by supporting the visualization of geographical distribution of environmental problems and solutions. GIS is also an information technology field that acquires, manages, interprets, integrates, displays, analyzes, or otherwise uses socio-economic and environmental data focusing on geographic, temporal, and spatial contexts. Students in the GIS concentration will develop a strong foundation in environmental problem solving that is linked to geospatial data acquisition and management, computer-based GIS technologies, and advanced geospatial analysis. GIS is a key emerging industry in the U.S. today and job growth is rapidly expanding. GIS specialists work in many areas, including research and analysis in resource and environmental management, biology, sociology, marine sciences, commercial business and marketing, and urban and regional planning.

The GIS concentration provides students within environmental studies majors with a set of foundational courses in introductory geospatial data management and visualization, information technology and software in GIS, and advanced geospatial analytical approaches for environmental applications. The program learning outcomes and student competencies that are achieved through the concentration include the successful development of basic geospatial technology skills and abilities, advanced geospatial data analysis abilities for environmental applications, enhanced understanding of scale, co-production of space, politics and power of representation, and the preparation of students for entry and mid-level careers as GIS specialists.

GLOBAL ENVIRONMENTAL JUSTICE CONCENTRATION

According to the United States Environmental Protection Agency (EPA), environmental justice is defined as ‘the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies.’ Today, environmental justice is a pillar of national environmental policy, with a swathe of laws and legislation that covers a wide range of sectors. It is a growing area in policy, advocacy and scholarship internationally, embracing topics as diverse as indigenous rights, gender equity and climate justice. In recent years, a parallel idea—of human rights and the environment—has emerged in legal and policy contexts. Environmental justice and human rights are thus among the fastest growing subjects in environmental public policy globally.

This concentration provides students within environmental studies majors with special depth of understanding of the issues and approaches central to global environmental justice. The global environmental justice concentration is premised on the assertion that the distribution of environmental problems

reflects longstanding, uneven terrains of power and privilege, exploitation, and dispossession. Globalization and the fluidity of corporate capital, commodity chains and community campaigns require approaches that conceptualize the frictions between the local and global, legacies of colonialism, and multiplicity of responses—human and non-human—in the face of oppression, adaptation, and resistance. The inextricable interconnections between ecological and social degradation, and the social implications of efforts to remedy ecological degradation, are an intrinsic and important core of environmental studies.

CONSERVATION SCIENCE AND POLICY CONCENTRATION

Effective conservation of biological diversity requires integrating principles of conservation biology and environmental policy. Conservation science is built on a foundation of natural history embedded into a framework of modern ecological theory. Conservation policy reflects social values and provides the economic and legislative tools to achieve desired goals surrounding the conservation of species and ecosystems. The purpose of the conservation science and policy concentration is to provide students within environmental studies majors with the depth and necessary skills in natural history, conservation biology, and environmental policy to effectively engage in this intrinsically interdisciplinary field. Students completing this concentration will be prepared for positions with government agencies and conservation organizations concerned with biodiversity conservation and ecosystem management.

The concentration requires upper-division core courses in both natural and social science aspects of conservation, as well as a field-based course in ecology, natural history, or conservation. The field-based course is important because effective work in the conservation field requires a deep understanding of natural ecosystems. This is best learned through immersive, experiential field courses that develop a natural history-based understanding of ecosystems as well as how to ask and answer critical ecological and conservation questions.

ENVIRONMENTAL STUDIES/BIOLOGY COMBINED MAJOR B.A.

Information and Policies

Introduction

This course of study provides students with the basic tools of biological science and sufficient understanding of resource conservation, conservation biology, and concerns about environmental sustainability to apply these tools to environmental problems.

Students interested in the four available concentrations (geographic information systems, global environmental justice, conservation science and policy, and agroecology and sustainable food systems) should choose to pursue the environmental studies B.A. degree. This does not apply to students who declared a combined major and concentration in agroecology and sustainable food systems prior to 2019.

Academic Advising for the Program

Advising is one way to make the most of your university experience. The advising system at UC Santa Cruz is amazing, and we encourage you to use it often. Ask questions, seek advice, and make decisions that work best for you.

To receive advising for this major, contact envsadvi@ucsc.edu. Additional information for prospective transfer students can be found in the Transfer Information and Policy section.

Getting Started in the Major

Program Learning Outcomes

Students graduating with a B.A. degree in environmental studies/biology will:

- Identify the societal (social, political, economic and ethical) agents and structures that contribute to environmental change. (social science competency)
- Describe the structure and functioning of major physical and ecological components of the earth's systems. (natural science competency)
- Access and analyze a complex literature addressing specific topics in environmental studies, and evaluate the usefulness and limitations of individual sources of information. (analytic thinking)
- Demonstrate effective oral and written communication skills. (communication skills).

Major Qualification Policy and Declaration Process

Major Qualification

To qualify to declare the environmental studies/biology combined major, students must complete the specific courses listed below, or their approved equivalents.

All of the following:

ENVS 25	Environmental Policy and Economics	5
BIOE 20C	Ecology and Evolution	5
BIOL 20A	Cell and Molecular Biology	5
CHEM 1A	General Chemistry	5
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Students must take all of these courses for a letter grade.

Determining qualification

- Students who complete all the qualification courses with a letter grade of C or better are eligible to declare a major.
- Students who have received one grade of C-, D+, D, D-, or F in one of the qualification courses taken at UC Santa Cruz will only be eligible to declare after successfully completing the same or an equivalent course with a letter grade of C or better.
- Students with two or more grades of C-, D+, D, D-, or F in the qualification courses taken at UC Santa Cruz are not eligible to declare.
- Students with non-letter grades in any of the qualification courses for the environmental studies/biology combined B.A. major will not be eligible to declare until a grade of C or better has been assigned.
- Students must attend an Environmental Studies Department declaration workshop when requesting to declare the major.

Appeal Process

Students who are not eligible to declare the major may appeal this decision by submitting an appeal to qualify for the major here within 15 days of the denial of the declaration. Within 15 days of receipt of the appeal, the department will notify the student and college of the decision. If a student has questions about the appeals process, they should contact envsadvi@ucsc.edu.

How to Declare a Major

Students wishing to declare within the Environmental Studies Department should visit the Environmental Studies Department website and follow the steps to declare listed there. Degree requirement sheets may be downloaded from the Environmental Studies Undergraduate Program Requirements page.

Transfer Information and Policy

Transfer Admission Screening Policy

To be considered for admission to UC Santa Cruz in the environmental studies/biology combined majors, transfer students must pass equivalents of the following courses with a C (2.0) or better in these required courses:

All of the following:

BIOE 20C	Ecology and Evolution	5
BIOL 20A	Cell and Molecular Biology	5
CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2

Plus one of the following:

AM 3	Precalculus for the Social	5
------	----------------------------	---

	Sciences	
AM 11A	Mathematical Methods for Economists I	5
AM 11B	Mathematical Methods for Economists II	5
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 22	Introduction to Calculus of Several Variables	5
MATH 23A	Vector Calculus	5

Plus one of the following options:

ENVS 25; or ECON 1 and a course in national or international politics (defined in ASSIST); or ECON 2 and a course in national or international politics (defined in ASSIST)

Prospective transfer students should review transfer information on the environmental studies transfer information.

Students who are proposed in a different major and have advanced standing when they come to UC Santa Cruz require permission from the department to change into the major. Contact envsadvi@ucsc.edu to request permission.

Getting Started at UCSC as a Transfer Student

Transfer students pursuing environmental studies majors are encouraged to transfer in the fall quarter. Transfer students should enroll in STAT 7 and STAT 7L during the summer or fall quarter in order to take ENVS 100 and ENVS 100L in winter or spring quarter of their first year. Transfer students can formally declare their major once qualification courses are successfully completed, following the steps in How to Declare a Major given above.

ENVS 25 and CHEM 1A are usually offered during Summer Session at UC Santa Cruz, and transfer students are encouraged to take them if they have not completed a substitute requirement or want a better understanding of the relevant material. If you are transferring, compare catalog descriptions, consult your current institution's adviser, and refer to the ASSIST website to determine equivalency. Prospective transfer students should review the transfer information.

Letter Grade Policy

All courses must be taken for a letter grade.

Course Substitution Policy

Students pursuing the Environmental Studies/Biology Combined Major cannot substitute courses to count toward their upper division electives.

Double Majors and Major/Minor Combinations Policy

Study Abroad

Environmental studies students are encouraged to study abroad and participate in other off-campus programs. If students are interested in planning to study abroad please note the following policies:

- Students planning to study abroad must be declared in their major prior to studying abroad.
- Students must have their courses they plan to take abroad reviewed and approved by Environmental Studies Advising.
- Environmental studies/biology combined majors cannot petition their courses taken abroad for upper division course substitution.
- For more information on EAP, please visit the UC Education Abroad Program website.

Honors

Departmental Honors. Students must have a 3.5 grade point average (GPA) in all courses used to satisfy the environmental studies upper-division requirements. To be considered for departmental honors, students are limited to no more than one grade of P in those upper-division courses.

Senior Comprehensive Honors. Only applicable to a senior thesis, senior internship, or individual work in a senior seminar. Honors must be awarded by the student's faculty sponsor, and a second faculty member (chosen by the student's faculty adviser) must concur.

Highest Departmental Honors. Students must have a 3.75 grade point average (GPA) in all courses used to satisfy the environmental studies upper-division requirements and must also receive senior comprehensive honors (see above).

Students must fulfill all requirements for honors from environmental studies and biology.

Requirements and Planners

Course Requirements

Lower-Division Courses

Biology and mathematics courses may require placement examinations. See the course descriptions for prerequisite information.

All of the following courses

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5
ENVS 25	Environmental Policy and Economics	5

Plus one of the following

ANTH 2	Introduction to Cultural Anthropology	5
PHIL 22	Introduction to Ethical Theory	5
PHIL 24	Introduction to Ethics: Contemporary Moral Issues	5
PHIL 28	Environmental Ethics	5
BME 80G	Bioethics in the 21st Century: Science, Business, and Society	5
SOCY 1	Introduction to Sociology	5
SOCY 10	Issues and Problems in American Society	5
SOCY 15	World Society	5

Plus one of the following**One of the following:**

AM 3	Precalculus for the Social Sciences	5
AM 6	Precalculus for Statistics	5
MATH 3	Precalculus	5
AM 11A	Mathematical Methods for Economists I	5
AM 11B	Mathematical Methods for Economists II	5
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 22	Introduction to Calculus of Several Variables	5
MATH 23A	Vector Calculus	5

Or take a placement exam:

Take the Math Placement Exam (MPE) with a score of 300 or higher or take the AP Calculus exam with a score of 3 or higher

Plus all of the following

STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Plus all of the following

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2

Plus one of the following options in physics

Either this course		
PHYS 1	Physics for Everyone	5
or these courses		
PHYS 6A	Introductory Physics I	5

PHYS 6L	Introductory Physics Laboratory	1
---------	---------------------------------	---

or these

PHYS 7A	Elementary Physics I	5
PHYS 7L	Elementary Physics Laboratory	1

Upper-Division Courses

Students are required to complete nine upper-division courses and the senior comprehensive requirement. Three of the nine upper-division courses must be the following courses (ENVS 100 and ENVS 100L is considered a single course).

ENVS 100	Ecology and Society	3
ENVS 100L	Ecology and Society Writing Laboratory	5
BIOL 105	Genetics	5
BIOE 109	Evolution	5

Electives

The remaining six upper-division elective courses include three in ecology and evolutionary biology (ecology and evolutionary biology courses numbered BIOE 107-BIOE 188) and three in environmental studies (environmental studies courses numbered ENVS 101-ENVS 179).

One of the six electives must be a laboratory course; laboratory courses are upper-division courses in the BIOE course code that carry 5 credits and have a "L" in their course number.

Additionally, one of the three environmental studies courses electives must be based in the social sciences selected from the following upper-division courses:

ENVS 110	Institutions, the Environment, and Economic Systems	5
ENVS 130B	Justice and Sustainability in Agriculture	5
ENVS 140	National Environmental Policy	5
ENVS 141	Ecological Economics	5
ENVS 143	Sustainable Development: Economy, Policy, and Environment	5
ENVS 145	Green Cities	5
ENVS 146	Water Quality: Policy, Regulation, and Management	5
ENVS 147	Environmental Inequality/Environmental Justice	5
ENVS 149	Environmental Law and Policy	5
ENVS 150	Coastal and Marine Policy	5
ENVS 151	Environmental Assessment	5
ENVS 154	Amazonian Cultures and Conservation	5
ENVS 158	Political Ecology and Social Change	5
ENVS 165	Sustainable Water Systems	5
ENVS 172	Environmental Risks and Public Policy	5
ENVS 173	An Introduction to World Environmental History	5
ENVS 176	Vulnerability, Complex Systems,	5

and Disasters

A list of all courses offered by the Environmental Studies Department is available here (p. 774). A list of which upper-division courses offered in the current year by the Environmental Studies Department are based in the natural sciences and in the social sciences is available here.

A list of the upper-division courses offered by the Ecology and Evolutionary Biology Department is available here (p. 649).

Students wishing to pursue an advanced degree in the pure or applied sciences are strongly encouraged to complete the organic chemistry series as well.

These upper-division elective courses should be selected in pursuit of a coherent plan of study, chosen in consultation with faculty sponsors from both the Biological Sciences and Environmental Studies Departments. None of the three environmental studies upper-division courses can be an environmental studies internship, individual study, or substitution course.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement for the environmental studies/biology combined major is satisfied by completing:

The DC requirement in environmental studies is satisfied by completing

ENVS 100	Ecology and Society	3
ENVS 100L	Ecology and Society Writing Laboratory	5

Plus one of the following

Where two-credit lab courses have to be taken concurrently with a 5-credit lecture course, the combination counts as one course.

BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
ENVS 183B	Senior Internship	5
ENVS 190	Capstone Course: Environmental Problem Solving	5
ENVS 195B	Senior Thesis Group	5
ENVS 196	Senior Seminar	5
BIOE 108	Marine Ecology	5
BIOE 114	Herpetology	5
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2
BIOE 122	Invertebrate Zoology	5
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 127	Ichthyology	5
BIOE 127L	Ichthyology Laboratory	2

BIOE 128L	Large Marine Vertebrates Field Course	5
BIOE 129	Biology of Marine Mammals	5
BIOE 129L	Biology of Marine Mammals Laboratory	2
BIOE 137	Molecular Ecology	5
BIOE 141L	Behavioral Ecology Field Course	5
BIOE 145	Plant Ecology	5
BIOE 145L	Field Methods in Plant Ecology	5
BIOE 150	Ecological Field Methods	5
BIOE 150L	Ecological Field Methods Laboratory	5
BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
BIOE 153C	Disciplinary Communication for Biologists	5
BIOE 158L	Marine Ecology Laboratory	5
BIOE 159A	Marine Ecology Field Quarter: Marine Ecology with Laboratory	5
BIOE 161L	Kelp Forest Ecology Laboratory	5
BIOE 172	Population Genetics	5
BIOE 172L	Population Genetics Laboratory	2

Comprehensive Requirement

Students satisfy the senior comprehensive requirement by completing either:

- One of the options for environmental studies B.A. majors
- One of the approved internships, independent research or field course or a thesis, as specified for the biology B.A.

The senior comprehensive may be satisfied by completing one of the options listed below. All courses used to satisfy the senior comprehensive requirement must be taken for a letter grade.

Before enrolling in the senior thesis or senior internship option, students must formally apply to work with a particular faculty mentor very early in their thesis or project preparation. The senior thesis and senior internship option require careful planning, additional independent research, and at least a two-quarter commitment.

Students with advanced skills in one of the graduate focal areas may also take a graduate seminar by invitation from the instructor.

Either this course

BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
-----------	---	---

or these courses

ENVS 183A	Senior Internship	5
ENVS 183B or this course	Senior Internship	5
ENVS 190	Capstone Course: Environmental Problem Solving	5
or these courses		
ENVS 195A	Senior Research	5
ENVS 195B or this course	Senior Thesis Group	5
ENVS 196	Senior Seminar	5

ENVS 190 is offered in the spring and summer.

ENVS 183B and ENVS 195B are usually taken after successfully completing ENVS 183A and ENVS 195A respectively.

Planners

The following are two sample academic plans for students pursuing the environmental studies/biology combine B.A. major. Plan One is for incoming frosh and Plan Two is for incoming transfer students.

Plan One for Incoming Frosh

	Fall	Winter	Spring
1st (frosh)	<u>MATH 3</u> or <u>AM 3</u>	<u>CHEM 1A</u>	<u>CHEM 1B</u>
		<u>ENVS 25</u>	SOCY/ANTH/ ethics course
2nd (soph)	<u>BIOE 20C</u>	<u>ENVS 100 & ENVS 100L*</u>	<u>BIOE 20B</u>
	<u>STAT 7 & STAT 7L</u>	<u>BIOL 20A</u>	<u>CHEM 1C & CHEM 1N</u>
3rd (junior)	<u>BIOL 105</u>	<u>BIOE 109</u>	Upper-division BIOE
	Upper- division ENVS	<u>PHYS 1</u>	Upper-division ENVS
4th (senior)	Upper- division BIOE	Upper-division BIOE	Comprehensive requirement
	Upper- division ENVS (social sciences)		

*This course is also offered in the spring term.

Students completing this major will have satisfied the SI, IN, PE-E, IS, and PR-E general education requirements. In addition, they will need to fulfill all remaining university, college, and general education requirements.

Plan Two for Incoming Transfer Students

	Fall	Winter	Spring
3rd (junior)	<u>STAT 7 & STAT 7L</u>	<u>ENVS 100 & ENVS 100L*</u>	Upper-division ENVS
		<u>BIOL 105</u>	<u>BIOE 109</u>
4th (senior)	Upper-division ENVS (social sciences)	Upper-division ENVS	Upper-division BIOE
	Upper-division BIOE	Upper-division BIOE	Comprehensive requirement

*This course is also offered in the spring term.

This planner assumes that a student has completed all required lower-division courses—including UCSC or community college general education requirements—with the exception of STAT 7 and STAT 7L, which is only offered at UC Santa Cruz.

A transfer student who has completed the requirements for the Intersegmental General Education Transfer Curriculum (IGETC) before matriculating at UC Santa Cruz, with at most two course requirements left to complete, is allowed to satisfy IGETC in lieu of the UCSC general education requirements.

ENVIRONMENTAL STUDIES/EARTH SCIENCES COMBINED MAJOR B.A.

Information and Policies

Introduction

This course of study provides students with the basic tools of Earth sciences and environmental studies needed to address environmental problems.

Students interested in the four available concentrations (geographic information systems, global environmental justice, conservation science and policy, and agroecology and sustainable food systems) should choose to pursue the environmental studies B.A. degree. This does not apply to students who declared a combined major and concentration in agroecology and sustainable food systems prior to 2019.

Academic Advising for the Program

Advising is one way to make the most of your university experience. The advising system at UC Santa Cruz is amazing, and we encourage you to use it often. Ask questions, seek advice, and make decisions that work best for you.

To receive advising for this major, contact envsadvi@ucsc.edu. Additional information for prospective transfer students can be found in the Transfer Information and Policy section.

Getting Started in the Major

Program Learning Outcomes

Students graduating with a B.A. degree in environmental studies/Earth sciences will:

- Identify the societal (social, political, economic and ethical) agents and structures that contribute to environmental change. (social science competency)
- Describe the structure and functioning of major physical and ecological components of the earth's systems. (natural science competency)
- Access and analyze a complex literature addressing specific topics in environmental studies, and evaluate the usefulness and limitations of individual sources of information. (analytic thinking)
- Demonstrate effective oral and written communication skills. (communication skills).

Major Qualification Policy and Declaration Process

Major Qualification

To qualify to declare the environmental studies/Earth sciences combined major, students must complete the specific courses listed below, or their approved equivalents.

One of the following

ENVS 24	General Ecology	5
BIOE 20C	Ecology and Evolution	5

Plus all of the following

ENVS 25	Environmental Policy and Economics	5
CHEM 1A	General Chemistry	5
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Determining qualification

- Students who complete all the qualification courses with a grade of P, or letter grade of C or better are eligible to declare a major.
- Students who have received one grade of C-, D+, D, D-, or F in one of the qualification courses taken at UC Santa Cruz will only be eligible to declare after successfully completing the same or an equivalent course with a letter grade of C or better.

- Students with two or more grades of C-, D+, D, D-, or F in the qualification courses taken at UC Santa Cruz are not eligible to declare.
- Students with AP credit for any of the qualification course(s) are eligible to declare after successfully completing the remaining qualification courses.
- Students must attend an Environmental Studies Department declaration workshop when requesting to declare the major.

Appeal Process

Students who are not eligible to declare the major may appeal this decision by submitting an appeal to qualify for the major here within 15 days of the denial of the declaration. Within 15 days of receipt of the appeal, the department will notify the student and college of the decision. If a student has questions about the appeals process, they should contact envsadvi@ucsc.edu.

How to Declare a Major

Students wishing to declare within the Environmental Studies Department should visit the Environmental Studies Department website and follow the steps to declare listed there. Degree requirement sheets may be downloaded from the Environmental Studies Undergraduate Program Requirements page.

Transfer Information and Policy

Transfer Admission Screening Policy

To be considered for admission to UC Santa Cruz in the environmental studies/Earth sciences combined majors, transfer students must pass equivalents of the following courses with a C (2.0) or better in these required courses:

One of the following:

ENVS 24	General Ecology	5
BIOE 20C	Ecology and Evolution	5

Plus all of the following:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1M	General Chemistry Laboratory	2
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2

Plus one of the following options:

AM 3	Precalculus for the Social Sciences	5
	OR	
MATH 3	Precalculus	5
	OR	
MATH 11A	Calculus with Applications	5
	OR	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

Plus one of the following options:

Either ENV5 25; or ECON 1 and a course in national or international politics (defined in ASSIST); or or ECON 2 and a course in national or international politics (defined in ASSIST).

Prospective transfer students should review transfer information on the environmental studies transfer information.

Students who are proposed in a different major and have advanced standing when they come to UC Santa Cruz require permission from the department to change into the major. Contact envsadvi@ucsc.edu to request permission.

Getting Started at UCSC as a Transfer Student

Transfer students pursuing environmental studies majors are encouraged to transfer in the fall quarter.

Transfer students should enroll in STAT 7 and STAT 7L during the summer or fall quarter in order to take ENV5 100 and ENV5 100L in winter or spring quarter of their first year. Transfer students who have completed the screening requirements listed above can formally declare their major, following the steps in How to Declare a Major given above.

ENV5 25 and CHEM 1A are usually offered during Summer Session at UC Santa Cruz, and transfer students are encouraged to take them if they have not completed a substitute requirement or want a better understanding of the relevant material. If you are transferring, compare catalog descriptions, consult your current institution's adviser, and refer to the ASSIST website to determine equivalency. Prospective transfer students should review the transfer information.

Letter Grade Policy

This program does not have a letter grade policy, except that the senior comprehensive requirement must be taken for a letter grade.

Course Substitution Policy

Students pursuing the Environmental Studies/Biology Combined Major cannot substitute courses to count toward their upper division electives.

Double Majors and Major/Minor Combinations Policy**Study Abroad**

Environmental studies students are encouraged to study abroad and participate in other off-campus programs. If students are interested in planning to study abroad please note the following policies:

- Students planning to study abroad must be declared in their major prior to studying abroad.

- Students must have their courses they plan to take abroad reviewed and approved by Environmental Studies Advising.
- Environmental studies/biology combined majors cannot petition their courses taken abroad for upper division course substitution.
- For more information on EAP, please visit the UC Education Abroad Program website.

Honors

Departmental Honors. Students must have a 3.5 grade point average (GPA) in all courses used to satisfy the environmental studies upper-division requirements. To be considered for departmental honors, students are limited to no more than one grade of P in those upper-division courses.

Senior Comprehensive Honors. Only applicable to a senior thesis, senior internship, or individual work in a senior seminar. Honors must be awarded by the student's faculty sponsor, and a second faculty member (chosen by the student's faculty adviser) must confer.

Highest Departmental Honors. Students must have a 3.75 grade point average (GPA) in all courses used to satisfy the environmental studies upper-division requirements and must also receive senior comprehensive honors (see above).

Students must fulfill all requirements for honors from environmental studies and biology.

Requirements and Planners**Course Requirements****Lower-Division Courses****All of the following**

STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Plus one of the following options

Either these courses		
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
or these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Plus all of the following

Choose one of the following:		
CHEM 1A	General Chemistry	5

CHEM 1B	General Chemistry	5
CHEM 1M	General Chemistry Laboratory	2
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2

Plus one of the following options

Either these courses

PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics Laboratory	1

or these courses

PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1
PHYS 5B	Introduction to Physics II	5
PHYS 5M	Introduction to Physics Laboratory	1

Plus one of the following options

Either these courses

EART 20	Environmental Geology	5

SOCY 10	Issues and Problems in American Society	5
SOCY 15	World Society	5

Upper-Division Courses**One of the following options**

Either these courses

EART 110A	Evolution of the Earth	5
EART 110L	Evolution of the Earth Laboratory	2

or these courses

EART 110B	Earth as a Chemical System	5
EART 110M	Earth as a Chemical System Laboratory	2

or these courses

EART 110C	The Dynamic Earth	5
EART 110N	The Dynamic Earth Laboratory	2

Plus all of the following

ENVS 100	Ecology and Society	3
ENVS 100L	Ecology and Society Writing Laboratory	5

Electives

The upper-division courses should be selected in pursuit of a coherent plan of study, such as water policy-hydrology, restoration ecology-geochemistry, agroecology-soil physical processes, or environmental policy-climate change, among others, in consultation with faculty from both the Environmental Studies and Earth and Planetary Sciences departments. None of the three environmental studies upper-division courses can be an environmental studies internship, individual study or substitution course.

Three upper-division environmental studies courses

Three additional upper-division environmental studies courses (numbered ENVS 101-ENVS 179) including at least one course based in the social sciences selected from the following upper-division courses:

ENVS 110	Institutions, the Environment, and Economic Systems	5
ENVS 130B	Justice and Sustainability in Agriculture	5
ENVS 140	National Environmental Policy	5
ENVS 141	Ecological Economics	5
ENVS 143	Sustainable Development: Economy, Policy, and Environment	5
ENVS 145	Green Cities	5
ENVS 146	Water Quality: Policy, Regulation, and Management	5
ENVS 147	Environmental Inequality/Environmental Justice	5
ENVS 149	Environmental Law and Policy	5
ENVS 150	Coastal and Marine Policy	5
ENVS 151	Environmental Assessment	5
ENVS 154	Amazonian Cultures and Conservation	5
ENVS 158	Political Ecology and Social	5

	Change	
ENVS 165	Sustainable Water Systems	5
ENVS 172	Environmental Risks and Public Policy	5
ENVS 173	An Introduction to World Environmental History	5
ENVS 176	Vulnerability, Complex Systems, and Disasters	5

A list of all courses offered by the Environmental Studies Department is available here (p. 774). A list of which upper-division courses offered in the current year by the Environmental Studies Department are based in the natural sciences and in the social sciences is available here.

Three upper-division Earth sciences courses

Three additional upper-division Earth sciences courses (Earth and Planetary Sciences courses numbered EART 100-EART 191C). A list of the upper-division courses offered by the Earth and Planetary Sciences Department is available here (p. 729).

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement for the environmental studies/Earth sciences combined major is satisfied by completing:

The following courses:

ENVS 100	Ecology and Society	3
ENVS 100L	Ecology and Society Writing Laboratory	5

Plus one of the following options:

Either one of these courses

BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
ENVS 183B	Senior Internship	5
ENVS 190	Capstone Course: Environmental Problem Solving	5
ENVS 195B	Senior Thesis Group	5
ENVS 196	Senior Seminar	5
EART 195	Senior Thesis	5
or these courses		
EART 188A	Summer Field Internship	5
EART 188B	Geographic Information Systems with Applications to the Earth Sciences	5

Students taking the cross-listed course BIOE 151B/ENVS 109B are recommended to enroll in ENVS 109B.

Comprehensive Requirement

Students satisfy the senior comprehensive requirement in environmental studies or Earth sciences by completing either:

- One of the senior comprehensive options for single environmental studies B.A. majors (see options listed below);
- One of the senior comprehensive options for Earth sciences B.S. (see Comprehensive Requirement under the Earth Sciences B.S.).

The senior comprehensive may be satisfied by completing one of the options listed below. All courses used to satisfy the senior comprehensive requirement must be taken for a letter grade.

Before enrolling in the senior thesis or senior internship option, students must formally apply to work with a particular faculty mentor very early in their thesis or project preparation. The senior thesis and senior internship option require careful planning, additional independent research, and at least a two-quarter commitment.

Students with advanced skills in one of the graduate focal areas may also take a graduate seminar by invitation from the instructor.

Either this course

BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
-----------	---	---

or these courses

ENVS 183A	Senior Internship	5
ENVS 183B	Senior Internship	5

or this course

ENVS 190	Capstone Course: Environmental Problem Solving	5
----------	--	---

or these courses

ENVS 195A	Senior Research	5
ENVS 195B	Senior Thesis Group	5

or this course

ENVS 196	Senior Seminar	5
----------	----------------	---

Students taking the cross-listed course BIOE 151B/ENVS 109B are recommended to enroll in ENVS 109B.

ENVS 190 is offered in the spring and summer.

ENVS 183B and ENVS 195B are usually taken after successfully completing ENVS 183A and ENVS 195A respectively.

Planners

The following are two sample academic plans for students pursuing the environmental studies B.A. major without a concentration. Plan One is for incoming frosh and Plan Two is for incoming transfer students.

Plan One for Incoming Frosh

Fall	Winter	Spring
-------------	---------------	---------------

1st (frosh)	<u>MATH 3</u> or <u>AM 3</u>	<u>ENVS 25</u>	<u>CHEM 1A</u>
		<u>EART 5</u> & <u>EART 5L</u>	SOCY/ANTH/ethics course
2nd (soph)	<u>ENVS 24</u> or <u>BIOE 20C</u>	<u>ENVS 100</u> & <u>ENVS 100L</u> *	<u>CHEM 1B</u> & <u>CHEM 1M</u> <u>PHYS 6A</u> & <u>PHYS 6L</u> or <u>PHYS 5A</u> & <u>PHYS 5L</u>
	<u>STAT 7</u> & <u>STAT 7L</u>	<u>MATH 11A</u>	<u>PHYS 6B</u> & <u>PHYS 6M</u> or <u>PHYS 5B</u> & <u>PHYS 5M</u>
3rd (junior)	<u>CHEM 1C</u> & <u>CHEM 1N</u>	Upper-division ENVS	Upper-division ENVS
	<u>MATH 11B</u>	<u>EART 110B</u> & <u>EART 110M</u>	Upper-division ENVS
4th (senior)	Upper- division EART	Upper-division EART	Upper-division EART
	Upper- division ENVS (social sciences)		Comprehensive requirement

*This course is also offered in the spring term.

Students completing this major will have satisfied the SI, IN, PE-E, IS, IN, MF, and PR-E general education requirements. In addition, they will need to fulfill all remaining university, college, and general education requirements.

Plan Two for Incoming Transfer Students

	Fall	Winter	Spring
3rd (junior)	<u>STAT 7</u> & <u>STAT 7L</u>	<u>ENVS 100</u> & <u>ENVS 100L</u> *	Upper-division EART
		<u>EART 110B</u> & <u>EART 110M</u>	Upper-division ENVS
4th (senior)	Upper-division ENVS	Upper-division ENVS (social sciences)	Comprehensive requirement
	Upper-division EART	Upper-division EART	

*This course is also offered in the spring term.

This planner assumes that a student has completed all required lower-division courses—including UCSC or community college general education requirements—with the exception of STAT 7 and STAT 7L, which is only offered at UC Santa Cruz.

A transfer student who has completed the requirements for the Intersegmental General Education Transfer Curriculum (IGETC) before matriculating at UC Santa Cruz, with at most two course requirements left to complete, is allowed to satisfy IGETC in lieu of the UCSC general education requirements.

ENVIRONMENTAL STUDIES/ECONOMICS COMBINED MAJOR B.A.

Information and Policies

Introduction

This major provides students with the basic tools of economic analysis and an understanding of the mechanics of resource production, conservation, and use, in both ecological and economic terms.

Students interested in the four available concentrations (geographic information systems, global environmental justice, conservation science and policy, and agroecology and sustainable food systems) should to pursue the environmental studies B.A. degree. This does not apply to students who declared a combined major and concentration in agroecology and sustainable food systems prior to 2019.

Academic Advising for the Program

Advising is one way to make the most of your university experience. The advising system at UC Santa Cruz is amazing, and we encourage you to use it often. Ask questions, seek advice, and make decisions that work best for you.

To receive advising for this major, contact envsadvi@ucsc.edu. Additional information for prospective transfer students can be found in the Transfer Information and Policy section.

Getting Started in the Major

Program Learning Outcomes

Students graduating with a B.A. degree in environmental studies/economics will:

- Identify the societal (social, political, economic and ethical) agents and structures that contribute to environmental change. (social science competency)
- Describe the structure and functioning of major physical and ecological components of the earth's systems. (natural science competency)
- Access and analyze a complex literature addressing specific topics in environmental studies, and evaluate

the usefulness and limitations of individual sources of information. (analytic thinking)

- Demonstrate effective oral and written communication skills. (communication skills).

Major Qualification Policy and Declaration Process

Major Qualification

To qualify to declare the environmental studies/economics combined major, students must complete the specific courses listed below, or their approved equivalents.

One of the following:

ENVS 23	The Physical and Chemical Environment	5
CHEM 1A	General Chemistry	5

Plus one of the following

ENVS 24	General Ecology	5
BIOE 20C	Ecology and Evolution	5

Plus all of the following

ENVS 25	Environmental Policy and Economics	5
ECON 1	Introductory Microeconomics: Resource Allocation and Market Structure	5
AM 11A	Mathematical Methods for Economists I	5

Plus one of the following options

Either this course

STAT 5	Statistics	5
--------	------------	---

or these courses

STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
--------	--	---

STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2
---------	---	---

Determining qualification

- Students who complete all the qualification courses with a grade of P, or letter grade of C or better are eligible to declare a major.
- Students who have received one grade of C-, D+, D, D-, or F in one of the qualification courses taken at UC Santa Cruz will only be eligible to declare after successfully completing the same or an equivalent course with a letter grade of C or better.
- Students with two or more grades of C-, D+, D, D-, or F in the qualification courses taken at UC Santa Cruz are not eligible to declare.
- Students with AP credit for any of the qualification course(s) are eligible to declare after successfully completing the remaining qualification courses.

- Students must attend an Environmental Studies Department declaration workshop when requesting to declare the major.

Appeal Process

Students who are not eligible to declare the major may appeal this decision by submitting an appeal to qualify for the major here within 15 days of the denial of the declaration. Within 15 days of receipt of the appeal, the department will notify the student and college of the decision. If a student has questions about the appeals process, they should contact envsadvi@ucsc.edu.

How to Declare a Major

Students wishing to declare within the Environmental Studies Department should visit the Environmental Studies Department website and follow the steps to declare listed there. Degree requirement sheets may be downloaded from the Environmental Studies Undergraduate Program Requirements page.

Transfer Information and Policy

Transfer Admission Screening Policy

To be considered for admission to UC Santa Cruz in the environmental studies/economics combined majors, transfer students must pass equivalents of the following courses with a C (2.0) or better in these required courses:

One of the following:

ENVS 23 or a general chemistry course (defined in ASSIST)

Plus one of the following:

ENVS 24	General Ecology	5
BIOE 20C	Ecology and Evolution	5

Plus all of the following:

ECON 1 and a course in national or international politics (defined in ASSIST)

Plus one of the following:

AM 11A	Mathematical Methods for Economists I	5
MATH 11A	Calculus with Applications	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

Plus the following:

STAT 5	Statistics	5
--------	------------	---

Prospective transfer students should review transfer information on the environmental studies transfer information.

Students who are proposed in a different major and have advanced standing when they come to UC Santa Cruz require permission from the department to change into the major. Contact envsadvi@ucsc.edu to request permission.

Getting Started at UCSC as a Transfer Student

Transfer students pursuing environmental studies majors are encouraged to transfer in the fall quarter.

Transfer students plan to enroll in ECON 100A or ECON 100M during the summer or fall quarter, and ECON 113 in the winter quarter in order to take ENVS 100 and ENVS 100L in spring quarter of their first year. Transfer students who have completed the screening requirements listed above can formally declare their major, following the steps in How to Declare a Major given above.

ENVS 25 and CHEM 1A are usually offered during Summer Session at UC Santa Cruz, and transfer students are encouraged to take them if they have not completed a substitute requirement or want a better understanding of the relevant material. If you are transferring, compare catalog descriptions, consult your current institution's adviser, and refer to the ASSIST website to determine equivalency. Prospective transfer students should review the transfer information.

Letter Grade Policy

This program does not have a letter grade policy, except that the senior comprehensive requirement must be taken for a letter grade.

Course Substitution Policy

Students pursuing the Environmental Studies/Biology Combined Major cannot substitute courses to count toward their upper division electives.

Double Majors and Major/Minor Combinations Policy

Study Abroad

Environmental studies students are encouraged to study abroad and participate in other off-campus programs. If students are interested in planning to study abroad please note the following policies:

- Students planning to study abroad must be declared in their major prior to studying abroad.
- Students must have their courses they plan to take abroad reviewed and approved by Environmental Studies Advising.
- Environmental studies/biology combined majors cannot petition their courses taken abroad for upper division course substitution.
- For more information on EAP, please visit the UC Education Abroad Program website.

Honors

Departmental Honors. Students must have a 3.5 grade point average (GPA) in all courses used to satisfy the environmental studies upper-division requirements. To be considered for departmental honors, students are limited to no more than one grade of P in those upper-division courses.

Senior Comprehensive Honors. Only applicable to a senior thesis, senior internship, or individual work in a senior seminar. Honors must be awarded by the student's faculty sponsor, and a second faculty member (chosen by the student's faculty adviser) must confer.

Highest Departmental Honors. Students must have a 3.75 grade point average (GPA) in all courses used to satisfy the environmental studies upper-division requirements and must also receive senior comprehensive honors (see above).

Students must fulfill all requirements for honors from environmental studies and biology.

Requirements and Planners

Course Requirements

Lower-Division Courses

All of the following courses

ECON 1	Introductory Microeconomics: Resource Allocation and Market Structure	5
ECON 2	Introductory Macroeconomics: Aggregate Economic Activity	5
AM 11A	Mathematical Methods for Economists I	5
AM 11B	Mathematical Methods for Economists II	5

Plus one of the following options

Either this course		
STAT 5	Statistics	5
or these courses		
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

STAT 7 and STAT 7L must be taken together.

Plus one of the following

ENVS 23	The Physical and Chemical Environment	5
CHEM 1A	General Chemistry	5

Plus one of the following

ENVS 24	General Ecology	5
BIOE 20C	Ecology and Evolution	5

Plus the following

ENVS 25	Environmental Policy and Economics	5
---------	------------------------------------	---

Plus one of the following

ANTH 2	Introduction to Cultural Anthropology	5
PHIL 22	Introduction to Ethical Theory	5
PHIL 24	Introduction to Ethics: Contemporary Moral Issues	5
PHIL 28	Environmental Ethics	5
BME 80G	Bioethics in the 21st Century: Science, Business, and Society	5
SOCY 1	Introduction to Sociology	5
SOCY 10	Issues and Problems in American Society	5
SOCY 15	World Society	5

Upper-Division Courses**One of the following**

ECON 100A	Intermediate Microeconomics	5
ECON 100M	Intermediate Microeconomics, Math Intensive	5

And all of the following

ECON 113	Introduction to Econometrics	5
ENVS 100	Ecology and Society	3
ENVS 100L	Ecology and Society Writing Laboratory	5

Electives

Six upper-division elective courses, three in economics and three in environmental studies.

Economics electives

Economics electives must be chosen from the following list:

ECON 100B	Intermediate Macroeconomics	5
ECON 100N	Intermediate Macroeconomics, Math Intensive	5
ECON 101	Managerial Economics	5
ECON 114	Advanced Quantitative Methods	5
ECON 115	Introduction to Management Sciences	5
ECON 120	Development Economics	5
ECON 128	Poverty and Public Policy	5
ECON 130	Money and Banking	5
ECON 131	International Financial Markets	5
ECON 133	Security Markets and Financial Institutions	5
ECON 135	Corporate Finance	5
ECON 136	Business Strategy	5
ECON 138	The Economics and Management of Technology and Innovation	5
ECON 139A	The Economics of Electronic Commerce	5
ECON 139B	E-Commerce Strategy	5
ECON 140	International Trade	5
ECON 141	International Finance	5
ECON 142	Advanced Topics in	5

ECON 150	International Economics	5
ECON 156	Public Finance	5
ECON 159	Health Care and Medical Economics	5
ECON 160A	The Economics of Organizations	5
ECON 160B	Industrial Organization	5
ECON 161A	Government and Industry	5
ECON 162	Marketing	5
ECON 165	Legal Environment of Business	5
ECON 169	Economics as an Experimental Science	5
ECON 175	Economic Analysis of the Law	5
ECON 180	Energy Economics	5
ECON 183	Labor Economics	5
	Women in the Economy	5

Environmental studies electives

Environmental studies electives must be chosen from those numbered ENVS 101-ENVS 179, with at least one course based in the natural sciences selected from the following upper-division courses (lecture and lab combinations count as a single course):

ENVS 104A	Introduction to Environmental Field Methods	5
ENVS 104L	Field Methods Laboratory	2
ENVS 106A	Natural History of Birds	5
ENVS 107A	Natural History Field Quarter	5
ENVS 107B	Natural History Field Quarter	5
ENVS 107C	Natural History Field Quarter	5
ENVS 108	General Entomology	5
ENVS 108L	General Entomology Laboratory	3
BIOE 151A	Ecology and Conservation in Practice Supercourse: Ecological Field Methods	5
BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
BIOE 151C	Ecology and Conservation in Practice Supercourse: Functions and Processes of Terrestrial Ecosystems	5
BIOE 151D	Ecology and Conservation in Practice Supercourse: Conservation in Practice	4
ENVS 120	Conservation Biology	5
ENVS 121	Landscape Ecology	5
ENVS 122	Tropical Ecology and Conservation	5
ENVS 123	Animal Ecology and Conservation	5
BIOE 125	Ecosystems of California	5
ENVS 129	Integrated Pest Management	5
ENVS 129L	Integrated Pest Management Laboratory	2
ENVS 130A	Agroecology and Sustainable Agriculture	5
ENVS 130L	Agroecology and Sustainable Agriculture Laboratory	2

ENVS 130C	Field Experiences in Agroecology and Sustainable Food	5
ENVS 131	Insect Ecology	5
ENVS 133	Agroecology Practicum	5
ENVS 138	Field Ethnobotany	5
ENVS 160	Restoration Ecology	5
ENVS 161A	Soils and Plant Nutrition	5
ENVS 161L	Soils and Plant Nutrition Laboratory	2
ENVS 162	Plant Physiological Ecology	5
ENVS 162L	Plant Physiological Ecology Laboratory	2
ENVS 163	Plant Disease Ecology	5
ENVS 163L	Plant Disease Ecology Lab	2
ENVS 164	Projects and Practices in Soil Ecology	5
ENVS 166	Agroecosystem Analysis and Watershed Management	5
ENVS 167	Freshwater and Wetland Ecology	5
ENVS 167L	Freshwater and Wetland Ecology Lab	2
ENVS 168	Biogeochemistry and the Global Environment	5
ENVS 169	Climate Change Ecology	5
ENVS 170	Agriculture and Climate Change	5

None of the three environmental studies upper-division courses can be an environmental studies internship, individual study or substitution course.

A list of all courses offered by the Environmental Studies Department is available here (p. 774). A list of which upper-division courses offered in the current year by the Environmental Studies Department are based in the natural sciences and in the social sciences is available here.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement for the environmental studies/economics combined major is satisfied by completing:

The following courses:

ENVS 100	Ecology and Society	3
ENVS 100L	Ecology and Society Writing Laboratory	5

Plus one of the following

BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
ENVS 183B	Senior Internship	5
ENVS 190	Capstone Course: Environmental Problem Solving	5
ENVS 195B	Senior Thesis Group	5

ENVS 196	Senior Seminar	5
----------	----------------	---

Students taking the cross-listed course BIOE 151B/ENVS 109B are recommended to enroll in ENVS 109B.

ENVS 183B and ENVS 195B are usually taken after successfully completing ENVS 183A and ENVS 195A respectively.

Comprehensive Requirement

Students satisfy the senior comprehensive requirement by completing both of the following:

- One of the options for environmental studies B.A.; and
- Pass those portions of the economics comprehensive examination administered in ECON 100A and ECON 113.

The senior comprehensive may be satisfied by completing one of the options listed below. All courses used to satisfy the senior comprehensive requirement must be taken for a letter grade.

Before enrolling in the senior thesis or senior internship option, students must formally apply to work with a particular faculty mentor very early in their thesis or project preparation. The senior thesis and senior internship option require careful planning, additional independent research, and at least a two-quarter commitment.

Students with advanced skills in one of the graduate focal areas may also take a graduate seminar by invitation from the instructor.

Either this course

BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
-----------	---	---

or these courses

ENVS 183A	Senior Internship	5
ENVS 183B	Senior Internship	5

or this course

ENVS 190	Capstone Course: Environmental Problem Solving	5
----------	--	---

or these courses

ENVS 195A	Senior Research	5
ENVS 195B	Senior Thesis Group	5
ENVS 196	Senior Seminar	5

Students taking the cross-listed course BIOE 151B/ENVS 109B are recommended to enroll in ENVS 109B.

ENVS 190 is offered in the spring and summer.

ENVS 183B and ENVS 195B are usually taken after successfully completing ENVS 183A and ENVS 195A

respectively.

Planners

The following are two sample academic plans for students pursuing the environmental studies B.A. major without a concentration. Plan One is for incoming frosh and Plan Two is for incoming transfer students.

Plan One for Incoming Frosh

	Fall	Winter	Spring
1st (frosh)	<u>MATH 3</u> or <u>AM 3</u>	<u>ENVS 25</u> <u>ECON 1</u>	<u>ENVS 23</u> or <u>CHEM 1A</u> <u>ECON 2</u>
2nd (soph)	<u>ENVS 24</u> or <u>BIOE 20C</u> <u>AM 11A/ECON 11A</u>	<u>STAT 5</u> or <u>STAT 7 & STAT 7L</u> <u>AM 11B/ECON 11B</u>	SOCY/ANTH/ethics course <u>ECON 100A</u> or <u>ECON 100M</u>
3rd (junior)	<u>ECON 113</u>	<u>ENVS 100 & ENVS 100L*</u> Upper-division ECON	Upper-division ENVS (natural science) Upper-division ECON
4th (senior)	Upper-division ENVS Upper-division ECON	Upper-division ENVS	Comprehensive requirement

*This course is also offered in the spring term.

Students completing this major will have satisfied the SI, IN, PE-E, IS, PE-H, MF, and PR-E general education requirements. In addition, they will need to fulfill all remaining university, college, and general education requirements.

Plan Two for Incoming Transfer Students

	Fall	Winter	Spring
3rd (junior)	<u>ECON 100A</u> or <u>ECON 100M</u>	<u>ECON 113</u> Upper-division ECON	Upper-division ENVS (natural sciences) <u>ENVS 100 & ENVS 100L</u>

Upper-division ENVS

Upper-division ENVS

Comprehensive requirement

4th

(senior)

Upper-division ECON

Upper-division ECON

This planner assumes that a student has completed all required lower-division courses—including UCSC or community college general education requirements.

A transfer student who has completed the requirements for the Intersegmental General Education Transfer Curriculum (IGETC) before matriculating at UC Santa Cruz, with at most two course requirements left to complete, is allowed to satisfy IGETC in lieu of the UCSC general education requirements.

ENVIRONMENTAL STUDIES COURSE LISTS

Pre-Approved Upper-Division Substitutions for ENVS Single Majors

Course Lists

Anthropology

ANTH 110E	Anthropology of Global Environmental Change	5
ANTH 110W	Land and Waterscapes Entropology	5
ANTH 111	Human Ecology	5

Latin American and Latino Studies

32 Merrill Academic Building
(831) 459-4284

PROGRAMS OFFERED

Latin American and Latino Studies B.A. (p. 530)

Latin American and Latino Studies/Politics Combined Major (p. 534)

Latin American and Latino Studies/Sociology Combined Major (p. 537)

Latin American and Latino Studies Minor (p. **Error! Bookmark not defined.**)

Latin American and Latino Studies Ph.D. (p. 540)

Latin American and Latino Studies Designated Emphasis (p. 542)

LALS is the combination of Latin American studies and Latina/o/x studies. LALS is grounded on the understanding that U.S. Latina/o/x, Chicana/o/x and Latin American peoples, subjects, histories and processes are interrelated. It is an area of study that draws from disciplines and fields. Our disciplines include sociology, history, anthropology, political science, economics, environmental studies, and literature. Our fields include ethnic studies, migration studies, environmental studies, media studies, communications, cultural studies, feminist studies, and health studies. Our focus is across the Américas, and our mission is driven by a deep commitment to activist scholarship, engaged teaching, and social justice.

Undergraduate Program

The Latin American and Latino studies (LALS) Department prepares students to be active global citizens, engaged in rigorous educational study with "real world" applications. Our students become committed scholars who want to better understand the roots of major issues like inequality, rights, oppression, globalization, and migration—and to learn about effective strategies for addressing them through a variety of fields and disciplines. Our students take seriously the importance of understanding others from a variety of perspectives, and engaging peoples and ideas through several languages including English, Spanish, and Portuguese. LALS students learn about the historical, economic, social, political, and cultural processes that are shaping and transforming the Américas. Our majors graduate with a commitment to social change with tools to help make our world a just place for all.

LALS is for students interested in better understanding the Américas. It is for students who 1) want to learn from multiple perspectives and work directly with faculty; 2) are interested in ethnic studies, Latin America, human rights, and

social change; and, 3) want to know about the roles various countries, peoples, and cultures have played in shaping Latina/o/x and Latin America today. LALS students have the opportunity to take major courses in Spanish, English, and Portuguese. Our majors study topics, concepts, and theories grounded in the Américas to learn about local, regional, global, and transnational dimensions shaping our world. LALS students often become involved in local communities, in Santa Cruz County, and in their hometowns. They strive to build the community resources and opportunities that help everyone thrive.

LALS is for students who want flexibility in pursuing educational opportunities within their degree coursework. The interdisciplinary structure of our major encourages students to explore many different kinds of courses, opportunities, and programs. Many of our students combine their study with other majors in the social sciences, humanities, arts, and sciences. LALS also encourages transfer students and works closely with them to ensure their success in the major. There are no specific high school-level courses required for admission to the major in LALS at UCSC, but we encourage you to embrace as much language preparation as possible.

LALS students learn about individual countries of the Américas; about historical and contemporary issues, processes, and cultures; about migration, transnationalism, intersectionality, inequality, collective action, social movements, power and culture; and about strategies and solutions for addressing questions of rights, advocacy, and justice. LALS students investigate the historical, political, economic, social, and cultural processes that are shaping and transforming the Américas region. By viewing societies as interrelated—specifically U.S. Latino/a communities and Latin American/Caribbean communities—LALS students learn to analyze from multiple perspectives, to understand imperialism and colonialism, and to clarify local, regional, global, and transnational dimensions affecting the histories, politics, and cultures of the hemisphere.

In addition to academic knowledge, LALS supports and encourages students to pursue opportunities to acquire practical skills. Through internships and field study experiences, students can acquire useful, pre-professional skills in key areas, such as political advocacy, community development, public policy, education, legal services, and research.

Graduates of the LALS major have forged careers in a wide variety of fields, including environmental activism, community organizing, teaching, health care, legal services, politics and government service, and journalism. Many have gone on to pursue advanced degrees in the U.S. or abroad in fields such as law, anthropology, bilingual education, media, communications, cultural studies, ecology, economics, geography, history, literature, educational counseling, public health, and sociology. LALS majors graduate with knowledge, skills, and understandings that propel them forward into exciting careers grounded in justice, rights, and creating social change.

LATIN AMERICAN AND LATINO

STUDIES B.A.

Information and Policies

Introduction

A degree in Latin American and Latino studies (LALS) trains students to be critical and analytical thinkers, to be active, engaged global citizens, and to be skilled strategic activists in making the world a more just place for all. An LALS bachelor of arts (B.A.) prepares students to learn from and work with people from a variety of cultures and perspectives, to understand the complexity of our current political, social, and cultural moment, and to use skills from many disciplines and fields.

Academic Advising for the Program

LALS Undergraduate Adviser and Program Coordinator
32 Merrill Academic Building
(831) 459-2119
lalsadvising@ucsc.edu

Getting Started in the Major

Students interested in the LALS B.A. are encouraged to enroll in LALS 1, Introduction to Latin American and Latino Studies, at their earliest opportunity.

Program Learning Outcomes

All students completing a degree in Latin American and Latino Studies will have proficiency or competency in the following five areas: critical thinking, research methods, communication, language, and lifelong learning skills.

1. **Critical Thinking.** Ability to analyze from a transnational/transborder/translocal perspective—to see the interconnections between Latin American and Latino issues, people, ideas, problems, and solutions. This includes key skills, such as understanding sources, comparing arguments, analysis, and historical perspective.
2. **Research Methods.** Working knowledge of social scientific and/or humanistic approaches to LALS relevant topics. This includes acquiring qualitative and quantitative skills, gathering or obtaining research data, finding/using primary sources, and other research methods.
3. **Communication.** Key communication skills, including written, oral presentation, and digital, including an understanding of media sources and ability to apply media literacy to cross-cultural analysis.
4. **Language.** Fluency in Spanish and/or Portuguese, in addition to English.
5. **Lifelong Learning Skills.** Acquisition of practical hands-on skills in community engagement, cross-cultural fluency, familiarity with Latin America, and familiarity with Latino experience acquired through

experiential learning while working with community and civic organizations.

Major Qualification Policy and Declaration Process

Major Qualification

To declare an LALS major, students must successfully complete any one LALS course with a grade of C or better. For an overview of the program, students are encouraged to enroll in LALS 1, Introduction to Latin American and Latino Studies, as their first course.

Appeal Process

Students who are notified they are not eligible to declare major appeal this decision by submitting a letter of appeal to the department chair within 15 days. Within 15 days of receipt of the appeal letter, the department will notify the student and their college of the appeal decision.

How to Declare a Major

Students may declare online, via the form on our department website, or in person, in the LALS Advising Office in Merrill Academic Building.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

LALS welcomes transfer students. Students interested in transferring to UCSC as an LALS major are encouraged to enroll in courses related to the discipline prior to transfer.

Getting Started at UCSC as a Transfer Student

Transfer students should enroll in LALS 1, Introduction to Latin American and Latino Studies, at the earliest opportunity. LALS 1 is offered in fall and winter quarters and during Summer Session. To make timely progress in the major, transfer students should enroll in LALS 1 and the first course in our core series, LALS 100, Concepts and Theories in Latin American and Latino Studies, in their first quarter.

Course Substitution Policy

Students may substitute two courses taken outside of LALS when satisfying the requirements for the major. Students studying abroad may substitute a maximum of three courses from outside LALS. No substitutions are permitted for our core curriculum: LALS 1, LALS 100, LALS 100A, and LALS 100B. See the undergraduate adviser for more information.

Study Abroad

Students may study abroad through UC Santa Cruz faculty-led programs, the University of California Education Abroad Program (UCEAP), other UC study abroad programs, or through non-UC programs. UCEAP offers opportunities for

students to study in Buenos Aires, Argentina; Mexico City and Oaxaca, México; Villarrica and Santiago, Chile; Rio de Janeiro, Brazil; and Madrid, Córdoba, Granada, and Barcelona in Spain. In addition to language and culture and university immersion programs, UCEAP also offers a field research program in México, which is an experiential program geared toward juniors and seniors who want to explore the “real” México outside the classroom and at the same time receive undergraduate research training. The program has research sites in states such as Chiapas, Yucatán, Oaxaca, and Michoacán (final site choice depends on the research topic). There is also a leadership in social justice and public policy, México City and Sacramento program. In this amazing program students study abroad in the capital of México and then add a related internship in Sacramento.

Application deadlines are generally about one year in advance of the program, so students should visit global engagement early to plan for study abroad and to begin the application process. The department will consider by petition the approval of courses taken abroad, whether through UCEAP or through non-UC programs, that cover topics appropriate to the LALS curriculum for upper-division credit toward the major. All credit for UCEAP classes is fully incorporated into students’ UCSC transcripts; students receive transfer credit for independent study abroad programs. Financial aid may apply to all study abroad programs, which take into account airfare and living costs in addition to tuition and fees. Before departure, students should present an academic plan for courses abroad to the department adviser for review. Credit for up to three UCEAP courses can be applied toward the major when courses are approved by the department. (A maximum of three courses of field study and UCEAP combined can be applied toward the major requirements.)

Honors

The LALS faculty considers awarding honors in the major based on overall student academic performance in courses that count toward the major. To receive the strongest consideration for honors in the major the following grade point average (GPA) criteria must be met: highest honors, 4.0; honors, 3.7. Students with a 3.5–3.7 GPA in the major will also be considered, and a decision is made based on their grades in core courses and improvement over time.

In addition to honors in the major, LALS may award honors for a thesis, or creative or community action project, or student-taught seminar, by the recommendation of the faculty adviser.

Students may qualify for both honors in the major and honors for a thesis, project, or student-taught seminar. Expanded papers and senior seminars do not qualify for a separate honors designation, but students who choose these options may still qualify for honors in the major.

Field-Study and Internship Opportunities

All majors are encouraged to undertake either a field study in Latin America, the Caribbean, a Latino/a community in the U.S., or formal academic study abroad through the Education Abroad Program (EAP). These paths are the best ways to

improve language skills, to explore the nature and direction of specific academic and career interests in relation to Latin American and Latino studies, and to deepen cross-cultural understanding and relationships.

Field studies are independent, community-based study projects for academic credit, done under faculty sponsorship and arranged on an individual basis. Local opportunities for internships and field study in Latino/a communities on California’s Central Coast are numerous. Credit for up to three upper-division courses may be applied toward the major from field study; however, course credit from field study and study abroad combined may not exceed three upper-division courses. Students should check the Latin American and Latino Studies Department website for further information regarding the field-study process and course credit. A listing of local field-study programs and petition forms are available at the Latin American and Latino Studies Department office, 32 Merrill.

Requirements and Planners

Course Requirements

The LALS B.A. major requires 11 courses: two lower-division, three upper-division core, and six upper-division electives.

Lower-Division Requirements

Two Lower-Division Courses

All students are required to take LALS 1, Introduction to Latin American and Latino Studies, and one additional lower-division Latin American and Latino studies course. These courses are normally taken during the student’s first year.

Language Preparation

In preparation for taking upper-division coursework taught in Spanish or Portuguese, students are expected to become proficient in either or both languages. To demonstrate proficiency in Spanish, students should complete courses through SPAN 6 or SPHS 6. To demonstrate proficiency in Portuguese, students should complete courses through PORT 65B.

Students who are fluent in Spanish or Portuguese may be exempt from this recommended preparatory coursework after demonstration of their proficiency.

For language placement, visit the Languages and Applied Linguistics language placement links for Spanish and/or Portuguese.

Upper-Division Requirements

Three Upper-Division LALS Core Courses

All majors must complete these three core courses:

LALS 100	Concepts and Theories in Latin American and Latina/o Studies	5
LALS 100A	Social Science Analytics	5

LALS 100B	Cultural Theory in the Americas	5
-----------	---------------------------------	---

Six Additional LALS Electives

Of the six required electives, two of these upper-division courses must be courses conducted in Spanish or Portuguese. Students can fulfill this language requirement through taking courses offered by the LALS Department, by other units at UC Santa Cruz, or an appropriate course taken while participating in a study abroad program.

One LALS elective may be satisfied by completing a senior seminar (LALS 194 series).

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement for the Latin American and Latino Studies B.A. is met by completing:

LALS 100A	Social Science Analytics	5
LALS 100B	Cultural Theory in the Americas	5

Comprehensive Requirement

Each student must complete a senior comprehensive requirement to graduate. The preparation and completion of this requirement is structured into the senior year, and the requirement is fulfilled by one of the following four options:

1. Passing a Latin American and Latino studies senior seminar (LALS 194 series). In these courses, students must write at least 30 pages cumulatively during the quarter. The final paper must be based on independent scholarly research, demonstrate advanced skills in critical analysis, and have undergone revisions. Senior standing and completion of LALS 100A and LALS 100B are required before taking a LALS 194 course for fulfillment of the senior exit requirement.
2. An expanded research paper, a minimum of 20 pages in length. This paper often builds on related course work and requires approval from the relevant faculty adviser before the end of the winter quarter of the senior year. Students must be enrolled in an independent study tutorial to complete this paper.
3. A senior thesis, generally between 40–60 pages, based on two or more quarters of sustained independent research under the supervision of the faculty adviser while enrolled in an independent study (done by petition to LALS, and with the approval of the faculty adviser). If the thesis option is selected by a combined major, it should be planned in consultation with an adviser from each department, completed under the supervision of a faculty member from either department, and read and approved by both advisers; one adviser is sufficient if this faculty member is affiliated with both departments. This option is recommended for those students seeking to enter graduate school.

4. A senior project, which can be either a creative project or a community-action project. Creative projects include website design, video, performance, slide show, photo exhibit, or other media work. A short written analysis of the student's experience in conducting the project is required. Community-action projects often involve sustained research and/or activity conducted in a community organization or public interest group, usually stemming from an internship. The required, short, written analysis has to be 10 pages minimum.

Planners

Recommended academic plan for students starting as freshmen who place in to SPAN 1 on the language placement exam. Portuguese language track in parentheses for students who choose this option.

	Fall	Winter	Spring
1st (frosh)	LALS 1*	SPAN 2 (PORT 2)	LALS lower-division elective
	SPAN 1 (PORT 1)		SPAN 3 (PORT 3)
2nd (soph)	LALS 100*	LALS 100A	LALS 100B
	SPAN 4** (PORT 65A)	SPAN 5** (PORT 65B)	SPAN 6**
3rd (jr)	LALS upper-division elective	LALS upper-division elective	LALS upper-division elective
	LALS language elective	LALS language elective	LALS 194
4th (sr)	Study abroad, research, or additional major or minor		

*both courses satisfy the ER general education requirement.

**Native speakers can substitute Spanish for Heritage Speaker series, SPHS 4, SPHS 5, and SPHS 6.

Recommended academic plan for students starting as juniors and who place into Spanish 4 on the language placement exam.

	Fall	Winter	Spring
1st (jr)	LALS 1*	LALS 100A	LALS 100B
	LALS 100*	LALS upper-division elective	LALS upper-division elective
	SPAN 4** (PORT 65A)	SPAN 5** (PORT 65B)	SPAN 6**
2nd (sr)	LALS upper-division elective	LALS language elective	LALS 194
	LALS language elective		

*both courses satisfy the ER general education requirement.

**Native speakers can substitute Spanish for Heritage Speaker series, SPHS 4, SPHS 5, and SPHS 6.

LATIN AMERICAN AND LATINO STUDIES/POLITICS COMBINED B.A.

A combined degree in Latin American and Latino studies (LALS) and politics allows students to combine their interest in Latina/o/x studies and Latin American studies with politics. Students are able to focus on the methods and theories of the discipline of political science within the broader interdisciplinary field of LALS.

lalsadvising@ucsc.edu

Politics Undergraduate Coordinator:
25 Merrill College
(831) 459-2505
gdiaz5@ucsc.edu

Getting Started in the Major

Students interested in the LALS and politics combined B.A. are encouraged to enroll in LALS 1, Introduction to Latin American and Latino Studies, and one lower-division politics course, chosen from POLI courses 1-79, at their earliest opportunity.

Program Learning Outcomes

Latin American and Latino Studies Program Learning Outcomes:

We expect that all graduating LALS seniors will have gained proficiency or competency in the following five areas: critical thinking, research methods, communication, language, and lifelong learning skills.

1. **Critical Thinking.** Ability to analyze from a transnational/transborder/translocal perspective—to see the interconnections between Latin American and Latino issues, people, ideas, problems and solutions. This includes key skills, such as understanding sources, comparing arguments, analysis, and historical perspective.
2. **Research Methods.** Working knowledge of social scientific and/or humanistic approaches to LALS relevant topics. This includes acquiring qualitative and quantitative skills, gathering or obtaining research data, finding/using primary sources, and other research methods.
3. **Communication.** Key communication skills, including written, oral presentation, and digital, including an understanding of media sources and ability to apply media literacy to cross-cultural analysis.
4. **Language.** Fluency in Spanish and/or Portuguese, in addition to English.
5. **Lifelong Learning Skills.** Acquisition of practical hands-on skills in community engagement, cross-cultural fluency, familiarity with Latin America, and familiarity with Latino experience acquired through experiential learning, and working with community and civic organizations.

Politics Program Learning Outcomes:

Upon completion of the major, students will have met the following objectives:

1. Understand the origins, development, and nature of political institutions, practices, and ideas;
2. Place particular political phenomena in broader context (national, historical, cross-cultural, and theoretical, etc);
3. Demonstrate familiarity with various theoretical approaches to the study of politics, and their application in different geographic and substantive areas;
4. Critically evaluate arguments about political institutions, practices, and ideas based on logic and evidence;
5. Develop and sustain coherent written and oral arguments regarding political phenomena, theories, and values based on appropriate empirical and/or textual evidence and logic.

Major Qualification Policy and Declaration Process

Major Qualification

Students must complete a lower-division politics course, chosen from POLI 1-79, and LALS 1, with a grade of C or better, and both departments must approve a study plan before the major can be declared.

Appeal Process

Students who are notified they are not eligible to declare major appeal this decision by submitting a letter of appeal to the department chair within 15 days of notification. Within 15 days of receipt of the appeal letter, the department will notify the student and their college of the appeal decision.

How to Declare a Major

Students must follow the declaration procedure for both LALS and politics, beginning with the Politics Department. Find more information on department websites or by speaking with the LALS or politics undergraduate adviser.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

LALS welcomes transfer students. Students interested in transferring in to UCSC as a LALS and politics combined major are encouraged to enroll in courses related to both disciplines prior to transfer.

Getting Started at UCSC as a Transfer Student

Transfer students must complete LALS 1, Introduction to Latin American and Latino Studies, and one politics course, POLI 1-79, (or transferred in with equivalent credit) to declare the LALS/politics combined major. LALS 1 is offered in fall and winter quarters and during Summer Session. To make timely progress in the major, transfer students should enroll in LALS 1 and the first course in our core series, LALS 100, Concepts and Theories in Latin American and Latino Studies, in their first quarter.

Honors

For combined majors, academic performance must meet the criteria in both departments to be awarded honors. Honors can only be conferred if both departments agree.

For LALS, honors are awarded based on performance in courses taken for the major. Students who achieve a 3.7 or higher in their coursework are awarded honors; those who achieve a 4.0 are awarded highest honors.

LALS also awards honors for the thesis, or creative or community action projects by the recommendation of the faculty adviser.

For Politics, honors are awarded to graduating seniors, based primarily on a review of grades, whose academic performance is judged to be consistently excellent by a committee of politics faculty. Highest honors in the major are reserved for students with consistently outstanding academic performance.

Requirements and Planners

Course Requirements

A total of 12 courses is required for the LALS and politics combined B.A., in addition to any language preparation needed.

Lower-Division Requirements

For the combined major, students must complete two lower-division courses: LALS 1 and one course from politics, POLI 1-79, or their equivalents.

Language Preparation

In preparation for taking upper-division coursework taught in Spanish or Portuguese, students are expected to become proficient in either or both languages. To demonstrate proficiency in Spanish, students should complete courses through SPAN 6 or SPHS 6. To demonstrate proficiency in Portuguese, students should complete courses through PORT 65B.

Students who are fluent in Spanish or Portuguese may be exempt from this recommended preparatory coursework after demonstration of their proficiency. For language placement, visit the

Languages and Applied Linguistics Department's language placement links for Spanish and/or Portuguese.

Upper-Division Requirements

LALS 100	Concepts and Theories in Latin American and Latina/o Studies	5
LALS 100A	Social Science Analytics	5
LALS 100B	Cultural Theory in the Americas	5
POLI 140C	Latin American Politics	5

Six Upper-Division Electives

Four from Politics

Three chosen from these options:		
POLI 105A	Ancient Political Thought	5
POLI 105B	Early Modern Political Thought	5
POLI 105C	Modern Political Thought	5
POLI 120A	Congress, President, and the Court in American Politics	5
POLI 120B	Society and Democracy in American Political Development	5
POLI 120C	State and Capitalism in American Political Development	5

POLI 140A	European Politics	5
POLI 140C	Latin American Politics	5
POLI 140D	Politics of East Asia	5
POLI 160A	Theories of International and World Politics	5
POLI 160B	International Law	5
POLI 160C	Security, Conflict, Violence, War	5
POLI 160D	International Political Economy	5

Two from LALS

One elective must be in Spanish or Portuguese.

One LALS elective may be satisfied by completing a senior seminar (LALS 194 series).

Disciplinary Communication (DC) Requirement

Students of every major must satisfy a disciplinary communication (DC) requirement. The DC requirement for the LALS and politics combined B.A. is met by completing:

LALS 100A	Social Science Analytics	5
LALS 100B	Cultural Theory in the Americas	5

Comprehensive Requirement

Each student must complete a senior comprehensive requirement to graduate. The preparation and completion of this requirement is structured into the senior year, and the requirement is fulfilled by one of the following four options:

1. Passing a Latin American and Latino studies senior seminar (LALS 194 series). In these courses, students must write at least 30 pages cumulatively during the quarter. The final paper must be based on independent scholarly research, demonstrate advanced skills in critical analysis, and have undergone revisions. Senior standing and completion of LALS 100A and LALS 100B are required before taking a LALS 194 course for fulfillment of the senior exit requirement.
2. An expanded research paper, a minimum of 20 pages in length. This paper often builds on related coursework and requires approval from the relevant faculty adviser before the end of the winter quarter of the senior year. Students must be enrolled in an independent study tutorial to complete this paper.
3. A senior thesis, generally between 40–60 pages, based on two or more quarters of sustained independent research under the supervision of the faculty adviser while enrolled in an independent study (done by petition to LALS, and with the approval of the faculty adviser). If the thesis option is selected by a combined major, it should be planned in consultation with an adviser from each department, completed under the supervision of a faculty member from either department, and read and approved by both advisers; one adviser is sufficient if this faculty member is affiliated with both departments. This option is recommended for those students seeking to enter graduate school.

4. A senior project, which can be either a creative project or a community-action project. Creative projects include website design, video, performance, slide show, photo exhibit, or other media work. A short written analysis of the student's experience in conducting the project is required. Community-action projects often involve sustained research and/or activity conducted in a community organization or public interest group, usually stemming from an internship. The required, short, written analysis has to be 10 pages minimum.

Planners

LATIN AMERICAN AND LATINO STUDIES/SOCIOLOGY COMBINED B.A.

A combined degree in Latin American and Latino studies (LALS) and sociology allows students to combine their interest in Latina/o/x studies and Latin American studies with sociology. Students are able to focus on the methods and theories of the discipline of sociology within the broader interdisciplinary field of LALS.

Information and Policies

Academic Advising for the Program

LALS Undergraduate Adviser and Program Coordinator:
32 Merrill Academic Building
(831) 459-2119
lalsadvising@ucsc.edu

Sociology Undergraduate Adviser and Program Coordinator:
Rachel Carson College Rm 224/226
831-459-4497
socy@ucsc.edu

Getting Started in the Major

Students interested in the LALS/sociology B.A. are encouraged to enroll in LALS 1, Introduction to Latin American and Latino Studies, and two of the required lower-division sociology courses - chosen from SOCY 1, 10, or 15 - at their earliest opportunity.

Program Learning Outcomes

LALS Program Learning Outcomes:

We expect that all graduating LALS seniors will have gained proficiency or competency in the following five areas: critical thinking, research methods, communication, language, and lifelong learning skills.

1. **Critical Thinking.** Ability to analyze from a transnational/transborder/translocal perspective—to see the interconnections between Latin American and Latino issues, people, ideas, problems and solutions. This includes key skills, such as understanding sources, comparing arguments, analysis, and historical perspective.
2. **Research Methods.** Working knowledge of social scientific and/or humanistic approaches to LALS relevant topics. This includes acquiring qualitative and quantitative skills, gathering or obtaining research data, finding/using primary sources, and other research methods.
3. **Communication.** Key communication skills, including written, oral presentation, and digital, including an understanding of media sources and ability to apply media literacy to cross-cultural analysis.
4. **Language.** Fluency in Spanish and/or Portuguese, in addition to English.
5. **Lifelong Learning Skills.** Acquisition of practical hands-on skills in community engagement, cross-cultural fluency, familiarity with Latin America, and familiarity with Latino experience acquired through experiential learning while working with community and civic organizations.

Sociology Program Learning Outcomes:

Students graduating with a bachelor of arts degree in sociology will:

Demonstrate critical thinking and critical citizenship skills intended to promote social justice through the ability to analyze and evaluate social, political, and/or cultural arguments.

Demonstrate sociological understandings of phenomena, for example, how individual biographies are shaped by social structures, social institutions, cultural practices, and multiple axes of difference and/or inequality.

Formulate effective and convincing written and/or oral arguments.

Demonstrate an understanding of, and the ability to use, several of the major classical and/or contemporary perspectives in social theory.

Demonstrate an understanding of several of the major social science research methodologies.

Demonstrate knowledge of some of the key substantive areas within the field of sociology.

Major Qualification Policy and Declaration Process

Major Qualification

Students must complete the lower-division sociology courses, two chosen from SOCY 1, SOCY 10, or SOCY 15, and LALS

1 with a grade of C or better, and both departments must approve a study plan before the major can be declared.

Appeal Process

Students who are notified they are not eligible to declare major appeal this decision by submitting a letter of appeal to the department chair within 15 days of notification. Within 15 days of receipt of the appeal letter, the department will notify the student and their college of the appeal decision.

How to Declare a Major

Students must follow the declaration procedure for both LALS and sociology, beginning with the Sociology Department. Find more information on department websites or by speaking with the LALS or sociology undergraduate adviser.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

LALS welcomes transfer students. Students interested in transferring in to UCSC as a LALS and sociology combined major are encouraged to enroll in courses related to both disciplines prior to transfer. Visit Assist.org to review our transfer articulations.

Getting Started at UCSC as a Transfer Student

Transfer students must complete LALS 1, Introduction to Latin American and Latino Studies, and two courses chosen from SOCY 1, SOCY 10, or SOCY 15 (or transferred in with equivalent credit) to declare the LALS/sociology combined major. LALS 1 is offered in fall and winter quarters and during Summer Session. To make timely progress in the major, transfer students often opt to enroll in LALS 1 and the first course in our core series, LALS 100, Concepts and Theories in Latin American and Latino Studies, in their first quarter.

Honors

For combined majors, academic performance must meet the criteria in both departments to be awarded honors. Honors can only be conferred if both departments agree.

For LALS, honors are awarded based on performance in courses taken for the major. Students who achieve a 3.7 or higher in their coursework are awarded honors; those who achieve a 4.0 are awarded highest honors. LALS also awards honors for the thesis, or creative or community action projects by the recommendation of the faculty adviser.

For sociology, honors are awarded based on the student's cumulative GPA for all courses taken to satisfy the program's major requirements, excluding the comprehensive requirement. Students with a GPA of 3.75 or above will be considered for honors in the major. Students with a GPA of 3.9 or above will be considered for highest honors in the

major. No more than approximately 15 percent of the graduating class will be considered for honors or highest honors in the major. Comprehensive honors is awarded to students who complete the senior thesis option, and their faculty thesis sponsor and one additional reader evaluate the thesis to be of honors quality.

Requirements and Planners

Course Requirements

A total of 12 courses is required for the LALS and sociology combined B.A., in addition to any language preparation needed.

Lower-Division Requirements

Students must complete three courses, one LALS and two sociology, or their articulated equivalents.

LALS 1	Introduction to Latin American and Latino Studies	5
--------	---	---

And select two from the following three options:

SOCY 1	Introduction to Sociology	5
SOCY 10	Issues and Problems in American Society	5
SOCY 15	World Society	5

Language Preparation

In preparation for taking upper-division coursework taught in Spanish or Portuguese, students are expected to become proficient in either or both languages. To demonstrate proficiency in Spanish, students should complete courses through SPAN 6 or SPS 6. To demonstrate proficiency in Portuguese, students should complete courses through PORT 65B.

Students who are fluent in Spanish or Portuguese may be exempt from this recommended preparatory coursework after demonstration of their proficiency.

For language placement, visit the Languages and Applied Linguistics Department's language placement links for Spanish and/or Portuguese.

Upper-Division Requirements

Upper-division core courses:

LALS 100	Concepts and Theories in Latin American and Latina/o Studies	5
LALS 100A	Social Science Analytics	5
LALS 100B	Cultural Theory in the Americas	5
SOCY 105A	Classical Social Theory	5
SOCY 105B	Contemporary Social Theory	5

Upper-division elective courses:

Four additional upper-division electives are required, two from sociology and two from Latin American and Latino studies. LALS and sociology combined majors must take at least one upper-division course taught in Spanish or Portuguese.

One LALS elective may be satisfied by completing a senior seminar (LALS 194 series).

Disciplinary Communication (DC) Requirement

Students of every major must satisfy a disciplinary communication (DC) requirement. The DC requirement for the LALS and sociology combined B.A. is met by completing:

LALS 100A	Social Science Analytics	5
LALS 100B	Cultural Theory in the Americas	5

Comprehensive Requirement

Each student must complete a senior comprehensive requirement to graduate. The requirement is fulfilled by one of the following options:

1. Passing a Latin American and Latino studies senior seminar (LALS 194 series). In these courses, students must write at least 30 pages cumulatively during the quarter. The final paper must be based on independent scholarly research, demonstrate advanced skills in critical analysis, and have undergone revisions. Senior standing and completion of LALS 100A and LALS 100B are required before taking a LALS 194 course for fulfillment of the senior exit requirement.
2. A senior thesis, generally between 40–60 pages, based on two or more quarters of sustained independent research under the supervision of the faculty adviser while enrolled in an independent study (done by petition to LALS, and with the approval of the faculty adviser). If the thesis option is selected by a combined major, it should be planned in consultation with an adviser from each department, completed under the supervision of a faculty member from either department, and read and approved by both advisers; one adviser is sufficient if this faculty member is affiliated with both departments. This option is recommended for those students seeking to enter graduate school.

Planners

Recommended academic plan for students starting as freshmen who place in to SPAN 1 on the language placement exam. Portuguese language track in parentheses for students who choose this option.

	Fall	Winter	Spring

Graduate Program

The Ph.D. program in Latin American and Latino Studies at UC Santa Cruz offers an innovative transnational and interdisciplinary approach to the study of the peoples, cultures, societies and institutions of the Americas. The program is designed to educate students in this new field of study and train them to develop the conceptual and analytical skills necessary for understanding the dynamics of hemispheric change. This is the first doctoral program in Latin American and Latino Studies. In preparing students for

research and teaching at the university level, the department offers four thematic clusters in the emerging field of Latin American and Latino studies: 1) transnational migrations within the Américas; 2) social inequalities; 3) cultural politics and cultural flows; and 4) collective action and social movements. Doctoral students specialize in one of these four substantive themes, as well as a focus area of their own design.

1. **Transnationalisms, Migrations, and Displacement.** While transnational migrations are the subject of research in multiple disciplines, this program analyzes these transformative processes through an interdisciplinary lens. A transnational approach examines links between regions in the Américas, analyzing the social and historical foundations of economic dynamics such as remittances from the United States or the dollarization of Latin American countries. A transnational approach to the study of migratory processes explores the dynamics of bi-national communities, bilingualism and multilingualism, immigrant integration into host societies, and North-South exchanges of ideas and cultures.
2. **Intersectionality, Identities, and Inequalities.** This program's research in the Américas foregrounds the study of transnational social inequalities formed by power relations based on race, ethnicity, nationality, citizenship, class, territory, gender and/or sexuality. These social hierarchies are analyzed as institutions, historical processes, discourses, or symbols with multiple meanings, and are examined in terms of how they have been mobilized to build, transform, or challenge identities, communities, and social movements in local, national, and global contexts over time.
3. **Cultural, Power, and Knowledge.** Another distinctive area of inquiry in the Américas is the study of cultural politics and cultural flows that shape everyday life, institutions, social identities, discourses, meanings, and cultural forms and practices, in global, regional, and local contexts in an increasingly interconnected and integrated world. The transnational analysis of culture focuses on the ways in which cultural forces and cross-cultural communication and media are contributing to the formation of new transnational imaginaries, as well as how these cultural processes are transforming and redefining national and local cultures.
4. **Collective Action, Social Movements, and Social Change.** This area of research addresses collective action and social movements at local, national and international levels viewed through transnational lenses. As migrants engage in public life, both in their communities of residence and in their communities of origin, they construct diverse practices of political participation, including "civic bi-nationality." These processes are crucial for understanding the largest wave of immigration in a century, including how migrants relate to U.S. society.

The doctoral program provides rigorous training in both disciplinary and interdisciplinary approaches to the study of transnational processes that link the Americas. The program educates doctoral students in the theories and research methods based in disciplines of the social sciences and the humanities.

LATIN AMERICAN AND LATINO STUDIES PH.D.

Introduction

The Ph.D. program in Latin American and Latino Studies at UCSC offers an innovative transnational and interdisciplinary approach to the study of the peoples, cultures, societies and institutions of the Americas. The program is designed to educate students in this new field of study and train them to develop the conceptual and analytical skills necessary for understanding the dynamics of hemispheric change. This is the first doctoral program in Latin American and Latino Studies.

In preparing students for research and teaching at the university level, the department offers four thematic clusters in the emerging field of Latin American and Latino Studies: 1) transnational migrations within the Americas; 2) social inequalities; 3) cultural politics and cultural flows; and 4) collective action and social movements. Doctoral students specialize in one of these four substantive themes, as well as a focus area of their own design.

- **Transnationalisms , Migrations, and Displacement.** While transnational migrations are the subject of research in multiple disciplines, this program analyzes these transformative processes through an interdisciplinary lens. A transnational approach examines links between regions in the Americas, analyzing the social and historical foundations of economic dynamics such as remittances from the United States or the dollarization of Latin American countries. A transnational approach to the study of migratory processes explores the dynamics of bi-national communities, bilingualism and multilingualism, immigrant integration into host societies, and North-South exchanges of ideas and cultures.
- **Intersectionality , Identities, and Inequalities.** This program's research in the Americas foregrounds the study of transnational social inequalities formed by power relations based on race, ethnicity, nationality, citizenship, class, territory, gender and/or sexuality. These social hierarchies are analyzed as institutions, historical processes, discourses, or symbols with multiple meanings, and are examined in terms of how they have been mobilized to build, transform, or challenge identities, communities, and social movements in local, national, and global contexts over time.
- **Cultural, Power, and Knowledge.** Another distinctive area of inquiry in the Americas is the study of cultural

politics and cultural flows that shape everyday life, institutions, social identities, discourses, meanings, and cultural forms and practices, in global, regional, and local contexts in an increasingly interconnected and integrated world. The transnational analysis of culture focuses on the ways in which cultural forces and cross-cultural communication and media are contributing to the formation of new transnational imaginaries, as well as how these cultural processes are transforming and redefining national and local cultures.

- **Collective Action, Social Movements, and Social Change.** This area of research addresses collective action and social movements at local, national and international levels viewed through transnational lenses. As migrants engage in public life, both in their communities of residence and in their communities of origin, they construct diverse practices of political participation, including "civic binationality." These processes are crucial for understanding the largest wave of immigration in a century, including how migrants relate to US society.

The doctoral program provides rigorous training in both disciplinary and interdisciplinary approaches to the study of transnational processes that link the Americas. The program educates doctoral students in the theories and research methods based in disciplines of the social sciences and the humanities.

The deadline for applications to the doctoral program is December 15 in the preceding year. The program only accepts students for admission in fall quarter.

Advancement to Candidacy

Course Requirements

Thirteen Courses

The program requires a total of 13 courses with LALS Graduate Program Affiliated Faculty, including the definition of two areas of concentration. Of the required courses, up to three may be independent studies with LALS faculty. Of the 13 required courses, students may take up to five graduate courses offered in other departments and with approval from the graduate director.

Before advancement to candidacy, a full-time course load is two or three courses at the graduate level.

The following are the course requirements:

LALS 200	Bridging Latin American and Latina/o Studies	5
LALS 200A	Power and Society	5
LALS 200B	Theories of Culture in the Americas	5
LALS 201	Research in Praxis: Epistemology, Ontology, and Ethics	5

Two Methodology Courses Taught in LALS or in a Disciplinary Department

All graduate students in-residence are required to enroll in the 2-credit LALS Graduate Colloquium every quarter.

Six additional 5-credit courses leading to the definition of two areas of concentration, taken in consultation with the faculty adviser.

If students enroll in a graduate summer language course, the course will not count as part of the six additional required courses.

If a student enters with a master's degree from another university, they may petition to the graduate director to apply some

Foreign Language Requirement

The program requires significant reading, writing and speaking abilities in both English and Spanish.

As per Graduate Division requirements, the secondary language requirement must be satisfied by the end of the third year, prior to Advancing to Candidacy. The secondary language requirement may be fulfilled by:

1. Departmental sit-down, Spanish-to-English translation examination
 - a. UCSC graduate courses in Spanish/Portuguese
 - b. Passing a 5-credit graduate seminar in LALS or other UCSC department, offered in secondary language during the academic year
2. Passing a UCSC Literature Department summer research language course
3. Summer immersion program, e.g. Berkeley, Cornell, or abroad. The program must have a scholarly and rigorous focus, the student must receive advance approval from faculty adviser, and the student must submit to the graduate adviser a letter from the program attesting to their completion of the program and their satisfactory performance in the secondary language. We urge students who choose this option to organize their language training early in their graduate career.
4. Graduating from a university with primary instruction in Spanish/Portuguese.

Students will be required to include information regarding their plans for satisfying the secondary language requirement in their End-of-Year statements in the first and second years.

Students are required to demonstrate, by one of the methods listed above, their proficiency in a language other than English before the completion of the qualifying examination.

Qualifying Examination

Doctoral students will be required to submit two qualifying essays, and a qualifying examination, as described below. A qualifying examination committee, composed of four faculty

members, will approve both the scope of the field statements constituting the qualifying essays and the final written products, and conduct the oral examination. This committee must include at least two LALS faculty members (i.e. LALS core faculty and LALS graduate program affiliates), and follow graduate division guidelines. The qualifying examination committee must be approved in advance by the Graduate Division. Students should take their examinations by spring of the third year. The qualifying-examination process is discussed in detail in a meeting with the graduate program coordinator and graduate director as graduate students finish the fall quarter of their second year.

1. **Qualifying Essays.** Students are required to complete two qualifying essays. The qualifying essay topics should address broad non-overlapping fields and review the literatures related to the proposed dissertation questions. Students should consult with their qualifying examination committee early in the process, regarding the appropriate scope and content of their essays.

One of the qualifying essays must focus on one of the department's four themes: transnational migrations and social displacement; intersectionality, identities and inequalities; collective action, social movements and social change; and culture, power, and knowledge. The qualifying essay should demonstrate command of the methodology relevant to the student's specialized research interests (e.g., ethnographic field methods, textual analysis, archival research methods, statistics, media analysis, and/or comparative methods) and include relevant texts in the second language. The committee chair must approve these essays at least one month prior to the oral examination.

In addition, the essays must be accompanied by two proposed course syllabi for potential undergraduate courses.

2. **Qualifying Examination.** An oral examination will follow the approval of the qualifying essays.
3. After successfully completing the qualifying examination, students are expected to assemble a dissertation committee chaired by a LALS principal faculty member chosen from the LALS core or LALS graduate program affiliate faculty lists.
4. Coursework and the qualifying process should be completed by the end of the third year. Students may petition for a non-terminal master's degree after advancing to candidacy.

Dissertation

Dissertation

Students will be expected to complete the dissertation prospectus and secure approval from the dissertation committee by the last day of the quarter after the qualifying examination. In the prospectus, students should clearly articulate the logic of an interdisciplinary, transnational

approach, as well as the methodologies to be used for addressing the research questions.

The dissertation must demonstrate in-depth research, make a significant and original scholarly contribution, and include material worthy of publication.

LATIN AMERICAN AND LATINO STUDIES DESIGNATED EMPHASIS

Introduction

Graduate students may work toward a doctor of philosophy (Ph.D.) degree that notes a designated emphasis in Latin American and Latino studies on the graduation documents. Students wishing to pursue this option should consult with the adviser of their respective Ph.D. programs and are encouraged to apply in the first or second year of graduate study. The application and an annually updated list of regularly offered, approved graduate courses are available on the LALS website.

Requirements

The following are required for the designated emphasis:

Committee Composition and Departmental Approvals

The student must have a designated graduate adviser from among the Latin American and Latino studies core, participating, or affiliated faculty. This adviser will be in addition to the graduate adviser from the student's home department. The Latin American and Latino studies adviser must serve on the student's qualifying examination committee and/or on the student's dissertation committee.

Course Requirements

The student must take five graduate courses in Latin American and Latino studies, including the required following courses:

LALS 200	Bridging Latin American and Latina/o Studies	5
----------	--	---

The remainder can be selected from appropriate graduate offerings of any UCSC department, as long as they are taught by core or affiliated Latin American and Latino studies faculty.

Legal Studies

Department website

PROGRAMS OFFERED

Legal Studies B.A. (p. 543)

Legal Studies Minor (p. 547)

At UC Santa Cruz, legal studies (LGST) majors study the complex relation of law to ideas and values, to political structures and institutions, and to society and communities. Legal studies is an interdisciplinary liberal arts major that invites students to consider many lenses regarding how law develops and operates, and how it relates to social issues, political structures, and the breadth of human experience.

The program is housed within the Politics Department, but operates independently and is intended to appeal to students who wish to gain from a variety of disciplinary frameworks. The design of the major provides a core foundation of knowledge of law as well as enabling students to explore their interests and expand their understanding of legal themes through the broad vantages offered in upper-division electives. Students who join the major have the opportunity to engage with methods and concepts from different academic disciplines by taking courses with faculty with backgrounds in the social sciences, humanities, arts, and law.

Our majors develop an informed and critical perspective on the roles and functions of legal ideas and systems in the U.S., other countries, and internationally, past and present, including the operation, possibilities, and limits of law in relation to fundamental issues of rights, equality, justice, citizenship, and political power.

Legal studies is not designed as a pre-law program or preparation for law school, but many students who are interested in law school join the major and can benefit from its liberal arts approach. (Students interested in learning more about law school, which does not suggest any specific major, should visit the Career Center's website and pre-law coach.)

Undergraduate Program

LEGAL STUDIES B.A.

Information and Policies

Introduction

Legal Studies (LGST) is an interdisciplinary, liberal arts major focused on legal ideas, institutions, and issues in and beyond the U.S. Our courses introduce students to the integral roles of law in social life, including its complex relation to values and shifting views of justice, rights, liberty, equality,

citizenship, and authority; to culture and social practices; and to historical, political, and economic forces and institutions.

Our program is housed under the auspices of the Politics Department, but operates independently and is designed to provide different disciplinary lenses on intersections between law and other realms. These include the relation of law to human rights, civil rights, voting rights, and property rights; to immigration, citizenship, borders, and sovereignty; to racial, gender, and economic inequalities; to environmental and health justice; to the scope and limits of governmental power; to the law of democracy and relation between citizens and the state; to relations between among nation-states; and to concerns regarding access to justice, justice gaps, and historical and systemic injustices.

Students who join this major have the opportunity to take courses with faculty from a range of backgrounds in the social sciences, humanities, arts, and law. Our curriculum includes course offerings spanning from anthropology, art, economics, environmental studies, feminist studies, history, Latin American and Latino studies, literature, music, philosophy, politics, psychology, and sociology. This allows our students to engage their interests through different approaches and analytical frameworks, and to consider many dimensions of law and its operation. For example, legal studies students might learn how to use approaches from psychology or philosophy to think about crime and punishment; they might use approaches from political theory or economics to think about property rights or social welfare policies; they might consider civil rights or privacy issues through approaches from critical race theory or feminist studies; they might use approaches from history or sociology to consider law in different eras or in relation to different groups; they might use approaches from politics to consider human rights and legal systems outside the U.S.

The legal studies major provides a broad academic platform from which students can pursue many different career paths and/or advanced studies. Alumni from our program work in many areas: law and the legal profession, government, non-profits, education, health, and community services, technology and software engineering, business, consulting and accounting, the entertainment industry, media, journalism, and communications. Our alums are also successful in pursuing graduate degrees in many fields. Although legal studies is often of interest to students considering law school or law-related careers, the major is not designed as a “pre-law” preparation for law school. (Students who are considering law school should visit the Career Center's website and pre-law coach.)

Our program strongly encourages students to enrich their studies with additional learning and opportunities. Legal Studies sponsors a speakers series and co-sponsors other talks and events, including career and alumni panels. We also encourage students to pursue internships or field experiences, such as through our legal studies internship seminar (LGST 185); through the UCDC program, a one-quarter study and internship program in Washington, D.C.; or through the UC Center Sacramento, which offers a one-quarter study and internship program at the state capitol. Students may also

want to study abroad through the Education Abroad Program (EAP) at UCSC, and some may want to consider developing independent research projects on topics of special interest to them. Students with strong academic preparation who know they want to attend law school may consider the UCSC/UC Hastings 3+3 program, in which students take the LSAT and fulfill requirements needed to apply to Hastings Law School during their junior year, and, if admitted, can earn their B.A. and J.D. degrees in six years.

Academic Advising for the Program

Undergraduate Adviser

The undergraduate adviser offers specific information about navigating through the program and the curriculum and assists students with prerequisites, requirements, policies, procedures, learning support, guidance on internships, scholarships, and opportunities for undergraduate research. Please contact the LGST undergraduate adviser at legalstudies@ucsc.edu.

Peer Advisers

Peer advising can assist in academic planning in regards to major and minor requirements, help prepare declaration of major and minor paperwork and provide guidance on 3+3 and UCDC program requirements. Please contact the LGST peer advising team at lgstpoli@ucsc.edu.

Transfer Students should also consult the Transfer Information and Policy section.

Getting Started in the Major

Program Learning Outcomes

Upon completion of the major, students will have achieved the following areas of learning and skills:

- an understanding of the nature and function of law, including legal theory, institutions, and analysis;
- an understanding of the role of law and legal institutions in the broader society, including the social, political, and economic context in which it operates;
- an understanding of the distinct nature of legal institutions and practices from a variety of interdisciplinary perspectives;
- the ability to analyze and critically evaluate arguments about legal theories, practices, and institutions based on logic and evidence, and from a variety of interdisciplinary perspectives; and
- the ability to develop, sustain, and communicate coherent written and oral arguments and analyses regarding legal issues based on appropriate empirical and/or theoretical evidence and logic.

Major Qualification Policy and Declaration Process

Major Qualifications

Students may declare the major after completing the following course: LGST 10, Introduction to the Legal Process.

Students will ideally have completed some or all of the remaining lower-division requirements before declaring the major.

Transfer students should also consult the Transfer Information and Policy section.

How to Declare a Major

Students who are eligible to declare the major must bring a completed declaration of major worksheet and legal studies major worksheet to the Legal Studies advising office to officially declare.

Students develop a program of study during the major declaration process. The major requirements consist of 11 courses, mapped out in the Requirements and Planners tab. Please also see the bottom of the Requirements and Planners tab for a four-year sample course plan for legal studies majors.

Appeal Process for Declaring the Major

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the program director within 15 days from the date the notification was made. Within 15 days of receipt of the appeal, the program will notify the student, college, and the Office of the Registrar of the decision.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply to UC Santa Cruz in this major are not required to complete specific courses for consideration of admission.

Transfer students considering the legal studies major are strongly encouraged to complete most, if not all, general education requirements before transfer. Transfer students are encouraged to complete any introductory philosophy course in ethics or logic at their prior institution, and this will be accepted in lieu of the requirement in the program to complete PHIL 9, PHIL 22, or PHIL 24. To ensure that students desiring a transfer to UCSC's legal studies major are on track for meeting these goals, they need to connect with their community college advisers for guidance and course planning.

Getting Started with Legal Studies at UCSC as a Transfer Student

Transfer students can designate legal studies as their intended major and begin working on the requirements as soon as they arrive at UCSC. However, they will not be able to formally declare until they complete LGST 10, Introduction to the

Legal Process, at UCSC. Students who wish to pursue the legal studies major should arrange to meet with the legal studies undergraduate adviser as early as possible to discuss plans for enrolling in LGST 10, declaring the major, and other course planning. Students should bring a copy of their UCSC Transfer Credit Summary to the meeting with the undergraduate adviser. This may be printed from the student portal.

Letter Grade Policy

This program does not have a letter grade policy.

Course Substitution Policy

Students may petition the department to substitute only one upper-division independent study or field study toward the elective requirement in the legal studies major. UCDC and UCSAC internships are exempt from this limit.

Double Majors and Major/Minor Combinations Policy

Study Abroad

Honors

Honors in the major are awarded to graduating seniors based primarily on a review of grades, whose academic performance is judged to be consistently excellent by a faculty committee. Highest honors in the major are reserved for students with consistently outstanding academic performance.

Requirements and Planners

Course Requirements

In addition to completing LGST 10, legal studies majors are required to take an introductory course in philosophy, a course on constitutional law, and a course on international or comparative law. They must also take courses in each of three broadly defined thematic areas: theory, public law and institutions, and law and society. Within the theory theme, students may take courses such as legal theory, jurisprudence, ethics, logic, and social and political thought; within the law and society theme, courses topics range from gender to race to psychology to economics; within the public law and institutions theme, courses range from environmental law to human rights law to criminal justice to public policy. To fulfill the senior exit requirement, students can take a senior capstone seminar, or they may opt to write a senior thesis.

Lower-Division Courses

All students are required to complete and pass LGST 10 prior to declaring the major. This course is normally taken the first year.

LGST 10	Introduction to Legal Process	5
---------	-------------------------------	---

Choose one of the following courses:

All legal studies majors are required to take one of these philosophy courses (transfer students are strongly encouraged to take a similar course prior to enrolling at UCSC).

PHIL 9	Introduction to Logic	5
PHIL 22	Introduction to Ethical Theory	5
PHIL 24	Introduction to Ethics: Contemporary Moral Issues	5

Upper-Division Courses

Complete one of the following courses:

POLI 111A	Constitutional Law	5
LGST 111B	Civil Liberties	5

Plus one of the following courses:

LGST 116	Comparative Law	5
POLI 160B	International Law	5

Thematic Core Course Requirement —6 courses

Legal studies majors are required to take six thematic core courses, two in each of the following three thematic areas:

- A. Theory
- B. Public Law and Institutions
- C. Law and Society

A. Theory Theme Courses

The following courses are offered by the Legal Studies Program or are crosslisted with LGST by another department. Enrollment in either rubric will count toward the legal studies major requirements.

POLI 105A	Ancient Political Thought	5
POLI 105B	Early Modern Political Thought	5
POLI 105C	Modern Political Thought	5
SOCY 128C	Social History of Democracy, Anarchism, and Indigenism	5
SOCY 128J	The World Jury on Trial	5
PHIL 144	Topics in Social and Political Philosophy	5
LGST 155	Topics in American Legal History: Making of American Constitutionalism	5
LGST 157	Political Jurisprudence Placeholder	5

Additional Theory Courses

The following courses are offered by legal studies faculty affiliates through their home departments. Students enroll in these designated courses through the home department's rubric, but they will automatically count toward the LGST major requirements.

PHIL 140	History of Ethics	5
POLI 103	Feminist Interventions	5

B. Public Law and Institutions Theme Courses

The following courses are offered by the Legal Studies Program or are crosslisted with LGST by another department. Enrollment in either rubric will count toward the legal studies major requirements.

POLI 111A	Constitutional Law	5
LGST 111C	Issues in Constitutional Law	5

LGST 115	Law and the Holocaust	5	LGST 111B	Civil Liberties	5
LGST 116	Comparative Law	5	LGST 113	Gay Rights and the Law	5
POLI 120C	State and Capitalism in American Political Development	5	LGST 114	Jews, Anti-Semitism, and the American Legal System	5
LGST 125	History of the U.S. Penal Culture	5	LGST 117	Sports, Law, and Politics	5
ECON 128	Poverty and Public Policy	5	POLI 120B	Society and Democracy in American Political Development	5
SOCY 128J	The World Jury on Trial	5	POLI 120C	State and Capitalism in American Political Development	5
SOCY 128M	International Law and Global Justice	5	POLI 121	Race & Justice in America	5
LGST 131	Wildlife, Wilderness, and the Law	5	SOCY 122	The Sociology of Law	5
POLI 132	California Water Law and Policy	5	SOCY 123	Law, Crime, and Social Justice	5
LGST 133	Law of Democracy	5	SOCY 127	Drugs in Society	5
POLI 134	Congress: Representation and Legislation	5	SOCY 128	Law and Politics in Contemporary Japan and East Asian Societies	5
LGST 135	Native Peoples Law	5	LGST 135	Native Peoples Law	5
LGST 136	Federal Indian Law and International Comparative Indigenous Peoples' Law	5	ANTH 138	Political Anthropology	5
LGST 137	International Environmental Law and Policy	5	ANTH 142	Anthropology of Law	5
LGST 139	War Crimes	5	PSYC 147A	Psychology and Law	5
ENVS 149	Environmental Law and Policy	5	PSYC 147B	Psychology and Law	5
LGST 152	Courts and Litigation	5	LGST 150	Children and the Law	5
LGST 153	Immigration, Citizenship, and Law	5	POLI 151	Politics of Law	5
LGST 155	Topics in American Legal History: Making of American Constitutionalism	5	LGST 154	The Legal Profession	5
LGST 156	Administrative Law and Challenges of Regulation	5	LGST 155	Topics in American Legal History: Making of American Constitutionalism	5
LGST 159	Property and the Law	5	ECON 160A	Industrial Organization	5
POLI 167	Politics of International Trade	5	ECON 162	Legal Environment of Business	5
POLI 171	Law of War	5	ECON 169	Economic Analysis of the Law	5
LGST 173	Disability, Law, & Politics	5	LGST 173	Disability, Law, & Politics	5
POLI 175	Human Rights	5	ECON 183	Women in the Economy	5
POLI 186	Global Health Politics	5	LGST 185	Legal Studies Internship/Field Seminar: Experiences in Law, Policy, and Society	5

Additional Public Law and Institutions Theme Courses

The following courses are offered by legal studies faculty affiliates through their home departments. Students enroll in these designated courses through the home department's rubric, but they will automatically count toward the LGST major requirements.

ENVS 140	National Environmental Policy	5
----------	-------------------------------	---

C. Law and Society Theme Courses

The following courses are offered by the Legal Studies Program or are crosslisted with LGST by another department. Enrollment in either rubric will count toward the legal studies major requirements.

LGST 108	Gender, Sexuality, and Law	5
POLI 110	Law and Social Issues	5
HIS 110B	Revolutionary America, 1740-1815	5
ANTH 110C	California Pasts	5

Additional Law and Society Theme Courses

The following courses are offered by legal studies faculty affiliates through their home departments. Students enroll in these designated courses through the home department's rubric, but they will automatically count toward the LGST major requirements.

ANTH 130C	Politics and Culture in China	5
ANTH 187	Cultural Heritage in Colonial Contexts	5
ANTH 187B	Cultural Resource Management	5
FMST 194O	The Politics of Gender and Human Rights	5
HIS 110B	Revolutionary America, 1740-1815	5
LIT 168A	The Culture of Islamic Law	5
LIT 189A	De la conquista a Sor Juana	5

Electives**Disciplinary Communication (DC) Requirement**

Students in every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in legal studies is satisfied by completing one of the following three alternatives:

1. Both

POLI 111A	Constitutional Law	5
POLI 160B	International Law	5

2. OR a Senior Seminar

LGST 196	Senior Capstone	5
----------	-----------------	---

3. OR a Senior Thesis (two or three quarters)

LGST 195A	Senior Thesis	5
LGST 195B	Senior Thesis	5
LGST 195C	Senior Thesis	5

Comprehensive Requirement

Students can satisfy the senior comprehensive requirement in the legal studies major by successfully completing one of the following two options:

Senior Capstone

The capstone is designed to provide an interdisciplinary integration of themes related to the study of law and includes a substantial writing requirement.

LGST 196	Senior Capstone	5
----------	-----------------	---

Senior Thesis (2-3 quarters).

Completion of a senior thesis of a minimum of 50 pages with a substantial research content, supervised by a legal studies faculty member or affiliate.

LGST 195A	Senior Thesis	5
LGST 195B	Senior Thesis	5
LGST 195C	Senior Thesis	5

Planners

Sample four-year and two-year course plans for students majoring in legal studies are provided below.

Four-Year Sample Course Planner for Frosh Students

Year	Fall	Winter	Spring
1st (frosh)		LGST 10	Phil 9 or 22
2nd (soph)	LGST (Law & Society Core)	LGST (Theory Core)	LGST (Law & Society Core) LGST 160B (Required)

3rd (junior)	LGST (Theory Core)	LGST 111A (Required)
	LGST (Public Law & Institutions Core)	LGST (Public Law & Institutions Core)
4th (senior)	LGST 196 (Capstone)	

In addition to the specific courses shown in this four-year planner, a student must complete courses satisfying the general education requirements. See the UCSC Legal Studies website to view courses and designations for which courses fulfill the majors' three-core thematic requirements: Theory, Public Law and Institutions, and Law & Society.

Two-Year Sample Course Planner for Transfer Students

Year	Fall	Winter	Spring
1st (junior)	LGST 10	LGST (Law & Society Core)	LGST-160B (required)
	PHIL 9*	LGST (Theory Core)	LGST (Public Law & Institutions) LGST (Law & Society Core)
2nd (senior)	LGST (Public Law & Institutions)	LGST 196 (Senior Capstone)	
	LGST (Theory Core)	LGST 111A (Required)	

This planner assumes that a student has completed all general education requirements, beyond major preparation requirements before coming to UCSC. See the UCSC Legal Studies website to view courses and designations for which courses fulfill the majors' three-core thematic requirements: Theory, Public Law and Institutions, and Law & Society.

*Articulated equivalent courses may be taken prior to transfer.

LEGAL STUDIES MINOR**Course Requirements**

To complete a minor in legal studies, a student must complete the following course requirements with a Pass or a grade of a C or better:

Lower-Division Courses

One lower-division course.

LGST 10 Introduction to Legal Process 5

Upper-Division Courses

Any five upper-division electives may be used to complete the minor.

The following courses are offered by the Legal Studies (LGST) Program or are crosslisted with LGST by another department. Enrollment in either rubric will count toward the legal studies major requirements.

ANTH 110C	California Pasts	5
LGST 100	Law and Politics of Memory	5
POLI 102	Doing Research	5
LGST 108	Gender, Sexuality, and Law	5
LGST 109	Legal Theory	5
LGST 111B	Civil Liberties	5
LGST 111C	Issues in Constitutional Law	5
LGST 113	Gay Rights and the Law	5
LGST 114	Jews, Anti-Semitism, and the American Legal System	5
LGST 115	Law and the Holocaust	5
LGST 116	Comparative Law	5
LGST 117	Sports, Law, and Politics	5
LGST 118	Law and Literature	5
LGST 125	History of the U.S. Penal Culture	5
LGST 130	Inequality and Law	5
LGST 131	Wildlife, Wilderness, and the Law	5
LGST 133	Law of Democracy	5
LGST 135	Native Peoples Law	5
LGST 136	Federal Indian Law and International Comparative Indigenous Peoples' Law	5
LGST 137	International Environmental Law and Policy	5
LGST 139	War Crimes	5
LGST 150	Children and the Law	5
LGST 152	Courts and Litigation	5
LGST 154	The Legal Profession	5
LGST 155	Topics in American Legal History: Making of American Constitutionalism	5
LGST 156	Administrative Law and Challenges of Regulation	5
LGST 157	Political Jurisprudence	5
LGST 159	Property and the Law	5
POLI 171	Law of War	5
LGST 173	Disability, Law, & Politics	5
POLI 175	Human Rights	5
LGST 185	Legal Studies Internship/Field Seminar: Experiences in Law, Policy, and Society	5
POLI 186	Global Health Politics	5

Additional Courses

The following courses are offered by other departments. Enrollment is only through the offered rubric (not as LGST) but the course will count toward the LGST minor requirements.

ANTH 130C	Politics and Culture in China	5
ANTH 148	Gender and Global Development	5
ANTH 187	Cultural Heritage in Colonial Contexts	5
ANTH 187B	Cultural Resource Management	5
ENVS 140	National Environmental Policy	5
FMST 194O	The Politics of Gender and Human Rights	5
HIS 110B	Revolutionary America, 1740-1815	5
HIS 121B	African American History: 1877 to the Present	5
LALS 194X	Extractivism and Socio-Environmental Conflicts in the Americas	5
LIT 168A	The Culture of Islamic Law	5
PHIL 140	History of Ethics	5
PHIL 153	Philosophy of Race	5
PSYC 114	Human Development as a Cultural Process	5
PSYC 140M	Legitimizing (In)Equality: Attitudes, Beliefs, and Social Policy	5
PSYC 153	The Psychology of Poverty and Social Class	5
POLI 103	Feminist Interventions	5
SOCY 185	Environmental Inequality	5

Politics

25 Merrill College
(831) 459-2855
politics@ucsc.edu

PROGRAMS OFFERED

Politics B.A. (p. 549)

Politics Minor (p. **Error! Bookmark not defined.**)

Politics Ph.D. (p. 552)

Politics Designated Emphasis (p. 554)

OTHER PROGRAMS OF INTEREST

Latin American and Latino Studies/Politics Combined Major (p. 534)

Legal Studies (p. 543)

UCDC (p. 554)

The study of politics is the exploration of the ways human communities shape and share a common life through their institutional practices, ideas, interests, and expectations. It looks at the way collective decisions are made, and at the obstacles citizens meet as they try to forge a shared and just life. Courses address issues central to public life, such as democracy, power, freedom, political economy, social movements, international law and conflict, institutional reforms, and how public life, as distinct from private life, is constituted. In describing the department and major at UC Santa Cruz, we use the term 'politics' (rather than 'political science' or 'government') because the study of political life requires a more inclusive approach than that associated solely with the discipline of political science, and because politics happens in places other than governments.

The programs offered by the UCSC Politics Department are designed to acquaint students with a broad range of issues studied by those in the field. The department offers an undergraduate major, a minor, a combined Latin American and Latino studies/politics major, and a doctoral degree. The Politics Department also houses the Legal Studies Program.

The Politics Department also encourages students to pursue additional academic opportunities while at UCSC. Possible programs include: the UCDC Program, a one-quarter program at the UC campus in Washington, D.C. that includes coursework and an internship, UCSAC, a one-quarter program at UC Center in Sacramento, the UCSC/UC Hastings Law School 3 Plus 3 program in which students earn B.A. and J.D. degrees in six years, and the Education Abroad Program (UCEAP).

Undergraduate Program

POLITICS B.A.

Information and Policies

Introduction

The study of politics is a critical part of a liberal arts education. Since political issues and practices are embedded in and reflective of the whole experience of a community, the study of politics can constitute the center of a broad-based course of study drawing on history, sociology, anthropology, philosophy, political science, economics, literature, science, and law.

UC Santa Cruz politics students have many opportunities for field work and for internship placements. Students are encouraged to develop their own extensive independent research projects.

Politics faculty members give students individual attention to help them in their studies. Faculty members are firmly committed to the value of a liberal arts education, but they are also actively engaged in programs of research and writing. The research interests of the faculty range from questions of justice to the problem of war, from campaign strategy to relations between the rich and the poor countries of the world.

No specific courses at the high school level are required for admission to the major in politics at UCSC. Courses in history, literature, philosophy, and the social sciences, whether taken at the high school or college level, are appropriate background and preparation for the politics major.

A major in politics is appropriate for students interested in careers in law, journalism, or teaching; in political and governmental work from local to international settings; in non-governmental organizations; and in corporations dealing with regulatory or global issues. Many UCSC politics graduates have also gone on to do advanced work in distinguished graduate and professional schools. Others have found active and challenging careers in business and community organizing. Still others have turned to scholarship and writing. But regardless of career direction, the most significant purpose of the politics major is to help educate a reflective and activist citizenry capable of sharing power and responsibility in a contemporary democracy.

Academic Advising for the Program

Undergraduate Adviser

The undergraduate adviser offers specific information about navigating through the program and the curriculum and assists students with prerequisites, requirements, policies, procedures, learning support, guidance on internships, scholarships, and opportunities for undergraduate research.

Contact polimajor@ucsc.edu.

Transfer students should also consult the Transfer Information and Policy section.

Peer Advisers

Peer advising assists with academic planning, major and minor requirements, preparing declaration paperwork and provides guidance on 3+3 and UCDC program requirements.

Contact lgstpoli@ucsc.edu.

Getting Started in the Major

Program Learning Outcomes

Upon completion of the major, students will have met the following objectives:

1. understand the origins, development, and nature of political institutions, practices, and ideas;
2. place particular political phenomena in broader context (national, historical, cross-cultural, and theoretical, etc);
3. demonstrate familiarity with various theoretical approaches to the study of politics, and their application in different geographic and substantive areas;
4. critically evaluate arguments about political institutions, practices, and ideas based on logic and evidence;
5. develop and sustain coherent written and oral arguments regarding political phenomena, theories, and values based on appropriate empirical and/or textual evidence and logic.

Major Qualification Policy and Declaration Process

Major Qualification

Students may declare the major after completing two lower-division politics courses (POLI 1–POLI 79) with grades of C or better. These courses are normally taken during the first year for frosh.

How to Declare a Major

Students who are eligible to declare the major must bring a completed declaration of major worksheet and politics major worksheet to the Politics advising office to officially declare.

Appeal Process

A student who has not been able to satisfy the pre-declaration requirement (a passing grade in two politics lower-division classes) may petition the department for an exception. The letter of petition must explain and document the circumstances that might justify an exception. The department will consider the request and notify the student of its decision within 15 days of receiving the petition.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

A transfer student may satisfy the requirement for one of the two lower-division courses by completing an equivalent transferable course in a political science or equivalent department with a grade of C or better. The second lower-division course must be completed at UC Santa Cruz.

Courses from another institution may be considered only if they appear on the student's Transfer Credit Summary. Students who wish to substitute transferable courses taken elsewhere for the politics major's requirements should discuss the procedure with the department adviser.

Getting Started at UCSC as a Transfer Student

To ensure a smooth transition into UCSC and timely completion of the major, transfer students should meet with the politics undergraduate adviser as early as possible to discuss a two-year major planner and course enrollment. Completion of a lower-division politics course in the first quarter will allow timely declaration of the major (required in the second quarter of enrollment).

Letter Grade Policy

This program does not have a letter grade policy.

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

The department accepts proposals for double majors. A student pursuing a double major meets the full requirements of the politics major as well as the full requirements of the other major.

The Politics Department offers a combined major with the Latin American and Latino Studies Department. Requirements may be found in the Latin American and Latino studies section of the catalog.

Study Abroad

Honors

Honors in the politics major are awarded to graduating seniors, based primarily on a review of grades, whose academic performance is judged to be consistently excellent by a committee of politics faculty. Highest honors in the major are reserved for students with consistently outstanding academic performance.

Independent and Field Studies

Students may petition the department to substitute only one upper-division independent study or field study toward the

elective requirement in the Politics major. UCDC and UCSAC internships are exempt from this limit.

Requirements and Planners

Course Requirements

Lower-Division Courses

Two lower-division politics courses.

All students are required to complete and pass two such courses, i.e. those numbered POLI 1 through POLI 79, as a foundation for continued success in the politics major and as a requirement to declare the major. These courses are normally taken during the student's first year.

Upper-Division Courses

Four upper-division politics core courses.

The following four groups of courses constitute the core of the politics major. Four courses are required: two courses from one group, one course from a second group, and one course from a third group. In general, upper-division courses are not recommended for frosh.

Theory

POLI 105A	Ancient Political Thought	5
POLI 105B	Early Modern Political Thought	5
POLI 105C	Modern Political Thought	5

U.S. Politics

POLI 120A	Congress, President, and the Court in American Politics	5
POLI 120B	Society and Democracy in American Political Development	5
POLI 120C	State and Capitalism in American Political Development	5

Comparative

POLI 140A	European Politics	5
POLI 140C	Latin American Politics	5
POLI 140D	Politics of East Asia	5

Global Politics/International Relations

POLI 160A	Theories of International and World Politics	5
POLI 160B	International Law	5
POLI 160C	Security, Conflict, Violence, War	5
POLI 160D	International Political Economy	5

Four upper-division politics electives

Four courses selected from POLI 101-POLI 190, one of which may satisfy the comprehensive requirement described below (see the "Course Description" page for details about these courses). The requirement is five courses if a

student chooses the "Additional Elective" option for the senior comprehensive requirement.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement for politics majors is satisfied by completing any three of the four required core courses. The politics core course list is detailed above in the major requirements.

Comprehensive Requirement

The comprehensive requirement in the Politics Department can be satisfied in any of the following methods:

- **Senior Seminar:** Successful completion of a politics senior seminar (POLI 190 series) that includes the writing of an extensive paper (no less than 15 pages) with a substantial research content. To enroll in a specific POLI 190 seminar, students must have successfully completed the prerequisite courses listed in the seminar's catalog course description.
- **Additional Elective:** Successful completion of one additional politics upper-division elective that includes a substantial writing component comparable to a paper for a senior seminar, either as part of the existing course requirements or added with the approval of the instructor. The student must receive prior approval from the instructor and enroll in a two-credit independent study, POLI 199F as part of this option.
- **Graduate Seminar:** Successful completion of a politics graduate seminar (enrollment is contingent on the written recommendation of two politics faculty) that includes the writing of an extensive paper (no less than 15 pages) with a substantial research content.
- **Thesis (2-3 quarters):** Successful completion of a senior thesis (POLI 195A, POLI 195B, POLI 195C) of a minimum of 50 pages. This option is for students interested in working on original research and writing under the supervision of a politics faculty member.

Planners

A four-year course plan for frosh majoring in Politics and a two-year course plan for transfer students are provided below.

Four-Year Sample Course Planner for Frosh Students

Year	Fall	Winter	Spring
1st (frosh)	POLI (Lower-division)	POLI (Lower-division)	
2nd (soph)	POLI (Upper-division elective)	POLI (Upper-division elective)	POLI (Upper-division core)

3rd (junior)	POLI (Upper- division core)	POLI (Upper- division elective)	POLI (Upper- division core)
	POLI (Upper- division elective)	POLI (Upper- division core)	
4th (senior)	POLI 190 (Senior Seminar)		

In addition to the specific courses shown in this four-year planner, a student must complete courses satisfying the general education requirements. See the UCSC Politics website to view courses and designations for which courses fulfill the majors' four core thematic requirements: Theory, U.S., Comparative, and Global/IR.

Two-Year Sample Course Planner for Transfer Students

Year	Fall	Winter	Spring
1st (junior)	POLI (Lower- division)*	POLI (Upper- division elective)	POLI (Upper- division elective)
	POLI (Lower- division)	POLI (Upper- division core)	POLI (Upper- division core)
	POLI (Upper- division elective)		
2nd (senior)	POLI (Upper- division core)	POLI 190 (Senior Seminar)	
	POLI (Upper- division elective)	POLI (Upper- division core)	

This planner assumes that a student has completed all general education requirements—beyond major preparation requirements before coming to UCSC. See the UCSC Politics website to view courses and designations for which courses fulfill the majors' four core requirements: Theory, U.S.,

Comparative and Global/IR. *Articulated equivalent courses may be taken prior to transfer.

*Articulated equivalent courses may be taken prior to transfer.

Graduate Program

POLITICS PH.D.

Introduction

The Faculty

The work of the UCSC Politics Department's faculty has led the field toward interdisciplinary and engaged research, and represents the diverse cutting edge of U.S. and international political research. A group of affiliated graduate faculty extends the program's intellectual breadth and the range of the course offerings.

The department enjoys several areas of special strength, including American political development, the social foundations of democratic politics and democratization; political economy; politics of the developing world; the politics of language; sub-national politics; post-colonial theory and nationalist discourse; early modern political thought; and informal and translocal political organization.

The Curriculum

The Politics Department is impressed by the fact that many of the best studies of politics today disregard the conventional boundaries of the political science's disciplinary subfields. Therefore, the core graduate curriculum and qualifying examination process are structured around four interrelated themes central to political inquiry. Each of these areas of emphasis focuses, in a different way, on the relations among material life, institutional authority, collective mobilization, and political vision at all levels of politics.

Political and Social Thought. Brings together the history of political thought; contemporary social and critical theory; and the contributions of legal and institutional analysis of various kinds. This area of inquiry emphasizes the critical study of political practices that are experienced or understood as in some way limiting, oppressive, or wrong. The work of political and social theory as we see it is to transform our understanding of these practices; to see their contingent conditions; and to articulate the possibilities of governing ourselves differently.

Political and Social Forces. Concerns the interaction of social forces and political forces, drawing upon the work of scholars focused on social mobilizations and histories. Accordingly, this area of inquiry focuses on the articulation and organization of political interest and identities. This area studies the mutual interaction of these interests and identities with structure (states, discourses, public policy, and the law) uniting substantive and theoretical concerns across regional, national, and global politics.

States and Political Institutions. Emphasizes the international study of political institutions as instruments of collective decision-making and action. This area of inquiry focuses on the state and on transnational, subnational, and regional political institutions. In this area, we emphasize historical patterns of institutional development in relation to domestic political conflict and the changing contours of international political economy and patterns of conflict and cooperation among states.

Political Economy. Focuses on the relationship between states, markets, and societies. This area of inquiry explores the various understandings of political economy that have emerged within a number of different theoretical perspectives, including Marxism, realism, and liberalism. At subnational, national, and supranational levels, this area seeks to understand political economy outcomes as the result of the mutual interactions between political institutions, societal interests, and ideas and norms.

The politics graduate curriculum works critically upon and within conventional social science research and also ranges beyond its methods, drawing upon cultural studies, historical sociology, and history as they inform the study of politics. Students in the politics graduate program also work with faculty in other distinguished departments at UCSC, including literature, history of consciousness, history, Latin American and Latino studies, environmental studies, sociology, philosophy, international economics, and feminist studies.

Scholars and students in the program emphasize the articulation of important questions prior to the development of methods for grappling with them, while recognizing the importance of appropriate methodological tools for doing meaningful political research.

To support the growth of students as scholars, the department also offers a series of professional development sessions to introduce and help develop the skills of successful academic work. All graduate students are also expected to attend department events with notable visitors brought to campus for public lectures, presentation, and/or graduate colloquia.

Advancement to Candidacy

Course Requirements

All curricular requirements are aimed at preparing students for timely and successful completion of a doctoral dissertation. The graduate curriculum in politics includes seven stages: 1) three core seminars plus POLI 201, Logics of Inquiry seminar; 2) five other graduate-level Politics Department courses; 3) three additional graduate-level courses that may be from Politics or other departments, along with further training as appropriate in language and methodology; 4) teaching assistant seminar training; 5) a qualifying examination consisting of written and oral parts; 6) the research and writing of the dissertation; and 7) its oral defense.

Core Seminars and Methods Training

Required Core Seminars:

During the first two years in residence, students are required to take three of the four core seminars that correspond to the areas of emphasis:

POLI 200A	Political and Social Thought Core Seminar	5
POLI 200B	Social Forces and Political Change Core Seminar	5
POLI 200C	States and Political Institutions Core Seminar	5
POLI 200D	Political Economy Core Seminar	5

The core seminars provide a broad foundation for research in politics and offer structured opportunities to foster a community of scholarship within the program.

Logics of Inquiry:

The department also recognizes the importance of informed and critically engaged methodology. Logics of Inquiry, POLI 201, is a required course that investigates approaches to the study of politics and to the enterprise of social science in general. We also regularly offer POLI 202, Political Research, a seminar providing a foundation in qualitative methods, and occasionally offer other methods courses as well. Students sometimes pursue further coursework in other UC Santa Cruz departments, and the department has sent many students to summer training programs such as the Institute for Qualitative and Multi-Method Research (IQMR).

POLI 201	Logics of Inquiry	5
POLI 202	Fundamentals of Political Research	5

Additional Courses

Prior to the qualifying examination, a minimum of five additional politics graduate courses taught by Politics Department faculty or affiliated graduate faculty must be completed. Three additional graduate-level courses are also required, which may be taken from any UCSC department (including Politics).

Each candidate shall develop with his or her adviser language and method requirements appropriate to the student's project, graduate education, and career goals.

Foreign Language Requirements

Teaching Requirement

Throughout its history, the department has been strongly committed to undergraduate teaching. The graduate program offers graduate students the opportunity to work closely with faculty and undergraduates as teaching assistants. The Politics Department's faculty is committed to "the teaching of teaching": its training of college educators emphasizes the importance of civic education in undergraduate instruction. All students who are teaching assistants will be required to attend a TA training program in which pedagogic and substantive issues will be considered.

See our website for details about the policies for admission to graduate standing as well as the application, and information about financial-support opportunities. For more information, refer to the Graduate Division website.

Pre-Qualifying Requirements

Qualifying Examination

The **Qualifying Examination (QE)** process is intended to demonstrate a student's mastery of and engagement with a range of literatures, including a) core literatures in two of the program's four areas of emphasis and b) specialized literatures relevant to her/his research trajectory. It is also intended to provide a forum for the student to specify and develop her/his research question and plan for the dissertation.

A student's preparation for the QE process begins with the first core seminar and continues throughout the required coursework. The QE process itself is completed during a student's third year. It has three components: 1) two written examinations (take-home examinations or field statements); 2) the dissertation prospectus; and 3) an oral examination. The specific deadlines for each component are available from the graduate adviser.

We encourage students to consult with their politics faculty advisers regarding the two written examination options. Students must complete the QE process to advance to Ph.D. candidacy by the end of their third year in the program. If the student fails any component of the QE process twice, she/he will not be permitted to continue in the program. On this schedule, students are expected to complete the degree in five to six years.

Post-Qualifying Requirements

Dissertation

Dissertation

Dissertation Defense

Academic Progress

Applying for Graduation

POLITICS DESIGNATED EMPHASIS

Introduction

Graduate students in politics may obtain a designated emphasis on the politics Ph.D. diploma indicating they have completed an additional specialized course of study in another department that offers a designated emphasis. Please consult the department of interest for more information.

Requirements

To receive a designated emphasis in politics, graduate students from other departments must complete the following

requirements **in addition to degree requirements for the doctorate in their home (or coordinating) department.**

Committee Composition and Departmental Approvals

The student must have a designated faculty adviser from among the politics core faculty. This adviser will be in addition to the faculty adviser from the student's home department. The politics adviser must serve on the student's qualifying examination committee and on the student's dissertation committee.

Course Requirements

The student must take four (4) graduate courses offered by the Politics Department. Two of these courses must be core courses (Political and Social Thought, Political Institutions, Political Economy, or Social Forces) and two courses may be electives appropriate to the student's thesis research. No more than one of these two elective courses may be an independent study.

POLI 200A	Political and Social Thought Core Seminar	5
POLI 200B	Social Forces and Political Change Core Seminar	5
POLI 200C	States and Political Institutions Core Seminar	5
POLI 200D	Political Economy Core Seminar	5

Writing, Research and/or Teaching Requirements

The student must prepare a significant piece of writing in the area of politics. This writing may take the form of a doctoral dissertation chapter or a paper to be submitted for publication.

Academic Progress

UCDC Program

10 Merrill College
(831) 502-7307
politics@ucsc.edu
<https://politics.ucsc.edu/undergraduate/ucdc/>

UCDC PROGRAM AT THE UNIVERSITY OF CALIFORNIA WASHINGTON CENTER

The UCDC Program supervises and supports students who pursue a quarter of academic study and internship work in the nation's capital. Internship placements are geared toward student interests, including but not limited to government and public policy, science and the environment, education and the arts, advocacy and nonprofit organizations, law, and business and finance. Students live in the UC Washington Center with

students from other UC campuses, which provides an intellectual and social community throughout the quarter.

The program is open through a competitive application process to students in all majors who are in good standing and will be juniors or seniors by the quarter in which they participate. Students enroll for fall, winter, or spring quarter, earn 12 to 17 course credits, and continue to be registered as full-time students. Applicant selection is based on academic record, a written statement, letters of recommendation, and in some cases a personal interview. Financial aid eligibility is maintained.

Interested students with strong academic records are encouraged to apply. For more information, email ucdc@ucsc.edu, contact the UCDC coordinator in 10 Merrill College, or visit the program's website.

Psychology

273 Social Sciences 2 Building
(831) 459-2002
<https://psychology.ucsc.edu/>

PROGRAMS OFFERED

Psychology B.A. (p. 556)

Cognitive Sciences B.S. (p. 563)

Psychology Ph.D. (p. 569)

Undergraduate Program

Psychology majors at UC Santa Cruz are introduced to theory and scientific research in the field. Students begin with lower-division courses that include introductory psychology, precalculus, statistics, and introduction to developmental psychology. Majors take a total of eight upper-division courses. These include Psychology 100, Research Methods in Psychology; six courses in the four areas of psychology—developmental, cognitive, social, and clinical-personality psychology; and one upper-division course outside the major from an approved list.

Cognitive psychology focuses on topics such as perception; brain and behavior; motor control; learning and memory; thinking, feeling, and emotions; psycholinguistics; computational modeling, and human-computer interaction. Our cognitive psychologists extend traditional boundaries in the study of cognition to encompass bodies, physical environments, sociocultural contexts, and information technologies. Social psychology involves the study of persons embedded within social contexts. Social psychology courses at UC Santa Cruz are organized around themes of social justice. Developmental psychology is concerned with processes of cognitive, language, social, emotional, and personality development across the life span. Additionally, both developmental and social psychology are concerned with issues of diversity including race, ethnicity, culture, gender, sexual identity, social class, and family structure. Clinical-personality psychology focuses on issues of individual traits, psychological distress, well-being, and adjustment.

In addition to the general psychology major, an intensive major (described as a concentration in the Psychology B.A. program statement) is also available. The department also administers a major in cognitive science. Students primarily interested in clinical and counseling psychology should realize that training in these areas does not occur at the undergraduate level but requires professional training through an advanced degree. UC Santa Cruz does not offer advanced degrees in clinical or counseling psychology.

Students are encouraged to carry out research projects. Interested psychology majors will find research opportunities in courses, as research assistants in faculty members' research

programs, or through faculty-sponsored independent study. This research may be carried out in specialized research laboratories or in the field. Students usually join an ongoing project in which a faculty member is engaged. Students who are especially interested in a career involving empirical research should become involved in a professor's ongoing research by their junior year. Some recent research topics include "Learning in Infancy," "Family Conversations About Science," "Museums As Sites of Social Change," "Interacting With Robots," "Sex and Social Identity," "Family Roles and Independence in First-Generation College Students," "How Do You Find Things Online?," and "Gender Bias and Adolescents Motivation in Math and Science."

Cognitive science focuses on achieving a scientific understanding of how human cognition works. Its subject matter encompasses cognitive functions (such as memory and perception), the structure and use of human language, the evolution of the mind, artificial intelligence, and more.

The cognitive science degree provides a strong grounding in the principles of cognition through courses in cognitive psychology, and, in addition, provides breadth in the interdisciplinary aspects of cognitive science such as anthropology, linguistics, biology, philosophy, and computer science. Graduates will be well prepared for advanced training in research fields of cognitive psychology and cognitive neuroscience, technology industries such as human-computer interaction, and health fields, such as the treatment of brain disorders.

The cognitive science major is intended for students wishing to enter doctor of philosophy (Ph.D.) programs in cognitive psychology, cognitive science, or cognitive neuroscience to pursue careers in research; enter the field of public health to work with individuals with neurological disorders or learning disabilities; to enter the field of human-computer interaction design; or pursue other related careers.

PSYCHOLOGY B.A.

Information and Policies

Introduction

Academic Advising for the Program

Students are encouraged to approach faculty in their area of interest for further advising no later than the first quarter of their junior year to discuss an upper-division program of study and to plan for graduate training in psychology. As a supplement to academic advising offered by faculty members, the Psychology Department has an advising office located at 273 Social Sciences 2 Building, (831) 459-2002, psyadv@ucsc.edu. The advisers assist students in obtaining information regarding major requirements and petitions, course planning, substitution of transfer courses for advance enrollment, careers, and graduate schools. Students are encouraged to take advantage of the advising office throughout their college career. Transfer students are encouraged to consult the Transfer Information and Policy Section.

Getting Started in the Major

Students interested in pursuing the psychology major should complete PSYC 1, PSYC 2, and the precalculus mathematics requirement. PSYC 1 and PSYC 2 should be taken for a letter grade. After completing these three lower-division required courses, students may petition to declare the psychology major subject to the grade requirement described in the Qualification to the Major section below.

High school students considering psychology as their university major find that the best preparation is a solid general education in English writing, mathematics at least through precalculus, biological and physical sciences, and social sciences.

Program Learning Outcomes

Students who complete the psychology major should demonstrate competency in:

- **Application of knowledge with critical thinking skills.** Students should be able to use critical thinking to evaluate and interpret evidence, and to apply psychological concepts, theories, and research findings to individual, social, and cultural issues.
- **Application of research methods with values and integrity.** Students should be able to apply basic research methods in psychology, with sensitivity to ethical principles.
- **Communication skills.** Students should be able to demonstrate effective communication skills following professional conventions in psychology appropriate to purpose and context.
- **Awareness of sociocultural diversity and societal inequality.** Students should be able to understand the complexity of sociocultural diversity and societal inequality in the inquiry and analysis of psychological issues.

Major Qualification Policy and Declaration Process

Major Qualification

Students may petition to declare the psychology major once they have demonstrated foundational skills by completing each of the following three requirements:

One of the following courses

Mathematics requirement

AM 3	Precalculus for the Social Sciences	5
AM 6	Precalculus for Statistics	5
MATH 4	Mathematics of Choice and Argument	5
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5

Or take the placement exam

Score 300 or higher on the ALEKS Mathematics Placement or score a 3, 4, or 5 on either the AP Calculus AB or the AP Calculus BC examination.

Plus take the following course and obtain a B- or better

PSYC 1	Introduction to Psychology	5
--------	----------------------------	---

PSYC 1 must be taken in order to declare. If a B- or better grade is not achieved in PSYC 1, achieving a B- or better in PSYC 10 will fulfill declaration requirements.

Plus one of the following options and obtain a grade of B- or better

Either this course		
PSYC 2	Introduction to Psychological Statistics	5
or this course		
STAT 5	Statistics	5
or these courses		
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Satisfying qualification to the major

Every student who satisfies qualification to the major and who petitions to declare the major by the campus declaration deadline will be admitted to the major. Students who satisfy the qualification to the major but who petition to declare the major after the deadline will be considered on a case-by-case basis for admission to the major; admission is not guaranteed.

Transfer students should also consult the department's Transfer and Information Policy section below.

Appeal Process

Students who did not satisfy the major admission requirements but believe that there are extenuating circumstances concerning their performance in the foundational courses may file a written appeal describing these circumstances; however, such appeals are rarely granted. Appeals may be filed in the undergraduate advising office or by emailing psyadv@ucsc.edu. Students must file the appeal within 15 days of denial of major declaration. The department will notify the student and college of the decision within 15 days of the receipt of the appeal.

How to Declare a Major

To declare the major, students may attend drop-in advising and complete the paperwork with a peer adviser, attend a major declaration workshop, or book an appointment with an undergraduate adviser. Drop-in advising is available Monday-Thursday 9:00 a.m.-12:00 p.m. and 1:00-4:00 p.m.

Transfer Information and Policy

Transfer Admission Screening Policy

Requirements for admission to the major include the following:

1. Minimum grade of B- (2.7)* in a course articulated to UC Santa Cruz's PSYC 1, Introduction to Psychology (An AP Psychology score of 4 or 5 can substitute for PSYC 1.) *Note: If a grade of C (2.0) or C+ (2.3) was earned in an equivalent course, a student must earn a minimum grade of B- (2.7) in a course articulated to UC Santa Cruz's PSYC 10, Introduction to Developmental Psychology.
2. Minimum grade of B- (2.7) in a course articulated to UC Santa Cruz's PSYC 2, Introduction to Psychological Statistics, or STAT 5 or STAT 7/STAT 7L, Statistics. (An AP Statistics score of 4 or 5 can substitute for PSYC 2 or STAT 5.)
3. Minimum grade of C (2.0) in a course articulated to UC Santa Cruz's MATH 3, Precalculus. (An AP Calculus AB or BC score of 3, 4, or 5 can substitute for MATH 3.) Please note that an acceptable course in calculus may be used as a substitution of this course requirement. Business calculus is also acceptable.

Junior transfer students should express an interest in psychology on their UCSC application for admission.

While not required for admission, students are strongly recommended to complete PSYC 10 prior to transfer.

Getting Started at UCSC as a Transfer Student

Transfer students who satisfy the requirements of the screening policy can declare the major at any time after matriculation at UC Santa Cruz. See the How to Declare the Major Section.

Letter Grade Policy

PSYC 1 and PSYC 2 must be taken for a letter grade. If alternative courses are taken to meet the major qualification requirements, they must also be taken for a letter grade (e.g., STAT 5 and PSYC 10).

Course Substitution Policy

Students who want to fulfill requirements with courses taken at other colleges must petition for the substitution of their transfer courses at an orientation session or at an appointment with the department adviser. PSYC 100, Research Methods in Psychology, must be taken at UC Santa Cruz.

Double Majors and Major/Minor Combinations Policy

No upper-division course from another department that counts toward the psychology major may count toward another major or minor (See "Course Requirements," "Upper-Division Courses," below). Students wishing to pursue double majors

or a major/minor combination are encouraged to meet with an adviser to create an academic plan to do so.

Study Abroad

Up to three courses taken through EAP may be approved for the major, prior course approval required. Please see the advising office if you are considering EAP and want to try to obtain approval for such courses to count toward the major.

Honors

Honors in the psychology major are awarded to graduating seniors whose UC Santa Cruz grade point average is a 3.6 or higher in psychology courses (1-189).

Highest honors in the major are reserved for students who meet the honors criteria as well as successful completion of a senior thesis, or whose UC Santa Cruz grade point average is a 3.9 or higher in psychology courses (1-189).

Psychology Field Study Program

The Psychology Field-Study Program provides qualified students an opportunity to apply classroom learning to direct experience in a community agency. Each year about 200 students develop new skills and clarify personal and professional goals by working as interns in schools, corporations, law enforcement agencies, research organizations, mental health services, and other social service agencies where they are supervised by professionals. Psychology faculty members sponsor the students' field study helping them to integrate their field experience with coursework and guiding them in related academic projects.

The two-quarter program is open to junior and senior psychology majors who must apply at least one quarter in advance. There are information meetings and individual meetings to help students develop a learning plan, select a placement, and choose an academic project. Application information is included in the information meetings.

General Psychology Major

Course Requirements

Twelve courses are required for the general major: four lower-division courses in preparation for the major and eight upper-division courses. The lower-division courses are prerequisites for virtually all of the upper-division courses and should be completed as early as possible, or by the end of the sophomore year. Some upper-division courses have additional prerequisites.

Lower-Division Courses

PSYC 1	Introduction to Psychology	5
--------	----------------------------	---

Plus one of the following courses:

Either this course		
PSYC 2	Introduction to Psychological Statistics	5

or this course			
STAT 5	Statistics	5	
or these			
courses			
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5	
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2	
Plus			
PSYC 10	Introduction to Developmental Psychology	5	
Plus one of the following:			
AM 3	Precalculus for the Social Sciences	5	
MATH 3	Precalculus	5	
MATH 11A	Calculus with Applications	5	

Appropriate equivalent courses may be substituted for any of the lower-division requirements.

Upper-Division Courses

Eight upper-division courses are required for the general major:

Research Methods

PSYC 100	Research Methods in Psychology	7	
----------	--------------------------------	---	--

One course in each of the following subfields (three courses):

- Developmental (courses numbered PSYC 101-PSYC 119)
- Cognitive (courses numbered PSYC 120-PSYC 139)
- Social (courses numbered PSYC 140-PSYC 159)

Three additional 5-credit upper-division courses in different areas from the following subfields:

- Developmental (PSYC 101-PSYC 119)
- Cognitive (PSYC 120-PSYC 139)
- Social (PSYC 140-PSYC 159)
- Clinical-Personality (PSYC 160-PSYC 179)
- Methods (PSYC 181-PSYC 189)
- Independent Study (PSYC 193-PSYC 199)

One upper-division course outside of psychology:

One upper-division course from one of the following related areas outside of psychology. The course must be 5 credits, and neither crosslisted with psychology nor taught by psychology faculty. These courses also cannot be counted twice in cases of double majors or minors:

- Anthropology
- Community Studies
- Ecology and Evolutionary Biology
- Education
- Feminist Studies
- History of Consciousness
- Latin American and Latino Studies
- Linguistics
- Philosophy
- Sociology
- Or CMPS 140, Artificial Intelligence

Upper-Division Seminar

One of the upper-division courses must be an upper-division seminar; these courses are psychology courses identified within the General Catalog by their course descriptions containing the phrase “satisfies seminar requirement.”

Students can access a full list of courses on the department’s website. Upper-division courses and their catalog descriptions are grouped within each of the subfields.

At least five of the eight courses (including PSYC 100), must be taken through the psychology program at UC Santa Cruz, not transferred from elsewhere (the five courses include psychology courses only, not the out-of-department course). After all substitutions have been made, students must satisfy the fundamental requirement that they take at least one upper-division UC Santa Cruz psychology course from each of the Developmental, Cognitive and Social subfields.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major’s upper-division Disciplinary Communication (DC) requirement. The DC requirement in psychology is satisfied by completing PSYC 100 and a seminar. Seminar courses are psychology courses identified within the General Catalog by their course descriptions containing the phrase “satisfies seminar requirement.”

Comprehensive Requirement

UC Santa Cruz requires that every student satisfy a senior exit/comprehensive requirement prior to graduation. Psychology students will satisfy this requirement by receiving a passing grade in a psychology seminar which is also part of the DC requirement (see above).

Planners

Following are two recommended academic plans for frosh, and one additional plan for transfer students. Plan One is a suggested guideline for frosh who are committed to the major early in their academic career. Plan Two is for frosh who are

considering the major or who need more preparation. Students should note that AM 3 is a requirement for the major and is a prerequisite for PSYC 2 and PSYC 100. The third planner is a suggested two-year guideline for transfer students.

Frosh Plan One

	Fall	Winter	Spring	4th (senior)	upper-division social	out of dept. course	upper-division PSYC elective
1st (frosh)	AM 3 PSYC 1	PSYC 2	PSYC 10		upper-division PSYC elective (seminar)	upper-division PSYC elective	
2nd (soph)	PSYC 20 (recommended)		PSYC 100				

3rd (junior) upper-division cognitive upper-division developmental upper-division social

4th (senior) upper-division PSYC elective upper-division PSYC elective (seminar) upper-division PSYC elective

out of dept. course

The courses listed above will satisfy the PE, SR, and DC general education requirements. All other GE requirements have to be satisfied.

Frosh Plan Two

	Fall	Winter	Spring
1st (frosh)	MATH 2		PSYC 1
2nd (soph)	AM 3	PSYC 2	PSYC 10
3rd (junior)	PSYC 100	upper-division cognitive	upper-division developmental

The courses listed above will satisfy the PE, SR, and DC general education requirements. All other GE requirements have to be satisfied.

Transfer Plan

	Fall	Winter	Spring
3rd (junior)	PSYC 100	upper-division cognitive	upper-division developmental
	PSYC 10		
4th (senior)	upper-division social	out of dept. course	upper-division PSYC elective (seminar)

upper-division PSYC elective
upper-division PSYC clinical-personality

Intensive Psychology Major

Course Requirements

The intensive major is an option that any psychology major may choose to undertake. The intensive major would be advantageous for a student intending to go on to a graduate program in any area of psychology. Students intending to take the intensive major should declare this on their proposed study plan during the junior year, outlining their plan for completing the requirements. The intensive major requires 18 courses. **Note:** the intensive major designation appears on the transcript but it does not formally appear on students' diplomas.

Lower-Division Courses

PSYC 1 Introduction to Psychology 5

Plus one of the following courses:

Either this course

PSYC 2 Introduction to Psychological Statistics 5

or this course

STAT 5 Statistics 5

or these courses

STAT 7 Statistical Methods for the Biological, Environmental, and Health Sciences 5

STAT 7L Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory 2

STAT 7L Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory 2

Plus

PSYC 10 Introduction to Developmental Psychology 5

Plus one of the following:

AM 3 Precalculus for the Social Sciences 5

MATH 3 Precalculus 5

MATH 11A Calculus with Applications 5

Appropriate equivalent courses may be substituted for any of the lower-division requirements.

Upper-Division Courses

Eleven upper-division courses are required for the intensive major:

Research Methods

PSYC 100 Research Methods in Psychology 7

One course from each of the following subfields:

- Developmental (courses numbered PSYC 101-PSYC 119)
- Cognitive (courses numbered PSYC 120-PSYC 139)
- Social (courses numbered PSYC 140-PSYC 159)

Three additional 5-credit upper-division courses in different areas from the following subfields:

- Developmental (courses numbered PSYC 101-PSYC 119)
- Cognitive (courses numbered PSYC 120-PSYC 139)
- Social (courses numbered PSYC 140-PSYC 159)
- Clinical-Personality (PSYC 160-PSYC 179)
- Independent Study (PSYC 199)

One of the following:

PSYC 181 Psychological Data Analysis 5

PSYC 182 Qualitative Research Methods 5

Two quarters of study from one of the following:

PSYC 193 Field Study 5

PSYC 193A Developmental Field Study 5

PSYC 193B Cognitive Field Study 5

PSYC 193C Social Field Study 5

PSYC 193D Clinical/Personality Field Study 5

PSYC 194A Research Internship in Developmental Psychology 5

PSYC 194B Research Internship in Cognitive Psychology 5

PSYC 194C Research Internship in Social Psychology 5

PSYC 194C Research Internship in Social Psychology 5

PSYC 195A Senior Thesis 5

PSYC 195B Senior Thesis 5

One five-credit course outside of psychology:

One upper-division course from one of the following related areas outside of psychology. The course must be 5 credits, and neither crosslisted with psychology nor taught by psychology faculty. These courses also cannot be counted twice in cases of double majors or minors.

- Anthropology
- Community Studies
- Ecology and Evolutionary

Biology Education

- Feminist Studies
- History of Consciousness
- Latin American and Latino Studies
- Linguistics
- Philosophy
- Sociology
- Or CMPS 140, Artificial Intelligence

One of the upper-division courses must be an upper-division seminar; these courses are psychology courses identified within the General Catalog by their course descriptions containing the phrase "satisfies seminar requirement."

Electives**Disciplinary Communication (DC) Requirement**

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in psychology is satisfied by completing PSYC 100 and a seminar. Seminar courses are psychology courses identified within the General Catalog by their course descriptions containing the phrase "satisfies seminar requirement." are designated in the campus catalog with the text "satisfies seminar requirement."

Comprehensive Requirement

UC Santa Cruz requires that every student satisfy a senior exit/comprehensive requirement prior to graduation. Psychology students will satisfy this requirement by receiving a passing grade in a psychology seminar which is also part of the DC requirement (see above). Passing a seminar course is also required for the major. Courses that meet this requirement are designated as seminars in the campus catalog as “satisfies seminar requirement.”

Planners

Following are two recommended academic plans for frosh, and one additional plan for transfer students. Plan One is a suggested guideline for frosh who are committed to the major early in their academic career. Plan Two is for frosh who are considering the major or who need more preparation. Students should note that AM 3 is a requirement for the major and is a prerequisite for PSYC 2 and PSYC 100.

Frosh Plan One

	Fall	Winter	Spring
1st (frosh)	<u>AM 3</u> PSYC 1	<u>PSYC 2</u>	<u>PSYC 10</u>
2nd (soph)	<u>PSYC 20</u> (recommended)		<u>PSYC 100</u>
3rd (junior)	upper-division cognitive	upper-division developmental	upper-division social
4th (senior)	upper-division PSYC elective	upper-division PSYC elective (seminar) out of dept. course	upper-division PSYC elective

The courses listed above will satisfy the PE, SR, and DC general education requirements. All other GE requirements have to be satisfied.

Frosh Plan Two

	Fall	Winter	Spring
1st (frosh)	<u>MATH 2</u>		<u>PSYC 1</u>
2nd (soph)	<u>AM 3</u>	<u>PSYC 2</u>	<u>PSYC 10</u>

3rd (junior)	<u>PSYC 100</u>	upper-division cognitive	upper-division developmental
4th (senior)	upper-division social	out of dept. course	upper-division PSYC elective
4th (senior)	upper-division PSYC elective (seminar)	upper-division PSYC elective	

The courses listed above will satisfy the PE, SR, and DC general education requirements. All other GE requirements have to be satisfied.

Transfer Plan

	Fall	Winter	Spring
3rd (junior)	<u>PSYC 100</u> <u>PSYC 10</u>	upper-division cognitive	upper-division developmental 1
4th (senior)	upper-division social	out of dept. course	upper-division PSYC elective (seminar)
4th (senior)	upper-division PSYC elective	upper-division PSYC elective clinical-personality	

Frosh Plan One

	Fall	Winter	Spring
1st (frosh)	<u>AM 3</u> <u>PSYC 1</u>	<u>PSYC 2</u>	<u>PSYC 10</u>
2nd (soph)	<u>PSYC 20</u> (recommended)		<u>PSYC 100</u>

3rd (junior)	Upper-division cognitive	Upper-division developmental	Upper-division social
3rd (junior)	Out of department course		Upper-division PSYC elective
4th (senior)	<u>PSYC 193/</u> <u>PSYC 194/</u> <u>PSYC 195</u>	<u>PSYC 193/</u> <u>PSYC 194/</u> <u>PSYC 195</u>	Upper-division PSYC elective
		Upper-division	<u>PSYC 181/</u>

PSYC elective PSYC 182
(seminar)

The courses listed above will satisfy the PE, SR, and DC general education requirements. All other GE requirements have to be satisfied.

Frosh Plan Two

	Fall	Winter	Spring
1st (frosh)	<u>MATH 2</u>		<u>PSYC 1</u>
4th (soph)	<u>AM 3</u>	<u>PSYC 2</u>	<u>PSYC 10</u>
3rd (junior)	<u>PSYC 100</u>	Upper-division cognitive Out of department course	Upper-division social Upper-division developmental
4th (senior)	<u>PSYC 193/</u> <u>PSYC 194/</u> <u>PSYC 195</u> Upper-division PSYC elective (seminar)	<u>PSYC 193/</u> <u>PSYC 194/</u> <u>PSYC 195</u> Upper-division PSYC elective	Upper-division PSYC elective <u>PSYC 181/</u> <u>PSYC 182</u>

The courses listed above will satisfy the PE, SR, and DC general education requirements. All other GE requirements have to be satisfied.

Transfer Plan

	Fall	Winter	Spring
3rd (junior)	<u>PSYC 100</u>	Upper-division developmental Out of department course	Upper-division cognitive Upper-division social
4th (senior)	<u>PSYC 193/</u> <u>PSYC 194/</u> <u>PSYC 195</u> Upper-division PSYC elective	<u>PSYC 193/</u> <u>PSYC 194/</u> <u>PSYC 195</u> Upper-division PSYC elective	Upper-division PSYC elective (seminar) <u>PSYC 181/</u> <u>PSYC 182</u>

In addition to the specific courses shown in this planner, a student must complete courses satisfying the Entry Level

Writing and Composition General Education requirements. The courses listed above will satisfy the PE-H, SR and DC General Education requirements.

COGNITIVE SCIENCE B.S.

Information and Policies

Introduction

Academic Advising for the Program

Students are encouraged to approach faculty in their area of interest for further advising no later than the first quarter of their junior year to discuss an upper-division program of study and to plan for graduate training in cognitive science. As a supplement to academic advising offered by faculty members, the Psychology Department has an advising office located at 273 Social Sciences 2 Building, (831) 459-2002, psyadv@ucsc.edu. The advisers assist students in obtaining information regarding major requirements and petitions, course planning, substitution of transfer courses for advance enrollment, careers, and graduate schools. Students are encouraged to take advantage of the advising office throughout their college career. Transfer students are encouraged to consult the Transfer Information and Policy Section.

Getting Started in the Major

Students who are not prepared to begin the calculus requirement should take preparatory courses offered by the mathematics and applied mathematics departments, including pre-calculus.

Program Learning Outcomes

Students who complete the cognitive science major should demonstrate competency in:

- **Application of knowledge with critical thinking skills.** Students should be able to use critical thinking to evaluate and interpret evidence, and to apply cognitive science concepts, theories, and research findings to individual, social, and cultural issues.
- **Application of research methods with values and integrity.** Students should be able to apply basic research methods in cognitive science, with sensitivity to ethical principles.
- **Communication skills.** Students should be able to demonstrate effective communication skills following professional conventions in cognitive science appropriate to purpose and context.
- **Awareness of methodological and theoretical diversity.** Students should be able to understand the complexities of cognition using neural, embodied, social, and/or technological approaches.

Major Qualification Policy and Declaration Process

Major Qualification

Students may petition to declare the cognitive science major once they have completed the lower-division requirements. For students to be admitted to the major, they must have a 2.80 or higher cumulative GPA in the lower-division requirements and receive a C or better in each of the courses. Transfer students may substitute equivalent courses from other institutions. Students not meeting the grade requirements in the lower-division courses may take any of the listed alternatives as substitutions; the department will use the highest grade to compute GPA.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student, college, and Office of the Registrar of the decision.

How to Declare a Major

To declare the major, students may attend drop-in advising and complete the paperwork with a peer adviser, attend a major declaration workshop, or book an appointment with an undergraduate adviser. Drop-in advising is available Monday-Thursday, 9:00 a.m.-12:00 p.m. and 1:00-4:00 p.m.

Transfer Information and Policy

Transfer Admission Screening Policy

Requirements for the major include the following:

- Minimum overall grade point average of 2.80 in the major-preparatory courses below.
- Minimum grade of C (2.0) in a course articulated to a UCSC calculus course (AM 11A/ECON 11A, MATH 11A, MATH 19A, or MATH 20A). (An AP Calculus AB score of 4 or 5, or Calculus BC score of 3, 4, or 5 can be substituted.)
- Minimum grade of C (2.0) in a course articulated to UCSC's PSYC 2, Introduction to Psychological Statistics, or STAT 5, or STAT 7/STAT 7L, Statistics. (An AP Statistics score of 4 or 5 can substitute for PSYC 2 or STAT 5.)
- Minimum grade of C (2.0) in a course articulated to one of the following UCSC programming courses (An AP Computer Science A score of 3, 4, or 5 can be substituted for the programming requirement):
 - CSE 13E
 - CSE 13S
 - CSE 20
 - CSE 30

It is recommended that PSYC 20 is completed prior to transfer, but this is not required.

Junior transfer students should express an interest in cognitive science on their UC Santa Cruz application for admission.

Getting Started at UCSC as a Transfer Student

Transfer students are strongly encouraged to speak with an academic adviser at the Psychology Department office prior to enrolling in classes in order to determine their status and begin the actual declaration of major process. In order to declare the major, transfer students must meet the GPA requirement described in the Major Qualification section above.

Letter Grade Policy

All lower-division courses required for the major have to be taken for a letter grade.

Course Substitution Policy

Students who want to fulfill requirements with courses taken at other colleges must petition for the substitution of their transfer courses at an orientation session or at an appointment with the department adviser. PSYC 100, must be taken at UC Santa Cruz. Students planning to transfer to UC Santa Cruz should check with the advising office of their present college, or refer to www.assist.org.

Double Majors and Major/Minor Combinations Policy

Students wishing to pursue double majors or a major/minor combination are encouraged to meet with an adviser to create an academic plan to do so.

Study Abroad

Up to three courses taken through EAP may be approved for the major, prior course approval required. Please see the advising office if you are considering EAP and want to try to obtain approval for such courses to count toward the major.

Honors

Honors in the cognitive science major are awarded to graduating seniors whose UC Santa Cruz GPA is a 3.6 or higher in PSYC 1-PSYC 189).

Highest honors in the major are reserved for students who meet the honors criteria as well as successful completion of a senior thesis, or whose UC Santa Cruz GPA is a 3.9 or higher in PSYC 1-PSYC 189).

Requirements and Planners

Course Requirements

The undergraduate degree program in cognitive science is a program offering a course of study leading to the bachelor of science (B.S.) degree. Fifteen courses (77 credits) are required. Because some courses have additional prerequisites,

students should read the descriptions of courses carefully, noting the prerequisites for courses of interest to them.

Lower-Division Courses

Introduction to Cognition

Take the following course:

PSYC 20	Cognition: Fundamental Theories	5
---------	---------------------------------	---

Statistics

Choose one of the following courses:

Either this course

PSYC 2	Introduction to Psychological Statistics	5
--------	--	---

or this course

STAT 5	Statistics	5
--------	------------	---

or these courses

STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
--------	--	---

STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2
---------	---	---

Lecture and lab combinations count as a single course.

Calculus

Choose one of the following courses:

MATH 11A	Calculus with Applications	5
----------	----------------------------	---

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
----------	--	---

MATH 20A	Honors Calculus	5
----------	-----------------	---

Computer Programming

Choose one of the following courses:

CSE 13E	Embedded Systems and C Programming	7
---------	------------------------------------	---

CSE 13S	Computer Systems and C Programming	7
---------	------------------------------------	---

CSE 20	Beginning Programming in Python	5
--------	---------------------------------	---

CSE 30	Programming Abstractions: Python	7
--------	----------------------------------	---

Some of these courses have prerequisites.

Upper-Division Courses

Take the following course:

PSYC 100	Research Methods in Psychology	7
----------	--------------------------------	---

Core Courses

Students must complete a course from three of the four following areas:

Perception

PSYC 120	Visual and Spatial Cognition	5
----------	------------------------------	---

PSYC 121	Perception	5
----------	------------	---

Neuroscience

PSYC 123	Cognitive Neuroscience	5
----------	------------------------	---

Language

PSYC 125	The Psychology of Language	5
----------	----------------------------	---

Memory

PSYC 129	Human Learning and Memory	5
----------	---------------------------	---

Electives

Cognitive Psychology Electives

Students must complete three additional upper-division psychology courses.

One Cognitive Senior Seminar from the following list:

PSYC 119E	The World of Babies	5
-----------	---------------------	---

PSYC 119F	Language Development	5
-----------	----------------------	---

PSYC 119P	Children and Technology	5
-----------	-------------------------	---

PSYC 139B	Consciousness	5
-----------	---------------	---

PSYC 139D	Modeling Human Performance	5
-----------	----------------------------	---

PSYC 139F	Psychology and Evolutionary Theory	5
-----------	------------------------------------	---

PSYC 139G	Conversations	5
-----------	---------------	---

PSYC 139H	Weird Science	5
-----------	---------------	---

PSYC 139J	Forgetting	5
-----------	------------	---

PSYC 139K	Face Recognition	5
-----------	------------------	---

PSYC 139L	Illusions	5
-----------	-----------	---

PSYC 139M	Human-Robot Interaction	5
-----------	-------------------------	---

PSYC 139P	Natural and Artificial Intelligence	5
-----------	-------------------------------------	---

PSYC 179F	The Path to a Science of Dreaming	5
-----------	-----------------------------------	---

Plus two additional courses from the following list:

PSYC 104	Development in Infancy	5
----------	------------------------	---

PSYC 105	Children's Thinking	5
----------	---------------------	---

PSYC 116	Communication Technologies, Culture, and Human Development	5
----------	--	---

PSYC 120	Visual and Spatial Cognition	5
----------	------------------------------	---

PSYC 120D	Deafness and Sign Language	5
-----------	----------------------------	---

PSYC 121	Perception	5
----------	------------	---

PSYC 123	Cognitive Neuroscience	5
----------	------------------------	---

PSYC 124	Psychology of Reading	5
----------	-----------------------	---

PSYC 125	The Psychology of Language	5
----------	----------------------------	---

PSYC 127	Computer Mediated Communication	5
----------	---------------------------------	---

PSYC 128	Human Factors	5
----------	---------------	---

PSYC 129	Human Learning and Memory	5
----------	---------------------------	---

PSYC 130	Deception, Brain, and Behavior	5
----------	--------------------------------	---

PSYC 132	Neural Modeling	5
----------	-----------------	---

PSYC 135	Feelings and Emotions	5
----------	-----------------------	---

PSYC 137	Mind, Body, and World	5
----------	-----------------------	---

PSYC 138	Computer Programming for the Cognitive Sciences	5
----------	---	---

PSYC 181	Psychological Data Analysis	5
----------	-----------------------------	---

PSYC 194B	Research Internship in	5
-----------	------------------------	---

PSYC 195A	Cognitive Psychology Senior Thesis	5
-----------	---------------------------------------	---

One of these may be replaced by a core course that was not used to satisfy the core courses requirement. PSYC 204-PSYC 252, graduate cognitive courses, may be substituted by petition.

Interdisciplinary Electives

Students must complete four interdisciplinary electives from lists of courses pre-approved by the Psychology Department, at least one of which must be upper-division. The electives fall into four groups: Evolution; Artificial Intelligence and Human-Computer Interaction; Linguistics; Philosophy. Three of the four electives must be selected from the same group. Students are responsible for planning their course of study to complete any necessary prerequisites for electives they wish to take. Possible sequences of interdisciplinary courses, including prerequisites, are given below.

Group 1: Evolution

ANTH 1	Introduction to Biological Anthropology	5
ANTH 100	History and Theory of Biological Anthropology	5
ANTH 101	Human Evolution	5
ANTH 104	Human Variation and Adaptation	5
ANTH 105	Human Paleopathology	5
ANTH 106	Primate Behavior and Ecology	5
ANTH 109	Evolution of Sex	5
ANTH 112	Life Cycles	5
ANTH 139	Language and Culture	5
ANTH 173	Origins of Farming	5
ANTH 174	Origins of Complex Societies	5
ANTH 184	Zooarchaeology	5
ANTH 184L	Zooarchaeology Laboratory	2
ANTH 194B	Chimpanzees: Biology, Behavior, and Evolution	5
ANTH 194H	Paleoanthropology	5
BIOE 20C	Ecology and Evolution	5
BIOE 109	Evolution	5
BIOE 124	Mammalogy	5
BIOE 124L	Mammalogy Laboratory	2
BIOE 129	Biology of Marine Mammals	5
BIOE 129L	Biology of Marine Mammals Laboratory	2
BIOE 140	Behavioral Ecology	5
BIOE 141L	Behavioral Ecology Field Course	5
BIOE 147	Community Ecology	5
BIOE 172	Population Genetics	5
BIOE 172L	Population Genetics Laboratory	2
BIOL 80E	Evolution	5
BIOL 105	Genetics	5
BIOL 120	Developmental Biology	5
BIOL 125	Introduction to Neuroscience	5
PHIL 127	Philosophy of Biology	5
PHIL 190	Senior Seminar	5

Lecture and lab combinations count as a single course.

ANTH 139 also listed in Group 3

PHIL 127 also listed in Group 4

PHIL 190 also listed in Group 4

Group 2: Artificial Intelligence and Human-Computer Interaction

CSE 80S	Social Networks	5
CSE 104	Computability and Computational Complexity	5
CSE 140	Artificial Intelligence	5
ECE 8	Robot Automation: Intelligence through Feedback Control	5
ECE 9	Introduction to Statics, Dynamics, and Biomechanics	5
ECE 167	Sensing and Sensor Technologies	5
ECE 167L	Sensing and Sensor Technologies Lab	2
CMPM 80K	Foundations of Video Game Design	5
CMPM 120	Game Development Experience	5
CMPM 146	Game AI	5
CMPM 148	Interactive Storytelling	5
MUSC 80L	Artificial Intelligence and Music	5

Lecture and lab combinations count as a single course.

The upper-division School of Engineering courses in this section have additional prerequisites that are not listed here.

The lower-division computer science courses in this section are not being offered at present.

Group 3: Linguistics

ANTH 139	Language and Culture	5
LING 50	Introduction to Linguistics	5
LING 53	Semantics I	5
LING 80C	Language, Society, and Culture	5
LING 80D	Language and Mind	5
LING 101	Phonology I	5
LING 102	Phonology II	5
LING 105	Morphology	5
LING 111	Syntactic Structures	5
LING 112	Syntax I	5
LING 113	Syntax II	5
LING 116	Semantics II	5
LING 117	Pragmatics	5
LING 124	Language Typology	5
LING 125	Foundations of Linguistic Theory	5
LING 140	Language Change	5
LING 151	Phonetic Analysis	5
LING 152	Applied Phonetics	5
LING 155	Language and Cognition	5
LING 157	Psycholinguistics and Linguistic Theory	5
LING 158	Advanced Psycholinguistics	5

ANTH 139 also listed in Group 1

LING 111 formerly LING 55

LING 112 formerly LING 52

Group 4: Philosophy

PHIL 9	Introduction to Logic	5
PHIL 11	Introduction to Philosophy	5
PHIL 80S	The Nature of Science	5
PHIL 100B	The Rationalists	5
PHIL 100C	The Empiricists	5
PHIL 121	Epistemology	5
PHIL 123	Philosophy of Language	5
PHIL 125	Philosophy of Science	5
PHIL 127	Philosophy of Biology	5
PHIL 133	Philosophy of Mind	5
PHIL 135	Philosophy of Psychology	5
PHIL 190	Senior Seminar	5

PHIL 127 also listed in Group 1

PHIL 190 satisfies this requirement by petition only

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in cognitive science is satisfied by completing PSYC 100, Research Methods in Psychology, and the comprehensive requirement.

PSYC 100	Research Methods in Psychology	7
----------	--------------------------------	---

Comprehensive Requirement

UCSC requires that every student satisfy a senior exit/comprehensive requirement prior to graduation. Cognitive Science students will satisfy this requirement by receiving a passing grade in a senior seminar.

Choose one of the following courses:

PSYC 119E	The World of Babies	5
PSYC 119F	Language Development	5
PSYC 119P	Children and Technology	5
PSYC 139B	Consciousness	5
PSYC 139D	Modeling Human Performance	5
PSYC 139F	Psychology and Evolutionary Theory	5
PSYC 139G	Conversations	5
PSYC 139H	Weird Science	5
PSYC 139J	Forgetting	5
PSYC 139K	Face Recognition	5
PSYC 139L	Illusions	5
PSYC 139M	Human-Robot Interaction	5
PSYC 139P	Natural and Artificial Intelligence	5
PSYC 179F	The Path to a Science of Dreaming	5

Planners

Following are two recommended academic plans for frosh, and one for transfer students to complete the Cognitive Science major. Plan 1 (for frosh) assumes typical curriculum selections. Plan 2 (for frosh) includes two additional interdisciplinary prerequisites, which some students find they need in order to take the upper-division courses they desire.

Students who place out of MATH 2 and MATH 3 do not need these courses, which are otherwise prerequisites to Calculus, PSYC 2 and PSYC 100.

Frosh Plan One

Year	Fall	Winter	Spring
1st (frosh)	MATH 2 PSYC 20	MATH 3 Programming	Calculus
2nd (soph)	Interdisciplinary prerequisite	PSYC 2	PSYC 100
3rd (junior)	Cognitive core Interdisciplinary elective Cognitive elective	Cognitive core Interdisciplinary elective (UD)	Cognitive core Interdisciplinary elective
4th (senior)	Interdisciplinary elective	Cognitive elective (seminar)	Cognitive elective

The courses listed above will satisfy the SR, and DC general education requirements. All other GE requirements have to be satisfied.

Frosh Plan Two

Year	Fall	Winter	Spring
1st (frosh)	MATH 2 PSYC 20	MATH 3 Programming	Calculus
2nd (soph)	Interdisciplinary prerequisite	PSYC 2	PSYC 100
		Interdisciplinary	Interdisciplinary

		prerequisite	prerequisite
3rd (junior)	Cognitive core	Cognitive core	Cognitive core
	Interdisciplinary prerequisite	Cognitive elective	
4th (senior)	Cognitive elective	Interdisciplinary elective (UD)	Interdisciplinary elective
	Cognitive elective (seminar)	Interdisciplinary elective	
	Interdisciplinary elective		

The courses listed above will satisfy the SR, and DC general education requirements. All other GE requirements have to be satisfied.

Transfer Plan

Year	Fall	Winter	Spring
3rd (junior)	PSYC 20	Cognitive core	Cognitive core
	PSYC 100	Interdisciplinary elective	Interdisciplinary elective
4th (senior)	Cognitive elective	Cognitive core	Cognitive elective (seminar)
	Interdisciplinary elective	Cognitive elective	Interdisciplinary elective (upper-division)

Graduate Program

The psychology program offers three areas of specialization leading to the doctoral degree: cognitive, developmental, and social psychology. The program prepares students for research, teaching, and administrative positions in colleges

and universities as well as for positions in schools, government, and other public and private institutions. Each student is primarily associated with one of the three research areas and participates in the courses and research forums sponsored by the faculty in that area. The program requires full-time enrollment as a graduate student. Although applicants for a master's degree are not accepted, students in the doctor of philosophy (Ph.D.) program may obtain a Master of Science (M.S.) degree by fulfilling specific requirements. Note that the program does not offer courses, training, or supervision in clinical psychology.

The cognitive psychology graduate program focuses on research of "Minds, Brains, and Beyond," offering a blend of traditional topics and new directions in cognitive science. With core strengths in language, memory, perception, and human-computer interaction, we are exploring topics such as: faces, speech, body movements, and embodied cognition; mechanisms of remembering and forgetting; metaphors and analogies; cognitive aesthetics and creativity; natural language use in conversation; cognition and technology; human-robot interaction; human performance and information processing. Our graduates find careers in academia, tech industries, and more.

The developmental psychology graduate program focuses on research that integrates cultural, interpersonal, and individual aspects of human development. The program focuses especially on issues of diversity in relation to culture, ethnicity, race, gender, sexuality, and social economic opportunity, as people engage across contexts of family, peers, school, community, technology, and media. Among the topics studied are: moral and emotional development; neurodiversity; language and cognitive development; learning through observation and social interaction; children and playable media; personal and social identities; family and peer relationships; communication technologies; prejudice and discrimination; gender development; adolescent development; the transition to adulthood; school climate and motivation; and diversity issues in university outreach programs. Our interdisciplinary collaborations with other programs (such as computer engineering, computational media, education, Latin American/Latino studies, linguistics, and philosophy) help nurture students' research and prepare them for a wide variety of careers. Graduates of our program have accepted positions in academia, research institutions, and community organizations.

The social psychology graduate program at UC Santa Cruz has a unique mission and focus. We use Kurt Lewin's model of "full-cycle" social psychology (theory-application-action) to study a broad range of topics related to social justice. In this way, knowledge gained in action-oriented research leads, in turn, to the development of new theory. Accordingly, our students learn to apply psychological theories and data to the analysis and solution of a wide range of social problems. We use a variety of research methods to examine justice-related issues in different cultural, political, and policy contexts. Our students are trained in laboratory, field, and survey methods; they are encouraged to attend to issues of race, class, sexuality, ethnicity, gender, and physical ableness; and, in addition to traditional social psychological approaches, are

steeped in critical theoretical perspectives such as feminist theory. Our graduates go on to successful careers in academia as well as in community, government, and non-profit settings. Our approach to research and training, combined with the quality and competencies of our faculty, make our program among the nation's best for the psychological study of social justice issues. Current faculty research interests include aggression and trauma; culture and the self; educational access; achievement and disparities; feminisms; health and health disparities; institutional analysis; intersectionality; narrative and identity; political conflict, violence, and peace-building; political psychology; poverty and economic justice; power and oppression; psychology and law; sexual identity and society; sexuality; social identity; social policy analysis; and structural inequality.

Graduate students in psychology may obtain a designated emphasis on the psychology Ph.D. diploma indicating that they have obtained additional training in another discipline such as feminist studies, Latin American and Latino studies, or sociology. For the full list of programs that offer a designated emphasis, see the Fields of Study section of the catalog. For specific requirements for a designated emphasis in a program, please refer to the program statement for that department.

Details on the policies for admission to graduate standing and requirements for the Ph.D. degree, as well as the online application can be found on the Division of Graduate Studies website. The department's graduate program brochure, and faculty research are available on the department web site.

PSYCHOLOGY PH.D.

Introduction

The psychology program offers three areas of specialization leading to the doctoral degree: cognitive, developmental, and social psychology. The program prepares students for research, teaching, and administrative positions in colleges and universities as well as for positions in schools, government, and other public and private institutions. Each student is primarily associated with one of the three research areas and participates in the courses and research forums sponsored by the faculty in that area. The program requires full-time enrollment as a graduate student. Although applicants for a master's degree are not accepted, students in the doctor of philosophy (Ph.D.) program may obtain a Master of Science (M.S.) degree by fulfilling specific requirements. Note that the program does not offer courses, training, or supervision in clinical psychology.

The cognitive psychology graduate program focuses on research of "Minds, Brains, and Beyond," offering a blend of traditional topics and new directions in cognitive science. With core strengths in language, memory, perception, and human-computer interaction, we are exploring topics such as: faces, speech, body movements, and embodied cognition; mechanisms of remembering and forgetting; metaphors and analogies; cognitive aesthetics and creativity; natural language use in conversation; cognition and technology; human-robot interaction; human performance and information

processing. Our graduates find careers in academia, tech industries, and more.

The developmental psychology graduate program focuses on research that integrates cultural, interpersonal, and individual aspects of human development. The program focuses especially on issues of diversity in relation to culture, ethnicity, race, gender, sexuality, and social economic opportunity, as people engage across contexts of family, peers, school, community, technology, and media. Among the topics studied are: moral and emotional development; neurodiversity; language and cognitive development; learning through observation and social interaction; children and playable media; personal and social identities; family and peer relationships; communication technologies; prejudice and discrimination; gender development; adolescent development; the transition to adulthood; school climate and motivation; and diversity issues in university outreach programs. Our interdisciplinary collaborations with other programs (such as Computer Engineering, Computational Media, Education, Latin American/Latino Studies, Linguistics, and Philosophy) help nurture students' research and prepare them for a wide variety of careers. Graduates of our program have accepted positions in academia, research institutions, and community organizations.

The social psychology graduate program at UC Santa Cruz has a unique mission and focus. We use Kurt Lewin's model of "full-cycle" social psychology (theory-application-action) to study a broad range of topics related to social justice. In this way, knowledge gained in action-oriented research leads, in turn, to the development of new theory. Accordingly, our students learn to apply psychological theories and data to the analysis and solution of a wide range of social problems. We use a variety of research methods to examine justice-related issues in different cultural, political, and policy contexts. Our students are trained in laboratory, field, and survey methods; they are encouraged to attend to issues of race, class, sexuality, ethnicity, gender, and physical ableness; and, in addition to traditional social psychological approaches, are steeped in critical theoretical perspectives such as feminist theory. Our graduates go on to successful careers in academia as well as in community, government, and non-profit settings. Our approach to research and training, combined with the quality and competencies of our faculty, make our program among the nation's best for the psychological study of social justice issues. Current faculty research interests include aggression and trauma; culture and the self; educational access; achievement and disparities; feminisms; health and health disparities; institutional analysis; intersectionality; narrative and identity; political conflict, violence, and peace-building; political psychology; poverty and economic justice; power and oppression; psychology and law; sexual identity and society; sexuality; social identity; social policy analysis; and structural inequality.

Graduate students in psychology may obtain a designated emphasis on the psychology Ph.D. diploma indicating that they have obtained additional training in another discipline such as feminist studies, Latin American and Latino studies, or sociology. For the full list of programs that offer a designated emphasis, see the Fields of Study section of the

catalog. For specific requirements for a designated emphasis in a program, please refer to the program statement for that department.

Details on the policies for admission to graduate standing and requirements for the Ph.D. degree, as well as the online application can be found on the Division of Graduate Studies website. The department's graduate program brochure, and faculty research are available on the department web site.

Advancement to Candidacy

Course Requirements

First-Year and Second-Year Project:

Students enrolled in the psychology graduate program will complete a first-year and second-year research project. All students must enroll and participate in the colloquium series appropriate to their specialty each quarter.

PSYC 230	Research in Cognitive Psychology Seminar	5
PSYC 231	Research in Social Psychology Seminar	5
PSYC 242	Research in Developmental Psychology Seminar	5

Statistics

First-year students must take two courses in statistics:

PSYC 204	Quantitative Data Analysis	5
PSYC 214A	Multivariate Techniques for Psychology	5

Plus a Two-Quarter Proseminar Sequence During Fall and Winter Quarters

For Cognitive

PSYC 224A	Proseminar: Cognitive I	5
PSYC 224B	Proseminar: Cognitive II	5

Additional requirements for the cognitive area include: three advanced cognitive graduate courses, a graduate course in developmental psychology, a graduate course in social psychology, and a substantive advanced course in a discipline other than psychology.

For Developmental

PSYC 244A	Proseminar I: Cognitive and Language Development	5
PSYC 244B	Proseminar II: Social and Personality Development	5

Additional Requirements for the Developmental Area

PSYC 225A	Introduction to Developmental Research I	3
PSYC 225B	Introduction to Developmental Research II	3
PSYC 225C	Introduction to Developmental Research III	5
PSYC 246	Cultural Diversity in Human Development	5

Plus one other advanced developmental graduate seminar course, a graduate course in cognitive psychology, a graduate course in social psychology, and a substantive advanced course in a discipline other than psychology. Developmental graduate students are also required to complete a professional practicum between the end of their second year and end of their third year.

For Social

PSYC 211A	Proseminar: Social Justice and the Individual	5
PSYC 211B	Social Justice, Society, and Policy	5

Additional Requirements for the Social Area

Both these courses

PSYC 210	The Experimental Method in Social Psychology	5
PSYC 248	Survey Methods	5

Plus four additional courses

One other advanced social graduate seminar; a graduate course in cognitive psychology; a graduate course in developmental psychology; and a substantive advanced course in a discipline other than psychology.

Plus one of the following

PSYC 249	Field Methodologies and Social Ethnography	5
PSYC 255	Qualitative Inquiry in Psychology	5
PSYC 261	Participatory Action Research	5

Letter Grade

Students are required to take their graduate courses as satisfactory/unsatisfactory.

Foreign Language Requirements

Teaching Requirements

Students are required to serve as a teaching assistant for at least two courses during their graduate career (one of which must be PSYC 10 for developmental and PSYC 40 for social).

Pre-Qualifying Requirements

Qualifying Examination

After satisfying the formal course and research requirements, psychology graduate students must take an oral examination to qualify as a candidate for the Ph.D., ideally by the end of their third year. The qualifying examination is intended to assess a student's knowledge of psychology and competence to conduct the dissertation research. For the qualifying examination, students write a major paper that reflects a conceptual analysis of their main research area, prepare a list of readings representative of their expertise in three areas of psychology, and satisfactorily complete an oral qualifying examination.

Post-Qualifying Requirements

Dissertation

Dissertation

Within a year of advancing to candidacy, students will prepare a written dissertation proposal that should demonstrate the student's in-depth knowledge of some research topic, along with a detailed outline of the empirical research to be conducted for the dissertation. The student's dissertation committee reviews the proposal, and the student will orally defend the proposal for approval by the committee.

Dissertation Defense

After the final draft of the dissertation has been completed and submitted to the faculty committee members, students must defend their thesis in an oral exam.

The Ph.D. degree is awarded upon successful completion and submission of the dissertation.

PROGRAMS OFFERED

Sociology B.A. (p. 573)

Global Information and Social Enterprise Studies Minor (p. 579)

Sociology Ph.D. (p. 580)

Sociology Designated Emphasis (p. 582)

OTHER PROGRAMS OF INTEREST

Latin American and Latino Studies/Sociology Combined B.A. (p. 537)

Sociology is the study of social interactions among individuals and social groups. More specifically, sociologists examine the cultural, ideological, economic and political contexts of human action including the processes whereby social institutions are created, maintained, and transformed.

Sociology was born as an intellectual response to the democratic and industrial revolutions that ushered in the modern era. As such, it considers how society is organized in relationship to a vision of a just, free, and equal society—a vision that may require fundamental social change. Developing an understanding of both social change and social justice as part of the sociological tradition is one of the teaching goals of sociologists at UCSC. In the process, we expect to develop in students an appreciation for the craft of social science: disciplined inquiry, observation, and research as part of informed global citizenship.

Our faculty have expertise in topics that include, but are not limited to:

- Children, youth, and families
- Civic engagement, voting, and citizenship
- Community-engaged research
- Cultural politics and the politicization of culture
- The cultural politics of sex work
- Critical ethnography
- Drugs, botanicals, and pharmaceuticals in society
- Educational inequality
- Education (K-12 and higher education)

- Environmental sociology
- Feminist studies
- Globalization and international development
- Global inequality, crime, and deviance
- Health and medicine
- Identities and identity changes
- International law
- The intersection of race, class, gender and sexualities
- Labor studies
- Latinx communities
- Law and Society
- Medicine and technology
- Media studies
- Immigration and Migration
- Political economy
- Popular culture and cultural studies
- Public Policy
- Queer studies
- Science and technology
- Social movements
- Sociology of emotion and affect
- Survey design and quantitative data analysis
- Sustainability
- Technology and social change
- Urban studies

Sociology faculty use a number of approaches and methods, including field research, critical ethnography, cultural analysis, comparative historical analysis, and quantitative techniques.

Undergraduate Program

The sociology major at UC Santa Cruz is a rigorous program of study that retains enough flexibility to accommodate students with diverse career goals and plans. It ensures that all students are trained in the main theoretical and methodological traditions of sociology, yet permits considerable variation in students' own areas of specialization. The major provides the necessary intellectual foundation for students who are considering graduate studies in sociology and related social sciences. It also can be used as preparation for careers in fields as diverse as law, social work,

management, environmental planning, public service, education, health services, journalism, and counseling. Finally, the sociology major can provide a general liberal education for undergraduates interested in the study of contemporary society and social problems.

Because of the interdisciplinary emphasis among sociology faculty, undergraduates find the department amenable for double majors and minors, and non-majors find many sociology courses of interest. In recent years, students have conducted independent studies and written senior theses on a variety of subjects including undocumented immigrants, cultural diversity and inclusion in education, low-wage workers in Santa Cruz County, housing shortage, social inequality and immunology, economic inequality and mental health, surveillance state and national security, feminism, music and race, homeless shelter services, domestic violence, inclusive education, the Pelican Bay Prison hunger strike, participatory culture in the 2016 presidential campaign, social media, the school-to-prison pipeline, mental illness, and community empowerment.

The Sociology Department offers two undergraduate majors: 1) a general sociology major; 2) a sociology with a concentration in global information and social enterprise studies (GISES) intensive major. Students also have the option of a combined major in Latin American and Latino studies (LALS) and sociology, which can be found through the LALS Department. Additionally, there is a minor in GISES that is open to students in any major.

Global Information and Social Enterprise Studies

Sponsored by the Sociology Department at UC Santa Cruz is Global Information and Social Enterprise Studies (GISES), a rigorous and innovative program developed in collaboration with the Everett Program for Technology and Social Change. It aspires to create a new generation of well-trained advocates for social justice and sustainable development, who use the tools of information technology and social enterprise to solve global problems. Practically, students develop projects in solidarity with local and global organizations to democratize globalization, deepen social justice, reduce poverty, support digital education, and advance the transition to a sustainable world. The Everett Program combines social entrepreneurship with peer-to-peer and near-to-peer trainings in information technologies with the aim that students learn how to be innovative and creative problem-solvers in order to increase the informational, communication and organizational capacity of community and non-governmental organizations (NGOs). The GISES program provides an excellent foundation for students pursuing careers in non-profit management, social advocacy, sustainable businesses, and technology. Depending on a student's major, there are two ways to enter the GISES program. If a student is a sociology major and wishes to participate in GISES, they should declare the sociology with concentration in GISES intensive major. A student who majors in any field other than sociology should declare GISES as a minor.

Further Information on Sociology Majors

All major qualification courses must be taken for letter grades. Students may petition for admission to the major by attending a major declaration workshop, filling out the campus's Declaration of Major/Minor Form and Academic Planning Form, and by supplying evidence of their performance in the required lower-division courses. For specific details, refer to the Sociology Department website or the department's undergraduate adviser.

SOCIOLOGY B.A.

Information and Policies

Introduction

Academic Advising for the Program

For sociology related advising inquiries contact:

socy@ucsc.edu
831-459-4888

Visit the sociology website for additional advising information, including advising hours, appointments, and peer advising.

Sociology advising is located in Rachel Carson College Academic Building, Rm 224.

Transfer students must also review the "Transfer Information and Policy" section.

Getting Started in the Major

Program Learning Outcomes

Students graduating with a Bachelor of Arts degree in Sociology will:

- Demonstrate critical thinking and critical citizenship skills intended to promote social justice through the ability to analyze and evaluate social, political, and/or cultural arguments.
- Demonstrate sociological understandings of phenomena, for example, how individual biographies are shaped by social structures, social institutions, cultural practices, and multiple axes of difference and/or inequality.
- Formulate effective and convincing written and/or oral arguments.
- Demonstrate an understanding of, and the ability to use, several of the major classical and/or contemporary perspectives in social theory.
- Demonstrate an understanding of several of the major social science research methodologies.

- Demonstrate knowledge of some of the key substantive areas within the field of sociology.

Major Qualification Policy and Declaration Process

Major Qualification

General Sociology Major

Students must take two of the following courses, for a letter grade, prior to petitioning for entry to the general sociology major:

SOCY 1	Introduction to Sociology	5
SOCY 10	Issues and Problems in American Society	5
SOCY 15	World Society	5

Students who pass these two courses with grades of C+ or better will be allowed to declare the sociology major. Students who are transferring in should also refer to the section below, "Transfer Information and Policy," on the major selection criteria used during the admissions screening process.

Sociology with a Concentration in GISES Intensive Major

Students must take three courses, for a letter grade, prior to petitioning for entry to the sociology with a concentration in Global Information and Social Enterprise Studies (GISES) intensive major, including this course:

SOCY 30A	Introduction to Global Information and Social Enterprise Studies	5
----------	--	---

Plus two of the following courses

SOCY 1	Introduction to Sociology	5
SOCY 10	Issues and Problems in American Society	5
SOCY 15	World Society	5

To be considered for admission to the sociology bachelor of arts (B.A.) with a concentration in GISES, students are required to obtain a GPA of 2.8 or higher in the above courses, and obtain approval from the faculty director. Students will begin the approval process while enrolled in SOCY 30A. Prior to enrollment into the second course in the series, SOCY 107A, the faculty director works with students to ensure there is an appropriate match between student interests and project partners.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the Sociology Department Undergraduate Education chair within 15 days from the date of notification. Within 15 days of receipt of the appeal, the department will notify the student and college of the decision. Letters of appeal should describe any extenuating circumstances that might have affected the student's record. Students should submit the appeal letter via email to socy@ucsc.edu or in-person to the undergraduate adviser in the Sociology Department located in Rachel Carson College Academic Building, rooms 224 or 226. Students may contact the sociology undergraduate adviser for any questions.

How to Declare a Major

To declare the major, students must attend a major declaration workshop. Students must meet the lower-division major qualification requirements prior to declaring their major or minor. For more information about the declaration workshops, process, or to sign up for a workshop, please review the Sociology Department website or contact the department's undergraduate adviser.

Transfer Information and Policy

Transfer Admission Screening Policy

To be considered for admission as a proposed major in sociology, students must complete prior to transfer, with a grade of C (2.0) or better, courses articulated to:

1. SOCY 1, Introduction to Sociology
2. SOCY 10, Issues and Problems in American Society

Prospective students for winter transfer are additionally required to complete, with a grade of C (2.0) or better, an articulated equivalent of SOCY 3A prior to transfer.

Transfer students are strongly encouraged to complete the articulated equivalents of SOCY 3A and SOCY 3B prior to enrolling at UC Santa Cruz to ensure timely progress.

Getting Started at UCSC as a Transfer Student

Transfer students who meet the selection criteria and are offered admission are admitted as proposed sociology majors. They must work with the sociology undergraduate coordinator when they arrive on campus to begin the process to declare the major and attend a major declaration workshop. Declaration of the major for transfer students must be completed by the campus declaration deadline, in the second term of residency.

Students who are proposed in a different major and have advanced standing when they come to UCSC require permission from the department to change into the major.

To ensure timely progress in the major, transfer students admitted as proposed sociology majors must take SOCY 3A in fall quarter if they have not satisfied the articulated equivalent at their previous institution. If SOCY 3A has been completed prior to transfer, it is recommended that SOCY 105A be taken in fall or winter quarter. In addition, transfer students who are pursuing the GISES intensive concentration must take SOCY 30A in fall quarter as it is the start of a yearlong course series.

Letter Grade Policy

All major qualification courses must be taken for letter grades. All other major requirements may be taken as a letter grade or Pass/No Pass. No more than 25 percent of credits earned at UCSC may be graded on a Pass/No Pass basis. Students must be in good academic standing to choose the Pass/No Pass option.

Course Substitution Policy

Sociology B.A. students may substitute two of the upper-division elective requirements with upper-division electives from other UCSC departments, individual study courses, education abroad electives, or other four-year institution electives. Students are limited in the number of outside electives accepted toward the major and must petition for approval of the course prior to applying it to the major. Review the sociology webpage for information about the petition process.

Double Majors and Major/Minor Combinations Policy

Study Abroad

Students seeking to study abroad must be declared in their major prior to studying abroad.

It is recommended that the students have the courses intended to be taken abroad reviewed and approved by the Sociology Department prior to departure. Up to two relevant courses taken through study abroad programs from which credits are transferable to UCSC may be used toward satisfaction of the sociology B.A. elective requirements when the content is deemed appropriate and approved by the Sociology Department. Up to five relevant courses taken through study abroad programs from which credits are transferable to UCSC may be used toward satisfaction of the sociology B.A. with a concentration in GISES intensive major elective requirements when the content is deemed appropriate and approved by the Everett/GISES program faculty director.

Visit the sociology webpage for additional information and planners for study abroad.

Honors

The Sociology Department awards honors in the major based on the student's cumulative GPA for all courses taken to satisfy the program's major requirements, excluding the comprehensive requirement. Students with a GPA of 3.75 or above will be considered for honors in the major. Students with a GPA of 3.9 or above will be considered for highest honors in the major. No more than approximately 15 percent of the graduating class will be considered for honors or highest honors in the major. Comprehensive honors is awarded to students who complete the senior thesis option, and their faculty thesis sponsor and one additional reader evaluate the thesis to be of honors quality.

General Sociology Major

Course Requirements

Sociology majors are required to take a total of 11 courses (two lower-division courses in preparation for the major, two prescribed lower-division core courses, two prescribed upper-division core courses, and five upper-division electives). In addition, they must successfully complete the comprehensive requirement prior to graduation.

Lower-Division Courses

Lower-division preparation:

All sociology majors are required to take two lower-division preparation courses, or their articulated equivalents.

Select two from the following three courses:

SOCY 1	Introduction to Sociology	5
SOCY 10	Issues and Problems in American Society	5
SOCY 15	World Society	5

Lower-division core courses:

The following two sociology courses, or their articulated equivalents, are required as the foundation of statistical and research methods in the discipline.

SOCY 3A	The Evaluation of Evidence	5
SOCY 3B	Statistical Methods	5

Upper-Division Courses

Upper-division core courses:

The following two sociology courses are required as the foundation of theoretical training in the discipline.

SOCY 105A	Classical Social Theory	5
SOCY 105B	Contemporary Social Theory	5

Upper-division advanced coursework:

Five upper-division sociology electives are required. The Sociology Department offers upper-division electives that reflect a wide range of ideas within the discipline and the diversified research interests of the faculty. All upper-division electives offered by the department are numbered Sociology 110-189. The annual course offerings can be viewed on the sociology webpage.

Electives

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The goals of the Sociology Department's Disciplinary Communication requirement is to ensure that students acquire and develop the skills in writing and other forms of communication that will best serve them in their study of sociology, and as future learners. The following courses satisfy the Disciplinary Communication requirement for students in programs administered by the Sociology Department.

SOCY 105A	Classical Social Theory	5
SOCY 105B	Contemporary Social Theory	5

Comprehensive Requirement

Prior to graduation, all sociology majors are required to complete one of the following comprehensive requirements.

