

The program accepts 10 students per year. Enrollment in science writing classes is strictly limited to students enrolled in the program. The program consists of one academic year of full-time study, beginning in fall quarter, followed by a full-time internship lasting a minimum of 10 weeks. *Science Notes*, the UCSC online science magazine, is produced annually by the graduate students. Please see the current issue and an archive of past issues on our web site, <http://scicom.ucsc.edu/>.

All students are required to complete at least two part-time internships in parallel with the six required graduate courses taken during the academic year. Internships are supervised by mentors on site, as well as by the program director. The interns earn academic credit for these field-study courses. The curriculum includes writing seminar courses in five distinct areas (news, features, multimedia, essays, and investigative reporting), as well as writing and editing workshops. Six courses from this curriculum, plus two course-equivalent internships, constitute the eight courses required for the graduate certificate. In addition to the academic year coursework, a full-time 10-week (minimum) internship, or an equivalent approved by the program director, is required.

Admission to the Science Writing Graduate Program

Students who have an intimate acquaintance with the theory and practice of science, an aptitude for writing, and a strong desire to communicate science to the general public are ideal candidates for the program. At least a bachelor's degree in science is required for admission. Other admission requirements are: full-time research experience of at least six months duration; official Graduate Record Exam (GRE) General Test scores; and official GRE Subject Test score in one of the following fields: biochemistry, cell and molecular biology, biology, chemistry, computer science, mathematics, or physics. Applicants with a doctor of philosophy (Ph.D.) degree in one of these subjects are granted a waiver of the GRE Subject Test. Applications and instructions can be found online through the UCSC Graduate Division web site at <http://graddiv.ucsc.edu>.

Further Information

Details about the science writing graduate certificate program may be obtained from the Science Communication Program office, the web site, or by sending e-mail to scicom@ucsc.edu.

[Program Description](#) | [Faculty](#) | [Course Descriptions](#)

Upper-Division Courses**160. Introduction to Science Writing. S**

A rigorous examination and practice of the skills involved in writing articles about science, health, technology, and the environment for the general public. Covers the essential elements of news writing and explanatory journalism, including developing a story idea, interviewing scientists, fact checking, composition, and editing of multiple drafts about scientific research. (Also offered as Biology:Ecology & Evolutionary 188. Students cannot receive credit for both courses.)
Prerequisite(s): satisfaction of the Entry Level Writing and C1, C2 requirements. Enrollment restricted to junior and senior physical and biological sciences majors. Enrollment limited to 18.
(General Education Code(s): W.) *R. Irion*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. *The Staff*

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. *The Staff*

Graduate Courses**201A. Reporting and Writing Science News. F**

A survey of the conventions of newspaper journalism and the special application of those conventions to scientific and technological subjects. Enrollment restricted to graduate students formally accepted into the writing track of the Science Communication Program. *K. McLaughlin, M. Desjardins*

201B. The Science Feature. W

A survey of selected feature articles in the current national science magazines, with attention to strategy, level of complexity, explanation technique, and style. Writing assignments include a publishable feature article. Enrollment restricted to graduate students formally accepted into the writing track of the Science Communication Program. *R. Irion*

201C. The Science Essay. W

A survey of science and nature essayists. Purpose, content, form, and style are considered. Writing assignments include original essays on current issues in science, technology, and society. Enrollment restricted to graduate students formally accepted into the writing track of the Science Communication Program. *E. Strauss*

201D. Policy and Investigative Reporting. S

Rigorous examination of techniques for reporting topics where science and technology meet public policy and society. Covers essential skills of investigative reporting, including obtaining documents through Public Records Act requests, using online reporting resources, and writing about ethical and legal issues. Enrollment restricted to graduate students formally accepted into the writing track of the Science Communication Program. *P. Aldhous, M. Mendoza*

201E. Multimedia Science News. S

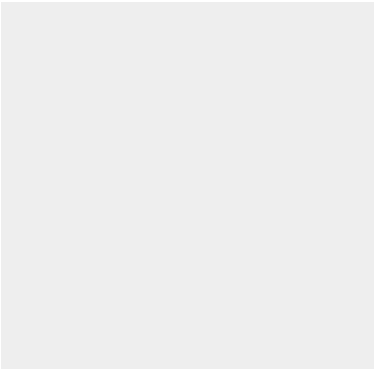

Introduces web-media tools for reporting science stories and enhancing coverage for broad audiences, including video packages, narrated slideshows, podcasts, blogs, and still photography. Laboratory sections address skills for handling equipment and online editing. Enrollment restricted to graduate students formally accepted into the writing track of the Science Communication Program. *R. Irion, M. Miller*

202. Writing and Editing Workshop. *

Theory and practice of writing and editing articles on scientific, medical, environmental, and technological subjects for newspapers, magazines, and special publications directed at non-technical readers. Enrollment restricted to graduate students formally accepted into the writing track of the Science Communication Program. May be repeated for credit. *R. Irion, E. Check-Hayden*

297. Independent Study. F,W,S

A media internship is completed with faculty tutorial assistance, to satisfy a need for the student

when a regular course is not available. Enrollment restricted to graduate students formally accepted into the writing track of the Science Communication Program. May be repeated for credit.
The Staff

*Not offered in 2011-12

Social Documentation

101 Communications Building
(831) 459-3445
socdoc@ucsc.edu
<http://communitystudies.ucsc.edu>,
<http://film.ucsc.edu>

[Program Description](#) | [Changes to 2010-12 Catalog Highlighted](#) | [Faculty](#) | [Course Descriptions](#)

Program Description

This is a crucial time for the documentary, as traditional sources of journalistic investigation and reporting are dwindling, untested opinions dominate the Internet, veracity is under constant attack, and audiences increasingly must search hard to find reliable perspectives on the world. It is at this moment that the Social Documentation (SOC DOC) program has come into being to train the next generation of documentarians in creative and scholarly approaches to experience, representation, and argument. Founded in 2005, the SOC DOC program at UCSC taps faculty across the campus to provide students with access to expertise and crosses traditional disciplinary lines in an effort to ground master of arts (M.A.) students in the deepest understanding of subject as well as medium. SOC DOC has emerged as an exciting new center of gravity for an innovative new discipline. Our students have earned grants and awards for their thesis documentaries, produced around the globe, in film/video, photography, other digital media, and a range of documentary styles. We don't just tell a story; our students go beyond the story to place individuals in context and struggles in history, deepening the public's understanding of the societies in which we live and with which we connect.

The UCSC Social Documentation (housed in the Film and Digital Media Department) program is a two-year, full-time, graduate-level program leading to an M.A. degree. The program offers students a chance to develop expertise in the understanding and production of social documentaries in film/video, multimedia, photography, new digital media. Students may also work in other documentary mediums related to faculty expertise. Students learn how to translate various scholarly interpretations of social life into effective, accessible, and professional quality media projects.

Upon completion of the program, master of arts degree holders will be qualified to enter documentary-related professions such as documentary directing, producing, or editing. Degree holders may work within industries such as public broadcasting, or in the documentary field, as independent producers and artists, or for archival centers or museums or within organizations committed to issues for which documentaries can advance understanding and change. Degree holders may also choose to pursue a doctor of philosophy (Ph.D.) degree in related fields in the arts, humanities, or social sciences.

The program is designed to provide opportunities for the graduate student who is actively committed to social justice to work on a full-time basis beyond the boundaries of the university. Master of arts candidates build a curriculum around a required set of core courses that offer a foundation in the theory and practice of social documentary, elective courses in their substantive area of interest, and the creation of a two-year documentary project that is the final requirement for the degree. Courses and faculty expertise are related to social justice in terms of broad structural and social changes and community-based organizing. Documentaries in the program have called attention to a range of under-recognized communities, problems, and structural inadequacies.

Objectives

The Social Documentation program aims to train its graduates in critical thinking and the use of visual, audio, electronic, and print media, as well as historic presentations and ethnographies, dedicated to the documentation of underrepresented areas of community life. The curriculum concentrates on the analysis of social problems, the creation of a critical approach to the collection and presentation of documentary material, and on the role of effective documentary in social change. For the master's degree, students produce projects of their own: documentaries in film or video; photographic essays (in book, gallery, or cross-platform presentations); multimedia and audio productions; and Internet or other web-platform projects.

Special features of the program include its focus on the study of "ordinary life" and its emphasis on

training students to produce original social analysis in broadly representational forms. The course of study includes training in the techniques of appropriate media and systems of representation. The unique emphasis of the Social Documentation program, however, is the acquisition of a level of academic rigor in the chosen subject of focus, an insistence on humanities and social scientific methodologies, a reliance on an ethical process of production that takes its subjects into full account, and a commitment to research in the development of material for extra-academic uses and audiences. Broadcast and theatrical media have increasingly recognized the importance of ancillary distribution through partnerships with pertinent communities of interest, just as the Internet is increasingly utilized for added depth and community interaction on issues. The Social Documentation program aims to prepare documentarians for newly evolving social media landscapes. At the same time, students receive training in the basic theories of social documentation with the aim of applying these theories to the analysis, prioritization, and solution of social problems.

Graduates are expected to generate work that will have an impact on the world outside the academy and to develop an understanding of documentary practices as well as social codes that can form a foundation for future work in their targeted subject area and arena of practice. The master's project, which constitutes the culmination of the two years of study, is to be given a public exhibition or reading, and becomes the springboard for continuing work after graduation.

Requirements

The Social Documentation program has a required core curriculum around which students develop a plan of study. Each student has two advisers, one for creative guidance and the other for topical expertise, who will be involved in designing each student's study and project plans. Full-time enrollment is required.

A total of 72 credits is required to complete the master's degree in social documentation, comprising a combination of seminars on social documentary and social science research designed specifically for the SOC DOC students, other courses on campus selected by students individually on the basis of relevance to the proposed project, and cohort courses focused on conceptualizing, executing, and completing the students' social documentary master's projects. There are eight required core courses.

Required courses for the first year are as follows:

- 200 *Approaches to Social Documentary*
- 202 *Practice of Social Documentary*
- 208 *Social Science Research and Social Representation*
- 270 *Project Planning*

Required courses for the second year:

- 204 *Ways of Seeing and Hearing*
- 294A *Production, Analysis, Editing*
- 294B *Production, Analysis, Editing*
- 294C *Production, Analysis, Editing*

In addition to these mandatory courses, an additional 32 credits must be secured through electives as identified on an individual basis, offered by other departments, or through independent study classes with or approved by faculty advisers.

To satisfy requirements for the master of arts degree, a student must complete the first year of required courses and electives. By the end of the first year, before summer quarter begins, students will have completed a proposal for their documentary project, which will be the basis for a required oral qualifying examination conducted by the graduate director and faculty advisers. This proposal will include a description of the subject to be documented, a treatment or narrative outline, a work plan including budget and timeline, and a preliminary annotated bibliography and filmography/videography of related works. Approval of the written proposal and satisfactory completion of the qualifying examination is a prerequisite for advancement to further coursework or fieldwork on the master's project. The successful qualifying examination proposal should address the following questions:

- What is the story to be told?
- What is the stylistic approach?
- What is the social analysis that will guide, inform, and underwrite the story?
- How will that analysis be represented in the documentary?
- What kinds of evidence will be generated to persuade the audience that the analysis is accurate?
- How will the documentary use social analysis to make the personal political: how will it move from analysis to critique?

The second year is focused on the final documentary project required for completion of the master's degree. This project must reflect original research and creative activity while demonstrating a command of related previous work by others. With an understanding of budgetary, equipment, and time limitations, students' electronic, digital, and photographic or other projects should reflect a level of quality appropriate for publication, exhibition, or broadcast (including digital/web-cast).

Typically, the expectation in each medium is as follows:

Documentary Film/Video. One 20- to 30-minute documentary suitable for professional distribution and public exhibition.

Documentary Photography. One major exhibition on or off campus with a minimum of 10-20 images with text, and/or a 10-minute multimedia presentation and/or a publication-ready book of photographs and essay(s).

Online/Digital Platform Projects. To be clarified with program chair and advisers, given the evolving nature of this field.

Audio Documentary/Sound Recording. One 20-30-minute documentary suitable for radio broadcast or museum/public installation.

The final examination consists of the public presentation of the project.

In addition, every project must be accompanied by a written essay describing its relationship to its field and must document its research via field notes, bibliographies, archival searches, filmographies, videographies, and photography searches.

All materials will be filed in digital form and archived for future reference and access. All final projects, in every medium, must be submitted in the formats specified by the program chair.

Goals for Social Documentation Graduates

The Social Documentation program prepares graduates with critical skills and professional tools well suited to careers in the evolving fields of documentary media in the private and public sectors, for collaboration on community-based projects, for a range of activities geared to the analysis and documentation of sociopolitical issues, and for work with private and public organizations in need of media expertise and analysis. It is expected that students will make careers in the nonprofit fields evolving to link social justice organizations with media outlets, as well as in a range of public campaigns and initiatives. They will also be well equipped to function as independent documentarians working on behalf of social change within the expanding sectors of media production and representational intervention.

Also, given the emphasis on the histories of the social documentary and on developing methods suitable for contemporary challenges, many graduates are likely to enter the field of education on a part- or full-time basis. The Social Documentation program's teaching assistant (TA) training program, in conjunction with the Film and Digital Media Department, provides graduates with the preparation necessary to exercise pedagogical options.

Social Documentation

~~235 Oakes Academic Building~~~~(831) 459-4706~~[101 Communications Building](#)[\(831\) 459-3445](#)socdoc@ucsc.edu<http://communitystudies.ucsc.edu>, <http://film.ucsc.edu>*Program Description*

This is a crucial time for the documentary, as traditional sources of journalistic investigation and reporting are dwindling, untested opinions dominate the Internet, veracity is under constant attack, and audiences increasingly must search hard to find reliable perspectives on the world. It is at this moment that the Social Documentation (SOC DOC) program has come into being to train the next generation of documentarians in ~~scholarly and~~ creative and scholarly approaches to experience, representation, and argument. Founded in 2005, the SOC DOC program at UCSC taps faculty across the campus to provide students with access to expertise and ~~to cross~~es traditional disciplinary lines in an effort to ground master of arts (M.A.) students in the deepest understanding of subject as well as medium. SOC DOC has emerged as an exciting new center of gravity for ~~this an~~ innovative new discipline. Our students have earned grants and awards for their thesis documentaries, produced around the globe, in film/video, photography, other digital media, and a range of ~~genres~~documentary styles. We don't just tell a story; our students go beyond the story to place individuals in context and struggles in history, deepening the public's understanding of the societies in which we live and with ~~whom which~~ we connect.

The UCSC Social Documentation (housed in the Film and Digital Media Department) program is a two-year, full-time, graduate-level program leading to an M.A. degree. The program offers students a chance to develop expertise in the understanding and production of social documentaries in ~~various mediums, including film/video, audio, multimedia,~~ -photography, and new digital media. Students may also work in other documentary related to faculty expertise. Students learn how to translate various ~~academic scholarly~~ interpretations of social life into effective, accessible, and professional quality ~~products~~media projects.

Upon completion of the program, master of arts degree holders will be qualified to enter documentary-related professions such as documentary directing, producing, or editing. Degree holders may work within industries such as public ~~television, public radio~~broadcasting, or in the documentary ~~film business~~field, as independent producers and artists, or for archival centers or museums or within organizations committed to issues for which documentaries can advance understanding and change. Degree holders may also choose to pursue a doctor of philosophy (Ph.D.) degree in ~~a~~-related fields in the arts, humanities, or social sciences.

The program is designed to provide opportunities for the graduate student who is actively

committed to social justice to work on a full-time basis beyond the boundaries of the university. Master of arts candidates build a curriculum around a required set of core courses that offer a foundation in the theory and practice of social documentary, elective courses in their substantive area of interest, and the creation of a two-year documentary project that is the final requirement ~~of for~~ the degree. Courses and faculty expertise are related to social justice in terms of, and include both broad structural and social changes and community-based organizing. Documentaries in the program have called attention to a range of under-recognized communities, problems, and structural inadequacies.

Objectives

The Social Documentation program aims to train its graduates in critical thinking and the use of visual, audio, electronic, and print media, as well as historic presentations and ethnographies, dedicated to the documentation of underrepresented areas of community life. The curriculum concentrates on the analysis of social problems, the creation of a critical approach ~~in to~~ the collection and presentation of documentary material, and on the role of effective documentary in social change. For the master's degree, students produce ~~documents-projects~~ of their own: documentaries in film or video; ~~oral histories; audio productions;~~ photographic essays (in book, gallery, or cross-platform presentations); multimedia and as well as audio productions; and oral histories; audio productions; extensive oral histories or written ethnographies; historic exhibitions for museum or public display; Internet or other web-platform, DVD or CD-ROM projects,; and/or digital archives.

Special features of the program include its focus on the study of "ordinary life" and its emphasis on training students to produce original social analysis in broadly representational forms. The course of study includes training in the techniques of appropriate media and systems of representation. The unique emphasis of the Social Documentation program, however, is the acquisition of a level of academic rigor in the chosen subject of focus, an insistence on humanities and social scientific methodologies, a reliance on an ethical process of production that takes its subjects into full account, and a commitment to research in the development of material for extra-academic uses and audiences. Broadcast and theatrical media have increasingly recognized the importance of ancillary distribution through partnerships with pertinent communities of interest, just as the Internet is increasingly utilized for added depth and community interaction on issues. The Social Documentation program aims to prepare documentarians for newly evolving social media landscapes. At the same time, students receive training in the basic theories of social documentation with the aim of applying these theories to the analysis, prioritization, and solution of social problems.

Graduates are expected to generate work that will have an impact on the world outside the academy and to develop an understanding of documentary practices ~~and traditions;~~ as well as social codes that can form a foundation for future work in their targeted subject area and arena of practice. The master's project, which constitutes the culmination of the two years of study, ~~will be~~ is to be given a public exhibition or reading, and ~~be becomes~~ the springboard for continuing work after graduation.

Requirements

The Social Documentation program has a required core curriculum around which students develop a plan of study. Each student has two advisers, one for ~~technical-creative~~ guidance and the other for topical expertise, who will be involved in designing each student's study and project plans. Full-time enrollment is required.

A total of 72 credits ~~are is~~ required to complete the master's degree in social documentation, comprising a combination of seminars on social documentary and social science research designed specifically for the ~~social-documentation-graduate~~ SOC DOC

students, other courses on campus selected by students individually on the basis of relevance to the proposed project, and cohort courses focused on conceptualizing, executing, and completing the students' social documentary master's projects. There are eight required core courses.

Required courses for the first year are as follows:

- 200 *Approaches to Social Documentary*
- 202 *Practice of Social Documentary*
- 208 *Social Science Research and Social Representation*
- 270 *Project Planning*

Required courses for the second year:

- 204 *Ways of Seeing and Hearing*
- 294A *Production, Analysis, Editing*
- 294B *Production, Analysis, Editing*
- 294C *Production, Analysis, Editing*

In addition to these mandatory courses, an additional 32 credits must be secured through electives as identified on an individual basis, offered by ~~Community Studies or~~ other departments, or through independent study classes ~~as~~ with or approved by faculty advisers.

To satisfy requirements for the master of arts degree, a student must complete the first year of required courses and electives. By the end of the first year, before summer quarter begins, students will have ~~written-completed~~ a proposal for their documentary project, which will be the basis for a required oral qualifying examination conducted by ~~at least two community studies faculty~~ the graduate director and faculty advisers. This proposal will include a description of the subject to be documented, a treatment or narrative outline, a work plan including budget and timeline, and a preliminary annotated bibliography and filmography/videography of related works. Approval of the written proposal and satisfactory completion of the qualifying examination is a prerequisite for advancement to further coursework or fieldwork on the master's project. The successful qualifying examination proposal should address the following questions:

What is the story to be told?

What is the stylistic approach of? ~~with the documentary project?~~

What is the social analysis that will guide, inform, and underwrite the story?

How will that analysis be represented in the documentary?

What kinds of evidence will be generated to persuade the audience that the analysis is accurate?

~~How will evidence be used either visually or orally?~~

How will the documentary use social analysis to make the personal political: how will it move from analysis to critique?

The second year is ~~largely~~ focused on the final documentary project required for completion of the master's degree. This project must reflect original research and creative activity while demonstrating a command of related previous work by others. With an understanding of budgetary, equipment, and time limitations, students' electronic, digital, and photographic, ~~or written or other~~ projects should reflect a level of quality appropriate

for publication, exhibition, or broadcast (including digital/web-cast).

Typically, the expectation in each medium is as follows:

Documentary Film/Video. One 20- ~~to~~ 30--minute documentary suitable for ~~television broadcast~~professional distribution and public exhibition.

Documentary Photography. One ~~major on-campus showing and one major exhibition on or off campus~~ showing; with a minimum of 10-15-20 page images with text, and/or a 10-minute- multimedia presentation and/or a publication-ready book of photographs and essay(s). ~~accompanying pictorial exhibition.~~

Online/Digital Platform Projects. To be clarified with program chair and advisers, given the evolving nature of this field.

Audio Documentary/Sound Recording. One 20-30-minute documentary suitable for radio broadcast or museum/public installation.

~~*Historic Presentation/Public History.* One on-campus presentation or exhibit and one major off-campus presentation/exhibit of "museum quality."~~

~~*Oral History/Ethnography.* One 75-100 page document.~~

~~*Internet/Digital Presentation or Archive.* To be worked out with program chair, given the evolving nature of this field.~~

The final examination consists of the public presentation of the project.

In addition, every project must be accompanied by a written essay describing its relationship to its field and must documents its research via field notes, bibliographies, archival searches, filmographies, ~~and~~ videographies, and photography searches.

~~These~~ All materials will be filed in digital form and archived for future reference and access. All final projects, in every medium, must be submitted in the formats specified by the program chair.

Goals for Social Documentation Graduates

The Social Documentation program prepares graduates with critical skills and professional tools well suited to careers in the evolving fields of documentary media in the private and public sectors, for collaboration on community-based projects, for a range of activities geared to the analysis and documentation of sociopolitical issues, and for work with private and public organizations in need of media expertise and analysis. It is expected that students will make careers in the nonprofit fields evolving to link social justice organizations with media outlets, as well as in a range of public campaigns and initiatives. They will also be well equipped to function as independent documentarians working on behalf of social change within the expanding sectors of media production and representational intervention.

Also, given the emphasis on the histories of the social documentary and on developing methods suitable for contemporary challenges, many graduates are likely to enter the field of education on a part- or full-time basis. The Social Documentation program's teaching assistant (TA) training program, in conjunction with the Film and Digital Media Department, ~~and opportunities~~ provides graduates with the preparation necessary to exercise ~~such~~ pedagogical options.

Faculty and Professional Interests

Professor

B. RUBY RICH

Documentary film and video, post-9/11 culture, new queer cinema, feminist film history, Latin American and Latin/a cinema, U.S. independent film and video, the essay film, the politics of film festival proliferation and the marketing of foreign films in the U.S.

RENEE TAJIMA-PEÑA

Documentary film and video focusing on Asian American and immigrant communities, media, and social change

Assistant Professor

JOHN JOTA LEAÑOS

Social documentation, social art practice, community arts, documentary animation, Chicana/o art practice and cultural studies, media and cultural studies, subaltern studies, photography, installation art, public art and intervention

Professor

DAVID BRUNDAGE (HISTORY)

American working-class and immigration history, history of U.S. social movements, Irish history and politics

SHARON DANIEL (FILM AND DIGITAL MEDIA)

Community-based public art in information and communications environments, social and political aspects of information technology, community networks, participatory culture, digital inclusion, Net art, human-computer interface design

ROSA-LINDA FREGOSO (LATIN AMERICAN AND LATINO STUDIES)

Human-rights studies; intercultural and transborder feminism; cultural studies; Latina/o and Latin American film and media arts

HERMAN S. GRAY (SOCIOLOGY)

Cultural studies, media and television studies, black cultural politics, social theory

LISBETH HAAS (HISTORY AND FEMINIST STUDIES)

U.S.-Mexico borderlands, Chicano and Native American history, visual culture in the colonial Americas; the U.S. West and California; historical memory, theory, and historical methodology

CRAIG W. HANEY (PSYCHOLOGY)

Applications of social psychological principles to legal settings, assessment of the psychological effects of living and working in institutional environments, social contextual origins of violence, development of alternative legal and institutional forms

GAIL B. HERSHATTER (HISTORY)

Modern Chinese social and cultural history; labor history; gender history, history of sexuality; feminist theory, history, memory, and nostalgia

ELI E. HOLLANDER (FILM AND DIGITAL MEDIA)

Film and video directing; ethnographic documentary directory, editing, cinematography, and videography; digital image generation; screenwriting

CHARLES L. LORD, EMERITUS

LOURDES MARTINEZ-ECHAZABAL (LITERATURE)

Latin American and Caribbean literatures; Afro-Latin American literatures, cultures, and societies; found(n)ational narratives; Brazilian literature; literatures of Cuba and the Cuban diaspora; critical race theory

OLGA NÁJERA-RAMÍREZ (ANTHROPOLOGY)

Folklore theory, ritual, festival, dance, greater Mexican culture, history and folklore, transnationalism, identity; expressive culture, ethnomusicology, bilingual communication, gender, history, and culture of Latin America, the U.S., and Mexico

MARGARET MORSE (FILM AND DIGITAL MEDIA)

Digital and electronic media theory and criticism, media art, media history, technology and culture, film history and theory, German cinema, documentary, science fiction, and silent comedy

ERIC C. PORTER (AMERICAN STUDIES)

Black cultural and intellectual history; U.S. cultural history and cultural studies; comparative ethnic studies; popular music and jazz studies

LISA ROFEL (ANTHROPOLOGY)

Critical theory, anthropology of modernity, popular/public culture, gender and sexuality, transnational capitalism, postcolonial and transnational feminism, China

SHELLEY STAMP (FILM AND DIGITAL MEDIA)

Film history, theory, and criticism; silent cinema; women's filmmaking; film censorship; histories of moviegoing; feminist approaches to cinema

NANCY STOLLER, EMERITA

DANA Y. TAKAGI (SOCIOLOGY)

Social inequality, affect, religion, race, quantitative analysis

KAREN TEI YAMASHITA (LITERATURE)

History and anthropology of Japanese immigration to Brazil; Asian American literature; modern fiction; playwriting

DAVID T. WELLMAN, EMERITUS

Associate Professor

LAWRENCE ANDREWS (FILM AND DIGITAL MEDIA)

Film, video, installation and media art

DAVID HENRY ANTHONY III (HISTORY)

African and African American history, art, music, literature, and cinema; Eastern and Southern Africa; African languages; Indian Ocean world; African and African American linkages; Islamic civilization; African diaspora studies; world history

JENNIFER GONZALEZ (HISTORY OF ART AND VISUAL CULTURE)

Contemporary theories of visual culture, semiotics, critical museum studies, photography, public and activist art in the U.S.

MIRIAM GREENBERG (SOCIOLOGY)

Urban sociology, media studies, cultural studies, political economy, and globalization

IRENE GUSTAFSON (FILM AND DIGITAL MEDIA)

Producing across the boundaries between "theory" and "practice," non-fiction, gender and queer studies; production design

L.S. KIM (FILM AND DIGITAL MEDIA)

Television history and theory, racial discourse, feminist criticism, Asian-American media production, industrial practices and social change in both mainstream Hollywood and alternative media

PETER LIMBRICK (FILM AND DIGITAL MEDIA)

International cinemas; intersections of race, gender, and sexuality; theories of globalization, transnationalism, and postcoloniality; queer theory

GUSTAVO VAZQUEZ (FILM AND DIGITAL MEDIA)

Film and video production, directing, drama, documentary and experimental cross-cultural experiences in film, film curator

WARREN SACK (FILM AND DIGITAL MEDIA)

Software design and media theory

LEWIS WATTS (ART)

Photography

Assistant Professor

MIRIAM GREENBERG (SOCIOLOGY)

Media studies, cultural studies, globalization, political and cultural economies of global cities, video production, and ethnography

IRENE LUSZTIG (FILM AND DIGITAL MEDIA)

Film and video production, experimental documentary, ethnographic film, autobiographical film,

editing

SORAYA MURRAY (FILM AND DIGITAL MEDIA)

New media art, theory, and criticism; visual culture, including digital, film, video, and electronic games; theories of technology and globalization; representation of otherness, migration, citizenship

FELICITY SCHAEFFER-GRABIEL (FEMINIST STUDIES)

Transnational feminism, migration, Latin American/Latino studies, chicana/o studies, Internet, technology and the body, sexuality, gender and globalization

MARCIA OCHOA (FEMINIST STUDIES)

Gender and sexuality, race and ethnicity, Latina/o studies, media and cultural studies, ethnography of media, feminism, queer theory, geography, multimedia production, graphic design, colonialism and modernity, Latin American studies—Colombia and Venezuela

GUSTAVO VAZQUEZ (FILM AND DIGITAL MEDIA)

Film and video production, directing drama, documentary and experimental cross-cultural experiences in film, film curator

YIMAN WANG (FILM AND DIGITAL MEDIA)

Film history and theory; colonial/semi-colonial/postcolonial modes of media production and exchange; border-crossing film remakes; silent cinema; translation theory and cinema; acting theory/practice and ethnic star studies; transnational connections and ramifications of Chinese cinema and documentary; fan culture; East Asian cinemas

MATTHEW WOLF-MEYER (ANTHROPOLOGY)

Anthropology and history of medicine and public health, science studies, American studies, popular culture, the United States and the United Kingdom

Social Documentation

101 Communications Building
(831) 459-3445
socdoc@ucsc.edu
<http://communitystudies.ucsc.edu>, <http://film.ucsc.edu>

[Program Description](#) | [Faculty](#) | [Course Descriptions](#)

Lower-Division Courses**200. Approaches to Social Documentation. F**

Comprehensive review and analysis of documentary strategies aimed at societal critique and social change, evaluating changes in argument, evidence, and process over development of the discipline. (Also offered as Digital Arts and New Media 205. Students cannot receive credit for both courses.) A concurrent media lab is required. Enrollment restricted to social documentation graduate students. Enrollment limited to 15. *B. Rich*

Upper-Division Courses**202. Practice of Social Documentary. F**

Introduction to social documentary genres including video, photography, new media and other mediums, which addresses social-scientific research and methodology in the context of these processes. (Also offered as Digital Arts and New Media 206. Students cannot receive credit for both courses.) A concurrent media lab is required. Enrollment restricted to social documentation graduate students. Enrollment limited to 15. *J. Leanos*

Graduate Courses**204. Ways of Seeing and Hearing. F**

Graduate-level advanced seminar explores ways that seeing, hearing, and knowing are influenced by culture, power, race, and other factors. Readings emphasize how documentary subjects are constituted and known, addressing questions of epistemology, social constructivism, objectivity, and method. (Also offered as Digital Arts and New Media 204. Students cannot receive credit for both courses.) Enrollment restricted to social documentation and digital arts new media graduate students. *M. Ochoa*

208. Social Science Research and Social Representation. W

Designed to acquaint students with how social science research represents social reality and how social documentarians represent social reality. Designed to encourage comparison among different modes of social science research and between social science and different modes of social documentation representations of social life. Enrollment restricted to social documentation graduate students. Enrollment limited to 15. *The Staff*

220. Oral History. *

Introduction to the theory and practice of oral history. Seminar participants read foundational texts in oral history, historical memory, public history, and social documentary. Students conduct two oral-history interviews; write synthesis essays; and complete a seminar paper. Concurrent enrollment in course 291 required. Enrollment restricted to graduate students. Enrollment limited to 15. *The Staff*

270. Project Planning for the Social Documentary. S

Workshop seminar in project planning focusing on the form and content of the documentary project; research and preproduction; technical, financial, and logistical plans; and coordination with subjects and resources. Enrollment restricted to social documentation graduate students. Enrollment limited to 15. *R. Tajima-Pena*

280. Video Production of the Social Documentary. W

Intensive directing and producing course that covers conceptualization, research, treatment and proposal writing, interview technique, camera, editing, production, and distribution. (Also offered as Digital Arts and New Media 207. Students cannot receive credit for both courses.) A concurrent media lab is required. Enrollment restricted to social documentation graduate students. Open to qualified undergraduates with permission of instructor. Enrollment limited to 15. *The Staff*

290. Special Topics in Social Documentation. F

Designed to provide supplemental instruction on specific topical and/or technical matters related to social documentation. Topics include technical standards and innovations within the field of social documentation, documentary subjects, location production, and/or the work of individual professional documentarians. (Also offered as Digital Arts and New Media 208. Students cannot receive credit for both courses.) Enrollment restricted to social documentation graduate students. Enrollment limited to 15. May be repeated for credit. *The Staff*

291. Media Laboratory for Social Documentation (2 credits). F,W,S

Individual training in a social documentation medium under the guidance of a faculty supervisor. Course is intended to be taken concurrently with social documentation courses requiring a laboratory course. Enrollment restricted to social documentation and digital arts and new media graduate students. Enrollment limited to 10. May be repeated for credit. *The Staff*

292. Special Topics (2 credits). F,W,S

Provides supplemental instruction on specific topical and/or technical matters related to social documentation. Topics include technical standards, artistic strategies, and innovations within the field of social documentation, documentary subjects, and/or work of individual professional documentarians. Enrollment restricted to graduate students. Enrollment limited to 15. May be repeated for credit. *The Staff*

294A. Production/Analysis/Editing. F

Workshop seminar oriented toward actual fieldwork, production, and preparation for editing of the thesis project in the student's chosen genre. Techniques of collection and recording, analysis, preparation, and editing taught. Enrollment restricted to social documentation graduate students. Enrollment limited to 15. *The Staff*

294B. Production/Analysis/Editing. W

Workshop seminar oriented toward the editing and creative assemblage of the thesis project in the student's chosen genre. Techniques of preparation, exhibition, and editing taught. Enrollment restricted to social documentation graduate students. Enrollment limited to 15. *B. Rich*

294C. Production/Analysis/Editing. S

Social documentation students in the final phase of completing their master's thesis receive guidance in shaping their projects, receive feedback, and are taught key elements of structure and narrative at a time when the demand for clarity and social documentation exposition is crucial. Prerequisite(s): courses 294A and 294B. Enrollment restricted to social documentation graduate students. *G. Vazquez*

295. Project Completion. F,W,S

Individualized study for second-year graduate students working on and completing their final projects. Limited to students enrolled in the social documentation program during their final quarter of study. May be repeated for credit. *(FWS) The Staff*

297. Independent Study. F,W,S

Study either related to a course being taken or a totally independent study. Enrollment restricted to graduate students. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

*Not offered in 2011-12

(There were no substantive changes to the Social Sciences Program Description from the General Catalog 2010-12.)

Program Description

The Division of Social Sciences focuses on the study of human relationships and society. As global economic and political changes transform the world around us, social scientists help us meet the challenges and opportunities of the 21st century.

Our nine departments offer more than 40 undergraduate and graduate degree programs, including many that are interdisciplinary collaborations. Our faculty members conduct leading-edge research in their fields, frequently working with students in research clusters linking departments to our research centers. We also offer extensive opportunities for experiential learning through field studies.

Our research, teaching, and state-of-the-art facilities provide students with a comprehensive and rigorous education that prepares them for productive careers and further academic pursuits. For more information on the division, see our web site at: <http://socialsciences.ucsc.edu/>.

Upper-Division Courses

194A. UCDC Internship Research Seminar. F,W,S

Weekly seminar that focuses on the production of a major research paper or equivalent scholarly undertaking connected to an internship in Washington, D.C., government, non-profit, or private institution. Seminar stresses institutional analysis, the development of bibliographic expertise in the use of Washington-based resources, and participant-observer skills. Required for participants in the UCDC program. Required for and enrollment restricted to students participating in the UCDC Program. Enrollment limited to 22. *The Staff*

194B. UCDC Internship Seminar (7 credits). F,W,S

A 30- to 36-hour-per-week internship in a Washington, D.C., government, non-profit, or private institution. Required for and enrollment restricted to UCDC program participants. (Formerly *UCDC Internship and Internship Seminar*.) Enrollment limited to 22. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

A program of directed study arranged with a Social Sciences Division faculty member. Enrollment restricted to participants in the UCDC program. *The Staff*

199F. Tutorial (2 credits). F,W,S

A program of directed study arranged with participating faculty. Class time is proportionally less than a 5-credit course. Enrollment restricted to participants in the UCDC program. *The Staff*

Sociology

226 College Eight
(831) 459-4306
<http://sociology.ucsc.edu>

[Program Description](#) | [Changes to 2010-12 Catalog Highlighted](#) | [Faculty](#) | [Course Descriptions](#)

Program Description

Sociology is the study of social interactions among individuals and social groups. More specifically, sociologists examine the cultural, ideological, economic and political contexts of human action including the processes whereby social institutions are created, maintained, and transformed.

Sociology was born as an intellectual response to the democratic and industrial revolutions that ushered in the modern era. As such, it considers how society is organized in relationship to a vision of a just, free, and equal society—a vision that may require fundamental social change. Developing an understanding of both social change and social justice as part of the sociological tradition is one of the teaching goals of sociologists at UCSC. In the process, we expect to develop in students an appreciation for the craft of social science: disciplined inquiry, observation, and research as part of informed global citizenship.

Sociology faculty members are engaged in research on a wide range of topics, such as medicine and technology; labor studies; the intersection of class, race, gender and sexualities; environmental sociology; sociology of emotion and affect; queer studies; the cultural politics of sex work; globalization and international development; black cultural politics; Latino and Chicano studies; the politicization of religion; drugs in society; global inequality, crime, and deviance; international law; legal institutions; sustainability; popular culture and cultural studies; media studies; urban studies; political economy; critical ethnography; discourse and conversational analysis; identities and identity changes; and social movements. Sociology faculty use a number of approaches and methods, including ethnography, comparative and historical analysis, conversational and discourse analysis, qualitative interviews, and survey research.

Because of the interdisciplinary emphasis among sociology faculty, undergraduates find the department amenable for double majors and minors, and non-majors find many sociology courses of interest. In recent years, students have conducted independent studies and written senior theses on a variety of subjects including the social construction of gender, emerging professions in health care, utopian communities, human development in Costa Rica, mass communication, the social effects of war, family violence, sustainable development in Bolivia, sanitation in Kenya and Haiti, street children in India, African soccer players in Europe, gay and lesbian families, Latino educational success, and cross-cultural family welfare policies.

The sociology major at UCSC is a rigorous program of study that retains enough flexibility to accommodate students with diverse career goals and plans. It ensures that all students are trained in the main theoretical and methodological traditions of sociology, yet permits considerable variation in students' own areas of specialization. The major provides the necessary intellectual foundation for students who are considering graduate studies in sociology and related social sciences. It also can be used as preparation for careers in fields as diverse as law, social work, management, environmental planning, public service, education, health services, journalism, and counseling. Finally, the sociology major can provide a general liberal education for undergraduates interested in the study of contemporary society and social problems.

Global Information and Social Enterprise Studies (GISES) is an innovative service learning program developed in collaboration with the Global Information Internship Program (GIIP). It aspires to create a new generation of well-trained advocates for social justice and sustainable development who use the tools of information technology and social enterprise to solve global problems. Practically, student projects engage with local and global organizations to democratize globalization, deepen social justice, reduce poverty, support digital education, and advance the transition to a sustainable world. By combining the spirit of social entrepreneurship with innovative information technologies, GISES students reduce the digital divide by strengthening the informational, communication and organizational capacity of schools, community organizations, and non-governmental organizations (NGOs). The GISES program provides an excellent foundation for students pursuing careers in non-profit management, social advocacy, and education. Depending on a student's major, there are two ways to enter the GISES program. If a student is a sociology major and wishes to participate in GISES, she or he should declare the intensive sociology major. A student who majors in any field other than sociology should declare GISES as a minor.

Admission into the General Sociology Major, Intensive Sociology Major, Combined LALS Major, Sociology Minor, or GISES Minor

The Sociology Department offers three undergraduate majors: 1) a general sociology major; 2) an intensive sociology major; and 3) a combined major with Latin American and Latino studies. Additionally, there are two minors, one in sociology and one in GISES.

Students must take three courses prior to petitioning for entry to the general sociology major: Sociology 1, *Introduction to Sociology*, Sociology 10, *Issues and Problems in American Society*, and Sociology 15, *World Society*. Students with a grade point average (GPA) of 3.0 or above for these three courses will be allowed to declare the sociology major.

Students must take six courses prior to petitioning for entry to the intensive sociology major: Sociology 1 *Introduction to Sociology*, Sociology 10, *Issues and Problems in American Society*; Sociology 15, *World Society*; Sociology 30A, *Introduction to Global Information and Social Enterprise Studies*; Sociology 30B, *Designing ICT Projects for Social Enterprises*; and Sociology 30C, *Project Implementation and Grant Writing for Social Entrepreneurs*. To be considered for admission to the intensive major, students are required to obtain a GPA of 3.0 or above in these courses and submit a list of seven upper-division courses they propose to complete the upper-division elective requirement, including a brief statement of justification for how each elective contributes to the specific project they will complete for Sociology 196G, *Project Practicum*.

Students must take two of the following three courses, Sociology 1, 10 or 15, prior to petitioning for entry to the sociology/Latin American and Latino studies major. Students with a GPA of 3.0 or above for these two courses will be allowed to declare the combined major. (If a student takes all three courses, calculation of the GPA will be based on the two highest grades.)

Students must take one of the following three courses, Sociology 1, 10, or 15 prior to petitioning for entry to the sociology minor. Students who receive a grade of B or higher in this course will be allowed to declare the sociology minor. (If a student takes more than one of these three courses, admission to the minor will be based on the highest grade in the courses taken.)

Students must take four courses prior to petitioning for entry to the GISES minor: Sociology 15, *World Society*; Sociology 30A, *Introduction to Global Information and Social Enterprise Studies*; Sociology 30B, *Designing ICT Projects for Social Enterprises*; and Sociology 30C, *Project Implementation and Grant Writing for Social Entrepreneurs*. To be considered for admission to the GISES minor, students are required to obtain a GPA of 3.0 or above in these courses and submit a list of four upper-division courses they propose to complete the upper-division elective requirement, including a brief statement of justification for how each elective contributes to the specific project they will complete for Sociology 196G, *Project Practicum*.

Equivalent courses may be taken at other universities or at community colleges.

Students should take Sociology 1, 10, 15, 30A, 30B, and 30C for letter grades.

Courses for which the grade of W is given are not counted in the computation of the GPA. The department will evaluate grades for repeated courses following the university's grading policy for repeated courses.

Students may petition for admission to the major by filling out the campus's Declaration of Major form, and by supplying evidence of their performance in the required lower-division courses. For specific details, refer to the Sociology Department web site, sociology.ucsc.edu, or the department's undergraduate adviser.

Transfer students who cannot complete Sociology 1, 10, and 15 before university policy requires them to declare a major will be allowed to declare if they have taken at least two of the three courses (or their equivalent) listed above (at UCSC, at another university, or at a community college) with an overall GPA of 3.0. Transfer students allowed to declare under this rule are expected to complete all three courses with an overall minimum GPA of 3.0. Transfer students will be subject to disqualification from the major if they subsequently do not achieve an overall 3.0 GPA in courses 1, 10, and 15 or their equivalent.

Appeal of Negative Decisions

Students must submit appeals of negative decisions to the Sociology Department in writing within 30 days of notification of denial of entrance into the major. Letters of appeal should describe any extenuating circumstances that might have affected the student's record.

Requirements for the General Sociology Major

For more details, students may consult the sociology handbook, available online at <http://sociology.ucsc.edu>, or at the department office, 226 College Eight.

Sociology majors are required to take a total of 13 courses (three prescribed lower-division courses in preparation for the major, four prescribed upper-division core courses, and six upper-division electives). In addition, they must successfully complete the comprehensive requirement prior to graduation.

Lower-division preparation. All sociology majors are required to take the following three courses or their equivalents.

1, *Introduction to Sociology*

10, *Issues and Problems in American Society*

15, *World Society*

Upper-division core courses. The following four sociology courses are required as the foundation of theoretical and methodological training in the discipline. Students are encouraged to take these courses early in their academic career.

103A, *Statistical Methods*

103B, *The Logic and Methods of Social Inquiry*

105A, *Classical Sociological Theory*

105B, *Contemporary Sociological Theory*

Upper-division advanced coursework. Six additional upper-division sociology courses are required. The Sociology Department offers upper-division electives that reflect a wide range of ideas within the discipline and the diversified research interests of the faculty. Refer to the *Sociology Department Undergraduate Handbook* or the *Sociology Undergraduate Adviser* for a list of recommended courses within a specific specialization.

- Comprehensive requirement. Prior to graduation, all sociology majors are required to complete one of the following comprehensive requirements.
- Senior thesis. The prerequisite for the senior thesis is course 103B. Students who would like to write a senior thesis must submit to their preferred faculty thesis sponsor a proposal that includes a one- to three-page abstract and draft research plan or design, a brief bibliography, and evaluations from relevant courses. The proposal must be submitted by the second week of the quarter, four quarters before graduation. Students unsuccessful in obtaining a thesis sponsor through these means may submit their proposals to the department's undergraduate education committee (UEC) by the fourth week of spring quarter. UEC members will review the merits of these proposals and assign the ones they approve to faculty members who have not yet agreed to serve as thesis advisers for the following year. Students will be notified of the outcome of the UEC's deliberations by the end of spring quarter.
- Capstone course. Sociology 196A, *Capstone: The Sociologist as Public Intellectual*. Upper-division lecture course that explores public sociology and integrates current research with theoretical strands in sociology.

In exceptional cases, students unable to take the senior capstone course may be allowed to substitute a portfolio of work. This substitution must be approved in advance, by the department chair. The portfolio option consists of: 1) portfolio of materials from (at least) three upper-division sociology courses; 2) a synthetic essay; 3) a paper consisting of new research by the student on some contemporary social or political issue, analyzed using the theoretical and empirical materials from those three courses. See the department for additional information.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The goals of the Sociology Department's disciplinary communication are to teach students to think critically by designing, evaluating, and analyzing existing or proposed research studies to create knowledge through synthesizing and integrating information from a variety of sources pertaining to a complex social problem, and to develop and apply evidence-based writing skills. Course 103B, *The Logic and Methods of Social Inquiry*, satisfies the Disciplinary Communication Requirement for students in programs administered by the Sociology Department. Combined majors with Latin American and Latino Studies should refer to the Latin American and Latino Studies Department for their Disciplinary Communication requirement.

Sociology Major Planner One

The following is a recommended academic plan for students to begin the sociology major.

Plan One

Year	Fall	Winter	Spring
1st (frsh)	SOCY 1	SOCY 15	SOCY 10
2nd (soph)	SOCY 105A	SOCY 103A	SOCY 103B
		SOCY 105B	

Sociology Major Planner Two

The following is a recommended academic plan for transfer students entering the sociology major as juniors. It is assumed that course 1 and course 10 equivalencies were completed at the previous college.

Students Beginning in Fall Quarter

Plan Two

Year	Fall	Winter	Spring
3rd (jr)	SOCY 15	SOCY 103A	SOCY 103B
	SOCY 105A	SOCY 105B	

Students Beginning in Winter Quarter

Plan Two

Year	Fall	Winter	Spring
3rd (jr)		SOCY 15	SOCY 103B
		SOCY 103A	
4th (sr)	SOCY 105A	SOCY 105B	

All majors must complete the remaining six upper-division courses in their junior and senior years.

Requirements for the Intensive Sociology Major

The intensive major is an option for students wishing to major in sociology and focus in the area of Global Information and Social Enterprise Studies (GISES). The global information and enterprise studies intensive sociology major is sponsored and administered by the Department of Sociology. This major is designed for highly motivated, self-directed and enterprising students who have demonstrated the capacity to design and complete an honors-quality project for a civil society group. Students are required to take a total of 18 courses (six prescribed lower-division courses in preparation for the major, four prescribed upper-division core courses, seven upper-division electives, and a project practicum course). In addition, they must successfully complete the comprehensive requirement prior to graduation.

Lower-division preparation. Students must take the following six courses or their equivalents.

1, *Introduction to Sociology*

10, *Issues and Problems in American Society*

15, *World Society*

30A, *Introduction to Global Information and Social Enterprise Studies*

30B, *Designing ICT Projects for Social Enterprises*

30C, *Project Implementation and Grant Writing for Social Entrepreneurs*

Upper-division core courses. The following four sociology courses are required as the foundation of theoretical and methodological training in the discipline. Students are encouraged to take these courses early in their academic career.

103A, *Statistical Methods*

103B, *The Logic and Methods of Social Inquiry*

105A, *Classical Sociological Theory*

105B, *Contemporary Sociological Theory*

Upper-division advanced coursework. Seven additional upper-division courses are required. The student's choice of electives must be approved either by the student's project adviser or by the director of GISES at the time of submitting the major declaration.

Project practicum. Students must enroll in Sociology 196G Project Practicum and complete their GISES capstone project. Contact the Sociology Department undergraduate adviser for more detailed guidelines regarding the GISES capstone project. At least one quarter before expected graduation, students are required to submit electronically a polished, focused, and concise GISES project proposal (five-page maximum), to the director of GISES and the sociology undergraduate adviser. The project proposal constitutes a prerequisite for enrolling in SOCY 196G.

The final GISES capstone project must make an unambiguous contribution to advancing a solution to a problem associated with global social justice and/or sustainable development. The project must be associated with a real, viable civil society organization, community organization, school or non-governmental organization (NGO). To complete the final requirements for GISES major or minor, the integrated project—narrative and digital deliverable—must be mounted on the appropriate web-enabled database managed by the Global Information Internship Program (GIIP).

Disciplinary Communication (DC) Requirement. All students are required to satisfy the Disciplinary Communications Requirement in their major. The goals of the Sociology Department's disciplinary communication are to teach students to think critically by designing, evaluating, and analyzing existing or proposed research studies; to create knowledge through synthesizing and integrating information from a variety of sources pertaining to a complex social problem; and to develop and apply evidence-based writing skills. Course 103B, *The Logic and Methods of Social Inquiry*, satisfies the Disciplinary Communication Requirement for students in sociology programs.

Comprehensive requirement. Prior to graduation, students are required to complete one of the following comprehensive requirements.

- Senior thesis. The prerequisite for the senior thesis is course 103B. Students who would like to write a senior thesis must submit to their preferred faculty thesis sponsor a proposal that includes a one- to three-page abstract and draft research plan or design, a brief bibliography, and evaluations from relevant courses. The proposal must be submitted by the second week of the quarter, four quarters before graduation. Students unsuccessful in obtaining a thesis sponsor through these means may submit their proposals to the department's undergraduate education committee (UEC) by the fourth week of spring quarter. UEC members will review the merits of these proposals and assign the ones they approve to faculty members who have not yet agreed to serve as thesis advisers for the following year. Students will be notified of the outcome of the UEC's deliberations by the end of spring quarter.
- Capstone course. Sociology 196A, *Capstone: The Sociologist as Public Intellectual*. Upper-division lecture course that explores public sociology and integrates current research with theoretical strands in sociology.

In exceptional cases, students unable to take the senior capstone course may be allowed to substitute a portfolio of work. This substitution must be approved in advance by the department chair. The portfolio option consists of: 1) portfolio of materials from (at least) three upper-division sociology courses; 2) a synthetic essay; 3) a paper consisting of new research by the student on some contemporary social or political issue, analyzed using the theoretical and empirical materials from those three courses. See the department for additional information.

Requirements for the Combined Major in Sociology and Latin American and Latino Studies

Students may choose to declare a combined major in sociology and Latin American and Latino studies. The requirements (listed below) should be examined carefully before choosing the combined major option. Both departments must approve a study plan before the major can be declared. Once the lower-division sociology courses have been completed, students may petition to declare the combined major. Each department determines major and thesis honors separately.

Language Study

Students must demonstrate proficiency in Spanish or Portuguese equivalent to the completion of Spanish 6 or 56 or Spanish for Spanish Speakers 63 or Portuguese 65A-B.

Sociology/Latin American and Latino Studies

Students are required to take a total of 14 courses and to satisfy a senior comprehensive requirement. There are three lower-division course requirements, two from the Sociology Department and one from the Latin American and Latino Studies Department. The lower-division LALS courses must be LALS 1 or 80; transfer students may petition to replace LALS 1 or 80 with an appropriate course from another institution. Upper-division requirements include seven core courses: LALS 100, 100A, 100B; Sociology 103A, 103B, 105A, and 105B; and four additional elective courses, two from sociology and two from Latin American and Latino studies. At least one of the Latin American and Latino studies upper-division courses must be taught in Spanish or Portuguese***, and at least one course in the sociology/Latin American and Latino studies combined major must be on Chicano/a-Latino/a issues. Up to three relevant courses taken through study abroad programs from which credits are transferable to UCSC may be credited toward the major when the content is deemed appropriate by the faculty advisers of both sociology and Latin American and Latino studies. Students can satisfy the comprehensive requirement in one of three ways: 1) writing a senior thesis; 2) passing an appropriate LALS *Senior Seminar* (194 series); or 3) completing two additional sociology upper-division courses in the area of *Inequality and Social Change* (refer to the sociology undergraduate adviser for the specific list of courses). If the thesis option is selected, it should be planned in consultation with an adviser from each department, completed under the supervision of a faculty member from either department, and read and approved by both advisers; one adviser is sufficient if this faculty member belongs to both departments.

***Upper-division courses in Portuguese are currently not taught at UCSC and must be taken elsewhere.

Honors in the Major

The Sociology Department awards honors in the major based on the student's cumulative GPA for all courses taken to satisfy the program's major requirements. Students with a GPA of 3.75 or above will be considered for honors in the major. Students with a GPA of 3.9 or above will be considered for highest honors in the major. No more than approximately 15 percent of graduating

class will be considered for honors or highest honors in the major.

Requirements for the Sociology Minor

Students minoring in sociology are required to take seven courses: one of courses 1, 10, or 15; at least two of courses 103B, 105A, and 105B; and at least four other upper-division sociology courses. Students must provide evidence of completion of the lower-division requirement, courses 1, 10, or 15 with a grade of B or better, prior to declaring the sociology minor.

Requirements for the GISES Minor

Students minoring in GISES are required to take nine courses (four prescribed lower-division courses in preparation for the minor, four upper-division electives, and a project practicum course). The four lower-division requirements are courses 15, 30A, 30B and 30C. The student's choice of four upper-division electives must be approved either by the student's project adviser or by the director of GISES at the time the minor is declared. Students must take Sociology 196G, *Project Practicum*, and complete their GISES capstone project. See description for the project practicum under Requirements for the Intensive Major.

Disqualification Policy

Students who receive a D, F, NP, or W twice in any of the upper-division core courses (courses 103A, 103B, 105A, and 105B) will be disqualified from the major or minor. Students, their college, and the Office of the Registrar will be notified by the department no later than the first day of instruction of the quarter following the disqualifying failure. Students who feel there were extenuating circumstances surrounding their failure of a course for the second time may appeal their disqualification by submitting a letter to the chair of the sociology undergraduate education committee. The appeal must be filed no later than 15 days after the disqualification notification was mailed, or the 10th day of classes in the quarter of the disqualification, whichever is later. For further information regarding the disqualification process, contact the Sociology Department.

UC Education Abroad Program Students

Academic year programs. Students must declare the major and pass the three lower-division preparatory course requirements (1, 10, and 15) and three of the upper-division core courses (103B, 105A, 105B) prior to study abroad. It is recommended that the students have the courses intended to be taken abroad reviewed and approved by the Sociology Department prior to departure. Up to three approved courses may be used toward the sociology major.

Semester programs. Fall semester: students must declare the major and pass the three lower-division preparatory course requirements (courses 1, 10, and 15) and one upper-division core course (105A) prior to fall semester study abroad. Spring semester: students must declare the major and pass the three lower-division course requirements (courses 1, 10, and 15) and two upper-division core courses (103B and 105B) prior to spring semester study abroad.

Up to three relevant courses taken through study abroad programs from which credits are transferable to UCSC may be used toward satisfaction of the major requirements when the content is deemed appropriate and approved by the Sociology Department.

Transfer Students

Junior transfer students expressing an interest in sociology on their UCSC application for admission are admitted as proposed sociology majors. This status is considered undeclared. Transfer students must meet with the sociology undergraduate adviser when they arrive on campus to determine their status and begin the actual declaration of major process, which must be completed by the end of the second quarter of the junior year for transfer students.

Declaring sociology early in the academic career will give a student priority for sociology course enrollment in subsequent quarters.

Graduate Program

The graduate program in sociology at UCSC distinguishes itself by its interdisciplinary nature. The program is designed to educate students in sociological theory and methods and in the disciplines major substantive areas while simultaneously exposing students to other arenas of intellectual inquiry that will aid them as they pursue their research questions and interests. After completing a group of required courses, students work closely with individual faculty members in designing their own course of study. The program leads to a doctor of philosophy (Ph.D.) degree in sociology. A master of arts (M.A.) degree may be taken *en route* to the doctorate, but a master's program *per se* is not available.

The core curriculum is divided into two parts, 1) basic grounding in sociological theory and methods, and 2) exposure to research in three areas of concentration: a) globalization, political economy, and environment; b) inequality and identity; and c) culture, knowledge, and power. To prepare students to conduct their own research projects, the department trains student in multiple methods—comparative and historical analysis, quantitative techniques, field research, and interpretive methods.