Senior thesis

SOCY 195A	Senior Thesis	5
SOCY 195B	Senior Thesis	5

<p>SOCY 195C Senior Thesis 5</p> <p>The prerequisite for the senior thesis is SOCY 3A and completion of the major's Disciplinary Communications (DC) requirement. Students who would like to write a senior thesis must submit to their preferred faculty thesis sponsor a proposal that includes a working title, a description of the work to be undertaken, research question(s), methodology, a brief bibliography, a timeline to completion, at least three keywords describing the thesis topics, and materials from relevant courses that might help faculty determine their preparedness to complete the thesis. In addition, students must familiarize themselves with IRB protocols and include in their proposal whether their research includes human subjects, if the project is IRB exempt, or if an IRB application will be needed. The proposal must be submitted one quarter prior to the commencement of the thesis work. Students unsuccessful in obtaining a thesis sponsor through these means may submit their proposals to the department's undergraduate education committee (UEC) no later than the sixth week of the quarter, one quarter prior to the commencement of the thesis work. UEC members will review the merits of these proposals and assign the ones they approve to faculty members who have not yet agreed to serve as thesis advisers for the following year. Students will be notified of the outcome of the UEC's deliberations within three weeks.</p>	<p>(soph)</p> <p>3rd (junior) SOCY 105A SOCY 105B SOCY elective</p> <p> SOCY elective SOCY elective</p> <p>4th (senior) SOCY elective SOCY elective SOCY 196A (or thesis fall-winter-spring)</p>

Planners

Sociology Major Planner One

The following is a recommended academic plan for students in the sociology major.

Option One

Year	Fall	Winter	Spring
1st (frosh)	SOCY 1	SOCY 10	
2nd	SOCY 3A	SOCY 3B	

In addition to the specific courses shown in these planners, a student must complete courses satisfying the CC, ER, IM, MF, SI, TA, PE, PR and composition General Education (GE) requirements. All sociology majors are required to take a statistical methods course which also satisfies the SR GE. Other GEs that could be satisfied in the sociology major, but are not required, are CC, ER, TA, and PE.

Sociology Major Planner Two

The following is a recommended academic plan for transfer students entering the sociology major. It is assumed that SOCY 1 and SOCY 10 equivalencies were completed at the previous college.

Option One

Year	Fall	Winter	Spring
-------------	-------------	---------------	---------------

1st (junior)	SOCY 3A*	SOCY 3B*	SOCY 105B
	SOCY elective	SOCY 105A	SOCY elective
2nd (senior)	SOCY elective	SOCY elective	SOCY 196A (or thesis fall- winter-spring)
	SOCY elective		

*Articulated equivalent courses may be taken prior to transfer.

Option Two

Year	Fall	Winter	Spring
1st (junior)	SOCY 3A*	SOCY 3B*	SOCY elective
	SOCY 105A	SOCY 105B	SOCY elective
2nd (senior)	SOCY elective	SOCY elective	SOCY 196A (or thesis fall- winter-spring)
	SOCY elective		

*Articulated equivalent courses may be taken prior to transfer.

Sociology with Concentration in GISES Intensive Major

The GISES intensive concentration is an option for students wishing to major in sociology and focus in the area of Global Information and Social Enterprise Studies (GISES). The major is sponsored and administered by the Department of Sociology. This major is designed for highly motivated, self-directed and enterprising students who have demonstrated the capacity to design and complete an honors-quality project for a civil society group. Students are required to take a total of 15 courses (three prescribed lower-division courses in preparation for the major, two prescribed lower-division core courses, two prescribed upper-division GISES courses, two prescribed upper-division core courses, five upper-division electives, and a project practicum course). In addition, they must successfully complete the comprehensive requirement prior to graduation.

Course Requirements

Lower-Division Courses

Lower-division preparation:

Students must take the following three courses or their articulated equivalents.

SOCY 30A	Introduction to Global Information and Social Enterprise Studies	5
----------	--	---

And select two from the following three options:

SOCY 1	Introduction to Sociology	5
SOCY 10	Issues and Problems in American Society	5
SOCY 15	World Society	5

Lower-division core courses:

The following two sociology courses, or their articulated equivalents, are required as the foundation of statistical and research methods in the discipline.

SOCY 3A	The Evaluation of Evidence	5
SOCY 3B	Statistical Methods	5

Upper-Division Courses

Upper-division GISES core courses:

The following two courses are required for the design and implementation of the GISES project.

SOCY 107A	Designing ICT Projects for Social Enterprise	5
SOCY 107B	Project Implementation and Grant Writing for Social Entrepreneurs	3

Upper-division core courses:

The following two sociology courses are required as the foundation of theoretical training in the discipline.

SOCY 105A	Classical Social Theory	5
SOCY 105B	Contemporary Social Theory	5

Upper-division advanced coursework:

Five upper-division electives are required, selected from the Sociology Department elective courses, Sociology 110-189, or from Sociology Course List (p. 582). Students are strongly recommended to consult with the director of GISES before choosing their electives, to ensure that their choices contribute to their selected project and/or their growth as a technology activist or technology linked social change advocate. Courses outside the list of approved courses may also be approved by the director of GISES. For more information on the process students must follow to have their courses approved, please visit the Everett Program webpage.

Project practicum:

Students must enroll in SOCY 196G, Project Practicum, and complete their GISES capstone project. SOCY 196G is offered every fall quarter. Students may review the GISES

webpage, or contact the program director of GISES (socy@ucsc.edu) for more detailed guidelines regarding the GISES capstone project. Prior to enrolling in SOCY 196G, students are required to submit, electronically, a one-page polished and concise summary of the GISES capstone project that will be the focus of their project practicum. This project summary constitutes a prerequisite for enrolling in SOCY 196G.

SOCY 196G	Project Practicum: Global Information and Social Enterprise	5
-----------	---	---

The final GISES capstone project must make an unambiguous contribution to advancing a solution to a problem associated with global social justice and/or sustainable development. The project must be associated with a real, viable civil society organization, community organization, school or non-governmental organization (NGO). To complete the final requirements for GISES major or minor, the integrated project—narrative and digital deliverable—must be mounted on the appropriate web-enabled database managed by the Everett Program.

Electives

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The goal of the Sociology Department's Disciplinary Communication requirement is to ensure that students acquire and develop the skills in writing and other forms of communication that will best serve them in their study of sociology, and as future learners. The following courses satisfy the Disciplinary Communication requirement for students in programs administered by the Sociology Department.

SOCY 105A	Classical Social Theory	5
SOCY 105B	Contemporary Social Theory	5

Comprehensive Requirement

Prior to graduation, students are required to complete one of the following comprehensive requirements.

Senior thesis

SOCY 195A	Senior Thesis	5
SOCY 195B	Senior Thesis	5
SOCY 195C	Senior Thesis	5

The prerequisite for the senior thesis is SOCY 3A and completion of the major's Disciplinary Communications (DC) requirement. Students who would like to write a senior thesis must submit to their preferred faculty thesis sponsor a proposal that includes: a working title, a description of the work to be undertaken, research question(s), methodology, a brief bibliography, a timeline to completion, at least three keywords describing the thesis topics, and materials from relevant courses that might help faculty determine their preparedness to complete the thesis. In addition, students must familiarize themselves with IRB protocols and include in their proposal whether their research includes human subjects, if the project is IRB exempt, or if an IRB application will be

needed. The proposal must be submitted and approved one quarter prior to the commencement of the thesis work. Students unsuccessful in obtaining a thesis sponsor through these means may submit their proposals to the department's undergraduate education committee (UEC) no later than the sixth week of the quarter, one quarter prior to the commencement of the thesis work. UEC members will review the merits of these proposals and assign the ones they approve to faculty members who have not yet agreed to serve as thesis advisers for the following year. Students will be notified of the outcome of the UEC's deliberations within three weeks.

Capstone course

SOCY 196A	Capstone: The Sociologist as Public Intellectual	5
-----------	--	---

Upper-division lecture course that explores public sociology and integrates current research with theoretical strands in sociology.

In exceptional cases, students unable to take the senior capstone course may be allowed to substitute a portfolio of work. This substitution must be approved in advance by the department chair. The portfolio option consists of: 1) portfolio of materials from (at least) three upper-division sociology courses; 2) a synthetic essay; 3) a paper consisting of new research by the student on some contemporary social or political issue, analyzed using the theoretical and empirical materials from those three courses.

See the department website for additional information.

Planners

Sociology with Concentration in GISES Intensive Major Planner One

The following is a recommended academic plan for students in the sociology with concentration in GISES intensive major.

Option One

Year	Fall	Winter	Spring
1st (frosh)	SOCY 1	SOCY 10	
2nd (soph)	SOCY 3A SOCY 30A	SOCY 3B SOCY 107A	SOCY 107B
3rd (junior)	SOCY 105A Upper-division elective	SOCY 105B Upper-division elective	Upper-division elective
4th	Upper-	Upper-	SOCY 196A

(senior)	division elective	division elective	(or thesis fall-winter-spring)	Upper-division elective	SOCY 105A		
	SOCY 196G			2nd (senior)	Upper-division elective	Upper-division elective	SOCY 196A (or thesis fall-winter-spring)
Option Two					SOCY 196G	Upper-division elective	Upper-division elective
Year	Fall	Winter	Spring				
1st (frosh)			SOCY 1				

2nd (soph)	SOCY 15 SOCY 3A	SOCY 3B	
3rd (junior)	SOCY 30A Upper-division elective	SOCY 107A Upper-division elective	SOCY 107B Upper-division elective
4th (senior)	SOCY 105A SOCY 196G	SOCY 105B Upper-division elective	SOCY 196A (or thesis fall-winter-spring) Upper-division elective

In addition to the specific courses shown in these planners, a student must complete courses satisfying the CC, ER, IM, MF, SI, TA, PR and composition general education (GE) requirements. All sociology majors are required to take a statistical methods course which satisfies the SR GE, and GISES students complete SOCY 30A which satisfies the PE GE. Other GEs that could be satisfied in the sociology major, but are not required, are CC, ER, and TA.

Sociology with Concentration in GISES Intensive Major Planner Two

The following is a recommended academic plan for transfer students entering the sociology with concentration in GISES intensive major. It is assumed that SOCY 1 and SOCY 10 equivalencies were completed at the previous college.

Year	Fall	Winter	Spring
1st (junior)	SOCY 3A* SOCY 30A	SOCY 3B* SOCY 107A	SOCY 107B SOCY 105B

*Articulated equivalent courses may be taken prior to transfer

This planner also assumes that a student has completed most of the general education requirements, beyond major preparation requirements, before transferring to UCSC.

GISES MINOR

Students must take one course prior to petitioning for entry to the GISES minor: SOCY 30A, Introduction to Global Information and Social Enterprise Studies. In order to declare the GISES minor, students must first have declared a major and must also meet with the sociology undergraduate advisor to review and complete the Major/Minor declaration form.

Course Requirements

Students minoring in GISES are required to complete the following courses and requirements:

Lower-Division Courses

Lower-division preparation:		
SOCY 30A	Introduction to Global Information and Social Enterprise Studies	5

Upper-Division Courses

Upper-division GISES core courses:		
SOCY 107A	Designing ICT Projects for Social Enterprise	5
SOCY 107B	Project Implementation and Grant Writing for Social Entrepreneurs	3

Upper-division advanced coursework:

Three additional upper-division electives are required, selected from the Sociology Department elective courses, Sociology 110-189, or from the list of approved courses (p. 582). Students are strongly recommended to consult with the director of GISES before choosing their electives, to ensure that their choices contribute to their selected project and/or their growth as a technology activist or technology linked social change advocate. Courses outside the list of approved courses may also be approved by the director of GISES. For more information on the process students must follow to have

their courses approved, please visit the Everett Program webpage.

Project practicum:

Students must enroll in SOCY 196G, Project Practicum and complete their GISES capstone project. Contact the director of GISES or the Sociology Department undergraduate adviser for more detailed guidelines regarding the GISES capstone project. Prior to enrolling in SOCY 196G, students are required to submit electronically a one-page polished and concise summary of the GISES capstone project that will be the focus of their project practicum. This project summary constitutes a prerequisite for enrolling in SOCY 196G.

The final GISES capstone project must make an unambiguous contribution to advancing a solution to a problem associated with global social justice and/or sustainable development. The project must be associated with a real, viable civil society organization, community organization, school or non-governmental organization (NGO). To complete the final requirements for a GISES major or minor, the integrated project—narrative and digital deliverable—must be mounted on the appropriate web-enabled database managed by the Everett Program.

Graduate Program

SOCIOLOGY PH.D.

Introduction

The Sociology Department at UCSC is intellectually innovative, both in its interdisciplinary nature and in its commitment to inquiry that is engaged with the world beyond the university. The Ph.D. program leads to both academic and non-academic careers. It distinguishes itself by its interdisciplinary nature. The program is designed to educate students in sociological theory and methods and in the discipline's major substantive areas while simultaneously exposing students to other arenas of intellectual inquiry that will aid them as they pursue their research questions and interests. After completing a group of required courses, students work closely with individual faculty members in designing their own course of study. The program leads to a Ph.D. in sociology. While a terminal master of arts (M.A.) program is not available and students are not admitted directly into the M.A., students have the option of applying for a non-terminal master's degree en route to the Ph.D. The program leads to a doctor of philosophy (Ph.D.) degree in sociology. A master's degree may be taken en route to the doctorate, but a master's program per se is not available.

The core curriculum is divided into two parts, 1) basic grounding in sociological theory and methods, and 2) exposure to research in three areas of concentration: a) political economies and political ecologies; b) new studies of inequality; and c) culture, knowledge, and power. To prepare students to conduct their own research projects, the department trains students in multiple methods—field research, critical ethnography, cultural analysis, comparative historical analysis, and quantitative data analysis. For an

overview of the faculty members' research interests, please refer to the program description.

Funding

Graduate students are supported through teaching assistantships, teaching fellowships, research fellowships and other grant/fellowship opportunities. A number of faculty receive research grants that support graduate student research assistantships.

When asked what they most appreciate about the sociology graduate program, most students cite the students' and faculty's commitment to social change in combination with their dedication to teaching, scholarly research, and understanding of the social forces of our society. The Sociology Department's colloquium series enhances scholarship, practice, and collegial networks. The diversity in age, ethnicity, and work experience of the student body creates a vibrant atmosphere for learning.

Many of the faculty in the Sociology Department have affiliations with other departments and programs on campus, and the graduate program consequently encourages interdisciplinary work. Seminars in the anthropology, environmental studies, history, history of consciousness, politics, psychology, and feminist studies programs are open to sociology students. Graduate students in sociology may obtain a designated emphasis on the sociology Ph.D. diploma indicating that they have specialized in a specific field in addition to sociology, such as feminist studies, Latin American and Latino studies, critical race and ethnic studies, environmental studies, philosophy, or education. Students must meet requirements for the designated emphasis as spelled out by the relevant department. For a complete list of programs that offer a designated emphasis, refer to the fields of study in the General Catalog. Students also participate in research projects under the auspices of a number of interdisciplinary social science research centers: the Science and Justice Research Center; the Center for Agroecology and Sustainable Food Systems; the Center for Labor Studies; the Chicano/Latino Research Center; the Center for Collaborative Research for an Equitable California; the Affect Studies Working Group; the Urban Studies Research Cluster; and the Interdisciplinary Development Working Group. Research opportunities also are available in the areas of environmental studies, feminist studies, and lesbian/gay/queer studies.

Many of our graduate students present papers at professional conferences and publish articles during the course of their graduate studies. The sociology master's paper is designed to prepare students to write for professional journals. Ongoing faculty seminars focusing on concrete research topics are available for advanced graduate students working on papers and dissertations in related areas.

The sociology program provides graduate students with many teaching opportunities so they can practice the skills required for good teaching—the ability to articulate ideas, to organize and present materials in logical sequence, and to listen attentively and discern someone else's comprehension. Graduate students typically serve as teaching assistants for at

least three quarters, if not more, in the department's core classes of the undergraduate curriculum.

The Sociology Department at UCSC is intellectually innovative, both in its interdisciplinary approach and in its commitment to inquiry that is engaged with the world beyond the university.

Details of the policies for admission to the graduate program, the requirements for the Ph.D. degree, and information on financial support opportunities are available from the Department of Sociology. For more information, please refer to the Graduate Studies section of the catalog.

Advancement to Candidacy

Course Requirements

Students are required to take at least 10 courses as follows.

A three-course core group:

SOCY 201	The Making of Classical Theory	5
SOCY 202	Contemporary Sociological Theory	5
SOCY 203	Sociological Methods	5

Two methods courses:

SOCY 204	Methods of Quantitative Analysis	5
----------	----------------------------------	---

and one of the following eight courses:

SOCY 205	Field Research Methods	5
SOCY 206	Comparative Historical Methods	5
SOCY 209	The Analysis of Cultural Forms	5
SOCY 241	Cross-National and Cross-Cultural Research	5
SOCY 242	Feminist Research Seminar	5
SOCY 268A	Science and Justice: Experiments in Collaboration	5
SOCY 282	Social Policy Research	5
PSYC 248	Survey Methods	5

Two of three thematic area courses:

SOCY 220	Global Transformation: Macrosociological Perspectives	5
SOCY 240	Inequality and Identity	5
SOCY 260	Culture, Knowledge, Power	5

A minimum of three elective graduate seminars, one of which may be from outside sociology (excluding SOCY 250 and SOCY 293).

SOCY 204: Students with no background in statistics are strongly advised to take an undergraduate course in statistical methods before enrolling in Methods of Quantitative Analysis, but can be admitted with permission of the instructor.

Elective Courses

A minimum of three elective graduate seminars, one of which may be from outside sociology (excluding SOCY 250 and SOCY 293). The elective course offerings change yearly. This selection of courses are offerings from the recent past.

SOCY 208	Writing Practicum	5
SOCY 209	The Analysis of Cultural Forms	5
SOCY 220	Global Transformation: Macrosociological Perspectives	5
SOCY 223	Sociology of the Environment	5
SOCY 225	Political Economy for Sociologists	5
SOCY 229	Work and Labor Markets in the New Economy	5
SOCY 240	Inequality and Identity	5
SOCY 242	Feminist Research Seminar	5
SOCY 244	Race and Ethnicity	5
SOCY 246	Class, Culture, and Movement	5
SOCY 249	Feminisms and Cultural Politics	5
SOCY 255	Engaging Cultural Studies	5
SOCY 256	Urban Sociology	5
SOCY 257	Colonialism, International Law, and Global Justice	5
SOCY 259	Space and the Politics of Difference	5
SOCY 260	Culture, Knowledge, Power	5
SOCY 263	Cultural Politics of Difference	5
SOCY 268A	Science and Justice: Experiments in Collaboration	5
SOCY 268B	Science and Justice Research Seminar	5
SOCY 290	Advanced Topics in Sociological Analysis	5

SOCY 209 SOCY 268A: Can be taken as an elective if not fulfilling the methods requirement.

Students are required to take two of the three thematic area courses—SOCY 220, SOCY 240, SOCY 260—and the third may count as an elective.

For more information about courses offered in the 2018-19 academic year, please visit the course listings at the Sociology Department website.

Foreign Language Requirements

Teaching Requirement

Pre-Qualifying Requirements

Beginning at least by the end of the first year, students initiate work on their master's paper.

Completion of the master's paper and required coursework is expected by the end of the second year.

Graduate students prepare field statements in two distinct areas of sociology as a written pre-qualifying stage to the oral qualifying examination.

Qualifying Examination

The qualifying examination is an oral defense of the student's dissertation proposal and occurs one quarter after the pre-qualifying field statement stage has been passed.

Students are expected to take their oral qualifying examination by the end of the third year, but no later than the end of the fourth year.

Post-Qualifying Requirements

Dissertation

Dissertation

After passing the qualifying examination, a student advances to candidacy and begins work on the dissertation with the aid of a three-person dissertation committee.

Dissertation Defense

After the complete dissertation has been submitted to and accepted by the dissertation committee, students must pass an oral dissertation defense.

Academic Progress

Applying for Graduation

SOCIOLOGY DESIGNATED EMPHASIS

Introduction

Graduate students interested in pursuing the Designated Emphasis in Sociology should contact the Sociology graduate program coordinator.

Requirements

To receive the Designated Emphasis (DE) in Sociology, a graduate student from another department must complete the following requirements in addition to the degree requirements for the doctorate in their degree-granting department. Students must initiate the request for the DE through their home departments. Then the student must meet with the Sociology graduate director who will: a) decide whether to approve the application; b) help find a Sociology faculty adviser; and c) oversee progress in the Designated Emphasis.

Committee Composition and Departmental Approvals

Adviser: In addition to the student's adviser(s) in their home department, the student must have a faculty adviser from among the core faculty of the Sociology Department who commits to serve on the qualifying examination (QE) committee. Outside members of a QE committee must be tenured.

Course Requirements

The student must take five (5) Sociology graduate seminar courses:

Two (2) core courses:

SOCY 201	The Making of Classical Theory	5
SOCY 202	Contemporary Sociological Theory	5

One (1) methods course from the following:

SOCY 203	Sociological Methods	5
SOCY 204	Methods of Quantitative Analysis	5
SOCY 205	Field Research Methods	5
SOCY 206	Comparative Historical Methods	5
SOCY 209	The Analysis of Cultural Forms	5
SOCY 241	Cross-National and Cross-Cultural Research	5
SOCY 242	Feminist Research Seminar	5
SOCY 282	Social Policy Research	5

Two (2) other graduate seminar electives offered by the Sociology Department

*SOCY 208, SOCY 250, SOCY 293, SOCY 297, SOCY 299 cannot be counted toward the requirements for the Designated Emphasis.

All courses must be offered by the Sociology Department. Courses offered by other departments do not count towards the requirements for the Designated Emphasis in Sociology.

Writing, Research and/or Teaching Requirements

The student must prepare a significant piece of scholarly writing in the area of sociology. This may take the form of a substantial seminar paper, a master's essay, a paper submitted for publication, or a chapter of the doctoral dissertation. The student's Sociology faculty adviser will determine whether a particular piece of writing meets the requirement.

ACADEMIC PROGRAMS

Academic Literacy Curriculum (p. 188)
College Scholars Program (p. 606)

ACADEMIC EMPHASIS

College Nine's theme of International and Global Perspectives emphasizes the causes and consequences of our increasingly interconnected world. We challenge students to grapple with complex, controversial and multi-scalar issues, for which there exist vastly differing opinions about the nature of problems and how to solve them. Becoming a global citizen requires critical thinking, cultural awareness, and effective communication, all skills our training provides to our students. Our academic and co-curricular programs analyze economic and cultural globalization, immigration, ethnic conflicts, genocide, and human rights, among other issues. Students interested in these issues either as their major focus or as part of their general education are invited to join the College Nine community.

CORE COURSE

In the first-quarter frosh core course, CLNI 1: Academic Literacy and Ethos: International and Global Perspectives, students examine current issues pertinent to the college's intellectual theme. This course challenges students to address what it means to be a global citizen, in recognition of our growing interconnections and interdependencies, and the fact that certain intractable problems cannot be addressed without large-scale collective action. Topics address issues such as globalization, inequities in wealth and poverty across the world, human rights, and climate change. The seminar teaches foundational concepts for intellectual exploration and personal development within an academic community—analysis, critical thinking, metacognition, engagement with others across difference, and self-efficacy. The instructors work closely with each student throughout the quarter.

COLLEGE ADVISING

nineadvising@ucsc.edu
Phone: 831-459-5034
Social Sciences 1, Room 217

Located on the second floor of Social Sciences 1, our team of dedicated, knowledgeable and caring advisers are here to guide students throughout their journey at UC Santa Cruz, from being admitted to the university through graduation. Our approach is collaborative and student-centered, assisting undergraduates with identifying and exploring their academic interests and capacities, and providing advice as to how to make the most of their time at UCSC. Our advisers answer questions about navigating the policies and life at UCSC, course scheduling and selection, degree and general education requirements, qualifying for a major, educational support and opportunities, and much more. Close partnerships with units across campus mean that if we do not know the answer to a question, we usually know someone who does.

Students who wish to connect with advising should visit the College Nine Academic Advising website for open hours, drop-ins, and appointments.

OTHER ACADEMIC PROGRAMS

Optional programs are available to involve College Nine students in academic and co-curricular activities beyond the first-quarter course. They are designed to promote students' academic achievement and success by connecting them with faculty mentors and helping them pursue leadership experiences in particular contexts.

Global Action

Global Action, CLNI 85, is a course facilitated by peer instructors in which students learn about current international and global issues through interactive exercises, small group discussions, and faculty presentations. Students will develop an "action plan" to raise awareness about one or more of these concerns and take practical steps to create positive change in the world. Projects in past years have partnered with organizations doing outstanding work in countries like Ecuador, India and Nepal. Students who have taken and excelled in CLNI 85 are eligible to teach the course in a future year, enrolling in CLNI 191: Teaching Global Action, where they gain the skills, techniques and tools to facilitate their own section of 12-18 students. Mentoring by our experienced staff is vital to realizing the potential of such peer-to-peer learning.

Apprenticeship in Community Engaged Research

The Apprenticeship in Community Engaged Research (or (H)ACER) is a new program at College Nine and College Ten designed to teach students qualitative research methods with a

focus on community-engaged and participatory methodologies. The objectives of our work encompass student enrichment, uplifting the work of our community partners, and conducting relevant, critical research to solve real-life challenges at the intersections of education, health, economics, immigration, nutrition, labor and the environment. The benefits for students of experiential learning in the community are multiple: abstract academic concepts become more tangible, students expand their web of social connection, and skills such as teamwork and problem solving are heightened. Students reach outside of their comfort zone, have their assumptions challenged, and meet remarkable local heroes.

(H)ACER offers a scaffolded progression of opportunities for students: students can begin by getting involved with Praxis, participating in Alternative Spring Break, or signing up for internships with community partners such as an after-school, garden-based educational program at Calabasas Elementary School in Watsonville. Praxis is a student club for community service in which College Nine and College Ten students undertake monthly volunteer opportunities throughout Santa Cruz County and neighboring communities. During campus meetings, Praxis participants engage in discussion, reading, and reflection to increase their awareness and knowledge about key issues.

Alternative Spring Break (ASB) in Watsonville centers on issues of food security, sovereignty, and justice. After getting to know each other at a retreat, discussing readings, and hearing from a panel of Watsonville leaders, ASB participants undertake five days of experiential learning with a variety of community partners (e.g., schools, artists, non-profits). After Spring Break, a final gathering is held for students to share their final projects.

These community learning opportunities for students then transition in our (H)ACER class series. The classes train students in research methodologies, support data collection and analysis with our community and university partners, and provide cutting-edge and methodologically rich research experiences for UCSC undergraduate students. These classes set students up to develop their own research projects that can then extend into senior theses and pathways to distinction in Colleges Nine and Ten.

Practical Activism: Tools for Local and Global Change

The annual Practical Activism Conference is a daylong, student-led event featuring keynote speakers, 10 workshops, various on- and off-campus organizations, performances, and a variety of hands-on activism activities. Students gain valuable leadership and organizing skills through developing and planning this exceptional program, which involves collaboration among faculty, staff, and the local community. Visit Practical Activism for more information.

Community Garden Class

In cooperation with the work of the Community Garden Club, this course explores such topics as collaborative garden design, community gardening best practices, building regenerative social and ecological systems, sustainability, and food justice, while also offering hands-on experience in the Colleges Nine and Ten community garden.

Education Abroad

The UC Education Abroad Program places students at a university in another country for one or more quarters. Studying abroad can be a valuable way to expand one's understanding of the world. Given the international focus at College Nine, students are encouraged (but not required) to develop a second language or to study abroad.

College Nine Pathways to Distinction

Another feature of College Nine is that qualified students may graduate with College Nine Distinction. This recognition is intended to serve as an incentive for students to pursue activities that are especially apt to help them succeed in college and beyond. Two pathways are possible:

Research and Scholarship. In this pathway, students pursue research with faculty by completing three quarters (15 credits) of work on a senior thesis or a research internship. Students may be recognized with College Nine Distinction if they do a thesis or a research internship in their major on a topic related to international or global issues.

Language and Culture. Students who enroll in at least three quarters (15 credits) in either Education Abroad or a foreign language (or a combination) may qualify for College Nine Distinction.

College Ten

College Office, 217 Social Sciences 1
(831) 459-5034
<https://collegeten.ucsc.edu>

ACADEMIC PROGRAMS

Academic Literacy Curriculum (p. 188)
College Scholars Program (p. 606)

ACADEMIC EMPHASIS

College Ten's theme of Social Justice and Community addresses a range of social problems and their impacts on society. Understanding the contemporary United States requires knowledge of histories and social theories that address concepts including racialized and gendered social hierarchies, the construction of marginalization and difference, the impacts of class differentials, and many manifestations of unequal power relationships. A flourishing society that progresses toward more social and environmental justice depends on informed, critical, and empathetic people willing to make the efforts necessary to create social change. At College Ten, we strive toward the goals of analyzing, embodying, and implementing ideas that help our students become knowledgeable and critical social actors who recognize and practice the principle that all people possess equal intrinsic worth. Our academic and co-curricular programs consider the injustices that many people confront in their lives, and possible policies for addressing social, political, and economic inequalities. In addition, the college provides students with opportunities to make their own positive contributions to social change through community involvement or scholarly research.

CORE COURSE

In the first-quarter frosh core course, CLTE 1: Academic Literacy and Ethos: Social Justice and Community, students examine current issues pertinent to the college's intellectual theme. The college curriculum explores the causes and consequences of social injustice in several ways. Students examine the roots of prejudice, discrimination, and violence directed toward groups based on their ethnicity, skin color, gender, sexual orientation, religious beliefs, or political views. They also consider the causes and consequences of economic inequality both within the United States and around the world. In addition to articulation with the college theme, the seminar teaches foundational concepts for intellectual exploration and personal development within an academic community—analysis, critical thinking, metacognition, engagement with others across difference, and self-efficacy. The instructors work closely with each student throughout the quarter.

COLLEGE ADVISING

tenadvising@ucsc.edu
Phone: 831-459-5034
Social Sciences 1, Room 217

Located on the second floor of Social Sciences 1, our team of dedicated, knowledgeable and caring advisers is here to guide students throughout their journey at UC Santa Cruz, from being admitted to the university through graduation. Our approach is collaborative and student-centered, assisting undergraduates with identifying and exploring their academic interests and capacities, and providing advice as to how to make the most of their time at UCSC. Our advisers answer questions about navigating the policies and life at UCSC, course scheduling and selection, degree and general education requirements, qualifying for a major, educational support and opportunities, and much more. Close partnerships with units across campus mean that if we do not know the answer to a question, we usually know someone who does.

Students who wish to connect with Advising should visit the College Ten Academic Advising website for open hours, drop-ins, and appointments.

OTHER ACADEMIC PROGRAMS

Optional programs are available to involve College Ten students in academic and co-curricular activities beyond the first-quarter core course. They are designed to promote students' academic achievement and success by connecting them with faculty mentors and helping them pursue leadership experiences in particular contexts.

Social Justice Issues Workshop

College Ten students have the option of enrolling in the Social Justice Issues Workshop in winter quarter. This two-credit course, taught by student instructors, meets once per week and can be taken in addition to a regular 15-credit academic load. The workshop offers a small, dynamic learning community in which members explore important issues of personal and cultural identity; social, political, and environmental concerns; and community-mindedness. The class emphasizes small-group experiential learning through structured exercises and group activities, and also includes discussions, film presentations, and guest speakers.

Apprenticeship in Community Engaged

Research

The Apprenticeship in Community Engaged Research (or (H)ACER) is a new program at College Nine and College Ten designed to teach students qualitative research methods with a focus on community-engaged and participatory methodologies. The objectives of our work encompass student enrichment, uplifting the work of our community partners, and conducting relevant, critical research to solve real-life challenges at the intersections of education, health, economics, immigration, nutrition, labor and the environment. The benefits for students of experiential learning in the community are multiple: abstract academic concepts become more tangible, students expand their web of social connection, and skills such as teamwork and problem solving are heightened. Students reach outside of their comfort zone, have their assumptions challenged, and meet remarkable local heroes.

(H)ACER offers a scaffolded progression of opportunities for students: students can begin by getting involved with Praxis, participating in Alternative Spring Break, or signing up for internships with community partners such as an after-school, garden-based educational program at Calabasas Elementary School in Watsonville. Praxis is a student club for community service in which College Nine and College Ten students undertake monthly volunteer opportunities throughout Santa Cruz County and neighboring communities. During campus meetings, Praxis participants engage in discussion, reading, and reflection to increase their awareness and knowledge about key issues.

Alternative Spring Break (ASB) in Watsonville centers on issues of food security, sovereignty, and justice. After getting to know each other at a retreat, discussing readings, and hearing from a panel of Watsonville leaders, ASB participants undertake five days of experiential learning with a variety of community partners (e.g., schools, artists, non-profits). After Spring Break, a final gathering is held for students to share their final projects.

Practical Activism: Tools for Local and Global Change

The annual Practical Activism Conference is a daylong, student-led event featuring keynote speakers, 10 workshops, various on-and off-campus organizations, performances, and a variety of hands-on activism activities. Students gain valuable leadership and organizing skills through developing and planning this exceptional program, which involves collaboration among faculty, staff, and the local community. Visit Practical Activism for more information.

Community Garden

Class

In cooperation with the work of the Community Garden Club, this course explores such topics as collaborative garden design, community gardening best practices, building regenerative social and ecological systems, sustainability, and food justice, while also offering hands-on experience in the Colleges Nine and Ten community garden.

College Ten Pathways to Distinction

Students are recognized with College Ten Distinction upon successful completion of three quarters (15 credits) of experiential coursework in Service and Leadership and/or Research and Scholarship focused on social justice and diversity issues. Applicable College Ten courses and research opportunities with faculty can fulfill the criteria for distinction. This recognition is intended to serve as an incentive for students to pursue activities that are apt to help them succeed in college and beyond.

Cowell College

Cowell 118
831-459-2253
<https://cowell.ucsc.edu>

ACADEMIC PROGRAMS

Academic Literacy Curriculum (p. 188)
College Scholars Program (p. 606)

ACADEMIC EMPHASIS

The academic theme of the college encourages students to pursue their general and disciplinary study with attention to the values of a liberal arts education: understanding one's individual perspectives by exploration of one's historical background and world context. Students affiliated with the college pursue majors from all departments on campus.

In satisfying their general education requirements, first-year Cowell students are required to take the Cowell core course in the fall term. The core course is taught in small seminar sections and seeks to develop critical reading, analytical writing, and seminar discussion skills through engagement with a selection of classic and contemporary texts focused on the theme of justice.

Enrichment courses are offered every term at the college, and priority is given to Cowell students. Some courses emphasize the development of skills such as public speaking or researching in library collections. Some courses take a broader perspective, examining the role of education in democracy or the epistemological bases of our judicial system.

The college also enriches the intellectual and cultural life of the campus by sponsoring events of various kinds: lectures and presentations by local faculty and visiting scholars, theatrical and musical performances, and forums and debates on topics of current interest.

Students who develop ideas for research, creative projects, community service, or internship experiences may apply to the college provost for financial support. The college also awards several annual scholarships and sponsors prizes for outstanding academic work.

The faculty fellows affiliated with the college represent all academic divisions (arts, engineering, humanities, physical and biological sciences, and social sciences). The faculty fellows guide the college academic programs and often contribute to the college-based advising system.

The college academic buildings house humanities faculty, with notable concentrations in philosophy, classics (study of ancient Greek and Latin language and civilization), and modern foreign languages, especially Chinese, French, Italian,

Russian, German, and Japanese. Interdisciplinary faculty groups in visual and performance studies and in pre- and early-modern studies are centered at Cowell College.

CORE COURSE

COWL 1, Academic Literacy and Ethos: Imagining Justice

Offered fall quarter

Cowell College One, Imagining Justice, is a first-year analytical reading and critical thinking seminar required of all first-year students, offered only in the fall quarter. It provides intensive practice in critical thinking and analysis, while also giving students opportunities to increase their speaking and presentation skills, and to engage in creative expression. More broadly, it introduces students to university-level discourse including key skills and common practices, and UC Santa Cruz's academic expectations. It works to build an intellectual community here at Cowell College not only within the incoming class, but across all students at Cowell, since some texts are held over from year to year, so that students from frosh to seniors have reading and ideas in common.

COLLEGE ADVISING

cowell@ucsc.edu
831-459-2253
Cowell College Administration Building, Room 118

Cowell College advisers help students interpret academic policies and procedures and clarify educational goals. They provide support to students to ensure their academic success and progress toward their degree throughout their time at UCSC. Advisers help students make informed decisions, develop resiliency, and develop the ability to take ownership of their academic choices. Advisers also connect students to resources that will enrich their academic experiences.

OTHER ACADEMIC PROGRAMS

College Scholars Program

Along with several other residential colleges, Cowell participates in the College Scholars Program, a program that engages first- and second-year students with faculty research in research seminars and service learning opportunities on campus and in the Santa Cruz community. Some students begin by invitation in the fall. Others apply to start in the spring. In the spring of their first year, the spring-start scholars join the fall-start scholars in a special two-credit class together, which includes special lectures and dinners. The program continues with selected seminars in the second year.

Cowell hosts several campuswide programs including the Chancellor's Undergraduate Internship Program (CUIP), Model United Nations and Mock Trial.

Cowell supports student research through quarterly research awards and through a variety of scholarship and service awards.

Crown College

Crown College Administration Building
831-459-2412
<https://crown.ucsc.edu>

ACADEMIC PROGRAMS

Academic Literacy Curriculum (p. 188)
College Scholars Program (p. 606)

ACADEMIC EMPHASIS

From the time of its founding in 1967, issues pertaining to the role of science and technology in society have been a focus of special interest at Crown College. We approach these issues from an interdisciplinary perspective that recognizes the influence of social and cultural factors on the scientific enterprise, as well as the ways in which science and technology influence our society.

More recently, Crown is adding an entrepreneurship and innovation component through its partnership with the Center for Innovation and Entrepreneurial Development (CIED). This partnership includes co-sponsoring talks and slams as well as a summer class in entrepreneurship.

Crown College emphasizes experiential learning and facilitates the establishment of internships with faculty fellows through advertising of individual projects and by providing funding to support them.

CORE COURSE

CRWN 1, Academic Literacy and Ethos: Ethical and Societal Implications of Emerging Technologies
Offered fall quarter

Crown College's entering frosh enroll in our core course, CRWN 1, which explores the theme, Ethical and Societal Implications of Emerging Technologies. Students work individually, in small groups of four to five students, and in sections of 25 to 30 students, thereby modeling and embracing the diversity found across campus. The course looks at how technological revolutions happen, how they transform societies, and how these changes in turn generate new ideological narratives. Deeper goals of this course include fostering a sense of belonging, and ensuring that our students achieve college-level reading, critical thinking, and effective communication skills.

A central component of the course is a group project, in which students place a technology of their choice in its societal context, while learning strategies for effective group work. The core course is enhanced through events such as the "Meet the Author" series, which gives students opportunities to meet

notable writers and hear them speak in the intimacy of the provost house. We also organize a science fiction short story contest, and students are encouraged to attend and/or present at Crown's Social Fiction Conference, which features keynote speakers, movies, cosplay, debates, and presentations in a variety of formats around science fiction, fantasy, and gaming topics and how they are relevant to our current society.

COLLEGE ADVISING

Phone: 831-459-2665
Crown College Administration Building

OTHER ACADEMIC PROGRAMS

Crown, in collaboration with Merrill College, offers a leadership development program, which combines leadership theory with a variety of opportunities to connect theory to real-world experiences, including field studies and student leadership positions.

In addition, Crown College offers the College Scholars and the Science Learning Community programs. The College Scholars Program provides a congenial and challenging academic home for a select group of well-prepared students at UC Santa Cruz. This enriched program of study includes special courses, seminars, colloquia, and other events into the fall of the sophomore year. Admission to the College Scholars Program can be by invitation during the admissions process based on high school academic performance (early entry) or in winter of the freshman year based on academic potential shown during the first quarter at UCSC (late entry).

The Crown Science Learning Community (SLC) is an innovative program that provides extra support to first-year students who are interested in pursuing a major in the sciences or engineering. Students enrolled in this program live together, forming a supportive community that promotes collaborative learning and group problem solving. To facilitate this process, SLC students are placed in a special section of Chemistry 1A or Math 3 and participate in a residentially based study group. The program often acts as a bridge to the ACE Program in the physical and biological sciences and engineering.

Similar to the Science Learning Community, Crown's Baskin Scholars Community focuses on underrepresented student success in engineering. Participants are housed together and receive tutoring, mentoring, and other assistance.

Kresge College

<https://kresge.ucsc.edu>

ACADEMIC PROGRAMS

Academic Literacy Curriculum (p. 188)
College Scholars Program (p. 606)

ACADEMIC EMPHASIS

Kresge was the sixth college to be built on the UC Santa Cruz campus. The college was founded on principles of participatory democracy and experiential education, with a vision of profound social and individual empowerment within an active living and learning community. Its motto is **Independence, Creativity, Community**.

Kresge College strives to blend the traditional promise of a liberal arts college with a prominent legacy of experimental and interdisciplinary education. Its curriculum is designed to create opportunities for personal growth and strengthening communities, to foster creative and critical thinking about the world we live in, to cultivate good citizenship, and to facilitate stewardship of a just and sustainable society. Kresge College aims to help students of the widest possible range of backgrounds and biographies, to succeed in a path to higher learning at a research institution.

Kresge's academic life is centered on the integration of living and learning in a community that values self-determination, consensus-building, intellectual freedom, sustainability, and justice. These principles take shape in a curriculum that emphasizes participatory learning, hands-on experience, and conscientious academic inquiry that transcends the walls of traditional classrooms. In wide-ranging topics including but not limited to agroecology, photography, writers' workshops, natural history, journalism and service learning, Kresge's courses offer varied ways for Kresge students to fulfill general education requirements while broadening their educational experience in the company of dedicated and imaginative faculty.

The core curriculum (see Core Course, below) consists of one required course and a range of elective extensions. All entering first-year students enroll in Academic Literacy and Ethos: Power and Representation (KRS 1), a fall-quarter seminar and plenary-series course that prepares students to develop and engage discourse and knowledge exchange in a university environment, and provides a foundation of questions and aspirations for the intellectual community that will shape Kresge students' whole engagement with their UCSC education. Following that course, Kresge students have the option to extend their core learning in courses that deepen those questions into specific domains. Power and

Representation and Media (KRS 2) extends the questions of social justice and media representation in a more advanced seminar in media literacy. Natural History Practicum (KRS 3) offers students weekly opportunities to practice critical and empirical reflection on the shared multi-species environment of the UC Santa Cruz campus. Learning with Intention and Purpose (KRS 100), intended for the Kresge junior or senior year, reintroduces Kresge students to fundamental principles of liberal arts education, and its relationship to the world beyond our campus.

Kresge also boasts a richly varied enrichment curriculum, with three distinct emphases:

Service Learning (KRS 12A, 12C ...), which supports student-initiated in community service and community action, cultivates grant-writing and fund-raising skills, and raises the profile of the college in visible and positive community impacts.

Kresge Labs (KRS 65W, 65 ...): courses in which traditional academic disciplines (ranging from writing, to photography, to natural history, music, and more) are approached in 2- and 3-credit courses for "lay inquiry", fostering learning in which students are the primary critical and collaborative audience for one another's academic work.

The Common Ground Center (curriculum and lecture series including KRS 72, 73, 74 ...), offering courses that support student cooperatives, foster initiatives for sustainability and justice, communication, and contemplative-studies, and support our function as the North American host of the Right Livelihood College.

Students can collaborate with the provost to encourage developments to this curriculum, including proposing student-driven or student-led courses, or recommending invited lecturers to participate in our core plenary, Media and Society, or Common Ground Center speaker series.

CORE COURSE

KRS 1, Academic Literacy and Ethos: Power and Representation

Offered in fall quarter

Offered to entering frosh, Kresge's core course, Academic Literacy and Ethos: Power and Representation (KRS 1), prepares students for engagement with university discourse. Students read a selected range of contemporary nonfiction and creative work in varied media, developing a practice of interpretation and dialogue that serves as a model for their future academic endeavors. Power and Representation emphasizes texts that reflect on the struggles of individuals and communities to represent and constitute themselves in the United States. In contemplating those struggles, students are encouraged to think beyond easy answers, to express themselves clearly, to reflect on their own thinking and learning styles, and to think critically about their place in a larger world of knowledge and experience. In addition to their

seminar meetings, all students in KRSRG 1 meet periodically with academic mentors—fellow Kresge students who model successful learning styles. The entire core cohort also meets five times during the quarter for the required evening Plenary Series, guest lectures that deepen engagement on specific topics of the course.

Visit Kresge Core Course for additional information about Kresge College academics, including core course requirements and other academic programs.

College promotes social and environmental change through undergraduate-focused action-education, research, advocacy, and civic engagement. Our Service Learning courses prepare students to become innovators and activists, through community service projects and grant-writing workshops that connect students' academic lives to the world outside the university. Kresge College also hosts courses related to our student cooperatives: the Kresge Garden Co-op, Photo Co-op, Music Co-op, and Food Co-op.

COLLEGE ADVISING

kresgeadvising@ucsc.edu

Phone: 831-459-2071

Kresge has a team of three academic advisers who work collaboratively with students to support them as they explore majors, navigate university policy, clarify academic goals, and develop strategies for success. Kresge's advisers serve as advocates for students who are experiencing institutional barriers to their success, while also upholding university policy when necessary.

Kresge's advising staff regularly participate in professional development opportunities both on- and off-campus in order to stay abreast of new research and best practices in the wider academic advising community. They celebrate and reflect the diversity of the Kresge student body and seek to model the goal of being lifelong learners.

College advisers work with students from Summer Orientation and Welcome Week through graduation, although much of the interaction is concentrated in the student's first year or two on campus before they've declared a major. Students come to the College Office with all of their questions, and college advisers and front desk staff frequently facilitate connections with other campus resources as appropriate.

In addition to one-on-one in-person and email advising, Kresge's advisers collaborate with the provost, Residence Life office, and campus-wide academic and student support services to offer holistic programming. Past workshops have covered topics such as options for summer enrollment, how to choose a major, and finding family away from home.

OTHER ACADEMIC PROGRAMS

Kresge is a rich and multidimensional academic community, uniquely oriented toward media studies, and known by many as "the writers' college," participatory and consensus-based decision making, service-learning, and cooperative and non-profit leadership.

Kresge is home to City on a Hill Press, as well as the Kresge Writing Center (a west-campus home of the UCSC Writer's Society, Matchbox Press, Red Wheelbarrow, and the Creative Writing Archives). The Common Ground Center at Kresge

Merrill College

Merrill College Administration Building
831-459-2144
<https://merrill.ucsc.edu>

ACADEMIC PROGRAMS

Academic Literacy Curriculum (p. 188)
College Scholars Program (p. 606)

ACADEMIC EMPHASIS

Cultural Identities and Global Consciousness is the ethos of Merrill College. This pairing signals the college's commitment to drawing on the "funds of knowledge" brought by individual college members to the community of scholars, and a corresponding commitment to understanding these identities within a larger global context.

Merrill's new core course is titled Academic Literacy and Ethos: Reading Ourselves, Reading the World. Like all college core classes, this course introduces students to analytical reading and critical thinking at the university level. It is the required first part of a larger program of study, the Academic Literacy Curriculum, which includes formal instruction in university-level writing. Core offers students a foundation for intellectual exploration and personal development as members of an academic community. It teaches reading and thinking processes essential to success at the university, and "habits of mind" that demystify academic work and promote independent, self-reflective, and collaborative participation in campus culture. It focuses on Analysis, Critical thinking, Metacognition, Engagement with others across difference, and Self-efficacy—"ACMES" for short—and assigns carefully chosen readings designed to teach these concepts.

Students also read a range of texts specific to Merrill's intellectual traditions. These focus on historical or political flashpoints, particularly those illuminating social, cultural, and economic change in relationships between the developed and the developing world. Students read the daily New York Times, which provides an unfolding narrative about events around the world and offers a valuable opportunity for students to analyze how these events are represented for a U.S. audience. They also read selections from several book-length texts—recent readings have included Anne Fadiman's *The Spirit Catches You and You Fall Down*, and Bryan Stevenson's *Just Mercy*—and accompanying secondary literature. These works show individuals and groups dealing with critical issues of nationalism, globalization, war, economic underdevelopment, and social and gender differentials, and encourage students to examine critically their own underlying assumptions and positions. By closely examining these readings in discussion with others, students develop strategies for effectively engaging different kinds of

texts, formulate their own analyses in relation to these readings, and share their ideas in course projects and seminar discussions. The course thus emphasizes skills central to intellectual life at the university: critical reading, analytical writing, and oral presentation of ideas.

Those admitted as transfer students are exempt from the core course requirement but may take it at their discretion if there is room.

CORE COURSE

MERR 1, Academic Literacy and Ethos: Reading Ourselves, Reading the World
Offered fall quarter

Merrill 1: Reading Ourselves, Reading the World teaches key processes for intellectual exploration, including approaches to analytical reading and critical thinking that faculty consider central to success at the university. These are intellectual processes. They eventually become so ingrained that professional academics use them without even thinking about them. This course makes them visible so that students can use them in other courses they take in their university career. Merrill 1 also focuses on helping develop "academic ethos"—recognition of oneself as a full member of an academic community—by teaching concepts and practices such as metacognition (thinking about thinking), engagement with others across difference, and self-efficacy. Together, these five concepts are known as ACMES: analysis, critical thinking, metacognition, engagement with others, and self-efficacy.

COLLEGE ADVISING

Merrill College Administration Building

Merrill College advisers help students interpret academic policies and procedures and clarify educational goals. They provide support to students to ensure their academic success and progress toward their degree throughout their time at UC Santa Cruz. Advisers help students make informed decisions, develop resiliency, and develop the ability to take ownership of their academic choices. Advisers also connect students to resources that will enrich their academic experiences.

OTHER ACADEMIC PROGRAMS

Merrill sponsors a variety of two-, three-, and five-credit courses on topics that change from year to year. A key characteristic of Merrill's academic program from its founding has been the importance of experiencing the world, not just studying it. Thus Merrill's academic programming focuses especially on theory-backed experiential learning. For instance, our new leadership course, shared with Crown College, teaches the "social change" theory of leadership and

leads to practical application in the form of resident assistantships for some students and off-campus internships for others. We also offer a field study practicum that teaches methods of responsible participant observation and helps students arrange internships in local agencies and organizations. An education-focused service-learning course, Classroom Connection, addresses current issues in educational theory and arranges for students to volunteer in local public schools. Merrill also provides experiential education in the academic world. Our paid Merrill undergraduate research mentorships prepare advanced undergraduate students to pursue graduate studies and provide invaluable research experience and personal and professional development for Merrill students. We also encourage students to apply for college special projects funds and campus-backed research funds.

In keeping with Merrill's spirit of community-mindedness, we now offer a Careers in Public Service course that features Merrill alumni as weekly speakers. Continuing the college's long history of involvement with Africa studies, Merrill also offers a series of alumni-led courses that focus on Africa. Merrill offers an upper-division class on the research university for recent transfer students, and, for eligible first-year students, we participate in the College Scholars Program, which provides a series of stimulating research-based opportunities (a speaker series, seminars, and research funding opportunities).

Recognizing the increasingly rigorous requirements for science majors, Merrill—in collaboration with the Academic Excellence Program—coordinates the Science Learning Community to support students majoring in the sciences. Students participating in the program enroll in small discussion sections that encourage a collaborative learning approach.

The Merrill Society, an alumni-led organization, helps support Merrill's curriculum and cultural events.

Academic Literacy Curriculum (p. 188)
College Scholars Program (p. 606)
Community Studies (p. 465)
Community-based Advocacy and Research (CARA)
Certificate Program

ACADEMIC EMPHASIS

As a result of their experience at Oakes College, students will cultivate equity and justice. This is what drives Oakes College. The broad learning outcomes are for Oakes students to understand the self, community, systemic oppression, and action for change.

The Oakes College faculty represents a wealth of expertise from the natural sciences to the humanities, and we are proud to have some of the top scholars in the world among our faculty fellows. Our students major in nearly every discipline at UC Santa Cruz—from economics and computer science, to theater arts and Latin American and Latino studies—and they are well supported by the depth and breadth of the Oakes College faculty and the extensive knowledge of our advising team. Oakes graduates have gone on to successful careers in fields such as medicine, law, education, medical research, and community service.

The Oakes core course, Communicating Diversity for a Just Society, is required of Oakes students. Most students take the course in their first year. The course examines individual and collective responses to issues of culture, gender, sexuality, race, and class. Those who are admitted as transfer students are exempt from the core course requirement but may take the core course at their option pending available space.

CORE COURSE

OAKS 1, Academic Literacy and Ethos: Communicating Diversity for a Just Society
Offered fall quarter

This course examines the intersections between reading as a college student practice, personal and social identities, and social justice. In our readings, discussions, and assignments, we seek to answer questions about how materials we read connect with our cultural, religious, sexual, ethnic, class, racial, and gender identities. How have our own ways of identifying—of naming or defining ourselves—shaped our individual experiences? Where do we position our own stories

within our shared family histories? How do our own autobiographies and essays, as written accounts of our process of identification, bring our search for ourselves and our relationship with reading and writing into the same conversation?

COLLEGE ADVISING

First floor, Oakes Administration Building

Mailing address:

The Office of Advising and Records
Oakes College
University of California, Santa Cruz
1156 High Street
Santa Cruz, CA 95064

Contact information:

oakesadvising@ucsc.edu
(831) 459-4531

At Oakes College, our role as college advisers is to serve as the first point of contact for our undergraduate students. We believe that effective advising mandates that we collaborate with students to identify and clarify their goals, develop a sense of self-authorship, and learn to make meaningful decisions about their lives. We ensure our students know that their educational trajectory extends beyond coursework, and includes opportunities and experiences that will enhance their education.

Investing in an advising model where a student's lived experience is an educational asset, we advance our practices and become more engaged and proactive in our work. Our Oakes college advisers advocate for necessary policy and procedural changes. We address institutional barriers by engaging with justice rather than simply adopting it as a value. In turn, we aspire for students to see the greater meaning of their educational experience and how it can transform their lives beyond their undergraduate career.

The purview of colleges advising includes navigating campuswide requirements such as general education, academic progress, time to degree, and major selection and qualification.

OTHER ACADEMIC PROGRAMS

At Oakes College, we foster student engagement and leadership within and beyond the classroom. To this end, we encourage students to develop the knowledge, skills, and cross-cultural understanding necessary to become actively engaged people and future leaders in their own communities, workplaces, and academic disciplines as well as in the larger U.S. society and the world as a whole. We also provide a range of resources and programs that enable all students to succeed in their academic endeavors. Such resources include:

The Learning Center and the **Westside Writing Center** at Oakes College provide space for study groups as well as tutoring. Special assistance in academic reading and writing in a variety of subjects is offered to Oakes students.

The Oakes Computer Lab provides access to 20 PCs for Oakes students.

Co-curricular programs like **Oakes 4.0**, **Oakes Core Café**, and the residential **Science Community at Oakes College** all offer living-learning opportunities to enhance student success and to provide students with unique opportunities for interacting with faculty in small group contexts.

The Oakes College CARA Program. The Community-based Action-Research and Advocacy (CARA) Program of Oakes College works to create opportunities for experiential education, leadership, research, and career development; we center the strengths and needs of first-generation college students and projects for transformative social justice. Courses emphasize community-building along with research and communication techniques within the critical frameworks that build confidence and support justice initiatives. The program includes a development and outreach strategy with campus and community groups—including schools, youth sites, direct-service provider networks, and grassroots organizations, both on-campus and off. Upper-division courses are commonly accepted as major requirement substitutions in multiple departments. The Corre la Voz after-school program offers paid student leadership positions; the Puentes Program, in collaboration with Legal Studies, sponsors interns. Oakes students can earn a CARA certificate by completing a sequence of community-engaged coursework focused on social justice.

Student services at Oakes include academic advising and psychological counseling.

Porter College

Porter College Office, D-Building
831-459-2273
<https://porter.ucsc.edu>

ACADEMIC PROGRAMS

Academic Literacy Curriculum (p. 188)
College Scholars Program (p. 606)

ACADEMIC EMPHASIS

Porter College was founded in 1969 as the fifth of UC Santa Cruz's residential colleges and was later renamed in honor of a generous grant from the Porter-Sesnon family. Its mission is to foster achievement in all areas of study. Porter is especially dedicated to achievement in the arts and humanities, believing that creative and humanistic inquiry are essential parts of a rigorous and broad-minded education, a flourishing society, and a happy life.

Porter College fellows hail from every academic division on campus and from many non-academic professions, but all of them share the philosophy of education that the college's curriculum embodies: first, discover how to learn; then, learn by doing; and finally, let your learning make a difference in the world.

The Porter College curriculum encourages students to explore unusual topics and provocative ideas, to test and revise hypotheses about the meaning of their experiences, to learn from the failures that are an inevitable part of new learning and discovery, and to assume responsibility for the decisions they make in their studies. In addition to core courses for first-year students, which provide rigorous training in critical reading and writing and study skills, Porter offers a variety of smaller interdisciplinary seminars that combine historical and theoretical approaches to the arts, humanities, and sciences with practical experience conducting scholarly research and making creative work.

CORE COURSE

PRTR 1, Academic Literacy and Ethos: Arts of Reading
Offered fall quarter

PRTR 1 teaches foundational concepts for intellectual exploration and personal development within an academic community—analysis, critical thinking, metacognition, engagement with others across difference, and self-efficacy. The course also engages Porter's intellectual tradition of investigating the contribution the arts and humanities make to a good life, a just society, and a flourishing world.

COLLEGE ADVISING

porteradviser@ucsc.edu
Phone: 831-459-2273
Porter D-Building, Room 104

Porter College advisers help students interpret academic policies and procedures and clarify educational goals. They provide support to students to ensure their academic success and progress toward their degree throughout their time at UCSC. Advisers help students make informed decisions, develop resiliency, and develop the ability to take ownership of their academic choices. Advisers also connect students to resources that will enrich their academic experiences.

OTHER ACADEMIC PROGRAMS

Porter College offers fellowships and grants to students and faculty in support of scholarly and creative projects. Among the grants offered annually are the Porter College Undergraduate Fellowship (PCUF), the Porter College Research Assistantship (PCRA) and the Nathan Foley Mendelssohn Memorial Travel Scholarship (NFM).

Rachel Carson College

Rachel Carson College Administration Building, Room 114

<https://rachelcarson.ucsc.edu>

ACADEMIC PROGRAMS

Academic Literacy Curriculum (p. 188)
College Scholars Program (p. 606)
Sustainability Minor (p. 601)

ACADEMIC EMPHASIS

Rachel Carson College's academic classes focus on the theme of environment and society. The college sponsors a number of educational initiatives and courses aimed at furthering its theme and mission, as well as programs offering experiential learning for students. CRSN 1 is the required first-year college core course, part of the Academic Literacy Curriculum that introduces students to critical and analytical reading at the university level. The core course is mandatory for all incoming frosh.

CORE COURSE

CRSN 1, Academic Literacy and Ethos: Environment and Society
Offered fall quarter

The Rachel Carson College core course focuses on the theme "Environment and Society," through examination of California's environment history and how the contemporary landscape has been shaped by capital, labor, technology and politics. A secondary focus is on food: how it is grown, who works in the fields, and why some are malnourished in the midst of agricultural plenty. The course also considers the ecological and environmental histories of California—the shape and biology of the land as well as the role of people in shaping the state's many landscapes; what novels, stories and articles can tell us about environment and society in California; the central role of water, soil and species in shaping society; and the potential impacts of climate change on both land and society. In pursuing these topics, students also delve into some of the environmental and ecological science that underpins them. The course consists of a weekly plenary (large lecture) and a bi- or tri-weekly seminar (discussion section).

COLLEGE ADVISING

carsonadvising@ucsc.edu
Phone: 831-459-2361
Rachel Carson College Administration Building, room 114

Rachel Carson College advisers help students interpret academic policies and procedures and clarify educational goals. Graduate Program

Stevenson College

Stevenson College
(831) 459-2020
stcollege@ucsc.edu
<https://stevenson.ucsc.edu>

Academic Literacy Curriculum (p. 188)
College Scholars Program (p. 606)
Cowell-Stevenson Collaborative

ACADEMIC EMPHASIS

The faculty at Stevenson, drawn from a variety of disciplines in the social sciences, humanities, engineering, and physical and biological sciences, share a common concern for the study of social processes that shape modern society and determine the quality of our individual lives throughout various global regions and periods of world history. Linguistics, history, sociology, politics, psychology, biology, chemistry, and computer science are strongly represented in the college.

Stevenson distinguishes itself as the only college with a required two-quarter core course intended to provide all first-year students with a common academic experience. The core course allows for more rigorous development of students' critical, reading, and analytical skills. It provides a unique learning environment and a supportive intellectual community for all Stevenson first-year students. Those admitted as transfer students are exempt from the core course requirement but may take the core course at their option pending available space.

Stevenson's second quarter of the core course satisfies a further general education requirement, the TA, or textual analysis designation.

Students in majors that have a large number of course requirements, including those in the Baskin School of Engineering who are also subject to the policy that they must complete three of a specified set of courses by the end of their first year, should consider how they plan to fit both the two-quarter college core course and their intended major's first-year requirements into their first year at UC Santa Cruz.

Students are encouraged to consult with both their college and major advisers. Stevenson College advisers can be found on the Stevenson advising website.

Students who are placed in the Multilingual Curriculum when they enter UC Santa Cruz will be required to take only the first quarter of the core course requirement.

The Stevenson core course, *Self and Society*, enables students to examine the nature of the self and the relationship of the individual to society. It teaches foundational concepts for intellectual exploration and personal development within an academic community—analysis, critical thinking, metacognition, engagement with others across difference, and self-efficacy. In addition, the course fosters an intellectual

commitment to the general philosophy that has helped to define Stevenson College since its inception: preservation of human dignity, the social cultivation of individual creativity and citizenship, and a belief in ethical responsibility. The core course reflects the college's long-standing commitment to interdisciplinary and culturally diverse readings, while at the same time affording students an opportunity to develop research interests, to acquire greater understanding of the role of research universities in contemporary societies, and to acquire the requisite skills to engage in increasingly more sophisticated intellectual work while at UCSC.

CORE COURSES

STEV 1: Academic Literacy: Self and Society, offered fall quarter

Introduction to University Discourse: *Self and Society*. College 1 helps students develop academic and civic proficiency in reading, critical thinking, and "academic ethos," and habits of mind and practice tied to a sense of belonging and academic success. This course prepares students for success in other UCSC courses requiring critical thinking, listening, discussion, and effective communication. It explores rhetorical principles and conventions of university discourse and considers the roots of modern society using foundational religious texts and major classical and modern philosophical works. Enrollment is restricted to first-year college members.

STEV 2: Academic Literacy: Self and Society 2, offered winter quarter

The Winter quarter class that follows College 1 continues the development of critical

reading, analysis, and effective speaking exploring conflicts inherent in modern society. The course fulfills the TA GE and investigates themes of colonization, race, gender, class, as well as cultural conflict. Enrollment is restricted to first-year and sophomore college members.

OTHER ACADEMIC PROGRAMS

Scholarships

Students have the opportunity to apply for funding for special research projects each quarter. Stevenson also provides several annual scholarships and service awards, including the Josh Alper Marines Memorial Award, the Michele Guard Memorial Scholarship, the Matthew Graviano Memorial Scholarship, the John Halverson Scholarship, Davis Art Makers Funding, the Sandor Callahan Scholarship Award, and the Robert Dodge Service Award.

Junior Fellow

Program

The Stevenson College Junior Fellows Program offers juniors and seniors an opportunity to serve as instructors in Self and Society. Junior fellows, who must have completed outstanding work in Self and Society during their first year, undergo a rigorous application and selection process. Junior fellows (enrolled in Stevenson 120, Teaching Practicum) earn five course credits.

Writing Assistance

Stevenson provides writing assistance for all of its students. Stevenson Writing Assistantships are paid student positions open to juniors and seniors with excellent academic records. [Click here for additional information about the Stevenson College academic events](#)

COLLEGE ADVISING

Located in the Stevenson College Office in the Stevenson Administration Building, Rooms 118-119 across from the Stevenson Coffee House patio

To schedule an appointment, contact the Stevenson College Office at stevensonadvising@ucsc.edu; phone number 831-459-4930.

Appointments: Daily 9:00 a.m.-4:00 p.m.

Drop-in Advising: Monday-Wednesday and Friday, 10:30 a.m.-11:30 a.m., and Monday-Friday, 1:30 p.m.-2:30 p.m.

The Stevenson advising staff assists students in their academic endeavors by providing them with guidance, support, and information. They advise students on many issues, ranging from helping them select their first UCSC classes to making sure that they've fulfilled all graduation requirements. Advisers provide students with tools and resources so that they feel confident and empowered to navigate the university.

Advisers encourage students to enter into an active partnership with staff and faculty to ensure that they will learn about existing programs, deadlines, procedures, and opportunities. Advisers also encourage students to become involved in the many extra-curricular activities available at the college. Stevenson students pride themselves on being the most politically active on campus. With this involvement comes the responsibility of maintaining academic goals as a priority. Advisers help students maximize their potential and balance their commitments inside and outside of the classroom so that they can get the most out of their education during and after their time at Stevenson.

College Scholars Program

PROGRAM OVERVIEW

The UC Santa Cruz College Scholars Program (CSP) offers a congenial and stimulating academic home for a select group of well-prepared first-year students at UC Santa Cruz.

Through this honors program, students can expect to challenge themselves academically, find other students who are similarly motivated, and explore undergraduate research. This enriched program of study includes special courses, seminars, colloquia, and other events during each quarter of the student's first academic year and fall of the student's second academic year.

CSP provides an opportunity for outstanding students to engage deeply with the best of UCSC. Early in their career, students are able to explore the full potential of the university setting, beyond the coursework that might be required in their respective disciplines.

CSP has close ties to the college system. In 2018-2019, Fall Start scholars (see below for information about Spring Start scholars) will live at Cowell, Crown, Merrill or Porter College. Each college will have a cohort of about 20-25 College Scholars Program students, and students in each cohort will be housed together. Students receive priority enrollment during their time in the program.

COLLEGE SCHOLARS PROGRAM CURRICULUM

The CSP academic program is designed to both challenge participants and give them the opportunity to develop a strong foundation in our research university.

Year 1

Fall Quarter 1—Supplement to College "Core Course": Students will take part in a series of gatherings led by the Faculty Director and the Provosts at the four Fall Start colleges. These meetings are meant to supplement their college "core course" and to build relationships with other CSP students.

Winter Quarter 1—Service Learning Course: All students will take a two-credit service-learning course offered through Cowell College (COWL 168). This course includes three main components: classroom meetings, journal reflections and papers, and placement in a local organization. Guest speakers are a part of the class and in the past have included local alumni and elected public officials, all working to promote

positive social change locally, nationally, or internationally. Over the course of the term, students contribute 40 hours of work to an organization in the community. Organizations that have welcomed students in the past include: the Homeless Service Center, Rising International, Santa Cruz Boys and Girls Club, and the Museum of Art and History.

Spring Quarter 1—Faculty Research Colloquium:

Students will take a two-credit course (COWL 89) where weekly faculty lectures are followed by dinner at one of the Provosts' houses. Each student is invited to attend one dinner during the term.

Faculty guests will be drawn from a variety of fields within the university, and students will be encouraged to listen to and appreciate scholars and scholarship beyond their own comfortable niche in engineering, biology, linguistics, music, or whatever their area of interest may be. The invited scholars will be speaking not only about the substance of their work, but also about the types of questions that are particular to their fields of study. By the end of the course, students should have a good sense of the modes of inquiry that animate intellectual life in a research university.

Year 2

Fall Quarter 2—Seminar: Students choose from one of several five-unit research seminars. Each of the seminars focuses on developing significant hands-on skills: whether it is a chance to "do real science" through guided research in the field and in a lab, or address important primary sources directly and debate them together in a text-centered seminar room, students will get training in the real intellectual work that scholars do.

College Scholars Programs: Fall Start and Spring Start

Fall Start—Invitation Only: Admission to the Fall Start cohort of College Scholars Program is by invitation only. A select group of UCSC applicants who are offered admission to the university will be invited to join the program, based on their record of academic achievement. Those students who accept the invitation will be housed together at either Cowell, Crown, Merrill, or Porter College.

Spring Start: Students can apply to the College Scholars Program after the Fall quarter of their first year. In this case, students accepted into CSP will join the program in Spring quarter and will participate in the spring research colloquium. Spring Start students will be selected based on applications reviewed through their college. Students may apply to Spring Start from any of UCSC's colleges.

PHYSICAL EDUCATION

East Field House
(831) 459-5076
<https://opers.ucsc.edu/>

Physical education (P.E.) offers students an opportunity to learn and improve skills in a variety of areas while gaining knowledge about the relationship between fitness and wellness. With this information, students will be better prepared to make important choices leading to healthy lifestyles.

Physical education courses at UCSC, which are elective and without academic credit, are offered in a wide variety of activities. The courses consist of instruction, practice, and full participation consistent with each student's ability. While many of the courses are for students at a beginning level, some are designed with more advanced students in mind. Most courses involve class meetings one hour in length, twice a week; but some consist of two weekly one-and-a-half-hour meetings or a single two-hour meeting per week. Some courses are offered exclusively to graduate students.

Students may enroll in as many courses as they desire and are permitted to repeat any course.

COURSES

ACEN - ACADEMIC ENGLISH

Upper-Division

ACEN 110A - Advanced Academic English 1 (5)

Students develop an academic vocabulary and successful reading strategies in English in order to understand high-level academic texts. Students also practice pronunciation and apply the rules of grammar to written and spoken academic language through weekly oral presentations and written assignments. Enrollment by instructor consent only. Enrollment is restricted to international students.

ACEN 110B - Advanced Academic English 2 (5)

Students continue to develop an academic vocabulary (e.g., collocations, idiomatic expressions), which is a significant contributor to successful academic reading and writing. Students also practice complex sentence structures in written and spoken language through weekly oral presentations and written assignments. Enrollment is by instructor consent only. Enrollment is restricted to international students.

ACEN 110C - Advanced Grammar in Context (5)

Students continue to develop an academic vocabulary, and practice reading and writing complex sentences in English with a high level of grammatical and stylistic accuracy. Students also increase their oral fluency and pragmatic skills and their awareness of second-language learning. Enrollment by instructor consent only. Enrollment restricted to international students. (Formerly Advanced Academic English 3.)

ACEN 110D - Advanced Academic English 4 (5)

Students continue to develop an academic vocabulary, and practice reading and writing complex essays in English with a high level of grammatical and stylistic accuracy. Students also continue to increase their oral fluency, pragmatic skills, and awareness of second-language learning. Enrollment is by instructor consent only. Enrollment is restricted to international students.

AM - APPLIED MATHEMATICS

Lower-Division

AM 3 - Precalculus for the Social Sciences (5)

Introduces mathematical functions and their uses for modeling real-life problems in the social sciences. Includes inequalities, linear and quadratic equations, functions (linear, quadratic, polynomial, rational, power, exponential, logarithmic, trigonometric), inverses, and the composition of functions. Students cannot receive credit for both this course and Mathematics 3. Mathematics 3 can substitute for this course. (Formerly Applied Mathematics and Statistics 3.)

Prerequisite: Prerequisite(s): score of 200 or higher on the mathematics placement examination (MPE), or MATH 2.

AM 6 - Precalculus for Statistics (5)

Reviews and introduces mathematical methods useful in the elementary study of statistics, including logic, real numbers, inequalities, linear and quadratic equations, functions, graphs, exponential and logarithmic functions, and summation notation. (Formerly AMS 6.)

Prerequisite: Prerequisite(s): MATH 2 or mathematics placement examination (MPE) score of 200 or higher or higher.

AM 10 - Mathematical Methods for Engineers I (5)

Applications-oriented course on complex numbers and linear algebra integrating Matlab as a computational support tool. Introduction to complex algebra. Vectors, bases and transformations, matrix algebra, solutions of linear systems, inverses and determinants, eigenvalues and eigenvectors, and geometric transformations. Students cannot receive credit for this course and for courses 10A or Mathematics 21. (Formerly AMS 10.)

Prerequisite: Prerequisite(s): score of 400 or higher on the mathematics placement examination (MPE) or MATH 3.

AM 11A - Mathematical Methods for Economists I (5)

Introduction to mathematical tools and reasoning, with applications to economics. Topics are drawn from differential calculus in one variable and include limits, continuity, differentiation, elasticity, Taylor polynomials, and optimization. Students cannot receive credit for both this course and MATH 11A or MATH 19A or AM 15A. (AM 11A formerly AMS 11A.)

Prerequisite: „Students who have already taken MATH 11A or MATH 19A should not take this course. Prerequisite(s): score of 300 or higher on the mathematics placement examination (MPE), AM 3 or AM 6, or MATH 3.

AM 11B - Mathematical Methods for Economists II (5)

Mathematical tools and reasoning, with applications to economics. Topics are drawn from multivariable differential calculus and single variable integral calculus, and include partial derivatives, linear and quadratic approximation, optimization with and without constraints, Lagrange multipliers, definite and indefinite integrals, and elementary differential equations. Students cannot receive credit for both this course and MATH 11B or MATH 19B or AM 15B. (AM 11B formerly AMS 11B.)

Prerequisite: Prerequisite(s): ECON 11A, or AM 11A, or MATH 11A, or MATH 19A.

AM 15A - Case-Study Calculus I (5)

Case-study-based, first-quarter introduction to single-variable calculus, with computing labs/discussion sections featuring contemporary symbolic, numerical, and graphical computing tools. Case studies drawn from biology, environmental sciences, health sciences, and psychology. Includes functions, mathematical modeling, limits, continuity, tangents, velocity, derivatives, the chain rule, implicit differentiation, higher derivatives, exponential and logarithmic functions and their derivatives, differentiating inverse functions, the mean value theorem, concavity, inflection points, function optimization, and curve-sketching. Students cannot receive credit for this course and course 11A or Economics 11A or Mathematics 11A or 19A. (Formerly AMS 15A.)

Prerequisite: Prerequisite(s): AM 3 or MATH 3 or score of 300 or higher on the mathematics placement examination (MPE) or by permission of instructor.

AM 15B - Case-Study Calculus II (5)

Case-study based, second-quarter introduction to single-variable calculus, with computing labs/discussion sections featuring symbolic numerical, and graphical computing tools. Case studies are drawn from biology, environmental science, health science, and psychology. Includes indefinite and definite integrals of functions of a single variable; the fundamental theorem of calculus; integration by parts and other techniques for evaluating integrals; infinite series; Taylor series, polynomial approximations. Students cannot receive credit for this course and course 11B or Economics 11B or Mathematics 11B or 19B. (Formerly AMS 15B.)

Prerequisite: Prerequisite(s): AM 15A or AM 11A or ECON 11A or MATH 11A or MATH 19A.

AM 20 - Mathematical Methods for Engineers II (5)

Applications-oriented class on ordinary differential equations (ODEs) and systems of ODEs using Matlab as a computational support tool. Covers linear ODEs and systems of linear ODEs; nonlinear ODEs using substitution and Laplace transforms; phase-plane analysis; introduction to numerical methods. Students cannot receive credit for this course and for courses 20A or Mathematics 24. (Formerly AMS 20.)

Prerequisite: Prerequisite(s): MATH 19B, and AM 10 or MATH 21.

AM 30 - Multivariate Calculus for Engineers (5)

Advanced multivariate calculus for engineering majors. Coordinate systems, parametric curves, and surfaces; partial derivatives, gradient, Taylor expansion, stationary points, constrained optimization; integrals in multiple dimensions; integrals over curves and surfaces. Applications to engineering form an integral part of the course.

Prerequisite: Prerequisite(s): AM 10; and MATH 19B or MATH 20B.

Upper-Division

AM 100 - Mathematical Methods for Engineers III (5)

Applications-oriented course on complex analysis and partial differential equations using Maple as symbolic math software support. In addition, introduces Fourier analysis, special functions, and asymptotic methods. Students cannot receive credit for this course and Physics 116B or Physics 116C.

Prerequisite: Prerequisite(s): AM 20, or by permission of instructor.

AM 107 - Introduction to Fluid Dynamics (5)

Covers fundamental topics in fluid dynamics: Euler and Lagrange descriptions of continuum dynamics; conservation laws for inviscid and viscous flows; potential flows; exact solutions of the Navier-Stokes equation; boundary layer theory; gravity waves. Students cannot receive credit for this course and AM 217. (AM 107 formerly AMS 107.)

Prerequisite: Prerequisite(s): MATH 107 or PHYS 116C or EART 111.

AM 114 - Introduction to Dynamical Systems (5)

Introduces continuous and discrete dynamical systems. Topics include: fixed points; stability; limit cycles; bifurcations; transition to and characterization of chaos; fractals. Examples are drawn from sciences and engineering. Students cannot receive credit for this course and course 214. (Formerly AMS 114.)

Prerequisite: Prerequisite(s): AM 20; or MATH 21 and MATH 24; or PHYS 116B. Enrollment is restricted to sophomores, juniors and seniors.

AM 115 - Stochastic Modeling in Biology (5)

Application of differential equations, probability, and stochastic processes to problems in cell, organismal, and population biology. Topics include life-history theory, behavioral ecology, and population biology. Students may not receive credit for this course and course 215.

Prerequisite: Prerequisite(s): STAT 131, a university-level course in biology, and operational knowledge of a programming language; or consent of instructor.

AM 129 - Foundations of Scientific Computing for Scientists and Engineers (5)

Covers fundamental aspects of scientific computing for research. Students are introduced to algorithmic development, programming (including the use of compilers, libraries, debugging, optimization, code publication), computational infrastructure, and data analysis tools, gaining hands-on experience through practical assignments. Basic programming experience is assumed. (Formerly AMS 129.)

AM 147 - Computational Methods and Applications (5)

Applications of computational methods to solving mathematical problems using Matlab. Topics include solution of nonlinear equations, linear systems, differential equations, sparse matrix solver, and eigenvalue problems. (Formerly AMS 147.)

Prerequisite: Prerequisite(s): AM 10 or MATH 21. Knowledge of differential equations (AM 20 or MATH 24) is recommended.

AM 148 - GPU Programming for Scientific Computations (5)

This second course in scientific computing focuses on the use of parallel processing on GPUs with CUDA. Basic topics covered include the idea of parallelism and parallel architectures. The course then presents key parallel algorithms on GPUs such as scan, reduce, histogram and stencil, and compound algorithms. Applications to scientific computing are drawn from problems in linear algebra, curve fitting, FFTs, systems of ODEs and PDEs, and image processing. Finally, the course presents optimization strategies specific to GPUs. Basic knowledge of Unix, and C is assumed. (Formerly AMS 148.)

Prerequisite: Prerequisite(s): AM 147 or MATH 148 or PHYS 115. Enrollment is restricted to juniors and seniors.

AM 198 - Independent Study or Research (5)

Students submit petition to sponsoring agency.

AM 198F - Independent Study or Research (2)

Students submit petition to sponsoring agency.

Graduate

AM 200 - Research and Teaching in Applied Mathematics (3)

Basic teaching techniques for teaching assistants, including responsibilities and rights; resource materials; computer skills; leading discussions or lab sessions; presentation techniques; maintaining class records; and grading. Examines research and professional training, including use of library; technical writing; giving talks in seminars and conferences; and ethical issues in science and engineering. (Formerly AMS 200.)

Prerequisite: Enrollment is restricted to graduate students.

AM 209 - Foundations of Scientific Computing (5)

Covers the fundamental aspects of scientific computing for research. Introduces algorithmic development; programming (including the use of compilers, libraries, debugging, optimization, and code publication); computational infrastructure; and data-analysis tools. Students gain hands-on experience through practical assignments. (Formerly AMS 209.) Basic programming experience will be assumed. May be taught in conjunction with AM 129 some quarters.

Prerequisite: Enrollment is restricted to graduate students; undergraduates may enroll by permission of the instructor.

AM 211 - Foundations of Applied Mathematics (5)

Accelerated class reviewing fundamental applied mathematical methods for all sciences. Topics include: multivariate calculus, linear algebra, Fourier series and integral transform methods, complex analysis, and ordinary differential equations. (Formerly AMS 211.)

Prerequisite: Enrollment is restricted to graduate students.

AM 212A - Applied Mathematical Methods I (5)

Focuses on analytical methods for partial differential equations (PDEs), including: the method of characteristics for first-order PDEs; canonical forms of linear second-order PDEs; separation of variables; Sturm-Liouville theory; Green's functions. Illustrates each method using applications taken from examples in physics. Course 211 or equivalent is strongly recommended as preparation. (Formerly AMS 211.)

Prerequisite: Enrollment is restricted to graduate students; undergraduates are encouraged to take this class with permission of instructor.

AM 212B - Applied Mathematical Methods II (5)

Covers perturbation methods: asymptotic series, stationary phase and expansion of integrals, matched asymptotic expansions, multiple scales and the WKB method, Padé approximants and improvements of series. (Formerly AMS 212B.)

Prerequisite: Prerequisite(s): AM 212A.

AM 213A - Numerical Linear Algebra (5)

Focuses on numerical solutions to classic problems of linear algebra. Topics include: LU, Cholesky, and QR factorizations; iterative methods for linear equations; least square, power methods, and QR algorithms for eigenvalue problems; and conditioning and stability of numerical algorithms. Provides hands-on experience in implementing numerical algorithms for solving engineering and scientific problems. Basic knowledge of mathematical linear algebra is assumed. (Formerly AMS 213A.)

Prerequisite: Enrollment is restricted to graduate students.

AM 213B - Numerical Methods for the Solution of Differential Equations (5)

Introduces the numerical solutions of ordinary and partial differential equations (ODEs and PDEs). Focuses on the derivation of discrete solution methods for a variety of differential equations, and their stability and convergence. Also provides hands-on experience in implementing such numerical algorithms for the solution of engineering and scientific problems using MATLAB software. The class consists of lectures and hands-on programming sections. Basic mathematical knowledge of ODEs and PDEs is assumed, and a basic working knowledge of programming in MATLAB is expected. (Formerly AMS 213B.)

Prerequisite: Enrollment is restricted to graduate students.

AM 214 - Applied Dynamical Systems (5)

Introduces continuous and discrete dynamical systems. Topics include: fixed points; stability; limit cycles; bifurcations; transition to and characterization of chaos; and fractals. Examples drawn from sciences and engineering; founding papers of the subject are studied. Students cannot receive credit for this course and course 114. (Formerly AMS 214.)

Prerequisite: Enrollment is restricted to graduate students; undergraduates may enroll by permission of instructor.

AM 215 - Stochastic Modeling in Biology (5)

Application of differential equations and probability and stochastic processes to problems in cell, organismal, and population biology. Topics include: life-history theory, behavioral ecology, and population biology. Students may not receive credit for this course and course 115. (Formerly AMS 215.)

Prerequisite: Enrollment is restricted to graduate students; undergraduates may enroll by permission of the instructor.

AM 216 - Stochastic Differential Equations (5)

Introduction to stochastic differential equations and diffusion processes with applications to biology, biomolecular engineering, and chemical kinetics. Topics include Brownian motion and white noise, gambler's ruin, backward and forward equations, and the theory of boundary conditions. (Formerly AMS 216.)

Prerequisite: Enrollment is restricted to graduate students; undergraduates may enroll by permission of the instructor.

AM 217 - Introduction to Fluid Dynamics (5)

Covers fundamental topics in fluid dynamics at the graduate level: Euler and Lagrange descriptions of continuum dynamics; conservation laws for inviscid and viscous flows; potential flows; exact solutions of the Navier-Stokes equation; boundary layer theory; gravity waves. Students cannot receive credit for this course and AM 107. (Formerly AMS 217.)

Prerequisite: Enrollment is restricted to graduate students; undergraduates may enroll by permission of the instructor.

AM 227 - Waves and Instabilities in Fluids (5)

Advanced fluid dynamics course introducing various types of small-amplitude waves and instabilities that commonly arise in geophysical and astrophysical systems. Topics covered include, but are not limited to: pressure waves, gravity waves, Rossby waves, interfacial instabilities, double-diffusive instabilities, and centrifugal instabilities. Advanced mathematical methods are used to study each topic. Undergraduates are encouraged to take this course with permission of the instructor. (Formerly AMS 227.)

Prerequisite: Prerequisite(s): AM 212A and AM 217.

AM 229 - Convex Optimization (5)

Focuses on recognizing, formulating, analyzing, and solving convex optimization problems encountered across science and engineering. Topics include: convex sets; convex functions; convex optimization problems; duality; subgradient calculus; algorithms for smooth and non-smooth convex optimization; applications to signal and image processing, machine learning, statistics, control, robotics and economics. Students are required to have knowledge of calculus and linear algebra, and exposure to probability. (Formerly AMS 229.)

Prerequisite: Enrollment is restricted to graduate students.

AM 230 - Numerical Optimization (5)

Introduces numerical optimization tools widely used in engineering, science, and economics. Topics include: line-search and trust-region methods for unconstrained optimization, fundamental theory of constrained optimization, simplex and interior-point methods for linear programming, and computational algorithms for nonlinear programming. (Formerly AMS 230.)

Prerequisite: Basic knowledge of linear algebra is assumed. Enrollment is restricted to graduate students.

AM 231 - Nonlinear Control Theory (5)

Covers analysis and design of nonlinear control systems using Lyapunov theory and geometric methods. Includes properties of solutions of nonlinear systems, Lyapunov stability analysis, effects of perturbations, controllability, observability, feedback linearization, and nonlinear control design tools for stabilization. (Formerly AMS 231.)

Prerequisite: Prerequisite(s): basic knowledge of mathematical analysis and ordinary differential equations is assumed. Enrollment is restricted to graduate students; undergraduates may enroll by permission of the instructor.

AM 232 - Applied Optimal Control (5)

Introduces optimal control theory and computational optimal control algorithms. Topics include: calculus of variations, minimum principle, dynamic programming, HJB equation, linear-quadratic regulator, direct and indirect computational methods, and engineering application of optimal control. (Formerly AMS 232.)

Prerequisite: Prerequisite(s): AM 114 or AM 214, or ECE 240 or ECE 241, or MATH 145. Enrollment is restricted to graduate students.

AM 238 - Fundamentals of Uncertainty Quantification in Computational Science and Engineering (5)

Computing the statistical properties of nonlinear random system is of fundamental importance in many areas of science and engineering. Introduces students to state-of-the-art methods for uncertainty propagation and quantification in model-based computations, focusing on the computational and algorithmic features of these methods most useful in dealing with systems specified in terms of stochastic ordinary and partial differential equations. Topics include: polynomial chaos methods (gPC and ME-gPC), probabilistic collocation methods (PCM and ME-PCM), Monte-Carlo methods (MC, quasi-MC, multi-level MC), sparse grids (SG), probability density function methods, and techniques for dimensional reduction. Basic knowledge of probability theory and elementary numerical methods for ODEs and PDEs is recommended. (Formerly AMS 238.)

Prerequisite: Prerequisite(s): STAT 203 or equivalent, and AM 213B or equivalent. Enrollment is restricted to graduate students.

AM 250 - An Introduction to High Performance Computing (5)

Designed for STEM students and others. Through hands-on practice, this course introduces high-performance parallel computing, including the concepts of multiprocessor machines and parallel computation, and the hardware and software tools associated with them. Students become familiar with parallel concepts and the use of MPI and OpenMP together with some insight into the use of heterogeneous architectures (CPU, CUDA, OpenCL), and some case-study problems. (Formerly AMS 250.)

Prerequisite: Enrollment is restricted to graduate students; undergraduates may enroll by permission of the instructor.

AM 260 - Computational Fluid Dynamics (5)

Introduces modern computational approaches to solving the differential equations that arise in fluid dynamics, particularly for problems involving discontinuities and shock waves. Examines the fundamentals of the mathematical foundations and computation methods to obtain solutions. Focuses on writing practical numerical codes and analyzing their results for a full understanding of fluid phenomena. (Formerly AMS 260.)

Prerequisite: Prerequisite(s): Basic knowledge of computer programming languages is assumed. Enrollment is restricted to graduate students.

AM 275 - Magnetohydrodynamics (5)

Studies the interaction of fluid motion and magnetic fields in electrically conducting fluids, with applications in many natural and man-made flows ranging from, for example, planetary physics and astrophysics to industrial metallurgic engineering. (Formerly AMS 275.)

Prerequisite: Prerequisite(s): AM 107 or AM 217. AM 227 suggested. Enrollment is restricted to graduate students.

AM 280A - Seminar in Mathematical and Computational Biology (2)

Weekly seminar on mathematical and computational biology. Participants present research findings in organized and critical fashion, framed in context of current literature. Students present own research on a regular basis. (Formerly AMS 280A.)

Prerequisite: Enrollment is restricted to graduate students.

AM 280B - Seminar in Applied Mathematical Modeling (2)

Weekly seminar series covering topics of current research in applied mathematics and statistics. Permission of instructor required. Enrollment is restricted to graduate students. (Formerly AMS 280B.)

AM 280C - Seminar in Geophysical and Astrophysical Fluid Dynamics (2)

Weekly seminar/discussion group on geophysical and astrophysical fluid dynamics covering both analytical and computational approaches. Participants present research progress and findings in semiformal discussions. Students must present their own research on a regular basis. (Formerly AMS 280C.)

Prerequisite: Enrollment is restricted to graduate students; undergraduates may enroll by permission of the instructor.

AM 296 - Masters Project (2)

Independent completion of a masters project under faculty supervision. Students submit petition to sponsoring agency. Enrollment is restricted to graduate students.

AM 297A - Independent Study or Research (5)

Independent study or research under faculty supervision. Students submit petition to sponsoring agency. Enrollment is restricted to graduate students.

AM 297B - Independent Study or Research (10)

Independent study or research under faculty supervision. Students submit petition to sponsoring agency. Enrollment is restricted to graduate students.

AM 297C - Independent Study or Research (15)

Independent study or research under faculty supervision. Students submit petition to sponsoring agency. Enrollment is restricted to graduate students.

AM 297F - Independent Study (2)

Independent study or research under faculty supervision. Students submit petition to sponsoring agency. Enrollment is restricted to graduate students.

AM 299A - Thesis Research (5)

Thesis research under faculty supervision. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

AM 299B - Thesis Research (10)

Thesis research under faculty supervision. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

AM 299C - Thesis Research (15)

Thesis research under faculty supervision. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

ANTH - ANTHROPOLOGY

Lower-Division

ANTH 1 - Introduction to Biological Anthropology (5)

Study of evolution illustrated by Pleistocene hominid fossils and variation in living human groups. Behavior and evolution of primates examined as they contribute to the understanding of human evolution. Required for all anthropology majors. (Formerly Introduction to Human Evolution.)

ANTH 2 - Introduction to Cultural Anthropology (5)

A number of different peoples are studied and a variety of approaches to the nature of the culture and to the study of specific cultures presented. Required for all anthropology majors.

ANTH 3 - Introduction to Archaeology (5)

Overview of ways of learning about the human past beyond the scope of written history. Reviews development of archaeology, fundamental methods and theories, and archaeology's contribution to understanding human origins, the emergence of farming, and the origins of complex societies.

ANTH 93 - Field Study (5)

Supervised research or organized projects on anthropological topics for lower-division students. Conducted either on or off campus. Students submit petition to sponsoring agency.

ANTH 97 - Laboratory Safety Practicum (2)

Covers laboratory health and safety and standard operating procedures within the anthropology laboratories. Prepares students for future laboratory research activities while providing support of laboratory administration, collections management, and laboratory course demonstration needs. Enrollment by application.

Upper-Division

ANTH 100 - History and Theory of Biological Anthropology (5)

Provides an historical overview from the 18th century to the present of race, ape-human relationships, and human nature. Emergence of an evolutionary framework and of fossil, genetic, and primate information becomes the basis for reformulating ideas about human biology within anthropology.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3 and satisfaction of the Entry Level Writing and Composition requirements.

ANTH 101 - Human Evolution (5)

Study of human evolution covering the last five million years. Examines the fossil evidence and emphasizes the reconstruction of behavior from the paleontological and anatomical evidence.

Prerequisite: Prerequisite(s): ANTH 1.

ANTH 102A - Human Skeletal Biology (5)

Presents basic human osteology allowing students to identify skeletal material by element. Emphasizes the dynamic nature of bone by integrating anatomy with a discussion of bone physiology within the context of the human life cycle.

Prerequisite: Prerequisite(s): ANTH 1.

ANTH 103 - Forensic Anthropology (5)

Covers the basic analysis of human skeletal remains for the medicolegal profession. Assessment of age, sex, ancestry, and general physical characteristics, trauma, and disease are discussed. Addresses the legal responsibilities of the anthropologist. Online lectures with in-class discussion sections, quizzes, and exams. Students cannot receive credit for this course and ANTH 103I.

Prerequisite: Prerequisite(s): ANTH 102A. Enrollment is restricted to juniors and seniors.

ANTH 103B - Forensic Anthropology and Bioarchaeology**ANTH 103I - Forensic Anthropology (4)**

This online course teaches the basic analysis of human remains for the medico-legal profession. Covers the development of forensic anthropology, creating a biological profile, evaluating skeletal trauma, estimation of interval since death, and how these assessments can be supported. Students cannot receive credit for this course and for ANTH 103.

Prerequisite: Prerequisite(s): ANTH 102A.

ANTH 104 - Human Variation and Adaptation (5)

Explores the major environmental factors (temperature, altitude, diet, and disease); how they are perceived by the human body; the physiological, micro- and macroanatomical

responses; and how behavior and culture can modify the impact of these stresses. Course 1 is highly recommended as preparation. (Formerly Human Adaptability.)

ANTH 105 - Human Paleopathology (5)

Examines paleopathology beginning with ancient hominid populations and proceeding to modern populations. Uses both the skeletal evidence and historical documentation when available. Considers evolutionary, cultural, and biological factors. Topics include: osteological diagnosis of infectious disease; trauma; nutritional deficiencies; dental disease; and developmental defects.

Prerequisite: Prerequisite(s): ANTH 1; ANTH 102A recommended.

ANTH 106 - Primate Behavior and Ecology (5)

The nature of primate social systems and social bonds is examined in the light of evolutionary and ecological concepts. We explore the evolution of primate social system behavior and culture, as well as the ecologies of primate populations.

Prerequisite: Prerequisite(s): ANTH 1.

ANTH 107A - Methods and Research in Biological Anthropology: Genetics (5)

Introduces the molecular analyses of anthropological questions and explores the intersection of genetics and anthropology. Covers the basic principles of molecular and population genetics as they relate to the study of humans. Prerequisite(s): courses 1 and 104. Course 102A is recommended. Enrollment by permission of instructor. (Formerly course 107, Methods and Research in Molecular Anthropology.)

ANTH 107B - Methods and Research in Biological Anthropology: Stable Isotopes (5)

This combination of lectures, readings, discussions, and hands-on laboratory experience provides a comprehensive overview of stable isotope research to reconstruct diet and mobility. Discover the wide application of isotopic research in biological anthropology, bioarchaeology, primatology and forensics. Prerequisite(s): at least one of ANTH 101, ANTH 104, ANTH 106, ANTH 107, or ANTH 110F and by permission of the instructor. (Formerly Methods and Research in Stable Isotope Ecology.)

Prerequisite: Prerequisite(s): ANTH 101 or ANTH 104 or ANTH 106 or ANTH 107 or ANTH 110F.

ANTH 108 - Neanderthals

Prerequisite: Prerequisite(s): course 1.

ANTH 109 - Evolution of Sex (5)

Provides a physical anthropology understanding of the evolution of sex. Focuses on genetics and the alterations in allele associations that take place as a result of sexual processes.

Prerequisite: Prerequisite(s): ANTH 1.

ANTH 110A - Public Life and Contemporary Issues (5)

How can cultural anthropology help us to understand current events unfolding locally, nationally, and globally? Students learn how to read newspapers differently--that is, through the lens of cultural analysis. The world of everyday politics and society, as it unfolds in debates happening right now, forms the topical substance of the course. (Formerly course 4.)

ANTH 110B - From Indiana Jones to Stonehenge: Archaeology as Popular Culture (5)

Addresses the meaning of archaeology as generated in television, movies, literature, newspapers, and even National Geographic. Students engage with several case-studies illustrating how archaeology is portrayed in popular culture.

ANTH 110C - California Pasts (5)

This course is structured around four critical moments--missionization, Rancho-Era, Gold Rush, and World War II--through the eyes of the ethnic and racial minorities who experienced them. Special attention is given to oral, archival, and archaeological sources which reveal California's multiethnic pasts.

ANTH 110D - Tourism Imaginaries and Encounters (5)

Explores anthropological approaches to the study of tourism, in particular themes of authenticity, othering, visual economies, development, identity politics, alternative tourisms, and material culture with reference to history, power, and location.

ANTH 110E - Anthropology of Global Environmental Change (5)

Introduces anthropological and historical approaches to environmental change and globalization. Key themes include: capitalism and industrialization, environmental politics, global culture, and relations between humans and other species.

ANTH 110F - Evolution of Human Diet (5)

Presents the evolution of human diet and subsistence from a biological anthropological perspective. Covers the key hypothesis and methodologies related to diet, from our early fossil ancestors up to agriculture and animal husbandry. (Formerly Biocultural Approaches to Food.)

ANTH 110H - Acoustic Culture (5)

Explores relationships between culture and the acoustic worlds, including environmental, verbal, and musical, which humans inhabit. How can paying attention to cultures of listening and sound-making help us think about cultural life and experience in new ways? (Formerly course 80H.)

ANTH 110I - Cultures of Sustainability and Social Justice (5)

Brings together diverse forms of cultural knowledge and complexities of everyday life to illuminate longstanding concerns of sustainability and justice. Investigates multiple theories of sustainable development as well as tools,

techniques, and contexts for ecological integrity, economic security, empowerment, responsibility and social well-being characteristic of sustainable communities. Case studies are drawn from around the world highlighting the work of Right Livelihood Award Laureates in tandem with UC faculty.

ANTH 110J - Encounter Studies

ANTH 110K - Culture Through Food (5)

Examines anthropology of food and politics of eating. Cultural and social uses of food in rituals of solidarity or fasting, identities and meanings of food for individuals, and consumption in the global context are key components of study.

ANTH 110L - Decolonizing Methodologies (5)

Delves into the implications of indigenous research, with themes such as self-determination and healing. At the intersection of indigenous peoples and institutional research, the course covers contexts of research conceptualizations, designs, and implications of participants and their communities.

ANTH 110N - Anthropology of Food (5)

Focuses on social institutions around the world that shape food and its meanings; how people use food to organize their worlds; and production, sharing, or consumption of food as a political or meaningful act.

ANTH 110O - Postcolonial Britain and France (5)

Transdisciplinary examination of the politics and culture of postcolonial Britain and France. Topics include: immigration from South Asia, Africa, and the Caribbean; racism and antiracism; minority difference and citizenship practices; and the emergence of Islam as a major category of identity and difference.

ANTH 110P - India and Indian Diaspora through Film (5)

Explores several themes of relevance in contemporary India and Indian diaspora, concentrating on anthropological research and various documentary and popular Bollywood films. Through films and ethnographies, students analyze the nature of anthropological contributions to the study of Indian societies. (Formerly course 80P.)

ANTH 110Q - Queer Sexuality in Black Popular Culture (5)

From Janet Mock to Young M.A., queerness has become hypervisible in Black popular culture--but at what cost? Using music, television, and social media as central texts, students investigate the intersections of sexuality, gender, and race in public life.

ANTH 110R - Discourses in American Religions and Their Role in Public Life (5)

Introduces dominant discourses about major American religions and their role in public life, with particular attention to intersecting differences, such as race, sex/gender, and

disability, and to shifting religious/political boundaries. Visual and textual media, political commentary, and popular ethnographies are analyzed.

ANTH 110S - Evolution of Democracy (5)

Examines the state and its institutions from a historical, social, and cross-cultural perspective, paying attention to the varied discourses and practices that constitute what we call the state.

ANTH 110T - Motherhood in American Culture (5)

Examines the culture wars around motherhood in the United States with a focus on the political mobilization of normative ideas about the correct way to mother, from the moment of conception on. Special attention is given to the historical construction of deviant motherhood among marginalized groups. (Formerly course 80T.)

ANTH 110U - Histories and Cultures of Piracy (5)

An interdisciplinary yet anthropologically informed approach to studying pirates and piracy across different historical eras and spaces. Explores the role of pirates in world history from ancient to present times, including piracy both at sea and online.

ANTH 110V - Virtual Values: The Cultural Politics of Information Technology

ANTH 110W - Land and Waterscapes Entropology (5)

Establishes anthropological interconnections of emergent worlds where environmental matters, social justice, and human survival interrelate. Focuses on anti-essential nature and waterscape ethnographies in which different pluricultures revalidate local understandings as ways of contesting increasing forms of land and water privatization.

ANTH 110Y - Feeding California (5)

Online course introducing students to social practices, political processes, and cultural contexts that shape food production and consumption. Considers identity, heritage, choice, power, agency, body practices, belonging, access, safety, and security. Prioritizes California case studies, with comparative examples from around the world.

ANTH 110Z - Infrastructure: Designing and Hacking Power in the Everyday

ANTH 111 - Human Ecology (5)

Reviews the environmental, physiological, behavioral, and cultural ways that humans interact with their physical surroundings. The effects of human culture on the environment and of the environment on the shape of human culture is emphasized.

ANTH 112 - Life Cycles (5)

Examines the human life cycle using an evolutionary framework. Examines key aspects of the human life stages using findings and concepts from developmental biology, physiology, nutrition, evolutionary ecology, and life-history theory.

Prerequisite: Prerequisite(s): ANTH 1.

ANTH 113 - Tutoring Writing in Anthropology (2)

Trains students to tutor writing in undergraduate anthropology courses; supports and guides them during the quarter they are tutoring. Enrollment by interview only. Prerequisite(s): satisfaction of the Composition requirement.

ANTH 118 - Globalization of Development

ANTH 118L - Globalization of Development Laboratory

ANTH 119 - Indigenous Visual Culture (5)

Examines the relationship between visual cultures and indigenous peoples. First, class discusses what is visual anthropology. Second, class examines the relationship between museums and indigenous peoples. Third, class examines ethnographic photography and indigenous uses of photography. Fourth, class examines the uses of ethnographic film, and then its relationship to indigenous peoples. Finally, class examines indigenous uses of film.

ANTH 120 - Culture in Film (5)

Introduces current and historical issues in visual anthropology, using film as a medium with which to represent culture. Raises questions about visual representation and advocacy in the context of global inequalities.

Prerequisite: Prerequisite(s): ANTH 2 or ANTH 80J or FILM 20A or FILM 20B, or HAVC 10D, or HAVC 10E, HAVC 10F or HAVC 10G.

ANTH 121 - Socialism (5)

Ethnography-based course that examines the social worlds of socialism, with particular focus on state socialism. Topics include: social problems that inspired socialist movements; implementation and experience of socialism in daily life; and significance of class, race, nation, science, technology, rationality.

ANTH 122 - Postsocialism (5)

Examines the demise of socialist systems. Addresses the political, social, cultural, and economic experiences of everyday life that led to that demise, what new social inequalities have arisen since, and how citizens use the socialist past to critique the present.

ANTH 123 - Psychological Anthropology (5)

An introduction to some of the central theoretical issues in psychological anthropology. Psychoanalytic, cognitive, and relativist perspectives on the link between person and society are discussed and compared.

Prerequisite: Prerequisite(s): ANTH 2.

ANTH 124 - Anthropology of Religion (5)

Study of the phenomenon of religion as manifested in ethnographic literature, with special attention to traditional and recent modes of analysis of religious behavior. Special

topics include myth, religious healing, witchcraft and sorcery, ritual, and millenarian movements.

ANTH 125 - Magic, Science, and Religion (5)

With a theoretical understanding of the concepts of magic, science, and religion, students draw on ethnographies of these practices to critique distinctions between them and critically analyze the understanding of these categories and their relation in the modern world

ANTH 127 - Ethnographies of Capitalism (5)

Challenges approaches to capitalism that treat it as socioeconomic relations separable from culture. Readings include ethnographies demonstrating the inextricability of cultural meanings from capitalist practices. Topics include capitalism's relationship to colonialism, nationalism, socialism, gender, and the commodification of aesthetics.

ANTH 128 - Contemporary American Evangelical Cultures (5)

Study of contemporary, American, born-again Protestant discourse using ethnographic materials and interpretive theories. Topics include biblical literalism, Christian conversion and self-fabulation, charismatic gifts, preaching, sacrificial giving, prosperity theology, apocalypticism, creationism, pro-family and pro-life rhetoric, and televangelism. (Formerly *Born-Again Religion and Culture*.)

ANTH 129 - Beyond Borders: Other Globalizations and Histories of Interconnection (5)

The history of social and cultural interconnections at a global scale. Anthropological approaches to the study of cultural encounter are used to investigate topics such as trade, religion, and citizenship and to evaluate shifting concepts of civilization and barbarism. (Formerly *Other Globalizations: Cultures and Histories of Interconnection*.)

Prerequisite: Prerequisite(s): ANTH 2.

ANTH 130A - Anthropology of Africa. (5)

Survey of sub-Saharan societies. Analysis of principles of social organization and factors of cultural unity of selected western, eastern, central, and southern African peoples. (Formerly *Peoples and Cultures of Africa*)

ANTH 130B - Brazil (5)

Examines Brazilian culture and its link to interpersonal relationships, religion, politics, and psychological experience.

Prerequisite: Prerequisite(s): ANTH 2.

ANTH 130C - Politics and Culture in China (5)

Joins substantive information about Chinese society and culture with debates in social theory and rethinks conventional wisdom about colonialism and modernity. Topics include representations of Chineseness, class revolution, Chinese diaspora, popular culture, family and kinship, nationalism, history/memory, race and gender.

ANTH 130E - Culture and Politics of Island Southeast Asia (5)

Southeast Asia includes a variety of societies exhibiting many ecological adaptations, religions, marriage systems, and experiences with colonial powers. Case studies of particular societies, chosen to reveal variety, are examined comparatively. Emphasis on religion and social organization.

Prerequisite: Prerequisite(s): ANTH 2.

ANTH 130F - Blackness In Motion: Anthology of the African Diasporas (5)

What connects Black communities in the Caribbean, the U.S., Latin America, and Canada, and what sets them apart? Examines theories of diaspora, gender and sexuality, slavery, colorism, music, U.S. hegemonies, social movements, and comparative racialization and global anti-blackness (Formerly African Diasporas in the Americas.)

ANTH 130G - Asian Americans in Ethnography and Film (5)

Critically examines category of Asian Americans. Addresses historic representations of Asians and Asian Americans in ethnographic research and film. Explores contemporary issues of race, culture, and politics through ethnographic practice and cultural production.

ANTH 130H - Ethnography of Russia and Eastern Europe (5)

Introduces students to the ethnography of Eurasia, with special attention to the lived experience and legacy of state socialism in this region. Topics include new ideas of personhood, changing economic practices, public health, and international development.

ANTH 130I - Cultures of India (5)

An examination of anthropological studies of tribal, rural, and urban cultures of India and a look at changes taking place in India.

Prerequisite: Prerequisite(s): ANTH 2.

ANTH 130J - Politics and Statemaking in Latin America (5)

Introduction to ethnohistory and political anthropology of one or more Latin American countries: Typically Mexico and one other country. Students explore how contested concepts such as indigeneity, nation or state come to gain credibility and are deployed in contemporary politics.

ANTH 130L - Ethnographies of Latin America (5)

A broad introduction to issues and areas of cultural production and transformation in the Caribbean, Mexico, and Central and South America. Colonial, neocolonial, class, ethnic, gender, religious, ecological, and political relations intersect as represented in ethnographies and film.

Prerequisite: Prerequisite(s): ANTH 2.

ANTH 130M - Inside Mexico (5)

Examines various communities within the Republic of Mexico as represented in ethnographic texts and other forms of cultural production, particularly music and dance.

Emphasis on the interplay between the concept of regionalism and national identity. Previous course work in Mexican culture and/or history strongly recommended. Some reading in Spanish is required.

ANTH 130N - Native Peoples of North America (5)

A survey of Native American cultures and experience during the past century, with emphasis on Pueblo cultures of the American Southwest.

ANTH 130O - Native Feminisms, Gender, and Settler Colonialism (5)

Covers Native feminisms, gender, settler colonialism, and ethnography. Students read ethnographies that intervene in Native feminisms and its possibilities. Focuses on ethnographies in the U.S., including Native men and masculinities in Hawaii.

ANTH 130P - Ethnography of Southern Cone Chile and Argentina (5)

Chile and Argentina, although both established within Spanish colonization and physically close, have dissimilar histories and culture. We explore areas of friction and overlap that shaped different peoples, institutions, cultural identities, and histories in countries that share a particular history.

ANTH 130R - Provincializing America

Prerequisite: Prerequisite(s): ANTH 2.

ANTH 130S - Ethnography of Russia and Eastern Europe, Abroad (5)

This study abroad introduces the ethnography of Russia and Eastern Europe, with special attention to lived experience and legacy of state socialism. Topics: effects of socialism, changing economic practices; constructions of new identities; modernization/development; belief systems; and memory and history.

ANTH 130T - Religion and Politics in the Muslim World (5)

Analyzes post-colonial forms of Islam, with particular attention to Muslim societies and cultures in the Middle East, North Africa, and Europe. Emphasizes the relationship between power, knowledge, and representation in anthropological approaches to Islam and Muslims. (Formerly Anthropological Approaches to Islam.)

ANTH 130U - Central America (5)

Draws on political, economic, and anthropological perspectives to analyze the key role of transnationalism and neoliberalism in contemporary Central America. Key topics include: the aftermath of revolutions; labor and gender; indigenous movements and multiculturalism; and transnational migration and governance.

ANTH 130V - Ethnography of Russia (5)

Examines daily life in Russia and affiliated formerly Soviet Republics through historical and cultural comparison. Topics include: socialist and postsocialist daily life; 20th- and 21st-

century Russian empire building; cultural politics; economic systems; state-citizen relations; citizenship regimes; labor and leisure; and religion.

ANTH 130W - Ethnography of Eastern Europe (5)

Examines daily life in Eastern Europe, especially how residents in this region have navigated the transition from state socialism to accession to the European Union. Topics include: the legacies of state socialism; cultural politics; new economies; consumption; the European Union; new forms of governance; and political activism.

ANTH 130X - Special Topics in Ethnography (5)

This course on special topics in ethnography will be taught on a rotating basis by various faculty members. Precise focus of each year's courses will vary according to the instructor and will be announced by the department.

Prerequisite: Prerequisite(s): ANTH 2.

ANTH 131 - Gender in Cross-Cultural Context (5)

Examines the diversity of women's as well as men's roles, experiences, and self-conceptions in a number of societies to explore how women and men shape, and are shaped by, particular forms of social life.

ANTH 131H - Russian-Language Readings Course: Readings in Anthropology of Russia (2)

Contemporary topics and readings in anthropology of Russia and the former Soviet Union. All readings, films, and other materials are in Russian. Discussions are in English. Accompanies course 130H, Ethnography of Russia and Eastern Europe. Prerequisite(s): course 130H and proof of Russian proficiency in reading and writing. Enrollment by permission of instructor.

ANTH 133 - Narratives of the Popular (5)

Addresses the increasing importance of popular culture as the terrain upon which to address issues of culture and power. Emphasizes an ethnographic approach to popular culture as sociocultural phenomena. Students learn about a variety of activities including television and film viewing, music, fashion, photography, postcards, comic books, and urban spatial relations and architecture.

ANTH 134 - Medical Anthropology: An Introduction (5)

Cross-cultural study of health, disease, and illness behavior from ecological and ethnomedical perspectives. Implications for biomedical health care policy. Students cannot receive credit for this course and course 254.

Prerequisite: Prerequisite(s): ANTH 2.

ANTH 135A - Cities (5)

Examines cities from an anthropological perspective. Reviews pertinent social scientific literature of the 19th and early 20th centuries. Surveys the concepts and methods used by contemporary anthropologists to investigate urban phenomena.

ANTH 136 - The Biology of Everyday Life (5)

Addresses cross-cultural attitudes to the human body and its everyday biological concerns: sleeping, eating, breathing, sex, and defecation.

Prerequisite: Prerequisite(s): ANTH 2.

ANTH 137 - Consuming Culture (5)

Explores consumption as a cultural form. Beginning with theories of capitalism and exchange, it then focuses on sites and modes of consumption and display such as department stores, museums and zoos, advertisements and photography, cultural tourism.

ANTH 138 - Political Anthropology (5)

The ideas, in selected non-Western societies, about the nature of power, order, social cohesion, and the political organization of these societies.

ANTH 139 - Language and Culture (5)

Examination of language system and language use in relationship to cultural contexts of communication in Western and non-Western societies. Topics include the Sapir-Whorf linguistic relativity hypothesis; linguistic constructions of gender; speech variation in relation to class, ethnicity, and national identity; and the emergence of self in communicative acts.

Prerequisite: Prerequisite(s): ANTH 2.

ANTH 140 - The Body in Rain: Environmental and Medical Intersections (5)

Explores medical and environmental anthropologies, including how bodies-human and other-are implicated in processes often figured as environmental. Explores how the body and the environment combine and interact to form nexus of political, cultural, and material forces.

ANTH 141 - Anthropology of Developing Countries: Environment, Water, Entropy

Prerequisite: Prerequisite(s): course 2.

ANTH 142 - Anthropology of Law (5)

An ethnographically informed consideration of law, dispute management, and social control in a range of societies including the contemporary U.S. Topics include conflict management processes, theories of justice, legal discourse, and relations among local, national, and transnational legal systems.

Prerequisite: Enrollment is restricted to anthropology and legal studies majors.

ANTH 143 - Performance and Power (5)

Explores relationships between power and performance forms and media, both traditional and emergent. Links aesthetics with politics, and recent transcultural exchanges with local circumstances and consequences.

Prerequisite: Prerequisite(s): ANTH 2 or any other Anthropology course.

ANTH 144 - Anthropology of Poverty and Welfare (5)

Examines phenomena of poverty and welfare in cross-cultural perspective with an emphasis on critical ethnographies and social analyses of social pathologies, economic systems, and community. Topics include informal economies, labor, household systems, social-support networks, and public policies.

ANTH 145X - Special Topics in Socio-Cultural Anthropology (5)

Taught annually on a rotating basis by faculty members. Each year's topic varies by instructor and is announced by the department.

Prerequisite: Prerequisite(s): ANTH 2.

ANTH 146 - Anthropology and the Environment (5)

Examines recent approaches to study of nature and the environment. Considers historical relationship between nature, science, and colonial expansion as well as key issues of contemporary environmental concern: conservation, environmental justice, and social movements. Students cannot receive credit for this course and course 246.

Prerequisite: Prerequisite(s): ANTH 2.

ANTH 147 - Anthropology and the Anthropocene (5)

Looks at how humans have lived with their environments in other times and places; the long-distance transfers of humans and other animals, as well as plants and microorganisms; and how we can best live in the Anthropocene.

Prerequisite: Prerequisite(s): ANTH 2.

ANTH 148 - Gender and Global Development (5)

Uses the critical tools of feminist theory and cultural anthropology to look at how global development discourses and institutions mobilize, reinforce, and challenge systems of gender-based inequality. Topics include non-governmental organizations (NGOs), development practice, microcredit, and technocrat cultures. (Formerly Gender and Development.)

ANTH 149 - Anthropology of Activism (5)

Examining activism from an anthropological perspective, students look at beliefs, ideals, and practices of social movements and those involved in them. Taking a procedural approach, course focuses on how things happen in unexpected ways, and examines activism as a collective matter.

ANTH 150 - Communicating Anthropology (5)

Encourages anthropology majors to explore different means of communicating anthropology with much attention to individual writing and presentation skills. Intensive work on library research; recognizing, comparing, and making arguments; and analyzing ethnographies, articles, reviews, and films.

Prerequisite: Prerequisite(s): two of the following courses: ANTH 1, ANTH 2, or ANTH 3; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to sophomore and junior anthropology majors.

ANTH 151 - Workshop in Ethnography (5)

Through demonstration, practice, and participation, acquire skills in collecting and analyzing cultural data. Work with members of other cultures and with each other to learn to identify significant cultural patterns. Lectures and readings provide added perspective and a theoretical base.

Prerequisite: Prerequisite(s): ANTH 2.

ANTH 152 - Survey of Cultural Anthropological Theory (5)

Major figures, ideas, and writings in 19th- and 20th-century cultural anthropology surveyed. Students cannot receive credit for this course and course 252.

Prerequisite: Prerequisite(s): ANTH 2 and satisfaction of the Entry Level Writing and Composition requirements; enrollment is restricted to anthropology majors.

ANTH 153 - Medicine and Colonialism (5)

Addresses the overlapping relationship between medicine and colonialism in the 19th century, with attention to post-colonial theory and contemporary studies of post-colonial medical pluralism in the 20th century.

Prerequisite: Prerequisite(s): ANTH 2 and ANTH 134.

ANTH 154L - Multimedia Laboratory

Prerequisite: is Concurrent enrollment in ANTH 154 required.

ANTH 157 - Modernity and Its Others (5)

Beginning with the conquest of the Americas, considers how Western thinkers have explained seemingly irrational ways of being and thinking (like witchcraft, human sacrifice, and bodily mutilation), and asks how we interpret beliefs and practices radically different from our own.

ANTH 158 - Feminist Ethnographies (5)

Considers the relationship between anthropology and feminism. Provides historical perspective on gender inequalities in the discipline as well as the emergence of feminist anthropology. Students read and engage with examples of feminist ethnography from a variety of regions and subfields.

ANTH 159 - Race and Anthropology (5)

Examines concept of race in anthropology. Begins with histories of race in anthropology; turns to contemporary analysis of racism, identity formation, and diaspora; and concludes with current debates on the validity of race as an object of analysis.

ANTH 160 - Reproductive and Population Politics (5)

Examines reproductive and population politics across the globe, with a focus on feminist and ethnographic analyses of

the stakes of various actors, from states to religious bodies to non-governmental organizations, in questions of who reproduces and in what circumstances.

ANTH 161 - The Anthropology of Food (5)

Critically examines food as a fundamental aspect of social and cultural life and key concept in the development of anthropological theory and methods. Topics include: power relationships; community building; exchange and reciprocity; symbolism; cultural rules and rituals; globalization; and memory.

ANTH 161S - Anthropology of Food, Abroad (5)

Food as a fundamental aspect of social/cultural life and key concept in development of anthropological theory and methods. Studying abroad, investigations are grounded in local ethnographic context to learn how anthropologists study food, practice methods, and understand food's local importance.

ANTH 162 - Anthropology of Displaced Persons (5)

Examines the causes, consequences, forms, and experiences of human movement, displacement, and abandonment. Topics include: migration, refugees, forced displacement, environmental displacement, tourism, transnational communities, and other displaced populations.

ANTH 163 - Kinship (5)

Provides a critical survey of debates, old and new, in the study of kinship. Readings range from classical treatments to recent reformulations that use kinship as a lens for exploring intimacy, memory, futurity, embodiment, commodification, and power. Students cannot receive credit for this course and course 263.

ANTH 164 - The Anthropology of Dance (5)

An intense reading seminar which critically reviews anthropological works in dance ethnography and dance theory. Recommended for anthropology majors.

Prerequisite: Prerequisite(s): ANTH 2.

ANTH 166 - States, Bureaucracies, and Other Cosmological Propositions (5)

Investigates the cosmologies of states and bureaucracies and the practices through which officials or rulers seek to produce order, knowledge, or stability. Looks at paperwork, nationalist and court rituals, practices of mapping and classification, forms of citizenship.

ANTH 170 - History of Archaeological Theory (5)

Historical review of prehistoric archaeology from antiquarianism to the present. Emphasis on development of archaeological theory and its relation to evolutionary and anthropological theory. Students cannot receive credit for this course and course 270.

Prerequisite: Prerequisite(s): ANTH 3; satisfaction of the Entry Level Writing and Composition requirements.

Enrollment is restricted to anthropology and Earth sciences/anthropology combined majors. Recommended for juniors.

ANTH 171 - Materials and Methods in Historical Archaeology (5)

In this intensive, hands-on course, students learn the step-by-step processes involved in conducting laboratory research on historic artifacts. Students study the ins and outs of analyzing, cataloging, and dating historic artifacts.

ANTH 172 - Archaeological Research Design (5)

Develops practical skills for connecting archaeological theory and methods to grant writing, final reports and presentations. Examines elements of good research design, including the logic of scientific inquiry, ethics, project conceptualization, measurement, sampling, data analysis, and effective writing.

Prerequisite: Prerequisite(s): ANTH 3. Enrollment is restricted to anthropology majors.

ANTH 173 - Origins of Farming (5)

Survey of the ecological and archaeological evidence for the origins of plant and animal domestication in Africa, Eurasia, and the Americas. Discussion will center on the preconditions of this drastic alteration in human ecology and its consequences in transforming human societies. Open to nonmajors. Students cannot receive credit for this course and course 273.

Prerequisite: Enrollment is restricted to juniors and seniors.

ANTH 174 - Origins of Complex Societies (5)

Deals with evidence and theories concerning the origins of complex society; the transition from egalitarian, foraging societies to the hierarchical, economically specialized societies often referred to as civilizations. Focuses on both Old World and New World cultures. Students cannot receive credit for this course and course 174.

Prerequisite: Prerequisite(s): ANTH 3.

ANTH 175 - African Archaeology (5)

Introduces the evolution of African kingdoms and states from the emergence of farming communities to initial contact with Europe. Particular attention paid to the origins of social inequality and the evolution of centralized polities. Students cannot receive credit for this course and Anthropology 275B. (Formerly African Complex Societies.)

Prerequisite: Prerequisite(s): ANTH 3.

ANTH 175B - African Complex Societies (5)

Introduces the evolution of African kingdoms and states from the emergence of farming communities to initial contact with Europe. Particular attention paid to the origins of social inequality and the evolution of centralized polities. Students cannot receive credit for this course and Anthropology 275B.

Prerequisite: Prerequisite(s): course 3; course 175A strongly recommended.

ANTH 175C - African Diaspora

Prerequisite: Prerequisite(s): ANTH 3; ANTH 175A and ANTH 175B strongly recommended.

ANTH 176A - North American Archaeology (5)

Development of Native cultures in North America. Topics include peopling of the New World, early foragers, spread of agriculture and complex societies in the Southwest and Eastern Woodlands, and review of cultural developments in the West and Far North.

Prerequisite: Prerequisite(s): ANTH 3 or consent of instructor.

ANTH 176B - Meso-American Archaeology (5)

Review of the archaeological and ethnohistorical evidence for the origins and development of pre-Columbian civilizations in Meso-America including the Olmec, Maya, Zapotec, Mixtec, Teotihuacan, Toltec, Tarascan, and Aztec.

Prerequisite: Prerequisite(s): ANTH 3.

ANTH 176C - Archaeology of the American Southwest (5)

Outlines the development of native cultures in the American Southwest from Paleo-Indian times (Ca. 11,500 B.C.) through early European contact (ca. A.D. 1600). Topics include the greater environment; early foraging culture; the development of agriculture and village life; the emergence and decline of regional alliances; abandonment and reorganization; and changes in social organization, external relations, and trade.

Prerequisite: Prerequisite(s): ANTH 3 and ANTH 176A.

ANTH 176D - Colonial Encounters in the Americas (5)

Uses archaeological case studies to explore processes of cultural confrontation, resistance, and transformation among Native American groups in the wake of European colonial expansion in the Western Hemisphere during the late 15th through mid-19th centuries.

Prerequisite: Prerequisite(s): ANTH 2 and ANTH 3.

ANTH 176E - Archaeology of the Pacific Northwest (5)

Explores some of the important issues surrounding the anthropological and archaeological study of the Pacific Northwest Coast--a roughly 1,800-kilometer-long shoreline that stretches from Yakutat Bay in Alaska to Cape Mendocino in California.

Prerequisite: Prerequisite(s): ANTH 3.

ANTH 176F - California Archaeology (5)

Introduces the Native peoples of California from an archaeological perspective. Covering the past 13,000 years, a variety of geographic and temporal settings are examined as well as current research in California archaeology.

Prerequisite: Prerequisite(s): ANTH 3.

ANTH 178 - Historical Archaeology: A Global Perspective (5)

Introduces the archaeology of European colonialism and the early-modern world. Topics include historical archaeological methods; the nature of European colonial expansion in New and Old Worlds; culture contact and change; and power and resistance in colonial societies. Students cannot receive credit for this course and Anthropology 278.

ANTH 180 - Ceramic Analysis in Archaeology (5)

Focuses on theories and techniques used by archaeologists to bridge the gap between the recovery of ceramic materials and their interpretation within cultural contexts. Topics include the origins of pottery, production methods, classification and typology, seriation, functional analysis, materials analysis and description, organization of production, trade, and the analysis of style. Students are billed a course materials fee. Students cannot receive credit for this course and course 280.

Prerequisite: Prerequisite(s): ANTH 3. Concurrent enrollment in ANTH 180L required. Enrollment is restricted to anthropology majors.

ANTH 180L - Ceramic Analysis Laboratory (2)

Practicum in ceramic materials analysis and description. Students perform material experiments in materials selection and processing, hand-building techniques, and open-pit firing. Demonstrations of standard techniques of attribute analysis and the mineralogical and chemical characterization of ceramic materials are presented. Students cannot receive credit for this course and course 280L.

Prerequisite: Prerequisite(s): ANTH 3. Concurrent enrollment in ANTH 180 required. Enrollment is restricted to anthropology majors.

ANTH 181X - Special Topics in Archaeology (5)

Taught annually on a rotating basis by various faculty members. Precise focus of each year's course varies according to the instructor and is announced by the department.

Prerequisite: Prerequisite(s): ANTH 3.

ANTH 182A - Lithic Technology (5)

Introduction to lithic and ceramic analysis in archaeology. Includes lab analysis, discussions of classification and typology, and exploration of the concept of style as it relates to ceramics and lithics in archaeology.

Prerequisite: Prerequisite(s): ANTH 3.

ANTH 184 - Zooarchaeology (5)

Lectures and seminar on archaeological faunal analysis. Topics include mammalian evolution and osteology, vertebrate taphonomy, reconstruction of human diet from faunal remains, foraging strategy theory, data collection and management, and methods of quantitative analysis. Students cannot receive credit for this course and course 284.

Prerequisite: Prerequisite(s): ANTH 3; concurrent enrollment in ANTH 184L is required.

ANTH 184L - Zooarchaeology Laboratory (2)

Practical laboratory in archaeological analysis, with demonstrations and exercises on human-caused modifications to animal bones and non-human modifications to animal bones.

Prerequisite: Prerequisite(s): ANTH 3 and concurrent enrollment in ANTH 184. Enrollment is restricted to anthropology majors and combined Earth sciences/anthropology majors.

ANTH 185 - Osteology of Mammals, Birds, and Fish (5)

Practicum in archaeological faunal analysis. Students learn to identify bones of all larger mammal species of central California plus selected bird and fish species. Students cannot receive credit for this course and course 285. Prerequisite(s): courses 184 or 102 or Biology 138/L or Earth Sciences 100 or Environmental Studies 105/L, and permission of instructor.

ANTH 187 - Cultural Heritage in Colonial Contexts (5)

Critical examination of the definitions of cultural heritage, its development as a concept, and the various laws, charters, and conventions that shape our management of the past in the present. The focus is on heritage in comparative colonial contexts.

ANTH 187B - Cultural Resource Management (5)

Explores how the past is managed or cared for in the present, especially in the context of the United States.

Prerequisite: Prerequisite(s): ANTH 3.

ANTH 188 - Practicum in Archaeology

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3.

ANTH 188A - Practicum in Archaeology A (2)

Introduces practical skills in archaeological materials identification of stone, shell, bone, and other materials, curation, and database management. Students receive entry-level training with once-weekly class meetings and five hours per week of hands-on work. Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3, and instructor consent. All three courses in sequence (ANTH 188A, ANTH 188B, ANTH 188C) required to count for the anthropology major or minor.

ANTH 188B - Practicum in Archaeology B (2)

Introduces practical skills in archaeological materials identification of stone, shell, bone, and other materials, curation, and database management. Students receive entry-level training with once-weekly class meetings and five hours per week of hands-on work. Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3, and instructor consent. All three courses in sequence (ANTH 188A, ANTH 188B, ANTH 188C) required to count for the anthropology major or minor.

ANTH 188C - Practicum in Archaeology C (2)

Two-credit course introducing practical skills in archaeological materials identification of stone, shell, bone, and other materials; curation; and database management. Students receive entry-level training with once-weekly class meetings and five hours per week of hands-on work. Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3. All three courses in sequence (188A, 188B, 188C) required to count for the anthropology major or minor.

ANTH 189 - Archaeology Field Methods (5)

Lecture, laboratory, and fieldwork sessions on archaeological field methods including survey, mapping, excavation, record and database maintenance, artifact accessioning, curation, and analysis on the UCSC campus. Students attend lectures/laboratories two evenings each week and do fieldwork all day on Saturdays. Enrollment by instructor consent. Prerequisite(s): course 3 and application letter. Students who have done no previous fieldwork in archaeology have priority. Students are billed a materials fee.

ANTH 190X - Special topics in Biological Anthropology (5)

Taught annually on a rotating basis by various faculty members. Precise focus of each year's course varies according to the instructor and is announced by the department. (Formerly Special topics in Archaeology-Physical Anthropology.)

Prerequisite: Prerequisite(s): ANTH 1.

ANTH 194A - Anthropology of Dead Persons (5)

Explores the cultural meanings of dead bodies and dead persons, including memorialization; the body in the United States legal system; cadavers in education and research; dead persons in mass disasters and human-rights cases; and repatriation of the dead. Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements, and courses 1, 2, and 3. Enrollment restricted to senior anthropology and Earth sciences/Anthropology combined majors. Enrollment by permission of instructor.

ANTH 194B - Chimpanzees: Biology, Behavior, and Evolution (5)

Explores studies on wild and captive chimpanzees with reference to other apes and humans. Topics include sociality, tool using, locomotion, traditions, and life history; social and physical dimensions of growth and development; language studies, genetics, and applications to human evolution.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3; satisfaction of the Entry Level Writing and Composition requirement. Enrollment is restricted to senior anthropology majors.

ANTH 194C - Feminist Anthropology (5)

Considers feminist perspectives on the human past, archaeologists' perspectives on feminist theory, and the impact of gender, feminist, and critical social theory on

archaeology as a profession. Students cannot receive credit for this course and course 279.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3, and satisfaction of the Entry Level Writing and Composition requirement. Enrollment restricted to senior anthropology and Earth sciences/Anthropology combined majors.

ANTH 194D - Tribes/Castes/Women (5)

Examines historical constructions and contemporary deployments of the categories that have structured popular and anthropological understandings of social life in South Asia, particularly those of tribe, caste, and women. Students gain familiarity with the mobilization of these categories in contemporary political movements across India.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3. Satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior anthropology majors.

ANTH 194E - Belief (5)

Focuses on problems and opportunities raised by the concept of belief. Students work to develop an anthropological understanding of belief as practiced, then put it to use in analyzing episodes from the NPR series *This I Believe*.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior anthropology majors.

ANTH 194F - Memory (5)

Intensive and fast-paced seminar focusing on theoretical and ethnographic studies of memory as a means for dealing with the past. Examines how ordinary people and societies have coped with the past through acts of selective remembering and forgetting.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3; satisfaction of the Entry Level Writing and Composition requirement. Enrollment is restricted to senior anthropology majors.

ANTH 194G - Politics and Secularism (5)

Examines secularism as political doctrine and practice of government. Topics include: transformation of religion by secularization; forms of inclusion/exclusion enacted by secularism; relationship between secularism and colonial rule. Case studies drawn from Europe, South Asia, United States, and the Middle East.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3, and satisfaction of the Entry Level Writing and Composition requirements; enrollment is restricted to senior anthropology majors.

ANTH 194H - Paleoanthropology (5)

Detailed overview of the evidence for the origin and evolution of humans with emphasis on reconstructing the paleobiology

of extinct hominids. Discussion of individual groups of ancient hominids from the Miocene apes to anatomically modern humans.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; ANTH 1, ANTH 2, and ANTH 3. Enrollment is restricted to senior anthropology and Earth sciences/Anthropology combined majors.

ANTH 194I - Consumption and Consumerism (5)

Investigates cultural analysis of consumer society, commodities, and consumer practices. Students develop their own research projects. Themes include: critiques of consumer society; symbolic analysis of goods, consumption as resistance, anthropologies of marketing, culture jamming; consumption and (post) colonialism.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3; satisfaction of the Entry Level Writing and Composition requirement. Enrollment is restricted to senior anthropology majors.

ANTH 194J - Histories of Forests and Other Wild Places (5)

Wild Nature has a history. This class offers tools for understanding the social and natural construction of wild nature. We will learn to read rural landscapes-- ethnographically, biologically, historically, creatively, and politically.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements. Enrollment is restricted to senior anthropology majors.

ANTH 194K - Reading Ethnographies (5)

Explores issues in the representation of culture through reading and discussing ethnographies. Recent experimental ethnographies open topics including the relation between fieldwork and writing, textual strategies, and the politics of ethnographic writing and research.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior anthropology majors.

ANTH 194L - Archaeology of the African Diaspora (5)

Senior seminar on African diaspora archaeology. Draws on archaeological, historical, and anthropological perspectives to examine the cultural, social, economic, and political lives of Africans and their descendants in the New World and West Africa from the 15th through 19th centuries.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, ANTH 3 and an upper division course in archaeology; satisfaction of the Entry Level Writing and Composition requirement. Enrollment is restricted to senior anthropology majors.

ANTH 194M - Medical Anthropology (5)

Focuses on critical issues in the social sciences of health and healing. Designed for students pursuing graduate work in medical anthropology and/or public health.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, ANTH 3, and ANTH 134; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior anthropology majors.

ANTH 194N - Comparison of Cultures (5)

Seminar for upper-division students interested in theories and methodology of social and cultural anthropology. Devoted to critical discussion of different methods of comparison practiced in anthropology.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior anthropology majors.

ANTH 194O - Masculinities (5)

Considers the social construction of men and masculinities in a variety of ethnohistorical contexts as well as the unique contribution enabled by anthropological methods, particularly ethnographic fieldwork, to the study of gender and power.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior anthropology majors.

ANTH 194P - Space, Place, and Culture (5)

Examines ways anthropologists have studied relationship between space, place, and culture. Covers early formulations acknowledging people in different cultural contexts ascribe particular meanings to places and to the concept of space and then traces the ways these questions have come to the fore in more recent scholarship.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior anthropology majors.

ANTH 194Q - Race, Ethnicity, Nation (5)

Provides students with theoretical and methodological approaches to studying the relationships between race, ethnicity, and nation, with a comparative focus on the United States, Latin America, and Europe. Students use ethnographic methods and/or discourse analysis to develop individual research projects.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and ANTH 1, ANTH 2, and ANTH 3. Enrollment is restricted to senior anthropology majors.

ANTH 194R - Religion, Gender, Sexuality (5)

Examines religion in relation to gender and sexuality. Examines how gender, sexuality, and religion intersect in notions of civilization, progress, and modernity in the contemporary and colonial periods. Particular attention paid to Islam, Christianity, and Hinduism.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and ANTH 1, ANTH

2, and ANTH 3. Enrollment is restricted to senior anthropology majors.

ANTH 194S - Hearing Culture: The Anthropology of Sound (5)

Explores relationships between culture and acoustic worlds--environmental, verbal, and musical--within which we live. How sound is shaped by human belief and practice and the role sound plays in cultural and social life, both past and present.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior anthropology majors.

ANTH 194T - Poverty and Inequality (5)

Through ethnographies about homelessness, food deprivation, and unemployment, examines the institutions through which poverty is recognized, the systems of morality shaping debates about need and appropriate behavior, and the effects of community responses to poverty.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; ANTH 1, ANTH 2, and ANTH 3. Enrollment is restricted to senior anthropology majors.

ANTH 194U - Environmental Anthropology: Nature, Culture, Politics (5)

Presents key readings in environmental anthropology focusing on environmental conflicts. Students guided in developing research paper on a society environment topic of their choice. Class is writing intensive with in-class discussion and final presentations.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior anthropology majors.

ANTH 194W - The Anthropology of Social Movements (5)

Focuses on the anthropology of social movements, especially the impact that global capital provokes on peripheral Latin American societies and the ways these respond through the organizing of social movements validating alternative worldviews that coalesce around issues pertaining to indigeneity, the environment, gender, and concepts of human dignity.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3, and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior anthropology majors.

ANTH 194X - Women in Politics: A Third World Perspective (5)

Focuses cross-culturally on the status of women in the Third World and their formal and informal participation in politics. Also discussed are organized efforts, through participation in both national and autonomous movements, for women's rights.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior anthropology majors.

ANTH 194Y - Archaeologies of Space and Landscape (5)

Examines contemporary archaeological perspectives on space and landscape. Focuses on how archaeology can contribute to an appreciation of the economic, cultural, and political factors that shape human perception, use, and construction of the physical world.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3; an upper-division archaeology course; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior anthropology majors.

ANTH 194Z - Emerging Worlds (5)

Addresses encounters and contact zones between cultures that give rise to emerging worlds. Emerging worlds refers to the cultural heterogeneity and diversity created within world-making networks, geographies, innovations, and meanings, moving us beyond ideas about vanishing, autonomous cultures.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3, and satisfaction of the Entry Level Writing and Composition requirements; enrollment is restricted to senior anthropology majors.

ANTH 195A - Senior Thesis Seminar (5)

Covers the basics like the planning and organization of research; writing research proposals; the publication and presentation of scientific research results; the recapitulation of laboratory methods; and intensification of specific recent research discussions in anthropology. Prerequisite(s): courses 1 and 107, and either course 101, or course 104, or course 105. Enrollment is restricted to senior anthropology majors and by permission of the instructor. Students cannot receive credit for this course and course 295A.

ANTH 195B - Senior Thesis Research (3)

Students conduct the research projects they proposed in course 195A. Students have weekly group meetings with the research supervisor.

Prerequisite: Prerequisite(s): ANTH 195A. Enrollment is restricted to senior anthropology majors.

ANTH 195C - Senior Thesis Capstone (3)

Students finalize their research projects and write their thesis in the form of a research paper that is in publishable form so it can be submitted to a relevant journal or conference.

Prerequisite: Prerequisite(s): ANTH 195B. Enrollment is restricted to senior anthropology majors.

ANTH 195S - Senior Thesis (5)

Produce a quality research paper focusing on an anthropological topic of interest to you and that builds upon

your experience in the major. Develop effective writing strategies and research skills to assist in professional development.

Prerequisite: Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to anthropology majors. Enrollment is by permission of the instructor.

ANTH 196C - Traveling Cultures (5)

Considers why traveling cultures have posed a threat, often met with violence, to regimes of rule, particularly modern nation-states. Also explores the unique problems that conducting research with mobile communities poses for the ethnographer.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and ANTH 1, ANTH 2, and ANTH 3. Enrollment is restricted to senior anthropology majors.

ANTH 196D - Food and Medicine (5)

Examines the intersections of food, medicine, and culture with special focus on nutrition, cultural knowledge, industrial foodways, genetically modified organisms (GMOs), ethnopharmacology, food safety, and biosecurity.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and ANTH 1, ANTH 2, and ANTH 3.

ANTH 196E - Pastoralists Past and Present (5)

Senior seminar treating the history and modern situation of the world's herding peoples. Readings draw on ethnographic, historical, archaeological, and ecological literatures. Students are coached in writing a 25-page research paper on a topic related to this theme.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and ANTH 1, ANTH 2, and ANTH 3. Enrollment is restricted to senior anthropology majors.

ANTH 196F - The Anthropology of Things: Gift, Sign, Commodity, Tool (5)

Examines some approaches used by anthropologists and other thinkers to bring things into focus: as gifts, signs, commodities, and tools. Explores whether, by taking things seriously, anthropologists might learn to be empirical in new ways. Students cannot receive credit for this course and course 225.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and ANTH 1, ANTH 2, and ANTH 3. Enrollment is restricted to senior anthropology majors.

ANTH 196G - Advanced Topics in Folkloristics (5)

Examines selected topics and issues in the field of folklore: specific topics vary each quarter. For students with a demonstrated interest in folklore and/or popular culture.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and ANTH 1, ANTH 2, and ANTH 3; and a course in folklore and/or popular culture is strongly recommended. Enrollment is restricted to senior anthropology majors.

ANTH 196H - Global History and the Longue Duree (5)

Emerging anthropological approaches to global history, with an eye to historical frameworks of 500 years or more. Course requires engagement with advanced theoretical concepts and challenging historical texts. Intensive seminar format. Students cannot receive credit for this course and course 269.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and ANTH 1, ANTH 2, and ANTH 3. Enrollment is restricted to senior anthropology majors.

ANTH 196I - Hard Problems (5)

Explores interrelated, long-standing, difficult problems in human theory. Considers why these problems are so forbidding; what makes them significant; why they are hard; and whether hard problems come in different varieties or strengths.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3; and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior anthropology majors.

ANTH 196J - Imagining America (5)

Explores sites of heritage and the politics of cultural memory in the American context. Focuses on public representation and interpretation at places where multiple views of history come into conflict.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior anthropology majors.

ANTH 196K - Settler Colonialism (5)

Provides seniors in anthropology a capstone experience. Settler colonialism is an all-encompassing, land-centered project that revolves around the elimination of the Native. This course revolves around a series of ethnographies and histories about settler colonialism.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior anthropology majors.

ANTH 196L - Archaeology of the American Southwest (5)

Outlines the development of native cultures in the American Southwest from Paleo-Indian times (ca. 11,500 B.C.) through early European Contact (ca. A.D. 1600).

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3 and satisfaction of the Entry Level Writing and Composition requirements. Course 178 is strongly recommended.

Enrollment is restricted to senior anthropology and Earth sciences/Anthropology combined majors.

ANTH 196M - Modernity and its Others (5)

Examines how Western modernity has interpreted various forms of radical difference, beginning with the 15th-century conquest of the New World. Considers historical and contemporary examples of how Western thinkers have explained irrational beliefs and practices (e.g., witchcraft, human sacrifice, devil-worship).

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3; and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior anthropology majors.

ANTH 196P - Disability and Difference (5)

Challenges limiting conceptions of what it means to be human in a range of arenas, from our understandings of culture to our conceptions of built space to our assumptions about citizenship, asking why disability makes people nervous.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3; and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior Anthropology majors.

ANTH 196R - Design Anthropology (5)

Senior seminar introduces students to principles, approaches, methods, and professional dimensions of design anthropology. Emphasizes collaborative methods and development of new methods for ethnographic research, analysis, and communication. Through a quarter-long research project, students develop professional skills and portfolio materials. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment restricted to senior anthropology majors and is by permission. Students cannot receive credit for this course and course 208C.

ANTH 196T - Archaeology of Technology (5)

Examines approaches mobilized by archaeologists to reconstruct ancient technologies and to explore how technological practices are implicated in processes of social formation and change. Approaches that engage technology as embodied technique and situated cultural practice are emphasized.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3, and satisfaction of the Entry Level Writing and Composition requirement. Enrollment is restricted to senior anthropology and Earth sciences/Anthropology combined majors.

ANTH 196U - Historical Anthropology (5)

Provides seniors in anthropology a capstone experience. Involves critical engagement with archaeological, ethnohistorical, ethnographic, and oral line of evidence to evaluate the outcomes of indigenous people's interactions

with different forms of missionary, settler, and mercantile colonialism.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3, and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior anthropology and Earth sciences/Anthropology combined majors.

ANTH 196W - Anthropology of Weather and Exposure (5)

Students discuss how differing approaches to weather and exposure generate different approaches to culture, science, and politics; identify key moments in cultural anthropology's engagement with environmental and climactic questions; and delineate new areas of research.

Prerequisite: Prerequisite(s): ANTH 1, ANTH 2, and ANTH 3. Satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior Anthropology majors.

ANTH 197 - Laboratory Tutorial (5)

Independent laboratory research on selected topics in archeology and physical anthropology. Interview with appropriate instructor required.

ANTH 197F - Laboratory Tutorial (2)

Independent laboratory research on selected topics in archaeology and physical anthropology. Interview with appropriate instructor required. Enrollment restricted to anthropology majors.

ANTH 198 - Independent Field Study (5)

Off-campus field study. Students submit petition to sponsoring agency.

ANTH 198F - Ind Field Study (2)

Ind Field Study

ANTH 198G - Independent Field Study (3)

Off-campus field study. Students submit petition to sponsoring agency.

ANTH 199 - Tutorial (5)

Students submit petition to sponsoring agency.

ANTH 199F - Tutorial (2)

Tutorial

ANTH 196D - Food and Medicine

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and ANTH 1, ANTH 2, and ANTH 3.

Graduate

ANTH 200 - Theoretical Foundations of Physical

Anthropological Research (5)

Provides historical and theoretical foundation of physical anthropology. Grounds students in the changing frameworks and perspectives during the last 150 years regarding questions in human biology, evolution, nature, and culture, by examining texts and scientific journals.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 200A - Cultural Graduate Core Course (5)

Introduces history, ethnography, and theory of cultural anthropology with emphasis on awareness of construction of anthropological canon and areas of conflict within it, leading up to contemporary debates on a variety of issues. Two-term course: students must enroll in both quarters. (Formerly Core Graduate Course.)

Prerequisite: Enrollment is restricted to anthropology graduate students.

ANTH 200B - Cultural Graduate Core Course (5)

Introduces history, ethnography, and theory of cultural anthropology with emphasis on awareness of construction of anthropological canon and areas of conflict within it, leading up to contemporary debates on a variety of issues. Multiple-term course; students must enroll in both quarters to receive academic credit. (Formerly Core Graduate Course.)

Prerequisite: Enrollment is restricted to anthropology graduate students.

ANTH 201 - Human Evolution (5)

Provides an overview of the first five million years of human evolution and a framework for studying evolution and reconstructing the human past. Emphasizes that all lines of evidence must be included: hominid fossils, archaeology, paleoecology, and molecular data.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 202A - Skeletal Biology (5)

Focuses on human skeletal biology, the identification of elements, physiology of hard tissue formation, growth, and maintenance. Students are required to show competence in skeletal identification to pass this class.

Prerequisite: Prerequisite(s): ANTH 102A or permission of instructor. Enrollment is restricted to graduate students.

ANTH 208A - Ethnographic Practice (5)

Introduces graduate students to the practice of fieldwork. Students design and carry out a quarter-long research project exploring a range of methods and producing an analytical case study. Readings and discussion emphasize both methodological critique and successful implementation.

Prerequisite: Enrollment is restricted to anthropology graduate students.

ANTH 208C - Design Anthropology (5)

Introduces the principles, approaches, methods, and professional dimensions of design anthropology. Emphasis is on collaborative methods and development of new methods for ethnographic research, analysis, and communication. Through a quarter-long research project, students develop non-academic professional skills, including portfolio materials. Students cannot receive credit for this course and course 196R.

Prerequisite: Open to second-year graduate students and higher (first-year students are required to take ANTH 208A).

ANTH 210R - Religion in American Politics and Culture (5)

Introduces dominant discourses about major American religions and their role in public life with particular attention to intersecting differences, such as race, sex/gender, and disability and to shifting religious/political boundaries. Visual and textual media, political commentary, and popular ethnographies are analyzed.

Prerequisite: Enrollment restricted to graduate students.

ANTH 211 - Human Ecology (5)

Reviews environmental, physiological, behavioral, and cultural ways that humans interact with their physical surroundings. Effects of human culture on the environment, and of the environment on the shape of human culture will be emphasized.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 212 - The Human Life Cycle (5)

Examines the human life cycle using an evolutionary framework. Examines key aspects of the human life stages using findings and concepts from developmental biology, physiology, nutrition, evolutionary ecology, and life history theory. These stages include: gestation, infancy, childhood, juvenile and adolescent periods, and senescence. Each stage of the life cycle is compared and contrasted with the developmental life of nonhuman primates and mammals. Other related topics include developmental plasticity and epigenetics.

Prerequisite: Enrollment restricted to graduate students.

ANTH 214 - Culture and Power (5)

Takes the many strands of scholarship on power relations between individuals within the context of institutions and conceptualizes how individuals come to exist through power relations, and how power is fundamental to social being.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 216 - Methods in Biological Anthropology (5)

Deepens students' understanding of methods applied in biological anthropology research. (Formerly Methods in Physical Anthropology.)

Prerequisite: Enrollment is restricted to graduate students.

ANTH 219 - Religions, States, Secularities (5)

Examines theories and case studies at the intersection of religion, states, and secularity. Topics include: secularism as a political doctrine; state and social regulation of religion and religious normativity; secular cultural practices; and lines of secular/religious entanglement and conflict.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 220 - Cartographies of Culture (5)

Examines, theoretically and ethnographically, how societies and their cultures are created and reified through spatializing practices, including border-making, mapping, landscape aesthetics, globalization, time/history/memory, movement, and other locating activities.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 224 - Anthropology of Secularism (5)

Examines secularism as a practice of government with a concomitant set of ethics. Topics include: the notion of religion necessary for secularism; forms of moral and political inclusion/exclusion enacted by secular governance; and the kind of ethical subject secularism engenders. (Formerly course 255.)

Prerequisite: Enrollment is restricted to graduate students.

ANTH 225 - The Anthropology of Things: Sign, Gift, Commodity, Tool (5)

Examines some approaches used by anthropologists and other thinkers to bring things into focus: as gifts, signs, commodities, and tools. Explores whether, by taking things seriously, anthropologists might learn to be empirical in new ways. Students cannot receive credit for this course and course 196F.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 228 - Grant Writing (5)

Devoted entirely to writing grant proposals. Students either work on their graduate education fellowships or their doctoral dissertation grants or both. Reading materials consist of granting agency documents plus examples of successful applications.

Prerequisite: Enrollment is restricted to anthropology graduate students.

ANTH 229 - Constructing Regions (5)

Discusses centrality of the idea of regions in studies of culture, the history of locating social theory, and debates about area studies. Students develop area of transregional bibliographies. Primarily for second- or third-year anthropology graduate students reading area literatures.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 230 - Bodies, Images, Screens (5)

Visuality as epistemology, image-consumption, and the political and representational possibilities stemming from digitization and the World Wide Web are increasingly important issues in the humane sciences. Offers historical and critical background and the possibility of hands-on practice using visual material in current research. (Formerly Photography and Image Culture.)

Prerequisite: Enrollment is restricted to graduate students.

ANTH 231 - Intimacy and Affective Labor (5)

Examines recent work on the role of intimacy and affective labor in value production, political mobilization, and transnational capital linkages. Special attention given to how these terms are invoked to answer methodological and narrative concerns in ethnographic writing.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 232 - Bodies, Knowledge, Practice (5)

Contemporary social theory and science both focus on bodies as critical sites of inquiry and the production of knowledge. Explores these theoretical intersections and constructions of the body with new ethnographic works. Questions how race, gender, and culture are inscribed through bodily practice, imagery, and phenomenology.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 233 - Politics of Nature (5)

Advanced graduate seminar in environmental anthropology and science and technology studies, focusing on how nature is produced in the modern world and what political and practical significance this has in different contexts.

Prerequisite: Enrollment restricted to graduate students.

ANTH 234 - Feminist Anthropology (5)

Examines how feminist anthropology creates its objects of knowledge by focusing on questions of method and representation. The class reads across these traditional objects--women and gender, for example--to highlight the epistemological and political stakes of feminist work in anthropology.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 235 - Language and Culture (5)

An examination of language system and language use in relationship to cultural contexts of communication in Western and non-Western societies. Also examines the complex role which linguistic inquiry and models have played in broader theories of culture.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 238 - Advanced Topics in Cultural Anthropology (5)

Advanced topics in cultural anthropology. Current topics in anthropological theory and ethnography taught on a rotating

basis by various faculty members. Precise focus of each seminar varies and will be announced by the department.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 241 - Social Justice (5)

Explores theoretical and methodological issues in the field of social justice with an emphasis on ethnographic analysis. Topics include: rights, obligations, justice, equality, compensation, and ethics.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 243 - Cultures of Capitalism (5)

Introduction to selected themes in political economy, stressing the work of Marx. Topics include the development of capitalism, colonialism, dependency, world systems, state formation, class consciousness, commodity fetishism, the nature of late capitalism, post-modernism, and the aesthetics of mass culture. Through political economy's interlocutors, raises questions about gender, race and ethnicity, and post-structuralist critiques.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 246 - Advanced Readings in Environmental Anthropology (5)

Survey of history and topics of contemporary interest in environmental anthropology, including political ecology, environmental history, ethnoecology, and multi-species anthropology. Additional advanced readings on contemporary environmental anthropology research. Students cannot receive credit for this course and course 146.

Prerequisite: Enrollment is restricted to Anthropology graduate students or by permission of the instructor.

ANTH 247 - Critical Perspectives on Nutrition (5)

Examines emerging critiques on the science, communication, and practice of nutrition using multidisciplinary approaches. Special attention is given to the effects of modern nutrition.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 248 - Shadowy Dealings: Anthropology of Finance, Money, and Law (5)

Moves from a brief introduction to classic economic anthropology to recent work on histories of money and capitalism and cultures of financial markets, of accounting, and of legal and illegal trading practices

Prerequisite: Enrollment is restricted to graduate students.

ANTH 249 - Ecological Discourses (5)

Explores narratives of nature and their practical consequences in contests over wild places and their resources. Readings focus on the histories of forests and on analytic frameworks—ecology, social history, interpretation, cultural studies—with which to investigate competing constructions of the environment.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 252 - Survey of Cultural Anthropological Theory (5)

Major figures, ideas, and writing in 19th- and 20th-century cultural anthropology surveyed. Students cannot receive credit for this course and course 152.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 253 - Advanced Cultural Theory (5)

Examines cultural anthropology's interdisciplinary practices of knowledge formation at an advanced level. Drawing on various types of theoretical texts, the course elaborates on the relationship between culture and power, taking up different themes each time it is taught.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 254 - Medicine and Culture (5)

Surveys medicine cross-culturally, with particular focus on power, tradition, and theories of embodiment. Students cannot receive credit for this course and course 134.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 255 - Regulating Religion/Sex (5)

First examines the regulation of religion and the normalization of sex/sexuality as parallel modalities of secular rule in the production of modern citizens and subjects. Ultimately inquires into the relationship between proper religion and proper sexuality in secular state formations. (Formerly course 259.)

Prerequisite: Enrollment is restricted to graduate students.

ANTH 258 - Experimental Cultures (5)

Addresses the use of experiments in anthropological research, theory, and writing.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 259 - Race in Theory and Ethnography (5)

Explores theoretical and methodological approaches to the cross-cultural study of race, with an emphasis on historical and ethnographic analysis. Main approaches considered include Foucauldian, Gramscian, diaspora theory, and the everyday poetics and politics of race. (Formerly course 246.)

Prerequisite: Enrollment is restricted to graduate students.

ANTH 260 - Anthropology of Freedom (5)

Examines conceptualizations and practices of freedom across geographical space and historical time. Readings drawn from Greek philosophy, Islamic, Christian, and Buddhist religious traditions. Enlightenment philosophy, liberal and neo-thought, and contemporary ethnographies.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 261 - Replication, Mimesis, and Fakery (5)

Replicas, copies, and fakes anchored conceptually by the authentic/original enable the marketing of cultural commodities like arts and crafts, especially since the advent of photography. Course explores these commercial and signifying processes in the global art and culture market.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 262 - Documenting Cultures (5)

Follows the history of film and ethnography, media and methodology into the birth of cinema and anthropology in the early 20th century. Students learn theories of representation and media, conduct ethnographic research, and prepare a short film.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 263 - Kinship (5)

Provides a critical survey of debates, old and new, in the study of kinship. Readings range from classical treatments to recent reformulations that use kinship as a lens for exploring intimacy, memory, futurity, embodiment, commodification, and power. Students cannot receive credit for this course and course 163.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 269 - Global History and the Longue Duree (5)

Emerging anthropological approaches to global history. Considers both 500-year and much longer historical frameworks. For the former, the evidence of documents, both European and non-European, is particularly important. For the latter, archaeological and evolutionary approaches are essential. Students cannot receive credit for this course and course 196H.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 270 - History of Archaeology (5)

Historical review of prehistoric archaeology from antiquarianism to the present. Emphasis on the development of archaeological theory, its relation to evolutionary and anthropological theory, and themes ongoing over time. Students cannot receive credit for this course and course 170.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 270A - Archaeology Graduate Core Course: History of Archaeological Theory (5)

Historical overview of archaeology, concentrating on archaeological practice in the English-speaking world from the late 19th through the 21st Centuries. Emphasis is on development of archaeological theory in its social context; its relation to evolutionary and anthropological theory; and themes ongoing over time. Students cannot receive credit for this course and course 270.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 270B - Current Directions in Archaeological Theory (5)

Provides an in-depth understanding of current trends in archaeological thought, and enables students to place issues of archaeological interpretation into broader historical and theoretical frameworks. This course is a follow-up to course 270, but not a substitute.

Prerequisite: Prerequisite(s): ANTH 270A. Enrollment is restricted to graduate students.

ANTH 272 - Advanced Archaeological Research (5)

Introduces graduate students to archaeological research design. Topics include: middle range theory; multistage research strategies; sampling strategies and appropriate field methodology; and issues specific to particular scales of archaeological analysis (artifact, household, site, region).

Prerequisite: Enrollment is restricted to graduate students.

ANTH 273 - Origins of Farming (5)

Survey of the ecological and archaeological evidence for the origins of plant and animal domestication in Africa, Eurasia, and the Americas. Discussion will center on the preconditions of this drastic alteration in human ecology and its consequences in transforming human societies. Students cannot receive credit for this course and course 173.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 274 - Origins of Complex Societies (5)

The origins of complex society: the transition from egalitarian foraging societies to the hierarchical, economically specialized societies often referred to as states or civilizations. Focuses on both Old World and New World cultures. Students may not receive credit for this course and course 174.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 275 - Tutorial in African Archaeology (5)

Graduate tutorial on the archaeology of precolonial African kingdoms and states. Particular attention paid toward the origins of social inequality and the evolution of centralized politics. Students cannot receive credit for this course and course 175.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 276A - Advanced Topics in North American Archaeology (5)

In-depth examination of development of Native cultures in North America from end of last ice age to time of European contact. Focuses on specific regional trajectories and problems of social change.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 276B - Mesoamerican Archaeology (5)

Examines the pre-Columbian cultures of Mesoamerica and reviews the archaeological and ethnohistorical evidence

related to the origins and development of cultures including the Olmec, Maya, Zapotec, Mixtec, and Aztec. Students cannot receive credit for this course and course 176B.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 276G - Archaeology of Colonial Borderlands (5)

This seminar draws from readings in archaeology, history, and Native American/Indigenous studies to assess borderlands throughout colonial-era North America as important arenas of change and continuity for indigenous societies, including indigenous technologies, foodways, gender roles, governance, and much more.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 278 - Tutorial on Historical Archaeology (5)

Tutorial on archaeology of European colonialism and the early-modern world. Focuses on the nature of European colonial expansion in New and Old Worlds; culture contact and change; and power and resistance in colonial societies. Students cannot receive credit for this course and course 178.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 279 - Feminism and Gender in Archaeology (5)

Considers feminist perspectives on the human past; archaeologists' perspectives on feminist theory; and the impact of gender, feminist, and critical social theory on the archaeological profession. Students cannot receive credit for this course and course 194C.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 280 - Advanced Ceramic Analysis (5)

Advanced graduate seminar that focuses on techniques and theories used to bridge the gap between the recovery of ceramic remains from archaeological contexts and their interpretation with respect to various anthropological issues and problems. Students cannot receive credit for this course and course 180.

Prerequisite: Enrollment is restricted to graduate students. Concurrent enrollment in ANTH 280L is required.

ANTH 280L - Advanced Ceramic Analysis Laboratory (2)

Emphasizes advanced techniques of ceramic analysis, including materials selection and processing, hand-building, and open-pit firings. Standard techniques for describing and measuring formal and technological attributes of pottery also presented. Students cannot receive credit for this course and course 180L.

Prerequisite: Enrollment is restricted to graduate students. Concurrent enrollment in ANTH 280 is required.

ANTH 282 - Household Archaeology (5)

Explores the theoretical and methodological challenges faced by archaeologists excavating ancient households. Students examine the social, economic, and political characteristics of

households and investigate how they intersect and support the social and physical aspects of communities.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 284 - Tutorial in Zooarchaeology (5)

Lectures and seminar on archaeological faunal analysis. Topics include: mammalian evolution and osteology; vertebrate taphonomy; reconstruction of human diet from faunal remains; foraging strategy theory; data collection and management; and methods of quantitative analysis. Students cannot receive credit for this course and course 184. (Formerly *Zooarchaeological Research Design*.)

Prerequisite: Enrollment is restricted to graduate students.

ANTH 285 - Osteology of Mammals, Birds, and Fish (5)

Practicum in vertebrate osteology, covering all larger mammal species of central California, plus selected bird and fish species, and topics in evolution and ecology of selected taxa. Students cannot receive credit for this course and course 185.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 287 - Advanced Topics in Archaeology (5)

A graduate seminar on advanced theoretical or methodological topics pertinent to advanced graduate student and faculty interests.

Prerequisite: Enrollment is restricted to graduate students or by consent of instructor.

ANTH 287A - Advanced Topics: Indigenous Archaeology (5)

Traces the development of indigenous archaeology primarily in North America. Topics include: the Native American Graves Protection and Repatriation Act (NAGPRA) and issues of cultural patrimony; postcolonialism; decolonizing methodologies; community-based research; oral sources and other ways of knowing the past; and future directions.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 290T - Pedagogy of Anthropology (2)

Provides training in scientifically backed educational practices for new Anthropology TAs. Through reading, class discussion and activities, we explore different methods of teaching and ways to conceptualize pedagogy. Includes teaching theories; survey of educational tools and techniques; and lesson planning.

Prerequisite: Enrollment restricted to anthropology graduate students.

ANTH 292 - Graduate Colloquium (2)

Designed to offer an institutionalized mechanism for the presentation of research papers and teaching efforts by faculty and advanced graduate students.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 294N - Comparison of Cultures (5)

Seminar for students interested in theories and methodology of social and cultural anthropology devoted to critical discussion of different methods of comparison practiced in anthropology.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 294R - Advanced Readings in Biological Anthropology (5)

Introduces literature relevant to students' research emphases and allows for discussion of new scientific publications. (Formerly Graduate Readings in Behavioral Ecology.)

Prerequisite: Enrollment is restricted to graduate students.

ANTH 295A - Scientific Method: Biological Anthropology (5)

The first core course of the Biological Anthropology Graduate Program. Students learn the principles and methods by which research projects in biological anthropology are devised and executed. Students cannot receive credit for this course and course 195A.

Prerequisite: Enrollment is restricted to graduate students.

ANTH 297A - Independent Study (5)

Students submit petition to sponsoring agency.

ANTH 297B - Independent Study (10)

Students submit petition to sponsoring agency.

ANTH 297C - Independent Study (15)

Students submit petition to sponsoring agency.

ANTH 297F - Independent Study (2)

Students submit petition to sponsoring agency.

ANTH 298 - Advanced Laboratory Apprenticeship (5)

Supervised tutorial in specialized analytic methods in archaeology or physical anthropology. Students collaborate on laboratory research with a departmental mentor or, with advisor's consent, with researchers on or off campus, preparing a manuscript for publication or an extensive literature review. Permission of instructor required. Enrollment restricted to graduate students.

ANTH 299A - Thesis Research (5)

Students submit petition to sponsoring agency.

ANTH 299B - Thesis Research (10)

Students submit petition to sponsoring agency.

ANTH 299C - Thesis Research (15)

Students submit petition to sponsoring agency.

APLX - APPLIED LINGUISTICS

Lower-Division

APLX 80 - Introduction to Applied Linguistics (5)

Introduces the field of applied linguistics, learning about language acquisition, use, and teaching in multilingual contexts from multiple disciplinary perspectives. Also, introduces research models that examine psycholinguistic, sociolinguistic, and/or educational aspects of multilingualism.

APLX 99 - Tutorial (5)

Students submit petition to sponsoring agency.

APLX 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

APLX 101 - Second-Language Acquisition (5)

Introduces the field of second-language acquisition. Topics include contexts of acquisition, the impact of individual differences, and basic methods of data collection and analysis.

Prerequisite: Prerequisite(s): APLX 80 or LING 50.

APLX 102 - Bilingualism (5)

An overview of bilingualism. Focuses on bilingualism as an individual phenomenon (i.e., how two languages develop and are represented in the minds of individual speakers), and as a social one (i.e., how do bilinguals interact in a community and how does this context of language contact shape their linguistic identity).

Prerequisite: Prerequisite(s): APLX 80 or LING 50.

APLX 103 - Second Language Speech (5)

Examines themes related to the acquisition of L2 phonetics and phonology, including theories and models of L2 speech learning; phonetics and phonology in L2 acquisition; as well as the training effects on L2 pronunciation.

Prerequisite: Prerequisite(s): APLX 80 or LING 50.

APLX 112 - Language and Gender (5)

Examines the relationship between language and gender. Topics include: gender differences in speech; linguistic gender norms and stereotypes; gender and the construction of identity in discourse; sexuality and language; sexism in

language; social, educational, and political implications. (Formerly Languages 112.)

APLX 113 - Inter-Cultural Communication (5)

Examines intercultural communication and miscommunication between individuals and speech communities, both within North American and global contexts. Through discourse and analytic approaches, students explore cultural stereotypes and interactional expectations, among other issues, that influence the outcome of intercultural communication. (Formerly Languages 113, Cross-Cultural Communication and Miscommunication.)

Prerequisite: Enrollment is restricted to juniors and seniors.

APLX 115 - Language and Power (5)

Examines the relationship between language and power. Explores the ways in which national languages, regional and social dialects, and specific phonological morpho-syntactic, or lexical features come to be associated with particular social meanings and contribute to creating social inequality.

Prerequisite: Prerequisite(s): APLX 80. Enrollment is restricted to sophomores, juniors, and seniors.

APLX 116 - Discourse Analysis: Language Use and Context (5)

Familiarizes students with the methods and theoretical assumptions behind discourse analytic approaches to the study of language. Examines language used in specific contexts. Topics include: genres, registers; discourse organization; discourse grammar; interaction; conversation; pragmatics; and social practice.

Prerequisite: Prerequisite(s): LING 50 or by consent of the instructor. Enrollment is restricted to juniors and seniors.

APLX 122 - Linguistic Diversity & Social Justice (5)

Explores the relationship between linguistic diversity and social justice: the celebration of multilingualism on the one hand and the negative experiences of people who speak "minority" languages in "dominant" cultural contexts on the other.

Prerequisite: Prerequisite(s): APLX 80; enrollment restricted to applied linguistics and multiculturalism, language studies, and linguistics majors.

APLX 135 - Second Language Teaching (5)

Introduces the theories of second-language acquisition and their connection to second-language teaching. Students develop cutting-edge teaching and testing materials, and engage with current scholarship on language instruction. Prerequisite(s): at least one year of college-level study of a foreign language, or its equivalent. Enrollment restricted to juniors and seniors, and by permission of instructor. Students cannot receive credit for this course and course 235.

APLX 136 - Second Language Assessment (5)

Introduces the fundamentals of second-language testing by presenting theories, key concepts, and practical applications in language assessment. Throughout the course, students develop their own assessment portfolios, creating materials they can use in their post-BA career.

Prerequisite: Prerequisite(s): APLX 135 or by permission of the instructor..

APLX 190 - Research Seminar in Applied Linguistics (5)

Prepares students to conduct research in applied linguistics. Students evaluate published studies that represent both quantitative and qualitative methods.

Prerequisite: Prerequisite(s): APLX 80 and APLX 101; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to seniors.

APLX 199 - Tutorial (5)

Students submit petition to sponsoring agency.

APLX 199F - Tutorial (2)

Students submit petition to sponsoring agency.

Graduate

APLX 235 - Second Language Teaching (5)

Helps novice instructors learn about the theory and practice of language teaching and learning. Focuses on current methods used in communicatively oriented classrooms. Topics include: listening comprehension, grammar, vocabulary, reading, writing, and testing/assessment. Students cannot receive credit for this course and course 135. (Formerly Language Studies 201.)

Prerequisite: Enrollment is restricted to graduate students.

ARBC - ARABIC

Lower-Division

ARBC 1 - First-Year Arabic (5)

Introduction to Arabic language and Arabic-speaking culture with practice in all four language skills: listening, speaking, reading, and writing. Intended for students with no previous study of Arabic as well as heritage speakers.

ART - ART

Lower-Division

ART 10D - 2D Foundation (5)

Introduces students to the fundamental principles of two-dimensional art and design and focuses on analyzing the concepts of line, color shape, value, space, form, unity, balance, scale, proportion, texture, and emphasis to be used to express complex ideas. This course is a hybrid studio/lecture. Students are billed for a materials fee.

ART 10E - 3D Foundation (5)

Introduces students to the fundamental principles of three-dimensional art and design through basic concepts, techniques, and technical practice. Focuses on three-dimensional art and the design fundamentals of sculpture, public art, architecture, and the industrial-design process and production. This course is a hybrid studio/lecture. Students are billed for a materials fee.

ART 10F - 4D Foundation (5)

Introduces students to the fundamental principles of four-dimensional/time-based art and design through basic concepts, techniques, and technical practices. Computers and video, photo, sound, and lighting equipment are used to create short-form, time-based work. This course is a hybrid studio/lecture.

ART 15 - Introduction to Drawing for the Major (5)

Introduction to the methods, materials, and purposes of drawing to develop perceptual and conceptual skills through a series of assignments, providing various approaches to drawing as a tool for creative exploration. Discussions and critiques facilitate the development of critical skills. Designed for students considering the art major. Students are billed a materials fee. (Formerly course 20.)

ART 20G - Introduction to Print Media and Drawing (5)

Introduces the methods, materials, and history of printmaking and drawing as a tool for creative exploration. Understanding and development of concepts and skills are achieved through a series of lectures, studio demonstrations and practice, assignments, and critiques. Students are billed for a materials fee.

Prerequisite: Prerequisite(s): two courses from ART 10D, ART 10E, ART 10F. Enrollment is restricted to proposed art and art majors.

ART 20H - Introduction to Sculpture and Public Art (5)

Introduces sculpture and art in public space. The course is composed of lectures, readings, discussions, studio assignments, and demonstrations. Students are billed for a materials fee.

Prerequisite: Prerequisite(s): two courses from ART 10D, ART 10E, ART 10F. Enrollment is restricted to proposed art and art majors.

ART 20I - Introduction to Photography (5)

Introduces basic skills and conceptual development in photography and related digital media through image-making in the field, on the web, and in laboratories, through readings, discussions, and critiques. Students are billed for a materials fee.

Prerequisite: Prerequisite(s): two courses from ART 10D, ART 10E, ART 10F. Enrollment is restricted to proposed art and art majors.

ART 20J - Introduction to Drawing and Painting (5)

Introduces the material practices of painting in combination with the formal vocabulary of the visual arts. A discussion of values, form, color, and figure/ground relationships enters into each class. Students are billed for a materials fee.

Prerequisite: Prerequisite(s): two courses from ART 10D, ART 10E, ART 10F. Enrollment is restricted to proposed art and art majors.

ART 20K - Introduction to New Media and Digital Artmaking (5)

Introduces digital and new media art practice. Explores the use of the computer as tool and medium. Provides a hands-on introduction to the fundamentals of graphics; digital-image acquisition and manipulation; video; web design; and computer programming. Lectures, readings, and discussions examine the history of technology artwork and technology's relationship to contemporary culture. Students are billed for a materials fee.

Prerequisite: Prerequisite(s): two courses from ART 10D, ART 10E, ART 10F. Enrollment is restricted to proposed art and art majors.

ART 20L - Introduction to Drawing (5)

Drawing course using traditional media taught online through demonstration videos, digital submissions, and small-group critiques. Introduces the basics of observational drawing in a progression designed to develop and build skills in sighting, measuring, value, and rendering. Familiarity with Canvas, access to a digital camera, and purchase of art supplies are required. Assumes 30 hours per week of coursework.

Prerequisite: Prerequisite(s): two courses from ART 10D, ART 10E, ART 10F. Enrollment is restricted to proposed art and art majors.

ART 26 - Introduction to Printmaking (5)

Survey of print medium: basic terminology, techniques, application of tools, materials, and condensed history of development of printmaking. Assignments consist of individual and collaborative projects aimed at building skills and gathering technical experience. Introduction to relief printing (black and white and color), intaglio, letterpress, and

interface between photography/computer and the handmade print. Exploration of print media for communication of issues including formal aesthetics, social/psychological and personal narrative. Students are billed a materials fee.

ART 80B - Environmental Art (5)

Examines ways artists engage, interact, and comment upon ecology and nature in their artworks by examining environmental art from the 1960s through the present.

ART 80D - Fundamentals of Photography (5)

Introductory course for beginners. Various techniques examined and assigned in specific exercises. Work on projects using color film; this is a non-darkroom course. Examples given of photography from 1826 to the present. Balances historical study and practice through assigned homework exercises. Students must provide their own camera, preferably one with a manual setting. No phone cameras allowed. Students are billed a materials fee. (Formerly Introduction to Photography.)

ART 80E - Environmental Art in the Expanded Field (5)

Examines the ways artists engage, interact, and comment upon ecology and nature in their artworks by examining environmental art from the 1960s through the present. Offers students a foundational introduction to art and artists working in the field of environmental and ecological art/activism.

ART 80F - Introduction to Issues in Digital Media (5)

Digital media was positioned as a radical new social and creative medium in the 1980s and 1990s. The ensuing decades have seen this area become ubiquitous mass media with structural inequalities, centralized ownership, environmental damage, and precarious labor conditions. At the same time, it has become the language of our time and remains a site of creativity and intervention and offers opportunities for social changes. This course provides an introduction to key issues in this area through the lens of race and ethnicity.

ART 80T - Digital Tools for Contemporary Art Practice (5)

Introduces the digital tools and mediums available to contemporary art practices. Tools are explored from a historical and theoretical context and from a technical perspective through hands-on tutorials. A variety of artworks that use digital mediums are also examined. Covers photo and vector editors, sound and video editing, basic 3D modeling, and images and interactions generated by code. Students should have basic computer literacy.

ART 80X - Ars Erotica: Sexual Imagery in Culture and Art (5)

What is sexually explicit imagery all about? Is it art, porn, trash, political hot potato, or hot commodity? This course enables students to critically explore these questions and more in an academic setting.

ART 99 - Tutorial (5)

Students submit petition to sponsoring agency.

Upper-Division

ART 101 - Introduction to Computer Programming for the Arts (5)

Combines an introduction to computer programming for beginners with special topics that are essential for the digital arts. Basic concepts of programming are developed in the JavaScript language and applied to digital arts media, such as algorithmically generated still images and animations in two and three dimensions, sound art, and music composition. Presentation of digital artwork in the theater and via the web are covered in detail.

ART 102 - Interactive Arts (5)

Physical computing examines bodily sound, movement, and other physical phenomena as an interface to a computer or microcomputer. Students investigate electronics and devices for use in interactive art-making to create sculptural or installation-based projects. Students receive hands-on experience working with sensors, motors, switches, gears, lights, circuits, and hardware store devices to create kinetic and interactive works of art, programming and interface design. Students are billed a materials fee.

Prerequisite: Prerequisite(s): Three courses from: ART 15, ART 20G, ART 20H, ART 20I, ART 20J, ART 20K, ART 20L, ART 26; or by permission of instructor. Enrollment is restricted to art majors.

ART 103 - Interactive Art: Object, Interface, Robotics (5)

Examines computer interactivity and interface in art making through theory and practice. Students develop interactive installation and sculptural works of art. Assignments may include the acquisition and creation of digital images, two-dimensional animation, programming with MAX/MSP/Jitter, basic electronics and sensors, and digital video and audio. Discussions, readings, and critiques address content, aesthetics, concepts, and expression as well as a practical grasp of relevant software. Students are encouraged to develop research projects and explore experimental practices. Students are billed a materials fee.

Prerequisite: Prerequisite(s): Three courses from: ART 15, ART 20G, ART 20H, ART 20I, ART 20J, ART ART 20K, ART 20L, ART 26 or by permission of instructor. Enrollment is restricted to art majors.

ART 104 - Digital Video (5)

An exploration of the video medium including production using the digital video format. Digital video cameras will be used to produce digital source material to be manipulated in a non-linear digital editing system. Image manipulation, effects, and editing will be explored. A variety of video structures, theories, concepts, and forms will be examined through production, discussions, and viewing students' and artists' work.

Prerequisite: Prerequisite(s): Three courses from: ART 15, ART 20G, ART 20H, ART 20I, ART 20J, ART ART 20K,

ART 20L, ART 26 or by permission of instructor. Enrollment is restricted to art majors.

ART 106A - 2D Animation (5)

Introduces animation techniques, practices, history, and theories. Students learn techniques and process in 2D, stop-motion, and digital animation. Projects teach students the workflow of animating including script development, storyboarding, frame-by-frame animation, animatic, digital, and post-production. Students are required to research artists, both historical and contemporary, working in the field of animation and to be able to discuss the work. The course teaches theoretical and historical perspectives on animation and requires students to develop a critical analysis and vocabulary. (Formerly Introduction to 2D Animation).

Prerequisite: Prerequisite(s): Three courses from: ART 15, ART 20G, ART 20H, ART 20I, ART 20J, ART 20K, ART 20L, ART 26. Enrollment is restricted to art majors.

ART 106C - Stop Motion Animation (5)

Introduction to imagining, producing, and creating stop motion animations. Includes hands-on work in storyboarding, drawing and paper-based animation, pixalization, animation of everyday objects, and Claymation with basic characters and sets. Historical and contemporary animations will be viewed in class to inspire animation ideas, aesthetics, and practices. Students are billed a materials fee. (Formerly Introduction to Stop Motion Animation.)

Prerequisite: Prerequisite(s): Three courses from: ART 15, ART 20G, ART 20H, ART 20I, ART 20J, ART 20K, ART 20L, ART 26; or by permission of instructor. Enrollment is restricted to art majors.

ART 106E - 3D Modeling and Animation (5)

Independent and collaborative creative projects using advanced computer methods. May include networking projects, virtual representations, interactive multimedia, installation, performance, 3D modeling and animation, or robotics. Emphasis on advanced critical and experimental approaches to computers as a unique art medium, and contemporary research issues. Students are required to enroll in scheduled lab section. Students are billed for a materials fee. (Formerly Introduction to 3D Modeling and Animation.)

Prerequisite: Prerequisite(s): Three courses from: ART 15, ART 20G, ART 20H, ART 20I, ART 20J, ART ART 20K, ART 20L, ART 26; or by permission of instructor. Enrollment is restricted to art majors.

ART 106O - 2D Animation (5)

This project-centered studio course introduces 2D animation concepts, history, techniques and contemporary practices, production strategies, processes, and tools from a practical approach rooted in a historical/theoretical context. During each project's development, students research artists working within relevant categories and/or topics of animation, presenting findings to assist in their creative process.

ART 108 - New Media and Social Practice Artmaking (5)

Provides students with firsthand experience developing new media artworks in relationship to the needs of specific communities and social struggles. Students develop content using new media practices, tools, systems, and strategies. The final artwork can utilize video, film, digital media, social networks, and app development, among other new media art forms. Students are billed for a materials fee.

Prerequisite: Prerequisite(s): Three courses from: ART 15, ART 20G, ART 20H, ART 20I, ART 20J, ART 20K, ART 20L, ART 26; or by permission of instructor. Enrollment is restricted to art majors.

ART 110 - Intermediate/Advanced Drawing (5)

Work moves toward individual directions in drawing. A variety of media are explored. Each student is expected to do 150 hours of drawing over the quarter. Students are billed a materials fee.

Prerequisite: Prerequisite(s): One course from ART 15, ART 20G, ART 20J, ART 20L, ART 111, ART 112, ART 119; and two from ART 20H, ART 20I, ART 20K, ART 26; or by permission of instructor. Enrollment is restricted to art majors.

ART 111 - Figure Drawing (5)

Focuses on drawing from the human figure and exploring the figure for the purpose of personal expression and social communication. Intended for the intermediate/advanced drawing student. Students are billed a materials fee.

Prerequisite: Prerequisite(s): One course from ART 15, ART 20G, ART 20J, ART 20L, ART 110, ART 111, ART 112, ART 119; and two from ART 20H, ART 20I, ART 20K, ART 26; or by permission of instructor. Enrollment is restricted to art majors.

ART 112 - Mixed Media Works on Paper (5)

This course stresses alternative drawing processes, techniques, and materials. Intended for the intermediate or advanced student. Students are billed a materials fee.

Prerequisite: Prerequisite(s): One course from ART 15, ART 20G, ART 20J, ART 20L, ART 110, ART 111, ART 119; and two from ART 20H, ART 20I, ART 20K, ART 26; or by permission of instructor. Enrollment is restricted to art majors.

ART 113 - Illustrating Stories: Fantasy and Documentary Narratives (5)

This drawing/painting class is taught using New Yorker magazine covers as examples of illustration at a level of excellence that is accessible and which are examined for content and formal qualities. Work is done in drawing and painting media; some digital and mixed media may be incorporated. Painting will be water-based. Wit, humor, restraint, and sophistication are discussed, as well as inclusivity, exclusivity, and explicit and implicit social issues.

ART 119 - Special Topics in Drawing (5)

Special topics in drawing as announced. Students are billed a materials fee.

Prerequisite: Prerequisite(s): One course from ART 15, ART 20G, ART 20J, ART 20L, ART 110, ART 111, ART 112; and two from ART 20H, ART 20I, ART 20K, ART 26; or by permission of instructor. Enrollment is restricted to art majors.

ART 120 - Intermedia (5)

Explorations of the role of an artist as someone who integrates a variety of media to explore conscious subject matter. Emphasis on contemporary art forms that incorporate scores, mapping, found objects, time-based elements, and interactivity. Students are billed a materials fee. (Formerly Introduction to Intermedia.)

Prerequisite: Prerequisite(s): One course from Art 20H, ART 121, ART 122, ART 124, ART 125, ART 129, ART 172, ART 180B, ART 183, ART 188, ART 189; and two non-sculpture/intermedia/ public art lower-division studios from ART 15, ART 20G, ART 20I, ART 20J, ART 20K, ART 20L, ART 26. Restricted to art majors.

ART 121 - Intermedia II (5)

Investigation in combining media, materials, and forms to explore a variety of contemporary art practices. Students develop their projects thematically throughout the quarter. Assignments encourage experimentation with time and motion, text and images, collaboration, installation, performance, and interactivity. Discussions, reading handouts, and critiques further the development of perceptual and conceptual skills. Skill workshops introduce new techniques. Students are billed a materials fee.

Prerequisite: Prerequisite(s): ART120. Enrollment is restricted to art majors.

ART 122 - Intermedia: Conceptual and Process-Oriented Approaches (5)

Special subjects to be offered by regular staff or visiting artists as announced. Students are billed a materials fee.

Prerequisite: Prerequisite(s): One course from ART 20H, ART 120, ART 121, ART 124, ART 125, ART 129, ART 172, ART 180B, ART 183, ART 188, ART 189; and two non-sculpture/intermedia/ public art lower-division studios from ART 15, ART 20G, ART 20I, ART 20J, ART 20K, ART 20L, ART 26. Enrollment is restricted to art majors.

ART 124 - Material Metaphor: Creating Meaning in Form (5)

Workshops introduce further investigation of materials and techniques. Students explore diverse methods of visual communication through a series of projects that require individual research and collaborative efforts. Students are encouraged to develop projects according to their motivation, expertise, and self-assessment. Emphasis placed on contemporary studio practices of installation, students will integrate a variety of materials and metaphor within the

architectural and environmental space. Students are billed a materials fee.

Prerequisite: Prerequisite(s): One course from ART 20H, ART 120, ART 121, ART 122, ART 125, ART 129, ART 172, ART 180B, ART 183, ART 188, ART 189; and two non-sculpture/intermedia/ public art lower-division studios from ART 15, ART 20G, ART 20I, ART 20J, ART 20K, ART 20L, ART 26. Enrollment is restricted to art majors.

ART 125 - Environmental Art Studio (5)

Introduces students to environmental art and design through basic concepts, techniques, and studio practice. Students are billed for a materials fee.

Prerequisite: Enrollment is restricted to juniors and seniors.

ART 127 - Architectural Design (5)

Introduction to the fundamentals of architectural design. To convey their concepts clearly, students are introduced to visual representation techniques, including orthographic projections and paraline drawing. Students are also introduced to representation techniques of abstraction and perception, including diagramming and mapping. Students are billed a materials fee.

Prerequisite: Prerequisite(s): One course from ART 20H, ART 120, ART 121, ART 122, ART 124, ART 125, ART 129, ART 172, ART 180B, ART 183, ART 188, ART 189; and two non-sculpture/intermedia/ public art lower-division studios from ART 15, ART 20G, ART 20I, ART 20J, ART 20K, ART 20L, ART 26. Restricted to art majors.

ART 128 - Picturing Identity: Document and Culture (5)

Studio addresses issues of race, gender, culture, personal identity, and visual representation. Examines ways ideas of identity are given visual form and communicated in fine arts and mass media. Students research ways traditionally underrepresented groups in society have been and are being represented in mass media; they then visually interpret that information in forms of visual artifacts. This process and interpretation serve as springboard to examination of expanded ideas of identity, including personal and/or family culture and history, gender, and ethnicity. Encourages use of broad range of mediums available to construct visual representations of identity. Students are billed a materials fee.

Prerequisite: Prerequisite(s): Three courses from: ART 15, ART 20G, ART 20H, ART 20I, ART 20J, ART 20K, ART 20L, ART 26. Enrollment is restricted to art majors.

ART 129 - Special Topics in Intermedia (5)

Exploring interactive strategies for making art. Projects experiment with combining forms and mediums to engage an audience. Students are billed a materials fee.

Prerequisite: Prerequisite(s): One course from ART 20H, ART 120, ART 121, ART 122, ART 124, ART 125, ART 172, ART 180B, ART 183, ART 188, ART 189; and two non-sculpture/intermedia/ public art lower-division studios from

ART 15, ART 20G, ART 20I, ART 20J, ART 20K, ART 20L, ART 26. Restricted to art majors.

ART 130 - Intermediate/Advanced Painting (5)

Continuation of the development of a basic foundation in painting with emphasis on the development of individual, experimental procedures. A foundation in drawing is recommended. Students are billed a materials fee.

Prerequisite: Prerequisite(s): One from ART 20J, ART 133, ART 137, ART 138, ART 139; and two non-painting lower-division studios from ART 15, ART 20G, ART 20H, ART 20I, ART 20K, ART 20L, ART 26. A foundation in drawing is recommended. Enrollment is restricted to art majors.

ART 132 - Figure Painting (5)

Students learn the classical practice of painting the nude figure from life using traditional oil painting techniques. Students study short poses, limited color, and graduate to long pose, full color. Students are billed a materials fee. (Formerly course 102A.)

ART 133 - Abstract Painting (5)

Exploration of abstract painting through studio work, lectures, and critiques with emphasis on progressive abstraction, minimalism, op art, and abstract expressionism as well as other 20th-century and 21st-century forms. A foundation in drawing is recommended. Students are billed a materials fee.

Prerequisite: Prerequisite(s): One from ART 20J, ART 20L, ART 130, ART 137, ART 138, ART 139; and two non-painting lower-division studios from ART 15, ART 20G, ART 20H, ART 20I, ART 20K, ART 26. Enrollment is restricted to art majors.

ART 137 - Outdoor Painter's Project (5)

Explores contemporary landscape through the practice of plein air painting. Observational plein air painting will provide the foundation for the class. Instruction includes technical instruction in materials and technique as well as conceptual material. Student may work with oils, alkyds, or acrylic on panels, paper, or canvas.

Prerequisite: Prerequisite(s): One from ART 20J, ART 130, ART 133, ART 138, ART 139; and two non-painting lower-division studios from ART 15, ART 20G, ART 20H, ART 20I, ART 20K, ART 20L, ART 26. Enrollment is restricted to art majors.

ART 138 - Facture and Meaning (5)

Explores the materials and history of painting through lectures, demonstrations, and practice in oils, egg tempera, distemper, and Flashe paint. Students participate in group practices and also work independently on projects designed by them in consultation with the instructor. A foundation in drawing is recommended. Students are billed for a materials fee.

Prerequisite: Prerequisite(s): One from ART 20J, ART 130, ART 133, ART 137, ART 139; and two non-painting lower-

division studios from ART 15, ART 20G, ART 20H, ART 20I, ART 20K, ART 20L, ART 26. Enrollment is restricted to art majors.

ART 139 - Special Topics in Painting (5)

Special studies in painting as announced. A foundation in drawing is recommended. Students are billed a materials fee.

Prerequisite: Prerequisite(s): One from ART 20J, ART 130, ART 133, ART 137, ART 138; and two non-painting lower-division studios from ART 15, ART 20G, ART 20H, ART 20I, ART 20K, ART 20L, ART 26. Enrollment is restricted to art majors.

ART 150 - Darkroom Practices (5)

Students concentrate on darkroom practices and explore visual ideas, directing their work toward individualized goals. Required work includes making photographic prints, reading historical and theoretical works, and examination of photographs. Students are billed a materials fee.

Prerequisite: Prerequisite(s): ART 20I and two non-photography lower-division art studios from ART 15, ART 20G, ART 20H, ART 20J, ART 20K, ART 20L, ART 26. Enrollment is restricted to art majors.

ART 152C - View Camera Photography (5)

Explores the processes, materials, and techniques of large-format photography. Students learn the concepts and theories related to the view camera. Emphasizes advanced understanding of negative exposure, sheet-film processing, tonal-range manipulation, digital scanning, and large-format output. Contemporary issues and concepts explored.

ART 153 - Still to Moving: Topics in Cinematography for Artists (5)

The natural evolution from still image making to motion picture image making is at the heart of this course as students look at this evolution from a historical, social, conceptual, and technical perspective. Artists who have been primarily working in still photography will learn to transition to visual storytelling through the lens of cinematography by addressing the technical requirements necessary to create motion pictures. Advanced discussions on film and digital formats, quality and quantity of light, exposure, composition, movement, camera support systems, and coverage for post-production will be explored through a combination of screenings, assignments, and readings. Students are billed a materials fee.

Prerequisite: Prerequisite(s): ART 20I; and two courses from ART 15, ART 20G, ART 20H, ART 20J, ART 20K, ART 20L, ART 26. Plus one course from ART 150 or ART 156. Enrollment is restricted to art majors.

ART 154A - Being Social: Photography & Engagement (5)

Explores historical and contemporary ways in which photography has been used to examine social issues and invites students to produce work that responds to issues that are important to them. We will learn about photographer's

historical significance in raising social awareness, analyzing the aesthetic and methodological strategies of modern and contemporary photographers seeking to catalyze economic, political and cultural change through the production of images. Students are billed a materials fee.

Prerequisite: Prerequisite(s): ART 20I and ART 156; and two courses from ART 15, ART 20G, ART 20H, ART 20J, ART 20K, ART 20L, ART 26. Enrollment is restricted to art majors.

ART 155 - Photo Field Research Quarter (PFRQ): California Road Trip (10)

Offers students the unique opportunity to live and learn and photograph outside the classroom, actively engaging locations across the state of California. Students will cover 2400 miles from Northern Mendocino County to the Salton Sea, Eastern Sierra, Death Valley, and Big Sur. Class exposes students to cultural, historical, and environmental issues facing California. Due to the rigor of the course, students must submit an application demonstrating the commitment and photo preparation necessary for successful completion of the class. Students are billed a materials fee.

ART 156 - Project Development in Photography (5)

Concentrates on photographic project development, developing analytical skills designed to help direct students' own photographic ideas. Helps students create a conceptual theoretical framework through image-making in the field and studio, through critique and discussion, through readings, and by studying the work of artists. Students are billed a materials fee.

Prerequisite: Prerequisite(s): One course from ART 20I; and two non-photography lower-division art studios from ART 15, ART 20G, ART 20H, ART 20J, ART 20K, ART 20L, ART 26. Enrollment is restricted to art majors.

ART 158 - Advanced Photography (5)

Students produce a portfolio of photographs, read historical and theoretical works, and study photographs and other art works. Students are billed a materials fee.

Prerequisite: Prerequisite(s): ART 156; and one course from ART 150, ART 151, or ART 159. Enrollment is restricted to art majors.

ART 159 - Special Topics in Photography (5)

Special studies in photography, concentrating on specific subject matter or media. Topics may include documentary photography, landscape, alternative processes, or mixed media. Students are billed a materials fee.

Prerequisite: Prerequisite(s): ART 150 or ART 156. Enrollment is restricted to art majors.

ART 160B - Mono/Mixed Media Printmaking (5)

Introduces the contemporary monotype, monoprint, and mixed media print processes facilitating a crossover between painting, drawing, and printmaking. Through lectures,

demonstrations, and discussions on topics and class assignments, students will expand their creative possibilities in this exciting medium. Students are billed a materials fee.

Prerequisite: Prerequisites: ART 20G or ART 26 and two non-print lower-division media studios from ART 15, ART 20H, ART 20I, ART 20J, ART 20K, ART 20L. Enrollment is restricted to art majors.