The sociology graduate program is intended to lead to both academic and nonacademic careers,

and the interests of the faculty reflect this twofold objective. Faculty specialties include comparative and historical sociology; construction of deviance; criminal justice; cultural sociology; development; economy and society; education; emotions/affect; environmental sociology; globalization; language and social linguistics; law and society; Marxist sociology; mass communication; medical sociology; policy analysis; political economy; qualitative methodology; race, class, gender, sexuality; science and technology studies; social inequality; social movements; sociology of drugs; sociology of knowledge; and visual sociology.

Graduate students are supported through teaching assistantships, teaching fellowships, research fellowships and other grant/fellowship opportunities. A number of faculty receive research grants that support graduate student research assistantships, most recently, for example, the National Science Foundation Science and Justice Fellowships.

When asked what they most appreciate about the sociology graduate program, most students cite the students' and faculty's activism and commitment to social change in combination with their dedication to teaching, scholarly research, and understanding of the social forces of our society. The Sociology Department's colloquium series enhances scholarship, practice, and collegial networks. The diversity in age, ethnicity, and work experience of the student body creates a vibrant atmosphere for learning

Many of the faculty in the Sociology Department have affiliations with other departments and programs on campus, and the graduate program consequently encourages interdisciplinary work. Seminars in the anthropology, environmental studies, history, history of consciousness, politics, psychology, and feminist studies programs are open to sociology students. Graduate students in sociology may obtain a designated emphasis on the sociology Ph.D. diploma indicating that they have specialized in a specific field in addition to sociology, such as feminist studies, Latin American and Latino studies, environmental studies, philosophy, or education. Students must meet requirements for the designated emphasis as spelled out by the relevant department. For a complete list of programs that offer a designated emphasis, refer to the fields of study in the General Catalog. Students also participate in research projects under the auspices of seven interdisciplinary social science research centers: the Science and Justice Working Group; the Center for Agroecology and Sustainable Food Systems; the Center for Global, International, and Regional Studies; the Chicano/Latino Research Center; the Center for Research on Educational Diversity and Excellence; and the Santa Cruz Center for International Economics. Research opportunities also are available in the areas of environmental studies, feminist studies, and lesbian/gay/queer studies.

Many of our graduate students present papers at professional conferences and publish articles during the course of their graduate studies. The sociology master's paper is designed to prepare students to write for professional journals. Ongoing faculty seminars focusing on concrete research topics and problems are available for advanced graduate students working on papers and dissertations in related areas.

The sociology program provides graduate students with many teaching opportunities so they can practice the skills required for good teaching—the ability to articulate ideas, to organize and present materials in logical sequence, and to listen attentively and discern someone else's comprehension. Graduate students serve as teaching assistants for at least three quarters in the department's core classes of the undergraduate curriculum.

The Sociology Department at UCSC is intellectually innovative, both in its interdisciplinary approach and in its commitment to inquiry that is engaged with the world beyond the university.

Required Courses

Students are required to take at least 12 courses as follows.

A three-course core group:

201 *The Making of Classical Theory*

202 *Contemporary Sociological Theory*

203 *Sociological Methods*

Two methods courses:

204 *Methods of Quantitative Analysis*

and one of the following seven courses:

205 *Field Research Methods*

206 *Comparative Historical Methods*

209 *Analysis of Cultural Forms*

241 *Cross-National and Cross-Cultural Research*

242 *Feminist Research Seminar*

Psychology 248 *Survey Methods*; or Sociology 282

Social Policy Research

Three area foundation courses:

220 *Global Transformation: Macrosociological Perspectives*

240 *Inequality and Identity*

260 *Culture, Knowledge, Power*

At least one writing course (208 or 250)

A minimum of three elective graduate seminars, at least one from Sociology (excluding Sociology 250 and Sociology 293).

Students with no background in statistics are strongly advised to take an undergraduate course in statistical methods before enrolling in *Methods of Quantitative Analysis*, but can be admitted with permission of the instructor.

Progress Toward the Ph.D.

- Beginning at least by the end of the first year, students initiate work on their master's paper.
- Completion of the master's paper is expected by the end of the second year.
- Students are expected to take an oral qualifying examination by the end of the third year, but no later than the end of the fourth year.
- Graduate students prepare field statements in two distinct areas of sociology and, in addition, prepare a detailed course outline and a grant proposal in one or the other of these areas.
- The qualifying examination is an oral examination and based on the student's field statements.
- After passing the qualifying examination, a student is advanced to candidacy and begins work on the dissertation with the aid of a three-person dissertation committee.

Details of the policies for admission to the graduate program, the requirements for the Ph.D. degree, and information on financial support opportunities are available from the Department of Sociology. For more information, refer to the Graduate Studies section of the catalog.

Designated Emphasis in Sociology

To receive the Designated Emphasis (DE) in Sociology, a graduate student from another department must complete the following requirements in addition to the degree requirements for the doctorate in their degree-granting department. Students must initiate the request for the DE through their home departments. Then the student must meet with the Sociology graduate director who will: a) decide whether to approve the application; b) help find a Sociology faculty adviser; and c) oversee progress in the Designated Emphasis.

Adviser: In addition to the student's adviser(s) in their home department, the student must have a faculty adviser from among the core faculty of the Sociology Department who commits to serve on the qualifying examination (QE) committee. Outside members of a QE committee must be tenured.

Courses: The student must take five (5) Sociology graduate seminar courses:

Two (2) core courses:

SOCY 201	The Making of Classical Theory
SOCY 202	Contemporary Sociological Theory

One (1) methods course from the following:

SOCY 203	Sociological Methods
SOCY 204	Methods of Quantitative Analysis
SOCY 205	Field Research Methods
SOCY 206	Comparative Historical Methods
SOCY 209	The Analysis of Cultural Forms
SOCY 241	Cross-National and Cross Cultural Research
SOCY 242	Feminist Research Seminar
SOCY 282	Social Policy Research

Two (2) other graduate seminar electives* offered by the Sociology Department

*SOCY 208, SOCY 250, SOCY 293, SOCY 297, SOCY 299 cannot be counted toward the requirements for the Designated Emphasis.

All courses must be offered by the Sociology Department. Courses offered by other departments do not count towards the requirements for the Designated Emphasis in Sociology.

Writing: The student must prepare a significant piece of scholarly writing in the area of sociology. This may take the form of a substantial seminar paper, a master's essay, a paper submitted for publication, or a chapter of the doctoral dissertation. The student's Sociology faculty adviser will determine whether a particular piece of writing meets the requirement.

Graduate students interested in pursuing the Designated Emphasis in Sociology should contact the Sociology graduate program coordinator.

226 College Eight

(831) 459-4306

<http://sociology.ucsc.edu>***Program Description***

Sociology is the study of social interactions among individuals and social groups. More specifically, sociologists examine the cultural, ideological, economic and political contexts of human action including the processes whereby social institutions are created, maintained, and transformed.

Sociology was born as an intellectual response to the democratic and industrial revolutions that ushered in the modern era. As such, it considers how society is organized in relationship to a vision of a just, free, and equal society—a vision that may require fundamental social change. Developing an understanding of both social change and social justice as part of the sociological tradition is one of the teaching goals of sociologists at UCSC. In the process, we expect to develop in students an appreciation for the craft of social science: disciplined inquiry, observation, and research as part of informed global citizenship.

Sociology faculty members are engaged in research on a wide range of topics, such as medicine and technology; labor studies; the intersection of class, race, gender and sexualities; environmental sociology; sociology of emotion and affect; queer studies; the cultural politics of sex work; globalization and international development; black cultural politics; Latino and Chicano studies; the politicization of religion; drugs in society; global inequality, crime, and deviance; international law; legal institutions; sustainability; popular culture and cultural studies; media studies; urban studies; political economy; critical ethnography; discourse and conversational analysis; identities and identity changes; and social movements. Sociology faculty use a number of approaches and methods, including ethnography, comparative and historical analysis, conversational and discourse analysis, qualitative interviews, and survey research.

Because of the interdisciplinary emphasis among sociology faculty, undergraduates find the department amenable for double majors and minors, and non-majors find many sociology courses of interest. In recent years, students have conducted independent studies and written senior theses on a variety of subjects including the social construction of gender, emerging professions in health care, utopian communities, human development in Costa Rica, mass communication, the social effects of war, family violence, sustainable development in Bolivia, sanitation in Kenya and Haiti, street children in India, African soccer players in Europe, gay and lesbian families, Latino educational success, and cross-cultural family welfare policies.

The sociology major at UCSC is a rigorous program of study that retains enough flexibility to accommodate students with diverse career goals and plans. It ensures that all students are trained in the main theoretical and methodological traditions of sociology, yet permits

considerable variation in students' own areas of specialization. The major provides the necessary intellectual foundation for students who are considering graduate studies in sociology and related social sciences. It also can be used as preparation for careers in fields as diverse as law, social work, management, environmental planning, public service, education, health services, journalism, and counseling. Finally, the sociology major can provide a general liberal education for undergraduates interested in the study of contemporary society and social problems.

Global Information and Social Enterprise Studies (GISES) is an innovative service learning program developed in collaboration with the Global Information Internship Program (GIIP). It aspires to create a new generation of well-trained advocates for social justice and sustainable development who use the tools of information technology and social enterprise to solve global problems. Practically, student projects engage with local and global organizations to democratize globalization, deepen social justice, reduce poverty, support digital education, and advance the transition to a sustainable world. By combining the spirit of social entrepreneurship with innovative information technologies, GISES students reduce the digital divide by strengthening the informational, communication and organizational capacity of schools, community organizations, and non-governmental organizations (NGOs). The GISES program provides an excellent foundation for students pursuing careers in non-profit management, social advocacy, and education. Depending on a student's major, there are two ways to enter the GISES program. If a student is a sociology major and wishes to participate in GISES, she or he should declare the intensive sociology major. A student who majors in any field other than sociology should declare GISES as a minor.

Admission into the General Sociology Major, Intensive Sociology Major, Combined LALS Major, Sociology Minor, or GISES Minor

The Sociology Department offers three undergraduate majors: 1) a general sociology major; 2) an intensive sociology major; and 3) a combined major with Latin American and Latino studies. Additionally, there are two minors, one in sociology and one in GISES.

Students must take three courses prior to petitioning for entry to the general sociology major: Sociology 1, *Introduction to Sociology*, Sociology 10, *Issues and Problems in American Society*, and Sociology 15, *World Society*. Students with a grade point average (GPA) of 3.0 or above for these three courses will be allowed to declare the sociology major.

Students must take six courses prior to petitioning for entry to the intensive sociology major: Sociology 1, *Introduction to Sociology*, Sociology 10, *Issues and Problems in American Society*; Sociology 15, *World Society*; Sociology 30A, *Introduction to Global Information and Social Enterprise Studies*; Sociology 30B, *Designing ICT Projects for Social Enterprises*; and Sociology 30C, *Project Implementation and Grant Writing for Social Entrepreneurs*. To be considered for admission to the intensive major, students are required to obtain a GPA of 3.0 or above in these courses and submit ~~a self-evaluation including a one to two page project plan with their declaration of the intensive major. The project plan will summarize their performance in Sociology 30A, 30B and 30C, including a description of their technology skills (e.g. web design or database applications), an assessment of their completed projects and a rough draft proposal describing their capstone project for Sociology 196G.~~ a list of seven upper-division courses they propose to complete the upper-division elective requirement, including a brief statement of justification for how each elective contributes to their specific project they will complete for Sociology 196G, *Project Practicum*.

Students must take two of the following three courses, Sociology 1, 10 or 15, prior to

petitioning for entry to the sociology/Latin American and Latino studies major. Students with a GPA of 3.0 or above for these two courses will be allowed to declare the combined major. (If a student takes all three courses, calculation of the GPA will be based on the two highest grades.)

Students must take one of the following three courses, Sociology 1, 10, or 15 prior to petitioning for entry to the sociology minor. Students who receive a grade of B or higher in this course will be allowed to declare the sociology minor. (If a student takes more than one of these three courses, admission to the minor will be based on the highest grade in the courses taken.)

Students must take four courses prior to petitioning for entry to the GISES minor: Sociology 15, *World Society*; Sociology 30A, *Introduction to Global Information and Social Enterprise Studies*; Sociology 30B, *Designing ICT Projects for Social Enterprises*; and Sociology 30C, *Project Implementation and Grant Writing for Social Entrepreneurs*. To be considered for admission to the GISES minor, students are required to obtain a GPA of 3.0 or above in these courses and submit ~~a self-evaluation including a one-to-two-page project plan with their declaration of the minor. The project plan will summarize their performance in Sociology 30A, 30B and 30C, including a description of their technology skills (e.g. web design or database applications), an assessment of their completed projects and a rough draft proposal describing their capstone project for Sociology 196G.~~ a list of 4four upper-division courses they propose to complete the upper-division elective requirement, including a brief statement of justification for how each elective contributes to their specific project they will complete for Sociology 196G, *Project Practicum*.

Equivalent courses may be taken at other universities or at community colleges.

Students should take Sociology 1, 10, 15, 30A, 30B, and 30C for letter grades. ~~For courses taken on a pass-no pass basis, the department will use the narrative evaluation in its assessment of eligibility for the major.~~

Courses for which the grade of W is given are not counted in the computation of the GPA. The department will evaluate grades for repeated courses following the university's grading policy for repeated courses.

Students may petition for admission to the major by filling out the campus's Declaration of Major form, and by supplying evidence of their performance in the required lower-division courses. For specific details, refer to the Sociology Department web site, sociology.ucsc.edu, or the department's undergraduate adviser.

Transfer students who cannot complete Sociology 1, 10, and 15 before university policy requires them to declare a major will be allowed to declare if they have taken at least two of the three courses (or their equivalent) listed above (at UCSC, at another university, or at a community college) with an overall GPA of 3.0. Transfer students allowed to declare under this rule are expected to complete all three courses with an overall minimum GPA of 3.0. Transfer students will be subject to disqualification from the major if they subsequently do not achieve an overall 3.0 GPA in courses 1, 10, and 15 or their equivalent.

Appeal of Negative Decisions

Students must submit appeals of negative decisions to the Sociology Department in writing within 30 days of notification of denial of entrance into the major. Letters of appeal should describe any extenuating circumstances that might have affected the student's record.

Requirements for the General Sociology Major

For more details, students may consult the sociology handbook, available online at <http://sociology.ucsc.edu>, or at the department office, 226 College Eight.

Sociology majors are required to take a total of 13 courses (three prescribed lower-division courses in preparation for the major, four prescribed upper-division core courses, and six upper-division electives). In addition, they must successfully complete the comprehensive requirement prior to graduation.

Lower-division preparation. All sociology majors are required to take the following three courses or their equivalents.

1, *Introduction to Sociology*

10, *Issues and Problems in American Society*

15, *World Society*

Upper-division core courses. The following four sociology courses are required as the foundation of theoretical and methodological training in the discipline. Students are encouraged to take these courses early in their academic career.

103A, *Statistical Methods*

103B, *The Logic and Methods of Social Inquiry*

105A, *Classical Sociological Theory*

105B, *Contemporary Sociological Theory*

Upper-division advanced coursework. Six additional upper-division sociology courses are required. The Sociology Department offers upper-division electives that reflect a wide range of ideas within the discipline and the diversified research interests of the faculty. Refer to the *Sociology Department Undergraduate Handbook* or the *Sociology Undergraduate Adviser* for a list of recommended courses within a specific specialization.

- Comprehensive requirement. Prior to graduation, all sociology majors are required to complete one of the following comprehensive requirements.
- Senior thesis. The prerequisite for the senior thesis is course 103B. Students who would like to write a senior thesis must submit to their preferred faculty thesis sponsor a proposal that includes a one- to three-page abstract and draft research plan or design, a brief bibliography, and evaluations from relevant courses. The proposal must be submitted by the second week of the quarter, four quarters before graduation. Students unsuccessful in obtaining a thesis sponsor through these means may submit their proposals to the department's undergraduate education committee (UEC) by the fourth week of spring quarter. UEC members will review the merits of these proposals and assign the ones they approve to faculty members who have not yet agreed to serve as thesis advisers for the following year. Students will be notified of the outcome of the UEC's deliberations by the end of spring quarter.
- Capstone course. Sociology 196A, *Capstone: The Sociologist as Public Intellectual*. Upper-division lecture course that explores public sociology and integrates current research with theoretical strands in sociology.

In exceptional cases, students unable to take the senior capstone course may be allowed to substitute a portfolio of work. This substitution must be approved in advance, by the department chair. The portfolio option consists of: 1) portfolio of materials from (at least) three upper-division sociology courses; 2) a synthetic essay; 3) a paper consisting of new research by the student on some contemporary social or political issue, analyzed using the theoretical and empirical materials from those three courses. See the department for additional information.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The goals of the Sociology Department's disciplinary communication are to teach students to think critically by designing, evaluating, and analyzing existing or proposed research studies to create knowledge through synthesizing and integrating information from a variety of sources pertaining to a complex social problem, and to develop and apply evidence-based writing skills. Course 103B, *The Logic and Methods of Social Inquiry*, satisfies the Disciplinary Communication Requirement for students in programs administered by the Sociology Department. Combined majors with Latin American and Latino Studies should refer to the Latin American and Latino Studies Department for their Disciplinary Communication requirement.

Sociology Major Planner One

The following is a recommended academic plan for students to begin the sociology major.

Plan One			
Year	Fall	Winter	Spring
1st (frsh)	SOCY 1	SOCY 15	SOCY 10
2nd (soph)		SOCY 103A	SOCY 103B

Sociology Major Planner Two

The following is a recommended academic plan for transfer students entering the sociology major as juniors. It is assumed that course 1 and course 10 equivalencies were completed at the previous college.

Students Beginning in Fall Quarter

Plan Two			
Year	Fall	Winter	Spring
3rd (jr)	SOCY 15	SOCY 103A	SOCY 103B
	SOCY 105A	SOCY 105B	

Students Beginning in Winter Quarter

Plan Two			
----------	--	--	--

Year	Fall	Winter	Spring
3rd (jr)		SOCY 15	SOCY 103B
		SOCY 103A	
4th (sr)	SOCY 105A	SOCY 105B	

All majors must complete the remaining six upper-division courses in their junior and senior years.

Requirements for the Intensive Sociology Major

The intensive major is an option for students wishing to major in sociology and focus in the area of Global Information and Social Enterprise Studies (GISES). The global information and enterprise studies intensive sociology major is sponsored and administered by the Department of Sociology. This major is designed for highly motivated, self-directed and enterprising students who have demonstrated the capacity to design and complete an honors-quality project for a civil society group. Students are required to take a total of 18 courses (six prescribed lower-division courses in preparation for the major, four prescribed upper-division core courses, seven upper-division electives, and a project practicum course). In addition, they must successfully complete the comprehensive requirement prior to graduation.

Lower-division preparation. Students must take the following six courses or their equivalents.

1, *Introduction to Sociology*

10, *Issues and Problems in American Society*

15, *World Society*

30A, *Introduction to Global Information and Social Enterprise Studies*

30B, *Designing ICT Projects for Social Enterprises*

30C, *Project Implementation and Grant Writing for Social Entrepreneurs*

Upper-division core courses. The following four sociology courses are required as the foundation of theoretical and methodological training in the discipline. Students are encouraged to take these courses early in their academic career.

103A, *Statistical Methods*

103B, *The Logic and Methods of Social Inquiry*

105A, *Classical Sociological Theory*

105B, *Contemporary Sociological Theory*

Upper-division advanced coursework. Seven additional upper-division courses are required. The student's choice of electives must be approved either by the student's project adviser or by the director of GISES at the time of submitting the major declaration.

Project practicum. Students must enroll in Sociology 196G Project Practicum and complete their GISES capstone project. At least one quarter before expected graduation, students are required to submit electronically a polished, focused, and concise GISES project proposal (five-page maximum), to the director of GISES and the sociology undergraduate adviser. The project proposal constitutes a pre-requisite for enrolling in SOCY 196G.

The final GISES capstone project must make an unambiguous contribution to advancing a solution to a problem associated with global social justice and/or sustainable development. The project must be associated with a real, viable civil society organization, community organization, school or non-governmental organization (NGO). To complete the final requirements for GISES major or minor, the integrated project—narrative and digital deliverable—must be mounted on the appropriate web-enabled database managed by the Global Information Internship Program (GIIP).

Contact the Sociology Department undergraduate adviser for more detailed guidelines regarding the GISES capstone project.

Disciplinary Communication (DC) Requirement. All students are required to satisfy the Disciplinary Communications Requirement in their major. The goals of the Sociology Department's disciplinary communication are to teach students to think critically by designing, evaluating, and analyzing existing or proposed research studies; to create knowledge through synthesizing and integrating information from a variety of sources pertaining to a complex social problem; and to develop and apply evidence-based writing skills. Course 103B, *The Logic and Methods of Social Inquiry*, satisfies the Disciplinary Communication Requirement for students in sociology programs.

Comprehensive requirement. Prior to graduation, students are required to complete one of the following comprehensive requirements.

- Senior thesis. The prerequisite for the senior thesis is course 103B. Students who would like to write a senior thesis must submit to their preferred faculty thesis sponsor a proposal that includes a one- to three-page abstract and draft research plan or design, a brief bibliography, and evaluations from relevant courses. The proposal must be submitted by the second week of the quarter, four quarters before graduation. Students unsuccessful in obtaining a thesis sponsor through these means may submit their proposals to the department's undergraduate education committee (UEC) by the fourth week of spring quarter. UEC members will review the merits of these proposals and assign the ones they approve to faculty members who have not yet agreed to serve as thesis advisers for the following year. Students will be notified of the outcome of the UEC's deliberations by the end of spring quarter.
- Capstone course. Sociology 196A, *Capstone: The Sociologist as Public Intellectual* Upper-division lecture course that explores public sociology and integrates current research with theoretical strands in sociology.

In exceptional cases, students unable to take the senior capstone course may be allowed to substitute a portfolio of work. This substitution must be approved in advance by the department chair. The portfolio option consists of: 1) portfolio of materials from (at least) three upper-division sociology courses; 2) a synthetic essay; 3) a paper consisting of new research by the student on some contemporary social or political issue, analyzed using the theoretical and empirical materials from those three courses. See the department for additional information.

Requirements for the Combined Major in Sociology and Latin American and Latino Studies

Students may choose to declare a combined major in sociology and Latin American and

Latino studies. The requirements (listed below) should be examined carefully before choosing the combined major option. Both departments must approve a study plan before the major can be declared. Once the lower-division sociology courses have been completed, students may petition to declare the combined major. Each department determines major and thesis honors separately.

Language Study

Students must demonstrate proficiency in Spanish or Portuguese equivalent to the completion of Spanish 6 or 56 or Spanish for Spanish Speakers 63 or Portuguese 65A-B.

Sociology/Latin American and Latino Studies

Students are required to take a total of 14 courses and to satisfy a senior comprehensive requirement. There are three lower-division course requirements, two from the Sociology Department and one from the Latin American and Latino Studies Department. The lower-division LALS courses must be LALS 1 or 80; transfer students may petition to replace LALS 1 or 80 with an appropriate course from another institution. Upper-division requirements include seven core courses: LALS 100, 100A, 100B; Sociology 103A, 103B, 105A, and 105B; and four additional elective courses, two from sociology and two from Latin American and Latino studies. At least one of the Latin American and Latino studies upper-division courses must be taught in Spanish or Portuguese***, and at least one course in the sociology/Latin American and Latino studies combined major must be on Chicano/a-Latino/a issues. Up to three relevant courses taken through study abroad programs from which credits are transferable to UCSC may be credited toward the major when the content is deemed appropriate by the faculty advisers of both sociology and Latin American and Latino studies. Students can satisfy the comprehensive requirement in one of three ways: 1) writing a senior thesis; 2) passing an appropriate LALS *Senior Seminar* (194 series); or 3) completing ~~the sociology course option of~~ two additional sociology upper-division courses in the area of Inequality and Social Change ~~-(refer to the Sociology Undergraduate Adviser for the specific list of courses)~~. If the thesis option is selected, it should be planned in consultation with an adviser from each department, completed under the supervision of a faculty member from either department, and read and approved by both advisers; one adviser is sufficient if this faculty member belongs to both departments.

***Upper-division courses in Portuguese are currently not taught at UCSC and must be taken elsewhere.

Honors in the Major

The Sociology Department awards honors in the major based on the student's cumulative GPA for all courses taken to satisfy the program's major requirements. Students with a GPA of 3.75 or above will be considered for honors in the major. Students with a GPA of 3.9 or above will be considered for highest honors in the major. No more than approximately 15 percent of graduating class will be considered for honors or highest honors in the major.

Requirements for the Sociology Minor

Students minoring in sociology are required to take seven courses: one of courses 1, 10, or 15; at least two of courses 103B, 105A, and 105B; and at least four other upper-division sociology courses. Students must provide evidence of completion of the lower-division requirement, courses 1, 10, or 15 with a grade of B or better, prior to declaring the sociology minor.

Requirements for the GISES Minor

Students minoring in GISES are required to take nine courses (four prescribed lower-division courses in preparation for the minor, four upper-division electives, and a project

practicum course). The four lower-division requirements are courses 15, 30A, 30B and 30C. The student's choice of four upper-division electives must be approved either by the student's project adviser or by the director of GISES at the time the minor is declared. Students must take Sociology 196G, *Project Practicum*, and complete their GISES capstone project. See description for the project practicum under Requirements for the Intensive Major.

Disqualification Policy

Students who receive a D, F, NP, or W twice in any of the upper-division core courses (courses 103A, 103B, 105A, and 105B) will be disqualified from the major or minor. Students, their college, and the Office of the Registrar will be notified by the department no later than the first day of instruction of the quarter following the disqualifying failure. Students who feel there were extenuating circumstances surrounding their failure of a course for the second time may appeal their disqualification by submitting a letter to the chair of the sociology undergraduate education committee. The appeal must be filed no later than 15 days after the disqualification notification was mailed, or the 10th day of classes in the quarter of the disqualification, whichever is later. For further information regarding the disqualification process, contact the Sociology Department.

UC Education Abroad Program Students

Academic year programs. Students must declare the major and pass the three lower-division preparatory course requirements (1, 10, and 15) and three of the upper-division core courses (103B, 105A, 105B) prior to study abroad. It is recommended that the students have the courses intended to be taken abroad reviewed and approved by the Sociology Department prior to departure. Up to three approved courses may be used toward the sociology major.

Semester programs. Fall semester: students must declare the major and pass the three lower-division preparatory course requirements (courses 1, 10, and 15) and one upper-division core course (105A) prior to fall semester study abroad. Spring semester: students must declare the major and pass the three lower-division course requirements (courses 1, 10, and 15) and two upper-division core courses (103B and 105B) prior to spring semester study abroad.

Up to three relevant courses taken through study abroad programs from which credits are transferable to UCSC may be used toward satisfaction of the major requirements when the content is deemed appropriate and approved by the Sociology Department.

Transfer Students

Junior transfer students expressing an interest in sociology on their UCSC application for admission are admitted as proposed sociology majors. This status is considered undeclared. Transfer students must meet with the sociology undergraduate adviser when they arrive on campus to determine their status and begin the actual declaration of major process, which must be completed by the end of the second quarter of the junior year for transfer students.

Declaring sociology early in the academic career will give a student priority for sociology course enrollment in subsequent quarters.

Graduate Program

The graduate program in sociology at UCSC distinguishes itself by its interdisciplinary nature. The program is designed to educate students in sociological theory and methods and in the disciplines major substantive areas while simultaneously exposing students to other arenas of intellectual inquiry that will aid them as they pursue their research

questions and interests. After completing a group of required courses, students work closely with individual faculty members in designing their own course of study. The program leads to a doctor of philosophy (Ph.D.) degree in sociology. A master of arts (M.A.) degree may be taken *en route* to the doctorate, but a master's program *per se* is not available.

The core curriculum is divided into two parts, 1) basic grounding in sociological theory and methods, and 2) exposure to research in three areas of concentration: a) globalization, political economy, and environment; b) inequality and identity; and c) culture, knowledge, and power. To prepare students to conduct their own research projects, the department trains student in multiple methods—comparative and historical analysis, quantitative techniques, field research, and interpretive methods.

The sociology graduate program is intended to lead to both academic and nonacademic careers, and the interests of the faculty reflect this twofold objective. Faculty specialties include comparative and historical sociology; construction of deviance; criminal justice; cultural sociology; development; economy and society; education; emotions/affect; environmental sociology; globalization; language and social linguistics; law and society; Marxist sociology; mass communication; medical sociology; policy analysis; political economy; qualitative methodology; race, class, gender, sexuality; science and technology studies; social inequality; social movements; sociology of drugs; sociology of knowledge; and visual sociology.

Graduate students are supported through teaching assistantships, teaching fellowships, research fellowships and other grant/fellowship opportunities. A number of faculty receive research grants that support graduate student research assistantships, most recently, for example, the National Science Foundation Science and Justice Fellowships.

When asked what they most appreciate about the sociology graduate program, most students cite the students' and faculty's activism and commitment to social change in combination with their dedication to teaching, scholarly research, and understanding of the social forces of our society. The Sociology Department's colloquium series enhances scholarship, practice, and collegial networks. The diversity in age, ethnicity, and work experience of the student body creates a vibrant atmosphere for learning

Many of the faculty in the Sociology Department have affiliations with other departments and programs on campus, and the graduate program consequently encourages interdisciplinary work. Seminars in the anthropology, environmental studies, history, history of consciousness, politics, psychology, and feminist studies programs are open to sociology students. Graduate students in sociology may obtain a ~~parenthetical notation~~ designated emphasis on the sociology Ph.D. diploma indicating that they have specialized in a specialized specific field in addition to sociology, such as feminist studies, Latin American and Latino studies, environmental studies, philosophy, or education. Students must meet requirements for the designated emphasis as spelled out by the relevant department. ~~and their committee members.~~ For a complete list of programs that offer a designated emphasis, refer to the fields of study in the General Catalog. Students also participate in research projects under the auspices of seven interdisciplinary social science research centers: the Science and Justice Working Group; the Center for Agroecology and Sustainable Food Systems; the Center for Global, International, and Regional Studies; ~~the Center for Justice, Tolerance, and Community;~~ the Chicano/Latino Research Center; the Center for Research on Educational Diversity and Excellence; and the Santa Cruz Center for International Economics. Research opportunities also are available in the areas of environmental studies, feminist studies, and lesbian/gay/queer studies.

Many of our graduate students present papers at professional conferences and publish articles during the course of their graduate studies. The sociology master's paper is

designed to prepare students to write for professional journals. Ongoing faculty seminars focusing on concrete research topics and problems are available for advanced graduate students working on papers and dissertations in related areas.

The sociology program provides graduate students with many teaching opportunities so they can practice the skills required for good teaching—the ability to articulate ideas, to organize and present materials in logical sequence, and to listen attentively and discern someone else's comprehension. Graduate students serve as teaching assistants for at least three quarters in the department's core classes of the undergraduate curriculum.

The Sociology Department at UCSC is intellectually innovative, both in its interdisciplinary approach and in its commitment to inquiry that is engaged with the world beyond the university.

Required Courses

Students are required to take at least 12 courses as follows.

A three-course core group:

201 The Making of Classical Theory

202 Contemporary Sociological Theory

203 Sociological Methods

Two methods courses:

204 Methods of Quantitative Analysis

and one of the following seven courses:

205 Field Research Methods

206 Comparative Historical Methods

209 Analysis of Cultural Forms

241 Cross-National and Cross-Cultural Research

242 Feminist Research Seminar

Psychology 248 Survey Methods; or Sociology 282

Social Policy Research

Three area foundation courses:

220 Global Transformation: Macrosociological Perspectives

240 Inequality and Identity

260 Culture, Knowledge, Power

At least one writing course (208 or 250)

A minimum of three elective graduate seminars, at least one from Sociology (excluding Sociology 250 and Sociology 293).

Students with no background in statistics are strongly advised to take an undergraduate course in statistical methods before enrolling in *Methods of Quantitative Analysis*, but can be admitted with permission of the instructor.

Progress Toward the Ph.D.

- **Beginning at least by the end of the first year, students initiate work on their master's paper.**

- Completion of the master's paper is expected by the end of the second year.
- Students are expected to take an oral qualifying examination by the end of the third year, but no later than the end of the fourth year.
- Graduate students prepare field statements in two distinct areas of sociology and, in addition, prepare a detailed course outline and a grant proposal in one or the other of these areas.
- The qualifying examination is an oral examination and based on the student's field statements.
- After passing the qualifying examination, a student is advanced to candidacy and begins work on the dissertation with the aid of a three-person dissertation committee.

Details of the policies for admission to the graduate program, the requirements for the Ph.D. degree, and information on financial support opportunities are available from the Department of Sociology. For more information, refer to the Graduate Studies section of the catalog.

Designated Emphasis in Sociology

To receive the Designated Emphasis (DE) in Sociology, a graduate student from another department must complete the following requirements in addition to the degree requirements for the doctorate in their degree-granting department. Students must initiate the request for the DE through their home departments. Then the student must meet with the Sociology graduate director who will: a) decide whether to approve the application; b) help find a Sociology faculty adviser; and c) oversee progress in the Designated Emphasis.

Adviser: In addition to the student's adviser(s) in their home department, the student must have a faculty adviser from among the core faculty of the Sociology Department who commits to serve on the qualifying examination (QE) committee. Outside members of a QE committee must be tenured.

-

Courses: The student must take five (5) Sociology graduate seminar courses:

Two (2) core courses:

SOCY 201 *The Making of Classical Theory*

SOCY 202 *Contemporary Sociological Theory*

One (1) methods course from the following:

SOCY 203 *Sociological Methods*

SOCY 204 *Methods of Quantitative Analysis*

SOCY 205 *Field Research Methods*

SOCY 206 *Comparative Historical Methods*

SOCY 209 *The Analysis of Cultural Forms*

SOCY 241 *Cross-National and Cross Cultural Research*

SOCY 242 *Feminist Research Seminar*

SOCY 282 *Social Policy Research*

Two (2) other graduate seminar electives* offered by the Sociology Department

*SOCY 208, SOCY 250, SOCY 293, SOCY 297, SOCY 299 cannot be counted towards the

requirements for the Designated Emphasis.

All courses must be offered by the Sociology Department. Courses offered by other departments do not count towards the requirements for the Designated Emphasis in Sociology.

Writing: The student must prepare a significant piece of scholarly writing in the area of sociology. This may take the form of a substantial seminar paper, a master's essay, a paper submitted for publication, or a chapter of the doctoral dissertation. The student's Sociology faculty adviser will determine whether a particular piece of writing meets the requirement.

Graduate students interested in pursuing the Designated Emphasis in Sociology should contact the Sociology graduate program coordinator.

[Program Description](#) | [Faculty](#) | [Course Descriptions](#)

Faculty and Professional Interests

Professor

DANE ARCHER, Emeritus

JOHN BROWN CHILDS, Emeritus

BEN CROW

International development, sociology of water and markets, global inequality, South Asia and East Africa, political economy, and green enterprise

E. MELANIE DUPUIS

Economic sociology, sociology of consumption, sociology of development, political sociology, sociology of the environment, technological change, historical sociology, social theory, food and social change

WILLIAM H. FRIEDLAND, Emeritus

HIROSHI FUKURAI

Global jury systems; deliberative democracy and lay participation in law; wrongful conviction and acquittal; advanced quantitative methods; survey and research

WALTER L. GOLDFRANK, Emeritus

HERMAN S. GRAY

Cultural studies, media and television studies, black cultural politics, social theory

PAUL M. LUBECK

Political sociology; political economy of development, globalization, labor and work; logics of methodology; religion and social movements; Islamic society and identities; information and networks

DENNIS C. McELRATH, Emeritus

MARCIA MILLMAN

Social psychology, the family, sociology of emotions, field research methods, sociology of medicine

JAMES R. O'CONNOR, Emeritus

CRAIG REINARMAN

Political sociology; law, crime, and social justice; drugs and society

PAMELA ANN ROBY, Emerita

DANA Y. TAKAGI

Social inequality, affect, religion, race, quantitative analysis

ANDREW SZASZ

Environmental sociology (environmental movements, policy, environmental justice); theory

CANDACE WEST

Language and social interaction, sex and gender, conversation analysis, microanalysis and medicine, animals and society

Associate Professor

JULIE BETTIE

Cultural studies and popular culture; race/ethnicity, class, and cultural politics; gender, sexuality, and cultural politics; critical ethnography, autoethnography, and visual ethnography

DEBORAH GOULD

Political emotion; social movements and contentious politics; classic and contemporary social theory; sexualities; lesbian/gay/queer studies; feminist and queer theory

MIRIAM GREENBERG

Urban sociology, media studies, cultural studies, political economy, and globalization

STEVEN MCKAY

Work; technology and labor markets; globalization and social change; race, ethnicity and migration; political sociology; ethnography/qualitative methods

JENNIFER E. REARDON

Issues of social identity as influenced by the new sciences of genetics and genomics; intersection of the sociology of science and knowledge and the sociology of race, gender, and class

HELEN SHAPIRO

Political economy, Latin American economic history and development (with an emphasis on Brazil), industrial policy, the auto industry, the state and transnational corporations

Lecturer

FRANCESCA GUERRA

Comparative-historical sociology, race and ethnicity, social justice, poverty, law, crime, deviance, asylum and prison architecture, religious non-profits, history of eugenics, disability studies, mass media, oral history, and qualitative and quantitative research methods

WENDY MARTYNA

Social psychology, death and dying, gender, social change, family and youth

Professor

BARBARA L. EPSTEIN (History of Consciousness)

Social movements and theories of social movements, 20th-century U.S. politics and culture, Marxism and related theories of social change

NANCY STOLLER, EMERITA (Community Studies)

MARK TRAUOGOTT (History)

Social and economic history, 19th-century France, French revolutions, European working class, historical methods, workers' autobiographies

DAVID WELLMAN, EMERITUS (Community Studies)

Working-class culture, American ethnic and racial diversity, social documentary studies, critical race theory, interrogations of whiteness, and qualitative research methods

Associate Professor

JULIE GUTHMAN (Community Studies)

Sustainable agriculture and alternative food movements, international political economy of food and agriculture, politics of obesity, political ecology, race and food, critical human geography

Assistant Professor

SHANNON GLEESON (Latin American and Latino Studies)

Migrant populations, the effects of documentation status, labor rights, civic engagement, inequality & stratification, political sociology, law & society, mixed methods & comparative approaches

[Program Description](#) | [Faculty](#) | [Course Descriptions](#)

Lower-Division Courses

1. Introduction to Sociology. F,S

A systematic study of social groups ranging in size from small to social institutions to entire societies. Organized around the themes of social interaction, social inequality, and social change. Fulfills lower-division major requirement. (General Education Code(s): IS.) *C. Reinerman, F. Guerra*

10. Issues and Problems in American Society. W,S

Exploration of nature, structure, and functionings of American society. Explores the following: social institutions and economic structure; the successes, failures, and intractabilities of institutions; general and distinctive features of American society; specific problems such as race, sex, and other inequalities; urban-rural differences. Fulfills lower-division major requirement. (General Education Code(s): IS.) *J. Reardon, M. Greenberg, D. Gould*

15. World Society. F,W

Introduction to comparative and historical sociology. Focuses on the global integration of human society. Examines social changes such as industrialization, globalization, colonial rule, and the rise of Islamic fundamentalism. Uses social theory (including ideas from Marx, Weber, and Adam Smith) to explore the making of institutions like the nation-state, the World Trade Organization, the World Bank, and the International Monetary Fund. Fulfills lower-division major requirement. (General Education Code(s): CC, IS, E.) *B. Crow, S. Mc Kay, P. Lubeck*

30A. Introduction to Global Information and Social Enterprise Studies (3 credits). F

Teaches how to use social-enterprise methodologies to transfer information-communication technologies (ICT) to community and non-governmental organizations. Concepts include: globalization, info-exclusion, social justice, information revolution, global civil-society networks, social entrepreneurship, "open source" resources, web design, databases, networking. Requires organizational assessment. Enrollment limited to 50. *P. Lubeck*

30B. Designing ICT Projects for Social Enterprise (3 credits). W

Covers designing "doable" ICT-based projects to support the goals of community and NGOs. Topics include: social entrepreneurship/enterprise case studies; step-by-step project design; integrating social and technical solutions; project management. Technical topics include: Internet resources; advanced web/database design; computer networks/maintenance. Enrollment limited to 50. *P. Lubeck*

30C. Project Implementation and Grant Writing for Social Entrepreneurs (3 credits). S

Covers conversion of ICT project into a fundable grant proposal for social justice, integration of social activism, entrepreneurship and justice, and implementation of project. Topics include: funders, proposal design, field methods, project assessment, innovative ICT applications, action research methods. Enrollment limited to 50. *P. Lubeck*

33. Designing Community Information Technology Centers. *

Examines theory and practice of designing and constructing community information technology centers for the U.S.A. and developing world through hands-on projects. Covers topics in social design, networking, open-source software, computer management, computing policy, VoIP, Wi-Fi, power sources, and project management. Courses 30A or 30B or 30C recommended as preparation. Enrollment limited to 25. *P. Lubeck*

42. Student-Directed Seminar. F,W,S

Seminars on selected topics taught at various times by upper-division students under faculty supervision. (See course 192.) Consult the *Schedule of Classes* for specific offerings. *The Staff*

80V. Understanding Agile Web Development for Social Justice. *

Focuses on development of web applications using agile methodologies and fundamentals of web programming and/or web UI design. Topics include: free/open-source software movement, social computing, and practices of digital justice. Focus is on ruby language, design principles, storyboarding, source control, testing, and documentation. May be repeated for credit. (General Education Code(s): T7-Natural Sciences or Social Sciences.) *P. Lubeck*

93. Field Study. F,W,S

Ordinarily call numbers for this course will not be issued after the first week of instruction. Students submit petition to sponsoring agency. *The Staff*

99. Tutorial. F,W,S

Directed reading and research. Petitions may be obtained from the Sociology Department Office. Ordinarily call numbers for this course will not be issued after the first week of instruction. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99F. Tutorial (2 credits). F,W,S

Directed reading and research. Petitions may be obtained from the Sociology Department Office. Students submit petition to sponsoring agency. Ordinarily call numbers for this course are not issued after the first week of instruction. May be repeated for credit. *The Staff*

Upper-Division Courses

103A. Statistical Methods (7 credits). W

Fundamental concepts in statistics. Introduction to measuring causation. Learn to use computer to analyze data efficiently. Emphasis on practical applications. Enrollment restricted to sociology, proposed sociology, and combined sociology majors. (General Education Code(s): SR, Q.) *D. Takagi*

103B. The Logic and Methods of Social Inquiry (7 credits). S

The first part of the course focuses on basic ethical, political, and logical issues in social scientific inquiry. The second part develops a wide range of skills and methods appropriate to actual research. Course 103A, *Statistical Methods*, is strongly recommended. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; enrollment restricted to sociology and sociology combined majors, minors and proposed majors. (General Education Code(s): W, Q.) *F. Guerra*

105A. Classical Sociological Theory. F

This intensive survey course examines the intellectual origins of the sociological tradition, focusing on changing conceptions of social order, social change, and the trends observed in the development of Western civilization in the modern era. Readings are all taken from original texts and include many of the classical works in social theory with special emphasis on the ideas of Marx, Weber, and Durkheim which constitute the core of the discipline. Required for sociology majors planning on studying abroad (EAP). Enrollment restricted to juniors and seniors in sociology, proposed sociology, the combined Latin American and Latino studies/sociology, and the proposed combined Latin American and Latino studies/sociology majors and sociology minors. *A. Szasz*

105B. Contemporary Sociological Theory. W

Surveys major theoretical perspectives currently available in the discipline including functionalism, symbolic interactionism, ethnomethodology, conflict theory, critical theory, neo-Marxism, feminist theory. Enrollment restricted to juniors and seniors in sociology, proposed sociology, the combined Latin American and Latino studies/sociology, and the proposed combined Latin American and Latino studies/sociology majors and sociology minors. *A. Szasz*

111. Family and Society. F

Focuses on the interaction between family and society by considering the historical and social influences on family life and by examining how the family unit affects the social world. Readings draw on theory, history, and ethnographic materials. *W. Martyna*

113. Political Sociology. *

An intensive examination of major substantive monographs representing pluralist, elite, and class theories of the state in industrialized capitalist democracies. *The Staff*

114. Sports and Society. *

Explores the interconnections between sports and society using sociological theories and methods. Topics include class, race, and gender; mass media and popular culture; political economy; education and socialization; leisure patterns (participants and spectators); globalization and cross-national comparisons. *The Staff*

115. Sustainable Design as Social Change. *

Using current sociological understandings of knowledge-making and technological innovation, students learn sustainable project design as collaborative "open" processes. Includes computer-assisted, active-learning team workshop exercises and laboratories in both face-to-face and virtual e-learning environments. Interdisciplinary web-based laboratories also introduce basic skills necessary to understanding the technical aspects of sustainability. Enrollment by permission of instructor. (Formerly Sustainability and Social Change.) Enrollment limited to 60. (General Education Code(s): PE-T.) *E. Du Puis*

116. Communication, Media, and Culture. F

Examines media institutions, communication technologies, and their related cultural expressions. Focuses on specific ways the media—including media studies and criticism—operates as social and cultural factor. Contemporary theory or equivalent in related fields recommended. (Formerly "Communication and Mass Media.") Enrollment restricted to upper-division students. *H. Gray*

118. Popular Music, Social Practices, and Cultural Politics. *

Considers the role of popular music as a site of contemporary social practices and cultural politics.

Examines the institutional organization and production of popular music, its cultural meanings, and its social uses by different communities and social formations. Also examines popular music as a vehicle through which major cultural and political debates about identity, sexuality, community, and politics are staged and performed. Prerequisite(s): course 105A or 105B. Enrollment restricted to juniors and seniors. *The Staff*

119. Sociology of Knowledge. *

Focus includes the following three areas: historical examination of sociological theories of knowledge with reference to Durkheim, Weber, Mannheim, and others; examination of black and feminist perspectives within sociology; examination of whether and how "outside" observers can analytically grasp the inner workings of other cultures. Prerequisite(s): course 103B or 105A or 105B. *The Staff*

120. Gender, Sexuality, and Cultural Politics. W

Focuses on the role feminist discourses play in cultural politics emphasizing sex, sexuality, and sex work as related to gender, race, and class. Examines the relationship between academic and popular feminisms. Interrogates post-feminism, third-wave feminism, and generational differences in feminisms. (Formerly *Feminisms and Cultural Politics*.) Prerequisite(s): course 129 recommended. Enrollment restricted to juniors and seniors. *J. Bettie*

121. Sociology of Health and Medicine. F

Analysis of the current health care "crises" and exploration of the social relationships and formal organizations which constitute the medical institution. Study of the political, economic, and cultural factors which affect the recognition, distribution, and response to illness. *J. Reardon*

121B. Comparative Health-Care Systems and Policies. *

Critical examination of the American health-care system, its history, and the interests it serves; and an analysis of the health-care systems of comparable nations. *The Staff*

122. The Sociology of Law. W

Explores the social forces that shape legal outcomes and the ways law, in turn, influences social life. Traces the history and political economy of American law; the relation between law and social change; how this relation is shaped by capitalism and democracy; and how class, race, and gender are expressed in welfare and regulatory law. (Also offered as Legal Studies 122. Students cannot receive credit for both courses.) *C. Reinerman*

123. Law, Crime, and Social Justice. *

Blends the latest research in criminology with that from social stratification, inequality, and social welfare policy with the objective of exploring the relationship between levels of general social justice and specific patterns of crime and punishment. The focus is primarily on the U.S. although many other industrialized democracies are compared. An introductory course in sociology is recommended as preparation. (Also offered as Legal Studies 123. Students cannot receive credit for both courses.) *The Staff*

124. Visual Sociology. *

Learn to critically consume documentary, ethnographic film, photojournalism, and the genre of realism as these methods are increasingly used to describe the social world. Addresses theoretical, methodological, practical, and ethical issues of creating visual media. Optional media lab teaches students how to create visual products as well. (Formerly *Visual Ethnography*) Prerequisite(s): Enrollment restricted to juniors and seniors. *J. Bettie*

124L. Visual Sociology Media Lab (2 credits). *

Teaches the basics of digital narrative/storytelling, basic use of digital video cameras, digital video editing in iMovie and/or Final Cut Pro, and use of microphones and sound. Students use these skills to aid in creation of their final course project. (Formerly *Visual Ethnography Media Lab*.) Concurrent enrollment in course 124 is required. Enrollment restricted to juniors and seniors. *J. Bettie*

125. Society and Nature. *

A healthy society requires a stable and sustainable relationship between society and nature. Covering past, present, and future, the course covers environmental history of the U.S., the variety and extent of environmental problems today, and explores their likely development in our lifetimes. (General Education Code(s): PE-E.) *A. Szasz*

126. Sociology of Sex. *

Explores social and cultural aspects of human sexuality and reproduction, including how and why meanings and behaviors are contested. Analyzes sexuality and reproduction as forms of social and political control as well as cultural expression and self-determination. Enrollment restricted to upper-division students. Enrollment limited to 90. *J. Bettie*

127. Drugs in Society. S

Explores the history of the use and abuse of consciousness-altering substances like alcohol and other drugs. Social-psychological theories of addiction are reviewed in tandem with political-economic analyses to identify the social conditions under which the cultural practices involved in drug use come to be defined as public problems. An introductory sociology course is recommended prior to taking this course. (Also offered as Legal Studies 127. Students cannot receive credit for both courses.) *C. Reinerman*

128. Law and Politics in Contemporary Japan and East Asian Societies. W

Introduction to contemporary analysis of Japan's race relations, ethnic conflicts, and a

government's failure to restore remedial justice for war victims in Japan, Asia, and the U.S. Specific issues include comfort women, national or state narratives on Hiroshima, forced labor during World War II, and Haydon legislation that allows war victims to sue Japanese government and corporations in California. (Also offered as Legal Studies 126. Students cannot receive credit for both courses.) Enrollment limited to 30. *H. Fukurai*

128I. Race and Justice. F

An introduction to comparative and historical analyses of the relations between race and criminal justice in the U.S. Emphasis on examinations of structural mechanisms that help maintain and perpetuate racial inequality in law, criminal justice, and jury trials. (Formerly *Race and Criminal Justice*) (Also offered as Legal Studies 128I. Students cannot receive credit for both courses.) Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 120. *H. Fukurai*

128J. The World Jury on Trial. *

Adoption of the jury and its varied forms in different nations provides ideal opportunities to examine differences between systems of popular legal participation. Course considers reasons why the right to jury trial is currently established in Japan or Asian societies, but abandoned or severely curtailed in others. American jury contrasted with other forms of lay participation in the legal process. (Also offered as Legal Studies 128J. Students cannot receive credit for both courses.) Enrollment restricted to sophomores, juniors, and seniors. Enrollment limited to 30. *H. Fukurai*

128M. International Law and Global Justice. S

Examines war crimes, crimes against humanity, and the evolution and role of the International Criminal Court (ICC). Examines the evolution of the concept of international law, the rationale for its birth and existence, roots of international conflicts and genocides, possible remedies available to victims, mechanisms for the creation and enforcement of international legal order, as well as the role of colonialism, migration, poverty, race/ethnic conflicts, gender, and international corporations in creating and maintaining conflicts and wars. (Also offered as Legal Studies 128M. Students cannot receive credit for both courses.) Enrollment restricted to juniors and seniors. Enrollment limited to 30. *H. Fukurai*

129. Popular Culture and Cultural Studies. *

Examines the hidden politics of popular pleasure, studying the workings of domination and transgression in popular culture and everyday life. Explores not only media representations but cultural practices as well. Examines both cultural production and consumption. Considers how hegemonic discourses render the politics of resistance invisible. (Formerly *Popular Culture*.) Enrollment restricted to juniors and seniors. *J. Bettie*

130. Sociology of Food. *

Following food from mouth to dirt, explores the politics, economy, and culture of eating, feeding, buying, selling, and growing food. Topics cover both the political economy of the food system as well as how body and nature are contested categories at either "end" of this system. *E. Du Puis*

131. Media, Marketing, and Culture. W

Explores relationship between modern forms of cultural production and the economy and society in which they emerge. Course reads, screens, and discusses variety of the cultural texts: from the historical and theoretical to the commercial, popular, and counter-cultural. (Formerly *Culture, Economy, and Power*.) Enrollment restricted to juniors and seniors. *M. Greenberg*

132. Sociology of Science and Technology. *

Reviews social and cultural perspectives on science and technology, including functionalist, Marxist, Kuhnian, social constructionist, ethnographic, interactionist, anthropological, historical, feminist, and cultural studies perspectives. Topics include sociology of knowledge, science as a social problem, lab studies, representations, practice, controversies, and biomedical knowledge and work. Prerequisite(s): course 103B, 105A, or 105B. Enrollment limited to 20. *The Staff*

133. Currents in African American Cultural Politics. *

Takes as its subject, the dialogues, debates, conceptions, and strategies of self representation produced by blacks in the U.S. and Atlantic world in the twentieth and twenty-first centuries. These issues are examined through the insights of feminist theory, cultural studies, media studies, sociology, and African American studies. Enrollment restricted to juniors and seniors. (General Education Code(s): E.) *H. Gray*

134. Television and the Nation. W

The role of American network television in the production of the post-war American national imagination is our focus. Our approach will explore issues of media power, especially television's industrial apparatus, its network structure, its strategies of representation in relationship to the construction of the image of the nation, and the meaning of citizens, consumers, and audiences. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to juniors and seniors. (General Education Code(s): W.) *H. Gray*

136. Social Psychology. W

Major theories and concepts in sociological study of social psychology. Topics include identity and social interaction, deviance, sociology of emotions, social narratives, and the social construction of reality. (General Education Code(s): PE-H.) *M. Millman*

137. Deviance and Conformity. W

Why certain social acts are considered threatening and how individuals or groups become stigmatized. Sociological analysis of the institutions and processes of social control and the

experience of becoming deviant and living with a stigmatized identity. Introductory course in sociology recommended. (General Education Code(s): PE-H.) *F. Guerra*

140. Social Psychology of Power. *

This course uses historical, sociological, and social psychological materials to introduce students to issues concerning class and power, religion and power, minorities and power, women and power, the rise of the New Right, and the successes and failures of the Left. Prerequisite(s): course 1, 10, or 15 or Psychology 40. Enrollment restricted to juniors and seniors. *G. Domhoff*

141. Group Process. F

The study of group development and interpersonal behavior based primarily on observation of the class discussion group. Readings are drawn from psychology and fiction as well as from sociology. Offered in alternate academic years. Enrollment restricted to senior sociology majors. Enrollment limited to 18. *M. Millman*

142. Language and Social Interaction. W

Concerns the routine and taken-for-granted activities that make up our interactions with one another, consisting in large part—but not exclusively—of verbal exchanges. Emphasis on the socially situated character of communication, whether intimacy between two people or dominance of a group. An introductory sociology course is recommended prior to taking this course. Enrollment restricted to sophomores, juniors, and seniors. *W. Martyna*

143. Conversation Analysis. W

A working seminar, involving the analysis of actual conversations. Covers fundamental ethical, conceptual, and methodological issues that arise in the collection of conversational data, as well as the skills and techniques of conversation analysis. Given our operating assumption, that talk is a primary means of constructing social identities, there is a heavy thematic emphasis on gender, status, and power in conversation. Prerequisite(s): course 142 or Psychology 80E. Enrollment restricted to juniors and seniors. Enrollment limited to 20. *C. West*

144. Sociology of Women. S

Analysis of the social significance and social production of gender. Some consideration of how sex differences have developed. Major emphasis on the impact of gender as a categorical imperative in the present social context. In this context, the course is also about sexual segregation, sexual inequality, and the dynamics of interpersonal power. Enrollment restricted to juniors and seniors. An introductory sociology course is recommended. *The Staff*

145. Sociology of Men. *

Examines conflicting views on the development and state of modern masculinity as adaptation, transitional phase, or pathology. Did men lose the "gender war"? Do boys need rescuing? What are common and divergent social experiences of men within race, class, gender, culture, era? An introductory sociology course recommended. *W. Martyna*

146. Sociology of Violence, War, and Peace. *

Explores key issues, theories, and topics in the study of violence, war, and peace. Addresses aspects of aggression, personal violence, political violence, and war. In addition, various strategies for the prevention of violence and war are examined. *The Staff*

149. Sex and Gender. S

Modern analyses of sexuality and gender show personal life closely linked to large-scale social structures: power relations, economic processes, structures of emotion. Explores these links, examining questions of bodily difference, femininity and masculinity, structures of inequality, the state in sexual politics, and the global re-making of gender in modern history. Recommended as background: any lower-division sociology course. *W. Martyna*

150. Sociology of Death and Dying. S

Explores contemporary, historical, cross-cultural and interdisciplinary perspectives on the social psychology of death and dying. Cultural norms and institutional contexts are studied, along with the individual experience, and the ways in which our perspectives on death and dying influence our experiences of life and living. Enrollment restricted to juniors and seniors. *W. Martyna*

152. Body and Society. F

Critically examines the place of the human body in contemporary society. Focuses on the social and cultural construction of bodies, including how they are gendered, racialized, sexualized, politicized, represented, colonized, contained, controlled, and inscribed. Discusses relationship between embodiment, lived experiences, and social action. Focuses on body politics in Western society and culture, especially the United States. An introductory sociology course is recommended prior to taking this course. Enrollment restricted to juniors and seniors. Enrollment limited to 50. *F. Guerra*

153. Sociology of Emotions. S

Examines sociological approaches to the understanding of emotions and the application of these approaches to work, learning, interpersonal relationships, health and illness, sports, and other aspects of everyday life. Enrollment restricted to juniors and seniors. *M. Millman*

154. Cross-National and Cross-Cultural Research. *

Examines a variety of theoretical, methodological, and substantive approaches to cross-national and cross-cultural research. Focuses on the importance and variety of cross-national and cross-cultural studies. Prerequisite(s): course 103B. Enrollment limited to 20. *The Staff*

155. Political Consciousness. *

Explores the relationship between consciousness, ideology, and political behaviors from voting to rebellion. Special attention is given to the lived experience and the identity interests that complicate the nexus of class position and political ideology. An introductory sociology course is recommended as preparation. *G. Domhoff*

156. U.S. Latina/o Identities: Centers and Margins. F

Explores historical and contemporary constructions of Latina/o identities and experiences in U.S. Particular emphasis placed on transcultural social contexts, racial formations, and intersections with other identities including sexuality and gender. Enrollment restricted to juniors and seniors. Enrollment limited to 50. (General Education Code(s): ER, E.) *The Staff*

157. Sexualities and Society. W

Explores controversies in the sociology of sexuality. Focuses on tensions and disagreements that characterize debates over sex and society, and attempts to identify political and theoretical issues at stake in these debates. Enrollment limited to 30. *D. Gould*

158. Politics of Sex Work and Erotic Labor. S

Examines sex work in an historical and cultural context, considering how it has changed over time. Considers the relationship of pornography, exotic dance, and selling sex on the Internet to racialization, queer politics, globalization, and tourism. Employs theories and methods of cultural studies in rethinking historical debates on sex work. Enrollment restricted to juniors and seniors. *J. Bettie*

163. Global Corporations and National States. *

Examines the nature and development of the capitalist world system since 1945. Emphasis is on the power of multinational corporations as managers of the world system and the response of states: role of multilateral agencies such as the World Bank, International Monetary Fund, United Nations. *H. Shapiro*

165. World Systems Perspective. *

Seminar on the intellectual origins and contemporary exponents of the world-systems perspective in the social sciences: Marx, Braudel, Polanyi, Arrighi, Wallerstein. Prerequisite(s): courses 105A and 105B or permission of instructor. *The Staff*

166. Economics for Non-Economists. *

Fosters economic literacy among students who are not economics majors but are interested in the political and social ramifications of economic change. Emphasizes economic institutions and policy and is taught by case-study method, which requires active student participation. Enrollment restricted to juniors and seniors. Enrollment limited to 40. *H. Shapiro*

167. Development and Underdevelopment. F

Examines contemporary debates about development in the Third World: alternative meanings of development, recent work on the impact of colonial rule, how some economies have industrialized, ideas about agrarian change, and recent research on paths out of poverty. Students work in pairs to examine a development in one country since World War II. *The Staff*

168. Social Justice. *

What is social justice? People answer this question differently, depending upon their sociological perspective. Using a combination of political philosophy and sociological studies, explore five perspectives on social justice within the Western sociological tradition: utilitarianism, Marxism, liberal egalitarianism, communitarianism, and pluralism. Students pick a topic and learn to articulate different visions of socially just change based on these perspectives. Prerequisite(s): course 105A. Enrollment limited to 60. *E. Du Puis*

169. Social Inequality. F

A survey of theories and systems of social stratification focusing on such phenomena as race, class, power, and prestige. Enrollment restricted to juniors and seniors. (General Education Code(s): E.) *The Staff*

170. Ethnic and Status Groups. *

Examines the enduring and changing status of ethnic and other visible minority groups in the United States, e.g., Latinos, Asian Americans, African Americans, and immigrants, with comparative materials drawn from other societies. An introductory course in ethnicity and race is recommended as preparation. Satisfies American History and Institutions Requirement. (General Education Code(s): E.) *The Staff*

171. Exploring Global Inequality. *

Seminar focusing on readings of key texts and recent research papers on several dimensions of global inequality (material, health, gender, cultural, migration) to find innovative ways of understanding the connections among different dimensions of inequality and of visualizing inequality in digital media. Students prepare visual presentations on contemporary social inequalities suitable for an online (for example, <http://ucatlas.ucsc.edu/>) or print atlas. Enrollment restricted to seniors. Enrollment limited to 30. *B. Crow*

172. Sociology of Social Movements. *

Through readings on social movements that span the 20th century, course examines the causes of popular mobilizations, their potential for rapid social change, and the theories developed to understand and explain their role in modern social life. Enrollment restricted to juniors and seniors.

Enrollment limited to 40. (General Education Code(s): PE-H.) *D. Gould*

173. Water. S

Analyzes access to clean water, both in the American West and global South. Reviews water quality, pivotal role of water in settlement and society, history and contemporary inequalities, water supplies, international conflict over water, climate change, and human use of water.

Enrollment restricted to juniors and seniors. Enrollment limited to 60. (General Education Code(s): PE-E.) *B. Crow*

174. Twenty-First-Century African American Social Structure. *

A sociological overview of African American society in the 21st century. The changing patterns of social/cultural organization, class structure, and modes of political action are analyzed. This analysis is located within the framework of migration, urbanization, and social struggle among black Americans. Prerequisite(s): course 10 or 20. (General Education Code(s): E.) *The Staff*

176. Women and Work. *

Examines the history of women and work; women's current conditions of work and political, economic, and social factors affecting these conditions; means by which women may shape working conditions including contributing leadership, developing policies, building unity, and creating alliances. Enrollment restricted to juniors and seniors. *The Staff*

176A. Work and Society. S

Addresses how work is organized and shapes life changes. Covers: the history of paid work; the impact of technology; race/class/gender at work; professional and service work; work and family; collective responses to work; and challenges of work in a globalizing economy. Enrollment restricted to juniors and seniors. *S. Mc Kay*

177. Urban Sociology. S

Historical and contemporary examination of urban life including community, race, geography, urban and suburban cultures and lifestyles, stratification, housing, crime, economic and environmental issues, demographic changes, and global urbanization. Enrollment restricted to junior and senior sociology majors. Enrollment limited to 60. *The Staff*

177A. Latinos/as and the American Global City. F

Examines roles of emerging Latino/a majorities in urban centers across the U.S. Explores the "Latinization" of U.S. cities and various factors affecting the life chances of Latinos/as including, but not limited to, immigration, segregation, social movements, and other forms of political participation. Enrollment restricted to juniors and seniors. Enrollment limited to 40. *The Staff*

177G. Global Cities. W

Explores how "global cities" have facilitated increasing integration of the diverse cultures and economies of the world. Using historical, sociological, and comparative methods, analyzes how these spaces both enable and constrain transnational flows of capital, labor, information, and culture. Enrollment restricted to juniors and seniors. *M. Greenberg*

178. Sociology of Social Problems. S

Views "problems" in society not as given but as social constructs. Examines the ways in which conditions in society become identified and defined as problems and consequences that follow from such a process. *F. Guerra*

179. Nature, Poverty, and Progress: Dilemmas of Development and Environment. *

Concerns about environmental change, including global warming, threats to the ozone layer, and industrial pollution, raise questions about Third World development. Simple views of the relation between society and nature, such as blaming population growth, industrialization, or poor people, seem to preclude higher living standards. Uses debates and case studies to explore more subtle and optimistic views of social-natural relations. *B. Crow*

179L. Nature, Poverty, and Progress Laboratory. *

For enrollees in course 179, this optional lab provides opportunity to research ideas and produce a rough business plan for green enterprise of choice. Examples include compostable packaging, gray water systems, sustainable manufacturing, solar-powered submarines, green consulting, and other enterprises. Concurrent enrollment in course 179 required. Enrollment limited to 20. *B. Crow*

180. Social Movements of the 1960s. *

Examines the roots, development, and political outcomes of black civil rights organizations during the Sixties. Explores social and structural forces, mobilization of black communities, strategies and tactics used, nature of the relationships between various civil rights organizations, unity and disunity among organizations, leadership gains, and impact on race relations in the U.S. Enrollment restricted to junior and senior sociology and combined sociology/Latin American and Latino studies majors. Enrollment limited to 45. *D. Gould*

181. A Sociology of Place: The California Coast. *

Examines the California coast, including important social, political, cultural, and environmental aspects of this most important place. Lectures, readings, discussion, and class assignments examine the history, development, and future of the California coast. Enrollment restricted to juniors and seniors. Enrollment limited to 45. *The Staff*

184. Hunger and Famine. *

Why do famines happen? Why are some hungry and some over-fed? Recent advances in the

understanding of food crises and chronic undernutrition are the focus of this course. *B. Crow*

185. Environmental Inequality. W

Modern society not only assaults nature, it does so in ways that reproduce existing social inequalities. Reviews research on disproportionate exposure to risks and hazards, especially along dimensions of class and race, and examines the environmental justice movement. Enrollment restricted to junior and senior sociology and environmental studies students. Course 125 recommended as preparation. Enrollment limited to 42. (General Education Code(s): PE-E.) *A. Szasz*

187. Feminist Theory. *

Examination of shifts in 20th- and 21st-century feminist theory and epistemology. Considers various deconstructive challenges to second wave feminism based on the politics of race, ethnicity, nation, sexuality, and class. Focus changes regularly. Prerequisite(s): course 105B, and either course 144 or 149 or Feminist Studies 1 or 100. Enrollment limited to 35. *D. Gould*

188. Religion and Social Change. *

Uses historical-comparative method to explore role of religion in global and local social movements. Case studies include historical analysis of the civil rights movement, Islamic movements, liberation theology, and millenarian movements. Topics vary annually. Recommended for social science and history majors. (General Education Code(s): E.) *P. Lubeck*

188A. Social Change in the Global Economy. W

Explores local dimensions of globalization, focusing on experiencing more global divisions of labor in both industrialized and developing countries. Themes include: economic integration and dislocation; new forms of governance; globalizing consumption and culture; gender; and popular resistance. Enrollment restricted to juniors and seniors. (General Education Code(s): CC.) *The Staff*

188G. Global Islam: Politics, Movements, Discourses. F

Historical sociology of Muslim political and cultural movements as a global phenomena. Topics include: survey of Muslim globalization processes, Muslim political theory, Shari'a, Sufi networks, economic institutions, Islamic nationalism contemporary social movements, Muslim response to imperialism, Islamic revival, Muslim civil society, and the role of women in contemporary Muslim politics. *P. Lubeck*

190. Proseminar.

The Staff

191. Sociology Teaching Practicum. F,W,S

Under the supervision of the instructor, the student works with a group of students in a lower-division course, leading discussions, explaining material, reading and marking submissions, consulting individually and/or in other ways assisting in the teaching of a course. Interview and selection by professor required. Prerequisite(s): Senior standing and excellent performance in core courses in the major. Enrollment restricted to senior sociology majors. *The Staff*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision. (See course 42.) Students submit petition to sponsoring agency. *The Staff*

193. Field Study. F,W,S

Provides for (department-sponsored) individual field study in the vicinity of the campus under the direct supervision of a faculty sponsor (as opposed to course 198 where faculty supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. Ordinarily call numbers for this course will not be issued after the first week of instruction. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

193F. Field Study (2 credits). F,W,S

Provides for department-sponsored individual field study in the vicinity of campus under the direct supervision of a faculty sponsor. May not be counted toward major requirements. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194F. Group Tutorial (2 credits). F,W,S

Small group study of a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

195A. Senior Thesis. F,W,S

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. The senior thesis satisfies the comprehensive requirement. Course is for independent thesis research and writing. Courses may be taken consecutively or concurrently. Prerequisite(s): course 103B. Students submit petition to sponsoring agency. *The Staff*

195B. Senior Thesis. F,W,S

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. The senior thesis satisfies the comprehensive requirement. Course is for independent thesis research

and writing. Courses may be taken consecutively or concurrently. Prerequisite(s): course 103B. Students submit petition to sponsoring agency. *The Staff*

195C. Senior Thesis. F,W,S

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. The senior thesis satisfies the comprehensive requirement. Course is for independent thesis research and writing. Courses may be taken consecutively or concurrently. Completion of course 195C (completion of the thesis) satisfies the W general education requirement. Prerequisite(s): course 103B and satisfaction of the Entry Level Writing and Composition requirements. Students submit petition to sponsoring agency. May be repeated for credit. (General Education Code(s): W.) *The Staff*

196A. Capstone: The Sociologist as Public Intellectual (3 credits). S

Students hear a selected group of faculty discuss their current research and how that research furthers public understanding and discussion of some vital contemporary social issue. Enrollment restricted to junior and senior sociology majors. *H. Gray*

196G. Project Practicum: Global Information and Social Enterprise. F,W,S

Project summary and evaluation are required for completion of minor in global information and social enterprise studies (GISES). Projects require approval in advance by director of GISES. Completed projects must be uploaded electronically on the web site or archive of the global information internship program. Prerequisite(s): courses 30A, 30B, and 30C. May be repeated for credit. *The Staff*

198. Independent Field Study. F,W,S

Provides for (department-sponsored) individual study program off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. Ordinarily call numbers for this course will not be issued after the first week of instruction. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Advanced directed reading and research. Petitions may be obtained from the Sociology Department Office. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Advanced directed readings and research. Petitions may be obtained from the Sociology Department Office. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

201. The Making of Classical Theory. F

Examines the establishment of "theory" in the discipline of sociology. Introduces students to close readings and analysis of a core selection of social theory. Problematises the construction, maintenance, and reproduction of a theoretical canon in sociology. Enrollment restricted to graduate students in sociology and by permission number. Enrollment limited to 20. *M. Greenberg*

202. Contemporary Sociological Theory. W

Intensive survey of major tendencies in modern social thought, including functionalism, symbolic interactionism, ethnomethodology, critical theory, structuralism, phenomenology, neo-Marxism, and feminist theory. Enrollment restricted to graduate students in sociology and by permission number. *D. Gould*

203. Sociological Methods. F

Approaches methods as a series of conscious and strategic choices for doing various kinds of research. Introduces students to the epistemological questions of method in social sciences; to key issues in "technique," particularly control, reliability, and validity; and to good examples of social research. Enrollment restricted to graduate students in sociology and by permission number. *C. West*

204. Methods of Quantitative Analysis. F

Students are provided with intuitive explanation of fundamental concepts in statistics and learn how to use statistics to answer sociological questions. Experience and guidance in using computers to efficiently analyze data are provided. Enrollment restricted to graduate students in sociology and by permission number. Enrollment limited to 20. *H. Fukurai*

205. Field Research Methods. W

Gives students first-hand experience doing fieldwork with an emphasis on participant observation and some interviewing. Students submit weekly field notes and a final project analysis. At seminar meetings, field experiences and relevant literature are examined. Enrollment restricted to graduate students in sociology and by permission number. Enrollment limited to 10. Offered in alternate academic years. *J. Bettie*

206. Comparative Historical Methods. *

Overview of research strategies and methods used in historical and social sciences. Students read works exemplifying a variety of analytical approaches. Written assignments cultivate critical skills, weighing of tradeoffs inherent in all methodological choices, and elaboration of hypothetical

research designs. Enrollment restricted to graduate students. Enrollment limited to 20. *The Staff*

208. Writing Practicum. S

Writing intensive course designed to facilitate the completion of the master's thesis, orals field statement, or the dissertation in sociology. The seminar is convened by a faculty member in conjunction with students and their adviser or appropriate committee chair. Students are expected to produce and present drafts of work completed in the seminar. Enrollment restricted to sociology graduate students and by permission number. Enrollment limited to 12. *M. Millman*

209. The Analysis of Cultural Forms. *

Examines material and symbolic forms such as media products, cultural artifacts, language, nonverbal communication and social practices using discourse, textual, content, interpretive, and conversation analyses as well as ethnography and different channels of communication. Theoretically, relies on cultural studies, communication studies, cultural sociology, film studies, and ethnomethodology. Enrollment restricted to sociology graduate students. *The Staff*

220. Global Transformation: Macrosociological Perspectives. W

Classical concepts and contemporary approaches in macrosociology, the study of large-scale, long term social change. Readings drawn primarily from the Marxian and Weberian traditions (new institutionalism, varieties of neo-Marxism, environmental history, state centrism) as they focus on agrarian and industrial structures and commodity chains; household, village, and neighborhood organization; social movements and revolutions; culture, ideology, and consciousness; policy analysis; comparative urban, national, and civilizational development. Enrollment restricted to graduate students in sociology. Enrollment limited to 15. *B. Crow*

222. Political Sociology. *

A survey of major works and themes in the relationship of politics and society, with primary emphasis on the compatibilities and contradictions of pluralist, elite, and class perspectives on the state. Enrollment restricted to graduate students. *E. Du Puis*

223. Sociology of the Environment. *

Advanced treatment of the dominant ideas of nature and the environment in the West and their relationship to the development of Western capitalism. Leading Western theories of environmental crisis and their relation with ideologies of environmentalism and environmental movements. Enrollment restricted to graduate students. Enrollment limited to 20. May be repeated for credit. *E. Du Puis*

224. Globalization: Theories and Social Movements. *

Examines the structures, processes, and movements associated with globalization processes. Reviews political economy theories, cultural theories systems, state industrial policies, and popular responses to globalization. Also assesses contribution of resistance movements informed by class, ethno-nationalism, religion, or gender. Enrollment restricted to graduate students. Enrollment limited to 25. Offered in alternate academic years. May be repeated for credit. *P. Lubeck*

225. Political Economy for Sociologists. *

Examines rudiments of historical materialism in light of advances in cultural and ecological Marxism. Basic categories of Marxist political economy. Thematic focus on the "first" and "second" contradictions of capitalism in world economy today. Enrollment restricted to graduate students. Enrollment limited to 15. *B. Crow*

227. Learning from Environmental Historians. *

Looks at several major themes in the sociology of the environment and asks how the works of environmental history address those themes. Includes reflections on how history as a method interrogates social questions. Possible themes include: sustainability; social justice; universalism vs. particularity; city and country; and social movements. Enrollment restricted to graduate students. Enrollment limited to 8. *E. Du Puis*

229. Work and Labor Markets in the New Economy. W

Focuses on the interaction of work restructuring and existing race/class/gender inequalities. Themes include: the labor process and theories of consent; labor market segmentation; job and occupational segregation; information technologies, flexible work, and post-industrialism; flexible employment relations; and low-wage service and labor markets. Enrollment restricted to graduate students. *S. Mc Kay*

230. Theory and Method in the Sociology of Marx. *

Examines theoretical and methodological implications of Marxist theory for empirical social research. Analyzes how historians and social scientists apply Marxist method in explaining society, social change, globalization, culture, and late capitalism. Goal is to assist students to employ Marxist theory and method creatively in their research projects. Enrollment restricted to graduate students. Enrollment limited to 12. *P. Lubeck*

240. Inequality and Identity. S

Explores recent theoretical and empirical studies of race, class, gender, and sexuality with an emphasis on the production of identities and their relationship to processes and structures of power in a postcolonial context. Enrollment restricted to graduate students in sociology. *D. Takagi*

241. Cross-National and Cross-Cultural Research. S

Seminar examining theoretical and methodological issues in doing cross-national and cross-cultural research. In addition to a consideration of different research paradigms and approaches,

representative works from each comparative tradition are examined. Enrollment restricted to graduate students. Enrollment limited to 15. *C. Reinerman*

242. Feminist Research Seminar. *

Provides scholarly support to students doing feminist research. Examines issues concerning conceptualization of feminism and feminist research. Explores relation of feminist research to intersections of gender, class, and race; to the self; to power; and to transformative social praxis. Students present and are given assistance with their work, as well as listen to, read, and assist with the work of others. Enrollment restricted to graduate students. Enrollment limited to 10. *The Staff*

244. Race and Ethnicity. *

A critical survey of the theoretical issues of persistence and change, public policy, and recent empirical studies in the field of race and ethnic relations. Readings introduce comparative race relations and a historical background of major theoretical paradigms in the field which purport to explain race and ethnic relations in general and race relations in America specifically. Enrollment restricted to graduate students. Enrollment limited to 15. Offered in alternate academic years. *The Staff*

245. Feminist Theory. *

Examination of shifts in 20th- and 21st-century feminist theory and epistemology. Explores the decentering of universalist feminist theories and asks what constitutes feminist theory after gender has been decentered. Considers various deconstructive challenges to second-wave feminist theory based on the politics of race, ethnicity, nation, sexuality, and class. Focus changes regularly. Enrollment restricted to sociology graduate students. Enrollment limited to 12. *J. Bettie*

246. Class, Culture, and Movement. *

Analyzes impact of ethnicity, gender, and religion on the class situation of laboring people in a globalized economy by intensive reading and critique of classic studies, explaining how social movements reflect combinations of social relations and cultural practices. Enrollment restricted to graduate students. Enrollment limited to 15. *C. Reinerman*

247. Race and Class. *

Introduces the student to the recent literature on race and class. Covers several different theoretical perspectives including internal colonialism, labor market segmentation theories, racial formation, and neo-gramscian cultural analyses. In addition to study of theory, also compares theoretical perspectives to the historical experience of minority groups, in particular, blacks, Hispanics, and Asians. Enrollment restricted to sociology graduate students. *The Staff*

249. Feminisms and Cultural Politics. *

Focuses on the role feminist discourses play in contemporary cultural politics with the main focus on the politics of sex, sexuality, and sex work. Begins with considerations of (mis)representations of feminisms in popular cultures; considers the relationship between academic and popular feminisms; and interrogates the meaning of terms *post-feminism* and *third-wave feminism*. Enrollment restricted to graduate students. *J. Bettie*

250. Course Design and Grant-Writing Seminar. *

A professional training seminar devoted to the philosophical, conceptual, and practical issues of course design, pedagogy, and grant writing. Topics covered: institutional contexts; curriculum (including syllabi, course content, assignments, evaluation); pedagogy; teaching as work/labor process; grant writing; budgets. Enrollment restricted to sociology graduate students. Enrollment limited to 15. *The Staff*

252. Symbolic Interactionism and Sociology of Emotions. *

Examines classic and contemporary theories and concepts that play a major role in sociological studies of identity, symbolic and social interaction, and the sociology of emotions. Examines how cultural forms, rules, and rituals define, structure, and mediate emotions and how identities are situated within social institutions. Enrollment restricted to graduate students. Enrollment limited to 10. *M. Millman*

253. Race, Crime, and Justice. *

An introduction to comparative and historical analyses of relations between race and the criminal justice system. Specific topics include defining race/ethnicity, sentencing disparities, jury nullification, jury selection and decisions, prosecutorial misconduct, government's charging and investigative discretions, and other racially biased law enforcement practices and criminal court processes. Also covers a number of highly publicized trials that involved unmistakable elements of race and racism such as Chin, King, Simpson, and Unabomber cases. Students are also exposed to World Wide Web (Internet) to learn how to do research in the field of criminal justice. Enrollment restricted to graduate students. Enrollment limited to 15. *H. Fukurai*

255. Engaging Cultural Studies. *

Examines feminist and ethnic studies production, appropriation, and transformation of cultural studies theories and methodologies. Considers the utility of various theoretical apparatuses and methodological strategies employed in the interdisciplinary site that combines feminist, ethnic, and cultural studies. Enrollment restricted to graduate students. Enrollment limited to 15. *J. Bettie*

256. Urban Sociology. *

Introduction to core writings and key theoretical paradigms in urban sociology. Examines the history and contemporary conditions of cities in the U.S. and the urban experience. Urbanization,

suburbanization, community, social inequality, urban politics, relationship between the built environment and human behavior. Enrollment restricted to graduate students. *The Staff*

257. Colonialism, International Law, and Global Justice. *

Examines colonialism, war crimes, crimes against humanity, and legal remedies, and the role of the International Criminal Court (ICC); traces the history of colonial expansionism, starting from the Roman Empire to the present American imperial dominance in global politics. Enrollment restricted to graduate students. Enrollment limited to 15. *H. Fukurai*

258. Global Lay Justice Systems and Direct Democracy. *

Introduces historical analysis of lay justice participation. Examines global exploration of the use of lay judge institutions in citizen's movements and the assumption that juries are a derivative institution of democratic ideals. Focuses on corporate media creation of anti-jury sentiment. Enrollment restricted to graduate students. Enrollment limited to 10. *H. Fukurai*

260. Culture, Knowledge, Power. S

An introduction to theoretical approaches and exemplary studies of culture, knowledge, and power which critically interrogate the relationship between cultural formations and the production, circulation, and meaning of knowledges, materials, artifacts, and symbolic forms. Explores the concrete ways that power is organized and operates through different forms and sites, how it interpolates with other forms of power, and examines knowledges and culture as specific forms of power and sites of political struggle. Enrollment restricted to sociology graduate students. Enrollment limited to 15. *H. Gray*

261. Sociology of Knowledge. *

Explores three main issues: the social determination of knowledge, including natural science; the character of intellectual labor and intellectuals as a social group; the role of organized knowledge and "knowledge industries" in contemporary social change. Texts examined include class-based theories (Lukacs, Mannheim, Gramsci), feminist standpoint analysis (Smith, Harding, etc.), and theories of postmodern culture (Lyotard, Harvey, etc.). Enrollment restricted to graduate students. Enrollment limited to 20. *The Staff*

262. Cultural Practice and Everyday Life. *

Examines contemporary debates about the role of mass produced expressive symbols in modern industrial societies, and the circumstances of cultural production for its impact on the creation, organization, and use of cultural artifacts. Concern with the use and experience of popular symbols for the ways that their use involves the creation of meanings and the role of such meanings in the social organization of society. Enrollment restricted to graduate students. Enrollment limited to 10. *H. Gray*

263. Cultural Politics of Difference. *

Considers the cultural turn and the turn to difference in understanding relations of power and struggles over representation in studies of race, media, and culture. Examines national identity, difference, subjectivity, and authenticity, especially as they bear on quests to create new identifications, alignments, and efforts to protect existing identities. Enrollment restricted to graduate students. Enrollment limited to 10. *H. Gray*

264. Science, Technology, and Medicine. *

Explores social and cultural perspectives on science, technology, and medicine. Analyzes theoretical approaches that open up "black boxes" of scientific and biomedical knowledge, including the politics of bodies, objects, and health/illness. Links are made to medical sociology. Enrollment restricted to graduate students. *J. Reardon*

268A. Science and Justice: Experiments in Collaboration. *

Considers the practical and epistemological necessity of collaborative research in the development of new sciences and technologies that are attentive to questions of ethics and justice. Enrollment by permission of instructor. Enrollment restricted to graduate students. (Also offered as Feminist Studies 268A and Biomolecular Engineering 268A. Students cannot receive credit for all three courses.) Enrollment limited to 15. *The Staff*

268B. Science and Justice Research Seminar. F

Provides in-depth instruction in conducting collaborative interdisciplinary research. Students produce a final research project that explores how this training might generate research that is more responsive to the links between questions of knowledge and questions of justice. Prerequisite(s): course 268A. Enrollment by permission of instructor. Enrollment restricted to graduate students. (Also offered as Feminist Studies 268B and Biomolecular Engineering 268B. Students cannot receive credit for all three courses.) Enrollment limited to 15. *J. Reardon, K. Barad*

282. Social Policy Research. *

Policy research. Covers a variety of theoretical perspectives found in policy studies. Surveys various methodological approaches used in policy research. Theories and methods linked to research agendas on the various phases of the policy life cycle. Students are required to design a research proposal. Enrollment restricted to graduate students. Enrollment limited to 10. Offered in alternate academic years. *E. Du Puits*

290. Advanced Topics in Sociological Analysis. *

The topics to be analyzed each year vary with the instructor but focus upon a specific research area. Enrollment restricted to graduate students by consent of the instructor. *M. Millman*

293. Going on the Job Market. *

A seminar devoted to the practical problems of securing a job as a professional sociologist. Topics covered: researching colleges, universities, and public and private organizations that employ sociologists; designing a curriculum vitae; writing an application letter; preparing a "job talk;" handling questions during the interview process; the etiquette of visiting (and its aftermath); finding out about them; and the terms of employment: what is negotiable and what is not. Enrollment restricted to graduate students. *C. West*

294. Writing for Social Scientists. *

Seminar on the genres of social science writing, and the problems of starting and finishing a publishable thesis, book, or article. For advanced graduate students working on the composition of their dissertations and journal articles. Enrollment restricted to graduate students. Enrollment limited to 10. *M. Millman*

297. Independent Study. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

299. Thesis Research. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

*Not offered in 2011-12

Spanish and Spanish for Spanish Speakers

Language Program
218 Cowell College
(831) 459-2054
<http://language.ucsc.edu>

[Program Description](#) | [Faculty](#) | [Course Descriptions](#)

(There were no substantive changes to the Spanish and Spanish for Spanish Speakers Program Description from the General Catalog 2010-12.)

Program Description

Students interested in acquiring proficiency in Spanish can enroll in a wide range of Spanish language or Spanish for Spanish speakers (SPSS) courses, from beginning to advanced levels. The language and culture sequences of lower-division courses, Spanish 1-6 and 56 as well as Spanish for Spanish Speakers 61-63, upper-division series Spanish 156 courses, and Spanish for Spanish Speakers 125, are aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing as well as cultural competence. Students are strongly encouraged to finish year-long sequences without interruption and, if possible, to study in Spanish-speaking countries. Students who want to do a major that would allow them to take several courses in Spanish may select from among several programs: a major or minor in language studies, a major in literature with an emphasis in Spanish/Latin American/Latino literatures, a major in Latin American and Latino studies, or a major in global economics.

Spanish

Students interested in taking Spanish classes are required to take the placement examination (<http://ic.ucsc.edu/test/>) to enroll in the appropriate level. Students finishing a first year of instruction in Spanish (1-2-3) are encouraged to continue on to second-year (intermediate-level) studies and take Spanish 4, 5, and 6, or Spanish 56, an introduction to Spanish language literature. First-year students also have the option of enrolling in the 1T, 2T, 3T series, which requires continuous enrollment from fall through spring quarters.

Health science majors have priority enrollment in Spanish 5M, Medical Spanish, but others may enroll if there is space availability. Students are also encouraged to continue with the third-year Spanish 156 and Spanish for Spanish Speakers 125 series of courses in which a wide variety of topics are covered. For more information on the courses offered in Spanish, please see the course descriptions.

Spanish for Spanish Speakers

Spanish for Spanish speakers (SPSS) has been developed for heritage speakers who, although raised in Spanish-speaking communities or households, are not yet fully proficient in Spanish. SPSS courses take into account the experiences and influences of bilingual and bicultural upbringing.

SPSS students are required to attend laboratory instruction once a week in addition to the regular class meetings. Some lower-division and all upper-division courses can fulfill requirements for several majors or departments, such as American studies, education, global economics, language studies, and Latin American and Latino studies.

Campus Language Laboratories and Placement Exams

Information about these topics can be found under [Language Program](#).

Study Abroad

The Office of International Education (OIE) offers programs ranging from four weeks (Summer Session) in Cuernavaca, Mexico to one quarter or one academic year in Buenos Aires; Argentina, Santiago, Chile; San Jose and Monteverde, Costa Rica; Morelia and Monterrey, Mexico, and Cordoba, Madrid, Alcala, Barcelona, and Granada, Spain. Generally, students must have completed Spanish 6 or 56 or SPSS 63 by the end of the sophomore year to qualify for a junior year abroad.

Courses taken abroad can, with approval of an adviser, be applied to major requirements. For more information, see the OIE web site (<http://oie.ucsc.edu/index.html>). For information on credit applied to a particular major, contact the appropriate department.

Faculty and Professional Interests

Professor

JORGE ALADRO FONT (LITERATURE)

Spanish mysticism, theory and historical developments of imagery in the Middle Ages to the baroque period, Renaissance and baroque Hispanic literature, Italian ideas in the Spanish Renaissance, Cervantes

JULIANNE BURTON-CARVAJAL (LITERATURE)

Twentieth- and 21st-century Latin(o) American visual media, particularly film; melodrama as a transnational form; gender and authorship; history, cultures, and representations of California, particularly the Central Coast

NORMA KLAHN (LITERATURE)

Latin American literary and cultural studies (specialization: Mexico), Chicano/Latino literature and culture from a cross-border perspective, modernity/postmodernity, poetics and politics, genre theory (novel, poetry, autobiography), contemporary critical theories (i.e., border, ethnic, feminist, transnational/global)

Associate Professor

LOURDES MARTÍNEZ-ECHAZÁBAL (LITERATURE)

Latin American and Caribbean literatures; Afro-Latin American literatures, cultures, and societies; found[n]ational narratives; Brazilian literature; literatures of Cuba and the Cuban diaspora; critical race theory

JUAN POBLETE (LITERATURE)

Latin(o) American literatures; transnational/global cultures (literature, radio, film); Latin(o) American cultural studies; 19th-century studies; the history of reading practices

Assistant Professor

EVE ZYZIK

Spanish linguistics, second language acquisition, cognitive linguistics, language pedagogy and curriculum design

Senior Lecturer

MARIA VICTORIA GONZÁLEZ-PAGANI

Language teaching methodology; Spanish syntax; computer-assisted foreign language learning; Latin American cultural studies, especially women's contributions

Lecturer

IGNACIO AZNAR, EMERITUS

BRENDA BARCELÓ

Medical and professional Spanish, language instruction technology, Latin American culture, Latin dance expressions, Spanish/English/Spanish translation and interpretation, Hispanic linguistics, Romance languages

CARLOS CALIERNO

Bilingualism and intercultural communication; Latin American culture; history of the conquest, music, art, and cinematography

MARÍA MORRIS

Language learning styles and strategies, culture and technology in language training

MARTA NAVARRO

Latin American literature, Mexican/Chicano culture, Latina/Chicana issues

ARIEL PÉREZ

Language acquisition and teaching methodology, computer-assisted language learning, teaching language for proficiency, oral proficiency assessment; Latin American current affairs

ALVARO ROMERO-MARCO

Spanish literature of the 19th- and 20th-centuries; film, cultural studies

revised 09/01/11

[Program Description](#) | [Faculty](#) | [Course Descriptions](#)

Lower-Division Courses

1. Instruction in the Spanish Language. F,W,S

Speaking, listening comprehension, reading and writing fundamentals. Taught entirely in Spanish; conversational fluency is encouraged through classroom practice and conversation groups, and is supplemented by language laboratory work. Classes are held three days a week; students complete the conversation group work independently of the classroom sessions. Prerequisite(s): Spanish Placement Examination score of 10. Enrollment limited to 24. *The Staff*

1T. Topic-Oriented Spanish Language Instruction (Special Track). *

Prepares students to understand, speak, and write on topics (geography, nature, society, art, history, etc.) and to provide information about themselves and their surroundings. Emphasis on the development of proficiency in all language skills and the active use of Spanish through task-oriented activities. Multiple-term course; students receive 5 credits per course and receive credit for all three courses upon completion of course 3T. Prerequisite(s): Spanish Placement Examination score of 10. Enrollment limited to 24. *The Staff*

1U. Laboratory to Topic-Oriented Spanish Language Instruction (2 credits). *

Consists of individualized instruction which allows students to work at their own pace developing their oral comprehension, reading comprehension, speaking and writing skills. Provides the supplementary exposure and practice students need in the acquisition of the target language. Multiple-term course; students receive credit for all three courses upon completion of course 3U. Prerequisite(s): interview only; Spanish Placement Examination score of 10. *The Staff*

2. Instruction in the Spanish Language. F,W,S

Speaking, listening comprehension, reading and writing fundamentals. Taught entirely in Spanish; conversational fluency is encouraged through classroom practice and conversation groups, and is supplemented by language laboratory work. Classes are held three days a week; students complete the conversation group work independently of the classroom sessions. Prerequisite(s): course 1 or Spanish Placement Examination score of 20. Enrollment limited to 24. *The Staff*

2T. Topic-Oriented Spanish Language Instruction (Special Track). *

Prepares students to understand, speak, and write on topics (geography, nature, society, art, history, etc.) and to provide information about themselves and their surroundings. Emphasis on the development of proficiency in all language skills and the active use of Spanish through task-oriented activities. Multiple-term course; students receive 5 credits per course and receive credit for all three courses upon completion of course 3T. Prerequisite(s): course 1T. Enrollment limited to 24. *The Staff*

2U. Laboratory to Topic-Oriented Spanish Language Instruction (2 credits). *

Consists of individualized instruction which allows students to work at their own pace developing their oral comprehension, reading comprehension, speaking and writing skills. Provides the supplementary exposure and practice students need in the acquisition of the target language. Multiple-term course; students receive credit for all three courses upon completion of course 3U. Prerequisite(s): interview only; course 1U. *The Staff*

3. Instruction in the Spanish Language. F,W,S

Speaking, listening comprehension, reading and writing fundamentals. Taught entirely in Spanish; conversational fluency is encouraged through classroom practice and conversation groups, and is supplemented by language laboratory work. Classes are held three days a week; students complete the conversation group work independently of the classroom sessions. Prerequisite(s): course 2, 2X, or Spanish Placement Examination score of 30. Enrollment limited to 24. *The Staff*

3T. Topic-Oriented Spanish Language Instruction (Special Track). *

Prepares students to understand, speak, and write on topics (geography, nature, society, art, history, etc.) and to provide information about themselves and their surroundings. Emphasis on the development of proficiency in all language skills and the active use of Spanish through task-oriented activities. Multiple-term course; students receive 5 credits per course and receive credit for all three courses upon completion of course 3T. Prerequisite(s): course 2T. Enrollment limited to 24. *The Staff*

3U. Laboratory to Topic-Oriented Spanish Language Instruction (2 credits). *

Consists of individualized instruction which allows students to work at their own pace developing their oral comprehension, reading comprehension, speaking and writing skills. Provides the supplementary exposure and practice students need in the acquisition of the target language. Multiple-term course; students receive credit for all three courses upon completion of course 3U. Prerequisite(s): interview only; course 2U. *The Staff*

4. Intermediate Spanish. F,W,S

Includes comprehensive grammar review, composition, readings, and discussion. Reading and audiovisual material deal with various sociopolitical and cultural issues in the Spanish speaking world. Classes are conducted in Spanish. Prerequisite(s): course 3, 3T, 3X, or Spanish Placement Examination score of 40. Enrollment limited to 24. (General Education Code(s): CC, IH.) *The Staff*

5. Intermediate Spanish. F,W,S

Includes comprehensive grammar review, composition, readings, and discussion. Reading and audiovisual material deal with various socio-political and cultural issues in the Spanish speaking world. Classes are conducted in Spanish. Prerequisite(s): course 4, 4X, or Spanish Placement Examination score of 50. Enrollment limited to 24. (General Education Code(s): CC, IH.) *The Staff*

5M. Medical Spanish. F,W,S

Students learn vocabulary, expressions, and cultural background to be able to interact with Spanish-speaking patients and doctors. Medical Spanish fulfills language requirement for the health science major of the Biology Department. Prerequisite(s): course 4; or Spanish for Spanish Speakers 61, 62, and 63; or Spanish for Spanish Speakers 125; or Spanish Placement Examination score of 50 or higher. Enrollment restricted to health sciences majors. Enrollment limited to 24. (General Education Code(s): IH.) *The Staff*

6. Intermediate Spanish. F,W,S

Increases oral and written proficiency using authentic reading materials which focus on such topics as social class, ethnicity, education, religion, economic, and political developments in the Spanish-speaking world. Prerequisite(s): course 5, 5M, 5X, or Spanish Placement Examination score of 60. Enrollment limited to 24. (General Education Code(s): CC, IH.) *The Staff*

94. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Upper-Division Courses

114. Advanced Conversation and Composition. F

Advanced conversation and composition based on extensive readings in the humanities and social sciences. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. Prerequisite(s): course 6, 56, Spanish for Spanish Speakers 63, or Spanish Placement Examination score of 70. (General Education Code(s): TA.) *The Staff*

156. Topics in Hispanic Language and Culture.

An analytic study of 20th-century Hispanic language and culture as revealed in print and audio visual media. *The Staff*

156A. The Language of Latin America Cinema. *

Explores Latin American culture through its cinematic art. Students are exposed to and participate in discussion, analysis, and commentary on important social, historical, and political issues presented in the films. Provides a greater understanding of Latin America, and works toward advanced communicative proficiency and comprehension of linguistic variations in countries such as Cuba, Argentina, México, Bolivia, Chile, and others. (Formerly *Hispanic Culture Through Film*.) Prerequisite(s): course 6, 56, Spanish for Spanish Speakers 63, or Spanish Placement Examination score of 70. (General Education Code(s): CC, E.) *C. Calierno*

156E. Spanish Culture. W

A broad survey of Spanish cultural topics, including history, politics, religions, art forms, music, and films. It is based on extensive conversations, discussion, and composition. Particular emphasis is placed on key changes that have occurred during the 20th century in Spain. Classes conducted through commentary on texts read (or viewed), oral presentations, and debate. Recommended for students preparing to go to Spain with EAP. Prerequisite(s): course 6, 56, Spanish for Spanish Speakers 63, or Spanish Placement Examination score of 70. Enrollment limited to 24. *The Staff*

156F. El humor en Español. S

Topic-oriented language course on sociopolitical and historical issues as seen through humor in different genres and media. Topics include Mafalda and Condorito (comic strips), Rius (collage of comic strips, photographs and original documents), Continflas and Almodovar (cinema), El Teatro Campesino (theater), Ana L., Vega (literature), Les Luthiers (song and music). Course deals with

written and oral discourse pertaining to the following Spanish language varieties: Rio de la Plata, Mexican, Caribbean, U.S., and Peninsular. Intensive writing and speaking in Spanish.
Prerequisite(s): courses 6, 56, Spanish for Spanish Speakers 63 or Spanish placement examination score of 70. (General Education Code(s): TA.) *M. Gonzalez Pagani*

156G. Spanish for the Professions. S

Taught in Spanish. Students learn vocabulary and expressions as well as pertinent cultural background to understand, speak, read, and write about business and professional situations in connection with the Latino experience. Legal, educational, medical, and business topics are covered. Prerequisite(s): course 6, 56, Spanish for Spanish Speakers 63, or Spanish Placement Examination score of 70. Enrollment limited to 18. (General Education Code(s): ER.) *B. Barcelo*

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

[Program Description](#) | [Faculty](#) | [Course Descriptions](#)

Lower-Division Courses

61. Spanish for Spanish Speakers. F

This course deals with orthography (syllabification, accentuation, etc.), basic grammatical features, verbal structures, and development of conversation skills and confidence in spoken Spanish. Focus on development of writing skills: description, dialogue, exposition, and commentary on contemporary issues relevant to Spanish speakers of the Americas. Students need to utilize the Self-Placement Guidelines, available in 133 Humanities Building to assure proper placement in this class. (General Education Code(s): CC, IH.) *The Staff*

62. Spanish for Spanish Speakers. W

Comprehensive review of the subjunctive, the passive voice, different uses of "se," and other nuances of the language. Intensive practice in understanding specialized readings, presentation/discussion of major ideas, vocabulary expansion, and writing essays on topics discussed. Prerequisite(s): course 61 or placement exam. Students who have not taken Spanish for Spanish Speakers 61 need to speak with an instructor in the Spanish for Spanish Speakers Program. (General Education Code(s): CC, IH.) *The Staff*

63. Spanish for Spanish Speakers. S

Comprehensive grammar review. Rigorous practice in reading historical, sociopolitical, and literary works pointing out nuances of Spanish. Rigorous experimentation with various writing styles: analytical, argumentative, and creative. Prerequisite(s): course 62 or placement exam. (General Education Code(s): CC, IH.) *The Staff*

94. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency. Enrollment limited to 10. May be repeated for credit. *The Staff*

99. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Upper-Division Courses

125. Mexico and the Southwest. S

An interdisciplinary survey of the cultural history of the Mexican people in both Mexico and the U.S. Southwest. Topics include literature, art, folklore, oral tradition, music, politics, as well as "everyday" cultural manifestations. Conducted in Spanish. May be counted toward fulfillment of upper-division major requirements for Latin American and Latino studies and language studies. Prerequisite(s): course 6, 56, Spanish for Spanish Speakers 63, or Spanish Placement Examination score of 70. Enrollment limited to 25. (General Education Code(s): CC.) *The Staff*

194. Group Tutorial. F,W,S

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Enrollment limited to 10. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Lower-Division Courses**10. Skills for College and Beyond (2 credits). S**

Applications of practical skills for effective, meaningful study in the context of a full, busy life. Topics include learning styles, time management, test preparation, and life balance. Specific techniques for efficient reading comprehension, note-taking, memorization, and self-assessment are introduced. Enrollment restricted to college members and by permission of instructor. Enrollment limited to 15. *C. Camblin*

16. Stevenson Community Garden (2 credits). *

Hands-on course in ecological horticulture at the Stevenson garden. Students grow the Stevenson community through gardening and projects focused on building a healthy and regenerative local-foods culture. Enrollment by interview only. Enrollment restricted to Stevenson College members. Enrollment limited to 16. *D. Shaw*

18. Eighteenth Century Kabbalistic Thought and Literature (2 credits). *

Emphasis on analyzing (translations of) original text to explore critical areas of kabbalistic thought, including tzimtzum, the sefirot, theodicy, and hermeneutics. *The Staff*

20. The Harder They Come—The Postcolonial Self in Jamaica (2 credits). *

Examines Jamaica's transition to independence: the history of colonialism, its legacy of violence, and how the subaltern incorporate and rework hegemonic tropes of the gunslinger, gangster, preacher, politician, and policeman in literature, music, and film. Enrollment restricted to Stevenson College members. Enrollment limited to 20. *The Staff*

21. Citizens and Nations: Self and Society in the 19th Century (2 credits). S

A reading seminar focusing on a set of key texts. Examines how the political and industrial revolutions of the 19th century fundamentally transformed the relationships between individuals and their respective societies. Enrollment restricted to Stevenson College members. Enrollment limited to 20. *K. Silver*

22. Self and Society in Classical Social Theory (2 credits). *

Reading seminar focusing on a set of key texts from classical social theory. Explores the transition from traditional to modern societies. Authors addressed may include Locke, Rousseau, de Tocqueville, Marx, Weber, and Durkheim. Enrollment restricted to Stevenson College members. Enrollment limited to 20. *K. Silver*

23. Monsters and the Monstrous in the Early British Novel (2 credits). *

Examines figurations of monsters and the monstrous in the 18th- and 19th-Century British novel to explore the function of monsters in the affirmation and subversion of social constructions such as race, gender, and sexuality. *S. Sweat*

24. Cultural Intelligence: Diversity Facilitator Team (2 credits). F

Students who apply for this course have the opportunity to become members of the diversity facilitator team (DFT) and be requested to deliver workshops. Instruction focuses primarily on develop cultural intelligence (CQ) and sharpening facilitation skills. Enrollment by permission of instructor. Enrollment restricted to sophomores, juniors, seniors, and graduate students. Enrollment limited to 18. *D. Smith*

28. Residential Life Leadership (2 credits). S

Examines the role and facilitates the development of Stevenson College Residential Advisers. Class themes include an exploration of leadership, resource management, and the process of community building within the college. Course evaluation based on paper writing, participation, engagement with course materials, and a small group final project that requires students to create a year-long program model designed to address an issue facing the Stevenson community. Prerequisite(s): Must have been hired as a Stevenson residential adviser or alternate for the following academic year. Enrollment limited to 30. May be repeated for credit. *B. Redding, S. Prather*

30. Thesis Writing and Editing (2 credits). W

Identifies and examines the assumptions, expectations, and formats of writing in students' fields, with the goal of beginning—or continuing—academic research. Prerequisite(s): satisfaction of the Composition requirement. Enrollment restricted to junior and senior college members and by permission of instructor. Enrollment limited to 25. *A. Weaver*

33. Self and Society Examined Through Ethical Dilemmas (2 credits). *

Examines ethical dilemmas in contemporary topics, such as the status of moral principles during

warfare; animal rights and the ethics of eating meat; privacy in the age of the Internet; imprisonment and rehabilitation; legal and illegal immigration; same-sex marriage; and health care. *The Staff*

35. Everyday Ethics for College Life (2 credits). *

Exploration of and reflection on everyday values and virtues such as integrity, open-mindedness, honesty, and community. Objectives include learning how to think about moral dilemmas and how to begin drafting one's own code of ethics. Enrollment restricted to college members. Enrollment limited to 20. *C. Camblin*

36. Women in the Bible (2 credits). *

Explores and analyzes many of the biblical narratives pertaining to female characters in the Hebrew Bible. Students are required to read the original texts, pose questions, suggest answers, and explore possible meanings of the narrative. Enrollment limited to 10. *The Staff*

40. The Self Under Moral Siege: Challenges for the Individual in 20th-Century Totalitarian Europe (2 credits). *

Examines how individuals and communities confronted dilemmas when laws, state ideology, and war challenged traditional morality. Themes include: ethics, responsibility, victimhood, moral compromise, retribution, and reconciliation. Enrollment priority given to Stevenson College students. Enrollment limited to 22. *The Staff*

41. Spirituality in a Modern World (2 credits). *

Investigates scientific and pragmatic perspectives on spirituality from William James to Fritjof Capra. Explores spirituality in Western and Eastern traditions from Martin Buber to Pema Chodron. Students analyze, support, and articulate their spiritual positions in a culminating paper. Enrollment restricted to Stevenson College members. Enrollment limited to 20. *C. Camblin*

42. Student-Directed Seminar. F,W,S

Seminars taught by upper-division students under faculty supervision (see course 192). *The Staff*

80A. Introduction to University Discourse: Self and Society. F

Explores rhetorical principles and conventions of university discourse providing intensive practice in analytical writing, critical reading, and speaking. Stevenson's core course considers the roots of modern society using foundational religious texts and major classical and modern philosophical works. Students cannot receive credit for this course and course 80B. Enrollment restricted to first-year college members who have not satisfied the C1 requirement. Enrollment limited to 25. (General Education Code(s): T5-Humanities and Arts or Social Sciences, C1.) *The Staff*

80B. Rhetoric and Inquiry: Self and Society. F

Explores the intersections of investigation, interpretation, and persuasion and hones strategies for writing and research. Stevenson's core course investigates the roots of modern society, using foundational religious texts and classical and modern philosophical works. Students cannot receive credit for this course and course 80A. Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment restricted to first-year college members. Enrollment limited to 25. (General Education Code(s): T5-Humanities and Arts or Social Sciences, C2.) *The Staff*

80F. Self and Society Through Film (2 credits). *

Seminar designed to expand upon the discussions begun in the Stevenson Core Course. Course uses documentary and feature films to investigate and discuss all sides of modern conflicts that bring class back to the Core Course theme. Prerequisite(s): completion of two-quarter core course sequence. Enrollment limited to 25. *The Staff*

80H. Rainbow Theater: An Introduction to Multicultural Theater. F

Introduction to Asian American, Chicano/Latino, and African American plays through reading of major authors, discussion of social and historical context of their work, and development of a production of a one-act play from each cultural group. In-depth examination of key historical context of these three cultural groups. Video presentations followed by class discussion. May be repeated for credit. (General Education Code(s): T4-Humanities and Arts, E.) *D. Williams*

80T. Self and Society for Transfer Students. *

Condensed version of Stevenson's core course for transfer students. Develops analytical writing, critical reading, and effective speaking by considering influential philosophical works while exploring cultural conflicts in modern society. Themes include imperialism, racism, and class conflict. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to college members. Enrollment limited to 25. (General Education Code(s): T5-Humanities and Arts or Social Sciences, W, E.) *The Staff*

81A. Self and Society 2. W

Winter quarter of Stevenson's core course continues development of analytical writing, critical reading, and effective speaking in exploring conflicts inherent in modern society. Investigates themes of colonization, race, gender, class, and cultural conflict. Enrollment restricted to first-year and sophomore college members. Students cannot receive credit for this course and course 81B. Enrollment limited to 25. (General Education Code(s): TA, E.) *The Staff*

81B. Rhetoric and Inquiry: Self and Society 2. W

Explores the intersections of investigation, interpretation, and persuasion and hones strategies for writing and research. Winter quarter of Stevenson's core course investigates themes of colonization, race, gender, class, and cultural conflict. Permission of instructor required; selection

for this course based on application submitted. Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment restricted to first-year and sophomore college members. Students cannot receive credit for this course and course 81A. Enrollment limited to 25. (General Education Code(s): TA, C2, E.) *The Staff*

Upper-Division Courses

120. Self and Society: Teaching Practicum. W

Each student facilitates one of the discussion sections of Stevenson 81A or attends lectures, and meets with staff for practicum on the teaching process. Prerequisite(s): qualifications as determined by instructor at first class meeting. Enrollment limited to 5. *The Staff*

121. Advanced Research and Strategic Planning for Graduate School. W

Guided by a faculty mentor, students engage in an advanced research experience including developing a research proposal, conducting research, and writing and presenting a research paper. Students also prepare for graduate school by practicing the graduate school application process. Enrollment is restricted to students accepted into the Educational Opportunity Programs faculty mentor program. Enrollment also restricted to junior and senior majors in the Divisions of Arts, Humanities, and Social Sciences. Enrollment limited to 20. *The Staff*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision (see course 42). Prerequisite(s): upper-division standing and a proposal supported by a faculty member willing to supervise. *The Staff*

193. Field Study. F,W,S

Provides for individual programs of study, sponsored by the college and performed off-campus. This course may be counted for up to three courses of credit in any quarter. Prerequisite(s): approval of student's adviser and the academic preceptor, and, in the case of full-time study, the board of studies supervising the major. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

A program of independent study arranged between a group of students and a faculty instructor. Enrollment restricted to members of Stevenson College. Enrollment limited to 12. *The Staff*

194F. Group Tutorial (2 credits). F,W,S

A program of independent study arranged between a group of students and a faculty instructor. Course designed for members of Stevenson College. Students submit petition to sponsoring agency. Enrollment limited to 10. May be repeated for credit. *The Staff*

198. Independent Field Study. F,W,S

Provides for college-sponsored individual study programs off campus, for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. Prerequisite(s): approval of the student's adviser, certification of adequate preparation, approval by the academic preceptor. May be repeated for credit. *The Staff*

198F. Independent Field Study (2 credits). F,W,S

Provides for college-sponsored individual study programs off campus, for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. Students submit petition to sponsoring agency. Requires approval of the student's adviser and academic preceptor. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Individual projects carried out under the supervision of a Stevenson faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Individual projects carried out under the supervision of a Stevenson faculty member. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

[Program Description](#) | [Changes to 2010-12 Catalog Highlighted](#) | [Faculty](#) | [Course Descriptions](#)

Program Description

The Theater Arts Department is a diverse group of scholars/artists united by a passionate belief in the value of the performing arts. Based on respect for the classical theater of all cultures, combined with a determination to challenge tradition and fashion with equal courage, we educate our students in the history, theory, and practice of theater to address fundamental issues by using the tools of body, voice, mind, and imagination. Seeking to attain the highest levels of intellectual and artistic integrity with a commitment to cultural diversity, we serve the research mission of UCSC, our audiences, and the students who will shape the theater of the future.

The Theater Arts Department combines drama, dance, critical studies, and theater design/technology to offer students an intensive program of theater as a unified field. The program stresses the inter-relation of all concentrations as essential to the successful practice of the theater arts in the 21st century. Graduates of the UCSC program typically pursue careers in professional theater and dance companies, in film and television, and in teaching at all levels—from university to high school to grade school. Many students go on to higher degrees at prestigious national programs. Others engage in careers in arts, administration, dramatic writing, and related fields.

The lower-division curriculum requires a range of practical work in the various concentrations and an interdisciplinary exposure to critical and historical studies. At the upper-division level, students are given the opportunity to focus on one or more areas of interest in limited-enrollment studios. At the same time, they are asked to expand their theoretical perspectives through confrontation with performance theory and focused coursework in critical studies. The impact of digital and new media on theater is integrated into the curriculum, especially with respect to dance and design.

A wealth of production opportunities is available to students. This includes major productions directed by faculty or distinguished visiting artists each quarter, productions directed or choreographed by students, and faculty-directed workshops. Undergraduate students are also given the opportunity to see their own writing, choreography, or developing concepts put into production in annual festivals of student work. Although majors are given preference in studio courses, most courses and productions welcome nonmajors as well. Opportunities to study and perform non-Western as well as Euro-American traditions are also a significant part of the program.

The stage and studio spaces available to students of theater arts allow for this breadth of training and performance opportunities. The Theater Arts Center contains a 500-seat thrust stage; a state-of-the-art experimental theater; a 200-seat proscenium theater; acting, directing, and dance studios; costume, scene, and properties shops; a sound recording room; a computer lab; and a metal shop.

Elsewhere on campus are the open-air Quarry Theater seating 3,000, the Shakespeare Santa Cruz Festival Glen, and the 150-seat Barn Theater. Library holdings in theater literature and history are extensive, including a large slide collection and dance video holdings; journals in current theater, design/technology, and dance; and recordings, films, videotapes, and CD-ROMs.

A unique resource for UCSC students is Shakespeare Santa Cruz (SSC). Acknowledged to be one of the leading Shakespeare festivals in the country, SSC was founded in 1982 to foster links between modern scholarship and contemporary professional theater practice. SSC's annual summer festival presents the works of Shakespeare in thematic context with other great plays of the world stage, performed, designed, and directed by professionals from all over the country. SSC offers undergraduates various opportunities to work in conjunction with theater professionals through its summer intern program, its winter holiday production (in fall quarter), and Shakespeare-to-Go, a 45-minute Shakespeare outreach production in which students perform and tour (rehearsed during winter quarter and performed during spring quarter) for audiences throughout Santa Cruz County and beyond.