ART 161B - Relief/Mixed Media Printmaking (5)

Explores traditional, contemporary, and experimental processes, issues, and concepts of relief and mono/mixed media printmaking. Students gain in-depth information and working knowledge to specialize individual ideas and build artistic development through varieties of class activities.

Prerequisite: Prerequisites: ART 20G or ART 26 and two non-print lower-division media studios from ART 15, ART 20H, ART 20I, ART 20J, ART 20K, ART 20L. Enrollment is restricted to art majors.

ART 161C - Tradition and Innovation: Relief Printmaking in Korea (5)

Explores the history of printing from the world's oldest printed text developed in Korea to the latest cutting-edge technology, including laser cutting. Students study many aspects of both traditional and contemporary relief (woodblock) printmaking, both materials, tools, and techniques and the issues, concepts and history of the field. Through various class activities, field trips and cultural visits (to UNESCO World Heritage Sites) in Korea, students will be exposed to diverse and multi-regional art practices that will broaden their perspectives and increase their understanding not only in the fields of print media but in the larger contemporary visual culture.

ART 162A - Intaglio I (5)

Introduces students to various methods used in making intaglio prints. Encourages individual artistic growth of imagery and technique through assignments designed to explore the medium. Includes discussion and critique of work with equal emphasis on technique and concept. Students are billed a materials fee.

Prerequisite: Prerequisites: ART 20G or ART 26 and two non-print lower-division media studios from ART 15, ART 20H, ART 20I, ART 20J, ART 20K, ART 20L. Enrollment is restricted to art majors.

ART 162B - Intaglio II (5)

This presentation of advanced intaglio techniques emphasizes a variety of multi-plate color printing and photo etching processes. The course concentrates on individual development in style and concept through the intaglio process. Students are billed a materials fee.

Prerequisite: Prerequisite(s): ART 162A. Enrollment is restricted to art majors.

ART 163A - Lithography I (5)

Introduction to drawing, processing, and printing of lithographs from stone. Emphasis on discovery of tonal, textural, and expressive potential from the surface of the stone, while establishing individual directions in imagery. Condensed history of the medium, technical theory, and critique in lecture and demonstrations. Students are billed a materials fee.

Prerequisite: Prerequisites: ART 20G or ART 26 and two non-print lower-division media studios from ART 15, ART 20H, ART 20I, ART 20J, ART 20K, ART 20L. Enrollment is restricted to art majors.

ART 163B - Lithography II (5)

Continuation of course 163A. Introduction of tusche wash, aluminum plates, transfers, photo-lithography (computer interface), and multiple color techniques. Emphasis on experimentation, refinement of craft and approach, defining individual imagery, and expanding scale. Further investigation of the history of the medium and contemporary practice. Students are billed a materials fee.

Prerequisite: Prerequisite(s): ART 163A. Enrollment is restricted to art majors.

ART 163C - Magnified Imagination: A Printmaking Approach (5)

Examines the wonders of visual magnification of the natural world by using enlargement lenses, scanner, and microscopes to create photo-based and autographic prints that enhance strange and unperceived realities. Visits to the UCSC Norris Center for Natural History, Thimann's Roof Garden and Greenhouse will provide opportunities to explore natural world specimens for projects. Students are billed a materials fee.

Prerequisite: Prerequisite(s): ART 20G and two courses from ART 15, ART 20H, ART 20I, ART 20J, ART 20K, ART 20L, ART 26. Enrollment restricted to art majors.

ART 164A - Screenprinting (5)

Introduces water-based screen printing. Students are introduced to processes including basic equipment, printing techniques, printing papers, stenciling processes, and photographic and digital techniques. Emphasis is on continued development of content and aesthetic awareness through the possibilities of screen printing. Students are billed a materials fee.

Prerequisite: Prerequisites: ART 20G or ART 26 and two non-print lower-division media studios from ART 15, ART 20H, ART 20I, ART 20J, ART 20K, ART 20L. Enrollment is restricted to art majors.

ART 164S - Serigraphy in Spain (5)

Introduces water-based screen printing processes including basic equipment, printing techniques, printing papers, stenciling processes, and photographic and digital techniques. Emphasis is on continued development of content and

aesthetic awareness through the possibilities of screen printing.

ART 165 - Print Media in Visual Communication (5)

Explores a unique approach reviewing the printed images in visual communications. A wide blend of traditional and cutting-edge print media processes with an interdisciplinary focus will be taught for conceptualizing, producing, and presenting the printed image. Students are billed a materials fee.

Prerequisite: Prerequisite(s): one course from ART 160B, ART 161B, ART 161C, ART 162A, ART 162B, ART 163A, ART 163B, ART 163C, ART 164A, ART 164S, ART 168, ART 169. Enrollment is restricted to art majors.

ART 166 - Art of Bookmaking (5)

Introduction to production of small edition books and multiples utilizing sequential visual imaging, narrative content, and mixed media in bookmaking. Provides instruction in conceptualizing, producing, and distributing printed artists' multiples. Ideas encouraged within a broad range of possibilities via the format of artists' books. Students are billed a materials fee.

Prerequisite: Prerequisite(s): Three courses from: ART 15, ART 20G, ART 20H, ART 20I, ART 20J, ART 20K, ART 20L, ART 26 or by permission of instructor. Enrollment is restricted to art majors.

ART 168 - Photo-Based Printmaking (5)

Intermediate/advanced studio course exploring the processes, history, and the recent developments in contemporary photomechanical printmaking. Through experimentation and research students learn how to utilize photographic imagery, blending them in multiple layers and colors, thereby facilitating articulation of their conceptual foundations. Students are billed a materials fee.

Prerequisite: Prerequisite(s): Three courses from the following: ART 15, ART 20G, ART 20H, ART 20I, ART 20K, ART 20L, ART 26. Enrollment is restricted to art majors.

ART 169 - Special Topics in Printmaking (5)

Special studies in printmaking, as announced. Students are billed for a materials fee.

Prerequisite: Prerequisites: ART 20G or ART 26 and two non-print lower-division media studios from ART 15, ART 20H, ART 20I, ART 20J, ART 20K, ART 20L. Enrollment is restricted to art majors.

ART 172 - Public Art: Memory, Landscape, and Artist as Activist (5)

In-depth exploration of art in the public sphere. Students build an understanding of public art sparked by practical experience designing and developing projects. Theoretical aspects of contemporary public art, and an introduction to the range of current public art practices will be introduced through

readings, lectures, and artist's talks. The combination of practical hands-on technique and theoretical ideology will enable students to fully develop their own project within the class. Students are billed a materials fee.

Prerequisite: Enrollment is restricted to juniors and seniors.

ART 175 - Taking Art to the Streets (5)

Expands traditional definitions of art making taking art beyond the museum. Students take art making to the streets. We explore art making in the public sphere from murals to graffiti, street art to shop dropping, protests to public commissioned projects and community engaged interventions.

Prerequisite: Prerequisite(s): Three courses from ART 15, ART 20G, ART 20H, ART 20I, ART 20J, ART 20K, ART 20L, ART 26, or by consent of instructor. Enrollment restricted to art majors.

ART 180B - Sculpture II (5)

More advanced fabrication techniques in sculpture using wood, metal, industrial, and other materials. Techniques include carpentry and woodshop skills, and an introduction to sculptural forms, processes, and ideas. Demonstrations, slide lectures, and critical discussion of work help develop technical and conceptual skills. Students are billed a materials fee.

Prerequisite: Prerequisite(s): One course from ART 20H, ART 120, ART 121, ART 122, ART 124, ART 125, ART 129, ART 172, ART 183, ART 188, or ART 189; and two non-sculpture/intermedia/public art lower-division studios from ART 15, ART 20G, ART 20I, ART 20J, ART 20K, ART 20L, ART 26. Enrollment is restricted to art majors.

ART 181 - Art, Power & Politics (5)

Explores strategies artists use to engage political subject matter in the 21st century. Students create their own projects, research and test approaches, techniques and strategies learning from the ways national and international artists encode and convey information in creating political work. Methods range from community collaboration; to tactical culture jamming, participatory collaborative projects, activism and intervention, symbolic and gestural work, artist-led projects, performances and community projects. Students are billed a materials fee.

Prerequisite: Prerequisite(s): three courses from: ART 15, ART 20G, ART 20H, ART 20I, ART 20J, ART 20K, ART 20L, ART 26. Enrollment is restricted to art majors.

ART 182 - Materiality of Color (5)

A research-based, studio art class in which students experiment with ideas and processes, and pursue projects exploring the materiality of color, including social and cultural effects and environmental implications. Following a sequence of short assignments paired with class critiques, students design and complete their own research-based art projects (in any media) that investigate color as a material phenomenon. Class discussions address physical, perceptual, psychological, geological, biological, cultural, social,

political, philosophical and aesthetic aspects of color in concert with readings, guest lectures, field trips, technical demonstrations and visual presentations. Students harvest, make, and use dyes from plant materials grown at the UCSC Farm, and contribute to the ongoing development of a dye garden on campus. Students are billed for a materials fee.

Prerequisite: Prerequisite(s): Three courses from: ART 15, ART 20G, ART 20H, ART 20I, ART 20J, ART 20K, ART 20L, ART 26. Enrollment is restricted to art majors.

ART 183 - Metal Fabrication (5)

Focus on teaching intermediate to advanced students the processes and techniques of direct metal fabrication for contemporary sculpture and design. Explores a range of welding, cutting, and forming techniques and processes through demonstrations, slide lectures, field trips, and studio time. Demonstrations, slide lectures, and critical discussion of work help develop technical and conceptual skills. Students are billed a materials fee.

Prerequisite: Prerequisite(s): One course from ART 20H, ART 120, ART 121, ART 122, ART 124, ART 125, ART 129, ART 172, ART 180B, ART 188, ART 189; and two non-sculpture/intermedia/public art lower-division studios from ART 15, ART 20G, ART 20I, ART 20J, ART 20K, ART 20L, ART 26. Enrollment is restricted to art majors.

ART 184 - 3D Art and Design: Laser Cutting and CNC Routing (5)

Emphasizes the conceptual aspects of 3D art and design using the laser cutter to prototype and experiment with construction methods and materials to create, represent, respond to, and reflect on 3D forms in space. Students learn about mixed-media fabrication techniques, materials, and processes that include using a woodshop and metal-fabrication shop. The course is structured around assignments that develop individual expressiveness, research skills, creative industry, and class participation. Students are billed a materials fee. (Formerly 3D Art and Design Studio 1.)

Prerequisite: One course from ART 20H, ART 20K, ART 101, ART 102, ART 103, ART 107, ART 108, ART 120, ART 121, ART 122, ART 124, ART 125, ART 129, ART 146T, ART 172, ART 180B, ART 183, ART 188, ART 189 and two courses from ART 15, ART 20G, ART 20I, ART 20J, ART 20L, ART 26. Enrollment is restricted to art majors.

ART 185 - 3D Art and Design: Printing and Prototyping (5)

Expands 3D art and design principles, methodologies, process, and skills via structured projects using 3D printers and modeling. The metal-fabrication shop and the woodshop allow students to prototype and experiment with construction methods and materials used to develop assignments. The course is structured around assignments that develop critical thinking, individual industry, research skills, creative expressiveness, and class participation. Students are billed a materials fee. (Formerly 3D Art and Design Studio 2.)

Prerequisite: One course from ART 20H, ART 20K, ART 101, ART 102, ART 103, ART 107, ART 108, ART 180B,

ART 183, ART 184, ART 188; and two courses from ART 15, ART 20G, ART 20I, ART 20J, ART 20L, ART 26. Enrollment is restricted to art majors.

ART 188 - Intermediate to Advanced Sculpture (Foundry) (5)

This intermediate/advanced course provides the information and facilities necessary to express ideas through the indirect process of metal casting. The lost wax method is used to manifest ideas in sculpture. Lectures and demonstrations are combined with work time in class. Students generate sculpture forms in wax then gate, invest, weld, chase, patina, and present at least one finished piece. Students are billed a materials fee. May be repeated for credit.

Prerequisite: Prerequisite(s): One course from ART 20H, ART 120, ART 121, ART 122, ART 124, ART 125, ART 129, ART 172, ART 180B, ART 183, ART 189; and two non-sculpture/intermedia/public art lower-division studios from ART 15, ART 20G, ART 20I, ART 20J, ART 20K, ART 20L, ART 26. Enrollment is restricted to art majors.

ART 189 - Special Topics in Sculpture (5)

Special topics in sculpture as announced, concentrating on specific aspects of subject matter and media. Students are billed a materials fee.

Prerequisite: Prerequisite(s): One course from ART 20H, ART 120, ART 121, ART 122, ART 124, ART 125, ART 129, ART 179, ART 180B, ART 183, ART 188; and two non-sculpture/intermedia/public art lower-division studios from ART 15, ART 20G, ART 20I, ART 20J, ART 20K, ART 20L, ART 26. Enrollment is restricted to art majors.

ART 190A - Writing for Artists (5)

Provides practice in using writing as a tool to support creative work--to generate ideas, to critically analyze and interpret artworks, and to communicate clearly with others about one's own work. Lectures, discussions, and visiting artist talks introduce and explore contemporary art contexts, ideas, discourses, artworks, artists, and practices to build students' capacities to place their work in the world. Readings introduce and unfold ideas for discussion, and provide examples of writing formats and purposes as they relate to art practice.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to junior and senior art majors.

ART 190B - Senior Project (5)

Advanced senior art majors create and complete a senior project to fulfill their comprehensive graduation requirement. Focuses on a weekly lecture, studio work, peer critique, and professional practices such as the documentation and exhibition of work. Students are billed for a materials fee.

Prerequisite: Enrollment is restricted to senior art majors.

ART 191 - Teaching Apprenticeship (5)

Designed for art majors at the upper-division level. Each student assists in a lower-division art course under the direct supervision of a faculty member. Students assist in technical instruction, critiques, and class discussions. May not be repeated for credit. Does not count toward upper-division major requirements. Enrollment restricted to art majors.

ART 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar under faculty supervision. (See course 42.) Students should have upper-division standing with a proposal supported by a faculty member willing to supervise. Students submit petition to sponsoring agency.

ART 193 - Field Study (5)

Supervised off-campus study conducted under the immediate and direct guidance of a faculty supervisor. To be used primarily by upper-division students doing part-time off-campus study. Students submit petition to sponsoring agency. Petitions may be obtained in the Art Department Office.

ART 194 - Forms and Ideas (5)

A non-media specific class introducing a range of contemporary visual practices, contexts, issues, forms, and UCSC resources of use to artists, emphasizing relationships between material, form, meaning and between private expression, public communication, and systems of exchange. Students are billed a materials fee.

Prerequisite: Enrollment is restricted to junior and senior art majors. Strongly recommended for junior transfer art majors.

ART 196 - Independent Senior Project (5)

Student will concentrate on completing work for comprehensive exhibition under the direction of his or her art adviser, with help from other faculty as needed. Students submit petition to sponsoring agency. (Formerly Senior Project.)

ART 197 - Individual Study (5)

Individual study in areas approved by sponsoring instructors. Students submit petition to sponsoring agency.

ART 198 - Independent Field Study (5)

Provides for department-sponsored independent study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Students submit petition to sponsoring agency.

ART 199 - Tutorial (5)

Individual study in areas approved by sponsoring instructors. Students submit petition to sponsoring agency. Students are billed a materials fee.

ART 199F - Tutorial (2)

Tutorial

Graduate

ART 297 - Independent Study (5)

Independent study or research for graduate students. Students submit petition to sponsoring agency.

ARTG - ART AND DESIGN: GAMES AND PLAYABLE MEDIA

Lower-Division

ARTG 80G - Visual Communication and Interaction Design (5)

Survey of the basics of visual communication and interaction design, focusing on communicating designs of interactive systems. Covers techniques from a breadth of visual communication traditions; how to choose, use, and innovate; and how to structure dialogue around them. Students are billed a materials fee.

ARTG 80H - Critical History of Digital Games (5)

Surveys the history of digital games from open university games through the home console, PC, and contemporary platforms, and on to indie and art games. Throughout, the course locates connections between technology, marketing, and play culture. (Formerly History of Digital Games.)

ARTG 80I - Foundations of Play (5)

Understanding the foundations of play through reading influential texts; in-class lectures and activities; designing and playtesting games; and the ethnographies of players in the physical world. Students are billed a materials fee. (Formerly Art 80I.)

ARTG 91 - Introduction to Game Art Production (5)

Project-centered studio-lecture hybrid course that introduces the process of world-building and interaction design from the standpoint of the art director. Each project addresses a milestone in the art direction development pipeline, and demonstrates corresponding entry-level technical and conceptual skills and strategies. Utilizing this split methodology, the big-picture game development process is presented in tandem with related fundamental digital art and design skills at an achievable scale for an introductory course.

Upper-Division

ARTG 118 - Digital Drawing/Painting for Game Design (5)

Supports students working as artists in an interdisciplinary collaboration with project teams led by senior students in computer game design (the yearlong Computer Science 170

series). Instruction includes techniques, tools, and concepts of drawing and painting in a digital environment oriented toward the context of computer games. Coursework is composed of projects to develop individual ideas and skills, as well as offering productively engaged participation in a collaborative game-design team. Enrollment restricted to art and art and design: computer game design majors; admission by permission of the instructor.

ARTG 120 - Game Design Experience (5)

Teaches the concrete skills associated with making a digital game, from start to finish. Activities include establishing a team, concepting, storyboarding, prototyping, producing, and testing a game for release. Students are organized into groups and work together to create and produce a playable game. Students are billed a materials fee.

Prerequisite: Prerequisite(s): ARTG 80H or ARTG 80I; and CSE 15 and CSE 15L and CMPM 80K and FILM 80V. Concurrent enrollment in CMPM 120 is required.

ARTG 129 - Special Topics in Game Design (5)

Allows students to explore game designs related to their ongoing work within their major in either digital or non-digital formats. Students choose a topic and develop game projects that engage players. Students are billed a materials fee.

Prerequisite: Prerequisite(s): Two of the following courses: ARTG 80G, ARTG 80H, ARTG 80I. Enrollment is restricted to art & design: games and playable media and computer science: computer game design majors.

ARTG 129A - Special Topics in Game Design (5)

Gives students an opportunity to explore game designs related to their ongoing work within the AGPM major, in either digital or analog formats. Students develop projects that engage players on a topic of their choosing.

Prerequisite: Prerequisite(s): ARTG 80G, ARTG 80H, and ARTG 80I. Enrollment is restricted to art and design: games and playable media and computer science: games and playable media majors.

ARTG 131 - 3D Game Art Production (5)

Studio course in which students learn the highly technical and fundamental skills in the production of 3D art assets for video games. Covers the essential steps in the 3D art pipeline, starting with basic 3D modeling, UV unwrapping, the creation of texture maps, and finally, game engine implementation. Focuses on developing an understanding of the processes and creative thinking necessary to produce industry-level artwork rather than specific software. Students provided with video lectures and demos, and students can expect to produce weekly assignments to practice basic skills and concepts covered.

ARTG 132 - 3D Character Rigging and Animation for Video Games (5)

Gives students an in-depth understanding of the techniques of 3D character rigging and animation for video games. Students understand and develop the skills necessary to be an effective technical artist and animator with a focus on industry standard methods for animating characters to be implemented into a game engine. Course provides students with video and written lectures, video demonstrations, assignments and discussion boards aimed at giving them historical understanding of game animation, the evolution of these techniques, hands-on work to become proficient, as well as the ability to communicate online with other students and the instructor to answer questions and further their knowledge.

ARTG 134 - Spectacular Play: Performance, Ritual, and Making a Scene IRL (5)

What do immersion and interactivity look like outside of virtual worlds? How can we activate social dynamics and public space for the purpose of play? How might we evoke feelings of purpose, or even magic, for players and spectators alike? Students will study and create immersive experiences designed to play out in real life. Drawing inspiration from performance studies, activism, art history, and more, we will transform the everyday into the extraordinary.

Prerequisite: Two of the following courses: ARTG 80G, ARTG 80H, ARTG 80I.

ARTG 137 - Experimental Tabletop RPG Design (5)

Explores experimental mechanics, dynamics, themes, and aesthetics within the tabletop RPG form. In groups and individually, students will play, run, design, write, workshop, and print/produce experimental tabletop RPGs, as well as conduct usability tests focused on layout, design cohesion, and accessibility.

Prerequisite: Prerequisite(s): ARTG 80G, ARTG 80H, and ARTG 80I.

ARTG 145 - Non-Digital Game Design (5)

Looks specifically at the design of non-digital games. Surveys a variety of game types and designs. Students prototype card or board game, culminating in a final project that engages players on a socially relevant topic.

ARTG 170 - Game Design Studio I (5)

Students create novel, interesting game concepts and outline and polish a game pitch for their yearlong project, starting with concept ideation and storyboarding to prototyping and presenting the game idea. This course is part one of the art and design: games and playable media capstone requirement. Students are billed a materials fee.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and ARTG 120 and CMPM 120. Enrollment restricted to senior art and design: games and playable media majors.

ARTG 171 - Game Design Studio II (7)

Students craft the core loop of their yearlong game project. Students build the game, examine player feedback, and repeat the process to make the game better. This course places particular emphasis on advanced production techniques for working in teams, as well as software engineering practices for software design, software testing, and build management. This course is part two of the art and design, games and playable media capstone requirement.

Prerequisite: Prerequisite(s): ARTG 170. Enrollment is restricted to senior art and design: games and playable media majors.

ARTG 172 - Game Design Studio III (7)

Students scope and polish their final game designs. Students work towards releasing one specific game platform while coordinating across disciplinary boundaries to create and integrate all the necessary code, art, animation, and sound assets for their game. This course is part III of the art and design: games and playable media capstone requirement. Students are billed a materials fee.

Prerequisite: Prerequisite(s): ARTG 171. Enrollment is restricted to senior art and design: games and playable media majors.

ARTG 176 - Game Design Collaborative (2)

Supports students who are collaborating with the ARTG/CMPM 170-series teams on the creation of their capstone game projects. Enrollment is restricted to students who are working with senior game-design project groups, and by permission of the instructor.

ARTG 199 - Tutorial (5)

Individual study in areas approved by sponsoring instructors. Tutorial may not be used to satisfy major requirements. Petition required, approved by instructor and department; petitions available on the program website.

ARTG 199F - Tutorial (2)

Individual study in areas approved by sponsoring instructors. Tutorial may not be used to satisfy major requirements. Petition required, approved by instructor and department; petitions available on the program website.

ASTR - ASTRONOMY AND ASTROPHYSICS

Lower-Division

ASTR 1 - Introduction to the Cosmos (5)

Overview of the main ideas in our current view of the universe and how these ideas originated. Galaxies, quasars,

stars, black holes, and planets. Students cannot receive credit for this course and course 2.

ASTR 2 - Overview of the Universe (5)

An overview of the main ideas in our current view of the universe, and how they originated. Galaxies, quasars, stars, pulsars, and planets. Intended primarily for nonscience majors interested in a one-quarter survey of classical and modern astronomy.

ASTR 3 - Introductory Astronomy: Planetary Systems (5)

Properties of the solar system and other planetary systems. Topics include the Sun, solar system exploration, the physical nature of the Earth and the other planets, comets and asteroids, the origin of the solar system, the possibility of life on other worlds, planet formation, and the discovery and characterization of planets beyond the solar system. Intended for nonscience majors. Courses 3, 4, and 5 are independent and may be taken separately or sequentially. (Formerly Introductory Astronomy: The Solar System.)

ASTR 4 - Introductory Astronomy: The Stars (5)

Stellar evolution: observed properties of stars, internal structure of stars, stages of a star's life including stellar births, white dwarfs, supernovae, pulsars, neutron stars, and black holes. Planet and constellation identification. Intended for nonscience majors. Courses 3, 4, and 5 are independent and may be taken separately or sequentially.

ASTR 5 - Introductory Astronomy: The Formation and Evolution of the Universe (5)

The universe explained. Fundamental concepts of modern cosmology (Big Bang, dark matter, curved space, black holes, star and galaxy formation), the basic physics underlying them, and their scientific development. Intended for non-science majors. Courses 3, 4, and 5 are independent and may be taken separately.

ASTR 6 - The Space-Age Solar System (5)

Scientific study of the Moon, Earth, Mercury, Venus, and Mars by the space program; history of rocket development; the Apollo program and exploration of the Moon; unmanned spacecraft studies of the terrestrial planets; scientific theories of planetary surfaces and atmospheres. Intended for nonscience majors. (Formerly course 80A.)

ASTR 7 - Black Holes (5)

Examines the nature of black holes, including their creation and evolution; evidence for their existence from astronomical observations; and the role of black holes in the evolution of the universe. Also examines current ideas about the nature of space, time, and gravity.

ASTR 8 - Exploring the Universe with Astronomical Data (5)

Introduces how we use observational data to learn about stars, galaxies, planets, and cosmology. Covers astronomical data and experimental design and basic physics and statistical

techniques, such as model fitting, regression, significance tests, and error estimation.

ASTR 9A - Introduction to Research in Physics and Astrophysics (2)

Introduction to research for first-year students interested in physics and astrophysics. Students complete projects in small groups with scientists. Introduces techniques for collaboration; science writing; physics careers. Continuing course spanning two quarters. Enrollment is restricted to first-year proposed astrophysics and physics majors and by permission of the instructor.

ASTR 9B - Introduction to Research in Physics and Astrophysics (3)

Introduction to research for first-year students interested in physics and astrophysics. Students complete projects in small groups with scientists. Introduces techniques for collaboration; science writing; physics careers. Continuing course spanning two quarters. Prerequisite(s): course 9A. Enrollment is restricted to first-year proposed applied physics, physics, and physics (astrophysics) majors and by permission of the instructor.

ASTR 12 - Stars and Stellar Evolution (5)

An introduction to the observational facts and physical theory pertaining to stars. Topics include the observed properties of stars and the physics underlying those properties; stellar atmospheres; stellar structure and evolution. Intended for science majors and qualified non-science majors. Knowledge of high school physics and an understanding of mathematics at the Mathematics 2 level required.

ASTR 13 - Galaxies, Cosmology, and High Energy Astrophysics (5)

Introduction to modern cosmology and extragalactic astronomy. Topics include the origin of the universe, Big Bang cosmology, expansion of the universe, dark matter and dark energy, properties of galaxies and active galactic nuclei, and very energetic phenomena in our own and other galaxies. Intended for science majors and qualified non-science majors. Knowledge of high school physics and an understanding of mathematics at the Math 2 level required.

ASTR 15 - Dead Stars and Black Holes (5)

Course is primarily concerned with the structure, formation, and astrophysical manifestations of compact objects, such as white dwarfs, neutron stars, and black holes, and the astronomical evidence for their existence. Intended for science majors and qualified non-science majors. Knowledge of high school physics and an understanding of mathematics at the Math 2 level required.

ASTR 16 - Astrobiology: Life in the Universe (5)

Topics include the detection of extrasolar planets, planet formation, stellar evolution and properties of Mars, the exploration of our solar system and the search for life within it, and the evolution of life on Earth. Intended for science majors and qualified non-science majors. Knowledge of high

school physics and an understanding of mathematics at the Math 2 level required.

ASTR 18 - Planets and Planetary Systems (5)

Our solar system and newly discovered planetary systems. Formation and structure of planets, moons, rings, asteroids, comets. Intended for science majors and qualified non-science majors. Knowledge of high school physics and an understanding of mathematics at the Mathematics 2 level required.

Upper-Division

ASTR 111 - Order-of-Magnitude Astrophysics (5)

Examines the most basic and direct connection between physics and astrophysics in order to derive a better understanding of astrophysical phenomena from first principles to the extent possible.

Prerequisite: Prerequisite(s): MATH 22 or MATH 23A; PHYS 5B or PHYS 6B; and PHYS 101A or previous or concurrent enrollment in PHYS 102.

ASTR 112 - Physics of Stars (5)

The leading observational facts about stars as interpreted by current theories of stellar structure and evolution. Spectroscopy, abundances of the elements, nucleosynthesis, stellar atmospheres, stellar populations. Final stages of evolution, including white dwarfs, neutron stars, supernovae.

Prerequisite: Prerequisite(s): MATH 22 or MATH 23A, PHYS 5B or PHYS 6B, and PHYS 101A or PHYS 102.

ASTR 113 - Introduction to Cosmology (5)

Physical examination of our evolving universe: the Big Bang model; simple aspects of general relativity; particle physics in the early universe; production of various background radiations; production of elements; tests of geometry of the universe; dark energy and dark matter; and formation and evolution of galaxies and large-scale structure. (Formerly Physical Cosmology.)

Prerequisite: Prerequisite(s): MATH 22 or MATH 23A, PHYS 5B or PHYS 6B, and PHYS 101A or PHYS 102.

ASTR 117 - High Energy Astrophysics (5)

Theory and practice of space and ground-based x-ray and gamma-ray astronomical detectors. High-energy emission processes, neutron stars, black holes. Observations of x-ray binaries, pulsars, magnetars, clusters, gamma-ray bursts, the x-ray background. High-energy cosmic rays. Neutrino and gravitational-wave astronomy.

Prerequisite: Prerequisite(s): MATH 22 or MATH 23A, PHYS 5B or PHYS 6B, and PHYS 101A or PHYS 102.

ASTR 118 - Physics of Planetary Systems (5)

Determination of the physical properties of the solar system, its individual planets, and extrasolar planetary systems

through ground-based and space-based observations, laboratory measurements, and theory. Theories of the origin and evolution of planets and planetary systems.

Prerequisite: Prerequisite(s): MATH 22 or MATH 23A; and PHYS 5B or PHYS 6B.

ASTR 119 - Introduction to Scientific Computing (5)

Introduction to solving scientific problems using computers. A series of simple problems from Earth sciences, physics, and astronomy are solved using a user-friendly scientific programming language (Python/SciPy).

Prerequisite: Prerequisite(s): MATH 11A or MATH 19A or MATH 20A or AM 15A.

ASTR 136 - Advanced Astronomy Laboratory (5)

Introduces the techniques of modern observational astrophysics at optical wavelengths through hands-on experiments and use of remote observatories. Students develop the skills and experience to pursue original research. Course is time-intensive and research-oriented. (Formerly Physics 136.)

Prerequisite: Prerequisite(s): EART 119 and PHYS 133. Enrollment is restricted to junior and senior astrophysics majors.

ASTR 192 - Dir Stu Teach (5)

Dir Stu Teach

ASTR 199 - Tutorial (5)

Graduate

ASTR 202 - Astrophysics I (5)

Survey of radiative processes of astrophysical importance from radio waves to gamma rays. The interaction of radiation with matter: radiative transfer, emission, and absorption. Thermal and non-thermal processes, including bremsstrahlung, synchrotron radiation, and Compton scattering. Radiation in plasmas. (Formerly Relative Processes.)

ASTR 204 - Astrophysics II (5)

Explores how physical conditions in astrophysical objects can be diagnosed from their spectra. Discussion topics include how energy flows determine the thermal state of radiating objects and how the physics of radiative transfer can explain the emergent spectral characteristics of stars, accretion disks, Lyman-alpha clouds, and microwave background. (Formerly Astrophysical Flows.)

Prerequisite: Enrollment is restricted to graduate students.

ASTR 205 - Introduction to Astronomical Research and Teaching (5)

Lectures and seminar-style course intended to integrate new graduate students into the department; to introduce students to

the research and interests of department faculty; and to expose graduate students to teaching skills and classroom techniques. (Formerly Introduction to Astronomical Research.)

Prerequisite: Enrollment is restricted to graduate students.

ASTR 214 - Special Topics in Galactic and Extragalactic Astronomy (5)

Survey of some principal areas of research on the origin and growth of cosmic structures and galaxies: the dark ages; 21cm tomography; first galaxies; first stars and seed black holes; reionization and chemical enrichment of the intergalactic medium; the assembly of massive galaxies; quasi-stellar sources; interactions of massive black holes with their environment; extragalactic background radiation; numerical simulations and the nature of the dark matter; the dark halo of the Milky Way. (Formerly Special Topics in Cosmology)

Prerequisite: Enrollment is restricted to graduate students.

ASTR 220A - Stars and Planets I (5)

Survey of stellar structure and evolution. Physical properties of stellar material. Convective and radiative energy transport. Stellar models and evolutionary tracks through all phases. Brown dwarfs and giant planets. Comparison with observations. (Formerly Stellar Structure and Evolution.)

Prerequisite: Enrollment is restricted to graduate students.

ASTR 222 - Stars and Planets II (5)

Theory and observations of protoplanetary disks. Origin and evolution of the solar nebula. Formation and evolution of the terrestrial planets and the giant planets. (Formerly Planetary Formation and Evolution.)

Prerequisite: Enrollment is restricted to graduate students.

ASTR 225 - High-Energy Astrophysics (5)

High-energy astrophysics and the final stages of stellar evolution: supernovae, binary stars, accretion disks, pulsars; extragalactic radio sources; active galactic nuclei; black holes. (Formerly *Physics of Compact Objects*)

ASTR 230 - Diffuse Matter in Space (5)

Fundamental physical theory of gaseous nebulae and the interstellar medium. Ionization, thermal balance, theory and observation of emission spectra. Interstellar absorption lines, extinction by interstellar dust. Ultraviolet, optical, infrared, and radio spectra of gaseous nebulae.

ASTR 233 - Galaxies and Cosmology I (5)

Survey of modern physical cosmology, including Newtonian cosmology, curved space-times, observational tests of cosmology, the early universe, inflation, nucleosynthesis, dark matter, and the formation of structure in the universe. (Formerly Physical Cosmology.)

ASTR 234 - Statistical Techniques in Astronomy (5)

Introduces probability and statistics in data analysis with emphasis on astronomical applications. Topics include

probability, Bayes' theorem, statistics, error analysis, correlation, hypothesis testing, parameter estimation, surveys, time-series analysis, surface distributions, and image processing. Students learn to identify the appropriate statistical technique to apply to an astronomical problem and develop a portfolio of analytic and computational techniques that they can apply to their own research.

Prerequisite: Enrollment is restricted to graduate students.

ASTR 240A - Galaxies and Cosmology II (5)

Structure and evolutionary histories of nearby galaxies. Stellar populations, galactic dynamics, dark matter, galactic structure and mass distributions. Peculiar galaxies and starbursting galaxies. Structure and content of the Milky Way. Evolution of density perturbations in the early universe. Hierarchical clustering model for galaxy formation and evolution. (Formerly Galactic and Extragalactic Stellar Systems.)

ASTR 257 - Observational Astronomy (5)

Covers physical, mathematical, and practical methods of modern astronomical observations at all wavelengths at a level that prepares students to comprehend published data and to plan their own observations. Topics include: noise sources and astrophysical backgrounds; coordinate systems; filter systems; the physical basis of coherent and incoherent photon detectors; astronomical optics and aberrations; design and use of imaging and spectroscopic instruments; antenna theory; aperture synthesis and image reconstruction techniques; and further topics at the discretion of the instructor. Familiarity with UNIX, computer programming, and completion of Physics 116C is strongly recommended as well as at least one upper-division course in astronomy. (Formerly Modern Astronomical Techniques.)

Prerequisite: Designed for graduate students; available to qualified undergraduate astrophysics majors by instructor permission.

ASTR 260 - Instrumentation for Astronomy (5)

An introduction to astronomical instrumentation for infrared and visible wavelengths. Topics include instrument requirements imposed by dust, atmosphere, and telescope; optical, mechanical, and structural design principles and components; electronic and software instrument control. Imaging cameras and spectrographs are described. Offered in alternate academic years.

Prerequisite: Enrollment is restricted to graduate students.

ASTR 289 - Adaptive Optics and Its Application (5)

Introduction to adaptive optics and its astronomical applications. Topics include effects of atmospheric turbulence on astronomical images, basic principles of feedback control, wavefront sensors and correctors, laser guide stars, how to analyze and optimize performance of adaptive optics systems, and techniques for utilizing current and future systems for astronomical observations.

Prerequisite: Enrollment is restricted to graduate students.

ASTR 292 - Seminar (0)

Seminar attended by faculty, graduate students, and upper-division undergraduate students.

ASTR 293 - Current Literature in Astrophysics (2)

Training for following daily progress in astrophysical research to keep pace with the rapidly evolving scientific field. Students learn how to select and read interesting papers (that span a wide range of topics) efficiently and how to summarize their key results. Students have an opportunity to practice presentation skills in an informal group discussion setting.

Prerequisite: Enrollment is restricted to graduate students.

ASTR 297A - Independent Study (5)

Independent study or research for graduate students who have not yet begun work on their theses. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

ASTR 297B - Independent Study (10)

Independent study or research for graduate students who have not yet begun work on their theses. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

ASTR 297C - Independent Study (15)

Independent study or research for graduate students who have not yet begun work on their theses. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

ASTR 299A - Thesis Research (5)

ASTR 299B - Thesis Research (10)

ASTR 299C - Thesis Research (15)

BIOC - BIOCHEMISTRY AND MOLECULAR BIOLOGY

Upper-Division

BIOC 100A - Biochemistry and Molecular Biology (5)

Fundamentals of molecular biology, structure and function of nucleic acids, and protein structure. Designed for students preparing for research careers in biochemistry and molecular biology. Lecture: 3-1/2 hours; discussion: 1-1/4 hours.

Prerequisite: Prerequisite(s): CHEM 8B; and BIOL 20A.

BIOC 100B - Biochemistry and Molecular Biology (5)

Covers principles of protein function from ligand binding and enzyme mechanism, kinetics and regulation to membrane composition and membrane protein function. Lecture: 3-1/2 hours; discussion: 1-1/4 hours. (Formerly Biochemistry.)

Prerequisite: Prerequisite(s): BIOC 100A.

BIOC 100C - Biochemistry and Molecular Biology (5)

Biochemistry: intermediary metabolism and bioenergetics. How enzymatically catalyzed reactions are organized and regulated; how energy from molecules is extracted for chemical work. Lecture: 3-1/2 hours; discussion: 1-1/4 hours. (Formerly Biochemistry.)

Prerequisite: Prerequisite(s): BIOC 100B.

BIOC 110L - Advanced Biochemistry Laboratory (5)

An introduction to the major techniques used in the isolation and characterization of biological components. Laboratory: 8 hours; lecture: 1-3/4 hours. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BIOC 100B and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to chemistry majors in the biochemistry concentration. Other majors by permission.

BIOE - BIOLOGY- ECOLOGY-AND- EVOLUTIONARY

Lower-Division

BIOE 19 - Biodiversity in the Age of Humans (5)

How can we better understand how humans have affected Earth and its inhabitants? Explores how DNA shed by organisms into the environment can be collected and used to study Earth's biodiversity, with applications in medicine, anthropology, agriculture, and conservation.

Prerequisite: Enrollment is restricted to first-year students, sophomores, and juniors.

BIOE 20B - Development and Physiology (5)

Topics in morphology, physiology, development, genetics, and endocrinology selected to exemplify current issues and perspectives in organismic biology.

Prerequisite: Prerequisite(s): BIOL 20A.

BIOE 20C - Ecology and Evolution (5)

Introduction to ecology and evolution covering principles of evolution at the molecular, organismal, and population levels. Evolutionary topics include genetic and phenotypic variation, natural selection, adaptation, speciation, and macroevolution. Also covers behavioral, population, and community ecology including applied ecological issues.

BIOE 75 - Scientific Diving Certification (2)

Prerequisite for course 161/L, *Kelp Forest Ecology*, and all research diving performed under the auspices of UCSC or

other academic institutions. Course work includes lectures and scuba diving. Topics include subtidal sampling techniques, navigation, low visibility diving, search and recovery, rescues, small boat use, oxygen administration for divers, technical blue water deep diving, physics, and physiology. Apply online at <http://www2.ucsc.edu/sci-diving>. Students are billed a course materials fee that covers costs for equipment use, materials, and transportation. Prerequisite(s): skill level equal to Advanced Scuba Diver Certification, pass scuba physical, provide own scuba gear, be certified in CPR and First Aid; and interview: pass swim test and scuba skills test.

BIOE 80S - Lies, Damn Lies, and Statistics (5)

Probability and statistics underlie much of our everyday experience and, as such, there is a fundamental need for an understanding of the use, and misuse, of statistics. This course is taught through case studies based in biology, politics, economics, crime, education, disease, conservation, and other fields of interest. For example, does a change in crime rate really affect your probability of being a victim of a crime? The goal is to provide all students with sufficient understanding probability and statistics to determine if everyday and often sensationalistic reporting of statistical results is meaningful.

BIOE 82 - Introduction to Field Research and Conservation (2)

A field-based course with overnight and day trips to regionally diverse areas throughout Central California. Field trips and lectures familiarize students with a wide variety of topics in the ecological, conservation, and environmental science as well as natural-resource management. Enrollment is by instructor permission. Students are billed a materials fee.

BIOE 85 - Natural History of the UCSC Natural Reserves (5)

Lectures and field trips familiarize students with the flora and fauna of the UCSC Natural Reserves. Field trips focus on surveying and identifying vertebrates and plants at each UCSC Natural Reserve (Fort Ord, Campus Reserve, Big Creek, Younger Lagoon, and Ano Nuevo).

BIOE 95 - Seymour Center Docent Training (2)

Taught as a series of seminars, course provides a survey of marine sciences and the role of scientific research in understanding and conserving the world's oceans. Topics include: marine biology, ecology, conservation, coastal geology, and climate change. This series is intended to prepare students to interpret research and inform the public by leading tours at the Seymour Marine Discovery Center at the Long Marine Lab. Enrollment is by application and interview.

BIOE 99 - Tutorial (5)

Individual, directed study for undergraduates. Students submit petition to sponsoring agency.

Upper-Division

BIOE 107 - Ecology (5)

Focuses on physiological, behavioral, and population ecology, and on linking ecological processes to evolution. It includes basic principles, experimental approaches, concepts of modeling, and applications to ecological problems.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; BIOL 20A, BIOE 20B, and BIOE 20C.

BIOE 108 - Marine Ecology (5)

Paradigms and designs in marine ecology. A review of the paradigms that have shaped our understanding of marine ecology; analysis and discussion of experiments with these paradigms. Students cannot receive credit for this course and course 208.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; BIOL 20A, BIOE 20B, and BIOE 20C; BIOE 107 or BIOE 140 recommended. Enrollment is restricted to juniors and seniors.

BIOE 109 - Evolution (5)

An examination of the history and mechanisms of evolutionary change. Topics include molecular evolution, natural and sexual selection, adaptation, speciation, biogeography, and macroevolution.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; BIOL 20A, BIOE 20B, BIOE 20C, and BIOL 105.

BIOE 112 - Ornithology (5)

Introduction to the evolution, ecology, behavior, and natural history of birds, using exemplary case histories to illustrate key concepts in evolution, ecology, and behavior.

Prerequisite: Prerequisite(s): BIOE 107, BIOE 109, or BIOE 140. Concurrent enrollment in BIOE 112L is required.

BIOE 112L - Ornithology Field Studies (2)

Field trips introduce students to field identification skills and field investigation of census, foraging behavior, migration, social behavior, and communication. Examination of specimens in the laboratory will be used to highlight the diversity and taxonomy of birds. Students are billed a materials fee. Some field trips may require students to provide their own transportation.

Prerequisite: Prerequisite(s): BIOE 107, BIOE 109, or BIOE 140. Concurrent enrollment in BIOE 112 is required.

BIOE 114 - Herpetology (5)

Lectures introduce students to evolution, development, physiology, behavior, ecology, and life history of reptiles and amphibians. The materials integrate with conceptual and

theoretical issues of ecology, evolution, physiology, and behavior.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; BIOE 107, BIOE 109, BIOE 110, or BIOE 140. Concurrent enrollment in BIOE 114L is required.

BIOE 114L - Field Methods in Herpetological Research (2)

Field trips introduce students to natural history, censusing techniques, physiological ecology, and behavioral analysis of reptiles and amphibians. Laboratories introduce students to techniques for analyzing behavior and physiology. Field studies culminate with a group project in a natural setting. Some field trips may be held on weekends due to weather considerations. Some field trips may require students to provide their own transportation, some transportation will be provided by UCSC. Students are billed a materials fee.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; BIOE 107, BIOE 109, BIOE 110, or BIOE 140. Concurrent enrollment in BIOE 114 is required.

BIOE 117 - Systematic Botany of Flowering Plants (5)

An examination of the taxonomy and evolution of flowering plants. Special topics include phylogenetics and cladistics, plant species concepts, and modern methods of systematic research.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C, and satisfaction of the Entry Level Writing and Composition requirements. Must be taken concurrently with BIOE 117L.

BIOE 117L - Systematic Botany of Flowering Plants Laboratory (2)

Weekly laboratory concerned primarily with California flora and plant families. Several field trips. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C. Must be taken concurrently with BIOE 117.

BIOE 118 - Plants and Society: the Biology of Food, Shelter, and Medicine (5)

Introduces plant biology as it affects human society. Topics include the origins of agriculture, the morphology and chemistry of food plants, the material uses of plant products, the biology of medicinal plants, and plant diversity and bioprospecting.

Prerequisite: Prerequisite(s): BIOL 20A and BIOE 20B and BIOE 20C; or ENVS 23 and ENVS 24.

BIOE 120 - Marine Botany (5)

An introduction to the biology of marine algae, fungi, and angiosperms with regard to form and function. Major boreal, temperate, and tropical marine plant communities. Lecture format.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C, and satisfaction of the Entry Level Writing and Composition requirements. Must be taken concurrently with BIOE 120L.

BIOE 120L - Marine Botany Laboratory (2)

One laboratory weekly and several field trips. Focuses on marine algae, fungi, and angiosperms. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C, and satisfaction of the Entry Level Writing and Composition requirements. Must be taken concurrently with BIOE 120.

BIOE 122 - Invertebrate Zoology (5)

An examination of invertebrates and their habitats. Lecture format.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C and satisfaction of the Entry Level Writing and Composition requirements. Must be taken concurrently with BIOE 122L.

BIOE 122L - Invertebrate Zoology Laboratory (2)

An examination of invertebrates and their habitats. Weekly laboratories or field trips. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C, and satisfaction of the Entry Level Writing and Composition requirements. Must be taken concurrently with BIOE 122.

BIOE 124 - Mammalogy (5)

Introduces the biology of mammals, including their classification, evolution, behavior, reproductive strategies, and general ecology. Examines the diagnostic traits of mammals; provides a survey of the living orders along with their diagnostic features, physiological and behavioral specializations, and adaptations.

Prerequisite: Prerequisite(s): BIOL 20A and BIOE 20B and BIOE 20C. Concurrent enrollment in BIOE 124L is required.

BIOE 124L - Mammalogy Laboratory (2)

Focuses on the identification of mammals and their specific traits. Exercises provide hands-on experience at identifying mammal orders, families, and species. Field trip provides students with field techniques in mammalogy.

Prerequisite: Prerequisite(s): BIOL 20A and BIOE 20B and BIOE 20C. Concurrent enrollment in BIOE 124 is required.

BIOE 125 - Ecosystems of California (5)

A survey of the diversity, structure, and functioning of California's ecosystems through time and the ways they have influenced and responded to human activities and stewardship. Topics include: ecosystem drivers such as climate, soils, and land-use history; human and ecological prehistory; comparative marine, freshwater, and terrestrial

ecosystem dynamics; and managed ecosystems such as range, fisheries, and agriculture.

Prerequisite: Prerequisite(s): BIOE 20C. Enrollment is restricted to ecology and evolution, marine biology, plant sciences, and biology B.A. majors.

BIOE 127 - Ichthyology (5)

An introduction to the biology of jawless, cartilaginous, and bony fishes--their classification, evolution, form, physiology, and ecology.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C, and satisfaction of the Entry Level Writing and Composition requirements. Must be taken concurrently with BIOE 127L.

BIOE 127L - Ichthyology Laboratory (2)

One laboratory session a week and several field trips to study the biology of fish. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C, and satisfaction of the Entry Level Writing and Composition requirements. Must be taken concurrently with BIOE 127.

BIOE 128L - Large Marine Vertebrates Field Course (5)

Lectures combined on fieldwork with large marine vertebrates in the laboratory and lectures with large marine vertebrates in the field (Monterey Bay, Ano Nuevo). Fieldwork familiarizes students with research methods, study design, and statistical approaches for research on large marine vertebrates (seals, birds, fish, and sharks). Research includes: animal tracking; physiology; behavior; foraging ecology; and energetics. Prerequisite(s): BIOL 20A and BIOE 20B and BIOE 20C, and satisfaction of the Entry Level Writing and Composition requirements. Students are billed a materials fee.

BIOE 129 - Biology of Marine Mammals (5)

A survey of cetaceans, pinnipeds, sirenians, and sea otters, including natural history, systematics, physiology, behavior, anatomy, and conservation.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C; and satisfaction of the Entry Level Writing and Composition requirements. BIOL 110 is recommended.

BIOE 129L - Biology of Marine Mammals Laboratory (2)

Covers the basics of marine mammal taxonomy, anatomy, and field methods with an emphasis on local field identification and understanding of local species. Will include field trips to Long Marine Lab, Ano Nuevo, and Monterey Bay. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C. Must be taken concurrently with BIOE 129.

BIOE 131 - Animal Physiology (5)

Principles and concepts underlying the function of tissues and organ systems in animals with emphasis on vertebrate

systems. Students cannot receive credit for this course and BIOL 130.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C.

BIOE 131L - Animal Physiology Laboratory (2)

Experiments conducted with primary focus on quantitative physiological principles of organ systems and intact organisms. Students cannot receive credit for this course and course 130L. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C. Concurrent enrollment in BIOE 131 is required.

BIOE 133 - Exercise Physiology (5)

An advanced-level course concerning physiological and biochemical processes associated with human performance. Emphasis is on the integration of organ systems for exercise. Topics include metabolism and fuel utilization, cardiovascular and respiratory dynamics during activity, and the effects of training. Requires a good understanding of basic physiological function and anatomy.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B and BIOE 20C. BIOE 131 is recommended. Concurrent enrollment in BIOE 133L is required.

BIOE 133L - Exercise Physiology Laboratory (2)

An introduction to basic measurement techniques used in assessing the physiological response of humans to exercise. Sessions cover oxygen consumption, respiratory rate, and heart rate monitoring during aerobic and anaerobic activity. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BIOL 20A, and BIOE 20B and BIOE 20C. BIOE 131 is recommended. Concurrent enrollment in BIOE 133 is required.

BIOE 134 - Comparative Vertebrate Anatomy (5)

Course focuses on vertebrate form and function: an integration of physiology and biomechanics. Topics include: the physiology and biomechanics underlying vertebrate locomotion; vertebrate feeding; and the morphological changes associated with different locomotion and feeding strategies through evolutionary time.

Prerequisite: Prerequisite(s): BIOL 20A and BIOE 20B and BIOE 20C. Concurrent enrollment in BIOE 134L is required.

BIOE 134L - Comparative Vertebrate Anatomy Laboratory (2)

Course focuses on the gross dissections all major clades of vertebrates: development, form, and diversity of organ systems and basic principles of evolution; vertebrate classification; and functional morphology, with emphasis on feeding and locomotion. Anatomical dissections integrated with the associated lecture material focusing on biomechanics, form, and function. Students are billed for a materials fee.

Prerequisite: Prerequisite(s): BIOL 20A and BIOE 20B and BIOE 20C. Concurrent enrollment in BIOE 134 is required.

BIOE 135 - Plant Physiology (5)

Cellular and organismal functions important in the life of green plants.

Prerequisite: Prerequisite(s): BIOL 20A and BIOE 20B and BIOE 20C; concurrent enrollment in BIOE 135L is required.

BIOE 135L - Plant Physiology Laboratory (2)

Weekly laboratory concerning the cellular and organismal functions of green plants. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BIOL 20A and BIOE 20B and BIOE 20C; concurrent enrollment in BIOE 135.

BIOE 136 - Environmental Physiology (5)

Explores how an organism's physiology interacts with its environment including molecular to whole organism-level processes. How do animals thrive in the most diverse regions of Earth and why are some more vulnerable to change than others?

Prerequisite: Prerequisite(s): BIOL 20A and BIOE 20B and BIOE 20C.

BIOE 137 - Molecular Ecology (5)

This combination lecture/laboratory course explores the use of molecular (DNA and/or protein) data in ecological and conservation research. Topics covered include data collection; marker choice; estimating genetic diversity and population structure; the inference of mating systems; and environmental genomics.

Prerequisite: Prerequisite(s): BIOE 20B and BIOE 20C and BIOL 20A and BIOL105, and satisfaction of the Entry Level Writing and Composition requirements. Concurrent enrollment in BIOE 137L is required.

BIOE 137L - Molecular Ecology Laboratory (2)

This combination lecture/laboratory course explores the use of molecular (DNA and/or protein) data in ecological and conservation research. Topics covered include data collection; marker choice; estimating genetic diversity and population structure; the inference of mating systems; and environmental genomics.

Prerequisite: Prerequisite(s): BIOE 20B and BIOE 20C and BIOL 20A and BIOL105. Concurrent enrollment in BIOE 137 is required.

BIOE 140 - Behavioral Ecology (5)

An introduction to social and reproductive behavior. Emphasis on studies of vertebrates in their natural habitat. Ideas concerning the evolution of social behavior, mating systems, and individual reproductive strategies. Case histories of well-studied animals that illustrate key principles in courtship and mating, parental behavior, and food-getting behavior.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C.

BIOE 141L - Behavioral Ecology Field Course (5)

A field-based course introducing students to concepts and methods for studying behavioral ecology in nature. Students will conduct observations and field experiments on various local model organisms including elephant seals, hummingbirds, sparrows, lizards, ants, bees, frogs, and salamanders. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BIOE 107 or BIOE 140 or BIOE 110; and satisfaction of the Entry Level Writing and Composition requirements.

BIOE 145 - Plant Ecology (5)

An exploration of the ecology of plant form, function, distribution, abundance, and diversity. Topics include plant adaptations to environmental conditions, life history variation, competition, reproductive ecology, herbivory, and patterns of diversity. Lecture with discussions of original papers and independent field project. Students cannot receive credit for this course and course 245.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C, and satisfaction of the Entry Level Writing and Composition requirements. BIOE 107 is recommended.

BIOE 145L - Field Methods in Plant Ecology (5)

Hands-on exploration of the concepts and techniques of plant ecology. A combination of lab, greenhouse, and field-based exercises (irrespective of weather conditions). Statistical analysis and scientific writing. One required weekend field trip. Students cannot receive credit for this course and course 245L. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C, and satisfaction of the Entry Level Writing and Composition requirements. Concurrent enrollment in BIOE 145 is required. BIOE 107 is recommended.

BIOE 147 - Community Ecology (5)

Develops the major themes of community biology: structure, trophic dynamics, succession, complex interactions among species, herbivory, evolution and coevolution. Uses case histories of well-studied marine and terrestrial systems. Students cannot receive credit for this course and course 247.

Prerequisite: Prerequisite(s): BIOE 107, BIOE 108, BIOE 145, BIOE 155 or 159A; or ENVS 24 by permission of instructor.

BIOE 148A - Quantitative Ecology (5)

Incorporates building mathematical models and fitting them to data to answer questions in ecology and evolution. Includes learning to write computer code to simulate models and analyze data. Topics include models of population and evolutionary dynamics, and species interactions and behavior. Students cannot receive credit for this course and course

248A. Prerequisite(s): course 107 and by permission of instructor.

BIOE 148B - Quantitative Methods in Ecology and Evolution (5)

Advanced methods for building mathematical models and fitting them to data to answer questions in ecology and evolution both mathematically and by writing computer code. Topics include: population dynamics and management, evolutionary and life-history theory, and behavior and game theory. Students cannot receive credit for this course and course 248B. Prerequisite(s): mathematical and programming background. Enrollment is by permission of the instructor.

BIOE 149 - Disease Ecology (5)

Focuses on the ecological and evolutionary processes that drive the transmission of pathogens between hosts; the impact of disease on host populations; and what causes the emergence of an infectious disease. Includes theoretical framework, description of field techniques, and discussion of wildlife and human diseases including malaria, West Nile virus, Lyme disease, HIV, avian influenza (bird flu), Chikungunya, tuberculosis, chytridiomycosis, and Ebola.

Prerequisite: Prerequisite(s): BIOL 20A, and BIOE 20B and BIOE 20C and BIOE 107.

BIOE 150 - Ecological Field Methods (5)

Lectures and laboratory computer exercises designed to familiarize students with research methods, study design, statistical approaches, and analysis tools for ecological research. Students cannot receive credit for this course and Environmental Studies 104A.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C; concurrent enrollment in BIOE 150L is required. BIOE 107, BIOE 108, BIOE 140, or BIOE 147 recommended.

BIOE 150L - Ecological Field Methods Laboratory (5)

Field-oriented course in the study of animal ecology and behavior. Combines overview of methodologies and approaches to field research with practical field studies. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C, and satisfaction of the Entry Level Writing and Composition requirements. Concurrent enrollment in BIOE 150 is required. BIOE 107, BIOE 108, BIOE 140, or BIOE 147 recommended.

BIOE 151A - Ecology and Conservation in Practice Supercourse: Ecological Field Methods (5)

An intensive, on-site learning experience in terrestrial field ecology and conservation, using the University of California Natural Reserves and other natural areas. Students study advance concepts in ecology, conservation, and field methods for four weeks, then experience total immersion in field research at the UC Natural Reserves and other natural areas.

Lectures, field experiments, writing assignments, and computer exercises familiarize students with research methods, study design, statistical approaches, and analytical tools for ecological research. Students complete and communicate the results of short field projects in ecology, learn the natural history of the flora and fauna of California, and plan and execute a significant, independent field-research study at the end of the quarter. Enrollment is by application. Prerequisite(s): BIOL 20A, BIOE 20B, BIOE 20C or ENVS 23, 24, 100; and AMS 7 and 7L. Concurrent enrollment in BIOE 151B-C-D or ENVS 109B-C-D is required. Satisfies the senior exit requirement for biological sciences majors and satisfies the senior exit requirement for environmental studies majors by prior approval. Students cannot receive credit for this course and BIOE 150, 150L, ENVS 104A or 196A.

BIOE 151B - Ecology and Conservation in Practice
 Supercourse: Ecological Field Methods Laboratory (5)

Field-oriented course in ecological research. Combines overview of methodologies and approaches to field research with practical field studies. Students complete field projects in ecology and also learn the natural history of the flora and fauna of California. Students are billed a materials fee. Enrollment is by application. Prerequisite(s): BIOL 20A, BIOE 20B, BIOE 20C or ENVS 23, 24, 100; and AMS 7 and 7L; satisfaction of the Entry Level Writing and Composition requirements. Concurrent enrollment in BIOE 151A-C-D or ENVS 109A-C-D is required. Satisfies the senior exit requirement for biological sciences majors and satisfies the senior exit requirement for environmental studies majors by prior approval. Students cannot receive credit for this course and BIOE 150, 150L, ENVS 104A or 196A.

BIOE 151C - Ecology and Conservation in Practice
 Supercourse: Functions and Processes of Terrestrial Ecosystems (5)

From lectures and discussion of terrestrial community and ecosystem ecology, students work individually or in small groups to present an idea for a project, review relevant literature, develop a research question/hypothesis, design and perform an experiment, collect and analyze data, and write a report. The instructor evaluates the feasibility of each student's project before it begins. Enrollment is by application. Prerequisite(s): BIOL 20A, BIOE 20B, BIOE 20C or ENVS 23, 24, 100; and AMS 7 and 7L. Concurrent enrollment in BIOE 151A-B-D or ENVS 109A-B-D is required. Satisfies the senior exit requirement for biological sciences majors and satisfies the senior exit requirement for environmental studies majors by prior approval. Students cannot receive credit for this course and BIOE 150, 150L, ENVS 104A or 196A.

BIOE 151D - Ecology and Conservation in Practice
 Supercourse: Conservation in Practice (4)

Focuses on current issues in environmental and conservation biology and the emerging field methods used to address them. From field-oriented lectures about current issues in environmental and conservation biology, students pursue research project as individuals and small groups to develop hands-on experience with field skills in conservation research

and resource management. Enrollment is by application. Prerequisite(s): BIOL 20A, BIOE 20B, BIOE 20C or ENVS 23, 24, 100; and AMS 7 and 7L. Concurrent enrollment in BIOE 151A-B-C or ENVS 109A-B-C required. Satisfies the senior exit requirement for biological sciences majors and satisfies the senior exit requirement for environmental studies majors by prior approval. Students cannot receive credit for this course and BIOE 150, 150L, ENVS 104A or 196A.

BIOE 153A - Introduction to Arctic Ecology (5)

Field-intensive course comprised of weekly classes in preparation for the field component. Focuses on issues relevant to the ecology of arctic regions including arctic ecology, arctic geology and paleontology, and arctic environmental change. Students are charged a materials fee. Enrollment is by permission of the instructor. Prerequisite(s): BIOL 20A, and BIOE 20B and 20C; and concurrent enrollment BIOE 153B and 153C.

BIOE 153B - Arctic Ecology (5)

Field-intensive course focusing on issues relevant to the ecology of the arctic regions. Explores the changing arctic environment through lectures and hands-on research during an 18-day camping trip transecting the subarctic boreal forest to the high Arctic. Enrollment is by permission of the instructor. Prerequisite(s): BIOL 20A, and BIOE 20B and 20C; and concurrent enrollment BIOE 153A and 153C.

BIOE 153C - Disciplinary Communication for Biologists (5)

Writing-intensive course focusing on developing skills in scientific communication with an emphasis on communicating issues relevant to the ecology of arctic regions. Communication products are developed during an 18-day camping trip in the Arctic. Enrollment is by permission of the instructor. Prerequisite(s): BIOL 20A, and BIOE 20B and 20C; and satisfaction of the Entry Level Writing and Composition requirements; and concurrent enrollment BIOE 153A and 153B.

BIOE 155 - Freshwater Ecology (5)

Provides an overview of the physical, chemical, and biological processes that characterize inland waters such as lakes, streams, rivers, and wetlands. Also addresses relationships between humans and freshwater, and discusses these challenges in conservation.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C.

BIOE 155L - Freshwater Ecology Laboratory (5)

Field and laboratory study of the ecology of freshwater systems including lakes, streams, and estuaries. Students gain experience sampling and identifying freshwater organisms, designing and analyzing ecological experiments, and writing scientific reports. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, BIOE 20C and BIOE 155.

BIOE 158L - Marine Ecology Laboratory (5)

Supervised individual research projects in experimental marine biology. Students carry out a complete research project, including (1) the formation of hypotheses; (2) the design and implementation of experiments; (3) collection, analysis, and interpretation of data; and (4) write-up of an oral presentation. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BIOE 108; satisfaction of the Entry Level Writing and Composition requirements.

BIOE 159A - Marine Ecology Field Quarter: Marine Ecology with Laboratory (5)

Total immersion in marine ecology for very motivated students. Students develop a research project during first five weeks on campus and then spend five weeks of immersion in directed research without distraction in isolated locations off campus (past locations include the Gulf of California in Mexico and Moorea in French Polynesia). Not available through University Extension. No other courses may be taken during this quarter. Students must sign a contract agreeing to standards of behavior outlined in the *UCSC Rule Book* and by the instructors. Students are billed a materials, transportation (not airfare), and room and board fee. Paradigms and designs in marine ecology. A review of the paradigms that have shaped our understanding of marine ecology and analysis and discussion of experiments with these paradigms. Students carry out a complete research project, including the formation of hypotheses; the design and implementation of experiments; the collection, analysis, and interpretation of data; and the write-up and oral presentation of results. Admission by interview during previous winter quarter. BIOE 159A, 159B, 159C, and 159D are equivalent to BIOE 127, 127L, 108, and 158L for major requirements. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; BIOE 159A, 159B, 159C, and 159D must be taken concurrently.

BIOE 159B - Marine Ecology Field Quarter: Ichthyology with Laboratory (5)

An introduction to the biology of jawless, cartilaginous, and bony fishes—their classification, evolution, form, physiology, and ecology. Admission by interview during previous winter quarter. BIOE 159A, 159B, 159C, and 159D are equivalent to BIOE 127, 127L, 108, and 158L for major requirements. BIOE 159A, 159B, 159C, and 159D must be taken concurrently.

BIOE 159C - Marine Ecology Field Quarter: Methods in Field Ecology (5)

Students learn quantitative methods for field experiments and surveys. Emphasis will be on marine environments, but there will also be exposure to terrestrial systems. This is the lecture component to course 159D. No text is required for this course; instead, readings from the current literature will be assigned. Students are evaluated on written independent field project proposals and class participation. Admission by interview during previous winter quarter. BIOE 159A, 159B, 159C, and 159D are equivalent to BIOE 127, 127L, 108, and 158L for major requirements. BIOE 159A, 159B, 159C, and 159D must be taken concurrently.

BIOE 159D - Marine Ecology Field Quarter: Methods in Field Ecology Laboratory (5)

This is laboratory portion of course 159C. Students carry out independent field projects under the supervision of course instructors. All work is done during the 5-6 week off-campus portion of course 159. Students are evaluated on field techniques, the final write-up of their independent field projects, and class participation. Admission by interview during previous winter quarter. BIOE 159A, 159B, 159C, and 159D are equivalent to BIOE 127, 127L, 108, and 158L for major requirements. BIOE 159A, 159B, 159C, and 159D must be taken concurrently.

BIOE 159E - Marine Ecology Field Quarter: Behavioral Ecology (5)

Study of animal behavior from an ecological and evolutionary perspective, using lectures, exercises, discussion, and research experience in the field. Emphasis on marine environments with exposure to extraterrestrial systems and laboratory studies. Focus on how scientists study animal behavior and what has been learned about evolution and ecology and ecology of animal behavior. Admission by interview during previous winter quarter. BIOE 159E is equivalent to BIOE 140 for major requirements. BIOE 159A, 159B, 159C, and 159E must be taken concurrently.

BIOE 161 - Kelp Forest Ecology (5)

Study of organization of kelp forests as models for examining biological communities. The physical and biotic factors responsible for community organization of kelp forests are explored using original literature and data collected in BIOE 161L. Class meets one full morning each week.

Prerequisite(s): by interview only; BIOL 20A, BIOE 20B, and BIOE 20C are required. Students must pass the University Research Diving Certification (contact the diving safety officer, Institute of Marine Sciences, for further information). Enrollment is restricted to seniors. BIOE 161L must be taken concurrently; BIOE 107, 120/L, 122/L are recommended.

BIOE 161L - Kelp Forest Ecology Laboratory (5)

Fieldwork using SCUBA to quantitatively and qualitatively examine the abundance and distribution of organisms in kelp forests, with additional laboratory work. Culminates with a directed individual research project. Class meets one full morning each week. Students are billed a materials fee. Admission by interview. Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C; satisfaction of the Entry Level Writing and Composition requirements; BIOE 161 must be taken concurrently; BIOE 107, 120/L, 122/L are recommended. Students must pass the University Research Diving Certification (contact the Diving Safety Officer, Institute of Marine Sciences, for further information).

BIOE 163 - Ecology of Reefs, Mangroves, and Seagrasses (5)

Integrated treatment of coral reefs, sea grasses, and mangroves emphasizing interactions and processes through time. Major topics: biological and geological history, biogeography, evolution and ecology of dominant organisms,

biodiversity, community and ecosystem ecology, geology, biogeochemistry, global change, human impacts.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C. Concurrent enrollment in BIOE 163L is required.

BIOE 163L - Ecology of Reefs, Mangroves, and Seagrasses Laboratory (2)

An interdisciplinary laboratory exploration of the anatomy, morphology, adaptations, diversity, evolution, and ecology of corals, mangroves, and seagrasses and of their physical, chemical, and geological environments.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C. Concurrent enrollment in BIOE 163 is required.

BIOE 165 - Marine Conservation Biology (5)

Initially undertakes an in-depth comparison of the biology and conservation of marine versus terrestrial ecosystems. With this foundation, course examines marine biodiversity loss resulting from overexploitation, habitat loss, species introduction, and pollution, with particular emphasis on the resulting trophic cascades, biodiversity losses, and climate change. Students cannot receive credit for this course and Environmental Studies 120.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, and BIOE 20C; OCEA 101 recommended.

BIOE 171 - Disciplinary Communication for Biologists (5)

Writing-intensive course focusing on developing skills in scientific communication, with an emphasis on communicating issues relevant to ecologists and evolutionary biologists. Presents the norms and standards of scientific communication spanning multiple genres. Students cannot receive credit for this course and course 271.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and BIOL 20A, BIOE 20B, and BIOE 20C.

BIOE 172 - Population Genetics (5)

Basic population genetics and selected topics will be covered, including genetics of speciation, tempo and mode of evolution, genetics of social behavior, natural selection in human populations, and the impact of molecular studies on evolutionary theory. Students cannot receive credit for this course and BIOE 272.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, BIOE 20C, and BIOL 105, and satisfaction of the Entry Level Writing and Composition requirements. Concurrent enrollment in BIOE 172L is required.

BIOE 172L - Population Genetics Laboratory (2)

A companion course to 172 Population Genetics that applies the theory developed in that course to related disciplines including conservation biology, ecology, agriculture, and population biology. Original scientific literature relating to the theory developed in BIOE 172 is read, and applied problem

sets are solved by the students. Students cannot receive credit for this course and BIOE 272L.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, BIOE 20C, and BIOL 105, and satisfaction of the Entry Level Writing and Composition requirements. Concurrent enrollment in BIOE 172 is required.

BIOE 182F - Exploring Research in EEB (2)

Provides undergraduate students with exposure to research in the laboratory of an Ecology and Evolutionary Biology (EEB) faculty member, affiliate, or adjunct. Students are not expected to do independent research but rather to assist in laboratory or field research projects under the supervision of the faculty mentor or appointed researcher. Prerequisite(s): Undergraduate research contract on file with the department. If supervised by different faculty or researchers, may be repeated for credit.

BIOE 183L - Undergraduate Research in EEB (3)

Designed to ensure that students are intellectually engaged in the planning or implementation of a supervised or independent research project, achieve a fundamental understanding of implementing the scientific method, and develop their scientific writing and presentation skills. Prerequisite(s): concurrent enrollment in course 183W and an Undergraduate Research Contract on file with the department.

BIOE 183W - Undergraduate Research in EEB--Writing (2)

Working in coordination with an Ecology and Evolutionary Biology (EEB) faculty member, affiliate or adjunct, students develop and write a formal research proposal or report and give a presentation on their research project. Includes weekly class meetings focused on the philosophy of science, basic statistics, library searches, inputting data, creating graphs, and preparing results for publication, posters, and talks.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and BIOE 107, BIOE 108, or BIOE109; and an undergraduate research contract on file with the department.

BIOE 193 - Independent Research in EEB (5)

Continued undergraduate research on a project sponsored by an Ecology and Evolutionary Biology (EEB) faculty member, affiliate, or adjunct. Students are graded on the quality of their research and meeting the terms of their undergraduate research contract. Prerequisites: course 183W and an undergraduate research contract on file with the department.

BIOE 193F - Independent Research in EEB (2)

Continued undergraduate research on a project sponsored by an Ecology and Evolutionary Biology (EEB) faculty member, affiliate, or adjunct. Students are graded on the quality of their research and meeting the terms of their undergraduate research contract. Prerequisites: course 183W and an undergraduate research contract on file with the department.

BIOE 195 - Senior Thesis (5)

An individually supervised course, with emphasis on independent research. Students required to submit a senior thesis. Enrollment is restricted to majors in biology, ecology and evolution, marine biology, plant sciences, and the combined major with environmental studies. Students submit petition to sponsoring agency.

BIOE 198F - Independent Field Study (2)

Provides for two credits of independent field study (a) by means other than the usual supervision in person, or (b) when the student is doing all or most of the coursework off campus. Students submit petition to sponsoring agency.

BIOE 199 - Tutorial (5)

Reading, discussion, written reports, and laboratory research on selected biological topics, using facilities normally available on campus. Students submit petition to sponsoring agency.

BIOE 199F - Tutorial (2)

Two-credit Tutorial. Reading, discussion, written reports, and laboratory research on selected biological topics, using facilities normally available on campus. Students submit petition to sponsoring agency.

Graduate

BIOE 200A - Scientific Skills (5)

Exposes graduate students to teaching skills, understanding the scientific method, searching and organizing literature, grant proposal and scientific writing, data management and presentation, and scientific speaking. Students are evaluated on their participation and the quality of a written research proposal.

Prerequisite: Enrollment is restricted to graduate students.

BIOE 200B - Advanced Organismal Biology (5)

Consists of lectures focusing on pivotal topics in ecology and evolution. Relevant background material is developed followed by a critical analysis of readings from the primary literature. Designed to give graduate (and advanced undergraduate) students direct contact with the major areas of research that are currently at the forefront of organismal biology.

Prerequisite: Enrollment is restricted to graduate students.

BIOE 208 - Marine Ecology (5)

Paradigms and designs in marine ecology. A review of the paradigms that have shaped our understanding of marine ecology; analysis and discussion of experiments with these paradigms. Students cannot receive credit for this course and course 108.

Prerequisite: Enrollment is restricted to graduate students.

BIOE 245 - Plant Ecology (5)

An exploration of the ecology of plant form, function, distribution, abundance, and diversity. Topics include plant adaptations to environmental conditions, life history variation, competition, reproductive ecology, herbivory, and patterns of diversity. Lecture with discussions of original papers and independent field project. Students cannot receive credit for this course and course 145.

Prerequisite: Prerequisite(s): BIOE 107 or ENVS 24 or permission of instructor. Enrollment is restricted to graduate students.

BIOE 245L - Field Methods in Plant Ecology Laboratory (5)

Hands-on exploration of the concepts and techniques of plant ecology. A combination of lab, greenhouse, and field-based exercises (irrespective of weather conditions), statistical analysis, and scientific writing. One required weekend field trip. Students cannot receive credit for this course and course 145L.

Prerequisite: Enrollment is restricted to graduate students.

BIOE 247 - Community Ecology (5)

Develops the major themes of community ecology: structure, trophic dynamics, succession, complex interactions among species, herbivory, evolution, and coevolution. Uses case histories of well-studied marine and terrestrial systems. Students cannot receive credit for this course and course 147.

Prerequisite: Enrollment is restricted to graduate students.

BIOE 248A - Quantitative Ecology (5)

Incorporates building mathematical models and fitting them to data to answer questions in ecology and evolution. Includes learning to write computer code to simulate models and analyze data. Topics include models of population and evolutionary dynamics, and species interactions and behavior. Students cannot receive credit for this course and course 148A.

Prerequisite: Enrollment is restricted to graduate students.

BIOE 248B - Quantitative Methods in Ecology and Evolution (5)

Advanced methods for building mathematical models and fitting them to data to answer questions in ecology and evolution both mathematically and by writing computer code. Topics include: population dynamics and management, evolution and life-history theory, and behavior and game theory. Students cannot receive credit for this course and course 148B. Enrollment is restricted to graduate students. Enrollment is by permission of the instructor.

BIOE 258L - Experimental Marine Ecology (5)

Supervised individual research projects in experimental marine biology. Students carry out a complete research project, including (1) the formation of hypotheses, (2) the design and implementation of experiments, (3) collection, analysis, and interpretation of data, and (4) the write-up of an

oral presentation. Prerequisite(s): BIOE 208; and interview to assess ability to carry out field project.

BIOE 262 - Facilitating Change in Coastal Science Policy (5)

Skills-based course in effective leadership and communication, including stakeholder engagement, facilitation, conflict resolution, team building, and introduction to project management. Communication training includes identifying audiences and objectives (public, philanthropy, policymakers, managers, scientist practitioners) and leveraging non-traditional communication platforms. Enrollment is by application and restricted to graduate students.

BIOE 271 - Disciplinary Communication for Biologists (5)

Writing-intensive course focusing on developing skills in scientific communication, with an emphasis on communicating issues relevant to ecologists and evolutionary biologists. This course presents the norms and standards of scientific communication spanning multiple genres. Students cannot receive credit for this course and course 171.

Prerequisite: Enrollment is restricted to graduate students.

BIOE 272 - Population Genetics (5)

Basic population genetics and selected topics are covered including genetics of speciation, tempo and mode of evolution, genetics of social behavior, natural selection in human populations, and the impact of molecular studies on evolutionary theory. Students cannot receive credit for this course and Biology 172.

Prerequisite: Concurrent enrollment in BIOE 272L is required. Enrollment is restricted to graduate students.

BIOE 272L - Population Genetics Laboratory (2)

A companion course to 272 Population Genetics that applies the theory developed in that course to related disciplines including conservation biology, ecology, agriculture, and population biology. Original scientific literature relating to the theory developed in course 272 is read, and applied problem sets are solved by the students. Students cannot receive credit for this course and course 172L.

Prerequisite: Must be taken concurrently with BIOE 272. Enrollment is restricted to graduate students.

BIOE 279 - Evolutionary Ecology (5)

Analysis of the ways in which ongoing evolution and coevolution shape the ecological structure and dynamics of populations, species, and species interactions across geographic landscapes.

Prerequisite: Enrollment is restricted to graduate students.

BIOE 281A - Topics in Basic and Applied Marine Ecology (5)

Seminar focusing on concepts in basic and applied ecology. Structure rotates quarterly between graduate student research and readings of journal articles and textbooks.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

BIOE 281B - Topics in Molecular Evolution (2)

A discussion of current research and literature review on the subject of molecular evolution. Primary focus on recent results on molecular phylogenetics and molecular population genetics.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

BIOE 281C - Topics in Physiological Ecology (5)

An intensive seminar focusing on the interaction between physiological constraint and life history options and solutions employed by animals. Topics vary from comparative physiology to ecological theory. Participants are required to present results of their own research or review papers of interest.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

BIOE 281D - Topics in Global Change Ecology (5)

Focuses on fundamental concepts in global-change ecology, with emphasis on coastal and marine ecosystems and issues of sustainability. The seminar is devoted to reading and evaluating current and classic literature and discussing graduate student research.

Prerequisite: Enrollment is restricted to graduate students.

BIOE 281E - Topics in Freshwater Ecology (5)

Current topics in freshwater ecology, eco-evolutionary dynamics, fisheries, and fish ecology.

Prerequisite: Enrollment is restricted to graduate students. Qualified undergraduates may enroll with permission from instructor.

BIOE 281F - Ecological Research Topics (5)

Intensive research and discussions on plant-animal interactions. All students undertake a research project and meet weekly with the faculty sponsor to monitor progress. The group meets weekly to discuss experimental design and analysis, specific problems related to the students' research, relevant research papers, or manuscripts that the group members are writing. Each student gives a formal presentation of research plans or progress each quarter.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

BIOE 281G - Topics in Sexual Selection and Social Behavior (5)

Discussion of current topics, research, and methods in sexual selection and social behavior focusing on theoretical and empirical research and links between evolution and ecology. Students present and discuss their research, read and discuss current and classic literature, or read and discuss methods used in the field.

Prerequisite: Enrollment is restricted to graduate students. Qualified undergraduates may enroll by permission of the instructor.

BIOE 281H - Topics in Comparative Marine Physiology (5)

Intensive seminar on selected topics in marine physiology. Students present results from their own research and discuss recent advances from the literature.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

BIOE 281I - Topics in Disease Ecology, Population Biology, and Conservation (5)

Selected topics in population biology and disease ecology. Students present results from their own research and discuss recent advances from the literature. (Formerly Topics in Plant Population and Disease Ecology)

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll by permission of instructor.

BIOE 281K - Topics in Plant Evolution (5)

Intensive seminar on selected topics in plant evolution. Students present results from their own research and discuss recent advances from the literature.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll by permission of instructor.

BIOE 281L - Topics in Behavioral and Evolutionary Ecology (5)

An intensive seminar on selected topics in behavioral and evolutionary ecology. Students are expected to discuss the current literature and present literature reviews, research proposals, and preliminary results from their ongoing research.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

BIOE 281N - Topics in Marine Vertebrate Ecology (5)

Seminar on the ecology of marine vertebrates. Topics vary from the factors that explain the distribution of marine predators to island biogeography and the ecosystem effects of introduced vertebrates on islands.

Prerequisite: Enrollment is restricted to graduate students.

BIOE 281O - Topics in Plant-Water Relations (5)

Intensive seminar focusing on fundamental and evolutionary concepts in plant-water relations. Students present results from their own research and discuss recent advances from the literature.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll by permission of instructor.

BIOE 281P - Topics in Plant Population Ecology (5)

An intensive seminar on selected topics in plant ecology and population biology. Students present results from their own research and discuss recent advances from the literature.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission from instructor.

BIOE 281Q - Topics in Molecular Evolutionary Genetics (5)

An intensive seminar on selected topics in molecular evolutionary genetics. Students are required to present results from their own research projects, present a critical review paper at least once during the quarter, and submit a written research proposal.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduate students may enroll with permission of instructor.

BIOE 281R - Topics in Marine Ecology and Evolutionary Biology (5)

An intensive seminar series focusing on fundamental concepts in marine ecology. Emphasis changes quarter to quarter. At least one quarter per year is devoted to discussion of graduate student research. Other quarters involve reading and evaluating current and classic literature on marine ecology and evolutionary biology.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

BIOE 281S - Topics in Ancient DNA and Paleogenomics (5)

Topics in population genetics and genomics, focusing on work involving paleontological and archaeological material. Students present weekly written and oral reports of their research projects. Once each term, students critique a recent publication.

Prerequisite: Enrollment is restricted to graduate students. Qualified undergraduates may enroll with permission from instructor.

BIOE 281T - Species Interactions and Coevolution (5)

The genetics and ecological structure of species interactions, and the role of coevolution between species in shaping biodiversity.

Prerequisite: Enrollment is restricted to graduate students.

BIOE 281U - Topics in Invertebrate Biology (5)

An intensive study about concepts, theory, and techniques for graduate students conducting research on the ecology, genetics, evolution, systematics, or biodiversity of marine invertebrates.

Prerequisite: Enrollment is restricted to graduate students; advanced undergraduates may enroll with permission of instructor.

BIOE 281V - Topics in Behavioral Ecology (5)

A discussion of current topics and methods in behavioral ecology and life history evolution.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

BIOE 281W - Topics in Exercise and Environmental Physiology (5)

A weekly seminar discussion on current research and techniques in mammalian exercise and environmental physiology. Areas covered include locomotor physiology, exercise testing and cardiovascular monitoring, and biomechanics. Oral presentation of ongoing research or current literature required from each student.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

BIOE 286 - Experimental Design and Data Analysis (5)

Focuses on problems and designs in ecology and population biology. Topics include experimental design; exploratory data analysis; hands-on statistics; and graphical theory. Structured around a statistical analysis and graphics program to teach students to design surveys and experiments and analyze data. Previous work in statistics strongly recommended.

Prerequisite: Concurrent enrollment in BIOE 286L is required. Enrollment is restricted to graduate students.

BIOE 286L - Experimental Design and Data Analysis Lab (2)

Lab will focus on hands-on statistical problem solving, graphical presentations and experimental design issues.

Prerequisite: Concurrent enrollment in BIOE 286 is required. Enrollment is restricted to graduate students.

BIOE 293 - Readings in Ecology and Evolution (2)

Weekly readings and discussions of recent research papers in ecology, evolution, and related topics from organismal biology.

Prerequisite: Enrollment is restricted to graduate students.

BIOE 294 - Ecology, Evolutionary Biology Seminar (0)

Selected topics of current interest to ecologists and evolutionary biologists presented by weekly guest speakers.

Prerequisite: Enrollment is restricted to graduate students.

BIOE 295 - Advanced Ecology and Evolutionary Biology Seminar (0)

Course consists of extended weekly meetings organized around an advanced theme in theoretical or applied evolutionary biology, ecology, physiology, behavior, or other aspect of organismal biology. Course is targeted at students who already have reached a professional level of expertise in their field and advanced master students.

Prerequisite: Enrollment is restricted to graduate students.

BIOE 297A - Independent Study (5)

Independent study for graduate students who have not yet settled on a research area for their thesis. Students submit petition to sponsoring agency.

BIOE 297B - Independent Study (10)

Independent study for graduate students who have not yet settled on a research area for their thesis. Students submit petition to sponsoring agency.

BIOE 297C - Independent Study (15)

Independent study for graduate students who have not yet settled on a research area for their thesis. Students submit petition to sponsoring agency.

BIOE 299A - Thesis Research (5)

Students submit petition to sponsoring agency.

BIOE 299B - Thesis Research (10)

Students submit petition to sponsoring agency.

BIOE 299C - Thesis Research (15)

Students submit petition to sponsoring agency.

BIOL - BIOLOGY MOLECULAR CELL AND DEVELOPMENTAL

Lower-Division

BIOE 15 - Undergraduate Research Reports (1)

Undergraduate students who work in faculty research laboratories present the results of their projects. Organized by the Minority Undergraduate Research Program and the

Minority Access to Research Careers Program. Designed for students with membership in the above-mentioned programs. Prerequisite(s): qualifications as determined by instructor at first class meeting.

BIOL 20A - Cell and Molecular Biology (5)

Introduction to biochemistry, cell biology, molecular biology, and genetics.

Prerequisite: Prerequisite(s): CHEM 1A; students with a chemistry AP score of 4 or higher who wish to start their biology coursework prior to completing the CHEM 1A, may enroll by permission of the instructor.

BIOL 20L - Experimental Biology Laboratory (2)

Provides biology majors with the theory and practice of experimental biology. A wide range of concepts and techniques used in the modern laboratory are included in the exercises. Designed to satisfy the introductory biology lab requirement of many medical and professional schools. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BIOL 20A and previous or concurrent enrollment in BIOE 20B.

BIOL 80A - Female Physiology and Gynecology (5)

Biochemical, medical, social, and clinical aspects of the female body. Emphasis will be on biological-chemical interactions in the female organs. Topics include female anatomy, cell physiology, endocrine functions, sexuality and intimacy, sexually transmitted diseases, puberty, pregnancy, menopause, birth control, abortion, immunity, cancer.

BIOL 80E - Evolution (5)

Introduction to Darwinian evolution including how the theory was devised and a discussion of other theories proposed at the time. Explores the facts and evidence of evolutionary processes and the insights they provide in biological diversity, consequences of extinction, and emergence of new diseases. Includes a discussion of evolution and spirituality.

BIOL 80J - Biology of Emerging and Pandemic Diseases (5)

Designed to introduce non-biology majors to the biology of viruses, the human immune system, HIV/AIDS, and emerging viral pandemics. Also explores vaccine technology and viral mediated therapies. Social, political, and economic influences of HIV and other viral pandemics discussed.

BIOL 86 - Research Deconstruction: MCD Biology (3)

Explores scientific principles and logic through research seminars in molecular, cellular, and developmental biology. Additional topics may include diseases, stem cell biology, and other medically relevant areas in biomedical research.

Prerequisite(s): Mathematics 3 or equivalent (i.e., mathematics placement examination score), and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to first-year, sophomore, and junior students. Enrollment is by permission of the instructor.

BIOL 88 - Studies in Medicine: Its Art, History, Science, and

Philosophy (5)

An interdisciplinary, multicultural, and historical perspective of medicine focused primarily upon therapy and practice to achieve better understanding of the scope, practice, and limits of medicine.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

Upper-Division

BIOL 100 - Biochemistry (5)

An introduction to biochemistry including biochemical molecules, protein structure and function, membranes, bioenergetics, and regulation of biosynthesis. Provides students with basic essentials of modern biochemistry and the background needed for upper-division biology courses. Students who plan to do advanced work in biochemistry and molecular biology should take the Biochemistry and Molecular Biology 100 series directly. Students cannot receive credit for this course after they have completed any two courses from the BIOC 100A, BIOC 100B, and BIOC 100C sequence.

Prerequisite: Prerequisite(s): BIOL 20A and BIOE 20B; and CHEM 8A or CHEM 112A.

BIOL 100L - Biochemistry Laboratory (5)

Basic techniques and principles of laboratory biochemistry including isolation and characterization of a natural product, manipulation of proteins and nucleic acids to demonstrate basic physical and chemical properties; and characterization of enzyme substrate interactions. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BIOL 100 or BIOC 100A; BIOL 101L or BIOL 102L; and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to biological sciences and affiliated majors and biology minors. Non-majors may enroll by permission of the instructor.

BIOL 101 - Molecular Biology (5)

Covers the basic molecular mechanism of DNA replication and transcription, protein synthesis, and gene regulation in bacterial and eukaryotic organisms. The experimental techniques used to determine these mechanisms are emphasized. Unless students have already passed BIOL 20L, they are strongly encouraged to enroll in BIOL 101L.

Prerequisite: Prerequisite(s): BIOL 100 or BIOC 100A.

BIOL 101L - Molecular Biology Laboratory (2)

Laboratory course providing hands-on experience with, and covering conceptual background in, fundamental techniques in molecular biology and biochemistry, including DNA cloning, PCR, restriction digest, gel electrophoresis, protein isolation, protein quantification, protein immunoblot

(Western) analysis, and use of online bioinformatics tools. Students are billed a materials fee.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in BIOL 20L or BIOL 102J, and BIOL 101 or BIOC 100A is required. Students cannot receive credit for this course and BIOL 102L. Enrollment is restricted to biochemistry and molecular biology, biology B.S., molecular, cell, and developmental biology, and neuroscience majors.

BIOL 102J - Toxic RNA Lab I (5)

Introduction to hypothesis-driven laboratory research. Students will create models of a unique uncharacterized disease causing mutation using site directed mutagenesis. An understanding of introductory molecular biology and genetics required. Students are billed a materials fee. Prerequisite(s): BIOL 20A. Enrollment restricted to biological sciences and affiliated majors with sophomore standing or higher. Enrollment by application and permission of instructor.

BIOL 102L - Toxic RNA Laboratory I (5)

Introduces hypothesis-driven laboratory research. Students create models of a unique uncharacterized disease causing mutation and determine how it impacts the process of pre-mRNA splicing. An understanding of introductory molecular biology and genetics is required. Students are billed a materials fee. Prerequisite(s): BIOL 20A; and BIOL 20L or BIOL 102J. Enrollment is restricted to sophomore, junior, and senior biological sciences and affiliated majors. Enrollment is by application and permission of the instructor.

BIOL 103L - Toxic RNA Laboratory III (5)

Introduces hypothesis-driven laboratory research. Students create models of a unique, uncharacterized, disease-causing mutation and determine how it impacts the process of pre-mRNA splicing. An understanding of introductory molecular biology and genetics is required. Prerequisite(s): BIOL 102J and BIOL 102L and satisfaction of the Entry Level Writing and Composition is requirements. Enrollment is restricted to sophomores, juniors, and seniors majoring in biology, molecular, cell, and developmental biology, neuroscience, human biology, and biochemistry and molecular biology. Enrollment is by application and permission of the instructor.

BIOL 105 - Genetics (5)

Mendelian and molecular genetics; mechanisms of heredity, mutation, recombination, and gene action.

Prerequisite: Prerequisite(s): BIOL 20A and BIOE 20B.

BIOL 105L - Eukaryotic Genetics Laboratory (5)

Classical and newly developed molecular-genetic techniques used to explore genetic variation in wild populations of the fruit fly *Drosophila melanogaster*. Topics include Mendelian fundamentals, mapping, design of genetic screens, bio-informatic and database analysis, genetic enhancers, and population genetics. Students are billed a materials fee. Enrollment is restricted to biological sciences and affiliated majors; biology minors; non-majors by instructor permission.

Prerequisite: Prerequisite(s): BIOL 100 or BIOC 100A; BIOL 101L or BIOL 102L; BIOL 105; and satisfaction of the Entry Level Writing and Composition Requirements.

BIOL 109L - Yeast Molecular Genetics Laboratory (5)

Using budding yeast as an experimental organism, this laboratory provides practical experience in classic and modern molecular biology and in genetic and epigenetic methods, and develops strong scientific communication skills. Topics include mendelian genetics, linkage, gene replacement, chromatin immunoprecipitation and epigenetics. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BIOL 101 or BIOC 100A; and BIOL 101L or BIOL 102L, and BIOL 105. BIOL 115 strongly recommended. Satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to biological sciences and affiliated majors; biology minors. Non-majors enroll by instructor permission.

BIOL 110 - Cell Biology (5)

Covers the structure, organization, and function of eukaryotic cells. Topics include biological membranes, organelles, protein and vesicular trafficking, cellular interactions, the cytoskeleton, and signal transduction. Requires a good understanding of basic biochemistry and molecular biology.

Prerequisite: Prerequisite(s): BIOL 101 or BIOC 100A; and BIOL 105; and BIOL 101L or BIOL 102L or BIOL 20L.

BIOL 111 - Immunology (5)

Immune systems--their manifestations and mechanisms of action.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B, BIOL 105, and BIOL 110.

BIOL 111A - Immunology I (5)

Principles and concepts of the innate and adaptive immune systems, with emphasis on mechanisms of action and molecular and cellular networks. The development, differentiation, and maturation of cells of the immune system are also discussed.

Prerequisite: Prerequisite(s): courses BIOE 20B, BIOL 20A, BIOL 105, and BIOL 110.

BIOL 111B - Immunology II (5)

The immune system in health and disease, including failures of host immune-defense mechanisms, allergy and hypersensitivity, autoimmunity, transplantation biology, the immune response to tumors, immune-system interactions with pathogens, and manipulation of the immune response.

Prerequisite: Prerequisite(s): BIOL 111A.

BIOL 112 - Virology (3)

Principles of virology illustrated through study of specific examples. Topics include: viral genome organization, viral assembly, virus-host interactions, genetic diversity of viruses,

viral ecology, and the epidemiology of viral diseases.
Prerequisite(s): BIOL 101 and 110 and consent of instructor.

BIOL 114 - Cancer Cell Biology (5)

Focuses on the molecular and cellular mechanisms behind cancer. Topics covered include oncogenes, tumor suppressor genes, cell growth genes, checkpoint genes, telomeres, and apoptosis. Students will gain experience in reading the primary scientific literature.

Prerequisite: Prerequisite(s): BIOL 110 or BIOL 115.

BIOL 115 - Eukaryotic Molecular Biology (5)

Covers eukaryotic gene and genome organization; DNA, RNA, and protein synthesis; regulation of gene expression; chromosome structure and organization; and the application of recombinant DNA technology to the study of these topics.

Prerequisite: Prerequisite(s): BIOL 101 or BIOC 100A; and BIOL 105; and BIOL 101L or BIOL 102L. Enrollment restricted to biological sciences and affiliated majors, non-majors by permission of instructor.

BIOL 115L - Eukaryotic Molecular Biology Laboratory (5)

A laboratory designed to provide students with direct training in basic molecular techniques. Each laboratory is a separate module which together builds to allow cloning, isolation, and identification of a nucleic acid sequence from scratch. Students cannot receive credit for this course and BIOL 187L or BIOL 287L. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BIOL 100 or BIOC 100A; BIOL 101L or BIOL 102L; and satisfaction of the Entry Level Writing and Composition Requirements; and previous or concurrent enrollment in BIOL 101 or BIOL 115. Restricted to molecular, cell and developmental biology majors and affiliated majors; biology minors; other majors by permission.

BIOL 116 - Advanced Topics in Cell Biology (3)

Advanced course in cell biology featuring small-classroom discussion of topics related to the structure and function of cells and their organelles. Emphasis is given to experimental strategies used in cell biology research. Requires discussion of scientific literature and student-led presentations.

Prerequisite: Prerequisite(s): BIOL 110. Enrollment is restricted to senior human biology, molecular, cell, and developmental biology, and neuroscience majors. Other majors by permission of instructor.

BIOL 117 - Global Health and Neglected Diseases (3)

Neglected tropical diseases afflict more than 1 billion of the poorest individuals on the planet. This course covers the molecular basis and pathology of the most prevalent neglected diseases and emerging strategies to combat these diseases. (Formerly Neglected Tropical Diseases.)

Prerequisite: Prerequisite(s): BIOL 110. Enrollment is restricted to senior human biology, molecular, cell, and developmental biology, and neuroscience majors. Other majors by permission of instructor.

BIOL 120 - Developmental Biology (5)

A description and analysis of selected developmental events in the life cycle of animals. Experimental approaches to understanding mechanisms are emphasized. (Formerly Development.)

Prerequisite: Prerequisite(s): BIOL 110.

BIOL 120L - Development Laboratory (5)

Experimental studies of animal development using a variety of locally obtainable organisms. Approximately eight hours weekly, but it will often be necessary to monitor continuing experiments throughout the week. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BIOL 100 or BIOC 100A; and BIOL 101L or BIOL 102L; satisfaction of the Entry Level Writing and Composition requirements. Previous or concurrent enrollment in BIOL 120 is required. Enrollment is restricted to biological sciences and affiliated majors; biology minors; other majors by permission.

BIOL 121L - Environmental Phage Biology Laboratory (5)

Introduction to hypothesis-driven laboratory research. Students isolate a unique bacteriophage and characterize its structure and genome. An understanding of molecular biology and basic genetics is required. Students are billed a materials fee. Prerequisite(s): BIOL 100 or BIOC 100A; and BIOL 101L or 102L; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to biological sciences and affiliated majors with sophomore standing or higher. Enrollment is by application and permission of instructor.

BIOL 125 - Introduction to Neuroscience (5)

The structure and function of the nervous system. Topics include elementary electrical principles, biophysics and physiology of single nerve and muscle cells, signal transduction at synapses, development of the nervous system, and neural basis of behavior. Requires a good understanding of basic biochemistry, cell biology, and molecular biology.

Prerequisite: Prerequisite(s): BIOL 20A, BIOE 20B; and BIOL 101 or BIOC 100A; previous or concurrent enrollment in BIOL 110 is required.

BIOL 126 - Advanced Molecular Neuroscience (5)

Explores in detail cellular and molecular events that underlay the function of the nervous system. Topics include neural development, axon guidance and regeneration, advanced electrical principles (synaptic transmission through a variety of receptors), synaptic plasticity, learning and memory, as well as several neural disorders. Students cannot receive credit for this course and course 226.

Prerequisite: Prerequisite(s): BIOL 125. Enrollment is restricted to neuroscience majors and proposed majors.

BIOL 128 - Developmental Neurobiology (5)

Covers the principles of nervous-system development from the molecular control of development, cell-cell interactions, to the role of experience in influencing brain structure and function. Students cannot receive credit for this course and course 228.

Prerequisite: Prerequisite(s): BIOL 110 and BIOL 125.
Enrollment is restricted to juniors and seniors.

BIOL 130 - Human Physiology (5)

Function, organization, and regulation of the major organ systems of humans, with emphasis on integration among systems. Students cannot receive credit for this course and course 131.

Prerequisite: Prerequisite(s): BIOL 110.

BIOL 130L - Human Physiology Laboratory (2)

Examines fundamental principles of systemic physiology focusing on the human. Students cannot receive credit for this course and BIOE 131L. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BIOL 110; BIOL 20L or 102J; and previous or concurrent enrollment in BIOL130 is required. Satisfaction of Entry Level Writing and Composition requirements. Enrollment is restricted to biological sciences and affiliated majors; biology minors; other majors by permission.

BIOL 140 - The RNA World (5)

This active-learning course explores the origins, evolution, and functions of ribonucleic acid (RNA), including ribozymes, ribosomes, IRNAs, spliceosomes, riboswitches, messenger RNA, microRNAs, snRNAs, snoRNAs, and other guide RNAs, CRISPR, long noncoding RNAs, retrotransposons, and RNA viruses.

Prerequisite: Prerequisite(s): BIOL 105 or BME 105, and BIOL 101.

BIOL 186F - Undergraduate Research in MCD Biology (2)

Supervised undergraduate research in laboratory of an MCD biology faculty member accompanied by weekly lectures on ethical and practical scientific issues. Topics include: laboratory safety; the scientific method; the collection, treatment, and presentation of data; critical evaluation of scientific literature; scientific misconduct; and peer review. Career issues, including how to apply for admission to graduate and professional schools, are also discussed. Prerequisite(s): BIOL 100 or BIOC 100A; and BIOL 20L or BIOL 102J; and previous completion of the Disciplinary Communication requirement. Each enrolled student must have a committed MCD faculty sponsor by the first class meeting. Enrollment is restricted to biology and affiliated majors.

BIOL 186L - Undergraduate Research in MCD Biology (5)

Supervised undergraduate research in laboratory of an MCD biology faculty member accompanied by weekly lectures on ethical and practical scientific issues. Topics include:

laboratory safety; the scientific method; the collection, treatment, and presentation of data; critical evaluation of scientific literature; scientific misconduct; and peer review. Career issues, including how to apply for admission to graduate and professional schools, are also discussed. Prerequisite(s): Entry Level Writing and Composition requirements; BIOL 100 or BIOC 100A; and BIOL 20L or BIOL 102J. Each enrolled student must have a committed MCD faculty sponsor by the first class meeting. Enrollment is restricted to biology and affiliated majors.

BIOL 186R - Undergraduate Research in MCD Biology (5)

Supervised undergraduate research in the laboratory of an MCD biology faculty member accompanied by weekly lectures on practical scientific issues. Topics include: laboratory safety; the scientific method; the collection, treatment, and presentation of data; critical evaluation of scientific literature; ethics and scientific misconduct; and peer review. Career issues, including how to apply for admission to graduate and professional schools, are discussed. Students cannot receive credit for this course and course 186L. Prerequisite(s): BIOL 100 or BIOC 100A; and BIOL 20L or BIOL 102J; and previous completion of the Disciplinary Communication requirement. Each enrolled student must have a committed MCD faculty sponsor by the first class. Enrollment is restricted to MCD Biology-affiliated majors.

BIOL 188 - A Life in Medicine (3)

Students explore healthcare from the perspectives of both clinicians and patients. The class focuses on medicine's cognitive, emotional, and spiritual elements, with the goal of understanding the rewards and costs of healthcare practice. (Formerly Life in Healthcare.)

Prerequisite: Enrollment is restricted to junior and senior human biology majors, and others by permission of instructor.

BIOL 189 - Health Sciences Internship (3)

Structured off-campus learning experience providing experience and pre-professional mentoring in a variety of health-related settings. Interns are trained and supervised by a professional at their placement and receive academic guidance from their faculty sponsor. Students spend 8 hours per week at their placement, participate in required class meetings on campus, and keep a reflective journal. Enrollment is by application. Students interview with health sciences internship coordinator; applications are due one quarter in advance to the Health Sciences Internship Office. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; previous or concurrent enrollment in course 189W is required. Enrollment is restricted to human biology majors.

BIOL 189W - Disciplinary Communication: Human Biology (2)

Writing-intensive course offered in conjunction with the health sciences internship. Weekly class meetings include academic guidance and mentoring as well as discussion of the mechanisms and conventions of academic writing about health and health care. Students complete multiple writing assignments, culminating in a term paper in the format of a

scholarly article. Enrollment is by application. Students interview with the health-sciences internship coordinator; applications are due one quarter in advance to the Health Care Sciences Internship Office. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Previous or concurrent enrollment in course 189 is required. Enrollment is restricted to human biology majors.

BIOL 195 - Senior Thesis Research (5)

An individually supervised course, with emphasis on independent research, to culminate in a senior thesis. Students submit petition to sponsoring agency.

BIOL 198 - Independent Field Study (5)

Provides for individual programs of study (a) by means other than the usual supervision in person, or (b) when the student is doing all or most of the coursework off campus. With permission of the department, may be repeated for credit, or two or three courses taken concurrently. Students submit petition to sponsoring agency.

BIOL 198F - Independent Field Study (2)

Provides for two credits of independent field study (a) by means other than the usual supervision in person, or (b) when the student is doing all or most of the coursework off campus. Students submit petition to sponsoring agency.

BIOL 199 - Tutorial (5)

Reading, discussion, written reports, and laboratory research on selected biological topics, using facilities normally available on campus. Students submit petition to sponsoring agency.

BIOL 199F - Tutorial (2)

Two-credit Tutorial. Reading, discussion, written reports, and laboratory research on selected biological topics, using facilities normally available on campus. Students submit petition to sponsoring agency.

Graduate

BIOL 200A - Critical Analysis of Scientific Literature (5)

Development of critical thinking skills via discussion of research articles on a broad range of topics. Prepares students to critically evaluate research publications, and improves their ability to organize effective oral presentations and to evaluate the oral presentations of other scientists.

Prerequisite: Enrollment is restricted to graduate students in MCD biology, or by permission of instructor.

BIOL 200B - Advanced Molecular Biology (5)

An in-depth coverage of the structure, function, and synthesis of DNA, RNA, and proteins. Discussion of the roles of macromolecules in the regulation of information in the cell.

Prerequisite: Prerequisite(s): Enrollment is restricted to graduate students.

BIOL 200C - Advanced Cell Biology (5)

An in-depth coverage of topics in cellular and subcellular organization, structure, and function in plants and animals. Emphasis on current research problems.

Prerequisite: Prerequisite(s): BIOL 200B. Enrollment is restricted to graduate students.

BIOL 200D - Developmental Biology (5)

Key topics in developmental biology, including developmental genetics, epigenetics, stem cell biology, and developmental neurobiology. Lectures are accompanied by critical analysis and discussion of recent publications.

Prerequisite: Enrollment is restricted to graduate students in MCD biology, or by permission of instructor.

BIOL 200E - Experimental Design (3)

A multidisciplinary course that focuses on topics to consider when tackling biomedical research questions experimentally. Lectures highlight important issues to take into account, are coupled with group discussions and intensive analysis of primary literature, and involve case studies to practically demonstrate how these considerations might be implemented.

Prerequisite: Concurrent enrollment in BIOL 200A is required.

BIOL 200F - Logic and Approaches to Scientific Discovery (5)

Multidisciplinary course with an emphasis on discussion of approaches and methods involved in the study of biological questions. Lectures focus on current gaps in our knowledge of topics and approaches to test models and hypotheses. Course focuses on current topics in RNA and DNA molecular biology, cell biology, developmental biology, stem cells, neurobiology, and genomics. Lectures coupled with small group discussions and written assignments.

Prerequisite: Prerequisite(s): BIOL 200A. Enrollment is restricted to graduate students.

BIOL 201 - RNA Processing (5)

An advanced graduate-level course on biological aspects of RNA function and processing in eukaryotes. Lectures and discussions will be developed using the current literature.

Prerequisite: Prerequisite(s): BIOL 200B or permission of instructor. Enrollment is restricted to graduate students.

BIOL 203 - Ribosomes and Translation (5)

Covers the field of ribosome research in depth, including the structure and function of ribosomes and the molecular mechanisms of protein synthesis. Begins with historical review of the ribosome field and proceeds to the most recent findings. Focus is on central questions: (1) How is the accuracy of the aminoacyl-tRNA selection determined? (2) What is accommodation? (3) What is the mechanism of peptide bond formation (peptidyl transferase)? (4) What is the mechanism of translocation? (5) What are the mechanistic

roles of the ribosome and translation factor EF-G in translocation? (6) To what extent is the mechanism of translation determined by RNA? (7) Why is RNA so well suited for the ribosome? (8) How did translation evolve from an RNA world?

Prerequisite: Prerequisite(s): BIOC 100A, BIOL 200B or permission of instructor. Enrollment is restricted to graduate students.

BIOL 204 - Chromatin (5)

Eukaryotic DNA is complexed with histones to form chromatin. This course focuses on the ways in which chromatin influences and is manipulated to regulate gene expression

Prerequisite: Prerequisite(s): BIOL 105 and BIOL 115; undergrads by permission of instructor. Enrollment is restricted to graduate students.

BIOL 205 - Epigenetics (5)

In-depth coverage of epigenetics focusing on how alterations in chromatin structure and DNA methylation establish and maintain heritable states of gene expression. Lectures are supplemented with critical discussion of recent publications.

Prerequisite: Prerequisite(s): BIOL 105 and BIOL 115, or permission of instructor. Enrollment is restricted to graduate students.

BIOL 206 - Introduction to Stem Cell Biology (5)

Fundamental concepts, experimental approaches, and current advances in stem cell biology, with consideration of key ethical issues. Topics include: self-renewal and differentiation; the microenvironment; epigenetics; cell-cycle regulation; and how basic research translates to medical therapeutics. Ethical, moral, and political issues surrounding stem cell research are discussed with lectures from philosophy and other relevant disciplines.

Prerequisite: Enrollment is restricted to graduate students.

BIOL 206L - Current Protocols in Stem Cell Biology (5)

Provides students with hands-on experience in embryonic stem cell culture methods.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll by permission of instructor.

BIOL 208 - Cellular Signaling Mechanisms (5)

All eukaryotic cells utilize intricate signaling pathways to control such diverse events as cell-cell communication, cell division, and changes in cell morphology. This course covers the molecular basis of these cellular signaling pathways, focusing on the most current research.

Prerequisite: Prerequisite(s): BIOL 105, BIOL 110, and BIOL 115. Enrollment is restricted to seniors and graduate students.

BIOL 214 - Advances in Cancer Biology (5)

Provides students with knowledge of the latest concepts in cancer biology and cancer therapeutics, and a general appreciation of the rapid advances being made in this area of biomedicine.

Prerequisite: Prerequisite(s): BIOL 200B or by permission of instructor. Enrollment is restricted to graduate students.

BIOL 215 - Applied Statistics for Molecular, Cell, and Developmental Biology (5)

For experimental biologists: focuses on resolving practical statistical issues typically encountered in molecular, cellular, and developmental biology lab research. No prior experience in statistics or programming is necessary.

Prerequisite: Enrollment is restricted to graduate students in molecular, cellular, and developmental biology.

BIOL 217 - Influence of Environment and Experience on Brain Development (5)

How environmental factors (animals' experiences, environmental toxins, etc.) affect the formation of neuronal circuits and brain function. Lectures and discussions use current literature.

Prerequisite: Prerequisite(s): BIOL 200A, BIOL 200B, BIOL 200C, and BIOL 200D, or by permission of the instructor. Enrollment is restricted to graduate students.

BIOL 218 - CRISPR/Cas Technologies (5)

Provides an overview of the continually emerging roles for CRISPR in biomedical research. Topics will include an overview of the CRISPR genome defense systems in bacteria, the mechanisms of DNA cleavage and repair, the many uses of CRISPR as a genome editing tool in model organisms, and discussions on the ethical use of the technology in precision medicine.

Prerequisite: Prerequisite(s): BIOL 200A, BIOL 200B, and BIOL 200C. Enrollment restricted to graduate students.

BIOL 226 - Advanced Molecular Neuroscience (5)

Basis of neural behavior at the cellular, molecular and system levels. First half of course focuses on cellular, molecular, and developmental aspects of the nervous system and covers two sensory systems: olfaction and auditory. Last half of course concerns higher-level functions of the nervous system, such as processing and integrating information. Discusses human diseases and disorders.

Prerequisite: Enrollment is restricted to graduate students.

BIOL 228 - Developmental Neurobiology (5)

Covers the principles of nervous-system development from the molecular control of development, and cell-cell interactions, to the role of experience in influencing brain structure and function. Students cannot receive credit for this course and course 128. Enrollment is restricted to graduate students and by permission of the instructor.

BIOL 280A - Topics in Research on Molecular Genetics of Yeast (2)

Intensive research seminar on the structure and function of the gene expression machinery in the simple eukaryote *Saccharomyces cerevisiae* and its relationship to the human gene expression machinery.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with approval of instructor.

BIOL 280B - Chromatin Structure and Transcriptional Regulation (2)

Weekly seminar on structure and gene regulatory function of chromatin. Discusses research of participants and relevant scientific literature.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

BIOL 280C - Mammalian Brain Development (2)

Seminar covers research into the development of the mammalian brain.

Prerequisite: Enrollment is restricted to graduate students; undergraduates may enroll with permission of instructor.

BIOL 280D - RNA Processing (2)

A discussion of current research and literature concerning the regulation of precursor messenger RNA processing.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

BIOL 280E - Meiotic Chromosome Dynamics (2)

Intensive course on the molecular mechanisms underlying homolog pairing, synapses, and recombination; and how they are regulated, coordinated, and monitored to ensure accurate meiotic chromosome segregation.

Prerequisite: Enrollment is restricted to graduate students; undergraduates may enroll with permission of instructor.

BIOL 280F - Development of Vertebrate Neural Connections (2)

Intensive research seminar on molecular mechanisms by which neural connections are established during mouse development. Special focus on topographic maps and role of Eph receptors and ephrins in this process.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

BIOL 280G - Physiology of the Developing Brain (2)

Research seminar covering circuit structure and function in the developing brain.

Prerequisite: Enrollment is restricted to graduate students; undergraduates may enroll by permission of the instructor.

BIOL 280H - Topics on Research into Chromatin and Transcription (2)

Seminar covering research into the effects of chromatin on transcription in yeast.

Prerequisite: Enrollment is restricted to graduate students; undergraduates may enroll with permission of instructor.

BIOL 280I - Epigenetic Gene Silencing and Insulators (2)

Intensive course on molecular mechanisms by which insulator elements regulate epigenetic gene silencing.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

BIOL 280J - Structures of Macromolecular Complexes (2)

Focuses on structure and function of the spliceosome using electron microscopy and x-ray crystallography. Participants present results from their own research and relevant journal articles.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

BIOL 280K - Topics in Cell Cycle Research (2)

An intensive seminar focusing on current research on the molecular mechanisms that control cell division. Participants are required to present results of their own research or to review journal articles of interest.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

BIOL 280L - Development (2)

Seminar covering research into breast development and cancer. (Formerly Topics on Neural Development.)

Prerequisite: Enrollment is restricted to graduate students.

BIOL 280M - Post-Transcriptional Control of Mammalian Gene Expression (2)

Intensive course on the molecular mechanisms by which RNA binding proteins regulate gene expression.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with the permission of the instructor.

BIOL 280N - Long Noncoding RNA and the Immune System (2)

Weekly seminar discussion of the current research and literature concerning the functions for long noncoding RNA in gene regulation within inflammatory signaling pathways.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll by permission of the instructor.

BIOL 280P - Quality Control in Gene Expression (2)

Intensive, discussion-based course concerning ongoing research in quality control and gene expression via analysis of published and unpublished observations and theories.

Prerequisite: Enrollment is restricted to graduate students.

BIOL 280Q - Cell Biology of Oocytes, Embryos, and Neurons (2)

Weekly seminar and round-table discussion about research problems and recent advances in molecular motor proteins, cytoskeletons, and the control of force-producing processes. Each participant reports recent advances in their field from current literature, their own primary research questions, current approaches to answering those questions, and their research progress.

Prerequisite: Enrollment is restricted to graduate students; undergraduates may enroll with permission of instructor.

BIOL 280R - Gene regulation in *C. elegans* and human parasitic nematodes (2)

Intense weekly seminar on the mechanisms of gene regulation, focusing on *C. elegans* and human parasitic nematodes.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with the permission of the instructor.

BIOL 280S - Chromatin and RNA Regulation in *C. elegans* (2)

Intensive research seminar about regulators of chromatin organization; the composition and function of germ granules; and the roles of both levels of regulation in germline development in *C. elegans*. Participants present their research results and report on related journal articles.

Prerequisite: Enrollment is restricted to graduate students; undergraduates may enroll with permission of instructor.

BIOL 280T - Molecular Biology of *Drosophila* Development (2)

An intensive seminar concerning the molecular genetics of *Drosophila*. Recent research is discussed weekly, with an emphasis on gene regulation and development. Students present their own research or critical reviews of recent articles at least once during the quarter.

Prerequisite: Enrollment is restricted to graduate students. Qualified undergraduates may enroll with permission of instructor.

BIOL 280U - Discussions on the Development of the *Drosophila* Embryo (2)

Involves a two-hour weekly meeting in which the students discuss topics concerning the cell cycle, early embryonic development, and the cytoskeleton. These discussions critically evaluate ongoing research in this area. Material is drawn from student research and recently published journal articles. Students are also expected to meet individually with the instructor two hours weekly. In addition to a three–five page research proposal, each student gives two one-hour oral presentations.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

BIOL 280V - Translational pediatric genomics (2)

Weekly discussion of the current research and literature on translational pediatric genomics. Specific patient cases may be discussed.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll by permission of the instructor.

BIOL 280W - Development, Connectivity, and Genetic Identity of Neural Circuits (2)

This seminar course will cover the current topics and progress of neuroscience research on neural circuit development, connectivity, function and genetics. (Formerly Membrane Proteins.)

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

BIOL 280X - RNA-mediated epigenetic inheritance (2)

Intensive research seminar about epigenetic inheritance and the role of small non-coding RNAs in the intergenerational inheritance of paternal environmental effects. Participants present their research results and report on related journal articles.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll by permission of the instructor.

BIOL 280Y - Activity-Dependent Synaptic Plasticity (2)

Research seminar covering the regulation of synaptic plasticity in the mammalian nervous system, focusing on how the activity regulates the structural and functional dynamics of synapses.

Prerequisite: Enrollment is restricted to graduate students; undergraduates may enroll with permission of instructor.

BIOL 280Z - Prostate Development and Cancer Biology (2)

Weekly research seminar covering gene regulation, cellular interactions, and stem cell behaviors in mammalian prostate development and prostate cancer progression.

Prerequisite: Enrollment is restricted to graduate students; undergraduates may enroll by the permission of the instructor.

BIOL 288 - Pedagogy in STEM (2)

Prepares graduate students to help teach university science courses. Weekly class sessions include activities and interactive discussions of diverse modes of learning, diverse ways of teaching, peer instruction, assessment of learning, equity and inclusion, and professional ethics. Students also visit an active learning class and an active learning discussion section at UCSC, then write evaluations of the teaching strategies used in those classes. (Formerly Teaching Assistant Training.)

Prerequisite: Enrollment is restricted to graduate students.

BIOL 289 - Practice of Science (5)

Examination of ethical and practical scientific issues, including the collection and treatment of data, attribution of credit, plagiarism, fraud, and peer review. Career issues, including how to apply for grants and positions in industry or academia, will be discussed.

Prerequisite: Prerequisite(s): BIOL 200A, BIOL 200B, and BIOL 200C or permission of instructor. Enrollment is restricted to graduate students; undergraduates may enroll with permission of the instructor.

BIOL 290 - Career Planning (2)

An important goal of graduate programs is to train students for diverse careers. Exposes molecular cell and developmental biology graduate students to diverse career options and helps them develop individual development plans to target their graduate training to their selected career goals.

Prerequisite: Enrollment is restricted to graduate students.

BIOL 291 - Molecular, Cellular, and Developmental Biology Seminar (2)

Topics of current interest in molecular, cellular, and developmental biology are presented weekly by graduate students, faculty, and guest speakers.

Prerequisite: Enrollment is restricted to graduate students.

BIOL 292 - MCD Seminar (0)

Various topics by weekly guest speakers.

Prerequisite: Enrollment is restricted to graduate students.

BIOL 296 - Laboratory Research in Molecular, Cell, and Developmental Biology (5)

Independent laboratory research in molecular, cellular, and developmental biology. Students submit petition to sponsoring agency.

BIOL 297A - Independent Study (5)

Independent study for graduate students who have not yet settled on a research area for their thesis. Students submit petition to sponsoring agency.

BIOL 297B - Independent Study (10)

Independent study for graduate students who have not yet settled on a research area for their thesis. Students submit petition to sponsoring agency.

BIOL 297C - Independent Study (15)

Independent study for graduate students who have not yet settled on a research area for their thesis. Students submit petition to sponsoring agency.

BIOL 297F - Independent Study (2)

Independent study for graduate students who have not yet settled on a research area for their thesis. Students submit petition to sponsoring agency.

BIOL 299A - Thesis Research (5)

Students submit petition to sponsoring agency.

BIOL 299B - Thesis Research (10)

Students submit petition to sponsoring agency.

BIOL 299C - Thesis Research (15)

Students submit petition to sponsoring agency.

BIOL 299F - Thesis Research (2)

Students submit petition to sponsoring agency.

Prerequisite: Enrollment is restricted to graduate students.

BME - BIOMOLECULAR ENGINEERING Lower-Division

BME 5 - Introduction to Biotechnology (5)

Introduces the tools and applications of biotechnology in the fields of medicine, agriculture, the environment, and industry.

BME 18 - Scientific Principles of Life (5)

The principles of life as it exists on this planet and how they generalize. Darwinian evolution, genomes, scientific theories of life (mechanistic, thermodynamic, information theoretic). Future of life: Internet, machine learning and adaptation, artificial intelligence, genome editing, fully artificial life. Earth Sciences 7 is recommended as preparation.

BME 21L - Introduction to Basic Laboratory Techniques (5)

Introduces students to basic laboratory techniques that are essential to begin work in faculty research labs and on capstone projects. Students have several independent blocks/fixes projects and learn how to use various instruments

and techniques employed in biotechnology laboratories, such as: calibration and use of the pipette; making up various buffers; pH titration; Bacterial transformation; TAcloning; plasmid and DNA isolation; Polymerase Chain Reaction (PCR); gel electrophoresis; Pyrosequencing; and an introduction to Linux for DNA sequence analysis. Students are billed a materials fee.

Prerequisite: Enrollment is restricted to bioengineering, bioinformatics, and biomolecular engineering and bioinformatics majors and proposed majors.

BME 22L - Foundations of Design and Experimentation in Molecular Biology, Part I (2)

The first in a two-part series that includes BME 23L. Together these courses prepare bioengineering students for successful junior/senior year projects in faculty research laboratories, iGEM, or Senior Design. The focus is on molecular biology laboratory and introductory bioinformatics skills. Students will design and initiate an original metagenome study near the end of the term.

Prerequisite: Prerequisites: BME 21L and CHEM 1A, CHEM 1B, CHEM 1M, and CHEM 1N; or by permission of instructor. Enrollment is restricted to sophomores and juniors.

BME 23L - Foundations of Design and Experimentation in Molecular Biology, Part II (2)

Continuation of BME 22L. Together these courses prepare bioengineering students for successful junior/senior year projects in faculty research laboratories, iGEM, or Senior Design. The focus is on molecular biology laboratory and introductory bioinformatics skills. Students will complete original metagenome and transcriptome studies.

Prerequisite: Prerequisites: BME 22L or by permission of instructor.

BME 51A - Applied Electronics for Bioengineers Part 1 (5)

Lab-based course that introduces measuring, modeling, and designing electronics circuits, emphasizing voltage dividers and complex impedance culminating in simple, negative-feedback op amp circuits for amplifying audio signals. Students are billed a materials fee.

Prerequisite: Prerequisite(s): MATH 19A; or MATH 11A by consent of instructor. High school physics recommended. Enrollment is restricted to bioengineering and biomolecular engineering & bioinformatics majors and proposed majors; other majors by consent.

BME 51B - Applied Electronics for Bioengineers Part 2 (5)

Lab-based course that introduces designing, measuring, and modeling electronics circuits, emphasizing RC filters and negative-feedback amplifiers for various sensors circuits for amplifying audio signals, design of multi-stage amplifiers, transimpedance amplifiers, instrumentation amplifiers, and class-D power amplifiers. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BME 51A.

BME 80G - Bioethics in the 21st Century: Science, Business, and Society (5)

Serves science and non-science majors interested in bioethics. Guest speakers and instructors lead discussions of major ethical questions having arisen from research in genetics, medicine, and industries supported by this knowledge.

BME 80H - The Human Genome (5)

Course will focus on understanding human genes. Accessible to non-science majors. Will cover principles of human inheritance and techniques used in gene analysis. The evolutionary, social, ethical, and legal issues associated with knowledge of the human genome will be discussed.

BME 94 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

BME 94F - Group Tutorial (2)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

BME 99 - Tutorial (5)

Students submit petition to sponsoring agency.

BME 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

BME 105 - Genetics in the Genomics Era (5)

Principles of genetics and genomics focusing on how sequencing technologies enable us to understand gene function, genotype to phenotype relationships, and genetic inheritance.

Prerequisite: Prerequisite(s): BIOL 20A and BIOE 20B. Enrollment is restricted to bioengineering, biomolecular engineering and bioinformatics, and bioinformatics majors and proposed majors.

BME 110 - Computational Biology Tools (5)

Hands-on lectures and laboratory geared to teach basic tools and skills used in computational biology (genome browsers, sequence database searching, motif analysis, multiple sequence alignment, gene finders, phylogenetics analysis, protein structure visualization, and others). Web-based tools/databases are used on student laptops. Open to all science students; no prior programming or Unix experience required.

Prerequisite: Prerequisite(s): BME 105, or BIOL 100, or BIOL 105, or BIOC 100A, or CHEM 103, or declared Bioinformatics majors.

BME 122H - Extreme Environmental Virology (5)

Examines life in extreme environments with an emphasis on the viruses that live there. Integrates aspects of virology, molecular biology, and computational biology. Students investigate a high-salt, extreme environment at the Don Edwards National Wildlife Refuge, and use DNA extraction methods to find molecular evidence of the organisms that live there and describe the genetic content of viruses and the community living in those high-salt ponds.

Prerequisite: Enrollment is restricted to College Scholar Students, and or by permission of the instructor.

BME 123T - Senior Thesis Writing (5)

For bioengineering senior thesis students, guidance in preparing a draft manuscript describing their senior research project. Students also practice conference-style oral or poster presentation. Enrollment is restricted to senior bioengineering majors.

Prerequisite: Prerequisite(s): BME 185 or CSE 185E. Concurrent enrollment in BME 193F or BME 195F or BME 198F or CSE 193F or CSE 195F or CSE 198F or ECE 193F or ECE 195F or ECE 198F is required.

BME 128 - Protein Engineering (5)

For bioengineering, bioinformatics, and biology majors, focuses on engineering (i.e., changing) of proteins. Topics focus on practical aspects of protein engineering strategies that are crucial to modern biotechnology and biomedical applications.

Prerequisite: Prerequisite(s): BIOL 20A; and BIOL 100 or BIOC 100A, or by permission of instructor.

BME 128L - Protein Engineering Laboratory (2)

Students address a current scientific question about protein stability using structure-guided protein engineering. Specifically, Students use recombinant DNA technology to produce an engineered protein that is predicted to have enhanced stability. Students then assess its stability with differential scanning fluorimetry. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BIOC 100A or BIOL 100; and BIOL 101L, BIOL 20L, or BME 21L. Previous or concurrent enrollment in BME 128 is required. Enrollment is restricted to junior and senior bioengineering, bioinformatics, and biomolecular engineering and bioinformatics majors; other majors by permission of instructor.

BME 129A - Project Design and Implementation in Biomolecular Engineering I (5)

First of a three-part series focused on senior design projects in biomolecular engineering. In this first part, students examine experiments that elucidated the function of biological macromolecules at the Angstrom scale, and how technologies related to those functions were invented and implemented. Guided by these examples, each student develops a senior design project concept or small business proposal and defends

its utility, plausibility, and inventiveness in a written document and an oral presentation.

Prerequisite: Prerequisite(s): BIOL 20A and BIOL 20B; and BIOL 100 or BIOC 100A; BME 51A recommended. Enrollment is restricted to junior and senior bioengineering majors or by permission of the instructor.

BME 129B - Project Design and Implementation in Biomolecular Engineering II (5)

Second part of a three-course sequence that is the culmination of the bioengineering program for students who chose a senior design group project to fulfill their capstone requirement. Students apply knowledge and skills gained in biomolecular engineering coursework to articulate, organize, and plan a senior design group project. Student groups complete research, specification, planning, and procurement for their project. Includes technical discussions, design reviews, and formal presentations. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BME 129A or BME 150. Enrollment is restricted to senior bioengineering majors.

BME 129C - Project Design and Implementation in Biomolecular Engineering III (5)

Final part of a three-course sequence that is the culmination of the bioengineering program for students who chose a senior design group project to fulfill their capstone requirement. Students apply knowledge and skills gained in biomolecular engineering coursework to articulate, organize, and plan a senior design group project. Student groups complete research, specification, planning, and procurement for their project. Includes technical discussions, design reviews, and formal presentations. Students are billed a materials fee.

Prerequisite: Prerequisite(s): BME 129A and BME 129B. Enrollment is restricted to senior bioengineering majors.

BME 130 - Genomes (5)

Advanced elective for biology majors, examining biology on the genome scale. Topics include genome sequencing; large scale computational and functional analysis; features specific to prokaryotic, eukaryotic, or mammalian genomes; proteomics; SNP analysis; medical genomics; and genome evolution.

Prerequisite: Prerequisite(s): BIOL 100 or CHEM 103 or BIOC 100A; and BIOL 105 or BME 105; or approval of instructor.

BME 132 - Evolutionary Genomics (5)

Covers major recent advances in evolutionary genomics. Students learn to analyze and interpret scientific writing in depth. Students also present on work covered in the class and produce one research or review paper. Students cannot receive credit for this courses and course 232.

Prerequisite: Prerequisite(s): BME 105 or BIOL 105. Enrollment is restricted to juniors and seniors.

BME 140 - Bioinstrumentation (5)

Introduces the fundamental aspects of bioinstrumentation that are essential for beginning-level employment in clinical, pharmaceutical, and biotechnology laboratories. The advantages and disadvantages of several instruments are discussed and demonstrated, such as thermocycler, polymerase chain reaction (PCR), next-generation DNA sequencing platforms, pyrosequencing, flabess nanofabrication, ion-sensitive measurements, microarray fabrication, and fluorescent-activated cell sorter (FACS). Students are billed a materials fee.

Prerequisite: Prerequisite(s): BME 5; or BME 51A and BME 51B; or EE 101 and EE 101L; or BIOL 100; or BIOC 100A.

BME 160 - Research Programming in the Life Sciences (6)

No programming experience is required, but basic computer and molecular biology understanding is assumed. Students learn programming in Python to manipulate biological data. Programming assignments comprise the majority of the assignments, and a final project using skills developed in this course is required. Lab section registration is required. BioPython and other modules introduced for use in the final project.

Prerequisite: Prerequisite(s): BIOL 20A or BIOL 21A.

BME 163 - Applied Visualization and Analysis of Scientific Data (5)

Python and its Numpy, Scipy, and Matplotlib packages as well as Inkscape are used on scientific data to generate publication-quality figures. Students cannot receive credit for this course and course 263.

Prerequisite: Prerequisite(s): BME 160 or BME 205. Prerequisites can be waived in cases where students have the required programming skills. Enrollment is restricted to juniors and seniors.

BME 175 - Entrepreneurship in Biotechnology (5)

Focuses on contemporary issues in commercializing biotechnology and genomics, emphasizing development of teamwork and communication skills. Topics include intellectual property management, fundraising, market analysis, and technology development as related to biotechnology start-ups. Students perform real-world tasks preparing for commercialization. Taught in conjunction with BME 275.

BME 177 - Engineering Stem Cells (5)

For bioengineering students interested in stem cells. Class uses project-based learning to discuss basic stem cell concepts and past breakthrough approaches to identify and design solutions for technological hurdles in stem cell research.

Prerequisite: Prerequisite(s): BME 140 or BME 150, and BIOL 100, or by consent of instructor.

BME 178 - Stem Cell Biology (5)

Basic concepts, experimental approaches, and therapeutic potential are discussed. Students gain experience in reading the primary scientific literature.

Prerequisite: Prerequisite(s): BIOL 110; BIOL 115 recommended.

BME 180 - Professional Practice in Bioengineering (2)

Seminar course where students develop a research proposal and the collaborative skills needed for independent research projects. Includes professional practice development in collaboration skills, project management, proposal development, and funding.

Prerequisite: Prerequisite(s): previous or concurrent enrollment in BME 185 or CSE 185E. Enrollment is restricted to junior and senior bioengineering, biomolecular engineering and bioinformatics, and bioinformatics majors or by permission.

BME 185 - Technical Writing for Biomolecular Engineers (5)

Writing by biomolecular engineers, not to general audiences, but to engineers, engineering managers, and technical writers. Exercises include job application and resume, library puzzle, graphics, laboratory protocols, document specification, progress report, survey article or research proposal, poster, and oral presentation.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements; previous or concurrent enrollment in BIOL 20L or BIOL 101L. Enrollment restricted to junior and senior biomolecular engineering, bioengineering, and bioinformatics majors.

BME 188A - Synthetic Biology--Mentored Research A (5)

Provides a multidisciplinary, collaborative research experience working on a project in synthetic biology. Working with one or more research faculty, student teams complete a substantial project. Multiple oral/written presentations are required, including a formal conference presentation. Prerequisite(s): course 180. Enrollment is restricted to juniors and seniors. Enrollment is by instructor permission.

BME 188B - Synthetic Biology--Mentored Research B (5)

The second course in the two-quarter series in synthetic biology research. It continues the collaborative research endeavor that began in course 188A. Multiple oral/written presentations are required, including a formal conference presentation. Prerequisite(s): course 188A. Enrollment is restricted to juniors and seniors. Enrollment is by instructor permission.

BME 193 - Field Study (5)

Provides for individual programs of study with specific aims and academic objectives carried out under the direction of a BME faculty member and a willing sponsor at a field site, using resources not normally available on campus. Credit is

based upon written and oral presentations demonstrating the achievement of the objectives of the course. Students submit petition to sponsoring agency.

BME 193F - Field Study (2)

Provides for individual programs of study with specific aims and academic objectives carried out under the direction of a BME faculty member and a willing sponsor at a field site, using resources not normally available on campus. Credit is based upon written and oral presentations demonstrating the achievement of the objectives of the course. Students submit petition to sponsoring agency.

BME 194 - Group Tutorial (5)

A program of study arranged between a group of students and a faculty member. Students submit petition to sponsoring agency.

BME 194F - Group Tutorial (2)

A program of independent study arranged between a group of students and a faculty member. Students submit petition to sponsoring agency.

BME 195 - Senior Thesis Research (5)

Students submit petition to sponsoring agency.

BME 195F - Senior Thesis or Research (2)

Students submit petition to sponsoring agency.

BME 198 - Individual Study or Research (5)

Students submit petition to sponsoring agency.

BME 198F - Individual Study or Research (2)

Students submit petition to sponsoring agency.

BME 199 - Tutorial (5)

For fourth-year students majoring in bioinformatics or bioengineering.

Graduate

BME 201 - Scientific Writing (3)

Covers effective writing styles for scientific communication for bio-science and engineering graduate students. Covers instruction for writing grant applications, scientific manuscripts, and thesis proposals. Students practice by preparing, editing, and evaluating each of these documents.

Prerequisite: Enrollment is restricted to graduate students.

BME 205 - Bioinformatics Models and Algorithms (5)

Covers bioinformatics models and algorithms: the use of computational techniques to convert the masses of information from biochemical experiments (DNA sequencing, DNA chips, and other high-throughput experimental methods)

into useful information. Emphasis is on DNA and protein sequence alignment and analysis.

Prerequisite: Enrollment is restricted to graduate students. Undergraduates may enroll with prerequisite(s): CSE 15; and CSE 107 or STAT 131; and BIOL 20A; and concurrent enrollment in BIOC 100A.

BME 215 - Applied Gene Technology (5)

Detailed insight into the techniques and technological trends in genomics and transcriptomics, building the necessary foundations for further research in genetic association studies, population genetic association studies, population genetics, diagnostics, medicine, and drug development. Students should already have a deeper understanding of the basic tools of molecular biotechnology than acquired in introductory courses in biotechnology, biochemistry, and molecular biotechnology.

Prerequisite: Enrollment is restricted to graduate students.

BME 229 - Protein and Cell Engineering (5)

Focuses on established and novel strategies for protein and cell engineering. Explores concepts, design, and practical applications of engineered proteins, cells, and organisms as research tools and in therapeutic applications. Recommended for graduate students with interests in bioengineering.

Prerequisite: Enrollment is restricted to graduate students. Undergraduates by permission of instructor.

BME 230A - Introduction to Computational Genomics and Systems Biology (5)

Introductory and intermediate-level topics in computational genomics, DNA and RNA sequence analysis, mapping, quantification, detection of variants and their associations with disease. Covers topics in machine-learning, probabilistic graphical models, gene regulatory network inference, and single cell analysis. Students conduct related independent research.

Prerequisite: Prerequisite(s): BME 205. Enrollment is restricted to juniors, seniors, and graduate students.

BME 230B - Advanced Computational Genomics and Systems Biology (5)

Covers advanced topics in computational genomics, DNA and RNA sequence analysis, mapping, quantification, detection of variants and their associations with disease. Topics include machine-learning, probabilistic graphical models, gene regulatory network inference, and single cell analysis. Students participate in teams in a computational analysis competition.

Prerequisite: Prerequisite(s): BME 230A. Enrollment is restricted to juniors, seniors, and graduate students.

BME 232 - Evolutionary Genomics (5)

Covers major recent advances in evolutionary genomics. Students learn to analyze and interpret scientific writing in depth. Students also present on work covered in the class and

produce one research or review paper. Students may not receive credit for this course and course 132.

Prerequisite: Enrollment is restricted to graduate students. BME 105 or BIOL 105 or equivalent courses in higher-level genetic processes are highly recommended.

BME 237 - Applied RNA Bioinformatics (5)

Teaches methods for RNA gene discovery; gene expression quantification; probabilistic modeling, secondary structure/trans-interaction prediction; mRNA splicing; and functional analysis. Emphasis on leveraging comparative genomics and employing high-throughput RNA sequencing data. Includes lectures, scientific literature discussion, problem sets, and final gene-discovery project.

Prerequisite: Enrollment is restricted to seniors and graduate students.

BME 263 - Applied Visualization and Analysis of Scientific Data (5)

Python and its Numpy, Scipy, and Matplotlib packages as well as Inkscape are used to generate publication quality figures from scientific data. Students cannot receive credit for this course and course 163.

Prerequisite: Prerequisite(s): BME 160 or BME 205. Prerequisite(s) can be waived in cases where students have required programming skills. Enrollment is restricted to graduate students.

BME 272 - Precision Medicine (5)

Focuses on modern "precision" approaches to understanding human health, where every patient is unique. Explores basic and clinical discoveries and 'omics-based medicine for the prevention, diagnosis, and treatment of disease. Emphasis is on genomic approaches and applications to cancer.

Prerequisite: Enrollment restricted to juniors, seniors, and graduate students.

BME 275 - Entrepreneurship in Biotechnology (5)

Focuses on contemporary issues in commercializing biotechnology and genomics, emphasizing development of teamwork and communication skills. Topics include intellectual property management, fundraising, market analysis, and technology development as related to biotechnology start-ups. Students perform real-world tasks preparing for commercialization. Taught in conjunction with Biomolecular Engineering 175.

BME 280B - Seminar on Bioinformatics and Bioengineering (2)

Weekly seminar series covering topics of current research in computational biology, and bioinformatics. Current research work and literature in these areas are discussed. (Formerly Seminar on Bioinformatics.)

BME 281A - Seminar on Processive Enzymes and Nanopores (2)

Weekly seminar series covering experimental research in nanopore technology and single-molecule analysis of polymerase function. Current research work and literature is discussed. Students lead some discussions and participate in all meetings.

Prerequisite: Enrollment is restricted to graduate students. Qualified undergraduates may enroll with permission of instructor.

BME 281C - Seminar in Cancer Genomics (2)

Presents current computational biology research to identify genomics-based signatures of cancer onset, progression, and treatment response. Examples of such investigations include: genetic pathway interpretation of multivariate high-throughput datasets; discovery of mutations in whole-genome sequence; identifications and quantification of gene isoforms, alleles, and copy number variants; and machine-learning tools to predict clinical outcomes. Students present their own research, host journal clubs, and attend lectures and teleconferences to learn about research conducted by national and international projects.

Prerequisite: Enrollment is restricted to graduate students.

BME 281D - Seminar on Protein Engineering (2)

Weekly seminar series covering experimental research in protein structure, function, and engineering. Current research work and literature in this area are discussed. Students lead some discussions and participate in all meetings.

Prerequisite: Enrollment is restricted to graduate students.

BME 281E - Seminar in Genomics (2)

Current topics in genomics including high-throughput sequencing, genome assembly, and comparative genomics. Students design and implement independent research projects. Weekly laboratory meetings are held to discuss these projects and related research in the field.

Prerequisite: Enrollment is restricted to graduate students.

BME 281F - Blood Cell Development (2)

Weekly seminar covering topics in current research on blood cell development and stem cell biology. Current research and literature in these areas discussed. Students lead some discussions and participate in all meetings.

Prerequisite: Enrollment is restricted to graduate students. Undergraduates may enroll with permission of instructor.

BME 281H - Seminar in Comparative Genomics (2)

Weekly seminar series covering topics of current computational and experimental research in comparative genomics. Current research work and literature in this area discussed. Students lead some discussions and participate in all meetings.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

BME 281J - Seminar in Computational Genomics and Biomedicine (2)

Research seminar of the UCSC Computational Genomic Laboratory and Platform Teams (cgl.genomics.ucsc.edu/). Topics include genomic and transcriptomic sequence analysis methods, comparative and evolutionary genomics, big-data genomic analysis, biomedical data sharing, and precision medicine.

Prerequisite: Enrollment is restricted to graduate students.

BME 281L - Seminar in Computational Genetics (2)

Weekly seminar series covering topics and experimental research in computational genetics. Current research work and literature in this area discussed. Students lead some discussions and participate in all meetings.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

BME 281N - Seminar in Transcriptomics (2)

Covers current topics in computational and experimental research in transcriptomics. Current research work and literature discussed. Weekly laboratory meetings held to discuss these projects and related research in the field.

Prerequisite: Enrollment is restricted to graduate students.

BME 281P - Seminar on Nanotechnology and Biosensors (2)

Weekly seminar covering topics of research in the development of new tools and technologies to detect and study genes and proteins. Latest research work and literature in these areas are discussed. Students lead some discussions and participate in all meetings.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

BME 281R - Seminar in Stem Cell Genomics (2)

Weekly seminar series covering topics in research on stem cell genomics. Current research and literature in this area is discussed. Students lead some discussions and participate in all meetings.

Prerequisite: Enrollment restricted to graduate students; qualified undergraduates may enroll with instructor permission.

BME 281S - Seminar in Computational Functional Genomics (2)

Weekly seminar series covering topics of current computational and experimental research in computational functional genomics. Current research work and literature in

this area discussed. Students lead some discussions and participate in all meetings.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

BME 281V - Immunogenomics Seminar (2)

Journal club and research presentations in immunogenomics. Enrollment is by consent of the instructor and is restricted to graduate students, juniors, and seniors.

BME 281Z - Seminar in Population and Evolutionary Genomics (2)

Covers major recent topics in evolutionary and population genomics. Consists primarily of discussions of recent literature and updates on group members' research. Enrollment is available only to members of the Corbett-Detig laboratory.

BME 293 - Seminar in Biomolecular Engineering (5)

Weekly seminar series covering topics of bioinformatics and biomolecular engineering research. Current research work and literature in this area discussed. Students lead some discussions and participate in all meetings.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

BME 296 - Research in Bioinformatics (5)

Independent research in bioinformatics under faculty supervision. Although this course may be repeated for credit, not every degree program accepts a repeated course towards degree requirements. Students submit petition to sponsoring agency.

BME 297A - Independent Study or Research (5)

Independent study or research under faculty supervision. Although course may be repeated for credit, not every degree program accepts a repeated course towards degree requirements. Students submit petition to sponsoring agency.

BME 297B - Independent Study or Research (10)

Independent study or research under faculty supervision. Although course may be repeated for credit, not every degree program accepts a repeated course towards degree requirements. Students submit petition to sponsoring agency.

BME 297C - Independent Study or Research (15)

Independent study or research under faculty supervision. Although course may be repeated for credit, not every degree program accepts a repeated course towards degree requirements. Students submit petition to sponsoring agency.

BME 297F - Independent Study or Research (2)

Independent study or research under faculty supervision. Although course may be repeated for credit, not every degree program accepts a repeated course towards degree

requirements. Students submit petition to sponsoring agency. Enrollment is restricted to graduate students.

BME 299A - Thesis Research (5)

Thesis research conducted under faculty supervision. Although course may be repeated for credit, not every degree program accepts a repeated course towards degree requirements. Students submit petition to sponsoring agency.

BME 299B - Thesis Research (10)

Thesis research conducted under faculty supervision. Although course may be repeated for credit, not every degree program accepts a repeated course towards degree requirements. Students submit petition to sponsoring agency.

BME 299C - Thesis Research (15)

Thesis research conducted under faculty supervision. Although course may be repeated for credit, not every degree program accepts a repeated course towards degree requirements. Students submit petition to sponsoring agency.

CHEM - CHEMISTRY AND BIOCHEMISTRY

Lower-Division

CHEM 1A - General Chemistry (5)

An integrated study of general chemistry. Covers a range of topics including the atomic structure of matter; molecules; chemical reactions; acids and bases; gases; and equilibria in the gas and liquid phase. Students are expected to use algebra to solve problems. General Chemistry is articulated in a full-year series. Partial transfer credit is not allowed for the A,B,C series.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in MATH 3 (or equivalent), or a mathematics placement score of 300 or higher; taking the online chemistry self-assessment exam is strongly recommended.

CHEM 1B - General Chemistry (5)

An integrated study of general chemistry. Coverage includes quantum mechanics; the hydrogen atom; many-electron atoms and chemical periodicity; elementary covalent bonding; transition metals; and chemical kinetics. Prerequisite(s): Strong high-school level chemistry is strongly recommended; taking the online chemistry self-assessment examination is strongly recommended. Concurrent enrollment in course 1M is recommended. General Chemistry is articulated in a full-year series. Partial transfer credit is not allowed for the A,B,C series.

CHEM 1C - General Chemistry (5)

An integrated study of general chemistry. Coverage includes thermodynamics; oxidation-reduction and electrochemistry;

liquids and solids; intermolecular forces and solutions, including colligative properties; and nuclear chemistry. General Chemistry is articulated in a full-year series. Partial transfer credit is not allowed for the A,B,C series.

Prerequisite: Prerequisite(s): CHEM 1A. Concurrent enrollment in course 1N is recommended.

CHEM 1M - General Chemistry Laboratory (2)

Laboratory sequence illustrating topics covered in courses 1B and 1C and important experimental techniques. Students are billed a materials fee.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in CHEM 1B is required.

CHEM 1N - General Chemistry Laboratory (2)

Laboratory sequence illustrating topics covered in courses 1B-1C, respectively, and important experimental techniques. Students are billed a materials fee.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in CHEM 1C is required.

CHEM 8A - Organic Chemistry (5)

Introduces organic chemistry, with an emphasis on bonding and reactivity of organic compounds. (Formerly course 108A.)

Prerequisite: Prerequisite(s): CHEM 1B and CHEM 1C.

CHEM 8B - Organic Chemistry (5)

Introduction to organic chemistry, with an emphasis on reactivity and synthesis of organic compounds. (Formerly course 108B.)

Prerequisite: Prerequisite(s): CHEM 8A.

CHEM 8L - Organic Chemistry Laboratory (2)

Laboratory experience in organic chemistry associated with course 8A. Designed to introduce the student to the many techniques associated with organic chemistry while affording an opportunity to explore the concepts discussed in the lecture material. Laboratory: 4 hours, lecture: 1-1/4 hours. Students are billed a materials fee. (Formerly course 108L.)

Prerequisite: Prerequisite(s): CHEM 1C and CHEM 1N and previous or concurrent enrollment in CHEM 8A is required.

CHEM 8M - Organic Chemistry Laboratory (2)

Laboratory experience in organic chemistry associated with course 8B. Designed to introduce the student to the many techniques associated with organic chemistry while affording an opportunity to explore the concepts discussed in the lecture material. Laboratory: 4 hours, lecture: 1-1/4 hours. Students are billed a materials fee. (Formerly course 108M.)

Prerequisite: Prerequisite(s): CHEM 8A and CHEM 8L and previous or concurrent enrollment in CHEM 8B is required.

CHEM 8N - Honors Organic Chemistry Lab (2)

Honors laboratory experience in organic chemistry associated with course CHEM 8B. Designed to introduce the exceptional student to many of the techniques associated with organic chemistry while taking part in an active organic chemistry research experience. Laboratory: 6 hours per week minimum. Prerequisite(s): CHEM 8A and CHEM 8L; concurrent enrollment in CHEM 8B is required. Enrollment is by permission of the instructor. Students must pass safety training to begin research. Students may only receive credit for one of the following: 8M or 8N. This class may only be taken as Pass/No Pass, which cannot be converted to a letter grade.

Prerequisite: Prerequisite(s): courses 8A and 8L concurrent enrollment in 8B is required.

CHEM 80H - Introduction to Wine Science and Chemistry (5)

A glimpse of the science and technology of wines through critical analysis. Students gain an appreciation of the scientific method and are exposed to data from chemistry, biology, viticulture, and enology. This analysis is extended to examine commonly accepted practices used by scientists vs. non-scientist to assess and describe wine quality. (Formerly Introduction to Wines and Wine Chemistry.)

CHEM 99 - Tutorial (5)

Students submit petition to sponsoring agency.

CHEM 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

CHEM 103 - Biochemistry (5)

Introduction to biochemistry including biochemical molecules, protein structure and function, membranes, bioenergetics, and regulation of biosynthesis. Provides students with basic essentials of modern biochemistry. Students who plan to do advanced work in biochemistry and molecular biology should take the Biochemistry and Molecular Biology (BIOC) 100 series. Students cannot receive credit for this course after they have completed any two courses from the BIOC 100A, 100B, and 100C sequence.

Prerequisite: Prerequisite(s): CHEM 8B.

CHEM 109 - Intermediate Organic Chemistry and Applications to Biology (3)

Integrated study of fundamental organic chemistry, with emphasis on materials especially relevant to biological sciences.

Prerequisite: Prerequisite(s): CHEM 8B or equivalent.

CHEM 110 - Intermediate Organic Chemistry with Emphasis on Synthesis and Analytical Methods (5)

An intermediate study of organic chemistry, including synthetic methods, reaction mechanisms, and application of synthetic chemistry techniques.

Prerequisite: Prerequisite(s): CHEM 8B. Enrollment is restricted to chemistry majors, minors and proposed majors.

CHEM 110L - Intermediate Organic Chemistry Laboratory (2)

Laboratory experience in organic chemistry and associated principles. Experiments involve the preparation, purification, characterization, and identification of organic compounds, and make use of modern as well as classical techniques. Students are billed a materials fee.

Prerequisite: Prerequisite(s): CHEM 8M and previous or concurrent enrollment in CHEM 110.

CHEM 110N - Honors Organic Chemistry Lab (2)

Honors laboratory experience in organic chemistry associated with CHEM 109 or CHEM 110. Designed to introduce the exceptional student to many of the techniques associated with organic chemistry while taking part in an active organic chemistry research experience. Laboratory: 6 hours per week minimum. Prerequisite(s): CHEM 8A, CHEM 8B and CHEM 8L and either CHEM 8M or CHEM 8N and previous or concurrent enrollment in CHEM 109 or CHEM 110 is required. Enrollment is by permission of the instructor. Students must pass safety training to begin research. Students may only receive credit for one of the following: CHEM 110L, or CHEM 110N. This class may only be taken as Pass/No Pass, which cannot be converted to a letter grade.

Prerequisite: Prerequisite(s): courses 8A, 8B and 8L and either 8M or 8N and previous or concurrent enrollment in 109 or 110 is required.

CHEM 122 - Principles of Instrumental Analysis (5)

A laboratory course designed to develop familiarity with techniques and instrumentation used in analytical chemistry, emphasizing determination of trace inorganic species. Primary emphasis on applications utilizing the absorption or emission of electromagnetic radiation and on voltammetry. Topics include molecular UV-visible absorption and fluorescence spectrometry; atomic absorption, emission and fluorescence spectrometry; and various forms of voltammetry. Lecture: 2 hours; laboratory: 8 hours. Students are billed a materials fee.

Prerequisite: Prerequisite(s): CHEM 110 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior chemistry (B.S.) majors.

CHEM 143 - Organic Chemical Structure and Reactions (5)

Advanced topics such as the chemistry of terpenes, steroids, synthetic polymers, alkaloids, reactive intermediates, and reaction mechanisms are treated. Lecture: 4 hours.

Prerequisite: Prerequisite(s): CHEM 110.

CHEM 144 - Catalysis In Organic Synthesis Using Metals and

Metalloids Based Reagents (5)

Designed to introduce Junior/Senior undergraduates to the field of catalysis in organic synthesis. Course acquaints students with the chemistry, with relevant techniques of metals and metalloid chemistry, and focuses on new advancements in organoborane field. Also provides knowledge of the methods to use chemistry to address synthetic challenges in organic chemistry. Students become familiar with the concepts and approaches in the current field of chemical biology.

Prerequisite: Prerequisite(s): CHEM 110.

CHEM 146A - Advanced Laboratory in Organic Chemistry (3)

Exposes students to advanced laboratory techniques in organic chemistry. Designed for students without previous research background in organic chemistry. Experiments carry a research-like format and cover the areas of natural products and reaction chemistry. Modern methods of organic analysis are emphasized including chromatographic methods and organic structure determination by spectroscopy. Laboratory: 8 hours. Students billed a materials fee.

Prerequisite: Prerequisite(s): CHEM 110 and CHEM 110L; satisfaction of Entry Level Writing and Composition requirements. Enrollment is restricted to chemistry majors. Minors by permission of instructor.

CHEM 146B - Advanced Laboratory in Inorganic Chemistry (3)

Designed to expose students to advanced synthetic and spectroscopic techniques in inorganic chemistry. Examples include anaerobic manipulations, characterization of inorganic materials through spectral assignments and synthesis of coordination and organometallic complexes. Lecture: 1-1/4 hours; laboratory: 8 hours. Students billed a materials fee.

Prerequisite: Prerequisite(s): CHEM 151A and CHEM 151L; CHEM 163A; satisfaction of Entry Level Writing and Composition requirements. Enrollment restricted to chemistry majors. Minors by permission of instructor.

CHEM 146C - Advanced Laboratory in Physical Chemistry (3)

Provides advanced laboratory experience in the areas of nanomaterial synthesis and characterization; spectroscopy; fabrication and measurements energy-conversion devices; and soft lithography techniques and instrumentation. Lecture: 1-1/4 hours; laboratory: 4 hours. Students are billed a materials fee.

Prerequisite: Prerequisite(s): CHEM 163B and CHEM 164; satisfaction of Entry Level Writing and Composition requirements. Enrollment restricted to chemistry majors. Minors by permission of instructor.

CHEM 151A - Chemistry of Metals (5)

Fundamental topics of inorganic chemistry are presented at the level of the standard texts of field. Special emphasis is given to maintain breadth in the areas of metallic,

nonmetallic, and biological aspects of inorganic chemistry. Lecture: 3-1/2 hours; discussion: 1-1/4 hours.

Prerequisite: Prerequisite(s): CHEM 8B and CHEM 8M and CHEM 163A. Concurrent enrollment in course 151L is required.

CHEM 151B - Chemistry of the Main Group Elements (5)

Fundamental aspects of inorganic chemistry of main group elements are discussed. The emphasis is placed on the chemistry of nontransition elements including noble gases and halogens. In addition, students are exposed to the concepts of extended structures, new materials, and solid-state chemistry. Lecture: 3-3/4 hours.

Prerequisite: Prerequisite(s): CHEM 8B and CHEM 8M and CHEM 163A. Recommended for chemistry majors.

CHEM 151L - Inorganic Chemistry Laboratory (2)

Laboratory experience in inorganic chemistry. Experiments involve the preparation, purification, and characterization of inorganic compounds. In addition, experiments are designed to illustrate fundamental principles in inorganic chemistry and are coordinated with lectures in course 151A. Laboratory: 4 hours per week. Laboratory lecture: 1 1/4 hours per week. Students are billed a materials fee.

Prerequisite: Prerequisite(s): CHEM 8B and CHEM 8M and CHEM 163A. Concurrent enrollment in CHEM 151A is required.

CHEM 156C - Materials Chemistry (5)

Advanced topics in inorganic chemistry and an introduction to solid-state chemistry. Synthesis and structure of materials discussed as well as their influence on properties for modern devices and applications. Recent developments in area of material science also explored. Taught in conjunction with course 256C. (Formerly Advanced Topics in Inorganic Chemistry.)

Prerequisite: Prerequisite(s): CHEM 151A. Enrollment is restricted to seniors.

CHEM 163A - Quantum Mechanics and Basic Spectroscopy (5)

A detailed introduction to quantum theory and the application of wave mechanics to problems of atomic structure, bonding in molecules, and fundamentals of spectroscopy.

Prerequisite: Prerequisite(s): CHEM 1B and CHEM 1C; PHYS 5A, PHYS 5B, and PHYS 5C or PHYS 6A, PHYS 6B, and PHYS 6C; and MATH 22 or MATH 23B. PHYS 6C can be taken concurrently.

CHEM 163B - Chemical Thermodynamics (5)

Fundamentals of thermodynamics and applications to chemical and biochemical equilibria. (Formerly Thermodynamics and Kinetic Theory.)

Prerequisite: Prerequisite(s): CHEM 1B and CHEM 1C, PHYS 6A or PHYS 5A, and MATH 22 or MATH 23B.

CHEM 163C - Statistical Thermodynamics and Kinetics (5)

Statistical mechanics, kinetic theory, and reaction kinetics and topics in spectroscopy. (Formerly Kinetic Theory and Reaction Kinetics, Statistical Mechanics, Spectroscopic Applications.)

Prerequisite: Prerequisite(s): CHEM 163A and CHEM 163B.

CHEM 164 - Physical Chemistry Laboratory (5)

Provides laboratory experience and data analysis in the areas of thermodynamics, kinetics, and spectroscopy. Lecture: 1.75 hours; experimental laboratory: 4 hours; computer laboratory: 2 hours. Students are billed a materials fee.

Prerequisite: Prerequisite(s): CHEM 1B and CHEM 1C; and PHYS 5A and PHYS 5B and PHYS 5C, or PHYS 6A and PHYS 6B and PHYS 6C; and MATH 22 or MATH 23B. CHEM 163A is recommended.

CHEM 169 - Chemistry and Biology of Drug Design and Discovery (5)

An overview of the central elements of drug discovery, including target selection and validation; computational or virtual screening; high-throughput screening; fragment-based methods; and pharmacokinetics.

Prerequisite: Prerequisite(s): CHEM 103 or BIOC 100A.

CHEM 171 - Chemical Biology (5)

Covers methods and techniques for the field of chemical biology. Brings together methods in chemistry, biochemistry, and genetics to study the interaction of small molecules with biological systems. Students cannot receive credit for this course and course CHEM 271.

Prerequisite: Prerequisite(s): CHEM 103 and CHEM 143. Enrollment is restricted to junior and senior chemistry and biochemistry majors and minors.

CHEM 192 - Dir Stu Teach (5)

Dir Stu Teach

CHEM 194 - Senior Essay (5)

An individually supervised course with emphasis on reviewing the current scientific literature. Students are required to submit a summary and a critique of a scientific paper in the form of a senior essay. Students submit a petition to the sponsoring agency. This course may not be repeated for credit.

CHEM 195A - Senior Research (5)

An individually supervised course with emphasis on independent research. Multiple-term course extending over two or three quarters; the grade and evaluation submitted for the final quarter apply to all previous quarters. Students submit petition to sponsoring agency; may not be repeated for credit.

CHEM 195B - Senior Research (5)

An individually supervised course with emphasis on independent research. Multiple-term course extending over two or three quarters; the grade and evaluation submitted for the final quarter apply to all previous quarters. Students submit petition to sponsoring agency; may not be repeated for credit.

CHEM 195C - Senior Thesis (5)

An individually supervised course with emphasis on independent research. Multiple-term course extending over two or three quarters; the grade and evaluation submitted for the final quarter apply to all previous quarters. Students submit petition to sponsoring agency; may not be repeated for credit. (Formerly Senior Research.)

CHEM 199 - Tutorial (5)

Students submit petition to sponsoring agency.

CHEM 199F - Tutorial (2)

Students submit petition to sponsoring agency.

Graduate

CHEM 200A - Advanced Biochemistry: Biophysical Methods (5)

An introduction to the theory, principles, and practical application of biophysical methods to the study of biomolecules, especially proteins and nucleic acids. Emphasis on spectroscopic techniques. Topics include magnetic resonance, optical spectroscopy, fast reaction techniques, crystallography, and mass spectrometry.

CHEM 200B - Advanced Biochemistry: Macromolecular Structure and Function (5)

A detailed discussion of nucleic acid and protein chemistry, ranging from the structure, thermodynamics, and folding to the relationship between structure and function, and encompassing the methods used to determine such information. (Formerly Advanced Biochemistry: Protein Structure and Function.)

CHEM 200C - Advanced Biochemistry: Enzyme Mechanisms and Kinetics (5)

A study of enzyme kinetics, mechanisms, and factors involved in enzymic catalysis. Lecture: 3-1/2 hours. (Formerly course 231, Enzyme Mechanisms and Kinetics.)

CHEM 222 - Career Success in Industrial Science/ Engineering (2)

Provides skills for the transition from academia into industrial research careers, addressing presentation skills, project prioritization, teamwork, salary-benefit expectations, intellectual property, performance reviews, Myers-Briggs profiles, and career planning. Participant teams will analyze the commercialization of a technical innovation.

Prerequisite: Enrollment is restricted to Physical and Biological Sciences and School of Engineering graduate students who have completed one consecutive year. Undergraduates may enroll on a space available basis by permission of instructor.

CHEM 230 - Grant Writing in Biomedical Research (5)

Introduces the fundamentals of grant writing in biomedical research, including best practices for presentation of data and communication of research findings. Students write and peer-edit most components of the NIH Ruth L. Kirschstein F31 predoctoral fellowship. Course is designed for students in their second year or later of graduate study.

Prerequisite: Enrollment is restricted to graduate students.

CHEM 234 - Bioinorganic Chemistry (5)

The role played by transition metals in biological systems is discussed through application of the principles of coordination chemistry and inorganic spectroscopy. Topics include metalloproteins involved in oxygen binding, iron storage, biological redox reactions, and nitrogen fixation, as well as metal complexes of nucleic acids. Lecture: 4 hours.

Prerequisite: Prerequisite(s): CHEM 151A, CHEM 151L, CHEM 163A, and BIOC 100A; or graduate students.

CHEM 238 - Topics in Biophysical Chemistry (5)

A discussion of the application of selected topics in biophysical chemistry to contemporary problems in biochemistry and molecular biology. Lecture: 3-1/2 hours.

CHEM 242A - Modern Physical Organic Chemistry (5)

Covers molecular structure and bonding, strain, and non-covalent binding forces. Other topics include acid-base chemistry, kinetics, thermodynamics, catalysis, organic reactions and mechanism, and quantum mechanical approaches to the analysis of organic molecules.

Prerequisite: Enrollment is restricted to seniors who have taken CHEM 143, and graduate students.

CHEM 242B - Modern Synthetic Methods in Organic Chemistry (5)

Presents concepts in bond formation, conformation, selectivity, and stereocontrol in modern organic synthesis. Focuses on understanding reaction mechanisms. Culminates with strategy in designing multi-step synthesis of complex targets.

Prerequisite: Enrollment is restricted to seniors who have taken CHEM 143, and graduate students.

CHEM 242C - Spectroscopy and Applied Analytical Methods (5)

Presents strategies in organic structure elucidation, including nuclear magnetic resonance (NMR) and mass spectrometry. Provides theory and practical elements of structure elucidation and modern analytical methods for organic molecules.

Prerequisite: Enrollment is restricted to seniors who have taken CHEM 143, and graduate students.

CHEM 244 - Organic Free Radical Chemistry (5)

Explores organic free radicals. Fundamental principles in physical chemistry provide an understanding of free-radical transformations in organic synthesis, polymerization, and some examples of free radicals in biology. For students who have a firm grounding in organic chemistry.

Prerequisite: Enrollment is restricted to graduate students.

CHEM 256A - Advanced Topics in Inorganic Chemistry (5)

Advanced topics in inorganic chemistry are presented. Topics covered vary from year to year, and are announced in advance. Possible topics include A) organometallic chemistry; B) structural methods in inorganic chemistry; C) solid-state chemistry.

Prerequisite: Enrollment is restricted to graduate students or previous enrollment in CHEM 151A, CHEM 151L, and CHEM 146B.

CHEM 256B - Advanced Topics in Inorganic Chemistry (5)

Advanced topics in inorganic chemistry are presented. Topics covered vary from year to year, and are announced in advance. Possible topics include A) organometallic chemistry; B) structural methods in inorganic chemistry; C) solid-state chemistry.

Prerequisite: Enrollment is restricted to graduate students or previous enrollment in CHEM 151A, CHEM 151L, and CHEM 146B.

CHEM 256C - Advanced Topics in Inorganic Chemistry (5)

Advanced topics in inorganic chemistry are presented. Topics covered vary from year to year, and are announced in advance. Possible topics include A) organometallic chemistry; B) structural methods in inorganic chemistry; C) solid-state chemistry.

Prerequisite: Enrollment is restricted to graduate students or previous enrollment in CHEM 151A, CHEM 151L, and CHEM 146B.

CHEM 256D - X-ray Crystallography (5)

Course in chemical crystallography focuses on the needs of small-molecule, single-crystal diffraction studies. Includes diffraction theory, space-group analysis, data collection, structure solution, and refinement. Practical component: use of diffraction equipment and solution/refinement software.

Prerequisite: Enrollment is restricted to graduate students and seniors who have taken CHEM 151A, CHEM 151L, and CHEM 163A.

CHEM 261 - Foundations of Spectroscopy (5)

The basic theory of time-dependent processes is covered at an advanced level. The interaction of electromagnetic radiation and matter is described using both semiclassical and quantum

field formulations. A variety of modern spectroscopic techniques are discussed both in terms of the basic processes and their use in the elucidation of chemical structure and dynamics.

Prerequisite: Enrollment is restricted to chemistry graduate students or previous enrollment in CHEM 163A.

CHEM 262 - Statistical Mechanics (5)

Theory and concepts of statistical mechanics with applications to ideal gases, condensed systems, phase transition, and non-equilibrium thermodynamics. Lecture: 3-1/2 hours.

Prerequisite: Enrollment is restricted to chemistry graduate students or previous enrollment in CHEM 163A.

CHEM 263 - Quantum Mechanics (5)

A rigorous introductory course: the Schrödinger equation, operator formalism, matrix mechanics, angular momentum, and spin. Perturbation and other approximate methods. Applications to atomic and molecular problems. Lecture: 3-1/2 hours.

Prerequisite: Enrollment is restricted to chemistry graduate students or previous enrollment in CHEM 163A, PHYS 116A, and PHYS 116B.

CHEM 265 - Computer Simulation in Statistical Mechanics (5)

A detailed introduction of the use of computer simulation methods in physical and biophysical chemistry. Includes review of thermodynamics and statistical mechanics, molecular mechanics, molecular dynamics, and Monte-Carlo methods. Applications to liquid structure, reaction dynamics, and protein dynamics.

CHEM 266A - Lasers and Their Chemical Applications (5)

Introduces the basic theoretical principles of lasers and laser light. Various types of lasers and selected applications to chemistry are discussed. The use of lasers in photochemistry, spectroscopy, chemical kinetics, and chemical analysis is considered. Lecture: 3-1/2 hours.

Prerequisite: Prerequisite(s): CHEM 163A and PHYS 114A and PHYS 114B.

CHEM 268 - Solid State and Materials Chemistry (5)

Topics include synthesis of solid-state materials and their characterization using experimental techniques: XRD, TEM spectroscopy, NMR, and their applications in technologies. Emphasis on new materials, e.g., polymer, biopolymers, nanomaterials, organic/inorganic composites, ceramics, superconductors, electronic, magnetic, and opto-electronic materials.

Prerequisite: Enrollment is restricted to chemistry graduate students or students previously enrolled in CHEM 163A and CHEM 163B.

CHEM 269 - Electrochemistry (5)

Designed to introduce basic principles and applications of electrochemistry to students at upper undergraduate and lower graduate levels in various fields including analytical, physical, and materials chemistry.

Prerequisite: Enrollment is restricted to seniors and graduate students.

CHEM 271 - Chemical Biology (5)

Methods and techniques for the field of chemical biology. Brings together methods in chemistry, biochemistry, and genetics to study the interaction of small molecules with biological systems. Students cannot receive credit for this course and course 171.

Prerequisite: Enrollment is restricted to chemistry graduate students.

CHEM 274 - Proseminar in Synthetic and Polymer Chemistry (5)

Weekly meetings devoted to study of synthetic organic chemistry and controlled polymer design for applications in nanotechnology. Topics drawn from current literature and research interests of participants.

CHEM 275 - Proseminar in Biological Inorganic Chemistry (5)

Weekly meetings devoted to biological inorganic chemistry and biochemistry. Topics are drawn from current literature. Papers and reviews are discussed, and participants give short seminars on their research interests.

CHEM 280 - Proseminar in Materials Chemistry (5)

Weekly meetings devoted to materials and inorganic research. Topics are drawn from current literature. Papers and reviews are discussed. Participants also give short seminars on topics of their research interests.

CHEM 282 - Proseminar: Synthetic Methods (5)

Weekly meetings devoted to the study of asymmetric and/or enantio-selective synthesis of optically active organic compounds of biological and medicinal significance. Topics drawn from the current literature and the research interests of the participants.

Prerequisite: Enrollment is restricted to graduate students.

CHEM 284 - Proseminar in Synthetic Organic Chemistry (5)

Weekly meetings devoted to the study of synthetic organic chemistry. Topics drawn from the current literature and the research interests of the participants.

Prerequisite: Enrollment is restricted to graduate students.

CHEM 285 - Proseminar: Photobiochemistry and Photobiology (5)

A detailed study of molecular mechanisms of light energy conversion and light-signal transduction processes in biological systems. Student participation in critical discussion

of current literature examples are emphasized. Two-hour lecture and two-hour seminar weekly.

Prerequisite: Enrollment is restricted to graduate students.

CHEM 286 - Proseminar in Natural Products Chemistry (5)

Weekly meetings devoted to the study of natural products. Topics drawn from the current literature and research interests of the participants.

Prerequisite: Enrollment is restricted to graduate students.

CHEM 288 - Proseminar in Bioinorganic Chemistry (5)

Weekly meetings devoted to inorganic and bioinorganic research. Topics are drawn from current literature. Papers and reviews are discussed. Participants also give short seminars on topics of their research interests.

CHEM 291 - Chemistry and Biochemistry Research Seminar (5)

A weekly chemistry and biochemistry seminar series covering recent developments and current research, led by experts from other institutions, as well as local speakers. Open to chemistry and biochemistry graduate students.

Prerequisite: Enrollment is restricted to graduate students.

CHEM 292 - Seminar (2)

Prerequisite: Enrollment is restricted to graduate students or approval of the graduate adviser.

CHEM 296 - Teaching Chemistry (2)

University-level pedagogy in chemistry; examines the role of preparation, assessment, and feedback in teaching chemistry discussion and laboratory sections. Effective classroom techniques and organizational strategies discussed; oral presentations analyzed critically. Required of entering chemistry graduate students.

Prerequisite: Enrollment is restricted to chemistry graduate students.

CHEM 297A - Independent Study (5)

A topic will be studied with faculty tutorial assistance to satisfy a need for the student when a regular course is not available. Students submit petition to sponsoring agency.

CHEM 297B - Independent Study (10)

A topic will be studied with faculty tutorial assistance to satisfy a need for the student when a regular course is not available. Students submit petition to sponsoring agency.

CHEM 299A - Thesis Research (5)

Thesis Research

CHEM 299B - Thesis Research (10)

Thesis Research

CHEM 299C - Thesis Research (15)

Thesis Research

CHIN - CHINESE

Lower-Division

CHIN 1 - First-Year Chinese (5)

Instruction in elementary spoken and written Chinese (Mandarin), beginning with the sounds of Chinese and their representation in the pinyin romanization system. Conversation, structural analysis, and an introduction to character texts. The first-year sequence (1-2-3) begins only in the fall quarter. Students interested in learning Chinese who are uncertain about where they should enter the sequence should meet with the instructor prior to the first class meeting. (Formerly Instruction in the Chinese (Mandarin) Language.)

CHIN 2 - First-Year Chinese (5)

Continuation of Chinese 1, which assumes that students are familiar both with the pinyin romanization system and approximately 150 basic characters. (Formerly Instruction in the Chinese (Mandarin) Language.)

Prerequisite: Prerequisite(s): CHIN 1 or by consent of instructor.

CHIN 3 - First-Year Chinese (5)

Continuation of Chinese 2, which assumes that students are familiar both with the pinyin romanization system and approximately 300 basic characters. (Formerly Instruction in the Chinese (Mandarin) Language.)

Prerequisite: Prerequisite(s): CHIN 2 or by consent of instructor.

CHIN 4 - Second-Year Chinese (5)

Instruction in intermediate spoken and written Chinese (Mandarin). Conversation, composition, and the reading of modern texts. The second-year sequence (4-5-6) begins only in the fall quarter. (Formerly Intermediate Chinese (Mandarin).)

Prerequisite: Prerequisite(s): CHIN 3 or by consent of instructor.

CHIN 4H - Accelerated Chinese for Heritage Speakers (5)

Intensive instruction in spoken and written Chinese for heritage students whose limited proficiency in Mandarin or limited familiarity with characters requires an accelerated review of the sounds, sentence patterns, and basic vocabulary before joining the Chinese sequence above the elementary level. Students who successfully complete Chinese 4H proceed to Chinese 5. Enrollment by instructor consent.

CHIN 5 - Second-Year Chinese (5)

Continuation of Chinese 4. Conversation, composition, and the reading of modern texts. (Formerly Intermediate Chinese (Mandarin).)

Prerequisite: Prerequisite(s): CHIN 4 or CHIN 4H or by consent of instructor.

CHIN 5H - Accelerated Chinese for Heritage Speakers (5)

Intensive instruction in spoken and written Chinese for heritage students whose limited proficiency in Mandarin or limited familiarity with characters requires an accelerated review of the sounds, sentence patterns, and basic vocabulary before joining the Chinese sequence above the elementary level. Students who successfully complete Chinese 5H proceed to Chinese 6.

Prerequisite: Prerequisite(s): CHIN 4H or by consent of instructor.

CHIN 6 - Second-Year Chinese (5)

Continuation of Chinese 5. Conversation, composition, and the reading of modern texts. (Formerly Intermediate Chinese (Mandarin).)

Prerequisite: Prerequisite(s): CHIN 5 or CHIN 5H or by consent of instructor.

CHIN 94 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

CHIN 99 - Tutorial (5)

Students submit petition to sponsoring agency.

CHIN 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

CHIN 103 - Advanced Chinese: Language and Society (5)

Designed to enhance the students' ability to understand, analyze, and discuss authentic Chinese reading materials. Chinese linguistic and cultural aspects are introduced. (Formerly Advanced Chinese.)

Prerequisite: Prerequisite(s): CHIN 6 or by consent of instructor.

CHIN 104 - Advanced Chinese: Readings in Literature (5)

Close readings in Chinese vernacular literature of recognized merit from contemporary and modern writers as well as from models from the traditional period. Student are introduced to the basic critical issues, in Chinese, relating to narrative and drama, revealed by the works under discussion.

Prerequisite: Prerequisite(s): CHIN 103 or CHIN 105 or CHIN 107 or CHIN 108; or by consent of instructor.

CHIN 105 - Advanced Chinese: Readings in History (5)

Offers an appreciation of some of the central issues in Chinese history as defined by Chinese historians of the 20th century. Through readings of graduated difficulty, the vocabulary, style, and form of modern Chinese historical writing are introduced.

Prerequisite: Prerequisite(s): CHIN 103 or CHIN 104 or CHIN 107 or CHIN 108; or by consent of instructor.

CHIN 107 - Introduction to Classical Chinese Prose (5)

Introduces the grammar and lexicon of classical Chinese and the language of China's pre-modern canonical writings in philosophy, religion, history, music, visual art, and literature. Reading from the Han and pre-Han era is featured. (Formerly Introduction to Classical Chinese.)

Prerequisite: Prerequisite(s): CHIN 103 or CHIN 104 or CHIN 105 or CHIN 108; or by consent of instructor.

CHIN 108 - Introduction to Classical Chinese Poetry (5)

Introduces the grammar and lexicon of classical Chinese and the language of China's pre-modern canonical writings in philosophy, religion, history, music, visual art, and literature. Classical poetry and lyrics are featured.

Prerequisite: Prerequisite(s): CHIN 103 or CHIN 104 or CHIN 105 or CHIN 107; or by consent of instructor.

CHIN 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

CHIN 199 - Tutorial (5)

Students submit petition to sponsoring agency.

CHIN 199F - Tutorial (2)

Students submit petition to sponsoring agency.

CLNI - COLLEGE NINE

Lower-Division

CLNI 1 - Academic Literacy and Ethos: International and Global Perspectives (5)

Teaches foundational concepts for intellectual exploration and personal development within an academic community: analysis, critical thinking, metacognition, engagement with others across difference, and self-efficacy. Addresses large-scale political, cultural, and economic issues to inform global citizenship.

Prerequisite: Enrollment is restricted to first-year college members.

CLNI 60 - Water Justice: Global Insights for a Critical Resource (5)

Groundwater is a challenging resource to manage and conserve, one critically depleted across our state, country and world. Course explores the many manifestations of groundwater access, use and justice on multiple interlocking scales (i.e. local, national, transnational) while illustrating analytical ideas connecting to a range of socio-environmental processes including urbanization and infrastructure development, deprivation and exclusion, privatization of land and water, and claims for human rights. We will draw from cases based on our multi-country research project that brings together scholars and practitioners from Latin America, Europe, Africa and South Asia. Students will have the opportunity to conduct qualitative and secondary research contributing to the California case study in the Central Coast, focused on groundwater governance and perspectives of Latinx farmworkers and residents.

Prerequisite: Enrollment is restricted to College Scholars students.

CLNI 70 - Colleges Nine and Ten Community Garden (2)

Students in this course design and build a new community garden at Colleges Nine and Ten. Students engage in a collaborative design process with campus stakeholders; learn hands-on skills and community gardening best practices; and build regenerative social and ecological systems.

Prerequisite: Enrollment is restricted to College Nine and College Ten students.

CLNI 85 - Global Action (2)

Workshop facilitated by peer instructors. Students learn about current international and global issues through interactive exercises, small-group discussions, and faculty presentations. Students develop an action plan to raise awareness about one or more of these concerns and take practical steps to create positive change in the world.

Prerequisite: Enrollment is restricted to College Nine members during priority enrollment only.

CLNI 86 - College Leadership Development (2)

Students newly appointed into leadership positions at College Nine explore the concept of leadership relating to the college's theme of International and Global Perspectives. Prerequisite(s): current College Nine student leader; permission of instructor.

CLNI 90 - Intercultural Understanding (2)

Provides an opportunity to enhance the intercultural experience, increase cultural competency, promote further understanding, and examine the various trends facing a uniquely diverse community. Geared toward U.S. and international students affiliated with the International Living Center. Enrollment by instructor permission.

CLNI 91 - Global Issues Colloquium (1)

Weekly colloquium on global issues with different topical focus each quarter. Presentations by UCSC faculty and invited speakers. Students must attend class, read an assigned article, and write a one-page synopsis.

Prerequisite: Enrollment is restricted to College Nine members.

Upper-Division

CLNI 105 - Researching Food Sovereignty (5)

Students engage in individual and collective research projects on transformational food systems in the United States and abroad. Readings look at the current global food system and grassroots responses to food and environmental crises.

Prerequisite: Enrollment is restricted to junior and senior College Nine and College Ten members during priority enrollment only.

CLNI 106 - Israel and Palestine: Pathways to a Deeper Understanding (2)

Explores, and seeks to provide a deeper understanding of, the Israeli-Palestinian conflict through materials and guest speakers that offer varying perspectives. Self-reflection and structured communication facilitate the positive exchange of ideas and views. Enrollment by permission of instructor.

CLNI 112A - Model United Nations Part A: A Group Seminar (2)

Introduces the Model United Nations. Students learn parliamentary procedure and U.N. protocols, as well as how to research and present position papers to the general assembly. Students learn resolution writing, alliance building, and persuasive speech. (Formerly course 112, Model United Nations: A Group Seminar)

CLNI 112B - Model United Nations Part B: International Crises (2)

Students are assigned a country to represent in the U.N. Three international crises allow students to present position papers, make speeches, and debate the issues.

Prerequisite: Prerequisite(s): CLNI 112A.

CLNI 115 - Community Investing for Social Good: A Micro-finance Lab (2)

Service-learning laboratory course that centers around investing by and in students to seed new social, economic, and environmental projects, ultimately aiming to build a campus culture of community investing to address needs linked to poverty and inequality.

CLNI 120 - Practical Activism Conference Planning and Development (2)

Offers an applied experience of collaborative planning, production, and leadership. Students plan workshops and

other event components; conduct outreach and publicity; and address all aspects of educational event planning. Enrollment restricted to members of the spring volunteer Practical Activism planning group. Enrollment by permission of the instructor.

CLNI 191 - Teaching Global Action (5)

Undergraduates at upper-division level participate in teaching discussion groups for College Nine 85 (W). Prerequisite(s): permission of instructor: essay describing interest in becoming course assistant, copies of evaluations, and letter of recommendation from faculty member and/or college staff member. Enrollment is restricted to College Nine juniors and seniors.

CLNI 199 - Tutorial (5)

Individual directed study for upper-division college members with college-affiliated faculty. Students must submit petition with one of the college academic advisers with accompanying letter from faculty adviser. Approval of provost required. Enrollment is restricted to upper-division College Nine members.

CLNI 199F - Tutorial (2)

Individual directed study for upper-division college members with college-affiliated faculty. Students must submit petition with one of the college academic advisers with accompanying letter from faculty adviser. Approval of provost required. Enrollment is restricted to upper-division College Nine members.

CLST - CLASSICAL STUDIES

Lower-Division

CLST 99 - Tutorial (5)

Students submit petition to sponsoring agency.

Upper-Division

CLST 197F - Senior Comprehensive Examination Preparation (2)

Students submit petition to sponsoring agency.

CLST 199 - Tutorial (5)

Students submit petition to sponsoring agency.

CLST 199F - Tutorial (2)

Students submit petition to sponsoring agency.

CLTE - COLLEGE TEN Lower-Division

CLTE 1 - Academic Literacy and Ethos: Social Justice and Community (5)

Teaches foundational concepts for intellectual exploration and personal development within an academic community: analysis, critical thinking, metacognition, engagement with others across difference, and self-efficacy. Reflects our college theme of Social Justice and Community, addressing topics such as identity formation, inequality, and environmental injustice.

Prerequisite: Enrollment is restricted to first-year college members.

CLTE 30 - (H)ACER Undergraduate Community Internship (2)

Student Internship through the Apprenticeship in Community Engaged Research (H)ACER Program at College Nine and College Ten. The (H)ACER Program joins community engagement with critical reflexive components of qualitative research to support transformative learning and strengthen community-university partnerships. Students will be placed at a variety of internships and work with our community partners such as Calabasas Elementary School classroom teachers, Calabasas Elementary School After School Program, Calabasas Community Garden, and Watsonville High School classroom teachers. Students also may propose internships if they already have strong ties with a community partner and receive approval from the (H)ACER Director. Requires students to read selected readings on critical service learning, community learning, qualitative research methods and a variety of texts relevant to the history, context and activities at the sites where they will intern. Internships will take place primarily in Watsonville. Enrollment by permission of the instructor.

CLTE 60 - Understanding Sustainability: Researching Environmental Justice at UCSC (5)

Through readings, discussions, and primary research on campus, course explores the following questions: What is sustainability at UCSC and what assumptions about the relationships between humans and nature are privileged in these definitions? (Formerly, I Couldn't Imagine Myself Anywhere Else: Understanding UCSC Undergraduate Narratives.)

Prerequisite: Enrollment is restricted to College Scholars students.

CLTE 85 - Social Justice Issues Workshop (2)

Series of presentations, films, and workshops that address personal and cultural identity and examine social, cultural, political, environmental, and other justice concerns.

Prerequisite: Enrollment is restricted to College Ten members during priority enrollment only.

CLTE 86 - College Leadership Development (2)

Students newly appointed into leadership positions at College Ten explore the concept of leadership relating to the college's theme of Social Justice and Community. Prerequisite(s): current College Ten student leader; permission of instructor.

CLTE 92 - Social Justice Issues Colloquium (1)

Weekly colloquium on social justice issues with a different topical focus each quarter. Presentations by UCSC faculty and invited speakers. Students must attend class, read an assigned article or book chapter(s) on the week's topic, and write a one-page synopsis.

CLTE 95 - Social Justice and Nonviolent Communication (Rumi's Field Living-Learning Community) (1)

Rumi's Field Nonviolent Communication Living-Learning Community operates in a spirit of cooperation, compassion, and goodwill. Students living on Rumi's Field enroll in this course in fall to explore the relevance of nonviolence to the pursuit of social justice. Restricted to residents of the Rumi's Field. (Formerly Nonviolent Communication [Living-Learning Community])

CLTE 98 - Alternative Spring Break (2)

Provides students with the opportunity to conduct service-learning work in a local Santa Cruz community over spring break. There are four preliminary class meetings in the winter quarter. Winter meeting attendance is required. Enrollment is by interview only. Enrollment is restricted to College Nine and College Ten members.

Upper-Division

CLTE 105 - The Making and Influencing of Environmental Policy (5)

Explores how environmental policy is made and influenced. Students learn about key contemporary environmental issues and the forces at play in determining environmental policy outcomes. Focuses on skills that enable citizens to impact environmental policy. (Formerly The Making and Influencing of Nuclear Policy.)

Prerequisite: Enrollment is restricted to sophomore, junior, and seniors.

CLTE 106 - Expressive Arts for Social Justice (2)

Students explore their own creative output in order to inspire community dialogue around social justice issues. Open to those who identify as artists as well as those who do not. Interested students must attend an information session and commit to expectations. Preference is given to College Nine and College Ten members.

CLTE 115 - Research Methods for Social Justice (2)

Fosters a deeper intellectual engagement with the theme of College Ten through the design and implementation of community-based research projects developed in close

consultation with community partners. Students gain methodological, teamwork, and critical-thinking skills while furthering social justice. Prerequisite(s): College Nine 85, or College Ten 85, or equivalent. Enrollment is restricted to College Nine and College Ten members and by permission of instructor.

CLTE 120 - Practical Activism Conference Planning and Development (2)

Offers an applied experience of collaborative planning, production, and leadership. Students plan workshops and other event components; conduct outreach and publicity; and address all aspects of educational event planning. Enrollment is restricted to members of the spring volunteer Practical Activism planning group. Enrollment is by permission of the instructor.

CLTE 125A - Transcommunal Peace Making (2)

Explores the theoretical tenets and applications of Transcommunality, an outgrowth of the principles of Kingian non-violence, which works toward peace, tolerance, and mutual respect across difference and diversity. UCSC students connect with the Cemanahuac Cultural group, a multi-ethnic and multi-racial gathering of incarcerated men who are warriors for peace within and outside the prison community. Three meetings will be held at the Correctional Training Facility (CTF) in Soledad, California. Enrollment is restricted to junior and senior College Ten members and by interview.

CLTE 125B - Transcommunal Peace Making (2)

Explores the principles of community, guided by established texts, for inmates at the Correctional Training Facility (CTF) in Soledad, California. Covers the theoretical tenets and applications of Transcommunality, an outgrowth of the principles of Kingian non-violence. Three joint meetings will be held with UCSC students enrolled in the parallel course 125A. Enrollment by permission of instructor.

CLTE 135 - Apprenticeship in Community Engaged Research (5)

Course takes a holistic approach in familiarizing students about how to effectively and ethically conduct community engaged research, from contextualized understandings of power and knowledge to hands-on training in various methodologies through a class project. The topical focus of the course varies (e.g., sustainability, water justice, educational equity etc.). (Formerly Social Justice, Institutions, and Power.)

Prerequisite: Prerequisite(s): CLTE 85, or CLNI 85, or equivalent. Enrollment is restricted to junior and senior College Ten and College Nine members.

CLTE 136 - Methodologies of Critical Praxis (5)

Considers an ethic of engaging with communities that honors existing knowledges and integrates them into community-engaged action plans and research strategies. Explores a list of questions critical scholars must consider when building socially just community partnerships. Interrogates notions of help and volunteerism and explores theories and practices of

popular education as a praxis engagement. Includes practice interviews, oral histories, field notes, and other research methods. Interacts with community partners through forums, blogs, and other multimedia.

Prerequisite: Prerequisite(s): CLTE 135 or an equivalent course.

CLTE 191 - Teaching Social Justice (5)

Undergraduates at upper-division level participate in teaching discussion groups for College Ten 85 (W). Prerequisite(s): permission of instructor: essay describing interest in becoming course assistant, copies of evaluations, and letter of recommendation from faculty member and/or college staff member. Enrollment is restricted to College Ten juniors and seniors.

CLTE 194 - Group Tutorial (5)

Independent study through which a group of students explores a particular topic in consultation with an instructor. Prerequisite(s): Course 91 or 105 recommended. Students submit petition to sponsoring agency.

CLTE 194F - Group Tutorial (2)

Independent study through which a group of students explores a particular topic in consultation with an instructor. Prerequisite(s): Course 91 or 105 recommended. Students submit petition to sponsoring agency.

CLTE 199 - Tutorial (5)

Individual directed study for upper-division college members with college-affiliated faculty. Students must submit petition with one of the college academic advisers with accompanying letter from faculty adviser. Approval of provost required. Enrollment is restricted to upper-division College Ten members.

CLTE 199F - Tutorial (2)

Individual directed study for upper-division college members with college-affiliated faculty. Students must submit petition with one of the college academic advisers with accompanying letter from faculty adviser. Approval of provost required. Enrollment is restricted to upper-division College Ten members.

CMMU - COMMUNITY STUDIES

Lower-Division

CMMU 10 - Introduction to Community Activism (5)

Surveys different strategies of community activism including charity, volunteering, labor and community organizing, and recently emerging global activism with goal of demonstrating how certain strategies challenge existing social relations and

arrangements while others typically (and often by design) reproduce them.

CMMU 30 - Numbers and Social Justice (5)

Relates simple lessons of quantitative thinking to topical materials that are accessible and relevant to working for justice and social change. Students learn practical techniques to distinguish credible statistical evidence from misleading statistical claims. (Formerly Numbers for Social Justice.)

CMMU 93 - Field Study (5)

Supervised work in a community-based setting conducted under the guidance of a faculty member. Students submit petition to sponsoring agency.

CMMU 93F - Field Study (2)

Supervised work in a community-based setting conducted under the guidance of a faculty member. Students submit petition to sponsoring agency.

CMMU 93G - Field Study (3)

Supervised work in a community-based setting conducted under the guidance of a faculty member. Students submit petition to sponsoring agency.

CMMU 99 - Tutorial (5)

Individual directed study for lower-division undergraduates.

CMMU 99F - Tutorial (2)

Individual directed study for lower-division undergraduates.

Upper-Division

CMMU 101 - Communities, Social Movements, and the Third Sector (5)

Engages with crosscutting ideas and concepts central to the major including constructions of community in social-change efforts and the institutionalization of social movements in third-sector organizations. Deepens students' understanding of the opportunities and obstacles embedded in various avenues of social action.

Prerequisite: Enrollment is restricted to sophomore, junior, and senior community studies majors and proposed majors.

CMMU 102 - Preparation for Field Studies (5)

A practicum to prepare students for field study. Course must be successfully completed prior to the six-month field study. Prerequisite(s): course 10; course 101; satisfaction of the Entry Level Writing and Composition requirements; submission of the signed Goals and Objectives form; and completion of the declaration of major process. Enrollment restricted to community studies majors.

CMMU 103 - Field Study Practicum (2)

A practicum in social change work in which the students works for a social change organization on a part-time basis. Concurrent enrollment in course 102 is required.

CMMU 105A - Field Study (5)

Full-time independent field study in an approved off-campus setting with onsite supervision by the sponsoring organization and regular distanced supervision by campus faculty. Enrollment is restricted to community studies majors upon completion of the required preparatory coursework. Prerequisite(s): course 102. (Formerly course 198, Independent Field Study.)

CMMU 105B - Field Study (5)

Full-time independent field study in an approved off-campus setting with onsite supervision by the sponsoring organization and regular distanced supervision by campus faculty. Enrollment is restricted to community studies majors upon completion of the required preparatory coursework. Prerequisite(s): course 102. (Formerly course 198, Independent Field Study.)

CMMU 105C - Field Study (5)

Full-time independent field study in an approved off-campus setting with onsite supervision by the sponsoring organization and regular distanced supervision by campus faculty. Enrollment is restricted to community studies majors upon completion of the required preparatory coursework. Prerequisite(s): course 102. (Formerly course 198, Independent Field Study.)

CMMU 107 - Analysis of Field Materials (5)

A seminar for students who have completed a full-time field study. Devoted to the systematic analysis of field materials, integrating appropriate concepts and relevant literature, as well as utilizing the experience of other students. (Formerly course 194.)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, course 198. Enrollment is restricted to community studies majors.

CMMU 132 - American Cities and Social Change (5)

Examines the historical development of and contemporary conditions within U.S. cities by focusing on social and economic restructurings of cities, cultural and political transformations, and spatial reorganizations of the urban landscape. Goal is understanding the changing nature of urban experience.

CMMU 133 - Making California: Landscapes, People, Politics, Economy (5)

Examines key moments in the development of California to provide understanding of the challenges and opportunities facing California today. Particular focus is given to abiding tensions around wealth and poverty, opportunity and exclusion, and progressive and conservative politics.