Majors who wish to concentrate their study of one particular theater arts area before seeking admission to graduate school or work with professional companies are encouraged to apply to the

department's Fifth-Year Certificate Program.

Requirements to Declare the Major

Prior to petitioning for the major, students must have successfully completed three lower division courses: one course from THEA 61A, B, or C, and two courses chosen from THEA 10, 20, or 30. Students are encouraged to complete these courses as early in their studies as possible so that the petition to major status can be accomplished no later than the end of sophomore year.

Transfer Students

Transfer students who have not satisfied the requirements to declare the major are advised to take as many of the six lower-division requirements listed above as possible in their first two quarters. Transfer students may petition to have equivalent lower-division courses taken at other schools count toward the lower-division major requirements. Petition forms and information on courses and major requirements can be obtained at the department office, J106 Theater Arts Center.

Major Requirements

The Theater Arts major requires seven lower-division courses, six credits of course 50, and eight upper-division courses (inclusive of a senior seminar project). Majors may organize their studies around a concentration in an area of interest in accordance with the requirements outlined below. The following six lower-division courses must be taken by all majors:

10, *Introduction to Theater Design and Technology*

20, *Introductory Studies in Acting*

30, *Introduction to Dance Theory and Technique*

61A, *Issues and Methods in Theater Arts*

61B, *Tragedy*

61C, *Birth of the Modern: After the Renaissance*

One additional lower-division 5-credit elective.

Plus: 50, *Fundamentals of Theater Production* (two-credit course; must take a total of six credits)

The following upper-division courses must be taken to complete the major:

Eight, 5-credit upper-division theater arts courses:

- 160, *Dramatic Theories*
- Two studio courses
- One elective
- One faculty-directed theater arts production course
- Two 161, 163, 164, or 165 series of critical studies courses in dance or drama, or 113, 116A (design) courses
- One senior seminar requirement, (course 185)

Exceptions to the major requirements, through the UC Education Abroad Program (EAP) or transfer credits, are considered on a case-by-case basis by the department chair.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement in theater arts is met by completion of the required courses 160 and 185.

Theater Arts Major Planners

The following are two recommended academic plans for students to complete during their first two years as preparation for the theater arts major. Plan One is a guideline for students who are committed to the major early in their academic career; Plan Two is for students who are considering the major.

Plan One

Year	Fall	Winter	Spring
1st (frsh)	THEA 61B	THEA 20	THEA 10
	gen ed	THEA 61A	gen ed

Comprehensive Requirement

Theater arts majors are responsible for successfully completing course 185, Senior Seminar.

Minor Requirements

Students earn a minor in theater arts by completing eight courses (seven, 5-credit courses and one, 2-credit course) comprising a background in the theory and practice of the theater arts as well as a focus on either drama, theater design/technology, or dance. The course requirements are listed below. There is no comprehensive requirement for the minor.

- THEA 61A
- One quarter of the 2-credit course 50
- One course in the student's area of focus chosen from: 10, 20, 30, or 40
- Three upper-division courses chosen from the following: 113, 116A, 161, 163, 164, 165
- Two upper-division studio courses, one of which may be a faculty-directed production (151)

Independent Studies (199) and *Field Studies* (198) will not satisfy minor requirements unless approved in advance by an adviser and the chairperson.

Transfer students are advised to check with the department office to determine which courses can be articulated from a community college.

The Dance Minor

Students earn a minor in dance by completing eight courses (three lower division, five upper division) comprising a background in the theory and practice of dance. The course requirements are listed below. There is no comprehensive requirement for the minor.

Lower division courses:

- one 5-credit course in dance foundations (30 or 36); one course (varying units) in cultural forms (including but not restricted to 22, 37, 80Z)
- one quarter of the 2-credit course 50

Upper division courses:

- one 5-credit course in dance foundations (128, 130); one course in critical studies (164, 165)
- three 5-credit elective courses planned in consultation with a faculty adviser (including but not restricted to 122, 128, 131, 135, 137, 138, 139)
- *Independent Studies* (199) and *Field Studies* (198) will not satisfy minor requirements unless approved in advance by an adviser and the chairperson.
- Transfer students are advised to check with the department office to determine which courses can be articulated from a community college.

Fifth-Year Certificate Program

The Theater Arts Department offers a graduate certificate program that allows a limited number of students to refocus or intensify their skills, concentrating on performance reinforced by scholarship and research. The program provides the opportunity to experience the benefits of apprenticeship in an academic setting. Students follow an individual program suited to their background, needs, and interests while concentrating in drama, design/technology, dance, playwriting, Western or non-Western theater, or dramatic literature.

Students in the graduate certificate program are expected to complete one academic year (fall-spring) as a full-time resident student, passing eight 5-credit theater arts courses. Of those eight courses, one is a required graduate seminar (course 290); and one must be chosen from the upper-division critical studies electives on offer. An incomplete in course 290 and/or 297 must be completed by the end of the following quarter of the residency year. The remainder of the program is designed by the student according to individual interests and needs in consultation with the faculty adviser. Many students elect to take faculty-supervised individual studies courses in their

area of emphasis.

For additional information, contact the Theater Arts Department.

theater@ucsc.edu<http://theater.ucsc.edu/>***Program Description***

The Theater Arts Department is a diverse group of scholars/artists united by a passionate belief in the value of the performing arts. Based on respect for the classical theater of all cultures, combined with a determination to challenge tradition and fashion with equal courage, we educate our students in the history, theory, and practice of theater to address fundamental issues by using the tools of body, voice, mind, and imagination. Seeking to attain the highest levels of intellectual and artistic integrity with a commitment to cultural diversity, we serve the research mission of UCSC, our audiences, and the students who will shape the theater of the future.

The Theater Arts Department combines drama, dance, critical studies, and theater design/technology to offer students an intensive program of theater as a unified field. The program stresses the inter-relation of all concentrations as essential to the successful practice of the theater arts in the 21st century. Graduates of the UCSC program typically pursue careers in professional theater and dance companies, in film and television, and in teaching at all levels—from university to high school to grade school. Many students go on to higher degrees at prestigious national programs. Others engage in careers in arts, administration, dramatic writing, and related fields.

The lower-division curriculum requires a range of practical work in the various concentrations and an interdisciplinary exposure to critical and historical studies. At the upper-division level, students are given the opportunity to focus on one or more areas of interest in limited-enrollment studios. At the same time, they are asked to expand their theoretical perspectives through confrontation with performance theory and focused coursework in critical studies. The impact of digital and new media on theater is integrated into the curriculum, especially with respect to dance and design.

A wealth of production opportunities is available to students. This includes major productions directed by faculty or distinguished visiting artists each quarter, productions directed or choreographed by students, and faculty-directed workshops. Undergraduate students are also given the opportunity to see their own writing, choreography, or developing concepts put into production in annual festivals of student work. Although majors are given preference in studio courses, most courses and productions welcome nonmajors as well. Opportunities to study and perform non-Western as well as Euro-American traditions are also a significant part of the program.

The stage and studio spaces available to students of theater arts allow for this breadth of training and performance opportunities. The Theater Arts Center contains a 500-seat thrust stage; a state-of-the-art experimental theater; a 200-seat proscenium theater;

acting, directing, and dance studios; costume, scene, and properties shops; a sound recording room; a computer lab; and a metal shop.

Elsewhere on campus are the open-air Quarry Theater seating 3,000, the Shakespeare Santa Cruz Festival Glen, and the 150-seat Barn Theater. Library holdings in theater literature and history are extensive, including a large slide collection and dance video holdings; journals in current theater, design/technology, and dance; and recordings, films, videotapes, and CD-ROMs.

A unique resource for UCSC students is Shakespeare Santa Cruz (SSC). Acknowledged to be one of the leading Shakespeare festivals in the country, SSC was founded in 1982 to foster links between modern scholarship and contemporary professional theater practice. SSC's annual summer festival presents the works of Shakespeare in thematic context with other great plays of the world stage, performed, designed, and directed by professionals from all over the country. SSC offers undergraduates various opportunities to work in conjunction with theater professionals through its summer intern program, its winter holiday production (in fall quarter), and Shakespeare-to-Go, a 45-minute Shakespeare outreach production in which students perform and tour (rehearsed during winter quarter and performed during spring quarter) for audiences throughout Santa Cruz County and beyond.

Majors who wish to concentrate their study of one particular theater arts area before seeking admission to graduate school or work with professional companies are encouraged to apply to the department's Fifth-Year Certificate Program.

Requirements to Declare the Major

Prior to petitioning for the major, students must have successfully completed three lower division courses: one course from THEA 61A, B, or C, and two courses chosen from THEA 10, 20, or 30. Students are encouraged to complete these courses as early in their studies as possible so that the petition to major status can be accomplished no later than the end of sophomore year.

Transfer Students

Transfer students who have not satisfied the requirements to declare the major are advised to take as many of the six lower-division requirements listed above as possible in their first two quarters. Transfer students may petition to have equivalent lower-division courses taken at other schools count toward the lower-division major requirements. Petition forms and information on courses and major requirements can be obtained at the department office, J106 Theater Arts Center.

Major Requirements

The Theater Arts major requires seven lower-division courses, six credits of course 50, and eight upper-division courses (inclusive of a senior seminar project). Majors may organize their studies around a concentration in an area of interest in accordance with the requirements outlined below. The following six lower-division courses must be taken by all majors:

10, Introduction to Theater Design and Technology

20, Introductory Studies in Acting

30, Introduction to Dance Theory and Technique

61A, Issues and Methods in Theater Arts

61B, Tragedy

61C, *Birth of the Modern: After the Renaissance*

One additional lower-division 5-credit elective.

Plus: 50, *Fundamentals of Theater Production* (two-credit course; must take a total of six credits)

The following upper-division courses must be taken to complete the major:

Eight, 5-credit upper-division theater arts courses:

- 160, *Dramatic Theories*
- Two studio courses
- One elective
- One faculty-directed theater arts production course
- Two 161, 163, 164, or 165 series of critical studies courses in dance or drama, or 113, 116A (design) courses
- One senior seminar requirement, (course 185)

Exceptions to the major requirements, through the UC Education Abroad Program (EAP) or transfer credits, are considered on a case-by-case basis by the department chair.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement in theater arts is met by completion of the required courses 160 and 185.

Theater Arts Major Planners

The following are two recommended academic plans for students to complete during their first two years as preparation for the theater arts major. Plan One is a guideline for students who are committed to the major early in their academic career; Plan Two is for students who are considering the major.

	gen ed	gen ed	gen ed
	(declare major)		

Comprehensive Requirement

Theater arts majors are responsible for successfully completing course 185, *Senior Seminar*.

Minor Requirements

There are two minors offered in Theater Arts. One is the comprehensive Theater Arts minor and the other is the Dance minor. Note: For both minors, Independent Studies (199) and Field Studies (198) will not satisfy minor requirements unless approved in advance by an adviser and the chairperson. Transfer students are advised to check with the department office to determine which courses can be articulated from a community college.

The Theater Arts Minor

Students earn a minor in theater arts by completing eight courses (seven, 5-credit courses and one, 2-credit course) comprising a background in the theory and practice of the theater arts as well as a focus on either drama, theater design/technology, or dance. The course requirements are listed below. There is no comprehensive requirement for the minor.

Lower-division courses:

- THEA 61A
- One quarter of the 2-credit course 50
- One course in the student's area of focus chosen from: 10, 20, 30, or 40
- Three upper-division courses chosen from the following: 113, 116A, 161, 163, 164, 165
- Two upper-division studio courses, one of which may be a faculty-directed production (151)

Independent Studies (199) and *Field Studies* (198) will not satisfy minor requirements unless approved in advance by an adviser and the chairperson.

Transfer students are advised to check with the department office to determine which courses can be articulated from a community college.

The Dance Minor

Students earn a minor in dance by completing eight courses (three lower division, five upper division) comprising a background in the theory and practice of dance. The course requirements are listed below. There is no comprehensive requirement for the minor.

Lower division courses:

- one 5-credit course in dance foundations (30 or 36); one course (varying units) in cultural forms (including but not restricted to 22, 37, 80Z)
- one quarter of the 2-credit course 50

Upper division courses:

- one 5-credit course in dance foundations (128, 130); one course in critical studies (164, 165)
- three 5-credit elective courses planned in consultation with a faculty adviser (including but not restricted to 122, 128, 131, 135, 137, 138, 139)
- *Independent Studies* (199) and *Field Studies* (198) will not satisfy minor requirements unless approved in advance by an adviser and the chairperson.
- Transfer students are advised to check with the department office to determine which courses can be articulated from a community college.

Fifth-Year Certificate Program

The Theater Arts Department offers a graduate certificate program that allows a limited number of students to refocus or intensify their skills, concentrating on performance reinforced by scholarship and research. The program provides the opportunity to experience the benefits of apprenticeship in an academic setting. Students follow an individual program suited to their background, needs, and interests while concentrating in drama, design/technology, dance, playwriting, Western or non-Western theater, or dramatic literature.

Students in the graduate certificate program are expected to complete one academic year (fall-spring) as a full-time resident student, passing eight 5-credit theater arts courses. Of those eight courses, one is a required graduate seminar (course 290); and one must be chosen from the upper-division critical studies electives on offer. An incomplete in course 290 and/or 297 must be completed by the end of the following quarter of the residency year. The remainder of the program is designed by the student according to individual interests and needs in consultation with the faculty adviser. Many students elect to take faculty-supervised individual studies courses in their area of emphasis.

Faculty and Professional Interests

Professor

JAMES H. BIERMAN

Playwriting, theater history and literature, classical and Renaissance drama, Chicano theater, digital media

M. KATHLEEN FOLEY

Asian theater, Southeast Asian studies, performance studies, maskwork, puppetry, multicultural theater

MARK FRANKO

Dance history and theory, choreography, technique, performance studies, theatrical theory in historical and critical perspective

DANNY SCHEIE

Acting, directing, dramatic literature, theater history, Shakespeare, Wagner, gay studies

PAUL WHITWORTH

Acting, directing, dramatic literature (English and Spanish Renaissance), translating dramatic literature

Associate Professor

BRANDIN BARON

Costume design, history of design

DAVID CUTHBERT

Lighting design, CADD, projection design, scenic design

KATE EDMUNDS

Set design for theater and film

PATTY GALLAGHER

Movement training for actors, circus and clown traditions, and Indonesian dance/performance

KIMBERLY JANNARONE

Directing, dramaturgy, dramatic theory and criticism, theater history, acting

EDWARD C. WARBURTON

Development of dance thought in action, creative processes, and technology in theater arts; dance technique, movement research and composition, and applied dance practices

Lecturer

TANDY BEAL

Choreography, improvisation, technique, performance skills, collaborations with classical and jazz composers, circus, theater and video, children's productions

GREGORY FRITSCH

[Program Description](#) | [Faculty](#) | [Course Descriptions](#)

Lower-Division Courses**10. Introduction to Theater Design and Technology. F,S**

Addresses imagination and creativity. Using the framework of theater production, students explore the process of translating a script into a performance. Topics include visual literacy, creative problem solving, establishing effective working teams, tear sheets, storyboarding, drawing, sound and color theory. This course is a prerequisite for all upper-division design courses. (General Education Code(s): IM, IH, A.) *The Staff, B. Baron, K. Edmunds*

12. Stage Management. F

Designed to acquaint students with the complexities of staging productions from the audition process to final performance. Directing, lighting, scenic production, sound, cueing, and personnel management are aspects that will be touched upon in class. Students are billed a materials fee. (Formerly *Production Management*.) (General Education Code(s): A.) *The Staff*

14. Drawing. *

A fundamental course in drawing from still life, the figure, and in the landscape. The approach is from the tonal and volumetric aspects of the object. Color is introduced as the course progresses. Instruction fashioned to the individual needs of the student. The inexperienced are welcomed as well as the experienced. Students are billed a materials fee. (General Education Code(s): PR-C, A.) *K. Edmunds*

15. Special Topics in Textiles. W

Introduces varied techniques in textile manipulation to create scenic and costume-design properties including drapery, upholstery, masks, bags, and millinery. Students learn basic sewing and surface-design methods, such as knitting, screen-printing, painting/dyeing, and distressing. Enrollment limited to 20. (General Education Code(s): PR-C, A.) *B. Baron, The Staff*

17. Costume Construction. *

The process of interpreting a costume designer's sketch into a finished theatrical costume. Some techniques included are dyeing, fabric selection, draping, flat pattern drafting, pattern manipulation, adaptation, fitting, and alteration. Using various techniques, students make basic pattern pieces and learn to modify them to create costumes. Students are billed a materials fee. Enrollment limited to 20. (General Education Code(s): PR-C, A.) *The Staff*

18. Drafting for Theatrical Production. *

An examination of the fundamentals of drafting scale drawings for production, including floor plans, elevations, sections, working drawings, dimensions, layout, and lettering. Students learn isometric drawing, perspective, and rendering techniques. Students are billed a materials fee. Enrollment limited to 20. (General Education Code(s): A.) *The Staff*

18C. Drafting-Computer Aided. *

In-depth exploration of computer-aided drafting, specifically the programs Vectorworks, Spotlight, and Renderworks. Topics include: the user interface, ground plan, section and detail views, paper space vs. working space, tool palettes, USITT drafting standards, layers, line weights, objects, classes, library annotations, importing rasters, and 3D modeling. Students required to do weekly projects such as ground plans, lighting plots, perspectives, and detail drawings, as well as turn in a major final project, and complete a mid-term, final, and quizzes. Students are billed for a materials fee. Enrollment restricted to theater arts majors. Enrollment limited to 10. (General Education Code(s): A.) *D. Cuthbert, The Staff*

19. Design Studio: Lighting Studio A. S

An introduction to the theory and practice of lighting design with attention to the practical skills and creative approaches to lighting performance pieces; the technical side of lighting design via demonstrations, lectures, and labs. Students complete projects evolving and executing concepts for lighting chosen pieces. Students are billed a materials fee. Prerequisite(s): course 10. (General Education Code(s): PR-C, IH, A.) *D. Cuthbert*

20. Introductory Studies in Acting. F,S

Introduction to basic acting skills and the problems of performance. Concentrates on expanding the

students' range of expression and ability to respond to and analyze dramatic text. Students with little or no experience are encouraged to attend. (General Education Code(s): IM, IH, A.) *The Staff*

21A. Acting Studio 1A: Psychological Realism. W

Explores the fundamentals of the work of Konstantin Stanislavski as developed at the Moscow Art Theater to the works of his and our contemporary playwrights. Specifically, students apply those techniques of action, physical score, given circumstances, subtext, interior monologue, goals, and objectives, throughline, superobjective, and emotional recall to works of Henrik Ibsen, Anton Chekov, and appropriate American realists, such as Sam Shepard, August Wilson, etc. Enrollment by interview only: audition at first class meeting. Enrollment limited to 31. (General Education Code(s): A.) *D. Scheie, P. Gallagher, P. Whitworth*

21B. Acting Studio 1B, Actors' Physicality. F,S

Uses a rigorous physical approach to acting (rather than the text-based approach of course 21A). Provides an "outside-in" starting point for theatrical creation and study, balancing and countering the "inside-out" approach of Stanislavski-based actor training. Emphasis on physical characterization, ensemble theater, mask work, and object performance. May involve practices, theories, and readings of Jerzy Grotowski, Eugenio Barba, Jacques Lecoq, and/or Tadashi Suzuki. Enrollment by interview only. Enrollment limited to 30. (General Education Code(s): A.) *P. Gallagher, D. Scheie*

22. Indonesian Dance and Drama. F

Students learn the basic movement repertoire of the specific characters of the Indonesian dance-drama/puppetry tradition over the quarter with explication of how these types operate in their own cultural context. The course culminates in an open showing of scenework. May be repeated for credit. (General Education Code(s): CC, A, E.) *P. Gallagher, M. Foley*

23. Voice for the Actor. *

Students work on developing resonance, range and expressivity for stage performance via physical exercises and text explorations undertaken in small groups. Prerequisite(s): course 20. Audition required for acceptance into class. Enrollment limited to 20. (General Education Code(s): A.) *The Staff*

30. Introduction to Dance Theory and Technique. F,W

Intensive instruction in developing the dancer's mind/body, with introduction to movement theory and practice. Students are billed a materials fee. (Formerly Introduction to Modern Dance Theory and Technique.) May be repeated for credit. (General Education Code(s): PR-C, IH, A.) *E. Warburton, The Staff*

31P. Postmodern Dance I. *

Introduction to postmodern dance theory and technique. Focus on performance practices of historically significant postmodern dance choreographers in the U.S. and worldwide. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): IM, A.) *E. Warburton*

32. Introduction to Ballet. *

Introduction to ballet basics such as healthy alignment, anatomically sound articulation of hips and feet, balance control, moving through space harmoniously, and development of technical strength and combinative capacity in a classical, but fluid, aesthetic. Students are billed a materials fee. Enrollment limited to 35. May be repeated for credit. (General Education Code(s): IM, IH, A.) *E. Warburton*

33. Advanced Introduction to Modern Dance. *

Intensive instruction in developing the dancer's physical instrument. Intended for students who have a previous fundamental knowledge of the basics of classic dance, combined with movement theory. Students are billed a materials fee. Prerequisite(s): course 30. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): IH, A.) *The Staff*

35. Introduction to Tap Dance. *

Intensive instruction in developing the dancer's physical instrument combined with basic movement theory. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): PR-C, A.) *The Staff*

36. Introduction to Dance Composition. S

Composing solo dances using a variety of approaches for developing movement combinations. Observation and recognition of personal movement patterns and discovering new sources for creative material. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): PR-C, IH, A.) *E. Warburton*

37. African Dance. S

A griot (musician-entertainer from western Africa) from Burkina Faso teaches "The African Journey," which emphasizes dance as combined in Africa, including singing, history, oral tradition, and storytelling. Students are billed a materials fee. Enrollment limited to 30. (General Education Code(s): PR-C, A.) *The Staff*

40. Introduction to Directing. F

An overview of the analytical and creative processes that inform the director's work. Close examination of texts, concepts, and directorial choices in staged performances, opera, films, and video. (General Education Code(s): IM, IH, A.) *K. Jannarone, The Staff*

45. Student-Directed Production. F,S

Participation in a student-directed play or student-choreographed dance concert under faculty supervision. (See course 192). Rehearsals culminate in public performances. Prerequisite(s): admission by audition; see department office for more information. *The Staff*

50. Fundamentals of Theater Production (2 credits). F,W,S

Work is on various aspects of theatrical production, including scenery, lighting, costumes, sound, stage management, and video documentation. Satisfies the department's technical experience requirement. May be repeated for credit. (General Education Code(s): PR-E, A.) *D. Cuthbert*

52. Basic Stagecraft. *

Provides introduction to technical theater and basic stagecraft. Course examines two-dimensional and three-dimensional scenery, scenic engineering, the physical theater, stage and scene shop equipment, project organization and process, technical theater graphics, materials, and theatrical construction techniques. Prerequisite(s): course 10. Enrollment limited to 30. (General Education Code(s): A.) *The Staff*

55A. Workshop in Performance: Barnstorm. F,W

Process-oriented investigation of practical theater production by working in and on productions in the Barnstorm season. Requires a total of 150 hours working backstage or onstage. Admission by audition at first class meeting; see department office for more information. May be repeated for credit. *D. Cuthbert*

55B. Workshop in Performance: Barnstorm Lab (2 credits). F,W

Process-oriented investigation of practical theater production by working in and on productions in the Barnstorm season. Requires a total of 50 hours working backstage or onstage. Admission by audition at first class meeting; see department office for more information. May be repeated for credit. *D. Cuthbert*

61A. Issues and Methods in Theater Arts. W

Introduces issues and methods for analyzing historical and contemporary performance practices from a variety of disciplinary perspectives. Readings contextualize theatrical objects as well as offer theoretical tools for analyzing, interpreting, and making performances out of them. (Formerly course 61.) (General Education Code(s): IM, IH, A.) *K. Edmunds, D. Scheie*

61B. Tragedy. S

Ancient enmities; horrific acts of parricide; monumental errors; suffering and contrition. This course examines the enormous appeal of the ancient Greek tragic vision from its inception to its enthusiastic rediscovery during the European Renaissance. Enrollment limited to 40. (General Education Code(s): TA, IH, A.) *The Staff*

61C. The Birth of the Modern: Drama and Performance After the Renaissance. F

Examines dramatic and theatrical works that sprang into being in the wake of the European Renaissance. Follows the ways modern artists have dramatized their questions, struggles, beliefs, and despair in the face of world wars, cultural fragmentation, unprecedented prosperity, and new technologies that changed the concrete experience of life itself. Enrollment limited to 60. (General Education Code(s): TA, IH, A.) *K. Jannarone*

70. Working in Theater and the Performing Arts (2 credits). *

Creative artists, technicians, and designers discuss the theory and practice of their art. Presentations include discussion of the nature of their artistic work and reflection on the path that brought them to their present work with attention to the creativity and constraint that they experience in their profession. *P. Whitworth*

80A. Introduction to African American Theater. *

Surveys African American theater from late 19th century to contemporary 21st-century playwrights and examines dramatic narratives to trace creation, evolution, and development of African American cultural identity formation in American theater. Enrollment limited to 50. (General Education Code(s): ER, T4 (TH), A, E.) *The Staff*

80B. Rock 'n' Roll Design. *

Examination of the genesis, history, and development of technical theater practices used in large arena rock shows. Topics will include the development of rigging practices used in arenas, touring logistics, lighting instrumentation and aesthetics of rock shows, and the nature, practice, and approach of sound in these venues. (General Education Code(s): T4-Humanities and Arts, A.) *The Staff*

80D. Commercial Design 1900 to Present. S

History of 20th-century commercial design for the theater through the eyes of the Western consumer. (Formerly course 161W, *Critical Survey of Commercial Design, 1900 to Present.*) (General Education Code(s): IM, T4-Humanities and Arts, A.) *B. Baron*

80E. Stand-Up Comedy. *

American comedy from Mark Twain to present, including popular humor, history, and politics, using comedy from the '20s through the women's gay and civil rights movements. Discussions are based on readings and videos of a wide variety of artists. Students present performances weekly. (General Education Code(s): T4-Humanities and Arts, A.) *The Staff*

80G. Creative Process/Dance. W

Introductory dance, with participation in a wide range of movement classes taught by the instructor and guest artists. Students develop their movement experiences through further viewing of world dance, discussion, reading, and writing. Enrollment limited to 100. (General Education Code(s): T4-Humanities and Arts, A.) *The Staff*

80H. Hamlet Conundrums. *

Offered online, the course explores major issues of interpretation of Shakespeare's classic play, which has occupied the minds of audiences, directors, designers, performers, and critics during its 400-year history. In doing this, it offers a sense of history of people's preoccupations with and thoughts about the play. Students taking this class are expected to complete the course during the quarter for which they are enrolled. All students enrolled in this course should visit elsinore.ucsc.edu and write to elsinore@ucsc.edu. (General Education Code(s): T4-Humanities and Arts, A.) *J. Bierman*

80K. Shakespeare 4every1. *

Introduces all students, regardless of experience, to the plays and theater of Shakespeare, and directly addresses linked relevance to contemporary 21st century American culture. (General Education Code(s): TA, T4-Humanities and Arts, A.) *P. Whitworth, D. Scheie*

80L. Muppet Magic: Jim Henson's Art. *

The artistic and social impact of the Muppets on American puppetry, children's television, and Hollywood film is explored through viewings, guest lectures, and analysis. Henson's legacy in artistic innovation, mainstreaming of puppet theater for adult audiences, and establishment of puppetry in media and marketing are also explored. (General Education Code(s): IM, T4-Humanities and Arts, A.) *M. Foley*

80M. Chicano/a Teatro. W

Introduction to Teatro Chicano/a with examination of how cultural diversity plays a role in theater. Through lectures, films, and workshop exercises, reflect upon the process of Teatro Chicano. Students write their own acts, improvise, and perform in class. (General Education Code(s): ER, T4 (TH), A, E.) *The Staff*

80N. Walt Disney. W

An examination of Walt Disney's creation of the American vision of "family entertainment." Particular attention will be paid to the classic animated feature films of Walt Disney and to the way this Disney invention has been preserved and developed since his death. We will also look at the live action films, theme parks, and other Disney creations. (General Education Code(s): T4-Humanities and Arts, A.) *The Staff*

80O. Comedy in American Theater and Media since 1950. *

The interrelationship of comedy in contemporary American media and innovations at Second City, the Chicago-based comedy club, will be explored, as well as the theory and practice of improvisation as a technique for generating comic material and the varied relationships of performers, writers, and audiences in live theater, television, and film. (General Education Code(s): IM, T4-Humanities and Arts, A.) *M. Foley*

80P. The Pixar Feature. *

Combines examination of the canon of Western dramatic literature and theater history through viewings of Pixar Animation Studios' full-length animated features, representing the most popular form of digital art and new media in the world today, and lectures focusing on digital art and new media viewed through established rules and traditions of dramatic art in literature, plays, and the theater. (General Education Code(s): IM, T4-Humanities and Arts, A.) *D. Scheie*

80Q. Introduction to Queer Theater. *

Examines the history of the queer perspective in dramatic literature, from the Greeks to Marlowe and Shakespeare through the calcification of homosexuality in the era of Freud, then traces theater stewardship by gay and lesbian artists from within the closet and without. (General Education Code(s): IM, T4-Humanities and Arts, A.) *The Staff*

80S. Theater Arts Education and the Community. *

This course is designed to develop ways in which we can direct our interest in the arts into concrete and successful community projects. Although the emphasis will be on developing skills to work within K-12 classrooms, other community projects will be discussed and designed. (General Education Code(s): T4-Humanities and Arts, A.) *The Staff*

80U. Socks, Drugs, and Rock and Roll: American Costume Since 1950. *

This course is an introduction to American fashion and fashion designers from the 1950's to the present with special attention given to the influence of popular media on American costume since 1950, the beginning of rock and roll. Students cannot receive credit for this course and course 116B. (General Education Code(s): IM, T4-Humanities and Arts, A.) *The Staff*

80V. The Circus in American Culture. *

Circus arts from their shamanic roots to contemporary practice will be analyzed in a historical, aesthetic, and creative dimension. Lecture, discussion, and demonstrations will explore the theory and practice of American circus arts. In section, students will explore basic circus skills from clowning to tumbling to exhibition of freaks. (General Education Code(s): T4-Humanities and Arts, A.) *The Staff*

80W. The Way Things Work and the Theater. *

Explores basics of mechanics and movement as applied to theatrical and non-theatrical realms. Utilizes textual materials as well as interaction with technology. Topics include structural elements, motion, energy, sound/light, their physical properties and how they interface with pre- and post-modern theater. (General Education Code(s): T4-Humanities and Arts, A.) *The Staff*

80X. The Performance of Story in Theater and Film. F

An examination of the theory and practice of theater and film, comparing and contrasting works that have been adapted from one genre to another. Lecture, film and video viewing and discussion of materialist, psychoanalytic, and feminist approaches will be shared. (General Education Code(s): TA, T4-Humanities and Arts, A.) *The Staff*

80Y. American Musical Theater. W

The history of American musical theater, from its roots to today, is studied through scripts, scores, and film. Major composers and lyricists' work is shown, discussed, and analyzed. (General Education Code(s): T4-Humanities and Arts, A.) *K. Edmunds*

80Z. Indian Dance. F

Classical Indian dance will be studied as a performance practice. Understanding of drum syllables and associated steps, religious and sociological context, and mimesis (abhinaya) as well as introduction to epic stories (Ramayana, Mahabharata, Bhagavata Purana) and classical song. (General Education Code(s): CC, T4-Humanities and Arts, A.) *The Staff*

99. Tutorial. F,W,S

Students must file their petitions for this course with the department office by the end of the fifth day of instruction in the quarter in which they would like to take the tutorial. Prerequisite(s): petition required, approved by instructor and department. May be repeated for credit. *The Staff*

Upper-Division Courses

100A. Asian Theater/Dance and Global Impacts. *

Overview of selected theater/dance performance genres of India, Indonesia, China, Korea, and Japan with attention to how cultural, political, and social flows have impacted contemporary performance in Asia and beyond. Lectures supplemented by workshops. (General Education Code(s): A, E.) *M. Foley*

100B. Black Theater USA. *

Spanning slavery, emancipation, reconstruction, the great depression, civil rights, and the black power/black arts movements, course explores African American drama from literary, historical, and biographical perspectives in lecture/discussions, film excerpts, dramatizations, and visits from award-winning guests. (General Education Code(s): A, E.) *The Staff*

100C. Courts, Courtesans, Shamans, and Clowns: Asian Drama. *

Asian court and popular performance are traced. Sanskrit drama is contrasted with Indian epic recitation, medium, and courtesan dance. Gender specialization is noted in Indonesian courts using Indian and local legends in dance, mask/puppetry, and clowning. Buddhist and Confucian impulses in Chinese theater and early Korean and Japanese mask and puppetry are introduced. Students are evaluated on participation, tests, writing, and a performance project. (General Education Code(s): A.) *P. Gallagher, M. Foley*

100G. Ancient and Classical Drama. *

Examines Western dramatic literature, theater history, and design from ancient Greece to the Renaissance, the Spanish golden age, and Elizabethan England. Looks at dramatic texts in their historical moments, bringing theater design and the function of performance into critical contexts. Major theoretical treatises, scripts, scenarios, background readings, and other texts are discussed in relation to the actual performance and staging practices of the period. (General Education Code(s): A.) *The Staff*

100H. Ballet: A History. *

Chronological critical and historical overview of ballet from its origins in the 15th century to the present, fleshing out the sociological, aesthetic, and design (costume and set) aspects of ballet production from the courts to the bourgeois opera house and the independent impresario. Enrollment limited to 40. (General Education Code(s): A.) *M. Franko*

100I. Hemispheric and Trans-Atlantic Theater: Indigenous America. *

Considers theater of the Americas with attention to indigenous pre-Colombian roots as well as trans-Atlantic connections forged in Spanish use of performance in conquest and development of African-influenced arts in black communities. Includes use of art in national independence movements, civil-rights struggles, and continuing movement across borders of the Americas with links to Africa. (General Education Code(s): A, E.) *The Staff*

100L. Performance and Conquest. *

Looks at use of theater/performance in the U.S. and Latin America by the state, oppositional groups, and theater and performance practitioners to solidify or challenge structures of power beginning with pre-Colombian indigenous civilizations, 16th-century Spanish/European conquest, national independence movements, to the U.S. Latino diaspora. (General Education Code(s): A, E.) *The Staff*

100M. Modern Drama. *

Examines modern theatrical experimentation from English Restoration through contemporary era. Major theoretical texts, scripts, and background readings establish critical contexts for analyzing modern performance and dramatic literature. (General Education Code(s): A.) *K. Jannarone*

100W. Black/African Diasporic World Theater. *

Examines major black African diasporic playwrights and theater. Focuses on the historical, cultural, and literary contexts that gave rise to the works of dramatists such as Ama Ata Aidoo, Derek Walcott, Wole Soyinke, Aime Cesaire, Debbie Green Tucker, and Paul Boakye. Prerequisite(s): course 61 or 60A or 60B or 60C. (General Education Code(s): A, E.) *The Staff*

104. Multimedia Authoring. *

Introduces students to basic tools for the creation of multimedia digital projects. Special attention is given to the integration of video, sound, graphics, text and virtual reality and to the creation and execution of strategies for interaction between users and the projects themselves. With this in mind, students design and create computer puzzles and games. Enrollment limited to 25. (General Education Code(s): A.) *J. Bierman*

105. Introduction to Digital Media Design. *

Introduction to digital media design for live theater. Primary focus on developing working understanding of Adobe Photoshop, Final Cut Pro, and DVD Studio Pro as applied to digital media design. Gives additional attention to theoretical questions raised by introduction of moving images in a theatrical space, visual composition, and editing practices. Enrollment limited to 15. (General Education Code(s): A.) *The Staff*

106. Digital Illustration. *

Introduces digital rendering techniques using the Adobe Creative Suite. Using Photoshop, Illustrator, Acrobat Writer and InDesign, students solve design problems relevant to scenic, costume, and property design. Material is applicable to anyone with an interest in the Adobe platform. Enrollment by permission of instructor. Application form available at department office. Enrollment limited to 15. (General Education Code(s): A.) *B. Baron*

107. Design Studio: Masks and Makeup. *

Advanced work in the design and techniques of stage make-up and masks. Students are billed a materials fee. Prerequisite(s): course 10. Enrollment restricted to theater arts majors; open at the end of priority enrollment if space permits. Enrollment limited to 20. Offered in alternate academic years. *The Staff*

110. Advanced Stage Technology. *

An investigation into the intricacies of production, focusing on structural, spatial, and visual concepts, creation and execution of scenic units, drafting, and related areas of technology. Designed to facilitate in-depth studies of specific production problems. Students are billed a materials fee. Prerequisite(s): course 10. (General Education Code(s): A.) *The Staff*

113. The History of Design for Theater. W

The development of scenic design from the Greek period to the present. Concentration is on the changing styles of set design in relation to the changing attitudes toward dramatic literature, art, and theater architecture. (General Education Code(s): IM, A.) *B. Baron*

114. Design Studio: Sound. S

The intangible and transitory nature of the acoustic reality. Electronically regenerated sounds for use in the performing arts. Broad scope of the course consideration begins with found sound and includes sound propagation. Emphasis on tape-recording, editing, sound control functions, and equipment utility. Students are billed a materials fee. Prerequisite(s): course 10. (General Education Code(s): PR-C, A.) *The Staff*

115A. Design Studio: Scenic Design. W

Advanced work in principles and theory of scenic design. Students are billed a materials fee. Prerequisite(s): course 10. (General Education Code(s): PR-C, A.) *K. Edmunds*

115B. Design Studio: Scenic Design B. *

Advanced theory and practice of theatrical set design. Prerequisite(s): course 115. (General Education Code(s): PR-C, A.) *K. Edmunds*

116A. History of Clothing and Costume. *

Survey of clothing and theatrical costumes; emphasis on dress of the audience and actor in historical periods of theatrical activity. Students are billed a materials fee. (General Education Code(s): IM, A.) *B. Baron*

117. Design Studio: Costume. W

Advanced principles and theory of costume design for theatrical productions. Students are billed a materials fee. May be repeated for credit. (General Education Code(s): IM, A.) *B. Baron*

117A. Advanced Costume Construction. *

Advanced principles in costume construction, including tailoring, advanced pattern drafting, and draping techniques. Focuses on translating modern techniques into historical garment construction. Teaches how to study artifacts and do primary research to unlock the past. Prerequisite(s): course 17. Enrollment limited to 25. (General Education Code(s): A.) *The Staff*

118. Design Studio: Scene Painting. *

Emphasis on techniques used in painting scenery for the theater. Students are billed a materials fee. Prerequisite(s): course 10. (General Education Code(s): A.) *The Staff*

119. Design Studio: Lighting Studio B. *

The theory and practice of lighting design with emphasis on practical application. Light plots, electricity, optics, design, and manipulation of lighting for the theater and related performance events are investigated. The student explores mechanics and aesthetics with hands-on experience. Students are billed a materials fee. Prerequisite(s): course 19. (General Education Code(s): PR-C, A.) *The Staff*

121. Acting Studio II. S

Continuing concentrated work on basic acting skills and textual analysis through scene study. May be repeated for credit with consent of instructor. Prerequisite(s): admission by audition at first class meeting. See department office for more information. Course 21 recommended as preparation. May be repeated for credit. (General Education Code(s): A.) *D. Scheie, P. Gallagher, P. Whitworth, M. Foley*

122. Indian Performance: Rama, Siva, Krishna. *

Study of the classical theater and dance of India, with attention to performance practice, aesthetic theory, relationship to religious practice devoted to Rama, Siva, and Krishna, political implications and intercultural experimentation. (General Education Code(s): CC, IH, A.) *The Staff*

124. Movement for Performers. *

Awareness and extension of personal movement repertoire, through observation, movement experience, and exploration. (General Education Code(s): A.) *P. Gallagher, The Staff*

126. Acting Studio III. F,W

Individual work on acting skills and problems, with emphasis on individual interpretation and scene work with other students. Prerequisite(s): course 121; permission of instructor; audition at first class meeting—contact department office for more information. Enrollment limited to 18. May be repeated for credit. (General Education Code(s): A.) *The Staff, P. Gallagher, P. Whitworth*

128. Choreographic Workshop. F

Intensive upper-division choreographic workshop that begins from the key motifs of historical dance to develop original work. Dancers made available to the student choreographers. Course is a prerequisite for the student-choreographed production *Random With a Purpose*. Prerequisite(s): course 36 or permission of instructor. Enrollment limited to 30. (General Education Code(s): A.) *M. Franko*

129. Advanced Ballet (2 credits). *

Continued study of classical ballet technique as a serious, expressive art form. Work includes longer combinations, air work, and style study in a regular class routine. Audition at first class meeting. Students are billed a materials fee. Enrollment limited to 20. May be repeated for credit. (General Education Code(s): A.) *The Staff*

130. Intermediate Dance Theory and Technique. W

A progression from the simple phrasing and articulation of beginning technique class to more complex material requiring more acute perceptive skills and richer dynamic range. Emphasis is on both alignment and maintaining the kinetic integrity of the body while moving through space. Students are billed a materials fee. (Formerly Intermediate Modern Dance Theory and Technique.) Prerequisite(s): course 30 or 31 or permission of instructor. May be repeated for credit. (General Education Code(s): IM, A.) *E. Warburton*

131. Advanced Dance Theory and Technique. S

Advanced instruction in developing the dancer's mind/body, combined with contemporary movement theory and practice. Students are billed a materials fee. (Formerly Advanced Modern Dance Theory and Technique.) Prerequisite(s): course 30 or 31 or permission of instructor. May be repeated for credit. (General Education Code(s): A.) *E. Warburton, The Staff*

131C. Dance Studio II. *

Continued study of contemporary dance theory and practice. Focus on intermediate dance technique, individual and group movement invention, choreographic voice, and theatrical applications. Students are billed a materials fee. Enrollment limited to 30. (General Education Code(s): A.) *The Staff*

131P. Postmodern Dance II. *

Continued study of postmodern dance theory and technique. Focus on advanced compositional practice, theatrical applications, and critical analysis of contemporary postmodern dance choreographers in the U.S. and worldwide. Audition at first class meeting. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): IM, A.) *E. Warburton*

132. Modern Dance Studio (2 credits). *

Instruction in developing the dancer's physical instrument, combined with movement theory. Students are billed a materials fee. Prerequisite(s): course 30 or 31 or permission of instructor. May be repeated for credit. (General Education Code(s): A.) *E. Warburton*

135. Dance Improvisation and Theory. *

Exploring sources for movement; gaining facility in a wide range of movement elements; working in ensemble and solos. Students are billed a materials fee. (General Education Code(s): A.) *E.*

136. Intermediate Ballet. *

Continued study of classical ballet technique as a serious expressive art form. Work includes longer combinations, air work, and style study (Baroque and Romantic) in a regular class routine. Class also involves viewing, reading, and review writing. Students are billed a materials fee.

Prerequisite(s): course 32 or permission of instructor. Enrollment limited to 30. May be repeated for credit. (General Education Code(s): IH, A.) *The Staff*

136C. Dance Studio III. *

Advanced study of contemporary dance theory and practice. Focus on dance performance, creative process, and choreographic form in a contemporary style. Students are billed a materials fee.

Enrollment limited to 30. May be repeated for credit. (General Education Code(s): A.) *The Staff*

137. Studies in Performance (Dance). *

Studies in dance, taken in connection with performance in a major dance concert. Students are required to work on all aspects of the production. Students work with guest and faculty choreographers. May be repeated for credit with consent of instructor. Students are billed a materials fee. Admission by audition held late winter quarter; see department office for more information. May be repeated for credit. (General Education Code(s): A.) *M. Franko*

138. Movement Research in New Arts Praxis. *

Work at the intersection of creative and research practices, focusing on experimental forms of movement theater, applications in digital arts and new media, and critical analysis of the arts in society. Collaborative, interdisciplinary performance projects required. Audition/interview at first class meeting. Students are billed a materials fee. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): A.) *E. Warburton*

139. Random: With a Purpose. W

Participation in a student-choreographed and directed dance concert under faculty supervision. Rehearsals culminate in public performances. Students are billed a materials fee. Auditions to be held on the first day of class. May be repeated for credit. (General Education Code(s): A.) *E. Warburton*

141. Play Direction Studio I. W

Basic studio exploration through scene problems and exercises of the development of directing principles. Intensive work on the director's pre-rehearsal work from text selection, analysis, and casting. Audition at first class. Enrollment limited to 20. *K. Jannarone*

142. Play Direction Studio II. *

Intensive studio exploration of the art and craft of directing. Primary focus on text analysis, collaboration with designers, developing a point of view and visual/auditory language for the play, staging techniques, and communication techniques with actors. Prerequisite(s): course 40, 141, or permission of instructor. Enrollment limited to 15. May be repeated for credit. (General Education Code(s): A.) *The Staff*

151. Studies in Performance (Drama). F,W,S

Studies in theater, taken in connection with participation in a Theater Arts Department sponsored production. Enrollment is limited to those persons chosen to take part in a particular production. Admission by audition; audition schedule to be announced at first class meeting. May be repeated for credit. (General Education Code(s): A.) *The Staff, M. Foley, D. Scheie*

152. Advanced Stagecraft. S

Exploration of stage technology from the scene shop's perspective. Conversion of scenic designs to construction drawings. Pursuit of scenic-engineering and construction techniques using steel, wood, and other materials. Training on use of stage machinery: rigging, flying, wagons, tracking, and propulsion. Prerequisite(s): course 52. Enrollment limited to 25. (General Education Code(s): A.) *The Staff*

155. Workshop Experiments in Performance. W

A process-oriented investigation of specific playwrights or theatrical styles consisting of work which may culminate in a final production. Admission by audition at first class meeting; see department office for more information. May be repeated for credit. (General Education Code(s): A.) *P. Gallagher*

156. Play Development Workshop. *

"Hands on" study and exploration of the process of developing a new script from the perspective of the playwright, the actor, and the director. Students enrolling in this course as playwrights are selected on the basis of submissions turned in the previous quarter. Students taking the course as directors are required to obtain consent of the instructor. Other students may enroll as usual. May be repeated for credit. (General Education Code(s): PR-C.) *The Staff*

157. Playwriting. F

Students are given the opportunity to write their own scripts and refine them as the result of class discussion and scenework with actors. Work is on specific problems involving such elements as the structuring of a plot or the development of character. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. May be repeated for credit. (General Education Code(s): W,A.) *J. Bierman*

158. Chautauqua Workshop. S

Advanced course that provides directors, writers, and performers with an opportunity to develop new works in performance. Students enrolling in this course as playwrights are selected on basis of submissions turned in the previous quarter. Students are billed a materials fee. Students taking the course as directors are required to obtain consent of the instructor. Other students may enroll as usual. May be repeated for credit. *The Staff*

159. Advanced Playwriting. W

A study, through practice, of the constituent elements in the construction of a drama. Students concentrate, in particular, on the organization of complex plots, the expression of character through conflict, and maximizing the emotional impact of dramatic situations. Prerequisite(s): course 157 or equivalent, satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): W,A.) *J. Bierman*

160. Dramatic Theories. S

An examination of the theories of acting and directing from the 19th century to our own time, starting with the classic theater and concentrating on the 20th-century debate centered in Stanislavski and Brecht, Grotowski, and Robert Wilson. This course must be taken prior to student's senior year; required for course 185. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. (General Education Code(s): A.) *The Staff*

161. Theater, Literature, and History. *

The Staff

161A. Irish Theater. *

Examines the idea of a "National Theater" in Ireland from its beginnings in the founding of the National Literary Society in 1892 to the current vitality of the contemporary Irish Theater. Enrollment limited to 45. (General Education Code(s): A.) *P. Whitworth*

161C. The Theater and Drama of Renaissance Europe. S

An examination of selected plays from Renaissance Europe (1580-1680, Italy, Spain, and France) from an explicitly theatrical viewpoint which will include practical scene study. Covers Renaissance theater buildings and some related critical materials. Offered in alternate academic years. (General Education Code(s): A.) *P. Whitworth, K. Jannarone*

161D. Asian Theater: An Anthropological Approach. F

Art serves simultaneously to educate its audience to the group's traditional values and to test new ideas. Indian, Indonesian, and Japanese forms are studied in relation to their cultural context. Through videotapes, lecture demonstrations, performances, and scenework, students explore the forms. Offered in alternate academic years. (General Education Code(s): CC, A, E.) *M. Foley*

161M. Sexuality, Gender, Drama, and Performance. *

Exploration and analysis of the interrelationships between gender, sexuality, and performance on stage and on the page. Topics include gender and homosexuality in the history of performance and dramatic literature, drag, queer Shakespeare, closet drama, same-sex performance conditions (e.g., Greece) vs. dual-gendered (e.g., Restoration England). Combines study of theoretical texts and script with analysis and practice. (Formerly *Gender and Performance*.) (General Education Code(s): A.) *D. Scheie*

161P. Theater in the "Chicano Power" Movement. *

Covers the rise of Teatro Chicano as a cultural-political force within the 1960's "Chicano Power" Movement starting with founding playwright Luis Valdez and El Teatro Campesino and covering Chicana/o playwrights inspired by the movement, e.g. Cherrie Moraga, Luis Alfaro, and Josefina Lopez. (Also offered as Latin American&Latino Studies 161P. Students cannot receive credit for both courses.) (General Education Code(s): A, E.) *The Staff*

161Q. Queer Theatricals: Representations and Sensibilities. *

An examination of the idea, form, and significance of queer/gay sensibility and representation in the English-speaking theater from the Renaissance to the present. (General Education Code(s): A.) *The Staff*

161R. Theater of American Cultures. *

Interrelationship of ethnicity and the rise of significant American theater groups including the black theater movement, Chicano Teatro, and Asian American theater will be shared via lecture, viewing, and discussion. (General Education Code(s): A, E.) *The Staff*

161S. American Drama: Politics and Theater. *

The dream of group theater, a long-term partnership of actors, directors, and playwrights, has fueled extraordinary and exciting change in the 20th-century American theater theory and practice. We examine ten exemplary manifestations of this dream. (General Education Code(s): A.) *The Staff*

161T. Women in Theater. S

Explores 20th-century American female playwrights from textual, historical, and multicultural perspectives. The course progresses from Trifles (1916) through the Harlem Renaissance, Broadway's Lillian Hellman, and today's post-Feminist theatrical explosion in lectures, films, dramatizations, and award-winning playwrights' visits. (General Education Code(s): A.) *The Staff*

161U. Performance of Story in Theater and Film. *

Examination of theory and practice of theater and film comparing and contrasting works having been adapted from one genre to another. Lecture, film, and video viewing. Discussions of materialist, psychoanalytic, and feminist approaches shared. Students cannot receive credit for this course and course 80X. (General Education Code(s): A.) *The Staff*

161Y. Modern Ancient Drama. *

Studies 20th- and 21st-century productions and adaptations of ancient Greek drama in theater, dance, music, and film, including Stravinsky, O'Neill, Graham, Pasolini, and Breuer, discussing artists' goals, the sociopolitical context, ideas of authenticity, and audience response. Enrollment limited to 30. (General Education Code(s): A.) *The Staff*

162. Public Space/Public Sphere: The Performance of Public Art in 20th Century America. *

Examines phenomenon of public art as a performative phenomenon in the 20th century. Begins with the theory of the public sphere in the work of Jurgen Haberman and social space in the work of Henri Lefebvre. Concludes with the popular phenomenon of public art in the 1980s and the demise of the NEA by the later 80s with the scandals of the NEA Four. (General Education Code(s): A.) *M. Franko*

163. Special Studies in Individual Playwrights.

The Staff

163A. Shakespeare. *

Focuses on selected plays of Shakespeare. Explores the range and variety of interpretations of the plays, both in critical writings and in performance. Also studies other writings and graphic art created on the subjects and themes of the plays. Offered in alternate academic years. (General Education Code(s): A.) *J. Bierman*

163E. Chekhov and His Impact. *

Delves into the work of Chekhov and the Moscow art theater. Through scene work Stanislavski's acting techniques are related to the scripts. The impact on later Russian innovators, especially Meyerhold, and on the American theater is considered. (General Education Code(s): A.) *The Staff*

163G. Special Studies in Playwrights: Artaud. *

Antonin Artaud through three critical lenses: influence on modern and contemporary theater, subject and site of psychoanalytic and social criticism, and theater practitioner. Exercises cultural, historical, and analytic approaches to his work. Prerequisite(s): course 60C; course 160 recommended. Enrollment limited to 40. (General Education Code(s): A.) *K. Jannarone*

163H. Henrik Ibsen and His Impact: Ghosts of the Future. W

Examines representative texts of Ibsen's work: early plays, realistic middle plays, and late plays. The cultural/historical context of Ibsen's oeuvre is considered as well as its impact, through contemporary translations and productions, on subsequent theater theory and practice. (General Education Code(s): TA.) *P. Whitworth*

164. Issues in Dance History and Theory. *

A research seminar. Topics range from problems in dance aesthetics, criticism, or theory to particular movements, periods, or the work of a choreographer. (Formerly course 133.) Enrollment limited to 20. May be repeated for credit. (General Education Code(s): A.) *E. Warburton, M. Franko*

165. Introduction to Dance Modernism. W

Rare historical footage and the writings of famous choreographers provide an overview of 20th-century dance within the perspective of modernism. Topics include romanticism, "natural" dance, Orientalism, Ausdruckstanz, "industrial" dance, American modern dance and neo-classicism, chance procedure, postmodernism, and the avant-garde commodity marketplace. (Formerly course 134.) (General Education Code(s): A.) *M. Franko*

170. Design Seminar (2 credits). *

Seminar to help advanced designers segue from student to professional. Topics to include portfolio construction, interview styles, guest speakers, and more. Enrollment restricted to senior and graduate students in Theater Arts. May be repeated for credit. *D. Cuthbert, B. Baron, K. Edmunds*

185. Senior Seminar. F

A required seminar for majors involving readings and discussions of important texts in dance, design, and drama. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; course 160. *D. Schele*

190. Group Projects. F,W,S

Prerequisite(s): petition required, approved by instructor and department. May be repeated for credit. *The Staff*

192. Directed Student Teaching. F,W,S

Teaching a lower-division seminar under faculty supervision. (See courses 42 and 45). Petition required, approved by instructor and department. *The Staff*

193. Proseminar. *

Exposes students to an aspect of the theory or practice of theater arts. Visiting scholars share their area of expertise in lectures to a small group of students. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): A.) *The Staff*

193F. Proseminar (2 credits). *

Exposes students to an aspect of the theory or practice of theatre arts. Visiting lecturers share their area of expertise in lectures to a small group of students. Enrollment limited to 25. May be repeated for credit. (General Education Code(s): A.) *The Staff*

198. Independent Field Study. F,W,S

Provides for department-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Students engaging in field study must complete application procedures for such study by the fifth week of the previous quarter. Petition required, approved by instructor and department. *The Staff*

198F. Independent Field Study (2 credits). F,W,S

Provides for department-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Students engaging in field study must complete application procedures for such study by the fifth week of the previous quarter. Petition required, approved by instructor and department. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Individual study in areas approved by sponsoring instructors. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Individual study in areas approved by sponsoring instructors. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

290. Special Topics and Area Concentration. F

Study group meetings on a regular basis which involve either the study of shared texts or presentations by the group members and invited guests. Enrollment restricted to graduate students in theater arts. May be repeated for credit. *K. Jannarone*

291. Field Study. F,W,S

Student-designed and conducted research carried out in field settings. A brief prospectus must be filed with the department office before undertaking the research, and a brief final report of activities must be filed upon return. Course intended for students with graduate standing in theater arts. Petition required, approved by instructor and department. *The Staff*

292. Teaching-Related Independent Study. F,W,S

Directed graduate research and writing coordinated with the teaching of undergraduates. Course intended for graduate students in theater arts. Petition required, approved by instructor and department. *The Staff*

297. Independent Study. F,W,S

Independent study or research for graduate students in theater arts. Petition required, approved by instructor and department. May be repeated for credit. *The Staff*

297F. Independent Study/Graduate (2 credits). F,W,S

Independent study or research for graduate students in theater arts. Petition required, approved by instructor and department. Enrollment restricted to graduate students in theater arts. May be repeated for credit. *The Staff*

* Not offered in 2011-12

<http://writing.ucsc.edu/>[Program Description](#) | [Changes to 2010-12 Catalog Highlighted](#) | [Faculty](#) | [Course Descriptions](#)

Program Description

The campuswide Writing Program offers courses designed to help students become more competent and confident writers of prose. The courses offered through this program teach skills of grammar and organization and strategies of invention, composition, revision, and editing. These courses approach writing as one of the most important ways we have of making discoveries about ourselves and the world around us and of communicating these insights to others.

Together with the colleges, the Writing Program administers the writing components (C1, C2) of the campus general education requirements; administers the Entry Level Writing Requirement (ELWR), formerly known as Subject A; and advises students about ways to fulfill these requirements.

Writing Program instructors in each college participate in the college's core course and counsel its students about their writing. The Writing Program offers Writing 2 (a lower-division course that satisfies the C2 requirement); the Writing 20, 21, 22, 23 series to help meet the needs of students who have not passed ELWR, including students with complex linguistics backgrounds; and instruction in the theory and practice of teaching writing for peer tutors and graduate students.