CMMU 134 - No Place Like Home (5)

Examines the class and race dynamics of the housing market and public policy, asking what kinds of housing get built, where it gets built, and for whom it is (or is not) built--and, crucially, why. Questions how homelessness became normalized in contemporary society.

CMMU 141 - Political Justice in Theory and Practice (5)

Examines how markets operate within the political economy of contemporary capitalism to generate myriad and often chronic forms of economic and social inequality in the United States. Explores different approaches to addressing inequality within the multi-faceted economic justice movement. (Formerly Political Economy of Inequality.)

Prerequisite: Enrollment is restricted to community studies majors and proposed majors during First Pass enrollment.

CMMU 143 - Wal-Mart Nation (5)

Examines origins and growth of Wal-Mart stores as powerful guides to understanding dynamics of contemporary global political economy and, relatedly, the changing fortunes of global social classes.

CMMU 145 - Global Capitalism: a History of the Present (5)

Provides an overview of the history of capitalism in order to understand current crises within the global political economy. Gives particular attention to the origin, character, and consequences of neoliberalism. (Formerly Globalization and Its Discontents.)

CMMU 149 - Political Economy of Food and Agriculture (5)

Examines key concepts in agrarian political economy; the historical development of the world food system; and a selection of contemporary issues related to food production, consumption, distribution, and regulation.

CMMU 151 - Sex, Race, and Globalization (5)

Examines globalization by attending to shaping forces of sexuality, gender, and race. Foregrounds Third World feminist theories, social movements. Topics include sexual and racial dynamics of free trade and labor fragmentation; global sex trades; HIV/AIDS politics in the South and North; transnational LGBT/queer politics.

CMMU 156 - Politics of Food and Health (5)

Critically examines contemporary debates about market and policy approaches to improve nutrition and dietary health and to address issues, such as food insecurity, obesity, and malnutrition. (Formerly Politics of Obesity.)

CMMU 157 - Ageism and Activism (5)

Introduces students to gerontology, the study of aging. Taking a multidisciplinary approach, critically examines the theories, stereotypes, and realities of worldwide demographic transition and considers the many interesting implications for organizing social and personal life.

CMMU 160 - Public Health (5)

Examination of community activism to address health issues: examples are drawn from a range of concerns, e.g., environmental racism, prison conditions, feminist health matters, the AIDS epidemic, violence, and alcoholism. Special attention is given to the social frameworks of health and to the utilization of social and political strategies for improving community well-being.

CMMU 161 - Gender Health and Justice (5)

Critically examines concrete aspects of health in U.S. social and political contexts, emphasizing how gendered interpretations and practices construct and affect health equity and the practices of health care. (Formerly Women's Health Activism.)

CMMU 162 - Community Gardens and Social Change (5)

Examines history, theory, and practice of community gardening, emphasizing contemporary garden projects using the transformative power of direct contact with nature to effect social change. Aims include understanding the nonprofit sector's response to social problems with novel programs and practices.

CMMU 163 - Health Care Inequalities (5)

Examines system and non-system that is American health care with special attention to inequalities in access, financing, and quality of care. Covers concepts such as equality, fairness, and need as well as community organizing and community building for health.

Prerequisite: Enrollment is restricted to community studies majors and proposed majors during First Pass enrollment.

CMMU 164 - Health Justice in Conflict (5)

Explores three case studies to address critical themes of healthcare inequalities in the context of conflict: the legal battle of Ecuadorians against Texaco/Chevron; the struggle of comfort women during World War II; and chemical saturation in Iraq.

CMMU 186 - Food and Agriculture Social Movements (5)

Examines the primary ways in which activists are attempting to resist, provide alternatives to, and/or transform aspects of the food system using social and environmental justice frameworks to evaluate such activism. Topics explored include organic farming, food charity, fair trade, relocalization, and farmworker organizing. Enrollment is by permission of instructor. (Formerly Agriculture, Food, and Social Justice.)

CMMU 189 - Methods of Teaching Community Studies (5)

Each student serves as a facilitator for small discussion groups in connection with core community studies courses. Facilitators complete course readings and meet with instructor as a group to discuss the teaching process. May not be counted toward upper-division major requirements. Prerequisite(s): prior course work in the major.

CMMU 191 - Student Volunteer Internship (3)

Course bridges Santa Cruz and university communities through students organizing volunteer opportunities and charitable events. Students contribute 10 hours per week on and off campus, including outreach, event-planning, and database maintenance; supplemented by reading and biweekly discussions. Enrollment is by permission of instructor after application and interview.

CMMU 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar, course 42, under faculty supervision. Students submit petition to sponsoring agency. Approval by the Committee on Educational Policy the prior quarter.

CMMU 193 - Field Study (5)

Supervised work in a community-based setting conducted under the guidance of a faculty member. Students submit petition to sponsoring agency.

CMMU 193F - Field Study (2)

Supervised work in a community-based setting conducted under the guidance of a faculty member. Students submit petition to sponsoring agency.

CMMU 193G - Field Study (3)

Supervised work in a community-based setting conducted under the guidance of a faculty member. Students submit petition to sponsoring agency.

CMMU 195A - Senior Thesis (5)

Individual study with a faculty member to complete the senior thesis.

CMMU 195B - Senior Thesis (5)

Individual study with a faculty member to complete the senior thesis.

CMMU 195C - Senior Thesis (5)

Individual study with a faculty member to complete the senior thesis.

CMMU 199 - Tutorial (5)

Advanced directed reading and research for the serious student.

CMMU 199F - Tutorial (2)

Advanced directed reading and research for the serious student.

Graduate

CMMU 297 - Independent Study (5)

Either study related to a course being taken or a totally independent study. Designed for graduate students. Students submit petition to sponsoring agency.

CMPM - COMPUTATIONAL MEDIA

Lower-Division

CMPM 25 - Introduction to 3D Modeling (5)

Introduces theory and techniques of 3D computer graphics. Topics include: capabilities of modern graphics hardware; 3D coordinate spaces; modeling with polygons; NURBS and subdivision surfaces; applying textures and materials; lighting; and simple effects. Students develop proficiency in 3D modeling via lectures and assignments focused on the use of a 3D modeling tool. (Formerly Computer Science 25, Introduction to Computer Graphics: 3D Modeling.)

CMPM 26 - Introduction to 3D Animation (5)

Introduces theories and techniques of 3D computer animation. Topics include: character animation; rigging; simulation of cloth, liquids, and fire; motion capture; rendering; and editing animated scenes. Students develop proficiency in 3D animation via lectures and assignments focused on the use of a 3D animation tool and use of motion-capture software. (Formerly Computer Science 26, Introduction to Computer Graphics: 3D Animation.)

Prerequisite: Prerequisite(s): CMPM 25.

CMPM 35 - Data Structures for Interactive Media (5)

Introduction to common data structures, algorithms that operate on them, and techniques for implementation. Uses digital authoring of interactive media as a frame to motivate asymptotic (big-O) analysis of design scalability. Students will program in a strongly typed language.

Prerequisite: Prerequisite(s): CSE 30.

CMPM 80A - Accessible Games (5)

Overview of the physical, psychological, cultural, and psychosocial aspects of disability and how they impact game play. Discusses implications for universal and accessible game design.

CMPM 80K - Foundations of Video Game Design (5)

A generally accessible course in which students explore how video games (and games generally) shape experiences and

express ideas. Students develop novel games, engage in game interpretation, and survey related topics (e.g., game history, technology, narrative, and ethics) through lectures and readings. Programming experience is not required.

CMPM 80L - Entrepreneurial Organization and Leadership (5)

Provides a framework for leadership in entrepreneurial organizations. Topics include leading with authenticity, motivation and personality, storytelling, teamwork and management, organizational culture and processes. Learning is integrated with practice through deep engagement with entrepreneurial leaders and a time-intensive entrepreneurial project. (Formerly Technology and Information Management 80L.)

CMPM 94 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit a petition to the sponsoring agency.

CMPM 94F - Group Tutorial (2)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit a petition to the sponsoring agency.

Upper-Division

CMPM 120 - Game Development Experience (5)

Teaches the concrete programming and collaboration skills associated with making a digital game from start to finish, including but not limited to: establishing a team, concepting, storyboarding, prototyping, producing, and testing a game for release. Students are organized into groups and work together to create and produce a playable game. This course is taught in conjunction with Art 120G which covers the skills required to design and critique digital games.

Prerequisite: Prerequisite(s): CMPM 80K, CSE 15 and CSE 15L, and FILM 80V; and ARTG 80G or ARTG 80H or ARTG 80I; and concurrent enrollment in ARTG 120.

CMPM 121 - Game Technologies (5)

Introduction to construction of games using game engine technology, using a specific game engine as a focus. Covers major game engine features: input, collision, animation, model import, lighting, camera, rendering, textures, particle systems. Introduction to a specific game scripting language, custom game logic, game programming patterns.

Prerequisite: Prerequisite(s): CMPM 120.

CMPM 131 - User Experience for Interactive Media (5)

Theories and practices for approaching the design problems of interactive media holistically, beyond usability and accessibility. Includes hands-on learning, application of human-centered design and evaluation skills in group projects, and peer critique.

Prerequisite: Prerequisite(s): CSE 15. Enrollment is restricted to juniors, seniors, and graduate students.

CMPM 146 - Game AI (5)

Course provides a comprehensive introduction to the use of artificial intelligence (AI) in computer games. Building on fundamental principles of AI, course explains how to create non-player characters (NPCs) with progressively more sophisticated capabilities. (Formerly Computer Science 146.)

Prerequisite: Prerequisite(s): CSE 101; familiarity with C++. Enrollment is restricted to sophomores, juniors, seniors, and graduate students.

CMPM 147 - Generative Design (5)

Introduces generative methods for design. Uses algorithmic techniques to generate and evaluate game content (images, sounds, map designs) along with mechanics and progression systems. Search-based and learning-based techniques with connections to artificial intelligence are also covered.

Prerequisite: Prerequisite(s): CMPM 120.

CMPM 148 - Interactive Storytelling (5)

Covers a range of design approaches and technologies including storytelling in games, interactive fiction, interactive drama, and artificial intelligence-based story generation. Through a mixture of readings, assignments, and project work, students explore the theoretical positions, debates, and technical and design issues arising from these approaches. (Formerly Computer Science 148.)

Prerequisite: Prerequisite(s): CSE 101. Enrollment is restricted to juniors and seniors.

CMPM 150 - Creating Digital Audio (5)

Introduces digital sound recording and editing technologies, sound synthesis, and concepts in sound design for media production. Covers the basics of sound capture, microphones, audio manipulation and editing, effects, sound formats, mixing and dynamics, synthesizers, audio software, and game audio.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

CMPM 151 - Algorithmic Music for Games (5)

Introduces compositional techniques and procedural audio as exhibited in the sound and music of video games. Surveys different styles of music implemented in video games and associated compositional approaches. Students develop skill in procedural audio via a series of workshops and assignments.

Prerequisite: Prerequisite(s): CSE 14 and CSE 14L, or CSE 11.

CMPM 163 - Game Graphics and Real-Time Rendering (5)

Introduces real-time, hardware-accelerated graphics programming suitable for game development, visual effects,

and interactive multimedia projects. Emphasizes contemporary shader-programming techniques and developing custom effects using game engines and multimedia software.

Prerequisite: Prerequisite(s): CSE 15 and CSE 15L (exceptions granted in special cases by permission of the instructor.).

CMPM 164 - Game Engines (5)

Covers the graphic elements in computer games. Topics include modifying, optimizing, adding components, and building a game engine. Course evaluation based on exams and several programming projects, including a game built using the student's game engine. (Formerly Computer Science 164.)

Prerequisite: Prerequisite(s): CSE 160 and CSE 160L. Concurrent enrollment in CMPM 164L is required.

CMPM 164L - Game Engines Lab (2)

Provides hands-on experience in using, designing, and building game engines. Students also explore different special effects, such as particle systems, spring systems, and game physics. (Formerly Computer Science 164L.)

Prerequisite: Concurrent enrollment in CMPM 164 is required.

CMPM 170 - Game Design Studio I (5)

First of a three-course capstone sequence for the computer game design program. Students work in teams to develop a comprehensive game design for a substantial computer game, including detailed storyline, level design, artistic approach, implementation technologies, and art-asset pipeline. Emphasis placed on creating novel, artistic game design concepts. Includes design reviews and formal presentations. Companion lectures cover advanced topics in game design, game programming, and software project management. Students are billed a materials fee. (Formerly Computer Science 170.)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; CMPM 120, ARTG 120 and CSE 111. Enrollment is restricted to Computer science: computer game design majors.

CMPM 171 - Game Design Studio II (7)

Second of a three-course capstone sequence for the computer game design program. Students work in teams on the software design, implementation, and testing of the computer game designed in course 170. Includes design reviews, progress reviews, and formal presentations. Companion lectures cover topics in software engineering, including design, testing, and project management. Game design and game programming also covered. Students are billed a materials fee.

Prerequisite: Prerequisite(s): CMPM 170 and CMPM 176 and one computer game engineering elective. Enrollment is restricted to computer science: computer game design majors.

CMPM 172 - Game Design Studio III (7)

Third of a three-course capstone sequence for the computer game design program. Students work in teams on the software design, implementation and testing of the computer game designed in courses 170 and 171. Includes progress reviews and formal presentations. Companion lectures cover topics in software engineering, including user and software testing, release engineering and project management; also covered are game design and game programming. Students are billed a materials fee. (Formerly Computer Science 172.)

Prerequisite: Prerequisite(s): CMPM 171. Enrollment is restricted to Computer science:computer game design major.

CMPM 176 - Game Systems (5)

Presents game design as the interplay of multiple interacting game systems. Surveys various game systems: movement, combat, reward, economic, logistics, quest, information visibility, narrative. Students explore systems via study, design, and play of board, card, and computer games.

Prerequisite: Prerequisite(s): CMPM 80K.

CMPM 177 - Creative Strategies for Designing Interactive Media (5)

Surveys tactical, structural, contextual, and other methods to enhance creativity and innovation in the design of games and other interactive media. Investigates strategies for creativity and innovation drawn from diverse fields, including interactive affordances, narrative and poetics, biology, contextual inquiry, and design research. To innovate in a field of fixed genres is challenging: the allure of modeling exemplars is strong. Although imitation can be successful in the marketplace, the most creative action occurs on the leading edge of change. Innovation benefits from strategies and methods that are directly aimed at exploring new perspectives and structures to learn through the process of discovery. (Formerly Computer Science 177.)

Prerequisite: Enrollment is restricted to juniors and seniors.

CMPM 178 - Human-Centered Design Research (5)

Students move through a rigorous design-research process involving skills and principles in human-centered design research as well as selected formal research methods. They learn to use tools for ideation, human-centered qualitative research, domestic probes, mock-ups, and prototypes. (Formerly Computer Science 178.)

Prerequisite: Enrollment is restricted to juniors, seniors, and graduate students.

CMPM 179 - Game Design Practicum (5)

Provides the opportunity to practice the creation of novel computer games. Students learn a new game-making technology, then create three games using this technology.

Prerequisite: Prerequisite(s): CMPM 120 and CMPM 80K.

CMPM 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit a petition to the sponsoring agency.

CMPM 194F - Group Tutorial (2)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit a petition to the sponsoring agency.

CMPM 195 - Senior Thesis Research (5)

Students submit a petition to the sponsoring agency.

CMPM 195F - Senior Thesis Research (2)

Intended for majors. Students submit a petition to the sponsoring agency.

CMPM 198 - Individual Study or Research (5)

Students submit petition to sponsoring agency.

CMPM 198F - Individual Study or Research (2)

Intended for majors. Students submit petition to sponsoring agency.

CMPM 199 - Tutorial (5)

For fourth-year students majoring in computational media. Students submit a petition to the sponsoring agency.

CMPM 199F - Tutorial (2)

For fourth-year students majoring in computational media. Students submit a petition to the sponsoring agency.

Graduate

CMPM 201 - Introduction to Computational Media (5)

Provides a broad foundation in the history, theory, and contemporary practice of computational media, examining its roots in a variety of fields and current structures of participation. Also covers a selection of key critical lenses for understanding computational media.

Prerequisite: Enrollment is restricted to computational media graduate students, or by permission of the instructor.

CMPM 202 - Computation Media Research (5)

Overview of computational media research strategies. Includes case studies of how particular projects were defined and completed and how interdisciplinary concerns have been successfully integrated. Considers the expressive and authorial affordances of different system architecture approaches.

Prerequisite: Prerequisite(s): CMPM 201, or by permission of the instructor. Enrollment is restricted to graduate students.

CMPM 203 - Computational Media Methods (5)

Overview of major methods in computational media research. Includes non-numerical methods such as playtesting, arts critique, ethnographic observation, and humanistic interpretation. Also includes numerically oriented methods such as survey instruments, data mining, user experiments, and characterizing expressive/generative spaces.

Prerequisite: Enrollment is restricted to Computational Media graduate students.

CMPM 204 - Computational Media Project Definition (5)

Students define the topic, approach, and scope for an M.S. thesis or project. Includes discussion of successful past projects and theses, visits from faculty presenting open problems, reviews of related literature, topic and timeline presentations, and critiques.

Prerequisite: Enrollment is restricted to computational media graduate students, or by permission of the instructor.

CMPM 206 - Computational Media Research Preparation (2)

Covers skills for finding relevant literature for a novel research topic, integrating that literature, and communicating the results. Also covers how to select work for a research portfolio, present that work, and describe contributions. Enrollment is by permission of the instructor. Prerequisite(s): CMPM 201, CMPM 202, and CMPM 203 for an understanding of media creation and computer programming; good standing in the PhD program. Enrollment is restricted to graduate students.

CMPM 235 - User Evaluation of Technology (5)

Presents a variety of evaluation methodologies to assess usability, acceptance, and effectiveness of technology with the intended users. Combines lectures and exercises for students to gain firsthand experiences of these methodologies with real users. (Formerly Computer Engineering 235.)

Prerequisite: Enrollment is restricted to graduate students. Seniors may enroll with completion of CSE 165.

CMPM 243 - Social Computing Research: Design, Algorithms, and Incentives (5)

Provides an interdisciplinary view of computational systems and human interaction, with an emphasis on human-computer interaction and algorithmic economics. Students learn about seminal and cutting-edge research contributions and methodologies, and carry out a quarter-long research project. (Formerly Technology and Information Management 243.)

Prerequisite: Prerequisite(s): A background in either mathematical proofs or user-centered design and programming. Enrollment is restricted to graduate students; undergraduates may enroll by permission of the instructor.

CMPM 244 - Artificial Intelligence in Games (5)

Artificial intelligence has long used game-playing as a metric for progress. Key algorithms such as alpha-beta and HPA search studied. Computer algorithms for backgammon, poker,

and chess examined. There will be individualized projects. (Formerly Computer Science 244.)

Prerequisite: Prerequisite(s): CSE 201; and CSE 202 or CSE 240 or CSE 242.

CMPM 248 - Interactive Storytelling (5)

Covers wide range of practices including hypertext, interactive fiction, embedded narratives in games, interactive drama, and artificial intelligence-based story generation. Through a mixture of readings, assignments, and project work, explores the theoretical positions, debates, and technical and design issues arising from these different approaches. (Formerly Computer Science 248.)

Prerequisite: Enrollment is restricted to graduate students.

CMPM 265 - Generative Methods (5)

In-depth exploration of algorithms for the automated generation of 2D and 3D models and content. Covers multiple approaches, including noise, grammars, genetic algorithms and programming, parametric design, and answer-set programming. Includes application of techniques to computer-game content and level design. (Formerly Computer Science 265.)

Prerequisite: Enrollment is restricted to graduate students.

CMPM 280C - Computational Media Seminar (2)

Graduate seminar with speakers from academia and industry. Covers state of the art research and industry trends in Computational Media and related areas.

Prerequisite: Enrollment is restricted to computational media and games and playable media graduate students.

CMPM 280G - Seminar in Generative Methods (2)

Weekly seminar covering advanced topics and current research in generative methods--the field focused on algorithms for creation of 2D and 3D models and content.

Prerequisite: Enrollment is restricted to graduate students.

CMPM 280H - Seminar in Human-Computer Interaction and Computational Media (2)

Covers advanced topics and current research in human-computer interaction as it intersects computational media. Focuses on student presentations and seminar participation. Enrollment restricted to graduate students and by permission of the instructor.

CMPM 280I - Human Computer Interaction Seminar (2)

Ongoing participatory seminar toward staying informed about the current state of the art in Human Computer Research, both within the Computational Media department, as well as in the broader field. Course consists of weekly lectures and discussion. Graduate students will take part in giving presentations.

Prerequisite: Enrollment restricted to computational media and games and playable media graduate students.

CMPM 280K - Seminar in Interactive Systems for Individuals with Special Needs (2)

Covers advanced topics and current research in interactive systems for individuals who have special needs. Focuses on student presentations and seminar participation.

Prerequisite: Enrollment is restricted to graduate students.

CMPM 280S - Seminar Topics (2)

Weekly seminar series of current research on a special topic in information systems and technology management. The theme of research presented throughout the course selected by the instructor. Topics may include, but are not limited to, knowledge planning, new product development and management of technology. Enrollment with permission of instructor. (Formerly Technology and Information Management 280S.)

CMPM 280W - Seminar in Digital Media (2)

Covers advanced topics and current research in digital media—the interdisciplinary field at the intersection of computer science, media authoring, and models of interpretation from the humanities and social sciences. Focuses on student presentations and seminar participation. (Formerly Computer Science 280W.)

Prerequisite: Enrollment is restricted to graduate students.

CMPM 280X - Expressive AI (2)

Weekly seminar covering topics of current research in artificial intelligence applied to interactive art and entertainment, including computer games. Enrollment by permission of instructor. Enrollment restricted to graduate students. (Formerly Computer Science 280X.)

CMPM 290A - Topics in Computational Media (5)

Students learn about a current research area in computational media and make a contribution. Each course offering focuses on a different aspect of technical, creative, and/or interpretive work in the field.

Prerequisite: Enrollment is restricted to computational media graduate students.

CMPM 290J - Playable Media (5)

Focuses on media, such as computer games, that invite and structure play. Work includes building and critiquing a series of prototypes; studying major examples in the field; and discussing both theoretical and practice-oriented texts. Enrollment by permission of instructor. Enrollment restricted to graduate students. (Formerly Computer Science 290J.)

CMPM 290K - Social and Emotional Approaches to Human Computer Interaction (5)

Focuses on enhancing social and emotional capabilities and qualities in interactive systems. Students read research, look at sample systems, and engage in evaluation, design, and prototyping exercises. A research project and helping to lead class discussions are also required.

Prerequisite: Enrollment is restricted to graduate students.

CMPM 290P - Topics in Computational Cinematography (5)

Focuses on discussion of recent advances in visual storytelling in graphical environments. Major topics covered are: intelligent camera control, shot-compositions, lighting design, interactive storytelling, and computational techniques associated with these applications. Class consists of in-class discussions and student presentations of research papers and a final student project. (Formerly Computer Science 290P.)

Prerequisite: Enrollment is restricted to graduate students.

CMPM 297A - Independent Study or Research (5)

Independent study or research under faculty supervision. Although this course may be repeated for credit, not every degree program will accept a repeated course toward degree requirements. Students submit petition to sponsoring agency.

CMPM 297B - Independent Study or Research (10)

Independent study or research under faculty supervision. Although this course may be repeated for credit, not every degree program will accept a repeated course toward degree requirements. Students submit petition to sponsoring agency.

CMPM 297C - Independent Study or Research (15)

Independent study or research under faculty supervision. Although this course may be repeated for credit, not every degree program will accept a repeated course toward degree requirements. Students submit petition to sponsoring agency.

CMPM 297F - Independent Study or Research (2)

Independent study or research under faculty supervision. Although this course may be repeated for credit, not every degree program will accept a repeated course toward degree requirements. Students submit petition to sponsoring agency.

CMPM 299A - Thesis Research (5)

Thesis research conducted under faculty supervision. Although this course may be repeated for credit, not every degree program will accept a repeated course toward degree requirements. Students submit petition to sponsoring agency.

CMPM 299B - Thesis Research (10)

Thesis research conducted under faculty supervision. Although this course may be repeated for credit, not every degree program will accept a repeated course toward degree requirements. Students submit petition to sponsoring agency.

CMPM 299C - Thesis Research (15)

Thesis research conducted under faculty supervision. Although this course may be repeated for credit, not every degree program will accept a repeated course toward degree requirements. Students submit petition to sponsoring agency.

COWL - COWELL COLLEGE

Lower-Division

COWL 1 - Academic Literacy and Ethos: Imagining Justice (5)

Teaches foundational concepts for intellectual exploration and personal development within an academic community: analysis, critical thinking, metacognition, engagement with others across difference, and self-efficacy. Examines the emergence and development of key concepts of justice including procedures, rights, and reparation.

Prerequisite: Enrollment is restricted to first-year college members.

COWL 10 - Becoming a Successful Student (5)

An interactive approach to effective studying, note-taking, critical thinking, and exams. Also explored: time management; good communication with staff and faculty; major and career exploration; and use of campus resources. Enrollment priority given to first-year students and sophomores.

COWL 12 - Public Speaking (5)

This introductory level seminar is designed to reduce anxiety and increase competence and confidence in a variety of public speaking situations. While providing some theory, this seminar emphasizes the practice of composing and delivering speeches, including formal, informal, and extemporaneous occasions.

Prerequisite: Enrollment is restricted to college members during priority enrollment.

COWL 39 - Brain, Mind, and Consciousness (3)

An interdisciplinary introduction to the study of the brain, mind, and consciousness. Topics include the philosophy of mind, neuroscience, cognition, and social psychology, and their applications in fields such as health science, technology, and social development.

COWL 40 - Near-Death Experiences: Evidence and Inference in the Post-Modern World (5)

Explores evidence and inferences from existing literature surrounding near-death experiences. Uses a multidisciplinary approach to investigate concepts, such as consciousness, aging, life, and death.

COWL 50 - Library Skills for the Digital Age (2)

Intended to enhance students' skills in using the most powerful learning tool in any university: the library. Topics:

organization of the library; how to begin researching; search engine and database use; judging the quality of sources; using sources responsibly. Disciplinary focus changes from quarter to quarter.

Prerequisite: Enrollment is restricted to first-year and sophomore college members, or by permission of instructor.

COWL 52 - Personal Finance and Investing (5)

Overview of the financial responsibilities that young adults take on after college. Topics include: taxes, budgeting, student loans, credit, and investing in the stock market. Ubiquitous terms, such as 401(k), are defined, and financial principles are used to develop a framework for personal financial decision-making.

COWL 61 - Critical Journeys (2)

For publication in a Cowell literary journal, students substantively revise one of their fall quarter essays by studying a major work that influences, acknowledges, or further clarifies a required reading of the Cowell core course.

Prerequisite: Prerequisite(s): course 80A or 80B; enrollment is restricted to college members.

COWL 64 - Social Justice: Issues and Debates (2)

Focused followup on social justice topics and readings introduced in the Cowell core course. Allows first-year students to pursue social justice themes in greater depth. Students must have previously taken a Cowell core course (or equivalent).

Prerequisite: Enrollment is restricted to first-year students.

COWL 65 - Meaning, Paradox, and Love (5)

Mary Holmes--legendary founding faculty member of UCSC, keen observer, painter of mythic images, and profound thinker--had a visionary's insight into the mysteries of love, paradox, and meaning. This course explores her art, teaching, and wisdom. (Formerly Love and Wisdom.)

COWL 70A - Introduction to Book Arts (5)

Students learn techniques of bookbinding, construction, and design, and fundamentals of letterpress printing. Enrollment is by permission of instructor. Students are billed a materials fee. (Formerly Bookbinding.)

COWL 70B - Intermediate Book Arts (5)

Learn fundamental skills in fine letterpress printing, including hand typesetting and instruction in the operation of printing presses. Basic typography explored as students design and print a small edition of a selected text. Students are billed a materials fee. (Formerly Printing I: Elements of Printing.)

Prerequisite: Prerequisite(s): COWL 70A or by permission of instructor.

COWL 70C - Advanced Book Arts (5)

Students learn fundamental skills in fine letterpress printing, including hand typesetting and instruction in the operation of

printing presses. Basic typography explored as students design and print a small edition of a selected text. Students are billed a materials fee. (Formerly Printing II: Typography and Book Design.)

Prerequisite: Prerequisite(s): COWL 70B or by instructor permission.

COWL 78 - Children, Technology, and Development (5)

First-year honors seminar focusing on current research and theory related to children and technology. Attention is given to the gaps between public opinion about the impact of technology on children and the actual evidence regarding such impacts. Topics may include how use of digital devices may influence children's thinking; how children learn to use new technologies; computer gaming and aggression; and how children's social development may be influenced by social media and other technology.

Prerequisite: Enrollment is restricted to College Scholar students.

COWL 82 - Good vs. Good (5)

Explores the world of philanthropy. Examines the different models of philanthropy to evaluate its strengths and weaknesses. Also examines what drives philanthropists to give. Enrollment by permission and restricted to College Scholar students.

COWL 83 - The Modern Metropolis: Paris, London, New York 1770-1860 (5)

A comparison of three great modern cities, with emphasis on their roles as incubators of new forms of art, spectacle, and entertainment; the specters of alienation, poverty, and crime during periods of explosive growth; and immigration and diversity as sources of cultural dynamism.

Prerequisite: Enrollment is restricted to Cowell and Crown Honors students.

COWL 84 - Chinese Approaches to Human Values (5)

Through study of primary sources in translation, considers a range of classic Chinese approaches to basic reflective questions about human experience, with special focus on issues of justice, social engagement, and meaning and authenticity in everyday life.

Prerequisite: Enrollment is restricted to College Scholars students.

COWL 85 - Introduction to Chinese Writing Systems (5)

Gateway course illuminating the operation of the writing systems of greater China. Intended for students who are curious about the world's longest continually used symbol set as well as for those who may be considering a serious commitment to learning the language.

COWL 86 - Leading Social Change (2)

Offers students the knowledge and skills required to lead diverse teams. Topics include the social-change model of

leadership and principles of collaboration. Geared toward Cowell and Stevenson Residential Assistants, but students interested in the topics may take the course with permission from the instructor.

COWL 87 - The History of Time (5)

Examines the history of temporality or the human experience of time. Theoretical readings and primary sources are used to explore the ways that humans have related to the past, present, and future. Course focuses on research and writing methods.

Prerequisite: Enrollment is restricted to College Scholar students.

COWL 89 - Faculty Research Colloquium (2)

Introduction of UCSC as a research university, our notable researchers, and their work. Weekly discussions with UCSC faculty from a variety of disciplines.

Prerequisite: Enrollment is restricted to participants in the first-year scholars program.

COWL 93 - Field Study (5)

Various topics to be arranged. Students submit petition to sponsoring agency.

COWL 93F - Field Study (2)

Various topics to be arranged. Students submit petition to sponsoring agency.

COWL 94 - Group Tutorial (5)

A program of independent study arranged between a group of students and a faculty instructor. Students submit petition to sponsoring agency.

COWL 94F - Group Tutorial (2)

A program of independent study arranged between a group of students and a faculty instructor. Students submit petition to sponsoring agency.

COWL 99 - Tutorial (5)

Various topics to be arranged. Students submit petition to sponsoring agency.

COWL 99F - Tutorial (2)

Various topics to be arranged. Students submit petition to sponsoring agency.

Upper-Division

COWL 107 - Trust Rules: How to Tell the Good People from the Bad (2)

Students learn practical tools and techniques for assessing trustworthiness, including your own, and applying these tools in a variety of situations. Integrating insights from practical experience, philosophy, and psychology, this course teaches us how to pay attention to red flags in relationships and

ultimately develop a network of trustworthy people that will help us succeed in work and in our personal lives. (Formerly Trust Rules: How to Tell Good People from Bad People in Work and Life.)

Prerequisite: Enrollment is restricted to college members or by permission of instructor.

COWL 110 - Introduction to Mock Trial (2)

Introduces Mock Trial, which is open to all students. Covers the basics of argumentation, cross and direct examinations, permissible evidence, witness testimony, and courtroom protocol. Special emphasis is on public speaking. Students write speeches for opening and closing arguments and create questions for witnesses. Students must read the Mock Trial handbook for examples and strategies. Each student has an opportunity for public speaking and creating a coherent legal argument.

Prerequisite: Enrollment is restricted to college members.

COWL 111 - Mock Trial Workshop (2)

Mock Trial teaches public speaking in the context of law. Students learn direct examination and cross examination strategies, characterization, and different ways to improve your public speaking skills. Class is open to everyone regardless of experience in Mock Trial. Class is also a way to gain experience for students considering joining the Mock Trial team.

COWL 118B - Words & Music: Poetry, Musical Theater, Opera (5)

Study of significant texts enhanced by music for performance. Topics vary annually. Course compares original texts in English translation with their adaptation to musical theater (My Fair Lady, Oklahoma, etc.) and opera (Carmen, etc.)

COWL 122 - United Nations Contemporary Issues (2)

Introduces the Model United Nations through discussion of contemporary issues. Students learn parliamentary procedures and U.N. protocols, as well as how to work collaboratively to research and to present position papers. Students learn resolution writing, alliance building, and persuasive speech.

COWL 126 - Trajectories of Justice: Standing Rock, Climate Change, and Trump's Potential Impeachment (5)

Enables students to become expert on the potential impeachment of Donald Trump in the context of progressive American history, emphasizing his Neglect of Duty regarding global climate change through the lens of The Native Uprising against the Dakota Access Pipeline. (Formerly The Trajectory of Justice in America.)

COWL 138A - The Place of Higher Education in a Democratic Society (5)

Centers around interviews of alumni and involves a reflective term paper on a specific topic having to do with the role of higher education in a democratic society. Teaches students how to conduct interviews.

Prerequisite: Prerequisite(s): COWL 80A or COWL 80B.

COWL 138B - Life Development (2)

Visits from alumni form the centerpiece of this course. In teams, students study the lives and the issues of the visitors. The aim is to reflect on the meaning of education in adult development.

Prerequisite: Prerequisite(s): COWL 80A or COWL 80B. Enrollment is restricted to sophomore, junior, and senior Cowell College members.

COWL 156M - Medical Ethics and Justice in Literature and Film (5)

Course approaches literature and literary devices in their capacity to address the patient's experience of illness, medical education and practice, and medical ethics and to understand and assess how considerations of justice impact these themes in medicine. Particular issues raised by a variety of topics are examined and discussed in the context of case examples as presented in literature and film, e.g., informed consent, the doctor-patient relation, withdrawing vs. withholding life-sustaining treatment, organ transplantation, health care reform, rationing/social justice, etc. (Formerly Arts and Sciences.)

COWL 158A - Special Topics: Oral History (5)

Introduction to the art and science of conducting and oral history. Readings include books that offer both theoretical and practical insights. Students conduct interviews and construct oral histories, focusing on the alumni of Cowell College.

Prerequisite: Enrollment restricted to sophomore, junior, and senior college members.

COWL 161A - Bards to Bloggers: Literature and Technology in Transhistorical Focus (5)

Through study of ancient and contemporary forms (epics to e-literature), students study the connections that have tied literary reading and writing to specific technologies, including memory, the alphabet, pens, printing, radio, computing, the Internet, and handheld devices.

Prerequisite: Enrollment is restricted to junior and senior college members.

COWL 165 - Fundraising Practicum (3)

Covers the fundamental skills, ethics, and practices of crowd-sourced fundraising in the liberal arts. Students build a project portfolio that includes mission statement, donor-cultivation tools, and action reports. Enrollment is by permission of the instructor. Meet with the instructor to verify enrollment in a Giving Day campaign with liberal arts focus.

COWL 168 - Social Change (2)

How do you change the world, working alone and in concert with others? To find out, students work in groups with specific community partners who, in turn, help place students in social-change organizations in Santa Cruz County.

Prerequisite: Enrollment is restricted to college members.

COWL 170F - Freedom and Race (5)

Interrogates the relationship between freedom and race in our current political moment by looking to historical and theoretical models that inform the present. Considers how race operates in legal, scientific, and visual discourses to shape individual and collective freedoms.

COWL 184A - Leadership and Institution Building (2)

Through lectures by senior administrators and student consensus-and-recommendation teams, students learn how leaders work with constituent groups, build cooperation, and develop implementation plans in an institution such as the University of California, specifically, UC Santa Cruz. Enrollment is restricted to undergraduates accepted in the Chancellor's Undergraduate Internship Program. Students submit applications winter quarter for the following academic year.

COWL 184B - Leadership and Institution Building (2)

Through lectures by senior administrators and student consensus-and-recommendation teams, students learn how leaders work with constituent groups, build cooperation, and develop implementation plans in an institution such as the University of California, specifically, UC Santa Cruz. Enrollment is restricted to undergraduates accepted in the Chancellor's Undergraduate Internship Program. Students submit applications winter quarter for the following academic year.

COWL 184C - Leadership and Institution Building (2)

Through lectures by senior administrators and student consensus-and-recommendation teams, students learn how leaders work with constituent groups, build cooperation, and develop implementation plans in an institution such as the University of California, specifically, UC Santa Cruz. Enrollment is restricted to undergraduates accepted in the Chancellor's Undergraduate Internship Program. Students submit applications winter quarter for the following academic year.

COWL 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar under faculty supervision. (See course 42.) Upper-division standing required and a proposal supported by a faculty member willing to supervise.

COWL 193 - Field Study (5)

Program of study arranged between a group of students and an instructor, which may involve work with an off-campus or non-departmental agency (e.g., internship or field work). Interview only; prior arrangement with instructor. Enrollment is restricted to juniors and seniors.

COWL 193F - Field Study (2)

Program of study arranged between a group of students and an instructor, which may involve work with an off-campus or

non-departmental agency (e.g., internship or field work). Interview only; prior arrangement with instructor. Enrollment is restricted to juniors and seniors.

COWL 194 - Group Tutorial (5)

A program of independent study arranged between a group of students and an instructor. Students submit petition to sponsoring agency.

COWL 194F - Group Tutorial (2)

A program of independent study arranged between a group of students and an instructor. Students submit petition to sponsoring agency. Enrollment is restricted to juniors and seniors.

COWL 195 - Senior Thesis (5)

Students submit petition to sponsoring agency.

COWL 198 - Independent Field Study (5)

Provides for college-sponsored individual study programs off campus, for which faculty supervision is not in person (e.g., supervision is by correspondence.) Up to three such courses may be taken for credit in any one quarter. Approval of student's adviser, certification of adequate preparation, and approval by provost required.

COWL 199 - Tutorial (5)

Various topics to be arranged. Students submit petition to sponsoring agency.

COWL 199F - Tutorial (2)

Various topics to be arranged. Students submit petition to sponsoring agency.

CRES - CRITICAL RACE AND ETHNIC STUDIES

Lower-Division

CRES 10 - Critical Race and Ethnic Studies: An Introduction (5)

Examines the concept of race, followed by an investigation of colorblindness, multiculturalism, and post-racialism. Race and ethnicity are examined as historically formulated in relationship to the concepts of gender, sexuality, class, nationalism, indigeneity, citizenship, immigration, and inequality.

Prerequisite: Prerequisite(s): Satisfaction of the Entry Level Writing requirement.

CRES 45 - Pilipinx Historical Dialogue (5)

Examines the history, politics, and cultural expressions of the Pilipinx community, in the Philippines and the diaspora, with an emphasis on Pilipinx and Pilipinx-American activism.

CRES 60E - Blackness and Indigeneity in Europe (5)

What are the contours of Black Europe? This course emphasizes a range of disciplinary approaches to the concepts of blackness and indigeneity, introducing and questioning Black Europe as a field, a culture, and a set of ideologies.

CRES 68 - Approaches to Black Studies (5)

Provides a diasporic approach to the field of Black Studies in the modern era, with a focus on histories of dispossession and resistance.

CRES 70S - Introduction to the Sikhs (2)

Introduces the Sikh community, including origins, history, belief system, and contemporary issues. Other topics include: Sikh music, art, literature, and aspects of Sikh society. Attention paid to the Sikh diaspora in the United States and in California in particular, including comparative perspectives with other minority communities. (Formerly Humanities 70S.)

CRES 94 - Group Tutorial (5)

A lower-division group tutorial, led by a faculty member, that focuses on various problems within critical race and ethnic studies. Topics to be chosen by the instructor and undergraduate student participants. Enrollment is restricted to critical race and ethnic studies majors.

CRES 94F - Group Tutorial (2)

A program of independent study arranged between a group of students and a faculty instructor. Students submit petition to sponsoring agency. Enrollment is restricted to critical race and ethnic studies majors.

CRES 99 - Tutorial (5)

Students submit petition to sponsoring agency.

Upper-Division

CRES 100 - Comparative Theories of Race and Ethnicity (5)

Examines race and ethnicity as categories of lived identity intersecting with gender, sexuality, class, and culture; historical discourses of difference underwriting social inequalities and movements to redress those inequalities; and concepts critical to the understanding and reshaping of power and privilege.

Prerequisite: Prerequisite(s): CRES 10 and satisfaction of the Entry Level and Composition requirements.

CRES 101 - Research Methods and Writing in Critical Race and Ethnic Studies (5)

Examines how scholars and activists produce knowledge in critical race and ethnic studies. Interrogates key terms to build a foundation and literacy in research methods. The course is project-based; and requires work on a team.

Prerequisite: Prerequisite(s): CRES 10 and satisfaction of the Entry Level Writing and Composition requirements.

CRES 111 - The Sounds of Struggle (5)

Explores relations between music and democratic politics. Is harmony the ideal condition of the nation-state? Is disharmony a necessary condition of democracy? Students read literary texts alongside political philosophy and listen to music as we explore how musical recordings and performances produce our understanding of the citizen-nation relationship.

CRES 114 - Race and Disability in American Drama (5)

Investigates how African-American, Asian-American, and Latin-American playwrights represent and criticize the concept of race and disability in their dramas on topics from freak shows to Jim Crow laws to the Virginia Tech massacre. Students cannot receive credit for this course and LIT 151K.

CRES 181 - The Lynch Doctrine: From Rough Justice to Stand Your Ground (5)

Interdisciplinary course examining the history, politics, and aesthetics of lynching culture in the United States. (Formerly History of Consciousness 181.)

CRES 185A - Race, Gender, and Science (5)

Examines how science as epistemology and its accompanying practices participate in, create, and are created by understandings of race, gender, sexuality, and nation.

Prerequisite: Enrollment is restricted to critical race and ethnic studies majors. Other majors by permission.

CRES 190A - Critical Race Feminisms (5)

Focuses on key learning outcomes of humanistic research and writing: developing a method for critical race feminist analysis, identifying objects and fields of study, formulating an appropriately narrow topic and thesis, identifying and critiquing sources, and completing well-structured written argumentation. Readings offer key theoretical models in critical race and ethnic studies, feminist studies, and queer theory.

Prerequisite: Prerequisite(s): CRES 10 and CRES 100; and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to critical race and ethnic studies majors.

CRES 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar by an upper-division student under faculty supervision. (See course 42.)

CRES 194 - Group Tutorial (5)

Group tutorial, led by a faculty member, that focuses on various problems within critical race and ethnic studies. Topics to be chosen by the instructor and undergraduate student participants. Enrollment restricted to critical race and ethnic studies majors.

CRES 199 - Tutorial (5)

Students submit a petition to the sponsoring agency.

CRES 199F - Tutorial (2)

Individual study in areas approved by sponsoring instructors. May not be counted toward upper-division major requirements. Student submits petition to sponsoring agency. Enrollment is restricted to critical race and ethnic studies majors.

CRSN - CARSON COLLEGE

Lower-Division

CRSN 1 - Academic Literacy and Ethos: Environment and Society (5)

Teaches foundational concepts for intellectual exploration and personal development within an academic community: analysis, critical thinking, metacognition, engagement with others across difference, and self-efficacy. Engages students in Rachel Carson's intellectual tradition of investigating relationships between environment and society.

Prerequisite: Enrollment is restricted to first-year college members.

CRSN 10 - Academic Success (2)

An interactive course providing students with the opportunity to assess and revise methods of and purposes in studying. Critical, effective approaches to reading, writing, participating in lectures and sections, taking exams, balancing competing responsibilities, and utilizing campus resources are all explored. Enrollment by permission of college adviser.

CRSN 15 - Strategies to Jump Start Your STEM Learning (2)

Introduces tips and techniques to supplement and expand a student's existing repertoire of science/mathematics problem-solving skills for science, technology, engineering, and mathematics (STEM) classes. The material covered is intended to aid development as a confident learner and future expert in the student's major.

Prerequisite: Enrollment is restricted to first-year and sophomore Rachel Carson College members. Other students by permission.

CRSN 15A - STEM Essentials (2)

Introduces tips and techniques to supplement and expand a student's existing repertoire of science/mathematics problem-solving skills for science, technology, engineering, and mathematics (STEM) classes. The material covered is intended to aid development as a confident learner and future expert in the student's major.

CRSN 20C - The Water Environment: Literature of the Sea (2)

Students consider the representation of the sea in selected texts, noting how it becomes the focal point for the fears, hopes, and prejudices of Western civilization. Students write critical papers and their own narratives.

Prerequisite: Enrollment restricted to first-year and sophomore college members.

CRSN 20D - College Students' Lives (2)

Students understand their peers and themselves better through an exploration of issues that affect the daily life of college students. Topics include campus/student cultures, the academic system, and other critical issues. Overview of campus resources also provided.

Prerequisite: Enrollment restricted to first-year and sophomore College members.

CRSN 20F - Justice on Earth (3)

Examines issues of oppression, privilege, and social justice within a global and environmental context through self-reflective and group work. May include an optional service-learning component requiring travel during spring break.

CRSN 20G - Peregrine Falcons Return (2)

A case study of the successful effort by UC Santa Cruz biologists to fully recover California's nearly extinct population of Peregrine Falcons between 1975 and 1995.

CRSN 28 - Peer Leadership in Higher Education (3)

Overview of theories of student development, critical student issues, and skills needed for appropriate peer leadership interventions. Utilizes a variety of learning modes including readings, discussions, case studies, lectures, and group projects. Interview only: approval of instructor; Resident Assistant (RA) pre-employment training course.

CRSN 55 - Rachel Carson College: Service Learning Practicum (2)

Introduces service-learning theory and practice for students engaging in service-learning work in the college, college-related projects, community service organizations, or public agencies.

Prerequisite: Enrollment restricted to college members until after priority enrollment.

CRSN 56 - Media Internships for Sustainability (2)

Students develop and work on media projects related to the college theme of Environment and Society in film, on

television, in print, and on the Internet. Students work in groups with specific instructors and project leaders. Enrollment by application and instructor consent.

CRSN 61 - Education for Sustainable Living Program (2)

Analyzes sustainability and its application in daily life and on campus, involving collaboration between students, faculty, staff, administration, and the community. Guest lecturers, discussions, an optional UC-wide retreat, and essays allow engagement with aspects of ecological and social sustainability.

CRSN 81C - Designing a Sustainable Future (5)

Introduces key technological solutions to environmental problems; discusses their underlying principles; and examines their societal dimensions. Topics include: conventional and renewable energy; emerging technologies for transportation, energy efficiency clean water; planetary engineering; and lean manufacturing.

Prerequisite: Prerequisite(s): CRSN 80A or CRSN 80B. Enrollment restricted to first-year and sophomore college members.

CRSN 82 - Environment and Society in Film (2)

Students write about and discuss a variety of films and articles about environment and society. Topics may include water, food systems, wilderness, wildlife, pollution, global warming, nuclear energy, conservation, and environmental activism.

Prerequisite: Enrollment restricted to college members.

CRSN 90 - Rachel Carson College Garden Internship (1)

One-credit internship in the Rachel Carson College Garden. Offers students of the college an opportunity to become involved in an experimental learning project focusing on application of concepts of sustainable agriculture.

Prerequisite: Enrollment restricted to college members.

CRSN 93 - Field Study (5)

CRSN 99 - Tutorial (5)

CRSN 99F - Tutorial (2)

Individual study for lower-division students directed by a faculty member affiliated with the college. Students submit petition to sponsoring agency.

Upper-Division

CRSN 128 - Advanced Peer Leadership Practicum (3)

Advanced practicum for the application of skills and theoretical knowledge studied in course 28. Uses many learning modes including readings, discussions, case studies, lectures, and group projects. Prerequisite(s): course 28. Enrollment by permission of instructor.

CRSN 151A - Sustainability Praxis in the Natural and Built

Environment (5)

Introduces the concepts, methods, practices, and tools of the trade for conceptualizing and conducting research in sustainability praxis in the built environment, and the quantitative and analytical tools required to conduct such analysis and research. (Formerly Sustainability Praxis in the Built Environment).

CRSN 151B - Innovation and Professionalization for Sustainability Designers, Engineers, and Entrepreneurs (5)

Teaches how to become innovators and entrepreneurs, develop projects and enterprises, and adopt professional practices. Focuses on sustainability for students in Sustainability Studies, especially in connection with students' research and interests.

CRSN 151C - Sustainability Laboratory Tools, Techniques, and Applications (3)

Introduces the concepts, skills, and strategies fundamental to the successful development of sustainability-related projects appropriate to the Sustainability Lab. Provides access to functional and living laboratory space, equipment, professional development, and technical training.

CRSN 152 - IDEASS Laboratory Practicum (2)

Laboratory designed to advance sustainability education with real-world impact. Enables students to develop as change agents and to make valued contributions to sustainable-design projects that advance new technologies or strategies and bring about societal and environmental change.

CRSN 155 - Rachel Carson College Sustainability Internship (2)

For students undertaking sustainability-oriented service-learning work in the college (college-related projects, community service organizations, or public agencies). Students are supervised by the instructor and project supervisor, and determine the content of their internship with the instructor and supervisor.

Prerequisite: Enrollment restricted to college members or by permission of instructor.

CRSN 160 - Developing Leadership to Facilitate Environmental Education (5)

Prepares students to facilitate working groups for Sustainable Living (courses 61/161) during the spring quarter. The skills acquired during this course include: facilitation skills; problem-solving; syllabus planning; curriculum building; experiential learning techniques; leadership skills; cultural competence; and non-violent communication training. Enrollment by interview only. Enrollment restricted to sophomores, juniors, and seniors.

CRSN 161 - Education for Sustainable Living Program (5)

Analyzes sustainability and its application in daily life and on campus, involving collaboration between students, faculty, staff, administration, and the community. Guest lecturers,

discussions, an optional UC-wide retreat, and essays allow engagement with aspects of ecological and social sustainability.

CRSN 162 - Sustainability Internship Practicum (5)

Introduces students to sustainable practices and state, local, and UC-wide policies through projects. Matches students with UCSC staff partners to work collaboratively on projects that integrate sustainability into aspects of campus operations. Supports students to develop the competencies necessary to become effective environmental professionals through learning models including hands-on work experience; professional skills training; guest lectures; reading, and discussion; and peer-to-peer advising. In addition to project deliverables, students complete and present a portfolio of their work upon completion of their project. Enrollment limited to Sustainability Office Interns and by instructor permission; an interview, resume, and cover letter are required.

CRSN 175S - Data and Democracy (5)

Critically interrogates the multiple meanings of data and democracy. Students examine case studies on the mobilization and framing of democracy in particular moments. Students also analyze concerns and opportunities provided by data management and archival practices of evidence and cataloging.

CRSN 193 - Field Study (5)

CRSN 193F - Field Study (2)

Provides for individual programs of study sponsored by the college and performed off campus. Must be sponsored by college faculty. Approval of the student's adviser and the academic preceptor is needed to enroll. May be repeated three times for credit. Students submit petition to sponsoring agency.

CRSN 195 - Senior Thesis (5)

CRSN 198 - Independent Field Study (5)

CRSN 199 - Tutorial (5)

CRSN 199F - Tutorial (2)

Individual study for upper-division students directed by a faculty member affiliated with the college. Students submit petition to sponsoring agency.

CRWN - CROWN COLLEGE

Lower-Division

CRWN 1 - Academic Literacy and Ethos: Ethical and Societal Implications of Emerging Technologies (5)

Teaches foundational concepts for intellectual exploration and personal development within an academic community:

analysis, critical thinking, metacognition, engagement with others across difference, and self-efficacy. Examines how technological revolutions happen, how they transform societies, and how these changes generate new ideological narratives.

Prerequisite: Enrollment is restricted to first-year college members.

CRWN 28 - Crown Student Leadership Development Seminar (2)

Explore leadership as it relates to student development at Crown College. Examine how values, ethics, involvement, identity, and theory affect leadership in a variety of content areas. Evaluate student's leadership strengths to determine objectives for improvement.

CRWN 31 - Crown College Student Leadership in Action Seminar (2)

Focuses on developing and establishing leadership skills and styles for new leaders at Crown College. Explores communication styles, group dynamics, community development, programming, moral development and conflict resolution concepts and strategies. Applies theory to action. Enrollment limited to college members and by permission of instructor.

CRWN 38 - Leadership for Social Change (2)

R. Stice

Students in this course explore and discuss the applicability of the Social Change Model of Leadership Development (Wagner, 1996) within the immediate UCSC, Crown College, and Merrill College communities. Students draw connections between concepts of leadership, community development, and community service. Enrollment is by permission of the instructor. Students must have a leadership role (e.g., R.A., student government) with Crown College or Merrill College.

CRWN 60 - The Environment on Film: Rhetoric of Ecocriticism (5)

Examines the overt as well as the subtle cinematic elements that depict, ponder, and persuade concerning issues of the environment and the role of humans regarding nature, animals, and the human-made landscape.

Prerequisite: Enrollment is restricted to college members during priority enrollment.

CRWN 70 - Introduction to Broadcast Media: Radio (3)

S. Stoklos

Comprehensive history of noncommercial radio as a mass-communication medium. Course also serves as an introduction to UCSC's radio station KZSC-FM and broadcasting. Through lectures, hands-on instruction, and written assignments, students learn the fundamentals of program presentation and audio production. Prerequisite(s): After completing 20 hours of orientation volunteering at KZSC, students apply to the instructor. Enrollment is by

permission of the instructor. Concurrent enrollment in course 70L is required.

CRWN 70L - Broadcast Production: Radio (2)

Practical application of technical and creative skills in the KZSC studios. Production of audio content and promotional materials for broadcast. Critical evaluation in a workshop setting. Assignments require original research, professional writing, and the operation of complex technology.
Prerequisite(s): After completing 20 hours of orientation volunteering at KZSC, students apply to the instructor.
Enrollment is by permission of the instructor. Concurrent enrollment in course 70 is required.

CRWN 79 - Introduction to Social and Ethical Implications of Emerging Technologies (2)

An introduction to the theme of Crown College, "Social and Ethical Implications of Emerging Technologies". Taught in a small class format and articulated around a group project, both of which help generate sense of belonging, and is the key to the success of our transfer students. The group project will be used to introduce academic research and also strategies for effective work in groups, which is an essential skill in most fields, and of particular relevance to STEM disciplines.

CRWN 80J - Cyborg Society: Myths, Realities, Choices (5)

Examines content and methodologies of the emerging field of cyborgology. Includes social studies of science, anthropology, sociology, philosophy, politics, art, biology, and informatics.

CRWN 80L - Food Safety and Environmental Quality: The Complexities of a Safe Salad (5)

In recent years, outbreaks of food-borne illness have alarmed farmers and consumers alike. This course examines the complexities of ensuring food safety in the complex natural, economic, and social settings that characterize U.S. food-production systems.

CRWN 80S - Undergraduate Seminar in Science, Technology, and Society (5)

An honors seminar for first year students on selected topics that examine the relationship between science, technology, and society. Precise focus of each seminar varies and is announced by the college.

Prerequisite: Preference given to Crown College students. Enrollment is restricted to first-year and sophomore students.

CRWN 85 - Visual Perception: A Window to Brain and Behavior (5)

Investigates visual perception as an example of the correlation of brain and behavior. Uses a multidisciplinary analysis of the optical, biochemical, and neural components of the visual pathway leading to the perception of form, color, etc. Discusses the applications of neuroscience in the social sciences, the humanities, engineering, and the arts.

Prerequisite: Enrollment is restricted to students in the Crown College or Cowell College first-year honors program.

CRWN 86 - Professional Communication in a Digital Age (5)

Provides advanced training in communication strategies. Students learn to combine narrative theory with digital technologies to achieve effective communication in a variety of contexts including social media, instructional information, and product design. These elements will be integrated into an individual and a group project.

Prerequisite: Enrollment is restricted to College Scholars Students.

CRWN 87 - Understanding and Communicating the Science Behind Global Warming (5)

Provides tools to critically assess the current debate on the implications of global warming and to communicate the issues to the public effectively. Examines how questions are framed and addressed by scientists in general and how they are framed and addressed given our current understanding of the problem of global warming based on basic physics and statistical analyses of climate data. Includes practical assignments and guest lectures by local UCSC experts.

Prerequisite: Prerequisite(s): Enrollment in the College Scholars Program.

CRWN 88 - Computational Futurology: Use of Data Analysis for Predicting Human Behavior and Activity (5)

P. Rothman

Investigates statistical and computational methods for the prediction of human activity, both at the individual and at the collective level. Students learn to evaluate and critique famous predictions, and consider the ethical and social implications of predictive technologies. Articulated around a creative group project to integrate concepts learned in the course.

Prerequisite: Enrollment is restricted to College Scholar Students.

CRWN 89 - Workshop in Computational Biology (5)

Designed to engage students with training in areas related to computational biology. Covers basic biological, statistical, and computational concepts needed for hands-on research; training students to read primary literature and do collaborative work in an interdisciplinary setting. Enrollment restricted to students with some background in programming, math or biology and by permission of instructor.

CRWN 90 - Start-up Entrepreneurship Academy (5)

Introduction to the basics of setting up a start-up company using the Lean Launchpad/NSF I-Corps model of instruction. Students learn principles of data collection, marketing processes, and resources needed for new companies. The class is articulated around the design of a business plan, in groups of 4-5 students coached by a successful entrepreneur, and culminates in a presentation. The market research for the project involves talking to at least 5 potential customers, partners, channels and/or related experts each week.

(Formerly, Summer Entrepreneurship Academy: Discovering and Launching a Business.)

Prerequisite: Enrollment is restricted to College Scholar Students.

CRWN 92 - Social and Creative Entrepreneurship (5)

Helps students discover and develop their own business idea that does the world good. Examines leadership and provides tools to research community issues and to develop sustainable business models. Guest lecturers and project mentors introduce students to business and civil leaders.

CRWN 93 - Field Study (5)

Provides for individual programs of study sponsored by the college and performed off campus. Students should review plans with an appropriate fellow of the college. A proposal should be presented to the college academic preceptor no later than the seventh week of the preceding quarter. Credit is granted by the sponsor upon approval of the work performed. Students submit petition to sponsoring agency.

CRWN 93F - Field Study (2)

Provides for individual field study in the vicinity of the campus under the direct supervision of a faculty sponsor. Students submit petition to sponsoring agency.

CRWN 96 - Digital Theater Workshop: Theorizing Culture and the Future (5)

Teaches different interpretation tools to be applied to a selection of dramatic literature in discussions. Students integrate these skills and develop their creativity through mounting a production of the play R.U.R., which addresses the impact of technology in society.

CRWN 99F - Tutorial (2)

Various topics to be arranged between student and instructor. Students submit petition to sponsoring agency.

Upper-Division

CRWN 123 - Examining Our Life Through Writing (5)

Writing-intensive seminar. Based on course readings and discussions, students write reflective response papers at the end of each class and weekly papers on their own lives and what they care most about. Intense class discussions, often started by students sharing their essays. Prerequisite(s): satisfaction of the Composition 1 requirement. Admission by permission of instructor after student reads lengthy syllabus, writes application, and interviews with instructor during faculty office hours. (Formerly Science and Human Values)

CRWN 175S - Data and Democracy (5)

Critically interrogates the multiple meanings of data and democracy. Students examine case studies on the mobilization and framing of democracy in particular moments. Students also analyze concerns and opportunities provided by data

management and archival practices of evidence and cataloging.

CRWN 185 - Career and Internship Preparation (2)

For students preparing for an internship experience or career position. Students undertake career development as a continuous lifelong process: learn techniques for an effective job search, such as preparing a resume and cover letter, interviewing and networking skills; and learn how to more clearly articulate their future educational and professional goals.

CRWN 191 - Student Practicum (5)

The student learns teaching skills by working with a faculty member in a Crown College course. Activities include facilitating discussions, helping students improve skills, and modeling leadership. The student must have demonstrated excellent performance in the course in which he/she will be assisting to be considered. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is by interview only.

CRWN 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar by an upper-division student under faculty supervision. (See course 42.)

CRWN 198 - Independent Field Study (5)

Provides for college-sponsored individual study programs off campus. Approval of student's faculty sponsor and college academic provost required.

CRWN 199 - Tutorial (5)

Various topics to be arranged between student and instructor. Students submit petition to sponsoring agency.

CRWN 199F - Tutorial (2)

Various topics to be arranged between student and instructor. Students submit petition to sponsoring agency.

CSE - COMPUTER SCIENCE AND ENGINEERING

Lower-Division

CSE 2 - Computer Literacy (5)

Introduction to how computers work and how to use them. Topics covered include network information systems, text editors, formatting, file and directory system, spreadsheets and databases. Computers as symbol manipulation devices. Introduction to programming concepts and computer languages. Impact of computers on society. Designed for students with little or no experience using computers.

Preference is given to students who have not taken other computer engineering or computer science courses. Students cannot receive credit for this course and Computer Engineering 3. (Formerly Computer Science 2.)

CSE 3 - Personal Computer Concepts: Software and Hardware (5)

Provides an introduction to computers. Personal computing is emphasized, and students are introduced to word processing, spreadsheets, database management, graphics, and programming. Covers fundamentals of computing and current and future uses of computer technology, PC hardware, Windows operating system, applications software, networking and the Internet, and developments in the computer industry. Designed for students with little or no experience using computers. Students cannot receive credit for this course and Computer Science 2. (Formerly Computer Engineering 3.)

CSE 5J - Introduction to Programming in Java (5)

Introduces programming in Java for students who have no prior programming experience. Students learn programming and documentation skills, as well as algorithmic problem-solving, and programming methodologies. Introduces computers, compilers, and editors. Students write small to medium-sized programs. This course and courses 5C and 5P cover similar concepts, but use different programming languages. Because 5J followed by course 11 is a two-quarter alternative to the accelerated course 12A/L, engineering majors and students planning on continuing the programming sequence are encouraged to take 5J rather than 5C or 5P. Students may not receive credit for 5J taken concurrently or subsequently to course 12A, 12B, or Computer Engineering 13. (Formerly CMPS 5J.)

CSE 10 - Introduction to Computer Science (5)

An overview of the theory, foundations, and practice of computer science with emphasis on what computers can and cannot do, now and in the future. Topics include algorithms and data, correctness and efficiency of algorithms, hardware, programming languages, limitations of computation, applications, and social issues. No programming skills are required as a prerequisite. Major concepts and open problems in computer science are presented without reliance on sophisticated mathematical tools. Students cannot receive credit for this course after completing CSE 15. (Formerly CMPS 10.)

CSE 12 - Computer Systems and Assembly Language (5)

Introduction to computer systems and assembly language and how computers compute in hardware and software. Topics include digital logic, number systems, data structures, compiling/assembly process, basics of system software, and computer architecture. May include C language. Students with no prior programming experience are strongly recommended to take course 3, Computer Science 5J, Computer Science 5P, Computer Science 10, or equivalent before taking this course. (Formerly Computer Engineering 12.)

Prerequisite: Prerequisite(s): previous or concurrent enrollment in CSE 12L is required.

CSE 12L - Computer Systems and Assembly Language Laboratory (2)

Introduction to computer systems and assembly language and how computers compute in hardware and software. Topics include digital logic, number systems, data structures, compiling/assembly process, basics of system software, and computer architecture. May include C language. Students with no prior programming experience are strongly recommended to take course 3, Computer Science 5J, Computer Science 5P, Computer Science 10, or equivalent before taking this course. (Formerly Computer Engineering 12L.)

Prerequisite: Prerequisite(s): previous or concurrent enrollment in CSE 12 is required.

CSE 13E - Embedded Systems and C Programming (7)

Introduction to the C programming language as a means for controlling embedded computing systems. Continuing the exploration begun in course 12, students move to higher levels of abstraction in the control of complex computer systems. Students cannot receive credit for both CSE 13E and CSE 13S. Course is 7 credits with integrated laboratory. (Formerly Computer Engineering 13, Computer Systems and C Programming, and Computer Engineering 13L, Computer Systems and C Programming Lab.)

Prerequisite: Prerequisite(s): CSE 12 and CSE 12L.

CSE 13S - Computer Systems and C Programming (7)

Focuses on C programming, command line, shell programming, editors, debuggers, source code control, and other tools. Examines basic computer systems, algorithm design, and development, data types, and program structures. Develops understanding of process model, compile-link-execute build cycle, language-machine interface, memory, and data representation. Students cannot receive credit for both CSE 13S and CSE 13E. Course is 7 credits with integrated laboratory.

Prerequisite: Prerequisite(s): CSE 12 and CSE 12L, or BME 160.

CSE 14 - Introduction to Programming (Accelerated) (5)

Accelerated introduction to programming. Students write medium-sized programs. Topics include: functions; conditionals and loops; classes; event-driven programming and graphic user interfaces (GUIs); recursion; and arrays. Students who have no or very limited programming experience should consider courses 5J and 11 which cover the same material in two quarters. Students may not receive credit for both this course and course 11. Some prior programming experience in a language such as C, C++, Java, or C# strongly recommended. (Formerly CMPS 12A.)

Prerequisite: Prerequisite(s): MATH 3, MATH 11A, MATH 19A, AM 3, AM 11A or ECON 11A, or a score of 400 or higher on the mathematics placement examination (MPE). Concurrent enrollment in CSE 14L is required.

CSE 14L - Computer Programming Laboratory (2)

Laboratory sequence complementing topics taught in course 12A by providing training and exposure to several software development tools and practices not covered in course 14. In addition, the lab provides an initial exposure to a second programming language to reinforce concepts from course 14. (Formerly CMPS 12L.)

Prerequisite: Prerequisite(s): Concurrent enrollment in CSE 14 is required.

CSE 15 - Introduction to Data Structures (5)

Teaches students to implement common data structures and the algorithms associated with each data structure, through progressively difficult exercises. Topics include big O notation; pointers, recursion (induction), and dynamic allocation; linked lists and list processing; stacks, queues, binary trees and binary search trees; simple sorting techniques and simple search techniques. Students will gain a working knowledge of the elements of the Java and C programming languages. Prior experience with Unix is assumed. (Formerly Computer Science 12B.)

Prerequisite: Prerequisite(s): CSE 11 or CSE 14 or CSE 13E or CSE 13S. Concurrent enrollment in CSE 15L is required.

CSE 15L - Data Structures Laboratory (2)

Complements course 12B, gaining additional competence with a number of important software development tools, languages, and techniques. Included are advanced Unix features and utilities such as grep, find, diff, the shell, and pipes; C programs utilizing I/O, arrays, pointers, and structures; a scripting language to perform simple text and file manipulation; and the make utility. (Formerly CMPS 12M.)

Prerequisite: Concurrent enrollment in CSE 15 is required.

CSE 16 - Applied Discrete Mathematics (5)

Introduction to applications of discrete mathematical systems. Topics include sets, functions, relations, graphs, predicate calculus, mathematical proof methods (induction, contraposition, contradiction), counting methods (permutations, combinations), and recurrences. Examples are drawn from computer science and computer engineering. Knowledge of computer programming is useful before taking this course. Students who do not have prior programming experience are strongly recommended to take Computer Science 5C, 5J, or 5P before taking this course. (Formerly Computer Engineering 16.)

Prerequisite: Prerequisite(s): MATH 19A or MATH 11B or AM 11B or AM 15B or ECON 11B.

CSE 20 - Beginning Programming in Python (5)

Provides students with Python programming skills and the ability to design programs and read Python code. Topics include data types, control flow, methods and advanced functions, built-in data structures, and introduction to OOP. No prior programming experience is required. Students may not receive credit for CSE 20 after receiving credit for CSE

30. (Formerly CMPS 5P, Introduction to Programming in Python.)

CSE 30 - Programming Abstractions: Python (7)

Introduction to software development in Python focusing on structuring software in terms of objects endowed with primitive operations. Introduces concepts and techniques via a sequence of concrete case studies. Coursework consists of programming assignments and a final examination.

Prerequisite: Prerequisite(s): CSE 20 or BME 160; and MATH 3 or MATH 11A or MATH 19A or AM 3 or AM 11A or ECON 11A, or a score of 400 or higher on the mathematics placement examination (MPE).

CSE 50 - Business Information Systems (5)

Addresses the use of information systems (IS) within a business enterprise. Subjects include computer hardware and software concepts, system design and implementation, telecommunications, data management, transaction-based systems, management information systems, and the use of IS to compete. Intended for technology and information management and business management economics majors. (Formerly TIM 50.)

CSE 58 - Systems Analysis and Design (5)

Students learn how information technology is used to deal with business requirements and/or solve business problems. Provides an understanding of structured computer systems analysis and design methodologies and techniques and their application to business information systems. Intended for technology and information management and business management economics majors. (Formerly TIM 58.)

Prerequisite: Prerequisite(s): CSE 50.

CSE 80A - Universal Access: Disability, Technology, and Society (5)

Overview of human-centered technology and of its potential for increasing the quality of life and independence of disabled individuals. A substantial portion of the course is devoted to studying physical, psychological, and psychosocial aspects of disability. Topics include: diversity and integration, legislation, accessibility, and universal design. (Formerly Computer Engineering 80A.)

CSE 80C - Starting a New Technology Company (5)

Focuses on the creation and management of technology start-ups and small companies, using case studies and team projects as the basis for learning and applying the course materials. (Formerly TIM 80C.)

CSE 80L - Social Data Analytics and Visualization (5)

Course examines: social data analytics--veracity, consistency, uncertainty, volume; statistical computation--misuse, bias, dispersion, correlation, regressions, differential scales, normal distributions, factor and cluster analysis, extrapolation, inference, simple programming; visual representations--communication, critique and design of infographics;

applications--environment, energy, economics, education, empowerment. (Formerly Computer Science 80L.)

CSE 80N - Introduction to Networking and the Internet (5)

Introduction to the evolution, technological basis, and services of the Internet, with descriptions of its underlying communications structure, routing algorithms, peer-to-peer hierarchy, reliability, and packet switching. Network security, mail, multimedia and data compression issues, HTML, and digital images. Students who have completed course 150 cannot receive credit for this course. (Formerly Computer Engineering 80N.)

CSE 80S - Social Networks (5)

Introduction to social networks and game theory. Topics include the structure of social networks; the world wide web; the flow of information and behavior through networks; and the principles behind modern web search and search-ad placement. (Formerly Computer Science 17.)

Prerequisite: Prerequisite(s): MATH 3 or MATH 11A; or AM 3 or AM 6 or AM 11A or AM 15A; or ECON 11A; or score on math placement exam of 300 or higher.

CSE 94 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

CSE 94F - Group Tutorial (2)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

CSE 99 - Tutorial (5)

Students submit petition to sponsoring agency.

CSE 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

CSE 100 - Logic Design (5)

Boolean algebra, logic minimization, finite-state machine design, sequential circuits, common logic elements, programmable logic devices, and an introduction to system level design. The electrical behavior of circuits including three state outputs, propagation delay, logic levels, and fanout. (Formerly Computer Engineering 100.)

Prerequisite: Prerequisite(s): CSE 12 and CSE 12L; previous or concurrent enrollment in CSE 100L is required.

CSE 100L - Logic Design Laboratory (2)

Laboratory sequence illustrating topics covered in course 100. Two 2-hour laboratory sessions per week. Weekly laboratory assignments which require the use of the oscilloscopes, TTL

circuits, computer-aided design and simulation tools, and programmable logic. Students are billed a materials fee. (Formerly Computer Engineering 100L.)

Prerequisite: Prerequisite(s): CSE 12 and CSE 12L; previous or concurrent enrollment in CSE 100 is required.

CSE 101 - Algorithms and Abstract Data Types (5)

Studies basic algorithms and their relationships to common abstract data types. Covers the notions of abstract data types and the distinction between an abstract data type and an implementation of that data type. The complexity analysis of common algorithms using asymptotic (big O) notation is emphasized. Topics include sorting and searching techniques, basic graph algorithms, and algorithm design techniques. Abstract data types covered include priority queues, dictionaries, disjoint sets, heaps, balanced trees, and hashing. Familiarity with C, Java, and Unix is assumed. (Formerly Computer Science 101.)

Prerequisite: Prerequisite(s): CSE 13E or CSE 13S; and CSE 16; and CSE 30; and MATH 11B or MATH 19B or MATH 20B or AM 11B; Students may enroll in CSE 101 without having completed CSE 30 and CSE 13S or CSE 13E if they complete CSE 15 and CSE 15L (formerly CMPS 12B/M) by Fall 2019; and CSE 16; and MATH 11B or MATH 19B or MATH 20B or AM 11B; and one course from the following: MATH 21, MATH 22, MATH 23A, AM 10, or STAT 131.

CSE 102 - Introduction to Analysis of Algorithms (5)

Methods for the systematic construction and mathematical analysis of algorithms. Order notation, the RAM model of computation, lower bounds, and recurrence relations are covered. The algorithm design techniques include divide-and-conquer, branch and bound, and dynamic programming. Applications to combinatorial, graph, string, and geometric algorithms. (Formerly Computer Science 102.)

Prerequisite: Prerequisite(s): CSE 101.

CSE 103 - Computational Models (5)

Various representations for regular languages, context-free grammars, normal forms, simple parsing, pumping lemmas, Turing machines, the Church-Turing thesis, intractable problems, the P-NP question. (Formerly CMPS 130.)

Prerequisite: Prerequisite(s): CSE 101.

CSE 104 - Computability and Computational Complexity (5)

Turing machines, general phase-structure grammars, the Chomsky hierarchy, recursive functions, diagonalization, the Halting problem, computability and unsolvability, computational complexity, time and space bounds, NP-completeness with emphasis on reductions between problems from various areas. (Formerly CMPS 132.)

Prerequisite: Prerequisite(s): CSE 103.

CSE 104W - Computability and Computational Complexity (2)

Disciplinary Communication (DC) course to be taken concurrently with course 132. Students satisfy the DC

requirement by writing a survey paper on a topic related to computability and computational complexity. Possible topics include: an overview of a different model of computation (e.g., quantum computing); an overview of a major complexity class; a critical analysis of the Church-Turing thesis. Prerequisite(s): course 130; satisfaction of the Entry Level Writing and Composition requirements. Concurrent enrollment in course 132 required. Enrollment by permission of instructor. (Formerly CMPS 132W.)

CSE 106 - Applied Graph Theory and Algorithms (5)

Basic concepts and algorithms are reviewed including trees, Eulerian and Hamiltonian graphs, and graph transversal. Algorithms are explored to solve problems in connectivity, routing, matching, and embedding of graphs. Graph theory and algorithms are developed around applications in computer engineering. (Formerly Computer Engineering 177.)

Prerequisite: Prerequisite(s): CSE 101.

CSE 107 - Probability and Statistics for Engineers (5)

Introduction to fundamental tools of stochastic analysis. Probability, conditional probability; Bayes Theorem; random variables and transforms; independence; Bernoulli trials. Statistics, inference from limited data; outcomes of repeated experiments; applications to design; assessment of relative frequency and probability; law of large numbers; precision of measurements. Elements of stochastic processes, Poisson processes; Markov chains. Students cannot receive credit for this course and Applied Mathematics and Statistics 131. (Formerly Computer Engineering 107.)

Prerequisite: Prerequisite(s): CSE 16; and AM 30 or MATH 22 or MATH 23A.

CSE 108 - Algorithmic Foundations of Cryptography (5)

Focuses on some of the foundational aspects of modern cryptography, namely, private and public key cryptography, digital signatures, pseudorandom generators and functions, message authentication codes, hash functions, and random oracles. Course also connects the formal concepts with some real-world applications, like RA, SSL, and bitcoin, exposing students to general concepts of probability theory, number theory, and rigorous proofs. (Formerly Computer Science 118.)

Prerequisite: Prerequisite(s): CSE 101. Enrollment restricted to computer engineering and computer science majors.

CSE 110A - Fundamentals of Compiler Design I (5)

An introduction to the basic techniques used in compiler design. Topics include compiler structure, symbol tables, regular expressions and languages, finite automata, lexical analysis, context-free languages, LL(1), recursive descent, LALR(1), and LR(1) parsing; and attribute grammars as a model of syntax-directed translation. Students use compiler building tools to construct a working compiler. (Formerly Computer Science 104A.)

Prerequisite: Prerequisite(s): CSE 101 and CSE 12 and CSE 12L.

CSE 110B - Fundamentals of Compiler Design II (5)

Advanced study of compiler implementation. Topics include compiler structure back end, run-time environments, storage management, garbage collection, register allocation, code generation, basic blocks, control flow, data flow, local and global optimization, interpretation, and machine-code generation. Students may not receive credit for this course and course 211. Taught in conjunction with course 211. (Formerly Computer Science 104B.)

Prerequisite: Prerequisite(s): CSE 110A.

CSE 111 - Advanced Programming (5)

An introduction to object-oriented techniques of software development including data abstraction, inheritance, polymorphism, and object-oriented design. Extensive practice using a computer to solve problems, including construction of graphical user interfaces and a multithreaded client/server applications. (Formerly Computer Science 109.)

Prerequisite: Prerequisite(s): CSE 15 and CSE 15L.

CSE 112 - Comparative Programming Languages (5)

Covers several programming languages and compares styles, philosophy, and design principles. Principles underlying declarative, functional, and object-oriented programming styles are studied. Students write programs emphasizing each of these techniques. (Formerly Computer Science 112.)

Prerequisite: Prerequisite(s): CSE 101 or CSE 111.

CSE 113 - Parallel and Concurrent Programming (5)

Introduction to parallel and concurrent programming. Topics include: types of parallel computers and programming platforms; design, implementation, and optimization of programs for parallel and multicore processors; basic and advanced programming techniques; performance analysis and load balancing; and selected parallel algorithms. (Formerly Computer Engineering 113 and Computer Science 113.)

Prerequisite: Prerequisite(s): CSE 12 and CSE 12L and CSE 101. CSE 120 recommended.

CSE 114 - Functional Programming (5)

An in-depth study of the functional style of programming and functional abstraction, including the study of applicative functors and monads, and monadic parsers. (Formerly CMPS 153.)

Prerequisite: Prerequisite(s): CSE 101 or CSE 111.

Enrollment is restricted to junior and senior computer science majors.

CSE 115A - Introduction to Software Engineering (5)

Emphasizes the characteristics of well-engineered software systems. Topics include requirements analysis and specification, design, programming, verification and validation, maintenance, and project management. Practical and research methods are studied. Imparts an understanding of

the steps used to effectively develop computer software. (Formerly Computer Science 115.)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and CSE 101.

CSE 115B - Software Design Project (5)

Students in teams specify, design, construct, test, and document a complete software system in a specialized application domain. Class time is spent in technical discussions and ongoing design reviews. A formal presentation and demonstration of each project is required. An organizational meeting will be held during the preceding quarter. Projects may be drawn from industry and campus research groups. (Formerly Computer Science 116.)

Prerequisite: Prerequisite(s): CSE 115A.

CSE 115C - Software Design Project II (5)

Continuation of course 116. Students work in teams to develop, test, document, and deploy a substantial software project. Teams give a formal presentation and demonstration of each project. (Formerly Computer Science 117.)

Prerequisite: Prerequisite(s): CSE 115B.

CSE 116 - Introduction to Functional Programming (5)

Problem solving emphasizing recursion, data abstraction, and higher-order functions. Introduction to types and type checking, modular programming, and reasoning about program correctness.

Prerequisite: Prerequisite(s): CMPS 101 or CSE 101.

CSE 117 - Open Source Programming (5)

Presents an opportunity to participate in Linux Kernel development--one of the preeminent open source projects. Through community involvement, students accelerate comprehension of computer science fundamentals and display their understanding and experience relevant to other programming projects. (Formerly Computer Science 107.)

Prerequisite: Prerequisite(s): CSE 101 and CSE 12 and CSE 12L. Enrollment restricted to School of Engineering majors.

CSE 118 - Mobile Applications (5)

Introduces programming and application development for mobile devices. Covers the SDK and main programming platforms available on mobile devices, methodologies for developing native applications, division of computation between the mobile platform and servers, and mobile-to-server communications. Introduces platforms based on JavaScript and HTML5 for the development of applications that are portable across platforms. Students develop components of applications, leading to fully functional applications by the end of the course. Course based on emulators and SDK tools, so ownership of a cellphone/tablet is not required for the course. (Formerly CMPS 121.)

Prerequisite: Prerequisite(s): CSE 15 and CSE 15L.

CSE 119 - Software for Society (5)

Provides experience with applying computing to social issues. Case studies on multiple issues. For example: privacy, copyright, voting, education, poverty, energy, activism. Team project in which students develop software to address a pre-identified need of a global or local non-profit. (Formerly Computer Science 119.)

Prerequisite: Prerequisite(s): CSE 101.

CSE 120 - Computer Architecture (5)

Introduction to computer architecture including examples of current approaches and the effect of technology and software. Computer performance evaluation, basic combinatorial and sequential digital components, different instruction set architectures with a focus on the MIPS ISA and RISC paradigm. Evolution of CPU microarchitecture from single-cycle to multi-cycle pipelines, with overview of super-scalar, multiple-issue and VLIW. Memory system, cache, virtual memory and relationship between memory and performance. Evolution of PC system architecture. May include advanced topics, such as parallel processing, MIMD, and SIMD. (Formerly Computer Engineering 110.)

Prerequisite: Prerequisite(s): CSE 12 and CSE 12L; and CSE 13E or CSE 13S or CSE 11 or CSE 14 and CSE 14L. CSE 16 recommended.

CSE 121 - Microprocessor System Design (5)

The design and use of microprocessor-based systems. Covers microprocessor and microcontroller architecture, programming techniques, bus and memory organization, DMA, timing issues, interrupts, peripheral devices, serial and parallel communication, and interfacing to analog and digital systems. (Formerly Computer Engineering 121.)

Prerequisite: Prerequisite(s): CSE 12, CSE 12L, CSE 100, CSE 100L; and CSE 13E or CSE 13S or CSE 15 and CSE 15L; and ECE 101, ECE 101L, PHYS 5C and PHYS 5N. Concurrent enrollment in CSE 121L required. Enrollment restricted to CMPE and ROBO majors during first-pass.

CSE 121L - Microprocessor System Design Laboratory (2)

Laboratory sequence illustrating topics covered in course 121. Two 2-hour laboratory sessions per week. Students design, build, program, debug, document, and demonstrate a microprocessor-based system. Students are billed a materials fee. (Formerly Computer Engineering 121L.)

Prerequisite: Prerequisite(s): CSE 12, CSE 12L, CSE 100, CSE 100L; and CSE 13E or CSE 13S or CSE 15 and CSE 15L; and ECE 101, ECE 101L, PHYS 5C and PHYS 5N. Concurrent enrollment in CSE 121 required. Enrollment restricted to computer engineering and robotics engineering majors during first-pass enrollment.

CSE 122 - Introduction to VLSI Digital System Design (5)

Introduces very large scale integrated (VLSI) custom integrated circuits. Topics include: semiconductor manufacturing, logic families, field-effect transistors (FETs),

interconnect models, simulation, and circuits. Introduces the design flow from logic design to layout with a focus on high performance and low power. Students cannot receive credit for this course and CSE 222A. (Formerly Computer Engineering 122.)

Prerequisite: Prerequisite(s): CSE 100, CSE 100L, ECE 101, and ECE 101L.

CSE 123A - Engineering Design Project I (5)

First of a two-course sequence that is the culmination of the engineering program. Students apply knowledge and skills gained in elective track to complete a major design project. Students complete research, specification, planning, and procurement for a substantial project. Includes technical discussions, design reviews, and formal presentations; engineering design cycle, engineering teams, and professional practices. Formal technical specification of the approved project is presented to faculty. Students are billed a materials fee. Prerequisite(s): CSE 121; previous or concurrent enrollment in CSE 185; permission of department and instructor. (Formerly Computer Engineering 123A.)

CSE 123B - Engineering Design Project II (7)

Second of two-course sequence in engineering system design. Students fully implement and test system designed and specified in CSE 123A. Formal written report, oral presentation, and demonstration of successful project to review panel of engineering faculty required. Students are billed a materials fee. (Formerly Computer Engineering 123B.)

Prerequisite: Prerequisite(s): CSE 123A and CSE 185.

CSE 125 - Logic Design with Verilog (5)

Verilog digital logic design with emphasis on ASIC and FPGA design. Students design and verify large-scale systems. Assignments and project use the Verilog Hardware Description Language with emphasis on verification and high-frequency ASIC/FPGA targets. (Formerly Computer Engineering 125.)

Prerequisite: Prerequisite(s): CSE 100 and CSE 100L. Concurrent enrollment in CSE 125L is required.

CSE 125L - Logic Design with Verilog Laboratory (2)

Laboratory sequence illustrating topics covered in course 125. Two 2-hour laboratory sessions per week. Students are billed a materials fee. (Formerly Computer Engineering 125L.)

Prerequisite: Prerequisite(s): CSE 100 and CSE 100L. Concurrent enrollment in CSE 125 is required.

CSE 129A - Capstone Project I (2)

First of a three-course sequence in which students apply knowledge and skills gained in elective track to complete a major design project. In this first course, students complete the specification and planning for a substantial project. Topics covered: engineering design cycle, engineering teams, and

professional practices. (Formerly Computer Engineering 129A.)

Prerequisite: Prerequisite(s): previous or concurrent enrollment in courses CSE 121 and CSE 121L. Enrollment is restricted to bioengineering, biomolecular engineering and bioinformatics, computer engineering, and robotics engineering majors.

CSE 129B - Capstone Project II (5)

Second of a three-course sequence in which students apply knowledge and skills gained in elective track to complete a major design project. In this second course, students complete the research and procurement for a substantial project and a preliminary implementation. Students are billed a materials fee. Prerequisite(s): CSE 121, CSE 121L, and CSE 129A. Previous or concurrent enrollment in CSE 185. Enrollment by permission of instructor. (Formerly Computer Engineering 129B.)

CSE 129C - Capstone Project III (5)

Third of a three-course sequence in which students apply knowledge and skills gained in elective track to complete a major design project. In this third course, students work in teams to complete the project specified and advanced in the first two courses. A formal written report, oral presentation, and demonstration of the successful project to a review panel of engineering faculty is required. Students are billed a materials fee. Prerequisite(s): CSE 129B and CSE 185. Enrollment by permission of instructor. (Formerly Computer Engineering 129C.)

CSE 130 - Principles of Computer Systems Design (5)

Covers the principles governing computer-systems design and complexity; familiarity with memory, storage, and networking; concurrency and synchronization; layering (abstraction and modularity); naming; client-server and virtualized system models; and performance. Requires significant programming projects demonstrating mastery of these concepts. (Formerly Computer Engineering 105.)

Prerequisite: Prerequisite(s): CSE 12 and CSE 12L; and CSE 13E or CSE 13S, or CSE 15 and CSE 15M; and knowledge of C programming language.

CSE 131 - Introduction to Operating Systems (5)

Fundamental principles of operating systems: process synchronization, deadlocks, memory management, resource allocation, scheduling, storage systems, and study of several operating systems. A major programming project will be required. (Formerly Computer Science 111.)

Prerequisite: Prerequisite(s): CSE 101 and CSE 120.

CSE 132 - Computer Security (5)

Introduction to computer security (including selected topics in network security). Access control. Security in programming languages. Basic cryptography. Security protocols. (Formerly CMPS 122.)

Prerequisite: Prerequisite(s): CSE 131 or permission of instructor. Enrollment restricted to School of Engineering majors.

CSE 134 - Embedded Operating Systems (5)

Detailed exploration of the internal design of an embedded operating systems kernel. Covers kernel structure and organization, device drivers, I/O systems, file systems, memory management, and security. Students complete significant programming projects that extend or modify existing operating systems. (Formerly Computer Engineering 114.)

Prerequisite: Prerequisite(s): CSE 120 and CSE 130.

CSE 138 - Distributed Systems (5)

Covers topics in distributed computing including communication, naming, synchronization, consistency and replication, fault tolerance, and security. Examples drawn from peer-to-peer systems, online gaming, the World Wide Web; other systems also used to illustrate approaches to these topics. Students implement simple distributed systems over the course of the quarter. (Formerly CMPS 128, File Sharing, Distributed Systems: Online Gaming, and More.)

Prerequisite: Prerequisite(s): CSE 101 or CSE 150. CSE 131 recommended.

CSE 139 - Data Storage Systems (5)

Covers all aspects of storage systems technology from magnetic media up through system software, including principles of magnetic recording, hard drive technology and evolution, performance measurement, file systems, storage networking, disk arrays, network-attached storage, and alternative storage technologies. (Formerly CMPS 129.)

Prerequisite: Prerequisite(s): CSE 101 and CSE 131; and PHYS 5A or PHYS 6A.

CSE 140 - Artificial Intelligence (5)

Introduction to the contemporary concepts and techniques of artificial intelligence, including any or all of: machine perception and inference, machine learning, optimization problems, computational methods and models of search, game playing and theorem proving. Emphasis may be on any formal method of perceiving, learning, reasoning, and problem solving which proves to be effective. This includes both symbolic and neural network approaches to artificial intelligence. Issues discussed include symbolic versus nonsymbolic methods, local versus global methods, hierarchical organization and control, and brain modeling versus engineering approaches. Lisp or Prolog may be introduced. Involves one major project or regular programming assignments. (Formerly CMPS 140.)

Prerequisite: Prerequisite(s): CSE 101.

CSE 142 - Machine Learning (5)

Introduction to machine learning algorithms and their applications. Topics include classification learning, density

estimation and Bayesian learning regression, and online learning. Provides introduction to standard learning methods such as neural networks, decision trees, boosting, and nearest neighbor techniques. (Formerly CMPS 142.)

Prerequisite: Prerequisite(s): CSE 101; and AM 30, or MATH 22, or MATH 23A; and STAT 131 or CSE 107.

CSE 143 - Introduction to Natural Language Processing (5)

Introduces the theory and practice of natural language processing (NLP)-- the creation of computer programs that can understand, generate, and learn natural language. Introduces the three major subfields of NLP: syntax (the structure of a sentence); semantics (the explicit meaning of a single sentence); and pragmatics (the implicit meaning of a sentence when it is used in a specific discourse). Projects focus on the techniques useful for a particular application area, alternating in different years. Project application areas include information extraction, narrative understanding, sentiment analysis, dialogue systems, and question answering. (Formerly CMPS 143.)

Prerequisite: Prerequisite(s): CSE 101.

CSE 144 - Applied Machine Learning (5)

Provides a practical and project-oriented introduction to machine learning, with an emphasis on neural networks and deep learning. Starts with a discussion of the foundational pieces of statistical inference, then introduces the basic elements of machine learning: loss functions and gradient descent. Using these, presents logistic regression, or one-layer networks, and then moves on to more complex models: deep neural networks, convolutional networks for image recognition, and recurrent networks and LSTM for temporal and sequence data. Also covers the basics of dataset preparation and visualization and the performance characterization of the models created. Includes weekly homework and a final project that can be done in groups. (Formerly CMPS 144.)

Prerequisite: Prerequisite(s): CSE 101. Enrollment is restricted to juniors and seniors.

CSE 145 - Introduction to Data Mining (5)

Covers the techniques, algorithms, and applications of data mining, including data preprocessing, data exploration, classification, clustering, mining text, and sequential and social data. (Formerly TIM 145.)

Prerequisite: Prerequisite(s): CSE 15 and CSE 15L; and AM 30 or MATH 22 or MATH 23A; and STAT 5 or CSE 107 or STAT 131; and AM 10 or MATH 21; and CSE 16 or ECON 113. Enrollment restricted to juniors and seniors. Graduate students by permission of instructor.

CSE 150 - Introduction to Computer Networks (5)

Addresses issues arising in organizing communications among autonomous computers. Network models and conceptual layers; Internet-working; characteristics of transmission media; switching techniques (packet switching, circuit switching, cell switching); medium access control

(MAC) protocols and local area networks; error-control strategies and link-level protocols; routing algorithms for bridges and routers; congestion control mechanisms; transport protocols; application of concepts to practical wireless and wireline networks and standard protocol architectures. Students who have completed course 80N can take this course for credit. (Formerly CMPE 150.)

Prerequisite: Prerequisite(s): CSE 16 and either CSE 12 and CSE 12L, or CSE 15 and CSE 15L. Concurrent enrollment in CSE 150L is required.

CSE 150L - Introduction to Computer Networks Laboratory (2)

Illustrates the concepts covered in course 150 and provides students with hands-on experience in computer networks. Students are billed a materials fee. (Formerly CMPE 150L.)

Prerequisite: Prerequisite(s): CSE 16 and either CSE 12 and CSE 12L, or CSE 15 and CSE 15L. Concurrent enrollment in CSE 150 is required.

CSE 151 - Advanced Computer Networks (5)

Provides an in-depth coverage of fundamental topics introduced in course 150 including routing, transport, and internetworking. Also introduces advanced concepts not covered in course 150 including wireless, application-layer services, security, etc. (Formerly Computer Engineering 151.)

Prerequisite: Prerequisite(s): CSE 150. Concurrent enrollment in CSE 151L is required.

CSE 151L - Advanced Computer Networks Laboratory (2)

Laboratory illustrating the concepts covered in course 151: provides students with hands-on experience in computer networks. (Formerly Computer Engineering 151L.)

Prerequisite: Prerequisite(s): CSE 150 and CSE 150L. Concurrent enrollment in CSE 151 is required.

CSE 152 - Principles of Computer Communication (5)

Course focuses on the design and analysis of protocols for computer communication. Topics include: the safety, liveliness, and performance of communication protocols for medium access control (MAC); link control; routing and switching; multicasting; and end-to-end transport. Students cannot receive credit for this course and CSE 250B.

Prerequisite: Prerequisite(s): CSE 107, CSE 150, and CSE 150L.

CSE 156 - Network Programming (5)

Methods and tools used for network programming. Topics include: operating system (OS) support for network protocols; inter-process communication (IPC) facilities, such as pipes, sockets, and remote procedure call (RPC); design of client and server sides of network applications; network security; and programming projects. (Formerly Computer Engineering 156.)

Prerequisite: Prerequisites: CSE 150, CSE 150L and CSE 101. Concurrent enrollment in course CSE 156L is required.

CSE 156L - Network Programming Laboratory (2)

Laboratory sequence illustrating concepts taught in course 156. Students learn use of network programming tools and methods via programming exercises. (Formerly Computer Engineering 156L.)

Prerequisite: Prerequisites: CSE 150, 150L, and CSE 101. Concurrent enrollment in CSE 156 is required.

CSE 160 - Introduction to Computer Graphics (5)

Introduces techniques of modeling, transformation, and rendering for computer-generated imagery. Topics: 2D/3D primitives, projections, matrix composition, and shading algorithms. Programming assignments and major project required. Students cannot receive credit for both this course and course 260 in quarters when they are offered concurrently. Mastery of materials in the prerequisite courses will be verified with a quiz or assignment during the first two weeks of the course. (Formerly Computer Science 160.)

Prerequisite: Prerequisite(s): CSE 101 and MATH 21 or AM 10. Concurrent enrollment in CSE 160L is required.

CSE 160L - Introduction to Computer Graphics Laboratory (2)

Complements course 160, gaining additional competence with a number of important software development tools, graphics libraries, and graphical user interfaces. Topics include OpenGL, WebGL, rubberbanding, picking, sliders, buttons, dialog, event handling, double buffering, lighting, shading, materials, and textures. The topic list may be updated to reflect technological changes. (Formerly CMPS 160L.)

Prerequisite: Concurrent enrollment in CSE 160 is required.

CSE 161 - Introduction to Data Visualization (5)

Concepts and methods for data analysis, information and scientific visualization, and effective communication of technical data. Topics include: mathematical foundations; scalar, vector, and tensor field visualization; multivariate visualization; and tree and graph visualizations. Applications are drawn from social-network analysis; environmental and space science; and medical imaging. Evaluation based on examinations, programming exercises, and a project. (Formerly CMPS 161.)

Prerequisite: Prerequisite(s): CSE 160 or equivalent. Concurrent enrollment in CSE 161L is required.

CSE 161L - Data Visualization Laboratory (2)

Complements course 161. Students gain additional competence with a number of important software development tools and techniques. Included are Paraview, Visualization Toolkit (VTK), and Insight Toolkit (ITK). Students get hands-on experience with designing transfer functions, isosurfacing, direct volume rendering, vector-field visualization techniques, as well as methods for dealing with non-spatial data. (Formerly CMPS 161L.)

Prerequisite: Concurrent enrollment in CSE 161 is required.

CSE 162 - Advanced Computer Graphics and Animation (5)

Covers concepts and methods for modeling and rendering static and dynamic scenes. Topics include: mathematical foundations (e.g., splines and numerical integration; global illumination models; texture mapping; morphing; physically based animation; behavioral animations; and procedural animations. Evaluation based on examinations, programming exercises, and a project. (Formerly CMPS 162.)

Prerequisite: Prerequisite(s): CSE 160 or equivalent.
Concurrent enrollment in CSE 162L is required.

CSE 162L - Advanced Computer Graphics and Animation Laboratory (2)

Complements course 162. Students gain additional competence in a hands-on computational laboratory setting. Representative examples include topics, such as interactive curve and surface design; shaders for advanced effects; crowd and behavioral animation; experiments with particle systems; facial animation; and motion and planning. (Formerly CMPS 162L.)

Prerequisite: Prerequisite(s): concurrent enrollment in CSE 162 is required.

CSE 163 - Data Programming for Visualization (5)

Presents the basics of open-source programming tools to perform data analysis and create interactive visualizations and maps for the web, data integrity and scraping, statistical computation, simple and novel visualizations, and geomapping. The examples are drawn from social science, public policy, and data journalism. (Formerly CMPS 165.)

Prerequisite: Prerequisite(s): CSE 101.

CSE 165 - Human-Computer Interaction (5)

Theory and hands-on practice to understand what makes user interfaces usable and accessible to diverse individuals. Covers human senses and memory and their design implications, requirement solicitation, user-centered design and prototyping techniques, and expert and user evaluations. Interdisciplinary course for social science and engineering majors. Students cannot receive credit for this course and CSE 265 or DANM 231. (Formerly Computer Engineering 131.)

Prerequisite: Prerequisite(s): CSE 15.

CSE 167 - Mobile Sensing and Interaction (5)

Provides hands-on knowledge and experience with modern mobile computing platforms for sensing and interactions tasks. Students learn how to create usable applications on a sensor-laden, mobile computing platform with adequate level of user interface. (Formerly Computer Engineering 161.)

Prerequisite: Prerequisite(s): CSE 13 and CSE 13L; or CSE 15 and CSE 15L; and PHYS 5A or PHYS 6A; and AM 10 or MATH 21.

CSE 168 - Introduction to Augmented Reality and Virtual

Reality (7)

Covers the concepts and methods needed to develop augmented reality (AR) and virtual reality (VR) applications. Topics include 3D modeling, graphics rendering, image compositing, occlusion handling, sensors, computer vision and image analysis, toolkits for AR, different display options, dynamics, interaction, and navigation. Prerequisite(s): course 160/L. Some knowledge of mobile platforms (e.g., CMPS 121 or CMPE 161) is helpful, but not required. Enrollment is by instructor permission. Enrollment is restricted to juniors and seniors. (Formerly CMPS 168.)

CSE 170 - Management of Technology Seminar (2)

Uses weekly talks by leading industry practitioners and university researchers to provide in-depth exposure to the management of technology. Topics covered include product development, operations, strategy, finance, and marketing for technologies such as software and information systems. (Formerly TIM 101.)

CSE 171A - Introduction to Management of Technology I (5)

An in-depth examination of technological, strategic, marketing, and financial methods and analytical tools for the management of technology to enable cost-effective and rapid development of profitable and high quality technologies. Includes case studies and a comprehensive project. (Formerly TIM 105.)

Prerequisite: Prerequisite(s): MATH 19B or MATH 11B or AM 11B or ECON 11B.

CSE 171B - Introduction to Management of Technology II (5)

High-technology enterprises must understand and operate effectively within their technology-business value chains in order to maximize profitability. This course develops and applies methods and tools for the design, optimization, selection, and management of these value chain networks. (Formerly TIM 125.)

Prerequisite: Prerequisite(s): CSE 171A.

CSE 173 - Financial Engineering and Management in High Technology Firms (5)

Addresses methods and tools for financing technology development and projects. Includes approaches for coordinating finance and accounting with strategy and operations of firms; discounted cash-flow analysis; activity-based costing; financial planning; and elements of financial account and investment science. (Formerly TIM 130.)

Prerequisite: Prerequisite(s): ECON 113 or STAT 131 or CSE 107 or by instructor permission.

CSE 174 - Decision Analysis in Management (5)

Presents decision tools/theory with a focus on investment, finance, management, technology, and policy. Often, irreversible decisions are made without enough information to analyze the possible consequences. Course uses systematic

approaches to analyze these types of situations to enable rational decisions. (Formerly TIM 165.)

Prerequisite: Prerequisite(s): AM 30 or MATH 22 or MATH 23A; and ECON 113; and ECON 100A or ECON 100M. Enrollment is restricted to juniors and seniors.

CSE 175 - Business Strategy and Information Systems (5)

Analysis of effective use of information systems within a business enterprise, with emphasis on gaining a competitive advantage. Integration of information systems with business strategy, financial justification, personnel, and organizational considerations are highlighted. Intended for technology and information management majors or senior engineering majors who have a business interest. (Formerly TIM 158.)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and CSE 50 or permission of instructor.

CSE 180 - Database Systems I (5)

Introduction to the concepts, approaches, tools, and methodology of database design. Covers the entity-relationship model, the relational model, relational algebra, relational calculus, commercial languages (such as SQL and QBE), functional dependencies, normal forms, and design theory. Other topics may include knowledge-bases, constraint databases, and alternative database models. Students that have taken and passed CSE 182 may not take CSE 180 for credit. (Formerly CMPS 180.)

Prerequisite: Prerequisite(s): CSE 101.

CSE 180W - Database Systems (2)

Disciplinary Communication (DC) course to be taken concurrently with course 180. Students satisfy the DC requirement by producing a database design document, a document with comments on the source code for complex queries, and a literature survey or systems survey. (Formerly CMPS 180W.)

Prerequisite: Prerequisite(s): CSE 101, or permission of instructor; satisfaction of the Entry Level Writing and Composition requirements. Concurrent enrollment in CSE 180 is required.

CSE 181 - Database Systems II (5)

Introduction to the architecture and implementation of database systems. Topics covered include data storage, tree and hash indexes, storage management, query evaluation and optimization, transaction management, concurrency control, recovery, and XML data management. (Formerly CMPS 181.)

Prerequisite: Prerequisite(s): CSE 180.

CSE 182 - Introduction to Database Management Systems (5)

Concepts, approaches, tools, and methodology of database design. Topics include the entity-relationship model; the relational data model; normal forms; commercial languages such as SQL (SQL constraints, SQL triggers, and update languages); query-by-example (QBE); XML data model, and

XML query language (XQuery); as well as relational database-management support for XML and object-relational features in database-management systems. Involves a database -application development project. Students that have taken and passed CSE 180 cannot receive credit for CSE 182 (Formerly CMPS 182).

Prerequisite: Prerequisite(s): CSE 15. Course intended for non-majors; computer science majors should enroll in CSE 180.

CSE 183 - Web Applications (5)

The World-Wide Web is one of the main mechanisms by which computer applications are delivered to users. This course introduces the design of Web applications. Students learn the main technologies involved, and build web applications as part of homework assignments and group class projects. (Formerly CMPS 183.)

Prerequisite: Prerequisite(s): CSE 15 and CSE 15L.

CSE 184 - Data Wrangling and Web Scraping (5)

Python basics; data extraction from CSV, JSON, XML, Excel, PDF, encoded text files; data cleaning, finding duplicates, missing data, fuzzy matching; data exploration, joining, aggregating, separating, correlation, clustering; web scraping, APIs, scraping data from social media, open data network. (Formerly CMPS 184.)

Prerequisite: Prerequisite(s): CSE 101.

CSE 185E - Technical Writing for Computer Engineers (5)

Writing by engineers and computer scientists, not to general audiences, but to engineers, engineering managers, and technical writers. Exercises include job application and resume, in-code documentation, algorithm description, naive-user documentation, library puzzle, survey article, proposal, progress report, formal technical report, and oral presentation. (Formerly Computer Engineering 185.)

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements; and CSE 12 or CSE 15 or BME 160 or by permission of the instructor. Enrollment is restricted to computer engineering, bioengineering, bioinformatics, biomolecular engineering and bioinformatics, robotics engineering, or network and digital technology majors.

CSE 185S - Technical Writing and Communication in Computer Science (5)

Writing and communication by computer science professionals to a technical audience. Geared toward students planning to pursue an advanced degree in computer science. Assignments include: cover letter and resume for job application, statement of purpose for graduate school application, algorithm description and analysis, user documentation, proposal preparation, critical analysis of published papers, survey of the literature, term paper, and oral presentations. (Formerly CMPS 185.)

Prerequisite: Prerequisite(s): CSE 101, one additional upper-division CSE course, and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to computer science majors, or by permission of the instructor.

CSE 191 - Computer Science and Technology Seminar (2)

Weekly talks by industry experts, university researchers, field practitioners, and video presentations provide an in-depth exposure to a specific or a broad area of computer science and technology. Topics include emerging ideas, opportunities, challenges, and future of the industry. (Formerly CMPS 191.)

CSE 192 - Supervised Student Teaching/Tutoring (5)

Students hold tutoring hours, run a lab, or lead discussion section in conjunction with a regularly offered course and under close supervision by the course's instructor. Weekly meetings with a regular faculty member to discuss teaching techniques, pedagogy, sensitivity to students' needs, maintaining a comfortable learning environment, and strategies for handling difficult situations. Students submit a report on their teaching experience. Enrollment by permission of instructor and restricted to sophomores, juniors, and seniors. (Formerly CMPS 192.)

CSE 192F - Supervised Student Teaching/Tutoring (2)

Students hold tutoring hours, run a lab, or lead discussion section in conjunction with a regularly offered course and under close supervision by the course's instructor. Weekly meetings with a regular faculty member to discuss teaching techniques, pedagogy, sensitivity to students' needs, maintaining a comfortable learning environment, and strategies for handling difficult situations. Students submit a report on their teaching experience. Enrollment by permission of instructor and restricted to sophomores, juniors, and seniors. (Formerly CMPS 192F.)

CSE 193 - Field Study (5)

Provides for individual programs of study with specific academic objectives carried out under the direction of a faculty member of the Computer Engineering Department and a willing sponsor at the field site using resources not normally available on campus. Credit is based on the presentation of evidence of achieving the objectives by submitting a written and oral presentation. May not be repeated for credit. Students submit petition to sponsoring agency.

CSE 193F - Field Study (2)

Provides for individual programs of study with specific academic objectives carried out under the direction of a faculty member of the Computer Engineering Department and a willing sponsor at the field site using resources not normally available on campus. Credit is based on the presentation of evidence of achieving the objectives by submitting a written and oral presentation. May not be repeated for credit. Students submit petition to sponsoring agency.

CSE 194 - Group Tutorial (5)

A program of independent study arranged between a group of students and a faculty member. Students submit petition to sponsoring agency.

CSE 194F - Group Tutorial (2)

A program of independent study arranged between a group of students and a faculty member. Students submit petition to sponsoring agency.

CSE 195 - Senior Thesis Research (5)

Students submit petition to sponsoring agency. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Computer Engineering majors, CSE 123A or CSE 129A.

CSE 195F - Senior Thesis Research (2)

Students submit petition to sponsoring agency. Consent of instructor required. Prerequisite: course 123A.

CSE 198 - Individual Study or Research (5)

Students submit petition to sponsoring agency.

CSE 198F - Individual Study or Research (2)

Students submit petition to sponsoring agency.

CSE 199 - Tutorial (5)

For fourth-year students majoring in computer engineering. Students submit petition to sponsoring agency.

CSE 199F - Tutorial (2)

For fourth-year students majoring in computer engineering. Students submit petition to sponsoring agency.

Graduate

CSE 200 - Research and Teaching in Computer Science and Engineering (3)

Basic teaching techniques for teaching assistants, including responsibilities and rights of teaching assistants, resource materials, computer security, leading discussion or lab sessions, presentation techniques, maintaining class records, electronic handling of homework, and grading. The course examines research and professional training, including use of the library and online databases, technical typesetting, writing journal and conference papers, publishing in computer science and computer engineering, giving talks in seminars and conferences, and ethical issues in science and engineering. Required for all teaching assistants. Formerly CMPS 200 and CMPE 200.)

Prerequisite: Enrollment is restricted to graduate students.

CSE 201 - Analysis of Algorithms (5)

Rigorous analysis of the time and space requirements of important algorithms, including worst case, average case, and

amortized analysis. Techniques include order-notation, recurrence relations, information-theoretic lower bounds, adversary arguments. Analysis of the key data structures: trees, hash tables, balanced tree schemes, priority queues, Fibonacci and binomial heaps. Algorithmic paradigms such as divide and conquer, dynamic programming, union-find with path compression, augmenting paths. Selected advanced algorithms. Introduction to NP-completeness. (Formerly Computer Science 201.)

Prerequisite: Enrollment is restricted to graduate students; undergraduate students may enroll in this course if they have completed CSE 102 or CSE 106 and have the consent of the instructor.

CSE 202 - Combinatorial Algorithms (5)

Fundamental combinatorial algorithms, graph algorithms, flow problems, matching problems, linear programming, integer programming, NP-completeness, approximation algorithms for optimization problems. (Formerly Computer Science 211.)

Prerequisite: Prerequisite(s): CSE 201.

CSE 204 - Computational Models and Complexity (5)

Finite automata and regular expressions, universal models of computation, computability and unsolvability, relations between complexity classes, hierarchy theorems, reductions, complete problems for the major complexity classes (L, NL, P, NP, PSPACE). Other topics may include complexity of counting and enumeration problems, complexity of approximation, randomized complexity classes. (Formerly Computer Science 210.)

Prerequisite: Prerequisite(s): CSE 201.

CSE 205 - Logic in Computer Science (5)

The applications and uses of formal systems to computer science. Covers the syntax and semantics of propositional logic and first-order logic, normal forms, soundness and completeness theorems, Herbrand's theorem, unification and resolution, foundations of logic programming, automated theorem proving. Other topics may include deductive databases, database query languages, nonmonotonic reasoning. (Formerly Computer Science 217.)

Prerequisite: Enrollment is restricted to graduate students.

CSE 207 - Graph Algorithms (5)

Explores graph theory and algorithms for solving problems in engineering. A review of basic graph concepts and algorithms is followed by topics in network flow, partitioning, spectral analysis of graphs, graph isomorphism, and intractability. (Formerly Computer Engineering 277.)

Prerequisite: Prerequisite(s): CSE 101 and CSE 102; or CSE 106; or CSE 201; or equivalent. Enrollment is restricted to graduate students.

CSE 210A - Programming Languages (5)

Covers current issues in programming languages. Language topics include object oriented, concurrent, functional, and logic programming, and other programmable applications such as symbolic manipulators and simulation. (Formerly Computer Science 203.)

Prerequisite: Enrollment is restricted to graduate students; undergraduate students may enroll for this course if they have completed CSE 112 and have the consent of the instructor.

CSE 210B - Advanced Programming Languages (5)

Covers issues in the design, implementation, analysis, and specification of programming languages. Topics include formal semantics (including operational, axiomatic, and denotational semantics), advanced type systems, program analysis (including abstract interpretation and model checking), specification, and verification. (Formerly Computer Science 253.)

Prerequisite: Prerequisite(s): CSE 210A or equivalent.

CSE 211 - Compiler Design (5)

Advanced study of compiler implementation. Topics include compiler structure back end, run-time environments, storage management, garbage collection, register allocation, code generation, basic blocks, control flow, data flow, local and global optimization, interpretation, machine code generation. Students may not receive credit for this course and course 110B. Taught in conjunction with 110B. (Formerly Computer Science 204.)

Prerequisite: Prerequisite(s): CSE 110A or equivalent. Enrollment is restricted to graduate students.

CSE 212A - Software Engineering (5)

Introduction to the general principles of software engineering. Covers current and classical topics from both practical and theoretical viewpoints. Topics include software evolution, project management, software inspections, design methods, requirements analysis and specification, software testing, maintenance, software implementation, human interfaces, and software engineering experimentation. (Formerly CMPS 276.)

Prerequisite: Enrollment is restricted to graduate students; undergraduates may enroll in this course if they have completed CSE 115A.

CSE 212B - Software Reuse and Component-Based Software Engineering (5)

Detailed study of interlocking business, organizational, and technical issues in large-scale software reuse and component-based software engineering. Topics include architecture, design for reuse, domain engineering, model-driven development, domain-specific kits, components, frameworks, software agents, generators, problem-oriented languages, library design, reuse tools, patterns, and aspects. Assumes prior exposure to software engineering topics. (Formerly Computer Science 279.)

Prerequisite: Prerequisite(s): CSE 212A or consent of instructor. Enrollment is restricted to graduate students.

CSE 214 - Principles of Database Systems (5)

Advanced course on principles of database systems. Main topics include overview of the relational data model and relational query languages; recursive queries, datalog, and fixed-points; query processing and optimization; database design, dependencies, normal forms, and the chase procedure. Additional topics may include information integration, complex objects, semistructured data, and XML. (Formerly Computer Science 277.)

Prerequisite: Prerequisite(s): CSE 201 or equivalent or consent of instructor. Enrollment is restricted to graduate students.

CSE 215 - Design and Implementation of Database Systems (5)

Advanced course in implementation techniques for database systems. For students who wish to do research in databases or to learn more about large-scale data processing. Topics include: indexing of complex data; techniques for high-volume concurrency control; query processing and optimization; database recovery; parallel database system architectures; database systems for streaming data; approximate query answering. Additional topics may include: self-managing database systems; advanced query optimization techniques; and query processing techniques for semi-structured data. (Formerly Computer Science 278.)

Prerequisite: Prerequisite(s): CSE 181 (or equivalent) or consent of instructor. Enrollment is restricted to graduate students.

CSE 220 - Computer Architecture (5)

Provides a thorough and fundamental treatment of the art of computer architecture. Topics include concepts of von Neumann architectures, methods of evaluating CPU performance, instruction-set design and examples, compiler issues, instruction pipelining, superscalar processors, methods for reduction of branch penalty, memory hierarchies, I/O systems, floating-point arithmetic, and current issues in parallel processing. (Formerly CMPE 202.)

Prerequisite: Enrollment is restricted to graduate students; undergraduates may enroll if they have completed CSE 120 and with consent of instructor. A basic knowledge of computer architecture, similar to the content of CSE 120, is recommended.

CSE 221 - Advanced Microprocessor Design (5)

Introduction to latest advances in computer architecture. Focuses on processor core design. Topics include simultaneous multithreading, thread level speculation, trace caches, novel out-of-order mechanisms, and energy-efficient processor core designs. Final project is modification/enhancement of an out-of-order processor on an FPGA development system. (Formerly Computer Engineering 221.)

Prerequisite: Prerequisite(s): CSE 220; and CSE 125, CSE 225, or equivalent Verilog experience. Concurrent enrollment in CSE 221L is required. Enrollment restricted to graduate students.

CSE 221L - Advanced Microprocessor Design Laboratory (3)

Laboratory sequence illustrating topics covered in course 221. (Formerly Computer Engineering 221L.)

Prerequisite: Prerequisite(s): CSE 220; and CSE 125, CSE 225, or equivalent Verilog experience. Concurrent enrollment in CSE 221 is required. Enrollment restricted to graduate students.

CSE 222A - VLSI Digital System Design (5)

Advanced Very Large Scale Integrated (VLSI) custom integrated circuits. Topics include: semiconductors; field-effect transistors (FETs); circuits; and interconnect simulation, along with advanced material on manufacturability, variability, short-channel devices, and non-volatile memories. Students cannot receive credit for this course and CSE 122. (Formerly Computer Engineering 222.)

Prerequisite: Prerequisite(s): CSE 122 or equivalent.

CSE 222B - VLSI System-on-a-Chip Design (5)

Design methodologies for Application Specific Integrated Circuits (ASICs). Topics include: behavioral specification; logic synthesis; standard-cell libraries; advanced timing analysis; and physical design automation tools. Familiarizes students with real-world tools during the design of a small system-on-a-chip project. Students are encouraged to fabricate and test their chips in an independent study. (Formerly Computer Engineering 223.)

Prerequisite: Prerequisite(s): CSE 222 or permission of instructor. Enrollment is restricted to graduate students.

CSE 225 - Introduction to ASIC Systems Design (5)

Introduces reconfigurable computing systems with emphasis on field-programmable devices. Topics include: architectures of field-programmable devices; novel reconfigurable systems; and hardware algorithms. Students are billed a materials fee. (Formerly Computer Engineering 225.)

Prerequisite: Enrollment is restricted to computer engineering graduate students.

CSE 226 - Advanced Parallel Processing (5)

Introduction to programming advanced parallel computer architecture. Topics may include: SIMD massively parallel processor arrays; streaming parallel coprocessors, such as graphics cards used for general-purpose processing (GPGPU); or other hybrid MIMD/SIMD architectures. Course has programming lab component, a project, and student presentation on related topics. (Formerly Computer Engineering 220.)

Prerequisite: Enrollment is restricted to graduate students; undergraduates may enroll with permission of instructor.

CSE 229 - Field-Programmable Gate Arrays Computer-Assisted Design (5)

Design methods for Field-Programmable Gate Arrays (FPGAs), including algorithms for technology mapping, routability estimation, placement, and routing. The relationship between FPGA architectures and their computer-aided design tools. Course project involves the modification and analysis of an FPGA tool. (Formerly Computer Engineering 229.)

Prerequisite: Enrollment is restricted to graduate students or by consent of instructor. CSE 100, CSE 125, CSE 222A, CSE 225, or other digital design experience recommended.

CSE 231 - Advanced Operating Systems (5)

A detailed study of the issues involved in operating systems design and implementation. Readings cover current research topics and systems of historical significance. Topics include (but are not restricted to) process and memory management, protection, security, synchronization, performance evaluation, file systems, distributed systems. (Formerly Computer Science 221.)

Prerequisite: Enrollment is restricted to graduate students; undergraduates by interview only.

CSE 232 - Distributed Systems (5)

Overview of research topics in distributed computer systems. Topics may include communication paradigms, process management, naming, synchronization and coordination, consistency and replication, fault tolerance, and security. Examples include distributed operating systems, distributed file and object systems, distributed document systems, and peer-to-peer systems. (Formerly Computer Science 232.)

Prerequisite: Enrollment is restricted to graduate students.

CSE 233 - Advanced Computer Security (5)

Overview of research topics in computer and network security. Topics may include cryptographic operations, security properties and policies, authentication and access control, attacks on computer systems and defenses against them, security in programming languages, and network protocols for security. (Formerly CMPS 223.)

Prerequisite: Enrollment is restricted to graduate students or consent of instructor.

CSE 234 - Understanding Cryptography (5)

Cryptography has become ubiquitous, from light bulbs to atomic weapons. This course provides both a comprehensive introduction to applied cryptography and an additional focus on the human issues caused by bad implementations, bad processes, and broken algorithms. Knowledge of C Programming, Linux, and Virtual machines is required. (Formerly Computer Engineering 236 and Computer Science 236.)

Prerequisite: Prerequisite(s): CSE 201. Enrollment is restricted to graduate students.

CSE 237 - Storage Systems (5)

Topics include storage devices, storage architectures, local file systems, high-performance file systems, and next-generation storage devices and architectures; covers issues of performance, reliability, scalability, robustness, and security. (Formerly Computer Science 229.)

Prerequisite: Enrollment is restricted to graduate students.

CSE 240 - Artificial Intelligence (5)

Prepares students for doing research in artificial intelligence. Major topics covered are search and heuristics, knowledge representation, planning, deduction and inference, reinforcement learning, associative pattern retrieval, and adaptive search. Discussion includes current research issues in AI problem-solving methods. Individualized projects. (Formerly Computer Science 240.)

CSE 241 - Knowledge Engineering (5)

Introduction to the acquisition, representation, and application of knowledge in expert systems. Topics include production systems, backward and forward chaining, dependency-directed backtracking, reasoning with uncertainty, certainty factors, fuzzy systems, knowledge representation (rules, frames, and semantic nets), inference engines, and metaknowledge. Discussion includes current research issues in adaptive expert systems. Involves one major project. Undergraduates may enroll in this course if they have completed CSE 140. (Formerly Computer Science 241.)

CSE 242 - Machine Learning (5)

Introduction to machine learning algorithms. Covers learning models from fields of statistical decision theory and pattern recognition, artificial intelligence, and theoretical computer science. Topics include classification learning and the Probably Approximately Correct (PAC) learning framework, density estimation and Bayesian learning, EM, regression, and online learning. Provides an introduction to standard learning methods such as neural networks, decision trees, boosting, nearest neighbor, and support vector machines. Requirements include one major experimental learning project or theoretical paper. Students may not receive credit for both this course and course 142. (Formerly CMPS 242.)

Prerequisite: Enrollment is restricted to graduate students in the computer engineering and computer science master's programs; and students in the following doctoral programs: computer engineering, computer science, applied mathematics and statistics, biomolecular engineering and bioinformatics, electrical engineering, and technology information management. Others may enroll by permission of the instructor.

CSE 243 - Data Mining (5)

Covers the principles, algorithms, and applications of data mining, including mining sequential data, structured data, stream data, text data, spatiotemporal data, biomedical data, and other forms of complex data. Formerly TIM 245.)

Prerequisite: Enrollment is restricted to graduate students.

CSE 245 - Computational Models of Discourse and Dialogue (5)

Focuses on classic and current theories and research topics in the computational modeling of discourse and dialogue, with applications to human-computer dialogue interactions; dialogue interaction in computer games and interactive story systems; and processing of human-to-human conversational and dialogue-like language such as e-mails. Topics vary depending on the current research of the instructor(s) and the interests of the students. Students read theoretical and technical papers from journals and conference proceedings and present class lectures. A research project is required.

Prerequisite: Enrollment is restricted to graduate students. Undergraduates may enroll with permission of instructor.

CSE 247 - AI: Problem Solving and Intelligent Search (5)

Surveys topics in contemporary deductive artificial intelligence (AI). Coursework involves weekly readings and a project. (Formerly Computer Science 247.)

Prerequisite: Prerequisite(s): CSE 201 and CSE 240. Enrollment is restricted to graduate students.

CSE 248 - Foundations of Data Science (5)

Examines the mathematical and algorithmic foundations of data science including high dimensional data, probabilistic inequalities, dimensionality reduction, correlation detection, streaming algorithms, and clustering. (Formerly Computer Science 218.)

Prerequisite: Prerequisite(s): CSE 201. Enrollment is restricted to graduate students.

CSE 249 - Large-Scale Web Analytics and Machine Learning (5)

Provides a systematic methodology and corresponding set of methods and analytical tools in stochastic models; reinforcement learning; stochastic (neuro-)dynamic programming; Bayesian graphical models; inference; and social networks used for web analytics and machine learning to achieve business intelligence (BI) and support research and applications in computer science, computer engineering, and electrical engineering, applied mathematics and statistics, business, management, and economics. Includes exposure to Hadoop for large-scale computation. Students should have solid background in probability equivalent to statistics, stochastic methods, calculus, (and preferably) stochastic processes and optimization, or mathematical maturity and exposure to business intelligence and algorithms. (Formerly TIM 251.)

Prerequisite: Prerequisite(s): CSE 107 or STAT 131 or permission of instructor. Enrollment is restricted to graduate students.

CSE 250A - Computer Networks (5)

Issues resulting from organizing communication among autonomous computers. Includes network models and switching techniques; medium access control protocols and

local area networks; error control and retransmission strategies; routing algorithms and protocols; congestion control mechanisms and end-to-end protocols; application-level protocols; and application of concepts to wireless and wireline networks, with emphasis on the Internet. (Formerly Computer Engineering 252A.)

Prerequisite: Enrollment is restricted to graduate students.

CSE 250B - Principles of Computer Communication (5)

Focuses on the design and analysis of protocols for computer communication. Topics include: the safety, liveness, and performance of communication protocols for medium access control (MAC); link control; routing and switching; multicasting; and end-to-end transport. Students cannot receive credit for this course and CSE 152. (Formerly CMPE 252B.)

Prerequisite: Prerequisite(s): CSE 250A. Enrollment is restricted to graduate students.

CSE 250C - High Speed Computer Networks (5)

Fiber-optic technology; fiber-optic link design; network protocol concepts; coding and error control; high-speed local area and metropolitan area networks; gigabit networks; error and congestion control; photonic networks; research topics. (Formerly Computer Engineering 254.)

Prerequisite: Prerequisite(s): CSE 250B.

CSE 253 - Network Security (5)

Fundamental mechanisms for network security and their application in widely deployed protocols. In-depth treatment of security mechanism at the data-link, network, and transport layers for both wired and wireless networks. Covers mechanisms for privacy and integrity, and methods for intrusion detection. (Formerly CMPE 253.)

Prerequisite: Prerequisite(s): CSE 250A and CSE 201. Enrollment restricted to graduate students.

CSE 257 - Wireless and Mobile Networks (5)

An interdisciplinary course on wireless communication and mobile computing. Covers the physical aspects of wireless communication but emphasizes higher protocol layers. Topics include cellular networks, packet radio and ad hoc networks, wireless transport protocols, security, and application-level issues. (Formerly Computer Engineering 257.)

Prerequisite: Prerequisite(s): CSE 250A or permission of instructor.

CSE 259 - Sensor Networks (5)

Focuses on the networking aspects of sensor networks: protocols at the various layers and how they answer the specific requirements posed by these networks (e.g., data driven, energy efficient, etc.) and their applications (monitoring, tracking, etc.). Explores how physical layer and hardware issues may influence protocol design. Course 257 is recommended as a prerequisite. (Formerly Computer Engineering 259.)

Prerequisite: Prerequisite(s): CSE 250A.

CSE 260 - Computer Graphics (5)

Introduces current research and techniques of modeling, 2D/3D transformation, matrix composition, shading algorithms, and rendering to obtain computer-generated imagery. Programming assignments and major project required. Students cannot receive credit for both this course and CSE 160. (Formerly Computer Science 260.)

Prerequisite: Enrollment is restricted to graduate students; undergraduates by interview only.

CSE 261 - Advanced Visualization (5)

Covers advanced topics in visualization, e.g., tensor-field visualization, uncertainty visualization, information visualization. Topics vary with differing offerings of the course. Course includes lectures, exam, research paper reading/presentation, and projects. Final project is expected to be at a sufficiently advanced level for submission to a conference. Students work individually or in pairs. (Formerly Computer Science 261.)

Prerequisite: Enrollment is restricted to graduate students.

CSE 262 - Computer Animation (5)

An in-depth treatment of computer animation, including its origins in conventional animation, 2-D animation, inbetweening, motion control, morphing, graphical motion editors, animation languages, motion blur, simulation of articulated body motion, real-time animation, and special-purpose animation hardware. (Formerly Computer Science 262.)

Prerequisite: Enrollment is restricted to graduate students.

CSE 263 - Data Driven Discovery and Visualization (5)

Explores high-quality interdisciplinary research using socio-economic data and software available on the Internet, and data curation, computation, and visualization to strengthen scientific inquiry to bear on large-scale societal problems. Applications include inequality, poverty, water, energy, environment, health, education, and democracy. Enrollment restricted to graduate students. Enrollment by instructor consent. (Formerly Computer Science 263.)

CSE 264 - Computer Vision (5)

Introduces general concepts in computer vision, with an emphasis on geometric 3D reconstruction. Topics include radiometry, photometry, projective geometry, geometric camera model, epipolar geometry, stereo depth reconstruction, corner and edge features, point descriptors and matching, and optical flow. (Formerly Computer Engineering 264.)

Prerequisite: Enrollment is restricted to graduate students. Undergraduate students who are interested in enrolling should meet with the instructor first.

CSE 265 - Human-Computer Interaction (5)

Theory and hands-on practice to understand what makes user interfaces usable and accessible to diverse individuals. Covers human senses and memory and their design implications, requirement solicitation, user-centered design and prototyping techniques, and expert and user evaluations. Individual research project. Interdisciplinary course for art, social science and engineering graduate students. Students cannot receive credit for this course and CSE 165.

Prerequisite: Enrollment is restricted to graduate students.

CSE 270A - Management of Technology I (5)

Addresses technological, strategic, marketing, financial methods, and analytical tools for management of technology in an integrated manner that enables the cost-effective and rapid development of profitable and high quality technologies. Includes case studies and a comprehensive project. (Formerly TIM 205.)

Prerequisite: Enrollment is restricted to juniors, seniors, and graduate students.

CSE 270B - Management of Technology II (5)

High technology enterprises must understand and operate effectively within their technology-business value chains in order to maximize profitability. Course develops and applies methods and tools for the design, optimization, selection, and management of these value chain networks. (Formerly TIM 225.)

Prerequisite: Prerequisite(s): CSE 270A or consent of instructor. Enrollment is restricted to juniors, seniors, and graduate students.

CSE 271 - E-Business Technology and Strategy (5)

Surveys structure of modern information technology, the relation of that structure to structure of the industry that creates it, and the economic forces that drive the players in the industry. Building on these technological and economic concepts, studies how firms can craft a technology and business strategy to create and capture value in the information technology product and/or services sectors. (Formerly TIM 211.)

Prerequisite: Enrollment is restricted to graduate students.

CSE 272 - Information Retrieval (5)

Course covers major topics of information retrieval, including statistical characteristics of text, several important retrieval models, text clustering, text classification, text filtering, web analysis, information extraction, peer to peer research, distributed search, personalized search, and other related topics. (Formerly TIM 260.)

Prerequisite: Enrollment is restricted to graduate students. Undergraduates may enroll with permission of instructor.

CSE 276 - Optimization Theory and Applications (5)

A first graduate course in optimization with an emphasis on problems arising in management and engineering applications. Objectives are to become experts in problem formulation, comfortable with software for solving these problems, and familiar with analytical methods behind these solver technologies. (Formerly TIM 206.)

Prerequisite: Prerequisite(s): calculus and linear algebra. Enrollment is restricted to graduate students.

CSE 277 - Random Process Models in Engineering (5)

A first graduate course in stochastic process modeling and analysis with an emphasis on applications in technology management, information systems design, and engineering. (Formerly TIM 207.)

Prerequisite: Enrollment is restricted to graduate students. Prerequisite: CSE 107 or other undergraduate probability course recommended.

CSE 279 - Data Mining and Business Analytics in Knowledge Services (5)

Provides students with systematic methodology and analytical tools in data and text mining and business analytics. Also provides an integrated perspective and examines use of these methods in the field of knowledge services, such as online marketing, sponsored search, health care, financial services, recommender systems, etc. Includes training in the basic elements of stochastic optimization and other algorithmic approaches, such as stochastic dynamic programming, statistics, constrained optimization, and machine learning with exposure to software tools. These methods enable firms to achieve rapid, effective, and profitable optimization of knowledge-services management. (Formerly TIM 209.)

Prerequisite: Enrollment is restricted to graduate students. Students are expected to have undergraduate preparation in probability and statistics. Undergraduates may enroll with instructor approval.

CSE 280A - Seminar in Computer Science and Engineering (2)

Weekly seminar covering topics of current research in computer science. Enrollment by permission of instructor. (Formerly CMPS 280A, Seminar in Computer Science Research.)

CSE 280D - Seminar in Database Systems (2)

Covers advanced research topics from the recent literature in database systems and related fields. Involves presentations from UCSC students and faculty, and guest talks from researchers in industry and other academic institutions. Enrollment by permission of instructor. (Formerly 280D.)

CSE 280F - Seminar on Software Engineering (2)

Weekly seminar covering topics of current research in software engineering. (Formerly CMPS 280G.)

Prerequisite: Prerequisite(s): Enrollment is restricted to graduate students.

CSE 280G - VLSI/CAD Seminar (2)

Weekly seminar on advanced topics in VLSI and computer-aided design (CAD). Students present and discuss modern issues in semiconductor design, fabrication, and CAD. Frequent guest speakers present pertinent results from industry and academia. (Formerly Computer Engineering 280G.)

CSE 280H - Seminar in Human Computation Systems (2)

Covers advanced topics and current research in the general area of human computation. Material is drawn from several disciplines that involve or deal with human computation, including computer vision, human-computer interaction, databases, and machine learning. The course comprises presentations from faculty, enrolled students, and external visitors. (Formerly CMPS 280H.)

Prerequisite: Enrollment is restricted to graduate students.

CSE 280I - Seminar on Information Retrieval and Knowledge Management (2)

Seminar series discussing advanced topics in information retrieval and knowledge management. Current research and literature are presented during each meeting. (Formerly 280I.)

Prerequisite: Enrollment is restricted to graduate students.

CSE 280J - Seminar on Computer Graphics (2)

Weekly seminar covering topics of current research in computer graphics. Enrollment restricted to graduate students and by permission of instructor. (Formerly CMPS 280J.)

CSE 280K - Sales and Marketing for Technologists and Engineers (2)

Perspective on the theory, plus examples, and tools useful to technologists and engineers for successfully guiding and supporting sales and marketing endeavors and, thereby, ensuring funding, staffing, product appeal, positive customer relationships, and marketplace success. (Formerly TIM 280M.)

CSE 280L - Seminar on Logic in Computer Science (2)

Covers advanced research topics from the recent literature in the uses of logic in computer science with particular emphasis on the applications of logic to the representation and the management of data. Involves presentations from UCSC students and faculty, and guest talks from researchers in other academic institutions or industrial research labs. Enrollment is by permission of the instructor and is restricted to graduate students. (Formerly CMPS 280L.)

CSE 280M - Seminar on Machine Learning (2)

Weekly seminar covering topics of current interest in machine learning. Enrollment is by permission of the instructor. Enrollment is restricted to graduate students. (Formerly CMPS 280M.)

CSE 280N - Seminar on Networks (2)

Weekly seminar series covering topics of current research in networks and networked systems. Current research work and literature in these areas are discussed. Prerequisite(s): permission of instructor. Enrollment is restricted to graduate students. (Formerly Computer Engineering 280N.)

CSE 280O - Seminar in Applied Programming Languages (2)

Covers current research in language-based approaches to security, distributed systems, databases, and formal verification. Students read and present papers from academic journals and conferences.

Prerequisite: Enrollment is restricted to graduate students, or by permission of the instructor.

CSE 280P - Seminar on Parallel Processing (2)

Weekly seminar series covering topics of current research in parallel systems, architectures, and algorithms. Current research work and literature in these areas are discussed. (Formerly Computer Engineering 280P.)

Prerequisite: Enrollment is restricted to graduate students.

CSE 280S - Seminar on Computer Systems (2)

Weekly seminar series covering topics of current research in computer systems. Enrollment by permission of instructor. (Formerly CMPS 280S AND CMPE 280S.)

CSE 280T - Seminar on New Technologies (2)

Weekly seminar series in which distinguished speakers from industry, universities, and government discuss current developments in networking and computer technology. The emphasis is on open research questions that may lead to collaborative work with faculty and graduate students. (Formerly Computer Engineering 280T.)

CSE 280V - Seminar on Computer Vision (2)

Weekly graduate-level seminar series discussing advanced topics in computer vision and image analysis. Current research and literature presented during each meeting. Enrollment is by permission of the instructor. Enrollment is restricted to graduate students. (Formerly Computer Engineering 280V.)

CSE 280X - Seminar in Distributed Systems (2)

Covers advanced research topics from the recent literature in distributed systems and related fields. Involves presentations from UCSC students and faculty. Enrollment is restricted to graduate students and by permission of the instructor.

CSE 280Z - Seminar in Natural Language Processing and Dialogue (2)

Covers advanced topics and current research in natural language processing. Focuses on student presentations and seminar participation. Enrollment is restricted to graduate students. Enrollment is by permission of the instructor. (Formerly CMPS 280Z.)

CSE 285 - Technical Writing for Engineering Graduates (5)

Writing skills development for graduate engineers. Students produce a major writing project with many subtasks. Exercises includes fellowship application; mathematical and algorithmic description; use of tables and graphs; experiment description; and producing technical web sites, presentations, and posters. Enrollment is restricted to graduate students in biomolecular engineering, computer science and engineering, computer sciences, and electrical and computer engineering. (Formerly CMPE 285.)

CSE 290A - Topics in Algorithms and Complexity Theory: Probabilistic Algorithms and Average Case Analysis (5)

Graduate seminar in algorithms and complexity theory on topics from recently published research journal articles and conference proceedings. Topics vary from year to year depending on the current research of the instructor(s) and interests of students. Students read technical papers from relevant journals and conference proceedings and present class lectures. Guest lectures may supplement the student presentations. A research project and/or paper may be required. (Formerly Computer Science 290A.)

Prerequisite: Enrollment is restricted to graduate students.

CSE 290C - Advanced Topics in Machine Learning (5)

In-depth study of current research topics in machine learning. Topics vary from year to year but include multi-class learning with boosting and SUM algorithms, belief nets, independent component analysis, MCMC sampling, and advanced clustering methods. Students read and present research papers; theoretical homework in addition to a research project. (Formerly Computer Science 290C.)

Prerequisite: Prerequisite(s): CSE 242.

CSE 290D - Neural Computation (5)

An introduction to the design and analysis of neural network algorithms. Concentrates on large artificial neural networks and their applications in pattern recognition, signal processing, and forecasting and control. Topics include Hopfield and Boltzmann machines, perceptions, multilayer feed forward nets, and multilayer recurrent networks. (Formerly Computer Science 290D.)

Prerequisite: Enrollment is restricted to graduate students.

CSE 290E - Object-Oriented Programming Methodology (5)

Object-oriented programming methodology is the application of abstract-data types and polymorphism to coding solution. Topics geared to beginning thesis research in this field. (Formerly Computer Science 290E.)

Prerequisite: Prerequisite(s): CSE 201 and CSE 210A. Enrollment is restricted to graduate students.

CSE 290F - Applications of Combinatorics (5)

Combinatorial mathematics, including summation methods, working with binomial coefficients, combinatorial sequences (Fibonacci, Stirling, Eulerian, Harmonic, Bernoulli numbers),

generating functions and their uses, Bernoulli processes, and other topics in discrete probability. Oriented toward problem solving, applications mainly to computer science, but also physics. (Formerly Computer Science 290F.)

Prerequisite: Prerequisite(s): CSE 16 and AM 10. Enrollment is restricted to graduate students and upper-division undergraduates.

CSE 290G - Topics in Software Engineering (5)

Research seminar on current topics in software engineering. Topics vary from year to year depending on the current research of the instructor(s) and interests of students. Students read technical papers from relevant journals and conference proceedings. Synthesis and understanding of materials is demonstrated by a required research project. (Formerly Computer Science 290G.)

Prerequisite: Prerequisite(s): CSE 212A recommended. Enrollment is restricted to graduate students; undergraduates may enroll with permission of instructor.

CSE 290H - Topics in Database Systems (5)

Focuses on current research topics in database systems. Different offerings cover different topics depending on current research of instructor(s) and the interests of students. Students read technical papers from journals and conference proceedings and present class lectures. A research project is required. (Formerly Computer Science 290H.)

Prerequisite: Prerequisite(s): CSE 180 (or equivalent) or CSE 214 or consent of instructor. Enrollment is restricted to graduate students.

CSE 290J - Advanced Topics in Computer Graphics and Visual Computing (5)

A graduate seminar in computer graphics on topics from recently published research journal articles and conference proceedings. Topics vary from year to year depending on interests of students. Primary areas of interest are likely to be scientific visualization, modeling, rendering, scattered data techniques, wavelets, and color and vision models. Students read technical papers and present class lectures. Guest lecturers supplement the student presentations. A research project is required. (Formerly Computer Science 290B.)

CSE 290K - Advanced Topics in Natural Language Processing (5)

Teaches participants about current methods and directions in active areas of Natural Language Processing research and applications. Students perform independent research and hone skills with state-of-the-art NLP tools and techniques.

Prerequisite: Enrollment is restricted to computer engineering, computer science, and technology management graduate students.

CSE 290L - Topics in Crowdsourcing and Collaboration (5)

Explores the foundations of crowdsourcing and computer-mediated collaboration. Covers the algorithmic and statistical

foundations of crowdsourcing, introducing and analyzing algorithms, and experimenting with concrete systems. Also, provides an introduction to computational systems for mediating user interaction and collaboration. (Formerly Computer Science 290L.)

Prerequisite: Enrollment is restricted to graduate students.

CSE 290M - Topics in Parallel Computation (5)

Investigates selected topics in applied parallel computation. Topics may include numerical methods, artificial intelligence and machine learning algorithms, graphics and image processing, systolic algorithms, and the interplay between hardware and algorithms. Students are encouraged to investigate and discuss the parallelization of their own research. (Formerly Computer Engineering 290M.)

Prerequisite: Enrollment is restricted to graduate students.

CSE 290N - Topics in Computer Performance (5)

Selected topics of current interest in the area of computer system performance. Subjects may include aspects of large systems, performability, computer networks, storage subsystems, and nontraditional approaches and are subject to periodic revision. (Formerly Computer Engineering 290N.)

Prerequisite: Enrollment is restricted to graduate students.

CSE 290O - Algorithmic Foundations of Convex Optimization (5)

Focuses on some of the foundational aspects of convex and its relationship to modern machine learning. Discusses positive results--how can you solve convex optimization problems--and negative ones with statements like This family of problems is too hard to be solved in reasonable time. Course is divided into three parts, each exploring a different aspect of convex optimization: 1) algorithmic frameworks; 2) Oracle complexities; 3) the power of randomness. Through this course students are exposed to general concepts of convex geometry, learning theory, and rigorous proofs. (formerly CMPS 290O.)

Prerequisite: Prerequisite(s): CSE 201 and CSE 242. Enrollment is restricted to computer engineering and computer science graduate students.

CSE 290P - Data Privacy Via Machine Learning, and Back (5)

Helps students achieve both expository knowledge and expertise in the field of data privacy. Focuses on fundamental techniques used in designing privacy-preserving, machine-learning systems in both academia and in the industry. Students are expected to read and understand recent research papers in the topic. (Formerly Computer Science 290P.)

Prerequisite: Prerequisite(s): CSE 201 and CSE 242 or equivalent. Enrollment is restricted to graduate students.

CSE 290Q - Topics in Programming Languages (5)

Current research topics on computer programming languages. Topics vary year to year. Students read papers from current conferences and journals, and present class lectures. A

research project is required. (Formerly Computer Science 290Q.)

Prerequisite: Prerequisite(s): CSE 210A. Enrollment is restricted to graduate students.

CSE 290S - Advanced Topics in Computer Systems (5)

Focuses on current research topics in computer systems. Topics vary from year to year depending on the current research of the instructor(s) and the interests of the students. Students read technical papers from current journals and conference proceedings, and present class lectures. A research project is required. (Formerly Computer Science 290S.)

Prerequisite: Prerequisite(s): CSE 231 recommended. Enrollment is restricted to graduate students; qualified undergraduates may enroll with instructor's consent.

CSE 290T - Topics in Computing for Society (5)

Current research topics on computer technology that is intentionally targeted to benefiting society. Topics vary year to year. Students read papers from current conferences and journals, and present class lectures. A research project is required. (Formerly Computer Science 290T.)

Prerequisite: Enrollment is restricted to graduate students.

CSE 290X - Cryptography and Computer Security (5)

Research seminar on encryption and related technologies. Topics include theory of codes, random sequences and generators, public key cryptosystems, private key cyphers, key exchange protocols, quantum computing and cryptography. Major project required. Prerequisite: interview with instructor. (Formerly Computer Science 290X.)

CSE 293 - Advanced Topics in Computer Science & Engineering (5)

A graduate seminar on a research topic in computer engineering which varies according to instructor. Possible topics include, but are not limited to, communication networks, data compression, special-purpose architectures, computer arithmetic, software reliability and reusability, systolic arrays. (Formerly Computer Engineering 293.)

CSE 296 - Masters Project (2)

Independent completion of a masters project under faculty supervision. Students submit petition to sponsoring agency.

CSE 297A - Individual Study or Research (5)

Independent study or research under faculty supervision. Although this course may be repeated for credit, not every degree program will accept a repeated course towards degree requirements. Students submit petition to sponsoring agency.

CSE 297B - Individual Study or Research (10)

Independent study or research under faculty supervision. Although this course may be repeated for credit, not every degree program will accept a repeated course towards degree requirements. Students submit petition to sponsoring agency.

CSE 297C - Individual Study or Research (15)

Independent study or research under faculty supervision. Although this course may be repeated for credit, not every degree program will accept a repeated course towards degree requirements. Students submit petition to sponsoring agency.

CSE 297F - Independent Study or Research (2)

Independent study or research under faculty supervision. Although this course may be repeated for credit, not every degree program will accept a repeated course toward degree requirements.

CSE 299A - Thesis Research (5)

Thesis research conducted under faculty supervision. Although the course may be repeated for credit, not every degree program will accept a repeated course towards degree requirements. Students submit petition to sponsoring agency.

CSE 299B - Thesis Research (10)

Thesis research conducted under faculty supervision. Although the course may be repeated for credit, not every degree program will accept a repeated course towards degree requirements. Students submit petition to sponsoring agency.

CSE 299C - Thesis Research (15)

Thesis research conducted under faculty supervision. Although the course may be repeated for credit, not every degree program will accept a repeated course towards degree requirements. Students submit petition to sponsoring agency.

CSE 299F - Thesis Research (2)

Independent study or research under faculty supervision. Enrollment is restricted to graduate students. Recommended for part-time students. Students submit petition to sponsoring agency.

CSP - COASTAL SCIENCE AND POLICY Graduate

CSP 200 - Natural Sciences for Coastal Sustainability (5)

Provides a basic foundation in the natural sciences including the environment (atmosphere, land, water, sea), species populations, ecosystems and biodiversity, and their relevance to sustainability issues of the coastal zone.

Prerequisite: Prerequisite(s): concurrent enrollment in CSP 210 and CSP 220. Enrollment is restricted to graduate students in the coastal science and policy program, or by permission of the instructor.

CSP 210 - Social Sciences for Coastal Sustainability (5)

Provides a basic foundation in the social sciences, through systematic study of communities, institutions, and entire societies. Examines the relevance of sociological theory, social interactions and relationships, social inequality, and social change to sustainability issues of the coastal zone.

Prerequisite: Prerequisite(s): concurrent enrollment in CSP 200 and CSP 220. Enrollment is restricted to graduate students in the coastal science and policy program, or by permission of the instructor.

CSP 220 - Economics for Coastal Sustainability (5)

Builds a foundation of economic concepts pertaining to the environment and explores tools for environmental valuation. Investigates the role for government action related to the environment, including estimation of costs and benefits for regulations and related policies.

Prerequisite: Prerequisite(s): concurrent enrollment in CSP 200 and CSP 210. Enrollment is restricted to graduate students in the coastal science and policy program, or by permission of the instructor.

CSP 230 - Integrated Problem-Based Discussion (0)

Focusing on a series of case studies, this discussion section demonstrates means and values of integrating across the natural and social sciences and economics disciplines in developing solutions to coastal sustainability.

Prerequisite: Prerequisite(s): Concurrent enrollment in CSP 200, CSP 210, and CSP 220. Enrollment restricted to coastal science and policy graduate students.

CSP 244 - Adaptation and Planning (5)

Introduces students to conceptual frameworks for developing solutions to coastal sustainability problems, and drawing on knowledge and skills gained in previous coastal science and policy courses to perform an integrated assessment of a coastal sustainability problem.

Prerequisite: Enrollment restricted to coastal science and policy graduate students.

CSP 290A - Coastal Science and Policy Capstone Project (10)

First of three independent research courses during which students work closely with partner institutions and faculty co-mentors to generate alternative, interdisciplinary-based solutions to coastal sustainability problems. Provides experience in a real-world, collaborative, problem-solving environment.

Prerequisite: Prerequisite(s): Concurrent enrollment in CSP 291. Enrollment restricted to coastal science and policy graduate students.

CSP 290B - Coastal Science and Policy Capstone Project (10)

Second of three independent research courses during which students work closely with partner institutions and faculty co-mentors to generate alternative, interdisciplinary-based

solutions to coastal sustainability problems. Provides experience in a real-world, collaborative, problem-solving environment.

Prerequisite: Prerequisite(s): Concurrent enrollment in CSP 291. Enrollment restricted to coastal science and policy graduate students.

CSP 290C - Coastal Science and Policy Capstone Project (10)

Third of three independent research courses during which students work closely with partner institutions and faculty co-mentors to generate alternative, interdisciplinary-based solutions to coastal sustainability problems. Provides experience in a real-world, collaborative, problem-solving environment.

Prerequisite: Prerequisite(s): Concurrent enrollment in CSP 291. Enrollment restricted to coastal science and policy graduate students.

CSP 291 - Coastal Science and Policy Capstone Seminar (2)

Concurrent with year-long capstone project. Students share the background, challenges and successes they experience in their capstone projects. Provides students with a broader exposure to real-world, collaborative, problem-solving of coastal sustainability issues.

Prerequisite: Corequisite(s): CSP 290A, CSP 290B, or CSP 290C. Enrollment is restricted to coastal science and policy graduate students.

DANM - DIGITAL ARTS AND NEW MEDIA

Upper-Division

DANM 130 - Embodiment in New Media Art (5)

Engages the topic of embodiment within new media art theory and practice. Focus is on embodiment within performance, time-based, electronic, and new media arts practice. Students produce a final paper and artistic project on the topic. Lower-division undergraduates may enroll with permission of instructor.

Prerequisite: Enrollment restricted to juniors and seniors.

DANM 132 - Literary Games: The Intersection of Writing and Play (5)

Hands-on course surveying the thriving micro-genres in the neutral zone between games and literature. Students read, play, and author stories that couldn't exist on a printed page. Interactive fiction, algorithmic poetry, and brand-new experiments. (Formerly: Games as Literature: The Intersection of Writing and Play)

DANM 133 - Introduction to Electronics and Physical Computing (5)

Introduces electronics using the open-source Arduino platform. Learn how to build interactive circuits through hands-on tutorials. In a workshop environment, students acquire the technical skills required to create electronic artwork. No previous experience required. Students are billed a materials fee. (Formerly course 33.)

DANM 134 - Hacking for Artists: Experimenting with Digital Media (5)

Hacking is the modification, reconfiguration, and reuse of computer code or hardware to create new functionality. Course encourages a hands-on approach to digital-media creation including the basics of computer programming and hacking techniques. No programming experience required. (Formerly course 31.)

DANM 135 - Kinematics: Motion and Machine Art (5)

Explores the history of machines. Kinetic art is presented including: animatronic puppetry, balance mobiles, light compositions, logic and mechanical art, interactive sculpture, and resonance cymatics. Students utilize automation techniques to create art projects using a modular set of gears, linkages, cams, belts, and springs. Discussion of technological advances in the field of kinetic art and its impact on society. Students are billed a materials fee.

DANM 136 - Mapmaking for Environmental Activism (5)

Introduces the basic principles of geographic analysis and visual communication through mapmaking. Projects focus on environmental issues, and class discusses best practices for distributing information and communicating ideas.

DANM 138 - Procession: Where Sculpture Meets Costumes Meets Performance (5)

Teaches techniques to animate sculptures, such as wearables/body art, mobility, puppetry, sound, light, or projection. Covers building techniques and how to incorporate individual creativity in a collaborative setting to create a common theme for the procession. Students are billed a materials fee.

DANM 140 - Introduction to 3D Printing, Laser Cutting, and More (5)

Learn to design functional objects, sculpture, and other digitally inspired forms in a variety of 3-D applications (Cinema 4-D, Maya, AutoCad, Rhino, SketchUp), then produce those models as physical objects with a variety of rapid prototyping methods including additive 3-D printing, CNC milling, vacuum forming, and laser cutting. Students are billed a course materials fee. (Formerly 3-D Alchemy: 3-D Design/Rapid Prototyping/3-D Printing/CNC Milling/Laser Cutting.)

DANM 141 - Introduction to Soft Interaction: Fiber Arts and Reactive Technologies (5)

Students learn to create interactive artwork through the combination of fiber arts and reactive technology. Course explores electronic art that is worn or touched, and discovers new developments in eTextiles that allow for this interaction. Students are billed a materials fee.

DANM 143 - Projects in Ecological Art (5)

By investigating topics related to water in California, students produce works of digital and new media art that engage with environmental issues and the local community.

DANM 199 - Tutorial (5)

Independent digital arts and new media research project under the guidance of a digital arts and new media faculty member or other faculty. Students submit petition to sponsoring agency. Enrollment restricted to juniors and seniors.

DANM 199F - Tutorial (2)

Independent digital arts and new media research project under the guidance of a digital arts and new media faculty member or other faculty. Students submit petition to sponsoring agency.

Graduate

DANM 201 - Recent Methods and Approaches to Digital Arts and Culture (5)

Students examine methods and approaches to research and writing in digital art and new media, while exploring key theories concerning technology, art, and culture. Focus is on the interaction between digital technologies and socio/cultural formations.

Prerequisite: Enrollment is restricted to graduate students.

DANM 202 - Dialogues and Questions in Digital Arts and Culture (5)

Students engage in dialogues at the intersection of theory and practice with the goal of producing a pre-thesis proposal and essay. Readings and seminar discussions inform the development of project proposals and essays, which theoretically contextualize students' work. (Formerly Digital Arts and New Media 203.)

Prerequisite: Enrollment is restricted to graduate students.

DANM 203 - Professional Development for the Arts (5)

A professional art practices practicum that focuses on researching opportunities and developing practical strategies and skills to ensure success outside an academic environment. (Formerly Frameworks and Arguments in Digital Arts and Culture.)

Prerequisite: Enrollment is restricted to graduate students.

DANM 210 - Project Design Studio (5)

Students work on the design of individual projects by developing project proposals, budgets, proof of concept design documents and/or prototypes and exploring tools, technologies, programming languages, hardware, software, and electronics techniques relevant to their projects.

Prerequisite: Enrollment is restricted to graduate students.

DANM 211 - Critique (5)

First-year digital arts and new media graduate students are required to present work-in-progress based on the projects developed in earlier courses and during the current quarter in individual studio critiques with the instructor as well as in group critiques.

Prerequisite: Enrollment is restricted to graduate students.

DANM 212 - Thesis Proposal (0)

First-year digital art and new media graduate students work on the development and completion of their thesis-project proposal and abstract under the supervision of the program chair and their thesis committees.

Prerequisite: Enrollment is restricted to DANM students.

DANM 215 - MFA Exhibition Production (5)

Second-year digital arts and new media graduate students work with faculty curator/coordinator to develop thesis projects specifically for the group exhibition context. Students contribute to exhibition design and collateral materials while studying the unique presentation and curatorial challenges of new media.

Prerequisite: Enrollment is restricted to graduate students.

DANM 216 - Digital Bodies (5)

Explores the appearance, form, and theoretical status of the human body/political subject in online art. Focuses on representations of race and gender, family resemblances, and local communities, as well as the political and colonial metaphors of spatial interaction operating on the World Wide Web. Visual representations of bodies that take the form of avatars, advertising, robots, and anime studied in their contextual usage.

Prerequisite: Enrollment is restricted to graduate students. Upper-division undergraduates may enroll with permission of instructor.

DANM 219 - Introduction to Electronics for Artmaking (5)

Intensive introduction to electronic devices used in artmaking, providing hands-on experience with sensors, motors, switches, gears, lights, simple circuits, microprocessors, and hardware storage devices to create kinetic and interactive works of art. Students are billed a materials fee.

Prerequisite: Enrollment is restricted to graduate students.

DANM 220 - Introduction to Programming for the Arts (5)

Covers aspects of computer programming necessary for digital art projects. Students learn to manipulate digital media using program control for installations, presentations, and the Internet. No prior programming experience required.

Prerequisite: Enrollment is restricted to graduate students.

DANM 221 - Mathematics and the Arts (5)

Examines the role of mathematics in the arts since the computer revolution with an emphasis on chaos, fractals, and symmetry. Covers abstract animation and algorithmic music, including the history of leading innovators and techniques from 1950 to the present. Student projects explore the creative process today using cutting-edge technologies.

Prerequisite: Enrollment is restricted to graduate students. Upper-division undergraduates may enroll with permission of instructor.

DANM 227 - Projected Light in Performance (5)

Exploration of projected light in performance and art. The history of lighting as art is covered in a hands-on demystifying format from the shadow of a bare light bulb to the latest in automated and projection equipment and techniques.

Prerequisite: Enrollment is restricted to graduate students. Juniors and seniors may enroll with permission of instructor.

DANM 233 - The Object as Interface (5)

Combination theory and studio-based exploration into the role of the object in real and virtual space. Provides a broad conceptual and theoretical examination of issues relating to object-making on a physical and dematerialized plane.

Prerequisite: Enrollment is restricted to graduate students.

DANM 241B - Modern Art: Cubism to Pop (5)

A history of the visual arts from the 1910s to the 1960s beginning in Europe and moving to the United States. Follows key movements of modern art while emphasizing the social, political, and philosophical events that inform it. Students cannot receive credit for this course and History of Arts and Visual Culture 141B.

Prerequisite: Enrollment is restricted to graduate students in digital arts new media, film, music, social documentation, theater, or visual studies.

DANM 250A - Collaborative Research Project Group: Art and Science (5)

Three-quarter, collaborative-research, project group encompasses a range of faculty-initiated projects that investigate new methods in art and science collaboration to solve real-world problems and produce outcomes of substantial artistic and scientific value. (Formerly Collaborative Research Project Group: Mechatronics.)

Prerequisite: Enrollment is restricted to graduate students.

DANM 250B - Collaborative Research Project Group: Socially Engaged Art (5)

Three-quarter, collaborative-research, project group encompasses a range of faculty-initiated projects that join digital methods with community-media activism to facilitate a culture of participation and social engagement. (Formerly Collaborative Research Project Group: Participatory Culture.)

Prerequisite: Enrollment is restricted to graduate students.

DANM 250C - Collaborative Research Project Group: Performance and Embodiment (5)

Three-quarter, collaborative-research, project group encompasses a range of faculty-initiated projects that investigate performance and embodied experience as profound sources of understanding and communication, pushing the limits of human identity, affect, empathy, and expression. (Formerly Collaborative Research Project Group: Performative Technologies.)

Prerequisite: Enrollment is restricted to graduate students.

DANM 250E - Collaborative Research Project Group: Experimental Play (5)

Three-quarter, collaborative-research, project group encompasses a range of faculty-initiated projects that investigate computer games and related forms to engage audiences, make arguments, tell stories, and shape social space through creation of new games and through reading and playing related works. (Formerly Games and Playable Media.)

Prerequisite: Enrollment is restricted to graduate students.

DANM 250F - Research Group: Isaac Julien Studio Lab (5)

Research group encompasses a range of faculty-initiated projects that investigate moving and still images to create visual and sonic languages for production, exhibition and installation.

Prerequisite: Enrollment is restricted to graduate students.

DANM 250G - Research Group: Isaac Julien Studio Lab - London Quarter (7)

Research group course taken by DANM students recruited to the Isaac Julien Lab, and focuses on production of Isaac Julien's and Mark Nash's research, in parallel with students working on their own projects to develop and prototype their thesis work. Course includes case studies, workshops, guest speakers, seminar discussions, and site visits in London. Outside of class students will work on their independent projects, as well as projects in the Isaac Julien Lab alongside lab staff. Enrollment is by permission and is restricted to digital arts and new media graduate students in the Isaac Julien lab; and other DANM graduate students in other project groups or programs upon application to the instructors.

DANM 254I - Empirical Approaches to Art Information (5)

Reading and practice in empirical methods, as applied to the study of music, visual art, multimedia production, and performance arts. Topics include semiotics, critiques of

empiricism, cultural determinants and contingents of perception, the psychophysics of information, sensory perception (visual and auditory), memory, pattern recognition, and awareness. Students apply existing knowledge in the cognitive sciences to a developing creative project, or develop and conduct new experiments.

Prerequisite: Enrollment is restricted to graduate students.

DANM 280 - Seminar in Digital Arts and New Media (2)

Weekly seminar covering topics of current research in digital arts and new media. Focuses on student presentations and seminar participation.

Prerequisite: Enrollment is restricted to graduate students.

DANM 281 - Special Topics in Digital Arts and New Media (5)

This hybrid theory/practice course examines the social implications of emerging technologies and cultural practices, with a focus on how artists and other producers engage with them in a critical manner that reveals their inner logics and/or deploys them for alternative purposes.

Prerequisite: Enrollment is restricted to graduate students; juniors and seniors may enroll by permission of the instructor.

DANM 297 - Independent Study (5)

Independent digital arts and new media research project under the guidance of a digital arts and new media faculty member or other faculty with approval of adviser. Project includes readings, research, and a written report. Students submit petition to sponsoring agency. Enrollment is restricted to graduate students. Maximum 10 credits.

DANM 297G - Independent Study (3)

Independent digital arts and new media research project under the guidance of a digital arts and new media faculty member or other faculty with approval of adviser. Students submit petition to sponsoring agency. Enrollment is restricted to graduate students. May be repeated for a maximum 6 credits.

DANM 299 - Thesis Research (5)

Students carry out a master's of fine arts thesis in digital arts and new media research, under the guidance of a thesis committee. The thesis will be an arts project with digital documentation accompanied by a written paper discussing the student's preparatory research as well as the theoretical significance of the project. Enrollment is restricted to graduate students. Maximum 10 credits.

EARTH - EARTH SCIENCES

Lower-Division

EART 1 - Oceanography (5)

An introduction to the physical environment of the ocean. Origin and evolution of ocean basins; sea-floor morphology; origin, distribution, historical record, and economic significance of marine sediments; ocean currents, waves, tides, and changing sea level; beaches, shorelines, and coastal processes; marine resources, pollution, and human impacts on the oceans. Students may also enroll in and receive credit for Ocean Sciences 1.

EART 2 - Earth Catastrophes (5)

The role of catastrophic processes in shaping Earth and the environment in which we live. The physical processes causing earthquakes, volcanic eruptions, tsunamis, floods, windstorms, landslides, and meteorite impacts will be described, along with the role played by these rapid processes in the geological and biological evolution of the planet. Interdisciplinary approaches to understanding these phenomena will be discussed. The entire time scale from formation of the universe to the present Earth system will be considered.

EART 3 - Geology of National Parks (5)

Geologic concepts and processes responsible for shaping our national parks including mountain building, volcanic and earthquake activity, sedimentation, weathering, erosion, and glaciation. An understanding of how geology impacts our lives is emphasized. Appropriate for both science and non-science majors who wish to enhance their knowledge, enjoyment, and appreciation of our national parks.

EART 5 - California Geology (5)

An introduction to physical geology emphasizing the minerals, rocks, volcanoes, mountains, faults, and earthquakes of California. In-class field trips to study the caves, rocks, and landforms of the campus and the Monterey Bay area. Discussion-1 hour. Concurrent enrollment in 5L is required for majors and minors.

EART 5L - California Geology Laboratory (1)

Laboratory sequence illustrating topics covered in course 5 with particular emphasis on rock and mineral identification and map interpretation. Field trip. Laboratory three hours. Students are billed a materials fee.

EART 7 - The History of Life (5)

An examination of the major events in the history of life, from the origin of life approximately four billion years ago, to the wave of extinctions that has decimated plants and animals around the globe over the past 30,000 years.

EART 8 - Planetary Discovery (5)

A sweeping tour of planets, satellites, and small bodies in and out of the solar system. Focuses on major scientific results from telescopes and spacecraft missions. Topics include planetary system architecture, planetary atmosphere, surface and interior, planetary formation and evolution, astrobiology, extra-solar planets. Open to all students.

EART 10 - Geologic Principles (5)

Introduction to the scientific study of Earth, the materials composing it, and the processes shaping it. Topics include minerals and rocks, Earth's internal structure, plate tectonics, earthquakes and volcanoes, oceans and the atmosphere, the formation of landscapes and global change. A one-day, optional field trip is included. Concurrent enrollment in 10L is required for majors and minors.

EART 10L - Geologic Principles Laboratory (1)

Laboratory sequence illustrating topics covered in course 10, with particular emphasis on rock and mineral identification and map interpretation. Laboratory 3 hours. In-lab field trips. Students are billed a materials fee.

EART 11 - Earthquakes (5)

Causes and effects of earthquakes. How do we measure, mitigate, and try to predict earthquakes? Plate motion, frictional faulting, earthquake triggering, wave propagation, earthquake damage, related hazards, and other social effects. Hazard reduction through earthquake forecasting and earthquake-resistant design. Class includes one full day weekend field trip to local faults. Advanced algebra and high school geometry recommended.

EART 12 - Introduction to Weather and Climate (5)

Many meteorological phenomena are familiar to us: clouds, fog, rain, snow, wind, lightning, and severe storms. Climate is the sum of weather over long periods and is changing (e.g., greenhouse warming, ozone depletion, urban smog) due to mankind's activities. Conceptual understanding of how and why the present-day atmosphere behaves as it does and how this may change in the future is the primary goal of this course.

EART 20 - Environmental Geology (5)

Introduction to aspects of geology which affect and are affected by humans. Addresses a broad range of topics including resource management, geologic hazards, air and water issues, population and land use, energy costs and effectiveness, and global change, all from a unique geological/environmental perspective. Lectures include strategies for mitigating these issues. Includes a one-day field trip. Concurrent enrollment in 20L required for majors and minors.

EART 20L - Environmental Geology Laboratory (1)

Laboratory sequence illustrating topics covered in course 20, with emphasis on rock and mineral identification, geologic hazard assessment, geologic resource management, and land

use planning. In-lab field trip. Laboratory 3 hours. Students are billed a materials fee.

EART 30 - Water in the Environment (5)

Broadly explores how components of the water cycle (precipitation, evapotranspiration, streamflow, groundwater) influence the structure of different environments as well as the communities, cultures, and people within these environments.

EART 66 - Natural History of Dinosaurs (5)

Explores the origin, evolution, and extinction of dinosaurs with emphasis on paleobiology and paleoecology. Covers fundamental paleontological and evolutionary principles, dinosaur anatomy and behavior, the hot-blooded/cold-blooded debate, dinosaur-bird relationships, diversity, and exploits of the great dinosaur hunters. One and a half hour of discussion each week. (Formerly EART 65.)

EART 96 - Academic Success Skills (2)

Practical, evidence-based strategies for maximizing learning in the Earth and planetary sciences. Introduces how learning occurs in the brain and how you can use those principles to optimize reading, note-taking, problem-solving, and studying. Enrollment is by permission of the instructor.

EART 98 - Earth Sciences Internship (5)

A supervised learning experience involving practical application of lower division Earth sciences knowledge while working with approved companies, governmental agencies, or research organizations. Students consult weekly with supervising faculty and prepare a final report of their work, to be evaluated both by the sponsoring agency and the faculty supervisor. Consult sponsoring agency for enrollment criteria; after instruction on resume preparation and interview skills, student must interview and be selected for internship by approved sponsoring organizations.

EART 99 - Tutorial (5)

Students submit petition to sponsoring agency.

Upper-Division

EART 100 - Vertebrate Paleontology (5)

Introduction to vertebrate history, with an emphasis on vertebrate relationships and the co-evolution of organisms and environments. Specific topics include vertebrate origins, systematics and classification, adaptive revolutions, mass extinctions, and the rise and fall of dinosaurs. Students are billed a materials fee.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and EART 5 or EART 10 or EART 20 or BIOE 20C, or ANTH 1. Concurrent enrollment in EART 100L is required.

EART 100L - Vertebrate Paleontology Laboratory (2)

Comparative anatomy and functional morphology of vertebrates, and preservation of vertebrate hard parts, using modern and fossil specimens. Laboratory three hours and one 1-day field trip.

Prerequisite: Concurrent enrollment in EART 100 is required.

EART 101 - Invertebrate Paleobiology (5)

An introduction to paleobiology; the use of fossil evidence to pose and solve evolutionary and geologic questions. Students are billed a materials fee. (Formerly The Fossil Record.)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and EART 5 or EART 10 or EART 20 or BIOE 20C or ANTH 1. Concurrent enrollment in EART 101L is required.

EART 101L - Invertebrate Paleobiology Laboratory (1)

Systematics, ecology, and evolutionary history of the major groups of fossil-forming animals. Laboratory 3 hours and one 1-day field trip. (Formerly The Fossil Record Laboratory.)

Prerequisite: Concurrent enrollment in EART 101 is required.

EART 102 - Marine Geology (5)

Geology of the marine environment. Topics include controls on the types, origin, and distribution of marine sediments; geology of oceanic crust; evolution of continental margins and plate boundaries; introduction to paleoceanography. Discussion: 1 hour. Students cannot receive credit for this course and Ocean Sciences 280.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and EART 5 or EART 10 or EART 20 or BIOE 20C.

EART 104 - Geologic Hazards (5)

The recognition, evaluation, and mitigation of geologic hazards: earthquakes and faulting, tsunamis, volcanism, landslides and mass movements, and flooding. Students are billed a materials fee.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and EART 10 and EART 10L; or EART 5 and 5L; or EART 20 and EART 20L.

EART 105 - Coastal Geology (5)

An investigation of the evolution, morphology, and processes in the coastal zone including the terrestrial (marine terraces, dunes, estuaries, sea cliffs) and marine (beaches, continental shelves, sea level changes, shoreline erosion and protection, waves, tides) components and their interaction. Laboratory: 3 hours. Students are billed a materials fee.

Prerequisite: Prerequisite(s): EART 5 or EART 10 or EART 20.

EART 106 - Coasts in Crisis (5)

Comprehensive assessment of the impacts that the human population is having on the coastal zone globally and the diverse ways in which geologic processes and coastal hazards impact human settlement and development in the coastal zone.

EART 107 - Remote Sensing of the Environment (5)

Introduction to geographic information systems (GIS) and remote sensing (RS) as valuable tools in the study of geology. Covers application of GIS/RS to study of surface processes, including landslides, hydrologic basins, coastal erosion, modern floods, volcanic activity and surface deformation.

Prerequisite: Prerequisite(s): EART 5 or EART 10 or EART 20.

EART 109 - Elements of Field Geology (5)

Basic tools and techniques used in geologic fieldwork. Preparation, analysis, and interpretation of geologic maps. Nine to 10 days of weekend field trips required, including a six-day geologic mapping exercise. Laboratory: 3 hours. Recommended for courses 120, 130, 150, and required for 188A-B. May not be taken concurrently with course 120, 150, or 188. Students are billed a materials fee. Enrollment is restricted to majors and minors in Earth and planetary sciences and the combined majors with anthropology and environmental studies.

Prerequisite: Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements, and EART 5 or EART 10 or EART 20; and EART 5L or EART 10L or EART 20L; or by permission of instructor. Concurrent enrollment in EART 109L is required.

EART 109L - Field Geology Laboratory (2)

Laboratory exercises essential to the successful completion of fieldwork required in course 109. Topics include topographic maps, Brunton compass, rock identification and description, geologic map analysis, structure section construction, and landslide recognition.

Prerequisite: Concurrent enrollment in EART 109 is required. Enrollment is restricted to Earth sciences majors and minors and the combined majors with anthropology and environmental studies or by permission of instructor.

EART 110A - Evolution of the Earth (5)

Investigation of the processes and mechanisms that have produced the present Earth system, with an emphasis on the temporal evolution of the earth from the Archean to the present. Specific topics covered include cyclicity in Earth processes and the evolution of, and interplay between the planet's crust, atmosphere, hydrosphere, and biosphere.

Prerequisite: Prerequisite(s): EART 5 or EART 10 or EART 20, and EART 5L or EART 10L or EART 20L, and MATH 11A or MATH 19A or AM 15A.

EART 110B - Earth as a Chemical System (5)

The chemical properties of Earth materials and the chemical processes by which the planet has evolved to its present state. Specific topics covered include properties of minerals; the genesis of igneous, metamorphic, and sedimentary rocks; and the linkage between the solid Earth and the hydrosphere. Enrollment is permitted by permission code with equivalent or exceptional background, or if enrolled concurrently in Chemistry 1B.

Prerequisite: Prerequisite(s): EART 5 or EART 10 or EART 20, and EART 5L or EART 10L or EART 20L, and CHEM 1B.

EART 110C - The Dynamic Earth (5)

Physical processes occurring in the interior of the earth, at its surface and in the oceans and atmospheres including plate tectonics, structural deformation of rocks, and material and heat transport. Students are billed a materials fee.

Prerequisite: Prerequisite(s): EART 5 or EART 10 or EART 20, and EART 5L or EART 10L or EART 20L; and EART 111 or MATH 22 or MATH 23A; and PHYS 6A or PHYS 5A.

EART 110L - Evolution of the Earth Laboratory (2)

Laboratory sequence illustrating topics covered in course 110A. Emphasis is on quantifying and evaluating different phenomena related to thermal, tectonic, climatic, and evolutionary processes.

Prerequisite: Prerequisite(s): concurrent enrollment in EART 110A.

EART 110M - Earth as a Chemical System Laboratory (2)

Laboratory sequence illustrating topics covered in course 110B. Emphasizes identification of the major rock-forming minerals and common rock types; principles of basic crystallography.

Prerequisite: Prerequisite(s): concurrent enrollment in EART 110B.

EART 110N - The Dynamic Earth Laboratory (2)

Laboratory sequence illustrating topics covered in course 110C.

Prerequisite: Prerequisite(s): concurrent enrollment in EART 110C.

EART 111 - Mathematics in the Earth Sciences (5)

Series and sequences, vectors, 3D analytic geometry, partial differentiation, matrix algebra, and differential equations with applications in the Earth sciences. Topics include matrix manipulation, systems of linear equations, least-squares, Taylor series, gradients, optimization, analytic and numerical solutions to differential equations.

Prerequisite: Prerequisite(s): EART 5 or EART 10 or EART 20, and MATH 11B or MATH 19B or AM 15B.

EART 116 - Hydrology (5)

Introduces processes involving water on and near Earth's surface, including meteorology, water properties, surface flows in streams and runoff, flood analysis, ground water, water budgets, sediment transport, erosion, and water quality. Problem set and laboratory each week. Laboratory/field: 3 hours. Students are billed a materials fee. Alternates annually with course 146. Enrollment is restricted to majors and minors in Earth and planetary sciences and the combined majors with anthropology and environmental studies.

Prerequisite: Prerequisite(s): EART 5 or EART 10 or EART 20; and MATH 11A or MATH 19A or AM 15A; and PHYS 6A and PHYS 6L or PHYS 5A and PHYS 5L, or by permission of the instructor. EART 5L or EART 10L or EART 20L and PHYS 6B and PHYS 6M are recommended.

EART 118 - Seismotectonics (5)

Earthquakes and their relationship to plate tectonics. Topics include seismological analysis of earthquake faulting, types of seismic waves, seismicity distributions, thermal and rheological structure of plates, and seismic investigation of plate dynamics.

Prerequisite: Prerequisite(s): EART 5 or EART 10 or EART 20; and MATH 11B or MATH 19B; and PHYS 5A or PHYS 6A.

EART 119 - Introductory Computer Programming for Geoscientists (5)

Introduction to programming for Earth and environmental scientists. Course assumes no prior programming experience. Develops useful Python skills for prospective scientists, rather than cover all aspects of the computer language.

Prerequisite: Prerequisite(s): MATH 19A or MATH 11A or MATH 20A and EART 5 or EART 10 or EART 20.

EART 120 - Sedimentology and Stratigraphy (5)

Stratigraphic principles used in classifying sedimentary rocks. Fundamentals of sedimentary mechanics. Analysis and interpretation of facies and depositional systems. Introduction to seismic facies and basin analysis. Course includes three Sunday field exercises. Students are billed a materials fee.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and EART 110A. EART 110B is recommended as preparation. May not be taken concurrently with EART 109.

EART 120L - Sedimentology and Stratigraphy Laboratory (2)

Laboratory sequence illustrating topics in course 120, including sedimentary petrology, sedimentary structures, sequence stratigraphy, and geohistory analysis.

Prerequisite: Prerequisite(s): concurrent enrollment in EART 120.

EART 121 - The Atmosphere (5)

Course focuses on understanding basic atmospheric weather and climate phenomena starting from the fundamentals of physics and chemistry. Using this approach, covers topics such as atmospheric circulation, precipitation, clouds, storms, urban and regional air quality, atmospheric aerosols, and climate and global change. Students are billed a materials fee.

Prerequisite: Prerequisite(s): MATH 11B or MATH 19B or AM 15B; and CHEM 1A; and PHYS 5B or PHYS 6B.

EART 124 - Modeling Earth's Climate (5)

A hands-on course in climate modeling with emphasis on computer programming (Python) exercises. Topics include the physical laws governing climate, the hierarchy of model complexity, parameterizations, using models for prediction versus understanding, and application to past and future Earth climates.

Prerequisite: Prerequisite(s): MATH 11B or MATH 19B and PHYS 6B or PHYS 5B. Enrollment is restricted to environmental sciences majors and Earth sciences majors.

EART 125 - Statistics and Data Analysis in the Geosciences (5)

Project-based introduction to analytical methods, such as univariate and multivariate statistics, cluster analysis and ordination, and maximum likelihood estimation, using a conceptual approach. Introduction to analysis and programming using the R software package. Students cannot receive credit for this course and course 225.

EART 127 - Measuring Earth's 4.5 Billion-Year History (5)

Introduces the methodology for measuring the timing of events in Earth's past. Topics include: radiogenic and stable isotopes, chemostratigraphy and paleomagnetism. Case studies focus on reconstructing the timing of major extinction and climatic events in Earth's history. (Formerly Radiogenic Isotopes.)

Prerequisite: Prerequisite(s): EART 110B.

EART 128 - Isotopes: Fundamentals and Applications in Earth and Marine Sciences (5)

Explores the fundamentals and concepts of stable, radiogenic, and cosmogenic isotope chemistry with applications relevant to Earth, marine, and biological sciences.

Prerequisite: Prerequisite(s): EART 110B or permission of instructor.

EART 129 - Global Change (5)

Covers the science of past and future climate change. Topics include: drivers of radiative forcing; carbon cycle; climate history of Earth; climate feedbacks; detection and attribution of climate change; climate change responses, impacts, adaptation, and mitigation.

Prerequisite: Prerequisite(s): MATH 11B and CHEM 1C. Enrollment is restricted to environmental sciences majors and Earth sciences majors.

EART 130 - Igneous and Metamorphic Petrology (5)

Introduction to the relationship between tectonic environments and the genesis of rock assemblages, primarily igneous and metamorphic. Examples from California and elsewhere are used to illustrate petrogenetic processes and characteristic petrologic features of rocks from all major tectonic settings.

Prerequisite: Prerequisite(s): EART 110B. Concurrent enrollment in EART 130L is required.

EART 130L - Igneous and Metamorphic Petrology Laboratory (2)

An introduction to optical mineralogy and the petrography of igneous rocks. (Formerly Magmas and Volcanos Laboratory.)

Prerequisite: Prerequisite(s): EART 110B. Concurrent enrollment in EART 130 is required.

EART 134 - Thermochemistry of Geologic Systems (5)

Introduction to the thermodynamic and kinetic principles with a strong emphasis on applications to Earth materials. Implications for phase equilibria, geothermometry/geobarometry, element partitioning, and physical properties of minerals, magmas, and solutions.

Prerequisite: Prerequisite(s): EART 110B.

EART 135L - Practical Geochemistry (5)

Provides hands-on exposure to geochemical instrumentation with a focus on data collection. Practical labs apply sample imaging, isotopic major- and trace-element measurements to natural samples. Laboratory sessions are supported by instruction, geochemistry, and Earth science.

Prerequisite: Prerequisite(s): EART 5, or EART 10, or EART 20. EART 110B is recommended. Enrollment is restricted to majors and minors in Earth sciences and the combined majors with anthropology and environmental studies.

EART 140 - Geomorphology (5)

An introduction to the evolution of the Earth's landscape, with emphasis on the processes responsible. Review of climatic and tectonic forcing followed by detailed discussion of weathering, glaciers, hillslopes, wind, rivers, and coastal processes with emphasis on their geographic distribution. One single day and one three-day field trip.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and EART 110A. Concurrent enrollment in EART 140L is required.

EART 140L - Geomorphology Laboratory (2)

Laboratory sequence illustrating topics covered in course 140. These extensive laboratory exercises emphasize the quantification of the geomorphic processes and forms, and on the writing of concise summaries of the science in the form of abstracts. Students are billed a materials fee.

Prerequisite: Prerequisite(s): Concurrent enrollment in EART 140 is required.

EART 142 - Engineering Geology for Environmental Scientists (5)

Introduction to the formation, composition, and classification of soils; the chemical interaction of soil and groundwater; and basic soil mechanics: stress-strain behavior, effective stress concept, consolidation, soil testing methods. Applications to problems including slope stability, landslides, liquefaction, subsidence, soil creep, debris flows. Laboratory: 3 hours. Students are billed a materials fee.

Prerequisite: Prerequisite(s): EART 5 or EART 10 or EART 20; and MATH 11A or MATH 19A or AM 15A.

EART 146 - Groundwater (5)

Explores saturated and unsaturated fluid flow below Earth's surface, well hydraulics, and resource evaluation and development. Introduces modeling, field techniques, geochemistry, and contaminant transport and remediation. Problem set and laboratory each week; final paper. Laboratory: 3 hours. Students are billed a materials fee. Alternates annually with course 116. Enrollment is restricted to majors and minors in Earth and planetary sciences and the combined majors with anthropology and environmental studies. Course 5L or 10L or 20L and Physics 6B/M are recommended as preparation

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and EART 5 or EART 10 or EART 20; and MATH 11A or MATH 19A or AM 15A; and PHYS 6A and PHYS 6L (PHYS 6B and PHYS 6M recommended); and CHEM 1A, or by permission of the instructor.

EART 148 - Glaciology (5)

Introduction to the role of snow and ice in the dynamics of the earth surface system. Snow deposition and metamorphosis. Heat and mass balance at snow and ice surfaces. Flow of glaciers, ice sheets, and sea ice. Methods of climate reconstruction. Ice age theories. Students are billed a materials fee.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and EART 5 or EART 10 or EART 20; and MATH 11A or MATH 19A or AM 15A.

EART 150 - Structural Geology (5)

Principles and methods of analysis of brittle and ductily deformed rocks. Includes descriptions of structures, field analysis of structures, and mechanics of deformation. Three day-long field trips on weekends. Students are billed a materials fee.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and EART 110A or EART 110B; EART 109 recommended; concurrent enrollment in EART 150L is required.

EART 150L - Structural Geology Laboratory (2)

Structural analysis of faults, folds, and maps. Use of stereographic projections. Cross section construction and balancing from field data.

Prerequisite: Concurrent enrollment in EART 150 is required.

EART 152 - Tectonics (5)

The processes, techniques, and interpretations involved in the study of active crustal movements; constraints from plate tectonics; horizontal and vertical motions and rates; geodesy, including GPS; stress measurement; image interpretation; fault system analysis; paleoseismicity; fluid effects. Examples from the circum-Pacific. Laboratory-3 hours. Students cannot receive credit for this course and course 207. Students are billed a materials fee.

Prerequisite: Prerequisite(s): EART 10 or EART 5 or EART 20; and EART 10L or EART 5L or EART 20L; and PHYS 5A or PHYS 6A or equivalent per instructor permission.

EART 160 - Planetary Science (5)

Broad introduction to planetary science. Topics include the fundamental characteristics of solar system bodies; space exploration of these bodies; formation and evolution of surfaces, atmospheres and interiors of planets, satellites and small bodies.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and MATH 11B or MATH 19B or AM 15B; and PHYS 5A or PHYS 6A.

EART 162 - Planetary Interiors (5)

The chemical and thermal structure and evolution of silicate planet interiors. Topics include equation of state of mantle and core materials, thermal history of the mantle and core, dynamics of mantle convection, geophysical determination of interior structure. Students cannot receive credit for this course and course 262.

Prerequisite: Prerequisite(s): EART 160; and EART 111 or MATH 22 or MATH 23A; and PHYS 5C or PHYS 6C.

EART 163 - Planetary Surfaces (5)

Comparative study of surfaces and atmospheres of planetary bodies in solar system, focusing on comparative planetology and geophysical processes at work, including differentiation, impact cratering, tectonics, volcanism, and geomorphic evolution. Explores terrestrial planets, giant planets and their moons. Students cannot receive credit for this course and course 263.

Prerequisite: Prerequisite(s): EART 160.

EART 164 - Planetary Atmospheres (5)

A quantitative study of the origin, chemistry, dynamics, and observations of the atmospheres of terrestrial and gas-giant planets. Students cannot receive credit for this course and course 264.

Prerequisite: Prerequisite(s): EART 160.

EART 165 - History and Geochemistry of the Solar System (5)

Introduces solar system history and geochemistry. Observation methods and tools discussed include major and trace element geochemistry, geothermometry, radiogenic and stable isotopes. Solar system reconstructed through the examination of meteorites from different parent bodies.

Prerequisite: Prerequisite(s): EART 110B.

EART 172 - Geophysical Fluid Dynamics (5)

Introduces fluid motion influenced by rotation. Topics include the Coriolis force, geostrophic flow, potential vorticity, the shallow water model, quasigeostrophic approximation, planetary waves, Ekman theory, thermal wind, models of the large-scale oceanic and atmospheric circulation, and equatorial dynamics. Taught in conjunction with course 272. Students cannot receive credit for this course and course 272.

Prerequisite: Prerequisite(s): PHYS 107 or AM 107; MATH 22 or MATH 23B recommended.

EART 188A - Summer Field Internship (5)

Three weeks of summer field study in geologically complex regions in the White-Inyo Mountains of eastern California. Activities include geologic field mapping on topographic and photographic base maps, stratigraphy, petrology, and structure analysis. A fee is required for participation. Contact sponsoring agency for details. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; courses 109/L, 110A/L, and 110B/M. Enrollment is restricted to Earth sciences majors. Concurrent enrollment in course 188B is required. Interview only via application filed with department.

EART 188B - Geographic Information Systems with Applications to the Earth Sciences (5)

Introduction to basic principles of geographic information systems (GIS). Visualization of earthscapes with applications to problem-solving in the Earth sciences. Laboratory exercises in loading, manipulation, and interpretation of data sets. Field investigations of phenomena visualized in laboratory, including geological description, interpretation, and written report preparation. Lecture and laboratory portions of course occur during spring quarter. Field investigations and report-writing occur in the summer following spring quarter. A fee is required for participation. Contact sponsoring agency for details. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; courses 109/L, 110A/L, and 110B/M. Enrollment is restricted to Earth sciences majors. Concurrent enrollment in course 188A is required. Interview only via application filed with department.

EART 189A - Geographic Information Systems with Applications in Earth Sciences (5)

Introduces Geographic Information Systems (GIS) for geologic mapping and interpretation. Students gain experience with satellite, air photo, and digital elevation model (DEM) interpretation, and research the geology, tectonics,

paleontology, and stratigraphy for field sites in eastern California. Prerequisite(s): courses 109, 109L, 110A, and 110. Enrollment is restricted to Earth sciences majors, and combined Earth sciences/environmental studies majors. Enrollment via an application.

EART 189B - Summer Field Study (5)

Students spend three weeks in this field course on advanced geologic mapping acquiring and analyzing original data and then another 11 days refining their interpretations. Emphasis is on geologic mapping, stratigraphy, structure and tectonic analysis, and petrology. Students are billed a fee. Prerequisite(s): courses 109, 109L, 110A, 110L, 110B, 110M, and 189A and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to Earth sciences and combined Earth sciences/environmental studies majors. Enrollment via an application.

EART 190 - Earth Sciences Mentorship (1)

Faculty research activity, analytic facilities, and career counseling in three separate Earth sciences laboratories are offered with varied formats including field trips, discussions, and equipment demonstrations. Three different faculty participate in each offering.

Prerequisite: Enrollment is restricted to Earth sciences, Earth sciences/anthropology, and environmental studies/Earth sciences majors.

EART 191A - Climate Change Science and Policy (5)

Explores the scientific basis of current and pending climate change, and the state of climate policy issues in California, the nation, and the world. Work includes foundational lectures on both public policy and climate science; additional guest lectures from policy makers, politicians, and scientists. Students are introduced to and become familiar with addressing climate-change issues from both policy and scientific perspectives; research papers and public presentations are required activities.

Prerequisite: Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior majors in Earth sciences and the combined major with anthropology.

EART 191B - Planetary Capstone (5)

Examines a crosscutting topic in planetary sciences (e.g., volcanism) to satisfy the senior capstone requirement. Students are assessed on the basis of an oral presentation and a written report in which a synthetic review is present.

Prerequisite: Prerequisite(s): EART 160, and EART 111 or MATH 22. Enrollment is restricted to seniors and graduate students.

EART 191C - Practical Geophysics (5)

Hands-on practice analyzing real-life observational data including earthquake catalogs, seismograms, gravity, and GPS data. Emphasis on data collection, and access and manipulation skills. Introduction to MATLAB programming

included. Students cannot receive credit for this course and course 266.

Prerequisite: Prerequisite(s): EART 110C.

EART 194F - Education Capstone (2)

Students write a paper on a lesson plan developed after their CalTeach internship courses. This independent study is supervised by Earth and planetary sciences faculty or ocean sciences faculty, as well as a member of the CalTeach staff or Education Department.

Prerequisite: Prerequisite(s): EDUC 185C and EDUC 185L. Enrollment is restricted to Earth and planetary sciences majors with a concentration in science education.

EART 195 - Senior Thesis (5)

Students submit petition to sponsoring agency. Enrollment is restricted to seniors. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

EART 196B - Tutoring Earth Sciences in the University (5)

Students facilitate laboratory and field exercises in conjunction with faculty and teaching assistants in various Earth sciences courses. May not count toward upper-division major requirements. Approval of sponsoring agency; interview, and selection by primary instructor of specific courses required. (Formerly Teaching Earth Sciences in the University.)

EART 196C - Tutoring Earth Sciences in the University (2)

Students facilitate laboratory and field exercises in conjunction with faculty and teaching assistants in various Earth sciences courses. May not count toward upper-division major requirements. Approval of sponsoring agency; interview, and selection by primary instructor of specific courses required. Enrollment restricted to Earth sciences, Earth sciences/anthropology, and environmental studies/Earth sciences majors.(Formerly Teaching Earth Sciences in the University.)

EART 198 - Earth Sciences Internship (5)

A supervised learning experience involving practical application of Earth sciences through working with approved companies, governmental agencies, or research organizations. Students consult weekly with supervising faculty and prepare a final report of their work. Consult sponsoring agency for enrollment criteria. After instruction on resume preparation and interview skills, students must interview and be selected for internship by approved sponsoring organizations. Enrollment is restricted to Earth sciences, Earth sciences/anthropology, and environmental studies/Earth sciences majors.

EART 198F - Earth Sciences Internship (2)

A supervised learning experience involving practical application of Earth sciences through working with approved companies, governmental agencies, or research organizations. Students consult weekly with supervising faculty and prepare

a final report of their work. May not be counted toward upper-division major requirements. Consult sponsoring agency for enrollment criteria. After instruction on resume preparation and interview skills, student must interview and be selected for internship by approved sponsoring organizations. Enrollment is restricted to Earth sciences, Earth sciences/anthropology, and environmental studies/Earth sciences majors.

EART 199 - Tutorial (5)

Introduction to research in laboratory, field, or theoretical subjects as an independent study. Students submit petition to sponsoring agency.

EART 199F - Tutorial (2)

Introduction to research in laboratory, field, or theoretical subjects as an independent study. May not be counted toward upper-division major requirements. Students submit petition to sponsoring agency.

Graduate

EART 203 - Introductory Teaching Seminar (1)

Intended for new Earth sciences graduate students. Focus on preparation, assessment, and feedback. Classroom techniques, organizational and time management strategies, practice teaching sessions specific to laboratory and/or science instruction. Required follow-up meetings to discuss practical teaching experience.

Prerequisite: Enrollment is restricted to graduate students.

EART 204 - Earth and Planetary Sciences Foundations (5)

Provides a comprehensive overview of key concepts, dominant paradigms, and research frontiers in Earth and planetary sciences in plenary talks by multiple faculty. Provides a required foundation course for all incoming students pursuing graduate degrees in Earth and planetary sciences. Students are billed a materials fee.

Prerequisite: Enrollment is restricted to Earth sciences graduate students.

EART 206 - Great Papers in the Earth Sciences (5)

Exposure to the most important ideas in the Earth sciences through exploration of the primary literature. Seminal papers in different subdisciplines of the Earth sciences are read and analyzed to provide breadth and improve students' ability to think critically.

Prerequisite: Enrollment is restricted to Earth sciences graduate students.

EART 207 - Tectonics (5)

An overview of tectonic theory and processes for application to the Earth sciences. The course explores the primary tools of tectonic interpretation including plate kinematics, rheology, plate boundary dynamics, and the behavior of active fault

systems. Taught in conjunction with course 152. Students cannot receive credit for this course and course 152.

Prerequisite: Prerequisite(s): graduate standing or permission of instructor.

EART 208 - Methods in Paleoclimatology (5)

Addresses methods used to reconstruct aspects of paleoclimates and paleoenvironments from the geologic record, focusing primarily on terrestrial records. Topics to be covered include dendrochronology and dendroclimatology, paleopalynology, paleobotany, ice cores, and paleosol studies. Lectures, discussions, and laboratory work.

Prerequisite: Enrollment is restricted to graduate students.

EART 220 - Ground Water Modeling (5)

Introduction to building and using models to solve hydrogeologic problems. Modeling methods include mainly analytical and finite-difference. Emphasis on using models rather than the details of their functioning, although some coding is required. Comfort with mathematical methods and computers expected. Course designed for graduate students, but available to qualified Earth science majors.

Prerequisite: Prerequisite(s): graduate standing or permission of instructor required. One year of calculus and courses in differential equations and basic hydrologic principles are recommended as preparation.

EART 225 - Statistics and Data Analysis in the Geosciences (5)

Using a conceptual approach, this course is a project-based introduction to analytical methods, such as univariate and multivariate statistics, cluster analysis and ordination, and maximum likelihood estimation. Introduces analysis and programming using the R software package. Students cannot receive credit for this course and course 125.

Prerequisite: Enrollment is restricted to graduate students.

EART 227 - Measuring Earth's 4.5 Billion Year History (5)

Introduces the methodology for measuring the timing of events in Earth's past. Topics include: radiogenic and stable isotopes chemostratigraphy and paleomagnetism. Case studies focus on reconstructing the timing of major extinction and climatic events in Earth's history. Students cannot receive credit for this course and course 127.

Prerequisite: Enrollment is restricted to graduate students.

EART 229 - Isotopic Methods in Environmental Science (5)

Explores how natural variations in stable isotope ratios answer questions in ecology, paleobiology, and other environmental sciences. Format includes lectures by the instructor and student presentations on applications following literature-based research on each topic.

Prerequisite: Enrollment is restricted to graduate students.

EART 240 - Communicating Science (3)

Introduces inquiry-based instructional strategies for communicating a passion for science. These strategies, combined with content knowledge and enthusiasm for sharing it, equips college students to introduce science to K-8 students and teachers in local schools.

Prerequisite: Enrollment is restricted to graduate students.

EART 254 - The Climate System (5)

Focuses on atmospheric and oceanic processes that are important within the Earth's climate system, especially those that operate on annual to centennial time scales. Format includes lectures by the instructors, paper readings, and discussion.

Prerequisite: Enrollment is restricted to graduate students.

EART 258 - Deep Time Paleoclimates (5)

Weekly lectures/readings/presentations focused on the key events in the long-term evolution of Earth's climate (i.e., before the Pliocene), including early Archean, faint, young-sun period; Proterozoic snowballs; Paleozoic glaciations and greenhouse events; the mid-Cretaceous oceanic anoxic events (OAEs); and Paleogene thermal maxima and glacial intervals. Considerable emphasis on evaluating the proxies of climate and mechanisms of climate change (e.g., greenhouse gasses, paleogeography).

Prerequisite: Enrollment is restricted to graduate students.

EART 262 - Planetary Interiors (5)

The chemical and thermal structure and evolution of silicate planet interiors. Topics include equation of state of mantle and core materials, thermal history of the mantle and core, dynamics of mantle convection, geophysical determination of interior structure. Students cannot receive credit for this course and course 162.

Prerequisite: Enrollment is restricted to graduate students.

EART 263 - Planetary Surfaces (5)

Comparative study of surfaces of planetary bodies in our solar system, focusing on comparative planetology and geophysical processes at work, including differentiation; on-impact cratering; tectonics; volcanism and geomorphic evolution; and exobiology. Explores terrestrial planets, giant planets and their moons, and trans-Neptunian objects, focusing on modern exploration. Students cannot receive credit for this course and course 163.

Prerequisite: Enrollment is restricted to graduate students.

EART 264 - Planetary Atmospheres (5)

Quantitative study of the origin, chemistry, dynamics, and observations of the atmospheres of terrestrial and gas giant planets. Students cannot receive credit for this course and course 164.

Prerequisite: Enrollment is restricted to graduate students.

EART 265 - Order of Magnitude Estimation (5)

Practice in making rough estimates and leading-order approximations in physical and chemical processes.

Prerequisite: Enrollment is restricted to graduate students.

EART 266 - Geologic Signal Processing and Inverse Theory (5)

Theoretical and practical aspects of digital signal analysis including data sampling, spectral estimation, digital filtering, statistical estimation, correlation tools, and principle-component analysis. Emphasis on practical examples of geophysical time series. Multivariable calculus and linear algebra are required and used extensively in the course. Taught in conjunction with course 191C. Students cannot receive credit for this course and course 191C.

Prerequisite: Enrollment is restricted to graduate students.

EART 270 - Global Seismology (5)

Introduction to quantitative earthquake and global Earth structure seismology. Topics include basic elasticity, wave characteristics, seismic ray theory, wave reflection, surface waves, normal modes, seismic instrumentation, application of seismic waves to reveal Earth structure and resulting models, representation of earthquake sources such as explosions and faulting, earthquake rupture scaling, modern methods of modeling seismic recordings to study source complexity, and an introduction to seismotectonics. Laboratory: 3 hours.

Prerequisite: Enrollment is restricted to graduate students.

EART 271 - Current Research Topics in Deep Earth Processes (5)

Students and instructor lead discussions of recent and significant publications in geophysics and chemistry of deep Earth. Articles structured around current theme of interest are selected by participants and approved by instructor. Emphasis on defining multidisciplinary significance of each article and its relationship to fundamental processes in deep Earth, including core and mantle. Designed for graduate students but available to qualified Earth sciences majors.

EART 272 - Geophysical Fluid Dynamics (5)

Introduces fluid motion influenced by rotation. Topics include the Coriolis force, geostrophic flow, potential vorticity, the shallow water model, quasigeostrophic approximation, planetary waves, Ekman theory, thermal wind, models of the large-scale oceanic and atmospheric circulation, and equatorial dynamics. Students cannot receive credit for this course and course 172.

Prerequisite: PHYS 227 is recommended as preparation. Enrollment is restricted to graduate students.

EART 273 - Earthquake Physics (5)

Why do earthquakes happen? Topics include friction, fracture, earthquake triggering, stress in the crust, observed source scalings, and seismicity statistics. Emphasis on observations

and current research topics. (Formerly course 290J, Topics in Earthquake Physics.)

Prerequisite: Enrollment is restricted to graduate students and advanced undergraduates.

EART 278A - Advanced Seismology (5)

Elastic wave propagation. Advanced topics in ray theory, WKBJ solutions in seismology, singularities and nonlinearities, surface wave theory, propagating matrices, normal modes, and inversion theory. Selected topics in time series analysis and seismic signal processing, seismic wave dispersion.

Prerequisite: Course is designed for graduate students but available to qualified Earth sciences majors. PHYS 110B and PHYS 114B are recommended as preparation. Enrollment is restricted to graduate students.

EART 280D - Short Course in Atmospheric/Climate Science (3)

Addresses specialized topics in atmospheric and/or climate science that are too narrow for a full (5-credit) format. Examples include: cloud physics; atmospheric boundary layer; aerosol physics and chemistry; atmospheric radiation; atmospheric thermodynamics.

Prerequisite: Enrollment is restricted to graduate students.

EART 290B - Topics in Glaciology (5)

Advanced review of the physics and chemistry of ice and snow. Mass and heat balance of ice masses. Motion of glaciers and ice sheets. Subglacial and englacial hydrology. Thermodynamics of ice masses and the linkage to climate.

Prerequisite: Enrollment is restricted to graduate students.

EART 290C - Topics in Geophysics (5)

Different problems and approaches will be stressed from year to year such as geotectonics, paleomagnetism, or properties and processes in the mantle and core.

Prerequisite: Enrollment is restricted to graduate students; qualified Earth sciences majors by permission of instructor.

EART 290D - Petrology and Plate Tectonics (5)

Selected topics illustrating relationships between igneous and metamorphic rocks and plate tectonics are explored in detail. Designed for graduate students but available to qualified Earth sciences majors.

EART 290E - Topics in Planetary Science (5)

We examine one well-defined topic in planetary science, beginning with a summary of current knowledge and concluding with the latest research literature. Topics will vary from year to year and may include planetary collisions, terrestrial planets, origin of planetary systems, small bodies, the New Mars, and satellites of Jupiter. Achievement will be evaluated based on class participation, exams, and a research project.

Prerequisite: Open to undergraduate majors with permission of instructor. Enrollment is restricted to graduate students.

EART 290F - Topics in Coastal Processes (2)

Instructor and students lead discussions and make presentations on current research, problems, and publications in coastal processes. These topics include littoral drift, sediment transport and storage on the inner shelf, shoreline erosion/change and its documentation, and related issues.

Prerequisite: Enrollment is restricted to graduate students.

EART 290G - Topics in Global Tectonics (5)

Explores different problems of special interest in global tectonics with the approach of integrating marine and terrestrial geologic and geophysical information. Course designed for graduate students but available to qualified Earth sciences majors.

EART 290H - Topics in Hydrogeology (5)

Selected topics in groundwater, hydrothermal systems, and related subjects. Discussion of theoretical models, field and laboratory approaches, and recent research. Topics vary from year to year. Course designed for graduate students but available to qualified Earth sciences majors.

EART 290I - Topics in Geomorphology (5)

Discussion of journal articles focused on a theme in contemporary geomorphology. Topics include: coupling of climate; tectonics and landscape evolution; mechanics of bedrock river channels; fundamentals of fluvial gravel transport; and inference of tectonic rates and processes from analysis of topography.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll by permission of instructor.

EART 290K - Paleontology Seminar (3)

Seminar discussion based on current readings in the literature around some topic in the history and evolution of life.

Prerequisite: Course designed for graduate students but available to qualified upper-division science students.

EART 290L - Topics in Climate Change (5)

Explores current issues and recent developments in the field of past, present, and future climate change. Topic is different each year, but focuses on the interaction between different components of Earth's environment and the effect of that interaction on climate change. Designed for graduate students but open to qualified undergraduates.

Prerequisite: Enrollment is restricted to graduate students.

EART 290M - Topics in Atmospheric Science (5)

Selected topics encompassing atmospheric physics and chemistry. Topics vary from year to year. Sample topics include: atmospheric physics, atmospheric chemistry, boundary layer meteorology, aerosol science, and atmospheric

thermodynamics. (Formerly Topics in Atmospheric Chemistry.)

Prerequisite: Designed for graduate students, but qualified undergraduates may enroll with permission of instructor.

EART 290N - Topics in Mineral Physics (5)

Selected topics encompassing the physics and chemistry of Earth's interior, planetary physics, high-pressure experimental geophysics and material properties at high pressure and temperature. Topics vary from year to year.

Prerequisite: Enrollment is restricted to graduate students and qualified Earth sciences majors by permission of instructor.

EART 290O - Topics in Hydrology (5)

Selected topics in watershed hydrology and related subjects. Discussion journal articles focused on fundamental concepts, scientific breakthroughs, and innovative methods. Topics include: water storage, runoff generation and thresholds, hydrologic connectivity, and ecohydrology.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of the instructor.

EART 290P - Interdisciplinary Topics in the Earth Sciences (5)

An understanding of the chemical and physical properties and processes in the earth is sought by integrating information from several subdisciplines in the Earth sciences. Topics vary from year to year, focusing on areas of active research. Course designed for graduate student but available to qualified Earth sciences majors.

Prerequisite: Prerequisite(s): graduate standing or permission of instructor. Course is designed for graduate student but available to qualified Earth sciences majors.

EART 290Q - Topics in Outer Solar System (5)

Exploration of the planets and satellites beyond the asteroid belt, with an emphasis on the underlying physical processes at work. Course includes lectures, computer practicals, and student presentations.

Prerequisite: Enrollment is restricted to graduate students.

EART 290R - Topics in the Chemistry and Physics of the Earth (5)

Explores problems and current research developments in the application of physics and chemistry to planetary interiors. Topics differ from year to year and include, but are not limited to, research related to the accretion, differentiation, evolution, and structure of the terrestrial planets. Course is designed for graduate students but available to qualified Earth sciences majors.

EART 290T - Current Research Topics in Paleoceanography and Paleoclimatology (5)

Students and instructor lead discussions of recent and significant problems in paleoceanography and

paleoclimatology. Articles structured around current themes of interest are selected by the instructor. Emphasis on major climatic transitions or events which noticeably influenced evolution of biota. Course is designed for graduate students but available to qualified Earth sciences majors.

EART 290U - Topics in Thermochronology (5)

Surveys the use of thermochronometry to quantify the rates of tectonic processes. Topics include heat conduction and diffusion; radioactive decay; analytical methods; and modeling of thermochronologic data. Seminars review seminal papers from the literature.

Prerequisite: Enrollment is restricted to graduate students.

EART 290X - Topics in Modeling Planetary Interiors (5)

Introduces computer modeling of thermal convection in planetary interiors. Students learn to write and run a basic computer code using spectral and finite-difference methods, then are shown how to improve the numerical method and physics. Basic computer programming experience is required (for example, in Fortran, C, IDL, or MATLAB).

Prerequisite: Course is designed for and enrollment restricted to graduate students, but available to qualified science majors.

EART 292 - Seminar (0)

Weekly seminar attended by faculty, graduate students, and upper-division undergraduate students.

EART 293 - Graduate Research Seminar (1)

Weekly seminar series covering a broad spectrum of topics in the Earth sciences. Graduate students give 15- to 20-minute oral presentations on current or anticipated research.

Prerequisite: Enrollment is restricted to graduate students.

EART 296 - Special Student Seminar (5)

Permission of instructor required.

EART 297A - Independent Study (5)

Permission of instructor required.

EART 297B - Independent Study (10)

Permission of instructor required.

EART 297C - Independent Study (15)

Permission of instructor required.

EART 298 - Earth Sciences Internship (5)

A supervised learning experience involving practical, graduate-level application of Earth sciences through working with approved companies, governmental agencies, or research organizations. Students consult weekly with supervising faculty and prepare a final report of their work. Consult sponsoring agency for enrollment criteria. After instruction on resume preparation and interview skills, students must interview and be selected for internship by approved sponsoring organizations.

EART 299A - Thesis Research (5)

Permission of instructor required.

EART 299B - Thesis Research (10)

Permission of instructor required.

EART 299C - Thesis Research (15)

Permission of instructor required.

ECE - ELECTRICAL AND COMPUTER ENGINEERING

Lower-Division

ECE 1 - Hands-On Computer Engineering (2)

Hands-on introduction to computer engineering practice and research, including computer hardware, robotics, and embedded systems. Encourages interaction with UCSC's School of Engineering community. Designed for students without previous background in computer engineering. (Formerly Computer Engineering 1.)

Prerequisite: Enrollment restricted to first-year students and sophomores.

ECE 8 - Robot Automation: Intelligence through Feedback Control (5)

Introduction to dynamical systems, feedback control, and robotics. Fundamental concepts in dynamical systems, modeling, stability analysis, robustness to uncertainty, feedback as it occurs naturally, and the design of feedback-control laws to engineer desirable static and dynamic response. Course includes an introduction to MATLAB and programming in MATLAB. Students are billed a materials fee. (Formerly CMPE 8.)

Prerequisite: Priority enrollment restricted to first-year students and sophomores.

ECE 9 - Introduction to Statics, Dynamics, and Biomechanics (5)

Theory and application of statics and mechanics of materials for mechanical and biomechanical systems. Covers statics of particles; equilibrium of rigid bodies; free-body diagrams; analysis of structure; friction; concepts of stress and strain; axial loading; torsion and bending; and failure criteria. (Formerly CMPE 9.)

Prerequisite: Prerequisite(s): MATH 19A; and PHYS 5A and PHYS 5L or PHYS 6A and PHYS 6L; and AM 10 or MATH 21.

ECE 10 - Fundamentals of Robot Kinematics and Dynamics (5)

Covers the theory and application of mathematical models to analyze the kinematics and dynamics of robot mechanisms or their components using vector algebra, differential equations, and computer simulations; also covers robot vehicle kinematics, robot arm kinematics, and robot dynamics with computational examples and problems. Some basic programming skills and familiarity with MATLAB are expected. (Formerly CMPE 10.)

Prerequisite: Prerequisite(s): ECE 9, and AM 20 or MATH 24.

ECE 11 - 3D Prototyping (5)

Introduces the basics of rapid prototyping for robotics design from limiting stresses to optimal design. Discusses fast prototyping methods, advantages, and disadvantages. Introduces CAD, CAD packages, 3D printing with different materials, and 3D scanning. (Formerly CMPE 11.)

Prerequisite: Prerequisite(s): previous or concurrent enrollment in ECE 9.

ECE 80E - Engineering Ethics (5)

Ethical theories, analysis, and their application to issues in the practice of engineering, such as safety and liability, professional responsibility to clients and employers, codes of ethics, legal obligations, environmental issues, and social issues. Emphasis on developing independent ethical analysis through the use of case studies. (Formerly CMPE 80E.)

ECE 80J - Renewable Energy Sources, Storage, and Smart Grids (5)

Introduces energy sources and storage with special emphasis on renewables as part of smart grids. Fundamental energy-conversion limits based on physics and existing source properties are studied. Various sources, such as solar, wind, hydropower, geothermal, tidal energy, and fuel cells are described. Electric vehicles, sustainable microgrids, and the integration to smart grids are studied. Finally, smart meters, demand response, the energy market, and policy are covered. Students cannot receive credit for this course and course 81J. (Formerly EE 80J.)

ECE 80S - Sustainability Engineering and Practice (5)

Topical introduction to principles and practices of sustainability engineering and ecological design with emphasis on implementation in society. Provides an understanding of basic scientific, engineering, and social principles in the design, deployment, and operation of resource-based human systems, and how they can be maintained for this and future generations. No specialized background in engineering, science, or social sciences is assumed. (Formerly EE 80S.)

ECE 80T - Modern Electronic Technology and How It Works (5)

Basic knowledge of electricity and how things work, how technology evolves, its impact on society and history, and

basic technical literacy for the non-specialist. Broad overview of professional aspects of engineering and introduction and overview of basic systems and components. Topics include electrical power, radio, television, radar, computers, robots, telecommunications, and the Internet. (Formerly EE 80T.)

ECE 94 - Group Tutorial (5)

A means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

ECE 94F - Group Tutorial (2)

A means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

ECE 99 - Tutorial (5)

Students submit petition to sponsoring agency.

ECE 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

ECE 101 - Introduction to Electronic Circuits (5)

Introduction to the physical basis and mathematical models of electrical components and circuits. Topics include circuit theorems (Thevenin and Norton Equivalents, Superposition), constant and sinusoidal inputs, natural and forced response of linear circuits. Introduction to circuit/network design, maximum power transfer, analog filters, and circuit analysis using Matlab. Topics in elementary electronics including amplifiers and feedback. (Formerly EE 101.)

Prerequisite: Prerequisite(s): PHYS 5C and PHYS 5N; or PHYS 6C and PHYS 6N; and MATH 24 or previous or concurrent enrollment in AM 20. Concurrent enrollment in ECE 101L is required.

ECE 101L - Introduction to Electronic Circuits Laboratory (2)

Illustrates topics covered in course 101. One two-hour laboratory session per week. Students are billed for a materials fee. (Formerly EE 101L.)

Prerequisite: Prerequisite(s): PHYS 5C and PHYS 5N or PHYS 6C and PHYS 6N; and MATH 24 or previous or concurrent enrollment in AM 20. Concurrent enrollment in ECE 101 is required.

ECE 102 - Properties of Materials (5)

The fundamental electrical, optical, and magnetic properties of materials, with emphasis on metals and semiconductors: chemical bonds, crystal structures, elementary quantum mechanics, energy bands. Electrical and thermal conduction. Optical and magnetic properties. (Formerly EE 145.)

Prerequisite: Prerequisite(s): PHYS 5A and PHYS 5L, PHYS 5B and PHYS 5M, and PHYS 5C and 5N; or PHYS 6A and

PHYS 6L, PHYS 6B and PHYS 6M, and PHYS 6C and PHYS 6N. Concurrent enrollment in ECE 102L is required.

ECE 102L - Properties of Materials Laboratory (2)

Laboratory sequence illustrating topics covered in course 145. One two-hour laboratory per week. Students are billed a materials fee. (Formerly EE 145L.)

Prerequisite: Prerequisite(s): PHYS 5A and PHYS 5L, PHYS 5B and PHYS 5M, and PHYS 5C and 5N; or PHYS 6A and PHYS 6L, PHYS 6B and PHYS 6M, and PHYS 6C and PHYS 6N. Concurrent enrollment in ECE 102 is required.

ECE 103 - Signals and Systems (5)

Course covers the following topics: characterization and analysis of continuous-time signals and linear systems, time domain analysis using convolution, frequency domain analysis using the Fourier series and the Fourier transform, the Laplace transform, transfer functions and block diagrams, continuous-time filters, sampling of continuous time signals, examples of applications to communications and control systems. (Formerly EE 103.)

Prerequisite: Prerequisite(s): ECE 101 and ECE 101L; and AM 20 or MATH 24.

ECE 103L - Signals and Systems Laboratory (2)

Use and operation of spectrum analyzers; advanced signal analysis using oscilloscopes; measuring impulse response, step response, frequency response, and computer analysis of real signals. MATLAB programming is taught and used as a tool for signal analysis. Students are billed a materials fee. (Formerly EE 103L.)

Prerequisite: Prerequisite(s): ECE 101 and ECE 101L and AM 20. Concurrent enrollment in ECE 103 is required.

ECE 104 - Bioelectronics (5)

Covers selected case studies in interfacing electronic devices with biological systems. from Galvani to neuronal stimulation and electroceuticals. These studies include: the squid giant axon, the pace maker, deep brain stimulation, organic bioelectronics, bionanoelectronics and optogenetics, bioenergetics, and bioprotonics electroceuticals. Students are assessed through weekly student papers on case studies and through a final presentation. (Formerly EE 104.)

Prerequisite: Enrollment is restricted to juniors, seniors, and graduate students.

ECE 115 - Introduction to Solid Mechanics (5)

Introduces the solid mechanics of materials. Topics include: stress and strain, torsion, bending of beams, shearing stresses in beams, compound stresses, principal stresses, deflections of beams, and statically indeterminate members and columns. (Formerly CMPE 115.)

Prerequisite: Prerequisite(s): ECE 9 and MATH 19B, and AM 10 or MATH 21.

ECE 118 - Introduction to Mechatronics (5)

Technologies involved in mechatronics (intelligent electro-mechanical systems) and techniques necessary to integrate these technologies into mechatronic systems. Topics include electronics (A/D, D/A converters, opamps, filters, power devices), software program design (event-driven programming, state machine-based design), DC and stepper motors, basic sensing, and basic mechanical design (machine elements and mechanical CAD). Combines lab component of structured assignments with a large and open-ended team project. Cannot receive credit for this course and course 218. (Formerly CMPE 118.)

Prerequisite: Prerequisite(s): ECE 101 and ECE 101L and CSE 12 and CSE 12L and CSE 100 and CSE 100L.

Concurrent enrollment in ECE 118L is required.

ECE 118L - Introduction to Mechatronics Laboratory (2)

Laboratory sequence illustrating topics covered in course 118. Two 2-hour laboratory sessions per week. Students cannot receive credit for this course and course 218L. Students are billed a materials fee. (Formerly CMPE 118L.)

Prerequisite: Prerequisite(s): Concurrent enrollment in ECE 118 is required.

ECE 121 - Microcontroller System Design (7)

Focus is on the design and use of microcontroller-based systems. Covers microprocessor and microcontroller architecture, programming techniques, bus and memory organization, DMA, timing issues, interrupts, peripheral devices, serial and parallel communication, and interfacing to analog and digital systems. Enrollment is restricted to electrical engineering and robotics majors during first-pass enrollment and then open to all majors. Students are billed a materials fee.

Prerequisite: Prerequisites: CSE 12 and CSE 12L, CSE 13E. Corequisite(s): ECE 101 and ECE 101L.

ECE 122A - Collaborative Sustainability Project Design (5)

This course is the first quarter of a three quarter series of courses that together comprise the IDEASS Program (Impact Designs: Engineering and Sustainability through Student Service), which provides students with opportunities to plan, implement, and evaluate interdisciplinary sustainable design projects in the built environment for the Monterey Bay Region. In fall quarter students are introduced to project topics and background information. In collaboration with an outside mentor project teams design, revise, and complete a project plan including project goals and deliverables, timeline of key activities and major milestones, stakeholder map, evaluation plan, and budget (as applicable). Students apply online; selected applicants complete in-person interviews. (Formerly EE 122A.)

ECE 122B - Collaborative Sustainability Project Implementation (5)

The second of a three-quarter sequence that together comprise the IDEASS Program (Impact Designs: Engineering and

Sustainability through Student Service) which provides opportunities for students to plan, implement, and evaluate interdisciplinary sustainable-design projects in the built environment for the Monterey Bay Region. In winter quarter, project teams work collaboratively to implement the project plans approved during the fall quarter. Students participate in a weekly seminary series that includes guest lectures and field trips as well as workshops in project management, public speaking, writing skills, and other professional development. Prerequisite(s): course 122A. Students apply online; selected applicants complete in-person interviews. Enrollment is restricted to juniors and seniors. (Formerly EE 122B.)

ECE 122C - Collaborative Sustainability Project Implementation (5)

The third of a three-quarter sequence that together comprise the IDEASS Program (Impact Designs: Engineering and Sustainability through Student Service) which provides opportunities for students to plan, implement, and evaluate interdisciplinary sustainable-design projects in the built environment for the Monterey Bay Region. In spring quarter, project teams work collaboratively to continue implementation of project plans approved during the fall quarter, then evaluate projects impacts. Students participate in a weekly seminary series that includes guest lectures and field trips as well as workshops in project management, public speaking, writing skills, and other professional development. Students also work in the community on educational public outreach regarding project impacts. Prerequisite(s): course 122A. Students apply online; selected applicants complete in-person interviews. Enrollment is restricted to juniors and seniors. (Formerly EE 122C.)

ECE 129A - Capstone Project I (5)

First of a three-course sequence in which students apply knowledge and skills gained in elective track to complete a major design project. In this first course, students complete the specification and planning for a substantial project. Topics covered: engineering design cycle, engineering teams, and professional practices. (Formerly EE 129A.)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and CSE 100; enrollment restricted to senior Electrical Engineering and Robotics Engineering majors. Electrical Engineering majors must complete ECE 171 and previous or concurrent enrollment in ECE 157 or ECE 118 or CSE 121. Robotics Engineering majors must complete ECE 118 and CSE 121.

ECE 129B - Capstone Project II (5)

Second of a three-course sequence in which students apply knowledge and skills gained in elective track to complete a major design project. In this second course, students complete the training, research, and procurement for a substantial project and a preliminary implementation. Students are billed a materials fee. (Formerly EE 129B.)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and ECE 129A. Enrollment is restricted to seniors.

ECE 129C - Capstone Project III (5)

Third of a three-course sequence in which students apply knowledge and skills gained in this elective track to complete a major design project. In this third course, students work in teams to complete the project specified and advance on the results of the work in the first two courses. A formal written report, oral presentation, and demonstration of the successful project to a review panel of engineering faculty is required. Students are billed a materials fee. (Formerly EE 129C.)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and ECE 129B. Enrollment is restricted to seniors.

ECE 130 - Introduction to Optoelectronics and Photonics (5)

Introduction to optics, photonics and optoelectronics, fiber optic devices and communication systems: Topics include: ray optics, electromagnetic optics, resonator optics, interaction between photons and atoms, dielectric waveguides and fibers, semiconductor light sources and detectors, modulators, amplifiers, switches, and optical fiber communication systems. Taught in conjunction with course 230. Students cannot receive credit for this course and course 230. (Formerly EE 130.)

Prerequisite: Prerequisite(s): Physics 5B and 5C, or Physics 6B and 6C; concurrent enrollment in course 130L.

ECE 130L - Introduction to Optoelectronics Laboratory (1)

Includes a series of projects to provide hands-on experience needed for basic concepts and laboratory techniques of optical fiber technology. Students are billed a materials fee. (Formerly EE 130L.)

Prerequisite: Prerequisite(s): PHYS 5L, PHYS 5M, and PHYS 5N, or PHYS 6L, PHYS 6M, and PHYS 6N; concurrent enrollment in ECE 130.

ECE 135 - Electromagnetic Fields and Waves (5)

Vector analysis. Electrostatic fields. Magnetostatic fields. Time-varying fields and Maxwell's equations. Plane waves. (Formerly EE 135.)

Prerequisite: Prerequisite(s): ECE 101 and ECE 101L; MATH 23B; and MATH 24 or AM 20. Students must concurrently enroll in ECE 135L.

ECE 135L - Electromagnetic Fields and Waves Laboratory (2)

Laboratory sequence illustrating topics in course 135. One two-hour laboratory session per week. Students are billed a materials fee. (Formerly EE 135L.)

Prerequisite: Prerequisite(s): ECE 101 and ECE 101L; MATH 23B; and MATH 24 or AM 20. Students must concurrently enroll in ECE 135.

ECE 136 - Engineering Electromagnetics (5)

Course will cover electromagnetic wave propagation, transmission lines, waveguides, and antennas. (Formerly EE 136.)

Prerequisite: Prerequisite(s): ECE 135 and ECE 135L. Enrollment is restricted to School of Engineering and Division of Physical and Biological Sciences majors or permission of instructor.

ECE 141 - Feedback Control Systems (5)

Analysis and design of continuous linear feedback control systems. Essential principles and advantages of feedback. Design by root locus, frequency response, and state space methods and comparisons of these techniques. Applications. (Formerly CMPE 141 and EE 153.)

Prerequisite: Prerequisite(s): ECE 103. Enrollment is restricted to School of Engineering and Division of Physical and Biological Sciences majors, or by permission of instructor.

ECE 145 - Estimation and Introduction to Control of Stochastic Processes (5)

Provides practical knowledge of Kalman filtering and introduces control theory for stochastic processes. Selected topics include: state-space modeling; discrete- and continuous-time Kalman filter; smoothing; and applications in feedback control. Students learn through hands-on experience. Students cannot receive credit for this course and course 245. Enrollment by permission of instructor. (Formerly CMPE 145.)

ECE 149 - Introduction to Cyber-physical Systems (5)

Presents the basic concepts and tools for the study of cyber-physical systems, including modeling and analysis tools for continuous-time and discrete-time systems, finite state machines, stateflow, timed and hybrid automata, concurrency, invariants, linear temporal logic, verification, and numerical simulation. Students are guided on methods for simulation and encouraged to apply them to several applications. The course is self-contained. Students are expected to have a basic background in logic circuits, programming, the mathematical modeling of dynamical systems (course 8 is recommended), differential equations, linear algebra, and basic calculus. Knowledge of MATLAB/Simulink is useful. Students cannot receive credit for this course and course 249. (Formerly CMPE 149.)

Prerequisite: Prerequisite(s): ECE 100 and ECE 100L or equivalent, and CSE 13E or equivalent.

ECE 151 - Communications Systems (5)

An introduction to communication systems. Analysis and design of communication systems based on radio, transmission lines, and fiber optics. Topics include fundamentals of analog and digital signal transmission in the context of baseband communications, including concepts such as modulation and demodulation techniques, multiplexing and multiple access, channel loss, distortion, bandwidth, signal-to-noise ratios and error control. Digital communication concepts include an introduction to sampling and quantization, transmission coding and error control. (Formerly EE 151.)

Prerequisite: Prerequisite(s): ECE 103, ECE 101, and ECE 101L; and CSE 107 or STAT 131 or probability theory and random variables background. Enrollment is restricted to School of Engineering and Physical and Biological Sciences majors.

ECE 152 - Introduction to Wireless Communications (5)

Introduction to the principles of wireless communications systems. Wireless propagation channels and their impact on digital communications. Modulation techniques for wireless systems and their performance. Multi-antenna systems and diversity. Multicarrier and spread spectrum. Multi-access methods: FDMA, TDMA, CDMA. The structure of cellular systems. Students cannot receive credit for this course and course 252. (Formerly EE 152.)

Prerequisite: Prerequisite(s): CSE 107 and ECE 151, or by consent of instructor. Enrollment is restricted to juniors and seniors.

ECE 153 - Digital Signal Processing (5)

Introduction to the principles of signal processing, including discrete-time signals and systems, the z-transform, sampling of continuous-time signals, transform analysis of linear time-invariant systems, structures for discrete-time systems, the discrete Fourier transform, computation of the discrete Fourier transform, and filter design techniques. Taught in conjunction with Electrical Engineering 250. Students cannot receive credit for this course and Electrical Engineering 250. (Formerly EE 153 and CMPE 153.)

Prerequisite: Prerequisite(s): ECE 103. Enrollment is restricted to School of Engineering and Division of Physical and Biological Sciences majors or permission of instructor.

ECE 157 - RF Hardware Design (5)

Engineering design cycle for wireless and RF systems: design, practical hardware implementation, and prototype. (Formerly EE 157.)

Prerequisite: Prerequisite(s): ECE 101 and ECE 101L, ECE 103, and ECE 171, and ECE 174; or consent of instructor. Concurrent enrollment in ECE 157L is required.

ECE 157L - RF Hardware Design Laboratory (2)

Laboratory to accompany course 157, emphasizing hardware-design practice and principles applies to RF apparatus. Students design and implement a substantial final project during the last half of the course. Students are billed a materials fee. (Formerly EE 157L.)

Prerequisite: Prerequisite(s): ECE 101 and ECE 101L, ECE 103, and ECE 171, and ECE 174; or consent of instructor. Concurrent enrollment in ECE 157 is required.

ECE 167 - Sensing and Sensor Technologies (5)

Introduces fundamental issues in sensing of temperature, motion, sound, light, position, etc. Sensors are integrated into a digital system using filtering, amplification, and analog-to-digital conversion. Advanced topics may include noise,

temperature, and other sources of variability. (Formerly CMPE 167.)

Prerequisite: Prerequisite(s): CSE 13E and ECE 103 and ECE 103L. Concurrent enrollment in ECE 167L is required.

ECE 167L - Sensing and Sensor Technologies Lab (2)

Introduces fundamental issues in sensing of temperature, motion, sound, light, position, etc. Sensors are integrated into a digital system using filtering, amplification, and analog-to-digital conversion. Advanced topics may include noise, temperature, and other sources of variability. (Formerly CMPE 167L.)

Prerequisite: Prerequisite(s): CSE 13E and ECE 103 and ECE 103L. Concurrent enrollment in ECE 167 is required.

ECE 171 - Analog Electronics (5)

Introduction to (semiconductor) electronic devices. Conduction of electric currents in semiconductors, the semiconductor p-n junction, the transistor. Analysis and synthesis of linear and nonlinear electronic circuits containing diodes and transistors. Biasing, small signal models, frequency response, and feedback. Operational amplifiers and integrated circuits. (Formerly EE 171.)

Prerequisite: Prerequisite(s): ECE 101 and ECE 101L; previous or concurrent enrollment in ECE 171L is required.

ECE 171L - Analog Electronics Laboratory (2)

Laboratory sequence illustrating topics covered in course 171. One two-hour laboratory session per week. Students are billed a materials fee. (Formerly EE 171L.)

Prerequisite: Prerequisite(s): ECE 101 and ECE 101L; previous or concurrent enrollment in ECE 171 is required.

ECE 172 - Advanced Analog Circuits (5)

Analog circuit design covering the basic amplifier configurations, current mirrors, differential amplifiers, frequency response, feedback amplifiers, noise, bandgap references, one- and two-stage operational amplifier design, feedback amplifier stability, switched capacitor circuits and optionally the fundamentals of digital-to-analog and analog-to-digital converters. Emphasis throughout will be on the development of approximate and intuitive methods for understanding and designing circuits. Cannot receive credit for this course and course 221. (Formerly EE 172.)

Prerequisite: Prerequisite(s): ECE 171.

ECE 173 - High-Speed Digital Design (5)

Studies of analog circuit principles relevant to high-speed digital design: signal propagation, crosstalk, and electromagnetic interference. Topics include electrical characteristics of digital circuits, interfacing different logic families, measurement techniques, transmission lines, ground planes and grounding, terminations, power systems, connectors/ribbon cables, clock distribution, shielding, electromagnetic compatibility and noise suppression, and bus architectures. (Formerly EE 173.)

Prerequisite: Prerequisite(s): ECE 101 and ECE 101L and ECE174. Previous or concurrent enrollment in ECE 173L is required. ECE 171 and CSE 121 recommended..

ECE 173L - High-Speed Digital Design Laboratory (2)

Laboratory sequence illustrating topics covered in course 173. One two-hour laboratory session per week. Students are billed a materials fee. (Formerly EE 173L.)

Prerequisite: Prerequisite(s): ECE 101, ECE 101L and ECE 174. Previous or concurrent enrollment in ECE 173 is required. ECE 171 and CSE 121 are recommended.

ECE 174 - Introduction to EDA Tools for PCB Design (3)

Focus on EDA tools for design of printed-circuit boards. Elements of design flow covered: schematic capture and simulation to final PCB layout. Final project is required. Students are billed a materials fee.

Prerequisite: Prerequisite(s): ECE 101 and ECE 101L or consent of instructor.

ECE 175 - Energy Generation and Control (5)

Introduces electrical energy generation, sensing, and control, emphasizing the emerging smart grid. Topics include 3-phase AC power systems, voltage and transient stability, fault analysis, grid protection, power-flow analysis, economic dispatch, and high voltage DC distribution (HVDC). (Formerly EE 175.)

Prerequisite: Prerequisite(s): ECE 101. Concurrent enrollment in ECE 175L is required.

ECE 175L - Energy Generation and Control Laboratory (2)

Computer analysis and simulation of energy generation, components, power-flow analysis, systems, and control covering topics from course 195. Weekly computer simulations reinforce the concepts introduced in course 175. (Formerly EE 175L.)

Prerequisite: Prerequisite(s): ECE 101. Concurrent enrollment in ECE 175 is required.

ECE 176 - Energy Conservation and Control (5)

AC/DC electric-machine drives for speed/position control. Integrated discussion of electric machines, power electronics, and control systems. Computer simulations. Applications in electric transportation, hybrid-car technology, robotics, process control, and energy conservation. (Formerly EE 176.)

Prerequisite: Prerequisite(s): ECE 103 and ECE 171. Concurrent enrollment in ECE 176L is required.

ECE 176L - Energy Conversion and Control Laboratory (2)

Simulink-based simulations of electric machines/drives in applications such as energy conservation and motion control in robotics and electric vehicles. (Formerly EE 176L.)

Prerequisite: Prerequisite(s): ECE 103 and ECE 171. Concurrent enrollment in course 176 is required.

ECE 177 - Power Electronics (5)

Switch-mode power converter design and analysis. Non-switching power supplies. Electronic power-factor correction. Soft switching. Power-semiconductor devices. Use in energy conservation, renewable energy, lighting, and power transmission. (Formerly EE 177.)

Prerequisite: Prerequisite(s): ECE 103. Concurrent enrollment in ECE 177L is required.

ECE 177L - Power Electronics Laboratory (2)

Buck, boost, buck-boost, flyback, and forward converter design and control. Students are billed a materials fee. (Formerly EE 177L.)

Prerequisite: Prerequisite(s): ECE 103. Concurrent enrollment in ECE 177 is required.

ECE 178 - Device Electronics (5)

This course reviews the fundamental principles, device's materials, and design and introduces the operation of several semiconductor devices. Topics include the motion of charge carriers in solids, equilibrium statistics, the electronic structure of solids, doping, the pn junction, the junction transistor, the Schottky diode, the field-effect transistor, the light-emitting diode, and the photodiode. (Formerly EE 178.)

Prerequisite: Prerequisite(s): ECE 102 and ECE 102L and ECE 171 and ECE 171L. Enrollment is restricted to School of Engineering and Division of Physical and Biological Sciences majors or permission of instructor.

ECE 180J - Advanced Renewable Energy Sources, Storage, and Smart Grids (5)

Provides a comprehensive overview of renewable energy, storage, and smart grids. Fundamental energy-conversion limits based on physics and existing material properties are discussed. Various sources and facilities, such as solar, wind, hydropower, geothermal, tidal energy, and fuel cells are described. Solar- and wind-site assessment, electric vehicles, as well as sustainable microgrids are also discussed. Finally, the latest research on smart grids and smart cities is introduced. Taught in conjunction with course 80J. (Formerly EE 180J.)

Prerequisite: Prerequisite(s): MATH 3 or AM 3 or AM 5 or AM 7.

ECE 181J - Renewable Energy Sources in Practice (7)

Provides a fundamental understanding of renewable energies in practice by experiencing them in a functional context. Students visit and evaluate renewable-energy facilities, such as wind power, solar energy, hydrogen storage, biofuel production, waste-water testing facilities, biomass, biodiesel, and biogas. This intensive one-month program allows students to carry out applied research in a real-life, industrial-scale, renewable-energy context. Prerequisite(s): course 80J or equivalent. Enrollment restricted to junior, senior, and graduate students and by permission of instructor. (Formerly EE 181J.)

ECE 183 - Special Topics in Electrical Engineering (5)

Topics vary with instructor. Sample topics include smart grids, bioelectronics, antennas, etc. Enrollment by instructor permission. Approval of undergraduate adviser required for credit as an upper-division elective. (Formerly EE 183.)

ECE 193 - Field Study (5)

Provides for individual programs of study with specific academic objectives carried out under the direction of a faculty member of the electrical engineering program and a willing sponsor at the field site and using resources not normally available on campus. Credit is based on the presentation of evidence of achieving the objectives by submitting a written and oral presentation. May not normally be repeated for credit.

ECE 193F - Field Study (2)

Provides for individual programs of study with specific academic objectives carried out under the direction of a faculty member of the electrical engineering program and a willing sponsor at the field site and using resources not normally available on campus. Credit is based on the presentation of evidence of achieving the objectives by submitting a written and oral presentation. May not normally be repeated for credit.

ECE 195 - Senior Thesis Research (5)

Individual directed study for upper-division undergraduates. Students submit petition to sponsoring agency. If using this course to replace the capstone design requirement (courses 129A,B,C), students must take course 129A, and take course 115 or 157 or Computer Engineering 118 to fulfill the ABET team design experience. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

ECE 195F - Senior Thesis Research (2)

Prerequisite(s): petition on file with sponsoring agency. Students submit petition to sponsoring agency.

ECE 198 - Individual Study or Research (5)

Provides for department-sponsored individual study program off campus, for which faculty supervision is not in person, but by correspondence. Students submit petition to sponsoring agency.

ECE 198F - Independent Field Study (2)

Provides for department-sponsored individual study program off campus for which faculty supervision is not in person, but by correspondence. Students submit petition to sponsoring agency.

ECE 199 - Tutorial (5)

Individual directed study for upper-division undergraduates. Students submit petition to sponsoring agency.

ECE 199F - Tutorial (2)

Individual directed study for upper-division undergraduates. Students submit petition to sponsoring agency.

Graduate

ECE 200 - Research and Teaching in Electrical Engineering (3)

Basic teaching techniques for TAs: responsibilities and rights, resource materials, computer security, leading discussion or lab sessions, presentations techniques, maintaining class records, electronic handling of homework, and grading. Examines research and professional training: use of library and online databases, technical typesetting, writing journal and conference papers, publishing, giving talks, and ethical issues. (Formerly EE 200.)

Prerequisite: Enrollment is restricted to graduate students.

ECE 201 - Introduction to Nanotechnology (5)

Introduction to underlying principles of nanoscience and nanotechnology. Intended for multidisciplinary audience with a variety of backgrounds. Introduces scientific principles and laws relevant on the nanoscale. Discusses applications in engineering, physics, chemistry, and biology. (Formerly EE 211.)

Prerequisite: Prerequisite(s): ECE 102 or consent of instructor.

ECE 203 - Nanocharacterization of Materials (5)

Covers the many characterization techniques used to characterize materials from volumes less than one cubic micrometer, including the basic physics of each method, the methodology used to get quantitative results, and the advantages and limitations of each technique. (Formerly EE 213.)

Prerequisite: Enrollment restricted to graduate students, or to undergraduates majoring in engineering or science by permission of instructor.

ECE 204 - Bioelectronics (5)

Covers selected case studies in interfacing electronic devices with biological systems from Galvani to neuronal stimulation and electroceuticals. Studies include: the squid giant axon, the pacemaker, deep-brain stimulation, organic bioelectronics, bionanoelectronics and optogenetics, bioenergetics, and bioprotonics electroceuticals. Students are assessed through weekly papers on case studies and through a final presentation. (Formerly EE 204.)

Prerequisite: Enrollment is restricted to graduate students.

ECE 205 - Fundamentals of Nanoelectronics (5)

Covers microscopic theory of electron transport in nanoelectronic devices and transistors. Topics include: ballistic transport; quantum conductance, NEGF-Landauer formalisms; molecular conductors; graphene and carbon

nanotubes, quantum resonant tunneling devices; nanotransistors; and spintronics. (Formerly EE 218.)

Prerequisite: Prerequisite(s): ECE 201 or ECE 207. Enrollment is restricted to graduate students. Students with background in basic matrix algebra and MATLAB programming may enroll with permission of instructor.

ECE 207 - Nanomaterials and Nanometer-Scale Devices (5)

Materials controlled at nanometer-scale will revolutionize existing technologies. Course offers opportunities of learning materials that exhibit peculiar physical characteristics at the nanometer scales. Course also includes discussions of unique device architecture based on materials crafted at the nanometer scale. (Formerly EE 216.)

ECE 215 - Models of Robotic Manipulation (5)

Theory and application of mathematical models to analyze, design, and program serial kinematic chains (robot arms). Covers models of arbitrary articulated robotic or biological arms and their application to realistic arms and tasks, including the homogeneous coordinate model of positioning tasks; the forward and inverse kinematic models; the Jacobian matrix; trajectory generation; and dynamic models, including Newton-Euler and Lagrangian formulations. (Formerly CMPE 215.)

Prerequisite: Enrollment is restricted to graduate students; and to seniors who have taken ECE 141, and AM 10 or MATH 21; or by permission of instructor.

ECE 216 - Bio-Inspired Locomotion (5)

Presents the principles of biological locomotion and application to robotics problems. Students learn about effective movements in the biological world (slithering, walking, climbing, and flying); extract their underlying principles; and apply them creatively to robotics design. (Formerly CMPE 216.)

Prerequisite: Prerequisite(s): ECE 9 or equivalent. Enrollment is restricted to graduate students, and seniors by permission of instructor.

ECE 218 - Mechatronics (5)

Introduction to intelligent electro-mechanical systems, combining aspects of computer, electrical, mechanical, and software engineering. Students become proficient in all aspects of mechanical, electrical, computer system design, analysis, prototyping, presentation and team mentorship. Cannot receive credit for this course and course 118. (Formerly CMPE 218.)

Prerequisite: Prerequisite(s): concurrent enrollment in ECE 218L. Enrollment is restricted to graduate students.

ECE 218L - Mechatronics Lab (2)

Laboratory sequence illustrating topics covered in course 218. Two 2-hour laboratory sessions per week. Students cannot receive credit for this course and course 118L. Students are billed a materials fee. (Formerly CMPE 218L.)

Prerequisite: Prerequisite(s): concurrent enrollment in ECE 218. Enrollment is restricted to graduate students.

ECE 221 - Advanced Analog Integrated Circuits (5)

Analog integrated circuit design with emphasis on fundamentals of designing linear circuits using CMOS. Covers MOS devices and device modeling, current mirrors, op-amp design, op-amp compensation, comparators, multipliers, voltage references, sample-and-holds, noise, and an introduction to more complicated systems using these building blocks, such as phase locked loops and analog-to-digital converters. If time permits, integrated circuit layout issues and device/circuit fabrication. Students cannot receive credit for this course and course 172. (Formerly EE 221.)

Prerequisite: Prerequisite(s): course ECE 171 or equivalent; ECE 178 or equivalent recommended.

ECE 222 - High-Speed Low-Power Integrated Circuit Design (5)

Digital integrated circuit design covered with an emphasis on high-speed and low-power applications. Covers signaling techniques and circuits including transmitters and receivers, with emphasis on on-chip interconnect, timing fundamentals and timing circuits. Theoretical fundamentals of phase locked loops and design issues of implementation addressed. Course has a project design component. Interview to assess technical skills of student. Enrollment is restricted to electrical engineering and computer engineering graduate students. (Formerly EE 222.)

ECE 223 - Advanced Solid-State Devices (5)

Solid-state devices advance rapidly by employing new materials, new architecture, and new functional principles. Class offers opportunities to learn the latest advancements in solid-state devices (e.g., electronic, optoelectronic, photonic devices, and smart sensors) viewed from various scientific, technological, and engineering aspects, such as energy conversion and computation. (Formerly EE 223.)

ECE 224 - Device Electronics (5)

Reviews the fundamentals of semiconductors and then explores the structure, design, and operation of the most important and widely used semiconductor devices. Topics include the motion of charge carriers in solids, equilibrium statistics, the electronic structure of solids, doping, the pn junction, the junction transistor, the Schottky diode, field-effect transistor, the light-emitting diode, and the photodiode.

Prerequisite: Enrollment is restricted to graduate students.

ECE 225 - Semiconductor Processing and Bandgap Engineering (5)

Addresses principles of semiconductor processing with applications for semiconductor materials engineering, research, and development. The materials fabrication and processing topics include preparation of silicon, III-V compounds, and dielectric thin films, including thin film deposition techniques, diffusion, ion implantation, and standard device fabrication sequences. Applications of these

processing principles for semiconductor materials engineering and bandgap engineering in semiconductor heterostructures are discussed for devices, such as LEDs, lasers, photoreceptors, modulators, and high-speed transistors.

Prerequisite: Enrollment is restricted to graduate students.

ECE 226 - CMOS Radio Frequency Integrated Circuit Design (5)

Covers narrowband and high-frequency techniques, noise, distortion, nonlinearities, low-noise amplifiers, power amplifiers, mixers, receivers, and transmitters for wireless communications. Topics are presented in the context of integrated designs in CMOS, but topics are fundamental and widely applicable. (Formerly EE 226.)

Prerequisite: Prerequisite(s): ECE 172 or ECE 221 or permission of instructor.

ECE 227 - Fundamentals of Semiconductor Physics (5)

Semiconductor physics is examined for advanced new materials and devices. Discusses how familiar concepts are extended to new electronics. Intended for students interested in electrical engineering, physics, and materials science applications. Good familiarity with basic electromagnetism and quantum physics is assumed. (Formerly EE 227.)

Prerequisite: Enrollment is restricted to graduate students.

ECE 228 - Engineering of Thin Film Deposition (5)

Covers key processes to build a coherent picture of the deposition of thin films. Offers an opportunity to implement general computing resources in describing the formation of thin films. The deposition of thin films plays a key role in technology due to their unprecedented physical properties. Their deposition depends on such factors as thermodynamics in the deposition environment and kinetics on the solid surfaces where atoms are assembled; therefore, understanding the fundamental processes involved is important. (Formerly EE 217.)

Prerequisite: Students should have a background in solid-state materials that is equivalent to ECE 102. Enrollment is restricted to graduate students.

ECE 229 - Quantum Electronics (5)

Covers basic theory of interaction of electromagnetic radiation with resonant atomic transitions and density matrix treatment; and applications including Rabi oscillations, slow light; nonlinear optics; coherent radiation, and noise in photodetectors and lasers. (Formerly EE 232.)

Prerequisite: Prerequisite(s): ECE 231 or equivalent.

ECE 230 - Optical Fiber Communication (5)

Components and system design of optical fiber communication. Topics include step-index fibers, graded-index fibers, fiber modes, single-mode fibers, multimode fibers, dispersion, loss mechanics, fiber fabrication, light-emission processes in semiconductors, light-emitting diodes, laser diodes, modulation response, source-fiber coupling,

photodetectors, receivers, receiver noise and sensitivity, system design, power budget and rise-time budget, fiber-optic networks (FDDI, SONET, etc.), wavelength division multiplexing (WDM). Students cannot receive credit for this course and course 130. (Formerly EE 230.)

Prerequisite: Enrollment is restricted to graduate students.

ECE 231 - Optical Electronics (5)

Introduction to phenomena, devices, and applications of optoelectronics. Main emphasis is on optical properties of semiconductors and semiconductor lasers. (Formerly EE 231.)

Prerequisite: Prerequisite(s): ECE 102 and ECE 102L.

ECE 232 - Integrated Biophotonics (5)

Covers use of integrated optics for study of biological material; fluorescence spectroscopy, single molecule detection, optical tweezers, layered dielectric media, hollow-core waveguides, photonic crystals, optofluidics, biophotonic systems, and applications. (Formerly EE 236.)

Prerequisite: Prerequisite(s): ECE 233 or equivalent. Enrollment is restricted to graduate students.

ECE 236 - Optics and Microscopy (5)

Covers the basic principles of optics and microscopy. Topics include geometrical optics, simple ray tracing, diffraction, Fourier optics, image formation in the human eye, the photographic camera, and different types of microscopes. Hands-on experience is provided in laboratories. Requires basic mathematics. (Formerly EE 266.)

Prerequisite: Enrollment is restricted to graduate students. Undergraduate students may enroll with permission of the instructor.

ECE 237 - Image Processing and Reconstruction (5)

Fundamental concepts in digital image processing and reconstruction. Continuous and discrete images; image acquisition, sampling. Linear transformations of images, convolution and superposition. Image enhancement and restoration, spatial and spectral filtering. Temporal image processing: change detection, image registration, motion estimation. Image reconstruction from incomplete data. Applications. (Formerly EE 264.)

Prerequisite: Prerequisite(s): ECE 153 or permission of instructor.

ECE 240 - Introduction to Linear Dynamical Systems (5)

Introduction to applied linear algebra and linear dynamical systems with applications to circuits, signal processing, communications, and control systems. Topics include the following: Least-squares approximations of over-determined equations and least-norm solutions of underdetermined equations. Symmetric matrices, matrix norm and singular value decomposition. Eigenvalues, left and right eigenvectors, and dynamical interpretation. Matrix exponential, stability, and asymptotic behavior. Multi-input multi-output systems, impulse and step matrices; convolution and transfer matrix

descriptions. Control, reachability, state transfer, and least-norm inputs. Observability and least-squares state estimation. (Formerly CMPE 240.)

Prerequisite: Enrollment is restricted to graduate students; undergraduates may enroll if they have completed ECE 103 and AM 147.

ECE 241 - Introduction to Feedback Control Systems (5)

Graduate-level introduction to control of continuous linear systems using classical feedback techniques. Design of feedback controllers for command-following error, disturbance rejection, stability, and dynamic response specifications. Root locus and frequency response design techniques. Extensive use of Matlab for computer-aided controller design. Course has concurrent lectures with ECE 141.

Prerequisite: Enrollment is restricted to graduate students.

ECE 242 - Applied Feedback Control (5)

Sequel to Electrical Engineering 154. After reviewing control design techniques examined in EE 154, this course explores state space control, discrete time control, and two case studies in control design. Students design and implement feedback controllers on an inverted pendulum experiment. (Formerly CMPE 242.)

Prerequisite: Prerequisite(s): ECE 141 or ECE 241. Enrollment is restricted to juniors, seniors, and graduate students.

ECE 243 - System Identification (5)

Course provides introduction to the construction of linear dynamical models from experimental data using parametric and non-parametric identification techniques. Theoretical and practical aspects of these techniques addressed. (Formerly CMPE 243.)

Prerequisite: Prerequisite(s): ECE 240, or by permission of instructor.

ECE 244 - Digital Control (5)

Teaches the design and analysis of digital control systems. The topics covered are discrete-time system modeling; z-transform; stability, controllability, and observability of discrete-time systems; various design approaches to control design in which sensor, computer hardware, actuation, communication, and user interface are part of the design. Note: knowledge of linear algebra, calculus, basic differential equations, Laplace transform, signals and systems, linear-system control theory, MATLAB, and the use of word-processing software are assumed. (Formerly CMPE 244.)

Prerequisite: Prerequisite(s): ECE 141 or ECE 241. Enrollment is restricted to graduate students, or by permission of the instructor.

ECE 245 - Estimation and Introduction to Control of Stochastic Processes (5)

Provides practical knowledge of Kalman filtering and introduces control theory for stochastic processes. Selected topics include: state-space modeling; discrete- and continuous-time Kalman filter; smoothing; and applications in feedback control. Students learn through hands-on experience. Students cannot receive credit for this course and course 145. (Formerly CMPE 245.)

Prerequisite: Prerequisite(s): ECE 240 or ECE 241. Knowledge of Matlab is expected. Enrollment is restricted to graduate students.

ECE 246 - Hybrid Dynamical Systems (5)

Examines the modeling and analysis of hybrid dynamical systems, including the modeling of hybrid systems, the concept of solutions, Zeno behavior, equilibrium sets, stability, convergence, Lyapunov-based conditions, robustness, and simulation. Students are guided on methods for simulation and encouraged to apply them to several applications. (Formerly CMPE 246.)

Prerequisite: Prerequisite(s): ECE 241. Enrollment is restricted to graduate students.

ECE 249 - Introduction to Cyber-physical Systems (5)

Presents the basic concepts and tools for the study of cyber-physical systems, including modeling and analysis tools for continuous-time and discrete-time systems, finite state machines, stateflow, timed and hybrid automata, concurrency, invariants, linear temporal logic, verification, and numerical simulation. Students are guided on methods for simulation and encouraged to apply them to several applications. The course is self-contained. Students are expected to have a basic background in logic circuits, programming, the mathematical modeling of dynamical systems (course 8 is recommended), differential equations, linear algebra, and basic calculus. Knowledge of MATLAB/Simulink is useful. Students cannot receive credit for this course and course 149. (Formerly CMPE 249.)

Prerequisite: Prerequisite(s): CSE 100 and CSE 100L or equivalent, and CSE 13E or equivalent.

ECE 250 - Digital Signal Processing (5)

In-depth study of signal processing techniques, including discrete-time signals and systems, the z-transform, sampling of continuous-time signals, transform analysis of linear time-invariant systems, structures for discrete-time systems, the discrete Fourier transform, computation of the discrete Fourier transform, filter design techniques. Students cannot receive credit for this course and course 153. (Formerly EE 250.)

ECE 251 - Principles of Digital Communications (5)

A core course on digital communications theory. Provides an introduction to digital communication, including source coding, characterization of communication signals and systems, modulation and demodulation for the additive

Gaussian channel, digital signaling, and over bandwidth constrained linear filter channels and over fading multipath channels. (Formerly EE 251.)

Prerequisite: Prerequisite(s): ECE 151 and ECE 153 and CSE 107.

ECE 252 - Wireless Communications (5)

In-depth study of the physical layer of wireless communications. Wireless propagation channels and their impact on digital communications. Modulation techniques for wireless systems and their performance. Multi-antenna systems and diversity. Multicarrier and spread spectrum. Multi-access methods: FDMA, TDMA, CDMA. The structure of cellular systems. Students cannot receive credit for this course and course 152. (Formerly EE 252.)

Prerequisite: Prerequisite(s): ECE 251.

ECE 253 - Introduction to Information Theory (5)

An introduction to information theory including topics such as entropy, relative entropy, mutual information, asymptotic equipartition property, channel capacity, differential entropy, rate distortion theory, and universal source coding. (Formerly EE 253 and CMPS 250.)

Prerequisite: Enrollment is restricted to graduate students.

ECE 254 - Radar, Synthetic Aperture Radar, and ISAR (5)

Introduces radar signal processing, synthetic aperture radar (SAR), and inverse SAR (ISAR). Focuses on the fundamentals and design principles of modern radar systems. Students use hands-on computer simulations to build a strong background in radar sensor systems that can be applied to a variety of problems, such as medical imaging, ground-penetrating radar imaging for geophysical exploration, and the use of radar sensor systems for satellite-based SAR. (Formerly EE 288.)

Prerequisite: Prerequisite(s): ECE 153. Enrollment is restricted to juniors, seniors, and graduate students.

ECE 255 - Error Control Coding (5)

Covers the following topics: introduction to algebra; linear block code; cyclic codes; BCH code; RS codes; spectral domain study of codes; CRC; and product codes. (Formerly EE 261.)

ECE 256 - Statistical Signal Processing (5)

Covers fundamental approaches to designing optimal estimators and detectors of deterministic and random parameters and processes in noise, and includes analysis of their performance. Binary hypothesis testing: the Neyman-Pearson Theorem. Receiver operating characteristics. Deterministic versus random signals. Detection with unknown parameters. Optimal estimation of the unknown parameters: least square, maximum likelihood, Bayesian estimation. Will review the fundamental mathematical and statistical techniques employed. Many applications of the techniques are presented throughout the course. Note: While a review of

probability and statistics is provided, this is not a basic course on this material. (Formerly EE 262.)

Prerequisite: Prerequisite(s): ECE 103 and CSE 107, or permission of instructor.

ECE 258 - Introduction to Inverse Problems (3)

Fundamental approaches and techniques in solving inverse problems in engineering and applied sciences, particularly in imaging. Initial emphasis on fundamental mathematical, numerical, and statistical formulations and known solution methods. Sampling of applications presented from diverse set of areas (astronomical, medical and optical imaging, and geophysical exploration). (Formerly EE 265.)

Prerequisite: Enrollment is restricted to graduate students.

ECE 275 - Technology Management in Network Industries (5)

Introduces analytical tools (optimization and simulation) for modeling firms' technology choices and market behavior for an industry with a network structure. Examples of industries with a network include electric power, airline, natural gas, water supply systems, and transportation sectors. These models are useful for planning investments in infrastructure, such as network expansion (transmission lines), supply capacity (power plants, storage), and demand-side management, and for analysis of public policies. Students are encouraged to apply those tools to analyze other sectors in a class project. (Formerly Technology and Information Management 275.)

Prerequisite: Enrollment is restricted to graduate students.

ECE 279 - Optimization and Control for Electric Power Systems (5)

Provides a comprehensive overview of power systems. Students learn how mathematical tools are used for the system planning and operation. Advanced topics include smart grids, electric vehicles and energy data analytics.

Prerequisite: Enrollment is restricted to graduate students. Undergraduates admitted with permission of the instructor.

ECE 280A - Current Topics in Applied Microscopy and Neuronal Imaging (2)

A weekly seminar to discuss current topics in applied microscopy and neuronal imaging. (Formerly EE 280A.)

Prerequisite: Enrollment is restricted to graduate students.

ECE 280B - Seminar on Integrated Bioelectronics (2)

Weekly seminar covering current research in integrated bioelectronics. Enrollment is by permission of the instructor and is restricted to students who have research in bioelectronics. (Formerly EE 280B.)

ECE 280C - Seminar on Control (2)

Weekly seminar series covering topics of current research in theory and application of control to engineering systems.

Current research work and literature in these areas discussed. (Formerly CMPE 280C.)

Prerequisite: Enrollment is restricted to graduate students; undergraduates may enroll with permission of instructor.

ECE 280D - Graduate Research Seminar (2)

Weekly seminar series in topics of current research in information systems and technology management. Enrollment by permission of instructor. (Formerly TIM 280A.)

ECE 280N - Seminar on Nanophotonics and Lab-on-Chip Systems (2)

Weekly series covering current research in nanophotonics and lab-on-chip systems including nanoplasmonic biosensors; nanospectroscopy (Raman and vibrational mid-infrared spectroscopy); nanofabrication; nanophotonics devices for energy conversion and thermoplasmonics; acoustic fluids; and microfluidic integration. Current research work and recent literature are discussed. Enrollment is by permission of the instructor and restricted to graduate students. Sophomores, juniors, and seniors may enroll by permission of instructor. (Formerly EE 280N.)

ECE 280O - Seminar on Applied Optics (2)

Weekly seminar series covering topics of current research in applied optics, including integrated, quantum, nonlinear, and nano-optics. Current research work and literature in these areas are discussed. Enrollment by permission of instructor. (Formerly EE 280O.)

ECE 280Z - Seminar on Smart Grids and Data Analytics (2)

Weekly series covering state-of-the-art research in smart power grids, machine learning, communications, and signal processing. Current research works and recent literature are discussed. Enrollment is by permission of the instructor and is restricted to graduate students. Undergraduates may enroll by permission of the instructor. (Formerly EE 280Z.)

ECE 283 - Special Topics in Electrical and Computer Engineering (3)

Graduate seminar on a research topic in electrical engineering that varies with the particular instructor. Topics may include, but are not limited to, electromagnetics, antennas, electronics biotechnology, nanotechnology, signal processing, communications, VLSI, MEMS, and radio frequency. Enrollment is restricted to graduate students and consent of instructor. (Formerly EE 283.)

ECE 290 - ECE Graduate Seminar (2)

Leading speakers from academia and industry present their latest research.

Prerequisite: Enrollment is restricted to computer engineering and electrical engineering graduate students.

ECE 291 - Tomorrow's Professor: Preparing for an Academic Career in Science and Engineering (3)

The aim of this course is two-fold: (1) inform, motivate, and prepare graduate students for possible careers in academia and industry; (2) expose graduate students to the professional skills required for possible career options in engineering and science. Course is for Satisfactory/Unsatisfactory grade only. (Formerly EE 291, Tomorrow's Professors, Engineers, and Entrepreneurs.)

Prerequisite: Enrollment is restricted to graduate students.

ECE 293 - Advanced Topics in Electrical and Computer Engineering (5)

Graduate seminar on a research topic in electrical engineering that varies with the particular instructor. Typical topics include, but are not limited to, electromagnetics, antennas, electronics biotechnology, nanotechnology, signal processing, communications, VLSI, and MEMS.

Prerequisite(s): Enrollment is by permission of the instructor and is restricted to graduate students. In some quarters course will be taught in conjunction with ECE 183. (Formerly EE 293.)

ECE 296 - Master Project (5)

Master project conducted under faculty supervision. Petition on file with sponsor faculty.

ECE 297A - Independent Study or Research (5)

Independent study or research under faculty supervision. Students submit petition to sponsoring agency.

ECE 297B - Independent Study or Research (10)

Independent study or research under faculty supervision. Students submit petition to sponsoring agency.

ECE 297C - Independent Study or Research (15)

Independent study or research under faculty supervision. Students submit petition to sponsoring agency.

ECE 297F - Independent Study or Research (2)

Independent study or research under faculty supervision. Students submit petition to sponsoring agency.

ECE 299A - Thesis Research (5)

Thesis research conducted under faculty supervision. Students submit petition to sponsoring agency.

ECE 299B - Thesis Research (10)

Thesis research conducted under faculty supervision. Students submit petition to sponsoring agency.

ECE 299C - Thesis Research (15)

Thesis research conducted under faculty supervision. Students submit petition to sponsoring agency.

ECON - ECONOMICS

Lower-Division

ECON 1 - Introductory Microeconomics: Resource Allocation and Market Structure (5)

For all interested students as well as prospective economics majors. Examines how markets allocate resources in different kinds of economies. Topics include competitive markets, monopoly, financial markets, income distribution, market failures, the environment, and the role of government.

ECON 2 - Introductory Macroeconomics: Aggregate Economic Activity (5)

For all interested students and prospective economics majors. Examines how the overall level of national economic activity is determined, including output, employment, and inflation. Explores the roles of monetary and fiscal policies in stabilizing the economy and promoting growth, with a focus on contemporary policy debates.

ECON 10A - Economics of Accounting (5)

Introduction to accounting principles and practice; preparation and analysis of financial statements; study of internal control procedures. Courses 10A and 10B satisfy the Accounting 1A-B requirement at UC Berkeley.

ECON 10B - Economics of Accounting (5)

Managerial accounting emphasizing analysis and control; accounting for corporations; introduction to taxation, budgeting, and equity/debt financing; management decision making. Courses 10A and 10B satisfy the Accounting 1A-B requirement at UC Berkeley.

Prerequisite: Prerequisite(s): ECON 10A.

ECON 20 - Economics for Non-Majors (5)

Designed for non-majors seeking a basic introduction to core economic concepts relevant for social and public policy decision making. Fundamental economic concepts illustrated through their application to a variety of public policy questions.

ECON 30 - Introduction to Entrepreneurship (5)

Provides an overview of the role and importance of entrepreneurship in the economy and society; a framework for approaching entrepreneurship and innovation; and exposure to the core competencies required of all entrepreneurs. The course incorporates case studies and speakers (often actual entrepreneurs) to provide context for the entrepreneurial topics covered in the course.

ECON 93 - Field Study (5)

Supervised fieldwork experience in an area connected with economics or business. Prerequisite(s): two of the following ECON 100A, ECON 100B, ECON 113. Enrollment restricted

to juniors and seniors. Students submit petition to sponsoring agency and seek internship for approval by agency.

ECON 93F - Field Study (2)

Supervised fieldwork experience, in an area connected with economics or business. Prerequisite(s): two of the following ECON 100A, ECON 100B, ECON 113. Enrollment restricted to juniors and seniors. Students submit petition to sponsoring agency and seek internship for approval by agency.

ECON 99 - Tutorial (5)

Upper-Division

ECON 100A - Intermediate Microeconomics (5)

Covers major theoretical issues arising in the study of resource allocation, the function of markets, consumer behavior, and the determination of price, output, and profits in competitive, monopolistic, and oligopolistic market structures. Also considers issues of welfare and public policy. Students cannot receive credit for this course and course 100M.

Prerequisite: Prerequisite(s): ECON 1 and ECON 2; and ECON 11B or AM 11B or MATH 22 or MATH 23A.

ECON 100B - Intermediate Macroeconomics (5)

Covers major theoretical issues arising in the study of income, employment, interest rates, and the price level. Examines the role of monetary and fiscal policy in economic stabilization. Also considers these issues as they relate to the global economy. Students cannot receive credit for this course and course 100N.

Prerequisite: Prerequisite(s): ECON 1 and ECON 2; and ECON 11B or AM 11B or MATH 22 or MATH 23A.

ECON 100M - Intermediate Microeconomics, Math Intensive (5)

Mathematically sophisticated version of course 100A. Provides analytically rigorous treatment of the subject using a calculus-intensive presentation of microeconomic theory. For specific topics, see course 100A. Students cannot receive credit for this course and course 100A.

Prerequisite: Prerequisite(s): ECON 1 and ECON 2; and ECON 11B or AM 11B or MATH 22 or MATH 23A.

ECON 100N - Intermediate Macroeconomics, Math Intensive (5)

Provides rigorous, mathematical-intensive treatment of topics covered in course 100B. Core is devoted to model-based analysis of questions in macroeconomics. Use of mathematical tools allows study of advanced topics and data-intensive applications. See course 100B for specific topics. Students cannot receive credit for this course and course 100B.

Prerequisite: Prerequisite(s): ECON 1 and ECON 2; and ECON 11B or AM 11B or MATH 22 or MATH 23A.

ECON 101 - Managerial Economics (5)

Analysis of the theory and practice of decision making in business firms, applying the concepts and techniques of microeconomics. Topics may include pricing schemes, non-price competition, internal organization of firms, incentive contracts, asymmetric information, and game theory. Case studies are used to illustrate some topics.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M; and ECON 113.

ECON 104 - Is There Truth in Numbers: The Role of Statistics in Economics (5)

Applies the techniques of econometrics and experimental economics to the understanding of economics. A hands-on course where real economic data is used in an interactive way so that students develop the art of empirical analysis.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M; and ECON 113, and Entry Level Writing and Composition requirements.

ECON 105 - Topics in Macroeconomics (5)

Covers topics in macroeconomics. Course builds on the tools of macroeconomics developed in ECON 100B and ECON 100N to explore topical macroeconomic issues. Possible topics include economic growth, business cycles, financial crises, unemployment, inflation, inequality, and the global economy.

Prerequisite: Prerequisite(s): ECON 100B or ECON 100N; and ECON 113.

ECON 110 - Managerial Cost Accounting and Control (5)

Focuses on how cost data are used by managers in the planning and control of both private- and public-sector organizations. Specific topics include organization of the management and control function, use of cost data for the pricing of goods and services, the effect of cost systems on management performance, and capital budgeting.

Prerequisite: Prerequisite(s): ECON 10B.

ECON 111A - Intermediate Accounting I (5)

Principles, control, and theory of accounting for assets; accounting as an information system; measurement and determination of income. Projects involving spreadsheet software are required.

Prerequisite: Prerequisite(s): ECON 10B.

ECON 111B - Intermediate Accounting II (5)

Covers the principles, control, the theory of accounting for liabilities and property; plant and equipment, the preparation and analysis of investments, and review and analysis of bonds and leases.

Prerequisite: Prerequisite(s): ECON 111A..

ECON 111C - Intermediate Accounting III (5)

Covers the principles of control, the theory of accounting for pensions and income taxes; the determination of share-based compensation and earnings per share, the calculation of shareholder's equity, and advanced topics in intermediate accounting.

Prerequisite: Prerequisite(s): ECON 111A.

ECON 112 - Auditing and Attestation (5)

For business management economics majors interested in careers that emphasize accounting, finance, or technology management. Also for students who intend to take the CPA exam. Covers audit techniques, risk analysis, and development of control structures for major financial processes including cash, investments, accounts receivable, inventories, accounts payable, debt, equity capital, and related information systems security.

Prerequisite: Prerequisite(s): ECON 10B.

ECON 113 - Introduction to Econometrics (5)

Practical methods for organizing and analyzing economic data, testing economic hypotheses, and measuring economic relationships. Regression analysis is the main empirical method, and basic statistical and probability theory is included. Students gain hands-on computer experience with an econometric software package. Students cannot receive credit for this course and Applied Mathematics and Statistics 113.

Prerequisite: Prerequisite(s): ECON 1 and ECON 2; STAT 5 or 7; and one of the following: ECON 11B, AM 11B, MATH 22, or MATH 23A. ECON 100A or ECON 100B strongly recommended as preparation.

ECON 114 - Advanced Quantitative Methods (5)

Application of statistical methods to estimating and testing economic relationships, i.e., econometric techniques. Topics include the effects of misspecification, choice of functional form, serial correlation, heteroscedasticity, limited dependent variables, and simultaneous equations. Includes discussion of existing empirical work and econometric projects by students.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M, and ECON 113; concurrent enrollment in ECON 114L is required.

ECON 114L - Advanced Quantitative Methods Lab (2)

Laboratory component associated with course 114. Topics include learning the fundamentals of programming in R language and learning to implement the modes and methods taught in course 114 lectures.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M; and ECON 113; concurrent enrollment in course 114 is required.

ECON 115 - Introduction to Management Sciences (5)

The scientific study of management decision making. Topics include linear, integer, and non-linear programming. Special emphasis on a wide variety of practical applications, including production scheduling, optimal transportation assignments, and optimal inventory policy.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M.

ECON 116 - Advanced Topics in Accounting and Ethics (5)

Covers topics in accounting and ethics. Builds a strong accounting foundation; develops critical thinking skills; and explores ethical standards in accounting, forensic accounting, international financial recording standards, and accounting for sustainability. Meets the California state educational ethics requirement for certified public accountant (CPA) licensure.

Prerequisite: Prerequisite(s): ECON 111A and ECON 111B. Enrollment is restricted to economics, business management economics, global economics, and the combined economics and environmental studies and mathematics majors.

ECON 117A - Income Tax Factors for Individuals (5)

Introduces federal taxation for individuals. Topics for study include taxable income, gross income exclusions and inclusions, capital gains, depreciation, business and itemized deductions, personal and dependency exemptions, passive activity losses, tax credits, and methods of accounting.

Prerequisite: Prerequisite(s): ECON 10B.

ECON 117B - Tax Factors of Business and Investment (5)

Focuses on various tax subjects providing a strong foundation in tax concepts and preparation for work in either public or corporate accounting. Topics include historical perspective of the U.S. tax system, introduction to estate and gift taxes, employment and self-employment taxes, tax concepts and laws, business expenses, capital recovery, tax credits, capital gains and losses, capital investments, and corporate operations. (Formerly course 117.)

Prerequisite: Prerequisite(s): ECON 10B.

ECON 119 - Advanced Accounting (5)

Accounting for business organizations; partnerships; government and non-profit organization funds; branches, consolidations, and installment sales. Projects involving spreadsheet software required.

Prerequisite: Prerequisite(s): ECON 111A or ECON 111B.

ECON 120 - Development Economics (5)

Studies the microeconomics of development. Topics may include health and nutrition, education, intra-household economics, formal and informal risk-coping mechanisms, savings, credit, agriculture, institutions, and service delivery and corruption. Focuses on empirical methods. Problem sets require statistical software such as Stata. (Formerly Economic Development.)

Prerequisite: Prerequisite(s): ECON 1, ECON 2, and ECON 113.

ECON 121 - Economic Growth (5)

Studies economic growth from theoretical, empirical, and historical perspectives. Topics include: theories of economic growth and their empirical importance, technology and innovation, social institutions and growth, and competing explanations of the global distribution of wealth.

Prerequisite: Prerequisite(s): ECON 1, ECON 2, ECON 11A, and ECON 11B (or the equivalent); ECON 100B is strongly recommended.

ECON 125 - Economic History of the U.S (5)

The development of the American economy from colonial times to the present, with emphasis on the interaction between institutional structure and economic development. Topics include the economics of slavery, the rise of big business, and the causes of the Great Depression.

Prerequisite: Prerequisite(s): ECON 1 and ECON 2. Related coursework in history also helpful. Enrollment is restricted to juniors and seniors.

ECON 126 - Why Economies Succeed or Fail: Lessons from Western and Japanese History (5)

Examines the emergence of capitalism and the world's first industrial revolution in Britain, continental Europe industrialization, Soviet economic growth and collapse, and the Japanese economic miracle. Asks about the historical sources of long-run economic development, stagnation, and decline. Draws lessons for current debates over free market versus more interventionist policies, economic reform in the former Communist nations, and economic rivalry between the U.S. and Japan.

Prerequisite: Prerequisite(s): ECON 1 and ECON 2. Related coursework in history also helpful. Enrollment is restricted to juniors and seniors.

ECON 128 - Poverty and Public Policy (5)

Studies the causes, consequences, and governmental response to urban poverty in the U.S. Topics include how public policy, the macroeconomy, race, gender, discrimination, marriage, fertility, child support, and crime affect and are affected by urban poverty. Emphasizes class discussion and research.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M; and ECON 113. Enrollment is restricted to economics, business management economics, global economics, legal studies, or economics combined majors.

ECON 130 - Money and Banking (5)

Examines the nature of money, financial intermediation, financial asset pricing, and markets; banking business and the banking industry; financial and banking crises, especially the 2007-09 crisis in the U.S. and abroad; the evolving nature of financial regulation and supervision of banking and financial institutions and markets; history and functions of the U.S.

central bank (Federal Reserve); the role of the central bank in providing liquidity, credit, and creating money; central bank emergency lending in crises; institutional design of central banks and macroeconomic policy.

Prerequisite: Prerequisite(s): ECON 100B or ECON 100N; and ECON 113.

ECON 131 - International Financial Markets (5)

International financial management analyzes the key financial markets and instruments that facilitate trade and investment activity on a global scale. Inquiry spans two areas: (1) economic determinants of prices in international financial markets; and (2) decisions facing private individuals and enterprises, with topics including capital financing, investment, and risk management.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M; and ECON 100B or ECON 100N.

ECON 133 - Security Markets and Financial Institutions (5)

An examination of all major financial markets: equities, bonds, options, forwards, and futures. Uses modern financial theory, including asset pricing models such as CAPM and APT.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M, and ECON 113.

ECON 135 - Corporate Finance (5)

An analysis of financial policies of business enterprises. Topics include cash flow analysis, stock and bond valuation, asset pricing models, capital budgeting, financial market institutions, and financial planning.

Prerequisite: Prerequisite(s): ECON 10A; and ECON 100A or ECON 100M; and ECON 113.

ECON 136 - Business Strategy (5)

The strategic management process, techniques for analyzing single-business and diversified companies, implementing strategy, organization, business planning, financial strategy, competitive analysis, entrepreneurial skills.

Prerequisite: Prerequisite(s): ECON 10A; and ECON 100A or ECON 100M.

ECON 138 - The Economics and Management of Technology and Innovation (5)

Examines the analytics of issues in technology and innovation, including cooperation in research and development (RD), standardization and compatibility, patents and intellectual property rights, and strategic management, using economic models and firm case studies.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M, or permission of instructor.

ECON 139A - The Economics of Electronic Commerce (5)

An analysis of the broad spectrum of issues affecting commercial uses of the Internet and the next-generation

information infrastructure. Uses economics to examine market structure, pricing quality, intellectual property rights, security, electronic payments and currencies, and public policy implications.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M, or permission of instructor.

ECON 139B - E-Commerce Strategy (5)

Review of economic principles and trends in e-commerce, including online retailing of physical products, digital products and services, financial services, business-to-business transactions, e-business, and e-marketing. Business-to-business and business-to-consumer business models are explored both in terms of strategy and implementation. Topics include how and why successful companies deploy e-business strategies and how these evolve in fast-changing technological and business environments..

Prerequisite: Prerequisite(s): ECON 139A or ECON 161A.

ECON 140 - International Trade (5)

The theory of international production and trade. The effects of tariffs and quantitative trade restrictions; the nature of economic integration; multinational firms; effects of trade and protection on economic stability and welfare.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M.

ECON 141 - International Finance (5)

Topics include national accounting, balance of payments theories, parity conditions in international finance, exchange rate determination models, forward-looking financial instruments, international monetary systems, country interdependence and exchange rate regimes, international monetary integration, and Eurocurrency market.

Prerequisite: Prerequisite(s): ECON 100B or ECON 100N.

ECON 142 - Advanced Topics in International Economics (5)

Selected issues in contemporary international economics: theory, empirical evidence, and public policy. Seminar emphasizing discussion and individual research.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and ECON 100A or ECON 100M; and ECON 100B or ECON 100N; and ECON 140 or ECON 141.

ECON 143 - Policy Issues in the International Economy (5)

Covers selected issues concerning the international economy. Topics include: U.S. competitiveness; U.S. trade policy; immigration; trade and the environment; developing countries; foreign investment; foreign exchange markets; and international economic institutions.

Prerequisite: Prerequisite(s): ECON 1 and ECON 2; and ECON 100A or ECON 100M.

ECON 148 - Latin American Economies (5)

This course is designed to familiarize students with the economic and business environment in Latin America.

Prerequisite: Prerequisite(s): ECON 1 and ECON 2.

ECON 149 - The Economies of East and Southeast Asia (5)

Examines the pattern of international trade, investment, and industrial structure in Asia. Examines competing explanations of rapid growth of Japan, Korea, and Taiwan; presents an overview of economic developments in China, Hong Kong, and Taiwan. Concludes with an analysis of high technology trade and multinationals in Asia in 2000 and beyond.

Prerequisite: Prerequisite(s): ECON 1 and ECON 2.

ECON 150 - Public Finance (5)

Economics of taxation, including incidence, equity issues, efficiency, and supply side effects. Close attention to taxes in the U.S. system and tax-reform issues. Students cannot receive credit for this course and course 250.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M; and ECON 100B or ECON 100N.

ECON 156 - Health Care and Medical Economics (5)

Health economics theory and review of studies of the health industry, including current topics. Focuses on the structure of the U.S. health care system, including analysis of health policy issues. Relationship to models of perfect competition and efforts at reform.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M; and ECON 113.

ECON 159 - The Economics of Organizations (5)

Uses an economic approach to shed light on questions such as why and how organizations are formed, and what consequences they may have on the adoption of different types of organizations for economic performance. Also emphasizes differences between the internal markets within organizations and market transactions.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M.

ECON 160A - Industrial Organization (5)

The structure and conduct of American industry with strong emphasis on the role of government, regulation, anti-trust, etc. The evolution of present-day industrial structure. The problems of overall concentration of industry and of monopoly power of firms. Pricing, output decisions, profits, and waste. Approaches include case study, theory, and statistics.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M.

ECON 160B - Government and Industry (5)

The influence of government regulation on industry and the allocation of resources is rigorously examined using theory and statistics. Areas of regulation include transportation and

power, pollution and congestion, rent control, and liability insurance regulation. Both optimal and actual regulation are examined from the point of view of effectiveness, efficiency, social welfare, and re-distribution.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M.

ECON 161A - Marketing (5)

The evolution of markets and marketing; market structure; marketing cost and efficiency; public and private regulation; the development of marketing programs including decisions involving products, price, promotional distribution. (Formerly course 161.)

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M.

ECON 161B - Marketing Research (5)

Prepares students to conduct market research and use it in solving real management problems. Students work with a company to solve marketing-based problems. Students conduct research, process data, and make a presentation to the company's management. Course work involves marketing, statistics, and communications; material is both qualitative and quantitative.

Prerequisite: Prerequisite(s): ECON 113 and ECON 161A.

ECON 162 - Legal Environment of Business (5)

A study of law and the legal process, emphasizing the nature and function of law within the U.S. federal system. Attention is given to the legal problems pertaining to contracts and related topics, business association, and the impact of law on business enterprise.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M.

ECON 164 - Economics and the Telecommunications Industry (5)

Covers the economics of the telecommunications industry including telephone, cellular telephone, and data communications. Particular emphasis on the Internet, satellite, paging, cable television, radio and television broadcasting. Examines the industry structure and implications of moving from a regulated environment to competition. Topics examined from a competitive strategic standpoint as well as public policy perspective.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M; and ECON 113.

ECON 165 - Economics as an Experimental Science (5)

The design, execution, and analysis of laboratory experiments in economics. Students study experimental methodology, critically survey the published literature, and design an experiment. Literature includes lab studies of investigations in auctions, markets, social choice theory, and game theory.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M.; and ECON 113.

ECON 166A - Game Theory and Applications I (5)

Introduces modern game theory, including applications in social science, biology, and engineering. Topics include extensive form, strategic form, mixed strategies, incomplete information, repeated games, evolutionary games, and simulation techniques.

Prerequisite: Prerequisite(s): STAT 5 or STAT 7 or ECON 113; and ECON 11B or AM 11B, or MATH 11B or MATH 19B. Enrollment is restricted to juniors and seniors.

ECON 166B - Game Theory and Applications II (5)

Explores research frontiers in game theory, emphasizing applications in social science, biology, and engineering. Each interdisciplinary team develops a topic, and presents it to the class in oral and written reports and demonstrations. Students must have shown a strong performance in course 166A or equivalent. Students cannot receive credit for this course and ECON 272, CSE 209, or BIOE 274.

Prerequisite: Prerequisite(s): ECON 166A or CSE 166A; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to juniors and seniors.

ECON 169 - Economic Analysis of the Law (5)

The application of the theories and methods of neoclassical economics to the central institutions of the legal system, including the common law doctrines of negligence, contract, and property; bankruptcy and corporate law; and civil, criminal, and administrative procedure.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M or permission of instructor.

ECON 170 - Environmental Economics (5)

Economic analysis of environmental issues. Environmental pollution and deterioration as social costs. Economic policy and institutions for environmental control. Influences of technology, economic growth, and population growth on environmental quality.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M; and ECON 113.

ECON 171 - Natural Resource Economics (5)

The application of economic analysis to the use of renewable and nonrenewable natural resources. Efficiency and distributional aspects of natural resource scarcity. Measurement of the benefits and costs. Optimal extraction or use policies. Common property and externalities. Government policies.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M.

ECON 175 - Energy Economics (5)

Applications of micro, welfare, and international economic theory and methodology to the energy field. Questions considered include optimal allocation of natural resources; pricing and investment; regulations and taxes; import and export control; redistributive policies.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M.

ECON 180 - Labor Economics (5)

A study of topics in modern labor economics with an emphasis on data analysis and econometrics. Topics include labor supply, labor demand, human capital, minimum wage, employment and wage discrimination, immigration, self-employment, earned income tax credit, and unemployment insurance.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M; and ECON 113.

ECON 183 - Women in the Economy (5)

Study of gender roles in economic life, past and present. Topics include occupational structure, human capital acquisition, income distribution, poverty, and wage differentials. The role of government in addressing economic gender differentials is examined.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M; and ECON 113 is strongly recommended.

ECON 186 - Mathematical Methods for Economic Analysis (5)

Presents mathematical methods commonly used in graduate-level economic analysis: basic matrix algebra, real analysis, functions, continuity concepts, differentiation, Taylor expansions, and implicit function theorem and optimization.

Prerequisite: Enrollment is restricted to applied economics and finance graduate students.

ECON 188 - Management in the Global Economy (5)

An overview of how firms do business in the global economy. The focus is on the motivations of firm behavior, but also explores the impact of corporate decision-making on national welfare. Includes a mix of business case studies, applied economic theory, and empirical applications.

Prerequisite: Prerequisite(s): ECON 113 and either ECON 100A or ECON 100M.

ECON 190 - Senior Proseminar (5)

Courses focus on problems of interest to advanced students of economics. They offer a flexible framework, so those interested in specific issues can read, present papers, and develop their ideas.

ECON 191 - Economics Teaching Practicum (5)

Each student serves as facilitator for small discussion group in connection with core economics courses. Facilitators complete course readings and meet with instructor as a group to discuss the teaching process. May not be counted toward upper-division major requirements.

ECON 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar, course 42, under faculty supervision. May *not* be counted toward the upper-division major requirements. Students submit petition to sponsoring agency.

ECON 193 - Field Study (5)

Provides for department-sponsored individual field study experience in an area connected with economics or business. Students work 12-14 internship hours per week. May not be counted toward the upper-division major requirements. Prerequisite(s): ECON 100A, ECON 100B, and ECON 113. Students submit petition to sponsoring agency.

ECON 193F - Field Study (2)

Provides for department-sponsored individual field study experience in an area connected with economics or business under the direct supervision of a faculty sponsor. Students work five-six hours internship hours per week. May not be counted toward the upper-division major requirements. Prerequisite(s): ECON 100A, ECON 100B and ECON 113. Students submit petition to sponsoring agency.

ECON 194 - Advanced Topics in Management (5)

Honors course providing detailed analysis of specialized topics in management. Possible topics include: venture capital, the financial services industry, e-business, behavioral finance, advanced consumer behavior, entrepreneurship, high-tech marketing, risk management, and option value approaches to business strategy. Students cannot receive credit for this course and course 194F. Prerequisite(s): courses 100A or 100M, 100B or 100N, and 113. Enrollment is by permission of instructor, and review of performance in economics courses. Enrollment is restricted to senior and junior business management economics majors.

ECON 194B - Advanced Topics in Business and Professional Development (2)

Enhances students' marketability, strengthens verbal and written communication skills, teaches appropriate business etiquette, improves networking skills, and helps students determine how to become an integral part of an organization's intellectual capacity. Business professionals provide guest presentations.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors economics, business management economics, global economics majors and combined majors with mathematics and environmental studies.

ECON 194F - Advanced Topics in Management and Finance (2)

Detailed analysis of specialized topics in management. Possible topics include: venture capital, the financial services industry, e-business, behavioral finance, advanced consumer behavior, entrepreneurship, high-tech marketing, risk management, and option value approaches to business strategy. Formerly, Advanced Topics in Management and Finance.

Prerequisite: Prerequisite(s): ECON 100A or ECON 100M; and ECON 113; ECON 133 or ECON 135 strongly recommended. Enrollment is restricted to senior and junior business management economics majors.

ECON 195 - Senior Thesis (5)

A supervised research project. If the project is of unusual scope, the course may be repeated for credit. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, students submit petition to sponsoring agency.

ECON 197 - Economic Rhetoric: Using Economic Theory and Empirical Evidence in Arguing Policy (5)

Economics students are expected to learn to effectively communicate economic theory and evidence relating to economic policy to audiences that do not have economics degrees. The skills to be learned are both written and oral communication. Students learn to present convincing policy arguments in position papers, executive summaries, and in oral presentation that may include charts and other means of communication.

Prerequisite: Prerequisite(s):Entry Level Writing & Composition requirement; one of the following: ECON 100A,ECON 100M, ECON 100B, ECON 100N, or ECON 113. Restricted to sophomore, junior, and senior economics, business-management economics, global economics and combined economics/math majors.

ECON 199 - Tutorial (5)

May be repeated for credit, but may be counted only once toward the upper-division major requirements. Undergraduates may not take graduate courses for credit as 199. Students submit petition to sponsoring agency.

ECON 199F - Tutorial (2)

Specialized study with individual faculty. May not be applied toward the major requirements. Students submit petition to sponsoring agency.

Graduate

ECON 200 - Microeconomic Analysis (5)

Survey of partial equilibrium analysis, market distortions, consumer choice and production and trade theory, perfect and imperfect competition, price discrimination, and intertemporal choice theory.

Prerequisite: Enrollment is restricted to applied economics and finance graduate students.

ECON 201 - Applications in Microeconomics (5)

Applies concepts and tools developed in course 200 to problems encountered in private- and public-sector output and labor markets. The focus is empirical; topics include analysis of labor supply and labor demand and the role of government labor market policies, analysis of pricing policies and regulation, estimation of the returns to schooling, estimation of demand and cost functions, and the role of unions in the economy. Course 200 is strongly recommended as preparation.

Prerequisite: Enrollment is restricted to applied economics and finance graduate students.

ECON 202 - Macroeconomic Analysis (5)

Aggregate economic analysis: determinants of aggregate expenditures and output, the roles of monetary and fiscal policy, recent developments in macro theory; macro policy issues.

Prerequisite: Enrollment is restricted to applied economics and finance graduate students.

ECON 204A - Advanced Microeconomic Theory I (5)

Economic theory of individual and market behavior, including constrained optimization, duality, theory of the consumer, theory of the producer, dynamic optimization, behavior under uncertainty, intertemporal choice, asymmetric information, game theory, partial and general equilibrium, pure and applied welfare economics, public goods and externalities. Courses 204A, 204B, and 204C must be taken in sequence. (Formerly Advanced Microeconomic Theory.)

Prerequisite: Enrollment is restricted to Ph.D. students in economics or by permission of the instructor.

ECON 204B - Advanced Microeconomic Theory II (5)

Economic theory of individual and market behavior, including constrained optimization, duality, theory of the consumer, theory of the producer, dynamic optimization, behavior under uncertainty, intertemporal choice, asymmetric information, game theory, partial and general equilibrium, pure and applied welfare economics, public goods and externalities. Courses must be taken in sequence. (Formerly Advanced Microeconomic Theory.)

Prerequisite: Prerequisite(s): ECON 204A.

ECON 204C - Advanced Microeconomic Theory III (5)

Economic theory of individual and market behavior, including constrained optimization, duality, theory of the consumer, theory of the producer, dynamic optimization, behavior under uncertainty, intertemporal choice, asymmetric information, game theory, partial and general equilibrium, pure and applied welfare economics, public goods and externalities. Courses must be taken in sequence. (Formerly Advanced Microeconomic Theory.)

Prerequisite: Prerequisite(s): ECON 204B.

ECON 205A - Advanced Macroeconomic Theory I (5)

Modern macroeconomic theory: theories of growth and business cycle fluctuations; theories of household and firm behavior; models of financial markets and labor markets; recent developments in the analysis of macroeconomic policy. Courses 205A, 205B, and 205C must be taken in sequence. (Formerly Advanced Macroeconomic Theory.)

Prerequisite: Enrollment is restricted to Ph.D. students in economics or by permission of instructor.

ECON 205B - Advanced Macroeconomic Theory II (5)

Modern macroeconomic theory: theories of growth and business cycle fluctuations; theories of household and firm behavior; models of financial markets and labor markets; recent developments in the analysis of macroeconomic policy. Courses must be taken in sequence. (Formerly Advanced Macroeconomic Theory.)

Prerequisite: Prerequisite(s): ECON 205A.

ECON 205C - Advanced Macroeconomic Theory III (5)

Modern macroeconomic theory: theories of growth and business cycle fluctuations; theories of household and firm behavior; models of financial markets and labor markets; recent developments in the analysis of macroeconomic policy. Courses must be taken in sequence. (Formerly Advanced Macroeconomic Theory.)

Prerequisite: Prerequisite(s): ECON 205B.

ECON 210A - Mathematical Methods for Economic Analysis (5)

Mathematical methods commonly used in economic analysis are discussed. Covers basic matrix algebra, real analysis, functions, continuity concepts, differentiation, Taylor expansion, implicit function theorem, and optimization. Prerequisite(s): qualifications as determined by instructor; inquire at department office.

ECON 210B - Mathematical Methods for Economic Analysis (5)

A course in introductory mathematical economics which covers standard optimization problems, difference and differential equations, optimal control theory, decisions under uncertainty, game theory, and stochastic calculus. Course 210A or equivalent is strongly recommended as preparation.

ECON 211A - Advanced Econometrics I (5)

Introduces advanced econometric methods. Topics include probability theory, hypothesis testing, linear regression analysis, heteroscedasticity, serial correlation, instrumental variables, and panel data models. (Formerly Advanced Econometrics.)

Prerequisite: Enrollment is restricted to economics Ph.D. students or by permission of the instructor.

ECON 211B - Advanced Econometrics II (5)

Focuses on the use of econometric methods for causal inference. Research designs covered include: OLS regression, non-parametric regression, propensity score, panel models, synthetic control, instrumental variables, and regression discontinuity. (Formerly Advanced Econometrics.)

Prerequisite: Prerequisite(s): ECON 211A. Enrollment is restricted to graduate students.

ECON 211C - Advanced Econometrics III (5)

Covers foundational time series analysis for economics. Topics include: linear time series models, numerical estimation, forecasting, vector autoregression models, the Kalman filter, unit roots, and cointegration. (Formerly Topics in Empirical Research.)

Prerequisite: Prerequisite(s): ECON 211B. Enrollment is restricted to graduate students.

ECON 212 - Empirical Project in Econometrics (2)

Empirical project or paper in econometrics to demonstrate student's ability to conduct applied econometric analysis. Ph.D. requirement to be completed by beginning of student's third year of study. Prerequisite(s): courses 211A and 211B.

ECON 216 - Applied Econometric Analysis I (5)

The use of statistical techniques for the testing of economic hypotheses and the estimation of parameters, with emphasis on regression analysis. Includes methods of dealing with serial correlation, errors in variables, multicollinearity, and heteroscedasticity. Experience with common statistical packages.

Prerequisite: Enrollment is restricted to applied economics and finance graduate students.

ECON 217 - Applied Econometric Analysis II (5)

Focuses on the application of advanced econometric and time series techniques to economic issues. Computer assignments and empirical applications are used to discuss and illustrate the practical aspects of simultaneous equation systems, nonlinear models, qualitative response models, time series model specification, unit root test, and cointegration analysis. Course 216 is strongly recommended as preparation.

Prerequisite: Enrollment is restricted to applied economics and finance graduate students.

ECON 220A - Development Economics I (5)

Studies the microeconomics of development. Topics may include health and nutrition, education, intra-household economics, formal and informal risk-coping mechanisms, savings, credit, agriculture, institutions, and service delivery, and corruption. (Formerly Development Economics: Theory and Cases.)

ECON 220B - Development Economics II (5)

Methodological class covering how to build a good theoretical model, how to derive a convincing test of a model, and how to structurally estimate a model. Examples drawn largely (though not exclusively) from the study of economic development. (Formerly Development Economics: Theory and Cases.)

ECON 221A - Advanced Methods in Macroeconomics I (5)

Covers major issues in monetary economics, focusing on the core theoretical models employed in monetary economics. Topics include: money in general equilibrium; money-in-the-

utility function approaches; cash-in-advance models; search-based models; welfare costs of inflation; optimal inflation tax; informational frictions in monetary economies; financial and credit frictions; nominal price and wage frictions; time-dependent and state-dependent models of price adjustment; and money in new Keynesian models. (Formerly Advanced Monetary Economics I.)

Prerequisite: Prerequisite(s): ECON 205A, ECON 205B, and ECON 205C, or by permission of instructor. Enrollment is restricted to graduate students.

ECON 221B - Advanced Methods in Macroeconomics II (5)

Covers major issues in empirical macroeconomics, focusing on structural vector auto-regressions (VARs) and solution and estimation of dynamic stochastic general equilibrium (DSGE) models. Topics include: recursive identification; long-run restrictions; sign-restrictions; Bayesian estimation of DSGE models; model comparisons; non-linear solution methods for DSGE models; particle filters and other advanced topics related to empirical macroeconomics. (Formerly Advanced Monetary Economics II.)

Prerequisite: Prerequisite(s): ECON 205A, ECON 205B, and ECON 205C, or by permission of instructor. Enrollment is restricted to graduate students.

ECON 221C - Advanced Methods in Macroeconomics (5)

Focuses on the use of disaggregated data on firms, establishments, workers, and households in macroeconomic research. Students learn about commonly used administrative records, survey data, quasi-experiments, etc., and their use to answer questions of interest to macroeconomists.

Prerequisite: Prerequisite(s): ECON 204C, ECON 205C, ECON 211C. Enrollment is restricted to economics graduate students.

ECON 231 - International Financial Management (5)

Equips students with the analytical tools they need to make informed financial decisions and manage the risks that businesses face in today's competitive global environment. Covers the fundamental theories and real-world examples in international financial markets.

Prerequisite: Prerequisite(s): ECON 233. Enrollment is restricted to graduate students in Applied Economics and Finance.

ECON 233 - Finance I (5)

Applications of economic analysis in private finance. Topics include risky choice and intertemporal choice theory, asset pricing models, efficient market hypotheses, market institutions, and derivative securities. Course 200 is strongly recommended as preparation.

Prerequisite: Enrollment is restricted to applied economics and finance graduate students.

ECON 234 - Financial Institutions and Markets (5)

This course examines the evolving microstructure of financial markets, instruments, and institutions. Topics include the role of banks and other financial intermediaries and the trading practices for domestic and international financial instruments, including equity, debts, futures, and options.

Prerequisite: Prerequisite(s): ECON 233.

ECON 235 - Corporate Finance (5)

Application of modern financial theory to corporate decision making. Topics covered include capital budgeting and the firm's investment decision, capital structure, dividend policies, and the implications of corporate governance for enterprise financial goals.

Prerequisite: Prerequisite(s): ECON 233.

ECON 236 - Financial Engineering (5)

This course surveys the financial risks faced by corporation, banks, and other financial institutions that arise from changes in interest rates, foreign exchange rates, commodity prices, and stock prices. It examines the characteristics, payoffs, and pricing of financial derivatives and other instruments for managing risk, including options, forwards, futures, swaps, structured notes, and asset-backed securities. Several cases will be used to illustrate how actual firms solve financial risk management problems.

Prerequisite: Prerequisite(s): ECON 233. Enrollment is restricted to applied economics and finance graduate students.

ECON 238 - Market Design: Theory and Pragmatics (5)

Surveys the principles of mechanism design and applies them to a variety of 21st Century markets, e.g., for energy, spectrum, finance, online ads, and predictions. Student teams develop new applications.

Prerequisite: Enrollment is restricted to graduate students.

ECON 239 - Current Topics in Finance (5)

Topics in finance selected by the instructor.

Prerequisite: Prerequisite(s): ECON 233.

ECON 240A - International Trade I (5)

The theory of international trade and commercial policy. Both traditional analyses and recent developments are covered. Topics include both normative and positive theoretical analyses, as well as empirical testing of theory. (Formerly Advanced International Trade Theory I.)

Prerequisite: Enrollment is restricted to graduate students. ECON 204A, ECON 204B, and ECON 204C are strongly recommended as preparation.

ECON 240B - International Trade II (5)

The second quarter of a two-quarter sequence which focuses on advanced research topics in trade and its intersection with applied microeconomics. The course is theoretical and

empirical, and designed to acquaint students with recent developments in the field. Research topics include: trade and development; political economy of trade policies; trade and labor markets; trade and environment; theories, determinants, and implications of foreign direct investments; economic geography; and spatial/urban economics. (Formerly Advanced International Trade Theory II.)

Prerequisite: Prerequisite(s): ECON 240A.

ECON 241A - Advanced International Finance I (5)

Covers the foundations of international macroeconomics. Topics include international borrowing and lending, the role of international financial markets, exchange rate economics, wealth and income in open economies, and macroeconomic policy interdependence.

ECON 241B - Advanced International Finance II (5)

Covers major topics in international finance and open economy macroeconomics, focusing on contemporary theoretical and empirical analysis. Topics include: international capital flows, financial crises, exchange rate economics, financial policy intervention, and fiscal and monetary policies in open economies.

ECON 241C - Advanced International Finance III (5)

Covers contemporary research topics in international macroeconomics and finance, including advances in both theoretical analysis and empirical methods. Specific topics on international macroeconomics, finance, and policy vary. Courses 202 and 203 or 205A-B-C strongly recommended as preparation.

ECON 249A - International Trade and Development Policy I (5)

Focuses on a range of real-life issues in international trade and development. Topics include North American Free Trade Agreement (NAFTA), the semiconductor industry, the Boeing-Airbus aircraft trade problems, the World Trade Organization (WTO) and developing countries, U.S./Japan trade, trade and the environment, and U.S./China trade.

Prerequisite: Enrollment is restricted to graduate students.

ECON 249B - International Trade and Development Policy II (5)

Emphasizes government policies to promote growth. Topics include the Washington Consensus, the East Asian model, and recent policy changes in East Asia, Latin America, Eastern Europe, and the former Soviet Union.

Prerequisite: Prerequisite(s): ECON 249A. Enrollment is restricted to graduate students.

ECON 250A - Applied Microeconomics I (5)

Theory of the role of public sector expenditures and taxes in market economies. Analyzes efficiency and equity arguments for government intervention. Topics include the role of public debt and deficits in economies, international effects of tax and spending policies, and economic theories of public sector

decision making. ECON 204A and ECON 205A are strongly recommended as preparation. Students cannot receive credit for this course and course 150. (Formerly, Public and Applied Economics I.)

ECON 250B - Applied Microeconomics II (5)

Covers topics in applied microeconomics, including public, labor, education, environmental, and health. Discusses advanced econometric techniques used to establish causal identification. Students read and evaluate current research and develop an independent research agenda. (Formerly Public and Applied Economics II.)

ECON 250C - Applied Microeconomics III (5)

Covers topics in applied microeconomics, with an emphasis on labor topics not covered in 250A and 250B. Students read and evaluate current research, discuss applications of advanced econometric techniques for causal identification, and develop an independent research agenda.

Prerequisite: Prerequisite(s): ECON 204C and ECON 211C. ECON 250A and ECON 250B are strongly recommended as preparation. Enrollment is restricted to economics Ph.D. students.

ECON 259A - Cost-Benefit Analysis (5)

Applications of economic analysis in public finance, largely from the revenue side: taxation. The issues considered include the effects of taxation on consumer welfare, consumption, labor, capital, production, growth. Course 200 is strongly recommended as preparation. Students cannot receive credit for this course and course 153.

ECON 259B - Public Policy Analysis (5)

Applications of welfare and microeconomic theory and methodology to the public expenditure question: cost-benefit. Effects of the taxes discussed in course 259A and sophisticated tools used in the face of these and other distortions with regard to measurement of benefits, costs, and the discount rate. Course 200 strongly recommended as preparation.

ECON 270 - Advanced Topics in Applied Microeconomics (5)

Advanced topics and current research in microeconomic theory and applications, including topics on decision theory, game theory, behavioral economics, and general equilibrium analysis.

ECON 272 - Evolutionary Game Theory (5)

Reviews static equilibrium concepts, games of incomplete information, and the traditional theory of dynamic games in discrete time. Develops recent evolutionary game models, including replicator and best reply dynamics, and applications to economics, computer science, and biology. Prerequisite(s): upper-division math courses in probability theory are strongly recommended. Cannot receive credit for this course and ECON 166B or CSE 166B.

ECON 274 - Workshop in Macroeconomics and Monetary

Economics (3)

For Ph.D. students in economics who are at the early stages of their research careers as well as for those who are engaged in dissertation work in macroeconomics and monetary economics. Topics vary from quarter to quarter depending on the interests of participants.

Prerequisite: Prerequisite(s): ECON 205A, ECON 205B, and ECON 205C, or by consent of instructor. Enrollment is restricted to graduate students.

ECON 275 - Workshop in Applied Microeconomics (3)

For Ph.D. students in economics who are at the early stages of their research careers as well as for those who are engaged in dissertation work in applied microeconomics or other empirical work. Topics vary from quarter to quarter depending on the interests of participants.

Prerequisite: Enrollment is restricted to graduate students.

ECON 276 - Workshop in Experimental Economics (3)

For economics doctoral students who are at early stages of their research careers as well as those engaged in dissertation research using laboratory experiments and related techniques. Topics vary from quarter to quarter depending on the interest of participants. Enrollment is by permission of instructor.

ECON 290 - Topics in International Economics (5)

Covers several advanced topics in the history of international economics, international trade, and international finance. Topics include imperfect competition and trade, strategic trade policies, increasing returns, and the pattern of trade, economic geography, exchange rate target zones, and balance of payment crises. Topics vary from year to year. Courses 204A-B-C and 205A-B-C are strongly recommended as preparation.

ECON 291 - Workshop in Applied Economics (5)

Experience in applied projects, report writing and presentation, drawing on previous coursework.

ECON 293 - Field Study (5)

Students will undertake analytical projects in public or private institutions. The material covered must be different from that of the thesis topic.

ECON 294A - Applied Economics and Finance Laboratory (2)

Practical experience in managing computerized data sets and running statistical packages. Covers STATA and R. (Formerly Applied Economics Laboratory.)

Prerequisite: Enrollment is restricted to applied economics and finance graduate students.

ECON 294B - Applied Economics and Finance Seminar (2)

Bi-weekly seminars designed to present students with current working applications in various fields of applied economics and finance. (Formerly Applied Economics Seminar.)

Prerequisite: Enrollment is restricted to applied economics and finance graduate students.

ECON 294C - Economics Guest Seminar Series (1)

Bi-weekly seminars by visiting faculty and industry leaders who are experts in their fields provide in-depth insight on topics relevant to graduate students in economics.

Prerequisite: Enrollment is restricted to graduate students.

ECON 294D - Applied Economics Seminar (2)

Weekly seminar designed to present students with current working applications in various fields of applied economics.

Prerequisite: Enrollment is restricted to economics Ph.D. students.

ECON 295 - Directed Reading (5)

Reading in research area of student interest, with faculty supervision through weekly discussion. Students submit petition to sponsoring agency. (Formerly course 295A.)

ECON 296A - Third Year Ph.D. Seminar (5)

Student presentations of literature and/or original research in areas of student research interest. Student discussion of presentations under faculty supervision.

Prerequisite: Prerequisite(s): ECON 204C, ECON 205C, ECON 211B, ECON 240A, ECON 240B, ECON 241A, and ECON 241B.

ECON 297A - Independent Study (5)

Independent study and research under faculty supervision. Students submit petition to sponsoring agency.

ECON 297B - Independent Study (10)

Independent study and research under faculty supervision. Students submit petition to sponsoring agency.

ECON 297C - Independent Study (15)

Independent study and research under faculty supervision. Students submit petition to sponsoring agency.

ECON 298A - Master's Thesis Research (5)

May be taken once to meet course requirements for the master's degree. Students submit petition to sponsoring agency.

ECON 298B - Master's Thesis Research (10)

May be taken once to meet course requirements for the master's degree. Students submit petition to sponsoring agency.

ECON 298C - Master's Thesis Research (15)

May be taken once to meet course requirements for the master's degree. Students submit petition to sponsoring agency.

ECON 299A - Doctoral Thesis Research (5)

Research toward Ph.D. dissertation under faculty supervision. Prerequisite(s): advancement to candidacy and students submit petition to sponsoring agency. (Formerly, course 298 Dissertation Research)

ECON 299B - Doctoral Thesis Research (10)

Research toward Ph.D. dissertation under faculty supervision. Prerequisite(s): advancement to candidacy and students submit petition to sponsoring agency. (Formerly, course 298 Dissertation Research)

ECON 299C - Doctoral Thesis Research (15)

Research toward Ph.D. dissertation under faculty supervision. Prerequisite(s): advancement to candidacy and students submit petition to sponsoring agency. (Formerly, course 298 Dissertation Research)

EDUC - EDUCATION

Lower-Division

EDUC 50A - CAL Teach 1: Science and Mathematics (2)

Introductory seminar exploring secondary students, teaching, and schools in the context of science and/or mathematics instruction. Concurrent participation in a secondary school internship required. Course material supports and enhances students' placement experiences. Prerequisite(s): Acceptance into CAL Teach and concurrent participation in a secondary school internship in a science or math classroom.

EDUC 50B - CAL Teach 1: Mathematics (2)

Introductory seminar exploring secondary students, teaching, and schools in the context of mathematics instruction. Concurrent participation in a secondary school internship required. Course material supports and enhances students' placement experiences. Prerequisite(s): Acceptance into CAL Teach and concurrent participation in a secondary school internship in a math classroom.

EDUC 50C - CAL Teach 1: Science (2)

Introductory seminar exploring secondary students, teaching, and schools in the context of science instruction. Concurrent participation in a secondary school internship required. Course material supports and enhances students' placement experiences. Prerequisite(s): Acceptance into CAL Teach and concurrent participation in a secondary school internship in a science classroom.

EDUC 60 - Introduction to Education: Learning, Schooling, and Society (5)

Explores the foundations of learning and teaching, the social and political forces within schools and school systems in the U.S., and the educational policies and practices in culturally and linguistically diverse communities.

EDUC 99 - Tutorial (5)

Students submit petition to sponsoring agency.

Upper-Division

EDUC 100A - Cal Teach 2: Science and Mathematics (2)

Examines students, schools, and science and/or mathematics instruction with emphasis on developing an instructional project aligned with state-mandated content standards. Concurrent participation in a secondary school internship required. Course content supports and enhances students' internship experience.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; EDUC 50A, EDUC 50B, or EDUC 50C; and acceptance into the Cal Teach program. Enrollment is restricted to sophomores, juniors, and seniors.

EDUC 100B - Cal Teach 2: Mathematics (2)

Examines students, schools, and mathematics instruction with emphasis on developing an instructional project aligned with state-mandated content standards. Concurrent participation in a secondary school internship required. Course content supports and enhances students' internship experience.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; EDUC 50A, EDUC 50B, or EDUC 50C; and acceptance into the Cal Teach program. Enrollment is restricted to sophomores, juniors, and seniors.

EDUC 100C - Cal Teach 2: Science (2)

Examines students, schools, and science instruction with emphasis on developing an instructional project aligned with state-mandated content standards. Student must concurrently participate in a K-12 school internship. Concurrent participation in a secondary school internship required. Course content supports and enhances students' internship experience.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; EDUC 50A, EDUC 50B, or EDUC 50C; and acceptance into the Cal Teach program. Enrollment is restricted to sophomores, juniors, and seniors.

EDUC 102 - Education, Media, and Society (5)

Focusing on ways the media (both news and the entertainment industry) portrays schools, teachers, and students to the public, investigates the way society views education, the way education is presented in the media, and the way education is influenced by society.

Prerequisite: Enrollment is restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor.

EDUC 104 - Ethical Issues and Teaching (5)

Emphasizes a philosophical exploration of the moral complexities of teaching. Students read theoretical investigations of these complexities, and examine case studies that pose difficult moral questions and illuminate the dilemmas of everyday life in classrooms. Course is grounded in a dialogical approach to learning.

Prerequisite: Enrollment restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor.

EDUC 115 - K-12 Student Assessment (5)

Provides an overview of educational testing. Appropriate use and interpretation of standardized, classroom achievement and special needs assessments are examined. Issues on fair testing of diverse populations of students are discussed within each topic area.

Prerequisite: Enrollment restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor.

EDUC 120 - The Arts in Schools: Aesthetic Education Theory and Practice (5)

Explores the historical legacy of the arts within education; considers aesthetic education as an inter-arts philosophical and practical endeavor; studies alternatives to the current situation of the arts in education; develops theory, curricula and methods necessary to teach the arts. Addresses both elementary and secondary teaching in the arts. Meets third-course requirements.

Prerequisite: Enrollment restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor.

EDUC 125 - Multicultural Children's Literature for Elementary Classrooms (5)

Offers opportunities for undergraduate and graduate students to learn about fundamental aspects of children's literature, increase their knowledge of range and quality of children's literature, enhance their understanding of multicultural children's literature, and develop ways to integrate children's literature into elementary- and middle-school curriculum areas.

Prerequisite: Enrollment is restricted to junior and senior education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission.

EDUC 126 - Foundations of Literacy Learning: Contemporary Perspectives (5)

Offers an overview of historical and contemporary perspectives regarding literacy learning in America. Using a socio-cultural lens and research findings to analyze instructional practices, it provides foundational knowledge for potential teachers and policy makers regarding literacy education.

Prerequisite: Prerequisite(s): EDUC 60 and EDUC 180.

EDUC 128 - Immigrants and Education (5)

Research and theory on the education of immigrant students. Major topics include the Americanization movement and America's changing demography, identity maintenance and change, home-school relations, and educators' roles in meeting the needs of culturally and linguistically diverse student populations.

Prerequisite: Enrollment is restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor.

EDUC 135 - Gender and Education (5)

Addresses the changing but continuing patterns of unequal expectations, opportunities, and treatment throughout the educational system for all students, female and male, who do not match a standard model of gender performance.

Prerequisite: Enrollment is restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor.

EDUC 140 - Language, Diversity, and Learning (5)

Explores the intersection between language, diversity, and education to examine the education of youth who have been historically underserved by schools. Topics include dialect and register variation; language policy; and sociocultural perspectives on learning/teaching of language.

Prerequisite: Enrollment is restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor.

EDUC 141 - Bilingualism and Schooling (5)

Introduces participants to issues related to the schooling of students who speak languages other than or in addition to English. Uses a multidisciplinary perspective to understand the circumstances these students face in schools and considers approaches and policies that best meet their needs.

Prerequisite: Enrollment is restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education

concentration, or biology B.A. bioeducation, or by permission of instructor.

EDUC 160 - Issues in Educational Reform (5)

Explores a variety of perspectives on key educational policy issues including desegregation, bilingual education, affirmative action, charter schools, national and state curriculum standards, student assessment and the assessment and certification of teachers.

Prerequisite: Enrollment is restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor.

EDUC 162 - Critical Youth Studies in Education (5)

Examines youth as a social construction, relation, and achievement to understand the everyday lives, experiences, learning, and education of youth. Explores the development, histories, cultures, politics, and resistance of youth in education, focusing on race, gender/sexuality, class, and their intersections.

Prerequisite: Enrollment restricted to junior and senior education minors.

EDUC 164 - Urban Education (5)

Focuses on urban schooling through critical readings, fieldwork, group projects, and extensive writing. Students explore how socialization, marginalization, and assimilation impede or support academic success, how class intersects with race, and how culture affects one's orientation to education.

Prerequisite: Enrollment restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor.

EDUC 166 - Technology and Education (5)

Explores the history of technology in education from approximately 1950 to the present, addressing the interpersonal, epistemological, and pedagogical differences between digital and analog learning. Although no programming experience is required, participants will create an instructional application.

Prerequisite: Enrollment is restricted to junior and senior education and STEM minors or by permission of instructor.

EDUC 170 - East Asian Schooling and Immigration (5)

Focuses on an historical and contemporary study of education in Japan, China, Korea, Hong Kong, and Taiwan, and the adaptation to schooling in the U.S. of immigrant families from those cultures. Topics include the effects on schooling of language acquisition, religion and cultural practices, family patterns, socioeconomic status, career aspirations, and parental expectations. (Formerly *Schools and Asian Cultures*.)

Prerequisite: Enrollment is restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor.

EDUC 171 - South and Southeast Asian Schooling and Immigration (5)

Historical and contemporary study of education in India, Vietnam, Cambodia, Laos, and the Philippines, and the adaptation to schooling in the U.S. of immigrant families. Topics include: effects of language acquisition; religion and cultural practices; family patterns; socioeconomic status; career aspirations; and parental expectations.

Prerequisite: Enrollment is restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor.

EDUC 173 - Seminar in Critical Pedagogy (5)

Philosophical and pedagogical exploration of relationships among oppression, power, society, education, and change. Examines how history, power, economics, and discrimination shape societal perspectives and schooling practices, and considers ways to transform education.

Prerequisite: Enrollment is restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor.

EDUC 174 - Ethnographic Research in Schools and Communities (5)

Explores ethnographic research as an important path for future teachers in understanding how diverse communities provide and support schooling at all levels.

Prerequisite: Prerequisite(s): EDUC 60 and EDUC 180. Enrollment is restricted to junior and senior education or STEM minors or by permission of instructor.

EDUC 177 - Teaching Culturally and Linguistically Diverse Students Math and Science (5)

Examines equity issues in the learning and teaching of math and science in culturally and linguistically diverse school settings. Draws on multicultural, bilingual, and math/science education perspectives. Intended for undergraduate majors considering a K–12 teaching career. Satisfies an elective requirement for the minor in education program. Prior completion of course 180 is advised.

Prerequisite: Enrollment is restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor.

EDUC 178 - Advanced Educational Studies (5)

Advanced academic development, field research, and guided experiential learning for students planning to work in education. Enrollment is restricted to juniors and seniors. May be applied only once to the minor.

Prerequisite: Enrollment is restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor.

EDUC 180 - Introduction to Teaching (5)

Designed to encourage students to think about teaching in new ways. Assumptions about teaching and schooling are examined as well as considering what it takes to teach so that children learn and understand. Not a course in how to teach, but an opportunity to reconsider what teaching should try to accomplish and what kinds of learning teachers should foster. Practicum in the schools of 30 hours per quarter required.

Prerequisite: Prerequisite(s): EDUC 60. Enrollment is restricted to education minors or by permission of instructor.

EDUC 181 - Race, Class, and Culture in Education (5)

Examines the schooling experience and educational attainment of racial/ethnic minority students in the U.S. Focuses primarily on domestic minorities. Addresses issues of variability between and within minority groups and the role of cultural, structural, and psychological factors in the educational attainment of these students.

Prerequisite: Enrollment is restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor.

EDUC 182 - American Teacher (5)

Examines multiple and competing images of teachers and, more specifically, notions of the good teacher; also explores social, cultural, historical, and policy context of teachers' work in the U.S.

Prerequisite: Enrollment is restricted to education or STEM minors, physics education majors, or students with math education concentration or Earth sciences science education concentration, or biology B.A. bioeducation, or by permission of instructor.

EDUC 183 - Children's Mathematical Thinking (5)

Provides an introduction to children's mathematical thinking and an overview of major themes, issues, and questions that researchers in mathematics education have studied in relation to children's mathematical thinking.

Prerequisite: Prerequisite(s): EDUC 60. Enrollment is restricted to education or STEM minors; physics education majors; students with math education concentration; Earth

Sciences science education concentration; biology B.A. bioeducation; or by instructor permission.

EDUC 185B - Introduction to Mathematics Education (5)

Provides an introduction to principles and practices for mathematics education; examines how research on learning and teaching mathematics informs approaches to teaching mathematics; provides an introduction to national and state standards, mathematics curricula, and other current issues in mathematics education.

Prerequisite: Prerequisite(s): MATH 11A and MATH 11B, or MATH 19A and MATH 19B; or MATH 20A and MATH 20B; or AM 11A and AM 11B; or equivalent courses (by instructor approval); or by permission of the instructor.

EDUC 185C - Introduction to Teaching Science (5)

An introduction to the principles and practices for teaching science in secondary classrooms. Course examines theoretical and practical approaches to teaching science, provides an introduction to national and state standards and an overview of science curricula and current issues in science teaching.

Prerequisite: Enrollment is restricted to juniors, seniors, or education minors or by permission of instructor.

EDUC 185L - Introduction to Teaching: Cal Teach 3 (3)

Supplements theoretical and practical introduction to the teaching of science or mathematics with subject-pedagogical approaches. Concurrent participation in an advanced Cal Teach internship provides context to apply theory and practical techniques. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; course 50A, 50B, or 50C; course 100A, 100B, or 100C; course 185B or 185C. Enrollment restricted to juniors and seniors or education minors, or by permission of instructor.

EDUC 187 - Cognition and Instruction (5)

Addresses the question, How do people learn? by examining theories of learning and research on cognition, learning, and instruction.

Prerequisite: Enrollment is restricted to juniors, seniors, or education minors, or by permission of instructor.

EDUC 194 - Group Projects (5)

Students submit petition to sponsoring agency.

EDUC 194F - Group Projects (2)

Students submit petition to sponsoring agency.

EDUC 197A - Cal Teach Special Project (1)

Work with K-12 students on science or math projects, ideally involving inquiry-based learning. Site supervision provided by a credentialed teacher. Project-dependent reading and writing assignments negotiated with instructor. Projects will be offered as available or initiated by student. Enrollment is by interview only. Prerequisite(s): course 50A, 50B, or 50C. Enrollment is restricted to majors in the physical and

biological sciences and majors in the school of engineering or by permission of instructor.

EDUC 197B - Cal Teach Special Project (2)

Work with K-12 students on science or math projects, ideally involving inquiry-based learning. Site supervision provided by a credentialed teacher. Project-dependent reading and writing assignments negotiated with instructor. Projects will be offered as available or initiated by student. Enrollment is by interview only. Prerequisite(s): course 50A, 50B, or 50C. Enrollment is restricted to majors in the physical and biological sciences and majors in the school of engineering or by permission of instructor.

EDUC 197C - Cal Teach Special Project (3)

Work with K-12 students on science or math projects, ideally involving inquiry-based learning. Site supervision provided by a credentialed teacher. Project-dependent reading and writing assignments negotiated with instructor. Projects will be offered as available or initiated by student. Enrollment is by interview only. Prerequisite(s): course 50A, 50B, or 50C. Enrollment is restricted to majors in the physical and biological sciences and majors in the school of engineering or by permission of instructor.

EDUC 198 - Independent Field Study (5)

Students submit petition to sponsoring agency.

EDUC 198F - Independent Field Study (2)

Students submit petition to sponsoring agency.

EDUC 199 - Tutorial (5)

Students submit petition to sponsoring agency.

EDUC 199F - Tutorial (2)

Students submit petition to sponsoring agency.

Graduate

EDUC 200 - Beginning Student Teaching (5)

A required course that introduces students to the diverse cultural and linguistic settings of today's classrooms. Classroom practices, instructional strategies, and analysis are emphasized. First course in the student teaching placement series. Placements are used to examine and apply teaching methods while developing classroom management skills. Class meetings include discussion and demonstration of teaching methods. (Formerly Applied Classroom Analysis and Methods: Beginning Student Teaching.)

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 201 - Intermediate Student Teaching (5)

Designed to provide students enrolled in the UCSC teacher education program a coherent, integrated, pre-professional experience in public school classrooms. Students assume part-

time student teaching responsibilities totalling 14–16 hours per week under the direct supervision of an exemplary classroom teacher. Weekly seminars and ongoing supervision by department staff are required.

Prerequisite: Prerequisite(s): EDUC 200. Enrollment is restricted to MA/credential students.

EDUC 201A - Intermediate Student Teaching: Single Subject (5)

Provides advanced pre-professional experience for single subject teaching candidates who progressively assume full-time responsibility for public school student teaching beginning in winter quarter. Taken concurrently with course 201. Weekly supervision and seminars with teacher supervisors are required.

Prerequisite: Prerequisite(s): EDUC 200. Enrollment is restricted to MA/credential students.

EDUC 202A - Advanced Student Teaching (5)

Designed for students who have extensive field and course experience in education, and who wish to qualify for the single-subject or multiple-subject teaching credential by undertaking a quarter of full-time, supervised student teaching.

Prerequisite: Prerequisite(s): EDUC 201. Enrollment is restricted to M.A./credential students.

EDUC 202B - Advanced Student Teaching (5)

Designed for students who have extensive field and course experience in education, and who wish to qualify for the single-subject or multiple-subject teaching credential by undertaking a quarter of full-time, supervised student teaching.

Prerequisite: Prerequisite(s): EDUC 201. Enrollment is restricted to M.A./credential students.

EDUC 202C - Advanced Student Teaching (5)

Designed for students who have extensive field and course experience in education, and who wish to qualify for the single-subject or multiple-subject teaching credential by undertaking a quarter of full-time, supervised student teaching.

Prerequisite: Prerequisite(s): EDUC 201. Enrollment is restricted to M.A./credential students.

EDUC 203 - Teaching English Language Development: Foundations, Approaches, and Strategies (5)

This course will help future educators develop a practical theory for teaching English as a second language in K-5 schools. Topics include the theoretical foundation for language acquisition; current trends and research in the field; the role of culture in teaching English learners; language assessment; and the design of instructional units. Also focuses on teaching social studies to English learners. Enrollment restricted to M.A./credential students. (Formerly, Methods of English Language Development: Multiple Subject Credential)

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 204 - Methods of English Language Development: Single Subject (5)

Course helps future educators develop a practical theory for teaching English in the elementary and secondary schools to students who speak other languages. Topics include current trends in the field, language assessment, and the design of instructional units.

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 205 - Teaching, Learning, and Schooling in a Diverse Society (5)

Required for master's students in education; offered in summer. Three basic units comprise the subject matter: teaching/learning, with such topics as development, learning, pedagogy, and socialization theories; second, schooling, as the context of teaching/learning both in its existent structures and its reform movements; third, the sociocultural context in which educational institutions exist, topics such as cultural and historical forces, political and economic condition, family, and community structures. (Formerly Teaching, Learning, and Schooling in a Diverse Society: Multiple Subject.)

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 206 - Teaching, Learning, and Schooling: Single Subject (5)

Required for master's students in education; offered in summer. Three basic units comprise the subject matter: teaching/learning, with such topics as development, learning, pedagogy, and socialization theories; schooling, as the context of teaching/learning both in its existent structures and its reform movements; and the sociocultural context in which educational institutions exist, including topics such as cultural and historical forces, political and economic conditions, family, and community structures.

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 207 - Social Foundations of Education (5)

Offered in summer. A sustained inquiry into the social, political, economic, and historical foundations of schools with an emphasis on community attitudes toward education. Student narratives of engagement and resistance will provide a basis for insights and interventions useful to educators.

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 208 - Portfolio Development (2)

Offered in summer. Provides student and faculty adviser with time to confer over the completion of the required portfolio.

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 210 - Health, Safety, and Community (2)

Offered in summer. Addresses the preparation of teachers for creating a supportive, healthy environment for student learning. Covers topics related to physical, emotional, and social health.

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 211 - Teaching Special Populations in the General Education Classroom (2)

Addresses the preparation of teachers for meeting needs of special populations within the general education setting. Covers basic knowledge, skills, and strategies. (Formerly Topics in Elementary Education: Teaching Special Populations.)

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 212A - Bilingualism and Biliteracy: History, Politics, Theory, and Practice (2)

Taught in Spanish. Prepares future bilingual teachers to be knowledgeable about history, politics, theory, and practices related to bilingual instructional programs. Topics: second-language acquisition, bilingual-program models, equity pedagogy.

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 212B - Bilingualism and Biliteracy: Language, Literacy and Content Instruction (2)

Taught in Spanish. Prepares future bilingual teachers to teach language, literacy, and the content areas in ways that address the needs of culturally and linguistically diverse students. Topics: literacy in two languages; academic language; assessment.

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 212C - Bilingualism and Biliteracy: Community and School Partnerships (2)

Taught in Spanish. Provides opportunities for future bilingual teachers to develop culturally relevant practices that build collaboration between the school, students' families, and community. Topics: Latino culture and history, school-parent communication.

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 213 - Child and Adolescent Development for Educators (2)

Offered in summer. Addresses theories of child and adolescent development and how these theories apply to

student success in school. Topics include: cognitive, social, emotional, and physical development, and how this knowledge influences decisions teachers make about instruction and their interaction with students.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 214 - Contemporary Issues in Education (2)

Addresses current issues in California's educational landscape. Potential topics include the teaching of LGBTQ curricula, understanding youth gang participation, the initiation of ethnic studies courses, school funding and school district budgets, and new technologies for student assessment.

Prerequisite: Enrollment is restricted to MA/Credential graduate students.

EDUC 217 - Topics in Elementary Education: Physical Education (2)

Offered in summer. Examines pedagogical understanding in teaching physical education. Introduces candidates to theoretical and research basis in physical education and content standards and frameworks. Also investigates and presents instructional practices.

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 218 - Topics in Elementary Education: Visual Arts (2)

Offered in summer. Examines pedagogical understanding in teaching visual arts. Introduces candidates to theoretical and research basis for teaching visual arts and content standards and frameworks. Also investigates and presents instructional practices.

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 219 - Topics in Elementary Education: Performing Arts (2)

Offered in summer. Examines pedagogical understanding in teaching performing arts. Introduces candidates to theoretical and research basis for teaching performing arts and content standards and frameworks. Also investigates and presents instructional practices.

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 220 - Reading and Language Arts for Elementary Classrooms (5)

This course provides both a theoretical and practical foundation for literacy instruction, emphasizing reading and language arts instruction in grades K–8. Interactive instruction and field experience will be used to examine curricula, methods, materials, and literacy evaluation.

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 221 - Science Learning and Teaching in Elementary

Classrooms (5)

Examines constructivist and sociocultural approaches to the learning and teaching of science in elementary classrooms, including beliefs about the nature of science and theories of how children learn science. Provides a critical overview of curricula, instructional theories, and multiple approaches to teaching the big ideas in elementary science. Students are billed a materials fee.

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 222 - Mathematics Learning and Teaching in Elementary Classrooms (5)

This course is required for the multiple subject credential. Examines constructivist and sociocultural approaches to the learning and teaching of mathematics in elementary classrooms, including the nature of mathematics and theories of how children learn mathematics. Provides an introduction to mathematics teaching standards and a critical overview of curricula, instructional theories, and multiple approaches to teaching the big ideas in elementary mathematics.

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 225 - Reading Across the Curriculum in Middle School and Secondary (5)

Offered in summer. Provides a theoretical and practical foundation for teaching reading within content area instruction in middle school and secondary classrooms. Field experiences and interactive instruction will facilitate learning about strategies, curricula, methods, materials, and observation. Intended for students pursuing a single subject credential.

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 226 - English Teaching: Theory and Curriculum (5)

Required for the single subject English credential student. Examines sociocultural approaches to the learning and teaching of English in secondary classrooms, including theories of how children learn English language, literature, and composition.

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 227 - English Teaching for Secondary Classrooms (5)

Prepares English single subject credential candidates for student teaching in winter and spring. Course focuses on developing curricula and strategies in the content area. Through classroom placements, students observe and apply techniques to develop curriculum units used in student teaching.

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 228 - Math Education: Research and Practice (5)

Examines research on the learning and teaching of mathematics. Topics include the nature of mathematics cognition and learning, how children learn mathematics, mathematical discourse, and perspectives on addressing diversity in mathematics classrooms. Course is required for M.A./credential students in secondary (single subject) mathematics and of Ph.D. students in mathematics education.

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 229 - Teaching Mathematics in the Secondary Classroom (5)

Examines constructivist and sociocultural approaches to teaching mathematics in the secondary classroom. Course will provide an introduction to mathematics teaching standards and a critical overview of curricula, instructional theories, and multiple approaches to teaching the big ideas in secondary mathematics. Required for mathematics secondary credential.

Prerequisite: Prerequisite(s): EDUC 228. Enrollment is restricted to MA/credential students.

EDUC 230 - Science Education: Research and Practice (5)

Examines theoretical approaches to the learning and teaching of science including the nature of scientific knowledge, theories of how children learn science, approaches to scientific discourse, and perspectives on addressing diversity in science classrooms. Course is required for single subjects science credential.

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 231 - Teaching Science in the Secondary Classroom (5)

Examines constructivist and sociocultural approaches to teaching science in secondary classrooms. Course will provide a critical overview of curricula, instructional theories, and multiple approaches to teaching the big ideas in science. Students are billed a materials fee.

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 232 - Social Science: Theory and Curriculum (5)

Required for the single subject social science credential student. Tracks both the implicit and explicit connections between theory and practice, illustrating that theory suggests best practice while practice informs theory-formation and testing.

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 233 - Social Science Teaching for Secondary Classrooms (5)

Prepares social science single subject credential candidates for student teaching in winter and spring. Course focuses on developing curricula and strategies in the content area.

Through classroom placements, students observe and apply techniques to develop curriculum units that are used in student teaching.

Prerequisite: Enrollment is restricted to MA/credential students.

EDUC 235 - Introduction to Educational Inquiry (5)

Addresses foundational knowledge needed to understand and conduct educational inquiry and research. Topics include epistemology in the human sciences, philosophical foundations of modern research strategies, and general classes of research investigations in education.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 236 - Quantitative Research Methods (5)

Provides an introductory-level knowledge of quantitative research methods in educational settings. Students learn the foundations of quantitative data theory, general logic behind statistical inference, and specific methods of data analysis in educational contexts. (Formerly Quantitative Methods in Educational Research.)

Prerequisite: Enrollment is restricted to graduate students.

EDUC 237 - Qualitative Research Methods (5)

Graduate level introduction to qualitative methods, with special attention to ethnographic research on schooling. Moves from overview of different methods, through examination of selected studies, to discussion of issues in research design, data collection, analysis, and writing.

Prerequisite: Enrollment is restricted to graduate students; priority is given to graduate students in education.

EDUC 250 - Teaching and Teachers (5)

Examines the historical, socio-political, and research contours of the teaching profession. Investigates histories of teaching and teacher's work in the 19th and 20th centuries. Analyzes the contemporary era of teachers and teaching in the United States.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 251 - Analysis of Activity and Interaction in Educational Settings (5)

Analyzes topics, which vary systematically from year to year, including analysis of classroom interaction, video recording and transcription, coding and analysis of discourse data, and software programs for qualitative analysis.

Prerequisite: Prerequisite(s): EDUC 237. Enrollment is restricted to graduate students.

EDUC 252 - Hermeneutics of Education (5)

Investigates philosophical hermeneutics to deeply interrogate education. Addresses such questions as: What is hermeneutics? How is education a hermeneutic enterprise? How does knowing hermeneutics deepen the ability to engage in education research?

Prerequisite: Enrollment is restricted to graduate students.

EDUC 253 - Research Design in Mathematics and Science Education (5)

Examines multiple approaches to designing research studies in mathematics and science education. Introduces multiple types of research designs and principles used by education researchers examining mathematics/science learning and teaching.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 254 - Critical and Alternative Paradigms in Education Research (5)

Examines theoretical foundations of critical and alternative research paradigms commonly used in education, including critical ethnography, participatory research, counter-storytelling, and social-design experiments. Examines critiques of qualitative/quantitative research from feminist and critical theory; surveys how such critiques have informed the development of new paradigms in education research; and explores the benefits and limits of selected alternative paradigms.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 255 - Intermediate Quantitative Methods (5)

Focuses on the applied statistical modeling and analysis of educational data (large-scale data sets), not on the mathematical foundations of science. Students learn to address quantitative research questions using general linear model (GLM) statistical methods. GLM includes regression analysis, analysis of variance (ANOVA), and analysis of covariance (ANCOVA). Students learn statistics by doing statistics.

Prerequisite: Prerequisite(s): introductory statistics course (EDUC 236 or equivalent). Enrollment is restricted to graduate students.

EDUC 256 - Intermediate Qualitative Analysis (5)

Emphasizes the analysis of qualitative data in education research and introduces interpretive analytical approaches for its use with empirical data, the use of coding software for ethnographic analysis, and video recording and transcription. (Formerly Advanced Qualitative Analysis in Education Research.)

Prerequisite: Enrollment is restricted to graduate students.

EDUC 260 - The Teacher and The School: An Investigation of Related Practice, Reform, and Research (5)

Explores empirical and theoretical interconnections between teachers and teaching on the one side, and schools as situated organizations on the other. The course examines these various interconnections in relation to contemporary educational research, practice, and policy reform.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 261 - Thinking and Learning (5)

Examines multiple theoretical perspectives on thinking, learning, and teaching; the development of the whole person in a variety of cultural contexts; the roles thinking, learning, and teaching play in that development; and how researchers' and educators' conceptions shape instruction. (Formerly Thinking, Learning, and Teaching.)

Prerequisite: Enrollment is restricted to graduate students.

EDUC 262 - Social and Cultural Context of Education (5)

Application of anthropological and sociological theories to study of education. Examines social, cultural, and linguistic context of schooling with particular attention to role of race, class, culture, power, and language in influencing schooling outcomes.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 263 - Educational Reform (5)

Provides students with multiple analytic perspectives from which to examine important educational issues by analyzing political, historical, and philosophical origins of educational reform in the U.S. and internationally. (Formerly Foundations of Educational Reform.)

Prerequisite: Enrollment is restricted to graduate students.

EDUC 264 - Research on Teacher Development and Teacher Education (5)

Addresses personal and professional development of teachers. Explores models of teacher education with specific attention to methods and processes by which teachers can be better prepared to work with culturally and linguistically diverse students.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 265 - Teacher as Educational Policy Maker (5)

Focuses on the role teachers play in making/implementing educational policy. Addresses how this topic is implicated in enhancing the educational opportunities available to students who, historically, have been underserved by schools.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 266 - Program Evaluation and Action Research in Educational Reform (5)

Overview of the purpose of and practice in program evaluations in a variety of contexts with a specific focus on educational settings. Students learn the techniques of program evaluation; the historical and theoretical context of program evaluations, including its relation to experimental research; and how action research can be used in conducting field-based evaluations. Students should be familiar with basic quantitative and qualitative methodologies.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 268 - Schools, Communities, and Families (5)

Examines the nexus of schools, communities, and families, and, in particular, how collaboration across institutional boundaries can facilitate school and community reform.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 271 - Theoretical Perspectives on Learning and Using Literacy (5)

Examines theoretical perspectives, educational issues, and scholarship related to use and development of literacy among diverse populations, particularly those who have not fared well in U.S. schools.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 272 - Language in Education and Society (5)

Investigates discipline of sociolinguistics and explores actual ways in which sociolinguistics has become a useful lens for better understanding teaching, learning, and schooling. Conduct own sociolinguistic analyses of data collected for culminating project. (Formerly Sociolinguistics in Education.)

Prerequisite: Enrollment is restricted to graduate students.

EDUC 273 - Language Acquisition, Bilingualism, and Education (5)

Foundations of first- and second-language acquisition and bilingualism with emphasis on implications for education in linguistically diverse settings. Topics include linguistic, cognitive, sociolinguistic, and sociocultural approaches to development of languages and the nature of individual and societal bilingualism.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 274 - Language and Power in Education (5)

Examines relationships between sociopolitical struggles and language/language practices. Students study ways in which Marxism, critical theory, and post structuralism have represented links between language and power, and investigate contemporary studies of language and power in education.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 276 - Theory and Practice of Writing (5)

Explores first and second language-writing theory, research, and practice, especially relating to language minority students and others considered academically under-prepared. Focuses on educational settings from pre-school settings including families and communities.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 278 - Critical Exploration of Reading Theory and Practice (5)

Doctoral seminar that examines historical and current research on reading processes and instructional practices. Intensive study of factors affecting the development of proficient,

engaged, and reflective readers who can acquire new knowledge from text.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 279 - Directed Reading (5)

Directed reading that does not involve a final paper. Students submit a petition to the course-sponsoring agency. May be repeated for credit up to four times. Enrollment is restricted to graduate students.

EDUC 279F - Directed Reading (2)

Directed reading that does not involve a final paper. Students submit a petition to the course-sponsoring agency. May be repeated for credit up to four times. Enrollment is restricted to graduate students.

EDUC 280 - Language and Literacy Across Disciplines (5)

Considers and critiques conceptualizations of the language used for academic pursuits, from the early years of schooling to higher education. Focuses on implications for research and practice related to the education of students in linguistically diverse schools and societies. (Formerly Academic Language.)

Prerequisite: Enrollment is restricted to graduate students.

EDUC 281 - Conceptual Change in Science and Mathematics (5)

Examines approaches in cognitive science, mathematics education, and science education to documenting student conceptions in science and mathematics, defining conceptual change, and describing relationship between conceptual change and learning with understanding.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 282 - Informal Learning in Sciences and Mathematics (5)

Explores research on learning outside of school in multiple settings such as museums, after-school clubs, aquariums, workplaces, and homes. Readings draw from multiple fields and disciplines, including cognitive psychology, cognitive anthropology, cognitive science, education, museum education and evaluation, science, and mathematics education. Examine theoretical approaches to describing and understanding how people learn science and mathematics outside of school, empirical studies documenting learning in multiple non-school settings, and diversity issues in out-of-school settings.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 283 - Equity and Social Justice in Mathematics and Science Education (5)

Examines the theory, research, policy and practice of social justice and equity in mathematics and science education in local, national, and international contexts. Emphasizes the promotion of equity and critical mathematics and science literacy in schools and communities.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 284 - Gender in Mathematics and Science Education (5)

Explores basic aspects of gender in the fields of mathematics and science education. Discusses historical trends, current dilemmas, and how science and mathematics block or enable access for women.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 285 - Culture and Learning (5)

Examines multiple approaches to the study of the relation between culture and learning. Readings include historical and contemporary perspectives from cognitive science, cognitive anthropology, cross-cultural psychology, cultural psychology, and socio-cultural theories as frameworks for the study of culture and learning.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 286 - Research in STEM Education (5)

Focuses on particular issues of theoretical importance to research in mathematics and science education. Topics vary from year to year. Particular issues in cognition, learning, teaching, curriculum, and assessment in mathematics and science education may be covered. (Formerly Special Topics in Math and Science Education.)

Prerequisite: Enrollment is restricted to graduate students.

EDUC 287 - Issues in Educational Assessment (5)

Familiarizes students with the basic concepts of educational assessment and explores issues related to the design and implementation of educational assessment as well as the application of educational assessment in educational research.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 288 - Ethnographies of Education (5)

Offers opportunity to critique a range of book-length ethnographic studies of education focusing on relationship between culture, learning, and schooling in the U.S. with comparative studies from other countries.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 289 - School Organization (5)

Applies multiple perspectives drawn from organizational theory, highlighting important aspects of organization of schools, including their operational environment, instructional organization, and professional and bureaucratic dimensions.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 290 - CHAT and Educational Practice and Research (5)

Introduction to cultural-historical activity theory (CHAT) based on work of Vygotsky, Bakhtin, and contemporary developments of their ideas. Explores the utility of CHAT as a framework for thinking about educational practice and research.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 291 - Globalization and Transnationalism in Education (5)

Examines educational access and advancement in several nations affected by globalization, national policies, and localized identity and opportunity structures. Attention to language and cultural expectations relevant to research in international contexts and how this knowledge provides reflection on the American condition. (Formerly Comparative and International Education.)

Prerequisite: Enrollment is restricted to graduate students.

EDUC 292 - Ideology and Education (5)

Philosophical study of the theory of ideology from Marx to the present and how ideologies (racism, sexism, classism, linguisticism, abilityism) become embodied, reproduced, resisted, and transformed (and particularly the role of education therein).

Prerequisite: Enrollment is restricted to graduate students.

EDUC 293A - Research Apprenticeship (2)

Research apprenticeship under guidance of faculty member during first or second year of doctoral studies. May also be taken in the third year and beyond. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

EDUC 293B - Research Apprenticeship (5)

Research apprenticeship under guidance of faculty member during first or second year of doctoral studies. May also be taken in the third year and beyond. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

EDUC 294 - Second-Year Research Project (5)

Doctoral students work with faculty advisors to plan, carry out, and write up small independent research project during second year of graduate studies. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

EDUC 295 - Critical Perspectives on Education (5)

Investigates critical theories in education. Situates the themes against and within critical theory and philosophic foundations of Paulo Freire's theory of liberation education. Elaborates these themes within the discourses on critical race theory and education, and feminism and education. (Formerly Critical Theories of Education.)

Prerequisite: Enrollment is restricted to graduate students.

EDUC 296 - Educational Policy and the Context of Teachers' Work (5)

Focuses on both the conceptual and methodological developments in the study of policy and on the research relation to the policy context of teachers' work.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 297 - Independent Study (5)

Students submit petition to sponsoring agency.

EDUC 297F - Independent Study (2)

Students submit petition to sponsoring agency.

EDUC 298 - TA Apprenticeship (2)

Students work with a faculty member who is teaching an undergraduate or MA/Credential course. Students will not be responsible for final grades, narrative evaluations, or holding discussion section. The expected course time commitment is limited to 2-3 hours per week, plus class meeting time. Students gain perspectives and practices of teaching undergraduate and graduate courses, working with the instructor on lesson planning, class instruction, and grading some student work.

Prerequisite: Enrollment is restricted to graduate students.

EDUC 299 - Thesis Research (5)

Students submit petition to sponsoring agency.

ENVS - ENVIRONMENTAL STUDIES

Lower-Division

ENVS 15 - Natural History of the UCSC Campus (2)

Introduces students to the range of natural species and communities occurring on the UCSC campus. All class time is spent outside, and each week a different area of campus is visited. Course 24 is recommended.

ENVS 17 - Curation of Natural History Collections (2)

Introduction and training in the skills needed to create, manage, and exhibit natural history collections, including plants, insects, fungi, birds, mammals, reptiles, and amphibians.

ENVS 18 - Natural History Illustration (5)

Students gain proficiency in illustration media, and acquire training in the essential skills needed to create natural-history inspired illustrations. Students create illustrations and paintings by studying organisms in the Norris Center for Natural History collections, as well as those living on and around campus. Some experience in basic drawing and/or natural-history sketching is recommended. Students are billed a materials fee.

ENVS 19 - Topics in Natural History (3)

Students learn the fundamentals of organismal biology and ecology through observations in the field, museum specimens,

and field journaling. Class focuses on a particular taxonomic group or natural community, such as reptiles, fungi, insects, coastal prairie, or chaparral.

ENVS 23 - The Physical and Chemical Environment (5)

Provides an overview of the physical and chemical environment of planet Earth. Fundamental chemistry and physics is introduced in the process of learning about Earth in a holistic way. The influence of human societies on the global environment is one focus of discussion. Earth's many spheres are explored first: the lithosphere; the atmosphere; the hydrosphere, and the ecosphere. Then global cycles of carbon, nitrogen, and several other elements are studied in the context of basic sciences and societal issues.

ENVS 24 - General Ecology (5)

Covers principles of ecology including limits to species abundances, evolutionary ecology, population dynamics, community interactions and patterns, and ecosystem patterns and dynamics.

Prerequisite: Prerequisite(s): AM 3 or AM 6, or MATH 3 or higher; or mathematics placement examination (MPE) score of 300 or higher; or AP Calculus AB exam score of 3 or higher; ENVS 23 recommended as prerequisite to this course.

ENVS 25 - Environmental Policy and Economics (5)

Introduces the policy and economic dimensions of some pressing environmental challenges. Uses examples from population, water, climate change, and other topics to examine the economic underpinnings of environmental problems, the process of environmental policy-making, and the trade-offs in different policy solutions.

ENVS 65 - Introduction to Fresh Water: Processes and Policy (5)

Introduction to freshwater resources from multiple scientific and policy perspectives. After a review of basic concepts, water issues affecting cities, farms, open space, and multiple-use landscapes are studied. Students cannot receive credit for this course if they have previously received credit for course 165.

ENVS 80B - The Ecological Forecast for Global Warming (5)

A broad overview of the impacts of human activities on the global climate system. Topics include how climate affects the distribution of ecosystems, the influence of global climate change on biodiversity, ecosystem function, and consequences for the human enterprise.

ENVS 80C - Climate Change Science and Policy (5)

An interdisciplinary overview of the science and policy of global climate change. Topics include Earth system science, climate change impacts on the environment, climate change policy, and the future of climate change politics from the local to the global.

ENVS 83 - Environmental Studies Internship (5)

A supervised off-campus learning experience related to environmental problem solving. Focuses on initial experiences in applied work and specific skill development. Students may be placed individually or with a team in government agencies, private organizations, citizen action groups.

ENVS 99 - Tutorial (5)

Directed reading, supervised research, and organized projects relating to environmental problems. May be repeated for credit with consent of the chairperson of Environmental Studies Department. Students submit petition to sponsoring agency.

ENVS 99F - Tutorial (2)

Provides for department-sponsored directed reading, supervised research, or organized project for lower-division students under the direct supervision of a faculty sponsor. May not be counted toward major requirements. Students submit petition to sponsoring agency.

Upper-Division

ENVS 100 - Ecology and Society (3)

Introduction to environmental issues in an interdisciplinary matrix. Focuses on three issues at the intersection of ecological questions and social institutions: agroecology and sustainable agriculture; population growth, economic growth, and environmental degradation; and biodiversity conservation and land management. Reviews the important roles of disciplinary abstraction and of the application of that knowledge to context-dependent explanations of environmental problems.

Prerequisite: Prerequisite(s): ENVS 23 or CHEM 1A; ENVS 24 or BIOE 20C; ENVS 25; and STAT 7 and STAT 7L, or ECON 113 or OCEA 90; and one from: ANTH 2, SOCY 1, SOCY 10, SOCY 15, PHIL 21, PHIL 22, PHIL 24, PHIL 28, or PHIL 80G. Concurrent enrollment in ENVS 100L is required.

ENVS 100L - Ecology and Society Writing Laboratory (5)

Required writing lab accompanying course 100. Students are introduced to writing in different styles and for different audiences typical of the ecosystem-society interface. Course 100 writing assignments are developed, written, and revised in conjunction with the lab. W credit is granted only upon successful completion of course 100.

Prerequisite: Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements. Concurrent enrollment in ENVS 100 is required.

ENVS 104A - Introduction to Environmental Field Methods (5)

A course in the process of field research and monitoring, with emphasis on use of the scientific method; experimental design, data handling, statistical analysis and presentation;

and basic field methodologies. Application of basic field skills, including habitat description; methods for sampling plants, animals, soils, water, and microclimate; and observational and manipulative techniques to address ecological, conservation, and management questions.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; concurrent enrollment in ENVS 104L and previous or concurrent enrollment in ENVS 100 and ENVS 100L is required, or by permission of instructor.

ENVS 104L - Field Methods Laboratory (2)

Students directly observe elements of natural history and ecological process; design and implement field studies based on lectures; deploy the methods discussed in lectures; and collect data to analyze, interpret, and report in written and oral forms.

Prerequisite: Concurrent enrollment in ENVS 104A is required.

ENVS 106A - Natural History of Birds (5)

The evolution, taxonomy, physiology, behavior, ecology, and management of birds. Lecture, discussion, field format. Birds observed in habitats including bay, marsh, meadow, and forest. Evaluations based on a field journal and examinations. Students are billed a materials fee.

Prerequisite: Prerequisite(s): previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor. ENVS 105 or BIOL 138 are recommended.

ENVS 107A - Natural History Field Quarter (5)

A 15-unit field course that uses California wild lands to develop skills of natural history observation and interpretation. Students gain the ability to identify plants, animals, vegetation types, and landscapes, as well as address the complex issues of preservation and management of these resources. Enrollment by interview. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L; concurrent enrollment in courses 107B and 107C required. Students are billed a materials fee.

ENVS 107B - Natural History Field Quarter (5)

A 15-unit field course that uses California wild lands to develop skills of natural history observation and interpretation. Students gain the ability to identify plants, animals, vegetation types, and landscapes, as well as address the complex issues of preservation and management of these resources. Enrollment by interview. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L; concurrent enrollment in courses 107A and 107C required.

ENVS 107C - Natural History Field Quarter (5)

A 15-unit field course that uses California wild lands to develop skills of natural history observation and interpretation. Students gain the ability to identify plants, animals, vegetation types, and landscapes, as well as address the complex issues of preservation and management of these

resources. Enrollment by interview. Prerequisite(s): Previous or concurrent enrollment in courses 100 and 100L; concurrent enrollment in courses 107A and 107B required.

ENVS 108 - General Entomology (5)

Introduction to entomology including anatomy, physiology, systematics, evolution, behavior, and reproduction of the world's most diverse group of organisms. These topics are illustrated in several contexts, from the importance of insects as disease vectors to the historical and contemporary uses of insects by humans.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L required, or by permission of instructor.

ENVS 108L - General Entomology Laboratory (3)

Laboratory sections are devoted to the identification of insects. Individual collections representing 15 orders, eight identification of 60 families, and use of taxonomic keys for positive designations required.

Prerequisite: Concurrent enrollment in ENVS 108 is required.

ENVS 110 - Institutions, the Environment, and Economic Systems (5)

Debate about environmental policy is often couched in economic terms. Environmental issues have become questions of political economy, as they influence international and domestic policy and reflect on the functioning of the market system. Examines the assumptions and implications of alternative approaches to political economy, as these pertain to questions of environmental policy and political institutions.

Prerequisite: Prerequisite(s): previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 115A - Geographic Information Systems and Environmental Applications (5)

Introduction to geographic information systems (GIS) as the technology of processing spatial data, including input, storage and retrieval; manipulation and analysis; reporting and interpretation. Emphasizes GIS as a decision support system for environmental and social problem solving, using basic model building, experimental design, and database management. Students cannot receive credit for this course and course 215A.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 115L and ENVS 100 and ENVS 100L, or permission of instructor. Course in computer science, Earth science, math, or geography recommended.

ENVS 115B - Intermediate Geographic Information Systems (GIS) (5)

Evaluates advanced technologies of processing spatial data, spatial theory, and application to unique geographic problems, data manipulation and analysis, and reporting and interpretation. Emphasizes GIS as a decision-support system

for environmental and social problem solving, using basic model building, experimental design, and database management.

Prerequisite: Prerequisite(s): ENVS 115A, ENVS 100, and ENVS 100L. A previous course in computer science, Earth science, mathematics, or geography is recommended. Enrollment is restricted to environmental studies majors.

ENVS 115C - Advanced Geographic Information Systems (5)

Explores more advanced training in spatial theory and methods and their application to unique geographic problems. Emphasis given to advanced aspects of spatial data analysis and building custom GIS solutions.

Prerequisite: Prerequisite(s): ENVS 115A and ENVS 115B. Enrollment is restricted to sophomores, juniors, and seniors.

ENVS 115L - Exercises in Geographic Information Systems (2)

Exercises in Geographic Information Systems and Remote Sensing that demonstrate the development of digital geographic data. Students gain hands-on experience with developing datasets, using imagery to create GIS layers, performing spatial analysis, and utilizing GPS technology. Emphasis placed on environmental applications. Students cannot receive credit for this course and course 215L. Students are billed a materials fee.

Prerequisite: Concurrent enrollment in ENVS 115A required.

ENVS 120 - Conservation Biology (5)

Introduces biological and anthropogenic influences on the diversity and scarcity of organisms. Explores the mathematical models and research tools that provide the foundation for many conservation and management decisions regarding endangered and/or declining species. Topics explored in the context of various examples of conservation decision-making in the real world.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 121 - Landscape Ecology (5)

Investigates topics about the causes and consequences of spatial heterogeneity and pattern in natural- and human-dominated systems. This course provides a foundational understanding of how landscape pattern is generated and relates to populations, communities, and ecosystem processes.

Prerequisite: Prerequisite(s): previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of the instructor.

ENVS 122 - Tropical Ecology and Conservation (5)

An introduction to the ecological processes, principles, and players of tropical ecosystems, and to conservation issues facing tropical American forests. We will look at how tropical ecosystems work, roles of humans in shaping them, and current conservation opportunities and dilemmas.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 123 - Animal Ecology and Conservation (5)

Advanced course in animal ecology and conservation focusing on the ecology, behavior, biogeography, and evolution of vertebrates.

Prerequisite: Prerequisite(s): ENVS 120. Previous or concurrent enrollment in ENVS 100 and ENVS 100L; or by permission of instructor.

ENVS 129 - Integrated Pest Management (5)

Provides an extensive coverage of applied ecology, pest control technology, and the social, political, and economic factors regulating the ideologies and practice of pest management. Topics include agroecosystem design and population regulation of insects, weeds, vertebrates, and pathogens; field monitoring, chemical and biological control; economic thresholds, decision-making processes, and the role of agribusiness.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 129L - Integrated Pest Management Laboratory (2)

Field trips and field exercises that demonstrate the practice of integrated pest management techniques. Individual and group projects provide hands-on experience with field sampling techniques, pest identification, recognition of biological control agents, experimental design, interview techniques, data interpretation and field report writing.

Prerequisite: Prerequisite(s): concurrent enrollment in ENVS 129.

ENVS 130A - Agroecology and Sustainable Agriculture (5)

Ecological concepts and principles are applied to the design and management of sustainable agroecosystems. Alternatives for agriculture are discussed in terms of ecosystem structure and function. A weekly three-hour lab is required.

Prerequisite: Prerequisite(s): Concurrent enrollment in ENVS 130L and previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 130B - Justice and Sustainability in Agriculture (5)

Agricultural sustainability is examined as a complex set of interactions between ecological, social, and economic factors. Drawing case studies from U.S. agriculture, course examines the social justice implications of historical and current agri-food system dynamics. (Formerly Principles of Sustainable Agriculture.)

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 130C - Field Experiences in Agroecology and

Sustainable Food (5)

Research and practice in agroecology and sustainable food systems. Students gain multidimensional understanding of agroecology through study at the UCSC farm, guest speakers, field trips, and interdisciplinary readings. Students participate in research projects and learn about methods, and study design and statistical analysis. Students are billed a materials fee.

Prerequisite: Prerequisite(s): previous or concurrent enrollment in ENVS 100 and ENVS 100L.

ENVS 130L - Agroecology and Sustainable Agriculture Laboratory (2)

Laboratory and field exercises to train in the analysis of ecological processes in agricultural systems, with a focus on the quantification of ecological sustainability. Experimental design, analysis, and data interpretation are emphasized. Students are billed a materials fee.

Prerequisite: Concurrent enrollment in ENVS 130A is required.

ENVS 131 - Insect Ecology (5)

Advanced course in ecology featuring insect-plant interactions such as herbivory, pollination, and the effects of plants on insect population dynamics. Lectures emphasize current controversies in ecological theory and relate theory to application.

Prerequisite: Prerequisite(s): previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 133 - Agroecology Practicum (5)

Lectures and demonstrations are combined with field applications to give students direct experience and knowledge of sustainable agriculture and horticulture practices and principles. UCSC Farm and Garden are the living laboratories for testing agroecological principles. Emphasis is placed on small-farm systems. May be applied to major only once. Students are billed a materials fee.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 135 - Sustainable Aquaculture (5)

Current international and local aquaculture systems and science and practices needed to steer them toward sustainability. Critically looks at practices, analyzes environmental, social, economic, and human health effects of sustainable systems. Includes UCSC Aquaculture lab, farm visits, private sector, guests.

Prerequisite: Prerequisite(s): ENVS100 and ENVS100L.

ENVS 138 - Field Ethnobotany (5)

Lectures, laboratory, and fieldwork examine field botany from a human ecology perspective. Students have the opportunity

to learn the skills of field botany and plant identification through the study of plants that are of major significance for human cultures. The emphasis of field skills is on applications to sustainable management of natural resources.

Prerequisite: Prerequisite(s): ENVS 130A and ENVS 130L, or by permission of instructor. Concurrent enrollment in ENVS 138L required.

ENVS 140 - National Environmental Policy (5)

An overview of all major federal environmental policy domains. Analyzes political, social, economic, and other forces influencing federal (and some state) public policy responses to land use, natural resources, pollution, and conservation dilemmas.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 141 - Ecological Economics (5)

Application of economic analysis to natural resource policy and management. Topics include welfare economics, property rights and externalities, natural resource valuation, exhaustible and renewable resources, and sustainable development.

Prerequisite: Prerequisite(s): ECON 1 is strongly recommended as preparation. Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 142 - Sustainable Energy (5)

Explores the renewable and fossil fuel energy resources, with an emphasis on interactions with food and water systems. Explores opportunities for improving efficiency, reducing pollution, and increasing access through technology advances, policy, and consumer decisions. (Formerly Energy Politics and Policy.)

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 143 - Sustainable Development: Economy, Policy, and Environment (5)

Considers whether and how global poverty can be alleviated without irreparably damaging the environment. Examines interactions among population, economic growth, poverty, global consumption ethos, property rights systems, global economy, state capacity, and environmental damage. Scrutinizes impact of various developmental strategies adopted during the past 50 years on poverty, governance, and the environment.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 144 - Global Climate Change Politics (5)

Explores the central political questions surrounding global governance of climate change. It focuses on the United Nations Framework Convention on Climate Change (UNFCCC) as the international hub of climate politics, and in particular explores issues of equity and justice in this forum.

Prerequisite: Prerequisite(s): Environmental Studies students, previous or concurrent enrollment in courses ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 145 - Green Cities (5)

Are cities an environmental savior or an engine of pollution? This course considers what makes a truly green city and analyzes innovative urban policies in areas such as energy, transportation, buildings, and waste management.

Prerequisite: Prerequisite(s): previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of the instructor.

ENVS 146 - Water Quality: Policy, Regulation, and Management (5)

Building on prior preparation, the course provides an in-depth examination of American water-quality policy, regulation and management. In addition to a detailed understanding of pollutant-discharge permitting, students learn about nonpoint source water pollution and its regulatory remedies.

Prerequisite: Prerequisite(s): ENVS 100 and ENVS 100L; and ENVS 140, ENVS 149, ENVS 150 or ENVS 165.

ENVS 147 - Environmental Inequality/Environmental Justice (5)

Reviews research on race, class, and differential exposure to environmental hazards. Shows how environmental inequality has, from the start, been an essential feature of modernity. Situates the environmental-justice movement in the history of American environmentalism. Students cannot receive credit for this course and Sociology 185.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 149 - Environmental Law and Policy (5)

Surveys a wide range of topics in environmental law, including state and federal jurisdiction, administrative law, separation of powers, state and local land use regulation, public land and resource management, pollution control, and private rights and remedies. Students read a large number of judicial cases and other legal documents.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 150 - Coastal and Marine Policy (5)

Examines key legal, policy, and institutional frameworks that govern the use and stewardship of coastal and marine areas

and resources. Primary focus is on the U.S., although attention is also devoted to international laws and institutions. Students cannot receive credit for this course and course 250.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENV 100 and ENVS 100L, or by permission of instructor.

ENVS 151 - Environmental Assessment (5)

Introduction to California land use planning law and practice, and the theory, practice, and public policy aspects of environmental assessment, using the California Environmental Quality Act (CEQA) as a model. The National Environmental Policy Act (NEPA) and other environmental and planning legislation also considered. Covers elements of State law and regulations, environmental impact assessment requirements, and practical procedures for preparing and evaluating CEQA documents, with case studies that exemplify legal, regulatory and public policy and practice aspects of the assessment process.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 152 - International Environmental Politics (5)

Examines international law and politics through the lens of cooperation on transboundary environmental problems, ranging from acid rain to toxic chemicals to biodiversity loss and climate change, which have become pressing political concerns in our increasingly globalized economy.

Prerequisite: Prerequisite(s): previous or concurrent enrollment in courses ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 153 - Globalization and the Environment: Trade Complements and Conflicts (5)

Explores the relationship between international trade and environmental protection. Centrally, we will consider the question: are trade liberalization and environment protection antithetical or conducive? We will use the theoretical literature on regime overlap to help us better consider this question.

Prerequisite: Prerequisite(s): previous or concurrent enrollment in courses ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 154 - Amazonian Cultures and Conservation (5)

Overview of human societies in the Amazon from both a historical and contemporary perspective. Topics include indigenous resource management, deforestation, conservation politics, culture, and economic change.

Prerequisite: Prerequisite(s): previous or concurrent enrollment in ENVS 100 and ENVS 100L, or permission of instructor.

ENVS 156 - Environmental Action Through Writing (5)

Guided practice in writing skills useful to environmental activists. Assignments emphasize thinking quickly, revising adeptly, researching resourcefully, and tempering powerful passions with careful arguments. Toward the development of effective individual voices, students read each other's drafts as well as the published work of established writers. Enrollment priority will be given to students who have not taken course 157.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 157 - Writing in the Natural Sciences (5)

Guided practice in writing effectively about science and natural history for a variety of audiences. Assignments emphasize reporting first-hand observations, explaining processes and phenomena, understanding scientific papers, and writing about scientific and technical subjects for a general audience. Enrollment priority will be given to students who have not taken course 156.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 158 - Political Ecology and Social Change (5)

The object is to provide a rigorous grounding in the method of political ecology and to demonstrate how this approach has been used in environmental analysis and problem solving by environmental social movements.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 159 - Nature Literature (5)

Introduction to 19th- and 20th-century American writers who have influenced our understanding of humans' place in the natural world. Readings include original works as well as biographical and critical texts. Discussions, field trips, and writing assignments emphasize active learning.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 160 - Restoration Ecology (5)

A multidisciplinary overview of restoring degraded ecosystems. Among the topics addressed are linkages between ecological principles and restoration, planning and implementing restoration projects, evaluating restoration success, and case studies of restoration of specific ecosystem types. Participation in one work day is required.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 161A - Soils and Plant Nutrition (5)

Provides fundamentals of soils and plant nutrition. The physical, biological, and chemical components of soils are investigated in relation to their ecological functions, fertility to plants, and sustainable management.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 161L - Soils and Plant Nutrition Laboratory (2)

Practice analytical techniques for evaluation of physical, chemical, and biological properties of soils. Grow plants to observe some typical symptoms of plant nutrient deficiencies.

Prerequisite: Prerequisite(s): Concurrent enrollment in ENVS 161A.

ENVS 162 - Plant Physiological Ecology (5)

Describes how the environment affects plants through the linkages between water, energy, nutrients, photosynthesis, and plant growth. Demonstrates how plant recruitment, survival, and reproduction affect conservation and agriculture. Prior coursework in ecology and/or plant physiology is recommended.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 162L - Plant Physiological Ecology Laboratory (2)

Introduces techniques for the study of plant interactions with the physical environment. Examines the role of stress on energy budgets, water relations, photosynthesis, and reproductive allocation. Emphasizes experimental design, field techniques, and instrumentation during field trips to local chaparral and grassland ecosystems.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 163 - Plant Disease Ecology (5)

Introduction to ecological roles of plant diseases, including their importance in regulating plant population dynamics, community diversity, and system function in natural ecosystems; considerations of plant diseases in conservation ecology; and ecological approaches to managing diseases in agroecosystems. Students cannot receive credit for this course and course 263.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 163L - Plant Disease Ecology Lab (2)

Introduction to techniques for studying plant diseases, including detection, isolation, cultivation, and identification of important groups of plant pathogens, completing Koch's postulates; diseases assessment techniques; experimental manipulation of plant-pathogen systems; and basic epidemiological tools. One field trip required.

Prerequisite: Prerequisite(s): concurrent enrollment in ENVS 163 is required.

ENVS 164 - Projects and Practices in Soil Ecology (5)

Students learn soil ecological principles by carrying out inquiry-based projects and practices in land ecosystems (agroecosystems, forests and grasslands). UCSC reserves, farms, gardens, and greenhouses are the default living-laboratories for the course. The emphasis is on experiential learning of practical and technical skills in using soil methods.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of the instructor. Previous enrollment in ENVS 161 is recommended.

ENVS 165 - Sustainable Water Systems (5)

Concepts, vocabulary, and skills necessary to the analysis of freshwater issues are introduced from hydrology, ecology, law, economics, engineering, and other disciplines. The skills are then applied to case studies involving local, state, and international freshwater conflicts and crises. (Formerly Freshwater Issues and Policy.)

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 166 - Agroecosystem Analysis and Watershed Management (5)

Explores a range of approaches to examine agroecosystem function, watershed management, and concepts of sustainability. Uses a combination of lecture, demonstration, field work, and field trips to illustrate approaches to analysis of managed ecosystems behavior and the integration of biophysical and socio-political knowledge to aid in watershed management.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor; and ENVS 130A or ENVS 130B or ENVS 129 or ENVS 133 or ENVS 160 or ENVS 167.

ENVS 167 - Freshwater and Wetland Ecology (5)

Field and lecture course teaches the physical and biological patterns and processes in freshwater and wetland systems, primarily focusing on Central Coast systems from headwaters to coastal marshes.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 167L - Freshwater and Wetland Ecology Lab (2)

Provides basic skills to assess chemical, biological, and physical characteristics of freshwater creeks, rivers, and wetlands. These skills are needed in environmental consulting, municipal agencies engaging in water management or impacts on water, and regulatory agencies. Relies on methods in geomorphology, biogeochemistry, hydrology, and field biology. Students are billed a materials fee.

Prerequisite: Concurrent enrollment in ENVS 167 is required.

ENVS 168 - Biogeochemistry and the Global Environment (5)

Studies biogeochemical cycles and related environmental issues such as global environmental change, eutrophication, ecosystem degradation, and agricultural sustainability. Discusses transformation and movement of major nutrient elements in context of watershed ecology and societal implications. Students cannot receive credit for this course and course 268.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L required, or by permission of instructor.

ENVS 169 - Climate Change Ecology (5)

Advanced topics in atmospheric science and ecological theory. Topics include impacts on biodiversity, carbon sequestration, sustainable agriculture, and innovative solutions.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L required, or by permission of instructor.

ENVS 170 - Agriculture and Climate Change (5)

Agriculture contributes to and is affected by climate change. Through lectures and field trips, this course covers the impacts on crops and livestock; climate adaptation strategies in the United States and internationally; and agricultural policy responses to climate change.

Prerequisite: Prerequisite(s): previous or concurrent enrollment in ENVS 100 and ENVS 100L.

ENVS 171 - Topics in Environmental Studies (5)

Readings and discussions of primary literature on a current environmental topic. Emphasizes experiential learning and research. The topics vary; consult current course listings.

Prerequisite: Prerequisite(s): ENVS 100 and ENVS 100L, or by permission of the instructor.

ENVS 172 - Environmental Risks and Public Policy (5)

Introduces students to the dilemmas in public policy relating to the management of environmental risks, and discusses their underlying philosophical underpinnings. Explores emergent alternatives, such as the precautionary principle and alternatives assessment, and examines the relationship

between experts and the lay public in public controversies. (Formerly Science, Policy, and the Environment.)

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 173 - An Introduction to World Environmental History (5)

Introduces students to some of the central issues in world environmental history such as: human attitudes toward the natural environment; the role of human societies, their institutions and technologies in changing the face of the earth; and the historical impact of environmental and developmental policies on race, class, and gender differences in a variety of human communities across the world.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 176 - Vulnerability, Complex Systems, and Disasters (5)

Introduces students to the research on the relationship between vulnerability and disasters, and on complex systems including hazardous technologies. Explores perspectives on disasters in the literature on political ecology. Also examines relevant work of organizational sociology, and related fields including normal accident and high reliability organizational theories.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L, or by permission of the instructor.

ENVS 177 - Teaching Environmental Education (5)

Designed for environmental studies majors interested in teaching environmental education in the K-12 school system. Students investigate incorporation of environmental education in the classroom; design an environmental education school project; and are placed in a school where they observe environmental education in practice.

Prerequisite: Prerequisite(s): previous or concurrent enrollment in courses ENVS 100 and ENVS 100L, or by permission of instructor.

ENVS 179 - Environmental Interpretation (5)

A field course in theory and practice of environmental interpretation in parks, museums, and school programs with special attention to local natural history and children. Students work to define their own interpretive philosophy, skills, and style. A background in natural history and/or experience working with children is recommended.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in ENVS 100 and ENVS 100L or by permission of instructor. Enrollment in ENVS 184 is highly recommended.

ENVS 183 - Environmental Studies Internship (5)

A supervised off-campus learning experience related to environmental problem solving. Students may work with

government agencies, private organizations, citizen action groups, or in specialized apprenticeships on an individual or team basis. A significant, independently researched project is required. Internship intended for environmental studies majors. Prerequisite(s): previous or concurrent enrollment in courses 100 and 100L, and by permission of instructor. Students submit petition to course sponsoring agency.

ENVS 183A - Senior Internship (5)

First quarter of two-quarter senior internship exit requirement. Supervised off-campus learning experience related to environmental problem-solving. Students may work with government agencies, private organizations, citizen action groups, or in specialized apprenticeships on an individual or team basis. Students submit petition to course-sponsoring agency. Enrollment is restricted to environmental studies majors and the combined majors with Earth science, biology, and economics. Enrollment is by permission of instructor.

ENVS 183B - Senior Internship (5)

This course combines fieldwork at an off-campus agency and a comprehensive analytical paper produced for the agency. Equivalent to a thesis in terms of the depth and quality of the work expected. Prerequisite(s): course 183A. Students submit petition to course-sponsoring agency. Enrollment is restricted to environmental studies majors and the combined majors with Earth sciences, biology, and economics.

ENVS 184 - Environmental Studies Internship (2)

Supervised learning experience related to environmental problem solving. Students may work with government agencies, private organizations, citizen action groups, or in specialized apprenticeships on an individual or team basis. This 2-credit internship puts students in the field and offers them the experience of practicing environmental problem solving. This internship experience focuses on specific skill development.

ENVS 189 - Environmental Studies Research Seminar (1)

Research seminars presented weekly throughout the year by environmental studies faculty, visiting scholars, and graduate students. Students discuss content and methodology of research presented following each seminar. Students write critiques of some seminars.

ENVS 190 - Capstone Course: Environmental Problem Solving (5)

A synthetic course that draws on the knowledge and skills students bring from other courses in the major. Focuses on written and oral individual and group projects in which students must take the initiative. Emphasizes developing skills critical for students in their future careers.

Prerequisite: Prerequisite(s): ENVS 100 and ENVS 100L; Entry Level Writing and Composition requirements. Enrollment is restricted to senior environmental studies majors and the combined majors with Earth sciences, biology, and economics.

ENVS 191F - Community and Agroecology Seminar (2)

Interdisciplinary two-credit seminar designed for upper-division students who want to become involved in PICA (Program in Community and Agroecology) and to explore concepts of community and agroecology as they relate to sustainability. Also emphasizes development of leadership skills. Specific topics and readings change each quarter.

Prerequisite: Prerequisite(s): ENVS 91F, ENVS 130A, ENVS 130B, or ENVS 133, or equivalent experience.

ENVS 192 - Directed Student Teaching (5)

Teaching a lower-division seminar. (See course 42.)
Prerequisite(s): upper-division standing; permission of environmental studies faculty member and chairperson of department.

ENVS 194 - Teaching Environmental Studies (5)

This provides an opportunity to participate in the preparation and teaching of introductory environmental studies courses. Students will have significant responsibility in leading discussion sections. Students submit petition to sponsoring agency.

ENVS 194F - Teaching Environmental Studies (2)

Students facilitate discussions of course material in an introductory environmental studies course in conjunction with faculty and teaching assistants. May not count toward upper-division major requirements. Approval of the sponsoring agency and selection by the primary instructor of specific courses is required.

ENVS 195A - Senior Research (5)

First of a two-quarter senior thesis that results in drafting key thesis elements. Completion of this course does not satisfy the senior exit requirement. Continuation into 195B is contingent upon instructor approval after satisfactory completion of this course. Prerequisite(s): Completion of courses 100 and 100L, and Entry Level Writing and Composition requirements.

ENVS 195B - Senior Thesis Group (5)

Individually supervised senior research that results in a senior thesis. Must meet regularly with faculty sponsor to discuss progress of the project, and to receive academic and technical guidance. Students must submit electronic copies of the completed research and write-up. Satisfies the senior comprehensive requirement. Prerequisite(s): Completion of courses 100 and 100L and 195A.

ENVS 196 - Senior Seminar (5)

Readings and discussions of primary literature on a current environmental studies topic. Field or literature-based research projects (individual or group) writing multiple drafts resulting in a final paper. Topics vary yearly; consult current course listings. Enrollment by application with selection based on appropriate background and academic performance and by consent of instructor. Satisfies senior comprehensive requirement. Enrollment restricted to senior environmental

studies majors; senior environmental studies/biology combined majors; senior environmental studies / Earth sciences combined majors; and senior environmental studies / economics combined majors. Prerequisite(s): Entry Level Writing and Composition requirements.

ENVS 199 - Tutorial (5)

Advanced directed reading, supervised research, and organized projects relating to environmental problems. May be repeated for credit with consent of the chair of environmental studies. Students submit petition to sponsoring agency. Prerequisite(s): prior or concurrent enrollment in courses 100 and 100L.

ENVS 199F - Tutorial (2)

Provides for department-sponsored directed reading, supervised research, or organized project under the direct supervision of a faculty sponsor. May not be counted toward major requirements. Students submit petition to sponsoring agency.

Graduate

ENVS 201A - Research Approaches in Environmental Studies (5)

The first course of a two-quarter sequence that explores the range of scholarly traditions that inform the kinds of research common to the Environmental Studies Department at UCSC. (Formerly Keywords and Concepts: Geography and Ecology.)

Prerequisite: Enrollment is restricted to graduate students.

ENVS 201B - Environmental Studies In Practice (5)

The second course in a two-quarter sequence that is designed for beginning graduate students in environmental studies and in any other related field. Introduces interdisciplinary approaches of environmental studies and is an experiential, hands-on class focused on a specific environmental problem. (Formerly Keywords and Concepts: Biogeochemistry and Environmental Policy.)

Prerequisite: Enrollment is restricted to graduate students.

ENVS 210 - Political Ecological Thought and Environment (5)

Provides an introduction to social scientific analyses of the relationships between capitalistic development and the environment in the late 20th century. It has a dual purpose: First, to develop a contemporary historical understanding and sensibility of how economic change, new institutional configurations, and world scale processes are shaping interactions with the environment. Second, to examine some recent political social theoretical perspectives on nature-society relations and radical environmental and social movements.

Prerequisite: Enrollment is restricted to graduate students in environmental studies.

ENVS 215A - Geographic Information Systems and

Environmental Applications (5)

Introduction to geographic information systems (GIS) as the technology of processing spatial data, including input, storage and retrieval; manipulation and analysis; reporting and interpretation. Emphasizes GIS as a decision support system for environmental and social problem solving, using basic model building, experimental design, and database management. Students cannot receive credit for this course and course 115A.

Prerequisite: Concurrent enrollment in ENVS 215L is required. Enrollment is restricted to environmental studies graduate students.

ENVS 215B - Intermediate Geographic Information Systems (5)

Evaluates advanced technologies of processing spatial data, spatial theory, and application to unique geographic problems, data manipulation and analysis, and reporting and interpretation. Emphasizes GIS as a decision-support system for environmental and social problem solving, using basic model building, experimental design, and database management. Taught in conjunction with ENVS 115B. Students cannot receive credit for this course and course 115B.

Prerequisite: Prerequisite(s): ENVS 215A. Enrollment is restricted to environmental studies graduate students.

ENVS 215L - Exercises in Geographic Information Systems (2)

Exercises in Geographic Information Systems and Remote Sensing that demonstrate the development of digital geographic data. Students gain hands-on experience with developing datasets, using imagery to create GIS layers, performing spatial analysis, and utilizing GPS technology. Emphasis placed on environmental applications. Students cannot receive credit for this course and course 115L. Students are billed a materials fee.

Prerequisite: Concurrent enrollment in ENVS 215A is required. Enrollment is restricted to environmental studies graduate students.

ENVS 220 - Conservation Biology (5)

The principles of conservation biology, including a review of the core disciplines of demography, population genetics, island biogeography, and community ecology and discussion of area and edge effects, population viability, and ecosystem issues related to the maintenance of biological diversity, especially in fragmented landscapes.

Prerequisite: Enrollment is restricted to environmental studies graduate students.

ENVS 230 - Agroecology and Sustainable Agriculture (5)

The application of ecological concepts and principles to the design and management of agricultural systems. The long-term goal of sustainable agroecosystems is examined in economic, social, and ecological contexts.

Prerequisite: Enrollment is restricted to environmental studies graduate students.

ENVS 235 - Social Theories of Nature (5)

Intensive reading and discussion seminar on the treatment of nature in social theory. Focuses on major recent works which examine nature in social theory, in themselves, and in the context of the intellectual history of development of disciplinary discourses about nature. Students write critical reviews of assigned books and a research paper situating a particular book within its intellectual tradition. Prerequisite(s): interview with instructor to determine preparedness.

ENVS 240 - Public Policy and Conservation (5)

Introduction to political and economic approaches to policy analysis, with particular reference to natural resource scarcity, property rights, and environmental conservation. Case studies apply economic and policy process concepts to the management of public lands, biodiversity, and renewable resources.

Prerequisite: Enrollment is restricted to environmental studies graduate students.

ENVS 247 - Regional Approaches to Environmental Policy (5)

A research seminar combining theoretical issues in democratic theory, political economy, and planning with emerging concepts of bioregionalism. The focus is on institutional, scientific, and political innovations in managing the environment. Students evaluate current and historical proposals to regionalize environmental policy in the U.S.

Prerequisite: Enrollment is restricted to environmental studies graduate students.

ENVS 250 - Coastal Governance (5)

Introduction to major theories of ocean and coastal governance, with emphasis on those that underlie current policy and management approaches. Students analyze local, state, national, and international laws and policies, considering interactions across scales, levels of social organization, and institutions. Taught in conjunction with ENVS 150. Students cannot receive credit for this course and for ENVS 150.

Prerequisite: Enrollment is restricted to environmental studies graduate students.

ENVS 263 - Plant Disease Ecology (5)

Introduction to ecological roles of plant diseases, including their importance in regulating plant populations dynamics, community diversity and system function in natural ecosystems, considerations of plant diseases in conservation ecology, and ecological approaches to managing diseases in agroecosystems. Students cannot receive credit for this course and course 163.

Prerequisite: Prerequisite(s): one ecology course. Enrollment is restricted to graduate students.

ENVS 268 - Biogeochemistry and the Global Environment (5)

Studies biogeochemical cycles and related environmental issues such as global environmental change, eutrophication, ecosystem degradation, and agricultural sustainability. Discusses transformation and movement of major nutrient elements in context of watershed ecology and societal implications. Students cannot receive credit for this course and course 168.

Prerequisite: Enrollment is restricted to environmental studies graduate students.

ENVS 271 - Valuing the Environment (5)

Intensive seminar examining the normative underpinnings of environmental values. Draws on tools from analytical, ethical, and political philosophy to develop normative arguments concerning environmental inequality and justice, environmental preservation, and risk evaluation. Involves team projects in which students develop cases on controversial contemporary issues such as biotechnology. Prerequisite(s): interview only. Enrollment restricted to graduate students.

ENVS 272 - Qualitative Field Methods (5)

Introduces qualitative research approaches in environmental studies. Focuses on philosophies of science, epistemological debates, and specific approaches to qualitative methods. Course components include: field safety, research ethics, human subjects, training, research design and sampling, field observation and ethnographies, key informants, field notes, focus groups, oral histories, narrative research, archival research, questionnaires, discourse analysis, participatory research, and qualitative data analysis techniques.

Prerequisite: Enrollment is restricted to graduate students.

ENVS 280 - Advanced Topics in Environmental Studies (5)

Intensive research seminar, including reading and critique of primary research literature and research in progress. Topics vary and are announced in advance; students should consult with faculty prior to enrolling. Enrollment by permission of instructor. Enrollment restricted to graduate students.

ENVS 283 - Environmental Studies Internship (5)

Graduate level internship focuses on integrating interdisciplinary academic theory with practical, specialized experience in a professional setting. Course intended for environmental studies graduate students; students must complete paperwork and meet with coordinator prior to first day of instruction.

ENVS 290 - Interdisciplinary Research Seminar (2)

Research seminars presented weekly throughout the year by environmental studies and affiliated faculty, by visiting scholars, and by graduate students. Students discuss the content and methodology of research presented following each seminar.

Prerequisite: Enrollment is restricted to graduate students.

ENVS 290L - Graduate Research Seminar (2)

Graduate student presentations of doctoral research proposals, dissertation work-in-progress, grant applications, and conference papers. This weekly laboratory meeting seeks to develop professional skills, teach constructive criticism, and foster effective discussion among peers.

Prerequisite: Enrollment is restricted to graduate students.

ENVS 291 - Advanced Readings in Environmental Studies (3)

Focusing on a recently published volume or on a topic of current interest, this seminar requires a rigorous analysis of the principles and methods employed in the four core areas of the program: sustainable agriculture and agro-ecology; conservation biology; environmental policy analysis; and political economy.

Prerequisite: Enrollment is restricted to graduate students.

ENVS 291C - Advanced Readings in Risk and Public Policy (3)

Advanced readings and research on environmental risk and public policy. Explores environmental decision making given the question of the burden of proof and scientific uncertainty and grapples, in an advanced manner, with emergent policy alternatives, such as the precautionary principle. Also offered as course 281C for 5 credits.

Prerequisite: Prerequisite(s): ENVS 172 or equivalent work demonstrated by an interview. Enrollment is restricted to graduate students.

ENVS 291D - Advanced Readings in Tropical Ecology, Agriculture, and Development (3)

Analyzes recent publications in ecology, conservation, agroecology, and development in tropical and subtropical regions, particularly Latin America. Discussions place special emphasis on integration across natural and social science disciplines to address issues of sustainability in tropical regions.

Prerequisite: Enrollment is restricted to graduate students.

ENVS 291M - Advanced Readings in Biogeochemistry (3)

Course consists of three parts: fundamental biogeochemistry of the Earth, global cycles of nutrient elements, and societal and scientific issues of global change. Class activities include (1) presentation of summary statements based on reading assignments; (2) discussion of theories, concepts, methodologies, and applications; (3) computer simulation and modeling of elemental cycles using STELLA; and (4) integration of scientific information on global change with social issues by writing.

Prerequisite: Enrollment is restricted to graduate students.

ENVS 291P - Advanced Readings in Environmental History and Anthropology (3)

Course of readings systematically surveying the theoretical contributions of the disciplines of environmental history,

historical ecology, environmental anthropology, and geography. After an overview of the evolution of 20th-century thought on the relationship between environment and culture as seen through the lenses of these disciplines, explores emerging research hybrids and new research frontiers.

Prerequisite: Enrollment is restricted to graduate students.

ENVS 292 - Topics in Research in Environmental Studies (2)

Seminar in which students give critically evaluated presentations regarding current research in environmental studies and issues in research design. Students should consult with faculty prior to enrolling.

Prerequisite: Enrollment is restricted to graduate students.

ENVS 297A - Independent Study (5)

Independent study and research under faculty supervision. Students submit petition to sponsoring agency.

ENVS 297B - Independent Study (10)

Independent study and research under faculty supervision. Students submit petition to sponsoring agency.

ENVS 297C - Independent Study (15)

Independent study and research under faculty supervision. Students submit petition to sponsoring agency.

ENVS 297F - Independent Study (2)

Independent study and research under faculty supervision. Intended to be taken in conjunction with a 5-credit course. Students submit petition to sponsoring agency.

ENVS 299A - Thesis Research (5)

Students submit petition to sponsoring agency.

ENVS 299B - Thesis Research (10)

Students submit petition to sponsoring agency.

ENVS 299C - Thesis Research (15)

Students submit petition to sponsoring agency.

ESCI - ENVIRONMENTAL SCIENCES

Lower-Division

ESCI 30 - Biological Principles of Environmental Sciences (5)

Introduction to biology and ecology for environmental sciences, focusing on the role of biological organisms within the Earth system. Topics span molecular/organismal interactions, such as photosynthesis and respiration, to global

biogeochemical cycles including the role of microbes, net community production, and contaminant distributions.

Upper-Division

ESCI 100A - Introduction to Environmental Sciences (5)

Introduces fundamental concepts for quantitative analysis of environmental problems and their application to complex systems focusing on algebraic tools. Key concepts include box models, mass and energy balances (including chemical processes), turning word problems into mathematical statements, and estimation. (Formerly Earth Sciences 114A.)

Prerequisite: Prerequisite(s): MATH 11A or MATH 19A, CHEM 1A, and PHYS 6A or PHYS 5A. Enrollment is restricted to environmental sciences majors.

ESCI 100B - Introduction to Environmental Processes (5)

Quantitative exploration of physical and chemical processes relevant to the environment and their applications to complex environmental systems. Focuses on calculus-based tools. Key concepts include fluid mechanics, heat transfer, mass transfer, particle mechanics, turbulence, and physicochemical processes. (Formerly Earth Sciences 114B.)

Prerequisite: Prerequisite(s): ESCI 100A or EART 114A, MATH 11B or MATH 19B, CHEM 1C, and PHYS 6B or PHYS 5B. Enrollment is restricted to environmental sciences and Earth sciences majors.

ESCI 122 - Air Pollution (5)

Introduces students to the chemistry and physics of air pollution with primary emphasis on understanding the main types of air pollutants, from where they originate, how they are removed, how to control their sources, measurement techniques, and their health effects.

Prerequisite: Prerequisite(s): ESCI 100A or EART 110A.

ESCI 160 - Data Analysis in the Environmental Sciences (5)

Introduces data-analysis methods regularly encountered within environmental sciences. Students learn how to think about data, its uncertainty, how models and data are related and depend on underlying assumptions, and how to synthesize information contained in data.

Prerequisite: Prerequisite(s): MATH 11B or MATH 19B or equivalent. Enrollment is restricted to environmental sciences majors.

ESCI 191 - Capstone Seminar (5)

In-depth exploration of a topic within the environmental sciences. Involves at least one research paper. Topics vary quarterly; consult the current course listings. Prerequisite(s): Entry Level Writing and Composition requirements; course 100A and previous or concurrent enrollment in course 100B. Enrollment is restricted to environmental sciences majors. Enrollment is by application with selection based on appropriate background and academic performance and by

consent of the instructor. Satisfies the senior comprehensive requirement.