Each year, the Writing Program also offers several specialized lower- and upper-division courses, as well as writing-intensive courses during the summer session.

Courses in creative writing are offered through the Literature Department.

[Program Description](#) | [Faculty](#) | [Course Descriptions](#)

Lower-Division Courses

2. Rhetoric and Inquiry. F,W,S

Explores the intersections of investigation, interpretation, and persuasion and hones strategies for writing and research. Students develop specific, practical ways of improving their writing through sustained critical thinking about diverse issues from multiple points of view. Students cannot receive credit for this course and course 1. Prerequisite(s): satisfaction of the Entry Level Writing and C1 requirements. Enrollment limited to 25. (General Education Code(s): C2.) *The Staff*

11A. Adjunct Tutorial in Writing (2 credits per quarter) (2 credits). F

A tutorial designed to provide follow-up assistance in writing for students who have passed the Entry Level Writing Requirement, but wish to continue to work on various aspects of their writing. Counts only for academic standing and financial aid purposes, but does not apply toward degree requirements (i.e., counts as workload credit only). Prerequisite(s): approval of the Writing Program; satisfaction of the Entry Level Writing Requirement. May be repeated for credit. *The Staff*

11B. Adjunct Tutorial in Writing (2 credits per quarter) (2 credits). W

A tutorial designed to provide follow-up assistance in writing for students who have passed the Entry Level Writing Requirement, but wish to continue to work on various aspects of their writing. Counts only for academic standing and financial aid purposes, but does not apply toward degree requirements (i.e., counts as workload credit only). Prerequisite(s): approval of the Writing Program; satisfaction of the Entry Level Writing Requirement. May be repeated for credit. *The Staff*

11C. Adjunct Tutorial in Writing (2 credits per quarter) (2 credits). S

A tutorial designed to provide follow-up assistance in writing for students who have passed the Entry Level Writing Requirement, but wish to continue to work on various aspects of their writing. Counts only for academic standing and financial aid purposes, but does not apply toward degree requirements (i.e., counts as workload credit only). Prerequisite(s): approval of the Writing Program; satisfaction of the Entry Level Writing Requirement. May be repeated for credit. *The Staff*

20. The Nature of Written Discourse. W

Explores the dynamics of written language: its relationships to speech, thought, and culture; its uses in different personal, academic, professional, and public contexts; its abuses in jargon and propaganda. Course work includes extensive practice in different kinds of writing. Enrollment restricted to students who have not passed the Entry Level Writing Requirement. Open to others by permission of instructor. Enrollment limited to 22. *The Staff*

21. Meaning and Style: The Sentence in Context. S

Explores, via cross-cultural readings, the nature, uses, and abuses of language. Course work includes extensive writing, both take-home and in-class. Emphasis on revising for power of expression and for variety and accuracy at the sentence level. Enrollment restricted to students who have not passed the Entry Level Writing Requirement. Open to others by permission of instructor. Enrollment limited to 22. *The Staff*

22A. Grammar and Editing Workshop (3 credits). F

Offers instruction on selected topics in grammar and conventions of written English as needed to strengthen the writing skills of students whose primary language is not standard English. Provides students practice in applying these concepts to editing their own writing. Designed for entering first-year students. Enrollment restricted to first-year students. Enrollment limited to 22. *The Staff*

22B. Grammar and Editing Workshop (3 credits). W

Offers instruction on selected topics in grammar and conventions of written English as needed to strengthen the writing skills of students whose primary language is not standard English. Provides students practice in applying these concepts to editing their own writing. Designed for continuing students who have already taken course 20 and/or 21. Enrollment limited to 22. *The Staff*

23. Grammar and Rhetoric: Language for Writing. F

Builds on writing skills gained in previous writing courses; focuses on effective language use in academic writing. Students reinforce their written English proficiency by reading, studying, practicing, and writing structures and patterns of written English. Enrollment restricted to students

who have not passed the Entry Level Writing Requirement. Open to others by permission of instructor. Enrollment restricted to first-year students and sophomores. Enrollment limited to 22. *The Staff*

42. Student-Directed Seminar.

Seminars taught by upper-division students under faculty supervision. (See course 192.) *The Staff*

64. Newswriting Workshop. *

Introduction to the basic techniques of newswriting, including practice in leads, formats, and different kinds of news reporting. Emphasis on developing skills in research, interviewing, and shaping stories. Includes an examination of the contemporary media. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, instructor determination at first class meeting. Enrollment limited to 22. (General Education Code(s): W.) *The Staff*

70. Communication and Rhetoric: An Introduction. *

This course introduces the field of contemporary communication studies, locating its roots in rhetoric and showing how key concepts play out in mass media and other settings as well as in everyday life. Prerequisite(s): satisfaction of the Entry Level Writing requirement. *The Staff*

93. Field Study. F,W,S

For lower-division students: supervised study within commuting distance of campus. May include internships at magazines, newspapers, publishing houses, or newsletters of corporations, and civic or service organizations. Prerequisite(s): satisfaction of the Entry Level Writing requirement; certification of adequate preparation; approval of Writing Program. May be repeated for credit. *The Staff*

93F. Field Study (2 credits). F,W,S

For lower-division students: supervised study within commuting distance of campus. May include internships at magazines, newspapers, publishing houses, or newsletters of corporations, and civic or service organizations. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99. Tutorial. F,W,S

Individual, directed study for lower-division students in expository writing, editing, or journalism. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

99F. Tutorial (2 credits). F,W,S

Individual, directed study for lower-division students in expository writing, editing, or journalism. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Upper-Division Courses

101. Introduction to the History, Theory, and Practice of Rhetoric. *

A survey of classical and contemporary ideas about rhetoric which explores, practically and theoretically, "the best means of persuasion in any situation whatsoever" and will consider the nature of human discourse in diverse areas of knowledge. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. (General Education Code(s): W.) *C. Freeman*

102. The Rhetoric of the Social Sciences. *

Develops rhetorical facility in disciplinary writing for upper-division social science majors. Requires critical and disciplinary reading, writing in modes appropriate to social science disciplines, and a substantial research or critical paper within the student's own discipline. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. (General Education Code(s): W.) *The Staff*

103. Rhetoric of the Natural Sciences. *

This course explores writing genres within the natural sciences. Emphasis is on the relationships between good science and good writing, clear thinking and clear writing. Frequent papers and substantive revisions required. Prerequisite(s): completion of 10 units coursework in the natural sciences, satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to juniors and seniors during priority enrollment. Enrollment limited to 30. (General Education Code(s): W.) *The Staff*

104. Writing in the Arts. *

A writing course focusing on the purposes and composition of various genres of writing about and in the performing arts, visual arts, and music such as reviews, program and exhibit notes, journal and magazine articles, grant proposals, and press releases. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 30. (General Education Code(s): W.) *E. Abrams*

106. Public Speaking. *

Students learn strategies to write, analyze, and deliver effective speeches of various kinds as well as professional presentations using PowerPoint and other visuals. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 25. *The Staff*

107. Technical and Business Writing: An Overview. *

An exploration of the conventions and formats of business and technical writing. Course work involves writing effective resumes, proposals, letters, end-user manuals, and the fundamentals of

Web site design. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 30. *The Staff*

108. Electronic Communication. *

An introduction to the evolving conventions of effective Web site design as well as collaborative writing. Course work includes evaluation of Web site content and structure and creation of hypertext. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 24. *The Staff*

109. Argument and Practical Reasoning. *

An investigation of contemporary persuasive discourse with special attention to the elements and forms of argument, the nature of evidence, questions of validity and probability, and the workings of rhetorical reasoning. Emphasizes the analysis of arguments rather than their construction. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 40. *The Staff*

110A. Writing in the Professions. *

Study of writing required in the selected professions, including law, politics, and government. Considers the rhetoric of each discipline and relevant texts. Includes lectures from visiting professionals and a series of writing assignments based on reading and research. Topic may vary from year to year, focusing on the rhetoric of other professional divisions: medicine, engineering, economics, and so forth. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 40. (General Education Code(s): W.) *The Staff*

120. Editing English Prose. *

This course offers extended, detailed instruction in editing one's own and other people's prose for accuracy, clarity, appropriateness, and effectiveness. It provides some history of theories of style and stylistic analysis, and instruction in prose variation according to social context. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 40. *The Staff*

159. Grammar for Tutors and Teachers (3 credits). W

English grammar from a pedagogical perspective, emphasizing structures, patterns, and conventions of written English that commonly challenge basic writers. Students learn strategies for helping multilingual and other writers improve their writing skills by increasing their awareness of grammar. Prerequisite(s): course 169, or by instructor permission. Enrollment limited to 45. *The Staff*

161. Academic Writing and Research Methods. *

Introduces library and field research methods and also provides instruction and practice in writing from research, addressing issues such as voice, argument, and documentation. Students write four lengthy essays and do considerable informal writing. Course 161 includes sections for re-entry women, transfer students, and students in the EOP Faculty Mentor Program. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements. Students should contact the instructor for enrollment information. Enrollment limited to 20. (General Education Code(s): W.) *The Staff*

163. Advanced Workshop in Expository Writing. *

A composition course for students who, having mastered basic writing skills, wish to concentrate on increasing their effectiveness as rhetoricians, prose stylists, and editors. Assignments include writing and revising essays, responding to other students' work, and reading published essays. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment limited to 22. May be repeated for credit. (General Education Code(s): W.) *The Staff*

165. Practicum in Reporting. *

In-depth, community-based reporting, with an emphasis on skills ranging from interviewing techniques to profiles, integrating research with writing. Students choose a specific area or "desk" of concentration, and all the stories reflect that beat. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; a writing sample, completed in class, is required at first class meeting. Enrollment restricted to journalism minors during priority enrollment. Enrollment limited to 22. (General Education Code(s): W.) *The Staff*

166. Topics in Journalism. *

Courses under this heading explore fields of newspaper and magazine journalism: feature writing, investigative reporting, reviewing, commentary, etc. Students study published writing and hone their own skills as writers under the supervision of a practicing journalist. See the *Schedule of Classes* for specific offerings. *The Staff*

166A. Magazine Writing. *

Introduces students to the various forms of magazine writing, as well as to pertinent reporting techniques. Students work intensively on process, style, and editing, producing numerous formal and informal pieces. Enrollment priority will be given to journalism minors. Students produce a writing sample on the first day of class. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements; course 64 or permission of instructor. Enrollment limited to 22. (General Education Code(s): W.) *The Staff*

166B. Investigative Reporting. *

Students acquire basic investigative and research skills, with particular emphasis on how to develop investigative subjects, obtain data, check accuracy, and convert information into well

written, publishable articles. Priority given to students concentrating in journalism. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; interview with instructor to review journalism portfolio. Enrollment limited to 22. (General Education Code(s): W.) *The Staff*

166D. Minorities in Journalism. *

Focuses on the minority press and how it has shaped journalism in the U.S. as well as viewing how the media has dealt with this segment of our society. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and consent of instructor. Enrollment limited to 22. (General Education Code(s): W.) *The Staff*

166J. Online Journalism. *

A course in using electronic sources to report articles for publication and in publishing journalistic pieces online. Prerequisite(s): course 64 or journalism experience; instructor determination at first class meeting. Enrollment limited to 25. *The Staff*

166N. The Rhetoric of Radio. *

Examines the theory and practice of radio. Students explore how the formats of radio create its meaning, and investigate radio's place in the landscape of the media, particularly in the U.S. and Mexico. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and consent of instructor. Enrollment limited to 25. *The Staff*

167. Making the News. *

A writing course examining news and feature articles in popular print media. Students write their own articles and analyze how a particular content is mandated by conventional forms, by the structure of the industries, and by ideas of "newsworthiness." Designed for journalism minors and students for whom a course in media criticism is central to their program. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; qualifications determined by instructor at first class meeting. Enrollment limited to 43. (General Education Code(s): W.) *The Staff*

169. Theory and Practice of Tutoring Writing (3 credits). F

An introduction to theory and research on the composing process and practical strategies for teaching writing, especially in tutorial situations. Recommended for writing assistants. Prerequisite(s): instructor determination at first class meeting; course intended for writing tutors only. Enrollment limited to 30. (General Education Code(s): PR-S.) *E. Newberry, A. Weaver*

180. Seminar in Editing and Publishing. *

Newswriting seminar for *City on a Hill* editors and writers. Weekly sessions evaluate newspaper in depth, including writing, reporting, and issues in journalism ranging from ethics to legal questions. Prerequisite(s): instructor determination at first class meeting; open only to editors, interns, and writers at City on a Hill Press. Enrollment limited to 40. May be repeated for credit. *The Staff*

189. Methods of Teaching Writing. *

Supervised by a writing instructor, each student attends a weekly seminar on teaching writing and either assists in a class or serves as a facilitator of a small writing group in a course at UCSC or a public school. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

191. Internships.

Individual work in journalism, publishing, or broadcasting. Internships require a contracted amount of writing or other work, and generally involve group tutorials with faculty in the Writing Program as well as individual conferences. *The Staff*

191A. Internship in Writing. F,W,S

Regular writing for newspaper or magazine. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

191B. Internship in Editing. F,W,S

Work in an editorial position involving critique and guidance of reporters. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

191C. Internship in Publishing. F,W,S

All phases of work for a publishing house, from manuscript reading to editorial. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

191D. Internship in Broadcasting. F,W,S

Writing, editing, scheduling, and/or broadcast work for television or radio. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

192. Directed Student Teaching. F,W,S

Teaching of a lower-division seminar under faculty supervision. (See course 42.) Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

193. Field Study. F,W,S

For upper-division students: supervised study within commuting distance of the campus. May include internships at magazines, newspapers, publishing houses, or newsletters of corporations, and civic or service organizations. Prerequisite(s): satisfaction of Entry Level Writing requirement; students submit petition to sponsoring agency. *The Staff*

193F. Field Study (2 credits). F,W,S

For upper-division students: supervised study within commuting distance of the campus. May include internships at magazines, newspapers, publishing houses, or newsletters of corporations, and civic or service organizations. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

194. Group Tutorial. F,W,S

A writing, editing, or publishing project undertaken by a small group of students under the direct supervision of a writing instructor. Students submit petition to sponsoring agency. Enrollment limited to 15. May be repeated for credit. *The Staff*

195. Senior Thesis. F,W,S

Individual work on a thesis for any campus major or individual major. Faculty in the Writing Program help students on all phases of work, from selection and focus to development of bibliographies, research techniques, revision, and editing. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

196. Developing and Editing Field Documentation (2 credits). *

Helps students transform field documentation into fully developed, professional projects. Employs a weekly production schedule and teaches principles of rhetoric as a means of effectively selecting and arranging documentary materials. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; interview with instructor to review documentary materials. Enrollment limited to 20. *The Staff*

198. Independent Field Study. F,W,S

Individual study for which faculty supervision is possible only by correspondence. May include internships at newspapers, magazines, publishing houses, or the newsletters of corporations, and civic or service organizations. Prerequisite(s): satisfaction of Entry Level Writing requirement; students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

198F. Independent Field Study (2 credits). F,W,S

Individual study for which faculty supervision is possible only by correspondence. May include internships at newspapers, magazines, publishing houses, or the newsletters of corporations, and civic or service organizations. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199. Tutorial. F,W,S

Individual, directed study for upper-division students in expository writing, editing, or journalism. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

199F. Tutorial (2 credits). F,W,S

Individual, directed study for upper-division students in expository writing, editing, or journalism. Students submit petition to sponsoring agency. May be repeated for credit. *The Staff*

Graduate Courses

202. Writing and Learning Seminar (3 credits). *

Strategies for teaching assistants to help undergraduates become better learners and writers in disciplinary courses. Topics include using writing to improve reading and thinking, analysis of assignments, avoiding plagiarism, responding to and evaluating papers, ESL writers, peer response, and technological aids. Enrollment restricted to graduate students. Enrollment limited to 30. *The Staff*

203. Teaching Writing. S

Prepares graduate students to teach Writing 1 at UCSC and elsewhere. Development of a syllabus, teaching strategy, and class plans based on study of composition and rhetorical theories, research on students' writing development, and effective writing pedagogies. Enrollment restricted to graduate students. Enrollment limited to 18. *E. Abrams*

*Not offered in 2011-12

[Program Description](#) | [Course Descriptions](#)

[\(The Yiddish Program Description is new to the catalog this year.\)](#)

Program Description

Students interested in acquiring proficiency in Yiddish can enroll in beginning language courses. In addition, some credit from these courses may be counted toward the major or minor in Jewish studies; consult with the Jewish studies program. Lower-division courses are aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing. Attention is also given to developing an understanding of the culture that has been expressed through the Yiddish language. Some instruction takes place in Yiddish from the beginning level.

Campus Language Laboratories and Placement Exams

Information about these topics can be found under Language Program.

[Program Description](#) | [Course Descriptions](#)

Lower-Division Courses

1. Introduction to Yiddish. W

Introduces the Yiddish language. Students learn to speak and to ask others in Yiddish about themselves and about common situations (the classroom, work, family), and learn to read and write simple Yiddish texts. (Formerly Hebrew 10, Introductory Yiddish) *The Staff*

2. Introduction to Yiddish. S

Course follows course 10, expanding vocabulary to include the weather, physical health and sickness, holidays, clothing, etc., and increasing student ability for self-expression using different tenses and grammatical cases. (Formerly Hebrew 11.) Prerequisite(s): Hebrew 10, or consent of instructor. *The Staff*

Teaching and Administrative Staff

Teaching Staff

Faculty titles for 2010–12 were verified as of August 31, 2010, and subsequent changes may not be reflected in the following list. Please note that inclusion in this list is not a guarantee that the faculty member will be teaching throughout the 2010–12 academic years. In addition, some faculty

listed here as emeriti may be recalled to teach courses.

The listing for most faculty members includes college membership, year of arrival at UC Santa Cruz, academic title, degrees, and former affiliations.

Martin Abadi, Stevenson College (2001)

Professor, Computer Science

B.S., M.S., Ph.D., Stanford University. Former affiliations: Systems Research Center, Compaq; Bell Labs Research; Lucent Technologies.

Ralph H. Abraham, Kresge College (1968)

Professor Emeritus, Mathematics

B.S.E., M.S., Ph.D., University of Michigan. Former affiliations: Princeton University; Columbia University; University of California, Berkeley.

W. Emmanuel Abraham, Cowell College (1973)

Professor Emeritus, Philosophy

B.A., University of London; M.A., B.Phil., Oxford University. Former affiliations: Macalester College; University of Ghana; University of California, Berkeley; Stanford University.

Elizabeth S. Abrams, Porter College (2000)

Senior Lecturer, Writing

A.B., University of California, Berkeley; M.A., M.Phil., Yale University. Former affiliation: Harvard Expository Writing Program.

Zsuzsanna Abrams (2010)

Associate Professor, Language Program

B.A., University of Wisconsin-Eau Claire; M.A., Ph.D., University of Tucson. Former affiliations: University of Texas at Austin.

Demetrios Achlioptas (2005)

Associate Professor, Computer Sciences

B.Eng., University of Patras; M.Sc., Ph.D., University of Toronto. Former affiliations: Microsoft Research, Redmond, Washington.

Robert Adams, Crown College (1967)

Professor Emeritus, Economics

B.A., Oberlin College; M.A., Ph.D., University of Michigan. Former affiliations: University of Pittsburgh; University of Maryland.

Anthony N. Aguirre (2003)

Associate Professor, Physics

B.A., Brown University; M.A., Ph.D., Harvard University. Former affiliation: Institute for Advanced Study (Princeton).

Patrick P. Aherne, Porter College (1966)

Professor Emeritus, Art

B.F.A., University of Kansas; M.A., Northwestern University. Former affiliation: Artist-in-Residence, Kings Canyon and Sequoia National Parks.

Judith L. Aissen, Stevenson College (1983)

Professor, Linguistics

B.A., Fordham University; M.A., Yale University; Ph.D., Harvard University. Former affiliations: University of California, Los Angeles; Yale University; University of California, Santa Barbara.

Joshua Aizenman, College Nine (2001)

Professor, Economics

B.A., M.A., Hebrew University of Jerusalem; Ph.D., University of Chicago. Former affiliations: University of Pennsylvania; University of Chicago; Hebrew University of Jerusalem; Dartmouth

College.

Ramakrishna Akella (2003)

Professor, Information Systems Management
B.S., Indian Institute of Technology; Ph.D., Indian Institute of Science. Former affiliations: State University of New York at Buffalo; Carnegie Mellon University.

Mark Akeson (1996)

Professor, Undergraduate Director, Biomolecular Engineering
B.A., University of California, San Diego; Ph.D., University of California, Davis. Former affiliations: National Institutes of Health; University of California, Davis.

Nameera N. Akhtar, Crown College (1995)

Professor, Psychology
B.S., M.S., Ph.D., Dalhousie University (Canada).

Peter Aldhous (2007)

Lecturer in Science Writing
B.S., University of Bristol, England; Ph.D., University of Nottingham, England.

Glenn Alers (2010)

Adjunct Professor, Computer Engineering
B.S., University of Colorado, Boulder; M.S., Ph.D., University of Illinois, Urbana.

George T. Amis, Cowell College (1965)

Professor Emeritus, English Literature
B.A., Amherst College; M.A., Ph.D., Yale University. Former affiliations: Yale University; Williams College.

Pranav Anand, Stevenson College (2006)

Assistant Professor, Linguistics
A.B., Harvard University; Ph.D., MIT.

Elliot W. Anderson, Porter College (1997)

Associate Professor, Art
B.A., M.A., San Francisco State University. Former affiliation: San Francisco Art Institute.

Eric Anderson (2008)

Assistant Adjunct Professor, Applied Mathematics and Statistics
B.A., Stanford University; M.S., Ph.D., University of Washington. Former affiliation: Southwest Fisheries Science Center.

Mark D. Anderson, Merrill College (2003)

Associate Professor, Anthropology
B.A., University of North Carolina at Chapel Hill; M.A., Ph.D., University of Texas at Austin. Former affiliation: University of Chicago.

Roger W. Anderson, Porter College (1968)

Professor, Chemistry and Biochemistry
B.A., Carleton College; M.A., Ph.D., Harvard University.

Frank C. Andrews, Merrill College (1967)

B.S., Kansas State University; M.A., Ph.D., Harvard University. Former affiliation: University of Wisconsin.

Lawrence Andrews, Porter College (1991)

Associate Professor, Film and Digital Media
B.F.A., San Francisco Art Institute.

Ryan Andrews (1999)

Executive Director, Physical Education
B.A., University of California, Berkeley, M.A., San Jose State University.

David Henry Anthony III, Oakes College (1988)

Associate Professor, History
A.B., New York University; A.M., Ph.D., University of Wisconsin-Madison. Former affiliation: University of Oregon.

Bettina F. Aptheker, Kresge College (1979)

Professor, Feminist Studies and History
B.A., University of California, Berkeley; M.A., San Jose State University; Ph.D., University of California, Santa Cruz. Former affiliation: San Jose State University.

Dane Archer, Stevenson College (1972)

Professor Emeritus, Sociology
B.A., Yale University; M.A., Ph.D., Harvard University.

Sondra Archimedes (2004)

Lecturer, Writing
B.A., M.A., San Francisco State University; Ph.D., University of California, Santa Cruz.

Manuel Ares, Porter College (1987)
Professor, Molecular, Cell, and Developmental Biology
B.S., Cornell University; Ph.D., University of California, San Diego. Former affiliation: Yale University.

Jeffrey M. Arnett (1987)
Lecturer, Writing
B.A., University of California, Santa Cruz; M.A., University of Colorado, Boulder. Former affiliation: Santa Clara University.

Anjali R. Arondekar, Kresge College (2000)
Associate Professor, Feminist Studies
I.B., Armand Hammer United World College; B.A., Cornell University; Graduate Certificate, Ph.D., University of Pennsylvania.

Elliot Aronson, Stevenson College (1974)
Professor Emeritus, Psychology
B.A., Brandeis University; M.A., Wesleyan University; Ph.D., Stanford University. Former affiliations: Harvard University; University of Minnesota; University of Texas at Austin.

Gabriela F. Arredondo, Merrill College (1998)
Associate Professor, Latin American and Latino Studies
B.A., Reed College; M.A., San Francisco State University; Ph.D., University of Chicago.

Derede Arthur (2001)
Lecturer, Writing
M.A., Stanford University. Former affiliations: Santa Clara University; De Anza College; Cogswell College, Sunnyvale.

Doris B. Ash, Porter College (2000)
Associate Professor, Education
B.S., M.S., Cornell University; Ph.D., University of California, Berkeley. Former affiliation: San Francisco Exploratorium.

Noriko Aso, Merrill College (1998)
Assistant Professor, History
B.A., Yale University; M.A., Ph.D., University of Chicago. Former affiliation: Portland State University.

Erik Asphaug, College Eight (1998)
Professor, Earth and Planetary Sciences
B.A., Rice University; Ph.D., University of Arizona, Tucson. Former affiliations: SETI Institute; NASA Ames Research Center.

Neda Atanasoski (2008)
Assistant Professor, Feminist Studies
B.A., University of Minnesota Twin Cities; M.A., Ph.D., University of California, San Diego. Former affiliations: State University of New York at Stony Brook.

William B. Atwood (2001)
Adjunct Professor, Physics
B.S., California Institute of Technology; Ph.D., Stanford University. Former affiliation: Stanford Linear Accelerator Center.

Ignacio Aznar (1966)
Lecturer Emeritus, Spanish Language
B.A., M.A., University of California, Berkeley. Former affiliation: Pomona College.

Margarita Azmitia, Cowell College (1989)
Professor, Psychology
B.A., M.A., University of North Carolina at Greensboro; Ph.D., University of Minnesota. Former affiliation: Florida International University.

Delbert Bailey (2010)
Lecturer, Computer Science
B.S., Portland State University; M.S., Ph.D., University of California, Santa Cruz. Former affiliation: University of Oregon.

Mark Baker (2000)
Lecturer, Writing
B.A., University of California, Irvine; M.A., San Francisco State University. Former affiliation: San Francisco State University.

John Balachandra (2010)
Adjunct Professor, Electrical Engineering
B.S., University of Sri Lanka; M.S., Ph.D., Texas A&M University. Former affiliations: Distributed Power & Electronics Center; California State University, Sacramento.

Gopal Balakrishnan, Oakes College (2006)
Associate Professor, History of Consciousness
B.A., Cornell University; M.A., Ph.D., University of California, Los Angeles. Former affiliation:

University of Chicago.

Thomas Banks (1986)

Professor, Physics

B.A., Reed College; Ph.D., Massachusetts Institute of Technology. Former affiliations: Stanford Linear Accelerator Center; Tel Aviv University; Institute for Advanced Study (Princeton); Rutgers University.

Karen M. Barad, Kresge College (2005)

Professor, Feminist Studies

B.A., Brandeis University; Ph.D., State University of New York at Stony Brook. Former affiliations: Mount Holyoke College, Rutgers University, Pomona College, Barnard College.

Brenda Barceló, Merrill College (1995)

Lecturer, Spanish Language

B.A., M.A., University of California, Santa Barbara. Former affiliations: Cuesta College; Alianza Cultural Uruguay-U.S.A. (Montevideo).

Brandin S. Baron, Porter College (2006)

Associate Professor, Theater Arts

B.A., Indiana University School of Music; M.F.A., University of California, San Diego. Former affiliation: The Academy of Art University, San Francisco.

Lora Bartlett (2004)

Assistant Professor, Education

B.A., M.Ed., University of Massachusetts, Amhurst; Ph.D., University of California, Berkeley. Former affiliation: University of London.

Karen L. Bassi, Cowell College (1988)

Professor, Classics (Literature)

B.A., University of California, Santa Cruz; Ph.D., Brown University. Former affiliations: Syracuse University; University of Rhode Island; Brown University.

Dilip K. Basu, Merrill College (1971)

Associate Professor, History

B.A., M.A., Calcutta University; M.A., Harvard University; Ph.D., University of California, Berkeley. Former affiliations: University of Michigan; University of California, Berkeley.

Frank Bäuerle (1994)

Lecturer, Mathematics

B.A., Technische Hochschule Karlsruhe; M.A., Ph.D., University of California, San Diego. Former affiliations: Monash University; Cornell University.

Murray Baumgarten, Kresge College (1966)

Professor, English and Comparative Literature; Neufeld Levin Professor, Holocaust Studies

B.A., Columbia University; M.A., Ph.D., University of California, Berkeley. Former affiliations: Hebrew University of Jerusalem; Williams College; University of California Education Abroad Program (Jerusalem).

Amy C. Beal, Porter College (2001)

Professor, Music

B.M., M.M., University of Kansas; M.A., Ph.D., University of Michigan. Former affiliation: Bates College.

Tandy Beal, Porter College (1973)

Lecturer, Theater Arts (Dance)

Former affiliations: Cabrillo College; University of Utah.

Michael W. Beck, (2007)

Assistant Adjunct Professor, Ocean Sciences

Ph.D., Florida State University.

Jonathan F. Beecher, Stevenson College (1970)

Professor Emeritus, History

B.A., Ph.D., Harvard University. Former affiliations: Harvard University; Ecole Normale d'Instituteurs (France).

David P. Belanger, College Eight (1984)

Professor, Physics

B.S., M.S., Georgia Institute of Technology; Ph.D., University of California, Santa Barbara.

Dorian Bell (2010)

Assistant Professor, Literature

B.A., Cornell University; M.A., Ph.D., University of Pennsylvania. Former affiliations: University of California, Irvine; Stanford University.

Ilan Benjamin, Stevenson College (1989)

Professor, Chemistry and Biochemistry

B.Sc., Ph.D., Hebrew University of Jerusalem. Former affiliation: University of California, San Diego.

Harry Berger, Jr., Cowell College (1965)
Professor Emeritus, English Literature and History of Art and Visual Culture
B.A., Ph.D., Yale University. Former affiliation: Yale University.

Martin A. Berger, Porter College (2004)
Professor, History of Art and Visual Culture
B.A., Wesleyan University; M.A., M.Phil., Ph.D., Yale University. Former affiliations: Colby College; University of North Carolina at Chapel Hill; Northwestern University; State University of New York at Buffalo; Yale University.

Ralph J. Berger, Cowell College (1967)
Professor Emeritus, Ecology and Evolutionary Biology
B.A., M.A., Cambridge University; Ph.D., University of Edinburgh. Former affiliations: University of Edinburgh; National Institute of Neurological Diseases and Blindness; University of Puerto Rico; University of California, Los Angeles.

Robert F. Berkhofer, Merrill College (1991)
Professor Emeritus, History
B.A., State University of New York at Albany; M.A., Ph.D., Cornell University. Former affiliations: University of Michigan, Ann Arbor; University of Wisconsin-Madison; University of Minnesota.

Nathaniel A. Berman (2007)
Lecturer, Music (Concert Choir)
B.A., M.A., University of California, Santa Cruz. Former affiliation: Robert Louis Stevenson High School, Pebble Beach.

Phillip W. Berman (2006)
Professor and Department Chair, Biomolecular Engineering
A.B., University of California, Berkeley; Ph.D., Dartmouth Medical School. Concurrent Affiliation: Global Solutions for Infectious Diseases; Genentech; VaxGen.

Giacomo Bernardi (1994)
Associate Professor, Ecology and Evolutionary Biology
B.S. (Maitrise), M.Sc. (D.E.A.), Ph.D. (These d'Université), University of Paris. Former affiliations: Institut Jacques Monod (Paris); Hopkins Marine Station, Stanford University.

Claude F. Bernasconi, Merrill College (1967)
Professor, Chemistry and Biochemistry
Diploma, Ph.D., Swiss Federal Institute of Technology (ETH) (Zurich). Former affiliation: Max Planck Institute for Biophysical Chemistry (Göttingen).

Rebecca A. Bernstein (2007)
Associate Professor/Associate Astronomer, Astronomy and Astrophysics
B.A., Princeton; Ph.D., California Institute of Technology. Former affiliations: Carnegie Observatories; University of Michigan.

Eva C. Bertram, Merrill College (2003)
Assistant Professor, Politics
B.A., Swarthmore College; M.A., M.Phil., Ph.D., Yale University.

Julie Bettie, College Eight (1997)
Associate Professor, Sociology
B.S., Boise State University; M.A., Ph.D., University of California, Davis.

Needhi Bhalla (2008)
Assistant Professor, Biology
B.A., Columbia College, New York; Ph.D., University of California, Berkeley.

Nandini Bhattacharya (1991)
Lecturer, Mathematics
B.A., Bryn Mawr College; M.A., University of California, Santa Cruz. Former affiliation: Cabrillo College.

Zhixi Bian (2008)
Assistant Adjunct Professor
B.S., Nankai University; M.S., Beijing University; Ph.D., University of California, Santa Cruz. Former affiliations: Vishay Siliconix; Beijing University.

James H. Bierman, Cowell College (1973)
Professor, Theater Arts (Drama)
B.A., Princeton University; Diplome, University of Paris, Sorbonne; Ph.D., Stanford University. Former affiliations: Smith College; Amherst College.

Raoul Birnbaum, Kresge College (1991)
Professor, History of Art and Visual Culture
B.A., College of the City of New York; M.A., M.Phil., Ph.D., Columbia University. Former affiliations: University of Iowa; Princeton University; Harvard University; Metropolitan Museum of Art.

A. Hunter Bivens, Cowell College (2008)
Assistant Professor, Literature

B.A., Bard College; Ph.D., University of Chicago. Former affiliation: Moravian College.

Courtney A. Blackburn (1980)

Physical Education Instructor

Certified master of Yung Style Tai Chi Chuan under Grand Master Liu, Yao Ting.

Chelsea Blackmore (2010)

Assistant Professor, Anthropology

B.A., Georgia Southern University; M.A., Florida State University; Ph.D., University of California, Riverside.

George R. Blumenthal, Oakes College (1972)

Chancellor; Professor, Astronomy and Astrophysics

B.S., University of Wisconsin-Milwaukee; Ph.D., University of California, San Diego.

Peter H. Bodenheimer, Stevenson College (1967)

Professor, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory

B.A., Harvard University; Ph.D., University of California, Berkeley.

Hanns Hinrich Boeger (2006)

Assistant Professor

B.S., M.S., Christian-Albrecht University; Ph.D., Max Planck Institute for Biophysical Chemistry; post-doctorate, Stanford University. Former affiliation: Stanford University Medical School.

Roberto A. Bogomolni, Porter College (1988)

Professor, Chemistry and Biochemistry

Diploma, University of Buenos Aires; Ph.D., University of California, Berkeley. Former affiliations: University of California, San Francisco; University of California, Berkeley.

Michael Bolte (1993)

Professor, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory

B.S., University of Central Florida; M.S., Florida State University; Ph.D., University of Washington. Former affiliations: NASA/Space Telescope Science Institute; Dominion Astrophysical Observatory.

Robert Boltje (1999)

Professor, Mathematics

Dipl. Math., University of Munich; Dr. habil., Dr. rer. nat., University of Augsburg.

John G. Borrego, Merrill College (1974)

Professor Emeritus, Latin American and Latino Studies

B.A., University of California, Berkeley; M.A., Washington University; M.C.P., Massachusetts Institute of Technology; Ph.D., University of California, Berkeley. Former affiliation: University of New Mexico.

John F. Bowin, Cowell College (2005)

Assistant Professor, Philosophy

B.A., M.B.A., M.A., University of Chicago; M.A., Ph.D., University of Texas at Austin.

Barry J. Bowman, Oakes College (1979)

Professor, Molecular, Cell, and Developmental Biology

B.A., University of Wisconsin; Ph.D., University of Michigan. Former affiliation: Yale University.

Mark Brandenburg (1989)

Lecturer, Music (Clarinet)

B.M., M.S., Juilliard School of Music.

Scott A. Brandt, Crown College (1999)

Professor, Computer Science

B.S., M.S., University of Minnesota, Minneapolis; Ph.D., University of Colorado, Boulder.

Alexandre Brandwajn (1985)

Professor, Computer Engineering

B.A., Docteur-Ingenieur, Docteur d'Etat, University of Paris. Former affiliations: Amdahl Corporation; Ecole Nationale Supérieure des Telecommunications (ENST) (Paris); Duke University.

Rebecca Braslau, Stevenson College (1991)

Professor, Chemistry and Biochemistry

B.A., Reed College; Ph.D., University of Wisconsin-Madison. Former affiliation: Institut für Organische Chemie (Basel, Switzerland).

Adrian Brasoveanu (2008)

Assistant Professor, Linguistics

B.A., M.A., University of Bucharest; Ph.D., Rutgers University.

Donald L. Brenneis, Cowell College (1996)

Professor, Anthropology

B.A., Stanford University; Ph.D., Harvard University. Former affiliation: Pitzer College.

Bruce Bridgeman, College Eight (1973)

Professor Emeritus, Psychology and Psychobiology

B.A., Cornell University; Ph.D., Stanford University. Former affiliations: Free University of Berlin; University of California, Berkeley.

Frank G. Bridges, Stevenson College (1970)
Professor Emeritus, Physics
B.Sc., M.Sc., University of British Columbia; Ph.D., University of California, San Diego. Former affiliation: University of California, San Diego.

Jean P. Brodie, Cowell College (1987)
Professor, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory
B.Sc., University of London; Ph.D., Cambridge University. Former affiliation: University of California, Berkeley.

Emily E. Brodsky (2006)
Associate Professor, Earth and Planetary Sciences
A.B., Harvard University; Ph.D., California Institute of Technology. Former affiliation: University of California, Los Angeles.

Joyce E. Brodsky, Porter College (1992)
Professor Emerita, Art
B.A., Brooklyn College; M.A., New York University; Ph.D. cand., Yale University; Ecole du Louvre. Former affiliation: University of Connecticut.

Margaret R. Brose, Cowell College (1978)
Professor Emerita, Italian and Comparative Literature
B.A., Wayne State University; M.A., Ph.D., Harvard University. Former affiliations: Yale University; University of Colorado.

George S. Brown, Porter College (1990)
Professor Emeritus, Physics
B.S., California Institute of Technology; M.S., Ph.D., Cornell University. Former affiliations: Cornell University; Bell Laboratories; Stanford University.

Michael K. Brown, Merrill College (1982)
Professor Emeritus, Politics
B.A., University of Oregon; M.P.A., Ph.D., University of California, Los Angeles. Former affiliation: Virginia Polytechnic Institute and State University.

Kenneth W. Bruland, Crown College (1974)
Professor, Ocean Sciences
B.A., Western Washington State College; Ph.D., Scripps Institution of Oceanography, University of California, San Diego.

Nicholas H. Brummell (2006)
Professor, Applied Mathematics and Statistics
B.Sc., D.I.C., Ph.D., Imperial College, London, UK. Former affiliation: University of Colorado, Boulder.

David T. Brundage, College Eight (1985)
Professor, Community Studies
B.A., Reed College; M.A., University of Warwick (England); Ph.D., University of California, Los Angeles. Former affiliation: University of New York.

Heather E. Bullock, College Ten (1999)
Professor, Psychology
B.A., Allegheny College; M.A., Ph.D., University of Rhode Island. Former affiliation: Nebraska Wesleyan University.

George Bunch, College Ten (2004)
Assistant Professor, Education
B.A., Georgetown University; M.A., University of Maryland, Baltimore County; Ph.D., Stanford University. Former affiliation: Stanford University.

Joseph F. Bunnett, Crown College (1966)
Professor Emeritus, Chemistry and Biochemistry
B.A., Reed College; Ph.D., University of Rochester. Former affiliations: Reed College; University of North Carolina; Brown University.

Victor Burgin, Oakes College (1988)
Professor Emeritus, History of Consciousness
A.R.C.A., Royal College of Art (London); M.F.A., Yale University. Former affiliation: Polytechnic of Central London.

P. Nicholas Burgoyne (1967)
Professor Emeritus, Mathematics
B.Sc., M.Sc., McGill University; Ph.D., Princeton University. Former affiliations: Princeton University; University of California, Berkeley; University of Illinois, Chicago.

Edmund Burke III, Merrill College (1968)
Professor Emeritus, History; UC Presidential Chair

B.A., University of Notre Dame; M.A., Ph.D., Princeton University.

Linda C. Burman-Hall, Porter College (1975)

Professor, Music

B.A., University of California, Los Angeles; M.F.A., Ph.D., Princeton University.

Julianne Burton-Carvájal, Merrill College (1974)

Professor Emerita, Literature

B.A., Denison University; M.Phil., Ph.D., Yale University. Former affiliation: University of Texas.

Jeffrey T. Bury, College Eight (2006)

Associate Professor, Environmental Studies

B.A., University of Utah; M.A., The American University; Ph.D., University of Colorado. Former affiliation: Department of Geography and Human Sciences, San Francisco State University.

Melissa L. Caldwell, College Eight (2004)

Assistant Professor, Anthropology

B.A., University of Tennessee; M.A., Indiana University; A.M., Ph.D., Harvard University. Former affiliations: Northeastern University; Harvard University.

Carlos Caliendo, Merrill College (1990)

Lecturer, Spanish Language

M.A., San Francisco State University; law degree, Facultad De Ciencias Juridicas (Santa Fe, Argentina).

Maureen Callanan, Crown College (1989)

Professor, Psychology

A.B., Mount Holyoke College; Ph.D., Stanford University. Former affiliations: University of Texas at Austin; Lehigh University.

Elisabeth L. Cameron, Porter College (2001)

Associate Professor, History of Art and Visual Culture

B.A., Agnes Scott College; M.A., Ph.D., University of California, Los Angeles. Former affiliation: Nelson-Atkins Museum of Art (Kansas City, Missouri).

Kenneth L. Cameron, Crown College (1973)

Professor Emeritus, Earth and Planetary Sciences

B.S., M.S., University of Houston; Ph.D., Virginia Polytechnic Institute and State University. Former affiliation: State University of New York at Stony Brook.

Walter I. Campbell (1989)

Lecturer, German Language

B.A., Whitman College; B.A., M.A., University of Washington.

Manel Camps, Crown College (2007)

Assistant Professor, Environmental Toxicology

D.V.M., M.A., Autonomous University of Barcelona; Ph.D., Stanford University. Former affiliation: University of Washington.

Mark H. Carr (1997)

Associate Professor, Ecology and Evolutionary Biology

B.A., University of California, Santa Cruz; M.S., San Francisco State University (Moss Landing Marine Laboratories); Ph.D., University of California, Santa Barbara. Former affiliations: Oregon State University; California Institute of Technology.

Benjamin L. Carson, College Eight (2003)

Assistant Professor, Music

B.A., Willamette University; M.M., University of Washington, Seattle; Ph.D., University of California, San Diego. Former affiliations: University of California, Riverside; University of California, San Diego.

Sue A. Carter, Crown College (1995)

Professor, Physics

B.A., Kalamazoo College; Ph.D., University of Chicago. Former affiliations: AT&T Bell Laboratories; IBM-Almaden Research Center.

Pedro G. Castillo, Merrill College (1975)

Associate Professor, History

B.A., Arizona State University; M.A., Northern Arizona University; Ph.D., University of California, Santa Barbara. Former affiliations: University of California, Santa Barbara; Yale University.

Brian A. Catlos, Stevenson College (2002)

Associate Professor, History

B.A., M.A., Ph.D., University of Toronto. Former affiliation: Boston University.

Giulia Centineo, Cowell College (1987)

Lecturer, Italian Language

Laurea, Università degli Studi di Palermo (Italy); M.A., Ph.D. cand., University of California, Berkeley.

Don Chamberlin (2008)

Adjunct Professor, Computer Science
B.S., Harvey Mudd College; M.S., Ph.D., Stanford University. Former affiliation: IBM Research Division.

Pak K. Chan, Crown College (1987)

Associate Professor, Computer Engineering
B.Sc., Chinese University of Hong Kong; M.Sc., Ph.D., University of California, Los Angeles. Former affiliation: University of California, Los Angeles.

Martin M. Chemers, Porter College (1995)

Professor Emeritus, Psychology
B.S., M.S., Ph.D., University of Illinois, Urbana-Champaign. Former affiliations: Claremont McKenna College; Claremont Graduate School; University of Utah; University of Delaware.

Bin Chen (2006)

Assistant Professor, Biological Sciences
B.S., M.S., Beijing University; Ph.D., State University of New York at Stony Brook; Postdoctorate, Stanford University. Former affiliation: Stanford University.

Bin Chen (2008)

Adjunct Professor, Electrical Engineering
B.S., Nanjing University; M.S., University of Illinois, Urbana-Champaign; Ph.D., Pennsylvania State University. Former affiliations: NASA Ames Research Center; Modus Nanotechnology, Inc.; Hal Technology; Physical Optics Corp.; Elore Corp.; Pharmaceutical University of China.

Nancy N. Chen, Crown College (1994)

Professor, Anthropology
B.A., Stanford University; M.A., Ph.D., University of California, Berkeley. Former affiliation: Tufts University.

Shaowei Chen (2004)

Professor, Chemistry and Biochemistry
B.S., University of Science and Technology of China; M.S., Ph.D., Cornell University. Former affiliation: Southern Illinois University at Carbondale.

Ai-Ru Cheng (2004)

Assistant Professor, Economics
B.A., National Tsing-hua University; M.S., Ph.D., University of North Carolina at Chapel Hill.

Weixin Cheng, College Nine (1999)

Professor, Environmental Studies
B.S., Northeast Agricultural College (Harbin, China); Ph.D., University of Georgia.

Yin-Wong Cheung, Crown College (1990)

Professor, Economics
B.S., University of Hong Kong; M.A., University of Essex (England); Ph.D., University of Pennsylvania.

John Brown Childs, College Ten (1987)

Professor Emeritus, Sociology
B.A., University of Massachusetts-Amherst; M.A., Ph.D., State University of New York at Buffalo. Former affiliations: National Academy of Sciences; Amherst College; Harvard University; Yale University.

Alan S. Christy, Merrill College (1995)

Associate Professor, History
B.A., Carleton College; M.A., Ph.D., University of Chicago.

Patrick Y. Chuang (2001)

Assistant Professor, Earth and Planetary Sciences
B.Sc., University of Alberta; M.S., Ph.D., California Institute of Technology. Former affiliation: National Center for Atmospheric Research.

Glennnda G. Chui (2006)

Lecturer in Science Writing, Science Communication
B.S., California State University, Hayward; M.S., University of California, Berkeley.

Sandra Chung, Cowell College (1986)

Professor, Linguistics
A.B., Radcliffe College; Ph.D., Harvard University. Former affiliations: University of California, Los Angeles; University of California, San Diego.

Mark Cioc, Stevenson College (1989)

Professor, History; Vice Provost and Dean, Undergraduate Education
B.S., M.A., University of Wyoming; Ph.D., University of California, Berkeley. Former affiliation: University of Massachusetts-Amherst.

Matthew E. Clapham (2007)

Assistant Professor, Earth and Planetary Sciences

B.Sc., University of British Columbia, Canada; M.Sc., Queen's University, Ontario, Canada; Ph.D., University of Southern California. Former affiliation: Queen's University.

James T. Clifford, Oakes College (1978)

Professor Emeritus, History of Consciousness

B.A., Haverford College; M.A., Stanford University; Ph.D., Harvard University; (Hon.) D. Litt. h.c., Haverford College. Former affiliation: Harvard University.

Rena V. Cochlin, Merrill College (1973)

Associate Supervisor, Physical Education

B.A., Barnard College; M.A., Columbia University. Former affiliations: Central Connecticut State College; East Los Angeles College; World Campus Afloat.

Robert S. Coe, Porter College (1968)

Professor, Earth and Planetary Sciences

B.A., Harvard University; M.A., Ph.D., University of California, Berkeley. Former affiliations: University of California, Berkeley; U.S. Geological Survey.

Christopher L. Connery, Oakes College (1990)

Professor, Chinese Literature

B.A., University of California, Santa Cruz; M.A., Ph.D., Princeton University.

Paul D. Contos (1997)

Lecturer, Music

Concurrent affiliations: California State University, Monterey Bay; Monterey Jazz Festival. Former affiliations: Santa Cruz County Symphony; San Jose Civic Light Opera.

Catherine R. Cooper, Stevenson College (1987)

Professor, Psychology and Education

B.A., Pomona College; Ph.D., University of Minnesota at Minneapolis-St. Paul. Former affiliation: University of Texas at Austin.

Bruce N. Cooperstein, College Eight (1975)

Professor, Mathematics

B.A., Queens College, City University of New York; M.A., Ph.D., University of Michigan. Former affiliation: University of Michigan.

Vilashini Cooppan, Oakes College (2003)

Associate Professor, Literature

B.A., Yale University; Ph.D., Stanford University. Former affiliation: Yale University.

David H. Cope, Porter College (1977)

Professor Emeritus, Music

B.M., Arizona State University; M.M., University of Southern California. Former affiliations: Miami University (Ohio); Kansas State College.

Mary J. Cope (1977)

Lecturer, Music (Piano)

B.A., Ohio Dominican College; M.M., Indiana University. Former affiliations: Cottey College; Kansas State College; Cleveland Institute of Music; Miami University (Ohio).

Dan Costa, College Eight (1982)

Professor, Ecology and Evolutionary Biology; Ida Benson Lynn Professor, Ocean Health

B.A., University of California, Los Angeles; Ph.D., University of California, Santa Cruz. Former affiliation: Scripps Institution of Oceanography.

William D. Coulter, Porter College (1995)

Lecturer, Music (Classical Guitar)

B.A., M.A., University of California, Santa Cruz; M.A., San Francisco Conservatory of Music.

Michael H. Cowan, Oakes College (1969)

Professor, American Studies

B.A., Ph.D., Yale University. Former affiliation: Yale University.

Philip O. Crews, Cowell College (1970)

Professor, Chemistry

B.S., University of California, Los Angeles; Ph.D., Princeton University. Former affiliation: University of California, Santa Barbara.

Edith G. Crichton, Porter College (1994)

Associate Professor, Art

B.F.A., San Francisco State University; M.F.A., California College of Arts and Crafts. Former affiliation: California State University, Hayward.

Donald A. Croll (2000)

Professor, Ecology and Evolutionary Biology

B.Sc., University of California, Davis; M.Sc., California State University, Hayward (Moss Landing Marine Laboratories); Ph.D., Scripps Institution of Oceanography, University of California, San Diego.

Faye J. Crosby, Porter College (1997)
Professor, Psychology
A.B., Wheaton College; Ph.D., Boston University; LL.D. (Hon.), Ball State University. Former affiliations: Boston University; London School of Economics and Political Science; Yale University; Smith College.

Ben D. Crow, College Eight (1996)
Professor, Sociology
B.Sc., University of Westminster (Polytechnic of Central London); Ph.D., University of Edinburgh. Former affiliations: Stanford University; University of California, Berkeley.

Cynthia Cruz, Merrill College (2008)
Assistant Professor, Education
B.A., Scripps College; Ph.D., University of California, Los Angeles. Former affiliations: Cornell University; Pacific Oaks College; University of California, Los Angeles.

Renwick E. Curry (2008)
Adjunct Professor, Computer Engineering
A.B., Middlebury College; S.B., S.M., E.A.A., and Ph.D., Massachusetts Institute of Technology.

Robert R. Curry, College Eight (1979)
Professor Emeritus, Environmental Geology (Environmental Studies)
B.A., M.Sc., University of Colorado; Ph.D., University of California, Berkeley. Former affiliations: University of California, Santa Barbara; University of Montana.

David L. Cuthbert, Porter College (2003)
Associate Professor, Theater Arts
B.A., California State University, Fresno; M.F.A., University of California, San Diego. Former affiliations: Old Globe Theater (San Diego); PCPA Theaterfest; Vortex Lighting (Los Angeles); Sledgehammer Theatre.

Michael S. Dalbey (1977)
Lecturer, Biology
B.A., San Fernando Valley State College; Ph.D., University of California, Santa Cruz.

Charles W. Daniel, Cowell College (1965)
Professor Emeritus, Molecular, Cell, and Developmental Biology
B.A., University of New Mexico; M.S., University of Hawaii; Ph.D., University of California, Berkeley.

Sharon A. Daniel, Porter College (1996)
Professor, Film and Digital Media
B.M., Baylor University; M.M., University of Texas; M.F.A., University of Tennessee. Former affiliations: Massachusetts Institute of Technology; Maryland Institute College of Art; Rhode Island School of Design.

Peter Danzig (2010)
Adjunct Professor, Computer Engineering
B.S., University of California, Davis; Ph.D., University of California, Berkeley.

Samit Dasgupta (2008)
Assistant Professor, Mathematics
A.B., Harvard University; Ph.D., University of California, Berkeley. Former affiliation: Harvard University.

Angela Y. Davis, Oakes College (1991)
Professor Emerita, History of Consciousness
B.A., Brandeis University; M.A., University of California, San Diego; Certificat de la Litterature Française Contemporaine, Sorbonne. Former affiliation: San Francisco State University.

James E. Davis (2004)
Associate Professor, Computer Science
B.S., University of California, Davis; Ph.D., Stanford University. Former affiliation: Honda Research Institute.

Luca De Alfaro (2001)
Associate Professor, Computer Engineering
B.S., Ph.D., Politecnico di Torino (Italy); M.S., Ph.D., Stanford University. Former affiliation: University of California, Berkeley.

David W. Deamer (1994)
Professor Emeritus (recalled), Chemistry and Biochemistry
B.S., Duke University; Ph.D., Ohio State University School of Medicine. Former affiliation: University of California, Davis.

Carolyn Dean, Porter College (1991)
Professor, History of Art and Visual Culture
B.A., University of Puget Sound; M.A., C.Phil., Ph.D., University of California, Los Angeles. Former affiliation: Texas Tech University.

Margaret L. Delaney, Crown College (1983)
Professor, Ocean Sciences
B.S., Yale University; Ph.D., Massachusetts Institute of Technology.

Teresa De Lauretis, Oakes College (1985)
Professor, History of Consciousness
Maturita Classica, Liceo-Ginnasio Dante Alighieri (Ravenna); Laurea, Universita Luigi Bocconi (Milan). Former affiliations: University of Wisconsin-Milwaukee; University of California, San Diego.

Gina Dent, Kresge College (2002)
Associate Professor, Feminist Studies, History of Consciousness, and Legal Studies
B.A., University of California, Berkeley; M.A., M.Phil., Ph.D., Columbia University. Former affiliations: Columbia University; Princeton University.

Marc A. DesJardins (2006)
Lecturer in Science Writing, Science Communication
B.A., University of Vermont.

Joshua Deutsch, Merrill College (1986)
Professor, Physics
B.S., M.Sc., University of California, San Diego; Ph.D., Cambridge University. Former affiliation: University of California, Santa Barbara.

Nathaniel Deutsch (2008)
Professor, History
B.A., M.A., Ph.D., University of Chicago. Former affiliations: Swarthmore College; City University of New York-Hunter College.

Rachel J. Dewey (1999)
Associate Adjunct Professor, Astronomy and Astrophysics
A.B., Harvard University; Ph.D., Princeton University.

Maria Elena Diaz, Merrill College (1991)
Associate Professor, History
B.A., Syracuse University; M.A., University of Chicago; Ph.D., University of Texas at Austin. Former affiliation: University of Texas at Austin.

May N. Diaz, Merrill College (1974)
Professor Emerita, Anthropology
B.A., Ph.D., University of California, Berkeley. Former affiliation: University of California, Berkeley.

Andrea Di Blas (2009)
Assistant Adjunct Professor
M.S., Ph.D., Politecnico di Torino, Italy.

Michael Dine, Stevenson College (1990)
Distinguished Professor, Physics
B.S., Johns Hopkins University; Ph.D., Yale University. Former affiliations: City College of the City University of New York; Stanford Linear Accelerator Center.

John Dizikes, Cowell College (1965)
Professor Emeritus, American Studies
B.A., University of California, Los Angeles; Ph.D., Harvard University. Former affiliation: University of Connecticut.

Carlos E. Dobkin (2003)
Associate Professor, Economics
B.A., University of California, Santa Cruz; M.A., Ph.D., University of California, Berkeley.

Andrew E. Doe, Porter College (1973)
Professor Emeritus, Theater Arts (Drama)
B.S., University of Vermont; M.A., University of Washington. Former affiliations: Lower Columbia College; University of Iowa; University of Michigan; University of Southern California; Pomona College.

G. William Domhoff, Stevenson College (1965)
Professor Emeritus, Psychology
B.A., Duke University; M.A., Kent State University; Ph.D., University of Miami. Former affiliation: California State College, Los Angeles.

Nathaniel Dominy, Crown College (2004)
Associate Professor, Anthropology
B.A., Johns Hopkins University; Ph.D., University of Hong Kong. Former affiliation: University of Chicago.

Chongying Dong, Crown College (1990)
Professor, Mathematics
B.S., Xian Telecommunication and Engineering University; Ph.D., Institute of System Science, Academia Sinica. Former affiliation: Rutgers University.

Michael P. Dooley, Crown College (1992)

Professor, Economics
B.S., Duquesne University; M.A., University of Delaware; Ph.D., Pennsylvania State University.
Former affiliations: International Monetary Fund; Federal Reserve Bank.

David E. Dorfan, Oakes College (1968)
Professor Emeritus, Physics
B.Sc., University of Cape Town; Ph.D., Columbia University. Former affiliations: Columbia University; Stanford Linear Accelerator Center.