ESCI 195 - Senior Thesis (5)

Students complete their senior thesis research projects and submit their thesis in the form of a research paper that is appropriate for submission to a relevant journal or conference. Prerequisite(s): Entry Level Writing and Composition requirement. Enrollment is restricted to environmental sciences majors. Satisfies the senior comprehensive requirement. Students submit petition to sponsoring agency.

FILM - FILM AND DIGITAL MEDIA

Lower-Division

FILM 10 - Professional Topics in Film, Television, and Digital Media (2)

Taught by a working professional, lectures and workshop provide students with career-related information and insight into a specific profession in film, television, and digital media. Students research various aspects of a film, television, or digital media profession.

Prerequisite: Enrollment is restricted to film and digital media majors and minors, pre-majors and proposed majors.

FILM 20A - Introduction to Film Studies (5)

An introduction to the basic elements, range, and diversity of cinematic representation and expression. Aesthetic, theoretical, and critical issues are explored in the context of class screenings and critical readings. Students are billed a course materials fee. If space allows, restrictions may be lifted after priority enrollment.

Prerequisite: Enrollment is restricted to first-year, sophomore, and junior proposed and pre-film and digital media majors and film and digital media minors.

FILM 20B - Introduction to Television Studies (5)

Introduction to the basic forms of televisual presentation, including differing narrative structure from movies and situation comedies to soap opera, plus modes of direct discourse in news, advertising, sports, music, television, and other genres. Alternative forms and modes in electronic media, such as independent video art and documentary, public television, cable, and electronic networks are explored, with their potential for expressing cultural diversity set in relation to social, cultural, and political conditions. Students are billed a course materials fee. If space allows, restrictions may be lifted after priority enrollment.

Prerequisite: Enrollment is restricted to first-year, sophomore, and junior declared, proposed, and pre-film and digital media majors and film and digital media minors.

FILM 20C - Introduction to Digital Media (5)

Introduces fundamental features of digital media and examines the immense visual, social, and psychological impact of the digital revolution on our culture. Topics include the concepts and forms of the digital hypertext interface, Internet, and web, and the impact of digital media on conceptions of the self, body, identity, and community. Students are billed a course materials fee. If space allows, restrictions may be lifted after priority enrollment.

Prerequisite: Enrollment is restricted to first-year, sophomore, and junior declared, proposed, and pre-film and digital media majors and film and digital media minors.

FILM 20P - Introduction to Production Technique (5)

Introduction to the production processes of visual/aural, time-based, creative work. Students work on a range of creative projects: performed, written, photographed, and created digitally. Assignments emphasize imaginative problem-solving, collaboration, visualization, and critical media literacy. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 20A or FILM 20B or FILM 20C or FILM 80A or FILM 80M. Enrollment is restricted to pre-majors, proposed majors, majors, frosh, sophomores, juniors, and students not currently declared in the production concentration.

FILM 80A - The Film Experience (5)

Students learn to understand how films reach the public through a collaborative, industrial, and artistic practice; how films work in a narrative sense; how they construct meanings for viewers; and how their formal techniques construct different possibilities for meaning and interpretation.

FILM 80M - Understanding Media (5)

Introduces students to contemporary concerns, issues, and topics of media and media criticism. With an emphasis on visual analysis, students develop conceptual tools to think critically about photography, cinema, television, video, and print journalism.

FILM 80S - Special Topics in Film and Digital Media (5)

Study of selected aspects of film, television, and/or digital media. Includes weekly screenings and historical/theoretical readings.

FILM 80T - Technothrillers (5)

Examination of recent films classified as thrillers that approach technology (computers, robotics, biotech, the Internet, etc.) through suspense, anxiety, and paranoia. It will also address how technologically produced popular culture negotiates attitudes toward technological change. Students are billed a course materials fee. (Formerly course 80A.)

FILM 80V - Video Games as Visual Culture (5)

Through aesthetic, medium-specific and critical theories of electronic games, course introduces histories, ideas, and debates that inform critical game studies. Themes include:

games and cinema; race, class, gender, sexuality and representation; visual/cultural studies approaches; topical issues in games.

FILM 80X - Sex in the Cinema (5)

Examines the historical representation of sexual difference, orientation, and politics in film and video using cultural studies, political and economic historiography, and feminist and queer theory and paying special attention to intersections of U.S. political movements with filmmaking and reception.

Upper-Division

FILM 120 - Introduction to Media Theory (5)

Explores media theory. May be organized thematically or chronologically. Selects from key debates and movements central to understanding media forms in relation to self, society, politics, and aesthetics. Students are billed a course materials fee. (Formerly Introduction to Film Theory and Criticism.)

Prerequisite: Prerequisite(s): FILM 20A. Enrollment is restricted to film and digital media majors, pre-majors, and proposed majors during priority enrollment; may be opened if space allows.

FILM 130 - Silent Cinema (5)

Presents the development of silent film as a cultural form from the early period to the beginning of sound, addressing its historical evolution, technological development, aesthetic transformations, and varied cultural contexts. Students are billed a course materials fee. Usually offered in alternate academic years.

Prerequisite: Prerequisite(s): FILM 20A, satisfaction of the Entry Level Writing and Composition requirements.

FILM 132A - International Cinema to 1960 (5)

A survey of significant developments in narrative film outside Hollywood from the advent of sound technology to the late '50s. Differing inter/national contexts, theoretical movements, technological innovations, and major directors are studied. Students are billed a course materials fee. Usually offered alternate academic years.

Prerequisite: Prerequisite(s): FILM 20A, satisfaction of the Entry Level Writing and Composition requirements.

FILM 132B - International Cinema, 1960 to Present (5)

A survey of significant developments in narrative film outside Hollywood from 1960 to the present. Major film movements and directors from around the world are studied. Students are billed a course materials fee. Usually offered in alternate academic years.

Prerequisite: Prerequisite(s): FILM 20A, satisfaction of the Entry Level Writing and Composition requirements.

FILM 134A - American Film, 1930-1960 (5)

A survey of American narrative cinema from 1930 to 1960. Examines developments in film style, film technology, and the film industry in relation to American cultural history. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 20A or FILM 20B, satisfaction of the Entry Level Writing and Composition requirements.

FILM 134B - American Film, 1960-Present (5)

A survey of American narrative cinema from 1960 to the present. Examines developments in film style, film technology, and the film industry in relation to American cultural history. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 20A or FILM 20B; and satisfaction of the Entry Level Writing and Composition requirements.

FILM 136A - Experimental Film and Video (5)

A survey of various experimental styles and practices in film and video, addressing the historical developments of these media formats. The course situates experimental film and video work within the larger contexts of artistic traditions as well as networks of production and reception. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 20A .

FILM 136B - History of Television (5)

Survey of the historical development of broadcast television from its origins to the present day phenomena of cable, satellite, and electronic networks. Examination of major genres, forms, and modes of production and consumption within cultural, social, and economic contexts. Offered every other year, alternating with course 136A. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 20B.

FILM 136C - Visual Culture and Technology: History of New Media (5)

Explores the relationship between technology and change and surveys the history of various technologies of visual culture from print to computer based imagery and the Internet. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 20C.

FILM 136D - Documentary Film and Video (5)

Explores the category of nonfiction through a historical and theoretical study of documentary in film and video. Addresses ethnographic film, Soviet and Griersonian documentary, cinema verite and/or other selected documentary texts and the issues of representation they raise. Students are billed a course materials fee. (Formerly course 161.)

Prerequisite: Prerequisite(s): FILM 20A or FILM 20B.

FILM 150 - Screenwriting (5)

Problems in writing for film and television are explored through the writing of original material and analysis of existing works. Various film genres, conventions, and styles, both fictional and nonfictional, are examined. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; priority given to students in the production concentration. Admission by application; application materials available during the last three weeks of preceding quarter. Students not in the production concentration but have completed the Entry Level Writing and Composition prerequisites may apply and will be considered if space is available.

FILM 151 - Film Directing (5)

Workshop that explores the director's involvement in film and video production. Topics will include the manipulation of time and space, continuity, script planning and blocking, and working with actors and crew. Students will participate in group and individual exercises in pre-production and scene direction. Prerequisite(s): courses 20A, 20P, and/or 170B are recommended; priority given to students in the production concentration. Admission by application; application materials available during the last three weeks of preceding quarter. Students not in the production concentration but have completed 20A; 20P and/or 170B may apply and will be considered if space is available.

FILM 152 - Script Analysis (5)

Students analyze diverse narrative techniques, dramatic structures, and genre forms to understand the craft of screenwriting and prepare for their own creative writing and filmmaking. Students read finished scripts and view films.

Prerequisite: Prerequisite(s): FILM 120. Enrollment is restricted to film and digital media majors and film and digital media pre-majors.

FILM 160 - Film Genres (5)

Concentrated study of films from one cinematic grouping with similar themes and narrative structures such as westerns, musicals, or science fiction, or a comparative study of different genres. History, theory, and criticism of the genre are covered. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 130, FILM 132A, FILM 132B, FILM 132C, FILM 134A or FILM 134B.

FILM 161B - Documentary Animation (5)

Examines the history, practice, and emergence of documentary animation in contemporary film, on the Web and as activist media with emphasis on the discourse central to social documentary, decolonial theory, and the politics of representation.

Prerequisite: Prerequisite(s): FILM 20A. Enrollment is restricted to juniors and seniors.

FILM 162 - Film Authors (5)

Intensive critical study of the work of one film auteur (director, screenwriter, actor, cinematographer). Themes, style, and structure are explored using various critical modes of analysis. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 130, FILM 132A, FILM 132B, FILM 132C, FILM134A, or FILM 134B.

FILM 165A - Film, Video, and Gender (5)

A study of texts, theories, and issues of gender in film and/or video. Changing focus on one or more topics, including production and authorship, representation, reception, theories of identification, sexual preference, and related issues. Students are billed a course materials fee. Usually offered in alternate academic years.

Prerequisite: Prerequisite(s): FILM 20A or FILM 20B.

FILM 165B - Race on Screen (5)

Review of historical and critical tools to interpret representations of race on cinematic, television, and computer screens. Class will consider the place of race in theoretical and historical scholarship and examine the debates about race produced within and across film and digital media. Students are billed a course materials fee. Usually offered in alternate academic years.

Prerequisite: Prerequisite(s): FILM 20A or FILM 20B.

FILM 165C - Lesbian, Gay, and Queer Film and Video (5)

An overview of homosexuality and LGBT representations in American film. Explores the format and historical significance of New Queer Cinema. Recent independent queer film and video discussed. Topics include: authorship; spectatorship; genre and genre reappropriation; historical gender constructs; the art film; mainstream versus independent production; and the relationship of film to popular music. Students are billed a materials fee.

Prerequisite: Enrollment is restricted to juniors, sophomores, and seniors.

FILM 165D - Asian Americans and Media (5)

Examines media representations about, as well as by, Asian Americans. Using critical essays on film theory, racial studies, feminist criticism, and independent cinema, students develop the skills necessary to conduct critical analysis of Asian Americans in film and television. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 20A. Enrollment is restricted to sophomores, juniors, and seniors.

FILM 165E - Chicana/o Cinema, Video (5)

Examines emergence of Chicana/o cinema and video from a place of social displacement, resistance, and affirmation. Looks at Chicana/o representation and spectatorship as it pertains to ethnicity, class, gender, and the beginning of a new

Chicana/o film aesthetic. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 20A. Enrollment is restricted to sophomores, juniors, and seniors.

FILM 165G - Gender and Global Cinema (5)

Offers students historical and critical tools to investigate global film through the framework of gender. Focused in particular on contemporary film (from 1960 to present), the class is structured both chronologically and via national industries. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 20A.

FILM 168 - National Cinema and Culture (5)

Study of a specific cinematic or other media tradition of a region, nation, language, diasporic collectivity or other unifying cultural entity. Not a survey, this course selects one focus or offers a comparative of cross-cultural framework. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 130, FILM 132A, FILM 132B, or FILM 132C.

FILM 168M - National Cinema and Culture: Morocco (5)

Faculty-led study abroad course taught in Rabat, Morocco. In-depth investigation of Moroccan cinema and culture, including literature and art. Includes visits and field trips around Morocco.

FILM 170A - Fundamentals of Digital Media Production (5)

Introduction to the conceptual and technical fundamentals of making digital media. Covers principles of digital image manipulation, basic web authoring, and interface design through projects that introduce production techniques and methods. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 20C or CSE 101 or CSE 111.

FILM 170B - Fundamentals of Film and Video Production (5)

An introduction to the art and craft of making films and videos. Covers principles of cinematography, videography, editing, production planning, and lighting involving both production techniques and methods. Students are billed a course materials fee. Prerequisite(s): course 20A or 20B and at least one upper-division film and digital media critical studies course. Admission by application; application materials available during the last three weeks of preceding quarter.

FILM 171A - Sound (5)

The cinematic equation equals images plus sound. What are sound-specific properties? What is the relationship between sound and image? Examines these and other questions through the creation of audio and audiovisual pieces. Students are billed a course materials fee. Prerequisite(s): course 170A or 170B; priority given to students in the production concentration. Admission by application; application

materials available during the last three weeks of preceding quarter. Students not in the production concentration but have completed 170A or 170B may apply and will be considered if space is available.

FILM 171C - Special Topics Workshop: Found Footage (5)

Students will consider the practice of recycling images perhaps not intended by the original owner or creator. In addition to assigned readings and technical workshops, students produce three video projects and give a presentation on a specific issue or artist/group. Prerequisite(s): course 170A or 170B; priority given to students in the production concentration. Admission by application; application materials available during the last three weeks of preceding quarter. Students not in the production concentration but have completed 170A or 170B may apply and will be considered if space is available.

FILM 171D - Social Information Spaces (5)

Investigates how information spaces can be designed to be inhabited, socially navigable spaces. Emphasizes the social navigation of information spaces, a set of techniques and ideas from computer-supported cooperative works, human-computer interaction, and architecture.

Prerequisite: Prerequisite(s): FILM 170A.

FILM 171F - Special Topics Workshop: Autobiographical Film (5)

Students explore autobiography as a filmmaking genre and practice, using experimental, fictionalized, documentary, and hybrid forms. Readings and screenings provide a theoretical context for production work. Topics include: strategies of (self) representation, reenactment, performance, portraiture, memoir, confession, and diaristic film. Students are billed a course materials fee. Prerequisite(s): course 170B; priority given to students in the production concentration. Admission by application; application materials available during the last three weeks of preceding quarter. Students not in the production concentration but have completed 170B may apply and will be considered if space is available.

FILM 171S - Special Topics in Film and Digital Media Production (5)

An intermediate workshop-style production course which addresses diverse themes and approaches. Content changes quarterly according to faculty research interests and changing technologies/discourses in digital audiovisual production. Prerequisite(s): course 170B. Admission is by application; application materials are available during the last three weeks of the preceding quarter. Priority is given to students in the production concentration. Students not in the production concentration may apply and are considered on a space-available basis. Students are billed a materials fee.

FILM 172 - Narrative Video Workshop (5)

Intermediate workshop in film and video production concentrating on narrative production, development of critical standards, and technical methods. Topics include cinematography, sound, and non-linear digital editing

techniques. Each student is responsible for the completion of short narratives from assignments. Students are billed a course materials fee. Prerequisite(s): course 170B; priority given to students in the production concentration. Admission by application; application materials available during the last three weeks of preceding quarter. Students not in the production concentration but have completed 170B may apply and will be considered if space is available.

FILM 173 - Narrative Digital Media Workshop (5)

Analysis of cinematic codes and narrative structure through digital video, Internet and interactive multimedia projects. Required readings address contemporary research in narratology and hyper-media, exploring the potential of digital technology to reconfigure the role of both author and audience. Students billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 170A.

FILM 175 - Documentary Video Workshop (5)

Workshop in documentary video production, development of critical standards, ethical issues, and technical methods. Each student is responsible for the completion of short documentaries from assignments. Students are billed a course materials fee. Prerequisite(s): course 170B; priority given to students in the production concentration. Admission by application; application materials available during the last three weeks of preceding quarter. Students not in the production concentration but have completed 170B may apply and will be considered if space is available.

FILM 176 - Experimental Video Workshop (5)

Introductory workshop in video production (non-narrative, experimental). Topics include a survey of non-narrative experimental video from a historical/theoretical perspective and an introduction to videography, fundamentals of video editing, and sound. Students are billed a course materials fee. Prerequisite(s): course 170B; priority given to students in the production concentration. Admission by application; application materials available during the last three weeks of preceding quarter. Students not in the production concentration but have completed 170B may apply and will be considered if space is available.

FILM 177 - Digital Media Workshop: Computer as Medium (5)

Introduction to the computer as a medium as well as a tool. Students explore art practice within digital imaging and information and communications environments through projects, readings, and screenings. Assignments may include designing virtual communities and /or interactive, multimedia web works. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 170A.

FILM 178A - Personal Computers in Film and Video (5)

Introduction to the specific applications of computers for film and video. By using computer-generated, enhanced and imported graphics, animation, text, sound, and moving video, students create still and time-based works in a computer environment. Students are billed a course materials fee.

Prerequisite(s): course 170A or 170B; priority given to students in the production concentration. Admission by application; application materials available during the last three weeks of preceding quarter. Students not in the production concentration but have completed 170A or 170B may apply and will be considered if space is available.

FILM 178B - Advanced Personal Computers in Film and Video (5)

Study of advanced computer tools in digital media, including exploration, creation, and manipulation of sound with the same level of complexity as required in composing the moving image. Students produce a final project that demonstrates skills learned. Prerequisite(s): course 170A or 170B; priority given to students in the production concentration. Admission by application; application materials available during the last three weeks of preceding quarter. Students not in the production concentration but have completed 170A or 170B may apply and will be considered if space is available.

FILM 179A - Special Topics in Animation (5)

Provides opportunities to learn technical skills in animation while engaging in critical analysis of animation and design. Students are encouraged to pursue their personal artistic vision as well as to develop a collaborative and problem-solving mindset. Prerequisite(s): course 170A or 170B; priority given to students in the production concentration. Admission by application; application materials available during the last three weeks of the preceding quarter. Students not in the production concentration but have completed 170A or 170B may apply and will be considered if space is available.

FILM 179B - Documentary Animation Workshop (5)

A project-based production seminar in documentary animation: students learn diverse animation styles and techniques, and apply them to a documentary-animation class project. Courses 161B and 170A are strongly recommended as preparation (or equivalent background); priority given to students in the production concentration. Admission by application; application materials available during the last three weeks of the preceding quarter. Students not in the production concentration may apply and will be considered if space is available.

FILM 180 - Writing About Film, Television, and Digital Media (5)

Improves students' ability to write and edit, and invites students to explore different kinds of writing related to film, television, and digital media including historical, theoretical, cultural criticism, popular reviews, grant proposals, online forums, and publishing.

Prerequisite: Prerequisite(s): FILM 20A, FILM 20B, or FILM 20C. Enrollment is restricted to sophomore and junior film and digital media majors.

FILM 185D - Sound and Image in Theory and Criticism (5)

Explores theories and critiques of sound in culture and analyzes sound in relation to media images in film, video, and other media. Voice, noise, and music are addressed. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 120.

FILM 185R - The Film Remake (5)

History and theory of the remake through case studies across cultural, gender, and genre boundaries. Examines changing cultural, social, stylistic, and technical values and explores notions of originality, repetition, homage, allusion, quotation, and intertextuality from Feuillade and Hitchcock to Raimi and Johnny To. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 120, FILM 130, FILM 132A, FILM 132B, FILM 132C, FILM 134A or FILM 134B.

FILM 185S - Advanced Topics in Film Studies (5)

Study of a selected aspect of film history, theory, or criticism. Includes weekly screenings and historical/theoretical readings. Usually offered in alternate academic years with rotating topics. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 120, FILM 130, FILM 132A, FILM 132B, FILM 132C, FILM 134A, or FILM 134B.

FILM 185X - EyeCandy Seminar (5)

Seminar and workshop on writing, producing, and publishing a journal. Students engage in assignments and exercises directly and indirectly related to the production of a web launch as well as a print copy of EyeCandy. Permission of instructor required based upon student's participation in EyeCandy in winter and spring quarters. Preference given to film and digital media majors and minors; others may apply based on qualifications and as space allows. Students are billed a course materials fee.

FILM 187 - Advanced Topics in Television Studies (5)

Study of a selected aspect of television history, television criticism, or national television. Includes weekly screenings and historical/theoretical readings. Usually offered in alternate academic years, with rotating topics. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 20B. Enrollment is restricted to junior and senior film and digital media majors and minors.

FILM 189 - Advanced Topics in Digital and Electronic Media Studies (5)

Study of a selected aspect of digital and/or electronic media history and criticism. Topics can include virtual environments, electronic networks, video installations, computer games, and hyper-media. Usually offered in alternate academic years. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 20C. Enrollment is restricted to junior and senior film and digital media majors and minors during priority enrollment; may be opened if space allows.

FILM 192 - Directed Student Teaching (5)

Teaching a lower-division course under faculty supervision (see course 42). Proposal supported by a faculty sponsor and department.

FILM 194A - Film Theory Seminar (5)

Advanced senior seminar examining classical and contemporary film theory and those theoretical paradigms and methods that have illuminated the medium: formalism, realism, structuralism, semiology, psychoanalysis, Marxism, feminism, and phenomenology. Primary texts are read. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 120. Enrollment is restricted to senior film and digital media majors.

FILM 194B - Electronic Media Theory Seminar (5)

Study of the major theoretical approaches to electronic media and their critical application to texts from television, independent video art and documentary, and electronic networks. Readings include a range of theoretical approaches selected from semiotic, ideological, feminist, cultural studies, reception theory, postmodernist, and other critical traditions. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 120. Enrollment is restricted to senior film and digital media majors.

FILM 194C - New Media Theory Seminar (5)

Study of theories of emerging genres of electronic culture, with emphasis on the discourse about computer-assisted and computer-generated forms of art and mass culture such as digital imagery, virtual environments, telematics, hyper- and multimedia, and electronic networks. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 120. Enrollment is restricted to senior film and digital media majors.

FILM 194D - Film History Seminar (5)

In-depth study of film history investigating developments in cinematic style, technological innovation, and industrial practice against the broad canvas of cultural history. Students will acquire the basic tools necessary to conduct informed film historical research. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 120; and FILM 130 or FILM 134A or FILM 134B. Enrollment restricted to senior film and digital media majors.

FILM 194E - International Cinemas (5)

In-depth study of the history and theory of international cinemas with changing topics such as globalism and resistance, postcolonial theory, international productions and

querying race, the national, and cinema. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 120; and FILM 132A or FILM 132B or FILM 132C. Enrollment restricted to senior film and digital media majors.

FILM 194F - Film and the Other Arts (5)

Examines the use of artistic media within films and of films that thematically are about other media. What do other art forms allow for in terms of the story, the film's meaning, the gaze, and the spectator? Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 120. Enrollment restricted to senior film and digital media majors.

FILM 194G - New(s) Media (5)

Addresses the role of new media technologies in the production, distribution, and reception of the news, especially international news. Examines software and network technologies as amplifying, filtering, extending, and countering the forces of media. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 120. Enrollment restricted to senior film and digital media majors.

FILM 194S - Special Topics Seminar (5)

Intensive research and writing on a changing topic chosen to demonstrate critical mastery in a specific area of film and digital media studies, for example, film adaptations and their literary sources, documentary/reality shows, or networked new media texts. Students are billed a course materials fee.

Prerequisite: Prerequisite(s): FILM 120. Enrollment restricted to senior film and digital media majors.

FILM 195 - Senior Thesis/Project (5)

An individually supervised course, with emphasis on independent research, to culminate in a senior thesis/project/production. Proposals should be submitted to adviser one quarter in advance. Petition required, approved by instructor and department; thesis petitions available in the department office.

FILM 196A - Senior Project in Narrative Production (5)

Students accomplish a range of production work focused on narrative production including script development, casting, and rehearsing to shooting and post-production work. Students are billed a course materials fee. Priority given to students in the production concentration. Admission by application; application materials available during the last three weeks of preceding quarter. Students may apply a maximum of two times. Enrollment restricted to senior film and digital media majors.

FILM 196B - Senior Project in Screenwriting (5)

Students write a full-length (75-100 pages) screenplay in this seminar while studying structural concepts and character

development in selected films. Scheduling, outlining, pitching ideas, and critique are all part of the workshop format of the class. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; course 150 or another screenwriting course; priority given to students in the production concentration. Admission by application; application materials available during the last three weeks of the preceding quarter. Enrollment restricted to senior film and digital media majors.

FILM 196C - Senior Documentary Workshop (5)

Students are responsible for producing short documentaries (up to 12 minutes). In class, students discuss each other's work as well as view and discuss other documentary films. Students are billed a course materials fee. Priority given to students in the production concentration. Admission by application; application materials available during the last three weeks of the preceding quarter. Enrollment restricted to senior film and digital media majors.

FILM 197 - Senior Digital Media Workshop (5)

Independent projects using the computer as a medium as well as a tool. Students will design and implement projects in digital imaging, information, and communications environments. Students' projects may include designing virtual communities, building collaborative networks, and/or interactive, multimedia web works. Students are billed a course materials fee. Priority given to students in the production concentration. Admission by application; application materials available during the last three weeks of the preceding quarter. Enrollment restricted to senior film and digital media majors.

FILM 198 - Independent Field Study (5)

Provides for department-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Students engaging in field study must complete application procedures for such study by the fifth week of the previous quarter. Field study may not be used to satisfy major requirements. Petition required, approved by instructor and department; petitions available in the department office.

FILM 198F - Independent Field Study (2)

Provides for department-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Students engaging in field study must complete application procedures for such study by the fifth week of the previous quarter. Field study may not be used to satisfy major requirements. Petition required, approved by instructor and department; petitions available in the department office.

FILM 199 - Tutorial (5)

Individual study in areas approved by sponsoring instructors. Tutorial may not be used to satisfy major requirements. Petition required, approved by instructor and department; petitions available in the department office.

FILM 199F - Tutorial (2)

Individual study in areas approved by sponsoring instructors. Tutorial may not be used to satisfy major requirements. Petition required, approved by instructor and department; petitions available in the department office.

Graduate

FILM 200A - Introduction to Graduate Study (5)

Introduces graduate study in the critical practice of film and digital media. Conducted as a pro-seminar, with faculty presentations and discussion.

Prerequisite: Enrollment restricted to graduate students.

FILM 200B - Theory and Praxis of Film and Digital Media 1 (5)

Investigates methods for rhetorical production of written and visual/aural texts. Emphasizes questions about delineation between theory and practice, and provides groundwork in theories relevant to key areas in film, television, and digital media studies.

Prerequisite: Enrollment restricted to graduate students.

FILM 200C - Theory and Praxis of Film and Digital Media 2 (5)

Investigates methods for rhetorical production of written and visual/aural texts. Emphasizes interwoven practices of the artist/researcher/teacher, formal and expressive possibilities of hybridized research, and cultural issues raised by integrated methods of inquiry. Students are billed a course materials fee.

Prerequisite: Enrollment restricted to graduate students.

FILM 202 - Pedagogy in Film and Digital Media (2)

Prepares students for teaching assistantships and instructor roles. Topics include TAships, designing inclusive course syllabi and lesson plans, active learning, teaching technologies, and classroom environment.

Prerequisite: Enrollment is restricted to graduate students.

FILM 203 - Professional Development in Film and Digital Media (3)

Prepares graduate students with professional skills in the discipline, such as CV writing, grants research and writing, public presentation, exhibition, publication, and job seeking.

Prerequisite: Enrollment is restricted to graduate students.

FILM 222 - Critical Methodologies in Film and Television (5)

Introduces graduate students to critical methodologies in media studies and offers sustained examination of theoretical approaches to media studies. Methodologies may include (but are not limited to) contemporary theory (semiotic, psychoanalytic, ideological), cultural studies, intertextuality, feminist film, and television theory.

Prerequisite: Enrollment restricted to graduate students.

FILM 223 - The Film/Video Essay (5)

Focuses on essayistic approaches to scholarship and production, emphasizing relationships between theory and praxis that this mode of production requires.

Prerequisite: Enrollment restricted to graduate students.

FILM 224 - Mediating Difference (5)

Considers theoretical and strategic, situated difference in the era of (semi-)colonialism, post-colonialism, and globalism, examining theoretical writing alongside media works on the topic.

Prerequisite: Enrollment restricted to graduate students.

FILM 225 - Software Studies (5)

Today, our lives are woven into vast software systems that facilitate our family communications, personal relations, jobs, and cultural, economic, political, and social institutions. Course examines these conditions of life and thought using insights from the arts and humanities.

Prerequisite: Enrollment restricted to graduate students.

FILM 226 - Queer Theory and Global Film and Media (5)

Examines queer subjectivities, practices, and theories in relation to globalization, transnationalism, and postcoloniality, focusing on film/media produced outside the United States. The course addresses representation and also uses queer theoretical work to engage wider contexts of film/media production, distribution, and exhibition.

Prerequisite: Enrollment restricted to graduate students.

FILM 227 - Representing Memory (5)

Studio-based hybrid practice/theory to explore problems of historical representation in film, video, and new media and engage with the production of new cinematic/visual forms that take on issues of personal, collective, and national memories.

Prerequisite: Enrollment is restricted to graduate students.

FILM 228 - Moving Image Archives and the Frontiers of Information (5)

Explores moving image archives in relation to social movements, technological change, and moving image use and reuse. Theories of memory, information, and technology provide a framework for discussions, site visits, and individual projects.

Prerequisite: Enrollment restricted to graduate students.

FILM 229 - Topics in Documentary Studies (5)

Examines the forms, discourses, and practices of documentary film, television, video, and other media in relation to cultural, social, and political history and theory. While the thematic focus varies from term to term, each edition of the course

places critical thought and documentary work in conversation around issues central to forms of social knowledge and action.

Prerequisite: Enrollment restricted to graduate students.

FILM 230 - Expanded Documentary (5)

Students explore the aesthetic, political, and ethical dimension of new and expanded forms of documentary practice including: new media; database-driven, interactive documentary; participatory media; social media; and documentation-based art practices.

Prerequisite: Enrollment restricted to graduate students.

FILM 231 - Topics in Postcolonial Theories, Film, and Media (5)

Explores topics in postcolonial theories and film and media around themes such as colonialism, modernity, and institutions of cinema; colonial histories and national or transnational film and media; race, gender, sexuality and colonialism; the uneven implications, pitfalls, and possibilities of the term postcolonial in relation to film and media.

Prerequisite: Enrollment restricted to graduate students.

FILM 232 - Audiovisual Ethnography (5)

Students learn the technical and critical skills required for fieldwork-based ethnographic video and audio media production. The course is structured around cumulatively building filmmaking skills with an emphasis on critically informed nonfiction ethnographic observation.

Prerequisite: Enrollment restricted to film and digital media, anthropology, or social documentation graduate students.

FILM 234 - Toward an Ethics of New Media (5)

Investigates an ethics of new media. Using an intersectional approach, students read thematic units that consider issues of race, class, and gender as they crosscut questions of advanced technological tools and their implementation in modern society.

Prerequisite: Enrollment restricted to graduate students.

FILM 235 - Feminist Media Histories (5)

Investigates feminist histories of film, radio, television, video, technology, playable media, and digital culture from the 19th century through the present day. Students learn varied historiographic methodologies and also engage in primary historical research.

Prerequisite: Enrollment restricted to graduate students.

FILM 236 - Making...in the Anthropocene (5)

Through readings and assignments, students explore the notions of making and the temporal context of the Anthropocene. Making is broadly defined as any creative production. The Anthropocene and climate change are studied as urgent and compelling context.

Prerequisite: Enrollment is restricted to graduate students.

FILM 237 - Graduate Critique (5)

Develops fluency in the languages of critical practice as expressed across media. Integrates critical and analytical writing about objects and experiences created by and through electronic and digital media with ongoing, student-driven critiques of audiovisual scholarship.

Prerequisite: Enrollment is restricted to film and digital media graduate students. Graduate students from other programs may enroll by permission of the instructor.

FILM 238 - The Politics of Information (5)

Explores the production and perception of information (news, stories, figures, identities, controversies, and complacencies). Students research, analyze, theorize, and define the scope of the politics of information, study the consequences of media(ted) knowledge, and propose possibilities for critical intervention and change.

Prerequisite: Enrollment is restricted to graduate students.

FILM 239 - Topics in Media Theory (5)

Explores advanced media theory and the methodologies of media analysis. Themes and issues to be drawn from media history; material, popular, or mass cultures; network and information theory; and intellectual, institutional, political, or cultural contexts.

Prerequisite: Enrollment is restricted to graduate students.

FILM 283 - New Media Art and Digital Culture (5)

A study of new media art in the context of digital culture. Electronic, digital and online technology art are set in critical relation to discourse on history, aesthetics, hypermedia, the interface, hacks, embodiment, robotics, artificial life and other topics. Students are billed a course materials fee.

Prerequisite: Enrollment restricted to graduate students.

FILM 284 - Film, Culture, and Modernity (5)

Traces the rise of motion picture culture from the late 19th century through the end of the 1920s, looking at film's emerging visual and narrative grammar, its changing cultural status, and its engagement with shifting registers of class, ethnicity, gender, and sexuality.

Prerequisite: Enrollment restricted to graduate students.

FILM 295 - Directed Reading (5)

Directed reading that does not involve a term paper. Students submit petition to course-sponsoring agency. Enrollment restricted to graduate students.

FILM 297 - Independent Study (5)

Either study related to a course being taken or a totally independent study. Students submit petition to sponsoring agency. Enrollment restricted to graduate students. May be repeated for credit.

FILM 297F - Independent Study (2)

Students submit petition to course-sponsoring agency.
Enrollment restricted to graduate students.

FILM 299A - Thesis Research (5)

Students submit petition to course sponsoring agency.
Enrollment restricted to graduate students.

FILM 299B - Thesis Research (10)

Students submit petition to course sponsoring agency.
Enrollment restricted to graduate students.

FMST - FEMINIST STUDIES

Lower-Division

FMST 1 - Feminist Studies: An Introduction (5)

Introduces the core concepts underlying the interdisciplinary field-formation of feminist studies within multiple geopolitical contexts. Explores how feminist inquiry rethinks disciplinary assumptions and categories, and animates our engagement with culture, history, and society. Topics include: the social construction of gender; the gendered division of labor, production, and reproduction; intersections of gender, race, class, and ethnicity; and histories of sexuality. (Formerly Introduction to Feminisms.)

FMST 10 - Feminisms of/and the Global South (5)

Explores feminist theories from domestic U.S. and global contexts in order to ask how interventions of women of color in the U.S. and of radical feminist movements in non-U.S. locations radically re-imagine feminist politics. Rather than focusing on feminist movements that represent different regions of the world, course examines feminist theory through multiple histories of colonialism, post-colonialism, and globalization. (Formerly course 80F.)

FMST 14 - Popular Culture in South Asia (5)

Popular culture enables people to make sense of their modern selves and their place in the world. Focusing on South Asia, this course explores the region's rich and variegated popular culture forms, including film, music, television, the painted and printed image, and sport. It also investigates how the popular articulates with nation and global conjunctures and how it constructs hierarchies of class, gender, caste, and sexuality.

FMST 15 - Gender, Sexuality, and Transnational Migration Across the Americas (5)

Examines migration as a mode of inquiry into transnational practices across geographic locales and temporal zones. Analyzes migration in relation to the transnational formation of gender, race, and sexuality as well as processes of

neocolonialism, the state, and globalization. Taught in conjunction with FMST 115.

FMST 16 - Media Histories--News and New Media (5)

The news is a set of narratives that produce, maintain, repair, and transform reality. Using three events that brought together old and new media, this course traces how the interaction of new media with news has changed how we make sense of the world around us and our place in it.

FMST 20 - Feminism and Social Justice (5)

Examines, and critically analyzes, select post-World War II movements for social justice in the United States from feminist perspectives. Considers how those movements and their participants responded to issues of race, class, gender, and sexuality. A feminist, transnational, analytic framework is also developed to consider how those movements may have embraced, enhanced, or debilitated feminist formations in other parts of the world. (Formerly course 80A.)

FMST 21 - Religion in American Politics and Culture (5)

Introduces dominant discourses about Christianity and Islam in the American public sphere, with particular attention paid to race, gender, sexuality, and class in thinking about religion. Visual and textual media, political commentary, and popular ethnographies are analyzed. (Formerly course 80T.)

FMST 30 - Feminism and Science (5)

Explores questions of science and justice. Examines the nature of scientific practice, the culture of science, and the possibilities for the responsible practice of science. Rather than focusing on feminist critiques of science, the course examines how science and technology are changing our world and the workings of power. (Formerly course 80K.)

FMST 31 - Disability Studies (5)

Introduces students to the key critical concepts, debates, and questions of practice in the emerging field of disability studies, with a focus on feminist and critical race approaches to disability.

FMST 40 - Sexuality and Globalization (5)

Examines the relationship between sexuality and the contemporary term globalization as a dense entanglement of processes that emerges from a history of U.S. empire. Sexuality cannot be separated from power struggles over the classification of bodies, territories, and questions of temporality. Examines how sexualized contact zones produce new knowledge, commerce, inequalities, possibilities, and identities. (Formerly course 80B.)

FMST 41 - Trans Gender Bodies (5)

Draws from representations of transgender/transsexual people in popular, biomedical, and political contexts. Examines the impact of transgender lives on concepts of gender, identity, and technology. Engages with biological and sexological frameworks of sex/gender, trans experience, and social movements and theories. (Formerly course 80M.)

FMST 75 - Feminist Methodologies (5)

Recommended for transfer students. Focuses on particular debates about feminist methodology. Specific methodological debates vary each year but might include feminist theorizing of experience, epistemology, situated knowledges, notions of truth and the real. Feminist methods may include transnational approaches, as well as queer, decolonial, postcolonial, and critical race methodologies. Enrollment is by permission of the instructor.

Upper-Division

FMST 100 - Feminist Theories (5)

Core course for feminist studies. Serves as an introduction to thinking theoretically about issues of feminism within multiple contexts and intellectual traditions. Sustained discussion of gender and its critical connections to productions of race, class, and sexuality. Focus will change each year.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

FMST 102 - Feminist Critical Race Studies (5)

Working from the perspective that race is a cultural invention and racism is a political, economic, and social relation, investigates how race is produced as a meaningful and powerful social category, examines the effects of racism as a social relation, and argues for the necessity of combining feminist and critical race studies. By considering different historical periods and places, aims to equip students with the tools necessary to critically examine the production and reproduction of race and racism in the U.S.

Prerequisite: Prerequisite(s): one course from feminist studies. Enrollment is restricted to juniors and seniors.

FMST 112 - Women and the Law (5)

Interdisciplinary approach to study of law in its relation to category women and production of gender. Considers various materials including critical race theory, domestic case law and international instruments, representations of law, and writings by and on behalf of women living under different forms of legal control. Examines how law structures rights, offers protections, produces hierarchies, and sexualizes power relations in both public and intimate life.

Prerequisite: Enrollment is restricted to feminist studies, politics, legal studies, and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

FMST 115 - Gender, Sexuality, and Transnational Migration Across the Americas (5)

Examines migration as a mode of inquiry into transnational practices across geographic locales and temporal zones. Analyzes migration in relation to the transnational formation

of gender, race, and sexuality as well as processes of neocolonialism, the state, and globalization.

Prerequisite: Prerequisite(s): FMST 1, FMST 100, or FMST 145. Enrollment is restricted to sophomores, juniors, and seniors.

FMST 120 - Transnational Feminisms (5)

Explores the emergence of transnational feminism through U.S. women of color and postcolonial feminism. Underscores the role of globalization, nationalism, and state formation in relation to feminist theorizing, activism, and labor across the Global South. In an attempt to understand the salience of inequalities, the course interrogates the continuation of feminist critique that is attentive to the war on terror, neocolonialism, and empire.

Prerequisite: Prerequisite(s): FMST 1. Enrollment is restricted to sophomores, juniors, and seniors.

FMST 123 - Feminism and Cultural Production (5)

Explores relationship between feminism and culture. Topics will vary and include different forms of cultural production such as film and literature. Regional/national focus will also vary.

Prerequisite: Prerequisite(s): FMST 1. Enrollment is restricted to sophomores, juniors, and seniors.

FMST 124 - Technology, Science, and Race Across the Americas (5)

Examines new ways of understanding the body and race through the intersection of technology and science. Addresses how broader structures of power and the rise of new technological and scientific discoveries mediate power relations and alter how race, national boundaries, the body, and citizenship are normalized and contested from colonialism to the present. Course content may vary; themes may include: U.S. eugenics, I.Q. tests, patenting debates, sterilization, assisted reproduction, biometrics, and genetics across the Americas.

Prerequisite: Enrollment is restricted to sophomore, junior, and senior feminist studies majors during priority enrollment only.

FMST 125 - Race, Sex, and Technology (5)

Explores theories and case studies tied to race, gender, and technology. Covers the history of feminist and critical race analyses of technology as well as contemporary debates.

FMST 126 - Images, Power, and Politics: Methods in Visual and Textual Analysis (5)

Introduces the analysis of visual images and text with particular emphasis on feminist critical methodologies. Using case studies from photography, film, TV, advertising, and new media, students learn how to read and analyze culture.

Prerequisite: Enrollment is restricted to sophomore, junior, and senior feminist studies majors during priority enrollment only.

FMST 131 - The Politics of Matter and the Matter of Politics (5)

Considers how things--what we may think of as objects, matter, nature, technology, bodies--are constitutive elements of social and political life. What happens to the political as a category if we take this matter seriously?

Prerequisite: Prerequisite(s): FMST 1.

FMST 132 - Gender and Postcoloniality (5)

Postcolonial feminist studies. Explores how discourses of gender and sexuality shaped the policies and ideologies of the historical processes of colonialism, the civilizing mission, and anticolonial nationalism. Considers orientalism as a gendered discourse as well as colonial understandings of gender and sexuality in decolonialization. Explores Western media representations, literature, the law, and the place of gender in the current debate between cultural relativism and universalism. Provides an understanding of some key terms in postcolonial studies and an in-depth examination of the place of gender in these processes.

Prerequisite: Enrollment is restricted to juniors and seniors.

FMST 133 - Science and the Body (5)

Contemporary technoscientific practices, such as nano-, info-, and biotechnologies, are rapidly reworking what it means to be human. Course examines how both our understanding of the human and the very nature of the human are constituted through technoscientific practices.

Prerequisite: Prerequisite(s): FMST 1 and FMST 100. Enrollment is restricted to juniors and seniors.

FMST 135 - Topics in Science and Sexuality (5)

Introduces the multiple debates animating the linkages between science, race, and sexuality. Interrogates the interrelated, epistemological frameworks of science and sexuality/queer studies across a range of interdisciplinary and geopolitical locations.

Prerequisite: Prerequisite(s): FMST 100 or FMST 145. Enrollment is restricted to sophomores, juniors, and seniors.

FMST 139 - African American Women's History (5)

Considers African American women as central to understanding of U.S. history, focusing on everyday survival, resistance, and movements for social change. Discussion of critical theories for historical research, gender, and race. Emphasis on biography, cultural history, and documentary and archival research.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

FMST 145 - Racial and Gender Formations in the U.S (5)

Introduces the defining issues surrounding racial and gender formations in the U.S. through an understanding of the term women of color as an emergent, dynamic, and socio-political phenomenon. Interrogates organizing practices around women

of color across multiple sites: film and media, globalization, representation, sexuality, historiography, and war, to name a select few.

FMST 150 - Mediating Desire (5)

From a foundation in semiotics, considers the ways race and gender are constructed, understood, performed, embraced, commodified, and exploited through representations. Uses representations of, by, and for the margins to engage theories of communication, identity, and representation. Creative final projects encouraged. (Formerly Community Studies 152)

Prerequisite: Enrollment is restricted to sophomore, junior, and senior feminist studies majors or by permission of instructor.

FMST 175 - Gender and Sexualities in Latina/o America (5)

Advanced topics in gender and sexuality in Latin America and Latina/o studies. Analyzes role of power, race, coloniality, national and transnational processes in the production and analysis of genders and sexualities. Materials include memoir, fiction, ethnography, social documentary and history. (Formerly, Gender and Sexuality in Latin America.)

Prerequisite: Enrollment is restricted to sophomore, junior, and senior feminist studies majors or by permission of instructor.

FMST 188 - Topics in Feminist Studies (5)

Focuses on a particular topic in feminist theory. Topics vary each offering but might include theorizing the gendered subject, racializing gender, politics and feminism, the relationship between queer theory and feminism, transgender studies, women of color feminisms, postcolonial and decolonial feminisms, feminist science studies.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

FMST 189 - Advanced Topics in Feminist Theory (5)

Focus on a particular problem in feminist theory. Problems vary each year but might include theorizing the gendered subject, racializing gender, the meeting points of psychoanalysis and social-political analysis in theorizing gender, the relationship between queer theory and feminist theory, postcolonial feminist theory.

Prerequisite: Prerequisite(s): FMST 100. Enrollment is restricted to juniors, seniors, and graduate students.

FMST 193 - Field Study (5)

Individual field study in the vicinity of the campus under the direct supervision of a faculty sponsor. Students submit petition to sponsoring agency.

FMST 193F - Field Study (2)

Individual field study in the vicinity of the campus under the direct supervision of a faculty sponsor. Students submit petition to sponsoring agency.

FMST 194A - Feminist Jurisprudence (5)

Approaches legal reasoning from a feminist and intersectional perspective with attention to structures and jurisdiction, case materials, and emerging international frameworks for gender justice. Designed to facilitate completion of a substantial research essay based in feminist legal philosophy.

Prerequisite: Prerequisite(s): FMST 1 and FMST 100; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior feminist studies majors.

FMST 194B - Queer/Feminist Historiography (5)

Providing for a critical examination of canonical formations in history and archives, this course proposes new ways of thinking about history from the point of view of those who have been marginalized or excluded by race, class, gender, or sexuality.

Prerequisite: Prerequisite(s): FMST 1 and FMST 100; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior feminist studies majors.

FMST 194C - Gender and Iconicity (5)

Examines icons and the processes through which an iconicity is constructed and circulated in its complexity. Icons and iconicities often link or articulate various ideologies, affects, and systems of thought into a potent symbol or a mythology. Icons constitute norms, but also disrupt them; icons could articulate new technologies, aesthetics and their representations of the self with purportedly older modes of being in the world, such as a transcendent belief in a god, a faith, etc.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and FMST 1 and FMST 100. Enrollment restricted to senior feminist studies majors.

FMST 194D - Feminist Science Studies (5)

Examines different feminist approaches to understanding the nature of scientific practices. Particular attention paid to notions of evidence, methods, cultural and material constraints, and the heterogeneous nature of laboratory practices. Considers the ways in which gender, race, and sexuality are constructed by science and how they influence both scientific practices and conceptions of science. Also examines the feminist commitment to taking social factors into account without forfeiting the notion of objectivity.

Prerequisite: Prerequisite(s): FMST 1 and FMST 100; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior feminist studies majors.

FMST 194F - Chicana/Latina Cultural Production (5)

Traces the intersection between Chicana studies and Latin American studies through transnational forms of cultural production, imaginaries, and empowerment. Analysis of

theories of cultural production and discussion of the political salience of culture as a site for resistance, critique, and creativity.

Prerequisite: Prerequisite(s): FMST 1 and FMST 100; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior feminist studies majors.

FMST 194G - Images of Africa (5)

Explores questions of colonialism, empire, race, gender, and geopolitics in the proliferating images--filmic, television, and media--of Africa in the United States. Facilitates the completion of a substantial research essay based on the study of popular culture.

Prerequisite: Prerequisite(s): FMST 1 and FMST 100; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior feminist studies majors.

FMST 194H - Michel Foucault: An Introduction (5)

French philosopher Michel Foucault's writings on modern forms of knowledge, power, and subjectivity provide a serious challenge to how we negotiate social oppression. Engages some of Foucault's most cited works, and grapples specifically with his primary claim that modern societies are marked less by freedom and autonomy than by discipline and docility.

Prerequisite: Prerequisite(s): FMST 1 and FMST 100; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior feminist studies majors.

FMST 194I - Feminist Oral History and Memoir (5)

Designed to train students in oral history and memoir writing. Emphasizes the specialness of transgressive voices; race, class, and sexuality, women's silence, erasure, censorship, and marginalization are addressed. The politics of memory, narratives, storytelling, and editorial judgment are considered.

Prerequisite: Prerequisite(s): FMST 1 and FMST 100; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior feminist studies majors.

FMST 194K - Black Diaspora (5)

Seminar focuses on the historical and subjective processes that produce the concept of an African or Black Diaspora. In narrative, film, and cultural studies, themes of slavery, exile, home, identity, alienation, colonialism, politics, and reinvention are explored.

Prerequisite: Prerequisite(s): FMST 1 and FMST 100; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior feminist studies majors.

FMST 194L - Decoloniality, Feminism, and Science Studies (5)

Introduces decolonial perspectives and considers how science studies might be radically transformed through an engagement with decolonial, indigenous, and black feminist perspectives, and scholars from the global South.

Prerequisite: Prerequisite(s): FMST 1 and FMST 100; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior feminist studies majors.

FMST 194M - Empire and Sexuality (5)

Explores the production of sexualities, sexual identification, and gender differentiation within multiple contexts of colonialism, decolonization, and emerging neo-colonial global formations. (Formerly course 118.)

Prerequisite: Prerequisite(s): FMST 1 and FMST 100; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior feminist studies majors.

FMST 194O - The Politics of Gender and Human Rights (5)

Examines human rights projects and discourses with a focus on the politics of gender, sexuality, race, and rights in the international sphere. Reading important human rights documents and theoretical writings, and addressing particular case studies, emphasizes the tensions between the ideals of the universal and the particular inherent in human rights law, activism, and humanitarianism.

Prerequisite: Prerequisite(s): FMST 1 and FMST 100; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior feminist studies majors.

FMST 194Q - Queer Diasporas (5)

Queer diaspora emerged from Third World/queer-of-color critique of queer theory and provides a framework for analyzing racializations, genders, and sexualities in colonial, developmental, and modernizing contexts. Readings from anthropology, history, literature, and feminist and cultural studies.

Prerequisite: Prerequisite(s): FMST 1 and FMST 100; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior feminist studies majors.

FMST 194T - Transgender Studies (5)

Explores literature from the natural sciences, anthropology, history, cultural studies, and sociology. Provides theoretical approaches to complex questions in queer studies and geopolitics, and a framework for understanding embodiment, medical regulation, gender formation, the human/animal divide, etc.

Prerequisite: Prerequisite(s): FMST 1 and FMST 100; satisfaction of the Entry Level Writing and Composition

requirements. Enrollment is restricted to senior feminist studies majors.

FMST 194U - Touring War and Empire (5)

Senior seminar focusing on tourism, colonialism, and militarism. Considers case studies on tourism in colonial contexts and sites of U.S. empire across multiple geographies as students craft their projects, participate in writing workshops, and present research.

Prerequisite: Prerequisite(s): FMST 1 and FMST 100; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior feminist studies majors.

FMST 194V - Marxism and Feminism (5)

Explores critically the intersections and crisis points between feminism and Marxism as bodies of thought, theoretical formations, and forms of historical inquiry.

Prerequisite: Prerequisite(s): FMST 1 and FMST 100; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior feminist studies majors.

FMST 194W - Politics of Space, Time, and Matter (5)

Senior seminar focusing on questions of the politics of space, time, and matter. Readings informed by fields, such as indigenous studies, queer studies, afrofuturism, borderland studies, critical race studies, decolonial studies, disability studies, feminist science studies, and new materialisms.

Prerequisite: Prerequisite(s): FMST 1 and FMST 100; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior feminist studies majors.

FMST 195 - Senior Thesis or Project (5)

The senior thesis/project which satisfies the major requirement. Course is for independent research and writing. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; students submit petition to sponsoring agency.

FMST 198 - Independent Field Study (5)

Provides for individual study program off campus for which faculty supervision is not in person. Students submit petition to sponsoring agency.

FMST 198F - Independent Field Study (2)

Provides for individual study program off campus for which faculty supervision is not in person. Students submit petition to sponsoring agency.

FMST 199 - Tutorial (5)

Individual directed study for upper-division undergraduates. Students submit petition to sponsoring agency.

FMST 199F - Tutorial (2)

Individual directed study for upper-division undergraduates. Students submit petition to sponsoring agency.

Graduate

FMST 200 - Feminist Theories (5)

Introductory required course for feminist studies graduate students. Covers major theorists, debates, and current questions as well as foundational texts through which feminist critiques have been grounded. Content changes with instructor.

Prerequisite: Enrollment is restricted to graduate students.

FMST 201 - Topics in Feminist Methodologies (5)

Explores feminist theorizing across disciplinary and cultural contexts for both methodology (theories about the research process) and epistemology (theories of knowledge). Goal is to orient students toward changes in organization of knowledge and provide them with different feminist methodologies in their pursuit of both an object of study and an epistemology.

Prerequisite: Enrollment is restricted to graduate students.

FMST 202 - Disciplining Knowledge/Graduate Research (5)

Prepares students to develop research skills and initiate their research projects. Students consider what is meant by feminist research and undertake designing and performing feminist research.

Prerequisite: Prerequisite(s): FMST 200 and FMST 201. Enrollment is restricted to graduate students.

FMST 203 - Feminist Pedagogies (5)

Examines feminist pedagogies as projects in transgressing traditional disciplinary boundaries. Examines historical examples of alternative pedagogies and contemporary models for creating communities dedicated to social justice. Designed to assist graduate students develop teaching strategies in multiple fields.

Prerequisite: Enrollment is restricted to graduate students.

FMST 207 - Topics in Queer/Race Studies (5)

Explores the interrelated epistemological frameworks of critical race studies and queer studies. Through the study of a range of philosophical, scientific, literary, and cinematic texts, course historicizes and theorizes discourses of race and sexuality.

Prerequisite: Enrollment is restricted to graduate students.

FMST 211 - Sexuality, Race, and Migration in the Americas (5)

Analyzes the ways transnational processes intersect with changing notions of gender, sexuality, and race. Examines processes such as tourism, the Internet, capitalism, and labor

spanning Brazil, the Dominican Republic, and the United States.

Prerequisite: Enrollment is restricted to graduate students.

FMST 212 - Feminist Theory and the Law (5)

Interrogation of the relationship between law and its instantiating gendered categories, supported by feminist, queer, Marxist, critical race, and postcolonial theories. Topics include hypostasization of legal categories, the contest between domestic and international human rights frameworks, overlapping civil and communal codes, cultural explanations in the law, the law as text and archive, testimony and legal subjectivity.

Prerequisite: Enrollment is restricted to graduate students.

FMST 214 - Topics in Feminist Science Studies (5)

Graduate seminar on feminist science studies. Topics will vary and may include: the joint consideration of science studies and poststructuralist theory; the relationship between discursive practices and material phenomena; and the relationship between ontology, epistemology, and ethics.

Prerequisite: Enrollment is restricted to graduate students.

FMST 215 - Postcolonial and Postsocialist Transactional Analytics (5)

Addresses the intersection of the postcolonial and the postsocialist as theoretical ground. Considers how (neo)liberal ideologies about race, class, gender, secularism, and democracy are shaped by the intersection between postsocialist geopolitics and imperial legacies. (Formerly Postsocialism, Postcolonialism, Neoliberalism.)

Prerequisite: Enrollment is restricted to graduate students.

FMST 216 - Archives/Genders/Histories: An Introduction (5)

Explores the entanglements of archives, genders, and histories across a number of intellectual and imperial contexts. Approaches the concept of the archive to reflect on who counts as a historical and/or gendered subject and what are the ethics of representation that guide such archival formations. Draws on literature from philosophy, gender/sexuality studies, anthropology, history, and literary criticism.

Prerequisite: Enrollment is restricted to graduate students.

FMST 218 - Militarism and Tourism (5)

Positioning tourism and militarism as central sites of inquiry for feminist and ethnic studies, course draws from literature on colonialism and empire to illuminate how tourism functions and how tourists move, in sites of past and present warfare.

FMST 222 - Religion, Feminism, and Sexual Politics (5)

Focuses on the increasing importance of religion as a category of analysis in feminist theory. Addresses the relationship of religion, feminist politics, and activism in connection with nationalism, the family, sexuality, and geopolitics.

Prerequisite: Enrollment is restricted to graduate students.

FMST 232 - Topics in Postcolonial Studies (5)

Variable topics that could include postcolonial approaches to questions of epistemology and knowledge production, theories of nationalism and nation-state formation, subaltern historiography, analyses of modernization and developmental theory, postcolonial approaches to globalization, and transnationalism. Significant component of feminist contributions to these literatures.

Prerequisite: Enrollment is restricted to graduate students.

FMST 243 - Feminism, Race, and the Politics of Knowledge (5)

Course takes as its central topic the institutional politics of feminist and critical race knowledges in the post-1960s United States university. Considers these fields' complex and contradictory relation to disciplinarity, the university's primary or default mode of arranging and legitimizing knowledge formations.

Prerequisite: Enrollment is restricted to graduate students.

FMST 260 - Black Feminist Reconstruction (5)

Re-visions and extends Reconstruction from 1865-1920 from a black feminist standpoint. Topics include: redefining democracy; labor; literacy and education; suffrage; re-visioning sexuality; childbirth; parenting, etc. Analyzes traditional historiography and the methodological implications of the boundaries between history and fiction, and archival and oral traditions.

Prerequisite: Enrollment is restricted to graduate students.

FMST 270 - Anthropology at Its Interfaces with Feminist, Postcolonial, and Decolonial STS (5)

Focuses on generative interfaces within and at the edge of the anthropological discipline, in particular, the way ethnographies and fields are being reconfigured by feminist, postcolonial, and decolonial perspectives and methodologies in science and technology studies (STS).

Prerequisite: Enrollment is restricted to graduate students.

FMST 290 - First-Year Advising (2)

First-year graduate students meet with graduate director for bi-quarterly meetings covering basic expectations. Also includes department colloquia and workshops for graduate students. Enrollment restricted to graduate students.

FMST 291 - Advising (2)

Independent study formalizing the advisee-adviser relationship. Regular meetings to plan, assess, and monitor academic progress, and to evaluate coursework as necessary. May be used to develop general bibliography of background reading trajectory of study in preparation for the qualifying examination. Enrollment restricted to graduate students.

FMST 297A - Independent Study (5)

Independent study and research under faculty supervision. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

FMST 297B - Independent Study (10)

Independent study and research under faculty supervision. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

FMST 297F - Independent Study (2)

Independent study and research under faculty supervision. Students submit petition to sponsoring agency. Enrollment is restricted to graduate students.

FMST 299A - Thesis Research (5)

Prerequisite(s): advancement to candidacy. Enrollment restricted to graduate students.

FMST 299B - Thesis Research (10)

Prerequisite(s): advancement to candidacy. Enrollment restricted to graduate students.

FREN - FRENCH

Lower-Division

FREN 1 - First-Year French (5)

Introduction to French language and culture with practice in all four language skills: listening, speaking, reading, and writing. Intended for students with no previous study of French. (Formerly Instruction in the French Language.)

FREN 2 - First-Year French (5)

Further development of cultural competence and basic French language skills, both written and spoken. Students learn past tenses in this course. (Formerly Instruction in the French Language.)

Prerequisite: Prerequisite(s): FREN 1 or placement by interview.

FREN 3 - First-Year French (5)

Final quarter of first-year sequence. Students complete study of French language basics, including the future tense and the conditional and the subjunctive moods, while continuing to learn about French and Francophone cultures. (Formerly Instruction in the French Language.)

Prerequisite: Prerequisite(s): FREN 2 or placement by interview.

FREN 4 - Second-Year French (5)

First course in intermediate sequence. Students review and expand upon their previous study of the language through

short literary readings, vocabulary building, grammar study, composition, and discussions. (Formerly Intermediate French.)

Prerequisite: Prerequisite(s): FREN 3 or placement by interview.

FREN 5 - Second-Year French (5)

Further development of intermediate-level oral and written skills through study of vocabulary and structures. Students also read and discuss a French or Francophone play.

Prerequisite: Prerequisite(s): FREN 4 or placement by interview.

FREN 6 - Second-Year French (5)

Final course of intermediate sequence includes grammar study, vocabulary building, extensive writing, and discussion. Reading of a French or Francophone novel is an integral part of course.

Prerequisite: Prerequisite(s): FREN 5 or placement by interview.

FREN 94 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

FREN 99 - Tutorial (5)

Students submit petition to sponsoring agency.

FREN 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

FREN 108 - French Cinema (5)

Investigation of a variety of topics (historical, cultural, and linguistic) in France and the French-speaking world. Topics are explored through film. Conducted in English. (Formerly course 80.)

FREN 111 - Stylistics (5)

Intensive work in French composition with the aim of attaining fluency and accuracy of expression while developing literary appreciation. May be repeated for credit with consent of instructor.

Prerequisite: Prerequisite(s): FREN 6. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting.

FREN 114 - French Phonetics (5)

Introduction to the French sound system and basic phonetics. Extensive practice of French pronunciation and phonetic transcriptions of both written and spoken language samples.

Prerequisite: Prerequisite(s): FREN 6.

FREN 120 - French Linguistics (5)

Major topics in contemporary French linguistics, covering both formal and social properties of French. Descriptive and theoretical study of phonetics and phonology, lexicon, morphology, syntax, sociolinguistic variation, status of regional and minority languages, and language planning. Taught in French.

Prerequisite: Prerequisite(s): FREN 6 or equivalent proficiency in French or by consent of the instructor.

FREN 121 - History of the French Language (5)

Overview of the history and development of the French language from Latin to early modern French. Sound changes, grammatical and lexical changes, language policy (e.g., l'Academie francaise), external influences on the language. Taught in French.

Prerequisite: Prerequisite(s): FREN 6 or equivalent proficiency in French, or by permission of the instructor.

FREN 125A - French Civilization: 19th Century (5)

Survey of the important historical events, social changes, and artistic movements contributing to the development of French culture during the 19th century.

Prerequisite: Prerequisite(s): FREN 6.

FREN 125B - French Civilization: 20th Century (5)

A survey of the important historical events, social changes, and artistic movements contributing to the development of French culture during the 20th century.

Prerequisite: Prerequisite(s): FREN 6.

FREN 130 - French for Professions (5)

Students better understand administrative organization in France through preparation of their own professional dossier in French, and preparation to look for professional opportunities in France. Taught in French.

Prerequisite: Prerequisite(s): FREN 6, or equivalent proficiency in French, or by permission of the instructor.

FREN 136 - La Francophonie (5)

In-depth multidisciplinary study of one or more French-speaking regions of the world. Topics may include history, language, society, literature, and the arts. All coursework will be done in French.

Prerequisite: Prerequisite(s): FREN 6.

FREN 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

FREN 199 - Tutorial (5)

Students submit petition to sponsoring agency.

FREN 199F - Tutorial (2)

Students submit petition to sponsoring agency.

GAME - GAMES AND PLAYABLE MEDIA

Graduate

GAME 200 - Game Design Systems (5)

Analyzes how games aggregate mechanics to create dynamic, interactive systems. Students analyze and design systems by general categories (e.g., movement, economy, conflict) to better understand their histories, relationships, and implementations.

Prerequisite: Enrollment is restricted to graduate students.

GAME 210 - Game Art Intensive (5)

Teaches the basic vocabulary, concepts, and practices of creating 2D and 3D art assets for games, as well as their management and integration into game engines. Includes sprites, models, textures, animations, and an introduction to effects.

Prerequisite: Enrollment is restricted to games and playable media graduate students; others by interview.

GAME 215 - Audio Direction (5)

Introduces fundamentals of digital audio and its implementation into a game project. Explores elements of acoustic audio therapy, musical theory, and digital audio theory, coupled with hands-on creation. Students work with audio software, synthesis, plug-in processing and microphones to develop and create an audio direction.

Prerequisite: Enrollment is restricted to games and playable media graduate students.

GAME 221 - Professional Development for Game Makers I (2)

First course in a three-course sequence covering the game industry, game jobs, current thinking on games, and becoming a professional game maker. Focuses on presenting yourself and your ideas. Includes elements of writing, speaking, and designing professional communication.

Prerequisite: Enrollment is restricted to games and playable media graduate students; others by interview.

GAME 222 - Professional Development for Game Makers II (2)

Second course in a three-course sequence covering the game industry, game jobs, current thinking on games, and becoming a professional game maker. Focus on design considerations

and methodologies employed in the game industry with emphasis placed upon the student's ability to develop designs beyond mere ideas through to execution.

Prerequisite: Enrollment is restricted to games and playable media graduate students.

GAME 223 - Professional Development for Games Makers III (2)

The third course in a three-course sequence covering the game industry, game jobs, current thinking on games, and becoming a professional game maker. Focuses on the business of the game industry, including funding, corporation types and formation, budgeting and burn rates, pitch decks, and marketing.

Prerequisite: Enrollment is restricted to games and playable media graduate students.

GAME 230 - Fundamentals of Game Engineering (5)

Deep introduction to technologies used in the construction of computer games. Principles of 2D game engine design, including architecture, object-oriented design patterns, collision detection, particle systems. Also examines artificial intelligence techniques including pathfinding, state machines, and behavior trees.

Prerequisite: Enrollment is restricted to games and playable media graduate students.

GAME 231 - Game Technologies (5)

Learn the fundamentals of at least two contemporary game engines. Develop 3D game prototypes using custom-level geometry and shaders. Understand common features of the engines and how engine-specific features shape the space games that are reasonable to implement.

Prerequisite: Prerequisite(s): GAME 230; or GAME 235 and GAME 236. Enrollment is restricted to graduate students.

GAME 232 - Advanced Game Technologies (5)

Exposes students to cutting-edge research technologies enabling the creation of games not possible with off-the-shelf techniques. Students learn how understand research to incorporate such technologies into a game. Students create rapid prototypes using several different technologies.

Prerequisite: Prerequisite(s): GAME 230; or GAME 235 and GAME 236. Enrollment is restricted graduate students.

GAME 235 - Game Development I (5)

First in a two-course sequence providing an introduction to game programming using a modern object-oriented language. Introduces the technologies used in the construction of computer games. Introduces the principles of 2D game engine design, including architecture, object-oriented design patterns, and collision detection. Students may not receive credit for this course and course 230.

Prerequisite: Enrollment is restricted to graduate students.

GAME 236 - Game Development II (5)

Second in a two-course sequence providing an introduction to game programming using a modern object-oriented language. Intermediate technologies are used in the construction of computer games. Includes NPC behavior, scenes and shaders, physics, debugging, and managing game code. Students may not receive credit for this course and course 230.

Prerequisite: Prerequisite(s): GAME 235. Enrollment is restricted to graduate students.

GAME 238 - Computer Graphics for Games (5)

Advanced computer-graphics techniques for computer games. Covers a range of computer graphics techniques used in contemporary computer games, with emphasis on those that complement existing game engines. Subjects covered include: lighting for models and scenes, shader programming (including several visual effects), procedural mesh manipulation, advanced use of particle systems, and non-photorealistic rendering techniques.

Prerequisite: Prerequisite(s): GAME 230 or GAME 235. Enrollment is restricted to graduate students.

GAME 250 - Foundations of Serious Games (5)

Provides an overview of the serious games field, including projects in various domains and using various design approaches. Introduces the fundamentals of requirements analysis and efficacy measurement for the serious games field, and their connections to game and project design.

Prerequisite: Enrollment is restricted to graduate students.

GAME 251 - Games User Research (5)

Research approaches to user experience of games, from direct interaction with players to game instrumentation methods. Students learn to understand, select between, and adapt research designs and analysis approaches. Includes defining and measuring impact and effect size of serious games.

Prerequisite: Enrollment is restricted to Serious Games graduate students.

GAME 255 - Serious Games Studio I (5)

Focuses on developing innovative project concepts, rapid prototyping and playtesting, and the creation of concept presentations. Students identify appropriate sources of subject matter expertise, elicit knowledge to inform a game project, and integrate that knowledge into the core gameplay experience.

Prerequisite: Prerequisite(s): GAME 200, or GAME 230, or GAME 236, or GAME 250. Enrollment is restricted to graduate students.

GAME 256 - Serious Games Studio II (5)

Students work in teams to develop serious games. Involves multiple aspects of game production with emphasis on initiating production and coordination between requirements and design, and preparing a game iteration for efficacy

measurement. Students receive frequent critiques on emerging game projects.

Prerequisite: Prerequisite(s): GAME 255. Enrollment is restricted to graduate students.

GAME 257 - Serious Games Studio III (5)

Students work in teams to develop serious games. Involves multiple aspects of game production with emphasis on performing efficacy measurements and responding through iteration. Students receive frequent critiques on final game projects.

Prerequisite: Prerequisite(s): GAME 256. Enrollment is restricted to graduate students.

GAME 270 - Games and Playable Media Studio I (5)

First course in a three-course sequence covering the fundamentals and advanced topics in game and playable-media development. Focuses on developing innovative project concepts using methods ranging from prototyping to design documents, planning, and initiating project development.

Prerequisite: Enrollment is restricted to games and playable media graduate students; others by interview.

GAME 271 - Games and Playable Media Studio II (5)

The second course in a three-course sequence in which students work in teams to develop an innovative computer game. Coursework involves multiple aspects of game production, including agile methodology; game and level design; development of code to implement game behavior; art direction; and audio design. Students receive frequent critiques on emerging game projects.

Prerequisite: Prerequisite(s): GAME 270. Enrollment is restricted to games and playable media graduate students.

GAME 272 - Games and Playable Media Studio III (5)

The third course in a four-course sequence in which students work in teams to develop an innovative computer game. Coursework involves multiple aspects of game production including agile methodology; game and level design; development of code to implement game behavior; art direction; and audio design. Students receive frequent critiques on emerging game projects.

Prerequisite: Enrollment is restricted to graduate students in the games and playable media program.

GAME 273 - Game Production Intensive (10)

Fourth course in a four-course sequence in which students work in teams to launch an innovative computer game. Coursework involves multiple aspects of game production, including agile methodology, game and level design, development of code to implement game behavior, art direction, and audio design. The emphasis is on interacting with game media to publicize the game. Students receive frequent critiques on emerging game projects.

Prerequisite: Enrollment is restricted to graduate students in the games and playable media program.

GAME 280A - Games Proseminar (2)

Students learn through guest speakers, design exercises, master classes, and interactive group activities. Students prepare through reading texts, playing games, and developing their own materials. Features visitors from small and large developers, game scholars, and those using games in general.

Prerequisite: Enrollment is restricted to graduate students.

GAME 280Y - Games You Should Know (2)

Examines games that produce novel experiences. Each session consists of game play and discussion of associated readings. Students learn to appreciate the range of possible game experiences, and understand key design ideas that enable those experiences.

Prerequisite: Enrollment is restricted to graduate students.

GAME 290A - Advanced Topics in Games (5)

In-depth study of current topics in digital and non-digital games. Topics vary, but are expected to include virtual reality, augmented reality, novel game interfaces, advanced computer graphics techniques, advanced game-design techniques, advanced procedural content generation, and autonomous characters.

Prerequisite: Enrollment is restricted to graduate students.

GERM - GERMAN Lower-Division

GERM 1 - First-Year German (5)

German 1, a beginning-level course, introduces the German language and culture for students with no previous knowledge of German. The course focuses on speaking, reading, writing, and listening. The first-year sequence (1-2-3) starts in fall quarter only. (An accelerated sequence, courses 1A-1B, begins in winter quarter.) (Formerly Instruction in the German Language.)

GERM 1A - Accelerated German (5)

Accelerated course covers German 1 and part of German 2. It is designed for motivated beginning students. Students develop skills in speaking, reading, writing, and listening to real-life German. (Formerly Intensive Elementary German.)

GERM 1B - Accelerated German (5)

Accelerated course part 2 covers part of German 2 and all of German 3. In this course, students who have successfully completed German 1A (or its equivalent) continue to develop competence in speaking, reading, writing, and understanding real-life German. (Formerly Intensive Elementary German.)

Prerequisite: Prerequisite(s): GERM 1A or GERM 2 or placement by examination. For students completing GERM 2, GERM 3 is preferable.

GERM 2 - First-Year German (5)

German 2, a second-quarter course, is designed for students who have successfully completed German 1 (or its equivalent). Students continue to develop competence in speaking, reading, writing, and understanding in the context of real-life language use. (Formerly Instruction in the German Language.)

Prerequisite: Prerequisite(s): GERM 1 or GERM 1A or placement by examination.

GERM 3 - First-Year German (5)

German 3 is designed for students who have successfully completed German 2 (or its equivalent; e.g., 2-3 years of high school German). Students continue to develop competence in speaking, reading, writing, and understanding real-life German. (Formerly Instruction in the German Language.)

Prerequisite: Prerequisite(s): GERM 2 or placement by examination.

GERM 4 - Second-Year German (5)

Intermediate composition and conversation based on the reading of selected prose and related cultural material. Speaking, reading, writing, and listening comprehension skills are developed by extensive use of media materials. Conducted entirely in German.

Prerequisite: Prerequisite(s): GERM 1B or GERM 3 or placement by examination.

GERM 5 - Second-Year German (5)

Intermediate composition and conversation based on the reading of selected prose and related cultural material. Speaking, reading, writing, and listening comprehension skills are developed by extensive use of media materials. Conducted entirely in German.

Prerequisite: Prerequisite(s): GERM 4 or placement by examination.

GERM 6 - Second-Year German (5)

Intermediate composition and conversation based on the reading of selected prose and related cultural material. Speaking, reading, writing, and listening comprehension skills are developed by extensive use of media materials. Conducted entirely in German.

Prerequisite: Prerequisite(s): GERM 5 or placement by examination.

GERM 94 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

GERM 99 - Tutorial (5)

Students submit petition to sponsoring agency.

GERM 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

GERM 119 - German Media (5)

This third-year language and culture course is designed for students who are comfortable speaking and writing German at the German 5 level or above. Using a variety of German media sources, students give oral presentations and write reports on contemporary issues. Taught in German.

Prerequisite: Prerequisite(s): GERM 5 or placement by examination.

GERM 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

GERM 199 - Tutorial (5)

Students submit petition to sponsoring agency.

GERM 199F - Tutorial (2)

Students submit petition to sponsoring agency.

GREE - GREEK

Lower-Division

GREE 1 - Elementary Ancient Greek (5)

Instruction in the grammar of Attic Greek, together with readings from ancient authors, designed to prepare for the study of classical literature. The sequence begins in the fall quarter only.

GREE 2 - Elementary Ancient Greek (5)

Instruction in the grammar of Attic Greek, together with readings from ancient authors, designed to prepare for the study of classical literature.

Prerequisite: Prerequisite(s): GREE 1, or permission of instructor.

GREE 99 - Tutorial (5)

Students submit petition to sponsoring agency.

GREE 99F - Tutorial (2)

Students submit petition to sponsoring agency.

HAVC - HISTORY OF ART AND VISUAL CULTURE

Lower-Division

HAVC 10 - Introduction to African Visual Culture (5)

An interdisciplinary approach to the study of the basic structures (gender, art within political sphere, and spiritual aspects of visual culture) and cultural institutions (initiations, closed associations, kingship, title association, etc.) around which the study of African visual culture revolves.

HAVC 20 - Visual Cultures of Asia (5)

An introduction to the art and architecture of East Asia, including China, India, Southeast Asia, and Japan. In order to achieve a fuller understanding of the arts of these countries a historical, cultural, and religious context is provided.

HAVC 22 - Religion and Visual Culture in China (5)

Introduction to the study of religious currents and practices in China and their visual expression. In addition to religious art, topics include such pivotal matters as body concepts and practices, representations of the natural world, and logics of the built environment. (Formerly course 80G.)

HAVC 24 - Southeast Asia Visual Culture (5)

Introduces the visual cultures of Southeast Asia. Topics include indigenous megalithic art, textiles, and jewelry, as well as Hindu and Buddhist art and architecture. Also considers shadow play and dance performance as alternative lenses to looking at ritual and visual narratives rendered on stone temples.

HAVC 27 - Image and Ideology in Indian Art (5)

Examination of the ways social, religious, and political patronage have affected the production and reception of art in the Indian subcontinent. The course is designed as a series of case studies from different periods of Indian history.

HAVC 30 - Introduction to European Visual Culture (5)

An introduction to the European tradition in visual culture, from antiquity to the present, but not in chronological order. All media, including the fine arts, architecture, film, video, and installation and performance work are incorporated. Presents the major visual regimes of representation while it probes the meanings and limits of Europe and the European tradition in the context of the visual.

HAVC 40 - Museum Cultures: The Politics of Display (5)

Explores the history of collecting and displaying art (museums, galleries, fairs) since the mid-19th century and the effect of institutional changes on aesthetic conventions.

Follows the history from the origins of museums and collections to contemporary critiques of institutional exclusion and misrepresentation.

HAVC 41 - Introduction to Modern Art (5)

Examines the social, economic, and political significance of European and U.S. modernist art and architecture, moving from French realism to American minimalism. Provides the historical background and theoretical frameworks needed to make sense of modernist art and culture. (Formerly Modern Art in Context.)

HAVC 43 - History of Modern Architecture (5)

Examines the origins and development of modern architecture, from the Enlightenment and the Industrial Revolution to the 20th Century and beyond. Buildings, urban plans, and works of art and design are discussed in relation to political, social, and cultural currents.

HAVC 44 - Designing California: Architecture, Design, and Environment (5)

Introduces the complex interplay between design--including architecture, art, engineering, and city planning--and conceptions of environment during the 20th Century in the American West. (Formerly Design and Environment in the American West.)

HAVC 45 - Photography Now (5)

Explores recent methods and approaches in photography. Surveys significant aesthetic, conceptual, and theoretical shifts occurring in the photographic medium and related discourses. Special attention given to the current landscape of contemporary photography (1980-present).

HAVC 46 - Introduction to U.S. Art and Visual Culture (5)

Overview of U.S. art and visual culture from the late 18th Century to the present. Examines art as evidence for understanding evolving beliefs and values of Americans. Explores the social and political meanings of art, and pays particular attention to how artists, patrons, and audiences have constructed nationalism, race, class, sexuality, and gender.

HAVC 47 - Introduction To Contemporary Art (5)

Introduces students to major debates and practices in contemporary art from 1960 to the present. Not a strict chronological survey or exhaustive catalogue, the course attends to movements and theoretical frameworks that still fuel contemporary practice and criticism.

HAVC 48 - Climate Justice Now Art, Activism, Environment Today (5)

As climate change grows more severe, artists and activists are creating strategies of consciousness-raising, mass mobilization, and sustainable living. This course investigates the convergence of climate justice and cultural politics, exploring imperatives for a just transition to a post-carbon future.

HAVC 49 - From Memes to Metadata: an Introduction to

Digital Visual Culture (5)

Introduction to digital visual culture including critical and historical approaches to memes; social media and politics; and the many intersections of data, images, and society. Sample topics include: digital art, digital activism, and surveillance. (Formerly A Short History of the Digital.)

HAVC 50 - Ancient Mediterranean Visual Cultures (5)

The role that ancient art and visual culture play in constructing social identities, sustaining political agendas, and representing various cultural, ritual, and mythological practices in Mesopotamia, Egypt, Greece, and Rome, including the sociology of ancient cultures, mythology, religious studies, gender studies and history.

HAVC 51 - Greek Eyes: Visual Culture and Power in the Ancient Greek World (5)

The central role of visual communication in ancient Greek civilization: examines the construction of cultural, social, political, religious, and gender identities through material objects and rituals. Includes discussions of images of the public and private sphere, athletic and theatrical performances, mythology, pilgrimage, and magic.

HAVC 55 - Unclothed: The Naked Body from Antiquity to the Present (5)

The human body without clothing in European and European-American art and visual culture from ancient Greece to the present day. Among the themes to be addressed: gender, youth and age, sexuality and sexual preference, fecundity and potency, erotic art and pornography, primitivism and the naked body of the non-European. (Formerly course 31, The Nude in the Western Tradition.)

HAVC 58 - Gardens of Delight: Fifteen Centuries of Islamic Visual Culture (5)

Examines some of the most representative creations of Islamic visual culture from the 7th Century to the present in order to appreciate the richness of this tradition and its extensive influence on other cultures. Focuses on the social, political, and religious role of a variety of materials, from mosques, palaces, and gardens to visual narratives, ceremonies, dance, and contemporary films.

HAVC 60 - Indigenous American Visual Culture (5)

Selected aspects of art and architecture of the first peoples of the Americas, north, central, and south, from ca. 2000 B.C.E. to present. Societies to be considered may include Anasazi, Aztec, Inca, Northwest Coast, Maya, Navajo, Plains, and others.

HAVC 70 - Visual Cultures of the Pacific Islands (5)

Interdisciplinary course examines visual cultures of Australia, Melanesia, Micronesia, and Polynesia from the archaeological past through contemporary periods.

HAVC 80 - Colonial Histories and Legacies: Africa, Oceania, and the Indigenous Americas (5)

The arts and visual cultures of selected cultures that developed outside the spheres of influence of major European and Asian civilizations, with an emphasis on the history and influence of colonialism in creating current ethnic and racial categories.

HAVC 85 - Introduction to Global Architecture (5)

Introduces the study of architecture and the built environment from a global perspective, focusing on architecture's relation to themes, such as ritual, power, the city, technology, and climate. (Formerly course 47.)

HAVC 99 - Tutorial (5)

Supervised study for undergraduates. Students submit petition to sponsoring agency.

Upper-Division

HAVC 100A - Approaches to Visual Studies (5)

Introduction to major issues of method and critique in study of art and visual culture. Focuses on understanding disciplinary and critical modes of scholarly inquiry in the visual arts, including role of historical research. Emphasizes intensive reading, discussion, and writing. Course 100A is a prerequisite for all History of Art and Visual Culture seminars.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements. Enrollment is restricted to sophomore, junior, and senior History of Art and Visual Culture majors and minors.

HAVC 110 - Visual Cultures of West Africa (5)

Explores visual cultures of West Africa through time (Nok to present). Attention paid to relationships between peoples and impact of European/Arab presence on visual cultures. Prerequisite(s): course 10 or 80 recommended.

HAVC 111 - Visual Cultures of Central Africa (5)

Examination of visual cultures of Central Africa within a historical sequence from the Sanga archaeological excavations to contemporary easel painting.

Prerequisite: Prerequisite(s): HAVC 80 suggested. Enrollment is restricted to sophomores, juniors and seniors (recommended).

HAVC 115 - Gender in African Visual Culture (5)

In Africa, relationships exist between gender and visual culture. Course examines where categories come from, differences in men's and women's visual cultures, and how visual cultures teach, reinforce, and negotiate gender definitions. When are male/female boundaries crossed, and why?

HAVC 116 - African Architecture (5)

Study of the built environment in Africa. Focusing in depth on 10 major architectural forms or sites, this course explores the diversity of architectural types and how gender, politics, religion, and culture shape and are shaped by architectural spaces.

HAVC 117 - Contemporary Art of Africa (5)

Examines contemporary arts in post-colonial Africa, 1960-present, including new popular cultural forms; arts resulting from new class and national structures; commodification of culture; Pan-Africanism; exhibitionism; and questions of destiny.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

HAVC 118 - Art of the Contemporary African Diaspora (5)

Considers contemporary art by African artists operating in metropolitan centers, as well as Afro-British, Afro-Caribbean, and African-American production. Topics are organized thematically and address constructing and deconstructing the idea of Africa; cultural authenticity; diaspora; Creolite and creolization; hybridity; cosmopolitanism; post-black; and globalism in the arts.

Prerequisite: Background in history of art and visual culture recommended. Enrollment is restricted to sophomores, juniors, and seniors.

HAVC 119 - Arts and Politics of African Urban Space (5)

Using contemporary art and other visual materials, examines how select African cities are structured, imagined, and contested, and how migration, colonialism, race, ethnicity, and globalization inform their spatial politics. Draws from urban studies, political theory, memoir, anthropology, and visual studies.

HAVC 122A - Sacred Geography of China (5)

An examination of the close relationship of religious traditions and the natural world in China, and its expression in visual representation. Particular emphasis on the ways in which competing groups sought to define or re-envision an understanding of the terrain.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

HAVC 122B - Constructing Lives in China: Biographies and Portraits (5)

Consideration of biographies and portraits in China as representations of human types and individuals, and the use of these representations as models for constructing lives. Attention to historical and social contexts, early times to present. Special focus on Chinese Buddhist traditions. A previous course that focuses on traditional China or Buddhist studies strongly recommended.

HAVC 122C - Writing in China (5)

Examines material and conceptual phenomena of writing in Chinese visual culture. Focuses on the intersections of places and practices of writing through various inscribed sites, ranging from oracle bones, seals, and mountain facades to hand scrolls, architecture, and contemporary art.

HAVC 122D - Chinese Landscape Painting (5)

Examines the history and significance of the subjects most prominent in Chinese painting during the past one thousand years, focusing on the cultural factors that made landscape a fundamental value in the Chinese tradition and the methods whereby painters created pictorial equivalents.

HAVC 122F - Bodies in Chinese Culture (5)

Introduces images, thoughts, and practices of bodies in Chinese culture. In China and Taiwan, the body is to be cherished, adorned, nourished, cultivated, and gazed upon, but also disciplined, altered, and controlled. Examines texts and images of the Chinese body in relation to religion, gender, ethnic politics, martial arts, sports, nationalism, food, medicine, and death. No knowledge of the Chinese language is required.

HAVC 123A - Modernity and the Arts of India (5)

Deals with artistic responses to the forces of modernity, colonialism, industrialization and globalization in India during the 19th and 20th centuries. Addresses the complex and often painful climb toward re-establishing a truly Indian artistic identity. (Formerly Modernity and Nationalism in the Arts in India.)

HAVC 123B - Religions and Visual Culture of South Asia (5)

South Asia is the home of many religions (Hinduism, Buddhism, Jainism, Islam, and Sikhism). Introduces the role images (painting, sculpture, architecture, photography, film) play in shaping these diverse religious traditions.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

HAVC 124A - Arts of Ancient Southeast Asia (5)

Focuses on Hindu and Buddhist arts of ancient Southeast Asia (Indonesia, Cambodia, Vietnam, and Thailand). Materials covered include indigenous megalithic arts, stone sculptures, and monumental temple architecture such as Angkor Wat, Borobudur, Prambanan, and the Bayon.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

HAVC 124B - History of Photography in Southeast Asia (5)

Examines how photography was used in Southeast Asia to document the racial difference and the exotic Others under the regime of colonialism. Considers the role photography played in documenting the Vietnam-American War and how contemporary Southeast Asian-American artists challenge this photographic history in their art.

Prerequisite: Enrollment is restricted to sophomores, juniors and seniors.

HAVC 124C - Arts and Politics in Theravada Traditions (5)

Consideration of the arts and architecture in Theravada Buddhist traditions in Sri Lanka and Southeast Asia. Topics and themes include ritual, relics, visual narrative, mural painting, contemporary art, mass-meditation movement, and political protest.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

HAVC 124D - Contemporary Art of Southeast Asia and its Diaspora (5)

Examines the respective national notions of modernity in the region through a comparative lens. How global capital flow and transnational cultural exchanges impact the production of arts of Southeast Asia and its diaspora. Themes and issues include: colonialism and art education; nationalism; identity politics; memory; trauma; gender; race; sexuality; and the body.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

HAVC 124E - Southeast Asian-American and Diasporic Visual Culture (5)

Focuses on Southeast Asian refugee visual culture in the United States. Themes and issues include: trauma; memory; the politics of race and ethnicity; gender and sexuality; and the politics of inclusion and exclusion from the nation-state.

HAVC 127A - Buddhist Visual Worlds (5)

Introduction to the study of Buddhist visual traditions, from their beginnings to the present day. Case studies examined with careful attention to historical, social and cultural contexts; particular emphasis on the relation of visual traditions to Buddhist practices.

Prerequisite: Enrollment is restricted to sophomore, junior, and senior students.

HAVC 127B - Buddhist Pure Lands (5)

Conceptions of pure lands have engaged the imaginations of Mahayana Buddhists for more than two millennia. Course considers literary and visual representations of pure lands and their inhabitants, as well as related practice traditions. Special emphasis on Chinese traditions. Previous courses in Asian visual cultures and/or Buddhist studies recommended.

HAVC 127C - Ritual in Asian Religious Art (5)

Examination of interaction between image and ritual in Asian religious art. Case studies from different historical periods and geographical locations (e.g., China, Tibet, Japan, Indonesia, India). Examples include mandalas, ritual bronzes, tankas, sacred caves, temples, tea ceremonies, and calligraphy.

HAVC 127D - Storytelling in Asian Art (5)

Combination of theoretical perspectives on narrative from literary criticism, rhetoric, folklore, and film theory with art historical focus on images (cave temples, stone reliefs on stupas, scrolls, dance-drama, etc.) from India, Pakistan, China, Japan, Cambodia, and Indonesia.

HAVC 127E - Modern/Contemporary Architecture of the Asia Pacific (5)

Examines 20th- and 21st-century architecture in the Asia Pacific. Examines how aesthetic, socio-political, economic, and technological networks have contributed to Asia Pacific's dynamic and experimental approaches to contemporary architecture.

HAVC 127F - The Politics of Exclusion: Asian American Visual Culture (5)

Examines Asian American artists as well as representations of Asian Americans through U.S. history. Addresses such themes as migration and dislocation, race and identity, intergenerational relationships, origins and diasporas, and American foreign policies in Asia.

HAVC 133A - Themes in the Study of Medieval Visual Culture (5)

Many issues associated with contemporary artistic production and visual culture originated in the Middle Ages. Themes to be considered: role of secular art; women as artists and patrons; aesthetic attitudes; relationship between cultures in holy war, crusade, and pilgrimage.

HAVC 135B - German Art, 1905–1945 (5)

Expressionism, agitprop, the Bauhaus, New Objectivity, attacks on modernism, National Socialist realism. Painting, sculpture, graphic art, and some architecture and film, studied in the context of political events from the eve of World War I to the end of World War II.

HAVC 135D - French Painting, 1780-1855 (5)

The art of David, Gros, Ingres, Gericault, Delacroix, the Barbizon School, and Courbet studied in relation to the changing status of the art and the political events from 1789 to 1848.

HAVC 135E - Jewish Identity and Visual Representation (5)

An exploration of the theoretical and practical or experiential applications of Jewish identity in European visual representation. Brief background on pre-emancipation textual and cultural issues followed by study of the Jewish subject and Jewish subjectivities in modernity.

Prerequisite: Enrollment is restricted to juniors and seniors.

HAVC 135F - Art of the Book in Western Europe 500-1600 (5)

The history of European books circa 500-1600, primarily medieval, illuminated manuscripts and the first years of printing. Focuses on the relationship between text and image. Topics include techniques of book production, the archeology

of the book, and the life and travels of individual books. (Formerly course 191R.)

HAVC 135G - Blood, Guts, and Gore: Representing War from Leonard da Vinci to Abu Ghraib (5)

Examines images of war from 1400 to the present. Class discusses the many aspects of war while considering major painters of the last 600 years, including da Vinci, Rubens, Goya, Picasso. Class also discusses Callot, Marinetti, etc., and other media, including film, photography, and public monuments.

HAVC 135H - Topics in European and Euro-American Visual Culture (5)

Consideration of how and why Europeans in Europe and Europeans and European-Americans in North America blended nature and human response between 1600 and the present in a variety of media and practices (painting, maps, photography, tourism, film, scouting, artist colonies).

HAVC 135P - Paris, Capital of the 19th Century (5)

Examines the places, spaces, practices, and representations of Paris in the 19th century. Tracing the changing face(s) of Paris by way of its literary and visual representations, students consider the experiences and constructions of the modern city.

HAVC 137A - Northern Renaissance Art (5)

Considers the painting and prints produced in Northern Europe in the 15th and 16th centuries. Major issues include the status of realism and classicism, the role of religion and religious reform, and the rise of popular imagery.

HAVC 137E - Renaissance Prints (5)

Examines the issues surrounding the technology and uses of printed images from the early Renaissance through the end of the early modern period. Topics may include the political, religious, and satirical uses of prints and the representation of women in prints.

HAVC 140A - America in Art (5)

Introduction to American visual arts: architecture, painting, photography, sculpture, and performance art, from the nineteenth through the twenty-first century. Explore social and political meanings of art and what art reveals about our nation's values and beliefs, in particular, gender and race.

HAVC 140B - Victorian America (5)

Examines how American writers and artists negotiated complexities of U.S. society during the 19th century. Emphasis on issues ranging from women's rights to laissez-faire capitalism, and from Reconstruction to manifest destiny. Considers how the era's cultural products provided artists, patrons, and audiences with metaphorical coping strategies to counteract what Victorians perceived to be the period's overwhelming social and political changes.

HAVC 140C - Race and American Visual Arts (5)

Investigation of the role played by visual arts in fashioning the racial identities of European-Americans, African Americans, Asian Americans, Native Americans, and Latinos in the United States.

HAVC 140D - Chicano/Chicana Art: 1970-Present (5)

Taking the terms Chicano and Chicana as a critical framework, addresses cultural and conceptual themes in visual art production since 1970. Questions concerning aesthetics, identity, gender, and activism in painting, photography, murals, and installation art explored.

HAVC 140E - Art and Science in America: Contact to circa 1900 (5)

Examines the relationship between art and scientific inquiry in American visual culture from earliest European exploration through the 19th century, when new scientific theories and technological advancements challenged earlier modes of understanding vision, spirituality, and the physical world.

HAVC 140P - Pop Culture as High Art (5)

Examines how Pop Art and popular culture in the United States were (re)formulated into public icons that challenged the visual and ideological associations between high and low art. (Formerly Pop and Popular Culture.)

HAVC 141A - Modern Art: Realism to Cubism (5)

Modern art in Europe and America, 1848-1914. Consideration of painting, graphic arts, and sculpture in Realism, Impressionism, Post-Impressionism (Symbolism) Art Nouveau, Fauvism, and Cubism as well as exploration of photography's changing status and influence.

HAVC 141B - Death, Desire, and Modernity (5)

Explores war, consumption and desire in the art of the 20th century. From Paris to New York, Cubism to Feminism, explores the relationship between the visual arts and intellectual movements such as psychoanalysis, existentialism, and phenomenology with particular attention to racial and sexual politics. (Formerly Modern Art: Cubism to Pop.)

HAVC 141C - Modern Art: Pop to Present (5)

Surveys major art forms and critical ideas that have shaped artistic practice from the 1950s to the present, including an overview of the socio-political, economic, and cultural forces that inspire artists to articulate human experience in visual form.

HAVC 141E - Histories of Photography (5)

Introduction to the histories of photography and the critical debates around different photographic genres such as medical photography, art photography, and political photography. Students will develop a critical language in order to analyze photographs while considering the importance of social and institutional contexts.

HAVC 141F - The Camera and the Body (5)

Through the study of historical and contemporary visual texts (from ethnography and portraiture to advertising and erotica), this course explores how photographic images of the body, while masquerading as natural, self-evident, or scientific, participate in highly coded sign systems that influence who looks at whom, how, when, and why.

HAVC 141H - Media History and Theory (5)

An introductory examination of the writing about the issue of medium and media theory in visual culture. Technologies, discourses, and practices from all periods that use the comparison of media as a major approach to understanding the problems of the visual are highlighted. New media, film, television, video, traditional arts are also treated.

HAVC 141I - Be Here Now: Art, Land, Space (5)

From the "happenings" of the late 1950s to contemporary ecological art, this course will examine temporary, site-specific projects of the U.S and Western Europe. Students will be introduced to theories of public art and the social production of space, and invited to explore practices that change the role of the audience, remake museum spaces, situate art in nature, or transform urban life. (Formerly Environments, Installations, and Sites.)

HAVC 141J - Critical Issues in Contemporary Art and Visual Culture (5)

Considers the relationship between art, cinema, and postmodernism. Specific, thematically oriented topics are considered including: the impact of cinema aesthetics on contemporary art; film and digital technology; cinematic structure as cultural critique; and filmic strategies as an ideological tool.

HAVC 141K - Activist Art Since 1960: Art, Technology, Activism (5)

Students explore art and technology produced for social change since 1960 within the context of major historical ruptures, such as the Vietnam War, the women's movement, environmental protection, AIDS activism, anti-capitalist, and international human rights movements.

HAVC 141M - Museum Practices (5)

How are museums organized, categorized, visited? How are objects physically handled, documented, and displayed? Course explores various concepts upon which museum practices are based and the impact these concepts have on society and cultures.

HAVC 141N - Data Cultures: Art, Technology, and the Politics of Visual Representation (5)

Through critical readings, interactive assignments, and primary sources, this course explores cultural and political issues around data, emphasizing the impacts of relevant technologies and practices on art and visual culture. Sample topics: digital art, critical mapping, social media, and surveillance.

HAVC 141O - Sex, Lies, and Surveillance: Contemporary Documentary Arts (5)

Focuses on contemporary experiments in artistic documentary practice, including photography and digital imagery, moving-image media, and artistic installations. Considers artistic case studies and leading theoretical and critical elaboration in relation to international cultures of documentary practice. (Formerly Contemporary Documentary Arts)

HAVC 141P - Networks and Natures: Art, Technology, and the Nonhuman (5)

Through critical readings and primary sources, this course explores the historical and theoretical developments in the interactions of art, culture, nature, and technology. Sample topics include environmental art; media infrastructures; concepts of nature and the nonhuman; and climate change and visual culture.

HAVC 142 - Contemporary Art and Ecology (5)

Investigates contemporary art and the politics of ecology. Examines the intersection of art criticism, politico-ecological theory, environmental activism, and postcolonial globalization, considering geopolitical areas diverse as the Arctic, Nigeria, Bangladesh, India, Europe, and the Americas.

HAVC 143A - Contemporary Architecture and Critical Debates (5)

Examination of practitioners, projects, issues, and theories in contemporary architecture circa 1968 to the present. Topics include the architecture of aftermath, the ethics of memory and memorialization, the corporatization of museums, the role of criticism and exhibitions, and the cult of the brand-name architect.

HAVC 143B - History of Urban Design (5)

Examines urban design from the Renaissance to the present, including Latin American colonial cities, Utopian plans, and sites such as Brasilia and Chandigarh. The course focuses on social justice, diversity, and the role of art and architecture.

HAVC 143C - Latin American Modern Architecture (5)

Presents Latin America's modern architecture with relation to colonization; the influence of immigrants from Europe, Africa, and Asia; the presence of indigenous cultures; and the search for autonomy. Case studies include Argentina, Brazil, Chile, Mexico, Venezuela, and Uruguay.

HAVC 143D - Architecture and the City in Modern and Contemporary Visual Culture (5)

Examines the modern and contemporary depictions of cities in visual and material culture, from paintings and photographs to logotypes and souvenirs. Also examines the roles of narrative in spatial representations, including literature, film, and television productions.

Prerequisite: Enrollment is restricted to juniors and seniors.

HAVC 143E - History of Design: The Objects of Technology, 1850-The Present (5)

Traces the connections between key movements in modern design and the evolution of technology in society. Also provides a framework for engaging critically with the proliferation of technology in society today.

HAVC 143F - Memory, Place, and Architecture (5)

How have architects engaged memory and place in architectural projects and built landscapes since World War II? Examines memorializing, memory, and erasure of place in reconstruction of cities, creation of memorials, and design of buildings. (Formerly Constructing Memory and Place in Postwar Architecture.)

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

HAVC 143G - After Utopia: Architecture and the City, 1968-Present (5)

Explores critical issues in the history of architecture and urbanism from 1968 to the present. Major themes in the development of contemporary architecture are introduced, including the uneven legacy of modernism, the growth of cities, changing technologies, environmental issues, and the social and political context of design.

HAVC 144A - Latin American Art and Visual Culture (5)

Investigates Latin American and Caribbean art and visual culture. Studies decolonial resistances, alternative modernisms, examining the shaping of race and ethnicity under global capitalism. Looks at practices by Latin American and Latinx artists, focusing on Afro-Latinx and indigenous knowledges.

HAVC 151 - Greek Myths Antiquity to the Present (5)

Myths dominated the culture and visual production of the ancient Greek world, and their presence is still strong today. How did they codify social, political, and religious realities and needs? How were they perceived in different time periods? In addition to ancient Greek and Roman and later European sculptures and paintings, this course considers less conventional sources, such as modern films, comics, and advertisements. Course 51 recommended as preparation.

HAVC 152 - Roman Eyes: Visual Culture and Power in the Ancient Roman World (5)

Visual culture in the ancient Roman world, from temples and public monuments to houses and tombs, performances, and rituals. Examines the construction of social and cultural identities, including class, gender, and sexuality, through architecture, sculpture, painting, household objects, jewelry, etc.

HAVC 154 - Byzantine Visual Culture: Politics and Religion in the Empire of Constantinople, 330-1453 A. C (5)

Centered on the capital city of Constantinople (modern Istanbul), the Hellenized and Christianized Roman Empire of

the Eastern Mediterranean today known as Byzantium played a major, yet often overlooked, role in European history for more than a millennium. This course examines its visual production and relation to politics and religion in court and church ceremonial, expressions of Christian faith, and cultural interactions with Western Europe, Islam, and the Slavic world.

HAVC 155 - Constructing Cleopatra: Power, Sexuality, and Femininity Across the Ages (5)

The construction of female identity and the production of history through the myth of Cleopatra. Critical analysis of archeological data and ancient sources, later sculptures and paintings, and contemporary films, movies posters, Internet sites, advertisements, comics, games, dolls, and household objects.

HAVC 157B - Italian Renaissance: Art and Architecture (5)

Lives of Italian Renaissance people from birth to death, examining the nature and roles of the institutions which defined human existence in this period. Uses visual arts both illustratively and to study how institutions fashioned their images through art and architecture.

HAVC 157C - High Renaissance (5)

An investigation of the High Renaissance as a period and stylistic concept, using the major artists and monuments of the period 1480–1525 to discuss issues of theory, history, and art. Artists considered include Leonardo da Vinci, Michelangelo, and Raphael.

HAVC 157D - Art of the Venetian Renaissance (5)

Considers Venetian art in the 15th and 16th centuries. Topics include major artists (the Bellini, Carpaccio, Titian, Tintoretto, Veronese, Palladio) and the relationship of the city to outside forces (Byzantine Empire, Turkish Empires) and other Italian cities.

HAVC 160A - Indigenous American Visual Culture Before 1550: Mexico (5)

Art and architecture of selected pre-Hispanic cultures from the gulf coast, central, western, and southern Mexico including the Olmec, Zapotec, Toltec, Mixtec, Mexica (Aztec), and others. (Formerly Pre-Hispanic Visual Culture: Mexico.)

HAVC 160B - Indigenous American Visual Culture Before 1550: The Andes (5)

The art of selected pre-hispanic cultures of Colombia, Ecuador, Peru, and Bolivia including the Nazca, Moche, Chimu, and Inca. (Formerly Pre-Hispanic Visual Culture: The Andes.)

HAVC 162A - Advanced Studies in Early Indigenous American Visual Culture: The Ancient Maya (5)

The art and architecture of the Maya of southern Mesoamerica from the first century C.E. to ca. 1500. Courses 80, 60, or 160A (formerly course 150A) are recommended as

preparation. (Formerly Advanced Studies in Pre-Hispanic Visual Culture: The Maya.)

HAVC 162B - Advanced Studies in Early Indigenous American Visual Culture: The Inka (5)

The visual culture of the Inka of the Andean region of western South America including textiles, metalwork, and the built environment. Courses 60 (formerly 80M) or 80 (formerly 10E) are recommended as preparation. (Formerly Advanced Studies in Pre-Hispanic Visual Culture: The Inka.)

HAVC 163 - The Native in Colonial Spanish America (5)

Indigenous contributions to colonial Spanish American visual culture including architecture, manuscripts, sculpture, painting, textiles, feather-work, and metallurgy. Focus on colonial Mexico, the Andes, and California.

HAVC 164A - Art and Visual Culture of Indigenous California (5)

Examines the diverse art and visual culture of California's Indigenous communities, by learning about historic practices and revitalization, artistic engagement with the built environment, performance and public art, activism through visual culture, and the deconstruction of stereotypes.

HAVC 165 - Indigenous Artists and the Borderland Missions (5)

The Missions of California, Arizona, New Mexico, Texas, Georgia and Florida impacted the lives of Indigenous peoples who were vital to the artistic and architectural development of these spaces. Course examines Indigenous contributions and ongoing reactions to these sites.

HAVC 170 - Art of the Body in Oceania (5)

Explores art of the body, defined broadly, from various perspectives. Examines colonial representations of Oceanic bodies, self-representation through bodily adornment and display (including tattoo, scarification, body painting, ornament, and dress), and bodily metaphors in Oceanic visual cultures.

HAVC 172 - Textile Traditions of Oceania (5)

Investigates how textiles contribute to cultural fabric of Oceania. Explores women's roles in socioeconomic exchanges and cultural production; gender issues regarding production and function of Oceanic textiles; and history of processes, functions, and aesthetics. Prerequisite: Prior coursework related to Oceania recommended.

HAVC 178 - Museums and Cultural Heritage in Oceania (5)

Examines representations of Pacific Island cultures. Explores the history of indigenous communities' relationships with museums and heritage institutions, and strategies to represent Oceanic histories, knowledges, and futures. Studies how stakeholders in cultural representation develop collaborative approaches to pursuing decolonized heritage practices.

HAVC 179 - Topics in Oceanic Visual Culture (5)

Examines selected and changing topics in the study of oceanic visual culture. The specific topic varies with each offering in order to keep up with recent directions in scholarship.

Possible topics include: archaeological material and visual cultures; colonial-era images, objects, and spaces; architecture and environments; performance; gender; race and ethnicity; modern/contemporary art and visual culture; and/or a regional focus.

HAVC 180A - Contemporary Art in a Globalized World (5)

Examines major developments in art and theory, 1980s-present. Close consideration of how artists from around the globe innovatively respond to often fraught social, political, and economic circumstances. Topics include: experimental social relations, diaspora, migration, decolonization, institutional critique, globalization, the commons, and ecology. (Formerly Global Contemporary Art.)

HAVC 185 - Art and Community: Arts Professions and Community Engagement (5)

Introduces the practices and production of art historical/visual cultural knowledge. Topics include: interdisciplinarity, pedagogy, museums, art criticism, digital humanities, cultural property, preservation, conservation, art/cultural organizations, art markets, archives, and the role of the humanities in contemporary life. (Formerly Critical Issues and Professional Practices in Visual Studies.)

Prerequisite: Enrollment is restricted to history of art and visual cultural majors.

HAVC 186 - Horror and Gender in Art and Visual Culture (5)

Explores the theme of horror in 20th/21st-Century visual culture. Unpacks how horror is often reflective of entrenched cultural anxieties around the interplay between gender, morality, and female sexuality.

HAVC 186I - Indigenous Art and Activism (5)

Examines how indigenous artists and activists visually respond to issues related to land and sovereignty. Looks at a broad range of media used by indigenous creative practitioners, including documentary filmmaking, printmaking, photography, and performance.

HAVC 186Q - Queer Visual Culture (5)

Students gain critical skills to grapple with queer art, visual culture, and theory of diverse histories and geographies. Students consider how queer is applied and appropriated in the scope of in/visibility in a transnational context.

HAVC 188A - Introduction to Curatorial Studies (5)

Investigates display histories of natural, ethnographic, and historical objects as well as contemporary art curation practices. Explores how curatorial methodologies can reinforce or challenge inequalities implicit in choosing what and how objects are seen.

HAVC 188B - Biennials and Mega-Exhibitions (5)

Explores the recent history of curatorial practice. Through studying important exhibitions produced in recent decades, students learn about the range of social, political, and economic factors influencing how art is conceived and displayed today.

HAVC 188C - Site-Specific Art, Installations, Artists and Institutional Practice (5)

Examines key moments and projects in site-specific art since the 1960s, including Earth Works, the rise of installation art, and the interplay between artists and institutional venues sponsoring such projects, including museums, private galleries and patrons, and biennials.

HAVC 188M - Heritage, Memory, and Material Culture (5)

Ideas of heritage suggest fixed origins and stable histories yet are changing and plural in human life. Course considers materials from around the world to explore how concepts of heritage address the present through commemorating (or forgetting) the past.

HAVC 190A - African Art and Visual Culture (5)

Advanced seminar requiring intensive research and writing on changing topics related to a specific area of African art and/or visual culture chosen to demonstrate critical mastery of this subject.

Prerequisite: Prerequisite(s): HAVC 10 or HAVC 80.

HAVC 190B - Play and Ritual in Visual Cultures (5)

Compares how play and ritual construct worlds and regulate visual cultures—from dolls to ritual objects and performances. Attention given to areas where play and ritual overlap and the visual cultures that result.

HAVC 190C - The Mediterranean from the Rise of Christianity to the Rise of Islam (5)

Examines the visual culture of the Mediterranean from the 3rd to the 7th centuries A.D., focusing on the historical and cultural developments which led to the survival of the Eastern Roman Empire and its transformation to what we call Byzantium.

HAVC 190D - The World of the Lotus Sutra (5)

Close study of the principal text of East Asian Buddhism as a self-enclosed vision of reality, with careful consideration of the forms and functions of the world of visual and aural representation that it has inspired.

Prerequisite: Prerequisite(s): HAVC 127A or by permission of instructor.

HAVC 190E - Huayan Visions (5)

Explores the distinctive conceptual world of the Buddhist Huayanjing (Avatamsaka-sutra) and its expression in visual forms. This long text, composed in Sanskrit and later

translated into Chinese, is a principal scripture of the international Mahayana Buddhist traditions of Asia.

Prerequisite: Prerequisite(s): HAVC 127A or by permission of instructor.

HAVC 190F - Chan Texts and Images (5)

Examines selected issues in history of Chan (Zen) Buddhist traditions in China from medieval times to the present day. Concepts, methods, and visual expression of Chan practice situated through study of texts and visual materials.

Prerequisite: Prerequisite(s): HAVC 127A or by permission of instructor.

HAVC 190G - Buddhist Wisdom Traditions (5)

Careful study of Mahayana Buddhist perfection-of-wisdom traditions--texts and related material culture, including visual imagery and illustrated books--with focus on the particular vision of reality that they aim to produce or reveal.

Prerequisite: Prerequisite(s): HAVC 127A or by permission of instructor.

HAVC 190J - Visual Cultures of the Vietnam-American War (5)

Examines the visual culture of the Vietnam-American war and its legacy in contemporary art of Southeast Asia. Considers representations in different media: painting, drawing, photography, film, novels, and material cultures. Issues addressed include memory, trauma, identity politics, body, race, gender, pornography, and prostitution.

HAVC 190K - Thematic Approach to Visual Cultures of Southeast Asia and Its Diaspora (5)

Undergraduate seminar that takes topical and thematic approaches to looking at the visual cultures of Southeast Asia and its diaspora. Media and themes include textile, film and literature, comparative modernity, race, gender, and sexuality. The specific topic and them varies from year to year. (Formerly Thematic Approach to Visual Cultures of Southeast Asia.)

HAVC 190M - Representations of Women in Indian Art (5)

Deals with representations of the female divinity in Indian religious imagery, and of women in secular and courtly paintings. Also examines roles women play in the production of art in the Indian subcontinent.

HAVC 190N - Topics in Mediterranean Visual Culture (5)

Examines selected and changing topics in the study of Mediterranean visual culture. Topics vary with each offering to keep up with recent directions in scholarship. Possible topics: Bronze Age Aegean cultures; myth, ritual, and religion in the Near East; Greek and Roman gender and sexuality; seafarers and cross-cultural interactions in the ancient Mediterranean; Islamic cultures of North African and Spain.

HAVC 190O - Berlin: History and the Built Environment (5)

Explores Berlin's urban and architectural history through themes: the meaning of memory in architecture; the political and cultural implications of preservation, globalization, and tourism. Because these questions are relevant beyond Berlin, course draws comparisons with other cities.

HAVC 190P - Death and Patriotism: The Case of the French Revolution (5)

What are the relations between the mortal body and politics in times of crisis? What purposes can death, or the threat of death, serve? Examines representations of executions, assassinations, and funerals during the French Revolution, with an emphasis on the Terror.

HAVC 190Q - Portraiture: Europe and America, 1400–1990 (5)

Western portraiture and self-portraiture at certain key moments (early modern Italy, 16th-century Germany, 17th-century Holland, France from the reign of Louis XIV to the Revolution, contemporary U.S.) are explored by reading 20th-century interpretations and some primary sources. This course can be taken for senior exit credit only by permission of the instructor.

HAVC 190S - New Directions in Contemporary Art (5)

Explores how critical theory illuminates forms of cultural production, from art and cinema to popular culture. Considers how scholars, artists, and filmmakers use critical theory both creatively and in the study of aesthetic objects and experiences. (Formerly Critical Issues in Contemporary Art and Visual Culture.)

HAVC 190T - Topics in Pre- and Post-Columbian Visual Culture (5)

Seminar on changing topics related to the current scholarship on pre-Hispanic and colonial Spanish American visual culture.

HAVC 190U - Word and Image in Illuminated Byzantine Manuscripts (5)

Religious, scientific, and secular manuscripts of Byzantium: examines how words and images interacted to express and promote central concepts of Byzantine culture; serve liturgical needs of private devotion; reflect imperial ideals; diffuse moral values and knowledge; and proclaim social status and cultural affiliations.

HAVC 190V - Cult of Mary in Byzantium (5)

Why did the cult of the Virgin Mary become so important in Byzantine culture? Examines historical, cultural, theological, political, and social reasons for this development, seen through the interaction of Byzantine visual culture and literature.

HAVC 190W - Art and Culture Contact in Oceania (5)

Examines impact of culture contact on Oceanic and Euro-American visual cultures in context of discovery, colonialism, and postcolonialism. Topics include 18th-century visual

culture, colonial identities, primitivism, syncretism, impact of Christianity, contemporary art/market, media, tourism, transnationalism, and globalization. Prior coursework related to Oceania recommended but not required.

HAVC 190X - Art and Identity in Oceania (5)

Theoretical discussions and Pacific Basin case studies on 1) definitions of cultural, ethnic, and national identities; 2) relationship between art, museums, and construction of historical and cultural narratives; 3) ways tradition defined in art practices and used by groups to assert an identity in their present. Participants first develop a theoretical framework and vocabulary for analyzing artistic production in a variety of cultures. Through specific case studies, will explore how art, architecture, and museums actively contribute to define and challenge ethnic and national identities. Prior course work related to Oceania recommended but not required.

HAVC 191A - Iconoclasm (5)

What happens when, to control an object, it is destroyed? Examines destruction of art as a way of ending the object's life cycle, as a device of social tension/change, and as a colonial and post-colonial mechanism of religious/political control.

HAVC 191B - The Virgin of Guadalupe: Images and Symbolism in Spain, Mexico, and the U.S (5)

Focus on the histories of miraculous images of La Virgen de Guadalupe de Extremadura (Spain) and La Virgen de Guadalupe de Tepeyac (Mexico). The foundations and growth of the cult of the Mexican Guadalupe during the colonial period is examined along with the multivalent symbolism of her image. Considers contemporary appearances of the Virgin of Guadalupe, from the miraculous images on a tree in central California and the compositions of Chicano artists, to mass-produced kitsch.

HAVC 191C - Subalternatives: Representing Others (5)

Explores how visual representation (in fine art, popular art, film, and television) encodes difference in selected cultural and historical contexts. Considers (post)colonial image-making both as a strategy of domination as well as resistance.

HAVC 191D - Semiotics and Visual Culture (5)

How can visual culture be understood as the production, circulation, and recirculation of signs? This course offers a history of semiotics and its methodological application in the analysis of images in popular culture and within the discipline of art history.

HAVC 191E - Feminist Theory and Art Production (5)

A close reading of works of art and theoretical texts by feminists working from 1970 to the present. The course encourages debate around the past, present, and future relevance of feminist theories to visual cultural studies, paying particular attention to issues of cultural and ethnic difference.

HAVC 191F - Image and Gender (5)

Examines what visual representations (feminine and masculine) reveal of gender in 19th- and 20th-century European and American culture; how images reflect norms of gender; and how we are conditioned to read images in gendered terms. Explores how femininity and masculinity were conceived during historical periods and how gender ideals changed in response to social, political, and economic pressures. Students encouraged to consider the fluid nature of 21st-century notions of ideal femininity and masculinity and possible alternatives.

HAVC 191G - Art, Cinema, and the Postmodern (5)

Explores how theory can illuminate various forms of cultural production from art and cinema to popular and material cultures. Considers how scholars and visual producers utilize theory creatively and in the study of aesthetic objects and experiences.

HAVC 191I - Topics in Architecture and Urban History (5)

Focuses on selected topics in the history of art and visual culture. Topics vary depending on instructor.

HAVC 191K - Decolonial Visual Culture (5)

Examines contemporary visual culture and processes of decolonialization in relation to topics including: petroculturalism, indigeneity, ecology, race, gender and sexuality, and multispecies ontology. Case studies include cultural practices in North America and Mexico, with diverse theoretical approaches.

HAVC 191M - Museum Exhibitions (5)

Students create and install an exhibition. Students take the roles of museum departments, moving the project from concept to installation. The impact exhibitions make in culture and society is examined throughout each step of the process. Prerequisite(s): HAVC 100A and HAVC 141M. Enrollment restricted to History of Art and Visual Culture majors and minors. Enrollment by instructor permission.

HAVC 191N - Topics in Renaissance Art and Visual Culture (5)

Seminar on changing topics related to the current scholarship on the art and visual culture of the Renaissance.

HAVC 191O - Topics in Oceanic Visual Culture (5)

Seminar on current scholarship on Oceanic visual culture. Topics include pre-colonial, colonial, and post-colonial visualities; place and the built environment; performance; race; gender; travel and tourism; cultural institutions. Prior coursework related to Oceania recommended but not required.

HAVC 191P - Topics in Contemporary Art (5)

Addresses changing topics in contemporary art. The specific topic varies with each offering to keep up with new directions in scholarship.

HAVC 191S - Topics in American Art and Visual Culture (5)

Advanced seminar requiring intensive research and writing on changing topics related to a specific area of American art and/or visual culture chosen to demonstrate critical mastery of this subject.

HAVC 191U - City on a Hill: The Architecture of the Campus (5)

Explores the history of campus design in North America. Traces the ways designers have used the campus for staging new ideas of education and work, stimulating social relations, and connecting architecture with the natural world. Emphasis is devoted to UCSC and the Silicon Valley tech campus.

HAVC 191V - The Edge of the Sea: Architecture and Design on the California Coast (5)

The history of architecture and design along the California coast. Through a series of case studies selected from topics in twentieth century design, course explores the roles of designers in mediating relationships between infrastructure and landscape, technology and natural forces, ideas of the artificial and natural, as well as between humans and non-human species.

HAVC 191W - Art, Disaster, and Resilience (5)

Explores how art and other visual cultural practices--like participatory mapping, data visualization, and image sharing--negotiate the material and social consequences of both sudden and slow-moving disasters. Emphasizes critical, activist, and regenerative methods of representation, collaboration, and response.

HAVC 193F - History of Art and Visual Culture Service Learning (2)

Integrates academic study with meaningful community service to enrich the learning experience, teach civic responsibility, and strengthen communities. Projects may serve non-profit agencies, schools, or art/culture institutions. Enrollment is restricted to junior and senior history of art and visual culture majors and minors. Enrollment is by instructor permission.

HAVC 195 - Senior Thesis (5)

Students submit petition to sponsoring agency.

HAVC 198 - Independent Field Study (5)

Independent field study away from the campus. Students submit petition to sponsoring agency.

HAVC 198F - Independent Field Study (2)

Independent field study away from the campus. Students submit petition to sponsoring agency.

HAVC 199 - Tutorial (5)

Individual study in areas approved by sponsoring instructors. Students submit petition to sponsoring agency.

HAVC 199F - Tutorial (2)

Individual study in areas approved by sponsoring instructors. Students submit petition to sponsoring agency.

Graduate

HAVC 201A - Introduction to Visual Studies and Critical Theory (5)

Introduces the visual studies discipline, providing students with an overview of the field's development, its primary texts, and its issues of central concern. Features intensive readings and student-led discussions. (Formerly course 201, Introduction to Visual Studies.)

Prerequisite: Enrollment is restricted to graduate students.

HAVC 202 - Introduction to Visual Studies Methods (5)

Examines research methods and approaches in a variety of materials, cultures, periods, and subjects that are relevant in the discipline of visual studies. Discussions focus on research and readings by history of art and visual culture faculty who share practices, experiences, and advice.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 204 - Grant Writing (5)

Devoted entirely to writing grant proposals. Students work on grants for educational support, their doctoral dissertation grants, or both.

Prerequisite: Enrollment is restricted to visual studies graduate students or by permission of the instructor.

HAVC 205 - Grant Writing in Visual Studies (3)

Devoted to grant-writing. Students work on composing and peer-reviewing research proposals, personal statements, bibliographies, CVs, and writing samples. Readings include literature on grant-writing and scholarly writing in the humanities.

Prerequisite: Enrollment is restricted to visual studies students or by permission of the instructor.

HAVC 212 - Yoruba Visualities and Aesthetics (5)

Yoruba conceptions of visibility are explored and compared to seeing through Western eyes. Critical reading focuses on Western and Yoruba scholars' work on visualities and complementary theoretical writings on Yoruba aesthetics and philosophy.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 213 - Theories and Visual Cultures of Iconoclasm (5)

Examines theories that attempt to explain iconoclasm, the willful destruction of religious or political objects, by applying the theory (including theories of cultural heritage) to various case studies. The universal aspect of iconoclasm and the differences in understanding and practice are explored.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 220 - Topics in Asian Visual Studies (5)

Examines selected and changing topics in the visual studies of Asia. The specific topic varies with each offering to keep up with recent directions in scholarship.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 222 - The Image of Arhat in China (5)

Indian Buddhist sage-monks (arhats) are portrayed in China in ways that represent a remarkable variety of visual/historical/practice traditions. This seminar examines these depictions and explores the ranges of means and functions attached to this theme.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 224 - Engaged Buddhism and Visual Culture (5)

Begins with an analysis of photography and films capturing the Gandhian and Dalit movement in India. Students then read key Buddhist texts on engaged Buddhism, and look at the rise of engaged Buddhism in Southeast Asia in the 1960s and how it impacted modern and contemporary art in Southeast Asia and its diaspora.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 232 - The Monument Since 1750 in Relation to Nationhood and the Experience of War (5)

Investigates modern monuments (1750 to present) and the creation or maintenance of a nation, especially in terms of war and its immediate aftermath. Destruction or alteration of monuments and production of anti- or counter-monuments are also examined.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 233 - Topics in Contemporary Art and Visual Culture (5)

Examines selected and changing topics in the contemporary art and visual culture. The specific topic varies with each offering to keep up with recent directions in scholarship.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 235 - Photography and History (5)

Investigates the complex relationship between photography and history. Considers the evolving perceptions of photography's capacity to capture reality, the discursive means by which photographic truths are produced, and the utility of photographs as primary evidence.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 236 - Contemporary Art and Theories of Democracy (5)

Interdisciplinary approach to the study of democratic political theory of the last two decades and its relation to contemporary art practice with an emphasis on activist art, public art, and theories of speech and performance.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 240 - Seeing Race (5)

Investigates how discursive systems racialized the sight of various racial and ethnic groups in 19th- and 20th-century U.S. society. Focuses on the construction and maintenance of racial values systems and on the historically specific ways in which an eclectic assortment of visual artifacts have been read by groups over time. Considers the visual and material implications of race-based sight.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 241 - Decolonizing Nature: Contemporary Art and Ecology (5)

Considers how visual culture intersects with environment. Considers how, in the age of neoliberal globalization, documentary and neo-conceptual practices confront the biopolitics of climate change; the financialization and rights of nature; climate refugees; and indigenous ecologies.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 242 - Radical Futurisms (5)

Examines and compares radical futurisms—Indigenous, Afro, Chicana/Latina, multispecies, Postcapitalist—and situates them in relation to experimental visual cultural, media, and aesthetic practices, asking critical and creative speculative questions about what comes after end-of-world narratives.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 243 - Alternative Architecture (5)

Focuses on what is commonly left out of architectural history: the ephemeral, informal, illegal, and uncertain. Topics include: anonymous and collective architecture; temporary interventions; everyday urbanism; and vestigial urban spaces. These topics are understood through theories of space as socially produced (Henri Lefebvre, Michel de Certeau, among others), and through cultural movements and manifestoes (Situationist International, Aesthetics of Hunger, etc.)

Prerequisite: Enrollment is restricted to graduate students.

HAVC 245 - Race and Representation (5)

Explores how human subjects come to be visually defined and marked by race discourse. Covers diverse theoretical literatures on the topic, primarily in visual studies, but also in cultural studies, post-colonial studies, and psychoanalysis.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 249 - How to Do Things with Pictures: Media, Culture, and Performance (5)

An interdisciplinary exploration of the performative dimensions of art, visual culture, and new media. Investigates theories of performance and action across multiple fields and considers their relevance to themes, problems, and contexts of interest to those enrolled.

HAVC 250 - The Cult of Mary in Byzantium: Visualities of

Political, Religions, and Gender Constructs (5)

Through the study of the Byzantine cult of Mary, we examine diverse modalities in the construction and interaction of political, religious, and gender values, and we investigate the interrelated role of images, rituals, and text in human experience, expression, and communication. (Formerly The Cult of Mary in Byzantium.)

Prerequisite: Enrollment is restricted to graduate students.

HAVC 260 - Visual Literacy in Spanish America, 1500-1800 (5)

Visual literacy is considered as a particular predicament of colonial societies. Students consider the legibility of artifacts in colonial Spanish American contexts given its culturally diverse audiences and examine specific instances of (mis)interpreted images and transcultured representations.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 270 - Colonial Cultures of Collecting and Display (5)

Examines collections and exhibitions of colonized people, places, and objects through primary sources, theoretical texts, and analytical case studies (with some emphasis on Oceania). Focuses on visual discourses of race, science, religious conversion, colonial settlement, nation-building, education, and entertainment.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 273 - Imaging Colonial Peripheries and Borderlands (5)

Considers 18th-century to 21st-century colonialisms, especially in Oceania. Concentrates on representations conditioned by particular cross-cultural engagements in colonial peripheries rather than focusing on metropolitan representations. Explores the construction and transgression of rigidly defined colonial identity categories, as expressed in visual/material form.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 275 - The Visual Cultures of Travel and Tourism (5)

Explores the visual cultures of travel and tourism with some focus on Oceania. Travel and tourism are implicated in the histories of colonialism, ethnography, and globalization, and offer rich sites for critical engagement with theories of transnationalism, imperialism, diaspora, and identity.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 280 - Visual Studies Issues (5)

Examines selected and changing issues in visual studies. The specific issue varies with each offering to keep pace with recent directions in scholarship.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 282 - Art of Independence, Liberation and the Cold War (5)

Explores art movements that played a role in major struggles for independence and liberation from colonial regimes or reflected upon them subsequently. These art movements are examined through international art and media exhibitions. Case studies vary with each course offering.

Prerequisite: Enrollment is restricted to graduate students.

HAVC 294 - Teaching-Related Independent Study (5)

Directed graduate research and writing coordinated with the teaching of undergraduates. Students submit petition to sponsoring agency.

HAVC 295 - Directed Reading (5)

Directed reading that does not involve a term paper. Students submit petition to course-sponsoring agency. Enrollment is restricted to graduate students.

HAVC 297A - Independent Study (5)

Independent study or research for graduate students. Students submit petition to sponsoring agency.

HAVC 297B - Independent Study (10)

Independent study or research for graduate students. Students submit petition to sponsoring agency.

HAVC 297F - Independent Study (2)

Students submit petition to course-sponsoring agency. Enrollment is restricted to graduate students.

HAVC 299A - Thesis Research (5)

Students submit petition to course sponsoring agency. Enrollment is restricted to graduate students.

HAVC 299B - Thesis Research (10)

Students submit petition to course sponsoring agency. Enrollment restricted to graduate students.

HEBR - HEBREW

Lower-Division

HEBR 1 - First-Year Hebrew (5)

Speaking, listening comprehension, reading, and writing fundamentals. The use of Modern Hebrew is encouraged through classroom practice supplemented by work with computer tutorials. The first-year sequence (1-2-3) begins in fall quarter only. (Formerly Instruction in the Hebrew Language.)

HEBR 2 - First-Year Hebrew (5)

Speaking, listening comprehension, reading, and writing fundamentals. The use of Modern Hebrew is encouraged

through classroom practice supplemented by work with computer tutorials. (Formerly Instruction in the Hebrew Language.)

Prerequisite: Prerequisite(s): HEBR 1 or by consent of instructor.

HEBR 3 - First-Year Hebrew (5)

Speaking, listening comprehension, reading, and writing fundamentals. The use of Modern Hebrew is encouraged through classroom practice supplemented by work with computer tutorials. (Formerly Instruction in the Hebrew Language.)

Prerequisite: Prerequisite(s): HEBR 2 or by consent of instructor.

HEBR 4 - Second-Year Hebrew (5)

Development of the students' familiarity with the spoken and written language through grammar review, discussions, and vocabulary building. Varied readings on literary and cultural topics related to modern Israel.

Prerequisite: Prerequisite(s): HEBR 1B or HEBR 3 or by consent of instructor.

HEBR 80 - Introduction to Biblical Hebrew (5)

Introduces students to the basic lexicon and grammatical structures of biblical Hebrew, with an emphasis on the development of a set of useful translation strategies. Throughout the course, students apply their emergent skills to translating a variety of biblical texts.

HEBR 94 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

HEBR 99 - Tutorial (5)

Students submit petition to sponsoring agency.

HEBR 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

HEBR 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

HEBR 199 - Tutorial (5)

Students submit petition to sponsoring agency.

HEBR 199F - Tutorial (2)

Students submit petition to sponsoring agency.

HISC - HISTORY OF CONSCIOUSNESS

Lower-Division

HISC 1 - Introduction to History of Consciousness (5)

Investigates the politics of identity and recognition as the basis for claims about institutional legitimacy and social struggle. Examines such diverse figures as Sartre, Fanon, Bataille, Foucault, Lacan, Levinas, Derrida, Deleuze, Zizek, and Badiou.

HISC 12 - Historical Introduction to Philosophy (5)

Focuses on moral, metaphysical, and epistemological issues using classical texts along with some contemporary readings on related philosophical problems. Plato, Kant, and Sartre provide the central readings on ethics, while Descartes, Hume, Kant (again), and Wittgenstein provide the central metaphysical and epistemological discussions. Issues of philosophy of language and method are highlighted throughout.

HISC 60A - What is Revolution? (5)

Studies the modern concept of revolution. Course proposes to inquire into the concept of revolution, insurgency, revolt and resistance in theory and practice. The course aims to analyze thinkers such Thomas Hobbes, Jean-Jacques Rousseau, Immanuel Kant, G.W. F. Hegel, Karl Marx, Carl Schmitt, Hannah Arendt, V.I. Lenin, Rosa Luxemburg, and the revolutionary declarations from the French Revolution to the Zapatista insurgency.

HISC 60C - What Is Resistance? (5)

Explores the politics of resistance and how different thinkers have conceptualized what it means to resist, why it is necessary, and with what methods it should be done. Side by side with the theorists of resistance, the course analyzes examples of resistance from around the world, traversing different time periods, geographies, and cultures. Examples range from peasant revolts to labor movements, feminist struggles to anti-war mobilizations, prisoner uprisings to anti-colonial wars and contemporary forms of corporeal, self-sacrificial resistance. Relying upon the concrete political problems posed by each historical instance as springboards into larger theoretical concerns, the course focuses on questions such as the nature of power relations, different forms of political organization and representation, the relationship between means and ends, the role of violence, and the function of different media, especially as they become manifest in the complexity of real politics.

HISC 80N - Prophecy Against Empire (5)

In the core of a London slum, with wars raging all around him, the printer William Blake sounded the trumpet of prophecy. This course channels Blake's war-time revelations,

laying bare the antinomies of imperial violence and the prophetic tradition.

HISC 80O - Understanding Popular Music (5)

Students develop the skills necessary to analyze popular music. First, challenging common-sense understandings of how music functions. And second, understanding how history works its way into musical forms.

HISC 80P - The Black Panther Party: History and Theory of a Political Movement (5)

Examines the history and theory of the Black Panther Party (BPP). Texts situate the historical conditions leading to the BPP's rise; theoretical inspirations and contributions; national and international reach; and decline following state repression, electoral campaigns, and guerrilla warfare.

HISC 80S - War and the Media (5)

Examines how war is represented in journalism using perspectives from political theory, intellectual history, and related fields. Materials aim to challenge media depictions, from the Civil War to the War on Terror, assessing how news shapes knowledge of conflict.

HISC 85 - Politics and Religion (5)

Considers both the religious sources of political ideas and the political sources of religious ideas, addressing topics, such as sovereignty, justice, love, reason, revelation, sacrifice, victimhood, evil, racism, rebellion, reconciliation, and human rights.

Upper-Division

HISC 102 - Philosophy and Poetics (5)

Introduction to the relationship between philosophy and poetics in some major 19th- and 20th-century poets and thinkers.

Prerequisite: Enrollment restricted to juniors and seniors.

HISC 105 - Antisocial Media (5)

Provides an introduction to critical scholarship on media infrastructures with a focus on cybernetic systems, internet protocol, surveillance, logistics, and finance. It explores how these configurations of power are reorganizing our societies and restructuring our subjectivities.

HISC 106 - The U.S. Horror Film: Race, Capitalism, and Monsters (5)

Analyzes films and images to consider how the genre of horror has screened the problems, expectations, and fantasized afterlives of racism, labor exploitation, ruin, and war.

HISC 108 - Parables for a Warming Planet: The Politics of Climate Change (5)

Takes up the literary form of the parable to illuminate a pressing and complex problem: the threat of global climate

change. How can the simplest of stories help us to explore our options for a planetary future?

HISC 109 - Liberalism and Violence (5)

Explores the meanings of modernity, religion, and violence and examines the conceptual status that war and sovereignty, long associated with religious belief, have since been accorded within the modern humanist and secular tradition. Also explores aspects of this tradition and their relationship to questions of morality and violence and how violence-and its relationship to secularism-can be better understood today as a mode of negotiating human existence in a world dominated by technology and its myths.

Prerequisite: Enrollment is restricted to juniors and seniors.

HISC 110 - Histories of the Atom (5)

This interdisciplinary course considers the atom in four respects: as philosophical idea, as weapon, as catastrophe, and as clock. Students will learn about ancient atomisms, radiometric dating, the Manhattan Project, the bombing of Hiroshima, and the Chernobyl nuclear disaster.

HISC 111 - States, War, Capitalism (5)

Survey of seminal work on ancient origins of the state, diverse geo-political systems of war and diplomacy, and consequences of the formation of the world market on the evolution of geo-political systems up to and beyond the wars of today.

Prerequisite: Enrollment restricted to juniors and seniors.

HISC 112 - Foundations in Critical Theory (5)

Concentrates on the Marxist tradition of critical theory, centering on classical texts by Marx and by writers in the Marxist tradition up to the present.

HISC 113 - History of Capitalism (5)

Surveys major developments in the capitalist world economy from the 13th century to today. Topics include: the transition to capitalism in Europe; the emergence of banking; colonization, slavery, and uneven development; industrialization; and globalization.

HISC 115 - The Radical Right, A Symptom of Capitalism (5)

Provides the historical context and the theoretical tools necessary for understanding today's radical right. Specific focus on considering the far right in the context of radical constructions under conditions of late capitalism.

HISC 117 - Making the Refugee Century: Non-Citizens and Modernity (5)

Examines the material, discursive, and racialized conditions that have produced refugees in the last century. Also examines the social claims made by refugees, institutional responses to them, and political alternatives to state belonging

HISC 119 - Politics of Recognition (5)

Course touches on the philosophical roots of Hegel's text, starting from the pre-World War II rereading of Hegel's master/slave dialectic that became the kernel of postwar thought arising from struggles over capitalism, communism, fascism, racism, colonialism, and feminism.

HISC 120 - What is a State? (5)

Examines the modern concept of state, its anthropological assumptions, categories, its critique, and its crisis. Inquires into the concept of representation, borders, security and control in thinkers, such as Thomas Hobbes, John Locke, Jean-Jacques Rousseau, Immanuel Kant, G.W.F. Hegel, Karl Marx, Carl Schmitt, and Lenin.

HISC 125 - Queerness and Race (5)

Gives students a grasp of different definitions and uses of the concept queerness in its relationship to race and how it's tied to the politics of lesbian, gay, bisexual, and transgender (LGBT) identity.

HISC 129 - Politics of Violence (5)

Inquires into the relationship between politics and violence as articulated by early modern, modern, and contemporary political theorists. Investigates the role of violence in the constitution and maintenance of sovereign power and the construction of the modern subject of politics.

HISC 131 - Postcolonial Paths (5)

How postcolonial thought occasions the reconsideration of the Western tradition of political philosophy and the discovery of alternative pathways of modernization within it.

HISC 140A - Africa: How to Make a Continent (5)

Introduces the histories of exploration, museum collection, and photography that shape historical and contemporary ideas about race, culture, and place in Africa.

HISC 150 - Radical Political Theory (5)

Provides an introduction to classical and contemporary texts of radical political theory, a body of work that critically examines fundamental premises of politics. Addresses the question 'What is the political?'

HISC 160 - Advanced Topics in History of Consciousness (5)

Provides students an opportunity for in-depth analysis of advanced topics within the history of consciousness arena. Course topic changes; see the Class Search for current topic.

HISC 163 - Freud (5)

The development of Freud's concept of mind. Extensive reading tracing the origins and development of Freud's theories and concepts (e.g., abreaction, psychic energy, defense, wish-fulfillment, unconscious fantasy, dreams, symptoms, transference, cure, sexuality) and emphasizing the underlying model of the mind and mental functioning.

HISC 185C - Comparative Religion: A Critical Introduction (5)

Introduces the comparative study of world religions and provides critical entry points toward the understanding of its history as a discipline. Special emphasis on the troubled history of imperialism, orientalism, and facile generalizations that have always accompanied the attempt to understand foreign or dead cultures.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

HISC 185T - Marxism and Feminism (5)

Critically engages with feminist-Marxist perspectives on social-reproduction. Introduces the foundation of Marxism and feminist-Marxist critique while examining the international feminist struggle historically from the origins of capitalism to the present moment.

HISC 187 - The Emergence of the Avant-garde from Disenchantment to Dada (5)

Examines the socio-political and cultural origins of early 20th-century avant-garde movements focusing on the vanguard movement of futurism, the roles played by the disenchantment of the world, and technological rationalization as it relates to warfare and aesthetic production.

HISC 199 - Tutorial (5)

A program of individual study arranged between an undergraduate student and a faculty member. Students submit petition to sponsoring agency.

Graduate

HISC 203A - Approaches to History of Consciousness (5)

An introduction to history of consciousness required of all incoming students. The seminar concentrates on theory, methods, and research techniques. Major interpretive approaches drawn from cultural and political analysis are discussed in their application to specific problems in the history of consciousness. Prerequisite(s): first-year standing in the program. See the department office for more information. (Formerly course 203.)

HISC 203B - Approaches to History of Consciousness (5)

Writing-intensive course based on readings in course 203A.

Prerequisite: Prerequisite(s): HISC 203A. Enrollment is restricted to graduate students.

HISC 214 - What is a Subject? (5)

Examines major streams of theorization about the subject in postwar and contemporary continental and critical theory. Thinkers include Althusser, Badiou, Balibar, Butler, Fanon, Foucault, Honneth, Laclau and Mouffe, Mbembe, Ranciere, and Sartre.

Prerequisite: Enrollment is restricted to graduate students.

HISC 215 - History of Unconsciousness (5)

There is a history of political consciousness that culminated in the project of enlightenment. There is a history of individual, collective, and political unconscious, which culminated in fascism. These two histories are intertwined, but their outcome is not preconceived. On the contrary, their relationship and integration constitute a field of possibilities for social, political, and human experimentation. This course inquires into the concept of political unconscious by exploring thinkers, such as Kant, Foucault, Adorno, Horkheimer, Freud, Jung, Reich, Fromm, Marcuse, and Klein.

Prerequisite: Enrollment is restricted to graduate students.

HISC 216 - Critical Race/Ethnic Studies (5)

Explores foundational and emergent theoretical and methodological approaches to the study of race. Issues examined include the production of race within and across various spheres of human activity and how race has shaped notions of difference and commonality in the past and present.

Prerequisite: Enrollment is restricted to graduate students.

HISC 217 - Critical Human Rights Theory (5)

Addresses about 10 of the significant critiques of human rights discourse published in the past decade by authors, such as Moyn, Douzinas, Fassin, Ticktin, J. Slaughter, D. Chandler, Mamdani, Weitzman, Badiou, and Meister.

Prerequisite: Enrollment is restricted to graduate students.

HISC 218 - French Hegel (5)

Students expected to locate with fluency and precision their own research projects within the conceptual and methodological frameworks defining the late-20th century constellation of thought to be laid out systematically over the course of the term.

Prerequisite: Enrollment is restricted to graduate students.

HISC 222B - Theories of Late Capitalism (5)

Writing intensive course based on readings in course 222A. (Formerly Theories of Late Capitalism, Nationalism, and the Politics of Identity.)

Prerequisite: Prerequisite(s): HISC 222A. Enrollment is restricted to graduate students.

HISC 223 - Althusser (5)

Through close readings of Althusser's major texts, this course systematically examines the political and philosophical thought of Louis Althusser and analyzes why he is one of the most important thinkers of the 20th century.

Prerequisite: Enrollment is restricted to graduate students.

HISC 224 - Marx's Capital Vol. 1 (5)

Investigates the many layers of Marx's Capital.

Prerequisite: Enrollment is restricted to graduate students.

HISC 226 - Liberty and Resistance (5)

Examines modern conceptions of liberty from a non-liberal perspective. Proposes to inquire into the concept of liberty as an individual and collective right by exploring its philosophical justifications and criticism in thinkers, such as Kant, Hegel, and Marx.

Prerequisite: Enrollment is restricted to graduate students.

HISC 227 - Carl Schmitt (5)

Provides a careful contextualization and a critically informed interrogation of the major works of Carl Schmitt, a figure at the center of many contemporary debates in political and legal thought.

Prerequisite: Enrollment is restricted to graduate students.

HISC 230A - Poetry, Language, Thought (5)

Introduces the relation between philosophy and poetics in some major 20th-century poets and thinkers.

Prerequisite: Enrollment is restricted to graduate students.

HISC 230B - Poetry, Language, Thought (5)

Writing-intensive course based on readings in course 230A.

Prerequisite: Prerequisite(s): HISC 230A, or permission of instructor.

HISC 231 - From System to Fragment (5)

Explores the rise and fall of the philosophical system. It proposes to inquire into the origin of the systematic philosophy, its development, its crisis, and its disintegration. This theoretical trajectory will be investigated together with alternative trajectories in thinkers, such as I. Kant, G. Fichte, Novalis, K.W.F. Schlegel, G.W.F. Hegel, M. Stirner, S. Kierkegaard, K. Marx, F. Nietzsche, L. Wittgenstein, T.W. Adorno, W. Benjamin, Empedocles.

Prerequisite: Enrollment is restricted to graduate students.

HISC 232 - Music, Social, Thought (5)

Examines the various modes through which intellectuals, artists, and other commentators have written about music as a socially situated art as well as the ways they have theorized the social through examinations of musical phenomena. Focus changes with course offering.

Prerequisite: Enrollment is restricted to graduate students.

HISC 236 - 20th Century Critical Theory (5)

Focuses on the critical-theoretical approaches that are associated with an interdisciplinary group of scholars affiliated with the Institute for Social Research, known as the "Frankfurt School". Surveys some of their most important contributions to the critique of capitalism, the authoritarian state, instrumental reason, culture, historical progress, law, and social organization. Discusses whether or not these different works fit together into a single tradition called "critical theory" and what theoretical and political

implications the gesture of such naming entails. Investigates the normative foundations of critique and the philosophical influences that shape them. Course also explores the different "generations" of the Frankfurt School and map out the relationship of these thinkers to the traditions of Western Marxism, psychoanalysis, and social theory. Concludes by analyzing the limitations of critical theory and the intellectual challenges it faces in the contemporary world.

Prerequisite: Enrollment is restricted to graduate students.

HISC 237A - Historical Materialism (5)

Students read landmark works of classical and contemporary Marxism. Writings from Marx, Lenin, Trotsky, Lukacs, Gramsci, Adorno, Benjamin, Sartre, Althusser, Anderson, Jameson, and Zizek are addressed.

Prerequisite: Enrollment is restricted to graduate students.

HISC 237B - Historical Materialism (5)

Writing-intensive seminar based on course 237A. Students read landmark works of classical and contemporary Marxism. Writings from Marx, Lenin, Trotsky, Lukacs, Gramsci, Adorno, Benjamin, Sartre, Althusser, Anderson, Jameson, and Zizek are discussed.

Prerequisite: Enrollment is restricted to graduate students.

HISC 240 - Basic Principles of University-Level Pedagogy (2)

Provides training for graduate students in university-level pedagogy in general. Under the supervision of the department chair, coordinated by a graduate student with substantial experience as a teaching assistant.

Prerequisite: Enrollment is restricted to graduate students.

HISC 242A - Violence and Phenomenology: Fanon/Hegel/Sartre (5)

Study of the work and influence of Frantz Fanon from a range of viewpoints: existential, phenomenological, psychoanalytic, and political; a variety of genres: film, literature, case history, and critique; and a set of institutional histories: clinical, cultural, and intellectual.

Prerequisite: Enrollment is restricted to graduate students.

HISC 242B - Violence and Phenomenology: Fanon/Hegel/Sartre (5)

Writing intensivecourse based on readings in course 242A.

Prerequisite: Prerequisite: HISC 242A. Enrollment is restricted to graduate students.

HISC 246 - Black Radicalism (5)

Examines the history of black radical intellectual, cultural, political, and/or social movements. May take the form of a survey of different aspects of black radicalism or may focus on a particular individual, groups, period, etc.

Prerequisite: Enrollment is restricted to graduate students.

HISC 248 - Black Critical Theory (5)

Offers a critical introduction and overview of black critical theory across multiple fields and genres. Beginning with the question of race and ontology, students go on to consider questions of sovereignty and domination, freedom and liberation, identity and difference, and conclude with a study of race and the post-human. Major thinkers studied include: Sylvia Wynter, Achille Mbembe, Frantz Fanon, and W.E.B. DuBois, as well as contemporary figures, such as Frank Wilderson, Fred Moten, and Hortense Spillers.

Prerequisite: Enrollment is restricted to graduate students.

HISC 252 - Poststructuralism (5)

French poststructuralism, with particular attention to the main philosophical texts of Jacques Derrida and Michel Foucault. Other representative theorists as well as critics of poststructuralism are studied as time permits.

Prerequisite: Enrollment is restricted to graduate students.

HISC 261 - Modern Intellectual History (5)

Survey of 19th- and 20th-century intellectual history that focuses on a cross-section of major works from Hegel to Levi-Strauss.

Prerequisite: Enrollment is restricted to graduate students.

HISC 262 - Critical Theory After Habermas (5)

Examines key works of Frankfurt School theorist Jurgen Habermas, his followers, and critics, on topics such as the public sphere, the theory of communicative action, power and domination, and religion and secularism.

Prerequisite: Prerequisite(s): Enrollment is restricted to graduate students.

HISC 263 - European Philosophies of Difference (5)

Survey of European philosophies of difference, tracing the evolution of philosophical concepts and frameworks from Nietzsche, Kierkegaard, Bergson, and Heidegger through later 20th-century French post-structuralist, feminist, and Frankfurt School theory.

Prerequisite: Enrollment is restricted to graduate students.

HISC 264 - The Idea of Africa (5)

Examines the position of Africa in cultural studies and the simultaneous processes of over- and under-representation of the continent that mark enunciations of the global and the local. Themes include defining diaspora, the West as philosophy, and Africa in the global economy.

Prerequisite: Enrollment is restricted to graduate students.

HISC 265A - Biopolitics I: Problematics (5)

Focuses on the theorization of life and death in relation to power as proposed by 20th-century thinkers. Investigates how a biopolitical problematic has emerged and what insights into politics it offers. Explores the different ways in which

thinkers have conceptualized biopolitics and its broader implications.

Prerequisite: Enrollment is restricted to graduate students.

HISC 265B - Biopolitics II: Corporealities (5)

Focuses on the exploration of biopolitics and necropolitics on the body. Examines how the body has become deeply integrated into power relations in modern society. Also explores different forms of corporeality that are conduits of political struggle and sites of transgression, resistance, and refusal.

Prerequisite: Enrollment is restricted to graduate students.

HISC 268A - Rethinking Capitalism (5)

Readings include works by speakers at UCSC's Rethinking Capitalism Initiative. Topics are: (1) financialization versus commodification (how options-theory has changed capitalism); (2) material markets (how this theory performs); and (3) valuation and contingency (how economies make worlds).

Prerequisite: Enrollment is restricted to graduate students.

HISC 268B - Rethinking Capitalism (5)

Course 268A addressed changes in the theory and practice of capitalism as derivatives markets have become increasingly central to it. This course, which can be regarded as either background or sequel, concerns questions that surround recent debates about derivatives from the standpoint of broader developments in law, culture, politics, ethics, ontology, and theology. What would it mean to see questions of contingency and value as a challenge to late-modern understandings of these modes of thought?

Prerequisite: Enrollment is restricted to graduate students.

HISC 269 - Property and Possession (5)

Covers modern conceptions of property and their critique. Inquires into the concept of property as an individual right by exploring its philosophical justifications and criticism in thinkers, such as John Locke, Jean-Jacques Rousseau, Immanuel Kant, G.W. F. Hegel, Pierre-Joseph Proudhon, and Karl Marx.

Prerequisite: Enrollment is restricted to graduate students.

HISC 271 - Historical Temporalities (5)

Explores the critique of the unilinear historical time through the prism of Reinhart Koselleck, Walter Benjamin, and Ernst Bloch's attempts to reconfigure the concepts of time and history. During the course, students investigate how time affects both representation of reality and political praxis.

Prerequisite: Enrollment is restricted to graduate students.

HISC 272 - Deprovincializing Marx (5)

Course aims to rethink Marx against the grain, from the debate with Russian populists to Capital and the Grundrisse. Investigates formal subsumption not as a historical stage, but

as a form that denotes how capitalism encounters, incorporates, and combines existing modes of production without creating a homogeneous world.

Prerequisite: Enrollment is restricted to graduate students.

HISC 275 - Sovereignities (5)

The guiding thought of this seminar is the question of what is, and is not, sovereign. Exploring a wide range of authors (such as Bodin, Hobbes, Spinoza, Rousseau, Kant, Schmitt, Bataille, and Fanon), this seminar addresses the most salient problems in recent discussions of sovereignty.

Prerequisite: Enrollment is restricted to graduate students.

HISC 285 - Topics in Political Theology (5)

Readings focus on the early 20th-century rediscovery of political theology; its use in theorizations of the Holocaust; and its return in 21st-century debates on empires, war, terror, enmity, reconciliation, fanaticism, human rights, political economy, and global catastrophe. Students cannot receive credit for this course and course 85.

Prerequisite: Enrollment is restricted to graduate students.

HISC 291 - Advising (2)

Independent study formalizing the advisee-adviser relationship. Regular meetings to plan, assess and monitor academic progress, and to evaluate coursework as necessary. May be used to develop general bibliography of background reading and trajectory of study in preparation for the qualifying examination.

HISC 292 - Practicum in Composition (5)

A practicum in the genres of scholarly writing, for graduate students working on the *composition* of their qualifying essay or doctoral dissertation.

Prerequisite: Enrollment is restricted to graduate students.

HISC 293A - Field Study (5)

Research carried out in field settings, based on a project approved by the responsible faculty. The student must file a prospectus with the department office before undertaking the research and a final report of activities upon return.

HISC 293B - Field Study (10)

Research carried out in field settings, based on a project approved by the responsible faculty. The student must file a prospectus with the department office before undertaking the research and a final report of activities upon return.

HISC 293C - Field Study (15)

Research carried out in field settings, based on a project approved by the responsible faculty. The student must file a prospectus with the department office before undertaking the research and a final report of activities upon return.

HISC 294A - Ind Study-Teaching (5)

Directed graduate research and writing coordinated with the teaching of undergraduates. Students submit petition to sponsoring agency.

HISC 294B - Ind Study-Teaching (10)

Directed graduate research and writing coordinated with the teaching of undergraduates. Students submit petition to sponsoring agency.

HISC 294C - Ind Study-Teaching (15)

Directed graduate research and writing coordinated with the teaching of undergraduates. Students submit petition to sponsoring agency.

HISC 295 - Directed Reading (5)

Systematic working through a prearranged bibliography which is filed as a final report at the end of the quarter with the signature of the instructor. Students submit petition to sponsoring agency.

HISC 295A - Directed Reading (5)

Systematic working through a prearranged bibliography which is filed as a final report at the end of the quarter with the signature of the instructor. Students submit petition to sponsoring agency.

HISC 295B - Directed Reading (10)

Systematic working through a prearranged bibliography which is filed as a final report at the end of the quarter with the signature of the instructor. Students submit petition to sponsoring agency.

HISC 295C - Directed Reading (15)

Systematic working through a prearranged bibliography which is filed as a final report at the end of the quarter with the signature of the instructor. Students submit petition to sponsoring agency.

HISC 296 - Special Student Seminar (5)

A seminar study group for graduate students focusing each quarter on various problems in the history of consciousness. A statement and evaluation of the work done in the course will be provided each quarter by the students who have participated in the course for that quarter, and reviewed by the responsible faculty.

HISC 297A - Independent Study (5)

Independent study and research under faculty supervision. Students submit petition to sponsoring agency.

HISC 297B - Independent Study (10)

Independent study and research under faculty supervision. Students submit petition to sponsoring agency.

HISC 297C - Independent Study (15)

Independent study and research under faculty supervision. Students submit petition to sponsoring agency.

HISC 298 - Doctoral Colloquium (5)

Under the supervision of a History of Consciousness faculty member, students finishing their dissertation meet weekly or bi-weekly to read and discuss selected draft chapters, design difficulties and composition problems.

HISC 299A - Thesis Research (5)

Prerequisite(s): advancement to candidacy.

HISC 299B - Thesis Research (10)

Prerequisite(s): advancement to candidacy.

HISC 299C - Thesis Research (15)

Prerequisite(s): advancement to candidacy.

HIS - HISTORY

Lower-Division

HIS 2A - The World to 1500 (5)

Surveys the rise of complex societies: the formation of classical civilizations in Afroeurasia and the Americas, post-classical empires and cross-cultural exchange, technology and environmental change, the Mongol Empire, and oceanic voyages and the origins of the modern world.

HIS 2B - The World Since 1500 (5)

Examines major world issues over the past 500 years. Topics include European expansion and colonialism, the Muslim empires, East Asia from Ming to Qing, the Americas, Africa, the scientific-technological revolution, decolonization, and modern environmental problems. Designed primarily for first- and second-year students, it provides a time frame for understanding events within a global framework.

HIS 4 - History of the Present: Investigating the Historical Origins of Contemporary Problems (5)

Explores how historical thinking can help you understand the developments, dilemmas, and crisis that are grabbing our attention in the present. It is organized around four themes: (un)natural disasters, the politics of representation, surveillance, and borders and belonging.

HIS 9 - Introduction to Native American History (5)

Introduction to the interdisciplinary field of Native American Studies and the Indigenous experience. Topics include: history of United States-Indian relations; colonialism; sovereignty; identity; representation of Native Americans in popular culture; and contemporary efforts toward decolonization in indigenous communities. (Formerly Introduction to Native American Studies.)

Offered: Spring.

HIS 9A - Native American History to 1860 (5)

Surveys the history of the indigenous peoples of North America until 1860. Introduces the diversity of Native American history and highlights the major themes of Native American history during this period.

HIS 10A - United States History to 1877 (5)

Focuses on the building of British American colonies and the establishment, disintegration, and reconstruction of the nation with an emphasis on how class, race, ethnicity, and gender impacted colonial development and structured the nation's agenda and the definition of citizenship.

HIS 10B - United States History, 1877 to 1977 (5)

Surveys the political, social, and cultural history of the United States from 1877 to 1977. Focuses on national politics with emphasis on how class, race, ethnicity, and gender changed the nation's agenda.

HIS 11A - Latin America: Colonial Period (5)

Introduces the social, cultural, economic, and political history of the New World through a close examination of the process of European conquest in the 16th century and its consequences for both native and settler peoples. Medieval and Renaissance European and African backgrounds; Inca, Maya, Aztec, plains, woodland, and tropical rainforest native American societies; processes of military and cultural conquest; epidemics and ecological changes; native resistance and the establishment of the fundamental institutions of colonial society.

HIS 11B - Latin America: National Period (5)

An introduction to the study of Latin American history from the Independence Wars in the early 19th century to the present. Topics include changing economic models of development, U.S. role, rural and urban life, women, nationalisms, populism, revolution, the military in politics, and the problem of democracy.

HIS 12 - Introduction to Latino American History (5)

Introduces students to the history of U.S. Latinos drawing on the experience of Central Americans, people of Mexican descent, Puerto Ricans, Dominican Americans, and Cuban Americans. Emphasizes international processes that fundamentally shape U.S. Latino communities.

HIS 13 - Introduction to American Religious Culture (5)

Introduction to the many communities found within the American religious landscape, balancing extraordinary diversity characterizing American pluralism against the dominant religious culture. Proceeds historically, engaging major problems and developments including utopianism, the rise of evangelicalism, religion and reform, manifest destiny, secularization and modernity, and the intersection of politics and religion.

HIS 15 - The United States of America from its Founding

through Our Time (5)

Takes students through five critical moments in United States history: the American Revolution, the Civil War, the New Deal, the Civil Rights era, and the years following the attack on the United States on Sept. 11, 2001. Designed for non-majors.

HIS 20 - U.S. Popular Music Movements (5)

Focuses on the development of popular music genres in the United States and the social contexts that have produced them, from the 19th Century to the present. Promotes an understanding of how music influences and reflects our political lives.

HIS 30 - The Making of Modern Africa (5)

Examines the loss and reassumption of local and state autonomy in Africa during the 19th and 20th centuries. Delineates the modalities of the colonial state and society, modes of resistance to alien occupation, and the deformation of social, class, and gender relations.

HIS 40A - Early Modern East Asia (5)

Surveys the history of East Asia from 1500 to 1894. Covers political, social, economic, and cultural histories of China, Japan, and Korea with the goal of perceiving a regional history that encompassed each society.

HIS 40B - The Making of Modern East Asia (5)

A broad introductory survey of the political, social, economic, philosophical, and religious heritage of modern China, Japan, and Korea. Emphasis on the historical foundations of modern nationalism, the colonial experience, and revolutionary movements.

HIS 41 - The Making of the Modern Middle East (5)

History of the modern Middle East from 1800 to the present, with special reference to the 20th century and forces which have shaped the area. The impact of imperialism, nationalism, and revolution in the area, with particular attention to the history of four countries: Turkey, Iran, Egypt, Israel.

HIS 44 - Modern South Asia, 1500 to Present (5)

Provides an introductory survey of South Asian history and society from the beginning of the 16th Century until the dawn of the 21st Century. Students gain an understanding of major events and long transformations in society, economy, culture, and politics.

HIS 50 - Pyramids and Papyrus: the History of Ancient Egypt (5)

Introduces the political and social history of ancient Egyptian civilization from the Predynastic through the end of the Pharaonic period. (Formerly Introduction to the History of Ancient Egypt.)

HIS 59 - The History of the English Language (5)

Students acquire an understanding of the history of the development of the English language, from its origins to present, and engage critically with the quantitative evidence for that history, using accessible online databases and digital texts.

HIS 60 - Medical and Scientific Terminology (5)

Trains students in the principals that will help them make sense of Greco-Latin scientific and technical vocabulary. Introduces Greco-Roman natural philosophy and its general cultural context, and explains the historical relationship of that tradition to the emergence of modern European experimental science and technology. (Formerly Scientific Vocabulary and the Roots of the European Scientific Tradition.)

HIS 61 - Classical Mythology (5)

Introduces the philosophy of myth, and surveys classical Greek mythology. Students explore the mythic mode of thinking and its distinguishing characteristics as well as the repertoire of Greek myths and their cultural contexts.

HIS 62A - Classical World: Greece (5)

An overview of Greek history from the beginnings through the Hellenistic period, with emphasis on the Archaic and Classical periods (ca. 800 B.C. through 323 B.C.).

HIS 62B - Classical World: Rome (5)

A lecture course offering an overview of Roman history and civilization from the legendary founding of Rome in 753 B.C. to the collapse of the Roman Empire's central administration in the West in 476 A.D.

HIS 63 - Women in the Ancient World (5)

Examines the lives of women in the ancient Greco-Roman world. Most readings are from primary texts (i.e., ancient sources), literary, historical, and documentary; material and artistic evidence also is considered.

HIS 65A - From the Martyrs to the Vikings: Medieval Europe, 200-1000 (5)

A survey of Europe from the third through 10th centuries. Emphasizes cultural conflict and assimilation (Roman and Germanic, pagan and Christian, East and West). Topics include the rise of Christianity, Germanic migrations, Byzantium and Islam, the cult of saints and relics, Vikings, and gender roles. (Formerly Medieval Europe: 200-1000.)

HIS 70A - Modern European History, 1500-1815 (5)

Surveys the economic, social, cultural, and political history of Europe since the late 15th century: 1500-1815. Course 70A is not a prerequisite to course 70B.

HIS 70B - Modern European History, 1815-present (5)

Surveys the political, social, and cultural history of Europe from the era of the Industrial Revolution to the beginning of the second millennium. Course 70A is not prerequisite to 70B.

HIS 71 - The Holocaust: Destruction of European Jewry (5)

Focuses on the destruction of the Jews of Europe by Nazi Germany. Issues and themes are historically grounded and include works of literature, social sciences, philosophy, and film. Online course.

HIS 74 - Introduction to Jewish History and Cultures (5)

Surveys 3,000 years of Jewish history. Themes include origins of the Jews in the ancient world, formation and persistence of the Jewish diaspora, coherence and diversity of Jewish experience, Jewish narrative and textual traditions, interaction between Jews and other cultures, productive tensions between tradition and modernity in Jewish history and literature.

HIS 74A - Introduction to Middle Eastern and North African Jewish History: Ancient to Early Modern (5)

Popular media present Muslims and Jews as age-old enemies; this is far from the truth. Through primary sources, secondary texts, and films, students examine this fraught and politicized history, challenging conventional narratives of the region and its Jewish population.

HIS 74B - Introduction to Middle Eastern and North African Jewish History, 1500-2000 (5)

Surveys modern Jewish history from Morocco to Iran, 1500-2000. Studying these populations through original documents, scholarly works, and literature imparts a unique perspective on both modern Jewish history and that of the region, challenging and complementing standard narratives of each. (Formerly course 74A, Jewish Life in North Africa and the Middle East.)

HIS 75 - Film and the Holocaust (5)

Examines a series of distinguished documentary and feature films about the destruction of European Jewry. Each film is placed in its historical context, and wherever possible, the readings include the original documents on which films were based. Emphasis is placed on the strategies the filmmakers used to address the problem of representing genocide without succumbing to mere melodrama.

HIS 76 - The Holocaust (5)

Investigates the genocide of the Jews from 1933 to 1945 within its broader historical context, including anti-Semitism, the Great Depression, Nazi-Soviet relations, and World War II. Examines how the Holocaust unfolded in Europe as well as its impact on Jews in North Africa and the Middle East. (Formerly Hitler and the Holocaust.)

HIS 80N - Gender, Labor, and Feminist Productions (5)

Examines how constructions of gender and intersecting constructions of race, class, and sexuality define the power of women differentially in the world of work. Beginning with the history of emancipation, traces the broader constructions of paid and unpaid labor in the 20th-century U.S. Traces the specific histories of transgender women workers, specific regional and industrial histories, and those marked by the

meaning given to African, Asian, Euro-, indigenous, and Mexican descent in the construction of gender and work. Uses feminist methodology and contemporaneous visual and written work by women artists and filmmakers.

HIS 80X - Civil Rights Movement: Grassroots Change and American Society (5)

The civil rights movement of the 1950s-60s was one of the most important grassroots social movements in American history. Course examines this movement and its effects on American society, focusing especially on the experiences of rank-and-file participants. (Formerly Community Studies 80B)

HIS 80Y - World War II Memories in the U.S. and Japan (5)

Examines how the meaning of such issues as war origins, war responsibility, the atomic bomb, reparations, and racism have been subjects of contention in postwar U.S. and Japan. Students explore the relations between history, memory, and contemporary politics.

HIS 99 - Tutorial (5)

Students submit petition to sponsoring agency.

Upper-Division

HIS 100 - Historical Skills and Methods (5)

Designed to introduce history majors to historical methods and provide preparation for exit seminars. Students develop critical reading, historical analysis, research, and disciplinary writing skills.

Prerequisite: Enrollment is restricted to history majors and proposed majors or by permission of the instructor.

HIS 101C - Oceans in World History (5)

Oceans, human communities, and the variety of relations between societies have been linked closely in world history. This course focuses on the three most well-researched and, historically, most important oceanic worlds--those that developed to link the regions bordering the Mediterranean Sea, Indian Ocean, and Atlantic Ocean.

HIS 101D - Topics in the World History of Science (5)

Detailed consideration of some specific topic or period in the history of science and technology with significant global implication. Topic varies from year to year. Examples include: Copernicanism, Darwinism, climate change, and military technology.

HIS 101E - Global 1930s (5)

Explores the turbulent 1930s from a global perspective. Students consider the great events of the decade--the Great Depression, the consolidation of communism, and the rise of fascism--within the context of global connections and forces, including those fostered by imperialism and various forms of internationalism. (Formerly course 196A.)

HIS 104C - Celluloid Natives: American Indian History on Film (5)

Examines how American Indian history and culture has been portrayed in Hollywood films, with an emphasis on films that represent Native Americans over the broad spectrum of Native American/white relations.

HIS 104D - Museums and the Representation of Native American History, Memory, and Culture (5)

Provides an historical overview of the relationship between American Indians and museums. Current issues and practices in museums are explored, primarily those associated with ethics, collecting practices, exhibitions, education/interpretation, and administration/governance.

HIS 105 - Nations and Nationalism (5)

Provides an historical, comparative, and theoretical exploration of the development of nations and nationalism. Emphases include the historical formation of nation-states, modernization, colonialism, decolonization, nations and globalization, and the intersections between ethnicity, race, religions, and nationalism.

HIS 106A - Vietnam War Memories (5)

Compares memories and interpretations of war in Southeast Asia by diverse groups in France, America, and Vietnam. Topics include war origins, military strategies, propaganda, combat, civilians, media, activism, MIAs, refugees, mixed race children, memorials, textbooks, films, music, literature, and art.

HIS 106B - Asian and Asian American History, 1941-Present (5)

Analyzes immigration, race relations, war, gender ideology, family life, acculturation, political activism, interracial marriage, multiracial identity, and cultural representations between 1941 and the present. Emphasis on discussion, writing, research, and group presentations.

HIS 109A - Race, Gender, and Power in the Antebellum South (5)

Examines how ideologies of race and gender shaped the development of slavery and empire in the American South from European colonization to the eve of the American Civil War.

HIS 110A - Colonial America, 1500-1750 (5)

Explores the social, economic, cultural, and political development of British North America from the first European/Amerindian contacts in the late 16th century through the establishment of a provincial British colonial society. Course 110A is not a prerequisite to course 110B.

HIS 110B - Revolutionary America, 1740-1815 (5)

Explores the political, social, economic, and cultural development of British North America from the first stirrings of resistance to the establishment of the U.S. Course 110A is not a prerequisite to course 110B.

HIS 110D - The Civil War Era (5)

Social, political, and economic history of the American Civil War and Reconstruction, focusing on the war's changing nature and significance, emancipation, and the postwar struggle over the future of the South and the nation.

HIS 110E - Rise of the Machines: Technology, Inequality, and the United States, 1877 to 1914 (5)

History of the U.S. during what was perhaps its most socially turbulent era, the period following Reconstruction through the First World War. What did it mean to be a nation in the post-Reconstruction era? How did a country that had only recently unified itself under one system of labor now resolve the question of national identity? Was America truly a nation by 1914?

HIS 110F - World War USA: The United States from 1914 through 1945 (5)

Between the First and Second World Wars, American society accepted the need for a regulatory state to save capitalism from itself. Takes an in-depth look at many aspects of U.S. politics and culture during these years. (Formerly Crossroads for American Capitalism: The U.S., 1914 to 1945.)

HIS 110G - Strange Days: The USA and its National Security State, 1945-1991 (5)

From the Good War to the Cold War, the Sixties to the rise of the New Right, the post-1945 American experience has been one of extremes. This survey course looks for evidence of commonality during those times. (Formerly Age of Extremes: The United States During the Cold War, 1945 to 1991)

HIS 110H - Greater Reconstruction: Race, Empire, and Citizenship in the Post-Civil War United States (5)

Examines how the consolidation of United States sovereignty in North America and the establishment of an overseas empire during the period between the conclusion of the Civil War and the Philippine-American War reshaped conceptions of race and citizenship.

HIS 111 - Popular Conceptions of Race in U.S. History, 1600-Present (5)

Explores how race has been constructed and perceived, examining Americans' use of race to describe themselves and to label others. Particularly concerned with ordinary people and how and why their ideas of race have changed over time.

HIS 112 - American Feminist Thought, 1750-1950 (5)

Traces history of feminist thought in the United States from the 18th century Enlightenment to the mid-20th century. Focusing on questions of social identity, gender difference, and legal/political status, examines writings of philosophers, activists, novelists, and ordinary women that challenged religious, political, and scientific beliefs underlying gender inequality.

HIS 113C - Women and American Religious Culture (5)

Historical introduction to religious culture of U.S. as experienced and created by women. Explores religious ideas about women, the treatment of women by mainstream institutions and religio-social communities, and female religious leaders and followers. Takes an explicitly feminist analytical approach and uses a variety of texts, including historical and literary scholarship, sacred texts, fiction, autobiography, material artifacts, visual art, and music.

HIS 114 - Market Revolution in Antebellum U.S. (5)

Examines the cultural, political, and environmental upheaval associated with antebellum market revolution. Topics include: markets and U.S. territorial expansion; reform movements that coalesced around disputes over what should, and should not be sold (e.g., antislavery activism; anti-prostitution reform movements).

HIS 116 - Slavery Across the Americas (5)

Examines the exploitation of African people as slaves throughout European colonies in the Americas. How did slavery affect slaves, enslavers, and their societies? Emphasizes the diversity of slave regimes and their importance for shaping American life for all.

HIS 116A - Unchained Memory: Slavery and the Politics of the Past (5)

Investigates the representation of slavery with scholarly and vernacular histories, focusing on the United States. Students examine representations of slavery in scholarly works, public-history venues like museums and historic sites, popular culture, and artistic productions. Students develop their own scholarly research into the history of slavery grounded in primary and secondary sources.

Prerequisite: Enrollment restricted to College Scholars students.

HIS 117 - Wired Nation: Broadcasting & Telecommunications in the US from the Telegraph to the Internet (5)

Explores the history of telecommunications systems in the US starting with the telegraph, the telephone, wireless telegraph, radio, television and the Internet. Students learn about the development of these systems and the cultures that they foster.

HIS 117A - From the Player Piano to Pandora (5)

Explores the history, culture, and politics of the distribution of recorded and live sound from the 1870s through the present.

HIS 118 - The Global Cold War, 1945-1991 (5)

Explores the history of the Cold War from a global, multinational perspective. Begins with the opening salvos between the United States and the Soviet Union in 1945, and concludes with the collapse of the latter empire in 1991.

HIS 118A - Conspiracy Planet: How Conspiracies, Conspiracy Theories, and Conspiracy Scandals Shape History (5)

Explores the history of a principal obsession of our age: the conspiracy. Focuses on the people who love them most: conspiracy theorists. Millions of people around the world believe in conspiracy theories. Why?

HIS 120 - W.E.B. Du Bois (5)

Examines the thought and activities of W.E.B. Du Bois across changing historical circumstances. Considers the ways Du Bois's work has been used in the present to address issues such as racism and imperialism.

HIS 121A - African American History to 1877 (5)

A survey of pre-contact Africa, indigenous social structures, class relations, the encounter with Europe, forced migration, seasoning, resistance, Africa's gift to America, slavery and its opponents, industrialization, emigration vs. assimilation, stratification, Convention Movement, Black feminism, Civil War, and Reconstruction.

HIS 121B - African American History: 1877 to the Present (5)

A survey of the period from 1877 to present, highlighting Jim Crow, Militarism, Black feminism, WWI, New Negro, Garveyism, Harlem Renaissance, Black Radicalism, Pan Africanism, Depression, WWII, Desegregation Movement, Black Power, 1960s, Reaganism. Cultural and economic emphases.

HIS 122A - Jazz and United States Cultural History, 1900-1945 (5)

Explores the meaning of jazz in United States society and as a U.S.-based art form in other societies. Examines the social and cultural forces that have produced different jazz styles and the various ways that social conflicts and ideals have been displaced onto the music.

HIS 122B - Jazz and United States Cultural History, 1945 to the Present (5)

Explores the meaning of jazz in United States society and as a U.S.-based art form in other societies since 1945. Examines the social and cultural forces producing jazz movements and the social transformations, conflicts, and ideals read into the music.

HIS 123 - Immigrants and Immigration in U.S. History (5)

Introduces U.S. immigration history from the colonial era to the present, with emphasis on the recent past. Particular attention given to changing immigration patterns; the character of the immigrant experience; and the range of responses to immigration, including nativism.

HIS 124 - American Empire (5)

Examines U.S. expansion and subsequent ascent to global power. In tracing the presence of the U.S. in different areas of the world during the 20th century, course considers the ideas, politics, gender, and social relations that have influenced imperial aspirations.

HIS 125 - California History (5)

California had a multi-ethnic indigenous society for centuries. Course traces the persistent multi-ethnic quality of the region as it became part of the Spanish empire, Mexico, and the United States. Considers the many diasporas that have shaped California's steady connection to the world, especially to Mexico and other nations that border the Pacific.

HIS 125A - Indigenous Histories of California (5)

Examines the tribal histories and epistemologies of California's recognized and unrecognized tribes. Beginning with ancient pasts of linguistically distinct indigenous peoples, the class focuses on the 19th and 20th centuries, and considers the role of colonialism, genocide, and historical recovery.

HIS 126 - From Indigenous Colonial Borderlands to the U.S.-Mexico Border (5)

Examines the interactions and integration of indigenous people and settlers in the Southwest U.S. and Northern Mexico from a region defined by its indigenous colonial borderlands to national borders. Explores the connections between the U.S. and Mexico. Within the deeply cross-cultural region studied, also examines the particular histories of states, indigenous peoples, and Mexican-origin groups and regions.

HIS 128 - Chicana/Chicano History (5)

A survey course on the social history of the Mexican (Chicana/o) community and people in the U.S. through the 20th century. Themes include resistance, migration, labor, urbanization, culture and politics.

HIS 130 - History of Modern Cuba (5)

Covers from the Cuban sugar revolution (late 18th century) to the socialist revolution and its aftermath (1959–present). It is intended to be not only a modern history of Cuba but also a broader history of Latin America through the case of Cuba.

HIS 131 - Women in Colonial Latin America (5)

Introduction to the social history of Latin America through a focus on the inflections of class and ethnicity on gender in this region. First six weeks focuses on the colonial period. The last three weeks covers the 19th and 20th centuries.

HIS 134A - Colonial Mexico (5)

Covers the social, cultural, economic, and political history of colonial Mexico (New Spain). Special attention paid to colonial identity formation, religion, and labor systems. Begins by examining indigenous societies prior to the arrival of Europeans and concludes with Mexico's independence movement in the early 19th century.

HIS 134B - History of Mexico, 1850 to Present (5)

Social, cultural, economic, and political history from the triumph of Liberalism to the present day, focusing on four key periods: the dictatorship of Porfirio Diaz (1900–1910), the armed phase of the Revolution (1910–1920), the

consolidation of revolutionary programs and a single-party democracy (1920–1940), and the developmentalist counter-revolution since 1940. Provides background for understanding the Mexican diaspora to the U.S.

HIS 137A - Africa to 1800 (5)

Introduction to history of Africa. Topics include states and stateless societies, culture, society and economy in the pre-modern era, stratification, oral traditions, long distance trade, the coming of Islam, and the evolution of the South Atlantic system and its social, political, and other consequences. Some background knowledge of Africa helpful.

HIS 137B - Africa from 1800 to the Present (5)

How Africa lost its continental, regional, and local autonomy in the era of European imperialism. The components of European hegemony, Christian proselytization, comparative colonial strategies and structures, nationalism, decolonization and independence and the disengagement from neo-colonial patterns and the colonial legacy. Case studies from northern and sub-Saharan Africa. Some background knowledge of Africa helpful.

HIS 137C - African Cinema (5)

Historical study of modern African cinematography from the emergence of film as a tool of social control in the imperial and colonial periods to its theoretical and practical transformation by African cineastes in the post-independence era. Films and videos from northern, eastern, western, central/equatorial, and southern Africa viewed.

Prerequisite: Prerequisite(s): HIS 30 or HIS 137A or HIS 137B, or by permission of instructor.

HIS 139B - Race and Memory in American History

HIS 139C - Queer Pasts: A Radical Telling of LGBTQ History in the United States (5)

Critically explores how to preserve, represent, and study the history of queer and gender non-conforming people. Focuses on non-traditional and digital archives, oral history, and original research.

HIS 139E - Santa Cruz History: 1770-Present (5)

Santa Cruz County was historically home to many Awaswas Ohlone-speaking tribes. Course traces the persistent multiethnic quality of the region as it became part of the Spanish empire, Mexico, and the United States.

HIS 140B - History of Qing China, 1644-1911 (5)

Introduces students to how Qing China arose, expanded, and struggled to enter the modern world. Focuses on what the Qing empire had in common with other agrarian empires across Eurasia, commercialization and communication networks, elite mobility and peasant revolts, political legitimacy of the alien rule, maintaining social order (such as merchants' control and gender segregation), massive population growth and internal migration, as well as its conflicts with the industrial West.

HIS 140C - Revolutionary China 1895-1960 (5)

Explores history of China from the late 19th century to the early years of the People's Republic, focusing on the end of imperial rule, the sources and development of revolution, and early attempts at socialist transformation.

HIS 140D - Recent Chinese History (5)

Explores history of China from establishment of the People's Republic of China to the present, focusing on competing strategies of socialist transformation, urban/rural relations, and the effects of the post-Mao economic reforms.

HIS 140E - Women in China's Long 20th Century (5)

Introduces changes in Chinese women's lives--and changes in shared social ideas about what women should do and be--from the mid-19th century to the present. When we foreground gender as a category of analysis, how does history look different?

HIS 145 - Gender, Colonialism, and Third-World Feminisms (5)

Introduces the history of feminism in the third world, focusing on the ways in which colonialism (and post-colonialism) has shaped gender relations and on the feminist movements that have emerged in response to the impact of colonialism.

HIS 146A - Colonial South Asia 1750-1947 (5)

Introduces key transformations--political, economic, social, and cultural--in colonial Indian history. The focus is on the processes, institutions, and ideas that shaped colonial power and resisted it.

HIS 147A - History of Premodern India (5)

A study of religions (Vaisnavism, Tantrism, Islam, Sikhism), art, literature, and social movements in their historical contexts from 1000 A.D. to 1800.

HIS 147B - Political and Social History of Modern South Asia (5)

Social, political, and religious movements in the colonial and postcolonial contexts of the 19th and 20th centuries in modern and contemporary South Asia.

HIS 147C - South Asia in the 20th Century (5)

Introduces historical change in 20th-century South Asia. Topics include: modernity, gender, state formation, nationalism, democracy, and development. Course material includes interdisciplinary secondary works, primary reading by important political actors, and films. Prior knowledge of South Asia is useful, but not necessary.

HIS 147D - Intellectual History of South Asia (5)

Highlights the power of ideas in making South Asia modern. Focuses on the 19th and 20th Centuries. Ideas assessed include liberalism, Marxism, Hindu revivalism, Islamic jihad, democracy, nationalism, secularism, and development.

HIS 150A - Emperors and Outcasts: Ancient Japan (5)

Surveys the history of the peoples of the Japanese islands from prehistorical migrations through the 15th century. Emphases include examination of social structures, political formations, cultural production, and religion. (Formerly Ancient Japan.)

HIS 150B - Tokugawa Japan (5)

Surveys the history of the peoples of the Japanese islands from the middle of the 15th century to the middle of the 19th century. Focus is on the era of civil war, the formation of the early modern federated state, social structure, and cultural production.

HIS 150C - Inventing Modern Japan: The State and the People (5)

Surveys the history of the peoples of the modern Japanese nation from the Meiji Restoration to the present. Focuses on the formation of the modern state, empire, social movements, and cultural production. (Formerly Modern Japan.)

HIS 150D - The Japanese Empire, 1868-1945 (5)

Examines the history of the Japanese colonial empire from 1868 to 1945, including the colonies of Taiwan, Korea, Micronesia, and Manchuria. Considers how the colonies were ruled and what the legacies of the empire have been.

HIS 150E - History and Memory in the Okinawan Islands (5)

Known historically as the Ryukyu Islands, Okinawa has long been an important transmitter of people, ideas, and goods in East Asia. Course explores this history by focusing not only on the royalty of these islands, but also on the lives of everyday people.

HIS 150F - Engendering Empires: Women in Modern Japan and Korea (5)

Explores how women's experiences in Japan and Korea were intertwined and differentiated before and during World War II under Japanese empire, and from the postwar to the present under American hegemony.

HIS 151 - History of Science, Medicine, and Technology from Antiquity to the Enlightenment (5)

Questions explored include the debate over when/where modern science began; the role of craft-based and artisanal skills in the production of knowledge; and the technological and social impacts of intellectual change, from the Bronze Age to the birth of computing.

HIS 151A - Medicine and the Body in the Colonial World (5)

Explores the histories of bodies and medicine in the colonial world. Charts the relationships among ideas about the body, medical practice, race, and labor in the colonial world between the 16th and the mid-20th centuries

HIS 151B - Drugs in World History (5)

What were drugs in the early modern world? Who grew and consumed them? How were they used, and why? Students study how humanity's ancient fascination with altered states shaped globalization, the Scientific Revolution, the Atlantic slave trade, colonialism, and modernity itself. (Formerly 196J, History of Drugs in the Early Modern World.)

HIS 152 - Trade and Travel on the Silk Roads (5)

Introduction to two millennia of history along the ancient trade routes popularly known as the Silk Road. These routes carried precious goods between Asia and Europe, while also serving as important conduits for the flow of people and ideas.

HIS 154 - Post-Colonial North Africa (5)

Introduces the history of modern North Africa from WWI to the so-called Arab Spring. Topics include the dynamics of colonial rule and reform, anti-colonial nationalism, decolonization, the rise of Islamism, and popular protest.

HIS 155 - History of Modern Israel (5)

The conflict between Israelis and Palestinians is one of the most intractable disputes in our troubled world. Course begins with a glimpse of Palestine in the late 19th and early 20th centuries, surveys the rise and fall of utopian Zionism, pays especially close attention to the events of 1948 and 1967, and concludes by analyzing the collapse of hopes for peace after Oslo and Camp David meetings.

HIS 156 - Interrogating Politics in the Post-Colonial Middle East (5)

Explores the political trajectory of the post-colonial Middle East. Topics include: the Cold War and rise of Third Worldism; women's movements; political Islam; Arab-Israeli conflict; Lebanese Civil War; impact of oil production; Iranian Revolution; rise of the Arabian Gulf.

HIS 156A - Art, Culture, and Mass Media in the Arab Middle East (5)

Chronicles the cultural history of the Arabic-speaking regions of the Middle East through art, literature, cinema, and mass media during the 20th and 21st Centuries.

HIS 156B - Modern Arab Thought (5)

Studies the intellectual history of the Arab world from the nineteenth century to the Arab Spring. Beginning with Arab responses to colonialism, it covers the evolution of various schools of thought including liberalism, Islamism, Marxism, nationalism, and feminism.

HIS 157 - The Ottoman Empire (5)

Explores the history of the Ottoman Empire with emphasis on its Arabic-speaking provinces. In addition to critically considering the political trajectory of the empire, we interrogate a wide range of topics relating to community organization, economic networks, international affairs, and the significance of religion within the Ottoman realm.

HIS 158A - The Escapes of David George: Biographical Research on Slavery and Early America (5)

Invites student collaboration on a biography of David George, born enslaved in colonial Virginia. His attempts to escape slavery led to a remarkable odyssey throughout the Atlantic World, revealing the constraints of slavery and limits of American freedom. (Formerly Cowell 161C.)

Prerequisite: Enrollment is restricted to College Scholars.

HIS 158C - Slavery in the Atlantic World: Historical and Archaeological Perspectives (5)

Explores the African diaspora resulting from the transatlantic slave trade, drawing on methodologies from two academic disciplines--history and archaeology. Examines key questions about the slave system, using an array of source materials, both written documents and artifacts.

Prerequisite: Enrollment is restricted to history, anthropology, and critical race and ethnic studies majors and minors during first-pass enrollment; open to all students at the start of second-pass enrollment.

HIS 159A - Cleopatra to Constantine: Greek and Roman Egypt (5)

Examines the political, social, religious, and material culture of ancient Egypt during these periods of intense interaction with the ancient Near East and Mediterranean, from the period of Alexander (332 BCE) through the beginning of Coptic Christianity (3rd century CE). (Formerly Greco-Roman Egypt.)

HIS 159B - Women and Gender in Ancient Egypt (5)

Explores sex and gender in ancient Egypt with a specific focus on women. Artistic representations, texts, objects of daily life, and burials are used to examine the practices that encoded gender in this ancient culture.

HIS 159C - Temple and City: The Egyptian New Kingdom and the City of Thebes (5)

Introduces the political and religious history of the Egyptian New Kingdom (1546-1086 BCE), using the city of Thebes as a focal point. The political, religious, and architectural history of the city is covered.

HIS 159D - When Cities Were New: the Rise of Urbanism in the Ancient Near East and Mediterranean (5)

Investigates the rise and development of urbanism in the ancient Near East and Mediterranean world, including Mesopotamia, Syria, Egypt, Greece, and the Roman Empire. Close studies of individual ancient cities, as well as broader issues in ancient urbanism are covered.

HIS 160A - Athenian Democracy (5)

Athenian democracy from foundation to the fourth century B.C., with emphasis on its practices and ideologies. Readings from ancient sources and modern theory. Topics to include foundations and development; Athenian concepts of freedom, equality, law, citizenship. Lectures and discussion.

HIS 160C - Topics in Greek History (5)

Detailed consideration of some specific topic or period in Greek history, varying from year to year. Examples include Greek religion, Alexander, the Hellenistic world, the ancient Greek economy, and Greece and India; Thucydides and the Peloponnesian War; Greek art and archaeology.

HIS 161B - Topics in Roman History (5)

Detailed consideration of some specific topic or period in Roman history, varying from year to year. Examples include Roman religion, Augustus and the Roman Empire, Julio-Claudian emperors and the principate, Roman slavery, and Christianity and Rome.

HIS 161C - Age of Augustus (5)

Surveys Rome's transition from Republic to Empire, and the politics, people, and literary and material culture of the principate.

HIS 163B - Genesis: A History (5)

Introduction to historical, textual, source, and redaction criticism of the book of Genesis and to exegesis as science and ideology. Texts, history, and iconography of neighboring traditions (Mesopotamian, Ugaritic, Egyptian, Greek) are also studied when appropriate.

HIS 163B - Genesis: A History (5)

Introduction to historical, textual, source, and redaction criticism of the book of Genesis and to exegesis as science and ideology. Texts, history, and iconography of neighboring traditions (Mesopotamian, Ugaritic, Egyptian, Greek) are also studied when appropriate. Course 44, Literature 80A, or some basis in Hebrew or Greek is strongly suggested.

HIS 164A - Late-Medieval Italy, c. 1200-1400 (5)

Italy from the birth of the commune to the early Renaissance in Florence. Topics include urban life and social conflict, gender roles, St. Francis, the Black Death, female mystics, Dante, Boccaccio, humanism, artistic developments from Giotto through Donatello. Requires viewing several films outside of class.

HIS 164B - Renaissance Italy, c. 1400-1600 (5)

Italy from the Florentine Renaissance through the Reformation. Topics include social change and political consolidation, the rise of the papacy, court life, witch hunting, Machiavelli, artistic developments from Donatello through late Venetian Renaissance. Requires viewing several films outside of class. Course 164A recommended as preparation.

HIS 166 - Northern Ireland: Communities in Conflict (5)

Introduction to the so-called troubles in Northern Ireland, from the 1960s to the present. Examination of the historical background to the conflict, the patterns of conflict in the 1970s and 1980s, and the emergence of a peace process in the 1990s.

HIS 167A - The First World War (5)

An intensive analysis of the First World War from multiple perspectives: military, diplomatic, political, economic, technological, global, and cultural. The emphasis is on the transformative impact of the war on European societies, international relations, and modern culture.

HIS 167B - The Second World War in Europe (5)

Making use of multiple perspectives, this course explores the origins of the Second World War, its course and outcome, and its transformative effects on European society, culture, politics, and demographics. Closely examines the war's impact on diverse civilian populations.

HIS 169 - Dutch and Belgian History, 1500 to Present (5)

The political, social, economic, and cultural history of the modern Netherlands and Belgium from 1500 to the present day.

HIS 170A - French History: Old Regime and Revolution (5)

French history from the Middle Ages through the Revolution. Focus on the rise and fall of absolute monarchy, the nature of Old Regime society, the causes and significance of the French Revolution. Attention to those who endured as well as to those who made events.

HIS 170B - French History: The 19th Century (5)

Social, political, and cultural history of France from the Revolution to WWI. Focus on the Revolutionary tradition, the Napoleonic myth, the transformation of Paris, and the integration of the peasantry into the national community. Readings may include novels by Stendhal and Balzac.

HIS 170C - From the Trenches to the Casbah: France and its Empire in the 20th Century (5)

Surveys major events in 20th-century French history, such as the two World Wars, the Thirty Glorious Years, European integration, decolonization, the Cold War, and the events of May 1968.

HIS 171 - Revolutions in France (5)

Examines the political/social upheaval in 1789, 1830, and 1848 in light of the sweeping changes brought to 19th-century France by those other great revolutions of the age, the democratic and the industrial. Students' written work focuses on the comparative analysis of revolution.

HIS 172A - German History (5)

The development of German civilization, including philosophy and literature as well as politics and diplomacy in the nineteenth and twentieth centuries.

HIS 172B - German Film, 1919-1945 (5)

Introduction to German films from 1919 to 1945. Through combination of movies and documentaries, gain insight into political, economic, social, and cultural conditions of Weimar and Nazi Germany.

HIS 172C - History of German Film, 1945 to Present (5)

Uses films and documentaries to provide insight into the political, social, economic, and cultural conditions of postwar East and West Germany, with a strong focus on remembrance of the country's Nazi past.

HIS 172D - Hitler and the Third Reich (5)

Focuses on Hitler's political career and analyzes how he harnessed Germany and much of Europe to his vision of a New Order organized along a social-Darwinist notion of the racial community.

HIS 173A - Medieval Russia (5)

Topics include Russia's relations with Scandinavia, Byzantium, and the Mongols; Orthodoxy; and the roles of women. Materials include chronicles, letters, law codes, household manuals, travelogues, epics, art, architecture, and maps. Also explores the continuing relevance of Russia's medieval past through operas and film.

HIS 173B - Imperial Russia, 1696-1917 (5)

Russian history from Peter the Great through the collapse of the Russian Empire. Explores the relationship between state and subjects (both Russian and non-Russian), alongside the role that geography played in an expanding empire in an increasingly globalizing world.

HIS 173C - History of the Soviet Union (5)

Covers Soviet history from the late imperial period through the Soviet collapse. Explores the nature of the Soviet state, relationships between state and society, the role of the Soviet Union in the Cold War, and experiences of everyday life.

HIS 174 - Spies: History and Culture of Espionage (5)

Analyzes the roles of espionage and intelligence in modern European history with emphasis on major conflicts from the Franco-Prussian War through the Cold War and beyond. Also examines images of spies in popular culture from the early 20th century to the present.

HIS 175D - History of Soviet Film (5)

Does not stress questions of aesthetics or technical aspects of film making, but the changing ideology inherent in Soviet films. The goal of examining cinema is to enrich our understanding of Soviet history. Readings include works of famous directors and theorists—Eisenstein, Vertov, Pudovkin, and Kuleshov—in addition to secondary works by Denise Youngblood, Richard Taylor, Josephine Woll, and Anna Lawton.

HIS 176 - Eastern Europe, 1848-2000 (5)

Examines the political and social history of modern Eastern Europe, excluding the Balkans and Baltic States, from 1848 to the present. Focuses on the development of nationalism, war, occupation, ethnic strife, communism, and democratic reform in this region.