Farid Dowla (2008)
Adjunct Professor, Electrical Engineering
B.S., M.S., Ph.D., Massachusetts Institute of Technology. Former affiliations: Lawrence Livermore National Laboratory; University of California, Berkeley; University of California, Davis; Massachusetts Institute of Technology.

Margaret M. Downes-Baskin (1998)
Research Associate, Feminist Studies
B.A., Vassar College; M.A., California State University, Northridge; Ph.D., Claremont Graduate School of Government.

William T. Doyle, Crown College (1965)
Professor Emeritus, Ecology and Evolutionary Biology
B.A., Ph.D., University of California, Berkeley. Former affiliation: Northwestern University.

Frank D. Drake (1984)
Professor Emeritus, Astronomy and Astrophysics
B. Eng. Physics, Cornell University; M.A., Ph.D., Harvard University. Concurrent affiliation: SETI Institute. Former affiliations: Harvard University; National Radio Astronomy Observatory; Jet Propulsion Laboratory; Cornell University.

David Draper, College Eight (2001)
Professor, Applied Mathematics and Statistics
B.Sc., University of North Carolina at Chapel Hill; M.A., Ph.D., University of California, Berkeley. Former affiliations: University of Chicago; RAND Corporation; University of California, Los Angeles; University of Bath (England).

Timothy Duane (2009)
Associate Professor, Environmental Studies
A.B., M.S., Ph.D., Stanford University; J.D., University of California, Berkeley. Former affiliations: University of California, Berkeley; Vermont Law School.

Sherwood Dudley, Porter College (1968)
Professor Emeritus, Music
B.M., B.A., North Texas State University; M.A., Ph.D., University of California, Berkeley. Former affiliation: University of California Education Abroad Program (Grenoble, Montpellier, Marseilles).

William B. Dunbar (2004)
Associate Professor, Computer Engineering
B.S., Virginia Polytechnic Institute and State University; M.S., University of California, San Diego; Ph.D., California Institute of Technology.

E. Melanie DuPuis, Crown College (1997)
Professor, Sociology
B.A., Radcliffe College, Harvard University; M.S., Ph.D., Cornell University. Former affiliations: State University of New York at Albany; New York State Department of Economic Development; Skidmore College; Rensselaer Polytechnic Institute; Siena College; Hudson Valley Community College.

Robert M. Durling, Cowell College (1966)
Professor Emeritus, Italian and English Literature
B.A., M.A., Ph.D., Harvard University. Former affiliations: Haverford College; Cornell University.

Mark R. Eastman (1990)
Lecturer, Mathematics
B.A., Colorado College; M.A., University of Montana, Missoula; Ph.D., University of California, Santa Cruz.

Kent H. Eaton, Merrill College (2006)
Professor, Politics
B.A., Stanford University; Ph.D., Yale University.
Former affiliations: Princeton University; Naval Postgraduate School.

Robert S. Edgar, Crown College (1970)
Professor Emeritus, Molecular, Cell, and Developmental Biology
B.Sc., McGill University; Ph.D., University of Rochester. Former affiliation: California Institute of Technology.

Kate Edmunds, Porter College (2004)
Professor, Theater Arts
B.F.A., Wayne State University; M.F.A., Yale School of Drama. Former affiliation: University of

California, Berkeley.

Christopher A. Edwards (2002)

Assistant Professor, Ocean Sciences

B.A. (Hons.), Haverford College; Ph.D., Massachusetts Institute of Technology and Woods Hole Oceanographic Institution. Former affiliation: University of Connecticut.

Michael D. Edwards (1982)

Professor Emeritus, Theater Arts

B.A., Monash University, Australia; M.F.A., University of California, Los Angeles. Concurrent affiliation: Asolo Theater, Sarasota, Florida. Former affiliation: State College of Victoria, Australia.

Torsten Ehrhardt (2004)

Associate Professor, Mathematics

Dipl. Math., Dr. rer. nat., Dr. habil., Chemnitz University of Technology (Germany). Former affiliation: Chemnitz University of Technology.

Ólöf Einarsdóttir, Crown College (1989)

Professor, Chemistry and Biochemistry

B.A., University of Iceland, Reykjavik; Ph.D., Colorado State University, Fort Collins. Former affiliation: Los Alamos National Laboratory.

Bernard L. Elbaum, Merrill College (1986)

Associate Professor, Economics

B.A., University of Michigan; Ph.D., Harvard University.

Gabriel H. Elkaim, Crown College (2003)

Associate Professor, Computer Engineering

B.S., Princeton University; M.S., Ph.D., Stanford University. Concurrent affiliation: Delta Technology Associates.

John M. Ellis, Crown College (1966)

Professor Emeritus, German Literature

B.A., Ph.D., University of London. Former affiliations: University of Wales; University of Leicester; University of Alberta.

Jonathan E. Ellis, Cowell College (2002)

Associate Professor, Philosophy

B.A., Dartmouth College; Ph.D., University of California, Berkeley.

Greer Ellison (2002)

Lecturer, Music (Flute)

B.M., Oberlin Conservatory of Music; M.M., University of Michigan, Ann Arbor.

Peter Q. Elsea, Porter College (1980)

Lecturer, Music

B.M., M.A., University of Iowa. Former affiliation: University of Iowa.

Angela A. Elsey, Cowell College (1988)

Lecturer, French Language

B.A., Kalamazoo College; M.A.T., University of Michigan. Former affiliations: San Francisco State University; Oregon State University; Hope College.

Harland W. Epps, Porter College (1989)

Professor, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory

B.A., Pomona College; M.S., Ph.D., University of Wisconsin. Former affiliation: University of California, Los Angeles.

Barbara L. Epstein, Oakes College (1973)

Professor, History of Consciousness

B.A., Radcliffe College; M.A., Ph.D., University of California, Berkeley.

Shelly E. Errington, Kresge College (1972)

Professor, Anthropology

B.A., Newcomb College, Tulane University; M.A., Ph.D., Cornell University. Former affiliation: Institute for Advanced Study (Princeton).

Heinz Erzberger (2006)

Adjunct Professor, Electrical Engineering

B.S., California Polytechnic State University; M.E.E., Ph.D., Cornell University. Former affiliations: NASA Ames Research Center.

James A. Estes (1978)

Adjunct Professor, Ecology and Evolutionary Biology and Ocean Sciences

B.A., University of Minnesota; M.S., Washington State University; Ph.D., University of Arizona.

J. Peter Euben, Kresge College (1967)

Professor Emeritus, Politics

B.A., Swarthmore College; M.A., Ph.D., University of California, Berkeley; Certificate, Oxford University.

Maria Evangelatou, Porter College (2007)

Assistant Professor, History of Art and Visual Culture

B.A., University of Ioannina, Greece; M.A., Ph.D., Courtauld Institute of Art, London. Former affiliations: Radcliffe Institute for Advance Studies, Harvard University: postdoctoral research fellowship.

Maria V. Ezerova, Porter College (1994)

Lecturer, Music (Piano)

B.M., Musical College, Moscow State University; M.A., University of California, Santa Cruz; M.M., D.M.A. equivalents, Moscow State Conservatory. Former affiliations: Russian Academy of Musical Arts (Moscow); Moscow State Conservatory; Turkmenian State Institute of Musical Arts (Ashkhabad).

Sandra M. Faber, Crown College (1972)

Professor, Astronomy and Astrophysics

B.A., Swarthmore College; Ph.D., Harvard University.

Robert W. Fairlie, College Ten (1994)

Professor, Economics

B.A., Stanford University; M.A., Ph.D., Northwestern University.

Sylvanna Falcón (2010)

Assistant Professor, Latin American and Latino Studies

B.A., Santa Clara University; M.A., University of New Mexico, Albuquerque; Ph.D., University of California, Santa Barbara. Former affiliation: University of California, Riverside, University of California, Office of the President; Connecticut College; University of California, Santa Barbara.

Donka F. Farkas, Stevenson College (1991)

Professor, Linguistics

B.A., University of Bucharest (Romania); Ph.D., University of Chicago. Former affiliation: Yale University.

Bryan H. Farrell, College Eight (1974)

Professor Emeritus, Geography (Environmental Studies)

B.A., University of Canterbury (New Zealand); M.A., University of Washington; Ph.D., University of Auckland. Former affiliations: Southern Methodist University; University of Auckland; University of Alberta; University of Victoria (Canada).

BK Faunce (2003)

Lecturer, Writing

B.A., M.A., University of Pacific, Stockton; Ph.D., University of California, Riverside.

Farnaz Fatemi (2000)

Lecturer, Writing

B.A., University of California, Santa Cruz; M.F.A., Mills College.

John Faulkner, Crown College (1969)

Professor Emeritus, Astronomy and Astrophysics

B.A., M.A., Ph.D., St. John's College, Cambridge University. Former affiliations: Cambridge University; California Institute of Technology; Institute of Theoretical Astronomy (Cambridge).

David A. Feldheim (2002)

Assistant Professor, Molecular, Cell, and Developmental Biology

B.A., University of California, San Diego; Ph.D., University of California, Berkeley.

Jerry F. Feldman, Crown College (1974)

Professor Emeritus, Molecular, Cell, and Developmental Biology

B.A., Swarthmore College; M.A., Ph.D., Princeton University. Former affiliations: California Institute of Technology; State University of New York at Albany.

Verónica E. Feliu, Merrill College (1999)

Lecturer, Spanish Language

Licenciate, Universidad de Chile; Ph.D., Duke University. Former affiliation: Duke University.

F. Joel Ferguson, College Eight (1987)

Professor, Computer Engineering; Provost, Crown College

B.S.E., University of North Carolina at Charlotte; M.S.E.E./C.E., Ph.D., Carnegie Mellon University.

Mayanthi Fernando (2008)

Assistant Professor, Anthropology

M.A., Harvard University; Ph.D., University of Chicago. Former affiliation: Washington University, St. Louis.

Noah Finnegan (2009)

Assistant Professor, Earth and Planetary Sciences

B.A., Carleton College; Ph.D., University of Washington. Former affiliations: Cornell University, University of California, Berkeley; National Center for Earth-Surface Dynamics.

Arthur E. Fischer, Crown College (1972)

Professor Emeritus, Mathematics

B.A., Columbia University; Ph.D., Princeton University; M.D., Albert Einstein College of Medicine.

Former affiliation: University of California, Berkeley.

Andrew T. Fisher, College Eight (1995)

Professor, Earth and Planetary Sciences

B.S., Stanford University; Ph.D., University of Miami. Former affiliations: Indiana Geological Survey; Indiana University; Texas A&M University; Ocean Drilling Program.

Tim R. Fitzmaurice, Crown College (1982)

Lecturer, Writing

B.A., San Jose State University; M.A., University of California, Santa Cruz.

Margaret I. Fitzsimmons, College Eight (1994)

Professor, Environmental Studies

B.A., Stanford University; M.A., California State University, Northridge; Ph.D., University of California, Los Angeles. Former affiliation: Graduate School of Architecture and Urban Planning, University of California, Los Angeles.

Cormac A. Flanagan (2003)

Professor, Computer Science

B.S., University College Dublin; M.S., Ph.D., Rice University. Former affiliations: Systems Research Center; DEC; Compaq; Hewlett-Packard.

A. Russell Flegal, Crown College (1985)

Professor, Environmental Toxicology

B.A., University of California, Santa Barbara; M.A., Moss Landing Marine Laboratories; Ph.D., Oregon State University. Former affiliation: California Institute of Technology.

Mary K. Foley, Porter College (1980)

Professor, Theater Arts (Drama)

B.A., Rosemont College; M.A., University of Massachusetts; Ph.D., University of Hawaii at Manoa. Former affiliation: University of Massachusetts.

Jorge Aladro Font, Merrill College (1992)

Professor, Spanish Literature

M.A., University of Barcelona; Ph.D., State University of New York at Albany. Former affiliations: Skidmore College; State University of New York at Albany.

Samantha E. Forde (2009)

Adjunct Professor, Ecology and Evolutionary Biology

B.A., University of California, Santa Barbara; Ph.D., University of California, Santa Cruz.

Doyle Foreman, Porter College (1968)

Professor Emeritus, Art

B.F.A., California College of Arts and Crafts.

Camilla E. Forsberg (2007)

Assistant Professor, Biomolecular Engineering

Ph.D., University of Wisconsin-Madison. Former affiliation: Stanford University.

Jonathan J. Fortney (2007)

Assistant Professor, Astronomy and Astrophysics

B.S., Iowa State University; Ph.D., University of Arizona. Former affiliation: NASA Ames Research Center.

Jonathan A. Fox, Merrill College (1995)

Professor, Latin American and Latino Studies

B.A., Princeton University; Ph.D., Massachusetts Institute of Technology. Former affiliation: Massachusetts Institute of Technology.

Laurel R. Fox, Crown College (1977)

Professor, Ecology and Evolutionary Biology

B.S., Cornell University; M.A., Ph.D., University of California, Santa Barbara. Former affiliation: Australian National University.

Jean E. Fox Tree, Porter College (1994)

Professor, Psycholinguistics (Psychology)

A.B., Harvard University; M.Sc., University of Edinburgh; Ph.D., Stanford University. Former affiliations: Stanford University; Max Planck Institute for Psycholinguistics (Nijmegen, Netherlands).

Paulo Franca (1997)

Lecturer, Computer Science

M.S., Federal University of Rio de Janeiro; M.Eng., Ph.D., University of California, Berkeley.

Dana L. Frank, Merrill College (1991)

Professor, History

B.A., University of California, Santa Cruz; M.A., Ph.D., Yale University. Former affiliation: University of Missouri at St. Louis.

Mark Franko, Porter College (1991)

Professor, Theater Arts (Dance)

B.A., City College of New York; Ph.D., Columbia University. Former affiliations: Columbia University; Université Paul Valéry; Princeton University; Purdue University.

Marge Frantz, Kresge College (1976)

Professor Emerita, American Studies and Feminist Studies

B.A., University of California, Berkeley; Ph.D., University of California, Santa Cruz. Former affiliation: Institute of Industrial Relations, University of California, Berkeley.

Carla A. Freccero, Kresge College (1991)

Professor, French Literature and Feminist Studies

B.A., Harvard University; M.Phil., Ph.D., Yale University. Former affiliation: Dartmouth College.

Carol M. Freeman, Cowell College (1974)

Senior Lecturer, Writing

B.A., Carleton College; Ph.D., Yale University. Former affiliation: Yale University.

Rosa-Linda Fregoso, Merrill College (2001)

Professor, Latin American and Latino Studies

B.J., University of Texas at Austin; Ph.D., University of California, San Diego. Former affiliations: University of California, Davis; University of California, Los Angeles; University of California, Santa Barbara.

William H. Friedland (1969)

Professor Emeritus, Community Studies and Sociology

B.A., M.A., Wayne State University; Ph.D., University of California, Berkeley. Former affiliation: Cornell University.

Benjamin Friedlander (1999)

Professor, Electrical Engineering

B.S., M.S., Technion University (Israel); M.S., Ph.D., Stanford University. Former affiliation: University of California, Davis.

Daniel Friedman, Crown College (1985)

Professor, Economics

B.A., Reed College; M.A., Ph.D., University of California, Santa Cruz. Former affiliations: University of California, Los Angeles; University of California, Berkeley.

Susan Friedman, Porter College (1981)

Lecturer, Art

B.A., University of Buffalo; M.F.A., San Francisco Art Institute. Former affiliation: Cabrillo College.

Gregory Fritsch, Porter College (1987)

Lecturer, Theater Arts (Drama)

B.Ed., M.A., University of Miami.

Marta Morello-Frosch, Merrill College (1983)

Professor Emerita, Spanish Literature

M.A., Ph.D., Ohio State University. Former affiliations: Ohio State University; University of California, San Diego; University of Waterloo, Canada.

Sakae Fujita (1991)

Lecturer, Japanese Language

B.A., Osaka University of Education; M.A., Monterey Institute of International Studies; Ph.D. cand., University of California, Berkeley. Former affiliation: Monterey Institute of International Studies.

Hiroshi Fukurai, Stevenson College (1990)

Professor, Sociology

B.A., California State University, Fullerton; M.A., Ph.D., University of California, Riverside. Former affiliations: University of California, Riverside; Texas A&M University.

K. C. Fung, Crown College (1989)

Professor, Economics

B.A., Swarthmore College; M.S., Ph.D., University of Wisconsin-Madison. Former affiliations: Mount Holyoke College; Stanford University.

John D. Funge (2007)

Assistant Adjunct Professor, Computer Science

B.Sc., King's College, London; M.Sc., University of Oxford; Ph.D., University of Toronto. Former affiliations: AiLive Inc.; Sony Computer Entertainment America; Intel Corporation.

Pascale Gaitet, Kresge College (1986)

Professor, Literature and Language Studies

B.A., M.A., Oxford University; Ph.D., Princeton University.

Patricia M. Gallagher, Porter College (2004)

Assistant Professor, Theater Arts

B.A., University of Arizona; M.A., Ph.D., University of Wisconsin-Madison.

Alison Galloway, Crown College (1990)

Professor, Anthropology; Vice Provost and Dean, Academic Affairs

B.A., University of California, Berkeley; M.A., Ph.D., University of Arizona. Former affiliation: University of Tennessee.

Frank R. Galuszka, Porter College (1995)

Professor, Art

B.F.A., M.F.A., Temple University, Tyler School of Art. Former affiliation: University of the Arts, College of Art and Design (Philadelphia).

Alexander Gamburd (2004)

Professor, Mathematics

B.S., Massachusetts Institute of Technology; M.A., Ph.D., Princeton University. Former affiliations: Stanford University; Mathematical Sciences Research Institute; Dartmouth College.

Mary-Kay Gamel, Cowell College (1973)

Professor, Classics and Comparative Literature

B.A., Smith College; M.A., Harvard University; Ph.D., University of California, Berkeley. Former affiliation: Boston University.

Pascale Garaud, Oakes College (2004)

Associate Professor, Applied Mathematics and Statistics

B.S., Université Louis Pasteur; M.S., Ph.D., Cambridge University. Former affiliation: Cambridge University.

J. J. García-Luna-Aceves, Crown College (1993)

Professor, Computer Engineering; Baskin Professor of Computer Engineering

B.S., Universidad Iberoamericana (Mexico City); M.S., Ph.D., University of Hawaii. Former affiliation: Stanford Research Institute International.

Ian Garrick-Bethell (2010)

Assistant Professor, Earth and Planetary Sciences

B.A., Wesleyan University; M.S., Ph.D., Massachusetts Institute of Technology.

Robert E. Garrison, Stevenson College (1968)

Professor Emeritus, Earth and Planetary Sciences

B.S., M.S., Stanford University; Ph.D., Princeton University. Former affiliations: University of California, Santa Barbara; University of British Columbia.

John C. Garza (2003)

Assistant Adjunct Professor, Ocean Sciences

Ph.D., University of California, Berkeley.

George D. Gaspari, Porter College (1967)

Professor Emeritus, Physics

B.S., DePaul University; Ph.D., University of California, Riverside. Former affiliation: University of Rochester.

Chelsea George (1989)

Physical Education Instructor

B.A., University of California, Santa Cruz.

Dietlind L. Gerloff (2006)

Assistant Professor, Biomolecular Engineering

Ph.D., Swiss Federal Institute of Technology, Zurich. Former affiliations: University of Edinburgh, Swiss National Science Foundation, Leukemia Society of America.

Raymond W. Gibbs, Jr., Cowell College (1982)

Professor, Psychology

B.A., Hampshire College; M.A., Ph.D., University of California, San Diego. Former affiliations: Yale University; Stanford University.

Margaret A. Gibson, Merrill College (1990)

Professor Emerita, Education

B.A., Wheaton College; M.Ed., Ph.D., University of Pittsburgh. Former affiliation: California State University, Sacramento.

Diane Gifford-Gonzalez, Merrill College (1976)

Professor, Anthropology

B.A., M.A., Ph.D., University of California, Berkeley. Former affiliation: University of Nevada.

Ricard Gil, College Ten (2004)

Assistant Professor, Economics

B.A., Universitat Pompeu Fabra, Spain; M.A., Ph.D. cand., University of Chicago. Former affiliations: University of Chicago; Universitat Pompeu Fabra.

Gregory S. Gilbert, College Eight (2000)

Professor, Environmental Studies

B.S., State University of New York, College of Environmental Science and Forestry; M.S., Ph.D., University of Wisconsin-Madison.

James B. Gill, Oakes College (1972)

Professor Emeritus, Earth and Planetary Sciences
B.S., Wheaton College; M.S., Franklin and Marshall College; Ph.D., Australian National University.

Susan Gillman, Oakes College (1986)
Professor, American Literature
A.B., Bryn Mawr College; Ph.D., University of California, Berkeley. Former affiliation: Rice University.

Viktor Ginzburg, College Eight (1996)
Professor, Mathematics
M.S., Moscow Institute of Steel and Alloys; Ph.D., University of California, Berkeley. Former affiliations: University of California, Berkeley; Princeton University; Stanford University.

Per F. Gjerde, College Nine (1989)
Professor Emeritus, Psychology
Cand. Psychol., University of Bergen (Norway); Ph.D., University of California, Berkeley. Former affiliation: University of California, Berkeley.

Ron Glass, College Ten (2005)
Associate Professor
A.B., Ed.M., Harvard University; C. Phil., UC Berkeley; M.A., Ph.D., Stanford University. Former affiliations: Arizona State University; UC Berkeley; Stanford University.

Gary A. Glatzmaier, Oakes College (1998)
Professor, Earth and Planetary Sciences
B.S., Marquette University; Ph.D., University of Colorado. Former affiliation: Los Alamos National Laboratory.

Shannon M. Gleeson (2008)
Assistant Professor, Latin American and Latino Studies
B.S., Santa Clara University; M.A., Ph.D., University of California, Berkeley.

Stephen R. Gliessman, College Eight (1980)
Alfred E. Heller Professor, Agroecology (Environmental Studies)
B.A., M.A., Ph.D., University of California, Santa Barbara. Former affiliation: Colegio Superior de Agricultura Tropical (Mexico).

Wlad B. Godzich, Cowell College (2000)
Professor, Literature
M.A., Ph.D., Columbia University. Former affiliations: Université de Genève; University of Toronto; University of Montreal; University of Minnesota; Yale University; Columbia University.

Lynda J. Goff, Crown College (1975)
Professor Emerita, Ecology and Evolutionary Biology
B.Sc., Western Oregon State College; Ph.D., University of British Columbia. Former affiliations: University of Washington, Friday Harbor Marine Station; University of British Columbia; U.S. Forest Service.

Robert A. Goff, Cowell College (1968)
Associate Professor Emeritus, Philosophy
B.A., Colgate University; Ph.D., Drew University. Former affiliations: Moravian College; Hamilton College.

Walter L. Goldfrank, College Eight (1968)
Professor Emeritus, Latin American and Latino Studies and Sociology
B.A., Harvard College; Certificate in Sociology, University of Madrid; Ph.D., Columbia University. Former affiliation: Columbia University.

Qi Gong (2008)
Assistant Professor, Applied Mathematics and Statistics
B.E., University of Science and Technology, China; M.E., Southeast University, China; Ph.D., Case Western Reserve University. Former affiliations: University of Texas at San Antonio; Naval Postgraduate School.

Jennifer A. González, Porter College (1997)
Associate Professor, History of Art and Visual Culture
B.A., Yale University; Ph.D., University of California, Santa Cruz. Former affiliation: Rhode Island School of Design.

Maria Victoria González-Pagani (1992)
Senior Lecturer, Spanish Language
B.A., M.A., Universidad Nacional de Tucuman (Argentina). Former affiliations: Northwestern University; University of Michigan; University of Illinois, Chicago.

David Goodman, College Eight (1990)
Professor Emeritus, Environmental Studies
B.Sc., London School of Economics and Political Science; Ph.D., University of California, Berkeley. Former affiliations: University College London; University of Manchester.

June A. Gordon, College Nine (1996)

Professor, Education
B.A., Stanford University; M.A., Western Washington University; Ph.D., University of Washington.
Former affiliation: University of Washington.

C. Aspen Gorry (2009)
Assistant Professor, Economics
B.S., Arizona State University; M.A., Ph.D., University of Chicago.

Susan Gorsky (2003)
Lecturer, Writing
A.B., Smith College; Ph.D., Case Western Reserve University.

Deborah B. Gould (2009)
Assistant Professor, Sociology
Ph.D., University of Chicago. Former affiliation: University of Pittsburg.

Shelly A. Grabe
Assistant Professor, Psychology
B.A., Michigan State University; Ph.D., University of Missouri-Columbia. Former affiliations:
University of Washington, University of Wisconsin-Madison.

Herman S. Gray, Stevenson College (1991)
Professor, Sociology
B.A., Florida A&M University; M.A., Washington State University; Ph.D., University of California,
Santa Cruz. Former affiliation: Northeastern University.

Barry L. Green (1996)
Lecturer, Music (String Bass)
B.M., Indiana University; M.M., University of Cincinnati, Conservatory of Music. Former affiliations:
University of Cincinnati; Indiana University.

Richard "Ed" Green (2010)
Assistant Professor, Biomolecular Engineering
B.S., University of Georgia, Athens; Ph.D., University of California, Berkeley. Former affiliation: Max
Planck Institute for Evolutionary Anthropology, Leipzig, Germany; University of California, Berkeley.

Marvin J. Greenberg, Stevenson College (1967)
Professor Emeritus, Mathematics
B.A., Columbia University; Ph.D., Princeton University. Former affiliations: Rutgers University;
University of California, Berkeley; Northeastern University.

Miriam B. Greenberg, College Ten (2006)
Associate Professor, Sociology
B.A., Eugene Lang College, The New School for Social Research; Ph.D., City University of New
York. Former affiliation: Department of Social Science and Cultural Studies, Pratt Institute.

Jody Greene, Kresge College (1998)
Associate Professor, Literature and Feminist Studies
B.A., Yale University; M.A., Ph.D., Cornell University. Former affiliations: Cornell University; Hobart
and William Smith Colleges.

Ronald E. Grieson, Crown College (1980)
Professor Emeritus, Economics
B.A., Queen's College; M.A., Ph.D., University of Rochester. Former affiliations: Massachusetts
Institute of Technology; Columbia University; Princeton University.

Gary B. Griggs, College Eight (1968)
Professor, Earth and Planetary Sciences; Director, Institute of Marine Sciences
B.A., University of California, Santa Barbara; Ph.D., Oregon State University. Former affiliation:
Oregon State University.

Martin Griss (2002)
Adjunct Professor, Computer Science
B.S., Technion, Haifa (Israel); M.S., University of Illinois. Former affiliations: Carnegie Mellon
University, West.

Kirsten S. Gruesz, Oakes College (1996)
Professor, Literature
B.A., Swarthmore College; Ph.D., Yale University. Former affiliation: College of William and Mary.

Isebill V. Gruhn, Stevenson College (1969)
Professor Emerita, Politics
B.A., Dickinson College; M.A., Johns Hopkins University; Ph.D., University of California, Berkeley.
Former affiliation: Oberlin College.

Claire X. Gu (1997)
Professor, Electrical Engineering
B.S., Fudan University (China); Ph.D., California Institute of Technology. Former affiliations:
Pennsylvania State University; Rockwell International Science Center.

Daniel E. Guevara, Cowell College (1991)
Associate Professor, Philosophy
B.A., California State University, Los Angeles; C.Phil., Ph.D., University of California, Los Angeles.

Puragra (Raja) GuhaThakurta (1994)
Professor, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory
B.Sc., St. Xavier's College (Calcutta, India); M.A., Ph.D., Princeton University.

Irene Gustafson, Porter College (2003)
Associate Professor, Film and Digital Media
B.A., Evergreen State College; M.F.A., Northwestern University. Former affiliation: Art Institute of Chicago.

Matthew R. Guthaus, Crown College (2006)
Assistant Professor, Computer Engineering
B.S.E., M.S.E., Ph.D., University of Michigan.

Julie H. Guthman, College Nine (2003)
Associate Professor, Community Studies
B.A., University of California, Santa Cruz; M.B.A., Ph.D., University of California, Berkeley. Former affiliation: University of California, Berkeley.

Gey-Hong Gweon (2006)
Assistant Professor, Physics
Ph.D., University of Michigan. Former affiliations: University of California, Berkeley; Lawrence Berkeley National Laboratory.

Melissa Gwyn, Porter College (2002)
Associate Professor, Art
B.A., Ohio State University; M.F.A., Yale University School of Art. Former affiliation: San Francisco Art Institute.

Lisbeth Haas, Merrill College (1986)
Professor, History
B.A., University of California, San Diego; Ph.D., University of California, Irvine.

Howard E. Haber, Stevenson College (1982)
Professor, Physics
S.B., S.M., Massachusetts Institute of Technology; Ph.D., University of Michigan.

Judith A. Habicht Mauche, Crown College (1990)
Professor, Anthropology
B.A., College of William and Mary; M.A., Ph.D., Harvard University. Former affiliation: School of American Research (Santa Fe).

Brent M. Haddad, College Eight (1997)
Professor, Environmental Studies
B.A., Stanford University; M.A., Georgetown University; M.B.A., Ph.D., University of California, Berkeley. Former affiliation: Monterey Institute of International Studies.

Steven H. Haddock (2005)
Associate Adjunct Professor, Ocean Sciences
Ph.D., University of California, Santa Barbara.

James B. Hall (1969)
Professor Emeritus, Literature
B.A., M.A., Ph.D., University of Iowa. Former affiliations: Miami University; Cornell University; University of Oregon; University of California, Irvine.

Gildas Hamel, Cowell College (1984)
Lecturer, French Language and Classical Studies
B.A., Université de Haute-Bretagne; Ph.D., University of California, Santa Cruz.

Roxanne Power Hamilton (2000)
Lecturer, Writing
B.A., University of Colorado; M.F.A., Cornell University.

Phillip L. Hammack, College Ten (2007)
Assistant Professor, Psychology
B.A., Georgetown University; M.A., Loyola University; Ph.D. cand., University of Chicago.

Todd M. Hammonds (2008)
Physical Education Instructor
B.S., M.S., Indiana University, Bloomington.

Craig W. Haney, Stevenson College (1977)
Professor, Psychology
B.A., University of Pennsylvania; M.A., Ph.D., J.D., Stanford University. Former affiliation: Stanford University.

Jorge Hankamer, Stevenson College (1980)

Professor, Linguistics
B.A., M.A., Rice University; Ph.D., Yale University. Former affiliation: Harvard University.

Robert W. Hansen (1977)
Physical Education Instructor
B.S., M.A., San Jose State University.

Hardy H. Hanson, Porter College (2000)
Professor Emeritus, Art
B.F.A., Yale University. Former affiliations: San Fernando Valley State College; University of Southern California.

Donna J. Haraway, Oakes College (1980)
Professor, History of Consciousness and Feminist Studies
B.A., Colorado College; M.Phil., Ph.D., Yale University. Former affiliations: University of Hawaii; Johns Hopkins University.

Susan F. Harding, Porter College (1989)
Professor, Anthropology
B.A., M.A., Ph.D., University of Michigan. Former affiliation: University of Michigan.

David M. Harrington, Stevenson College (1975)
Associate Professor Emeritus, Psychology
B.A., Macalester College; Ph.D., University of California, Berkeley. Former affiliations: University of California, Berkeley; Macalester College.

Grant A. Hartzog (1998)
Professor, Molecular, Cell, and Developmental Biology
B.A., University of California, Berkeley; Ph.D., University of California, San Francisco.

Amelie E. Hastie, Porter College (1999)
Associate Professor, Film and Digital Media
B.A., Brown University; M.A., Ph.D., University of Wisconsin-Milwaukee.

David Haussler, Crown College (1986)
Professor, Biomolecular Engineering; Director, Institute for Quantitative Biomedical Research
B.A., Connecticut College; M.S., California Polytechnic State University, San Luis Obispo; Ph.D., University of Colorado. Former affiliation: University of Denver.

John Hay, Porter College (1988)
Professor Emeritus, History of Art and Visual Culture
B.A., Oxford University; Ph.D., Princeton University. Former affiliations: Institute of Fine Arts, New York University; Harvard University.

Sean A. Hayes (2007)
Assistant Adjunct Professor, Ocean Sciences
Ph.D., University of California, Santa Cruz.

Barney Haynes (2009)
Lecturer, Digital Arts and New Media
M.F.A., California College of Arts and Crafts. Concurrent affiliation: California College of the Arts.

Charles W. Hedrick, Jr., Cowell College (1990)
Professor, History
B.A., Pitzer College; M.A., Ph.D., University of Pennsylvania. Former affiliation: State University of New York at Buffalo.

David P. Helmbold, College Eight (1986)
Professor, Computer Science
B.A., University of California, Berkeley; Ph.D., Stanford University.

Margo J. Hendricks, Cowell College (1990)
Professor Emerita, Literature
B.A., California State University, San Bernardino; M.A., Ph.D., University of California, Riverside.
Former affiliation: San Jose State University.

Gail B. Hershatler, Merrill College (1991)
Professor, History
B.A., Hampshire College; M.A., Ph.D., Stanford University. Former affiliation: Williams College.

Karlton E. Hester, Merrill College (2000)
Associate Professor, Music (Composition, Flute, and Saxophone)
B.M., University of Texas at El Paso; M.M., San Francisco State University; Ph.D., City University of New York Graduate Center. Former affiliation: Cornell University.

Clemens A. Heusch, Porter College (1969)
Professor Emeritus, Physics
Diploma, Technical University, Aachen; Ph.D., University of Munich. Former affiliations: California Institute of Technology; DESY, University of Hamburg.

Dee Hibbert-Jones, Porter College (2002)

Associate Professor, Art
B.A., London University, London; M.A., Durham University, Durham, England; M.A., York University, York, England; M.F.A., Mills College. Former affiliations: California College of Arts; Mills College.

Henry R. Hilgard, Kresge College (1967)
Professor Emeritus, Molecular, Cell, and Developmental Biology
B.A., Harvard University; M.D., Stanford University; Ph.D., University of Minnesota. Former affiliations: University of Minnesota; American Heart Association.

Lindsay Hinck (1998)
Professor, Molecular, Cell, and Developmental Biology
B.S., Western Washington University; M.S., University of California, Davis; Ph.D., Stanford University.

Ralph T. Hinegardner, Crown College (1967)
Professor Emeritus, Ecology and Evolutionary Biology
B.A., Denison University; M.S., University of Southern California; Ph.D., University of Hawaii. Former affiliations: University of Kentucky; Columbia University.

Miriam C. Hitchcock (1993)
Lecturer, Art
B.A., University of California, Santa Cruz; M.F.A., Yale University.

David A. Hoffman (1990)
Lecturer, Psychology
B.A., Reed College; M.S., Ph.D., University of Oregon.

Karen D. Holl, College Eight (1995)
Pepper-Giberson Professor, Environmental Studies
B.S., Stanford University; Ph.D., Virginia Polytechnic Institute and State University.

Eli E. Hollander, Porter College (1974)
Professor, Film and Digital Media
B.S., Juilliard School of Music; M.F.A., University of California, Los Angeles. Former affiliations: Encyclopaedia Britannica Films; Public Broadcasting Television Network (Los Angeles); Churchill Films; New York Philharmonic Orchestra.

Theodore R. Holman, Cowell College (1996)
Professor, Chemistry and Biochemistry
B.A., University of California, San Diego; Ph.D., University of Minnesota at Minneapolis. Former affiliations: Harvard Medical School; Syntex Pharmaceuticals; University of California, Riverside.

Christine Hong, Cowell College (2009)
Assistant Professor, Literature
B.A., University of California, Los Angeles; Ph.D., University of California, Berkeley.

Emily Honig, Kresge College (1992)
Professor, Feminist Studies and History
B.A., Brown University; M.A., Ph.D., Stanford University. Former affiliations: Yale University; Lafayette College.

Edward F. Houghton, Porter College (1970)
Professor Emeritus, Music
B.A., Rutgers University; M.A., University of Nevada; Ph.D., University of California, Berkeley. Former affiliations: University of California Education Abroad Program (Padua, Venice, Bologna); Rutgers University.

Jeremy K. Hourigan (2006)
Assistant Professor, Earth and Planetary Sciences
B.S., University of Vermont; Ph.D. Stanford University. Former affiliations: Yale University; University of California, Santa Barbara.

David C. Hoy, Cowell College (1981)
Professor Emeritus, Philosophy
B.A., Ph.D., Yale University. Former affiliations: Barnard College; Columbia University; University of California, Los Angeles; Princeton University; Yale University.

Jocelyn B. Hoy, Cowell College (1984)
Lecturer, Philosophy
M.Phil., Ph.D., Yale University. Former affiliation: Rider College.

Minghui Hu, College Eight (2005)
Assistant Professor, History
Ph.D., University of California, Los Angeles. Former affiliation: University of Chicago.

Richard P. Hughey, Crown College (1991)
Professor, Biomolecular Engineering and Computer Engineering
B.A., B.S., Swarthmore College; Sc.M., Ph.D., Brown University.

Akasha Hull, Kresge College (1988)

Professor Emerita, Feminist Studies and Literature

B.A., Southern University; M.A., Ph.D., Purdue University. Former affiliation: University of Delaware.

Fred A. Hunnicutt, Porter College (1969)

Professor Emeritus, Art

B.F.A., University of Texas; M.F.A., San Francisco Art Institute. Former affiliations: University of Texas at Arlington; Hornsey College of Art (London); Royal College of Art (London).

Donna M. Hunter, Porter College (1985)

Associate Professor, History of Art and Visual Culture

B.A., Vassar College; M.A., Ph.D., Harvard University. Former affiliation: Harvard University.

Aida Hurtado, Stevenson College (1983)

Professor, Psychology

B.A., Pan American University; M.A., Ph.D., University of Michigan, Ann Arbor. Former affiliation: Pan American University.

Harry D. Huskey (1968)

Professor Emeritus, Computer Science

B.S., University of Idaho; M.S., Ph.D., Ohio State University. Former affiliations: University of California, Berkeley; Institute for Numerical Analysis, National Bureau of Standards; Indian Institute of Technology (Kanpur); Delhi University; University of Pennsylvania; Association for Computing Machinery.

Greta K. Hutchison (1986)

Lecturer, French

B.A., M.A., University of Oregon, Eugene. Former affiliation: Cabrillo College.

Michael M. Hutchison, Cowell College (1985)

Professor, Economics

B.A., University of California, Santa Cruz; Ph.D., University of Oregon. Former affiliations: Federal Reserve Bank of San Francisco; University of Oregon; Institute for International Economic Studies, University of Stockholm.

Garth D. Illingworth, Crown College (1988)

Professor, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory

B.Sc., University of Western Australia; Ph.D., Australian National University. Former affiliations: Space Telescope Science Institute; University of California, Berkeley; Kitt Peak National Observatory; Johns Hopkins University.

Robert W. Irion (1988)

Senior Lecturer in Science Writing, Program Director

B.S., Massachusetts Institute of Technology; Graduate Certificate, University of California, Santa Cruz.

Michael S. Isaacson (2003)

Professor, Electrical Engineering; Narinder Singh Kapany Professor, Optoelectronics

B.S., University of Illinois, Urbana-Champaign; S.M., Ph.D., University of Chicago. Former affiliations: Brookhaven National Laboratory; University of Chicago; Cornell University.

John W. Isbister, Merrill College (1968)

Professor Emeritus, Economics

B.A., Queen's University (Canada); Ph.D., Princeton University.

Junko Ito, Stevenson College (1986)

Professor, Linguistics

B.A., M.A., International Christian University (Tokyo); Ph.D., University of Massachusetts-Amherst.

Kimberly M. Jannarone, Porter College (2001)

Assistant Professor, Theater Arts

B.A., Emory University; M.F.A., D.F.A., Yale School of Drama. Former affiliations: University of Washington; Smith College; Quinnipiac College.

Virginia Jansen, Cowell College (1975)

Professor Emerita, History of Art and Visual Culture

B.A., Smith College; M.A., Ph.D., University of California, Berkeley. Former affiliations: University of Santa Clara; Foothill College; Montreal Museum of Fine Arts.

Arnav Jhala (2009)

Assistant Professor, Computer Science

B.E., Gujarat University, India; M.S., Ph.D., North Carolina State University, Raleigh. Former affiliation: North Carolina State University, Raleigh.

Robert P. Johnson, Merrill College (1991)

Professor, Physics

B.S., University of Kansas; Ph.D., Stanford University. Former affiliations: PPE Division, CERN; University of Wisconsin-Madison.

Burton F. Jones, Crown College (1975)
Professor Emeritus, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory
B.S., M.S., Ph.D., University of Chicago.

Catherine A. Jones, Stevenson College (2007)
Assistant Professor, History
B.A., Haverford College; Ph.D., Johns Hopkins University. Former affiliation: Johns Hopkins University.

David Evan Jones, Porter College (1988)
Professor, Music; Provost, Porter College
B.A., M.A., Ph.D., University of California, San Diego. Former affiliations: Dartmouth College; University of York (England); University of California, San Diego.

John O. Jordan, Kresge College (1968)
Professor, English Literature
B.A., Princeton University; Ph.D., Stanford University.

Melissa S. Jurica, Oakes College (2003)
Assistant Professor, Molecular, Cell, and Developmental Biology
B.S., Montana State University; Ph.D., University of Washington, Fred Hutchinson Cancer Research Center. Former affiliation: Brandeis University.

Michael Kahn, Stevenson College (1970)
Professor Emeritus, Psychology
B.A., M.A., Ph.D., Harvard University. Former affiliations: Harvard University; Yale University; University of Texas.

Gretchen L. Kalonji (2005)
Professor, Electrical Engineering
B.S., Ph.D., Massachusetts Institute of Technology. Former affiliations: University of California, Office of the President; University of Washington; Max Planck Institut, Stuttgart, Germany; Massachusetts Institute of Technology; National Bureau of Standards.

Rohinton T. Kamakaka (2006)
Associate Professor, Molecular, Cell, and Developmental Biology
B.S., M.S., Poona University; Ph.D., Cambridge University; post-doctoral research, University of California, San Diego and University of California, Berkeley. Former affiliation: National Institutes of Health.

Stacy L. Kamehiro, Porter College (2002)
Assistant Professor, History of Art and Visual Culture
B.A., University of California, San Diego; M.A., Ph.D., University of California, Los Angeles. Former affiliation: University of Redlands.

Sheldon Kamieniecki, College Eight (2006)
Professor and Dean of Social Sciences
B.A., M.A., Ph.D., State University of New York at Buffalo. Former affiliation: University of Southern California.

Sung-Mo (Steve) Kang (2001)
Adjunct Professor, Electrical Engineering
B.S., Fairleigh Dickinson University; M.S., State University of New York at Buffalo; Ph.D., University of California, Berkeley. Former affiliations: University of Illinois, Urbana-Champaign; Swiss Federal Institute of Technology; University of Karlsruhe; Technical University of Munich.

Kevin Karplus, Cowell College (1986)
Professor, Biomolecular Engineering
B.S., Michigan State University; M.S., Ph.D., Stanford University. Former affiliation: Cornell University.

S. Paul Kashap, Cowell College (1969)
Professor Emeritus, Philosophy
B.A., M.A., University of Bombay; M.A., Edinburgh University; B.Litt., Oxford University. Former affiliations: Brown University; Wheaton College.

Yonatan Katznelson
Lecturer, Mathematics, Economics, and Applied Mathematics and Statistics
B.Sc., Hebrew University, M.Sc., Ph.D., Stanford University. Former affiliations: Institut des Hautes Etudes Scientifiques, France; University of Maryland, College Park.

David E. Kaun, Crown College (1966)
Professor, Economics
B.S., Arizona State University; M.A., Claremont Graduate School; Ph.D., Stanford University. Former affiliations: University of Pittsburgh; Brookings Institution.

Alan H. Kawamoto, Crown College (1986)
Associate Professor, Psychology
B.S., Stanford University; Ph.D., Brown University. Former affiliation: Carnegie Mellon University.

Kathleen M. Kay (2008)

Assistant Professor, Ecology and Evolutionary Biology
B.S., University of California, Davis; Ph.D., Michigan State University. Former affiliations: University of California, Santa Barbara; University of California, Berkeley.

David L. Keenan (2000)

Lecturer, Chinese Language

B.A., Dartmouth College; M.A., Ph.D., Harvard University. Former affiliations: Indiana University; Grinnell College; Colby College.

Al Kelley, Stevenson College (1966)

Professor Emeritus, Mathematics

B.S., University of Montana; M.A., Ph.D., University of California, Berkeley. Former affiliations: Institute for Advanced Study (Princeton); National Academy of Sciences Exchange Fellowship to the USSR.

Douglas Kellogg (1995)

Professor, Molecular, Cell, and Developmental Biology

B.A., University of Wisconsin-Madison; Ph.D., University of California, San Francisco.

Peter Kenez, Stevenson College (1966)

Professor, History; Neufeld Levin Professor, Holocaust Studies

B.A., Princeton University; M.A., Ph.D., Harvard University. Former affiliations: Oxford University; Massachusetts Institute of Technology.

Hi Kyung Kim, Porter College (1992)

Professor, Music

B.A., Seoul National University (Korea); M.A., Ph.D., University of California, Berkeley; D.E.A., IRCAM and Ecole Normale Supérieure (Paris). Concurrent affiliation: Pacific Rim Music Festival. Former affiliation: San Francisco State University.

L. S. Kim, Porter College (2002)

Associate Professor, Film and Digital Media

B.A., Smith College; M.A., Ph.D., University of California, Los Angeles. Former affiliation: Northwestern University.

Julie H. Kimball (1983)

Physical Education Instructor

B.A., University of California, Santa Cruz. Former affiliation: Ramani Iyengar Yoga Institute (India).

James C. King (2008)

Adjunct Professor, Computer Science

B.A., M.A., Washington State University; Ph.D., Carnegie Mellon University.

Robin Y. King (1997)

Lecturer, Writing

B.A., M.F.A., University of California, San Diego.

Russell L. Kingon (2000)

Physical Education Instructor

B.S., Clemson University.

Sharon A. Kinoshita, Oakes College (1987)

Professor, Literature

A.B., M.A., Ph.D., University of California, Berkeley. Former affiliation: Stanford University.

Norma Klahn, Merrill College (1989)

Professor, Literature

B.A., M.A., Queens College, City University of New York; Ph.D., State University of New York at Stony Brook. Former affiliation: Columbia University.

Kenneth M. Kletzer, Stevenson College (1992)

Professor, Economics

B.S., Stanford University; M.S., University of Washington; Ph.D., University of California, Berkeley. Former affiliations: University of California, Davis; Yale University.

Lori G. Kletzer, Merrill College (1993)

Professor, Economics

B.A., Vassar College; Ph.D., University of California, Berkeley. Former affiliation: Williams College.

Robert Klevan (1998)

Lecturer, Music (Wind Ensemble)

B.M., M.M., University of the Pacific; Ph.D., University of Texas at Austin. Concurrent affiliation: Monterey Peninsula College.

David S. Kliger, Oakes College (1971)

Professor, Chemistry and Biochemistry; Campus Provost and Executive Vice Chancellor

B.S., Rutgers University; Ph.D., Cornell University. Former affiliation: Harvard University.

Elise Knittle, Kresge College (1988)

Professor, Earth and Planetary Sciences
A.B., Smith College; Ph.D., University of California, Berkeley.

Nobuhiko P. Kobayashi (2007)

Associate Professor, Electrical Engineering
B.S., Aoyama Gakuin University, Japan; M.S., Ph.D., University of California, Los Angeles. Former affiliations: Hewlett-Packard; University of California, Berkeley.

Paul L. Koch, Crown College (1996)

Professor, Earth and Planetary Sciences
B.A., University of Rochester; M.S., Ph.D., University of Michigan. Former affiliations: Smithsonian Institution; Carnegie Institution of Washington; Princeton University.

Phokion Kolaitis, College Eight (1988)

Professor, Computer Science
Diploma, University of Athens; M.A., Ph.D., University of California, Los Angeles. Former affiliations: Stanford University; Occidental College; University of Chicago.

Joseph P. Konopelski, Stevenson College (1984)

Professor, Chemistry and Biochemistry
B.A., M.A., Johns Hopkins University; Ph.D., Stanford University. Former affiliations: Université Louis Pasteur (Strasbourg); University of Pennsylvania.

David C. Koo, College Eight (1988)

Professor, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory
A.B., Cornell University; M.A., Ph.D., University of California, Berkeley. Former affiliation: Space Telescope Science Institute.

Athanasios Kottas (2002)

Associate Professor, Applied Mathematics and Statistics
B.Sc., M.Sc., University of Ioannina (Greece); Ph.D., University of Connecticut. Former affiliation: Duke University.

Robert P. Kraft, Stevenson College (1967)

Professor Emeritus, Astronomy and Astrophysics; Astronomer Emeritus, UC Observatories/Lick Observatory
B.S., M.S., University of Washington; Ph.D., University of California, Berkeley.

Mark Krumholz (2008)

Assistant Professor, Astronomy and Astrophysics
B.A., Princeton University; M.A., Ph.D., University of California, Berkeley.

Nancy Krusoe (2002)

Lecturer, Crown College Writing Coordinator, Writing
B.A., Georgia State University, Atlanta; M.A., California State University Northridge. Former affiliation: California State University, Northridge.

Joel A. Kubby (2005)

Associate Professor, Electrical Engineering
B.A., University of California, Berkeley; M.S., Ph.D., Cornell University. Former affiliation: Xerox Corporation.

Raphael M. Kudela (1999)

Professor, Ocean Sciences
B.S., Drake University; Ph.D., University of Southern California. Concurrent affiliation: Monterey Bay Aquarium Research Institute.

Sri H. Kurniawan (2007)

Assistant Professor, Computer Engineering
B.S., Satya Wacana University; M.S., Hong Kong University of Science and Technology; Ph.D., Wayne State University. Former affiliation: University of Manchester.

Frederick H. Kuttner (1996)

Lecturer, Physics
B.S., Massachusetts Institute of Technology; M.B.A., Santa Clara University; M.S., Ph.D., University of California, Santa Cruz. Former affiliations: Litton Industries; Northwestern Polytechnic University.

William A. Ladusaw, Cowell College (1984)

Professor, Linguistics; Dean, Humanities
B.A., University of Kentucky; M.A., Ph.D., University of Texas at Austin. Former affiliations: University of Connecticut; University of California, Los Angeles; University of Iowa.

Edward M. Landesman, Crown College (1966)

Professor Emeritus, Mathematics
B.A., M.A., Ph.D., University of California, Los Angeles. Former affiliation: University of California, Los Angeles.

Glen G. Langdon (1987)

Professor Emeritus, Computer Engineering
B.S., Washington State University; M.S., University of Pittsburgh; Ph.D., Syracuse University.

Former affiliations: IBM Research; University of São Paulo.

Jean H. Langenheim, Stevenson College (1966)
Professor Emerita, Ecology and Evolutionary Biology
B.S., University of Tulsa; M.S., Ph.D., University of Minnesota. Former affiliations: Harvard University; University of California, Berkeley; University of Illinois, Urbana-Champaign; San Francisco College for Women; Mills College.

Regina D. Langhout (2006)
Associate Professor, Psychology
B.A., University of California, Santa Cruz; A.M., Ph.D., University of Illinois. Former affiliations: Wesleyan University; University of San Diego.

Leo F. Laporte, Crown College (1971)
Professor Emeritus, Earth and Planetary Sciences
B.A., Ph.D., Columbia University. Former affiliation: Brown University.

Bruce D. Larkin, Cowell College (1965)
Professor Emeritus, Politics
B.A., University of Chicago; M.A., Ph.D., Harvard University.

Tracy Larrabee, College Eight (1990)
Professor, Computer Engineering
B.S., California Institute of Technology; M.S., Ph.D., Stanford University. Former affiliations: Hewlett-Packard Laboratories; Xerox PARC; Digital Equipment Corporation.

Matthew Lasar (2003)
Lecturer, History
Ph.D., Claremont Graduate University. Former affiliation: University of California, Riverside.

Kimberly J. Lau (2006)
Professor, American Studies; Provost, Oakes College
B.A., M.L.I.S., University of California, Berkeley; Ph.D., University of Pennsylvania. Former Affiliation: University of Utah.

Gregory P. Laughlin (2001)
Associate Professor, Astronomy and Astrophysics
B.S., University of Illinois, Urbana-Champaign; M.S., Ph.D., University of California, Santa Cruz. Former affiliation: NASA Ames Research Center.

Kenneth Laws (2008)
Assistant Adjunct Professor, Electrical Engineering
B.S., San Francisco State University; M.S., Ph.D., University of California, Santa Cruz. Former affiliation: University of Michigan.

Thorne Lay, Porter College (1989)
Professor, Earth and Planetary Sciences
B.S., University of Rochester; M.S., Ph.D., California Institute of Technology. Former affiliations: University of Michigan, Ann Arbor; California Institute of Technology.

John Jota Leaños (2009)
Assistant Professor, Social Documentation
M.F.A., San Francisco State University. Former affiliations: California College of the Arts; Arizona State University.

Campbell Leaper, Cowell College (1988)
Professor, Psychology
B.A., Boston University; M.A., Ph.D., University of California, Los Angeles. Former affiliations: Harvard Medical School; California State University, Northridge; California State University, Long Beach.

Burney J. Leboeuf, Crown College (1967)
Professor Emeritus, Ecology and Evolutionary Biology
B.A., University of California, Berkeley; M.A., San Francisco State College; Ph.D., University of California, Berkeley. Former affiliations: University of California, Davis; Harvard University.

Herbert K. Lee, College Nine (2002)
Professor, Applied Mathematics and Statistics
B.S., Yale University; M.S., Ph.D., Carnegie Mellon University. Former affiliation: Duke University.

Jimin Lee, Porter College (2003)
Associate Professor, Art
B.F.A., M.F.A., Seoul National University (Korea); M.F.A., San Francisco Art Institute. Former affiliation: California State University, Hayward.

H. Marshall Leicester, Jr., Cowell College (1967)
Professor, English Literature
B.A., M.A., Ph.D., Yale University. Former affiliation: Yale University.

Anatole Leikin, Porter College (1989)

Professor, Music
B.A., Gnesin State Conservatory (Moscow); M.A., Gnesin State Musical and Pedagogical Institute (Moscow); Ph.D., University of California, Los Angeles. Former affiliations: Gnesin State Conservatory; University of California, Los Angeles.

Deborah K. Letourneau, College Eight (1984)
Professor, Ecology (Environmental Studies)
B.S., M.S., University of Michigan; Ph.D., University of California, Berkeley.

Bruce C. Levine (1997)
Professor Emeritus, History
B.A., University of Michigan, Ann Arbor; M.A., Ph.D., University of Rochester. Former affiliation: University of Cincinnati.

Robert A. Levinson, Stevenson College (1985)
Professor, Computer Science
B.S., University of Minnesota at Minneapolis-St. Paul; Ph.D., University of Texas at Austin. Former affiliations: University of Texas at Austin; University of Minnesota.

Danielle Lewis (2002)
Physical Education Instructor
B.S., Rutgers University, M.S., Oregon State University.

Debra K. Lewis, Crown College (1991)
Professor, Mathematics
B.A., Ph.D., University of California, Berkeley. Former affiliation: University of Minnesota.

Diane K. Lewis (1972)
Professor Emerita, Anthropology
B.A., M.A., University of California, Los Angeles; M.P.H., University of California, Berkeley; Ph.D., Cornell University. Former affiliations: University of California, Santa Barbara; University of California, Riverside; San Francisco State University.

Yat Li, Crown College (2007)
Assistant Professor, Chemistry
B.Sc., University of Hong Kong; Ph.D., University of Hong Kong.

Fredric Lieberman, Porter College (1983)
Professor, Music
B.M., Eastman School of Music; M.A., University of Hawaii; Ph.D., University of California, Los Angeles. Former affiliations: Brown University; University of Washington.

Peter E. Limbrick, Porter College (2001)
Associate Professor, Film and Digital Media
B.A., M.A., University of Otago (New Zealand); Ph.D., La Trobe University (Australia). Former affiliations: Duke University; Stanford University; University of California, Berkeley.

Douglas N. Lin, Crown College (1979)
Professor, Astronomy and Astrophysics
B.S., McGill University; Ph.D., Cambridge University. Former affiliation: Harvard University.

Daniel T. Linger, Stevenson College (1983)
Professor Emeritus, Anthropology
B.A., University of Michigan; M.A., Ph.D., University of California, San Diego. Former affiliation: University of California, San Diego.

Roger G. Linington, Crown College (2007)
Assistant Professor, Chemistry and Biochemistry
B.Sc., University of Leeds, United Kingdom; Ph.D., University of British Columbia, Canada.

Ronnie D. Lipschutz, Stevenson College (1990)
Professor, Politics
B.A., B.S., University of Texas at Austin; M.S., Massachusetts Institute of Technology; Ph.D., University of California, Berkeley.

Alan M. Litke (1984)
Adjunct Professor, Physics
B.A., Johns Hopkins University; M.A., Ph.D., Harvard University.

Wentai Liu (2003)
Professor, Electrical Engineering
B.S., National Chiao-Tung University; M.S., National Taiwan University; Ph.D., University of Michigan, Ann Arbor. Former affiliation: North Carolina State University, Raleigh.

Norman Locks, Porter College (1977)
Professor, Art
B.F.A., San Francisco Art Institute; M.A., San Francisco State University.

Suresh K. Lodha, Porter College (1992)
Professor, Computer Science

M.Sc., Indian Institute of Technology (Kanpur); M.A., University of California, Berkeley; Ph.D., Rice University. Former affiliation: IBM.