HIS 177 - Smoke, Smallpox, and the Sublime: Thinking about

the Environment in the 19th Century (5)

Examines ways in which Europeans and others thought about the environment and nature in the 19th century and how their concerns about issues such as climate change, pollution, and conservation were both similar to and different from environmentalist thinking today.

HIS 177A - Slaves, Soldiers, and Scientists: History of the Tropics (5)

Surveys the role of the tropics and tropical peoples in history, covering the post-Columbian encounters between indigenous Americans, Europeans, and Africans, colonialism, and the origins of fields, such as anthropology and tropical medicine. (Formerly Tropics of Empire.)

HIS 178A - European Intellectual History: The Enlightenment (5)

Study of European thought and literature from Hobbes and Swift to Rousseau and Goethe. Focuses on relation of ideas to their social and cultural context. Special attention to traditions of religious conflict and criticism rising from the Protestant Reformation; to the discovery of the world beyond Europe; and to the intellectual and cultural roots of the French Revolution.

HIS 178B - European Intellectual History: The 19th Century (5)

Study of European thought and literature from Blake to Nietzsche. Focuses on relation of ideas to their social and cultural context. Special attention to the rise and fall of the Romantic movement, to changing conceptions of history, and to the development of socialist and aesthetic critiques of industrial civilization.

HIS 178C - European Intellectual History, 1870-1970 (5)

Drawing on experiments in autobiography, the arts, and social theory, this course focuses on ideas and images of modernity in European culture. It also highlights the role of the intellectual as politically engaged or disillusioned witness in a violent century.

HIS 178E - Modern Jewish Intellectual History (5)

Surveys European Jewish intellectual history from the Enlightenment to the present. Major themes include emancipation and assimilation, the flowering of Yiddish literature, the rise of Zionism, new variations on the messianic idea, and Jewish contributions to the culture of urban modernism.

HIS 180A - English History (5)

Emphasis on the interaction between social, economic, religious, and political developments. An attempt to place these phenomena in the context of the wider European and world scene. The period from 1485 to 1689.

HIS 181 - Modern Britain and the British Empire (5)

Examines the history of the British Isles and the British Empire from the late 17th century to the present. Traces the

expansion, transformation, and dissolution of the British Empire as well as the changing meanings of Englishness and Britishness over this period.

HIS 181B - Africa and Britain in an Imperial World (5)

Covers the long history of interaction between Britain and Africa, from the Atlantic slave trade and British colonialism in Africa up to the post-colonial present, from British settlers in Africa to the African presence in the British Isles.

HIS 183A - Nineteenth-Century Italy (5)

Italian politics, culture, and society from the Napoleonic era through early leftist movements. Central emphasis on the Risorgimento and Unification. Other topics include: north-south conflict; banditry; urban change; growth of tourism; popular religion; family structures and gender; visual arts and opera.

HIS 183B - Fascism and Resistance in Italy (5)

Examines Italian politics, society, and culture (c. 1900-1950), emphasizing the Fascist regime; interdisciplinary focus emphasizing history, literature, and film. Course 183A recommended as preparation.

HIS 184B - Racism and Antiracism in Europe: From 1870 to the Present (5)

Explores the histories of racism and anti-Semitism alongside efforts to combat racism in Europe from 1870 to the present. Offers a conceptual basis for thinking about the definition of race and its historical evolution.

HIS 185C - Communism, Nationalism, and Zionism: Comparative Radical Jewish Politics (5)

Comparative in approach, course examines Jewish radical politics across Europe, North Africa, the Middle East, and the Americas in the late 19th and 20th centuries. How did radical politics afford Jews greater agency in contexts that otherwise excluded them? What tensions arose with religious, nationalist, and internationalist obligations? What drew so many Jews across so many diverse contexts to focus on radical leftist politics? What, if anything, links Jews and radical politics across such diverse contexts? Through primary sources, memoirs, scholarly works, films and more, students compare Jewish engagement in radical leftist movements in several nodes, including Russia (and the former USSR), Poland, France, Egypt, Iraq, Morocco, Israel, Argentina, Mexico, and the USA among others.

HIS 185I - Latin American Jewish History in the Modern Period (5)

Explores Jewish immigration settlement and identity negotiation in Latin America from the mid-19th Century to the present.

HIS 185J - The Modern Jewish Experience (5)

Historical comparative overview of the political, socio-cultural, and intellectual transformation of Jewish societies in

Europe and the Middle East from the late 18th Century to the present.

HIS 185K - Jewish Life in Eastern Mediterranean Port Cities (5)

Overview of the Jewish experience in important cities in the age of empire. Istanbul, Beirut, Alexandria, and Salonica were home to thriving, culturally diverse Jewish populations. Course explores these urban Jewish cultures, the institutions, and intellectual production.

HIS 185L - Where Civilizations Met--Jews, Judaism, and the Iberian Peninsula (5)

Surveys Jewish life in the Iberian Peninsula from Roman times to the present, and explores offshoot Hispanic Jewish societies in the aftermath of the 1492 expulsion.

HIS 185M - Zionism: An Intellectual History (5)

Zionism is one of the most complex--and contested--political and ideological movements of the modern period. This course explores the intellectual history of Zionism and its critics, from the late 19th century to the establishment of the State of Israel.

HIS 185O - The Holocaust and the Arab World (5)

Examines World War II in North Africa and the Middle East. Through primary and secondary sources, films, and novels, students consider WWII and the Holocaust as they intersect with colonial and Jewish histories in the Arab world.

HIS 189 - @history: Doing History in a Digital Age (5)

Investigates questions relating to how new technologies are changing the way historians do research and interact with the public. This course has both a critical classroom component and a hands-on computer laboratory component. (Formerly 100A.)

Prerequisite: Enrollment is restricted to junior and senior history, Jewish studies, German studies, and classical studies majors.

HIS 190A - Slavery and Race in Latin America (5)

Covers comparative history of slavery in Latin America with questions of race in the colonial and national periods and key moments and debates in the historiography of slavery and its relation to ideologies of the past and the nations.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190B - Race and the Nation in Latin America (5)

Focuses on the ways in which nation and race have been thought about in Latin America throughout the 19th and 20th centuries. These concepts were closely intertwined, albeit in differing and changing ways, since the wars of independence from Spain and Portugal (1810-1825). Compares the ways in which black, Indian, and racially mixed (mulatto or mestizo)

have been socially constructed, ideologized, and contended in different countries, including Brazil, the Spanish-speaking Caribbean, Mexico, Peru, and Argentina.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190D - Asian and Latino Immigration Since 1875 (5)

Examines Asian and Latino immigration into the United States since 1875. Students explore the relationship between U.S. foreign policies and immigration policies, transnational ties and homeland connections, and the cultural and political influences they have on American society.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190E - Topics in Chicana/o History (5)

A seminar on the history of Chicanos/Mexicans in the United States, 1848 to the present. Topics include Chicana/o labor, family, social, urban, cultural, and political history.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190F - Research Seminar in the Americas (5)

Students learn how to conduct research and write history. Primary and secondary sources are extensively read. Research sources include a rich array of government documents, newspapers, memories and diaries, visual material and film.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190G - History and Theory (5)

Each year students study one or more theorists or schools of philosophy and history. Themes vary by year and include: Walter Benjamin, Hayden White, Agnes Heller, the Frankfurt School, and the Subaltern School.

Prerequisite: Prerequisite(s): two upper-division history courses and satisfaction of the Entry Level Writing and Composition requirements, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190H - History of Time (5)

Writing-intensive seminar on the experience, manipulation, and representation of time in history. Students pursue advanced research using primary and secondary sources.

Prerequisite: Prerequisite(s): two upper-division history courses and satisfaction of the Entry Level Writing and

Composition requirements, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190I - California and the Borderlands (5)

Complete original research in California and borderlands history in this senior research seminar. Focus on selected problems and themes. Assignments and discussions help students frame their research and edit their writing.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190J - Diaspora and Migration in World History (5)

Diaspora studies recently have included a range of movements and people in colonial, post-colonial, and national dilemmas. Diaspora studies share historical themes with migration studies, and include the study of forced exile and situations of genocide and femicide experienced by indigenous and national minorities.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190K - Wired Planet: Readings on the Global History of Broadcasting and Telecommunications (5)

Locates common themes in the history of broadcasting and telecommunications throughout the world. Why do certain strategies for developing broadcasting and telecommunications systems succeed or fail? Why do some nations outstrip other nations of comparable development in the growth of their communications systems? Why do national or regional communication systems suddenly become more or less open—or more or less centralized?

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190L - Personal Politics in the New South (5)

Examines the tensions between movements for political reform and reaction in the southern United States between Reconstruction and the second world war. Students develop a research paper grounded in primary research that addresses these questions.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; two upper-division history courses or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190M - History of Children and Culture of Childhood in the 19th Century (5)

Explores the lives of children and the functions of the literary figure of the child in the cultural politics of the 19th century in the United States. Examines the historically contingent

nature of childhood through historical, literary, and visual sources.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190N - Topics in African History (5)

Examines contemporary crises in Africa: the new South Africa, refugees, HIV/AIDS, children of war, blood or conflict diamonds, civil war, and genocide in Rwanda. Seminar format where students will be prepared to undertake studies on specific subjects and two rounds of 15–20 page papers.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190O - African American Historiography (5)

Major themes in contemporary African American historiography on a topical basis.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190P - Early American Society and Culture (5)

Explores subjects and themes in the political, social, and cultural history of early U.S. history from the colonial period through 1850. Includes critical reading of current scholarship and research in primary texts. The focus of this course is the production of a 25-page research paper. Recommended for senior history majors.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190Q - The Novel and History (5)

Explores novels and novelists in relation to the writing of historical scholarship. Breaking down the simplistic genre division between fiction and nonfiction, provides opportunities for students to read novels as historical evidence, novels as editorial commentary, and novels as analytical narrative. Students produce a series of papers that culminate in a 25-page research project.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and two upper-division history courses or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190R - Research in the History of American Religions (5)

Readings and research in the history of religions in the United States. Readings focus on topics including the rise of evangelicalism; gender and religion; class, race, and religious

diversity; and modernity. Students produce papers that culminate in a 25-page research project.

Prerequisite: Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements and two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190T - Latin America in the Cold War (5)

Writing-intensive seminar on Latin America during the Cold War. Particular attention given to U.S.-Latin American relations, including moments of covert or direct interventions. Students pursue advanced research using primary and secondary sources.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190U - Power, Culture, and the Federal Bureau of Investigation (5)

In this research seminar, students explore F.B.I. files obtained under the Freedom of Information Act on a prominent citizen of the United States of America.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190W - U.S. Civil War and Reconstruction (5)

Students read historiographically significant works in the history of the U.S. Civil War and Reconstruction. Students develop research projects grounded in primary source material on a related topic of their choosing. (Formerly Topics in U.S. Civil War and Reconstruction.)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and two upper-division history courses or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190X - History of the Atlantic World, 1492-1824 (5)

Explores the transatlantic societies created by Europeans' colonization of the Americas, and their exploitation of African slaves. Questions whether the cultural, economic, and political links across the ocean integrated the adjacent lands into a fundamentally Atlantic World.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190Y - The Atlantic Slave Trade (5)

Before 1800, far more Africans than Europeans colonized the Americas, arriving unwillingly in the slave trade. Course examines the captives' experiences; the trade's organization and significance in the Atlantic economy; and the eventual movement to abolish the traffic.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 190Z - The Long Civil Rights Movement (5)

Explores the concept of the long civil rights movement as a framework for understanding a wide range of social, economic, and political developments in the African American freedom struggle, in both North and South, from the 1930s through the 1980s.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and two upper-division history courses or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar under faculty supervision. (See course 42.) Students submit petition to sponsoring agency.

HIS 193 - Field Study (5)

To allow promising, well-qualified undergraduates to pursue directed programs of archival or archaeological study in the field under supervision of the UCSC history faculty, concentrating their work within a single given quarter. Students may take two or three courses concurrently. Students submit petition to sponsoring agency.

HIS 194A - Gender, Class, and Sex in Shanghai (5)

Focusing on Shanghai, course examines issues of gender, class, and sex in modern urban Chinese history. Given Shanghai's history as a treaty port, particular attention paid to ways in which its semi-colonial status inflected the articulation of gender identities, class formations and issues of sexuality (particularly sexual labor). Also looks at Shanghai during the Maoist period and in the context of more contemporary economic reforms.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and HIS 140C, or HIS 140D, or HIS 140E, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 194B - Okinawan History (5)

Examines the history of Okinawa with particular attention paid to the modern era. The goal is to give students a solid foundation in the historiography of major themes in the study of Okinawan society.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements two upper-division history courses, or permission of instructor.

HIS 194E - Women in Japanese History (5)

Examines through both primary and secondary sources such issues as work, sexuality, education, class, and ethnicity in relation to constructions of female gender in Japanese society

over the past several centuries, particularly focusing on the modern era.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 194F - Jewish Shanghai (5)

Explores the migration of the more than 10,000 Jewish refugees who fled Europe during World War II and settled in Shanghai. Examines the different Jewish populations that fled to Shanghai, the Shanghai ghetto, and the recovery of this piece of history from the 1980s through the present.

Prerequisite: Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 194G - China Since the Cultural Revolution: Histories of the Present (5)

Explores the rapid and often destabilizing shifts that have taken place in China since the late 1970s (the reform era), tracing the effects of China's earlier experiment with revolutionary socialism on the market-driven present. Examines how various meanings of reform are negotiated; changes in rural and urban environments; and class, gender, and ethnic differences.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 194H - Gender, Family, and State in China: 1600-Present (5)

Explores gender, family, and state power in China from 1600 to present, examining gendered norms, education, political movements, revolutionary practice, sexuality and sex work, and state interventions in contemporary families. Responses to reading and a research paper required.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 194I - U.S. Bases and Social Movements in Asia (5)

Focuses on the complicated and often tumultuous relationships between the United States military and Pacific communities. Investigates the histories of the people who protested against military bases in Japan, Okinawa, the Philippines, South Korea, Guam, etc.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 194J - The Poor and the Everyday in Modern China (5)

Focuses on non-elite people in modern Chinese history. Drawing on historical studies and contemporary accounts, this course looks at how colonialism, war, and revolutionary movements shaped everyday lives.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors and minors and East Asian studies minors.

HIS 194L - Exile, Diaspora, and Displacement: Jewish Lives from North Africa to the Middle East (5)

From Medieval Spain, Ottoman Salonica, 20th-century Baghdad, present day Casablanca, and beyond, this course examines Jewish experiences of exile, diaspora, and displacement, as well as how to read memoir and biography as sources in their broader historical context.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and two upper-division history courses. Enrollment is restricted to junior and senior history majors and Jewish studies majors and minors.

HIS 194M - Literati, Samurai, and Yangban: Comparative History of State and Elite in East Asia, 1600-1900 (5)

Critically examines the formation of political elites in East Asia. Compares literati in Ming and Qing, China; samurai in Tokugawa, Japan; and yangban in Joseon, Korea. Each group occupied specific roles and functions in their state and society but differed in scale and character. Students cannot receive credit for this course and course 294M.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, or two upper-division history courses, or permission of the instructor. Enrollment is restricted to junior and senior history majors and East Asian studies minors.

HIS 194N - Urbanites in the Global South, 18th Century to the Present (5)

Urbanization is an important aspect of the making of the Global South. This course introduces the histories of urbanization from the 18th Century to the present. Students read the works of historians, anthropologists, geographers, and sociologists.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 194O - South Asia in the Twentieth Century (5)

Introduces students to key ideas and ideologues of the Indian nation and the practices of the late-colonial and post-colonial Indian State. In the process, students become familiar with themes like modernity, gender, state formation, space, nationalism, democracy, and development.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 194P - Urban South Asia (5)

Introduces important themes in urban studies in South Asia in the pre-modern and modern periods. These include political economic change; competing imaginations of city life; urban politics; land use; urban planning; and cultural life among others. This course begins with a brief survey of urbanism in pre-modern South Asia but focuses mostly on urbanities in the early modern and modern periods.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 194Q - Making Space in the Colonial and Post-Colonial World (5)

Explores the production and experience of new forms of space in the colonial and post-colonial world through historical, political, and anthropological case studies with an emphasis on the Middle East and Africa.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 194R - Cairo: The City Victorious, 1750-2000 (5)

The modernization of a world city from 1750 to the present. Cairo's social and cultural history (literature, film, music) against the background of its changing political and economic contexts. Topics include: orientalism, nationalism, imperialism, minorities, women, migration, urbanism, popular culture, tourism.

Prerequisite: Prerequisite(s): Two upper-division history courses; and HIS 41 or HIS 101A or HIS 101B; and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to junior and senior history majors.

HIS 194S - Special Topics in Ancient Egyptian History (5)

Focuses on different topics in ancient Egyptian history. In addition to assigned readings, each student does additional research that culminates in a 20-page paper on a topic of the student's choice. General topics for the course vary from year to year.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior classical studies and history majors.

HIS 194T - Worlds of Labor in Asia (5)

Introduces students to important debates in labor studies in Asia. Studies the relationship between labor, capitalism, and imperialism. Also interrogates the relevance or irrelevance of Asia as a concept from the standpoint of labor. Students cannot receive credit for this course and course 229.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of the instructor. Enrollment is restricted to junior and senior history majors.

HIS 194U - The Cold War and East Asia (5)

Considers through primary and secondary sources the events and aftermath of the Cold War in East Asia in terms of state formation, domestic and foreign policy, and protest movements in China, Taiwan, Korea, and Japan with reference to Vietnam.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 194V - Fascism and Anti-Fascism: The Global Spanish Civil War (5)

Widely considered the antechamber of WWII, the Spanish Civil War (1936-1939) was the first large-scale international clash of Fascists and anti-Fascists. It was simultaneously a national conflict and a global proxy war, colonial and anti-colonial; and yet, it is often overlooked.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and two upper-division history courses. Enrollment is restricted to junior and senior history, German studies, and Jewish studies majors and minors.

HIS 194W - Social Movements in the Modern Middle East (5)

This writing-intensive seminar explores the social movements sweeping the contemporary Middle East. Students pursue advanced research using primary and secondary sources.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment restricted to junior and senior history majors.

HIS 194Y - Memories of WWII in the U.S. and Japan (5)

Research seminar comparing U.S. and Japanese memories of World War II. Topics include war origins, total war, the atomic bomb, war responsibility, reparations, memorials, museums, and monuments. Primary work devoted to research in original texts and documents.

Prerequisite: Prerequisite(s): two upper-division history courses or permission of instructor; satisfaction of the Entry Level Writing and Composition requirements; HIS 80Y recommended. Enrollment is restricted to junior and senior history majors.

HIS 194Z - Historical Memory and Historical Narration in China (5)

Examines major events in modern Chinese history, from the Manchu conquest (1644) through the Tian'anmen Square demonstrations (1989), exploring why and how collective memories and new narratives about such events have been transmitted and have shaped politics in the present.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors and East Asian Studies minors.

HIS 195A - Thesis Research (5)

Prerequisite(s): petition on file with sponsoring agency (students should have completed two upper-division courses, preferably in their area of concentration).

HIS 195B - Thesis Writing (5)

Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; petition on file with sponsoring agency (students should have completed two upper-division courses, preferably in their area of concentration).

HIS 196C - Modern Italian Culture (5)

Developments in Italian culture and society from the postwar to the present. Topics include north-south divisions, family and gender, cinema and modernity, urbanization, mafia, and terrorism.

Prerequisite: Prerequisite(s): HIS 164A or HIS 164B or HIS 183A or HIS 183B, or permission of instructor and one upper-division history course; and satisfaction of the Entry Level Writing Requirement. Enrollment is restricted to junior and senior history majors.

HIS 196D - City of Rome (5)

Explores the long-term urban history of Rome from its founding through the modern tourist city. Emphasizes the cityscape and geographical centers of political power, culture, and religion, as well as the everyday life of neighborhoods.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history, classical studies, and Italian studies majors.

HIS 196E - Modern Irish History (5)

Aims to illuminate major themes and turning points of modern Irish history: the causes and consequences of the famine; the development of Irish nationalism; revolution, civil war, and partition; and the recent economic boom.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 196F - Topics in European Environmental History (5)

Examines the history of Europe and its empires within the context of human interactions with and attitudes toward a changing natural world. Topics include: European imperialism in ecological perspective; the effects of new developments in science and technology on urban and rural environments; the rise of public health, sanitation, and colonial medicine; environmental justice; and the historical context of contemporary environmental problems. (Formerly European Environmental History.)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 196G - Topics in Modern Germany and Europe (5)

A senior reading and research seminar that explores the selected historiographic debates in German history during the 19th and 20th centuries. (Formerly Modern Germany and Europe.)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history, German studies, and Jewish studies majors.

HIS 196H - Sex and the City--The History of Sexuality in Urban Areas Around the Globe (5)

Focuses on the history of sexuality in major urban areas globally. Topics include: sexual identities and race, class, and gender; sex work, policing, and urban spaces; gay, lesbian, and transgender communities; race, gender, and sexuality within the context of colonialism.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; two upper-division history courses, or by permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 196I - The French Revolution (5)

Students conduct original research on the French Revolution of 1789 based on mix of primary and secondary courses. Classroom discussions focus on interpreting contemporary documents and addressing historiographical issues. Seminar format with significant written requirements. Presumes familiarity with the period.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; HIS 70B and one upper-division history course; or HIS 170A or HIS 171; or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 196K - Studies in European Intellectual History (5)

Topics in European intellectual history from the French Revolution to World War I. Readings exemplifying approaches from history of ideas and intellectual biography to

recent studies of rhetoric and political culture. Preparation and presentation of research paper.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 196L - French Intellectuals and Politics from Voltaire and Rousseau to Sartre and Foucault (5)

Studies the emergence of the secular intellectual as a force in French political and cultural life. Topics considered include Voltaire and the Republic of Letters, Robespierre and the self-fashioning of the revolutionary intellectual, the Dreyfus Affair, the enigma of French fascism, the meaning of May '68, and decolonization and the Algerian War.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of the instructor. Enrollment is restricted to junior and senior history majors.

HIS 196M - Shtetl: Eastern European Jewish Life (5)

For several centuries, the shtetl functioned as the center of Jewish life in Eastern Europe. Alternately mythologized and pathologized, the shtetl continues to exist as an imaginary space that defines and distorts the historical image of Eastern European Jewish life. Students cannot receive credit for this course and course 257.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and two upper-division history courses. Enrollment is restricted to junior and senior history and Jewish studies majors.

HIS 196N - Eastern European Jewish Social History (5)

Study of 19th- and 20th-century Eastern European and Russian Jewish social history.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history, German studies, and Jewish studies majors.

HIS 196O - Russian Revolution, 1917-1932 (5)

Study of the major political, social, and intellectual conflicts and transformations of the period. Topics include February and October revolutions, Civil War, NEP, rise of Stalinism, and collectivization.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 196P - Hitler and Stalin (5)

A discussion of 20th-century totalitarianism.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division

history courses, or permission of instructor. Enrollment is restricted to junior and senior history, German studies, and Jewish studies majors.

HIS 196Q - Europe and the World During the Cold War (5)

Explores European history from the end of World War II through the fall of the Soviet Union. Examines how Europe evolved from a fragmented, polarized array of colonial rivals to a more economically and culturally integrated place.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 196R - Social World of Roman Palestine (5)

Inquiry into the structures of Roman Palestine on the basis of parables from the synoptic Gospels, the Dead Sea Scrolls, Josephus, inscriptions, and archaeological discoveries. Physical, social, economic, and ideological conditions are researched in an ethnographic fashion.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history, classical studies, and Jewish studies majors.

HIS 196S - Special Topics in Ancient History (5)

Seminar focuses on different topics in ancient history. In addition to assigned readings, the student is expected to do additional research that culminates in a 20-page paper on a topic of the student's choice. General topics for the course will vary from year to year.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors and classical studies majors.

HIS 196T - Paris Peace Conference (5)

The Paris Peace Conference remade Europe and the globe after World War I. By establishing the League of Nations and signing the Versailles Treaty, the Paris diplomats shaped the postwar era and created the conditions for World War II.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Two upper-division history courses or permission of instructor required. Enrollment is restricted to junior and senior history majors.

HIS 196U - Topics in Medieval History (5)

Addresses contemporary and modern interpretations of the events relation to medieval history. Through critical discussion and debate, assesses the value and limitations of various historical sources, as well as developing skills in research, presentation-making, and writing.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, HIS 102A or HIS

103, and one upper-division history course, or by permission. Enrollment is restricted to junior and senior history majors.

HIS 196V - The Soviet Experience (5)

Uses memoirs, diaries, novels, films, oral interviews and histories, and scholarly works to explore everyday life in the Soviet Union, and the extent to which the Soviet Union represented a totalitarian society.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 196W - Brave New World? Scientific & Technological Visions of Utopia and Dystopia in Russia/Soviet Union (5)

Focuses on the role of scientific and technological developments in creating the kinds of social, economic, and ecological change that inspired utopian thinking--as well as utopia's counterpart, dystopia--in Russia in the late 19th and 20th centuries.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 196Y - Saints and Holiness in Medieval Europe (5)

Examines popular religious belief and practice, including conversion, the cult of the saints, relics, pilgrimage, miracles and visions. Emphasis on Medieval Europe, but some attention also paid to modern patterns of devotion.

Prerequisite: Prerequisite(s): two upper-division history courses; satisfaction of the Entry Level Writing and Composition requirements, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 196Z - Europe from the Margins: Outside Influences on Modern European Thought and Culture (5)

Europe's engagement with the outside world, which ranged from cultural and intellectual borrowings to relations of domination and colonialism, shaped its modern history and culture. This course examines the cultural and intellectual history of modern Europe by focusing on the ways in which European thinkers and cultural producers drew upon or were influenced by non-European sources.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; two upper-division history courses, or permission of instructor. Enrollment is restricted to junior and senior history majors.

HIS 198 - Independent Field Study (5)

Student's supervision is conducted by a regularly appointed officer of instruction by means other than the usual supervision in person (e.g., by correspondence) or student is doing all or most of the course work off campus.

HIS 199 - Tutorial (5)

Students submit petition to sponsoring agency.

HIS 199F - Tutorial (2)

Students submit petition to sponsoring agency.

Graduate

HIS 200 - Methods and Theories of History (5)

An overview of theories, methods, and philosophies concerning the nature and production of history. Topics vary with instructor.

Prerequisite: Enrollment is restricted to graduate history students and others by permission of instructor.

HIS 201 - Directed Research Colloquium (5)

Having already prepared a bibliography and research prospectus in a graduate research seminar, students will undertake further research on their projects, write a 25–30 page research paper, and present their work to their fellow students.

Prerequisite: Prerequisite(s): history graduate research seminar. Enrollment is restricted to graduate history students.

HIS 202 - Practicing World History (5)

Because world history surfaces in curriculums at all educational levels, this seminar interrogates its value. Why do historians advocate world (and transnational) history? How do historians actually practice it? What are the pitfalls? Can global perspectives apply to localized subjects?

Prerequisite: Enrollment is restricted to graduate students.

HIS 203 - Global Decolonization (5)

Focuses on the histories and theories of decolonization in the mid-to-late 20th century, particularly, interactions among anticolonial movements, how Cold War era antagonisms inflected the process of decolonization, and efforts to forge Afro-Asian unity and/or a nonalignment movement.

Prerequisite: Enrollment is restricted to graduate students.

HIS 204A - History of Gender Research Seminar (5)

Introduction to theories and methods employed in gendered historical research. Readings are drawn from a range of chronological, national, and thematic fields and explore the intersection of gender analysis with such historical problems as the body and sexuality, modernity, national identity, and production/consumption.

Prerequisite: Enrollment is restricted to graduate students.

HIS 204B - Approaches to Social and Cultural History (5)

Graduate reading course focusing on both classic and contemporary approaches to social and cultural history. Readings include: Bakhtin, Benjamin, Foucault, Auerbach,

and Berlin, and a variety of more recent studies in social, cultural, and intellectual history. Course not limited to graduate students in History.

Prerequisite: Enrollment is restricted to graduate students.

HIS 204C - Colonialism, Nationalism and Race Research Seminar (5)

Research seminar introducing theories and methods of the comparative histories of race, ethnicity, colonialism, and nationalism.

Prerequisite: Enrollment is restricted to graduate students.

HIS 204E - Transnationalism, Borderlands, and History (5)

Graduate seminar exploring the history of Canada-United States-Mexico borderlands. Approaches and arguments compare nation-state centered histories with narratives that construct the North American borderlands as places wrought from a multiplicity of overlapping indigenous, imperial, national, transnational, and global forces.

Prerequisite: Prerequisite(s): Enrollment is restricted to graduate students.

HIS 205 - Diaspora and World History (5)

Examines the histories and historiography concerning diaspora. This area of study includes populations from Asia, Africa, Europe, and the Americas. Students study the histories of diasporic populations, and the questions, theory, and methods that scholars use to approach the subject.

Prerequisite: Enrollment is restricted to graduate students.

HIS 206 - Empire in World History (5)

Introduces the study of empire (as opposed to nations, regions, or continents) as an approach to world history and to recent historiographical trends in the history of empires.

Prerequisite: Enrollment is restricted to graduate students.

HIS 210A - Readings in U.S. History (5)

Introduction to major themes and controversies in the interpretation of U.S. history. Readings cover both chronological eras and topical subjects, often in a comparative context: colonial and early national periods.

Prerequisite: Enrollment is restricted to graduate students.

HIS 210B - Readings in U.S. History (5)

Introduction to major themes and controversies in the interpretation of U.S. history. Readings cover both chronological eras and topical subjects, often in a comparative context: 19th century.

Prerequisite: Enrollment is restricted to graduate students.

HIS 211A - Research Seminar in Early American History (5)

First quarter of a two-quarter introduction to research in early American history (1550-1820). Readings include both historiographically definitive texts as well as recent

scholarship reflecting the field's developments. Students complete analyses of historical sources, brief critical essays, and a significant research project. Course A is not a prerequisite to course B.

Prerequisite: Enrollment is restricted to graduate students.

HIS 211B - Research Seminar in Early American History (5)

Second quarter of a two-quarter introduction to research in early American history (1550-1820). Readings include both historiographically definitive texts as well as recent scholarship reflecting the field's developments. Students complete analyses of historical sources, brief critical essays, and a significant research project. Course A is not a prerequisite to course B.

Prerequisite: Enrollment is restricted to graduate students.

HIS 212A - Citizenship in U.S. History (5)

A reading-intensive graduate seminar in United States history that examines citizenship and its exclusions, grounded in race, gender, sexuality, age, and disability. This seminar also explores how forms of belonging intersected with evolving understandings of nationalism and sovereignty.

Prerequisite: Enrollment is restricted to graduate students.

HIS 212B - Citizenship in United States History (5)

A reading-intensive graduate seminar in United States history examining citizenship and its exclusions, grounded in race, gender, sexuality, age, and disability. The course also explores how forms of belonging intersected with evolving understandings of nationalism and sovereignty.

Prerequisite: Enrollment is restricted to history graduate students.

HIS 214 - California History (5)

Concerns the history and historiography of California from indigenous dominion to the present. Considers the distinctive ways in which California has led the nation and globe in economic, political, and social change, while remaining a multiethnic borderland.

Prerequisite: Enrollment is restricted to graduate students.

HIS 215A - Topics in American History: U.S. Labor and Working Class History (5)

Addresses topics in history of working people, the labor movement broadly defined, and political-economic change in the U.S. Topics include race, ethnic and gender dynamics, and U.S. labor and working-class history in global context.

Prerequisite: Enrollment is restricted to graduate students.

HIS 215B - Visions of Progress (5)

Explores the emergence of the welfare/regulatory state in the United States from the 1870s to World War I, examining different schools of historical thought about this period.

Prerequisite: Enrollment is restricted to graduate students.

HIS 215C - U.S. Immigration and Ethnic History (5)

Introduces key issues and debates in United States immigration and ethnic history. Topics include causes of immigration; constructions of race, gender and ethnicity; assimilation; transnationalism; and forces shaping immigration policy.

Prerequisite: Enrollment is restricted to graduate students.

HIS 216 - Readings in the History of American Religions (5)

Research in the history of religions in the United States. Addresses topics, such as the rise of evangelicalism; class, race, and religious diversity; gender and power; modernity; and civil religion through analyses of visual and literary texts, iconography, ritual, theology, and praxis.

Prerequisite: Enrollment is restricted to graduate students.

HIS 217 - Critical Conversations in Native American History (5)

Overview of key historical texts focusing on the Native American experience, with particular focus on scholarship that seeks to decolonize Western methodologies and research practices. Readings explore such topics as decolonization, indigenous identity, sovereignty, repatriation efforts, gender and sexuality, and historical memory. The format consists of discussions of readings. Students give oral presentations on the readings, and write book reviews and a final historiographical paper.

Prerequisite: Enrollment is restricted to graduate students.

HIS 220 - The Atlantic World, 1500-1800 (5)

Explores the economic, social, and cultural history of early America in terms of its Atlantic connections and intersection with the cultures of early modern Europe, Africa, and Latin America. Builds upon previous work in early America and early modern Europe, challenging students both to work comparatively and to break out of traditional geographic models.

Prerequisite: Enrollment is restricted to graduate students.

HIS 221 - Empires and New Nations in the Americas (5)

Compares the history of the colonial and 19th-century Americans through a world-history perspective. Focuses on the interrelated themes of indigenous histories, slavery and other forms of servitude, commodity production, and the meaning of equality and freedom in new nations.

Prerequisite: Enrollment is restricted to graduate students.

HIS 222 - Global Sexualities--A Seminar in the Queering of Historiographies (5)

Explores the history of sexuality covering diverse time periods, peoples, and regions. Examines methods and theories used in the study of sexuality. Readings draw from the Americas, Middle East, Africa, Europe, and Austro-Asia, as well as topics in queer and LGBTQ2 studies.

Prerequisite: Enrollment is restricted to graduate students.

HIS 225 - Spanish Colonialism (5)

Reading-intensive graduate seminar with emphasis on theoretical and historiographical questions regarding the field of Spanish colonialism in the Americas. Students encouraged to engage in discussions of comparative colonialisms.

Prerequisite: Enrollment is restricted to graduate students.

HIS 227 - Gender and Colonialism (5)

Explores the relationship between colonialism and gender. Examines the construction of gender categories (in conjunction with race) in the context of colonial conquest and rule; contested definitions of motherhood, domesticity, and citizenship; and regulation of sexuality.

Prerequisite: Enrollment is restricted to graduate students.

HIS 229 - Worlds of Labor in Asia (5)

Introduces students to important debates in labor studies in Asia. Studies the relationship between labor, capitalism, and imperialism. Also interrogates the relevance or irrelevance of Asia as a concept from the standpoint of labor. Students cannot receive credit for this course and course 194T.

Prerequisite: Enrollment is restricted to graduate students.

HIS 230A - Readings in Late Imperial China (5)

Survey of the major works on and historiographical controversies about Qing Dynasty (1644–1911) China.

Prerequisite: Enrollment is restricted to graduate students.

HIS 230B - Engendering China (5)

Reading seminar on the history of Chinese gender, focusing on the Qing dynasty (1644 to 1911) to the present. Topics include marriage and family, sexuality, work, the gendered language of politics, and major reform movements.

Prerequisite: Enrollment is restricted to graduate students.

HIS 230C - Readings in 20th-Century China (5)

A survey of major Western-language works and historiographical controversies in Chinese history from 1900 to the present. Weekly readings emphasize particular social and political movements as well as long-term changes in urban and rural society.

Prerequisite: Enrollment is restricted to graduate students.

HIS 231 - Historicizing the People's Republic of China (5)

An overview of the scholarly literature on the People's Republic of China. Readings include works by historians as well as by social scientists. Students consider what kinds of questions historians have and can ask.

Prerequisite: Enrollment is restricted to graduate students.

HIS 238A - Research Methods: China (5)

An introduction for graduate students to the use of major research tools and sources in Chinese history since 1600, with a focus on 20th-century materials. Students complete a series of bibliographical exercises and prepare a research prospectus.

Prerequisite: Enrollment is restricted to graduate students.

HIS 238B - Research Methods: China (5)

Building on the research and bibliographic skills developed in course 228A, students develop a research topic and write a paper of 20-30 pages using primary sources as appropriate in English, Chinese, and/or Japanese.

Prerequisite: Enrollment is restricted to graduate students.

HIS 242 - Readings in Modern Japan (5)

A graduate course intended to give students a fundamental understanding of the major themes in the study of modern Japanese history. Central themes include modernity and modernization, colonialism, postwar recovery, gender, race, and nationalism.

Prerequisite: Enrollment is restricted to graduate students.

HIS 243 - Transnational Japan (5)

Examines how Japanese history has been forged across, outside, and beyond the boundaries of the modern nation-state of Japan. Considers how Japan has transformed the world. Students debate how the world made Japan and how Japan remade the world.

Prerequisite: Enrollment is restricted to graduate students.

HIS 244 - Gender and Japanese History (5)

Examines—through primary and secondary sources—constructions of gender (masculine, feminine, and transgender) in Japanese society over the past several centuries, focusing on the modern era.

Prerequisite: Enrollment is restricted to graduate students.

HIS 251A - Readings in Modern European History: Environment and Technology (5)

Introduces major themes and problems in recent historiographical trends in environmental history and the history of technology. Examines the role of environment and technology in the making of Europe and European societies' engagement with the world.

Prerequisite: Enrollment is restricted to graduate students.

HIS 251B - Readings in Modern European History: Empire (5)

The history of empire has emerged as one of the most influential and fastest growing areas of inquiry within the field of modern European history. This course introduces students to recent debates and trends in imperial, colonial, and postcolonial history.

Prerequisite: Enrollment is restricted to graduate students.

HIS 252 - Republicanism and Its Discontents: Universal Projects and Particular Discriminations (5)

Focuses on the histories and theories of republicanism and liberalism by investigating the tension between universal ideologies and discriminatory practices. Focuses on France and the United States, but Algeria, Syria, and Turkey will also be covered.

Prerequisite: Enrollment is restricted to graduate students.

HIS 255 - Religion and Modernity (5)

Examines the significance of religion and secularism in the modern period. How did modernity and the concept of the secular transform various religions and how, in turn, did these religions help to create modernity.

Prerequisite: Enrollment is restricted to graduate students.

HIS 257 - Shtetl: Eastern European Jewish Life (5)

For several centuries, the shtetl functioned as the center of Jewish life in Eastern Europe. Alternately mythologized and pathologized, the shtetl continues to exist as an imaginary space that defines and distorts the historical image of Eastern European Jewish life. Students cannot receive credit for this course and course 196M.

Prerequisite: Enrollment is restricted to graduate students.

HIS 260 - History and the Spatial Turn: Making Space, Place, and Geography in History (5)

Explores the making of space, place, and geography in a body of recent historical work. Explores key theoretical work interrogating the significance of space as a critical element of social theory and historical consideration. Proceeds through three thematic units: questions of colonial economy in South Asia; spaces of empires and its end in the Eastern Mediterranean; and histories of infrastructure.

Prerequisite: Enrollment is restricted to graduate students.

HIS 261 - The Contours of the New Middle East History (5)

Explores the history and historiography of the modern Middle East through recent historical scholarship. Examines the new theoretical approaches that frame inquiries into the region's history and how contemporary historians are reinterpreting familiar questions and themes.

Prerequisite: Enrollment is restricted to graduate students.

HIS 265 - History of the Body (5)

A multidisciplinary history of the body from late antiquity to the present. Topics include: medical and religious constructions; the raced, gendered, and sexualized body; adornment and performance markers; power and control through the body; body parts; and the body's permeability.

Prerequisite: Enrollment is restricted to graduate students.

HIS 280A - History Graduate Proseminar: Teaching Pedagogy

(2)

Devoted to professionalism and socialization of history graduate students. Includes formal and informal meetings with faculty and other graduate students. Topics include TAs, designing course syllabi, pedagogy, teaching technologies, and teaching in different venues.

Prerequisite: This course is required for first-year students; however, it is open to all other graduate students as needed. Enrollment is restricted to graduate students .

HIS 280B - History Graduate Proseminar: Research Presentations and Grant Writing (2)

Devoted to professionalism and socialization of history graduate students. Topics include discussion of researching grants; effective CV writing; successful grant applications and publication proposals; and conference paper and panel proposals. Required for first-year graduate students; however, open to all history graduate students as needed.

Prerequisite: This course is required for first-year students; however, it is open to all other graduate students as needed. Enrollment is restricted to graduate students .

HIS 280C - History Graduate Proseminar: Job Market (2)

Devoted to professionalism and socialization of history graduate students. Includes formal and informal meetings with faculty and other graduate students. Topics include researching position; preparing a CV and the job-application letter; preparing for an interview; practice interview; preparing a job talk and/or teaching presentation; and practice job talk.

Prerequisite: This course is required for first-year students; however, it is open to all other graduate students as needed. Enrollment is restricted to graduate students .

HIS 283 - Foreign Language Preparation (2)

Independent study course in which history graduate student reads selected texts to fulfill foreign language requirement. Student meets with instructor to discuss readings, deepening his knowledge of the foreign language. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

HIS 284 - Qualifying Examination Preparation (2)

Independent study course designed to help students prepare for qualifying exams. Students meet on regular basis with one or more members of qualifying examination committee to monitor preparation for exam. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

HIS 285 - Readings in Research Field (2)

Independent study focusing on selected texts or authors in history or historical theory. Students meet on regular basis with instructor to discuss readings and deepen their knowledge of a particular author or historical theory. Students submit petition to sponsoring agency.

Prerequisite: Enrollment restricted to graduate students.

HIS 285B - Readings in Research Field (5)

Independent study focusing on selected texts or authors in history or historical theory. Students meet on regular basis with instructor to discuss readings. Students submit petition to sponsoring agency.

HIS 286 - Research Colloquium on Colonialism, Nationalism, and Race (2)

Acquaints students with the department's thematic research clusters in their field to coordinate training in historical research. Students meet on a regular basis with a faculty member of a particular cluster to discuss most important readings in the field. Enrollment restricted to graduate students.

Prerequisite: Enrollment is restricted to graduate students.

HIS 287 - Research Colloquium on Gender (2)

Acquaints students with the department's thematic research clusters in their field to coordinate training in historical research. Students meet on a regular basis with a faculty member of this cluster to discuss most important readings in their field. Enrollment restricted to graduate students.

Prerequisite: Enrollment is restricted to graduate students.

HIS 288 - Teaching Assistant Preparation (2)

Independent study designed to help history graduate students prepare to teach in an area of history outside their specialization. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

HIS 289 - History Colloquium (2)

Independent study designed to foster departmental and cross-disciplinary participation in campus talks, colloquia, conferences, and events. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

HIS 294M - Literati, Samurai, and Yangban: A Comparative History of State (5)

Critically examines the formation of political elites in East Asia. Compares literati in Ming and Qing China; samurai in Tokugawa, Japan; and yangban in Joseon, Korea. Each group occupied specific roles and functions in their state and society but differed in scale and character. Students cannot receive credit for this course and course 194M.

Prerequisite: Enrollment is restricted to graduate students.

HIS 297A - Independent Study (5)

Students submit petition to sponsoring agency.

HIS 297B - Independent Study (10)

Students submit petition to sponsoring agency.

HIS 297C - Independent Study (15)

Students submit petition to sponsoring agency.

HIS 299A - Thesis Research (5)

Students submit petition to sponsoring agency.

HIS 299B - Thesis Research (10)

Students submit petition to sponsoring agency.

HIS 299C - Thesis Research (15)

Students submit petition to sponsoring agency.

ITAL - ITALIAN

Lower-Division

ITAL 1 - First-Year Italian (5)

During the first quarter of this first-year sequence, students learn to introduce themselves, to talk about their daily activities and hobbies, to describe themselves and their friends/families, and to recount past events. The first-year sequence (1-2-3) begins in fall quarter.

ITAL 1A - Accelerated Italian (5)

The first quarter of accelerated instruction in elementary Italian language. The accelerated pace allows a rapid mastery of grammar and vocabulary, giving students a basic knowledge of Italian in only two quarters. Completion of the sequence is equivalent to the completion of the 1-2-3 sequence. This sequence starts once a year in the winter quarter.

ITAL 1B - Accelerated Italian (5)

The second quarter of accelerated instruction in elementary Italian language. The accelerated pace allows a rapid mastery of grammar and vocabulary, giving students a basic knowledge of Italian in only two quarters. Completion of the sequence is equivalent to the completion of the 1-2-3 sequence. (Formerly Intensive Elementary Italian.)

Prerequisite: Prerequisite(s): ITAL 1A or ITAL 2 or placement by examination. For students completing ITAL 2, ITAL 3 is preferable.

ITAL 2 - First-Year Italian (5)

During the second quarter of this first-year sequence, students learn to tell a story in the past, to make plans about their future, and to express commands and requests. The sequence starts once a year in the fall quarter. (Formerly Instruction in the Italian Language.)

Prerequisite: Prerequisite(s): ITAL 1 or placement by examination.

ITAL 3 - First-Year Italian (5)

During the third quarter of this first-year sequence, students learn to talk about historical events, to formulate hypothetical scenarios, to express wishes, desires, doubts, and opinions,

and to discuss more abstract topics (e.g., immigration, work, politics). (Formerly Instruction in the Italian Language.)

Prerequisite: Prerequisite(s): ITAL 2 or placement by examination.

ITAL 4 - Second-Year Italian (5)

Short stories, articles, films, and newsclips are used as the basis for studying intermediate-level conversation and composition. Laboratory assignments involve use of the World Wide Web, conversations with native speakers, films and video clips. Students interested in this course who have not taken the prerequisite at UCSC should meet with the instructor, preferably prior to the first class meeting, and take the placement examination.

Prerequisite: Prerequisite(s): ITAL 1B or ITAL 3 or placement by examination.

ITAL 5 - Second-Year Italian (5)

Reading of Italian short stories and a play are used as basis for further study and refinement of oral and written skills at the intermediate level. Particular emphasis is placed on oral/written discussion of abstract ideas and topics, and on the study of different language registers/contexts. Laboratory work is regularly assigned. Students interested in this course who have not taken the prerequisite at UCSC should meet with the instructor, preferably prior to the first class meeting and take the placement examination.

Prerequisite: Prerequisite(s): ITAL 4 or placement by examination.

ITAL 6 - Second-Year Italian (5)

Reading of first novel in the language and weekly viewing of Italian films serve as basis for oral reports and discussions on various aspects of Italian culture and civilization. Weekly assignments, three essays, and a paper on topics derived from or related to the text. Students interested in this course who have not taken the prerequisite at UCSC should meet with the instructor, preferably prior to the first class meeting, and take the placement examination.

Prerequisite: Prerequisite(s): ITAL 5 or placement by examination.

ITAL 80 - Italian Culture Through Cinema (5)

Film is used as a medium through which images of Italians and their culture are disseminated, perpetuated, and crystallized. Whether these representations offer historical perspectives or stereotypes, they are important documents for the study of Italian culture, society, history, and politics. Students cannot receive credit for this course and Italian 106. (Formerly Languages 80D.)

ITAL 94 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

ITAL 99 - Tutorial (5)

Students submit petition to sponsoring agency.

ITAL 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

ITAL 100 - Advanced Italian Composition and Conversation (5)

Provides intensive practice in oral and written Italian. Focuses on vocabulary building and increased oral and written expression. Active student participation is essential and constitutes a significant portion of the course including class discussions, oral presentations, written reports, responses and essays, using different genres of writing, including, but not limited to diaries, epistles (formal and informal), blogs, text messaging, dialogues, short stories, memoirs, interviews, podcasts, and media language.

Prerequisite: Prerequisite(s): ITAL 6 or by permission of the instructor.

ITAL 106 - Italian Culture Through Film (5)

Film is used as a medium through which images of Italians and their culture are disseminated, perpetuated, and crystallized. Students focus on pivotal issues in Italian culture, society, history, and politics, and develop an informed opinion on relevant issues in Italian studies. The course is taught in English with a mandatory enhancement section in Italian. The enhancement section meets once a week and is designed to give students who are already familiar with the language the opportunity to discuss the films in Italian and to read/view additional material in the language. Students cannot receive credit for this course and Italian 80 (formerly Languages 80D).

Prerequisite: Prerequisite(s): ITAL 6.

ITAL 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

ITAL 199 - Tutorial (5)

Students submit petition to sponsoring agency.

ITAL 199F - Tutorial (2)

Students submit petition to sponsoring agency.

JAPN - JAPANESE

Lower-Division

JAPN 1 - First-Year Japanese (5)

Students carry out beginning-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write Japanese scripts (hiragana, katakana, and about 40 kanji). (Formerly Instruction in the Japanese Language.)

JAPN 2 - First-Year Japanese (5)

Students carry out beginning-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write 70 additional kanji. (Formerly Instruction in the Japanese Language.)

Prerequisite: Prerequisite(s): JAPN 1 or by consent of instructor.

JAPN 3 - First-Year Japanese (5)

Students carry out beginning-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write 70 additional kanji. (Formerly Instruction in the Japanese Language.)

Prerequisite: Prerequisite(s): JAPN 2 or by consent of instructor.

JAPN 4 - Second-Year Japanese (5)

Students carry out intermediate-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write 70 additional kanji.

Prerequisite: Prerequisite(s): JAPN 3 or by consent of instructor.

JAPN 5 - Second-Year Japanese (5)

Students develop intermediate-level competence in listening, speaking, reading, and writing in diverse social contexts; acquire a deeper and broader understanding of Japanese society and culture; and learn how to read and write 70 additional kanji characters.

Prerequisite: Prerequisite(s): JAPN 4 or by consent of instructor.

JAPN 6 - Second-Year Japanese (5)

Students carry out intermediate-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write 100 additional kanji. Emphasis is placed on developing the student's cultural knowledge relevant to intercultural communication.

Prerequisite: Prerequisite(s): JAPN 5 or by consent of instructor.

JAPN 94 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

JAPN 99 - Tutorial (5)

Students submit petition to sponsoring agency.

JAPN 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

JAPN 103 - Advanced Japanese (5)

Students carry out advanced-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write 100 additional kanji. Emphasis placed on developing the student's cultural knowledge about Japan as well as knowledge relevant to inter-cultural communication.

Prerequisite: Prerequisite(s): JAPN 6 or by consent of instructor.

JAPN 104 - Advanced Japanese (5)

Students carry out advanced-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write 100 additional kanji. Emphasis placed on developing the student's cultural knowledge about Japan as well as knowledge relevant to inter-cultural communication.

Prerequisite: Prerequisite(s): JAPN 103 or by consent of instructor.

JAPN 105 - Advanced Japanese (5)

Students carry out advanced-level tasks that involve listening, speaking, reading, and/or writing, and learn how to read and write 100 additional kanji. Further development of cultural knowledge and understanding through critical examination of authentic Japanese materials in a variety of genres, including literary work, expository writing, and films. May be repeated for credit with consent of instructor.

Prerequisite: Prerequisite(s): JAPN 104 or by consent of instructor.

JAPN 109 - Japanese Language, Culture, and Society (5)

Critical reading of Japanese texts, such as essays, film scripts, and novels in regard to linguistic diversity related to cultural and social diversity. Topics include standard Japanese and regional variation, politeness and honorifics, age-related stylistic variation, and gendered language.

Prerequisite: Prerequisite(s): JAPN 104 or by consent of instructor.

JAPN 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

JAPN 199 - Tutorial (5)

Students submit petition to sponsoring agency.

JAPN 199F - Tutorial (2)

Students submit petition to sponsoring agency.

JWST - JEWISH STUDIES

Lower-Division

JWST 99 - Tutorial (5)

Students submit petition to sponsoring agency.

Upper-Division

JWST 185N - The Holocaust in a Digital World (5)

Explores how digital tools change the way we know about the Holocaust by (1) critically understanding and analyzing digital representations of the Holocaust and (2) using and developing digital skills to engage with stories about the Holocaust.

Prerequisite: Enrollment is restricted to Jewish studies and history majors and minors during first-pass enrollment; open to all students at the start of second-pass enrollment.

JWST 195A - Thesis Research (5)

Devoted to independent research under the guidance of a primary thesis adviser. Students are expected to meet with their thesis adviser every two weeks to report on research progress and receive advice and criticism. Enrollment restricted to junior and senior Jewish studies majors. Students submit petition to sponsoring agency.

JWST 195B - Thesis Writing (5)

Devoted to independent writing under the guidance of the primary and secondary thesis faculty advisers. Completed theses must be a minimum of 40 pages in length. Student are required to meet regularly with their faculty advisers and to submit at least two drafts for detailed criticism. Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirement. Enrollment restricted to junior and senior Jewish studies majors.

JWST 199 - Tutorial (5)

Students submit petition to sponsoring agency.

JWST 199F - Tutorial (2)

Students submit petition to sponsoring agency.

KRSG - KRESGE COLLEGE

Lower-Division

KRSG 1 - Academic Literacy and Ethos: Power and Representation (5)

Teaches foundational concepts for intellectual exploration and personal development within an academic community: analysis, critical thinking, metacognition, engagement with others across difference, and self-efficacy. Texts in varied media reflect individuals' and communities' struggles to represent, constitute, and empower themselves in the United States.

Prerequisite: Enrollment is restricted to first-year college members.

KRSG 2 - Power and Representation in Media (5)

Students explore the radical restructuring of media representation and its consequences over the last three decades. Examines a range of social issues--representation of women and minorities, police brutality, fake news and social media--through lenses of specific media spaces, in order to discover the impact of new media, new media environments, and a dynamic media culture on power and representation in American life.

Prerequisite: Prerequisite(s): KRSG 1. Enrollment is restricted to Kresge College members.

KRSG 3 - Campus Natural History Practicum (2)

Develop practical skills and knowledge in naturalist observation. Acquire an overview of the field of natural history, particularly applied to the UCSC campus. Document an evolving and multidimensional personal experience of natural spaces, including, but not limited to, wilderness. (Formerly KRSG 18.)

KRSG 12A - Service Learning (3)

Students find a volunteer position with the instructor's assistance and perform community service in non-profit organizations, schools, unions, or local government agencies. Students meet weekly, keep a journal, and write a social action witnessing report of their experience.

Prerequisite: Enrollment is restricted to college members.

KRSG 12B - Service Learning (2)

Students find a volunteer position with the instructor's assistance and perform community service in non-profit organizations, schools, unions, or local government agencies.

Students meet weekly, keep a journal, and write a social action witnessing report of their experience.

Prerequisite: Enrollment is restricted to college members.

KRSG 12C - Service Learning: Introduction to National Service/Introduction to Grant Writing (3)

A fast-paced and academically rigorous exercise in four main sections. First and foremost, participants must locate and support a community-service site for three hours each week. Each student's service commitment requires the student to attend class regularly and share community-service experience with classmates. Students are introduced to the basic requirements of a variety of national service agencies including AmeriCorp, the Peace Corp, City Year, Teach for America, and City Service. Students are required to do community-service work with a member of one of these agencies locally for four hours during the quarter. The last major section of this course teaches students the basics of grant writing and research.

Prerequisite: Enrollment is restricted to college members.

KRSG 15A - The Writer as Witness (3)

Students are involved in a community service project to produce a portfolio of social-action writing that situates the writer as witness in the community.

Prerequisite: Enrollment is restricted to college members.

KRSG 15B - The Writer as Witness (2)

Students are involved in a community-service project to produce a portfolio of social-action writing that situates the writer as witness in the community.

Prerequisite: Enrollment is restricted to college members.

KRSG 16 - The Rise of Capitalism and Its Consequences (5)

Explores the rise and consequences of capitalism. How has capitalism affected how humans understand and act in the world? How do oppressions along lines of race, gender, sexuality, and nation intersect with capitalism? Is resistance desirable and/or possible?

Prerequisite: Enrollment is restricted to Kresge, Cowell, or Crown honors students.

KRSG 24 - Imagining Utopias (3)

Explores possible futures by studying several utopian visions, projects, and manifestos. Students imagine a future by writing a manifesto and other creative non-fiction pieces that embrace a utopian imagination.

Prerequisite: Enrollment is restricted to college members.

KRSG 25 - Successful Transfer to the Research University (2)

Provides community college transfers, during their first year at UC Santa Cruz, with an understanding of the workings of a research university with emphasis on advanced academic expectations, creating purposeful education and career goals, and navigating opportunities and challenges. Guides

refinement of goals, development of an action plan to meet desired academic, career and civic-oriented outcomes, and encourages developing essential and enriching relationships to enrich UC Santa Cruz experience.

Prerequisite: Enrollment is restricted to first-quarter transfer students.

KRSG 26 - Navigating the Research University (2)

Explores critical engagement in education in the context of a research university. Introduces first-year issues and success strategies and ways to participate in the institution's academic life. Investigates strategies for clarifying education goals and devising a plan for success. Students cannot receive credit for this course and Porter 26 or Stevenson 26.

Prerequisite: Enrollment is restricted to first-year Kresge and Porter College members.

KRSG 45 - Achieving Consensus in Diverse Communities (5)

Defines consensus in terms of inclusive decision-making and explores depth-psychology approaches to facilitating social agreement in culturally diverse settings. Readings include Totem and Taboo, Diversity Calling, and selected articles related to issues of cultural literacy. Recommended for, but not limited to, social science majors.

Prerequisite: Enrollment is restricted to Kresge College and Oakes College affiliates or by permission of the instructor.

KRSG 60C - Prison Narratives (3)

Seeks to ask hard questions about the role of the prison, its increasing use in our nation, and the use of torture by the U.S. government in Guantanamo, Abu Ghraib, and other prisons. Readings may include J. James's *Imprisoned Intellectuals*, Alexander Berkman's *Prison Memoirs of an Anarchist*, and other writings by American prisoners. Eve Ensler's *What I Want My Words to Do to You* is shown. Course is primarily reading and discussion; students are asked to keep a reading journal and to write a critical/creative essay at the end of the quarter. (Formerly *Language of the Prison House*.)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to college members.

KRSG 60F - Writer's Read (2)

Students attend weekly creative writing readings by fiction writers and poets, read excerpts from the writers' works, participate in question and answer sessions, and write short, creative and/or analytical responses to the readings and writings.

Prerequisite: Enrollment is restricted to Kresge and Porter college members.

KRSG 62 - Transformative Action (5)

Introduces key skills for effective transformation agents including: creativity and innovation; transformative communication; servant leadership; optimism and resilience, risk taking, initiative; luck; failure; and relationship building.

Students create their own portfolio and commit to weekly civic engagement projects.

KRSG 62A - Transformative Action (2)

Addresses the most effective methods of social change. Examines principles and strategies of transformative action and case studies of leaders solving world problems. Empowers students to be innovators in real-life community projects. Integrates nonviolence, psychology, sustainability, and social justice.

KRSG 62B - Transformative Action Seminar (2)

For students who enrolled in the winter quarter Transformative Action course, to further investigate, research, and refine their Big Idea. Opportunity given to deepen and integrate Transformative Action principles into projects. Enrollment by instructor permission only.

KRSG 63 - Kresge Garden Cooperative (2)

Hands-on practice with basic ecological horticulture skills through work at the Kresge Garden, including soil cultivation. Enrollment by instructor approval through application (available in the Kresge College office). Enrollment limited to college members.

KRSG 64 - Tools for World Changers (2)

Develops life skills that support you and help you support others. Implement effective methods for personal productivity (managing your to-dos, calendar, and inbox), interpersonal communication, meeting facilitation, event hosting, collaboration, and regenerative community design.

KRSG 65A - Power and Representation: Food and Community (2)

Explores core themes of power and representation through the mediums of food, nature awareness, community, personal empowerment and sustainable living. Students will develop meaningful final projects in collaboration with Kresge Food Co-op, Kresge Garden Co-op, Kresge World Cafe, and projects of their own design. (Formerly Power and Representations: Food Systems.)

Prerequisite: Concurrent enrollment in KRSG 80A, KRSG 80B, or KRSG 80C is required.

KRSG 65F - Kresge Lab: Photography (2)

A course of practical guidance in developing skills and creative approaches in photography; also a group setting for critique and feedback. Students do in-class and out-of-class assignments in photography and development, discuss examples of photographic art in various communities and subgenera, and apply principles to their own work in a final portfolio. (Formerly course 65B, Power and Representation: Photography).

KRSG 65M - Kresge Lab: Text, Music, and Performance (2)

Students pursue collaborative or individual projects in the relationship between text, music, and performance, in pairs or groups. Areas explored include practical introductions to

prosody and poetics, musical forms, text-setting, and theories of performance and reception. (Formerly course 65D: Power and Representation: Poetry and Musical Performance).

KRSG 65W - Kresge Lab: Creative Writing (2)

A course of guidance and exercises to assist in developing independent writing projects, and a group setting for critique and feedback. Students do in-class and out-of-class writing assignments; read and discuss texts; and work to develop a final project. (Formerly course 65C, Power and Representation: Creative Writing).

KRSG 67 - Transformative Justice Seminar (3)

Examines the principles and processes of restorative justice juxtaposed to current practices in the judicial and educational systems of contemporary society. Students study leading restorative justice practices and their implication for individual and community transformation. Students learn to facilitate the restorative justice process restorative circles, and have the opportunity to practice them in real time. Enrollment is by instructor consent and is restricted to frosh, sophomores, and juniors.

KRSG 68 - Transformative Communication (2)

Based on Nonviolent Communication (NVC), this experiential course offers skills in intra- and inter-personal conflict transformation by aligning with core values; understanding what motivates self and others; cultivating compassion, even under difficult circumstances; and bringing greater peace into our world.

KRSG 69 - Practical Application of Restorative Practices (2)

This second seminar supports students in deepening and fine-tuning their Restorative Circle facilitation along with exploring the question What are the components of a restorative life? Students participate in the Kresge College Restorative Justice Initiative, and, during the fall quarter, offer Restorative Circles to student groups in conflict.

Prerequisite: Prerequisite(s): KRSG 67. Enrollment is restricted to sophomores, juniors, and seniors.

KRSG 71 - The World Cafe: The Art of Hosting Conversations That Matter (2)

Examines the principles, practices, and art of hosting conversations derived from the work of Juanita Brown, David Isaacs, and the World Cafe community. Students gain experience with group facilitation, meeting design, strategic questioning, harvesting collective intelligence, graphic recording, intergenerational collaboration, and participatory action-research.

KRSG 72 - Collaborative Learning: Transitioning to Sustainability and Justice (2)

Collaborative learning in service of transitioning from an industrial growth society to a participatory, democratic, and sustainable society. Students engage with ongoing sustainability and justice projects and develop leadership skills in personal productivity, project management,

communications, and facilitation. (Formerly Collaborative Learning: The Great Turning.)

KRSG 73 - Collaborative Learning: Sustainable Communities (2)

Collaborative learning in service of building thriving, just, and sustainable communities locally and globally. Students engage with ongoing sustainability and justice projects and develop skills in leadership, personal productivity, project management, communications, and facilitation.

KRSG 74 - Collaborative Learning: Permaculture Skills (2)

Collaborative learning in service of fostering community resilience in response to environmental and social crisis. Students engage with ongoing sustainability and justice projects and develop advanced skills in leadership, personal productivity, project management, communications, and facilitation.

KRSG 75 - Sustainable Food Systems (5)

Introduces students to fundamental food-system issues and opportunities. Topics include: hunger, environmental sustainability, race and gender, food and agricultural policy, local food systems, gardening and farming models, social movements, and approaches for analysis and change.

KRSG 76 - Social Documentary Photography (5)

History of social documentary photography with its practice. Includes analysis of historical and contemporary images from social documentary work; camera, darkroom, and digital skill development; an individual student documentary project; and collective project discussion.

Prerequisite: Enrollment is restricted to Kresge College members.

KRSG 77 - Food Memoir (2)

Workshop in writing memoir that connects to issues of multiculturalism, gender, and environment. Designed to hone skills in creative writing through stories that students will unify into a larger memoir.

Prerequisite: Enrollment is restricted to Kresge and College Eight members or by permission of instructor.

KRSG 78 - Social and Environmental Justice Activism and the Right Livelihood Award Foundation (2)

Introduces contemporary activism on environmentalism and human rights, emphasizing the work of Laureates of the Right Livelihood Award (known internationally as the Alternative Nobel Prize) and the Right Livelihood College, whose North American campus is Kresge College.

KRSG 90C - Collaborative Approaches to Research (5)

Critical engagement of current research methodology in the humanities and arts. Coursework consists primarily of a collaborative research project that requires each student to synthesize information and sources in topics both familiar and unfamiliar. The specific methodologies presented vary by

instructor across two to three disciplines, possibly including literature, history, the arts, and cultural studies. Enrollment is restricted to first-year Challenge Program participants from Stevenson College, Merrill College, Porter College, and Kresge College.

KRSG 99 - Tutorial (5)

A program of directed study arranged between a first-year or sophomore student and a Kresge faculty member. Students submit petition to sponsoring agency.

KRSG 99F - Independent Study (2)

A program of directed study arranged between a student and a Kresge faculty member. Class time is less proportional to credit given. Students submit petition to sponsoring agency.

KRSG 99G - Independent Study (3)

A program of directed study arranged between a student and a Kresge faculty member. Students submit petition to sponsoring agency.

Upper-Division

KRSG 100 - University Learning with Intention and Purpose (2)

Students learn practical ways of maximizing the resources of a public education and research institution. Students collaborate across disciplines, broaden impacts of higher learning, and develop strategies for effective interaction with faculty and the broader professional communities to which they aspire.

Prerequisite: Enrollment is restricted to sophomore, junior, and seniors.

KRSG 161 - Permaculture and Whole Systems Design (5)

Focuses on concepts, principles, and practices of permaculture and whole systems design. Permaculture education is transdisciplinary and provides practical experience with design, ecological horticulture, regional planning, natural building, architecture, appropriate technology, aquaponics, animal husbandry, ecopsychology, and community resilience. Enrollment by application.

KRSG 171 - Kresge Challenge Seminar (5)

For first-year students, by invitation only. This class is part of the Challenge Program which provides high-achieving students with the opportunity to participate in a rigorous program emphasizing individual attention and dynamic interaction with UCSC faculty and academically motivated peers in classes, social settings, and collaborative research projects. Enrollment restricted to Kresge, Merrill, and Stevenson students enrolled in the College Challenge Programs.

KRSG 172 - Collaborative Learning: The Great Turning (5)

Collaborative learning in service of transitioning from industrial growth society to a life-sustaining society. Students deepen their connection with nature, themselves, and community through guest lectures, intergenerational dialogue to discover collective and wise action, and engagement with long-term projects.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

KRSG 173 - Collaborative Learning: Sustainable Communities (5)

Collaborative learning in service of building thriving, just, and sustainable communities locally and globally. Learn about Ecovillages and reclaiming the commons while also discovering collective and wise action through guest lectures, intergenerational dialogue, and engagement with long-term projects.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

KRSG 174 - Collaborative Learning: Permaculture Skills (5)

Collaborative learning in service of fostering community resilience in response to peak oil. Practice hands-on skills with permaculture and transition towns while also discovering collective and wise action through guest lectures, intergenerational dialogue, and engagement with long-term projects.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

KRSG 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar under Kresge faculty supervision. (See course 42.) Prerequisite(s): upper-division standing in Kresge, a proposal supported by a Kresge faculty member willing to supervise, and college approval.

KRSG 193 - Field Study (5)

Supervised off-campus study conducted under the immediate and direct guidance of a Kresge faculty supervisor. To be used primarily by upper-division students doing part-time, off-campus study. Prerequisite(s): approval of student's adviser and the college.

KRSG 194 - Group Tutorial (5)

A program of independent study arranged between a group of students and a Kresge faculty member. Students submit petition to sponsoring agency.

KRSG 195 - Senior Thesis (5)

Senior thesis or project for student doing individual major program. May be repeated twice for credit. Prerequisite(s): permission of sponsoring committee and college approval.

KRSG 198 - Independent Field Study (5)

Provides for college-sponsored individual study programs off campus, for which Kresge faculty supervision is not in person (e.g., supervision is by correspondence.) Prerequisite(s): approval of the student's faculty sponsor and college approval.

KRSG 199 - Tutorial (5)

A program of individual study arranged between an upper-division student and a Kresge faculty member. Students submit petition to sponsoring agency.

KRSG 199F - Tutorial (2)

Tutorial

LAAD - LANGUAGES**Lower-Division****LAAD 99 - Tutorial (5)**

Students submit petition to sponsoring agency.

LAAD 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division**LAAD 199 - Tutorial (5)**

Students submit petition to sponsoring agency.

LAAD 199F - Tutorial (2)

Students submit petition to sponsoring agency.

Graduate**LAAD 210 - Oral Communication in the U.S. Classroom: Strategies for International T.A.s (2)**

Seminar for international graduate students who speak English as a second or foreign language. Focuses on oral competency and serves to qualify students as graduate teaching assistants in UCSC classrooms or laboratories.

Prerequisite: Enrollment is restricted to international graduate students; language assessment administered by the Graduate Division.

LALS - LATIN AMERICAN AND LATINO STUDIES**Lower-Division****LALS 1 - Introduction to Latin American and Latino Studies (5)**

Interdisciplinary introduction presenting the elements for studying Latin American politics and economics, culture, and society as well as the dynamics of Latino communities in the U.S. Special attention paid to issues of colonialism, human rights, U.S. foreign policy toward Latin America, racism, capitalist globalization, migration, to emerging political and economic shifts in the Americas, and to new local and transnational efforts for social change on the part of Latin America's peoples and Latinos in the U.S.

LALS 5 - Introduction to Human Rights and Social Justice (5)

Introduces human rights as a way to study social justice. Students gain an understanding of interdisciplinary approaches to human rights as a theory, legally, and as a basis for global social movements.

LALS 20 - Latino Politics (5)

Offers a domestic (U.S.) and transnational approach to Latino politics, focusing on the five largest Latino groups: Mexicans, Puerto Ricans, Cubans, Salvadorans, and Guatemalans. Issues addressed include Latino electoral participation, Latino public opinion, migrant political incorporation, and transnationalism among others.

LALS 30 - Social Movements in Latin America (5)

Examines contemporary social movements in Latin America, especially those that arose from popular response to different forms of social exclusion and to authoritarian political systems. Explores a variety of popular movements, their successes and setbacks, including rural and urban uprisings, native nations and their descendants, women, labor, human rights, and transnational movements.

LALS 32 - Citizens, Denizens, Aliens (5)

Explores theories and practices of citizenship with a focus on how institutions, such as the immigration apparatus, school, and prison, produce and shape inclusion, marginalization, exclusion, and mobility and how social actors envision and enact home and belonging. (Formerly course 132).

LALS 40 - Latinos and Labor (5)

Explores the historical, social, economic, and political dynamics of inequality, stratification, and segmentation that shape the occupational pathways and workplace conditions of Latinos in the United States. Students learn about the structures, policies, and ideologies that influence Latinos'

working lives as well as how individuals experience their work in a variety of sectors. (Formerly Latinos, Work, and Organizing.)

LALS 45 - Intersections of Race, Class, and Gender (5)

Introduces theories of race, class, and gender which shape understandings about racial/ethnic issues in the United States. With particular attention to the experiences of U.S. racial/ethnic groups, including Latinas/os, African Americans, Asian Americans, and Native Americans, this course draws from interdisciplinary research to address how race, class, and gender are also crosscutting dynamics. (Formerly Race, Class, Gender.)

LALS 50 - Transnational Feminist Organizing in the Americas (5)

Explores key aspects of transnational feminist organizing in the Americas, including transnational feminist theories and feminist activism in Latin America and the Caribbean. Discusses how women from throughout the Americas region organize politically and socially across gender, race, ethnicity, sexuality, and nationality.

LALS 60 - Latin American Childhoods (5)

Introduces research on childhood in contemporary Latin America. Explores discourses about Latin American children, the regional institutions shaping children's lives, and how children experience and negotiate these larger social forces.

LALS 70 - Cinema and Social Change in Cuba (5)

Examines selected feature-length films and documentaries produced after the Revolution of 1959 as a venue to study social change in Cuba. Cinema is used as artifact to document and critique social change. Topics include: the role of art and artist in Revolution, literacy campaign, changing gender relations, dissident sexualities, racial politics, and others.

LALS 75 - Art and Social Change in Latin America: Diego Rivera (5)

Explores the works of Diego Rivera, other Mexican muralists, and the Latin American cultural movements that developed to address relevant social and political issues.

LALS 80D - Political Change in Mexico (5)

Reviews broad trends in contemporary Mexican politics against the backdrop of long-term historical, social, and economic change throughout the 20th century, analyzing how power is both wielded from above and created from below. The course covers national politics, grassroots movements for social change and democratization, environmental challenges, indigenous movements, the media, and the politics of immigration and North American integration.

LALS 80F - Latinos in the U.S.: A Comparative Perspective (5)

Analyzes the Latino experience in the U.S. with a special focus on strategies for economic and social empowerment. Stresses the multiplicity of the U.S. Latino community, drawing comparative lessons from Cuban-American, Puerto

Rican, Chicano/Mexicano, and Central American patterns of economic participation and political mobilization.

LALS 80H - Comparative Latina/o Histories (5)

Designed to survey recent works in the field of Latina and Latino histories, with particular emphasis on historiographical approaches and topics in the field. Readings are chosen to expose a selection of the varied histories and cultures of Latina/os in the U.S., and focus primarily on Mexicans, Puerto Ricans, and Cubans.

LALS 80J - Race, Nation, and War (5)

Evaluates the relationship between processes of racial formation, war, and nationalism in Latin America. Case studies range from the wars of independence to more recent forms of transnational violence. Students engage historical and anthropological perspectives and critiques of modernity.

LALS 80P - Environment and Society in Latin America (5)

Examines the implications of environmental degradation and resource extraction for economic growth and social inequality in Latin America. Course focuses on the connections between race, ethnicity, power, poverty, and environmental problems. (Formerly Energy, Society, and Ecology in Latin America.)

LALS 80S - Sexualities and Genders in Latin American and Latina/o Studies (5)

Introduction to issues and themes surrounding sexualities and genders within Latin American and Latina/o studies. Provides background in the basic theoretical and historical frameworks of gender and its relationship to sexuality. In addition to cross-border perspectives, course also examines how gender and sexuality are structured and experienced through other social categories.

LALS 80X - Central American Peoples and Cultures (5)

Examines contemporary societies and peoples of Central America considering how, in recent decades, media, history, war, cultural production, and migration have shaped Guatemala, Honduras, El Salvador, Nicaragua, and Costa Rica both as individual nations and as a region.

LALS 90 - Contemporary Brazil (5)

Introduces issues affecting contemporary Brazilian society and culture, such as the legacy of slavery and persisting social, racial, and gender inequities. Analyses of how different representations of Brazil sustain distinctive national projects, which, in turn, attribute specific meanings to blackness, whiteness, masculinity, femininity, and upper- and lower-class identities.

LALS 95 - Undergraduate Research Seminar (2)

Seminar for undergraduates participating in the Cultivamos Excelencia program supporting the development of students as researchers and active participants in academic communities; including lectures on disciplinary methods by participating faculty, work-in-progress sessions for mentors and student researchers, and workshops on formulating

research questions, developing a research plan, writing a research paper, and professional development. Enrollment is by instructor permission.

Upper-Division

LALS 100 - Concepts and Theories in Latin American and Latina/o Studies (5)

Interdisciplinary exploration of transnational migrations; social inequalities; collective action and social movements; and cultural productions, products, or imaginaries. Examines how transnational migration and hemispheric integration are transforming Latin American studies and Chicana/o-Latina/o studies. Explores the influence of neoliberalism and globalization, especially the intersection of critical analysis and social-justice praxis. Completion of course 1 highly recommended. (Formerly course 10, Bridging Latin American and Latina/o Studies)

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

LALS 100A - Social Science Analytics (5)

Compares diverse analytical strategies and builds practical research skills in the field of Latin American and Latino studies. (Formerly Politics and Society: Concepts and Methods.) Two-credit course 100L writing lab highly recommended.

Prerequisite: Prerequisite(s): LALS 100 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to sophomore, junior, and senior Latin American and Latino studies majors, minors, and combined majors or by permission.

LALS 100B - Cultural Theory in the Americas (5)

Focuses on transnational, regional, and local features of Latina/o and Latin American cultural production and artistic expression: how culture is shaped by historical, social, and political forces; how cultural and artistic practices shape the social world; and how culture is produced in an interconnected, postindustrial, and globalized economy. (Formerly Culture and Society: Culture in a Global Context.)

Prerequisite: Prerequisite(s): LALS 100 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to sophomore, junior, and senior Latin American and Latino studies majors, minors, and combined majors.

LALS 112 - Immigration and Assimilation (5)

Examines immigration to U.S. from colonial era to present with special emphasis on issues of citizenship, social identities, and social membership. (Formerly American Studies 112.)

LALS 115 - Mexico-United States Migration (5)

Overview of Mexico-United States migration in historical and contemporary context. Focuses on Mexican experiences of

racialization, deportability, second-class citizenship, and transnationalism--the cross-border networks, institutions, activities, loyalties, and identities by which Mexican migrants orchestrate their lives across international borders.

Prerequisite: Enrollment is restricted to sophomores, juniors and seniors.

LALS 122 - Media and Nationalism (5)

Evaluates the links between media and the production of national identities in Latin America. Focuses on theories of nationalism, media, and globalization to examine the production of national histories and representations.

Prerequisite: Enrollment is restricted to juniors and seniors.

LALS 124 - Brazilian Cinema (5)

Surveys films by and/or about women from Brazil, drawing a picture of contemporary Brazilian cinema through the angle of gender in its articulation with sexuality, race, class, ethnicity, national identity, and other key concepts, while offering a visual and critical introduction to Brazilian culture.

LALS 127 - Genero, Nacion Y Modernidad En El Cine (5)

Taught in Spanish. Examines the relationship between cinema, gender, the nation, and modernity. Focusing on films by key women filmmakers in Latino and Latin America, the seminar examines their engagement with identity, cultural imaginaries, coloniality, sexuality, and gender.

Prerequisite: Enrollment is restricted to Latin American and Latino studies majors, minors and combined majors.

LALS 128 - Latino Media in the U.S (5)

Explores the history and practice of Latino media in the U.S. with an emphasis on work created by, for, with, and about Latino constituencies. Course highlights the role that media plays in struggles for social change, political enfranchisement, creative self-expression, and cultural development. Course content varies with instructor.

LALS 129 - America Latina: Cine, Dictadura y Memoria (5)

Taught in Spanish. Analyzes and compares the rise of authoritarian regimes throughout Latin America in the 20th century through selected films and documentaries. Themes include U.S. foreign policy toward the region, ethnic cleansing, neoliberalism, and memory/resistance/reconciliation through artistic representations.

LALS 130 - Expresiones cuirs de Género y Sexualidad en el cine Latinoamericano (5)

Examines cinematic manifestations of dissident sexualities, as well as dissident expressions of gender and family in Latin American culture. Taught in Spanish.

Prerequisite: Enrollment is restricted to juniors and seniors.

LALS 131 - Latino Literatures: Assimilation and Assimilability (5)

Explores assimilation and assimilability in the United States, especially as related to the education and languages of Latinos, via literary forms, such as the memoir, novel, essay, short fiction, film, and/or poetry. (Meets the methods requirement in Latin America and Latino studies.)

LALS 133 - Latina/o Art and Representation (5)

Focus on art forms and visual representations of Latina/os in the United States. Emphasis on visual art created by artists associated with the Chicano/o movement and the Central American diaspora. Topics include cultural identity, murals, public art, and fine art.

LALS 136 - Tourism, Culture, and Identity (5)

Interdisciplinary study of tourism in Latin America and its interconnections with culture, power, and identity. Examines contemporary trends of tourism (ethnic tourism, diaspora tourism, sex tourism, and favela tours) and explores how regional, national, and transnational identities shape and are shaped by tourism.

Prerequisite: Enrollment is restricted to juniors and seniors.

LALS 143 - Race and Ethnicity (5)

Race and ethnicity have been--and continue to be--powerful forces shaping the U.S. experience. This course examines a range of conceptual approaches and monographic studies grounded in the history of the U.S. The readings provide various criteria for studying and understanding these phenomena. The course problematizes race by asking what the readings tell us about race-making and the reproduction of racial ideologies in specific historical contexts. Similarly, ethnicity is treated as a historically specific social construct. (Meets the methods requirement in Latin America and Latino studies.)

LALS 143J - Global Political Economy (5)

Analyzes the global, social, economic, and political forces that shape transnational, national, and regional societal formations and consequently the entire environment for social change. Examines the evolution of revolutionary struggle and its origins within and impact upon the evolving capitalist system.

LALS 144 - Mexicana/Chicana Histories (5)

Explores current historical and theoretical writings on the lived experiences of Chicanas and Mexicana women in U.S. history. Themes include domination/resistance politics, (re)presentations, contestation, social reproduction, identity and difference. Meets the methods requirement in Latin America and Latino studies.

LALS 145 - Grassroots Social Change in Latin America (5)

Focuses on the analysis of collective action by underrepresented groups in Latin America. Concepts and issues include political participation and impact, gender,

ethnicity and race, class, the environment, religion, non-governmental organizations, and social capital.

Prerequisite: Prerequisite(s): any two Latin American and Latino studies courses or permission of instructor; open to graduate students.

LALS 150 - Afro-Latinos/as: Social, Cultural, and Political Dimensions (5)

Explores the lives of African descendants in the Americas, including the Caribbean. Students learn about the settlement patterns of Afro-Latinos/as and Afro-Latin Americans in the region and the ways in which African descendants negotiate their multiple identities and broaden racial frameworks in the United States and Latin America.

LALS 152 - Consumer Cultures Between the Americas (5)

Examines the circuits of media, commodities, and migration connecting the Americas in an age of globalization. Issues of states, transnational markets, social relations, and cultural representations addressed. Relationship between consumption, nationalism, and globalization is considered critically. (Meets the methods requirement in Latin America and Latino studies.)

LALS 155 - Latin American and Latino Youth Movements (5)

Examines the histories, structures, and practices of Latin American and Latino youth movements. Analyzes the patterns, themes, and differences of social movements using primary documents. Addresses the dynamics of age, generation, race, ethnicity, and nation. Uses youth activism to explore questions relevant to the study of contemporary social movements in the Americas.

LALS 156 - Human Rights and Transitional Justice in the Americas (5)

Provides students with an introduction to the emerging scholarly field of transitional justice. Examines transitional justice in a broad sense and through elected case studies.

Prerequisite: Prerequisite(s): LALS 1. Enrollment is restricted to junior and senior Latin American and Latino studies majors, minors, and combined majors.

LALS 157 - Revoluciones Sociales (5)

Taught in Spanish. Examines major social upheavals in Latin America since 1900, exploring revolution as a distinctive form of social conflict and change. Analyzes political, economic, social, and cultural conditions that gave rise to, and linked, revolutions across the Americas.

LALS 158 - Latin American Political Economy (5)

Explores and applies basic tools of Latin American political economy to map the evolution of the region's main patterns of economic growth and accompanying social structures across past centuries. Reviews the effects of neoliberal capitalist globalization on contemporary Latin America, resistance to destructive consequences, and the nature of emerging alternatives.

LALS 165 - Contemporary Peru (5)

Explores contemporary issues facing Peru by addressing the formation of the state and the country's troubled history with political and state violence. Students learn about Peru's multicultural/racial population and about ongoing conflicts and hopes for the country today.

LALS 168 - Inter-American Relations (5)

Examines the history of various forms of connection between people, governments, cultures, and social movements across the Americas. From military intervention to transnational anti-imperialist agendas to contemporary artistic collaboration, many forms of foreign relations have shaped the American hemisphere.

LALS 169 - South America: History, Society, and Culture (5)

Examines the southernmost region of South America, commonly referred to as the Southern Cone, exploring the historical trajectories of Argentina, Chile, Paraguay, Uruguay, and southern Brazil, from independence through the end of the 20th century.

LALS 170 - Indigenous Struggles in the Americas (5)

Focuses on the way Natives of First Peoples have interacted voluntarily and involuntarily with nonindigenous cultures. Examines their perspectives, thoughts, frustrations, and successes. Touches on land issues and examines the way current indigenous cultures of Latin America face and adapt to social change. Focuses mainly on the Andes, lowland Amazon, Mesoamerica, and other areas.

LALS 171 - Brazil in Black and White (5)

Taught in Portuguese. Examines blackness and whiteness in Brazil through the lens of the intersectionality of race, gender, and class identities. Topics include: national narratives of racial democracy, racism, black activism, and the emerging studies of whiteness in Brazil.

LALS 172 - Visualizing Human Rights (5)

Explores how visual artists take up the subject of human rights in response to urgent challenges facing Latina/o and Latin American communities across the Americas. Examines the imprint of film and media arts reshaping human-rights discourse. Considers persistent themes in Latina/o representation, including colonialism and state terrorism; self-representation and the rights of collectives (racial, ethnic, and sexual groups); social and economic rights. (Meets the methods requirement in Latin America and Latino studies.)

LALS 175 - Migration, Gender, and Health (5)

Through an interdisciplinary, cross-border approach, examines complex nature of Latino health in relation to migration and how women and men experience health problems differently. Examines how health problems are created by economic and social conditions, how migrants experience access to care, and how agencies can design culturally sensitive programs.

LALS 178 - Gender, Transnationalism, and Globalization (5)

Focuses on the impact of globalization and transnationalism on gender relations in the Americas. Examines gender and power in the context of neoliberalism, modernity, the nation, social movements, and activism. Explores local and transnational constructions of gender, and the intersection of gender with race, ethnicity, class, and sexuality.

LALS 180 - Borders: Real and Imagined (5)

Situates The Border historically and within the context of U.S. imperialism. Examines the formalization of political borders, methods of enforcement, and intra-group conflicts. Examines the varied experiences of colonialism and immigration between Mexicans, Puerto Ricans, Native Americans, and Cubans. Explores how the tools of The Border and Borderlands are being used to untangle the roles of race prejudice and sexual and gender discrimination. (Meets the methods requirement in Latin America and Latino studies.)

LALS 186 - Field Research Methods (5)

Introduction to field research methods that consider theory, methodological challenges, and epistemology in conducting research. Explains the research process, including designing research questions, interview instruments, concepts maps, and methods of data collection, and data analysis. (Meets the methods requirement in Latin America and Latino studies.)

Prerequisite: Prerequisite(s): LALS 100; and LALS 100A or LALS 100W. Enrollment is restricted to junior and senior Latin American and Latino studies majors, minors, and combined majors and Sociology majors.

LALS 190 - Internship (5)

Internships with campus or community organizations sponsored and evaluated by a Latin American and Latino studies faculty member. Students write an analytical paper or produce another major work agreed upon by student, faculty supervisor, and internship sponsor; sponsor must also provide review of experience. Students submit petition to sponsoring agency.

LALS 190F - Internship (2)

Internships with campus or community organizations sponsored and evaluated by a faculty member from Latin American and Latino studies. Students write a short (8-page) descriptive paper or produce another work agreed upon by student and faculty supervisor. Students submit petition to sponsoring agency.

LALS 194A - Immigrant Storytelling (5)

Examines first-person narratives by migrants, paying close attention to storytelling as a strategy for fomenting cultural, social, and political change. In addition to reading literary and visual texts, student complete a final project based on original research.

Prerequisite: Prerequisite(s): LALS 100, and LALS 100A, and previous or concurrent enrollment in LALS 100B. Enrollment

is restricted to junior and senior Latin American and Latino studies majors and combined majors.

LALS 194B - Global Migration and Displacement (5)

Examines the global history of migrating people, things, and ideas. Focuses primarily on case studies of mass migration and displacement in 19th and 20th centuries. Students analyze processes of migration in the Americas within a broader global context.

Prerequisite: Prerequisite(s): LALS 100, and LALS 100A, and previous or concurrent enrollment in LALS 100B. Enrollment is restricted to junior and senior Latin American and Latino studies majors and combined majors.

LALS 194C - Criminalizing the Poor (5)

Examines neoliberal discourses related to poverty that have become more critical of the poor over time, including reforms to social welfare, criminal justice, and immigration, and the ways in which the poor struggle to survive and contest neoliberalism.

Prerequisite: Enrollment is restricted to junior and senior Latin American and Latino studies majors and minors; and combined majors with global economics, sociology, literature, and politics.

LALS 194G - Chile: Social and Political Change (5)

Taught in Spanish. Analysis of Chilean politics and society from the election of Salvador Allende in 1970 to the present. Particular emphasis is given to understanding the different forces, internal as well as external, that broke the Chilean tradition of democratic rule in 1973, and to the current configuration.

Prerequisite: Enrollment is restricted to junior and senior Latin American and Latino studies majors, minors, and combined majors.

LALS 194H - Central America and the United States (5)

This senior seminar focuses on the connections between Central America and the United States. Covers Central American history, the political and economic relations between the isthmus and the United States, and Central American media and literature. (Formerly Central American Political Relations with the U.S.)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to junior and senior Latin American and Latino studies majors, minors, and combined majors.

LALS 194M - Twentieth-Century Revolutions (5)

Treatment of 20th-century Latin American revolutions from Zapata to the Zapatistas. Focuses on the causes and consequences of revolutions rather than on their narrative histories.

Prerequisite: Enrollment is restricted to junior and senior Latin American and Latino studies majors, minors, and combined majors.

LALS 194Q - Globalization in the Americas (5)

Introduces multiple dimensions of globalization by reviewing key theories and frameworks in order to understand development, social inequalities, trade agreements, multilateral institutions, and the future of globalization studies.

Prerequisite: Enrollment is restricted to junior, and senior Latin American and Latino studies majors, minors, and combined majors.

LALS 194R - Violencia Cotidiana en las Americas (5)

Senior seminar taught in Spanish. Engages a critical study of violence, social relations, and everyday life in contemporary Latin America. Focuses on the relationship between narratives and acts of violence, and the constitution and social effects of these representations. Requires proficiency in Spanish (written and spoken), and advanced reading knowledge of Spanish.

Prerequisite: Enrollment is restricted to junior and senior Latin American and Latino studies majors, minors, and combined majors.

LALS 194T - Youth and Citizenship (5)

Explores multiple and contested meanings of youth and citizenship; how youth, civic, and political identities are imagined, produced and negotiated in social and cultural locations; and how different versions of Latina/o youth citizenship are promoted and articulated by social and political institutions.

Prerequisite: Enrollment is restricted to junior and senior Latin American and Latino studies majors, minors, and combined majors during priority enrollment only.

LALS 194U - Political Violence in Mexico (5)

Focuses on rural and urban case studies of state repression in post-revolutionary Mexico. Examines how political violence was a preferred method of governance by Mexico's autocratic rulers throughout the 20th century.

Prerequisite: Enrollment is restricted to juniors and seniors.

LALS 194V - Comparative Migration Histories in the Americas (5)

Traces major historical patterns of migration and related processes in the Americas over the past two centuries. Covers the social, cultural, political, and economic factors that drive and shape the movements of people and considers the ways migration has impacted the sending, transit, and receiving societies. Over the quarter, students come to understand major historical forces of migration that inform our contemporary world, including citizenship, urbanization, identity formations, globalization, and neoliberalism.

Prerequisite: Enrollment is restricted to seniors.

LALS 194X - Extractivism and Socio-Environmental Conflicts in the Americas (5)

Explores, in-depth, how local communities, transnational capital, and state participate in conflicts anchored in extractive sectors, for example, mining, agro-exports, and so on. Through digital-based, case-study research, students identify and explore the logics of action, strategic interests, and the rhetoric of the principal protagonists in socio-ecological conflicts.

Prerequisite: Enrollment is restricted to juniors and seniors.

LALS 195B - Senior Project (5)

Senior thesis writing under direction of major adviser. Students submit petition to sponsoring agency.

LALS 195C - Senior Project (5)

Senior thesis writing under direction of major adviser. Students submit petition to sponsoring agency.

LALS 198 - Field Study (5)

Off-campus study in Latin America, the Caribbean, or nonlocal Spanish-speaking community in the U.S. Nature of proposed study/project to be discussed with sponsoring instructor(s) before undertaking field study; credit toward major (maximum of three courses per quarter) conferred upon completion of all stipulated requirements. Students submit petition to sponsoring agency.

LALS 198F - Independent Field Study (2)

Individual studies undertaken off-campus. Students submit petition to sponsoring agency.

LALS 199 - Tutorial (5)

Supervised directed reading; weekly or biweekly meetings with instructor. Final paper or examination required. Students submit petition to sponsoring agency.

LALS 199F - Tutorial (2)

Supervised research and writing of an expanded paper, completed in conjunction with requisite writing for an upper-division course taken for credit in the major. Students submit petition to sponsoring agency.

Graduate

LALS 200 - Bridging Latin American and Latina/o Studies (5)

Explores social, cultural, economic, and political changes that connect Latin America and U.S. Latina/o communities. The objective of this interdisciplinary team-taught course is to bridge previously distinct research approaches of Latin American and Latina/o studies to better understand processes that link peoples and ideas across borders as well as help students to conceptually and methodologically identify and design new objects of study and revisit traditional approaches. Core requirement for students pursuing the Parenthetical Notation in Latin American and Latino studies.

Prerequisite: Enrollment is restricted to graduate students.

LALS 200A - Power and Society (5)

Assesses key concepts organized around questions of power in contemporary Latina/o and Latin American interdisciplinary intellectual thought in the social sciences. Emphasis is on understanding power in relation to transnationalism and the department's substantive themes.

Prerequisite: Enrollment is restricted to graduate students.

LALS 200B - Theories of Culture in the Americas (5)

Introduces foundational theories and problems organized around questions of culture and epistemology; emphasizes developing interdisciplinary, humanities-based interpretive and analytic skills for understanding how culture is conceptualized; draws from critical social and cultural theories.

Prerequisite: Enrollment is restricted to graduate students.

LALS 201 - Research in Praxis: Epistemology, Ontology, and Ethics (5)

Problematizes the construction of research approaches in the interdisciplinary field of Latin American and Latino studies, and provides training in particular approaches in the social sciences and humanities so students may engage in innovative, transnational research.

Prerequisite: Enrollment is restricted to graduate students.

LALS 202 - Latin/o American Spaces and Modernity (5)

Students engage and discuss texts that examine the relationship between space, narratives, and ideas of the modern nation, along with critical studies that highlight the social effects of imaginaries and representations.

Prerequisite: Enrollment is restricted to graduate students.

LALS 203 - Latin American Social Movements (5)

Grounds students in the social science literature on Latin American social movements, integrating anthropological, sociological, and political science approaches to the field.

Prerequisite: Enrollment is restricted to graduate students.

LALS 204 - Migration, Borders, and Borderlands (5)

Explores concepts and approaches related to migration; the multiple types of borders that migrants transcend--geopolitical, social, cultural, or interpersonal; and borderland formations constructed in relation to bodies in motion.

Prerequisite: Enrollment is restricted to graduate students.

LALS 205 - Comparative Mobilities (5)

Brings together comparative studies of physical and social mobility with a focus on race, migration, and citizenship. Both an articulation and study of comparison, course is organized around three components: comparative borders; comparative migration; and comparative ethnic studies. The

questions animating it include: What happens when different histories, places, and peoples are compared? How and why do scholars in the humanities and humanistic social sciences compare? What are the strengths and challenges of a comparative approach?

Prerequisite: Enrollment is restricted to graduate students.

LALS 206 - Queer Cuba (5)

Seminar that engages social, political, and cultural histories of homosexuality in Cuba, focusing on LGBT ostracism and activism after 1959, with particular attention to the social and economic impact of the developments of the USSR on Cuba's LGBT population.

Prerequisite: Enrollment is restricted to graduate students.

LALS 207 - Youth Cultures, Global Capitalism, and Social Change (5)

Introduces intellectual histories of youth studies scholarship in the context of Latin American and Latino studies; explores young people's lived experiences of racialized capitalism and globalization; and addresses various forms of youth resistance and the relationship between youth cultures, politics, and social change.

Prerequisite: Enrollment is restricted graduate students.

LALS 208 - Politics of Childhood and Youth (5)

Explores how narratives about children, teens, youth, and students are imbued with political significance, and the ways young people are actively engaged in political practices. Considers how representations and lived experiences of youth can serve to reproduce and/or challenge inequalities.

Prerequisite: Enrollment is restricted to graduate students.

LALS 210 - Latina Feminisms: Theory and Practice (5)

Through an interdisciplinary approach, explores Latina feminist social theory and scholarly practice—especially in representation and interpretation of Latina experiences. Examining key texts at different historical junctures, charts how Latinas of varied ethnic, class, sexual, or racialized social locations have constructed oppositional and/or relational theories and alternative epistemologies or political scholarly interventions and, in the process, have problematized borders, identities, cultural expressions, and coalitions.

Prerequisite: Enrollment is restricted to graduate students.

LALS 211 - Paradigms of Race/Color, Sexuality, and Culture in Latin America (5)

Explores foundational texts by Latin American intellectuals that have served to construct and sustain continental, regional, national, and transnational cartographies of identities and the search for *lo americano*. Examines race/color, sexuality, and culture by tracing their narrative and conceptual (trans)formations in the region and its diaspora. Most texts are read in the original language of publication.

Prerequisite: Enrollment is restricted to graduate students.

LALS 212 - Latina/o Ethnographic Practice (5)

Explores the social construction of Latino cultures in their varied regional, national-ethnic, and gendered contexts. Examines how culture, as a dynamic process constructed with a historical context of hierarchical relations of group power, is interrelated to the structural subordination of Latinos. Focuses on how power relations create a context for the creation of specific Latino cultural expressions and processes.

Prerequisite: Enrollment is restricted to graduate students.

LALS 215 - Latina Cultural Studies: Culture, Power, and Coloniality (5)

Examines the theories and practices informing the field of Latina cultural studies in the Americas. For students pursuing the Designated Emphasis in Latin American and Latino studies and students with interest in theories of coloniality of power, decolonialism, intercultural and transnational feminist methodologies. (Formerly Latina Cultural Studies: Transborder Feminist Imaginaries.)

Prerequisite: Enrollment is restricted to graduate students.

LALS 220 - Transnational Civil Society: Limits and Possibilities (5)

Analyzes social, civic, and political actors that come together across borders to constitute transnational civil society, drawing from political sociology, political economy, comparative politics, and anthropology to address collective identity formation, collective action, institutional impacts, and political cultures.

Prerequisite: Enrollment is restricted to graduate students.

LALS 225 - Race in the Americas (5)

Considers historical moments in the development of race in the Americas to understand how race is given meaning and actualized through practices, beliefs, and behaviors. Interrogates theories and racial dynamics in the 19th through 21st centuries to reveal interconnections with constructions of gender and nation.

Prerequisite: Enrollment is restricted to graduate students.

LALS 240 - Culture and Politics of Human Rights (5)

Examines cultural, philosophical, and political foundations for human rights and provides students with critical grounding in the major theoretical debates over conceptualizations of human rights in the Americas. Addresses the role of feminist activism and jurisprudence in the expansion of human rights since the Universal Declaration of Human Rights. Addresses challenges of accommodating gender rights, collective rights, and social and economic rights within international human rights framework.

Prerequisite: Enrollment is restricted to graduate students.

LALS 242 - Globalization, Transnationalism, and Gender in the Américas (5)

Explores how globalization, transnationalism, and the social construction of gender are interrelated, contingent, and subject to human agency and resistance. Examines particular configurations of globalization, transnationalism, and gender through the Américas and their implications for race, space, work, social movements, migration, and construction of collective memory.

Prerequisite: Enrollment is restricted to graduate students.

LALS 244 - Digital Mapping and Human Geographies (5)

Explores the utility of geographical information systems (GIS) for social science research. This course has three components: critical discussions of spatial analysis in published research, training in GIS software, and the application of digital mapping to students' research projects.

Prerequisite: Enrollment is restricted to graduate students.

LALS 245 - Epistemologies of the South (5)

Examines efforts by intellectuals from the Global South, mainly Latin America, to cast off the political, cultural, and epistemological notions imposed by European colonialism and preserved today through the practices of Western/Eurocentric knowledge, to forge their own epistemologies of the South.

Prerequisite: Enrollment is restricted to graduate students.

LALS 292 - LALS Graduate Colloquium (2)

Required for all LALS graduate students in residence, colloquium includes a mix of activities aimed at supporting the development of graduate students as teachers, researchers, and active participants in academic communities. Includes lectures by distinguished speakers, work-in-progress sessions for both faculty and graduate student research, pedagogical theory and practice seminars, and professional development workshops.

Prerequisite: Enrollment is restricted to graduate students.

LALS 297A - Independent Study (5)

Students submit a reading course proposal to a department faculty member who supervises independent study in the field. Faculty and student jointly agree upon reading list. Students expected to meet regularly with faculty to discuss readings. This independent study must focus on a subject not covered by current UCSC graduate curriculum. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LALS 297B - Independent Study (10)

Students submit a reading course proposal to a department faculty member who supervises independent study in the field. Faculty and student jointly agree upon reading list. Students expected to meet regularly with faculty to discuss readings. This independent study must focus on a subject not covered by current UCSC graduate curriculum. Students

submit petition to sponsoring agency. Enrollment restricted to graduate students.

LALS 297C - Independent Study (15)

Students submit a reading course proposal to a department faculty member who supervises independent study in the field. Faculty and student jointly agree upon reading list. Students expected to meet regularly with faculty to discuss readings. This independent study must focus on a subject not covered by current UCSC graduate curriculum. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LALS 299A - Thesis Research (5)

Enrollment restricted to graduate students and permission of instructor. Students submit petition to sponsoring agency.

LALS 299B - Thesis Research (10)

Enrollment restricted to graduate students and permission of instructor. Students submit petition to sponsoring agency.

LALS 299C - Thesis Research (15)

Enrollment restricted to graduate students and permission of instructor. Students submit petition to sponsoring agency.

LATN - LATIN

Lower-Division

LATN 1 - Elementary Latin (5)

Instruction in Latin grammar, using a modern Latin method, designed to prepare for the study of classical literature. The sequence begins in the fall quarter only.

LATN 2 - Elementary Latin (5)

Instruction in Latin grammar, using a modern Latin method, designed to prepare for the study of classical literature.

Prerequisite: Prerequisite(s): LATN 1.

LATN 99 - Tutorial (5)

Students submit petition to sponsoring agency.

LATN 99F - Tutorial (2)

Students submit petition to sponsoring agency.

LGST - LEGAL STUDIES

Lower-Division

LGST 10 - Introduction to Legal Process (5)

Introduction to U.S. and comparative legal institutions and practices. Examines diverse areas of law from torts to civil

rights to international human rights. Why is America portrayed as having an activist legal culture; why is law used to decide so many questions from presidential elections to auto accidents; can law resolve disputes that, historically, have led to war and violence; is the legal system fair and/or effective, and, if so, for whom and under what conditions?

Upper-Division

LGST 100 - Law and Politics of Memory (5)

Examines why we choose to memorialize some aspects of our history, but not others. What impact do those choices have on our contemporary politics and society? How may memorials help create a stronger democracy?

LGST 108 - Gender, Sexuality, and Law (5)

Analysis of legal issues related to gender, sexuality, and sexual orientation. Introduction to the key areas of gender and sexuality regulated by law and critical analysis of how law and policy should and do treat these issues.

Prerequisite: Enrollment is restricted to sophomore, junior, and senior legal studies majors during first and second pass enrollment only.

LGST 109 - Legal Theory (5)

Offers systematic exploration of alternative conceptions of the nature of law, including positivism, natural law, formalism, realism, pragmatism, and theories of justice. Additional focus on the nature of law; relation of law and morality, rights and other legal concepts; and philosophical debates such as critical legal studies and critical race theory.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment only.

LGST 111B - Civil Liberties (5)

Explores the status of American civil liberties as provided by the Bill of Rights. Particular attention will be given to issues of concern relating to the aftermath of 9/11, including issues relating to detainees, freedom of information requests, wiretapping authority, watch lists, profiling, and creation of a domestic intelligence agency.

Prerequisite: Enrollment is restricted to legal studies and politics majors during first- and second-pass enrollment only.

LGST 111C - Issues in Constitutional Law (5)

Examines variety of topics in constitutional law that are not covered in courses 111A and 111B. Focuses primarily on Supreme Court decisions and common-law debates.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 113 - Gay Rights and the Law (5)

Examines relevant court cases as well as local, state, and federal laws that define boundaries for legal recognition of sexual orientation and personal sexuality. Explores legal

assumptions behind current and historical cases defining personal sexuality and sexual orientation and considers the social and political impetus in each era that drove the courts and legislatures to make such decisions.

LGST 114 - Jews, Anti-Semitism, and the American Legal System (5)

Explores how Jews have influenced and been impacted by the American legal system. Students explore significant cases, debates, and trends in the law as it relates to Jewish identity, religious freedom, and conceptions of justice.

Prerequisite: Enrollment is restricted to legal studies and Jewish studies majors during first and second pass enrollment.

LGST 115 - Law and the Holocaust (5)

Examines the Nazi philosophy of law, and how it was used to pervert Germany's legal system in order to discriminate against, ostracize, dehumanize, and ultimately eliminate certain classes of human beings, and the role of international law in rectifying the damage. Enrollment restricted to legal studies majors during priority enrollment only.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 116 - Comparative Law (5)

Explores how countries organize their societies through legal rules. Particular attention is given to constitutional design, differences between common and civil law systems, changes brought about by the European Union, and the convergence of legal norms globally.

Prerequisite: Enrollment is restricted to legal studies and politics majors during first and second pass enrollment.

LGST 117 - Sports, Law, and Politics (5)

Investigates the relationship between sports, law, and politics, focusing on racism, colonialism, post-colonialism, and globalization.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 118 - Law and Literature (5)

Explores variety of texts including novels, short stories, and essays as a source for reflection about the nature of law and legal practice. Readings include such writers as Herman Melville, Harper Lee, Richard Wright, Arthur Miller, Nadine Gordimer, and James Alan McPherson, among others. (Formerly course 138.)

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 121 -

LGST 125 - History of the U.S. Penal Culture (5)

Explores the history and theory of U.S. state punishment from its 17th-century beginnings to the present and notes evolving models of criminal deviance, focusing on how punishment

systems legitimate particular models of criminal deviance, crime, and its correction.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 130 - Inequality and Law (5)

Explores the complex relationship between race and the law in American society. Included subjects are critical race theory, civil rights and voting rights law, issues of the criminal justice system, intersections with issues of class and gender, and the social construction of race through law and legal decisions. (Formerly Race and the Law.)

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 131 - Wildlife, Wilderness, and the Law (5)

Introduction to wildlife, wilderness, and natural resources law, policy, and management. Examines rules governing resource allocation and use including discussion of fundamental legal concepts. Explores laws and management policies affecting wildlife and wilderness, including their origins and impacts. Examines how conflicts over natural resources are being negotiated today.

Prerequisite: Enrollment is restricted to sophomore, junior, and senior legal studies majors during first and second pass enrollment.

LGST 133 - Law of Democracy (5)

Explores the role of law in both enabling and constraining the actions of elected politicians in the U.S. Among issues examined are voting rights, redistricting, and campaign finance. Course asks how the law shapes and limits our ability to choose our elected leaders, and in turn, how the law is shaped by political forces.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 135 - Native Peoples Law (5)

Explores the legal relationship between native peoples and the state. Examines the development of that relationship and several of the key legal issues currently confronting native peoples as they attempt to redress the injustices of the past.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 136 - Federal Indian Law and International Comparative Indigenous Peoples' Law (5)

Indian law refers to the body of law dealing with the status of Indian tribes, their inherent powers of self-government, their special relationship to the federal government, and the actual or potential conflicts of governmental power. Primary objective will be to address tribal reassertion of aboriginal sovereignty over culture and land in the context of increasing world recognition of indigenous rights.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 137 - International Environmental Law and Policy (5)

International environmental law (IEL) endeavors to control pollution and depletion of natural resources within a framework of sustainable development and is formally a branch of public international law—a body of law created by nation states for nation states, to govern problems between nation states. Examines landmark developments of IEL since 1972 within a historical continuum to better understand their strengths and weaknesses.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 139 - War Crimes (5)

Explores complex international human rights/humanitarian law issues surrounding genocide and other mass violence, beginning with the Nuremberg trials following World War II up to recent atrocities in Rwanda, Bosnia, and elsewhere. Covers basic legal framework of human rights law, examines specific situations on a case by case basis, and discusses what options the international community, the nations themselves, and individuals have in the wake of such catastrophes.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 150 - Children and the Law (5)

Explores the legal rights of children. Topics may include juvenile justice, gang offenses, free speech and Internet censorship, religious rights, child custody and support, adoption, foster care, abuse and sexual harassment, special needs, public benefits, and medical care.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 152 - Courts and Litigation (5)

A study of the role of courts in society and the uses of litigation to address and deflect social problems. Focus is on recent developments in American litigation, but comparative materials may be considered.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 153 - Immigration, Citizenship, and Law (5)

Explores U.S. laws and policies regarding immigration and citizenship from historical and contemporary perspectives. Includes studying landmark court cases, key statutes and regulations governing immigration and citizenship, and scholarly treatments in order to critically examine historical developments and contemporary debates.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 154 - The Legal Profession (5)

Lawyers stand between the legal system and those who are affected by it. Examines this relationship descriptively and normatively, and from the point of view of sociological theory. Concentrates on the U.S. profession, with some comparative material.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 155 - Topics in American Legal History: Making of American Constitutionalism (5)

Explores some aspects of early American constitutional thought, particularly immediately preceding the American Revolution situating early colonial constitutional thought within some of the larger themes and controversies of the 17th-century English constitutionalism, then considering some aspects of American constitutional thought in the founding period against the background of the colonial experience. Prerequisite(s): permission of instructor: selection based on the ability to do very advanced work. Enrollment restricted to legal studies majors during first and second pass enrollment.

LGST 156 - Administrative Law and Challenges of Regulation (5)

The rise of the regulatory state brings with it a host of questions regarding the exercise of state power and separation of powers. Takes up some of these questions; in particular, questions about administrative agencies and their relationship to the judiciary, the legislature and private individuals and groups. (Formerly Administrative Jurisprudence.)

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 157 - Political Jurisprudence (5)

Explores some themes in legal and political theory, especially on the relationship of theories of justice, law, and ethics.

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 159 - Property and the Law (5)

Begins with an examination of the concept of property, then covers how different cultures characterize property and determine ownership and the laws and policies that define property in modern society. Topics include theories of property law, common property, property and natural resources, zoning, regulatory takings, and intellectual and cultural property

Prerequisite: Enrollment is restricted to legal studies majors during first and second pass enrollment.

LGST 173 - Disability, Law, & Politics (5)

Introduction to how individuals, societies, and states answer fundamental questions about disability, including what is or is not a disability, what causes disability, and what the proper responses to the existence of disabilities are.

LGST 185 - Legal Studies Internship/Field Seminar: Experiences in Law, Policy, and Society (5)

A practicum seminar for students seeking field experience in law- and policy-making settings. Designed to be combined with an internship; provides structured class meetings and work, including weekly field notes and a final paper.

Prerequisite: Prerequisite(s): LGST 10. Enrollment is restricted to sophomores, juniors, and seniors.

LGST 188A - Introduction to the Legal Profession and Legal Aid Work (2)

Offers a basic introduction to key aspects of the Legal Profession, generally, as well as an introduction to the specific area of the profession known as Legal Aid -- the system and services through which under-served communities gain access to legal services. Course covers key elements of the legal profession and legal aid work, offering practical information and training on topics such as professional responsibility, ethics, confidentiality, interviewing skills, record keeping, communication, and working with diverse clients. It is particularly designed as a preparation or companion course for law-related internships and field student through courses such as OAKS/LGST 188B (3 credits), OAKS 199 (OAKS 199), or LGST 185 Internship (5 credits). Enrollment by permission of the instructor.

LGST 193 - Field Study (5)

Field research performed off-campus, under the supervision of a member of the legal studies faculty.

LGST 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

LGST 195A - Senior Thesis (5)

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency.

LGST 195B - Senior Thesis (5)

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency.

LGST 195C - Senior Thesis (5)

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the

previous quarters. Students submit petition to sponsoring agency.

LGST 196 - Senior Capstone (5)

Examines related legal topics from an interdisciplinary perspective. Each focuses broadly on the relationship between law as a distinct system and law as an attempt to achieve justice, which requires that law remain open to claims of political morality generally. To what extent are legal norms internal to a separate system called law and to what extent are claims of political right in general relevant to question of what law is?

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior legal studies majors.

LGST 198 - Independent Field Study (5)

Individual studies undertaken off-campus for which faculty supervision is not in person, but by correspondence. Students submit petition to sponsoring agency.

LGST 198F - Independent Field Study (2)

Individual studies undertaken off-campus for which faculty supervision is not in person, but by correspondence. Students submit petition to sponsoring agency.

LGST 199 - Tutorial (5)

A student normally approaches a faculty member and proposes a course 199 on a subject he or she has chosen. Students submit petition to sponsoring agency.

LGST 199F - Tutorial (2)

A student normally approaches a faculty member and proposes a course 199 on a subject he or she has chosen. Students submit petition to sponsoring agency.

LING - LINGUISTICS

Lower-Division

LING 50 - Introduction to Linguistics (5)

An introduction to the major areas, problems, and techniques of modern linguistics.

LING 53 - Semantics I (5)

Introduction to the logical foundations of natural language semantics. Logical and semantic relations, simple set theory, logical representations (propositional and predicate calculi, modal and tense logics) and their interpretations. A basic literacy course in the language of logical representation.

LING 80C - Language, Society, and Culture (5)

The study of language from a sociological perspective. Multilingualism, language change and variation, pidgins and creoles, the origin and diversification of dialects.

LING 80D - Language and Mind (5)

A critical overview of the research program initiated by Noam Chomsky and its implications for theories of the human mind and brain.

LING 80K - Invented Languages, from Elvish to Esperanto (5)

Considers invented languages, including Elvish and Klingon, as well as lesser-known ones that tackle ethical, social, or cognitive concerns. Students learn tools from contemporary linguistics to analyze language structures and understand how they relate to creator intentions.

LING 80M - Language and Indigeneity in Mesoamerica (5)

Explores indigenous experiences in Mesoamerica, focusing on the role of language in the formation of indigenous identities, both historically and in contemporary society. Also considers the linguistic correlates of inequalities experienced by indigenous communities since European contact. Students learn about some of the unique features of Mesoamerican indigenous languages, but no prior experience with linguistics is presumed.

LING 80V - Structure of the English Vocabulary (5)

A systematic study of the elements of English words: besides the practical goal of vocabulary consolidation and expansion, explores the historical origin and development of word elements, as well as their sound, meaning, and function in the contemporary language.

LING 99 - Tutorial (5)

Students submit petition to sponsoring agency.

Upper-Division

LING 101 - Phonology I (5)

Introduction to how sounds pattern in grammars-why they vary, how they combine, etc. Emphasis is on developing theories to explain the patterns. Topics include distinctive feature theory, phonemic analysis, autosegmental phonology, and principles of syllabification and stress.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, LING 50.

LING 102 - Phonology II (5)

Advanced phonological theory. Topics include markedness; underspecification theories; advanced topics in feature geometry, syllable theory, and stress theory; and optimality theory. Readings include published articles. Emphasis on theory construction and argumentation based on data.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 103 - Phonology III (5)

Advanced topics in phonology, with an emphasis on reading both classic and contemporary research articles and book

chapters. Prerequisite(s): course 102 and enrollment by interview.

LING 105 - Morphology (5)

Study of the principles of word formation: derivation, inflection, and compounding; cross-linguistic study of morphological processes, morphological investigation and analysis.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 108 - Poetry and Language (5)

An introduction to the linguistic aspects of poetry, e.g., rhyme, meter, and larger-scale organization of poetic form. The emphasis is on English poetry, complemented by brief sketches of other poetic traditions.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 111 - Syntactic Structures (5)

Provides a basic introduction to the methods and results of generative grammar. It simultaneously provides an overview of the major syntactic constructions of English.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

LING 112 - Syntax I (5)

An introduction to syntactic investigation, developed through the study of central aspects of English syntax. A major purpose is to introduce students to the study of language as an empirical science.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

LING 113 - Syntax II (5)

Further aspects of English syntax; universal and language-particular constraints on syntactic structures and rules. Further developments and extensions of generative theory.

Prerequisite: Prerequisite(s): LING 53, and LING 111 or LING 112.

LING 114A - Syntax III (5)

Advanced topics in syntax. Prerequisite(s): course 113, satisfaction of the Entry Level Writing and Composition requirements and permission of instructor.

LING 114B - Readings in Syntax (5)

Introduces reading the primary literature in syntax. Readings will vary. Emphasis is on how to read technically difficult works, evaluate arguments, and appreciate competing views. Coursework includes readings, presentations, and short response papers. Enrollment by permission of instructor. Prerequisite: course 113.

LING 114C - Topics in Syntax (5)

Advanced undergraduate course devoted to a topic in syntax. Topics vary and may include ellipsis, binding, agreement phenomena, alternative frameworks. Coursework includes problem sets, readings, presentations, and a term paper. Enrollment by permission of instructor. Prerequisite: course 113.

LING 116 - Semantics II (5)

Major issues in natural language semantics: nature of lexical entries, thematic relations, propositional representation or logical form; relation between semantic interpretation and syntactic representations, quantification and scope relations, reference and presupposition, coreference and anaphoric relations.

Prerequisite: Prerequisite(s): LING 53, and LING 111 or LING 112.

LING 117 - Pragmatics (5)

Covers topics central in the study of pragmatics, the interpretation of language use. Topics include conversational implicature, speech acts and discourse understanding, and social deixis.

Prerequisite: Prerequisite(s): LING 53 and LING 101; and LING 111 or LING 112.

LING 118 - Semantics III (5)

Uses the tools learned in courses 53 and 116 (Semantics I and Semantics II), giving students the opportunity to explore important topics with heavy emphasis placed on reading primary-source literature. Readings form the basis for weekly lectures and the discussion section. Prerequisite(s): course 116 and permission of instructor.

LING 120 - Structure of English (5)

Survey of grammatical structure of English and terminology of grammatical description. Covers phonological, morphological, and syntactic structure of English and contrasts it with other languages.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 124 - Language Typology (5)

Introduces the branch of linguistics whose goal is to describe and explain the structural diversity of the world's languages. Focuses on what is known about variation in particular domains (e.g., syllable structure, word order, evidentiality), and how it might be explained.

Prerequisite: Prerequisite(s): LING 111 or LING 112, and LING 101.

LING 125 - Foundations of Linguistic Theory (5)

Survey of some of the history and foundational assumptions of generative grammar; also looks at some of the influence of

generative linguistic theorizing on disciplines outside linguistics, notably psychology and philosophy.

Prerequisite: Prerequisite(s): LING 113 or LING 116.

LING 127 - History of Linguistics (5)

Topics in the history of linguistics, with a special focus on the 20th century.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 140 - Language Change (5)

Methods and problems in the study of change in linguistic systems. Reconstruction of proto-languages; the comparative method. Theories of change and implications for the theory of grammar.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 141 - Ellipsis (5)

Introduction to and survey of the ellipsis in natural language, including the typology of ellipsis processes, cross-linguistic uniformity and variation in ellipsis, and theoretical approaches and issues.

Prerequisite: Prerequisite(s): LING 53 and LING 101; and LING 111 or LING 112.

LING 144 - Computational Methods for Linguists (5)

Introduction to computational methods for linguists with little background in computer programming. Possible topics include: regular expressions, annotation, databases, and search. Students learn contemporary techniques in team-based programming and annotation.

Prerequisite: Prerequisite(s): LING 50, LING 53, and either LING 111 or LING 112. Enrollment is restricted to linguistics and language studies majors.

LING 145 - Native Languages of North America (5)

Selective survey of the indigenous languages of North America, including a formal/structural component and an historical/social component. Topics include typological properties of these languages, current status, and revitalization efforts.

Prerequisite: Prerequisite(s): LING 101, and either LING 111 or LING 112.

LING 147 - Quantitative Methods in Linguistics (5)

Introduces quantitative methods for linguistics. Focuses on categorical data and continuous data, and using R. Students learn the basics of probability, statistics, and experimental design, and use R to apply them to linguistic data sets.

Prerequisite: Prerequisite(s): LING 53 and LING 101, and either LING 111 or LING 112.

LING 151 - Phonetic Analysis (5)

Introduction to instrumental phonetic analysis—analysis using experimental methods. Emphasis is on the acoustics and perception of speech.

Prerequisite: Prerequisite(s): LING 101.

LING 152 - Applied Phonetics (5)

Examines areas in which phonetic analysis and experimentation are used in practice. Emphasizes problem-solving, experiments, and analytical tasks.

Prerequisite: Prerequisite(s): LING 151.

LING 154 - Language and Social Identity (5)

Introduction to sociolinguistics exploring the relationship between language and such social parameters as social status, ethnicity, race, gender, etc., including the role of language differences in the creation of social stereotypes. Emphasis on gathering, examining, and reporting data.

Prerequisite: Prerequisite(s): LING 101, and either LING 111 or LING 112.

LING 155 - Language and Cognition (5)

Introduces and examines some of the foundational assumptions, practices, and methods of generative grammar in comparison to those of other areas of cognitive science, notably psychology and philosophy.

Prerequisite: Prerequisite(s): LING 111 or LING 112; and LING 53 and LING 101.

LING 157 - Psycholinguistics and Linguistic Theory (5)

Theory and methods in psycholinguistics, covering perception, production, and acquisition of language and linguistic structure. A hands-on, laboratory-style introduction to the topic, focusing on the relation between experimental findings and linguistic theory. Students cannot receive credit for this course and course 257.

Prerequisite: Prerequisite(s): LING 102 or LING 105 or LING 113 or LING 116. Enrollment is restricted to linguistics and language studies majors.

LING 158 - Advanced Psycholinguistics (5)

Advanced topics in psycholinguistics and experimental linguistics, contemporary memory models, computational models of comprehension and production, and neurolinguistic findings and methodologies. Student work revolves around an extended research project in which students learn to apply advanced analytical techniques.

Prerequisite: Prerequisite(s): LING 157. Enrollment is restricted to linguistics and language studies majors.

LING 160 - Language Engineering (5)

Addresses a particular problem in language engineering, chosen for its practical and theoretical interest and its tractability. The entire course focuses on a team project to

design a solution to the problem. Permission of instructor required.

LING 164 - Linguistics for Engineers (5)

Introduction to computational linguistics for engineers with a focus on providing background and skills in linguistics. Students are expected to already have programming skills and basic computer science. Knowledge of shell scripting or a scripting language suggested.

Prerequisite: Prerequisite(s): CSE 10 and CSE 14, or permission of instructor.

LING 180 - Structure of a Particular Language (5)

Topics in the phonology, morphology, syntax, or semantics of a language that is the research interest of the instructor. The language investigated changes with each offering of the course.

Prerequisite: Prerequisite(s): LING 101; and LING 111 or LING 112.

LING 181 - Structure of Romance Languages (5)

Discusses topics in the phonology, syntax, and semantics of Romance languages, with emphasis left to the discretion of the instructor. Students read original research articles and pursue empirical investigation of Romance languages by collecting data from scholarly publications, fieldwork, and/or corpus analysis. Some knowledge of Italian, French, or Spanish is required.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 182 - Structure of Spanish (5)

The phonology and syntax of Spanish, studied from a modern linguistic perspective. Some knowledge of Spanish is required.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 183 - Structure of French (5)

The phonology, morphology, and syntax aspects of French. Some knowledge of French is helpful.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 185 - Structure of Russian (5)

The phonology, morphology, and syntax of Russian. Some knowledge of Russian is helpful.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 186 - Structure of German (5)

Phonological, morphological, and syntactic aspects of the structure of the German language. Some knowledge of German is required.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 187 - Structure of Japanese (5)

The phonology, morphology, and syntax of Japanese.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 188 - Structure of Turkish (5)

The phonology, morphology, and syntax of Turkish.

Prerequisite: Prerequisite(s): LING 101; and LING 111 or LING 112.

LING 189 - Structure of Arabic (5)

The phonology, morphology, and syntax of Arabic. (Mainly modern standard, but also some regional dialects.) No knowledge of Arabic is required.

Prerequisite: Prerequisite(s): LING 101, and LING 111 or LING 112.

LING 193 - Field Study (5)

Students submit petition to sponsoring agency.

LING 195 - Senior Thesis (5)

Deadline for submission of thesis proposal is one year in advance of proposed completion. Students submit petition to sponsoring agency.

LING 198 - Independent Field Study (5)

Provides for department-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision by correspondence). Preparation and approval must be completed by the fifth day of instruction of any given quarter. Students submit petition to sponsoring agency.

LING 199 - Tutorial (5)

Students submit petition to sponsoring agency.

LING 199F - Tutorial (2)

Students submit petition to sponsoring agency.

Graduate

LING 211 - Phonology A (5)

First part of a three quarter introduction to phonology. Topics of the sequence include fundamentals of acoustic phonetics; introduction to optimality theory; theories of syllabification, stress, and prosodic organization; prosodic morphology; advanced issues in faithfulness and correspondence; segmental and suprasegmental processes.

Prerequisite: Enrollment is restricted to graduate students or by permission of instructor.

LING 212 - Phonology B (5)

Second part of a three quarter introduction to phonology. Topics of the sequence include fundamentals of acoustic phonetics; introduction to optimality theory; theories of syllabification, stress, and prosodic organization; prosodic morphology; advanced issues in faithfulness and correspondence; segmental and suprasegmental processes.

Prerequisite: Prerequisite(s): LING 211. Enrollment is restricted to graduate students or by permission of instructor.

LING 214 - Phonetics (5)

Introduction to phonetic theory concentrating on acoustic phonetics and speech perception along with common experimental methods, the role of phonetic principles in explaining phonological patterns and markedness.

Prerequisite: Enrollment is restricted to graduate students or by permission of instructor.

LING 216 - Phonology Proseminar (5)

One or more topics in phonological theory. Topics vary from year to year, covering literature and current research in phonology.

Prerequisite: Prerequisite(s): LING 212. Enrollment is restricted to graduate students or by permission of instructor.

LING 219 - Phonology Seminar (5)

Advanced topics in phonology drawn from the current research interests of the instructor.

Prerequisite: Prerequisite(s): LING 212. Enrollment is restricted to graduate students or by permission of instructor.

LING 219G - Phonology Seminar (3)

Advanced topics in phonology drawn from the current research interests of the instructor. Three-credit version of course 219. Does not require a final paper.

Prerequisite: Prerequisite(s): LING 212. Enrollment is restricted to graduate students.

LING 221 - Syntax A (5)

Introduction to syntactic theory. Phrase structure; subcategorization; lexical entries; passive; infinitival constructions.

Prerequisite: Enrollment is restricted to graduate students or by permission of instructor.

LING 222 - Syntax B (5)

Continuation of Syntax A. The syntax of unbounded dependencies, including constituent questions, relative clauses, clefts, topicalization. Constraints on extraction; unbounded versus successive cyclic movement; the licensing of gaps.

Prerequisite: Prerequisite(s): LING 221. Enrollment is restricted to graduate students or by permission of instructor.

LING 226 - Proseminar in Syntax (5)

In-depth investigation of some topic in syntactic theory. Topics vary from year to year, covering literature and current research in grammatical structure from varying theoretical perspectives.

Prerequisite: Prerequisite(s): LING 222. Enrollment is restricted to graduate students.

LING 226G - Proseminar in Syntax (3)

In-depth investigation of some topic in syntactic theory. Topics vary from year to year, covering literature and current research in grammatical structure from varying theoretical perspectives. Three-credit version of course 226. Does not require a final paper.

Prerequisite: Prerequisite(s): LING 222. Enrollment is restricted to graduate students.

LING 229 - Syntax Seminar (5)

Advanced topics in syntax drawn from the current research interests of the instructor.

Prerequisite: Prerequisite(s): LING 222. Enrollment is restricted to graduate students or by permission of instructor.

LING 229G - Syntax Seminar (3)

Advanced topics in syntax drawn from the current research interests of the instructor. Three-credit version of course 229. Does not require a final paper.

Prerequisite: Prerequisite(s): LING 222. Enrollment is restricted to graduate students.

LING 231 - Semantics A (5)

Introduction to linguistic semantics: nature of lexical entries, thematic relations, representation of logical form; relation between semantic interpretation and syntactic representation, quantification and scope relations, reference and presupposition.

Prerequisite: Enrollment is restricted to graduate students or by permission of instructor.

LING 232 - Semantics B (5)

Model-theoretic semantics for natural language. Truth-conditional, compositional semantics. Various logical ontologies and their application to natural language categories. Dynamic interpretation of discourse and anaphoric relations. Treatment of illocutionary force.

Prerequisite: Prerequisite(s): LING 231. Enrollment is restricted to graduate students or by permission of instructor.

LING 236 - Proseminar in Semantics (5)

In-depth investigation of some topic in semantics and pragmatics. Topics vary from year to year, covering literature and current research in linguistic semantics and pragmatics.

Prerequisite: Prerequisite(s): LING 231. Enrollment is restricted to graduate students or by permission of instructor.

LING 236G - Semantics Proseminar (3)

In-depth investigation of some topic in semantics and pragmatics. Topics vary from year to year, covering literature and current research in linguistic semantics and pragmatics. Three-credit version of course 236. Does not require a final paper.

Prerequisite: Prerequisite(s): LING 231. Enrollment is restricted to graduate students, or by consent of instructor.

LING 239 - Semantics Seminar (5)

Advanced topics in semantics drawn from the current research interests of the instructor.

Prerequisite: Prerequisite(s): LING 232. Enrollment is restricted to graduate students or by permission of instructor.

LING 239G - Semantics Seminar (3)

Advanced topics in semantics drawn from the current research interests of the instructor. Three-credit version of course 239. Does not require a final paper.

Prerequisite: Prerequisite(s): LING 232. Enrollment is restricted to graduate students.

LING 240 - The Pedagogy of Linguistics (1)

Provides training for graduate students in university-level pedagogy in general and in the pedagogy of linguistics specifically. Under the supervision of a faculty member, coordinated by a graduate student with substantial experience as a teaching assistant.

Prerequisite: Enrollment is restricted to graduate students.

LING 244 - Computational Methods for Linguists (5)

Practical introduction to computational methods for linguists. Topics covered: database development; indexation and search; morphological and syntactic parsing; and modern annotation methodologies. Students concurrently learn Python and JavaScript. No background in programming is required.

Prerequisite: Enrollment is restricted to graduate students, or by consent of the instructor.

LING 248 - Topics in Computational Methods and Models (5)

Seminar in computational approaches in linguistics and the language sciences with topics drawn from the current interests of the instructor.

Prerequisite: Prerequisite(s): LING 221 and LING 231. Enrollment is restricted to linguistics graduate students.

LING 249 - Morphology Seminar (5)

Presents theoretical and descriptive issues, particularly those raised by the framework of distributed morphology and its current competitors. Course work consists of readings, squibs, and a term paper.

Prerequisite: Enrollment is restricted to graduate students.

LING 249G - Morphology Seminar (3)

Presents theoretical and descriptive issues, particularly those raised by the framework of distributed morphology and its current competitors. Coursework consists of readings and squibs. Three-credit version of course 249. Does not require a final paper.

Prerequisite: Enrollment is restricted to graduate students.

LING 257 - Psycholinguistics and Linguistic Theory (5)

Theory and methods in psycholinguistics, covering perception, production, and acquisition of language and linguistic structure. A hands-on, laboratory-style introduction to the topic, focusing on the relation between experimental findings and linguistic theory. Students cannot receive credit for this course and course 157 or 257G

Prerequisite: Enrollment is restricted to graduate students.

LING 258 - Advanced Psycholinguistics (5)

Advanced topics in psycholinguistics and experimental linguistics. Contemporary memory models. Computational models of comprehension and production. Neurolinguistic findings and methodologies. Student work revolves around an extended research project in which students learn to apply advanced analytical techniques. Graduate students have separate evaluation criteria. Students cannot receive credit for this course and course 258G.

Prerequisite: Prerequisite(s): LING 257. Enrollment is restricted to graduate students.

LING 258G - Advanced Psycholinguistics (3)

Advanced topics in psycholinguistics and experimental linguistics. Contemporary memory models. Computational models of comprehension and production. Neurolinguistic findings and methodologies. Student work revolves around an extended research project in which students apply advanced analytical techniques. Graduate students have separate evaluation criteria. Three-credit version of course 258. Does not require a final paper. Students cannot receive credit for this course and course 258.

Prerequisite: Prerequisite(s): LING 257. Enrollment is restricted to graduate students.

LING 259 - Phonetics Seminar (5)

Advanced topics in acoustic and articulatory phonetics.

Prerequisite: Prerequisite(s): LING 214. Enrollment is restricted to graduate students.

LING 259G - Phonetics Seminar (3)

Advanced topics in acoustic and articulatory phonetics. Three-credit version of course 259. Does not require a final paper.

Prerequisite: Prerequisite(s): LING 214. Enrollment is restricted to graduate students.

LING 279 - Research Seminar in Psycholinguistics (5)

Contemporary research in psycholinguistic theory models, and methods. Topics vary with research interests of faculty and graduate students.

Prerequisite: Enrollment is restricted to graduate students or by permission of instructor.

LING 280 - Proseminar in Experimental Linguistics (5)

Examines experimental design and analysis for gathering linguistic data; the advantages and disadvantages of major response measures, including reaction times; interaction with extra-grammatical factors; and statistics on categorical and continuous measures. Students present results in research papers. Students cannot receive credit for this course and course 280G.

Prerequisite: Enrollment is restricted to graduate students.

LING 280A - Linguistic Investigation (5)

Methods of primary linguistic investigation. Close study of one language typologically different from English. Data analysis and elicitation techniques.

Prerequisite: Enrollment is restricted to graduate students.

LING 280B - Linguistic Investigation (5)

Linguistic Investigation

Prerequisite: Enrollment is restricted to graduate students.

LING 280G - Proseminar in Experimental Linguistics (3)

Examines experimental design and analysis for gathering linguistic data: the advantages and disadvantages of major response measures, including reaction times; interaction with extra-grammatical factors; and statistics on categorical and continuous measures. Three-credit version of course 280. Does not require a final paper.

Prerequisite: Enrollment is restricted to graduate students.

LING 282 - Field Methods (5)

Exploration of a language previously unfamiliar to students through elicitation from a native speaker. Discussion of elicitation techniques. Students investigate selected aspects of the language in depth. Enrollment is restricted to graduate students; enrollment is by instructor permission only.

LING 290 - Research Seminar (5)

A research seminar for undergraduate and graduate students to develop the skills of the profession. Critical reading, reviewing, teaching, presentation, and writing. Students submit petition to sponsoring agency. Enrollment is restricted to graduate students or by permission of instructor.

LING 295 - Directed Reading (5)

Directed reading which does not involve a term paper. Enrollment is restricted to graduate students or by permission of instructor.

LING 296 - Linguistics Colloquium (2)

Independent graduate-level activities and assignments relating to professionalism; organizing and attending colloquium and conferences; participation in discussion at such events; and preparation of commentaries on academic papers. Students submit petition to sponsoring agency. Enrollment is restricted to linguistics graduate students.

LING 297A - Independent Study (5)

Enrollment restricted to graduate standing or consent of instructor.

LING 297B - Independent Study (10)

Enrollment restricted to graduate standing or consent of instructor.

LING 297C - Independent Study (15)

Enrollment restricted to graduate standing or consent of instructor.

LING 297F - Independent Study (2)

Two-credit independent study. Enrollment restricted to graduate students, or by consent of instructor.

LING 299A - Thesis Research (5)**LING 299B - Thesis Research (10)****LING 299C - Thesis Research (15)**

LIT - LITERATURE

Lower-Division

LIT 1 - Literary Interpretation (5)

Close reading and analysis of literary texts, including representative examples of several different genres and periods. An introduction to practical criticism required of all literature majors; should be completed prior to upper-division work in literature.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to first-year students and sophomores, or literature and proposed literature majors and literature minors.

LIT 61C - Devils, Dervishes, and Bawdy Tales from Baghdad to Canterbury: The Story within the Story (5)

A story within a story, the frame tale is a playful and enduring literary genre. Focuses on frame tales of the global middle ages, tracing their movement from the Indian subcontinent to the British Isles. Readings include selections from Fables of Bidpai, The Arabian Nights, Libro de Buen Amor, and The Canterbury Tales. (Formerly The Frame Tale.)

LIT 61F - Introduction to Reading Fiction (5)

Close reading of short stories and some novels with the aim of developing critical methods for the analysis and interpretation of prose fiction. Topics include character, plot, narrative structure, and the poetics of prose. The course topic changes; please see the Class Search for the current topic.

LIT 61H - Introduction to Film Analysis (5)

Introduces techniques for the close reading of film, with particular attention to film form (shot-by-shot analysis), cinematic codes, narrative structure, and the ideological burdens of the basic cinematic apparatus. Case studies of select works by major directors from the Hollywood studio period.

LIT 61J - Introduction to Jewish Literature and Culture (5)

Surveys 3,000 years of Jewish literature and culture. Themes include origins of the Jews in the ancient world; formation and persistence of the Jewish diaspora; coherence and diversity of Jewish experience; Jewish narrative and textual traditions; interaction between Jews and other cultures; tensions between tradition and modernity.

LIT 61K - Introduction to the Fairy Tale (5)

Introduces the fairy tale as a genre, including historical, cultural, and political contexts; relation to identity, performance, transnationalism; contemporary transformations of tales and their expression in other media (e.g., film, art, theater); and current scholarship.

LIT 61L - True Stories: Memoir (5)

Historical overview of the genre from Augustine to contemporary experiments in memoir. Student write weekly creative-critical responses and a final creative-critical paper.

LIT 61M - Approaches to Classical Myth (5)

Introduction to Greek myths, including selected ancient texts and visual artifacts, historical and cultural context of their creation and reception, modern theoretical approaches such as structuralism and psychoanalysis, and interpretations in various media.

LIT 61N - Introduction to Children's Literature (5)

Introduction to children's literature as a literary genre, including historical, cultural, and political considerations of the genre's relationship to gender, race, sexuality, nationalism, colonialism, and popular culture through primary texts, secondary criticism, and other media (e.g., film, illustration, comics).

LIT 61P - Introduction to Reading Poetry (5)

An introduction to selected modes and forms of poetry with an emphasis on close textual analysis. Examples will be taken from different historical periods and poetic traditions. Course topic changes; please see the Class Search for the current topic.

LIT 61R - Race in Literature (5)

An investigation into the various uses and abuses of race in literature. Course topic changes; see the Class Search for current topic.

LIT 61S - Sacred Texts (5)

Studies religious texts held sacred by different cultures and communities around the world, concentrating primarily on their literary dimensions. Course topic changes; please see the Class Search for current topic.

LIT 61T - Travel Narratives (5)

Travel narratives may be of many types: odysseys of self-discovery, adventures in nature, or journeys to exotic lands off the beaten track. This course examines travelers' accounts drawn from periods ranging from the Middle Ages to the contemporary.

LIT 61U - Introduction to Speculative Fiction (5)

Examines speculative and science fiction (SF) texts to develop critical methods for the analysis and interpretation of SF as a critique of science, technology, and culture. Themes include encounters across species; novelty and change; expanded concepts of life; and the role of technology in human development.

LIT 61W - Writing and Research Methods (5)

Intensive training in the practice of literary analysis and the writing of polished research papers. Topics include manuscript sources, variant editions, reading techniques, publication technologies, web research. Workshop format. Strongly recommended for majors and/or transfer students who have completed LIT 1 or its equivalent.

LIT 61X - Tragedy: Learning Through Suffering (5)

Reading representative Greek tragedies with attention to history, form, and content. Course examines how Greek tragedy responds to the fact of human mortality, i.e., to the myriad and culturally specific ways in which characters in tragedy accept, evade, or deny death.

LIT 61Z - Introduccion a generos literarios de Espana y America Latina (5)

Speaking, reading, and writing proficiency in Spanish required. The study of poetry, drama, and prose in Spain and Latin America.

LIT 80B - Monsters and Literature (5)

Every age has the monsters it needs. From medieval marvels to GMO chimeras, monsters serve as figures of a culture's deepest fears, anxieties, and hidden desires. This course takes a multidisciplinary, transhistorical approach to the problems and promises of monsters, and introduces monster theory.

LIT 80D - Literary Traditions of India (5)

Introduces the fundamental questions of interpretation and cultural analysis through engagement with varying literary

and cultural traditions of the Indian subcontinent since antiquity. Emphasis is on language, communicative media, literary form, memory, transmission, interpretive approaches, and translation. The course topics change; please see the Class Search for the current topic.

LIT 80E - Animals and Literature (5)

Examines the copresence in literary works (fiction and non-fiction prose and poetry) of nonhuman and human animals from antiquity to the present across a variety of cultures.

LIT 80H - The Politics of Fashion (5)

Surveys the politics of fashion, focusing on how style has shaped ideology, culture, power, revolution, resistance, and a variety of identities, including nation, race, ethnicity, gender, sexuality, and class.

LIT 80I - Topics in American Culture (5)

A history of one or more cultural genres in written, visual, and/or musical forms. Course topic changes; please see the Class Search for the current topic.

LIT 80K - Topics in Medical Humanities (5)

Medical Humanities designate an interdisciplinary field of humanities (literature, philosophy, ethics, history, and religion) concerned with application to medical education and practice. The humanities provide insight into the human condition, suffering, personhood, and our responsibility to each other; and offer a historical perspective on medical practice.

LIT 80L - The Holocaust: The Destruction of European Jewry (5)

Focus is on the destruction of the Jews of Europe by Nazi Germany. Issues are historically grounded, and include works of literature, social sciences, philosophy, and film.

LIT 80M - China in the Post-Reform Period (5)

Speaking, reading, and writing proficiency in Mandarin Chinese required. Lectures, discussions, writing assignments, and all readings in Chinese. An investigation of Chinese culture, society, and politics in the post-1978 period through literature, film, critical essays, and internet media. Topics include labor, gender, generational divisions, family, urban life, social media, nationalism.

LIT 80N - Latino Expressions in the U.S (5)

An introduction to Latino literature and culture in the U.S. A study of the creative expressions of Chicanos/as, Nuyoricans, Cuban Americans, and other Latin Americans in the U.S.

LIT 80O - Love, Anarchy, Revolution (5)

Considers love, anarchy, and revolution as three modes of liberation. Concentrating on the contemporary period, with explorations of philosophy, literature, film, popular culture, political movements and manifestos, and personal or collective experience, this course considers these variant, but overlapping, scenes of the dialectics of liberation.

LIT 80Q - Jane the Virgin: Latinx Readers and (Latin) American Literature (5)

What does a telenovela spoof about a virgin Latinx mother and aspiring romance novelist have to do with literature? Course explores Jane the Virgin as a commentary on the tastes, identities, and politics of 21st-century Latinx readers and writers.

LIT 80T - Literature and Magic (5)

Explores the history of magic in relation to the written word. Concerns include the gendering of magic; interconnections among Judaic, Arabic, and Christian worlds; magic in the age of rationalism; and the recent popular fascination with magic.

LIT 80U - Introduction to Contemplative Reading (5)

Combines contemplative practice, including meditative practice, with close reading of literary works to provide students with a more precise ability to interpret and respond to texts, both literary and non-literary. Works include poetry, imaginative prose, and essays.

LIT 80V - Literature and History (5)

Examines literature's relationship to the past and to the experience of history. Course topic changes; please see the Class Search for current topic.

LIT 80W - Captive Minds: The Literature of Pre-modern Slavery (5)

Examines the literary production of slave societies by looking at the literatures of several pre-modern slave societies; also develops a cultural-historical narrative that explains the origins of genocidal forms of plantation slavery in the Americas by tracing their origins back to Greece and Rome.

LIT 80X - Global Narratives (5)

A survey of global narratives, with a focus on the novel over several centuries, traditions, languages, and cultures.

LIT 80Y - Harry Potter (5)

From *The Sorcerer's Stone* to *The Deathly Hallows*, this course approaches the Harry Potter books and films from a variety of critical angles, using the analytical tools of literary and cultural studies to shed new light on this dizzying phenomenon.

LIT 80Z - Introduction to Shakespeare (5)

Study of representative plays. No previous experience with Shakespeare is assumed.

LIT 81A - Homer's Odyssey (5)

Introduction to Homer's *Odyssey*, its hero, and its world. An epic tale of a man who abandons his family to fight in the Trojan War, then returns two decades later, the *Odyssey* was a profound influence on the culture of ancient Greece and Rome, and continues to shape our self-understanding today.

LIT 87 - Introduction to Literary Topics (2)

Introduces topics in literature. The course topic changes; please see the Class Search for the current topic.

LIT 90 - Introduction to Creative Writing (5)

Introduction to the crafts and techniques of poetry, fiction, and creative non-fiction, identifying and exploring traditional and non-traditional literary forms and genres while working on individual creative writing projects. An author reading and two workshop sections per week.

Prerequisite: Prerequisite: satisfaction of the Entry Level Writing requirement. Enrollment is restricted to first-year students, sophomores, and juniors.

LIT 90X - Introduccion a la Escritura Creativa/Introduction to Creative Writing (5)

Speaking, reading, and writing proficiency in Spanish is required. Explores creative writing from a bilingual (Spanish-English) perspective, and considers bilingualism in the literary arts (como el ejercicio de una identidad), as a way of thinking and a way of being, as a creative lens (el pensamiento de frontera), as a framework, as a border (que quiere ser cruzada).

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing requirement. Enrollment is restricted to first-year, sophomore, and junior students.

LIT 91A - Intermediate Fiction/Prose Writing (5)

An intermediate-level course in fiction designed for prospective applicants to the creative writing concentration.

Prerequisite: Prerequisite(s): LIT 90. Enrollment is restricted to first-year, sophomore, and junior students.

LIT 91B - Intermediate Poetry Writing (5)

An intermediate-level course in poetry designed for prospective applicants to the creative writing concentration.

Prerequisite: Prerequisite(s): LIT 90.

LIT 99A - Tutorial (5)

Study of literature in English or English translation. Students submit petition to sponsoring agency.

LIT 99B - Tutorial (5)

Speaking, reading, and writing proficiency in French, German, Greek, Italian, Latin, Spanish or other non-English language required. Students submit petition to sponsoring agency.

LIT 99C - Tutorial (5)

Study of creative writing. Students submit petition to sponsoring agency.

LIT 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

LIT 101 - Theory and Interpretation (5)

Contemporary approaches to literary and cultural theory, with emphasis on how theoretical perspectives advance and broaden the reading of literary texts. Introduction to important new theoretical developments and their antecedents. Literature majors should complete this course as early as possible. Course topic changes; see the Class Search for the current topic.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to literature and proposed literature majors and literature minors.

LIT 102 - Translation Theory (5)

Promotes the understanding of translation and its role in redefining meanings across epochs and cultures, in establishing common norms, and in advancing mutual intelligibility; but also providing encounters with absolute alterity. Actual translations are used as case studies.

Prerequisite: Prerequisite(s): one year of college-level, non-English language study or the equivalent reading ability in a non-English language.

LIT 110A - The Traditional British Canon, Part I (5)

The constitution of the canon of English literature from Chaucer to Cowper. Critical approach designations: Canons, Histories. Distribution requirements: Poetry, Pre-1750.

LIT 110B - The Traditional British Canon, Part II (5)

Explores poetry and prose from 1800 to 1950 through extensive reading in the Romantics, Victorians, Moderns, articulating the connections among them, and connecting their work to key social, political, scientific, and technological moments defining these eras. Critical approach designations: Canons, Histories. Distribution requirement: Poetry.

LIT 110C - The Traditional U.S. Canon: Beginnings to 1900 (5)

Major works from the colonial and early national periods to 1900, with attention to their social and cultural context. Critical approach designations: Canons, Histories.

LIT 110D - The Traditional U.S. Canon, 1900 to the Present (5)

Major works from 1900 to the present, with attention to their social and cultural context. Critical approach designation: Canons, Histories.

LIT 111B - Geoffrey Chaucer (5)

Close study of Chaucer's poetry, with some attention to relevant cultural, philosophical, and historical issues in the context of the late medieval period. Particular emphasis on The Canterbury Tales. Critical approach designations:

Canons, Histories. Distribution requirements: Poetry, Pre-1750.

LIT 111D - William Shakespeare (5)

Study of representative works by William Shakespeare. Course topic changes; please see the Class Search for the current topic. Critical approach designations: Canons, Media. Distribution requirements: Poetry, Pre-1750.

LIT 111E - Edmund Spenser (5)

Studies in Spenser's major poetry: Faerie Queene, Book I; Epithalamion; Mutabilitie Cantos. Critical approach designations: Canons, Histories. Distribution requirements: Poetry, Pre-1750.

LIT 112A - Jane Austen (5)

Representative Austen novels within political, historical, and cultural context; considers form and genre, nationalism, feminist, postcolonial, and other critical readings. Examines poetry and other writings that illuminate cultural issues of the period, as well as film and other adaptations of Austen's novels. Critical approach designations: Canons, Histories.

LIT 112C - Charles Dickens (5)

Study of representative work by Charles Dickens. Critical approach designations: Canons, Histories.

LIT 112G - William Faulkner (5)

A survey of Faulkner's early fiction; focus on development of theme and technique. Also considers Faulkner as a Southern historian, stressing the relationship between personal and regional experience in time. Critical approach designations: Canons, Geographies.

LIT 112I - Kafka in Translation (5)

An intensive study of the works of Franz Kafka, with reference to the literary, social, and historical context in which his work emerged. Course topic changes; please see the Class Search for current topic. Critical approach designations: Canons, Geographies.

LIT 112K - Herman Melville (5)

Study of representative work by Herman Melville, including novels and short stories. Critical approach designations: Canons, Histories.

LIT 112M - Twain (5)

A chronological survey of Twain's major works, with an emphasis on the development of style and content. Among other works, *The Innocents Abroad*, *Roughing It*, *Life on the Mississippi*, and *Huckleberry Finn* are considered. Critical approach designations: Canons, Power and Subjectivities.

LIT 112P - Gwendolyn Brooks (5)

An examination of the major works of Gwendolyn Brooks, the first African American to win the Pulitzer Prize (in 1950), with particular attention to questions of race, gender, and class as modes through which to consider questions of form and

content. Critical approach designations: Canons, Power and Subjectivities. Distribution requirement: Poetry.

LIT 114A - Orlando Furioso (5)

Reading the 46-canto Italian Renaissance adventure poem of Ludovico Ariosto, the most popular book of its century and a classic of humanist literature, students consider literary tradition, Renaissance humanism, and how entertainment literature may articulate moral and political criticism. Critical approach designations: Canons, Genres. Distribution requirement: Poetry, Pre-1750.

LIT 114C - Dante's Divine Comedy (5)

Reading of the Inferno, the Purgatorio, and selected canti of the Paradiso, along with selections from Dante's lyrics and from medieval Italian and French poetry. Critical approach designations: Canons, Genres. Distribution requirements: Poetry, Pre-1750.

LIT 114D - Goethe's Faust (5)

An intensive study of Goethe's Faust, Parts I and II. All works are read in English. Critical approach designations: Canons, Histories. Distribution requirement: Poetry.

LIT 116B - Encountering Antiquity (5)

Introduces selected modes and forms of poetry with emphasis on close textual analysis. Considers uses of Greek and Roman antiquity in English/Anglo-American poetic practice from early to post-modernity by historicizing the reproduction of antiquity through poetic forms. Critical approach designations: Canons, Genres. Distribution requirement: Poetry, Pre-1750. (Formerly Pre- and Early Modern Literature 127.)

LIT 116C - Ancient Myth/Modern Poetics (5)

Reading of Greek and Roman texts (in English translation) which utilize mythic material juxtaposed with later poems written in response to them. Readings from Homer, Sappho, Greek drama, Petrarch, modern poets; discussion of concepts of myth, strategies of response. Critical approach designations: Canons, Genres. Distribution requirement: Poetry, Pre-1750.

LIT 116F - Knights, Ladies, and Werewolves: Medieval French Literature in Translation (5)

Medieval French literature appeared rather suddenly in the age of castles, Crusades, knights, and chivalry, and spawned a remarkable array of genres: epic, romance, lyric, *lais*, saint's lives, *fabliaux* (bawdy tales), drama, histories, and more. This course provides a sampling of the variety of this rich tradition. Critical approach designations: Canons, Histories. Distribution requirement: Pre-1750.

LIT 116G - Victorian Monsters (5)

Through an examination of monsters in literature, course explores anxieties, fears, and ideals of Victorian society, paying close attention to issues of gender, sexuality, class,

race, empire, scientific, and technology. Critical approach designations: Canons, Histories.

LIT 117A - Old Iranian Literature (5)

The pre-Islamic literature of Iran is one of the world's richest literary traditions, and forms part of the Indo-European poetic heritage. Course offers an overview of and introduction to indigenous Iranian literary traditions. The course topic changes; see the Class Search for the current topic. Critical approach designations: Canons, Histories. Distribution requirements: Global, Poetry, Pre-1750.

LIT 118A - Hebrew Bible (5)

Introduction to textual, source, redaction, historical, and literary criticism of individual books of the Hebrew Bible and to exegesis as science and ideology. Covers texts and iconography of neighboring mythological traditions (Mesopotamian, Ugaritic, Egyptian, Greek) when appropriate. Course topic changes; see the Class Search for current topic. Critical approach designations: Canons, Histories. Distribution requirement: Pre-1750.

LIT 120A - Topics in Poetry (5)

Close reading--critical and creative--of poetry. Examines how poets teach, through their writing, to radically attend to reading. The course topics changes; please see the Class Search for current topic. Critical approach designations: Genres, Histories. Distribution requirement: Poetry.

LIT 120B - Poetry of the 17th Century (5)

Readings in the works of Donne, Jonson, Herbert, Herrick, Marvell, and others. Critical approach designations: Genres, Histories. Distribution requirements: Poetry, Pre-1750.

LIT 120C - Victorian Poetry (5)

A reading of the major Victorian poets from Tennyson to early Yeats. Critical approach designations: Genres, Histories. Distribution requirement: Poetry.

LIT 120D - Nineteenth-Century American Poetry (5)

The major figures and important movements from Poe to Emerson through Whitman and Dickinson. Critical approach designations: Canons, Genres. Distribution requirement: Poetry.

LIT 120E - Early- to Mid-20th-Century American Poetry (5)

Poets include Emily Dickinson, Walt Whitman, H.D. (Hilda Doolittle), William Carlos Williams, Marianne Moore, Wallace Stevens, Langston Hughes, T.S. Eliot, and others, with attention to leading movements and critical issues. Critical approach designations: Canons, Genres. Distribution requirement: Poetry. (Formerly English Language Literature 120D.)

LIT 120F - Topics in Modern Poetry (5)

Survey of modern poetry; includes a variety of poetic forms. Course topic changes; see the Class Search for current topic.

Critical approach designations: Genres, Histories. Distribution requirement: Poetry.

LIT 120H - American Poetry Since World War II (5)

Major poets since World War II, with attention to leading movements and critical issues. The course topic changes; please see the Class Search for the current topic. Critical approach designations: Genres, Histories. Distribution requirement: Poetry.

LIT 120J - Contemporary American Poetry (5)

Surveys contemporary poetry with attention to race, sex, and gender; includes a variety of poetic forms. Course topic changes; see the Class Search for the current topic. Critical approach designations: Genres, Histories. Distribution requirement: Poetry.

LIT 121D - Medieval Epic (5)

Medieval reworkings of stories and motifs drawn from the barbarian or Germanic tradition including Beowulf, The Song of Roland, Nibelungenlied, Snorri Sturlason: King Harald's Saga from Heimskringla, and Njal's Saga. Critical approach designations: Canons, Genres. Distribution requirement: Poetry, Pre-1750.

LIT 121G - The Idea of Poetry (5)

Focus is on the theories of rhetoric and poetry written between 1580 and 1620. Texts include English, Italian, French, and Spanish works. Critical approach designations: Genres, Histories. Distribution requirements: Poetry, Pre-1750.

LIT 121H - Classical Poetics in Elizabethan Verse (5)

An introduction to Elizabethan poetry and poetics, with emphasis on shorter lyrics (sonnets, ballads, etc.), pastoral, erotic epyllia, devotional poetry, etc. Examines various Classical and Continental strains of influence at play in the production of English verse in the later 16th century, including Classical rhetoric, Ovidian mythology, and Petrarchanism. Critical approach designations: Canons, Genres. Distribution requirements: Poetry, Pre-1750.

LIT 121J - Medieval Romance (5)

A study of representative texts from the 12th through the 15th centuries. Questions of subjectivity, sexuality, and history in romance narratives are addressed. Critical approach designations: Genres, Power and Subjectivities. Distribution requirement: Pre-1750.

LIT 121K - Radical Moderns/Poetry International (5)

Focuses on a generation of early 20th-century poets from Asia, Latin America, the Middle East, and beyond. Studying their poetic output through the lens of modernism and other genres, students discover a truly global moment in literature/politics. Critical approach designations: Genres, Power and Subjectivities. Distribution requirements: Global, Poetry.

LIT 121L - Green Ache: Ecopoetics, Race, and Material (5)

Examines ecopoetics as theory, politic, and field of discourse. Focuses on literary and artistic production across a variety of texts that explore the role of race and representation, including literary theory, film, and visual art. Critical approach designations: Genres, Power and Subjectivities. Distribution requirement: Poetry.

LIT 121M - Blue and Brown: Race, Gender, and Blackness (5)

Examines Blackness as race, identity, politic, field, and discourse. Exploration guided by poetry, narrative fiction, video, film, music, and the daily news. Critical approach designations: Genres, Power and Subjectivities. Distribution requirement: Poetry.

LIT 124A - Masters of Modernist Short Fiction (5)

Acquaints students with the main stylistic features of modernism through the close reading of short stories. Critical approach designations: Genres, Histories.

LIT 125A - Ancient Novel (5)

Roman prose fiction--the ancient novel and texts from other genres--in relation to the history of the novel. Critical approach designations: Genres, Histories. Distribution requirements: Pre-1750.

LIT 125B - Studies in the English Novel (5)

From the 18th to the 20th century. The course topic changes; please see the Class Search for the current topic. Critical approach designations: Genres, Geographies.

LIT 125C - Great French Novels (5)

Provides an introduction to important French novels of the nineteenth and twentieth centuries. All works are read in English. Critical approach designations: Genres, Geographies.

LIT 125D - Modern German Fiction (5)

Selected readings from the novel and novella in 20th-century German literature. All works are read in English. Critical approach designations: Genres, Histories.

LIT 125H - Modern Arabic Novel (5)

Examines the literary and cultural production of the modern Arab world, with an emphasis on the novel since the 1950s. Includes discussion of film, poetry, and mass culture. Critical approach designations: Genres, Histories. Distribution requirement: Global.

LIT 125I - What is the Novel? (5)

A survey of global narratives, focusing on the novel over several centuries, traditions, languages, and cultures. Examines the novel as a particular genre of literary expression; also examines its formative relationship with historical, social, cultural, and political processes. Critical approach designations: Genres, Power and Subjectivities. Distribution requirement: Global.

LIT 126A - International Cyberpunk (5)

Cyberpunk, considered a subgenre within science fiction, has achieved international prominence and presents interesting interpretative challenges. Course examines some issues as manifested in representative texts. Critical approach designations: Genres, Histories. Distribution requirement: Global.

LIT 126F - Speculative Fiction As Cultural Theory and Practice (5)

Readings of contemporary and historical speculative fiction, including examination of representational practices, technologies, and politics that emerge from and/or circumscribe their interrelations. Course topic changes; please see the Class Search for current topic. Critical approach designations: Genres, Histories.

LIT 127D - Travel Writing (5)

Examines the genre of travel writing and the critical and cultural issues it engages. Critical approach designations: Genres, Geographies. Distribution requirements: Global. (Formerly World Literature and Cultural Studies 138.)

LIT 130A - Ancient Literature in Cross-Cultural Perspective (5)

Comparative approaches to the study of ancient literature and culture. Topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Global, Pre-1750.

LIT 130B - Travel Writing and Intercultural Relations in the Middle Ages (5)

Provides a historically-based and theoretically-informed introduction to medieval and early modern European contacts with other cultures. Readings include fourth through 17th-century writings about travel, discovery, and conquest in Asia, Africa, and America. Critical approach designations: Geographies, Histories. Distribution requirement: Global, Pre-1750.

LIT 130D - The Global Middle Ages (5)

Examination of texts from the global Middle Ages in a range of world cultures and traditions, with attention to their historical and social contexts. Course topic changes; please see the Class Search for the current topic. Satisfies the Global and Pre- and Early Modern distribution requirements.

LIT 131A - Problems (5)

Considers a range of phenomena from a critical world perspective: subject formation; human activity on a global scale; questions that demand a worlded answer. Course topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 131B - Space/Time (5)

The world as understood through spatial and temporal divisions: regions, nations, empires, periods in a worlded perspective. Course topic changes; see the Class Search for

current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 131C - Worldings (5)

How to think about the world as a whole: representations, networks, systems, taxonomies, versions of globalization. Course topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 131D - Literature in a Global Context (5)

Comparative examination of fiction in the modern world and of fictional responses to social change and crisis. Course topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirements: Global.

LIT 132A - Germany in War and Peace (5)

Study of selected texts reflecting German society at war or in that ambiguous state called peace. Attention is given to the place of literature in German cultural life and its special role in the formation of national identity. Critical approach designations: Geographies, Power and Subjectivities.

LIT 133D - Topics in the Literatures and Cultures of Southern Asia (5)

Provides in-depth analysis of literary and cultural phenomena of southern Asia. The course topic changes; see the Class Search for the current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 133E - Topics in Asian Modernism (5)

Examines cultural practice in 20th-century Asia. Examines literary and cultural practice following the collapse of imperial China. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 133F - Pacific Rim Discourse (5)

Examines the rise of the idea of the Pacific Rim: its historical background, ideological assumptions, and various forms of its cultural manifestations. Critical approach designations: Geographies, Histories. Distribution requirements: Global.

LIT 133G - The Nuclear Pacific (5)

Examines a range of cultural representations, literature, and films that chart the transnational history and representational legacy of uranium and nuclear power. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 133H - Haunted by the Forgotten War: Literature and Film of the Korean War (5)

The Korean War has the dubious distinction of being known as the Forgotten War in a U.S. context. Course examines novels, short stories, film, popular visual narratives, and historical accounts of the Korean War and its often-circuitous legacies.

LIT 133I - Global Japan: Literatures of the Japanese Diaspora (5)

Examines the fiction of ethnic Japanese writers who are located outside of Japan. How do these writers situate themselves vis-a-vis Japan and the countries in which they were born or reside? How does their status as outsiders enable them to view Japan's social problems and colonial history? Critical approach designations: Genres, Geographies. Distribution requirement: Global.

LIT 134A - Caribbean Literature (5)

A study of major writing from the English-speaking Caribbean, with attention to the historical and cultural context out of which it arises and to which it responds. Critical approach designations: Canons, Geographies. Distribution requirement: Global.

LIT 135A - Topics in African Literature (5)

Thematic and stylistic linkages: classical texts, oral traditions, and modern developments in African literature. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 135E - The Historical Imaginary (5)

A survey of historical literature in the Americas that examines fictional attempts to re-imagine New World histories. Readings focus on secret or mangled histories, the legacies of slavery and colonialism, gendered critiques of national histories, and U.S. imperialism. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 135F - Empire and After in the Anglophone Novel (5)

Examines fiction written in English, 1883 to 1948, in order to consider the complex relations--complicit, resistant, both--between literary and imperialist discourses. Likely novelists for study are Schreiner, Haggard, Conrad, Kipling, Forster, Hilton, Paton. Critical approach designations: Genres, Geographies.

LIT 135G - Postcolonial Writing (5)

Introduces students to a selection of postcolonial theory and texts. Critical approach designations: Geographies, Power and Subjectivities.

LIT 136B - Beat Literature and the World (5)

Explores the sources and context of Beat writing, emphasizing the Beats' intense interest in and engagement with the world at large. Includes works by major and minor Beat writers. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Poetry.

LIT 137A - Global Cities (5)

Examines cities as social spaces and as local spaces in the global economy and global imaginary. Focus is interdisciplinary, including literature, film, cultural studies, history, and sociology. Topic changes; please see the Class

Search for current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 137C - Imagining Paris (5)

Examines ways in which Paris, France, a mecca of literature and art for the last two centuries, has spurred imagination, and has itself been the product of global imagination. Exploration of landmarks, monuments, and iconic aspects of Parisian culture via literary and artistic imaginings. Critical approach designations: Geographies, Media.

LIT 138A - Culture and Nation (5)

Course explores the role of literature and culture in the production of national communities. Course topic changes; please see the Class Search for the current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 138B - Regions in American Literature (5)

Examines development of regional writing in the U.S. Course topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Histories.

LIT 138C - Modern Turkish Literature (5)

Explores the formation of modern Turkish literature from the late-Ottoman tale to the postmodern novel. Introduces key critical concepts/debates (orientalism, canon formation, belatedness/modernization, national allegory) used in the study of non-Western literatures. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 139A - Topics in American Literature and Culture (5)

Studies in American literature and culture, with attention to historical context. Course topic changes; please see the Class Search for current topic. Critical approach designations: Geographies, Histories.

LIT 141A - Early Mediterranean Cultures (5)

Examination of representations of medieval and early modern Mediterranean history. Course topic changes; please see the Class Search for current topic. Critical approach designations: Geographies, Histories. Distribution requirements: Global, Pre-1750.

LIT 141B - Classical Chinese Culture and Literature, 10th Century B.C.E. through Sixth Century C.E. (5)

Survey of writing and culture from the 10th century B.C.E. through the sixth century C.E., focusing on poetry, philosophical and historical writing, supernatural fiction, Buddhist/Taoist texts in contexts of fragmentation, empire building, dynastic collapse, rebellion, eremitism, and courtly society. Critical approach designations: Geographies, Histories. Distribution requirements: Global, Poetry, Pre-1750.

LIT 141C - Classical Chinese Culture and Literature, Sixth Century through 16th Century (5)

Survey of writing and culture from the Tang through early Ming dynasties (sixth century C.E. through 16th century C.E.). Themes include literary, religious, and philosophical innovation; courtly life; cultural contacts with non-Chinese people; and transformations of state and society. Critical approach designations: Geographies, Histories. Distribution requirements: Global, Poetry, Pre-1750.

LIT 141D - Arab-Islamic Literatures I: 500-1200 (5)

Examines the development of classical Arabic literature in historical context, including the appearance and importance of major genres and their broad relationship to the social and cultural history of the Arab-Islamic world. Critical approach designations: Geographies, Histories. Distribution requirements: Global, Pre-1750.

LIT 141E - Arab-Islamic Literatures II: 1200-1900 (5)

Examines the evolution of Arabic and Islamic literatures and cultures through the late-Medieval and early-modern periods. These periods produce much of the body of literature and texts that survive today, and is profoundly influential. Critical approach designations: Geographies, Histories. Distribution requirements: Global, Pre-1750.

LIT 144A - Continental Renaissance (5)

Introductory survey of great prose writings of the continental Renaissance in their cultural and historical contexts. Authors include: Machiavelli, Castiglione, Erasmus, Rabelais, Montaigne, and Cervantes. Critical approach designations: Geographies, Histories. Distribution requirement: Pre-1750.

LIT 145A - Colonial American Literatures (5)

Surveys representations of the Euro-Amerindian encounter in the pre-national period. Readings include collective stories of indigenous peoples, European captivity narratives, reflections about spirituality and religion, poems, and a contemporary novel. Critical approach designations: Histories, Power and Subjectivities. Distribution requirement: Pre-1750.

LIT 146A - Studies in Romanticism (5)

A survey of major Romantic themes and authors between 1780 and 1820. Explores relationships to pre-Romantic and post-Romantic authors. The main goal is to achieve familiarity with a wide range of individual poems in the general context of Romanticism. Critical approach designations: Genres, Histories. Distribution requirement: Poetry.

LIT 146B - Victorian Literature (5)

British Victorian literature (1830-1901) featuring representative texts and authors. Course topic changes; please see the Class Search for the current topic. Critical approach designations: Geographies, Histories.

LIT 146C - Victorian Prose (5)

Victorian prophecy, Victorian criticism: an examination of some major writings of 19th-century nonfiction prose by Carlyle, Mill, Ruskin, Newman, Arnold, Pater, and Wilde, with a glance at the social context and the minor fictional forms of the era. Critical approach designations: Genres, Histories.

LIT 146D - Nineteenth-Century American Fiction (5)

Examination of selected fiction written between the end of the 18th century and the Civil War, with attention to historical and cultural as well as literary issues. Critical approach designations: Canons, Histories.

LIT 146F - The Dissenting Tradition in America (5)

Antislavery writing of the 19th century profoundly shaped a resistant strain in American writing. By reading speeches, essays, and life writing along with more traditionally literary work, students examine what gives language the power to move people and to change the world. Critical approach designations: Histories, Power and Subjectivities.

LIT 146G - Queer(y)ing Victorian Literature (5)

Examines mid- to late-19th-century English representations of non-normative gender and sexuality in popular culture. Considers how these figures in fiction conform to or resist established perceptions of gender, sexuality, race, and empire. Critical approach designations: Histories, Power and Subjectivities.

LIT 147A - Twain, Slavery, and the Literary Imagination (5)

Using Mark Twain's later writings and other literary/non-literary materials, explores responses to popular and legal discourse on blood, race, sex, resurgence of racism, and imperialism. Critical approach designations: Histories, Power and Subjectivities.

LIT 149A - Behind the Berlin Wall (5)

Examines cultural life in the German Democratic Republic between 1946 and 1992 through films from the state-owned DEFA film studios. Topics include: socialist realism and international modernism in cinema; the representation of collective labor; the status of women; youth culture; and the texture of everyday life and consumer culture in socialism. Critical approach designations: Histories, Media.

LIT 149B - Contemporary American Literature (5)

A selective examination of major writings since World War II, with attention to literary issues and historical context. Critical approach designation: Geographies, Histories.

LIT 149C - The 1960s (5)

An interdisciplinary study of the cultural and social movements of the 1960s. Critical approach designations: Histories, Power and Subjectivities. Distribution requirement: Global.

LIT 149D - Topics in Modern Literature (5)

Study of 19th- and/or 20th-century literature, with attention to its literary and historical context. Course topic changes; please see the Class Search for current topic. Critical approach designations: Genres, Histories.

LIT 149E - Modern Fiction and Poetry (5)

Survey of modern fiction and poetry. Course topic changes; please see the Class Search for current topic. Critical approach designations: Genres, Histories. Distribution requirement: Poetry.

LIT 149F - Contemporary Mexican Narrative (5)

Examines 20th and 21st century Mexican literature, with attention to literary critical issues as they relate to cultural, historical, and political contexts. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 149G - War in Contemporary American Culture (5)

Considers the treatment of war in American literature since World War II. Close attention paid to both literary form and historical context. Also provides perspectives on, and critical tools for thinking about, contemporary armed conflict. Course topic changes; please see the Class Search for the current topic. Critical approach designations: Histories, Power and Subjectivities.

LIT 149H - The Future (5)

Examines modes of thinking and imagining the future throughout human history, and considers the fate of the future today. Topics include apocalyptic religion, utopia and dystopia, progress, revolution, finance, and everyday life. Critical approach designations: Histories, Power and Subjectivities. Distribution requirement: Global.

LIT 149I - Contemporary Medievalisms (5)

Explores contemporary representations of medieval cultures by considering questions of historical memory, limits of adaptation, and the power of satire. Critical approach designations: Geographies, Histories.

LIT 150D - The Power of Writing: Books and Libraries 600-1500 (5)

Surveys the history of the book in the West from ca. 600-1500. Concentrates on the medieval illuminated manuscript and the first years of printing, and focuses on the relationship between text and image. Critical approach designations: Histories, Media. Distribution requirements: Pre-1750.

LIT 150E - Letters, Literature: A Correspondence Course (5)

Examines the form and function of the letter in literature from antiquity to the contemporary moment. Considers all writing, from the most expressly public to the most seemingly private, as a form of correspondence, and we will contribute our own letters, in both creative and critical modes, in an effort to expand our capacities for critical analysis of texts. Critical approach designations: Genres, Media.

LIT 151B - The Phenomenon of Tragedy (5)

Examines the theory of tragedy from Aristotle to Nietzsche, while inviting students to read and discuss classic dramatic pieces to which the label tragedy was applied. Relies on student presentations and contributions, and teaches skills both in handling theory and in practical literary criticism. Critical approach designations: Genres, Media. Distribution requirement: Pre-1750.

LIT 151G - English Drama: 1576-1642 (5)

Study of representative plays. Course topic changes; please see the Class Search for current topic. Critical approach designations: Canons, Media. Distribution requirement: Pre-1750.

LIT 151K - Gender, Race, and Disability in American Drama (5)

An investigation of how American playwrights represent and criticize the concepts of gender, race and disability. Analysis of the genre of drama as a contact zone of gender, race, and disability by studying how American playwrights have critically responded to historical and social alienation, sexism, racism, and ableism in their works about "disabled" bodies. Students cannot receive credit for this course and CRES 114. Critical approach designations: Media, Power and Subjectivities.

LIT 155A - Cinema and Subjectivity (5)

An examination of the ways in which the technological and institutional practices of cinema construct modes of modern and contemporary subjectivity. Course topic changes; please see the Class Search for current topic. Critical approach designations: Media, Power and Subjectivities. Distribution requirement: Global.

LIT 155C - New German Cinema (5)

Surveys the work of Fassbinder, Kluge, Herzog, Schlöndorff, von Trotta, Reitz, Straub, Sanders-Brahms, and others. Major themes include post-fascism and the problems of history, the burden of memory, mass culture, gender, social class, and migration in postwar Germany. Critical approach designations: Geographies, Media.

LIT 155D - Italian Cinema and Literature (5)

Explores the rich history of Italian cinema. Special attention is given to the links between literacy and visual narratives, Italian films and Italian novels, autobiographies, and short stories on which the films are based. Critical approach designations: Geographies, Media.

LIT 155E - Cinema and Social Change in Latin America (5)

Surveys selected Latin American and Latino feature and documentary films. Course topic changes; please see the Class Search for current topic. Critical approach designations: Media, Power and Subjectivities. Distribution requirement: Global.

LIT 155H - The Horror Film (5)

Shifting definitions of horror in the movies from the late silent period to the present through close analysis of representative films and critical texts. Course topic changes; please see the Class Search for current topic. Critical approach designations: Genres, Media.

LIT 155J - The Films of John Carpenter (5)

Study of development and central themes of preeminent genre director of the post-Hollywood era, concentrating on central core of major works in horror/science fiction genres from Halloween to In the Mouth of Madness, with attention to the comedies and action films. Critical approach designations: Genres, Media.

LIT 155L - Vampire Film (5)

Examines development and central themes of vampire film from the silent era to the present. Critical approach designations: Genres, Media.

LIT 155N - Cinema in India (5)

Examines cinema in India from the silent era to the contemporary production of Bollywood films. Attention is given to the rise of the culture industry in urban centers such as Mumbai, and the dialectical relationship between socio-political change and cultural form. Critical approach designations: Geographies, Media. Distribution requirement: Global.

LIT 156A - The Gothic Imagination in Fiction, Film, and Theory (5)

Readings include theoretical essays by Freud and Lacan and such fictions as *The Monk*, *Frankenstein*, *Dracula*, *Maus*, *The Yellow Wallpaper*, and *Beloved*. Films change each year. Critical approach designations: Histories, Media.

LIT 157A - Modern Ancient Drama (5)

The study of 20th- and 21st-century productions and adaptations of ancient Greek drama in theater, dance, music, and film, including Stravinsky, Graham, Pasolini, Breuer, and von Trier, discussing artists' goals, the sociopolitical context, ideas of authenticity, and audience response. Critical approach designations: Histories, Media. Distribution requirement: Pre-1750.

LIT 157C - Representations of Hamlet (5)

Examination of Shakespeare's *Hamlet* from various perspectives, including as a literary and historical object, and as a mirror of socio-political concerns. Readings include both precursors to Shakespeare and modern adaptations and revisions of the *Hamlet* story. Critical approach designations: Canons, Media. Distribution requirements: Pre-1750.

LIT 157E - Greek Drama/Modern Film (5)

A reading of ancient Greek plays along with contemporary films similar to them in theme, form, and effect. Students discuss different definitions of tragedy; genre as a critical tool; and similarities and difference between the media of

literature, drama, and film. Critical approach designations: Genres, Media. Distribution requirement: Pre-1750.

LIT 160E - Theorizing Race and Comics (5)

Examines comics' origins in the United States' legacies of racial caricature and political cartoons about slavery, Asian exclusion, yellow journalism, and imperial expansion. Analyses of graphic novel's 20th-century evolution around human-rights violations and post-atrocity representational strategies around race, nationalism and minority status. Critical approach designations: Media, Power and Subjectivities. Distribution requirement: Global.

LIT 160F - Topics in Cultural Studies (5)

Investigates the ways in which cultural texts--literary, aesthetic, visual, performative, and a variety of popular forms--create and transform individual experiences, everyday life, social relations, and power. Course topic changes; see the Class Search for the current topic. Critical approach designations: Media, Power and Subjectivities.

LIT 160G - Topics in Literary Theory (5)

Examination of major issues in contemporary theory, with emphasis on key concepts. Course topic changes; please see the Class Search for current topic. Critical approach designations: Canons, Power and Subjectivities.

LIT 160I - Race, Militarism, and Empire in Asia and the Pacific (5)

Theoretical and historical inquiry into the relationship between race, militarism, and empire; a comparative examination of the Japanese and U.S. empires in the Asia-Pacific region; and a consideration of how liberal ideologies around race were wielded as a tool of imperial governance. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 160J - Exile, Diaspora, Migration (5)

Analyzes how the figure of the refugee, migrant, and other travelling communities are produced, engaged and represented in literary texts, cultural texts, and theories. Course materials include fiction, memoir, essay, legal tracts, and film. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 160K - Race, Labor, and Migration (5)

Examines racialized labor from the mid-19th century to the present, including the racial protest novel as a cultural form. Investigates race, gender, and citizenship as technologies used to regulate labor and to circumscribe labor's power. Critical approach designations: Histories, Power and Subjectivities. Distribution requirement: Global.

LIT 160L - Literature and Philosophy (5)

Provides critical insight into the complex dynamics that define our historical moment through an investigation of literary and philosophical treatments. Readings include novels, plays, philosophical essays, and political commentary.

The course topic changes; see the Class Search for the current topic. Critical approach designations: Genres, Power and Subjectivities.

LIT 160M - The War on Terror (5)

Investigates the logic of U.S. imperialism, with a specific focus on the War on Terror. Includes texts in critical race and ethnic studies, history, and literature, and a diverse, range of media; novels, poetry, film, graphic literature, and music. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 161A - African American Literature (5)

Examination of African American writing and cultural representations, with attention to the historical, cultural, and general literary contexts out of which they emerged and upon which they commented. Course topic changes; please see the Class Search for the current topic. Critical approach designations: Histories, Power and Subjectivities.

LIT 161B - African American Women Writers (5)

Explores the cultural, aesthetic, political, and feminist issues in select works by African American women. Through close analysis of the works, students develop an understanding of the intersections that race, gender, and class play in the literary imaginations of these writers. Critical approach designations: Histories, Power and Subjectivities.

LIT 162A - Asian American Literature (5)

Examination of Asian American literary works (fiction, poetry, dramatic essays) in the context of the historical presence of Asian Americans in the United States since the 1850s. Emphasis on comparison of select works from ethnic Asian writings. Critical approach designations: Geographies, Power and Subjectivities.

LIT 162B - Literature of the Asian Diaspora (5)

Study of literature of the Asian diaspora, attempting to discover and define a growing body of contemporary writing under this rubric, including immigrant/migrant histories, memories of exile and refuge, as well as the fiction of imagined homelands. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 163A - American Indian Literature (5)

Explores works of fiction, creative non-fiction, drama, and poetry written by American Indians. Focuses on historical and political issues within the text as well as on formal and thematic structures. Critical approach designations: Histories, Power and Subjectivities.

LIT 164A - Jewish Travel Narratives (5)

Exploration of the idea of the Diaspora as a moving condition, and of the multi-dimensional character of global Jewish culture, covering authors who traveled across the Jewish world from medieval times to the present. Critical approach

designations: Geographies, Power and Subjectivities.
Distribution requirement: Pre-1750.

LIT 164B - Hebrew Poetry (5)

Hebrew poetry-Biblical, medieval, modern-explores cultural and literary issues central to our contemporary world. Texts and discussion focus on Jewish and Israeli literary traditions. Critical approach designations: Genres, Power and Subjectivities. Distribution requirement: Poetry.

LIT 164C - Global Jewish Writing (5)

Comparative analysis of modern Jewish writers from Western and non-Western diasporas. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 164D - Jewish Diaspora, Ethnicity, and Urban Life (5)

Focuses on modern Jewish diaspora, ethnicity, and urban life. Critical approach designations: Geographies, Power and Subjectivities.

LIT 164G - Literature and the Holocaust (5)

Reading and analysis of fiction and poetry, focusing on Holocaust literature as a problem in critical theory, cultural studies, and literary history. Though most of the works are read in translation, some knowledge of European languages is helpful. Critical approach designations: Histories, Power and Subjectivities.

LIT 164H - Jewish Writers and the European City (5)

Interrogates the master narrative of a specific European city and discusses the ways in which Jewish life and Jewish actions helped to shape that story and were shaped by it. Course topic changes; please see the Class Search for current topic. Critical approach designations: Geographies, Power and Subjectivities.

LIT 164J - Jewish Writers and the American City (5)

An examination of some major Jewish writers and their responses to the American city. Major writers: Henry Roth, Saul Bellow, Bernard Malamud, J. Kaplan, Philip Roth. A look at Yiddish and other minority writers, and including sociological and historical materials on the American city. The course topic changes; please see the Class Search for the current topic. Critical approach designations: Histories, Power and Subjectivities.

LIT 165A - Chicano/Mexicano Geographies (5)

Considers the historical, current, and future directions of Chicano/a literary culture within the context of the long-standing exchanges of culture and politics across the U.S.-Mexican border and the challenges of globalization. Includes novels, essays, and films. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 165B - Latino Fictions of the Americas (5)

Writers in the U.S., Latin America, and the Caribbean have been drawn repeatedly to the theme of intercultural conflict as they recall the traumatic history of the hemisphere. Examining fiction, poetry, and film expands the horizons of American literature. Critical approach designations: Genres, Power and Subjectivities. Distribution requirement: Global. (Formerly Latin/o American Fiction.)

LIT 165C - Mesoamerican Indigenous/Indigenista Literature (5)

Analyzes literature about and by indigenous peoples in Mesoamerica: traces the construction of racialized categories of identity, such as indio and mestizo in Mesoamerican cultures and examines how they interact with definitions of the human that dominate in the West. Critical approach designations: Histories, Power and Subjectivities. Distribution requirement: Global.

LIT 166A - Representations of Gender in Medieval Literature (5)

Examination of the portrayal of gender roles and interactions. Particular stress on erotic experience and the courtly tradition: Ovid, Andreas Capellanus, Marie de France, Chretien de Troyes, The Romance of the Rose, Dante, Chaucer, Christine de Pizan. Critical approach designations: Histories, Power and Subjectivities. Distribution requirements: Poetry, Pre-1750.

LIT 166B - Early Modern Representations of Gender (5)

Explores representation of gender in early modern literature, with attention to contemporary aesthetic, cultural, and theoretical contexts. Texts include drama, poetry, and prose. Critical approach designations: Histories, Power and Subjectivities. Distribution requirement: Pre-1750.

LIT 166C - Early Modern Italian Women Writers (5)

In early modern Italy several factors converged to foster a boom in women's writing and publication. Course addresses the context and content of these writings, dealing with key theoretical and historical issues surrounding women's entry into authorship in Europe. Knowledge of Italian not required. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Pre-1750.

LIT 166E - Women's Literature (5)

Works by women from the 18th century to the present, with special attention to the relationship of literature to history, psychology, and aesthetics. Course topic changes; please see the Class Search for current topic. Critical approach designations: Histories, Power and Subjectivities.

LIT 167B - Monsters and Humans (5)

Focuses on the historical development of what we broadly consider to be the human body from its Humanist instantiations in early modern Europe as seen through its alleged opposite: the monstrous body. Critical approach designations: Histories, Power and Subjectivities. Distribution

requirement: Pre-1750. (Formerly Pre- and Early Modern Literature 130.)

LIT 167C - Metamorphoses: Pre/Post Modern Transformations (5)

Examines transformations between god, human, and animal from ancient literature to medieval, renaissance, modern, and postmodern (especially science) fiction and poetry. Critical approach designations: Histories, Power and Subjectivities. Distribution requirement: Poetry, Pre-1750.

LIT 167E - The Vampire in Literature and Popular Culture (5)

Traces the vampire's appearance in different historical moments, cultural contexts, genres, and media to interrogate its place in the shifting cultural politics of gender and sexuality, as well as in relation to race, ethnicity, class, and other identity positions. Critical approach designations: Media, Power and Subjectivities.

LIT 167F - Animals and Literature (5)

Examines the disruptive presences of nonhuman animals and nonanimal aliens as they appear in a variety of narrative forms: prose fiction, non-fiction, and poetry. Organized around central themes relating to the presence of animals in literature, including representation, difference, desire, and subjectivity. Critical approach designations: Histories, Power and Subjectivities.

LIT 167G - Reading the Weather: Literature and Global Climate Change (5)

An overview of climate change and its representations in literary and filmic texts. Asks how climate fiction and non-fiction narratives of climate change can help us to confront issues of environmental justice, inequalities of race and class, vulnerability, land rights, and refugeehood. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 167H - Disability in Transnational Asian American Studies (5)

Investigates U.S. imperialism in the Asia-Pacific region by focusing on race and disability; examines how disabled subjects have responded to historical and social alienation. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 168A - The Culture of Islamic Law (5)

Investigates the nature of Islamic law as a set of textual and interpretive practices that change over time and is fully enmeshed with Arabic culture, as well as its representation and role in literature as a force, standard, and context. Critical approach designations: Genres, Power and Subjectivities. Distribution requirement: Global.

LIT 179A - Advanced Writing: Fiction (5)

Intensive work in writing fiction. Critical approach designation: Genres.

Prerequisite: Enrollment is restricted to creative writing literature majors.

LIT 179B - Advanced Writing: Poetry (5)

Intensive work in writing poetry. Critical approach designation: Genres.

Prerequisite: Enrollment is restricted to creative writing literature majors.

LIT 179C - Methods and Materials (5)

Focuses on a particular process or subject used in the production of a literary text. Course is intended to work as a bridge between invention and scholarship. Course topic changes; please see the Class Search for current topic. Critical approach designation: Genres.

Prerequisite: Enrollment is restricted to creative writing literature majors.

LIT 181A - Biblical Hebrew, Part 1 (5)

Grammatical study interspersed with narrative excerpts from the Hebrew Bible. Recommended: previous study of a second language up to the advanced level. Critical approach designations: Canons, Histories. Distribution requirements: Global, Pre-1750.

LIT 181B - Biblical Hebrew, Part 2 (5)

Continuation of grammatical study interspersed with poetic texts from the Hebrew Bible. Critical approach designations: Genres, Geographies. Distribution requirements: Global, Poetry, Pre-1750. Together, Biblical Hebrew 1 and 2 fulfill the language prerequisites for Literature 102; together they also satisfy the intensive major second-language course requirements.

Prerequisite: Prerequisite(s): LIT 181A or the equivalent.

LIT 181C - Coptic (5)

Intensive introduction to fundamentals of classical Coptic grammar (Sahidic dialect) designed to move rapidly into reading of primary texts. Readings include The Martyrdom of S. Coluthus, Gospel of Thomas, and the Gnostic treatise Thunder: Perfect Mind. Critical approach designations: Genres, Histories. Distribution requirement: Pre-1750. (Formerly Pre- and Early Modern Literature 108.)

LIT 181D - Reading Egyptian Hieroglyphs, Part 1 (5)

Introduction to Egyptian hieroglyphs as a graphic, conceptual, and communicative system. Covers the basic elements of classical Egyptian grammar, drawing primarily on inscriptions from extant Egyptian monuments. Students read one prose and one poetical text from the Middle Kingdom. Critical approach designations: Geographies, Media. Distribution requirement: Global, Pre-1750. Strongly recommended: two years previous study of a foreign language at the college level or the equivalent.

LIT 181E - Reading Egyptian Hieroglyphs, Part 2 (5)

Advanced Middle Egyptian grammar (two weeks). Close reading of the Tale of Sinuhe in Middle Egyptian, selected hymns and love poetry from the New Kingdom. Critical approach designations: Genres, Geographies. Distribution requirement: Global, Poetry, Pre-1750. Together, Egyptian Hieroglyphs 1 and 2 fulfill the language prerequisites for Literature 102; together they also satisfy the intensive major second-language course requirements.

Prerequisite: Prerequisite(s): LIT 181D.

LIT 181F - Reading Egyptian Hieroglyphs, Part 3 (5)

Close reading of the Tale of Sinuhe in Middle Egyptian. Critical approach designations: Genres, Geographies. Distribution requirements: Global, Poetry, Pre-1750.

Prerequisite: Prerequisite(s): LIT 181E.

LIT 181G - Sanskrit, Part 1 (5)

Systematic introduction to the grammar, syntax, and usage of Classical Sanskrit, to the oral dimensions of the language, and to the Sanskrit literary tradition. Critical approach designations: Canons, Histories. Distribution requirements: Global, Poetry, Pre-1750.

LIT 181H - Sanskrit, Part 2 (5)

Continued study of the grammar, syntax, and usage of Classical Sanskrit, and the Sanskrit literary tradition. Students read the entire Bhagavad-Gita, including key sections in the original Sanskrit. Critical approach designations: Canons, Geographies. Distribution requirements: Global, Poetry, Pre-1750. Together Sanskrit, Part 1 and Part 2 fulfill the language prerequisites for Literature 102; together they also satisfy the intensive major second-language course requirements.

Prerequisite: Prerequisite(s): LIT 181G.

LIT 182A - Le Moyen Age (5)

Speaking, reading, and writing proficiency in French required. Study of 12th- and 13th-century texts, with attention to problems of history and social change. In modern translations with selected readings in Old French or Provençal. Course topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Histories. Distribution requirements: Poetry, Pre-1750.

LIT 182E - Etudes de Poésie (5)

Speaking, reading, and writing proficiency in French required. Emphasizes the close study of a limited number of poetic texts in terms of their linguistic, stylistic, and rhetorical devices. Course topic changes; please see Class Search for current topic. Critical approach designations: Genres, Geographies. Distribution requirement: Poetry.

LIT 182F - Le théâtre (5)

Speaking, reading, and writing proficiency in French required. Studies in French drama and theories of theatricality. Course

topic changes; see the Class Search for current topic. Critical approach designations: Genres, Media.

LIT 182H - Auteur et culture (5)

Speaking, reading, and writing proficiency in French required. Designed to provide an in-depth study of a given author's literary oeuvre and its cultural context. Course topic changes; see the Class Search for the current topic. Critical approach designations: Geographies, Histories.

LIT 182I - Littérature d'expression française hors de France (5)

Speaking, reading, and writing proficiency in French required. A study of texts written in French-speaking cultures: Belgium, Canada, Africa, the Caribbean. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 182J - Theorie (5)

Speaking, reading, and writing proficiency in French required. A discussion of recent developments in French literary theory. Critical approach designations: Canons, Geographies.

LIT 182K - Textes et contextes (5)

Speaking, reading, and writing proficiency in French required. Examines implications of social and political change in terms of literary theory and practice. Places equal emphasis on literary and other kinds of cultural texts: historical, political, and cinematic. Course topic changes; please see the Class Search for current topic. Critical approach designations: Histories, Power and Subjectivities.

LIT 182L - Science-Fiction Française (5)

Speaking, reading, and writing proficiency in French required. Course considers several French literary and cinematic examples of contemplating the present through the future and the past. Learn how reading across different cultural contexts can blur the distinction between "science" and "fiction"; how to read fictional texts alongside the films they inspire; and how to produce more effective essays and presentations in French. Critical approach designations: Genres, Media.

LIT 183A - Einführung in der deutschen Literatur (5)

Speaking, reading, and writing proficiency in German required. Wide reading of works representing the major authors, periods, and genres of German literature. Critical approach designations: Canons, Geographies.

LIT 183B - Themen in deutscher Literatur und Kultur (5)

Speaking, reading, and writing proficiency in German required. Course studies German literature and culture, with attention to historical context. Course topic changes; please see the Class Search for current topic. Critical approach designations: Geographies, Histories.

LIT 183D - Die deutsche Romantik (5)

Speaking, reading, and writing proficiency in German required. A study of the emergence and development of German Romanticism. Central concerns are the Romantics'

attitude toward the role of the imagination in literature and their attempts to revitalize myth and folklore in their works. Authors read include Tieck, Novalis, Hoffmann, Eichendorff, and Heine. Critical approach designations: Genres, Histories.

LIT 183F - Die deutsche Novelle (5)

Speaking, reading, and writing proficiency in German required. A study of Novellen of the major 19th-century German authors. Critical approach designations: Canons, Genres. (Formerly The German Novelle.)