Michael E. Loik (1998)

Associate Professor, Environmental Studies

B.Sc., M.Sc., University of Toronto; Ph.D. University of California, Los Angeles. Former affiliations: University of California, Berkeley; California State University, San Bernardino.

Robert S. Lokey (2002)

Assistant Professor, Chemistry and Biochemistry

B.S., Trinity University (San Antonio); Ph.D., University of Texas at Austin.

Amy J. Lonetree, Oakes College (2007)

Assistant Professor, American Studies

B.A., University of Minnesota; M.A., University of Chicago; M.A., Indiana University; Ph.D., University of California, Berkeley.

Darrell D. Long, Crown College (1988)

Professor, Computer Science

B.S., San Diego State University; M.S., Ph.D., University of California, San Diego.

Charles L. (Chip) Lord, Porter College (1987)

Professor, Film and Digital Media

B.A., M.Arch., Tulane University. Former affiliation: University of California, San Diego.

Murray K. Low (2008)

Lecturer, Music, (Jazz Theory)

B.S.E.E., University of California, Berkeley. Former affiliations: Stanford University, University of California, Berkeley.

Todd M. Lowe (2001)

Associate Professor, Biomolecular Engineering

B.A., Williams College; Ph.D., Washington University.

Flora E. Lu, Merrill College (2008)

Assistant Professor, Latin American and Latino Studies

A.B., Stanford University; Ph.D., University of North Carolina at Chapel Hill. Former affiliations: University of North Carolina at Chapel Hill; Stanford University.

Paul M. Lubeck, College Eight (1973)

Professor, Sociology

B.A., St. Michael's College; M.A., Ph.D., Certificate in African Studies, Northwestern University.

Robert A. Ludwig, Crown College (1979)

Professor, Molecular, Cell, and Developmental Biology

B.S., University of Michigan; Ph.D., Yale University. Former affiliation: Massachusetts Institute of Technology.

Brij Lunine (2000)

Lecturer, Writing

Ph.D., University of New Mexico. Former affiliation: Georgiana Bruce Kirby Preparatory School.

Irene E. Lusztig, Porter College (2008)

Assistant Professor, Film and Digital Media

B.A., Harvard University; M.F.A., Bard College. Former affiliations: Harvard University; State University of New York at Purchase; Temple University.

Boreth J. Ly, Porter College (2008)

Assistant Professor, History of Art and Visual Culture

B.A., Bates College, Lewiston, Maine; Ph.D., University of California, Berkeley.

John P. Lynch, Cowell College (1970)

Professor Emeritus, Classics (Literature)

B.A., Harvard College; M.A., M.Phil., Ph.D., Yale University.

Jennifer K. Lynn (2010)

Lecturer, Greek and Latin Language

A.B., Ph.D., Columbia University. Former affiliations: The Hotchkiss School, The Berkeley Carroll School, Oberlin College, Princeton University, Columbia University.

Bruce E. Lyon (1997)

Professor, Ecology and Evolutionary Biology

B.Sc., McGill University; M.Sc., Queen's University; Ph.D., Princeton University.

R. Bruce MacFarlane (2005)

Adjunct Professor, Ecology and Evolutionary Biology

B.S., Pennsylvania State University; M.S., Ph.D., Florida State University. Former affiliation: National Oceanic and Atmospheric Administration (NOAA).

Pavel Machotka, Porter College (1970)

Professor Emeritus, Psychology
B.A., University of Chicago; M.A., Ph.D., Harvard University; (Hon.) Dr. h. c., Charles University (Prague). Former affiliations: Harvard University; University of Colorado.

Nathaniel E. Mackey, Kresge College (1979)

Professor, Literature

B.A., Princeton University; Ph.D., Stanford University. Former affiliations: University of Southern California; University of Wisconsin-Madison.

Wesley F. Mackey (1993)

Lecturer, Computer Science

B.S., M.S., Ph.D., University of Manitoba.

Piero Madau (2000)

Professor, Astronomy and Astrophysics

B.S., University of Florence; Ph.D., International School for Advanced Studies (Trieste). Former affiliation: Cambridge University.

Patrice Maginnis, Cowell College (1986)

Lecturer, Music (Voice)

B.A., M.A., San Jose State University. Former affiliations: San Jose State University; De Anza College; Opera San Jose.

Roy T. Malan (1980)

Lecturer, Music (Violin and Viola)

Diplomas, Royal Academy of Music, Juilliard School of Music, and Curtis Institute of Music.

Concurrent affiliations: San Francisco Ballet Orchestra; San Francisco Contemporary Music Players; Telluride Chamber Music Festival; Rocky Ridge Music Center. Former affiliations: Ithaca College; San Francisco Conservatory of Music; San Francisco State University; University of Nevada at Reno; Stanford University.

Carlos G. Maltzahn (2006)

Assistant Adjunct Professor, Computer Science

Ph.D., Computer Science, University of Colorado at Boulder; Diplom-Informatiker, University of Passau, Germany. Former Affiliations: NetApp; Digital Equipment Corporation.

Roberto Manduchi (2001)

Associate Professor, Computer Engineering

Laurea, Dottorato di ricerca, University of Padova (Italy). Former affiliation: University of Southern California.

Marc S. Mangel, Stevenson College (1996)

Professor, Information Systems Management

B.S., M.S., University of Illinois; Ph.D., University of British Columbia. Former affiliations: University of California, Davis; Simon Fraser University; University of Oxford; Hebrew University of Jerusalem; Weizmann Institute of Science.

Patrick E. Mantey, Merrill College (1984)

Jack Baskin Professor, Computer Engineering

B.S., University of Notre Dame; M.S., University of Wisconsin; Ph.D., Stanford University. Former affiliations: Stanford University; IBM Research.

John A. Marcum, Merrill College (1969)

Professor Emeritus, Politics; Universitywide Director, Education Abroad Program, University of California, Santa Barbara

B.A., Stanford University; M.A., Columbia University; Ph.D., Stanford University. Former affiliations: Colgate University; Lincoln University; University of Pennsylvania; University of Denver.

Bruce H. Margon, Crown College (2006)

Professor of Astronomy and Astrophysics; Vice Chancellor, Research

A.B., Columbia University; M.S., Ph.D., University of California, Berkeley. Former affiliation: Space Telescope Science Institute.

Baldo B. Marinovic (1996)

Lecturer

Ph.D., University of Western Australia.

Justin Marion (2005)

Assistant Professor, Economics

B.B.A., B.S., Southern Methodist University; Ph.D., University of Chicago. Former affiliation: University of Chicago.

David S. Marriott, Oakes College (2003)

Associate Professor, History of Consciousness

B.A. (Hons., 1st class), M.A., Ph.D., University of Sussex. Former affiliation: University of London.

George E. Marsh (1982)

Lecturer, Music (Percussion)

Concurrent affiliation: Sonoma State University. Former affiliation: San Francisco Conservatory.

Alma R. Martinez, Kresge College (2001)
Professor Emerita, Theater Arts (Acting)
B.A., Whittier College; M.F.A., University of Southern California; Ph.D., Stanford University. Former affiliations: Aquarius Theater; El Teatro Campesino; Universal Studios.

Lourdes Martínez-Echazábal, Merrill College (1990)
Associate Professor, Latin American Literature; Provost, Merrill College
B.A., M.A., Ph.D., University of California, San Diego. Former affiliation: Rutgers University.

Pradip Mascharak, Oakes College (1984)
Professor, Chemistry and Biochemistry
B.S., M.S., University of Burdwan (India); Ph.D., Indian Institute of Technology (Kanpur). Former affiliations: Stanford University; Massachusetts Institute of Technology.

Geoffrey Mason, Kresge College (1973)
Professor, Mathematics
B.Sc., University of London; M.S., Ph.D., University of Illinois, Chicago.

Dominic W. Massaro, Porter College (1979)
Professor Emeritus, Psychology
B.A., University of California, Los Angeles; M.A., Ph.D., University of Massachusetts. Former affiliation: University of Wisconsin.

Mark Fathi Massoud, Merrill College (2009)
Assistant Professor, Politics
B.A., M.A., University of Notre Dame; J.D., Ph.D., University of California, Berkeley. Former affiliation: Stanford University.

Terry Mast (2006)
Research Astronomer, Astronomy and Astrophysics
B.S., California Institute of Technology; Ph.D., University of California, Berkeley.

Michael J. Mateas (2006)
Associate Professor, Computer Science
B.S., University of the Pacific; M.S., Portland State University; Ph.D., Carnegie Mellon University. Former affiliation: The Georgia Institute of Technology.

Richard S. Mather, Cowell College (1965)
Professor Emeritus, History
B.A., M.A., Ph.D., University of California, Berkeley.

Andrew S. Mathews, College Eight (2007)
Assistant Professor, Anthropology
B.Sc.; M.Sc., M.Phil., Ph.D., Florida International University.

William G. Mathews, Porter College (1970)
Professor Emeritus, Astronomy and Astrophysics
B.S., University of Washington; M.S., University of Chicago; Ph.D., University of California, Berkeley. Former affiliation: University of California, San Diego.

Dean P. Mathiowetz, Merrill College (2003)
Assistant Professor, Politics
B.A., University of Minnesota; M.A., Ph.D., University of California, Berkeley.

Claire E. Max (1999)
Professor, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory
A.B., Harvard University; Ph.D., Princeton University.

Melanie J. Mayer, Cowell College (1972)
Professor Emerita, Psychology
A.B., Cornell University; M.A., University of Wisconsin-Madison; Ph.D., University of California, San Diego.

Phillip McCalman, Crown College (1999)
Associate Professor, Economics
B.Comm., M.Comm., University of Melbourne; Ph.D., University of Wisconsin-Madison. Former affiliation: Australian National University.

Matthew D. McCarthy (2001)
Assistant Professor, Ocean Sciences
B.S., University of California, San Diego; Ph.D., University of Washington. Former affiliation: Carnegie Institution of Washington; University of Hawaii.

Douglas E. McClellan, Porter College (1970)
Professor Emeritus, Art
M.F.A., Claremont Graduate School. Former affiliations: Chaffey College; Otis Art Institute; Scripps College; Claremont Graduate School.

James McCloskey, Stevenson College (1988)
Professor, Linguistics
B.A., University College Dublin; Ph.D., University of Texas at Austin. Former affiliations: University

College Dublin; Dublin Institute for Advanced Studies; University of Texas at Austin.

Jennie L. McDade, Porter College (1987)
Professor Emerita, Art
B.F.A., University of Southern Mississippi; M.F.A., University of Georgia.

Charles E. McDowell, Porter College (1985)
Professor, Computer Science
B.S., California Polytechnic State University, San Luis Obispo; M.S., Ph.D., University of California, San Diego. Former affiliations: University of California, San Diego; Lawrence Livermore National Laboratory; Digital Equipment Corporation.

Dennis C. McElrath, Stevenson College (1965)
Professor Emeritus, Sociology
B.A., University of California, Santa Barbara; M.A., University of California, Los Angeles; Ph.D., Yale University. Former affiliations: University of Southern California; Northwestern University; University of California Education Abroad Program (Padua).

Grant L. McGuire, Stevenson College (2009)
Assistant Professor, Linguistics
B.A., University of Illinois, Urbana-Champaign; M.A., Ph.D., Ohio State University. Former affiliation: University of California, Berkeley.

Steven McKay, College Nine (2007)
Associate Professor, Sociology
B.A., University of California, Berkeley; M.A., Ph.D., University of Wisconsin-Madison.

Patrick M. McKercher, College Eight (1995)
Lecturer, Writing
B.A., M.A., San Diego State University; Ph.D., University of British Columbia.

Barry S. McLaughlin, Merrill College (1966)
Professor Emeritus, Psychology
B.A., M.S., St. Louis University; Ph.D., Harvard University. Former affiliation: University of California Education Abroad Program (Göttingen).

Kenneth McLaughlin (2008)
Lecturer in Science Writing, Science Communication
B.A., State University of New York at Albany; M.A., Stanford University.

Karen C. McNally, Kresge College (1981)
Professor Emerita, Earth and Planetary Sciences
B.A., M.A., Ph.D., University of California, Berkeley. Former affiliation: California Institute of Technology.

Martha Mendoza (2002)
Lecturer in Science Writing
B.A., Universal Technical Institute, Phoenix.

Rita Mehta (2010)
Assistant Professor, Ecology and Evolutionary Biology
B.S., B.A., University of California, Berkeley; M.S., University of Texas, Tyler; Ph.D., University of Tennessee, Knoxville. Former affiliation: University of California, Davis.

Tanya H. Merchant, Porter College (2007)
Assistant Professor, Music
B.M., The Peabody Institute's Conservatory, Johns Hopkins University; M.Mus., Goldsmiths College, University of London; Ph.D., University of California, Los Angeles.

R. Armin Mester, Stevenson College (1989)
Professor, Linguistics
Staatsexamen, University of Göttingen (Germany); Ph.D., University of Massachusetts-Amherst.

Kathryn E. Metz, Porter College (1971)
Professor Emerita, Art
B.F.A., Bowling Green State University; M.A., University of California, Los Angeles. Former affiliations: New York University; College of St. Benedict; St. John's University.

Jacob B. Michaelsen, Crown College (1965)
Professor Emeritus, Economics
B.A., M.B.A., Ph.D., University of Chicago. Former affiliation: University of California, Berkeley.

Edward T. Migliore (1986)
Lecturer, Mathematics
B.A., Rutgers University; M.A., Ph.D., University of California, Santa Cruz. Former affiliation: Monterey Peninsula College.

Peyman Milanfar (1999)
Professor, Electrical Engineering
B.S., University of California, Berkeley; Ph.D., Massachusetts Institute of Technology. Former

affiliation: Stanford Research Institute International.

Gary B. Miles, Cowell College (1971)

Professor Emeritus, History

B.A., Colby College; M.A., Harvard University; Ph.D., Yale University. Former affiliations: Phillips Academy; Wesleyan University; University of Texas.

Ethan L. Miller, Crown College (2000)

Professor, Computer Science

Sc.B., Brown University; M.S., Ph.D., University of California, Berkeley. Former affiliation: University of Maryland, Baltimore County.

Joseph S. Miller, Crown College (1967)

Professor Emeritus, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory

B.A., University of California, Los Angeles; M.S., Ph.D., University of Wisconsin.

Leta E. Miller, Porter College (1978)

Professor, Music (Music History and Flute)

B.A., Stanford University; M.Mus., Hartt College of Music, University of Hartford; Ph.D., Stanford University. Former affiliations: Foothill College; Hartt College of Music.

Mary K. Miller

Lecturer in Science Writing

B.A., University of California, Santa Cruz.

Tyrus H. Miller, Cowell College (1999)

Professor, Literature; Vice Provost and Dean, Graduate Studies

B.A., M.A., M.A., Johns Hopkins University; Ph.D., Stanford University.

Glenn L. Millhauser, Cowell College (1988)

Professor, Chemistry and Biochemistry

B.S., California State University, Los Angeles; M.S., Ph.D., Cornell University.

Marcia Millman, Stevenson College (1971)

Professor, Sociology

B.A., Ph.D., Brandeis University.

Dejan Milutinovic (2009)

Assistant Professor, Applied Mathematics and Statistics

Diplom-Ingenieur and M.S., University of Belgrade, Yugoslavia; Ph.D., Technical University of Lisbon, Portugal. Former affiliations: Army Research Office; Duke University; Utrecht University, The Netherlands.

Natalio Mingo (2007)

Associate Adjunct Professor, Electrical Engineering

M.S., Ph.D., Universidad Autonoma de Madrid. Former affiliations: CEA-Grenoble; Himeji Institute of Technology.

Patricia L. Mitchell (2002)

Lecturer, Music (Oboe)

B.M., San Jose State University.

Richard R. Mitchell (1983)

Lecturer, Mathematics

B.A., M.A., Ph.D., University of California, Santa Cruz.

Helene Moglen, Kresge College (1978)

Professor Emerita, Literature

B.A., Bryn Mawr College; M.A., Ph.D., Yale University. Former affiliations: State University of New York at Purchase; New York University.

Kivie Moldave(1984)

Professor Emeritus, Molecular, Cell, and Developmental Biology

B.A., University of California, Berkeley; M.S., Ph.D., University of Southern California. Former affiliations: Tufts University; University of Pittsburgh; University of California, Irvine.

J. Cameron Monroe (2006)

Assistant Professor, Anthropology

Ph.D., University of California, Los Angeles. Former affiliation: Washington University, St. Louis.

Richard Montgomery, Crown College (1990)

Professor, Mathematics

B.A., Sonoma State University; Ph.D., University of California, Berkeley. Former affiliation: Massachusetts Institute of Technology.

Megan C. Moodie (2009)

Assistant Professor, Anthropology

B.A., Skidmore College; Ph.D., University of California, Santa Cruz.

Andrew M. Moore, Oakes College (2006)

Professor, Ocean Sciences
D.Phil., University of Oxford, England. Former affiliation: University of Colorado.

J. Casey Moore, Crown College (1970)
Professor Emeritus, Earth and Planetary Sciences
B.A., University of California, Santa Barbara; Ph.D., Princeton University.

Jonathan W. Moore (2008)
Assistant Professor, Ecology and Evolutionary Biology
B.A., Carleton College; Ph.D., University of Washington. Former affiliation: National Marine Fisheries Service.

Madeline R. Moore, Kresge College (1972)
Professor Emerita, English Literature
B.S., Ph.D., University of Texas at Austin. Former affiliation: University of Texas at Austin.

Cynthia A. Mori (1983)
Physical Education Instructor
B.A., M.A., California State University, Long Beach. Former affiliation: Saddleback College.

Eugene Moriarty (2006)
Visiting Professor, Computer Engineering
B.S., M.S., University of Illinois; Ph.D., Illinois Institute of Technology. Former affiliation: San Jose State University.

Maria D. Morris, Merrill College (1989)
Lecturer, Spanish Language
B.A., Santa Clara University; M.A., University of Texas. Former affiliations: Santa Clara University; Cabrillo College.

Robin D. Morris (2008)
Associate Adjunct Professor, Applied Mathematics and Statistics
M.A., Ph.D., Cambridge University. Former affiliation: Universities Space Research Association.

Margaret E. Morse, Porter College (1991)
Professor, Film and Digital Media
B.A., Humboldt State University; M.A., Ph.D., University of California, Berkeley. Former affiliations: San Francisco State University; University of San Francisco; University of Southern California.

Judit N. Moschkovich, Crown College (1999)
Associate Professor, Education
B.S., University of Minnesota; M.A., Ph.D., University of California, Berkeley. Former affiliations: TORC, Cambridge, Massachusetts; Institute for Research on Learning, Menlo Park, California.

Eduardo Mosqueda, College Ten (2007)
Assistant Professor, Education
B.A., University of California Irvine; Ed.M., Ed.D., Harvard Graduate School of Education.

Peter H. Mostkoff, Porter College (1999)
Assistant Professor, Theater Arts
B.A., Sarah Lawrence College; M.A., Ph.D., University of California, Berkeley.

Gordon Mumma, Porter College (1973)
Professor Emeritus, Music
Former affiliations: Cursos Latinoamericanos de Musica Contemporanea; Mills College; University of California, San Diego; Merce Cunningham Dance Company; Sonic Arts Union; University of Illinois.

Derek C. Murray (2007)
Assistant Professor, History of Art and Visual Culture
B.F.A., Art Center College of Design; M.A., California State University, Los Angeles; M.A., Ph.D., Cornell University. Former affiliation: University of South Florida; University of California, Berkeley.

John T. Musacchio (2004)
Associate Professor, Information Systems Management
B.S., Ohio State University; M.S., Ph.D., University of California, Berkeley. Former affiliation: TerraBlaze, Inc.

Kim I. Musch (1998)
Physical Education Instructor
A.B., University of California, Berkeley; M.A., San Jose State University. Former affiliations: University of California, Berkeley; Chabot College; Ohlone College.

Peggy B. Musgrave, Crown College (1980)
Professor Emerita, Economics
B.A., M.A., American University; Ph.D., Johns Hopkins University. Former affiliations: Northeastern University; University of California, Berkeley; Vassar College.

Olga Nájera Ramírez, Merrill College (1989)
Professor, Anthropology
B.A., University of California, Santa Cruz; M.A., Ph.D., University of Texas at Austin.

Onuttom Narayan, College Eight (1995)

Professor, Physics

M.Sc., Indian Institute of Technology; M.A., Ph.D., Princeton University. Former affiliation: Harvard University.

Michael Nauenberg, Crown College (1966)

Professor Emeritus, Physics

B.S., Massachusetts Institute of Technology; Ph.D., Cornell University. Former affiliations: Columbia University; Stanford Linear Accelerator Center.

Paul Nauert, Porter College (1996)

Professor, Music

B.M., Eastman School of Music; M.A., Ph.D., Columbia University.

Marta A. Navarro (1990)

Lecturer, Spanish Language

B.A., M.A., University of California, Berkeley.

Jerry E. Nelson (1994)

Professor, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory

B.S., California Institute of Technology; Ph.D., University of California, Berkeley. Former affiliation: University of California, Berkeley.

Jerome Neu, Cowell College (1972)

Professor, Humanities

B.A., Princeton University; D.Phil., Oxford University.

Dard A. Neuman, Porter College (2004)

Assistant Professor, Music; Kamil and Talat Hasan Endowed Chair in Classical Indian Music

B.A., University of Washington, Amherst; M.Phil., Ph.D., Columbia University. Former affiliation: Columbia University.

A. Todd Newberry, Cowell College (1965)

Professor Emeritus, Ecology and Evolutionary Biology

B.A., Princeton University; Ph.D., Stanford University.

Ellen S. Newberry (1997)

Lecturer, Writing

B.A., Brown University; M.A., San Francisco State University. Former affiliations: De Anza College; Evergreen Valley College.

William S. Nickell (1999)

Lecturer, Russian Language

B.A., Washington University; M.A., Ph.D., University of California, Berkeley.

Paul L. Niebanck (1973)

Professor Emeritus, Environmental Planning (Environmental Studies)

A.B., Johns Hopkins University; M.C.P., Ph.D., University of Pennsylvania. Former affiliations: University of Pennsylvania; U.S. Department of Health, Education and Welfare.

Jason A. Nielsen (2006)

Assistant Professor, Physics

B.S., Iowa State University; Ph.D., University of Wisconsin-Madison. Former affiliation: Lawrence Berkeley National Laboratory.

Francis Nimmo (2005)

Associate Professor, Earth and Planetary Sciences

B.A., Ph.D., Cambridge University. Former affiliations: University College, London; University of California, Los Angeles.

Harry F. Noller, Crown College (1968)

Robert L. Sinsheimer Professor, Molecular, Cell, and Developmental Biology

B.A., University of California, Berkeley; Ph.D., University of Oregon. Former affiliations: Institut de Biologie Moleculaire (Geneva); MRC Laboratory of Molecular Biology (Cambridge, England).

Carlos G. Noreña, Stevenson College (1967)

Professor Emeritus, Philosophy

Master in Classics, College S. Estanislao (Madrid); Master in Philosophy, College Chamartin (Madrid); Master in Theology, College S. Georgen (Frankfurt); LL.M., University of Wurzburg; Ph.D., University of California, San Diego. Former affiliations: Sophia University (Tokyo); University of San Diego; University of California, San Diego.

Loisa C. Nygaard, Crown College (1975)

Associate Professor, German Literature

B.A., Ph.D., Cornell University.

Katia Obraczka (2001)

Professor, Computer Engineering

B.S., M.S., Federal University of Rio de Janeiro; M.S., Ph.D., University of Southern California.

Former affiliation: University of Southern California.

Marcia Ochoa, Kresge College (2005)
Assistant Professor, Community Studies
B.A., University of Michigan; A.M., Ph.D., Stanford University.

James R. O'Connor, College Eight (1976)
Professor Emeritus, Sociology
B.S., Ph.D., Columbia University. Former affiliations: Barnard College; Washington University; San Jose State University.

Rodney T. Ogawa, College Ten (2002)
Professor, Education
B.A., University of California, Los Angeles; M.A., Occidental College; Ph.D., Ohio State University.
Former affiliation: University of California, Riverside.

Matthew D. O'Hara, Cowell College (2006)
Associate Professor, History
Ph.D., University of California, San Diego. Former affiliation: New Mexico State University.

Shigeko Okamoto, Merrill College (2008)
Professor, Japanese Language
B.A., Kyoto Prefectural University; M.A., California State University, Fresno; Ph.D., University of California, Berkeley. Concurrent Affiliation: California State University, Fresno.

Scott R. Oliver (2004)
Associate Professor, Chemistry and Biochemistry
B.Sc., Ph.D., University of Toronto. Former affiliation: State University of New York at Binghamton.

Brad Olsen (2004)
Assistant Professor, Education
B.A., Bowdoin College; M.Ed., Harvard Graduate School of Education; Ph.D., University of California, Berkeley. Former affiliation: University of California, Los Angeles.

Gregory O'Malley, Stevenson College (2008)
Assistant Professor, History
B.A., Boston University; M.A., Ph.D., Johns Hopkins University. Former affiliation: California Institute of Technology.

Ryan D. Oprea (2006)
Assistant Professor, Economics
B.A., Hillsdale College; M.A., Ph.D., George Mason University.

Charles Leo Ortiz, Cowell College (1973)
Professor Emeritus, Ecology and Evolutionary Biology
B.A., California State University, Northridge; Ph.D., University of California, Los Angeles.

Paul A. Ortiz, College Ten (2001)
Associate Professor, Community Studies
B.A., Evergreen State College; Ph.D., Duke University. Former affiliation: Duke University.

Richard E. Otte, Cowell College (1982)
Professor, Philosophy
B.A., Colorado State University; M.A., Ph.D., University of Arizona. Former affiliation: University of Pittsburgh.

Karen M. Ottemann, Crown College (1998)
Professor, Microbiology and Environmental Toxicology
B.S., University of California, Davis; Ph.D., Harvard University. Former affiliation: University of California, Berkeley.

Mesut Özgen (1998)
Lecturer, Music (Classical Guitar)
M.M., Artist Diploma, Yale University, School of Music; D.M.A. cand., Arizona State University;
M.D., Hacettepe University (Ankara, Turkey). Former affiliation: School of Music Education, Gazi University (Turkey).

Jaye Padgett, Stevenson College (1992)
Professor, Linguistics
B.A., University of Maryland; Ph.D., University of Massachusetts-Amherst.

Jeffrey D. Paduan (1997)
Associate Adjunct Professor, Ocean Sciences
B.S.E., University of Michigan, Ann Arbor; Ph.D., Oregon State University. Concurrent affiliation: Naval Postgraduate School. Former affiliation: Scripps Institution of Oceanography, University of California, San Diego.

Nicole A. Paiement, Porter College (1988)
Professor, Music (Conducting)
B.M., University of Ottawa; M.M., McGill University; D.M.A., Eastman School of Music. Former

affiliations: McGill University; Eastman School of Music.

Daniel Palleros, Cowell College (1986)
Lecturer, Chemistry and Biochemistry
M.S., Ph.D., University of Buenos Aires.

Triloki N. Pandey, Crown College (1973)
Professor, Anthropology
B.A., M.A., Lucknow University (India); M.A., Cambridge University; Ph.D., University of Chicago.
Former affiliations: Cambridge University; University of Pittsburgh; New York University.

Alex Pang, Merrill College (1990)
Professor, Computer Science
B.S., University of the Philippines; M.S., Ph.D., University of California, Los Angeles.

Ingrid M. Parker, College Nine (1998)
Associate Professor, Ecology and Evolutionary Biology
A.B., University of Chicago; Ph.D., University of Washington.

Jennifer A. Parker, Porter College (1999)
Associate Professor, Art
B.A., University of California, Santa Barbara; M.F.A., Rutgers University.

Sarah-Hope Parmeter, Merrill College (1985)
Lecturer, Writing
B.A., Mills College; M.A., University of California, Davis.

Eleonora Pasotti, Merrill College (2003)
Assistant Professor, Politics
M.Sc., London School of Economics; M.Phil., Ph.D., Columbia University.

Manuel Pastor, Jr., Merrill College (1995)
Professor, Latin American and Latino Studies
B.A., University of California, Santa Cruz; M.A., Ph.D., University of Massachusetts. Former affiliation: Occidental College.

Adina Paytan (2008)
IMS, Research Scientist, Earth and Planetary Sciences
B.S., Hebrew University, Jerusalem; M.S., Weizmann Institute of Science, Rehovot; Ph.D., Scripps Institution of Oceanography. Former affiliations: University of California, San Diego.

Arthur Pearl, College Eight (1972)
Professor Emeritus, Education
B.A., M.A., Ph.D., University of California, Berkeley. Former affiliations: Howard University; University of Oregon.

Devon E. Pearse (2009)
Adjunct Professor, Ecology and Evolutionary Biology
B.A., University of California, Santa Cruz; Ph.D., University of Georgia. Former affiliation: NOAA Southwest Fisheries Science Center.

John S. Pearse, College Eight (1971)
Professor Emeritus, Ecology and Evolutionary Biology
B.S., University of Chicago; Ph.D., Stanford University. Former affiliations: American University in Cairo; California Institute of Technology.

David A. Pease (2009)
Assistant Adjunct Professor, Computer Engineering
M.S. and Ph.D., University of California, Santa Cruz.

Lucinda Pease-Alvarez (1990)
Associate Professor, Education
B.A., Willamette University; M.A., Ph.D., Stanford University. Former affiliations: Stanford University; University of Alabama.

Kenneth Pedrotti, Porter College (2000)
Professor, Electrical Engineering
B.S., M.S., University of California, Berkeley; Ph.D., Stanford University. Former affiliation: Rockwell Science Center.

James E. Pepper, College Eight (1972)
Professor Emeritus, Environmental Planning (Environmental Studies)
B.S., B.Arch., Montana State University; M.L.A., M.C.P., University of California, Berkeley. Former affiliation: California State Polytechnic College, Pomona.

Ariel Pérez (2001)
Lecturer, Spanish
B.A., Universidad de Morón, Buenos Aires, Argentina; M.A., Monterey Institute of International Studies. Former affiliations: Defense Language Institute; Salinas Adult School.

Micah E. Perks, Kresge College (1997)

Associate Professor, Literature

B.A., M.F.A., Cornell University. Former affiliations: Hobart and William Smith Colleges; Cornell University.

Hector Perla, Jr., Merrill College (2008)

Assistant Professor, Latin American and Latino Studies B.A., San Francisco State University; M.A., Stanford University; Ph.D., University of California, Los Angeles. Former affiliations: University of California, Irvine; Ohio University.

Thomas F. Pettigrew, Stevenson College (1979)

Professor Emeritus, Social Psychology

B.A., University of Virginia; M.A., Ph.D., Harvard University. Former affiliations: University of North Carolina; Harvard University.

Jarmila Pittermann (2008)

Assistant Professor, Ecology and Evolutionary Biology

B.S., McMaster University, Canada; M.S., University of Toronto, Canada; Ph.D., University of Utah. Former affiliation: University of California, Berkeley.

Juan E. Poblete, Merrill College (1997)

Associate Professor, Spanish Literature

Licenciate, Universidad de Chile; Ph.D., Duke University. Former affiliation: Duke University.

Grant Pogson, Crown College (1994)

Professor, Ecology and Evolutionary Biology

B.Sc., Carleton University; Ph.D., University of British Columbia. Former affiliations: Dalhousie University (Canada); University of Cambridge (England).

Ira Pohl, Stevenson College (1970)

Professor, Computer Science

B.A., Cornell University; M.S., Ph.D., Stanford University. Former affiliation: Thomas J. Watson Laboratory.

Cynthia L. Polecritti, Stevenson College (1988)

Associate Professor, History

B.A., University of Pittsburgh; M.A., Ph.D., University of California, Berkeley.

Neoklis Polyzotis (2003)

Associate Professor, Computer Science

Diploma, University of Athens; M.Sc., Ph.D., University of Wisconsin.

Clifton A. Poodry, Merrill College (1972)

Professor Emeritus, Molecular, Cell, and Developmental Biology

B.A., M.A., State University of New York at Buffalo; Ph.D., Case Western Reserve University.

Jennifer Poole, College Nine (2007)

Assistant Professor, Economics

B.A., Smith College Ph.D., University of California, San Diego.

Stan E. Poplin (2002)

Lecturer, Music (Bass)

Norwegian State Academy of Music.

Eric C. Porter, Oakes College (2001)

Professor, American Studies

B.A., University of California, Berkeley; M.A., Ph.D., University of Michigan. Former affiliation: University of New Mexico.

Donald C. Potts, Crown College (1977)

Professor, Ecology and Evolutionary Biology

B.Sc., University of Queensland; Ph.D., University of California, Santa Barbara. Former affiliations: Australian National University; Flinders University (Australia).

Nader Pourmand (2008)

Assistant Professor, Biomolecular Engineering

B.S., Stockholm University, Sweden; M.S., Ph.D., Karolinska Institute, Stockholm.

Raquel Prado (2001)

Associate Professor, Applied Mathematics and Statistics

B.S., Universidad Simon Bolivar (Caracas, Venezuela); M.S., Ph.D., Duke University. Former affiliation: Universidad Simon Bolivar.

Anthony R. Pratkanis, Stevenson College (1987)

Professor, Psychology

B.S., Eastern Mennonite College; M.A., Ph.D., Ohio State University. Former affiliation: Carnegie Mellon University.

Maria A. Prencipe, Cowell College (1991)

Lecturer, Italian Language

Laurea (M.A.), University of Bari (Italy).

Daniel M. Press, College Eight (1992)

Professor, Environmental Studies

B.S., University of California, Davis; M.A., Ph.D., Claremont Graduate School. Former affiliations: EPICS International; California Institute of Public Affairs.

Joel R. Primack, Crown College (1973)

Professor, Physics

B.A., Princeton University; Ph.D., Stanford University. Former affiliations: Stanford Linear Accelerator Center; Harvard University.

Jason X. Prochaska (2002)

Associate Professor, Astronomy and Astrophysics; Assistant Astronomer, UC Observatories/Lick Observatory

B.S., Princeton University; M.S., Ph.D., University of California, San Diego.

Stefano Profumo (2007)

Assistant Professor, Physics

B.S., Università di Pisa; M.S., Scuola Normale Superiore, Pisa; Ph.D., International School for Advanced Studies (SISSA-ISAS), Trieste (Italy).

Mary B. Pudup, College Eight (1989)

Associate Professor, Community Studies

B.A., Pennsylvania State University; M.A., Ph.D., University of California, Berkeley. Former affiliation: West Virginia University.

Geoffrey K. Pullum, Cowell College (1981)

Professor Emeritus, Linguistics

B.A., University of York; Ph.D., University of London. Former affiliations: University of York; University College London.

Jie Qing, Crown College (1997)

Professor, Mathematics

B.S., M.S., Peking University; Ph.D., University of California, Los Angeles. Former affiliation: Columbia University.

Ralph H. Quinn, Stevenson College (1984)

Lecturer, Psychology

A.B., Bowdoin College; M.A., Goddard College; Ph.D., Saybrook Institute (San Francisco).

Dominik Rabus (2008)

Assistant Adjunct Professor, Electrical Engineering

M.S., University of Stuttgart; Ph.D., Technical University Berlin. Former affiliations: Technical University of Karlsruhe; Forschungszentrum Karlsruhe GmbH, Institute for Microstructure Technology; Fraunhofer Institute for Telecommunications, Heinrich-Hertz-Institute.

Timour Radko (2008)

Associate Adjunct Professor, Applied Mathematics and Statistics

M.S., Moscow Institute of Physics and Technology; Ph.D., Florida State University, Tallahassee. Former affiliations: Florida State University; Massachusetts Institute of Technology; Naval Postgraduate School.

Peter T. Raimondi, College Eight (1996)

Professor, Ecology and Evolutionary Biology

B.A., Northern Arizona University; Ph.D., University of California, Santa Barbara. Former affiliation: University of Melbourne.

S. Ravi Rajan, Cowell College (1997)

Associate Professor, Environmental Studies; Provost, College Eight

B.A., Osmania University; B.A., M.A., M.Phil., University of Delhi; D.Phil., University of Oxford. Former affiliations: Max Planck Institute (Berlin); Cornell University; University of California, Berkeley; University of Oxford.

Amy Ralston (2009)

Assistant Professor, Molecular, Cell, and Developmental Biology

B.A., Oberlin College; Ph.D., University of Wisconsin-Madison. Former affiliation: Hospital for Sick Children Research Institute, Toronto, Ontario.

Arthur P. Ramirez (2009)

Professor, Electrical Engineering; Dean, Jack Baskin School of Engineering

B.S., Ph.D. Yale University. Former affiliations: LGS; Bell Labs.

Catherine S. Ramirez, Oakes College (2002)

Assistant Professor, American Studies

B.A., M.A., Ph.D., University of California, Berkeley. Former affiliation: University of New Mexico.

Renya K. Ramirez, Oakes College (2000)

Associate Professor, American Studies

B.A., University of California, Berkeley; M.A., Ph.D., Stanford University.

Enrico J. Ramirez-Ruiz (2008)

Associate Professor, Astronomy and Astrophysics

B.A., Universidad Nacional Autonoma de Mexico; Ph.D., University of Cambridge.

Richard R. Randolph, Cowell College (1965)

Professor Emeritus, Anthropology

B.A., Ph.D., University of California, Berkeley. Former affiliation: Rice University.

Paul Rangell, Porter College (1983)

Lecturer, Art

B.A., University of California, Santa Cruz; Tamarind Master Printer, Tamarind Institute, University of New Mexico.

David M. Rank, College Eight (1971)

Professor Emeritus, Astronomy and Astrophysics

B.S., Pennsylvania State University; M.S., Ph.D., University of Michigan.

Tudor Ratiu, Crown College (1987)

Professor Emeritus, Mathematics

B.A., M.A., University of Timisoara (Romania); Ph.D., University of California, Berkeley. Former affiliation: University of Arizona.

A. Christina Ravelo, Oakes College (1991)

Professor, Ocean Sciences

B.A., B.S., Stanford University; M.A., M.Phil., Ph.D., Columbia University.

Federico Ravenna (2001)

Acting Associate Professor, Economics

B.A., Luiss University of Rome; M.Phil., University of Derby (England); M.A., Ph.D., New York University.

Benjamin Read, Merrill College (2007)

Assistant Professor, Politics

B.A., Cornell University; M.A., University of California Berkeley; Ph.D., Harvard University. Former affiliation: University of Iowa.

Jennifer E. Reardon, College Eight (2005)

Associate Professor, Sociology

B.S., B.A., University of Kansas; M.A., Ph.D., Cornell University. Former affiliations: Harvard University; Brown University; Duke University.

Colleen Reichmuth (2009)

Lecturer, Ocean Sciences

Ph.D., University of California, Santa Cruz

Craig Reinerman, College Ten (1989)

Professor, Sociology

B.A., Babson College; M.A., San Francisco State University; Ph.D., University of California, Santa Barbara. Former affiliation: Northeastern University.

Jose Renau Ardevol (2004)

Assistant Professor, Computer Engineering

B.S., M.S., Ramon Llull University; Ph.D., University of Illinois at Urbana Champaign.

Michael Rexach (2005)

Professor, Molecular, Cell, and Developmental Biology

B.S., Syracuse University; Ph.D., University of California, Berkeley. Former affiliation: Stanford University.

B. Ruby Rich, Oakes College (2004)

Professor, Community Studies

B.A., Yale College. Former affiliation: University of California, Berkeley.

Alan R. Richards, Merrill College (1976)

Professor, Emeritus, Environmental Studies

A.B., A.M., Harvard University; M.A., Ph.D., University of Wisconsin-Madison. Former affiliations: Brooklyn College, City University of New York; University of Wisconsin.

E. Michael Riordan (1999)

Adjunct Professor, Physics

S.B., Ph.D., Massachusetts Institute of Technology. Concurrent affiliations: Stanford University; Stanford Linear Accelerator Center.

Steven Ritz (2009)

Professor, Physics

B.A., Wesleyan University; M.S., Ph.D., University of Wisconsin-Madison. Former affiliation: NASA Goddard Space Flight Center (GSFC).

Cecilia M. Rivas, Merrill College (2007)

Assistant Professor, Latin American and Latino Studies
Ph.D., University of California, San Diego. Former affiliation: University of California, San Diego.

Forrest G. Robinson, Oakes College (1970)
Professor, American Studies
B.A., Northwestern University; M.A., Ph.D., Harvard University. Former affiliation: Harvard University.

Jonathan M. Robinson (2007)
Assistant Professor, Economics
S.B., Massachusetts Institute of Technology; M.A., Ph.D., Princeton University.

Pamela A. Roby, Merrill College (1973)
Professor Emerita, Sociology
B.A., University of Denver; M.A., Syracuse University; Ph.D., New York University. Former affiliations: George Washington University; Brandeis University.

Constance M. Rockosi (2004)
Associate Professor, Astronomy and Astrophysics
B.S.E., Princeton University; Ph.D., University of Chicago. Former affiliation: University of Washington, Seattle.

Abel Rodriguez (2007)
Assistant Professor, Applied Mathematics and Statistics
B.A., M.S., Universidad Catolica Andres Bello, Venezuela; B.S., Universidad Simon Bolivar, Venezuela; M.A., Ph.D., Duke University.

Lisa B. Rofel, Kresge College (1991)
Professor, Anthropology
B.A., Brown University; M.A., Ph.D., Stanford University. Former affiliation: Massachusetts Institute of Technology.

Barbara Rogoff, Porter College (1991)
UC Santa Cruz Foundation Professor, Psychology
B.A., Pomona College; Ph.D., Harvard University. Former affiliations: University of Utah; Stanford University.

Alvaro Romero-Marco (2000)
Lecturer, Spanish Language
Licenciatura, Universidad de Zaragoza (España); Ph.D., Universidad Complutense de Madrid.
Former affiliation: University of Madrid.

Elaine Y. Roos, Porter College (1973)
Professor Emerita, Theater Arts (Costume Design)
B.A., Pomona College; M.F.A., New York University School of the Arts. Former affiliation: State University of New York at Albany.

Norvid J. Roos, Porter College (1974)
Professor Emeritus, Theater Arts (Design)
B.F.A., University of Illinois; M.F.A., New York University. Former affiliations: The Electric Company, Children's Television Workshop; Metropolitan Opera; Illinois Wesleyan University.

Jasper A. Rose, Porter College (1965)
Professor Emeritus, Art, History, and History of Art and Visual Culture
B.A., M.A., Cambridge University. Former affiliations: Cambridge University; University of Keele (England); Rice University.

Jacob Rosen (2008)
Associate Professor, Computer Engineering
B.S., M.S., Ph.D., Tel Aviv University. Former affiliation: University of Washington.

Bruce Rosenblum, Porter College (1966)
Professor Emeritus, Physics
B.S., New York University; Ph.D., Columbia University. Former affiliations: University of California, Berkeley; Radio Corporation of America.

Kevin G. Ross (2004)
Assistant Professor, Information Systems Management
B.S., University of Canterbury; M.S., Ph.D., Stanford University.

Tammi H. Rossman-Benjamin (1997)
Lecturer, Hebrew Language
B.A., McGill University; M.A., University of Pennsylvania.

Paul A. Roth, Cowell College (2004)
Professor, Philosophy
B.A., Wesleyan University; M.A., Ph.D., University of Chicago. Former affiliation: University of Missouri, St. Louis.

Donald L. Rothman, Oakes College (1973)

Senior Lecturer, Writing
B.A., University of Michigan; M.A., Ph.D. cand., University of California, Berkeley. Former affiliations: Merritt College; North Oakland Development Center; East Oakland Development Center; University of California, Berkeley; Social Action Research Center.

Wendy F. Rothwell (1998)
Lecturer, Biomolecular Engineering
B.A., B.S., San Jose State University; Ph.D., University of California, Santa Cruz.

Michael E. Rotkin, College Eight (1973)
Lecturer, Community Studies
B.A., Cornell University; Ph.D., University of California, Santa Cruz. Former affiliation: New York State School of Industrial and Labor Relations.

Seth M. Rubin (2006)
Assistant Professor, Chemistry
B.A., Columbia University; Ph.D. University of California, Berkeley.

Danilyn Rutherford (2010)
Associate Professor, Anthropology
Ph.D, Cornell University. Former affiliation: University of Chicago.

Warren Sack, Porter College (2002)
Associate Professor, Film and Digital Media
B.A., Yale University; S.M., Ph.D., Massachusetts Institute of Technology. Former affiliations: University of California, Berkeley; Massachusetts Institute of Technology; University of Paris VIII.

John Sackett (1994)
Lecturer, Music
B.M., San Francisco Conservatory of Music; M.A., Mills College; M.A., Ph.D., University of California, Berkeley.

Hamid R. Sadjadpour (2001)
Professor, Electrical Engineering
B.S., M.S., Sharif University of Technology (Tehran); Ph.D., University of Southern California. Former affiliation: AT&T Research Laboratories (New Jersey).

G. S. Sahota (2010)
Assistant Professor, Literature
B.A., University of California, Santa Cruz; Ph.D., University of Chicago. Former affiliation: University of Minnesota, Twin Cities.

Hartmut F.-W. Sadrozinski, Crown College (1980)
Adjunct Professor, Physics
Dipl. Phys., University of Hamburg; Ph.D., Massachusetts Institute of Technology. Former affiliation: Princeton University.

Chad W. Saltikov (2004)
Associate Professor, Environmental Toxicology
B.S., University of California, Santa Barbara; Ph.D., University of California, Irvine. Former affiliation: California Institute of Technology.

Daniela Sandler (2009)
Assistant Professor, History of Art and Visual Culture
Professional Degree, University of Sao Paulo; M.A., Ph.D., University of Rochester. Former affiliations: Rhode Island School of Design; Bryn Mawr College; Getty Research Institute.

Matthew Sands, Kresge College (1969)
Professor Emeritus, Physics
B.A., Clark University; M.A., Rice University; Ph.D., Massachusetts Institute of Technology. Former affiliations: Stanford University; California Institute of Technology; Massachusetts Institute of Technology.

Gabriela Sandoval, College Ten (2004)
Assistant Professor, Sociology
B.A., University of California, San Diego; M.R.P., Ph.D. cand., Cornell University. Former affiliation: University of California, San Diego.

Jeremy R. Sanford (2008)
Assistant Professor, Biological Sciences
B.A., Ph.D., Case Western Reserve University. Former affiliation: Indiana University School of Medicine.

Bruno Sansó (2002)
Professor, Applied Mathematics and Statistics
B.Sc., M.Sc., Universidad Simón Bolívar; Ph.D., Universidad Central de Venezuela. Former affiliations: Duke University; Universidad Simón Bolívar.

Donald T. Saposnek, Stevenson College (1978)
Lecturer, Psychology

B.A., University of California, Los Angeles; M.A., San Jose State University; Ph.D., Ohio State University. Former affiliations: Institute of Juvenile Research (Chicago); University of San Francisco.

William M. Saxton (2007)

Professor, Molecular, Cell, and Developmental Biology

B.S., University of Minnesota; M.S., California State University, Northridge; Ph.D., University of Colorado. Former affiliation: Indiana University, Bloomington.

John H. Schaar, Kresge College (1970)

Professor Emeritus, Politics

B.A., M.A., Ph.D., University of California, Los Angeles. Former affiliations: University of California, Los Angeles; Mount Holyoke College; University of California, Berkeley.

Felicity Schaeffer-Grabiel (2005)

Assistant Professor, Feminist Studies

B.A., San Diego State University; M.A., University of Arizona; Ph.D., University of Minnesota, Minneapolis.

Terry L. Schalk (1975)

Adjunct Professor, Physics

B.S., Ph.D., Iowa State University. Former affiliations: University of California, Riverside; Stanford Linear Accelerator Center.

John M. Schechter, Merrill College (1985)

Professor Emeritus, Music

A.B., Hamilton College; M.M., Indiana University; Ph.D., University of Texas at Austin. Former affiliations: New England Conservatory of Music; Syracuse University.

Daniel Scheie, Kresge College (1987)

Professor, Theater Arts (Drama)

B.A., Indiana University at Bloomington; M.A., Ph.D., University of California, Berkeley.

Martine D. F. Schlag, College Eight (1988)

Professor, Computer Engineering

B.A., M.S., Ph.D., University of California, Los Angeles. Former affiliation: University of Washington.

Stuart A. Schlegel, Merrill College (1968)

Professor Emeritus, Anthropology

B.A., University of California, Los Angeles; M.A., Ph.D., University of Chicago. Former affiliation: University of Chicago.

Thomas W. Schleich, Crown College (1969)

Professor, Chemistry and Biochemistry

B.S., Cornell University; Ph.D., Rockefeller University. Former affiliations: Dartmouth College; University of Oregon.

Zack Schlesinger, Cowell College (1995)

Professor, Physics

B.A., University of California, Santa Barbara; Ph.D., Cornell University. Former affiliation: IBM.

Holger Schmidt (2001)

Professor, Electrical Engineering

B.S., University of Stuttgart; M.S., Ph.D., University of California, Santa Barbara.

Roger Schoenman, College Ten (2003)

Assistant Professor, Politics

B.A., Johns Hopkins University; M.Sc., London School of Economics; Ph.D., Columbia University.

Maria Schonbek, Crown College (1986)

Professor, Mathematics

Licenciatura, University of Buenos Aires; Ph.D., University of Michigan, Ann Arbor.

Bruce A. Schumm (1995)

Professor, Physics

B.A., Haverford College; Ph.D., University of Chicago. Former affiliation: Lawrence Berkeley National Laboratory.

Hilde L. Schwartz (1998)

Senior Lecturer, Earth and Planetary Sciences

B.A., University of California, Santa Barbara; Ph.D., University of California, Santa Cruz. Former affiliation: Museum of Northern Arizona.

Susan Y. Schwartz, Cowell College (1989)

Professor, Earth and Planetary Sciences

B.S., Brown University; M.S., Ph.D., University of Michigan.

Thomas J. Schwarz (2005)

Associate Adjunct Professor

Ph.D., Computer Science and Engineering, University of California, San Diego. Former affiliation: Santa Clara University.

Judith A. Scott, Crown College (2000)

Associate Professor, Education

B.A., University of California, Davis; M.A., Ph.D., University of Illinois, Urbana-Champaign. Former affiliation: Simon Fraser University.

Peter L. Scott, Stevenson College (1966)

Professor Emeritus, Physics

B.A., University of California, Berkeley; M.A., University of Michigan; Ph.D., University of California, Berkeley. Former affiliation: Stanford University.

William G. Scott, Crown College (1998)

Professor, Chemistry and Biochemistry

B.S., B.S., Bates College; Ph.D., University of California, Berkeley. Former affiliation: Indiana University.

Daniel D. Scripture, College Eight (1986)

Lecturer, Writing

B.A., Goddard College; M.A., San Jose State University; Ph.D. cand., University of California, Santa Cruz. Former affiliation: San Jose State University.

Ana Maria C. Seara, Merrill College (1998)

Lecturer, Portuguese Language

B.A., Universidade Federal do Rio de Janeiro; M.A., Ph.D., University of North Carolina. Former affiliations: University of California, Berkeley; Stanford University.

Abraham Seiden, Crown College (1976)

Professor, Physics

B.S., Columbia University; M.S., California Institute of Technology; Ph.D., University of California, Santa Cruz.

Daniel Selden, Oakes College (1988)

Associate Professor, Classics (Literature)

B.A., M.Phil., Ph.D., Yale University. Former affiliations: Barnard College; Columbia University; Yale University.

Vanita Seth, Merrill College (2001)

Associate Professor, Politics

B.A. (Hons., 1st class), University of Sydney; Ph.D., University of Melbourne.

Travis L. Seymour, College Ten (2001)

Associate Professor, Psychology

B.A., Northwestern University; M.S., Ph.D., University of Michigan.

Scott Shaffer (1994)

Lecturer, Ocean Sciences

B.S., San Diego State University; M.S., Ph.D., University of California, Santa Cruz

Ali Shakouri, College Eight (1998)

Professor, Electrical Engineering

B.S., Ecole Nationale Supérieure des Telecommunications (Paris); M.S., Ph.D., California Institute of Technology. Former affiliation: University of California, Santa Barbara.

Helen Shapiro, College Nine (1997)

Associate Professor, Sociology

B.A., Hampshire College; M.A., M.Phil., Ph.D., Yale University. Former affiliation: Harvard Business School.

Buchanan Sharp, Stevenson College (1970)

Professor, History

B.A., University of California, Berkeley; M.A., University of Illinois; Ph.D., University of California, Berkeley. Former affiliation: University of California, Berkeley.

B. S. Shastry (2003)

Professor, Physics

B.Sc., Nagpur University (India); M.Sc., Indian Institute of Technology (Madras, India); Ph.D., Tata Institute of Fundamental Research (India). Former affiliation: Indian Institute of Science (Bangalore).

Carolyn M. Shaw, Kresge College (1972)

Professor Emerita, Anthropology

B.S., Ph.D., Michigan State University. Former affiliations: College of San Mateo; University of Nairobi.

Jerome M. Shaw, College Nine (2003)

Assistant Professor, Education

B.A., M.A., Ph.D., Stanford University. Former affiliation: Science for Linguistic Inclusion Project, WestEd.

Priscilla W. Shaw, Stevenson College (1967)
Professor Emerita, English and Comparative Literature
B.A., Swarthmore College; Ph.D., Yale University. Former affiliations: Haverford College; Rutgers University; Yale University.

Deanna Shemek, Cowell College (1990)
Professor, Italian and Comparative Literature; Provost, Cowell College
B.A., University of Nebraska; M.A., Ph.D., Johns Hopkins University. Former affiliations: Yale University; University of Pennsylvania.

Carol Shennan (1997)
Professor, Environmental Studies
B.A., Ph.D., University of Cambridge. Former affiliation: University of California, Davis.

Robert J. Shepherd (1981)
Senior Lecturer, Economics
B.S., M.A., University of Southern California; California Certified Public Accountant. Former affiliation: Price Waterhouse & Co.

Alexander Sher (2008)
Assistant Professor, Physics
Diploma of Higher Education: Novosibirsk State University, Russia; Ph.D., University of Pittsburgh. Former affiliations: SCIPP; Budker Institute of Nuclear Physics, Russia.

William F. Shipley, Stevenson College (1966)
Professor Emeritus, Linguistics
B.A., Ph.D., University of California, Berkeley. Former affiliations: University of California, Berkeley; University of Novi Sad (Yugoslavia).

Cecilia Shin (2002)
Physical Education Instructor, Scuba
B.A., M.A., University of California, Santa Cruz

Eli A. Silver, Crown College (1973)
Professor, Earth and Planetary Sciences
B.A., University of California, Berkeley; Ph.D., Scripps Institution of Oceanography, University of California, San Diego. Former affiliations: U.S. Geological Survey; Scripps Institution of Oceanography.

Mary E. Silver, Oakes College (1972)
Professor Emerita, Ocean Sciences
B.A., University of California, Berkeley; Ph.D., Scripps Institution of Oceanography, University of California, San Diego. Former affiliation: San Francisco State College (Moss Landing Marine Laboratories).

Barry R. Sinervo (1997)
Professor, Ecology and Evolutionary Biology
B.S., Dalhousie University; Ph.D., University of Washington. Former affiliation: Indiana University.

Bakthan Singaram, Merrill College (1989)
Professor, Chemistry and Biochemistry
B.Sc., M.Sc., Ph.D., University of Madras (Tamil Nadu, India). Former affiliation: Purdue University.

Nirvikar Singh, Crown College (1982)
Professor, Economics
B.Sc., M.Sc., London School of Economics; Ph.D., University of California, Berkeley. Former affiliation: University of Delhi.

Paul N. Skenazy, Kresge College (1971)
Professor Emeritus, Literature
B.A., University of Chicago; M.A., Ph.D., Stanford University. Former affiliation: Stanford University.

Lisa Sloan, Crown College (1992)
Professor, Earth and Planetary Sciences
B.S., Allegheny College; M.S., Kent State University; Ph.D., Pennsylvania State University. Former affiliation: University of Michigan.

Greta N. Slobin, Stevenson College (1988)
Professor Emerita, Russian Literature
B.A., Wayne State University; M.A., University of Michigan; M.Phil., Ph.D., Yale University. Former affiliations: Amherst College; State University of New York at Albany; Wesleyan University; University of Michigan; Yale University.

David M. Smith (2003)
Associate Professor, Physics
S.B., Massachusetts Institute of Technology; M.A., Ph.D., University of California, Berkeley. Former affiliation: University of California, Berkeley.

Donald R. Smith, Crown College (1996)

Professor, Microbiology and Environmental Toxicology
B.A., University of California, Santa Cruz; M.A., San Francisco State University (Moss Landing Marine Laboratories); Ph.D., University of California, Santa Cruz.

Graeme H. Smith, Merrill College (1989)
Professor, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory
B.Sc., Ph.D., Australian National University. Former affiliations: Space Telescope Science Institute; Harvard-Smithsonian Center for Astrophysics; Dominion Astrophysical Observatory.

M. Brewster Smith (1970)
Professor Emeritus, Psychology
B.A., M.A., Stanford University; Ph.D., Harvard University. Former affiliations: University of California, Berkeley; New York University; Vassar College; Harvard University; University of Chicago; Center for Advanced Study in the Behavioral Sciences.

Ruth L. Solomon, Porter College (1970)
Professor Emerita, Theater Arts (Dance)
B.A., Bard College. Former affiliations: University of Hawaii; Punahou Academy; Indiana University; New York University School of the Arts; Chautauqua Institution.

Wayne J. Solomon (2000)
Lecturer, Music (Trombone)
B.M., University of Minnesota, Duluth; M.M., San Francisco Conservatory of Music. Concurrent affiliations: California State University, Fresno; Monterey County Symphony; Santa Cruz County Symphony; Napa Valley Symphony; Carmel Bach Festival. Former affiliation: America's Band in Blue (U.S. Air Force).

Michael Soulé, College Eight (1989)
Professor Emeritus, Environmental Studies
B.A., California State University, San Diego; M.A., Ph.D., Stanford University. Former affiliations: University of Michigan; University of California, San Diego.

Roswell L. Spafford, Kresge College (1978)
Lecturer Emerita, Writing
B.A., University of California, Santa Cruz; M.A., San Francisco State University. Former affiliation: San Francisco State University.

Alan C. Spearot (2007)
Assistant Professor, Economics
B.S., University of Michigan; M.S., Ph.D., University of Wisconsin.

Sharon E. Stammerjohn (2008)
Assistant Professor, Ocean Sciences
B.A., University of Virginia; M.A., University of California, Santa Barbara; M. Phil., Ph.D., Columbia University. Former affiliation: Lamont-Doherty Earth Observatory (New York).

Shelley Stamp, Porter College (1994)
Professor, Film and Digital Media
B.A., University of Toronto; M.A., Ph.D., New York University. Former affiliation: Queen's University (Canada).

Audrey E. Stanley (1969)
Professor Emerita, Theater Arts (Drama)
B.A., University of Bristol; M.A., Ph.D., University of California, Berkeley. Former affiliations: University of Victoria (British Columbia); Dalhousie University; City of Birmingham College of Education; Nottinghamshire County College of Education; School of Art (Guildford, England).

Brian J. Staufenbiel, Porter College (1996)
Lecturer, Music (Voice)
B.A., University of California, Santa Cruz; M.M., San Jose State University; D.M.A., Eastman School of Music. Former affiliations: Eastman School of Music; Santa Clara University.

Stuart P. Stegner, Porter College (1968)
Professor Emeritus, American Literature
B.A., M.A., Ph.D., Stanford University. Former affiliation: Ohio State University.

Adriane Steinacker (2003)
Associate Adjunct Professor, Astronomy and Astrophysics
Ph.D., Universität Bonn, Germany. NASA Ames Research Center.

Andrea Steiner (1998)
Lecturer, Community Studies
A.B., Brown University; M.S., University of Southern California; Ph.D., Rand Graduate School of Policy Studies.

Elizabeth Stephens, Porter College (1994)
Professor, Art
B.F.A., Tufts University; M.F.A., Rutgers University; Diploma, School of the Museum of Fine Arts, Boston.

Trish Stoddart (1993)

Professor, Education

B.A., University of Leeds (England); M.A., University of Birmingham (England); Ph.D., University of California, Berkeley. Former affiliations: Michigan State University; University of Utah.

Abraham D. Stone (2005)

Assistant Professor, Philosophy

A.B., Harvard University; M.A., Princeton University; Ph.D., Harvard University. Former affiliation: University of Chicago.

Michael Stone (2007)

Assistant Professor, Chemistry and Biochemistry

B.A., University of Pennsylvania; Ph.D., University of California, Berkeley

Victoria Auerbuch Stone (2008)

Assistant Professor, Microbiology and Environmental Toxicology

B.A., Cornell University; Ph.D., University of California, Berkeley. Former affiliation: Tufts University School of Medicine.

Evelyn J. Strauss (2006)

Lecturer in Science Writing

B.S., University of California, Berkeley; Ph.D., University of California, San Francisco.

Nancy E. Stoller, College Eight (1973)

Professor Emerita, Community Studies

B.A., Wellesley College; M.A., Ph.D., Brandeis University. Former affiliation: Emmanuel College.

Susan Strome (2007)

Professor, Molecular, Cell, and Developmental Biology

B.A., University of New Mexico; Ph.D., University of Washington; Postdoctorate, University of Colorado. Former affiliation: Indiana University, Bloomington.

Joshua M. Stuart, Cowell College (2003)

Associate Professor, Biomolecular Engineering

B.S., B.A., University of Colorado; Ph.D., Stanford University.

Ellen Kappy Suckiel, Cowell College (1973)

Professor Emerita, Philosophy

B.A., Douglass College; M.A., Ph.D., University of Wisconsin-Madison. Former affiliations: Florida State University; University of Wisconsin.

Ephraim Suhir (2006)

Adjunct Professor, Electrical Engineering

M.S., Polytechnic Institute, Ukraine; Ph.D., Moscow University. Former affiliations: ERS Co.; IOLON Inc.; Bell Laboratories; Lucent Technologies; Exxon Corp.; Research Institute of Engine-Building; Institute of Ocean Engineering; University of Illinois at Chicago.

William Sullivan, Crown College (1990)

Professor, Molecular, Cell, and Developmental Biology

B.A., University of California, San Diego; Ph.D., University of Washington. Former affiliation: University of California, San Francisco.

Undang Sumarna (1976)

Lecturer, Music (Gamelan)

Former affiliations: Akademi Seni Tari Indonesia and Konservatori Karawitan (Bandung, West Java); University of California, Berkeley; University of California, Los Angeles.

David Swanger, Crown College (1971)

Professor Emeritus, Education and Creative Writing

B.A., Swarthmore College; M.A.T., Ed.D., Harvard University. Former affiliation: Harvard University.

David G. Sweet, Merrill College (1971)

Professor Emeritus, History

B.A., Oberlin College; M.A., Ph.D., University of Wisconsin-Madison.

Eugene Switkes, Crown College (1971)

Professor, Chemistry and Biochemistry

B.A., Oberlin College; Ph.D., Harvard University. Former affiliations: Oberlin College; General Electric.

Marshall Sylvan, Stevenson College (1965)

Lecturer Emeritus, Mathematics and Statistics

B.S., Roosevelt University; M.S., University of Chicago; Ph.D., Stanford University.

Andrew Szasz, College Eight (1986)

Professor, Sociology

B.A., Harvard University; M.A., University of Chicago; Ph.D., University of Wisconsin-Madison. Former affiliation: Rutgers University.

Neferti Tadiar, Oakes College (1996)

Associate Professor, History of Consciousness
B.A., University of the Philippines; M.A., University of Minnesota; Ph.D., Duke University. Former affiliation: University of the Philippines.

Lincoln Taiz (1973)

Professor Emeritus, Molecular, Cell, and Developmental Biology
B.S., University of Utah; Ph.D., University of California, Berkeley. Former affiliation: University of California, Berkeley.

Renee Tajima-Peña (2003)

Associate Professor, Community Studies
B.A., Radcliffe College, Harvard University. Concurrent Affiliation: Independent filmmaker.

Dana Takagi, Stevenson College (1987)

Professor, Sociology
B.A., M.A., Ph.D., University of California, Berkeley. Former affiliation: University of California, Irvine.

Frank J. Talamantes, Oakes College (1974)

Professor Emeritus, Molecular, Cell, and Developmental Biology
B.A., University of St. Thomas; M.A., Sam Houston State University; Ph.D., University of California, Berkeley.

Hirotaka Tamanoi, Stevenson College (1996)

Professor, Mathematics
B.S., M.S., University of Tokyo; Ph.D., Johns Hopkins University. Former affiliations: Institut des Hautes Etudes; University of Kentucky; Max Planck Institut für Mathematik; Rutgers University; Institute for Advanced Study (Princeton).

John W. Tamkun, Porter College (1989)

Professor, Molecular, Cell, and Developmental Biology
B.A., University of South Florida; Ph.D., Massachusetts Institute of Technology. Former affiliation: University of Colorado.

Wang-Chiew Tan (2002)

Associate Professor, Computer Science
B.S., National University of Singapore; M.S., Ph.D., University of Pennsylvania.

R. Michael Tanner (1971)

Professor Emeritus, Computer Science
B.S., M.S., Ph.D., Stanford University. Former affiliation: Tennessee State University.

Patrick Tantalo (1998)

Lecturer, Computer Science
B.S., University of California, Berkeley; Ph.D., University of California, Santa Cruz.
Former affiliation: University of Arkansas, Fayetteville.

Hai Tao (2001)

Associate Professor, Computer Engineering
B.S., M.S., Tsinghua University; M.S., Mississippi State University; Ph.D., University of Illinois, Urbana-Champaign. Former affiliation: Sarnoff Corporation.

Kip T. Téllez, Stevenson College (2000)

Associate Professor, Education
B.A., California State University, Fullerton; M.A., Ph.D., Claremont Graduate School. Former affiliation: University of Houston; Claremont Graduate School.

Richard Terdiman, Kresge College (1987)

Professor, Literature
B.A., Amherst College; Ph.D., Yale University. Former affiliations: Swarthmore College; University of California, Berkeley; University of California, San Diego.

Bernie R. Tershy (2005)

Adjunct Professor, Ecology and Evolutionary Biology
B.S., University of California, Santa Cruz; M.S., Moss Landing Marine Laboratory; Ph.D., Cornell University. Former affiliation: Institute of Marine Sciences.

Roland G. Tharp, Crown College (1990)

Professor Emeritus, Education and Psychology
B.A., University of Houston; M.A., Ph.D., University of Michigan, Ann Arbor. Former affiliations: United States International University; University of Hawaii.

David J. Thomas, Stevenson College (1966)

Professor Emeritus, Politics
B.A., Oberlin College; Ph.D., Harvard University.

Megan C. Thomas, Merrill College (2003)

Assistant Professor, Politics
B.A., Oberlin College; M.S., London School of Economics; Ph.D., Cornell University. Former affiliation: Weatherhead East Asian Institute, Columbia University.

Ravi Thomas (2007)

Adjunct Professor, Economics

M.S., London School of Economics; Ph.D., University of California, Berkeley. Former affiliations: Temple University, Swarthmore College, International Monetary Fund.

Bruce Thompson, Stevenson College (1990)

Lecturer, History

A.B., Princeton University; M.A., Ph.D., Stanford University. Former affiliations: Stanford University; Santa Clara University.

John N. Thompson, Stevenson College (2000)

Professor, Ecology and Evolutionary Biology

B.A., Washington and Jefferson College; Ph.D., University of Illinois, Urbana-Champaign. Former affiliation: Washington State University.

Avril Thorne, Stevenson College (1991)

Professor, Psychology

B.A., University of Utah; M.A., Arizona State University; Ph.D., University of California, Berkeley. Former affiliations: University of California, Berkeley; Emory University; Wellesley College.

Stephen E. Thorsett, Crown College (1999)

Professor, Astronomy and Astrophysics; Dean, Division of Physical and Biological Sciences

B.A., Carleton College; M.A., Ph.D., Princeton University. Former affiliation: Princeton University.

Martin T. Tinker (2009)

Adjunct Professor, Ecology and Evolutionary Biology

B.S., University of Guelph, Ontario, Canada; M.S., University of Waterloo, Ontario; Ph.D., University of California, Santa Cruz. Former affiliation: United States Geological Survey.

Othmar T. Tobisch, Porter College (1968)

Professor Emeritus, Earth and Planetary Sciences

B.A., M.A., University of California, Berkeley; Ph.D., University of London (Imperial College). Former affiliation: U.S. Geological Survey.

Jude Todd, Porter College (1984)

Lecturer, Writing

B.A., Indiana University; M.L.S., University of California, Berkeley; M.A., San Francisco State University; Ph.D., University of California, Santa Cruz.

Veronica K. Tonay (1989)

Lecturer, Psychology

B.A., University of California, Santa Cruz; M.A., Ph.D., University of California, Berkeley.

Mark Traugott, Stevenson College (1974)

Professor, History

B.A., Harvard University; M.A., Ph.D., University of California, Berkeley.

Nina K. Treadwell, Cowell College (2004)

Associate Professor, Music

B.A., B.M., University of Melbourne (Australia); M.A., Ph.D., University of Southern California. Former affiliation: Grinnell College.

Jonathan Trent (2004)

Adjunct Professor, Biomolecular Engineering

Ph.D., Scripps Institution of Oceanography. Concurrent affiliation: NASA Ames Research Center.

Anthony J. Tromba, Cowell College (1970)

Professor, Mathematics

B.S., Cornell University; M.A., Ph.D., Princeton University. Former affiliation: Stanford University.

Anna L. Tsing, Kresge College (1987)

Professor, Anthropology

B.A., Yale University; M.A., Ph.D., Stanford University. Former affiliations: University of Colorado; University of Massachusetts.

Slawek M. Tulaczyk (2000)

Professor, Earth and Planetary Sciences

Magister, University of Wroclaw (Poland); Graduate Certificate, University des Saarlandes (Germany); M.Sc., Northern Illinois University; M.Sc., Ph.D., California Institute of Technology. Former affiliation: University of Kentucky.

Zdravka Tzankova (2007)

Assistant Professor, Environmental Studies

A.B.D., University of California, Berkeley; M.A., Brown University; Ph.D., Mount Holyoke College.

Michael E. Urban, Stevenson College (1991)

Professor, Politics

B.A., Seattle University; M.A., University of Alberta; Ph.D., University of Kansas. Former affiliations: Auburn University; State University of New York, College at Oswego; University of

Montana.

Georges Y. Van Den Abbeele (2006)

Professor, Literature; Dean, Division of Humanities
B.A., Reed College; Ph.D., Cornell University. Former affiliations: University of California, Berkeley;
Miami University; University of California, Davis.

Allen Van Gelder, Porter College (1987)

Professor, Computer Science
B.S., Massachusetts Institute of Technology; Ph.D., Stanford University.

Anujan M. Varma, College Eight (1991)

Professor, Computer Engineering
B.Sc., University of Calicut; M.E., Indian Institute of Science; Ph.D., University of Southern
California. Former affiliation: IBM Thomas J. Watson Research Center.

Gustavo O. Vazquez, Porter College (1995)

Associate Professor, Film and Digital Media
B.F.A., San Francisco Art Institute; M.A., San Francisco State University. Former affiliations:
Exploratorium; Telesistema Michoacano de Radio y Television; Guadalupe Cultural Arts Center.

John F. Vesecky, Crown College (1999)

Professor, Electrical Engineering
B.A., B.S., Rice University; M.S., Ph.D., Stanford University. Former affiliations: University of
Michigan; Stanford University; University of Leicester (England); SRI International; Sylvania
Electronic Defense Laboratories.

Thomas A. Vogler, Cowell College (1965)

Professor Emeritus, English and Comparative Literature
B.A., University of Chicago; M.A., Ph.D., Yale University. Former affiliation: Yale University.

Steven S. Vogt, Crown College (1978)

Professor, Astronomy and Astrophysics; Astronomer, UC Observatories/Lick Observatory
B.S., University of California, Berkeley; M.A., Ph.D., University of Texas at Austin. Former
affiliation: University of Texas at Austin.

Susan C. Vollmer (2002)

Lecturer, Music (Horn)
B.M., M.M., San Francisco Conservatory of Music.

George E. Von der Muhll, Merrill College (1969)

Professor Emeritus, Politics
B.A., Oberlin College; M.Sc., London School of Economics; Ph.D., Harvard University. Former
affiliations: Swarthmore College; University of Chicago; Makerere University College (Uganda).

Matthew W. Wagers, Stevenson College (2008)

Assistant Professor, Linguistics
A.B., Princeton University; Ph.D., University of Maryland.

Marilyn Walker (2009)

Professor, Computer Science
B.A., University of California, Santa Cruz; M.S., Stanford University; M.A., Ph.D., University of
Pennsylvania. Former affiliations: University of Sheffield, England; AT&T; Hewlett-Packard.

Merle F. Walker (1965)

Professor Emeritus, Astronomy and Astrophysics; Astronomer Emeritus, UC Observatories/Lick
Observatory
A.B., Ph.D., University of California, Berkeley. Former affiliations: Mt. Wilson and Palomar
Observatories; Yerkes Observatory; Warner and Swasey Observatory; Cerro Tololo Inter-American
Observatory (Chile).

Carl E. Walsh, Crown College (1987)

Professor, Economics
B.A., Ph.D., University of California, Berkeley. Former affiliation: Princeton University.

Hongyun Wang, Oakes College (1999)

Professor, Applied Mathematics and Statistics
B.S., M.S., Beijing University; Ph.D., University of California, Berkeley. Former affiliation: Lawrence
Berkeley National Laboratory.

Howard H. Wang, Stevenson College (1970)

Professor Emeritus, Molecular, Cell, and Developmental Biology
B.S., California Institute of Technology; Ph.D., University of California, Los Angeles. Former
affiliations: University of California, Berkeley; Massachusetts Institute of Technology.

Su-Hua Wang (2003)

Associate Professor, Psychology
B.S., M.S., National Taiwan University; Ph.D., University of Illinois, Urbana-Champaign.

Yiman Wang, Porter College (2006)

Assistant Professor, Film and Digital Media
B.A., Nanjing University, China; M.A., Beijing University, China; Ph.D., Duke University. University of California, Los Angeles.

Edward C. Warburton, Porter College (2004)
Associate Professor, Theater Arts
B.A., Boston College; Ed.M., Ed.D., Harvard University. Former affiliations: New York University, Southern Methodist University, Boston Conservatory; Boston Ballet; Houston Ballet; American Ballet Theater II.

Steven N. Ward (1984)
Research Geophysicist, Earth and Planetary Sciences
B.S., Bucknell University; M.A., Ph.D., Princeton University. Former affiliation: Harvard University.

Noah Wardrip-Fruin (2008)
Assistant Professor, Computer Science
B.A., University of Redlands; M.A., New York University; M.F.A., Ph.D., Brown University. Former affiliations: University of California, San Diego; University of Baltimore; New York University.

Manfred Warmuth, Stevenson College (1982)
Professor, Computer Science
Vordiplom in Informatik, Frederick Alexander Universität (Germany); M.Sc., Ph.D., University of Colorado.

Michael J. Warren, Cowell College (1968)
Professor Emeritus, English Literature
B.A., M.A., Oxford University; M.A., Dalhousie University (Canada); Ph.D., University of California, Berkeley. Former affiliation: University of Victoria (British Columbia).

Richard A. Wasserstrom, Stevenson College (1979)
Professor Emeritus, Philosophy
B.A., Amherst College; M.A., Ph.D., University of Michigan; LL.B., Stanford University. Former affiliations: University of California, Los Angeles; Tuskegee Institute; U.S. Department of Justice; Stanford University.

Kerstin Wasson (2003)
Adjunct Assistant Professor, Ecology and Evolutionary Biology
B.A., Oberlin College; Ph.D., University of California, Santa Cruz. Concurrent affiliation: Elkhorn Slough Foundation.

Lewis G. Watts, Porter College (2001)
Associate Professor, Art
B.A., M.A., University of California, Berkeley. Former affiliation: University of California, Berkeley.

Amy L. Weaver (1998)
Lecturer, Writing
B.A., University of California, Santa Cruz; M.A., Cornell University. Former affiliation: Cornell University.

Gerald E. Weber, Crown College (1983)
Lecturer Emeritus, Earth and Planetary Sciences
B.A., University of California, Riverside; M.A., University of Texas at Austin; Ph.D., University of California, Santa Cruz. Former affiliations: De Anza College; U.S. Geological Survey; Union Oil.

Martin Weissman (2006)
Assistant Professor, Mathematics
A.B., Princeton University; Ph.D., Harvard University.

David T. Wellman (1983)
Professor Emeritus, Community Studies
B.A., Wayne State University; M.A., Ph.D., University of California, Berkeley. Former affiliations: University of California, Berkeley; University of Oregon.

C. Gordon Wells, Porter College (2000)
Professor, Education
B.A., University of Cambridge; Dipl. Appl. Ling., University of Edinburgh; Ph.D., University of Bristol. Former affiliations: Ontario Institute for Studies in Education, University of Toronto; University of Bristol.

Randall S. Wells (1983)
Associate Adjunct Professor, Ocean Sciences
B.A., University of South Florida; M.S., University of Florida; Ph.D., University of California, Santa Cruz.

Linda L. Werner, Porter College (1985)
Lecturer, Computer Science
B.A., Clark University; M.S., Ph.D., University of California, San Diego. Former affiliations: Wang Laboratories; Data General Corporation.

Candace West, College Eight (1979)

Professor, Sociology
B.A., M.A., Ph.D., University of California, Santa Barbara. Former affiliations: University of California, Santa Barbara; Florida State University.

Marilyn J. Westerkamp, Merrill College (1989)

Professor, History

B.A., Brandeis University; M.A., Ph.D., University of Pennsylvania. Former affiliations: University of Wyoming; Clarion University of Pennsylvania.

Cedric Westphal (2009)

Assistant Adjunct Professor, Computer Engineering

M.S., Ecole Centrale, Paris, France; M.S., Ph.D., University of California, Los Angeles.

Donald L. Weygandt, Porter College (1967)

Professor Emeritus, Art

B.F.A., Washington University; M.F.A., University of Illinois. Former affiliations: University of Colorado; San Francisco Art Institute; University of California, Los Angeles.

Aaronette M. White (2008)

Associate Professor, Psychology

A.B., University of Missouri-Columbia; M.A., Ph.D., Washington University. Former affiliations: Pennsylvania State University; Harvard University; Northwood University; Wilberforce University; University of Georgia; Missouri Institute of Mental Health; The University of the Western Cape (South Africa); St. Louis University; Washington University; University of Amsterdam; University of Suriname; University of Missouri, Columbia.

Hayden V. White, Oakes College (1978)

University Professor Emeritus, History of Consciousness

B.A., Wayne State University; M.A., Ph.D., University of Michigan. Former affiliations: Wesleyan University; University of California, Los Angeles; University of Rochester; Wayne State University.

Emmet J. Whitehead, Porter College (2000)

Associate Professor, Computer Science

B.S., Rensselaer Polytechnic Institute; M.S., Ph.D., University of California, Irvine.

Paul Whitworth, Cowell College (1990)

Professor, Theater Arts

M.A. (Hons., 1st class), University of St. Andrews; graduate studies, Oxford University. Former affiliation: Royal Shakespeare Company.

Donald M. Wiberg (2002)

Professor Emeritus, Electrical Engineering

B.S., M.S., Ph.D., California Institute of Technology. Former affiliations: Institute of Electrical and Electronics Engineers; University of California, Los Angeles.

Harold Widom, Stevenson College (1968)

Professor Emeritus, Mathematics

M.S., Ph.D., University of Chicago. Former affiliations: Cornell University; University of Chicago; University of California, Berkeley; Stanford University.

David A. Williams (1987)

Adjunct Professor, Physics

A.B., Washington University; A.M., Ph.D., Harvard University.

Quentin Williams, Porter College (1988)

Professor, Earth and Planetary Sciences

A.B., Princeton University; Ph.D., University of California, Berkeley.

Terrie M. Williams, College Eight (1994)

Professor, Ecology and Evolutionary Biology

B.S., Douglass College; M.S., Ph.D., Rutgers University. Former affiliations: Scripps Institution of Oceanography; San Diego Zoo; Sea World Research Institute; Naval Oceans Systems Center Hawaii Laboratories; U.S. Office of Naval Research.

Stanley M. Williamson, Cowell College (1965)

Professor Emeritus, Chemistry and Biochemistry

B.S., University of North Carolina; Ph.D., University of Washington. Former affiliations: University of California, Berkeley; Cambridge University.

Christopher C. Wilmers (2006)

Assistant Professor, Environmental Studies

B.A., Wesleyan University; Ph.D., University of California, Berkeley.

G. Carter Wilson, College Nine (1972)

Professor Emeritus, Community Studies

B.A., Harvard University; M.A., Syracuse University. Former affiliations: Stanford University; Harvard University; Tufts University.

James A. Wilson, Cowell College (1985)

Lecturer, Writing

B.A., California State University, Fresno; M.A., Ph.D., University of California, Berkeley. Former affiliation: University of California, Berkeley.

Margaret L. Wilson, Crown College (2001)
Associate Professor, Psychology
B.A., Reed College; Ph.D., University of California, Berkeley.

Rob J. Wilson, Oakes College (2001)
Professor, Literature
B.A., M.A., Ph.D., University of California, Berkeley. Former affiliation: University of Hawaii at Manoa.

William K. Winant (1983)
Lecturer, Music (Percussion)
B.F.A., York University; M.F.A., Mills College. Concurrent affiliations: University of California, Berkeley; Mills College; San Francisco Contemporary Music Players. Former affiliation: Mount Allison University.

Rasmus G. Winther (2007)
Assistant Professor, Philosophy
B.A., M.A., Stanford University; Ph.D., Indiana University. Former affiliation: Universidad Nacional Autónoma de Mexico (UNAM).

W. Todd Wipke, Crown College (1975)
Professor Emeritus, Chemistry and Biochemistry
B.S., University of Missouri; Ph.D., University of California, Berkeley. Former affiliations: University of Missouri; University of California, Berkeley; Harvard University; Princeton University.

Daniel J. Wirls, Merrill College (1988)
Professor, Politics
B.A., Haverford College; M.A., Ph.D., Cornell University.

Donald A. Wittman, Merrill College (1969)
Professor, Economics
B.A., University of Michigan; M.A., Ph.D., University of California, Berkeley. Former affiliations: University of Chicago; University of California, Berkeley.

Richard A. Wohlfeiler (1994)
Lecturer, Art
B.A., University of California, Los Angeles; Graduate Certificate, University of California, Santa Cruz.

Matthew Wolf-Meyer (2008)
Assistant Professor, Anthropology
B.A., Oakland University; M.A., University of Liverpool; M.A., Bowling Green State University; Ph.D., University of Minnesota. Former affiliation: Wayne State University.

Deborah Woo, College Eight (1984)
Professor Emerita, Community Studies
B.A., Tufts University; M.A., Ph.D., University of California, Berkeley.

Stanford E. Woosley, Crown College (1975)
Professor, Astronomy and Astrophysics
B.A., M.S., Ph.D., Rice University. Former affiliations: California Institute of Technology; Rice University; Lawrence Livermore National Laboratory.

Alexandra Worden
Assistant Adjunct Professor, Ocean Sciences
B.A., Wellesley College; Ph.D., University of Georgia. Concurrent affiliation: Monterey Bay Aquarium Research Institute. Former affiliation: Massachusetts Institute of Technology.

Ru-Shan Wu (1986)
Institute of Geophysics and Planetary Physics (IGPP); Research Geophysicist
B.S., Northwestern University, China; Ph.D., Massachusetts Institute of Technology.

Thomas Y. Wu (2006)
Assistant Professor, Economics
B.A., M.A., Pontifical Catholic University of Rio de Janeiro; Ph.D., Princeton University. Former affiliations: Princeton University; Pontifical Catholic University of Rio de Janeiro.

David Yager, Porter College (2009)
Professor, Art; Dean, Division of the Arts
B.A., University of Connecticut; M.F.A., Florida State University; H.D.D., DeMontfort University, U.K.

Yamada Toshishige (2008)
Associate Adjunct Professor, Electrical Engineering
B.S., M.S., University of Tokyo; Ph.D., Arizona State University. Former affiliations: NASA Ames Research Center; Stanford University; Arizona State University.

Karen T. Yamashita, Kresge College (1997)
Professor, Literature (Creative Writing)
B.A., Carleton College. Former affiliation: University of California, Los Angeles.

Huibin Yan (2001)
Assistant Professor, Economics
B.A., Wuhan University (People's Republic of China); Ph.D., Washington University.

Alice S. Yang, Merrill College (1993)
Associate Professor, History
B.A., Brown University; M.A., Ph.D., Stanford University.

Fitnat Yildiz, Crown College (2002)
Associate Professor, Environmental Toxicology
B.S., Hacettepe University (Ankara, Turkey); Ph.D., Indiana University. Former affiliation: Carnegie Institution of Washington.

A. Peter Young, Crown College (1984)
Professor, Physics
M.A., D.Phil., Oxford University. Former affiliations: Oxford University; Institut Laue-Langevin (Grenoble, France); Cornell University; Imperial College (London).

Judith Yung, Oakes College (1990)
Professor Emerita, American Studies
B.A., San Francisco State College; M.L.S., Ph.D., University of California, Berkeley. Former affiliations: University of California, Berkeley; Stanford University; San Francisco State University.

James C. Zachos, Crown College (1992)
Professor, Earth and Planetary Sciences
B.S., State University of New York, College at Oneonta; M.S., University of South Carolina; Ph.D., University of Rhode Island. Former affiliation: University of Michigan.

Alan M. Zahler (1994)
Professor, Molecular, Cell, and Developmental Biology
B.S., Carnegie Mellon University; Ph.D., University of Colorado, Boulder.

Jack Zajac, Porter College (1969)
Professor Emeritus, Art
F.A.A.R., American Academy in Rome. Former affiliations: University of Colorado; Artist-in-Residence, American Academy in Rome.

Erika S. Zavaleta, College Eight (2003)
Assistant Professor, Environmental Studies
B.A., M.A., Ph.D., Stanford University. Former affiliation: University of California, Berkeley.

Patricia J. Zavella, College Eight (1984)
Professor, Latin American and Latino Studies
B.A., Pitzer College; M.A., Ph.D., University of California, Berkeley.

Jonathan P. Zehr (1999)
Professor, Ocean Sciences
B.S., Western Washington University; Ph.D., University of California, Davis. Former affiliation: Rensselaer Polytechnic Institute.

Jin Z. Zhang, Crown College (1992)
Professor, Chemistry and Biochemistry
B.S., Fudan University (Shanghai); Ph.D., University of Washington. Former affiliation: University of California, Berkeley.

Yi Zhang, College Eight (2005)
Assistant Professor, Information Systems Management
B.S., Tsinghua University, China; M.S., Ph.D., Carnegie Mellon University. Former affiliation: Carnegie Mellon University.

Xixi Zhao (1991)
Lecturer, Earth and Planetary Sciences; Research Geophysicist, IGPP
B.S., M.A., University of Science and Technology of China; Ph.D., University of California, Santa Cruz. Former affiliation: Institute of Geology, Academia Sinica (Beijing).

Adrienne L. Zihlman, Oakes College (1967)
Professor, Anthropology
B.A., University of Colorado; Ph.D., University of California, Berkeley.

Martha C. Zúñiga, Merrill College (1989)
Professor, Molecular, Cell, and Developmental Biology
B.A., University of Texas at Austin; M.Phil., Ph.D., Yale University. Former affiliation: University of Texas at Austin.

Yi Zuo (2007)
Assistant Professor, Molecular, Cell, and Developmental Biology

B.S., Tsinghua University; Ph.D., Northwestern University; Postdoctorate, NYU School of Medicine; Postdoctorate, University of Texas. Former affiliation: University of Texas, Austin.

Eileen L. Zurbriggen, College Ten (2000)
Professor, Psychology
B.S., M.S., Michigan State University; M.A., Ph.D., University of Michigan.

Eve C. Zyzik, Merrill College (2008)
Assistant Professor, Language Program
B.A., Indiana University, Bloomington; Ph.D. University of California, Davis. Former affiliation: Michigan State University.

In Memoriam

We mourn the deaths of eight valued faculty members since the publication of the last catalog.

February 2008. James B. Hall, Porter College (1969)
Literature
B.A., M.A., Ph.D., University of Iowa.

October 2008. Donald Coyne, Porter College (1985)
Physics
B.S., University of Kansas; Ph.D., California Institute of Technology.

February 2009. Noel Q. King, Merrill College (1968)
History and Comparative Religion
M.A., Oxford University; Ph.D., University of Nottingham.

April 2009. Gabriel Berns, Cowell College (1965)
Spanish Literature
B.A., M.A., University of Wisconsin; Ph.D., Ohio State University.

June 2009. Ali Akbar Khan (1999)
Music
D.Litt.: Rabinda Bharati University; University of Dacca; University of Delhi; Doctorate: Viswa Bharati University; D.A., California Institute of the Arts.

October 2009. Ching-Yi Dougherty (1967)
Chinese Language
B.A., Yenching University; M.A., Mills College.

February 2010. Ronald J. Schusterman (1985)
Ocean Sciences
B.A., Brooklyn College; M.A., Ph.D., Florida State University

August 2010. George P. Hitchcock, Porter College (1971)
Literature
B.A., University of Oregon.

University Administration

The governance of the university is entrusted, under the state constitution, to the Regents of the University of California. The Board of Regents is presently composed of 18 members who are appointed by the governor of California, subject to California State Senate confirmation; seven members who participate because of the offices they hold; and a student member appointed by the board.

The president of the university is the chief executive of the 10-campus system. He is appointed by the Regents and is directly responsible to them.

Each of the 10 campuses of the university has a chancellor, its chief administrative officer, who is responsible for the organization and operation of the campus, including academic, student, and business affairs.

The Academic Senate, consisting of the faculty and certain administrative officers, determines the conditions for admission and degrees, subject to the approval of the Regents; authorizes and supervises courses and curricula; and advises the university administration on important matters such as appointments and promotions, budgets, student discipline, and administration of the library.

University Professors

The title of University Professor is the highest honor UC bestows on a professor in recognition of outstanding scholarship and teaching. The title is reserved for scholars of international distinction who are recognized and respected as teachers of exceptional ability. University Professors—appointed by the Regents—visit other campuses for seminars and meetings with faculty and students and for presentations to more general audiences.

Appendixes

Appendix A: California Residency and Nonresident Tuition Fee

If you do not meet the University of California requirements for residence for tuition purposes on the residence determination date for each term in which you propose to attend the university, you must pay a Nonresident Tuition Fee in addition to all other fees. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter, and for schools on the semester system, the day instruction begins for the semester.

Regulations Governing Residence

The rules regarding residence for tuition purposes at the University of California are governed by the California Education Code and implemented by Standing Orders of the Regents of the University of California. Under these rules, adult citizens and certain classes of aliens can establish residence for tuition purposes. There are particular rules that apply to the residence classification of minors (see below).

Note: Registered domestic partners are included in rules that apply to spouses.

Who Is a Resident?

If you are an adult student (at least 18 years of age), you may establish residence in California if

- (1) You are a U.S. citizen.
- (2) You are a permanent resident or other immigrant.
- (3) You are a nonimmigrant who is not precluded from establishing a domicile in the U.S. This includes nonimmigrants who hold valid visas of the following types: A, E, G, H-1B, H-4, I, K, L, N, O-1, O-3, R, T, U, or V.

To establish residence you must be physically present in California for more than one year, and you must come here with the intent to make California your home as opposed to coming to this state to go to school. Physical presence within the state solely for educational purposes does not constitute the establishment of California residency, regardless of the length of stay. You must demonstrate your intention to make California your home by severing your residential ties with your former state of residence and establishing those ties with California. If these steps are delayed, the one-year durational period will be extended until you have demonstrated both presence and intent for one full year. If your parents are not California residents, you are required to be financially independent in order to be a resident for tuition purposes. Your residence cannot be derived from your spouse, a registered domestic partner or a parent.

Requirements for Financial Independence

You are considered "financially independent" if one or more of the following applies:

- (1) You are at least 24 years of age by December 31 of the calendar year of the term for which you are requesting resident classification.
- (2) You are a veteran of the U.S. Armed Forces.
- (3) You are a ward of the court or both parents are deceased.
- (4) You have legal dependents other than a spouse or a registered domestic partner.
- (5) You are married, a registered domestic partner, or a graduate student, and you were not/will not be claimed as an income tax deduction by any individual other than your spouse or domestic partner for the tax year immediately preceding the term for which you request resident classification.
- (6) You are a single undergraduate student and you were not claimed as an income tax deduction by your parents or any other individual for the two tax years immediately preceding the term for which you request resident classification, and you can demonstrate self-sufficiency for those years and the current year.

Note: Financial independence is not a factor in determining residence status for graduate student instructors, graduate student teaching assistants, research assistants, junior specialists, postgraduate researchers, graduate student researchers, and teaching associates who are employed 49 percent or more of full time or awarded the equivalent in university-administered

funds (e.g., grants, stipends, fellowships) for the term for which resident classification is sought.

Establishing Intent for California Residency

You must demonstrate your intent to make California your home by severing your residential ties with your former state of residence and establishing those ties with California shortly after arrival. Indications of your intent to make California your permanent residence must be dated one year before the term for which you seek residence classification, and can include the following: registering to vote and voting in California elections; designating California as your permanent address on all school and employment records, including military records if you are in the military service; obtaining a California driver's license or, if you do not drive, a California identification card; obtaining California vehicle registration; paying California income taxes as a resident, including taxes on income earned outside California from the date you establish residence; establishing a home in California where you keep your personal belongings; and licensing for professional practice in California. The absence of these indicia in other states during any period for which you claim California residence can also serve as an indication of your intent. Documentary evidence is required and all relevant indications will be considered in determining your classification. Your intent will be questioned if you return to your prior state of residence when the university is not in session.

General Rules Applying to Minors

If you are an unmarried minor (under age 18), the residence of the parent with whom you live is considered to be your residence. If you live with neither parent, your residence is that of the parent with whom you last lived. Unless you are a minor alien present in the U.S. under the terms of a nonimmigrant visa, which precludes you from establishing domicile in the U.S., you may establish your own residence when both parents are deceased and a legal guardian has not been appointed. If you derive California residence from a parent, that parent must satisfy the one-year durational/intent requirement.

Specific Rules Applying to Minors

(1) *Divorced or separated parents.* To derive California resident status from a California-resident parent, you must move to California to live with that parent before your 18th birthday, remain in the state, and establish California indicia of intent from the time you reach 18. Otherwise, you will be considered out-of-state student and will have to meet all applicable UC residence requirements.

(2) *Parent of minor moves from California.* You may be entitled to resident status if you are a minor and a U.S. citizen or eligible alien whose parent(s) was a resident of California who left the state within one year of the residence determination date if

(a) you remained in California after your parent(s) departed;

(b) you enrolled in a California public postsecondary institution within one year of your parent(s)' departure; and

(c) once enrolled, you maintain continuous attendance in that institution. Financial independence is not required in this case.

(3) *Self-support.* You may be entitled to resident status if you are a minor and a U.S. citizen or eligible alien and can prove the following:

(a) you lived in California for the entire year immediately preceding the residence determination date;

(b) you have been self-supporting for that year; and

(c) you intend to make California your permanent home.

(4) *Two-year care and control.* You may be entitled to resident status if you are a minor and a U.S. citizen or eligible alien and you have lived continuously with an adult who is not your parent for at least two years prior to the residence determination date. The adult with whom you are living must have been responsible for your care and control for the entire two-year period and must have been residing in California during the one year immediately preceding the residence determination date.

Exceptions that either Confer Residence Status or Exemption from Nonresident Tuition

You may be entitled to an exception conferring residence status or exemption from nonresident tuition if one of the following applies to you.

Some of the exceptions conferring residence status and exemptions are for a limited period of time. Check with the Campus Residence Deputy for more information:

(1) *Member of the military; spouse, registered domestic partner, or other dependents of military personnel.* An undergraduate student who is a member of the U.S. military stationed in California on active duty (unless assigned for educational purposes to a state-supported institution of higher education) is eligible for resident status. A graduate student will be eligible for resident status for two years during which the student must take steps to fulfill the UC resident requirements.

An undergraduate student who is a dependent spouse, registered domestic partner, or natural or adopted child or stepchild of a member of the U.S. military stationed in California on active duty is entitled to resident status. A military dependent who is a graduate student is entitled to resident status only until the student has lived in California the minimum time necessary to become a

resident (366 days).

An undergraduate or graduate student who qualifies under federal law (The Higher Education Opportunity Act of 2008) and is a member of the Armed Forces of the United States on active duty for a period of more than 30 days and whose domicile or permanent duty station is in California, or the spouse, registered domestic partner, or dependent child of such a member of the Armed Forces, is entitled to California resident tuition. Student must be continuously enrolled at the University, notwithstanding a subsequent change in the permanent duty station to a location outside of California. The student remains a nonresident, but may petition for residency upon fulfilling the University's residence regulations.

Those who may qualify for an exemption from nonresident tuition and fees (based on federal law: The Higher Education Opportunity Act of 2008).* An undergraduate or graduate student who is a member of the Armed Forces of the United States on active duty for a period of more than 30 days and whose domicile or permanent duty station is in California, or the spouse, registered domestic partner, or dependent child of such a member of the Armed Forces, is entitled to an exemption from nonresident tuition. The student must be continuously enrolled at the university, notwithstanding a subsequent change in the permanent duty station to a location outside of California.

* As of the residence determination date for the term.

(2) *Child, spouse, or registered domestic partner of a faculty member.* To the extent that university funds are available, a student who is the unmarried, dependent child under the age of 21 or the spouse or registered domestic partner of a University of California faculty member who is a member of the Academic Senate may be eligible for an exemption.

(3) *Child, spouse, or registered domestic partner of a university employee.* A full-time UC employee assigned to work outside the State of California in an institution or state agency and the unmarried, dependent child under the age of 21 or the spouse or registered domestic partner of such an employee may be eligible for resident classification. This provision most often applies to employees of Los Alamos National Laboratory.

(4) *Child, spouse, or registered domestic partner of a deceased public law enforcement or fire suppression employee.* A student who is a child, spouse or registered domestic partner of a deceased public law enforcement or fire suppression employee, who was a California resident and was killed in the course of law enforcement or fire suppression duties may be eligible for an exemption.

(5) *Dependent child of a California resident.* A student who has not been an adult resident for more than one year and is the natural or adopted dependent child of a California resident who has been a resident for more than one year immediately prior to residence determination date may be entitled to an exemption from nonresident tuition until the student has lived in California the minimum time necessary to become a resident. Please be aware that when this exemption expires, the student must have fulfilled all applicable UC residence requirements to maintain resident status and continued dependence upon a California-resident parent. The student must also maintain continuous attendance in a California public postsecondary institution.

(6) *Graduate of a California school operated by the Federal Bureau of Indian Affairs (B.I.A.).* A student who is a graduate of a California school operated by the B.I.A. (e.g., Sherman Indian High School) may be eligible for a resident classification.

(7) *Employee of California public school district.* A student holding a valid credential authorizing service in California public schools and employed by a school district in a full-time certificate position may be exempt from nonresident tuition.

(8) *Student athlete in training at U.S. Olympic Training Center, Chula Vista.* An amateur student athlete in training at the U.S. Olympic Training Center in Chula Vista may be eligible for resident status until he or she has resided in California the minimum time necessary to become a resident.

(9) *Graduate of California high school.* A student who attended high school in California for three or more years (9th grade included) and graduated from a California high school (or attained the equivalent) may be exempt from nonresident tuition. You are not eligible for this exemption if you are a nonimmigrant alien.

(10) *Congressional Medal of Honor recipient.* An undergraduate student under age 27 who is the recipient of the Congressional Medal of Honor or a child of a recipient who at the time of his or her death was a California resident may be eligible for an exemption.

(11) *Surviving dependent of California resident killed in 9/11 terrorist attacks.* An undergraduate student who is the surviving dependent of a California resident who was killed in the 9/11/01 terrorist attacks on the World Trade Center, the Pentagon Building, or the crash of United Airlines Flight 93 may be eligible for an exemption.

(12) *Ward of the Court.* A student who resides in California and is 19 years of age or under at the time of enrollment, and who is currently a dependent or ward of the state through California's child welfare system, or was served by California's child welfare system and is no longer being served either due to emancipation or aging out of the system, shall be entitled to a resident classification as long as he or she remains continuously enrolled.**

**The Ward of the Court entry was added to the list of exceptions in January 2011 after the 2010-12 UCSC *General Catalog* was printed.

Temporary Absences

If you are a nonresident student who is in the process of establishing a residence for tuition purposes and you return to your former home during noninstructional periods, your presence in the state will be presumed to be solely for educational purposes and only convincing evidence to the contrary will rebut this presumption. Students who are in the state solely for educational purposes will not be classified as residents for tuition purposes regardless of the length of their stay.

If you are a student who has been classified as a resident for tuition purposes and you leave the state temporarily, your absence could result in the loss of your California residence. The burden will be on you (or on your parents if you are a minor) to verify that you did nothing inconsistent with your claim of a continuing California residence during your absence. Steps that you (or your parents) should take to retain a California residence include:

- (1) *Continue to use a California permanent address on all records*—educational, employment, military, etc.
- (2) *Continue to satisfy California tax obligations.* If you are claiming California residence, you are liable for payment of income taxes on your total income from the date that you establish your residence in the state, including income earned in another state or country.
- (3) *Retain your California voter's registration and vote by absentee ballot.*
- (4) *Maintain a California driver's license and vehicle registration.* If it is necessary to change your driver's license or vehicle registration, you must change them back within the time prescribed by law.

Petitioning for Change of Classification

You must petition in person at the Office of the Registrar for a change of classification from nonresident to resident status. All changes of status must be initiated prior to the first day of classes for the term for which you intend to be classified as a resident. Late petitions will not be accepted.

Time Limitation on Providing Documentation

If additional documentation is required for residence classification but is not readily accessible, you will have until the third week of instruction of the applicable term to provide it. Failure to meet this deadline will result in your file being closed and your status remaining as a nonresident.

Incorrect Classification

If you are incorrectly classified as a resident, your classification will be corrected and you will be required to pay all nonresident tuition not paid. If you concealed information or furnished false information and were classified incorrectly as a result, you are also subject to university discipline. Resident students who become nonresidents must immediately notify the campus residence deputy.

Inquiries and Appeals

Please be advised: This is only a summary of the UC Residence Regulations and may not cover all of your residence questions or circumstances. All inquiries regarding residence requirements, determination, and/or recognized exceptions should be directed to the Residence Deputy, Office of the Registrar, 190 Hahn Student Services Building, University of California, Santa Cruz, 1156 High Street, Santa Cruz, CA 95064-1077, reg_fees@ucsc.edu, or to the Residence Specialist, University of California Office of the General Counsel, 1111 Franklin Street, 8th Floor, Oakland, CA 94607-5200.

Changes may be made to the residence requirements between the publication date of this statement and the relevant residence determination date. Any student, following a final decision on residence classification by the residence deputy, may appeal in writing to the residence specialist within 30 days of notification of the residence deputy's final decision.

No other University of California personnel are authorized to provide information regarding residence requirements.

Privacy Notice

All of the information requested on the Statement of Legal Residence form is required [by the authority of Standing Order 110.2 (a)–(d) of the Regents of the University of California] for determining whether or not you are a legal resident for tuition purposes. You have the right to inspect university records containing the residence information requested on this form. The records are maintained by the Office of the Registrar, 190 Hahn Student Services Building, University of California, Santa Cruz, 1156 High Street, Santa Cruz, CA 95064-1077.

Appendix B: University Police

The University Police have the same authority and responsibility, by law, as municipal police departments. In emergencies, call 9-1-1, 24 hours a day, from campus or private phones. If you need information, or if you need to report a theft, assault, or other crime, call (831) 459-2231,

also 24 hours a day. Officers patrol the campus on foot, bicycle, motorcycle, or by car. They answer calls related to crimes, collisions, injuries, and complaints. The lost-and-found service is located in the Police Department. Office hours are Monday through Friday, 8 a.m. to 5 p.m. The Police Department is located near the main entrance to campus.

The Parking Enforcement Office (for paying parking citations and requesting special parking consideration) is in the same location. Citation payments may be made in person Monday through Friday, 8 a.m. to 5 p.m.

Crime Awareness and Campus Security Act

In compliance with the federal Crime Awareness and Campus Security Act, UCSC publishes information on campus security and crime statistics. The information is posted on the web: www2.ucsc.edu/police.

[\[Return to top.\]](#)

Appendix C: Drug-Free Schools and Communities Act

In compliance with the federal Drug-Free Schools and Communities Act, UCSC annually notifies students, faculty, and staff of policies, procedures, and potential consequences related to unlawful possession, use, or distribution of drugs and alcohol on campus. This notice is distributed to students through the colleges and the Graduate Studies Division, and to faculty and staff via e-mail. The university also conducts a biannual review of programs related to drugs and alcohol to determine effectiveness, implement changes, and ensure that disciplinary sanctions are consistently enforced. This review is conducted by the Office of the Vice Chancellor for Student Affairs, (831) 459-2474.

[\[Return to top.\]](#)

Appendix D: Smoking on Campus Policy

To protect the rights of the nonsmoking campus community to breathe smoke-free air, UCSC has adopted a policy that bans smoking in areas occupied by the nonsmoking population. The policy applies to residential and nonresidential university buildings and vehicles and to all individuals on the campus. Smoking is prohibited inside the residence halls (including student rooms) as well as residence hall lounges, inside individual apartments, community rooms, bathrooms, lounges, cafés and dining halls. Additionally, smoking is prohibited in all indoor public spaces at UC Santa Cruz—both academic and residential. The no-smoking policy includes exterior stairways, decks and balconies. Smoking outside is permitted only in designated areas, 25 feet away from all buildings and air intakes. For more detailed information about the smoking policy see the web: ehs.ucsc.edu (under Environmental Health and Safety [EH&S] Administration, Policies). Tobacco products will not be sold on campus either through vending machines or campus establishments. UCSC supports and assists efforts to stop smoking by providing literature and referrals to community cessation programs. Students may obtain information about the programs from the Cowell Student Health Center (831) 459-2211.

Appendix E: Policies and Regulations

The Student Policies and Regulations Handbook, the Code of Student Conduct, and related appendixes may be accessed at www2.ucsc.edu/judicial. The Student Policies and Regulations Handbook is also available in alternate formats such as enlarged print, braille, audiocassette, or electronic disc from Student Judicial Affairs. Topics include:

- Policy on Nondiscrimination
- Policy on Speech and Advocacy
- Policy on Use of University Properties
- Policy on Campus Emergencies
- Registered Campus Organizations
- University Obligations and Student Rights
- Policy on Student Governments
- Policy on Campus-Based Student Fees
- Code of Student Conduct
- Policy on Student Grievance Procedures
- Policy on Student Participation in Governance
- Policies Applying to the Disclosure of Information from Student Records
- Guidelines Applying to Nondiscrimination on the Basis of Disability

- University of California Authorized Student Governments
- Use of the University's Name
- Nondiscrimination Policy Statement for University of California Publications Regarding Student-Related Matters
- UCSC Alcohol and Drug Policy
- University of California Policy on Hazing
- Policy on Sexual Harrassment for Undergraduates
- UCSC Academic Dishonesty Policy
- UCSC Policy on Sexual Orientation Harassment/Discrimination
- UCSC Guidelines for Speakers and Public Events for Students and Campus Organizations
- UCSC Computer Guidelines: Policies for Use of UCSC Computing Facilities
- UCSC Smoking Policy
- UCSC Public Nudity and Sexually Offensive Conduct Policy
- UCSC Hate/Bias Incident Policy
- UCSC Procedures for Ensuring Adequate Interim Protection from Retaliation or Intimidation for Complainant(s), Witness(es), and other Individuals
- UCSC Policy on Academic Integrity for Graduate Students

For further information, stop by 245 Hahn Student Services Building or call (831) 459-1738.

Appendix F: Graduate Student–Faculty Adviser Relationship Guidelines

The University of California, Santa Cruz, expects professional, fair, and frequent communication between graduate students and their advisers. Open communication and mutual respect should be the foundation of the relationship between a graduate student and faculty adviser. The graduate adviser and the graduate student should discuss their student-adviser relationship early, and clearly communicate mutual and agreeable expectations from the beginning. Regular interactions, especially face-to-face meetings, are essential in ensuring that expectations and goals are met.

In an optimal learning environment, the faculty adviser should provide timely and constructive feedback on performance and expectations; timely and sufficient warning of inadequate performance; appropriate recognition of a student's intellectual contributions; and academic and professional advice on all stages of the graduate career. The graduate student should be an active participant in seeking advice and getting feedback on progress, keeping the faculty adviser informed of plans, progress, and obstacles, and contributing during regular progress assessments. The faculty adviser and the student each have the duty and responsibility to initiate meetings as necessary to foster and protect the success of the relationship.

Professionalism and fairness should guide the graduate student–faculty adviser relationship. Graduate students and faculty should avoid relationships that conflict with their particular roles and responsibilities. Faculty advisers and graduate students are bound by policies that prohibit discrimination and harassment. (See [Nondiscrimination and Affirmative Action Policies](#), and Appendix E.) Graduate students may be entitled to accommodations under the Americans with Disabilities Act. (See [Nondiscrimination and Affirmative Action Policies](#), and Appendix E.) When concerns and conflicts arise, they should be raised and attended to professionally, honestly, and promptly. Retaliation and discrimination against students for raising concerns are prohibited.

If something happens that upsets the faculty adviser–graduate student relationship and cannot be resolved either by direct or indirect discussion, a graduate student can seek assistance from a trusted faculty member, the dean of graduate studies, the graduate director, the department chair, the ombudsman, and/or counseling and psychological services. Graduate students may request confidentiality. Many departments have developed processes to address a range of potential concerns. For information about grievance and appeal procedures, see [Nondiscrimination and Affirmative Action Policies](#) and Appendix E. For a description of additional informal and formal grievance and appeal processes available to UCSC graduate students, please refer to the Graduate Student Handbook at www.graddiv.ucsc.edu.

[\[Return to top.\]](#)

Appendix G: Student Judicial Affairs

Student Judicial Affairs is responsible for the adjudication of all nonacademic student and student organization misconduct for UCSC. In this capacity, Student Judicial Affairs administers the Code of Student Conduct in accordance with Section 100.00 of the Student Policies and Regulations Handbook. Allegations of misconduct may be brought by students, faculty, staff, police, visitors to the campus, and members of our local community. Allegations should be made in writing and

delivered to Student Judicial Affairs.

Upon receipt of an allegation, Student Judicial Affairs will review the merits of the allegation and then conduct an investigation to determine if a violation has occurred. If no violation can be proven, the matter will be dropped. If a violation is proven, then an appropriate sanction will be recommended to the student or student organization for their review and acceptance. If the recommendation is unacceptable, the student or student organization may request a formal hearing or file a written appeal. If you have a question about a possible violation, university policy, or your rights in the discipline process, please feel free to contact the office for a phone consultation or to schedule an appointment.

Student Judicial Affairs serves as the Americans with Disabilities Act (ADA) compliance resolution office for grievances of alleged discrimination based on disability or handicap. In addition, Student Judicial Affairs is the resource office for grievances of alleged discrimination based on race, color, national origin, or sexual orientation, and for incidents of hate/bias.

The Office of Student Judicial Affairs is located in 245 Hahn Student Services Building and can be reached by phone at (831) 459-1738, by fax at 459-3188, or via e-mail at SJA@ucsc.edu. Web: www2.ucsc.edu/judicial.

[\[Return to top.\]](#)

Appendix H: Ombuds Office

The Ombuds Office assists students, staff, and faculty in achieving informal resolution of complaints and conflicts that stem from UCSC policies, procedures, practices, and intracampus relationships. The office seeks fair and equitable solutions to problems, using the principles of informality, impartiality, independence, and confidentiality.

The Ombuds Office operates independently of administrative authorities and protects the privacy of all contacts and communications to the office. When appropriate, Ombuds staff encourage direct interaction between involved parties or may make referrals as appropriate. Ombuds staff are impartial when listening to concerns, providing options, and resolving complaints.

Services include providing information on campus resources, policies, and procedures; facilitating the resolution of problems with the university; and consulting on leadership and organizational-development issues. The office is not involved in formal grievance or disciplinary processes, and cannot set aside any university policy or rule. Speaking to the Ombuds about a concern does not constitute "notice" to the university that the problem exists.

The Ombuds can be reached at (831) 459-2073. Call for further information or for an appointment. All inquiries are confidential. The Ombuds Office is located in Kerr Hall, Room 109; e-mail lmccann@ucsc.edu. Web: <http://www2.ucsc.edu/ombuds>.

Nondiscrimination Statement

The University of California, in accordance with applicable Federal and State law and University policy, prohibits discrimination against or harassment of any person and does not discriminate on the basis of race, color, national origin, religion, sex, gender identity, pregnancy, physical or mental disability, medical condition (cancer related or genetic characteristics), genetic information (including family medical history), ancestry, marital status, age, citizenship, sexual orientation, or service in the uniformed services as defined by the Uniformed Services Employment and Reemployment Rights Act of 1994. The University also prohibits sexual harassment. This nondiscrimination policy covers admission, access, treatment in University programs and activities and employment.

University policy also prohibits retaliation for bringing a complaint of discrimination or participating in a complaint process or investigation pursuant to this policy.

Inquiries regarding the University's student-related nondiscrimination policies may be directed to Student Judicial Affairs at extension 9-1738, or e-mail sja@ucsc.edu.

Inquiries regarding the UCSC Policy on Sexual Assault, and UC Policy on Sexual Harassment and/or violations of Title IX may be directed to the Title IX Coordinator/Sexual Harassment Officer, (831) 459-2462, or e-mail rew@ucsc.edu.

Inquiries regarding the University's affirmative action, equal employment opportunity, and nondiscrimination policies for staff or academic employment may be directed to the Office for Diversity, Equity and Inclusion, (831) 459-3676, or e-mail cbene@ucsc.edu. For academic employment related matters, inquiries may also be directed to the Assistant Vice Chancellor for Academic Human Resources at (831) 459-4300, or e-mail pgpeters@ucsc.edu.

Student inquiries regarding disability or disability accommodations may be addressed to the Director, Disability Resource Center, (831) 459-2089 (voice); (831) 459-4806 (TTY); e-mail drc@ucsc.edu.