LIT 183G - Deutsche Komödie (5)

Speaking, reading, and writing proficiency in German required. A study of a series of comic works by authors writing in German. In addition to discussing the texts in depth, we also look at theories of humor and laughter developed by thinkers such as Freud, Schopenhauer, and Bergson. Critical approach designations: Canons, Media.

LIT 183H - Das deutsche Drama (5)

Speaking, reading, and writing proficiency in German required. Selected readings of major German dramatists; attention given to various movements in theater. Critical approach designations: Canons, Media.

LIT 183K - Moderne deutsche Literatur und Film (5)

Speaking, reading, and writing proficiency in German required. Discusses a range of modern and contemporary German texts, including poetry, drama, and film. Critical approach designations: Geographies, Media.

LIT 183M - Moderne deutsche Fiktion (5)

Speaking, reading, and writing proficiency in German required. Selected readings from the novel and novella in 20th-century German literature. Critical approach designations: Genres, Geographies.

LIT 183N - Modern Deutsche Lyrik (5)

Speaking, reading, and writing proficiency in German required. Intensive analysis of selected poems is complemented by broader reading in certain authors and periods. Critical approach designations: Genres, Histories. Distribution requirement: Poetry.

LIT 183P - Fremdenangst: Ausländerfeindlichkeit in der deutschen Literatur und Kultur (5)

Speaking, reading, and writing proficiency in German required. Considers recent violence against immigrants and asylum-seekers in Germany, and moves on to examine images of people perceived as foreign or alien in German literature and culture from early times to the present. Critical approach designations: Genres, Power and Subjectivities.

LIT 184A - Introduction to Greek Literature (5)

Reading proficiency in Ancient Greek required. Critical approach designations: Canons, Histories. Distribution requirement: Pre-1750.

LIT 184B - Greek Drama (5)

Reading proficiency in Ancient Greek required. Course topic changes; see the Class Search for current topic. Critical approach designations: Histories, Media. Distribution requirement: Pre-1750.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

LIT 184C - Greek Poetry (5)

Reading proficiency in Ancient Greek required. Course topic changes; see the Class Search for current topic. Critical approach designations: Genres, Histories. Distribution requirements: Poetry, Pre-1750.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

LIT 184D - Prose Authors (5)

Reading proficiency in Ancient Greek required. Course topic changes; see Class Search for the current topic. Critical approach designations: Canons, Genres. Distribution requirement: Pre-1750.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

LIT 184E - Special Topics in Greek Literature (5)

Reading proficiency in Ancient Greek required. Readings in selected ancient Greek texts. Course topic changes; see the Class Search for current topic. Focus is on translation and interpretation; requirements normally include translation exams and interpretive essays. Critical approach designations: Canons, Genres. Distribution requirements: Global, Pre-1750.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

LIT 185B - Letteratura e cultura italiana (5)

Speaking, reading, and writing proficiency in Italian required. In-depth examination of a topic in Italian literary and cultural studies. Course topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Histories.

LIT 185H - L'Opera italiana (5)

Speaking, reading, and writing proficiency in Italian required. Explores Italian opera as dramatic and spectacular cross-cultural phenomenon beginning in 1590s Florence through the 19th and 20th centuries. Attention to opera's function as a medium of cultural translation and political critique. Critical approach designations: Genres, Media. Prerequisite(s): Two years of university study of Italian language, or equivalent proficiency.

LIT 185I - Teatro italiano (5)

Speaking, reading, and writing proficiency in Italian required. Survey of Italian theater from its beginnings in medieval ritual through the development of Renaissance staged comedy and the commedia dell'arte, pastoral and tragicomedy, opera,

melodrama, and 20th-century avant-garde and political theater. Critical approach designations: Genres, Media.

LIT 185J - Poesia moderna (5)

Speaking, reading, and writing proficiency in Italian required. Study of development of the Italian lyric from romanticism to present, with close stylistic and thematic analyses of works of Leopardi, D'Annunzio, Ungaretti, Quasimodo, Pavese, and Montale. Critical approach designations: Canons, Genres. Distribution requirement: Poetry.

LIT 185L - La novella italiana (5)

Speaking, reading, and writing proficiency in Italian required. Surveys short fiction in Italian, from bawdy medieval novellas to folk tales edited in the 19th century, to psychological and character studies. Focuses on the formal properties that distinguish short fiction from romances and novels and the social functions these writings can perform. Critical approach designations: Genres, Geographies.

LIT 185M - Fascismo e resistenza (5)

Speaking, reading, and writing proficiency in Italian required. The relationship between literature and Italian fascism is explored, including the rise and myths of fascism, critique and censorship, the persecution of minorities, the Resistance, the role of the intellectual. Authors include Borgese, Vittorini, Bassani, Pavese. Critical approach designations: Histories, Power and Subjectivities.

LIT 185N - Le donne nell'Italia moderna (5)

Speaking, reading, and writing proficiency in Italian required. Explores the specificity of Italian women's writing and studies their literary activities in historical and social context. Readings include Italian feminist and some history as well as literary texts. Critical approach designations: Geographies, Power and Subjectivities.

LIT 185P - Boccaccio: Decameron (5)

Speaking, reading, and writing proficiency in Italian required. Critical study of The Decameron. Critical approach designation: Canons, Genres. Distribution requirements: Poetry, Pre-1750.

LIT 185Q - Dante: Divina Commedia (5)

Speaking, reading, and writing proficiency in Italian required. Reading of the Inferno, the Purgatorio, and selected canti of the Paradiso, along with selections from Dante's lyrics and from medieval Italian and French poetry. Critical approach designations: Canons, Histories. Distribution requirements: Poetry, Pre-1750.

LIT 185S - Petrarca (5)

Speaking, reading, and writing proficiency in Italian required. The transition from medieval to Renaissance modes of poetry in the works of Francesco Petrarca. Readings in the Rime Sparse, the Trionfi, and the prose works. Critical approach designations: Canons, Histories. Distribution requirements: Poetry, Pre-1750.

LIT 185Z - Italian Studies Writing in the Discipline (1)

Concurrent enrollment in an approved upper-division course in Italian literature, history of art and visual culture, or history satisfies the Disciplinary Communication requirement in Italian studies. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Students submit petition to sponsoring agency. Enrollment restricted to Italian studies majors and by permission of instructor.

LIT 186A - Introduction to Latin Literature (5)

Reading proficiency in Latin required. Course topic changes; see Class Search for the current topic. Critical approach designations: Canons, Histories. Distribution requirement: Pre-1750.

LIT 186B - Roman Poetry (5)

Reading proficiency in Latin required. Course topic changes; see the Class Search for current topic. Critical approach designations: Canons, Genres. Distribution requirements: Poetry, Pre-1750.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

LIT 186C - Prose Authors (5)

Reading proficiency in Latin required. Course topic changes; see the Class Search for current topic. Critical approach designations: Canons, Histories. Distribution requirement: Pre-1750.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

LIT 186D - Special Topics in Latin Literature (5)

Reading proficiency in Latin required. Course topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Pre-1750.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

LIT 188A - Literatura medieval (5)

Speaking, reading, and writing proficiency in Spanish required. Focuses on Spanish medieval literature, broadly covering the 12th to the 15th centuries. Examines and contextualizes literary genres developed in this period. Critical approach designations: Geographies, Histories. Distribution requirement: Pre-1750. (Formerly Medieval Spanish Literature.)

LIT 188B - Literatura peninsular: de los orígenes al siglo XVIII (5)

Speaking, reading, and writing proficiency in Spanish required. A critical study of several representative texts from the early period of Spanish literature in their sociohistorical context. Included among the readings are El Poema del Cid, the Romancero, La Celestina, Lazarillo de Tormes, and a Golden Age play. Critical approach designations:

Geographies, Histories. Distribution requirements: Poetry, Pre-1750.

LIT 188E - Teatro del Siglo de Oro español (5)

Speaking, reading, and writing proficiency in Spanish required. Studies in Spanish Golden Age theater. Critical approach designations: Histories, Media. Distribution requirement: Pre-1750.

LIT 188F - Cuentos del Siglo de Oro español (5)

Speaking, reading, and writing proficiency in Spanish required. Focuses on the prose in the Renaissance period and the different genres that flourished before the creation of Cervantes' *Don Quixote*. Chosen texts constitute an amalgam of Renaissance ideology, and provide examples of 16th-century literature, including the picaresque novel, pastoral novel, the Byzantine novel, and the chivalresque novel. Critical approach designations: Genres, Histories. Distribution requirement: Pre-1750.

LIT 188G - Literaturay vida en Don Quijote y otros textos cervantinos (5)

Speaking, reading, and writing proficiency in Spanish required. A close reading of the works of Cervantes, with particular attention to *Don Quijote*, in an attempt to discover how these works reflect the conflictive period in which the author lived. Also looks closely at the Cervantine view of the relationship of literature to life, as manifested in the works under study. Critical approach designations: Canons, Histories. Distribution requirement: Pre-1750.

LIT 188H - Erotismo y Mistica (5)

Speaking, reading, and writing proficiency in Spanish required. Examines the connections between erotic literature and mystical literature through poetic representations of sublime where Eros and Thanatos meet. As symbolisms of mystical and erotic experiences fuse and confuse each other, we are able to establish connections between Sufi, Hindi, and Judeo-Christian mystical poetry. Critical approach designations: Genres, Histories. Distribution requirement: Pre-1750.

LIT 188I - La novela picaresca (5)

Speaking, reading, and writing proficiency in Spanish required. The picaresque novel of 16th-century Spain considers the fictive environment as reality in order to introduce its protagonist as a rebel against social dominion. The picaresque novel is the only literary genre comparable to what is now called literature of social protest. Critical approach designations: Genres, Histories. Distribution requirement: Pre-1750.

LIT 188L - Literatura de la guerra civil española (5)

Speaking, reading, and writing proficiency in Spanish required. Examines literature related to the period of the Spanish Civil War (1936-39) and the Franco years (1939-75). Includes works by Spanish writers in exile during this period; also examines literary texts written prior to the outbreak of the

war. Critical approach designations: Histories, Power and Subjectivities.

LIT 188M - Literatura peninsular: siglos XIX y XX (5)

Speaking, reading, and writing proficiency in Spanish required. A critical study of several representative texts from this period of Spanish literature. Critical approach designations: Geographies, Histories.

LIT 188Z - Literatura de España (5)

Speaking, reading, and writing proficiency in Spanish required. Examines works by Spanish authors with attention to historical and cultural as well as literary issues. Course topic changes, see the Class Search for current topic. Critical approach designations: Geographies, Histories.

LIT 189A - De la conquista a Sor Juana (5)

Speaking, reading, and writing proficiency in Spanish required. A study of Hispanic American and Peninsular literatures from the chronicles of the conquest through the 17th century. Readings deal with transformations in both the idea of empire and the rights of the conquered. Includes the works of Colon, Cortes, El Inca Garcilaso de la Vega, Sor Juana Ines de la Cruz, and others. Critical approach designations: Canons, Histories. Distribution requirements: Global, Pre-1750.

LIT 189B - El Siglo XIX en America Latina: cultura, política y sociedad (5)

Speaking, reading, and writing proficiency in Spanish required. Follows the literary manifestations of the growing consciousness of the Latin American writer: discovery of native themes, comparative analysis of Spanish American and Peninsular European models, search for a new language literally and figuratively. Relates historical events with literary movements. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 189C - Introducción a Spanish Studies (5)

Speaking, reading, and writing proficiency in Spanish is required. Explores the social, cultural, economic, and political changes that connect Latin America, Spain, and the United States Latina/o communities. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

Prerequisite: Prerequisite(s): SPAN 6 or SPHS 6 or permission of instructor.

LIT 189D - Sor Juana Ines de la Cruz (5)

Speaking, reading, and writing proficiency in Spanish required. An in-depth examination of the life and work of Sor Juana Ines de la Cruz, a 17th-century nun, poet, playwright, and woman of genius and intellectual prowess whose ideas and accomplishments were ahead of her time. Critical approach designations: Canons, Histories. Distribution requirement: Pre-1750.

LIT 189E - Cuba (5)

Speaking, reading, and writing proficiency in Spanish required. Examines Cuban literature and culture, with attention to historical context. Course topic changes; please see the Class Search for current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 189F - Literaturas Latinas en los Estados Unidos: en inglés, español y Spanglish (5)

Speaking, reading, and writing proficiency in Spanish required. Spanish-based, English/bilingual inclusive overview of Latino/a writing in the U.S. Critical approach designations: Genres, Geographies. Distribution requirement: Global.

LIT 189G - Cine y Literatura (5)

Speaking, reading, and writing proficiency in Spanish required. Analysis and interpretation of Spanish-language films derived from literary works by Latin American and Spanish authors. Topic changes; see the Class Search for current topic. Critical approach designations: Genres, Media. Distribution requirement: Global.

LIT 189H - La Globalizacion en/del Cine Latin/o Americano (5)

Speaking, reading, and writing proficiency in Spanish required. Examines globalization of Latin/o American cinema as a cultural industry. Classical issues of cultural politics and political economy are revisited from the viewpoint of current global processes. Also provides access to the representation of different aspects of globalization in Latin/o American cinema. Critical approach designations: Media, Power and Subjectivities. Distribution requirement: Global.

LIT 189I - Literatura e indigeneidad (5)

Speaking, reading, and writing proficiency in Spanish required. Course examines the history, representation, and politics of Indigeneity and Indigenous literature in Latin America by analyzing novels, short stories, transcribed oral tradition, film, and radio. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 189K - El ensayo latinoamericano (5)

Speaking, reading, and writing proficiency in Spanish required. A study of the essay in Spanish America from Sarmiento to the present, concentrating on problems of national or cultural identity. Critical approach designations: Geographies, Histories. Distribution requirement: Global.

LIT 189L - Poesía latinoamericana (5)

Speaking, reading, and writing proficiency in Spanish required. Poets from modernismo to the present in Spanish America. Studies how this poetry attempts to define Latin America, its past, its present history, and its vision for the future. Critical approach designations: Genres, Geographies. Distribution requirements: Global, Poetry.

LIT 189M - Prosa contemporánea hispanoamericana (5)

Speaking, reading, and writing proficiency in Spanish required. Examines contemporary Spanish American prose. Course topic changes; please see the Class Search for current topic. Critical approach designations: Genres, Geographies. Distribution requirement: Global.

LIT 189N - Latinoamericano testimonio (5)

Speaking, reading, and writing proficiency in Spanish required. Contemporary non-fiction testimonial literature of Latin America. Critical approach designations: Genres, Power and Subjectivities. Distribution requirement: Global.

LIT 189O - El Cuento Hispanoamericano: Variedades estéticas de la literatura breve en America Latina (5)

Speaking, reading, and writing proficiency in Spanish required. Explores various aesthetics of the Latin American short story including fantastic, detective, metaliterary, social critique, historical, and philosophical writings. Critical approach designations: Canons, Genres. Distribution requirement: Global.

LIT 189P - Las mujeres en la literatura latinoamericana (5)

Speaking, reading, and writing proficiency in Spanish required. Literary and sociological writings by and about women in Latin America-in Hispanic, indigenous, and African-Latino communities; in rural and urban settings; in historical and contemporary periods. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 189Q - Ficción y marginalidad (5)

Speaking, reading, and writing proficiency in Spanish required. Marginalized perspectives take center stage in this course that studies ways Latin American/Latino authors textually contest dominant representations and realities, opening symbolic spaces for emergent historical subjects who gain agency and authority by re/presenting unmapped terrains. Texts include chronicles, testimonios, writings of the self, and novels. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 189R - La Novela de la Dictadura (5)

Speaking, reading, and writing proficiency in Spanish required. An analysis of novels which focus on the theme of dictators and the rhetoric of dictatorships in Latin America. Texts are studied as literary manifestations of particular historical and political periods. Critical approach designations: Genres, Power and Subjectivities. Distribution requirement: Global.

LIT 189S - La cultura popular en la narrativa latinoamericana (5)

Speaking, reading, and writing proficiency in Spanish required. Explores short stories and novels that have been greatly influenced by popular culture, not only in theme, but also by appropriation of popular forms of language and modes of representation. Includes works by authors from Mexico,

Argentina, Cuba, and Colombia. Critical approach designations: Genres, Geographies. Distribution requirement: Global.

LIT 189T - Historia de la lectura y los lectores: Recepcion y consumo cultural en el mundo Latino Americano (5)

Speaking, reading, and writing proficiency in Spanish required. Explores historical readers and reading practices in at least three different formations: colonial, national-popular, and transnational. Proposes a historical-theoretical reconstruction of the place of reading and readers at key moments in the history of culture in Latin America. Critical approach designations: Histories, Power and Subjectivities. Distribution requirement: Global.

LIT 189U - Modernidad y literatura: El Boom de la novela latinoamericana (5)

Speaking, reading, and writing proficiency in Spanish required. Explores the relationships between literature and mass culture, modernization, and globalization through the study of the so-called Boom of Latin American narrative. Critical approach designations: Genres, Histories. Distribution requirement: Global.

LIT 189V - Andean Indigenismo (5)

An introduction to the indigenista movement in Peru, Bolivia, Ecuador, and Paraguay, and to the literary and ideological debates surrounding it. Authors include Mariategui, Gonzalez Prada, Arguedas, Icaza, Alegria, and Vallejo. Critical approach designations: Geographies, Power and Subjectivities. Distribution requirement: Global.

LIT 189X - Estudios mediaticos (5)

Investigates film, radio, video games, new media, and other newly emergent forms of cultural production in the Spanish-speaking world. Topics may include the historical study of media, media-focused analysis of literary texts, and new media translation. The course topic changes; see the Class Search for the current topic. Critical approach designations: Genres, Media.

LIT 189Z - Literatura de Chile (5)

Speaking, reading, and writing proficiency in Spanish required. Focusing on narrative and poetry in Chile and their transformations during the 20th century, course examines the relationships between literature, nation, and representation. Critical approach designations: Canons, Histories. Distribution requirement: Global.

LIT 190A - Topics in Pre- and Early Modern Studies (5)

Examination of individual authors or critical problems in ancient, medieval, or early modern/Renaissance literature. Course topic changes; see the Class Search for current topic. Critical approach designations: Canons, Histories. Distribution requirements: Pre-1750, Senior Seminar.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior literature majors.

LIT 190F - Studies in Poetry (5)

Studies in English-language poetry. Course topic changes; see the Class Search for current topic. Critical approach designations: Genres, Histories. Distribution requirements: Poetry, Senior Seminar.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior literature majors.

LIT 190I - Individual Authors (5)

Intensive examination of works by individual authors. Course topic changes; see the Class Search for current topic. Critical approach designations: Genres, Histories. Distribution requirement: Senior Seminar. (Formerly English Language Literature 190A.)

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior literature majors.

LIT 190J - Studies in English Language Literature (5)

Studies of selected authors or issues in English language literature. Course topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Senior Seminar.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior Literature majors.

LIT 190K - Studies in U.S. Literature (5)

Intensive examination of issues in U.S. literature. Course topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Senior Seminar.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior literature majors.

LIT 190L - Topics in World Literature and Cultural Studies (5)

Course topic changes; see the Class Search for current topic. Critical approach designations: Histories, Power and Subjectivities. Distribution requirements: Global, Senior Seminar.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior literature majors.

LIT 190N - Studies in 19th-Century British Literature (5)

Study of selected authors or issues in 19th-century British literature. Course topic changes; see the Class Search for current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Senior Seminar.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior literature majors.

LIT 190O - Studies in Slavery, Race, and Nation in the Americas (5)

Compares literatures and histories of slavery, abolitionism, and nationalism in 19th-century Cuba and the U.S. Readings include slave narratives and antislavery novels. Critical

approach designations: Histories, Power and Subjectivities. Distribution requirements: Global, Senior Seminar.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior literature majors.

LIT 190T - Topics in Modern Literary Studies (5)

Selected authors or issues in modern literary and cultural studies. Course topic changes; see the Class Search for current topic. Critical approach designation: Histories. Distribution requirement: Senior Seminar.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior literature majors.

LIT 190U - Topics in Theory (5)

Advanced work in theory (e.g., cultural, ideological, literary, social). Course topic changes; see the Class Search for the current topic. Critical approach designations: Canons, Histories. Distribution requirement: Senior Seminar.

Prerequisite: Prerequisite(s): course 101. Enrollment is restricted to senior literature majors and minors.

LIT 190V - Fiction Senior Seminar (5)

Satisfies the Creative Writing Literature concentration; also satisfies the senior seminar distribution requirement. Critical approach designation: Media. Distribution requirement: Senior Seminar.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior creative writing literature majors.

LIT 190W - Poetry Senior Seminar (5)

Satisfies the Creative Writing Literature concentration; also satisfies the senior seminar distribution requirement. Critical approach designation: Media. Distribution requirement: Senior Seminar.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior creative writing literature majors.

LIT 190X - Temas de la literatura y cultura espanolas y latinoamericanas (5)

Speaking, reading, and writing proficiency in Spanish is required. Examines authors or issues in Spanish and Latin American literature and cultures. Course topic changes; see the Class Search for the current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Senior Seminar. Spanish studies majors may use this course to satisfy the Spanish studies senior exit requirement.

Prerequisite: Prerequisite(s): LIT 101. Enrollment is restricted to senior literature majors.

LIT 190Y - Topics in Jewish Literature and Culture (5)

Study of selected authors or issues related to modern Jewish literature and culture. Topic changes; please see the Class Search for current topic. Critical approach designations: Histories, Power and Subjectivities. Distribution requirement:

Senior Seminar. Jewish Studies majors may use this course to satisfy the Jewish Studies senior exit requirement.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and LIT 101 (for literature majors). Enrollment is restricted to senior literature and Jewish studies majors.

LIT 190Z - Topics in German Literature and Culture (5)

Study of selected authors or issues related to German literature and culture. Course topic changes; please see the Class Search for current topic. Critical approach designations: Geographies, Histories. Distribution requirement: Senior Seminar. German studies majors may use this course to satisfy the German studies senior exit requirement.

Prerequisite: Prerequisite(s): LIT 101 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior German studies and literature majors.

LIT 191 - Methodologies of Teaching (3)

This three-credit course provides students with the theoretical and practical knowledge to help others become more careful, sensitive, and sophisticated readers of complex texts. Enrollment by permission of the instructor.

LIT 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar under faculty supervision. (See course 42.)

LIT 195A - Senior Essay (5)

Study of literature in English or English translation. Satisfies the Literature major senior exit distribution requirement. Students submit petition to sponsoring agency. Prerequisite(s): Literature 101. Enrollment is restricted to seniors.

LIT 195B - Senior Essay (5)

Speaking, reading, and writing proficiency in French, German, Greek, Italian, Latin, Spanish, or other non-English language required. Satisfies the Literature major senior exit distribution requirement. Students submit petition to sponsoring agency. Prerequisite(s): Literature 101. Enrollment is restricted to seniors.

LIT 195C - Senior Essay (5)

Satisfies the Creative Writing senior exit distribution requirement. Prerequisite(s): Literature 101. Students submit petition to sponsoring agency. Enrollment restricted to senior creative writing literature majors.

LIT 198A - Group Tutorial (5)

Study of literature in English or English translation. Students submit petition to sponsoring agency.

LIT 198B - Group Tutorial (5)

Speaking, reading, and writing proficiency in French, German, Greek, Italian, Latin, Spanish or other non-English

language required. Students submit petition to sponsoring agency.

LIT 198C - Group Tutorial (5)

Study of creative writing. Students submit petition to sponsoring agency.

LIT 199A - Tutorial (5)

Study of literature in English or English translation. Students submit petition to sponsoring agency.

LIT 199B - Tutorial (5)

Speaking, reading, and writing proficiency in French, German, Greek, Italian, Latin, Spanish or other non-English language required. Students submit petition to sponsoring agency.

LIT 199C - Tutorial (5)

Study of creative writing. Students submit petition to sponsoring agency.

LIT 199F - Tutorial (2)

Students submit petition to sponsoring agency.

Graduate

LIT 200 - Proseminar (5)

The proseminar provides a common experience for entering students, facilitates exchange of ideas and approaches to literary and extra-literary texts, critical issues, and theoretical problems. It focuses on broad aspects of the history of theory and criticism, on the students' critical writing, and on aspects of professional development.

Prerequisite: Enrollment is restricted to graduate students.

LIT 201 - The Pedagogy of Literature (2)

Provides training for graduate students in university-level pedagogy in general and in the pedagogy of literature specifically. Coordinated by a graduate student who has had substantial experience as a teaching assistant, under the supervision of a faculty member.

Prerequisite: Enrollment is restricted to graduate students.

LIT 202 - Colloquium (2)

Student receives credit for attending a designated number of freestanding lectures, colloquia, symposia, or conferences during the term and reports orally, or in writing, to instructor. Enrollment restricted to graduate students.

LIT 204 - Readings in Literature (2)

Focuses on selected texts or authors in literature and/or theory. Students meet with instructor to discuss readings and deepen their knowledge on a particular author, critic, theorist, or text.

Prerequisite: Enrollment is restricted to graduate students.

LIT 205 - Writing and Publication Practicum (2)

Introduces the methods and practice of dissertation writing and publication in literature. Workshop format. Meets one hour per week.

Prerequisite: Enrollment is restricted to graduate students.

LIT 206 - Critical Writing Practicum (5)

Reinforces writing and revision skills in the discipline of literary and cultural criticism and theory, covering various genres of writing in the profession. Designed for students preparing for QE or dissertation work. Workshop structure.

Prerequisite: Enrollment is restricted to graduate students.

LIT 221 - Canons (5)

Considers literary canon formation through the lens of neglected or lost works by authors otherwise considered peripheral because of their language, cultural tradition, or regional affiliation.

Prerequisite: Enrollment restricted to graduate students.

LIT 222 - Topics in English Language Literature (5)

Course topic changes; see the Class Search for current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 223 - Periods and Movements (5)

Examines a particular historical period or literary movement. Course topic changes; see the Class Search for current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 224 - Transnational Literatures (5)

Investigation of English language literature which transcends national boundaries. Course topic changes; see the Class Search for current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 230A - Topics in Theory (5)

Explores issues arising in both the modern practice of criticism and in writings on the theory of criticism. Course topic changes; please see the Class Search for current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 230B - Narrative Theory (5)

A survey of 20th-century narratology, emphasizing structuralist and poststructuralist theories of narrative.

Prerequisite: Enrollment is restricted to graduate students.

LIT 230C - Feminist Theories/Historical Perspectives (5)

A critical examination of feminist and related theories (queer, critical race, post-humanist) and criticism in historical and culturally specific contexts.

Prerequisite: Enrollment is restricted to graduate students.

LIT 231A - Studies in Literary and Cultural History (5)

Course topic changes; see the Class Search for current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 237A - Modernism (5)

Focuses on modernism and the intellectual and social forces which help illuminate that period. Considers concepts by which the innovative tendencies in 20th-century modernist literature and arts have been theorized and periodized, including high and late modernism, avant-garde and experimental, and the concept of global modernisms.

Prerequisite: Enrollment is restricted to graduate students.

LIT 240G - History and Tragedy (5)

Examines history, tragedy, and early science as ways of representing human experience in the Western canon. Topics include truth claims and questions of evidence, the nature of historical events, and tragedy as a political medium.

Prerequisite: Enrollment is restricted to graduate students.

LIT 243A - Studies in Early Modernity (5)

In-depth examination of a topic in Early Modern Studies. Course topic changes; see the Class Search for current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 243B - Early Modern Colonial Encounters (5)

This course will examine primary texts and interpretations, both fictional and archival, of the encounter between western Europe and non-European populations affected by European expansion from the 15th through the 18th centuries.

Prerequisite: Enrollment is restricted to graduate students.

LIT 246 - Individual Authors (5)

Focuses on work of a single author in literary historical and/or historical context. Course topic changes; see the Class Search for current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 250 - Theory and Methods (5)

Global theories of history and cultural production. Course topic changes; see the Class Search for current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 251 - Topics in Cultural Studies (5)

The course topic changes; see the Class Search for the current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 279A - Methods and Materials (5)

A combined seminar and creative-writing workshop with a concentrated focus on a particular problem, aspect, or genre of poetry or prose writing. Includes reading and analysis of selected texts with critical responses and creative writing. Explores the productive interaction between various practices of scholarship and creative invention. The course topic changes; please see the Class Search for the current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 279B - Writing Studio (5)

In this graduate-level, multi-genre course, students develop their own creative projects of publishable quality under the guidance of the instructor.

Prerequisite: Enrollment is restricted to graduate students in the creative/critical concentration or by permission of the instructor.

LIT 282A - Studies in Literary Genres (5)

An in-depth examination of one genre of French literature. Course topic changes; see the Class Search for current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 282B - Studies in Literary and Cultural History (5)

In-depth examination of one period of French literature. Course topic changes; see the Class Search for current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 282C - Texts and Contexts (5)

The implications of social and political change examined in terms of literary theory and practice. Equal emphasis placed on literary and other kinds of cultural texts: historical, political, cinematic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 282D - Topics in Theory (5)

Prerequisite: Enrollment is restricted to graduate students.

LIT 282F - French Literature Outside France (5)

A study of texts written in French-speaking cultures: Belgium, Canada, Africa, the Caribbean.

Prerequisite: Enrollment is restricted to graduate students.

LIT 283A - Deutsche Literatur und Kultur (5)

Examination of topics within German literature. Course topic changes; see the Class Search for the current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 288C - Don Quijote (5)

Concentrates on the study and analysis of Miguel de Cervantes' major work *Don Quijote*, with a three-part structure: life and literature in *Don Quijote*; Cervantes-the

father of the modern novel; and madness and ingenio in Don Quijote.

Prerequisite: Enrollment is restricted to graduate students.

LIT 288F - Writing and Re-Writing of the Conquest and Colonial Period in Spanish America (5)

Study of 1) the writings (chronicles, memoirs, diaries, letters) comprising European and indigenous accounts of the encounter and indigenous, criolla, and mestiza writings during the colony; and 2) the re-writings of these events in contemporary post-colonial novels.

Prerequisite: Enrollment is restricted to graduate students.

LIT 288M - Cuba (5)

Course topic changes; please see the Class Search for the current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 288O - The Conquest through the Eyes of Contemporary Writers (5)

Analyzes contemporary writers who fictionalize the phenomenon of the conquest of the Americas. These authors, who combine chronicles, biographies, and accounts with fiction, offer an imaginative way to view history.

LIT 288P - The Avant Garde in Latin America (5)

Emerging from a Europe in crisis, this 20th-century avant-garde movement opened a space in Latin/o American literature for the emergence of a post-western aesthetic exploring a cultural identity in difference. A deconstruction of vanguardismo, lo real maravilloso, lo fantástico, lo mágico-antropológico, and realismo mágico.

Prerequisite: Enrollment is restricted to graduate students.

LIT 288S - Citiscapes (5)

Theories of space/place poetics and politics, and the literary and visual re-presentations of urban spaces in Latin/o America. Questions of identity and location in modernist poetics, and the ways difference (gender, ethnicity, and sexuality) inhabit and imagine the post-modern lettered city.

Prerequisite: Enrollment is restricted to graduate students.

LIT 288U - Spain in the Eyes/Camera of Pedro Almodovar (5)

Contemporary Spain through the camera of Pedro Almodovar from transgressive enthusiasm, experimentation, and cultural disobedience of the 1980s to more universal themes of human nature and borderline experiences in the pursuit of love, relationships, beauty, and art.

Prerequisite: Enrollment is restricted to graduate students.

LIT 288Y - Teoria Critica en America Latina (5)

Overview of contemporary theoretical issues in Latin American cultural critique. Course topic changes; please see the Class Search for the current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 288Z - Literatura y sociedad (5)

Analyzes the relationship between Latin American cultural products and their cultural, economic, and political contexts. The course topic changes; please see the Class Search for the current topic.

Prerequisite: Enrollment is restricted to graduate students.

LIT 291F - Advising (2)

Independent study formalizing the advisee-adviser relationship. Regular meetings to plan, assess, and monitor academic progress and to evaluate coursework as necessary. May be used to develop general bibliography of background reading and trajectory of study. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LIT 293 - Independent Study: Creative Writing (5)

Individual study with a professor in the creative/critical concentration. Written work is required. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LIT 294 - Teaching-Related Independent Study (5)

Directed graduate research and writing coordinated with teaching of undergraduates. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LIT 295A - Directed Reading (5)

Study of literature in English or English translation. Directed reading that does not involve a term paper. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LIT 295B - Directed Reading (5)

Speaking, reading, and writing proficiency in French, German, Greek, Italian, Latin, Spanish, or other non-English language required. Directed reading which does not involve a term paper. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LIT 295C - Directed Reading (5)

Study of creative writing. Directed reading that does not involve a term paper. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LIT 296A - Special Student Seminar (5)

Study of literature in English or English translation. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LIT 296B - Special Student Seminar (5)

Speaking, reading, and writing proficiency in French, German, Greek, Italian, Latin, Spanish, or other non-English language required. Directed reading which does not involve a term paper. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LIT 296C - Special Student Seminar (5)

Study of creative writing. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LIT 297A - Independent Study (5)**LIT 297B - Independent Study (10)**

Speaking, reading, and writing proficiency in French, German, Greek, Italian, Latin, Spanish, or other non-English language required. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LIT 297F - Independent Study (2)

Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

LIT 299A - Thesis Research (5)

Thesis Research

LIT 299B - Thesis Research (10)

Thesis Research

MATH - MATHEMATICS

Lower-Division

MATH 2 - College Algebra for Calculus (5)

Operations on real numbers, complex numbers, polynomials, and rational expressions; exponents and radicals; solving linear and quadratic equations and inequalities; functions, algebra of functions, graphs; conic sections; mathematical models; sequences and series.

Prerequisite: Prerequisite(s): mathematics placement (MP) score of 100 or higher.

MATH 2S - College Algebra for Calculus (2)

This two-credit, stretch course offers students two quarters to master material covered in course 2: operations on real numbers, complex numbers, polynomials, and rational expressions; exponents and radicals; solving linear and quadratic equations and inequalities; functions, algebra of functions, graphs; conic sections; mathematical models; sequences and series. After successful completion of this course in the first quarter, students enroll in course 2 the following quarter to complete the sequence and earn an additional 5 credits.

Prerequisite: Prerequisite(s): mathematics placement (MP) score of 100 or higher.

MATH 2T - Preparatory Math: Tutorial (2)

Independent study of algebra and modern mathematics using adaptive learning software. Instruction emphasizes clear

mathematical communication and reasoning when working with sets, equations, functions, and graphs. Drop in labs, online forums, and readings provide opportunities for further learning and exploration.

Prerequisite: Prerequisite(s): mathematics placement (MP) score of 100 or higher.

MATH 3 - Precalculus (5)

Inverse functions and graphs; exponential and logarithmic functions, their graphs, and use in mathematical models of the real world; rates of change; trigonometry, trigonometric functions, and their graphs; and geometric series. Students cannot receive credit for both MATH 3 and AM 3. AM 3 can substitute for MATH 3.

Prerequisite: Prerequisite(s): MATH 2 or mathematics placement (MP) score of 200 or higher.

MATH 4 - Mathematics of Choice and Argument (5)

Techniques of analyzing and creating quantitative arguments. Application of probability theory to questions in justice, medicine, and economics. Analysis and avoidance of statistical bias. Understanding the application and limitations of quantitative techniques.

Prerequisite: Prerequisite(s): MATH 2, or mathematics placement (MP) score of 200 or higher, or AP Calculus AB examination score of 3 or higher.

MATH 11A - Calculus with Applications (5)

A modern course stressing conceptual understanding, relevance, and problem solving. The derivative of polynomial, exponential, and trigonometric functions of a single variable is developed and applied to a wide range of problems involving graphing, approximation, and optimization. Students cannot receive credit for both this course and MATH 19A, or AM 11A, or AM 15A, or ECON 11A.

Prerequisite: Prerequisite(s): MATH 3 or AM 3; or mathematics placement (MP) score of 300 or higher; or AP Calculus AB exam score of 3 or higher.

MATH 11B - Calculus with Applications (5)

Starting with the fundamental theorem of calculus and related techniques, the integral of functions of a single variable is developed and applied to problems in geometry, probability, physics, and differential equations. Polynomial approximations, Taylor series, and their applications conclude the course. Students cannot receive credit for this course and MATH 19B, or AM 11B, or AM 15B, or ECON 11B.

Prerequisite: Prerequisite(s): MATH 11A or MATH 19A or AM 15A or AP Calculus AB exam score of 4 or 5, or BC exam score of 3 or higher, or IB Mathematics Higher Level exam score of 5 or higher.

MATH 19A - Calculus for Science, Engineering, and Mathematics (5)

The limit of a function, calculating limits, continuity, tangents, velocities, and other instantaneous rates of change.

Derivatives, the chain rule, implicit differentiation, higher derivatives. Exponential functions, inverse functions, and their derivatives. The mean value theorem, monotonic functions, concavity, and points of inflection. Applied maximum and minimum problems. Students cannot receive credit for both this course and MATH 11A, or AM 11A, or AM 15A, or ECON 11A.

Prerequisite: Prerequisite(s): MATH 3; or mathematics placement (MP) score of 400 or higher; or AP Calculus AB exam score of 3 or higher.

MATH 19B - Calculus for Science, Engineering, and Mathematics (5)

The definite integral and the fundamental theorem of calculus. Areas, volumes. Integration by parts, trigonometric substitution, and partial fractions methods. Improper integrals. Sequences, series, absolute convergence and convergence tests. Power series, Taylor and Maclaurin series. Students cannot receive credit for both this course and MATH 11B, or AM 11B, or AM 15B, or ECON 11B.

Prerequisite: Prerequisite(s): MATH 19A or MATH 20A or AP Calculus AB exam score of 4 or 5, or BC exam score of 3 or higher, or IB Mathematics Higher Level exam score of 5 or higher.

MATH 20A - Honors Calculus (5)

Methods of proof, number systems, binomial and geometric sums. Sequences, limits, continuity, and the definite integral. The derivatives of the elementary functions, the fundamental theorem of calculus, and the main theorems of differential calculus.

Prerequisite: Prerequisite(s): mathematics placement (MP) score of 500 higher; or AP Calculus AB examination score of 4 or 5; or BC examination of 3 or higher; or IB Mathematics Higher Level examination score of 5 or higher.

MATH 20B - Honors Calculus (5)

Orbital mechanics, techniques of integration, and separable differential equations. Taylor expansions and error estimates, the Gaussian integral, Gamma function and Stirling's formula. Series and power series, numerous applications to physics.

Prerequisite: Prerequisite(s): MATH 20A.

MATH 21 - Linear Algebra (5)

Systems of linear equations matrices, determinants. Introduces abstract vector spaces, linear transformation, inner products, the geometry of Euclidean space, and eigenvalues. Students cannot receive credit for this course and AM 10.

Prerequisite: Prerequisite(s): MATH 11A or MATH 19A or MATH 20A or AM 11A or AM 15A.

MATH 22 - Introduction to Calculus of Several Variables (5)

Functions of several variables. Continuity and partial derivatives. The chain rule, gradient and directional derivative. Maxima and minima, including Lagrange multipliers. The double and triple integral and change of

variables. Surface area and volumes. Applications from biology, chemistry, earth sciences, engineering, and physics. Students cannot receive credit for this course and course 23A.

Prerequisite: Prerequisite(s): MATH 11B or MATH 19B or MATH 20B or AM 15B or AP calculus BC exam score of 4 or 5.

MATH 23A - Vector Calculus (5)

Vectors in n-dimensional Euclidean space. The inner and cross products. The derivative of functions from n-dimensional to m-dimensional Euclidean space is studied as a linear transformation having matrix representation. Paths in 3-dimensions, arc length, vector differential calculus, Taylor's theorem in several variables, extrema of real-valued functions, constrained extrema and Lagrange multipliers, the implicit function theorem, some applications. Students cannot receive credit for this course and course 22. (Formerly Multivariable Calculus.)

Prerequisite: Prerequisite(s): MATH 19B or MATH 20B or AP calculus BC exam score of 4 or 5.

MATH 23B - Vector Calculus (5)

Double integral, changing the order of integration. Triple integrals, maps of the plane, change of variables theorem, improper double integrals. Path integrals, line integrals, parametrized surfaces, area of a surface, surface integrals. Green's theorem, Stokes' theorem, conservative fields, Gauss' theorem. Applications to physics and differential equations, differential forms. (Formerly Multivariable Calculus.)

Prerequisite: Prerequisite(s): MATH 23A.

MATH 24 - Ordinary Differential Equations (5)

First and second order ordinary differential equations, with emphasis on the linear case. Methods of integrating factors, undetermined coefficients, variation of parameters, power series, numerical computation. Students cannot receive credit for this course and AM 20.

Prerequisite: Prerequisite(s): MATH 22 or MATH 23A; MATH 21 is recommended as preparation.

MATH 99 - Tutorial (5)

MATH 99F - Tutorial (2)

Upper-Division

MATH 100 - Introduction to Proof and Problem Solving (5)

Students learn the basic concepts and ideas necessary for upper-division mathematics and techniques of mathematical proof. Introduction to sets, relations, elementary mathematical logic, proof by contradiction, mathematical induction, and counting arguments.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; MATH 11A or

MATH 19A or MATH 20A; and MATH 21 or AM 10 or AMS 10A.

MATH 101 - Mathematical Problem Solving (5)

Students learn the strategies, tactics, skills and tools that mathematicians use when faced with a novel (new) problem. These include generalization, specialization, the optimization, invariance, symmetry, Dirichlet's box principle among others in the context of solving problems from number theory, geometry, calculus, combinatorics, probability, algebra, analysis, and graph theory. (Formerly, course 30.)

Prerequisite: Prerequisite(s): MATH 21 and MATH 100.

MATH 103A - Complex Analysis (5)

Complex numbers, analytic and harmonic functions, complex integration, the Cauchy integral formula, Laurent series, singularities and residues, conformal mappings. (Formerly course 103.)

Prerequisite: Prerequisite(s): MATH 23B; and either MATH 100 or CMPS 101.

MATH 103B - Complex Analysis II (2)

Conformal mappings, the Riemann mapping theorem, Mobius transformations, Fourier series, Fourier and Laplace transforms, applications, and other topics as time permits.

Prerequisite: Prerequisite(s): MATH 103A.

MATH 105A - Real Analysis (5)

The basic concepts of one-variable calculus are treated rigorously. Set theory, the real number system, numerical sequences and series, continuity, differentiation.

Prerequisite: Prerequisite(s): MATH 22 or MATH 23B and either MATH 100 or CMPS 101.

MATH 105B - Real Analysis (5)

Metric spaces, differentiation and integration of functions. The Riemann-Stieltjes integral. Sequences and series of functions.

Prerequisite: Prerequisite(s): MATH 105A.

MATH 105C - Real Analysis (5)

The Stone-Weierstrass theorem, Fourier series, differentiation and integration of functions of several variables.

Prerequisite: Prerequisite(s): MATH 105B.

MATH 106 - Systems of Ordinary Differential Equations (5)

Linear systems, exponentials of operators, existence and uniqueness, stability of equilibria, periodic attractors, and applications.

Prerequisite: Prerequisite(s): MATH 21 or AM 10; and either MATH 24 or AM 20; and either MATH 100 or CSE 101.

MATH 107 - Partial Differential Equations (5)

Topics covered include first and second order linear partial differential equations, the heat equation, the wave equation, Laplace's equation, separation of variables, eigenvalue problems, Green's functions, Fourier series, special functions including Bessel and Legendre functions, distributions and transforms.

Prerequisite: Prerequisite(s): MATH 21 or AM 10; and MATH 24 or AM 20; and either MATH 100 or CSE 101; MATH 106 is recommended as preparation.

MATH 110 - Introduction to Number Theory (5)

Prime numbers, unique factorization, congruences with applications (e.g., to magic squares). Rational and irrational numbers. Continued fractions. Introduction to Diophantine equations. An introduction to some of the ideas and outstanding problems of modern mathematics.

Prerequisite: Prerequisite(s): MATH 100 or CSE 101.

MATH 111A - Algebra (5)

Group theory including the Sylow theorem, the structure of abelian groups, and permutation groups. Students cannot receive credit for this course and course 111T.

Prerequisite: Prerequisite(s): MATH 21 or AM 10 and either MATH 100 or CSE 101.

MATH 111B - Algebra (5)

Introduction to rings and fields including polynomial rings, factorization, the classical geometric constructions, and Galois theory.

Prerequisite: Prerequisite(s): MATH 111A.

MATH 111T - Algebra (5)

Introduction to groups, rings and fields; integers and polynomial rings; divisibility and factorization; homomorphisms and quotients; roots and permutation groups; and plane symmetry groups. Also includes an introduction to algebraic numbers, constructible numbers, and Galois theory. Focuses on topics most relevant to future K-12 teachers. Students cannot receive credit for this course and course 111A.

Prerequisite: Prerequisite(s): MATH 100.

MATH 114 - Introduction to Financial Mathematics (5)

Financial derivatives: contracts and options. Hedging and risk management. Arbitrage, interest rate, and discounted value. Geometric random walk and Brownian motion as models of risky assets. Ito's formula. Initial boundary value problems for the heat and related partial differential equations. Self-financing replicating portfolio; Black-Scholes pricing of European options. Dividends. Implied volatility. American options as free boundary problems.

Prerequisite: Corequisite(s): STAT 131 or CSE 107.

MATH 115 - Graph Theory (5)

Graph theory, trees, vertex and edge colorings, Hamilton cycles, Eulerian circuits, decompositions into isomorphic subgraphs, extremal problems, cages, Ramsey theory, Cayley's spanning tree formula, planar graphs, Euler's formula, crossing numbers, thickness, splitting numbers, magic graphs, graceful trees, rotations, and genus of graphs.

Prerequisite: Prerequisite(s): MATH 21 or AM 10 and either MATH 100 or CSE 101.

MATH 116 - Combinatorics (5)

Based on induction and elementary counting techniques: counting subsets, partitions, and permutations; recurrence relations and generating functions; the principle of inclusion and exclusion; Polya enumeration; Ramsey theory or enumerative geometry.

Prerequisite: Prerequisite(s): MATH 100 or CSE 101. Enrollment is restricted to sophomores juniors, and seniors. Familiarity with basic group theory is recommended.

MATH 117 - Advanced Linear Algebra (5)

Review of abstract vector spaces. Dual spaces, bilinear forms, and the associated geometry. Normal forms of linear mappings. Introduction to tensor products and exterior algebras.

Prerequisite: Prerequisite(s): MATH 21 or AM 10 and either MATH 100 or CSE 101.

MATH 118 - Advanced Number Theory (5)

Topics include divisibility and congruences, arithmetical functions, quadratic residues and quadratic reciprocity, quadratic forms and representations of numbers as sums of squares, Diophantine approximation and transcendence theory, quadratic fields. Additional topics as time permits.

Prerequisite: Prerequisite(s): MATH 110 or MATH 111A.

MATH 120 - Coding Theory (5)

An introduction to mathematical theory of coding. Construction and properties of various codes, such as cyclic, quadratic residue, linear, Hamming, and Golay codes; weight enumerators; connections with modern algebra and combinatorics.

Prerequisite: Prerequisite(s): MATH 21.

MATH 121A - Differential Geometry (5)

Topics include Euclidean space, tangent vectors, directional derivatives, curves and differential forms in space, mappings. Curves, the Frenet formulas, covariant derivatives, frame fields, the structural equations. The classification of space curves up to rigid motions. Vector fields and differentiable forms on surfaces; the shape operator. Gaussian and mean curvature. The theorem Egregium; global classification of surfaces in three space by curvature.

Prerequisite: Prerequisite(s): MATH 21 and MATH 23B and either MATH 100 or CSE 101. MATH 105A strongly recommended.

MATH 121B - Differential Geometry and Topology (5)

Examples of surfaces of constant curvature, surfaces of revolutions, minimal surfaces. Abstract manifolds; integration theory; Riemannian manifolds. Total curvature and geodesics; the Euler characteristic, the Gauss-Bonnet theorem. Length-minimizing properties of geodesics, complete surfaces, curvature and conjugate points covering surfaces. Surfaces of constant curvature; the theorems of Bonnet and Hadamard.

Prerequisite: Prerequisite(s): MATH 121A.

MATH 124 - Introduction to Topology (5)

Topics include introduction to point set topology (topological spaces, continuous maps, connectedness, compactness), homotopy relation, definition and calculation of fundamental groups and homology groups, Euler characteristic, classification of orientable and nonorientable surfaces, degree of maps, and Lefschetz fixed-point theorem.

Prerequisite: Prerequisite(s): MATH 100; MATH 111A recommended.

MATH 128A - Classical Geometry: Euclidean and Non-Euclidean (5)

Euclidean, projective, spherical, and hyperbolic (non-Euclidean) geometries. Begins with the thirteen books of Euclid. Surveys the other geometries. Attention paid to constructions and visual intuition as well as logical foundations. Rigid motions and projective transformations covered.

Prerequisite: Prerequisite(s): either MATH 100 or CSE 101.

MATH 128B - Classical Geometry: Projective (5)

Theorems of Desargue, Pascal, and Pappus; projectivities; homogeneous and affine coordinates; conics; relation to perspective drawing and some history.

Prerequisite: Prerequisite(s): MATH 21.

MATH 129 - Algebraic Geometry (5)

Algebraic geometry of affine and projective curves, including conics and elliptic curves; Bezout's theorem; coordinate rings and Hilbert's Nullstellensatz; affine and projective varieties; and regular and singular varieties. Other topics, such as blow-ups and algebraic surfaces as time permits.

Prerequisite: Prerequisite(s): MATH 21 and MATH 100.

MATH 130 - Celestial Mechanics (5)

Solves the two-body (or Kepler) problem, then moves onto the N-body problem where there are many open problems. Includes central force laws; orbital elements; conservation of linear momentum, energy, and angular momentum; the Lagrange-Jacobi formula; Sundman's theorem for total collision; virial theorem; the three-body problem; Jacobi

coordinates; solutions of Euler and of Lagrange; and restricted three-body problem.

Prerequisite: Prerequisite(s): MATH 19A and 19B; and MATH 23A or PHYS 5A or PHYS 6A; MATH 21 and MATH 24 strongly recommended.

MATH 134 - Cryptography (5)

Introduces different methods in cryptography (shift cipher, affine cipher, Vigenere cipher, Hill cipher, RSA cipher, ElGamal cipher, knapsack cipher). The necessary material from number theory and probability theory is developed in the course. Common methods to attack ciphers discussed.

Prerequisite: Prerequisite(s): MATH 100 or CSE 101; MATH 110 is recommended as preparation.

MATH 140 - Industrial Mathematics (5)

Introduction to mathematical modeling of industrial problems. Problems in air quality remediation, image capture and reproduction, and crystallization are modeled as ordinary and partial differential equations then analyzed using a combination of qualitative and quantitative methods.

Prerequisite: Prerequisite(s): MATH 24; and either MATH 100 or CSE 101; and MATH 105A.

MATH 145 - Introductory Chaos Theory (5)

The Lorenz and Rossler attractors, measures of chaos, attractor reconstruction, and applications from the sciences. Students cannot receive credit for this course and AM 114.

Prerequisite: Prerequisite(s): MATH 22 or MATH 23A; MATH 21; MATH 100 or CSE 101. Concurrent enrollment in MATH 145L is required.

MATH 145L - Introductory Chaos Laboratory (1)

Laboratory sequence illustrating topics covered in course 145. One three-hour session per week in microcomputer laboratory.

Prerequisite: Concurrent enrollment in MATH 145 is required.

MATH 148 - Numerical Analysis (5)

A survey of the basic numerical methods which are used to solve scientific problems, including mathematical analysis and computing assignments. Some prior experience with Matlab (or similar) is helpful but not required. Some typical topics are: computer arithmetic; Newton's method for non-linear equations; linear algebra; interpolation and approximation; numerical differentiation and integration; numerical solutions of systems of ordinary differential equations and some partial differential equations; convergence and error bounds.

Prerequisite: Prerequisite(s): MATH 22 or MATH 23A; and MATH 21 or AM 10; and MATH 24 or AM 20; and MATH 100 or CSE 101. Concurrent enrollment in MATH 148L is required.

MATH 148L - Numerical Analysis Laboratory (1)

Laboratory sequence illustrating topics covered in course 148. One three-hour session per week in the computer laboratory.

Prerequisite: Concurrent enrollment in MATH 148 is required.

MATH 160 - Mathematical Logic I (5)

Propositional and predicate calculus. Resolution, completeness, compactness, and Lowenheim-Skolem theorem. Recursive functions, Godel incompleteness theorem. Undecidable theories. Hilbert's 10th problem.

Prerequisite: Prerequisite(s): MATH 100 or CSE 101.

MATH 161 - Mathematical Logic II (5)

Naive set theory and its limitations (Russell's paradox); construction of numbers as sets; cardinal and ordinal numbers; cardinal and ordinal arithmetic; transfinite induction; axiom systems for set theory, with particular emphasis on the axiom of choice and the regularity axiom and their consequences (such as, the Banach-Tarski paradox); continuum hypothesis.

Prerequisite: Prerequisite(s): MATH 100 or equivalent, or by permission of instructor.

MATH 181 - History of Mathematics (5)

A survey from a historical point of view of various developments in mathematics. Specific topics and periods to vary yearly.

Prerequisite: Prerequisite(s): MATH 19B or MATH 20B. MATH 100 is strongly recommended for preparation.

MATH 188 - Supervised Teaching (5)

Supervised tutoring in self-paced courses. May not be repeated for credit. Students submit petition to sponsoring agency.

MATH 192 - Dir Stu Teach (5)

MATH 194 - Senior Seminar (5)

Designed to expose the student to topics not normally covered in the standard courses. The format varies from year to year. In recent years each student has written a paper and presented a lecture on it to the class.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; MATH 103 or MATH 103A or MATH 105A or MATH 111A. Enrollment is priority given to seniors; juniors may request permission from the Undergraduate Vice Chair.

MATH 195 - Senior Thesis (5)

Students research a mathematical topic under the guidance of a faculty sponsor and write a senior thesis demonstrating knowledge of the material. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Students submit petition to sponsoring agency.

MATH 199 - Tutorial (5)

Students submit petition to sponsoring agency.

MATH 199F - Tutorial (2)

Tutorial

Graduate

MATH 200 - Algebra I (5)

Group theory: subgroups, cosets, normal subgroups, homomorphisms, isomorphisms, quotient groups, free groups, generators and relations, group actions on a set. Sylow theorems, semidirect products, simple groups, nilpotent groups, and solvable groups. Ring theory: Chinese remainder theorem, prime ideals, localization. Euclidean domains, PIDs, UFDs, polynomial rings. Prerequisite(s): courses 111A and 117 are recommended as preparation.

Prerequisite: Enrollment is restricted to graduate students.

MATH 201 - Algebra II (5)

Vector spaces, linear transformations, eigenvalues and eigenvectors, the Jordan canonical form, bilinear forms, quadratic forms, real symmetric forms and real symmetric matrices, orthogonal transformations and orthogonal matrices, Euclidean space, Hermitian forms and Hermitian matrices, Hermitian spaces, unitary transformations and unitary matrices, skewsymmetric forms, tensor products of vector spaces, tensor algebras, symmetric algebras, exterior algebras, Clifford algebras and spin groups.

Prerequisite: Prerequisite(s): MATH 200 is recommended as preparation. Enrollment is restricted to graduate students.

MATH 202 - Algebra III (5)

Module theory: Submodules, quotient modules, module homomorphisms, generators of modules, direct sums, free modules, torsion modules, modules over PIDs, and applications to rational and Jordan canonical forms. Field theory: field extensions, algebraic and transcendental extensions, splitting fields, algebraic closures, separable and normal extensions, the Galois theory, finite fields, Galois theory of polynomials.

Prerequisite: Prerequisite(s): MATH 201 is recommended as preparation. Enrollment is restricted to graduate students.

MATH 203 - Algebra IV (5)

Topics include tensor product of modules over rings, projective modules and injective modules, Jacobson radical, Wedderburn's theorem, category theory, Noetherian rings, Artinian rings, affine varieties, projective varieties, Hilbert's Nullstellensatz, prime spectrum, Zariski topology, discrete valuation rings, and Dedekind domains.

Prerequisite: Prerequisite(s): MATH 200, MATH 201, and MATH 202. Enrollment is restricted to graduate students.

MATH 204 - Analysis I (5)

Completeness and compactness for real line; sequences and infinite series of functions; Fourier series; calculus on Euclidean space and the implicit function theorem; metric spaces and the contracting mapping theorem; the Arzela-Ascoli theorem; basics of general topological spaces; the Baire category theorem; Urysohn's lemma; and Tychonoff's theorem.

Prerequisite: Prerequisite(s): MATH 105A and MATH 105B are recommended as preparation. Enrollment is restricted to graduate students.

MATH 205 - Analysis II (5)

Lebesgue measure theory, abstract measure theory, measurable functions, integration, space of absolutely integrable functions, dominated convergence theorem, convergence in measure, Riesz representation theorem, product measure and Fubini's theorem. L^p spaces, derivative of a measure, the Radon-Nikodym theorem, and the fundamental theorem of calculus.

Prerequisite: Prerequisite(s): MATH 204. Enrollment is restricted to graduate students.

MATH 206 - Analysis III (5)

Banach spaces, Hahn-Banach theorem, uniform boundedness theorem, the open mapping and closed graph theorems, weak and weak* topology, the Banach-Alaoglu theorem, Hilbert spaces, self-adjoint operators, compact operators, spectral theory, Fredholm operators, spaces of distributions and the Fourier transform, and Sobolev spaces.

Prerequisite: Prerequisite(s): Courses 204 and 205 recommended as preparation. Enrollment is restricted to graduate students.

MATH 207 - Complex Analysis (5)

Holomorphic and harmonic functions, Cauchy's integral theorem, the maximum principle and its consequences, conformal mapping, analytic continuation, the Riemann mapping theorem.

Prerequisite: Prerequisite(s): MATH 103 is recommended as preparation. Enrollment is restricted to graduate students.

MATH 208 - Manifolds I (5)

Definition of manifolds; the tangent bundle; the inverse function theorem and the implicit function theorem; transversality; Sard's theorem and the Whitney embedding theorem; vector fields, flows, and the Lie bracket; Frobenius's theorem. Course 204 recommended for preparation.

Prerequisite: Enrollment is restricted to graduate students.

MATH 209 - Manifolds II (5)

Tensor algebra. Differential forms and associated formalism of pullback, wedge product, exterior derivative, Stokes theorem, integration. Cartan's formula for Lie derivative. Cohomology via differential forms. The Poincaré lemma and

the Mayer-Vietoris sequence. Theorems of deRham and Hodge.

Prerequisite: Prerequisite(s): MATH 208. MATH 201 is recommended as preparation. Enrollment is restricted to graduate students.

MATH 210 - Manifolds III (5)

The fundamental group, covering space theory and van Kampen's theorem (with a discussion of free and amalgamated products of groups), CW complexes, higher homotopy groups, cellular and singular cohomology, the Eilenberg-Steenrod axioms, computational tools including Mayer-Vietoris, cup products, Poincaré duality, the Lefschetz fixed point theorem, the exact homotopy sequence of a fibration and the Hurewicz isomorphism theorem, and remarks on characteristic classes.

Prerequisite: Prerequisite(s): MATH 208 and MATH 209 recommended as preparation. Enrollment is restricted to graduate students.

MATH 211 - Algebraic Topology (5)

Continuation of course 210. Topics include theory of characteristic classes of vector bundles, cobordism theory, and homotopy theory.

Prerequisite: Prerequisite(s): MATH 200, MATH 201, and MATH 202 recommended as preparation. Enrollment is restricted to graduate students.

MATH 212 - Differential Geometry (5)

Principal bundles, associated bundles and vector bundles, connections and curvature on principal and vector bundles. More advanced topics include: introduction to cohomology, the Chern-Weil construction and characteristic classes, the Gauss-Bonnet theorem or Hodge theory, eigenvalue estimates for Beltrami Laplacian, and comparison theorems in Riemannian geometry.

Prerequisite: Prerequisite(s): MATH 208. Enrollment is restricted to graduate students.

MATH 213A - Partial Differential Equations I (5)

First of the two PDE courses covering basically Part I in Evans' book; *Partial Differential Equations*; which includes transport equations; Laplace equations; heat equations; wave equations; characteristics of nonlinear first-order PDE; Hamilton-Jacobi equations; conservation laws; some methods for solving equations in closed form; and the Cauchy-Kovalevskaya theorem.

Prerequisite: MATH 106 and MATH 107 are recommended as preparation. Enrollment is restricted to graduate students.

MATH 213B - Partial Differential Equations II (5)

Second course of the PDE series covering basically most of Part II in Evans' book and some topics in nonlinear PDE including Sobolev spaces, Sobolev inequalities, existence, regularity and a priori estimates of solutions to second order elliptic PDE, parabolic equations, hyperbolic equations and

systems of conservation laws, and calculus of variations and its applications to PDE.

Prerequisite: Prerequisite(s): MATH 106, MATH 107, and MATH 213A are recommended as preparation. Enrollment is restricted to graduate students.

MATH 214 - Theory of Finite Groups (5)

Nilpotent groups, solvable groups, Hall subgroups, the Frattini subgroup, the Fitting subgroup, the Schur-Zassenhaus theorem, fusion in p -subgroups, the transfer map, Frobenius theorem on normal p -complements.

Prerequisite: Prerequisite(s): MATH 200 and MATH 201 recommended as preparation. Enrollment is restricted to graduate students.

MATH 215 - Operator Theory (5)

Operators on Banach spaces and Hilbert spaces. The spectral theorem. Compact and Fredholm operators. Other special classes of operators.

Prerequisite: Prerequisite(s): MATH 204, MATH 205, MATH 206, and MATH 207 are recommended as preparation. Enrollment is restricted to graduate students.

MATH 216 - Advanced Analysis (5)

Topics include: the Lebesgue set, the Marcinkiewicz interpolation theorem, singular integrals, the Calderon-Zygmund theorem, Hardy Littlewood-Sobolev theorem, pseudodifferential operators, compensated compactness, concentration compactness, and applications to PDE.

Prerequisite: Prerequisite(s): MATH 204, MATH 205, and MATH 206 recommended as preparation. Enrollment is restricted to graduate students.

MATH 217 - Advanced Elliptic Partial Differential Equations (5)

Topics include elliptic equations, existence of weak solutions, the Lax-Milgram theorem, interior and boundary regularity, maximum principles, the Harnack inequality, eigenvalues for symmetric and non-symmetric elliptic operators, calculus of variations (first variation: Euler-Lagrange equations, second variation: existence of minimizers). Other topics covered as time permits.

Prerequisite: Prerequisite(s): MATH 204, MATH 205, and MATH 206 recommended as preparation. Enrollment is restricted to graduate students.

MATH 218 - Advanced Parabolic and Hyperbolic Partial Differential Equations (5)

Topics include: linear evolution equations, second order parabolic equations, maximum principles, second order hyperbolic equations, propagation of singularities, hyperbolic systems of first order, semigroup theory, systems of conservation laws, Riemann problem, simple waves, rarefaction waves, shock waves, Riemann invariants, and entropy criteria. Other topics covered as time permits.

Prerequisite: Prerequisite(s): MATH 205 and MATH 206.
Enrollment is restricted to graduate students.

MATH 219 - Nonlinear Functional Analysis (5)

Topological methods in nonlinear partial differential equations, including degree theory, bifurcation theory, and monotonicity. Topics also include variational methods in the solution of nonlinear partial differential equations.

Prerequisite: Enrollment is restricted to graduate students.

MATH 220A - Representation Theory I (5)

Lie groups and Lie algebras, and their finite dimensional representations.

Prerequisite: Prerequisite(s): MATH 200, MATH 201, and MATH 202. MATH 225A and MATH 227 recommended as preparation. Enrollment is restricted to graduate students.

MATH 220B - Representation Theory II (5)

Lie groups and Lie algebras, and their finite dimensional representations.

Prerequisite: Prerequisite(s): MATH 220A. Enrollment is restricted to graduate students.

MATH 222A - Algebraic Number Theory (5)

Topics include algebraic integers, completions, different and discriminant, cyclotomic fields, parallelotopes, the ideal function, ideles and adèles, elementary properties of zeta functions and L-series, local class field theory, global class field theory. Courses 200, 201, and 202 are recommended as preparation.

Prerequisite: Enrollment is restricted to graduate students.

MATH 222B - Algebraic Number Theory (5)

Topics include geometric methods in number theory, finiteness theorems, analogues of Riemann-Roch for algebraic fields (after A. Weil), inverse Galois problem (Belyi theorem) and consequences.

Prerequisite: Enrollment is restricted to graduate students.

MATH 223A - Algebraic Geometry I (5)

Topics include examples of algebraic varieties, elements of commutative algebra, local properties of algebraic varieties, line bundles and sheaf cohomology, theory of algebraic curves. Weekly problem solving. Courses 200, 201, 202, and 208 are recommended as preparation.

Prerequisite: Enrollment is restricted to graduate students.

MATH 223B - Algebraic Geometry II (5)

A continuation of course 223A. Topics include theory of schemes and sheaf cohomology, formulation of the Riemann-Roch theorem, birational maps, theory of surfaces. Weekly problem solving. Course 223A is recommended as preparation.

Prerequisite: Enrollment is restricted to graduate students.

MATH 225A - Lie Algebras (5)

Basic concepts of Lie algebras. Engel's theorem, Lie's theorem, Weyl's theorem are proved. Root space decomposition for semi-simple algebras, root systems and the classification theorem for semi-simple algebras over the complex numbers. Isomorphism and conjugacy theorems.

Prerequisite: Prerequisite(s): MATH 201 and MATH 202 recommended as preparation Enrollment is restricted to graduate students.

MATH 225B - Infinite Dimensional Lie Algebras (5)

Finite dimensional semi-simple Lie algebras: PBW theorem, generators and relations, highest weight representations, Weyl character formula. Infinite dimensional Lie algebras: Heisenberg algebras, Virasoro algebras, loop algebras, affine Kac-Moody algebras, vertex operator representations.

Prerequisite: Prerequisite(s): MATH 225A. Enrollment is restricted to graduate students.

MATH 226A - Infinite Dimensional Lie Algebras and Quantum Field Theory I (5)

Introduction to the infinite-dimensional Lie algebras that arise in modern mathematics and mathematical physics: Heisenberg and Virasoro algebras, representations of the Heisenberg algebra, Verma modules over the Virasoro algebra, the Kac determinant formula, and unitary and discrete series representations.

Prerequisite: Enrollment is restricted to graduate students.

MATH 226B - Infinite Dimensional Lie Algebras and Quantum Field Theory II (5)

Continuation of course 226A: Kac-Moody and affine Lie algebras and their representations, integrable modules, representations via vertex operators, modular invariance of characters, and introduction to vertex operator algebras.

Prerequisite: Enrollment is restricted to graduate students.

MATH 227 - Lie Groups (5)

Lie groups and algebras, the exponential map, the adjoint action, Lie's three theorems, Lie subgroups, the maximal torus theorem, the Weyl group, some topology of Lie groups, some representation theory: Schur's Lemma, the Peter-Weyl theorem, roots, weights, classification of Lie groups, the classical groups.

Prerequisite: Prerequisite(s): MATH 200, MATH 201, MATH 204, and MATH 208. Enrollment is restricted to graduate students.

MATH 228 - Lie Incidence Geometries (5)

Linear incidence geometry is introduced. Linear and classical groups are reviewed, and geometries associated with projective and polar spaces are introduced. Characterizations are obtained.

Prerequisite: Enrollment is restricted to graduate students.

MATH 229 - Kac-Moody Algebras (5)

Theory of Kac-Moody algebras and their representations. The Weil-Kac character formula. Emphasis on representations of affine superalgebras by vertex operators. Connections to combinatorics, PDE, the monster group. The Virasoro algebra.

Prerequisite: Enrollment is restricted to graduate students.

MATH 232 - Morse Theory (5)

Classical Morse Theory. The fundamental theorems relating critical points to the topology of a manifold are treated in detail. The Bott Periodicity Theorem. A specialized course offered once every few years.

Prerequisite: Prerequisite(s): MATH 208, MATH 209, MATH 210, MATH 211, and MATH 212 recommended as preparation. Enrollment is restricted to graduate students.

MATH 233 - Random Matrix Theory (5)

Classical matrix ensembles; Wigner semi-circle law; method of moments. Gaussian ensembles. Method of orthogonal polynomials; Gaudin lemma. Distribution functions for spacings and largest eigenvalue. Asymptotics and Riemann-Hilbert problem. Painleve theory and the Tracy-Widom distribution. Selberg's Integral. Matrix ensembles related to classical groups; symmetric functions theory. Averages of characteristic polynomials. Fundamentals of free probability theory. Overview of connections with physics, combinatorics, and number theory.

Prerequisite: Prerequisite(s): MATH 103, MATH 204, and MATH 205; MATH 117 recommended as preparation. Enrollment is restricted to graduate students.

MATH 234 - Riemann Surfaces (5)

Riemann surfaces, conformal maps, harmonic forms, holomorphic forms, the Reimann-Roch theorem, the theory of moduli.

Prerequisite: Enrollment is restricted to graduate students.

MATH 238 - Elliptic Functions and Modular Forms (5)

The course, aimed at second-year graduate students, will cover the basic facts about elliptic functions and modular forms. The goal is to provide the student with foundations suitable for further work in advanced number theory, in conformal field theory, and in the theory of Riemann surfaces.

Prerequisite: Prerequisite(s): MATH 200, MATH 201, MATH 202, and either MATH 207 or MATH 103A are recommended as preparation. Enrollment is restricted to graduate students.

MATH 239 - Homological Algebra (5)

Homology and cohomology theories have proven to be powerful tools in many fields (topology, geometry, number theory, algebra). Independent of the field, these theories use the common language of homological algebra. The aim of this course is to acquaint the participants with basic concepts of

category theory and homological algebra, as follows: chain complexes, homology, homotopy, several (co)homology theories (topological spaces, manifolds, groups, algebras, Lie groups), projective and injective resolutions, derived functors (Ext and Tor). Depending on time, spectral sequences or derived categories may also be treated. Courses 200 and 202 strongly recommended.

Prerequisite: Enrollment is restricted to graduate students.

MATH 240A - Representations of Finite Groups I (5)

Introduces ordinary representation theory of finite groups (over the complex numbers). Main topics are characters, orthogonality relations, character tables, induction and restriction, Frobenius reciprocity, Mackey's formula, Clifford theory, Schur indicator, Schur index, Artin's and Brauer's induction theorems. Recommended: successful completion of courses 200-202.

Prerequisite: Enrollment is restricted to graduate students.

MATH 240B - Representations of Finite Groups II (5)

Introduces modular representation theory of finite groups (over a field of positive characteristic). Main topics are Grothendieck groups, Brauer characters, Brauer character table, projective covers, Brauer-Cartan triangle, relative projectivity, vertices, sources, Green correspondence, Green's indecomposability theorem. Recommended completion of courses 200-203 and 240A.

Prerequisite: Prerequisite(s): MATH 200, MATH 201, MATH 202, MATH 203, and MATH 240A recommended. Enrollment is restricted to graduate students.

MATH 246 - Representations of Algebras (5)

Material includes associative algebras and their modules; projective and injective modules; projective covers; injective hulls; Krull-Schmidt Theorem; Cartan matrix; semisimple algebras and modules; radical, simple algebras; symmetric algebras; quivers and their representations; Morita Theory; and basic algebras.

Prerequisite: Prerequisite(s): MATH 200, MATH 201, and MATH 202. Enrollment is restricted to graduate students.

MATH 248 - Symplectic Geometry (5)

Basic definitions. Darboux theorem. Basic examples: cotangent bundles, Kähler manifolds and co-adjoint orbits. Normal form theorems. Hamiltonian group actions, moment maps. Reduction by symmetry groups. Atiyah-Guillemin-Sternberg convexity. Introduction to Floer homological methods. Relations with other geometries including contact, Poisson, and Kähler geometry.

Prerequisite: Prerequisite(s): MATH 204; MATH 208 and MATH 209 are recommended as preparation. Enrollment is restricted to graduate students.

MATH 249A - Mechanics I (5)

Covers symplectic geometry and classical Hamiltonian dynamics. Some of the key subjects are the Darboux theorem,

Poisson brackets, Hamiltonian and Lagrangian systems, Legendre transformations, variational principles, Hamilton-Jacobi theory, geodesic equations, and an introduction to Poisson geometry. Courses 208 and 209 are recommended as preparation.

Prerequisite: MATH 208 and MATH 209 recommended as preparation. Enrollment is restricted to graduate students.

MATH 249B - Mechanics II (5)

Hamiltonian dynamics with symmetry. Key topics center around the momentum map and the theory of reduction in both the symplectic and Poisson context. Applications are taken from geometry, rigid body dynamics, and continuum mechanics. Course 249A is recommended as preparation.

Prerequisite: Enrollment is restricted to graduate students.

MATH 249C - Mechanics III (5)

Introduces students to active research topics tailored according to the interests of the students. Possible subjects are complete integrability and Kac-Moody Lie algebras; Smale's topological program and bifurcation theory; KAM theory, stability and chaos; relativity; quantization. Course 249B is recommended as preparation.

Prerequisite: Enrollment is restricted to graduate students.

MATH 252 - Fluid Mechanics (5)

First covers a basic introduction to fluid dynamics equations and then focuses on different aspects of the solutions to the Navier-Stokes equations.

Prerequisite: Prerequisite(s): MATH 106 and MATH 107 are recommended as preparation. Enrollment is restricted to graduate students.

MATH 254 - Geometric Analysis (5)

Introduction to some basics in geometric analysis through the discussions of two fundamental problems in geometry: the resolution of the Yamabe problem and the study of harmonic maps. The analytic aspects of these problems include Sobolev spaces, best constants in Sobolev inequalities, and regularity and a priori estimates of systems of elliptic PDE.

Prerequisite: MATH 204, MATH 205, MATH 209, MATH 212, and MATH 213 recommended as preparation. Enrollment is restricted to graduate students.

MATH 256 - Algebraic Curves (5)

Introduction to compact Riemann surfaces and algebraic geometry via an in-depth study of complex algebraic curves.

Prerequisite: MATH 200, MATH 201, MATH 202, MATH 203, MATH 204, and MATH 207 are recommended as preparation. Enrollment is restricted to graduate mathematics and physics students.

MATH 260 - Combinatorics (5)

Combinatorial mathematics, including summation methods, binomial coefficients, combinatorial sequences (Fibonacci,

Stirling, Eulerian, harmonic, Bernoulli numbers), generating functions and their uses, Bernoulli processes and other topics in discrete probability. Oriented toward problem solving applications. Applications to statistical physics and computer science.

Prerequisite: Enrollment is restricted to graduate students.

MATH 264 - Inverse Problems and Integral Geometry (5)

Concepts of inverse problem and ill-posedness on the Hilbert scale. Approaches to inversion, regularization and implementation. In Euclidean geometry: Radon transform; X-ray transform; attenuated X-ray transform (Novikov's inversion formula); weighted transforms. Same topics in different geometric contexts: homogeneous spaces, manifolds with boundary. Non-linear problems: boundary rigidity, lens rigidity, inverse problems for connections. Courses 148, 204, 205, 206, and 208, are recommended for preparation.

Prerequisite: Enrollment is restricted to graduate students.

MATH 280 - Topics in Analysis (5)

Prerequisite: Enrollment is restricted to graduate students.

MATH 281 - Topics in Algebra (5)

Prerequisite: Enrollment is restricted to graduate students.

MATH 282 - Topics in Geometry (5)

Prerequisite: Enrollment is restricted to graduate students.

MATH 283 - Topics in Combinatorial Theory (5)

Prerequisite: Enrollment is restricted to graduate students.

MATH 284 - Topics in Dynamics (5)

Prerequisite: Enrollment is restricted to graduate students.

MATH 285 - Topics in Partial Differential Equations (5)

Topics such as derivation of the Navier-Stokes equations. Examples of flows including water waves, vortex motion, and boundary layers. Introductory functional analysis of the Navier-Stokes equation.

Prerequisite: Enrollment is restricted to graduate students.

MATH 286 - Topics in Number Theory (5)

Topics in number theory, selected by instructor. Possibilities include modular and automorphic forms, elliptic curves, algebraic number theory, local fields, the trace formula. May also cover related areas of arithmetic algebraic geometry, harmonic analysis, and representation theory. Courses 200, 201, 202, and 205 are recommended as preparation.

Prerequisite: Enrollment is restricted to graduate students.

MATH 287 - Topics in Topology (5)

Topics in topology, selected by the instructor. Possibilities include generalized (co)homology theory including K-theory, group actions on manifolds, equivariant and orbifold cohomology theory.

Prerequisite: Enrollment is restricted to graduate students.

MATH 288A - Pedagogy of Mathematics (2)

Prepares graduate students to become successful Teaching Assistants in mathematics courses. Topics include class management, assessment creation, evaluation and grading, student interaction, introduction to teaching and learning strategies, innovation in education, use of technology, and best practices that promote diversity and inclusion.

Prerequisite: Enrollment is restricted to graduate students.

MATH 288B - Pedagogy of Mathematics (0)

Prepares graduate students to become successful Graduate Student Instructors in mathematics. Topics include class management, assessment creation, evaluation and grading, student interaction, introduction to teaching and learning strategies, innovation in education, use of technology, and best practices that promote diversity and inclusion.

Prerequisite: Enrollment is restricted to graduate students.

MATH 292 - Seminar (0)

A weekly seminar attended by faculty, graduate students, and upper-division undergraduate students. All graduate students are expected to attend.

Prerequisite: Enrollment is restricted to graduate students.

MATH 296 - Special Student Seminar (5)

Students and staff studying in an area where there is no specific course offering at that time.

Prerequisite: Enrollment is restricted to graduate students.

MATH 297A - Independent Study (5)

Either study related to a course being taken or a totally independent study. Enrollment restricted to graduate students.

MATH 297B - Independent Study (10)

Either study related to a course being taken or a totally independent study. Enrollment restricted to graduate students.

MATH 297C - Independent Study (15)

Either study related to a course being taken or a totally independent study. Enrollment restricted to graduate students.

MATH 298 - Master's Thesis Research (5)

Enrollment restricted to graduate students.

MATH 299A - Thesis Research (5)

Enrollment restricted to graduate students.

MATH 299B - Thesis Research (10)

Enrollment restricted to graduate students.

MATH 299C - Thesis Research (15)

Enrollment restricted to graduate students.

MERR - MERRILL COLLEGE

Lower-Division

MERR 1 - Academic Literacy and Ethos: Reading Ourselves, Reading the World (5)

Teaches foundational concepts for intellectual exploration and personal development within an academic community: analysis, critical thinking, metacognition, engagement with others across difference, and self-efficacy. Engages students in Merrill's intellectual tradition of investigating social change and social justice.

Prerequisite: Enrollment is restricted to first-year college members.

MERR 3L - Precalculus Academy Lab (2)

Students use worksheets designed to help them solve problems by thinking critically, and participate in answering project-based questions relevant to the themes of their college core courses. Prerequisite(s): Mathematics 2 or placement (MP) score of 200 or higher. Concurrent enrollment in Mathematics 3 is required. Enrollment is by permission of the instructor.

MERR 28 - Peer Leadership in Co-Curricular Settings (2)

Introductory course for student leaders combining theoretical background and practical applications. Topics include: student-development theory; communication strategies; leadership-skills assessment; and intergroup relations. Includes readings, discussions, self-reflection, and lectures. Resident assistant (RA) pre-employment training course. Enrollment by interview only: approval of instructor required. Enrollment restricted to selection as resident assistant (RA), program assistant, or alternate for Merrill College.

MERR 50 - Merrill Alumni Careers in Public Service (2)

Course focuses on careers in public service--why choose one, how to prepare for one.

Prerequisite: Enrollment is restricted to college members.

MERR 80C - Merrill Seminar (5)

Research-based seminar on a topic of particular cultural, historical, or contemporary interest, open to all undergraduate students, taught by either a Merrill College Fellow or other member of the UCSC faculty.

MERR 85B - Merrill Classroom Connection Field Study (3)

Supervised hands-on experience assisting in local K-12 school classrooms. Students attend UCSC class meetings, complete relevant readings in educational theory, and present a final assignment. This course requires more hours than course 85C and involves travel to Pescadero twice per week.

Prerequisite: Priority enrollment restricted to Merrill College members.

MERR 85C - Merrill Classroom Connection Field Study (2)

Supervised hands-on experience assisting in local K-12 school classrooms. Students also attend UCSC course meetings, complete relevant readings in educational theory, and present a final assignment. Please see <http://merrill.ucsc.edu/academics/programs-and-courses/classroom-connection/index.html> for conditions that must be met prior to placement at local schools.

Prerequisite: Priority enrollment is restricted to Merrill College members.

MERR 90 - Theory and Practice of Field Study (5)

Course provides an opportunity for lower-division students to learn about Santa Cruz, Calif., its contemporary history, culture, and politics through classroom theoretical learning integrated with individual field studies. Course also examines social change, qualitative research, and community organizing.

Prerequisite: Enrollment is restricted to College Scholar Students.

MERR 90F - Merrill Field Study Practicum (2)

Offers Merrill students an opportunity for practical field study experience with preparation and support for practical skill development and critical reflection on service-learning experience.

Prerequisite: Enrollment is restricted to sophomore, junior, and senior college members.

MERR 90S - Theory and Practice of Field Study (2)

Students spend 10 hours a week on an internship they choose, with the support of the instructor, working with a local organization. Includes class lectures and discussions of readings.

MERR 93 - Field Study (5)

Provides for individual programs of study sponsored by the college and performed off campus. Up to three such courses may be taken for credit in any one quarter. Approval of student's adviser and provost required.

MERR 93F - Field Study (2)

Provides for individual program of study sponsored by the college and performed off campus. Approval of instructor required.

MERR 93G - Field Study (3)

Provides for individual programs of study sponsored by the college and performed off campus. Approval of instructor required.

MERR 98F - Independent Study (2)

Independent Study

MERR 99 - Tutorial (5)

Various topics to be arranged between student and instructor. Students submit petition to sponsoring agency.

MERR 99F - Tutorial (2)

Various topics to be arranged between student and instructor. Students submit petition to sponsoring agency.

Upper-Division

MERR 120 - Personal Empowerment (5)

Intensive course on individual goal-oriented behavior, commonly called problem solving. Focus on purpose, goals, meaning, emotions, languages, model-building, reality, thinking, logic, creativity, the steps of problem solving, common blocks, and techniques of unblocking. Meet with instructor prior to advance enrollment; priority given to upper-level students.

MERR 180 - Research Skills for College and Beyond (2)

Focuses on exploration/development of skills for planning, study habits, research, networking, and communication skills for college, graduate and professional school, and beyond. Primary focus is on writing, public speaking, and academic and professional research.

Prerequisite: Enrollment is restricted to junior and senior college members.

MERR 183F - Focus on Africa (2)

Equips students with the skills and background necessary to be informed observers and chroniclers of current affairs on the African continent.

MERR 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar by an upper-division student under faculty supervision. (See course 42.) Students submit petition to sponsoring agency, supported by faculty member willing to supervise.

MERR 193 - Field Study (5)

Provides for individual programs of study sponsored by the college and performed off campus. Up to three such courses may be taken for credit in one quarter. Approval of student's adviser and provost required.

MERR 193F - Field Study (2)

Provides for individual programs of study sponsored by the college and performed off campus. Up to three such courses may be taken for credit in one quarter. Approval of student's adviser and provost required.

MERR 193G - Field Study (3)

Provides for individual programs of study sponsored by the college and performed off campus. Up to three such courses

may be taken for credit in one quarter. Approval of student's adviser and provost required.

MERR 194 - Group Tutorial (5)

A program of independent study arranged between a group of students and a faculty member.

MERR 195 - Senior Research Project (5)

Students submit petition to sponsoring agency.

MERR 198 - Independent Field Study (5)

Provides for college-sponsored individual study programs off campus, for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. This may be a multiple-term course extending over two or three quarters; in this case the grade and evaluation submitted for the final quarter apply to all previous quarters. Petitions may be obtained at the Merrill College Office. Approval of student's adviser, certification of adequate preparation, and approval by the Merrill Provost required.

MERR 198F - Independent Study (2)

Independent Study

MERR 199 - Tutorial (5)

Various topics to be arranged between student and instructor. Students submit petition to sponsoring agency.

METX - MICROBIOLOGY AND ENVIRONMENTAL TOXICOLOGY

Lower-Division

METX 80E - Aquatic Toxicology (5)

An introduction to the sources, cycling, and impacts of toxicants in aquatic systems, including acid rain, ground water, fresh water rivers and lakes, estuaries, and the ocean. Emphasis is on the properties of toxic chemicals that influence their biogeochemical cycles and factors that influence their toxicity to aquatic organisms and humans.

Upper-Division

METX 101 - Sources and Fates of Pollutants (5)

Presents in-depth important principles of environmental toxicology related to the introduction, transport, and fate of toxicants in aquatic and terrestrial environments, including environmental chemistry and biogeochemical cycles as well

as exposure pathways and uptake by organisms. Additional emphasis placed on susceptibility and effects of toxicants across organ systems, toxicokinetic and biomarkers of exposure, and effects at the ecosystem level. Students cannot receive credit for this course and course 201.

METX 102 - Cell and Molecular Toxicology (5)

Emphases of biochemical, cellular, and organ system basis of intoxication, including dose-response relationships, biotransformation of toxicants, biochemical mechanisms underlying toxicity, factors influencing toxic action, and biomarkers of exposure. Emphasizes effects of various classes of toxins, including heavy metals and persistent synthetic organics, with a focus on susceptible biochemical/cellular processes of the central nervous, immune, hepatic, and renal target organ systems. Designed for advanced undergraduates. Students cannot receive credit for this course and course 202. (Formerly Cellular and Organismal Toxicology.)

Prerequisite: Prerequisite(s): BIOL 20A and BIOE 20B or equivalent; BIOL 100 and BIOC 110 recommended. Enrollment restricted to juniors and seniors.

METX 119 - Microbiology (5)

Cell and molecular biology of bacteria and their viruses, including applications in medicine, public health, agriculture, and biotechnology.

Prerequisite: Prerequisite(s): BIOC 100A or BIOL 101 or BIOL 100 or CHEM 103.

METX 119L - Microbiology Laboratory (5)

An introduction to the principles and practices of laboratory microbiology, with a substantial presentation of optical microscopy. Students are billed a materials fee.

Prerequisite: Prerequisite(s): previous or concurrent enrollment in METX 119 and either BIOL 20L, BIOL 101L, or BIOL 102L. Satisfaction of Entry Level Writing and Composition requirements. Enrollment restricted to biological sciences and affiliated majors, proposed majors, and minors. Other majors by permission.

METX 125 - Practicing Safe Science (2)

Introduces research safety principles and practices. Instructors and guest experts discuss research hazards and control measures. Students explore the safe use of research methods and materials via hands-on and outside exercises. Issues include compliance with hazardous waste and other environmental safety regulations.

METX 135 - Functional Anatomy (5)

A rigorous systems-based course in anatomy. Lectures provide an overview of functional anatomy at all levels from the systems to the tissues. Provides a mechanistic understanding of the structures of the body as a foundation for human-health oriented studies. (Formerly BIOL 135.)

Prerequisite: Prerequisite(s): courses 20A and Biology: Ecology and Evolutionary 20B. Concurrent enrollment in

course 135L is required. Enrollment restricted to biological sciences majors and affiliated majors and biology minors.

METX 135C - Cadaver Dissection Laboratory (2)

Dissection of a human cadaver under the direction of an anatomy instructor.

Prerequisite: Prerequisite(s): METX 135 and METX 135L, or ANTH 102A.

METX 135L - Functional Anatomy Lab (2)

Complements lecture course 135. Emphasizes nomenclature and recognition; includes the embryology and histology of bones, muscles, and internal organs, and the interactions between the systems of the body. Students are billed a materials fee. (Formerly BIOL 135L.)

Prerequisite: Prerequisite(s): BIOL 20A and BIOE 20B. Enrollment restricted to biological sciences majors and affiliated majors and biology minors. Concurrent enrollment in METX 135 is required.

METX 140 - Molecular Biology of Prokaryotes (5)

Focuses on several aspects of prokaryotic molecular biology. Covers transcriptional regulation, translational regulation, DNA replication and segregation, protein secretion, transport of small molecules, control of metabolism, stress response, bacterial differentiation, signal transduction, biofilm formation, and motility. Strong focus on experimental techniques and approaches used in prokaryotic molecular biology. Focus on model bacteria such as *Escherichia coli* and *Bacillus subtilis*. Students cannot receive credit for this course and course 240.

Prerequisite: Prerequisite(s): METX 119.

METX 144 - Groundwater Contamination (5)

Analyses of contemporary problems in groundwater contamination, based on current scientific understanding of contaminant transport in aquifers. Topics include both theoretical concepts and case studies.

Prerequisite: Prerequisite(s): EART 110B.

METX 145 - Medical Geology (5)

An interdisciplinary analysis of natural geochemical processes that impact human health and of anthropogenic processes that exacerbate those impacts.

Prerequisite: Prerequisite(s): CHEM 1A, CHEM 1B, CHEM 1C, CHEM 1M, and CHEM 1N.

METX 150 - Introduction to Research and Experimental Design (5)

Lecture-based course for advanced undergraduates actively engaged in undergraduate research (e.g., independent study or senior thesis). Emphasizes basic lab skills, including laboratory safety and handling of laboratory equipment; experimental design; scientific record keeping; and literature searching, review, and management.

METX 151 - Scientific Writing and Presentation (5)

For advanced undergraduates who are actively engaged in undergraduate research (e.g., independent study or senior thesis). Emphasizes the collection, reduction, analysis, management, and interpretation of scientific data; the presentation of scientific data in written and oral formats; and further development of critical thinking.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

METX 160 - Coastal Environmental Toxicology and Policy (3)

Interdisciplinary analysis of the scientific basis and policy development to regulate and manage environmental pollutants in coastal waters. Focuses on case studies involving aspects of environmental toxicology and policy including environmental monitoring and regulatory programs; ecosystem restoration; and regulating the environmental impacts of coastal development.

Prerequisite: Enrollment restricted to sophomores, juniors, seniors, and graduate students.

METX 170 - Drug Action and Development (5)

Lectures and case studies explore principles and approaches in drug discovery and development, emphasizing concepts in pharmacology; medicinal chemistry; and genomics- and bioinformatics-based approaches to drug discovery to illustrate pathways from discovery through development for clinical use. Cannot receive credit for this course and course 270. (Formerly Frontiers in Drug Action and Discovery.)

Prerequisite: Prerequisite(s): BIOL 100 or CHEM 103 or BIOC 100A; BIOL 110, and BIOL 130 and BIOL 130L or BIOL 131 and 131L are recommended. Enrollment restricted to juniors and seniors.

METX 195 - Senior Thesis (5)

An individually supervised course, with emphasis on independent research culminating in a senior thesis.

METX 195F - Senior Thesis (2)

An individually supervised course with emphasis on independent research culminating in a senior thesis.

METX 198 - Independent Study (5)

Provides for individual programs of study (a) by means other than the usual supervision in person or (b) when the student is doing all or most of the coursework off campus. With permission of the department, two or three courses may be taken concurrently, or the course repeated for credit.

METX 198F - Independent Study (2)

Provides for individual programs of study (a) by means other than the usual supervision in person or (b) when the student is doing all or most of the coursework off campus. With permission of the department, two or three courses may be taken concurrently, or the course repeated for credit.

METX 199 - Tutorial (5)

Reading, discussion, written reports, and laboratory research on selected topics.

METX 199F - Tutorial (2)

Reading, discussion, written reports, and laboratory research on selected topics.

Graduate

METX 200 - Interdisciplinary Approaches in Environmental Toxicology (5)

Introduction to interdisciplinary, case-based approaches to problem-solving. Demonstrates how important, current problems in environmental and human health have been addressed and solved. Presents assigned problems that integrate the different organization levels (environmental, molecular/cellular, organismal/public health) inherent to environmental and human health. Students work in collaborative teams to analyze each problem and create a proposal for a research plan/solution.

Prerequisite: Enrollment is restricted to graduate students. Advanced undergraduates may enroll by permission of the instructor.

METX 201 - Sources and Fates of Pollutants (5)

Presents in-depth important principles of environmental toxicology related to the introduction, transport, and fate of toxicants in aquatic and terrestrial environments including environmental chemistry and biogeochemical cycles as well as exposure pathways and uptake by organisms. Additional emphasis will be placed on the susceptibility and effects of toxicants across organ systems, toxicokinetics and biomarkers of exposure, and effects at the ecosystem level. Students cannot receive credit for this course and course 101.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduate science majors may enroll with permission of instructor.

METX 202 - Cell and Molecular Toxicology (5)

Emphasizes biochemical, cellular, and organ system basis of intoxication, including dose-response relationships, biotransformation of toxicants, biochemical mechanisms underlying toxicity, factors influencing toxic action, and biomarkers of exposure. Emphasizes effects of various classes of toxins, including heavy metals and persistent synthetic organics, with a focus on susceptible biochemical/cellular processes of the central nervous, immune, hepatic, and renal target organ systems. Students cannot receive credit for this course and Microbiology and Environmental Toxicology 102 or BIOL 122.. (Formerly Cellular and Organismal Toxicology.)

Prerequisite: Enrollment is restricted to graduate students.

METX 203 - Cellular and Molecular Toxicology (5)

Presents in-depth cellular and molecular principles of environmental toxicology. These include modes of action and cellular and molecular targets of toxicants, as well as mechanisms of cellular and molecular responses to toxicants and their detoxification. State-of-the-art biological methodologies and approaches to identify and study cellular targets of toxicants. Designed to provide students with a broad and deep understanding of the biological aspects of toxicology at both cellular and molecular levels, and the skills to approach emerging challenges in the field.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with instructor's permission.

METX 205 - Scientific Grant Writing (5)

Provides fundamental training of graduate students in the scientific method; experimental design; ethics in science; grant proposal and scientific writing; and data presentation and scientific speaking. Students are evaluated on class participation, performance, and a written NIH/NSF-style research proposal. (Formerly Scientific Skills, Ethics, and Writing.)

Prerequisite: Enrollment restricted to graduate students. Advanced undergraduates may enroll with permission of the instructor.

METX 206A - Advanced Microbiology (5)

Focuses on aspects of bacterial molecular biology. Covers four main areas: (1) metabolism-catabolism, anabolism, building-block precursors; (2) transcription/signal transduction; (3) replication/plasmid biology/division; (4) translation/protein processing/secretion/cell structure. Strong focus on experimental techniques and approaches used in molecular biology, and on model bacteria, such as *Escherichia coli* and *Bacillus subtilis*.

Prerequisite: Enrollment is restricted to graduate students. Advanced undergraduates may enroll with permission of instructor.

METX 210 - Molecular and Cellular Basis of Bacterial Pathogenesis (5)

Focuses on the molecular basis of bacterial pathogenesis with specific emphasis on gene expression, regulation, and ecology and evolution.

Prerequisite: Enrollment is restricted to graduate students. Advanced undergraduates with extensive background in microbiology and biology may enroll with permission of instructor.

METX 215 - Antibiotics: Actions and Resistance (3)

Critical review of scientific literature covering genetic and physiological mechanisms conferring resistance to antibiotics and their spread in the population. Format based on structured discussion of selected topics and original research proposal.

(Formerly Seminar in Advanced Prokaryotic Molecular Biology.)

Prerequisite: Prerequisite(s): METX 206A or METX 119, or by permission of the instructor. Enrollment is restricted to graduate students.

METX 238 - Pathogenesis: Molecular Mechanisms of Disease (5)

Provides an overview of the mammalian innate immune response and the role of inflammation in disease. Also, presents how both environmental stressors and microbial pathogens impact inflammation.

Prerequisite: Enrollment is restricted to graduate students.

METX 240 - Molecular Biology of Prokaryotes (5)

Focuses on several aspects of prokaryotic molecular biology. Covers transcriptional regulation, translational regulation, DNA replication and segregation, protein secretion, transport of small molecules, control of metabolism, stress response, bacterial differentiation, signal transduction, biofilm formation, and motility. Strong focus on experimental techniques and approaches used in prokaryotic molecular biology. Focus on model bacteria such as *Escherichia coli* and *Bacillus subtilis*. Students cannot receive credit for this course and course 140.

METX 245A - Scientific Communication in Microbiology and Environmental Toxicology A (5)

Introduces multiple forms of scientific presentation and communication to graduate students. Students learn to craft and deliver multiple types of written and visual communications, including formal and informal modes, on a topic developed as part of the class.

Prerequisite: Prerequisite(s): METX 200. Enrollment is restricted to graduate students.

METX 245B - Scientific Communication in Microbiology and Environmental Toxicology B (5)

Continuation of METX 245A. Students develop and refine a capstone in-depth report in a written form and as an oral presentation.

Prerequisite: Prerequisite(s): METX 245A. Enrollment is restricted to graduate students.

METX 250 - Environmental Microbiology (5)

How microbes interact with their environments. Topics include anaerobic metabolism; biotransformation of toxic metals and organic pollutants; geomicrobiology; life in extreme environments; water quality. Advanced undergraduates with extensive background in microbiology and biology may enroll with permission of instructor.

Prerequisite: Enrollment is restricted to graduate students.

METX 270 - Drug Action and Development (5)

Lectures and case studies explore principles and approaches in drug discovery and development, emphasizing concepts in pharmacology; medicinal chemistry; and genomics- and bioinformatics-based approaches to drug discovery to illustrate pathways from discovery through development for clinical use. Cannot receive credit for this course and course 170. (Formerly Frontiers in Drug Action and Discovery.)

Prerequisite: Enrollment is restricted to graduate students.

METX 281A - Topics in Environmental Toxicology (5)

Selected topics in environmental toxicology. Topics vary from year to year.

Prerequisite: Enrollment is restricted to graduate students; qualified upper-division science majors may enroll with instructor's permission.

METX 281C - Topics in Environmental Microbiology (2)

Seminar and discussion focusing on mechanism of microbial transformation of metals. Participants present results from their research projects in a seminar format. Relevant journal articles presented and discussed.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with instructor's permission.

METX 281F - Topics in Aquatic Toxicology (2)

Analyses of the sources and fates of aquatic pollutants. Discussions on processes at the air-water interface, within the water column, and in aquatic sediments. Topics vary from year to year.

Prerequisite: Enrollment is restricted to graduate students; qualified upper-division science majors may enroll with instructor's permission.

METX 281M - Topics in Molecular Toxicology (2)

Seminar and discussion on the mechanisms of toxicity in DNA alkylating agents. Participants present results from their research, and relevant journal articles are discussed.

Prerequisite: Enrollment is restricted to graduate students. Undergraduates may enroll with instructor's permission.

METX 281O - Topics in Bacterial Pathogenesis (2)

Intensive seminar focusing on mechanisms of bacterial pathogenesis of the ulcer-causing bacterium *Helicobacter pylori*. Participants are required to present results from their own research and relevant journal articles.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

METX 281S - Cellular and Organismal Responses to Toxicants (2)

Intensive research seminar on the concepts, theory, and techniques in deriving physiologically based pharmacokinetic models of toxin exposure, metabolism, and efficacy of therapeutic treatment in mammalian models of human metal toxicity.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with permission of instructor.

METX 281V - Topics in Bacterial Pathogenesis and Innate Immunity (2)

Focuses on the interplay between the human gut bacterial pathogen *Yersinia pseudotuberculosis* and the innate immune system of the host. Participants are required to present the goals, results, and conclusions from their own research. Participation in the general discussion during others' presentations is also required.

Prerequisite: Enrollment is restricted to graduate students. Qualified undergraduates performing research under the supervision of the instructor may enroll with instructor's permission.

METX 281Y - Biofilms: Processes and Regulation (2)

Intensive seminar series focusing on the most current work on genes and the processes that regulate biofilm development dynamics as well as on the recent developments on visualization of biofilms. Presentation and discussion based.

Prerequisite: Enrollment is restricted to graduate students. Qualified undergraduate students may enroll with instructor's permission.

METX 282 - Current Approaches to Molecular Pathogenesis (2)

Graduate level seminar focusing on the mechanisms by which bacterial pathogens cause disease. Specific topics include basic concepts of virulence and virulence factors, virulence factor regulation, toxins, and interactions of pathogens with mammalian cells and organs. Discussions focus on several key pathogens, including *Helicobacter pylori*, *Vibrio cholerae*, *Salmonella typhimurium*, and *Listeria monocytogenes*.

METX 290 - Proseminar (5)

Special topics offered from time to time by faculty, visiting professors, or staff members.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with instructor's permission.

METX 290A - Epidemiology and Risk Assessment (5)

Approaches different techniques of biological monitoring and the exposure and effect of biomarkers related to occupational and environmental exposure to chemicals. Available methods for risk assessment and identification of protective exposure

limits also considered. (Formerly *Biological Impact of Chemical Exposures*.)

METX 292 - Introductory Graduate Seminar (0)

Weekly seminars by academic and research faculty on their areas of special interest. Students write weekly abstracts on articles covered by the seminars.

Prerequisite: Enrollment is restricted to graduate students; qualified undergraduates may enroll with instructor's permission.

METX 297A - Independent Study (5)

Independent study for graduate students who have not yet settled on a research area for the thesis. Students submit petition to sponsoring agency.

METX 297B - Independent Study (10)

Independent study for graduate students who have not yet settled on a research area for the thesis. Students submit petition to sponsoring agency.

METX 297C - Independent Study (15)

Independent study for graduate students who have not yet settled on a research area for the thesis. Students submit petition to sponsoring agency.

METX 299A - Thesis Research (5)

Students submit petition to sponsoring agency.

METX 299B - Thesis Research (10)

Students submit petition to sponsoring agency.

METX 299C - Thesis Research (15)

Students submit petition to sponsoring agency.

MUSC - MUSIC

Lower-Division

MUSC 1A - Women's Chorale (2)

Study of vocal and choral techniques in the context of ensemble rehearsals, often culminating in public performance. Repertoire to include varied works for treble choir, both a cappella and with instrumental accompaniment. Familiarity with basic music notation recommended. Some additional rehearsal time, both individually and with the group is required. Admission by audition with conductor prior to first class meeting.

MUSC 1C - University Concert Choir (2)

A study of selected works for mixed chorus, with emphasis on masterworks for chorus and orchestra, culminating in one or more public concerts. Familiarity with basic music notation

recommended. Admission by audition with conductor prior to first class meeting. Students are billed a materials fee.

MUSC 2 - University Orchestra (2)

A study of selected works for orchestra, culminating in one or more public concerts. Admission by audition with conductor prior to first class meeting. Students are billed a materials fee.

MUSC 3 - Large Jazz Ensemble (2)

Instruction in performance in large jazz ensembles with written arrangements. Prepares a specific repertory for public performance. Admission by audition with conductor prior to first class meeting. Students are billed a materials fee.

MUSC 4A - Latin American Ensemble: Voces (2)

Instruction in diverse musical traditions, and their culturally-grounded performance contexts, of Native American, Ibero-American, and African American music cultures of Latin America, including texted music in Spanish and Quechua or other regional languages. The class forms an ensemble that prepares varying cultural and national repertoires for public performance. Some Spanish language ability is recommended. Attend first class meeting.

MUSC 4B - Latin American Ensemble: Taki Ñan (2)

Development of Latin American, Native American, Ibero-American, African American, and/or *Nueva Canción* (New Song) repertoire in a small ensemble setting. Three quarters of course 4A or previous enrollment in course 4B required prior to enrolling in this course. Admission by audition with instructor at first class meeting.

MUSC 5A - West Javanese Gamelan Ensemble: Beginning (2)

Instruction in practice and performance of gamelan music from Java or Sunda. Preparation of several works for public presentation.

MUSC 5B - West Javanese Gamelan Ensemble: Intermediate (2)

Instruction in practice and performance of gamelan music from Java or Sunda. Preparation of several works for public presentation. Attend first class meeting.

MUSC 5C - West Javanese Gamelan Ensemble: Advanced (2)

Instruction in practice and performance of gamelan music from Java or Sunda. Preparation of several works for public presentation. Attend first class meeting.

MUSC 6 - Classical Guitar Ensemble (2)

Study of selected repertoire and instruction in performance for classical guitar ensemble. Ensembles for guitar and other instruments will prepare works for public performances both on and off campus. All students enrolled in individual guitar lessons are expected to enroll. Students of other instruments or voice may also audition. Some additional rehearsal time, individually and with the group, is required. Admission by audition with instructor prior to first class meeting.

MUSC 7 - Music, Mind, Evolution, Language (5)

An interdisciplinary examination of various topics and issues in music, featuring an array of guest speakers. Part of the spring quarter Arts Division Dean's Lecture Series.

MUSC 8A - Beginning Balinese Gamelan (2)

Instruction in Balinese gamelan. Utilizes pitched percussion instruments to learn highly ornate and complex pieces through rote learning; students are not required to read music. Focuses on traditional repertoire and basic gamelan techniques for public performance. Enrollment by permission of the instructor at the first class meeting. (Formerly Balinese Gamelan Ensemble.)

MUSC 8B - Advanced Balinese Gamelan (2)

Instruction in Balinese gamelan. Utilizes pitched percussion instruments to learn highly ornate and complex pieces through rote learning; students are not required to read music. Focuses on advanced traditional and contemporary repertoire for public performance.

Prerequisite: Prerequisite(s): MUSC 8A.

MUSC 9 - Wind Ensemble (2)

A study of selected advanced-level works for wind ensemble, culminating in one or more public concerts. Admission by audition with conductor prior to first class meeting. Students are billed a materials fee.

MUSC 10 - Eurasian Ensemble (2)

Performing ensemble focusing on the vernacular and art musics of the Eurasian continent, with emphasis on Central Asia. Admission by instructor determination at first class meeting.

MUSC 11A - Introduction to Western Classical Music (5)

A study of significant works of classical music from Gregorian chant to the present day in relation to the historical periods they represent. Emphasizes the listening experience and awareness of musical style and structure. Illustrated lectures and directed listening. (Formerly Classical Music from the Middle Ages to the Present.)

MUSC 11B - Introduction to Jazz (5)

Designed to provide students with thorough and comprehensive background in history and roots of jazz as a musical style from its African roots to the present. Essential jazz styles and traditions are discussed through lectures, required listening, readings, lecture demonstrations, and film presentations.

MUSC 11D - Introduction to World Music (5)

Covers topics reflecting distinctive features of selected world music cultures. Introduces content, scope, and method of ethnomusicology. Focuses on understanding the musical styles, performance practices, and cultural functions of these musical traditions. Incorporates live class performance of selected music.

MUSC 12 - Mariachi Ensemble (2)

Focuses on the stylistic practice of mariachi music of Mexico. Centralizes efforts learning dance music as the son jalisciense, as well as popular singing genres that include the huapango, canci3n ranchera, corridos, and boleros. Students must have previous experience with music performance and applicable instruments.

MUSC 12B - Mexican Folklorico Music and Dance (2)

Instruction in the aesthetic, cultural, and historical dimensions of Mexican Folklorico dance and music. Brings together a dance ensemble and a music ensemble. Enrollment is by permission of the instructor.

MUSC 13 - Beginning Theory & Musicianship I (5)

Fundamentals of sound production notation in music. Emphasis on the development of the ear and rhythmic skills. Course involves significant participation through in-class performance.

MUSC 14 - Beginning Theory & Musicianship II (5)

Students learn basic elements of musical language: rhythms, meters, scales, intervals, and chords. All of these elements will be studied both singly and in their interrelationships within musical compositions. The study of structural elements of music will incorporate both theoretical and practical aspects of learning, including written, keyboard, singing, and aural exercises.

Prerequisite: Prerequisite(s): MUSC 13 or placement exam.

MUSC 15 - Preparatory Musicianship (5)

Basic studies in musicianship related to Western European notation and literature. Students with prior training in music notation develop literacy in basic tonal melody and harmony. Skills include dictation and sight-reading. Simple composition and analysis exercises accompany the training. Enrollment by placement examination and permission of instructor.

MUSC 16 - Theoretical Foundations of Music (5)

Explores the physics and socio-historical foundations of music so that students are effectively equipped to undertake further culturally informed study in music theory. No prior formal music education is required for this class, though students should have some experience singing or playing an instrument.

MUSC 30A - Theory, Literature, and Musicianship (5)

Integrated musicianship, theory, and analysis. Species counterpoint and fundamentals of tonal harmony. Analysis of literature from the Middle Ages and Renaissance. Ear-training, taught in smaller sections, emphasizes recognition of triad and dominant-seventh inversions, dictation of diatonic melodies, and aural analysis of simple diatonic interval and chord progressions. Most of the ear-training materials consist of homophonic and polyphonic examples from music literature performed live in class. Prerequisite: admission by core curriculum placement examination.

MUSC 30B - Theory, Literature, and Musicianship (5)

Integrated musicianship, theory, and analysis. Diatonic harmony and fundamentals of chromatic harmony and musical form, with an emphasis on early 18th-century styles. Ear-training, taught in smaller sections, emphasizes recognition of triad and seventh-chord qualities and inversions, dictation of moderately complex melodies and multi-voice chorales, and aural analysis of chord progressions including secondary functions. Most of the ear-training materials consist of homophonic and polyphonic examples from music literature performed live in class. Prerequisite(s): course 30A; instructor determination at first class meeting.

MUSC 30C - Theory, Literature, and Musicianship (5)

Integrated musicianship, theory, and analysis. Chromatic harmony and large forms, with emphasis on late 18th- and early 19th-century styles. Ear-training, taught in smaller sections, emphasizes melodic and multi-voice dictation, as well as aural analysis of chord progressions, with materials including digressions, modulations, and advanced chromatic idioms. Most of the ear-training materials consist of homophonic and polyphonic examples from music literature performed live in class. Prerequisite(s): course 30B; instructor determination at first class meeting.

MUSC 51 - Vocal Repertoire Class (2)

The study and performance of vocal repertoire from 1400 to the present, including solo song, oratorio, opera, ensemble music. Emphasis is given to the development of effective performance skills, culminating in public performance. Attend first class meeting; concurrent enrollment in individual voice lessons with instructor of this course is required.

MUSC 52 - Guitar Repertoire and Performance (2)

Designed to give guitar students who are pursuing the music major and minor, a weekly performance opportunity. Student performers receive feedback and constructive criticism from the instructors and from their peers. The instructors also offer insight and tips on choosing repertoire, performance anxiety and solutions, and historical and cultural context of the composers and music performed in the class. Enrollment by permission of instructor.

MUSC 54 - North Indian Music Workshop (2)

A course covering the music of North India taught using the oral traditions of Indian music. For beginners as well as more experienced students, this course is well suited for instrumentalists and vocalists. Interview; instructor determination at first class meeting.

MUSC 55 - Rhythms of North India (2)

Introduces students to the richness of North Indian rhythms. Includes hands-on exploration of the language of rhythm that is specific to learning the tabla.

MUSC 56 - Collaborative Music-Making for Beginners (2)

An active, hands-on introduction to music where no previous musical experience is needed. Using pitched and non-pitched

percussion, students are placed into small groups where they create and perform new pieces. Within this framework, students learn about scales, modes, rhythmic structures and form.

MUSC 57 - Survey of Jazz Guitar Styles (2)

Provides a selective historical and technical survey of jazz guitar. In addition to short lectures that provide historical context, students will also learn the basic building blocks of accompaniment and soloing in a variety of styles. Enrollment by permission of instructor.

MUSC 58 - Songwriting Craft and Practice (5)

Explores the craft of songwriting through listening, analysis, performance, and songwriting assignments. Students are exposed to a variety of writing styles from diverse musical backgrounds such as pop, rock, folk, jazz, avant-garde, classical, and world music. Students gain the ability to analyze a song's form, its textual rhythmic scheme, mood, and performative aspects. Students also compose, record, and perform song samples demonstrating their understanding and creative approach to the concepts discussed in class.

MUSC 59 - Introductory Keyboard Skills (2)

Introductory instruction in piano technique, staff notation, and music theory. Includes group and individual performance experience. A minimum of six hours per week individual practice required. Appropriate for students with little/no piano experience. Students are billed a materials fee. Enrollment is by permission of the instructor. Students audition to determine their skill level.

MUSC 60 - Fundamental Keyboard Skills (2)

Elementary instruction in piano technique, including group and individual performance experience. A minimum of six hours per week of individual practice is required. Curriculum is coordinated with keyboard requirements of course 30A. Concurrent enrollment in course 30A is required. Students are billed a course fee. Prerequisite(s): Instructor determination at first class meeting. (Formerly Group Instruction in Piano.)

MUSC 61 - Individual Lessons: Half Hour (2)

One-half hour of individual instrumental or vocal instruction. Repertory, technique, and performance practice. A minimum of six hours per week of individual practice is required. Concurrent enrollment in an ensemble in the lesson instrument or voice is required. Students are billed a course fee. Admission by audition with the instructor prior to first class meeting. Enrollment priority given to music majors and minors.

MUSC 62 - Individual Lessons: One Hour (3)

One hour of individual instrumental or vocal instruction. Repertory, technique, and performance practice. A minimum of nine hours per week of individual practice is required. Concurrent enrollment in an ensemble in the lesson instrument or voice is required. Students are billed a course fee. Admission by audition with the instructor prior to first

class meeting. Enrollment priority given to music majors and minors.

MUSC 63 - Group Instrumental and Vocal Lessons (2)

Elementary group instruction in instrumental (excluding piano) or vocal techniques, including group and individual performance experience. A minimum of six hours per week of individual practice is required. Students are billed a course fee. Admission by audition with the instructor prior to first class meeting.

MUSC 75 - Beginning Improvisational Theory (5)

Studies in the modes, scales, chord alternations and extensions, chord voicings, chord progressions, and forms that underlie jazz improvisation, composition, and arranging in a variety of styles.

MUSC 80A - Music of the Silk Road (5)

Exploration of the commonalities between music cultures found along ancient trade routes through Asia.

MUSC 80B - Music of Asia (5)

Introduces basic concepts of ethnomusicology; instructs students in the development of listening and analytical skills; and explores selected musical areas of East Asia, Southeast Asia, and South Asia.

MUSC 80C - History, Literature, and Technology of Electronic Music (5)

This survey of electronic music from previous centuries to the present studies the works and aesthetics of important composers, acoustics, musical perception, the effects of technological innovation on cultural evolution, and the development of synthesizers and computer music.

MUSC 80E - Race and American Music (5)

Survey of American music and its dynamic formation through cultural constructions of racial difference. Students hear music as contentious signals of identity, power, and transgressions, contextualized by wide-ranging testimony on racial difference, ethnicity, gender, sexuality, and musical practice.

MUSC 80F - Music in Latin American Culture: Regional Traditions (5)

In-depth study of select music cultures of Mexico, Central America, and Caribbean, Brazil, Chile, Argentina, Colombia, and Peru. Characteristic regional genres, ensembles, instruments, and music rituals. Case studies by ethnomusicologists with expertise in specific regional musics. Also Latin American Nueva Canción, women's musics, and overarching themes in Latin American music, as a whole. Offered on a rotational basis with other non-Western courses in the 80 series.

MUSC 80G - American Musical Theater (5)

Surveys American musicals from operetta through rock musicals with a historical approach focusing on selected

examples from the literature. Music reading or musical experience helpful but not required.

MUSC 80H - The Hollywood Musical (5)

Introductory study of the Hollywood music film, exploring the theory of film sound, the musical genre, and representative works from the 1920s to the present. Students expected to view about two films each week, read assigned section of texts, and contribute to class discussions.

MUSC 80I - Music of Modern Israel (5)

Historical, musicological, and anthropological study of the many (and often conflicting) worlds brought together by Israeli popular and art music: Jewish and Arabic traditions, Western ideals, and modern beats.

MUSC 80J - American Folk Music (5)

Surveys American folk music, both instrumental and vocal, by region and period. Approach is primarily through listening. Previous musical experience helpful, but not required.

MUSC 80K - Sound in Art, Science, and the Environment (5)

Study the role of sound in artistic creation and scientific research related to the environment. Topics include: environmental sound monitoring, increasing environmental awareness, social activism, discovery of sound phenomena, knowledge of audio tools and techniques, sound and environmental problem-solving.

MUSC 80L - Artificial Intelligence and Music (5)

An introduction to basic concepts in music and artificial intelligence, and to algorithmic composition (composition by a set of explicit instructions, often using the computer). Other topics include basic introductions to related concepts in linguistics, mathematics, neural nets, pattern matching, genetic algorithms, fuzzy logic, and interactive systems. Previous experience in one or more of these topics is helpful but not required. Students produce a project based on one of the models presented in class.

MUSC 80M - Film Music (5)

A survey of film music including a discussion of current trends and film composers. Techniques and styles of film music are explored through lectures, required listenings, readings, and viewing of relevant films. A musical background, including the ability to read music, is helpful but not necessary.

MUSC 80N - Music of the Grateful Dead (5)

In-depth exploration of the music of the Grateful Dead. Contextual study of the sociology and history of the late 1960s psychedelic movement supplies background for study of the music as the band evolved through time.

MUSC 80O - Music, Politics, and Protest (5)

Examination of relationship between music, politics, and protest in the U.S. in the 20th century, with focus on how

music commented upon and reflected different eras in American cultural and political life.

MUSC 80P - Popular Music in the United States (5)

Introduces music and cultural studies, surveys popular music in the United States from 18th-century minstrelsy to 21st-century social media consumer-producers. Emphasizes narratives of race, complicated by ethnicity, gender, and class, informing ways of valuing music, and its capacity for social representation. (Formerly Music 11C, Introduction to American Popular Music.)

MUSC 80Q - A Survey of African Music (5)

Traces the various stylistic musical areas throughout the African continent and explores the development of traditional African music from antiquity into the 20th century.

MUSC 80R - Music in the Digital Age (5)

A survey of how the Internet has influenced how music is made, transmitted, and consumed. Students discuss the history and ethics of file sharing and open source software, telematics and methods of music-making via the Internet, virtual communities, and social media. Students explore these topics through research and creative projects. (Formerly Music and the World Wide Web.)

MUSC 80S - Women in Music (5)

An exploration of the sociological position of women as composers and performers in Western and non-Western musics, with a focus on both ethnographic and historical sources.

MUSC 80T - Mizrah: Jewish Music in the Lands of Islam (5)

A survey of the musical traditions of the Jews of North Africa and the Middle East. Based on the Maqamat, the Arabic musical modes, Jewish music flourished under Islamic rule, encompassing the fields of sacred, popular, and art music.

MUSC 80V - The Music of the Beatles (5)

The most significant group in the history of popular music, the Beatles spanned the gamut of styles from hard-edged R & B to sophisticated art-rock. This course explores their work in detail, in its own terms, and in the historical/cultural/technological contexts. Students cannot receive credit for both this course and course 180V in the same quarter. Course 11C is recommended but not required as preparation.

MUSC 80W - Music Business (5)

Explores the many facets of the music industry: history, technology, economics, sociology, and legislation. Provides both a broad understanding of the industry and a pragmatic survey of available career paths. Students cannot receive credit for both this course and course 180W in the same quarter.

MUSC 80X - Music of India (5)

A survey course in Hindustani (North Indian) and Karnatak (South Indian) music covering the Raga (modal system) and Tala (metric system) as they have developed in the two traditions. Consideration is given to the historical development of the music, from Vedic chanting to the modern Raga system; social functions of the music throughout history; and instrumental and vocal forms with an emphasis on listening.

MUSC 80Y - Music, Anti-Semitism, and the Holocaust (5)

The musical legacy of the Holocaust: music and anti-Semitism in the 19th century; morality, collaboration, and composing in the Third Reich; music in the ghettos and concentration camps; impact on post-war music; second-generation composers' trauma; music in Holocaust films.

MUSC 80Z - Laptop Music (5)

Basic digital audio editing and mixing; related concepts in the physics of sound, psychoacoustics, and the digital representation and computer control of audio. Musical notation of musical pulse, meter, and rhythm, and sonic realization via MIDI (musical instruction digital interface). Using their own computers, students complete projects involving recording and spectral analysis, creative editing and mixing of existing recordings, composition of polyphonic drum rhythms, and constructing a collaborative sonic environment.

MUSC 81A - Survey of Rap and Hip Hop Music (5)

Involves examination, evaluation, performance, and discussion of rap music and its relationship to hop hop culture. Looks at three primary areas: historical periods of rap, aspects of performance practice, and lyrical content related to issues in contemporary society. Students engage in listening exercises, performances and presentations, and discuss the placement of rap in an academic setting. No prior musical knowledge is required.

MUSC 81C - Global Popular Music (5)

This cultural study of global popular musics explores musical sounds, practices, and discourse via an examination of the development of the category world music. It explores how music and mass media engage broader issues around globalization, ethnic, national, and transnational identities; popular resistance; censorship; and cultural hegemony.

MUSC 81E - Music and Resilience in Latin America (5)

Introduces the role of music and musical practices in social movements, cultural changes, and activism in the 20th and 21st centuries in Latin America and Latina/o communities in the United States and other parts of the world where Latin American cultures are vibrant. Case studies covered in class demonstrate how actions occur within social, political, economical, and environmental spheres that impact the formation of identities, the negotiation around human rights, and the well-being of communities.

MUSC 81G - A Cultural History of the Guitar (5)

Surveys the history of the guitar--one of the world's most popular, adaptable, and ubiquitous instruments--by tracing its organological development in the late Renaissance and analyzing representative historical moments of widespread cultural relevance through a technological lens.

MUSC 81H - The Golden Age of Hip Hop (3)

During the Golden Age Era of Hip Hop (late 1980s to mid-1990s) there was a creative explosion of musical representation in rap/hip hop music. Beginning after the commercial success of Run DMC in 1986, class focus continues until the deaths of Tupac Shakur (1996) and the Notorious BIG (1997). In between these points some of the most influential and controversial figures in hip hop history emerge.

MUSC 81I - Music of Indonesia (5)

Provides a general overview of music practices native to the Indonesian archipelago. Students study cultural and political histories of Indonesia and analyze a variety of music styles. Students also learn to perform a selection of Indonesian music styles in hands-on performance labs.

MUSC 81J - Jazz Mirror of Global Interconnection (5)

Examines global cultural history through the primary lens of jazz music evolution from its traditional African source through the nexus of the primary elements of sound. Students use music to examine and explore the intersections between many global cultural developments.

MUSC 81M - Chicano/Latino Music in the United States (5)

Examines the process of music making and how it is tied to the notion of space, place, identity and ethnicity, focusing on musical styles, genres, forms, and repertoires in Chicana/o and Latina/o communities in the United States.

MUSC 81P - History of Jewish Music (5)

Survey of the diverse and rich musical traditions of Jewish music in the diaspora from biblical times to the present. Examines the historical, social, and anthropological aspects of the different communities from sacred music through art and popular songs. (Formerly course 80P.)

MUSC 81R - The 1970's: A Decade in Rock (3)

Rock in the 1970s topped music charts while expanding far beyond the radio single. Many 70s artists, such as Elton John, Led Zeppelin, and Pink Floyd, enjoy continuing popularity today. Students examine this decade of rock, its roots, and its biases.

MUSC 81S - Music and Science Fiction (3)

Examines the historical and cultural role of music in science fiction literature, film, and television, asking students to question how music is used to convey the strange and unfamiliar and to further think critically about why music is able to do so. Also covers science fiction in opera, symphonic

music, and popular music, highlighting the musical elements that comprise the sounds of science fiction.

MUSC 81T - Fundamentals of Music Technology (2)

A practical introduction to the tools and techniques used for live sound reinforcement and studio recording. Hands-on demonstrations of different microphones, speakers, hardware and software processors, analog and digital systems.

MUSC 94 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Admission requires approval of department.

MUSC 99 - Tutorial (5)

A program of directed study arranged with a department faculty member. Students submit petition to sponsoring agency.

MUSC 99F - Tutorial (2)

A program of directed study arranged with a department faculty member. Class time is proportionally less than a five-credit course. Students submit petition to sponsoring agency.

Upper-Division

MUSC 101A - History of Western Art Music (Medieval, Renaissance, and Baroque) (5)

First quarter of a three-quarter chronological study of Western art music. Coordinated lectures, readings, listening, and analysis of representative works: Medieval, Renaissance, Baroque. Formerly History of Western Art Music.

Prerequisite: Prerequisite(s): MUSC 30A and satisfaction of the Entry Level Writing and Composition requirements.

MUSC 101B - History of Western Art Music (5)

Second quarter of a three-quarter chronological study of Western art music. Coordinated lectures, readings, listening, and analysis of representative works: Baroque, Classical, Romantic.

Prerequisite: Prerequisite(s): MUSC 30B.

MUSC 101C - History of Western Art Music (5)

Third quarter of a three-quarter chronological study of Western art music. Coordinated lectures, readings, listening, and analysis of representative works: Romantic, 20th Century.

Prerequisite: Prerequisite(s): MUSC 30C and satisfaction of the Entry Level Writing and Composition requirements.

MUSC 102 - University Orchestra (2)

A study of selected works for orchestra, culminating in one or more public concerts. Admission by audition with conductor prior to first class meeting. Students are billed a materials fee. Enrollment restricted to juniors and seniors.

MUSC 103 - University Concert Choir (2)

A study of selected works for orchestra, culminating in one or more public concerts. Prerequisite(s): admission by audition with conductor prior to first class meeting. Students are billed a materials fee.

MUSC 105A - Music of the United States (5)

Traces major developments in the history of American music since the Revolutionary Era, focusing on what makes music in the United States unique. Material drawn from classical, popular, religious, jazz, and avant-garde traditions.

Prerequisite: Prerequisite(s): MUSC 101A, MUSC 101B, or MUSC 101C, or by permission of the instructor. Enrollment is restricted to juniors and seniors.

MUSC 105C - Folk and Traditional Music in California (5)

A comparative study of the folk and traditional musical productions of five different cultural communities found in California, through a body of media that intersects history, sociology, anthropology, ethnomusicology, and more.

Prerequisite: Prerequisite(s): MUSC 30A.

MUSC 105E - Early Keyboard Music (5)

Survey of four centuries of early keyboard music, including representative genres, instruments, composers, and compositions from the late-Gothic to the Classical period. Harpsichord, virginal, organ and fortepiano works studied through scores, recordings, and live performance. Social context, instrument tuning and representative performance practices will coordinate each unit.

Prerequisite: Prerequisite(s): course 101A or 101B or 101C. Enrollment is restricted to junior and senior music majors.

MUSC 105I - Improvisation and Collaborative Practices in the 20th Century (5)

Study of music repertoires and performance practices based on improvisation and collaborative approaches to real-time composition in the areas of jazz and other new music.

Prerequisite: Prerequisite(s): MUSC 30A, MUSC 30B, and MUSC 30C, and at least one course from the 101 series. Enrollment is restricted to music majors.

MUSC 105M - Solo Song: from Monophony to Monody (5)

Traces the changing landscape of the secular solo song from the earliest notated examples of the troubadours through the explosion of monody in print at the beginning of the 17th century.

Prerequisite: Prerequisite(s): MUSC 30A and MUSC 101A. Enrollment is restricted to music majors.

MUSC 105O - Opera from Peri to Pergolesi (5)

Traces the development of opera from its origins in the late 16th century through the works of the early 18th century. Explores all aspects of this multimedia genre, with significant research and writing components.

Prerequisite: Prerequisite(s): MUSC 30C and MUSC 101A, or by permission of the instructor.

MUSC 105P - The Piano (5)

Research-based survey of the history of the piano and related keyboard instruments. Topics include instrument mechanics, design, and tuning; important players and innovators in piano technique; repertoire written for piano in classical, jazz, vernacular, and experimental traditions and performance practices, including improvisation; the socioeconomics of the piano industry; the piano's use as a pedagogical tool.

Prerequisite(s): MUSC 30A and consent of instructor.

MUSC 105Q - The String Quartet from Haydn to the Present (5)

Traces the development of the string quartet from its origins in the mid-18th Century through the works of the mid-late 20th Century. Emphasis is on listening and analysis with significant research and writing component. (Formerly The String Quartet from Haydn to Shostakovich.)

Prerequisite: Prerequisite(s): MUSC 30A, or by permission of instructor.

MUSC 105R - History of Russian Music (5)

Focuses on Russian music in its historical development from the Middle Ages to the 20th century. Class lectures, as well as listening and reading materials, draw together different musical strata. All musical events viewed in their cultural, historical, and social contexts.

Prerequisite: Prerequisite(s): MUSC 30A.

MUSC 111B - Seminar in Jazz Analysis (5)

Analytic exploration of the evolution of jazz in America. The process involves independent listening, analysis, transcription, weekly seminar discussions, and oral presentation to students in course 11B.

Prerequisite: Prerequisite(s): MUSC 30B and MUSC 11B.

MUSC 120 - Seminar in Music Composition (5)

Instruction in individual composition offered in the context of a group; composition in traditional large and small forms. Counts as one of two choices for a capstone course.

Prerequisite: Prerequisite(s): MUSC 30C.

MUSC 121 - Orchestration (5)

A study of the nature of each instrument of the orchestra. Scoring for various small instrumental combinations, culminating in a transcription for full orchestra. (Formerly course 130.)

Prerequisite: Prerequisite(s): MUSC 30C.

MUSC 122 - Conducting (2)

The development of basic conducting techniques, including understanding and demonstration of the conductor's posture,

best practices of dynamics, left hand usage, mixed meter, and breath.

Prerequisite: Prerequisite(s): MUSC 130. Enrollment is restricted to sophomores, juniors, and seniors.

MUSC 123 - Electronic Sound Synthesis (5)

Introduction to electronic music studio techniques, relevant electroacoustical studies, and procedures of electronic music composition. Practical experience in the UCSC electronic music studio with an analog synthesizer; mixing, equalization, multitrack recording equipment, and other sound processing. Application form available at department office during last two weeks of the previous quarter. Preference given to music majors, students in the film/video major, and those with substantial musical experience. Prerequisite(s): instructor determination via application; course 80C or course 30A placement.

MUSC 124 - Intermediate Electronic Sound Synthesis (5)

Composition with the use of small computers in the electronic music studio. Techniques covered include hybrid synthesis, digital synthesis, and MIDI-controlled systems. No programming is involved, but basic computer literacy is helpful.

Prerequisite: Prerequisite(s): MUSC 123.

MUSC 125 - Advanced Electronic Sound Synthesis (5)

Continuing study in the electronic music studio, with concentration on compositional development. Includes advanced applications of skills developed in courses 123 and 124, expansion of background knowledge and relevant electroacoustical studies.

Prerequisite: Prerequisite(s): MUSC 124.

MUSC 129 - Live Electroacoustic Music Ensemble (2)

Explores the live performance practice of electroacoustic music, including historical repertoire, improvisation, and compositions by participants. All manner of electronic audio resources are applied to real-time performance. Participants need a basic proficiency in electronic audio and computer tools. Enrollment is restricted to juniors, seniors, and graduate students. Enrollment is by permission of the instructor at first class meeting.

MUSC 130 - Harmony and Form in 19th-Century and Early 20th-Century Music (5)

Analysis, theory, musicianship, and aural skills associated with advanced tonal music. Study of chromaticism, larger forms, and other features of 19th-Century and early 20th-Century music.

Prerequisite: Prerequisite(s): MUSC 30C and Piano Proficiency Exam.

MUSC 150A - Music Analysis for Performers (5)

A study of homophonic forms in tonal music. Architectonic, thematic, harmonic, and hermeneutic analyses of instrumental

and vocal compositions in their historical context. Deliberations of various interpretational solutions and comparative analyses of historical and modern performances. (Formerly course 100B, Theory, Literature, and Musicianship II.)

Prerequisite: Prerequisite(s): MUSC 30C.

MUSC 150C - Special Topics in Music Theory: Tonal Counterpoint (5)

Tonal counterpoint modeled on the music of J.S. Bach. Imitative and non-imitative forms including binary dance, invention, canon, and fugue. Discussion and analytical application of generalized intervallic and harmonic models. Development of related keyboard, singing, and aural skills, including dictation in two and three voices.

Prerequisite: Prerequisite(s): MUSC 130.

MUSC 150I - Special Topics in Music Theory: Hindustani Music (5)

In-depth introduction into the music, culture, and theory of Hindustani music.

Prerequisite: Prerequisite(s): MUSC 130. Enrollment is restricted to junior and senior music majors.

MUSC 150P - Special Topics in Music Theory: 20th-Century Popular Song (5)

Analysis and composition in two 20th-century popular song genres. Part one (of two) is drawn from 1930s swing or Tin-Pan Alley standards. Part two varies according to instructor and may include genres outside the United States.

Prerequisite: Prerequisite(s): MUSC 30C or permission of instructor. Enrollment is restricted to music majors.

MUSC 150S - Focus on Spontaneous Composition (5)

Examines both music and musical composition, and the characteristics they share with science, mathematics, and the natural world. Written for upper-division and graduate courses, the course text shows that music is part of an interdisciplinary collection of artistic modes of expression, and that these modes can be better understood in the context of what students observe in the real world. Thinking about music, through a variety of angles, students aim to understand that creativity is a vehicle through which to explore the evolution and interconnectedness of music as well as other phenomena in our universe.

Prerequisite: Prerequisite(s): MUSC 130. Enrollment is restricted to sophomores, juniors, and seniors.

MUSC 150T - Post Tonal Analysis (5)

Examines the analytic and compositional techniques associated with selected post tonal styles including the linear, harmonic, rhythmic, and textural elements of music by composers, such as Schoenberg, Stravinsky, Bartok, Debussy, Messiaen, Carter, Cage, and Reich. Students attend weekly keyboard/ear-training laboratories. (Formerly Post Tonal Composition and Analysis.)

Prerequisite: Prerequisite(s): MUSC 130.

MUSC 150X - Theoretical Practices of American Music (5)

Examines theoretical practices and compositional methods of 20th-Century American composers including Charles Ives, Henry Cowell, Ruth Crawford, Johanna Beyer, Harry Partch, Conlon Nancarrow, John Cage, James Tenney, Kenneth Gaburo, George Russell, and Ornette Coleman.

Prerequisite: Prerequisite(s): MUSC 30A, MUSC 30B, and MUSC 30C. Enrollment is restricted to music majors.

MUSC 158 - South African Music Ensemble (2)

Introduces music and performance practice from South Africa. Covers a selection of repertoire in many languages and many traditions, with strong emphasis on vocal music. Enrollment is by permission of the instructor. Students must audition for the class in order to provide information about their skill level.

MUSC 159A - Opera Workshop (2)

A workshop for singers, accompanists, and directors, the course develops a wide variety of skills related to opera through scenework. Attention will be given to movement, acting, coaching, and operatic stage-directing technique. Instruction culminates in studio productions of scenes from operas and musicals. Admission by permission of vocal instructor, or by audition with instructor prior to first class meeting. Students are billed a materials fee.

MUSC 160 - University Opera Theater (5)

A production workshop, culminating in one or more staged performances of an entire opera or selected scenes from the operatic repertory. Admission by audition with instructor prior to first class meeting; auditions usually take place in fall quarter. Students are billed a materials fee.

MUSC 161 - Individual Lessons: One Hour (3)

One hour of individual instrumental or vocal instruction. Repertory, technique, and performance practice. A minimum of nine hours per week of individual practice is required. Concurrent enrollment in an ensemble in the lesson instrument or voice is required. Students are billed a course fee. Admission by audition with the instructor prior to first class meeting. Enrollment priority given to music majors and minors.

MUSC 162 - Advanced Individual Lessons: One Hour (5)

One hour of individual instruction for advanced students. Study of repertory, technique, and performance practice. A minimum of 18 hours per week of individual practice and at least one 30-minute recital are required. May be taken three times for credit. Concurrent enrollment in an ensemble in the lesson instrument or voice is required. Students are billed a course fee. Admission by juried audition.

MUSC 163 - Early Music Ensemble (2)

A study of selected works for varied early music instrumental and vocal resources, culminating in one or more public

concerts. Individual lessons are recommended in conjunction with consort work. Recommended for students who have instrumental or vocal competence and music literacy. Admission by audition with instructor prior to first class meeting. (Formerly Early Music Consort.)

MUSC 164 - Jazz Ensembles (2)

Instruction in combo performance and techniques of the jazz idiom. The class forms several ensembles that prepare a specific repertory for public performance. Admission by audition with instructor prior to first class meeting.

MUSC 165 - Chamber Music Workshop (2)

A study of selected works for various small combinations of instruments, culminating in one or more public concerts. Admission by audition with instructor prior to first class meeting.

MUSC 166 - Chamber Singers (2)

The study of selected works for small vocal ensemble from the 15th through 20th centuries, with performances on and off campus throughout the academic year. Students must have demonstrated vocal and music reading skills. Admission by audition with instructor prior to first class meeting. Students are billed a materials fee.

MUSC 167 - Workshop in Electronic Music (2)

Continuing studio work in electronic music. Students carry out individual projects, meeting in weekly seminar to share problems and discoveries. Relevant advanced topics are covered, including new developments in the art.

Prerequisite: Prerequisite(s): MUSC 124.

MUSC 167R - Recording Workshop (2)

Seminar in modern studio recording. Students learn aspects of recording from pre-production through mastering and distribution. Weekly recording sessions give students hands-on experience in running recording sessions and working with musicians. Admission by interview with instructor prior to first class meeting. Enrollment is restricted to music majors.

MUSC 168 - Experimental Music Ensemble (2)

A study of selected works for various small combinations of instruments and voice, culminating in one or more public concerts. Admission by audition with instructor prior to first class meeting. (Formerly Contemporary Music Ensemble.)

MUSC 174 - Intermediate Jazz Improvisation (5)

Develops basic skills through a range of advanced bop, quasi-modal and post-bebop styles—including selected free jazz and avant-garde repertoire. Prerequisite(s): course 75; audition with instructor at first class meeting.

MUSC 175 - Jazz Theory II (5)

Through transcription, analysis, and performance of jazz standards, composition, arranging, improvisation, and spontaneous creation explored. Students write a series of

improvisations, short compositions, and arrangements throughout the course.

Prerequisite: Prerequisite(s): MUSC 75.

MUSC 180A - Studies in World Musics: Asia and the Pacific (5)

In-depth ethnomusicological studies of selected music cultures of East Asia, Southeast Asia, and the Pacific. Emphasizes comparison of historical, theoretical, contextual, and cultural features. Includes basic ethnomusicological points of reference, as regards organology, music ritual, notation and transcription, and aspects of field research.

Prerequisite: Prerequisite(s): MUSC 30B. Concurrent enrollment in a non-Western performing ensemble is strongly recommended. Enrollment is restricted to music majors and graduate students. Anthropology majors may enroll with permission of instructor.

MUSC 180B - Studies in World Musics: Africa and the Americas (5)

In-depth ethnomusicological studies of selected music cultures of sub-Saharan Africa and South and North America, including Native America. Emphasizes comparison of historical, theoretical, contextual, and cultural features. Includes basic ethnomusicological points of reference, as regards organology, music ritual, notation and transcription, and aspects of field research.

Prerequisite: Prerequisite(s): MUSC 30B; concurrent enrollment in a non-Western performing ensemble is strongly recommended. Enrollment is restricted to music majors and graduate students. Anthropology majors may enroll with permission of instructor.

MUSC 180C - Studies in World Musics: Central Asia (5)

In-depth, ethnomusicologically oriented course on select music cultures in Central Asia. Compares theoretical, historical, and cultural aspects of music and culture from Uzbekistan, Tajikistan, Afghanistan, Kyrgyzstan, Kazakhstan, the Xinjiang region of China, Mongolia, and Tuva.

Prerequisite: Prerequisite(s): MUSC 30A. Enrollment is restricted to music majors.

MUSC 180D - Music of Insular Southeast Asia (5)

Comparative studies of selected music cultures focusing on the cosmology, music rituals, and organology of varied cultures in Malaysia, Indonesia, Papua New Guinea, and the Philippines. Introduction to ethnomusicology field research and transcription, and hands-on ensemble workshops.

Prerequisite: Prerequisite(s): MUSC 30A; concurrent enrollment in MUSC 5B, MUSC 5C, or MUSC 8. Enrollment is restricted to music majors. Anthropology majors may enroll with permission of instructor.

MUSC 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar under faculty supervision. (See course 42.) Upper-division standing and a proposal supported by a music faculty member willing to supervise required.

MUSC 195A - Senior Thesis (5)

Preparation of senior thesis over one or two quarters. If taken as a multiple-term course, the grade and evaluation submitted for the final quarter applies to the previous quarter. Students submit petition to sponsoring agency.

MUSC 195B - Senior Thesis (5)

Preparation of senior thesis over one or two quarters. If taken as a multiple-term course, the grade and evaluation submitted for the final quarter applies to the previous quarter. Students submit petition to sponsoring agency.

MUSC 196A - Senior Recital Preparation (without individual lessons) (5)

Prerequisite(s): juried audition or approved composition portfolio. Students submit petition to sponsoring agency.

MUSC 196B - Senior Recital Preparation (with individual lessons) (5)

Students are billed a course fee. Prerequisite(s): juried audition.

MUSC 199 - Tutorial (5)

A program of directed study arranged with a department faculty member. Students submit petition to sponsoring agency.

MUSC 199F - Tutorial (2)

A program of directed study arranged with a department faculty member. Class time is proportionally less than a five-credit course. Students submit petition to sponsoring agency.

Graduate

MUSC 200 - Introduction to Research Methods (5)

Practical introduction to graduate study in music focusing on research methods, music sources and bibliography, techniques of scholarly writing, and critical readings in the discipline. Culminates in a public oral presentation on the model of a professional conference paper.

MUSC 201 - History of Music Theory from the Greeks Through Rameau (5)

Study and analysis of pre-tonal and tonal music from the Greeks through the 18th century. Course combines a history of theory with analyses that utilize contemporaneous theoretical concepts.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 202 - Tonal and Posttonal Analysis (5)

Encompasses various forms of linear analysis, set theory, and selected topics in current analytical practice.

MUSC 203A - Performance Practice in the Middle Ages (5)

A study of performance practices in medieval music from Gregorian chant to the 14th century. History of instruments and notation. Rhythmic interpretations of chant and a study of improvised practices in organum. Editing and performance of representative works. Offered on a rotational basis with other courses in the 203 series.

MUSC 203B - Performance Practice in the Renaissance (5)

A study of performance practices in Renaissance music, including concepts of mode, musica ficta, ornamentation, text underlay, tempo, and articulation. Basic principles of white notation and a brief history of instruments. Transcription, editing, and performance of a Renaissance work. Offered on a rotational basis with other courses in the 203 series.

MUSC 203C - Performance Practice in the Baroque (5)

An examination of historically informed performance practice techniques in Baroque music, with attention to aspects of ornamentation, articulation, figured bass realization, dance choreography, rhythm and tempo, and organology. In-class performances and editing of source materials are included. Offered on a rotational basis with other courses in the 203 series.

MUSC 203D - Performance Practice in the Classic Period (5)

Issues in performance practice focusing on selected topics and styles from the time of C.P.E. Bach through Haydn. Development of selected genres and ensembles, sources and editing, and interpretation and improvisation. Offered on a rotational basis with other courses in the 203 series.

MUSC 203E - Performance Practice in the Romantic Period (5)

Interpretation of music from Beethoven to Scriabin through examinations of both the musical texts (form, genre, harmony, texture, orchestration, etc.) and the period performance practices. Topics range from interpretative analyses of selected compositions to critical assessments of modern as well as documented 19th- and early 20th-century performances. Offered on a rotational basis with other courses in the 203 series.

MUSC 203F - Performance Practice in the 20th Century (5)

Projects in analysis, notational studies, extended instrumental techniques, and the aesthetics and performance practices associated with composers from Debussy to the present. Reading and listening focuses on the writings and performances of the composers themselves and upon interpretive writings by informed performers of 20th-century music. Offered on a rotational basis with other courses in the 203 series.

MUSC 203G - Concepts, Issues, and the Practice of Ethnomusicology (5)

Ethnomusicological field methodology; vocal and instrumental performance practices as related to the ethnomusicological endeavor. Specific topics: philosophical paradigms, historical overview, and definitional issues of ethnomusicology; field research concepts and procedures; studies in instrumental and vocal performance practices of diverse cultures; selected writings of Charles Seeger; transcription and analysis issues; studies in micromusics. Offered on a rotational basis with other courses in the 203 series.

MUSC 203H - Area Studies in Performance Practice (5)

Intensive examination of the vocal and instrumental performance practices of living musical traditions of Indonesia, Latin America, or other regions. Topics may incorporate soloistic and ensemble traditions, secular and sacred traditions. Research rubrics include tuning, tone quality, performance posture and rhetoric, and improvisational and fixed patterns, as dictated by regional norms. May be repeated for credit in a different area. Offered on a rotational basis with other courses in the 203 series.

MUSC 204 - Pedagogy of Music (2)

Provides graduate students with an opportunity to reflect on and practice a wide variety of pedagogical skills necessary to teach post-secondary music in a number of settings, including rehearsals, lectures, sections, and labs. These skills may include lesson planning, inclusive teaching, active learning, assessment, evaluation, teaching with technology, syllabus design, teaching statement writing, and lesson facilitation. Pedagogical skills modeled through a series of facilitated activities.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 204W - Graduate Writing Workshop (2)

Focuses on the mechanics of academic writing (including grammar and syntax) with a focus on styles specific to writing about music. Topics covered will include writing music criticism, developing ethnographic descriptions of musical events (i.e., "thick description"), crafting written descriptions of musical sound, and academic writing for general audiences. Students also utilize the workshop to develop large-scale writing projects specific to their course of study (such as preparatory qualifying exam essays, composition program notes, dissertation and thesis chapters, conference papers, etc.).

Prerequisite: Enrollment is restricted to graduate students.

MUSC 205A - Conceptual Foundations in Western Music Analysis (2)

Focused analysis of selected works from the Western classical music repertoire. Emphasis is on aural and analytical skills, the modal and tonal foundations of Western music, and the evolution of form and expression.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 205B - Conceptual Foundations in World Music (2)

A broad survey of traditional and vernacular musical practices from around the world with an emphasis on aural analysis and critical listening skills.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 206A - World Music Composition (5)

Studies in the history, structure, and cultural function of music from cultures as diverse as Global African, central European, Korean, Latin American, Indonesian, and Indian traditions. Examines ways in which composers such as Bartok, Anthony Braxton, Chou Wen-Chung, Lou Harrison, and Takemitsu sought and integrated such influences. Students choose to write critical and analytic essays on musics exhibiting diverse cultural influences, or to compose music that takes a vernacular or non-European music as a model for a compositional/improvisational approach.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 206B - Computer-Assisted Composition (5)

Study of techniques of algorithmic and computer-assisted composition in a variety of contemporary idioms. Topics may include stochastic methods, generative grammars, search strategies, and the construction of abstract compositional designs and spaces. Final project for course involves students formulating and algorithmically implementing their own theoretical assumptions and compositional strategies.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 206D - Music Perception and Cognition (5)

Investigations in the psychology of musical listening and awareness. Topics include time and rhythm perception, auditory scene analysis, pattern recognition, and theories of linguistics applied to harmony, melody, and form in the music of diverse cultures. Explores applications of the cognitive sciences to music transcription, analysis, composition, interpretation, and performance practice. Students apply existing knowledge in the cognitive sciences to a developing creative or analytical project, or develop and conduct new experiments.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 219 - Techniques in Composition (5)

Short compositional exercises incorporating diverse contemporary techniques with emphasis on problem solving and development of compositional skills. Exercises focus on particular strategies for organizing and coordinating aspects of pitch, rhythm, timbre, and other musical dimensions, depending on interests of instructor and students. (Formerly course 219A.)

Prerequisite: Enrollment is restricted to graduate students.

MUSC 220 - Graduate Seminar in Music Composition (5)

Instruction in individual composition offered in the context of a group; composition in large forms of the 20th century with

emphasis on techniques since 1950. May be taken by upper-division undergraduates for credit. Interview with instructor at first class meeting.

Prerequisite: Prerequisite(s): MUSC 219.

MUSC 228 - Techniques of Modernity and Aesthetic Formations (5)

Explores the transformations and aesthetic possibilities of the digital age through a study of perceptual shifts of the past, from orality to literacy, gift to commodity, pre-colonial to colonial, pre-modern to modern, and the technological revolutions that accompanied these shifts.

Prerequisite: Enrollment is restricted to graduate students; upper-division undergraduates may enroll with permission of instructor.

MUSC 252 - Current Issues Colloquium (0)

An interactive colloquium featuring presentations by faculty, graduate students, and visiting scholars on research projects in composition, musicology / ethnomusicology, and performance practice, followed by focused discussion.

Prerequisite: Enrollment is restricted to graduate students. Undergraduate students may enroll with permission of instructor.

MUSC 253A - Historical Perspectives in Musicology and Ethnomusicology (5)

Explores trends in musical scholarship in the 20th and 21st centuries, focusing on broad questions and modes of inquiry within historical musicology and ethnomusicology. (Formerly Pitch, Melody, and Tuning Systems)

Prerequisite: Enrollment is restricted to graduate students.

MUSC 253B - Rhythm, Time, and Form (5)

Traditional and experimental rhythmic and temporal systems representing diverse cultures, with emphasis on unmeasured, divisive, additive, and multilayer practices in cultural context. Students examine rhythmic composition, improvisation, and rubato performance in selected cultures, including rhythmic notation and transcription systems.

Prerequisite: Prerequisite(s): MUSC 200 or the equivalent, or consent of instructor. Enrollment is restricted to graduate students.

MUSC 253C - Music and Discourse (5)

Addresses both song and musical performance as modes of discourse. For song: musical and textual phrase and verse structures and their interrelationships. For musical performances: musical performance as rhetoric and emblem.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 253D - Issues in the Ethnography of Music (5)

Explores ethnography—the description of culture—as it relates to musicology and ethnomusicology, particularly where culture and cultural production are historically dynamic

and geographically porous. Examines music with sensitivity to such complexities of context, and the disciplinary points of reference from which cultural difference is calculated. Considers the ideological imprint of methodology on cultural analysis: how to study an unfamiliar music in a way that transcends the measure of difference from the familiar, and, conversely, how to conduct an objective study of a familiar music.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 254C - Performativity and Music (5)

Performance can describe activities in the arts, humanities, and social sciences. Recognizing the mappings of this concept, this course examines selected performances and performative behavior through theoretical and critical lenses. Emphasis is on investigating the act and practice of musical performance in multicultural context, and on analyzing scholarly writing as performative discourse. (Formerly Performance Theory and Practice.)

Prerequisite: Enrollment is restricted to graduate students.

MUSC 254D - Organology and Acoustics (5)

Comprehensive study of musical instruments including, but not limited to, physical and engineering concepts; theory and methods of description, analysis, systematic, and cultural classifications; physiology and performance techniques; cultural significance; anthropomorphic and zoomorphic symbolism; ritual usage; and more. Previous enrollment in introductory ethnomusicology course (e.g., course 11D) helpful, but not required. Enrollment by interview only, except music M.A. and Ph.D. students. Enrollment restricted to junior and senior music majors, electronic music minors, anthropology majors, or physics majors, and graduate students.

MUSC 254E - Asian Resonances in 20th-Century American and European Music (5)

Explores the influence of Asian musics on Western composers from Debussy to Britten to American experimentalists such as Harrison, Cage, Riley, and Ruyard. Questions of cultural appropriation and originality are addressed through specific examples and critical readings.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 254F - Beethoven (5)

Examines the life and work of composer Ludwig van Beethoven (1770-1827). In addition to a close study of his biography and musical compositions, course considers the role of historiography and reception history in the development of his "heroic" status and Romantic cultivation of the "cult of genius." Also critically examines issues having to do with canon construction, positivist research vs. "new musicology," and how Beethoven has been used for political purposes and in popular culture.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 254J - Jazz Historiography (5)

Introduces the ways jazz history has been conceptualized, evaluated, and transmitted. Examines the social, intellectual, and cultural formations that have influenced this historiography. Considers the interdisciplinary project of new jazz studies in relation to established and alternative historical narratives.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 254K - Music, Gender, and Sexuality (5)

Seminar focuses on musicological and ethnomusicological work incorporating feminist and queer theories published since the late 1980s. Cross-cultural approach to the examination of music, gender, and sexuality, drawing examples from both Western and non-Western traditions.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 254L - John Cage: Innovation, Collaboration, and Performance Technologies (5)

In-depth examination of John Cage's interdisciplinary work, his pioneering activity in live electronic technology, and his influence in current multimedia creativity. Approximately one-half of the seminary is devoted to student research and creative projects and reflect Cage's legacy.

Prerequisite: Enrollment is restricted to juniors, seniors, and graduate students. Upper-division undergraduates may enroll with permission of instructor.

MUSC 254M - Music in San Francisco, 1850-1950 (5)

Explores San Francisco's musical life during the city's first century, including opera, symphony, Chinese music, musical theater, and other genres. Considerable emphasis on music and society, including issues of race.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 254N - Cruising the Postcolony (5)

Drawing on Jose Esteban Munoz's suggestion that queer politics is most radical when it is looking to the possibilities of the future rather than the pragmatics of the present, this course interrogates the radical vision of postcolonial and queer music-making.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 254O - Historiography of American Music (5)

Covers the period in United States history between the Revolutionary Era and the Civil War (approximately 1770-1865). Examines historical and contemporary writings about music in the United States, its composers, musicians, musical institutions, economics, and performance practices.

Prerequisite: Prerequisite(s): MUSC 200 or equivalent. Enrollment is restricted to graduate students.

MUSC 254R - Research Design and Grant Writing for Music Scholars (5)

Dissertation research grant applications and their attenuating dissertation proposals represent the first time most graduate students think through the theoretical issues and strategic planning of a major project and convince others within and outside their field of its academic validity. This seminar (primarily for Ph.D. and D.M.A. students in their 2nd, 3rd, or 4th year who are applying for grants to support doctoral research) provides guidance on topics about dissertation research, professional development, and grant applications.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 261 - Graduate Applied Instruction (3)

One hour of individual instrumental or vocal instruction for graduate students. Repertory, technique, and performance practice. A minimum of nine hours per week of individual practice is required. Students are billed a course fee. Admission by audition with the instructor prior to first class meeting.

MUSC 265 - Graduate Ensemble Participation (2)

Participation by graduate students in ensembles. Enrollment limit appropriate to the size of each ensemble. Admission by audition with the instructor prior to first class meeting.

MUSC 267 - Workshop in Computer Music and Visualization (2)

Graduate-level techniques and procedures of computer music composition and visualization. Practical experience in the UCSC electronic music studio with computer composition systems and software, including visualization and interactive performance systems. Extensive exploration of music and interactive graphic programs such as Max/MSP/Jitter. Enrollment is by permission of instructor; appropriate graduate experience required. Enrollment is restricted to graduate students.

MUSC 295 - Directed Reading (5)

Directed reading, which does not involve a term paper. May be repeated once for credit. Students submit petition to sponsoring agency.

MUSC 297 - Independent Study (5)

Independent study, creative work, or research for graduate students who have not yet begun work on their thesis. Students submit petition to sponsoring agency.

MUSC 298 - Graduate Recital (5)

A public performance in the student's primary area of interest, related to the thesis or dissertation project, under the supervision of a faculty member. Students submit petition to sponsoring agency.

Prerequisite: Enrollment is restricted to graduate students.

MUSC 299 - Thesis Research (5)

A thesis consisting of a substantive and original creative or scholarly work, related to the graduate recital, under the supervision of a faculty member. Students submit petition to sponsoring agency.

OAKS - OAKES COLLEGE

Lower-Division

OAKS 1 - Academic Literacy and Ethos: Communicating Diversity for a Just Society (5)

Teaches foundational concepts for intellectual exploration and personal development within an academic community: analysis, critical thinking, metacognition, engagement with others across difference, and self-efficacy. The Oakes core course considers the intersections between reading, personal and social identities, and social justice.

Prerequisite: Enrollment is restricted to first-year college members.

OAKS 3L - Precalculus Academy Lab (2)

Students use worksheets designed to help them solve problems by thinking critically, and participate in answering project-based questions relevant to the themes of their college core courses. Prerequisite(s): Mathematics 2 or placement (MP) score of 200 or higher. Concurrent enrollment in Mathematics 3 is required. Enrollment is by permission of the instructor.

OAKS 10 - Academic Success (2)

Provides opportunity to assess and revise methods of and purposes in studying. Critical, effective approaches to reading, writing, participating in lectures and sections, taking exams, balancing competing responsibilities, and utilizing campus resources explored. Enrollment by permission of college adviser.

OAKS 11 - Foundation of Leadership (3)

Teaches leadership skills to create effective teams, and motivates individuals to communicate effectively with teammates with different styles. Enrollment is restricted to first-year and sophomore college members and by permission of instructor.

OAKS 30 - Thesis Writing and Editing (2)

Substantial writing and revision for a piece of writing relevant to a student's field. Focuses on academic research, documentation, editing, and revision. Enrollment restricted to junior and senior college members. Enrollment by permission of instructor.

OAKS 47 - Building an Inner Sanctuary (2)

Through experiential methodologies of self-leadership and mind-body practices, this course encourages students to discover and flex those internal resources which enhance resilience, foster psycho-emotional and community-building skills, and affirm their cultural dignity. Enrollment is by application and permission of the instructor.

OAKS 48 - Slugs Speak: Our Stories, Our Selves (2)

Students learn about the power of story to make change through this Storytelling for Justice project. Students practice developing personal life stories, learn to create and facilitate community space, and participate in a community storytelling event focused on intersectional identities.

Prerequisite: Enrollment is restricted to Oakes College affiliates or by instructor permission.

OAKS 60 - Oakes Literary Journal: Further Reflections on a Diverse Society (2)

For publication in an Oakes College literary journal, students significantly refine an essay from the fall quarter Oakes College core course. Course work includes consideration of a substantive text that engages core course themes and promotes the focus of the essay.

Prerequisite: Prerequisite(s): OAKS 80A or OAKS 80B. Enrollment is restricted to first-year students.

OAKS 67 - The Politics of Food: Labor and Social Justice (2)

Engages the themes of Oakes College (respect for diversity and social justice) and the interests of UCSC's Center for Agroecology and Sustainable Food Systems. Topics include the racial politics of food, farm labor, organic farming, and activism.

Prerequisite: Prerequisite(s): successful completion of OAKS 80A, OAKS 80B, OAKS 80C, OAKS 80D, or OAKS 80H. Enrollment is restricted to college members.

OAKS 70 - Diverse Voices in Contemporary American Women's Poetry (2)

Students examine issues in the work of contemporary American women poets representing a range of cultural, sexual, socioeconomic, and ideological identities. Discussion focuses on theories of poetics as well as poetry analysis and interpretation within the context of social and cultural identity. Students create a portfolio of their own poetry in response to weekly prompts.

Prerequisite: Enrollment restricted to Oakes College members.

OAKS 72 - Building the Strength to Love and Dream: Oakes Oral History Project (5)

Students study the founding and development of Oakes College through oral history. Students immerse themselves in thorough background research and build skills necessary to conduct oral histories with previous Oakes affiliates, revising pieces suitable for publication.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements. Enrollment is restricted to College members; other students may contact the instructor for a permission code.

OAKS 73B - Oakes College Mentoring: Service Learning Practicum (2)

Mentors introduce first-year students to campus resources, provide them with academic support, share academic successes and difficulties, and offer guidance on college adjustment. Enrollment is restricted to College members. Please apply to be a mentor or a mentee online on the Oakes College Mentoring website.

OAKS 75 - Oakes Student Development and Leadership Theory (2)

Overview of theories, methods, applications, skills, and special topics focusing on college student development and leadership. Uses a variety of learning modes including lecture, discussion, case studies, small group interaction, and presentations. Interview only: see Oakes coordinator for residential education during spring enrollment period. Enrollment restricted to Oakes College members.

OAKS 76 - Social Geography and Justice in Santa Cruz (5)

Explores how social identities, life practices, and power are reflected and shaped by the spaces and places we live in. Combines local history and contemporary research with placements in the community focusing on justice for children, youth, and families; topics vary by year and seek to build on the understanding and community relationships advanced through winter quarter research.

Prerequisite: Prerequisite(s): Oakes core course. Restricted to Oakes College members; others by permission of instructor.

OAKS 80H - Rainbow Theater Cultural Studies (5)

Introduction to multicultural theater and multicultural plays that aims to bring cultural awareness to all students interested in theater discipline. Students are required to read and critically analyze contemporary plays of color with emphasis on race and culture in contemporary American society.

OAKS 93 - Field Study (5)

Supervised off-campus study conducted under the immediate and direct guidance of a faculty supervisor. To be used primarily by lower-division students doing part-time off-campus study. Prerequisite(s): approval of student's adviser, certification of adequate preparation, approval of provost.

OAKS 94F - Group Tutorial (2)

A program of independent study arranged between a group of students and a faculty instructor. Students submit petition to sponsoring agency.

OAKS 95 - Directed Reading (5)

Directed reading on selected topics in literature. Students submit petition to sponsoring agency.

OAKS 99 - Tutorial (5)

Individual study for lower-division students directed by a fellow of Oakes. Students submit petition to sponsoring agency.

OAKS 99F - Independent Study (2)

Independent study on various topics to be arranged between student and instructor. Students submit petition to sponsoring agency.

Upper-Division

OAKS 130 - Writing Resistance: Creative Writing Workshop (5)

Engages diasporic and people of color (POC) writers whose work inspires social justice. Through course materials and creative exercises, students examine and break down the roadblocks that create silence. Focuses on the craft of writing, and revision and performance to create socially relevant and powerful words through community engagement.

OAKS 134 - Diasporic Central Americans (5)

Engages literature and culture from multiple generations of diasporic Central Americans in the U.S. whose work inspires conversations on politics and identity. Through course materials and oral history projects, examines the (in)visibility of this emergent Latinx group. Focus on oral history, aesthetics, poetics, and projects of representation.

OAKS 150 - Queer History and Theory in the United States (5)

Gives students a broad overview of the historical and social construction of queer identities in the United States. Through assigned readings and archival research, students contribute to the project of documenting queer history in the present. Students also examine how queer theory addresses the meanings that U.S. politics and culture have placed on sexual orientation over time.

Prerequisite: Enrollment is restricted to junior and senior Oakes College members.

OAKS 151A - Corre la Voz: Community Literacies and Power Seminar (2)

Required seminar for first-quarter students in the Corre la Voz program. Examines theories, curriculum design, and teaching methods that emphasize social connection, leadership, verbal enrichment, multi-modal literacies, and community empowerment. Taken concurrently with field study. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Co-requisite(s): course 151B. Enrollment is by interview only and successful application to the Corre la Voz program. (Formerly Corre la Voz: Community Literacies and Power.)

OAKS 151B - Community Literacies Field Study (3)

Field study for Corre la Voz interns. Intensive on-site training and participation in team teaching of dual-language (Spanish

English) students (4th-5th grade). Literacies include social-emotional, expressive (artistic/dramatic), collaborative problem-solving, academic, and use of digital tools as well as traditional tools. Enrollment by interview only, and successful application to the Corre la Voz program. Concurrent enrollment in course 151A is required during the first quarter after which course 151B may be repeated by itself.

OAKS 152 - Transformative Literacies (5)

Combines a seminar on critical inquiry into different theories and practices of transformative literacy work with community-service placement or a creative project to assist a local organization in its mission communicating internally and externally.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to Oakes College members and community studies majors; other students may enroll by permission of the instructor.

OAKS 153 - Community Mapping (5)

Students study the theories and methods of community mapping, and work in research teams to design and conduct social-research projects. Emphasizes research questions that focus on assets and capacities, as well as on participatory-action research for justice.

Prerequisite: Prerequisite(s):satisfaction of Entry Level Writing and Composition requirements. Enrollment is restricted to Oakes College members and community studies majors.

OAKS 167 - Food Systems: Culture, Social Justice, Sustainability (5)

Examines the complexities of food systems with special attention to labor practices, food access, and food production. Students consider the nature of culture in advancing problematic notions of food options and sustainability. A service-learning project is required.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

OAKS 170F - Freedom and Race (5)

Interrogates the relationship between freedom and race in our current political moment by looking to historical and theoretical models that inform the present. Considers how race operates in legal, scientific, and visual discourses to shape individual and collective freedoms.

OAKS 188B - Legal Field Practice: Professional Skills and Ethics (3)

Offers placement, standards, and support during on-site experiential training in professional skills and ethics for students working in the legal field or with legal information to empower under-served communities. Concurrent enrollment in LGST 188A or OAKS 188A and by permission of instructor.

OAKS 192 - Directed Student Teaching (5)

Teaching a lower-division seminar under faculty supervision. (See course 42.) Prerequisite(s): upper-division standing in Oakes; a proposal supported by a faculty member willing to supervise.

OAKS 193 - Field Study (5)

Supervised off-campus study conducted under the immediate and direct guidance of a faculty supervisor. To be used primarily by upper-division students doing part-time off-campus study. Prerequisite(s): approval of student's adviser, certification of adequate preparation, approval of provost. If taking two or more such courses in any one quarter, must obtain approval of academic adviser.

OAKS 195 - Senior Thesis (5)

Senior thesis related to college-sponsored individual majors. Students submit petition to sponsoring agency. Sponsoring faculty must be member of individual major committee.

OAKS 198 - Independent Field Study (5)

College-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. Prerequisite(s): approval of the student's adviser, certification of adequate preparation, and approval by provost.

OAKS 199 - Tutorial (5)

Individual study for junior and senior members of Oakes College directed by a fellow of Oakes. Students submit petition to sponsoring agency.

OAKS 199F - Tutorial (2)

Independent study on various topics to be arranged between student and instructor. Students submit petition to sponsoring agency.

OCEA - OCEAN SCIENCES

Lower-Division

OCEA 1 - The Oceans (5)

An interdisciplinary introduction to oceanography focusing on biological, chemical, geological, and physical processes. Covers topics such as origins and structure of planet Earth and its oceans, co-evolution of Earth and life, plate tectonics, liquid water and the hydrologic and hydrothermal cycles, salinity and elemental cycles, ocean circulation, primary production and nutrient cycles, plankton and nekton, life on the sea floor, near shore and estuarine communities, future environmental problems our oceans face. Students may also enroll in and receive credit for Earth Sciences 1.

OCEA 80A - Life in the Sea (5)

The ecology of plants and animals in oceans and coastal areas. Consideration of life in various marine habitats, including the open ocean, rocky shores, estuaries, and the sea. Includes field trips. High school biology and chemistry courses are recommended prior to taking this course.

OCEA 80B - Our Changing Planet (5)

Interdisciplinary scientific perspective on Earth system, focusing on human impacts on global environment. Introduces concepts of Earth system science and explores topics such as global warming, ozone depletion, pollution, deforestation, and future climate change. Prerequisite(s): high school chemistry course recommended.

OCEA 90 - Fundamentals of Climate (5)

Quantitative introduction to climate comprising five modules: atmosphere-ocean circulation, atmospheric teleconnections, El-Nino Southern Oscillation, the Pacific Decadal Oscillation, and global warming. Hands-on statistical methods are applied to real-world observations to develop a quantitative understanding of climate.

Upper-Division

OCEA 100 - Physical Oceanography (5)

Introduces physical aspects of the ocean including both descriptive representations of ocean properties and dynamical processes that govern ocean circulation. Topics include measurement methods, the equation of state, the equations of motion, geostrophy, atmospheric forcing, Ekman transport, gyre circulation, western boundary currents, the global circulation, and surface gravity waves.

Prerequisite: Prerequisite(s): MATH 11B or equivalent; and PHYS 6B; and ESCI 100A or EART 110A.

OCEA 101 - The Marine Environment (5)

An introduction to the marine environment stressing the interaction of physical, chemical, geological, and biological factors in the ocean. Provides the oceanographic background needed for studies in marine biology. Students taking the prerequisite math courses concurrently may enroll in the course with permission from instructor.

Prerequisite: Prerequisite(s): Chemistry 1C and Mathematics 11B or 19B. Students taking the prerequisite math courses concurrently may enroll in the course with permission from instructor.

OCEA 102 - Oceans and Climate: Past, Present, and Future (5)

An introduction to Earth's environment, particularly its oceanic and climatic components. Emphasizes interactions between chemical, physical, biological, and geological processes, and fundamentals of past, present, and future global environmental change. Provides backgrounds for specialized courses in oceanic or climatic change.

Prerequisite: Prerequisite(s): CHEM 1C.

OCEA 111 - Climate Dynamics (5)

Applies fundamental physical principles to the atmosphere, cryosphere, and land surface to interpret their observed properties. Interactions between the different components of the climate system, and their role in shaping Earth's climate, are also examined.

Prerequisite: Prerequisite(s): MATH 11B or equivalent; PHYS 6B; and ESCI 100A or EART 110A.

OCEA 118 - Marine Microbial Ecology (5)

The study of marine bacteria and their role in the marine ecosystem. Emphasis on biochemistry and physiology in relation to metabolic activity and elemental cycles, trophic interactions, and flows of material and energy in marine food webs. Students cannot receive credit for this course and Ocean Sciences 218.

Prerequisite: Prerequisite(s): BIOE 20C or BIOE 21C, and CHEM 1C.

OCEA 120 - Aquatic Chemistry: Principles and Applications (5)

An integrated study of the chemical behavior of natural waters with an emphasis on both principles and applications. Topics include chemical equilibrium, kinetics, acids/bases, oxidation/reduction, complexation, solid dissolution and precipitation, and reactions on solid surfaces.

Prerequisite: Prerequisite(s): CHEM 108B or CHEM 112C.

OCEA 121 - Aqueous Geochemistry (5)

Explores the geochemistry of the water-solid interface in the environment. Topics include: the composition of natural particles in the environment; the use of chemical equilibria and kinetics to assess the reactivity at the particle-water interface; and applications to environmental and oceanographic problems.

Prerequisite: Prerequisite(s): CHEM 1C, or previous or concurrent enrollment in EART 110A. Enrollment is restricted to juniors, seniors, and graduate students.

OCEA 122 - Chemical Oceanography (5)

Provides a chemical description of the sea. Emphasizes the chemical interactions of the ocean with the biosphere, atmosphere, and lithosphere. Topics include biochemical cycles and the use of chemical tracers to study oceanic and coastal processes. Students may not receive credit for this course and OCEA 220.

Prerequisite: Prerequisite(s): CHEM 1C; a previous course in ocean sciences is also recommended. Enrollment is restricted to juniors and seniors.

OCEA 124 - Aquatic Organic Geochemistry (5)

Introduction to organic geochemistry with emphasis on aquatic environments. Explores how non-living organic

matter shapes biogeochemical cycles by carrying and sequestering reduced carbon and major nutrients and examines influence of chemical structure and environmental factors on transport and fate of organic molecules. Provides an introduction to organic biomarkers. Students cannot receive credit for this course and course 224.

Prerequisite: Prerequisite(s): basic college chemistry (Chemistry 1B, 1C); at least one quarter of college level organic chemistry required (e.g., Chemistry 7).

OCEA 130 - Biological Oceanography (5)

Biological description of the sea, with emphasis on processes and patterns. Topics include microbial dynamics, phytoplankton and zooplankton production, and ecology of marine food webs. Emphasis placed on understanding how physical, chemical, and geological environment shapes biology and ecology of oceans, including such topics as harmful algal blooms, global estimates of productivity, and effects of humans on environment. Students may not receive credit for this course and Ocean Sciences 230.

Prerequisite: Prerequisite(s): previous course in ocean sciences recommended. Enrollment is restricted to juniors (with instructor approval), and seniors.

OCEA 158 - The Ecology and Conservation of Marine Birds and Mammals (5)

The systematics, physiology, ecology, behavior, and conservation of marine birds and mammals, with emphasis on the fauna and issues of the Monterey Bay area. Lectures are complemented by laboratory and field sessions. Lab topics include taxonomy and comparative morphology. Field exercises are designed to promote development of observation and identification skills. Field trips enable students to observe unique local species in their native habitats and learn current research techniques.

Prerequisite: Prerequisite(s): OCEA 80A, BIOE 20C, or permission of instructor.

OCEA 199 - Tutorial (5)

Students submit petition to sponsoring agency.

Graduate

OCEA 200 - Physical Oceanography (5)

Introduces the physics of the ocean. Topics include physical properties of seawater, atmospheric forcing, Ekman dynamics, Sverdrup dynamics, the wind-driven ocean circulation, ocean mixing, water masses, the meridional overturning circulation, surface gravity waves, Rossby waves, Kelvin waves, and ocean tides. Designed for beginning graduate students in ocean sciences and upper-division science majors. Calculus and physics recommended as preparation.

OCEA 211 - Climate Dynamics (5)

Introduction to the dynamics of the Earth climate system. Topics: climate system components, the global energy

balance, radiative transfer, the hydrological cycle, general circulations of the atmosphere and ocean, El Niño, the North Atlantic Oscillation, and the Pacific Decadal Oscillation.

Prerequisite: Enrollment is restricted to graduate students. Undergraduates may enroll by permission of instructor. Previous courses in calculus and ocean sciences or earth sciences are recommended.

OCEA 213 - Biogeochemical Cycles (5)

Overview of biogeochemical cycles, present and past, and geochemical models. Topics include: marine, terrestrial, and global views of the carbon, nitrogen, phosphorus, silicon, sulfur, and oxygen cycles, and the evolution of these cycles and Earth's redox balance through geologic time.

Prerequisite: Enrollment is restricted to graduate students. Upper-division undergraduates may enroll with instructor approval. College-level chemistry and an upper-division course in at least one relevant discipline are recommended.

OCEA 215 - Predicting the Atmosphere, Ocean, and Climate (5)

Introduction to the theory and practice of operational prediction in meteorology, oceanography, and climate. Topics: observations and estimation theory, dynamic adjustment and initialization, estimation theory, data assimilation, forecast verification, predictability, ocean state estimation, seasonal forecasting.

Prerequisite: Enrollment is restricted to graduate students. Undergraduates may enroll with instructor approval. OCEA 200, OCEA 264, EART 272, or equivalents are recommended.

OCEA 218 - Marine Microbial Ecology (5)

Recent developments in the study of marine bacteria and their role in the marine ecosystem. Emphasis on biochemistry and physiology in relation to metabolic activity and elemental cycles, trophic interactions and flows of material and energy in marine food webs. Exams and research paper required. Students cannot receive credit for this course and course 118 and Biology 171. Biology 20C and Chemistry 1C recommended.

OCEA 220 - Chemical Oceanography (5)

A chemical description of the sea; emphasis on the chemical interactions of the oceans with the biosphere, atmosphere, and lithosphere. Topics include biogeochemical cycles and the use of chemical tracers to study oceanic and coastal processes. Course designed for graduate students; available to upper-division science majors. Students may not receive credit for this course and OCEA 122.

OCEA 224 - Aquatic Organic Geochemistry (5)

Introduction to organic geochemistry with emphasis on aquatic environments. Explores how non-living organic matter shapes biogeochemical cycles by carrying and sequestering reduced carbon and major nutrients and examines influence of chemical structure and environmental

factors on transport and fate of organic molecules. Provides an introduction to organic biomarkers. Students cannot receive credit for this course and course 124.

OCEA 230 - Biological Oceanography (5)

Biological description of the sea, with emphasis on processes and patterns. Topics include microbial dynamics, phytoplankton and zooplankton production, and ecology of marine food webs. Emphasis placed on understanding how physical, chemical, and geological environment shapes biology and ecology of oceans, including such topics as harmful algal blooms, global estimates of productivity, and effects of humans on environment. Students may not receive credit for this course and course 130.

Prerequisite: Prerequisite(s): previous course in ocean sciences recommended. Enrollment is restricted to graduate students.

OCEA 241 - Dynamics of Marine Ecosystems (5)

Covers physical-biogeochemical interactions in the ocean on marine ecosystems, with a special focus on the California Current region. Lectures introduce fundamental processes occurring at local, regional, and basin scales, and describe their complex interplay.

Prerequisite: Enrollment is restricted to graduate students.

OCEA 260 - Introductory Data Analysis in the Ocean and Earth Sciences (5)

Introduces data analysis methods regularly encountered within the ocean and earth sciences. Topics include: error propagation, least squares analysis, data interpolation methods, empirical orthogonal functions, and Monte Carlo methods applied to problems drawn from oceanographic and earth sciences datasets. Introduces and uses a high-level computing and visualization package, MATLAB. Student project consists of analysis of the student's own dataset.

Prerequisite: Prerequisite(s): previous course in ocean or earth sciences is recommended. Enrollment is restricted to graduate students; undergraduates with permission of instructor.

OCEA 280 - Marine Geology (5)

Geology of the marine environment. Topics include controls on the types, origin, and distribution of marine sediments; geology of oceanic crust; evolution of continental margins and plate boundaries; and introduction to paleoceanography. Students cannot receive credit for this course and Earth Sciences 102.

Prerequisite: Enrollment is restricted to graduate students.

OCEA 285 - Past Climate Change (5)

Reviews the fundamentals of climate dynamics and explores how Earth's environment is a product of the interaction of its components. Uses examples of climate change from historical and geologic records, and from predictions of the future. Recommended for junior, senior, and graduate students in the sciences.

OCEA 286 - Introduction to Ocean Modeling (5)

Fundamental concepts and ideas that underpin numerical modeling of the ocean. Topics include numerical methods and solutions of partial differential equations (PDEs), ocean circulation, wave dynamics, ocean ecosystem model, and MATLAB programming.

Prerequisite: Enrollment is restricted to graduate students, or seniors by permission of instructor.

OCEA 290A - Topics in Chemical Oceanography (5)

A weekly seminar series covering recent developments in chemical oceanography. Different topics and approaches will be stressed from year to year.

OCEA 290B - Topics in Biological Oceanography (5)

Explores different problems of special interest in biological oceanography. Different topics and approaches will be stressed from year to year.

OCEA 290C - Topics in Marine Geochemistry (5)

Selected topics in geochemistry. Discussion of theoretical models, different approaches, and recent research. Topics vary from year to year.

OCEA 290D - Topics in Marine Microbiology (5)

A weekly seminar series covering topics in environmental microbiology. Topics vary from year to year, and will include research in ecology, methodology, biochemistry and physiology of bacteria. Emphasis on the role of bacteria in biogeochemical cycling from microzone to global scales, with particular focus in marine systems.

OCEA 290E - Topics in Climatic and Oceanic Change (5)

Weekly seminar series covering recent developments in climatic and oceanic change. Different topics and approaches stressed from year to year. Prerequisite(s): interview with instructor prior to first class meeting.

OCEA 290G - Topics in Physical Oceanography (5)

Weekly seminar series covering topics in physical oceanography as well as biological-physical interactions in the oceans. Different topics and approaches stressed from year to year.

Prerequisite: Enrollment is restricted to graduate students; undergraduates may enroll with permission of instructor.

OCEA 290H - Topics in Ocean Optics (5)

Examines recent developments and application of bio-optics to the marine environment, including theory, instrumentation, and remote sensing. Different topics and approaches emphasized from year to year.

Prerequisite: Prerequisite(s): previous course in ocean sciences recommended. Enrollment is restricted to graduate students; senior undergraduates with permission of instructor.

OCEA 290J - Topics in Marine Organic Geochemistry (5)

Examines recent developments in uses of organic geochemistry to trace oceanographic and biogeochemical processes. Focuses on introduction to organic biomarkers, current literature, and evolving applications. Different topics and approaches emphasized from year to year.

Prerequisite: Prerequisite(s): previous course in ocean sciences and organic chemistry are recommended. Enrollment is restricted to graduate students; upper-division undergraduates with instructor's permission.

OCEA 292 - Seminar (0)

Weekly seminar on various topics attended by faculty, graduate, and upper-division undergraduate students.

OCEA 296 - Teaching in Ocean Sciences (2)

For new and/or relatively inexperienced graduate students in pedagogy of ocean sciences. Role and responsibilities of teaching in ocean sciences described and developed. Includes discussions about effective teaching methods; hands-on issues for work in the laboratory; university expectations; and regulations regarding teaching, organizational strategies, time management, and working with instructors and staff.

Prerequisite: Prerequisite(s): graduate standing or permission of instructor. Enrollment is restricted to graduate students.

OCEA 297A - Independent Study (5)

Independent reading, research, and written reports not related to thesis research. Students submit petition to sponsoring agency.

OCEA 297B - Independent Study (10)

Independent reading, research, and written reports not related to thesis research. Students submit petition to sponsoring agency.

OCEA 297C - Independent Study (15)

Independent reading, research, and written reports not related to thesis research. Students submit petition to sponsoring agency.

OCEA 299A - Thesis Research (5)

Students submit petition to sponsoring agency.

OCEA 299B - Thesis Research (10)

Students submit petition to sponsoring agency.

OCEA 299C - Thesis Research (15)

Students submit petition to sponsoring agency.

PBS - PHYSICAL BIOLOGICAL

SCIENCES

Upper-Division

PBS 101 - Cal Teach: Pedagogy for Learning Assistants (2)

Supports and prepares learning assistants (LAs) for success in active classrooms. Helps LAs integrate learning theory and effective practices to facilitate thinking and learning when students work in small groups on conceptual problems.

Prerequisite(s): Successful completion of the course or equivalent in which the student will serve as an LA. Concurrent participation as an LA for a University STEM course is required. Enrollment is by application via the online form and a follow-up interview for selected applicants

PBS 182 - ACE Program Service Learning (2)

Students participate in training and development to co-facilitate collaborative learning in ACE active learning sessions and final exam review sessions. Students are role models for students pursuing science- and math-intensive majors. Prerequisite(s): Prior participation in ACE; good academic standing; no non-passing grades in prior quarter. Enrollment is restricted to sophomores, juniors, and seniors.

PERS - PERSIAN

Lower-Division

PERS 1 - First-Year Persian (5)

Introduction to Persian (Farsi) and Persian-speaking culture with practice in all four language skills: listening, speaking, reading, and writing. Intended for students with no previous study of Persian as well as heritage speakers.

PERS 2 - First-Year Persian (5)

Introduction to Persian (Farsi) and Persian-speaking culture with practice in all four language skills: listening, speaking, reading, and writing. Intended for students with no previous study of Persian as well as heritage speakers.

Prerequisite: Prerequisite(s): PERS 1 or comparable proficiency.

PERS 3 - First-Year Persian (5)

Introduction to Persian (Farsi) and Persian-speaking culture with practice in all four language skills: listening, speaking, reading, and writing. Intended for students with no previous study of Persian as well as heritage speakers.

Prerequisite: Prerequisite(s): PERS 2 or comparable proficiency.

PHIL - PHILOSOPHY

Lower-Division

PHIL 8 - Reason, Logic, and the Idols of Thought (5)

Students cultivate their ability to distill and critically assess the barrage of argument and rhetoric with which they are confronted every day--on the Internet, in the media, on campus--and learn to subject their own thoughts to more rigorous, logical standards. (Formerly Logic, Numbers, and Emotion: Thinking Clearly in Everyday Life.)

PHIL 9 - Introduction to Logic (5)

A first course in symbolic deductive logic. Major topics include (but are not limited to) the study of systems of sentential logic and predicate logic, including formal deduction, semantics, and translation from natural to symbolic languages.

PHIL 11 - Introduction to Philosophy (5)

An introduction to the main areas of philosophy through critical reflection on and analysis of both classical and contemporary texts. Focuses on central and enduring problems in philosophy such as skepticism about the external world, the mind-body problem, and the nature of morality.

PHIL 12 - Philosophy and Film (2)

Explores the philosophy of film through the viewing and discussion of several philosophically interesting films. Examines both the aesthetics of film and a variety of philosophical issues that particular films raise.

PHIL 13 - Eastern Philosophy (2)

Covers perspectives of Eastern philosophy; specifically, Hinduism, Jainism, Buddhism, Daoism, and Confucianism. Includes views concerning the nature of ultimate reality, personal identity, morality, the afterlife, god(s), and the problem of evil.

PHIL 14 - Nihilism and Film (2)

Explores the concept of nihilism in the contemporary Western world and its relation to what might be considered a technological mindset in terms of a Nietzschean and Heideggerian interpretation. Students work through readings as well as relevant films because it may well be argued that contemporary cinema is a metaphorical mirror for our conception both of how the Western world is and how we imagine it should or might be.

PHIL 15 - Technology, Knowledge, and Human Life (2)

Provides a clearer understanding of what technology is how it relates to knowledge and human life. Students read and discuss texts by Plato, Aristotle, Husserl, and Heidegger.

PHIL 16 - Hip Hop Philosophers (5)

Examines the work of various high hop artists and philosophers. Topics may include authenticity, rebellion, identity, politics, and aesthetics, among others. Students develop understanding of relative philosophical themes and critically engage concerns through everyday experiences and art forms (such as hip hop).

PHIL 19 - Special Topics in Analytic Metaphysics (2)

Introduces students to controversial topics in analytic metaphysics. Possible topics include: universals, particulars, time, causality, persistence, modality, and realism.

PHIL 22 - Introduction to Ethical Theory (5)

A consideration of ethical issues and theories focusing on the foundation of moral value and the principles governing character and behavior. Designed to extend and develop the student's abilities in philosophical reasoning about ethics.

PHIL 23 - Philosophy of Cognitive Science (5)

Explores the philosophical issues that arise in cognitive science, particularly issues concerning the nature of minds. Students consider the idea that the mind is a digital computer, then analyze alternatives, such as connectionism and dynamics.

PHIL 24 - Introduction to Ethics: Contemporary Moral Issues (5)

An examination of the conceptual and moral issues that arise in connection with a variety of specific ethical issues. Topics vary according to the interests of the instructor, but among those commonly discussed are: abortion, war and violence, euthanasia, world hunger, human rights, and animal rights. The readings are typically drawn from recent philosophical articles on these topics, but earlier sources (important in the history of philosophy) can be considered as well.

PHIL 26 - Existentialism and After (5)

A survey of recent movements in European thought, such as phenomenology, existentialism, hermeneutics, critical theory, continental feminism, and poststructuralism, with some attention to their 19th-century precursors. Selections from major philosophical treatises are supplemented with literary works.

PHIL 27 - Business Ethics (5)

Examination of the ethical issues that arise in connection with a variety of specific business contexts. Common topics include: advertising, environmental harm, employee-employer relationships, finance, capitalism, market failure, government regulation, work-life balance, and consumer rights.

PHIL 28 - Environmental Ethics (5)

This course is an introduction to the moral issues raised by our interactions with nonhuman animals and with the rest of the natural environment. The course will relate traditional moral theories to contemporary literature on the ethics of nature conservation and environmental protection. The

course is intended as a first course in philosophy as well as a first course in ethics; therefore, questions concerning the nature of philosophical inquiry and the ways in which philosophical inquiry is different from inquiries conducted within other disciplines will also be addressed.

PHIL 80B - Wisdom, Love, and Wakefulness (5)

Non-Western philosophy (primarily Eastern but also indigenous and other non-Western sources) as a lens for understanding human behavior. Emphasis on relevance to contemporary life (including personal, social, and ecological problems and potentials), connections to empirical research, and application in (and illumination through) the arts. Methodologies based in contemplative science. (Formerly Buddhism and Daoism.)

PHIL 80C - Philosophy of Sex and Love (5)

What is the nature of love? Is marriage a means of social control? Does pornography empower or oppress women? How is gender constructed? This course provides a systematic investigation of the development of Western philosophical perspectives on gender and sexuality from Ancient Greece to the 21st century. Topics include love, marriage, sexual perversion, promiscuity and monogamy, pornography, feminism, and sexual morality. Aims to promote critical reflection with regard to the ethical, political, and social implications for contemporary society. (Formerly Philosophical Perspectives on Gender and Sexuality.)

PHIL 80E - Latin American Philosophy (5)

Is there a general school of philosophy endemic to Latin America? Would it have to appeal to quintessential Western philosophical questions regarding knowledge, values, and reality? If not, why not, and would it then still count as philosophy? What difference do ethnic and national diversity, as well as strong political and social inequality, make to the development of philosophical questions and frameworks? Course explores a variety of historically situated Latin American thinkers who investigate ethnic identity, gender, and socio-political inequality and liberation, and historical memory, and who have also made important contributions to mainstream analytical and continental philosophy.

PHIL 80H - Holistic Healing and Non-Western Medicine (5)

Inquiry into the science and philosophical background of approaches that fit under the rubric of Complementary, Alternative, and Integrative Medicine.

PHIL 80M - Philosophical Foundations of Science Studies (5)

Provides a philosophical perspective concerning the revolution in the understanding of science that generated the so-called science wars. Introduces the changed philosophical understanding of science shared and presupposed in the fields of science, technology, and society. (Formerly *Science and Society*.)

PHIL 80S - The Nature of Science (5)

A survey of what philosophers have said about the nature of science and scientific change. Emphasis is placed on whether

science is best characterized as the gradual accumulation of truth or whether truth is irrelevant to scientific change.

PHIL 99 - Tutorial (5)

Upper-Division

PHIL 100A - Ancient Greek Philosophy (5)

Survey of ancient Greek philosophy of the Classical and Hellenistic periods. Begins with Socrates and the pre-Socratics, then undertakes an intensive study of Plato and Aristotle. Course then surveys the main developments that follow: Epicureanism, Stoicism, and Skepticism.

Prerequisite: Prerequisite(s): PHIL 8 or PHIL 9; one course from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or PHIL 80G or PHIL 80M or PHIL 80S; and satisfaction of the Entry Level Writing and Composition requirements.

PHIL 100B - The Rationalists (5)

A study of the historical background and the present relevance of Descartes, Spinoza, and Leibniz.

Prerequisite: Prerequisite(s): PHIL 8 or PHIL 9; one course from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or PHIL 80G or PHIL 80M or PHIL 80S; and satisfaction of the Entry Level Writing and Composition requirements.

PHIL 100C - The Empiricists (5)

A critical study (based on original texts) of Locke, Berkeley, and especially Hume on the nature of knowledge, perception, causation, morality, religion, and political society.

Prerequisite: Prerequisite(s): PHIL 8 or PHIL 9; one course from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or PHIL 80G or PHIL 80M or PHIL 80S; and satisfaction of the Entry Level Writing and Composition requirements.

PHIL 106 - Kant (5)

Intensive study of Kant's philosophy, particularly his epistemology and metaphysics developed in his *Critique of Pure Reason*.

Prerequisite: Prerequisite(s): PHIL 9; one course from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 107 - Nineteenth-Century Philosophy (5)

A study of some European philosophers of the 19th century, with particular attention to Hegel, Schopenhauer, and Nietzsche. (Formerly course 108.)

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 108 - Phenomenology (5)

French phenomenology includes primarily the work of Jean-Paul Sartre, Simone de Beauvoir, and Maurice Merleau-Ponty. Additional topics include the nature of consciousness and agency. Course includes discussions of French feminists' reactions to Simone de Beauvoir and Emmanuel Levinas.

Prerequisite: Prerequisite(s): PHIL 9; PHIL 11 or PHIL 22 or PHIL 24; PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 111 - Continental Philosophy (5)

Study of recent work in continental philosophy. Topics vary.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 112 - American Philosophy (5)

Study of classical American philosophers, specifically Emerson, Peirce, James, and Dewey, with emphasis on their views of metaphysics, epistemology, ethics, and philosophy of religion. Some attention is also paid to recent pragmatic tendencies in American philosophy.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 113 - The History of Analytic Philosophy (5)

Examination of the beginnings and development of analytic philosophy, with primary interest in the reformulation of traditional philosophical problems beginning with Frege. Other figures studied include, but are not limited to, Russell, Carnap, Wittgenstein, Quine, and Sellars.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 114 - Probability and Confirmation (5)

Studies the philosophical foundations of probability, induction, and confirmation. Different interpretations of probability studied, and solutions to various problems and paradoxes investigated. Students cannot receive credit for this course and course 214.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 115 - Formal Methods in Philosophy (5)

Study of formal methods commonly used in analytic philosophy. Emphasis is on developing the technical tools to enable one to read and do modern analytic philosophy. Applications of various formal tools to philosophical problems will also be discussed.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 116 - Logic, Sets, and Functions (5)

Introduction to basic set theory, recursive definitions, and mathematical induction. Provides a bridge between course 9 and courses 117 and 119. Strong emphasis on proving theorems and constructing proofs, both formal proofs and proofs in the customary, informal style used by mathematicians.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11, PHIL 22, PHIL 23, PHIL 24, PHIL 80E, PHIL 80G, PHIL 80M, PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 117 - Non-Classical Logic (5)

Investigations of non-classical logic. Several non-classical logics, such as various modal logics, multi-valued logics, and relevance logics studied. Meta-theoretic results investigated for each logic studied.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 118 - Stoic Ethics (5)

Surveys Stoic Ethics in the Hellenistic and Roman Periods, attending both to the theoretical writings of early Stoa (e.g., Zeno and Chrysippus) as well as to the therapeutic and protreptic writings of later figures (e.g., Seneca and Epictetus).

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 119 - Intermediate Logic (5)

Detailed treatment of the semantics of first order logic and formal computability. Completeness, undecidability of first order logic and Lowenheim-Skolem results also proven. Nature and formal limits of computability and introduction to incompleteness also investigated. Students cannot receive credit for this course and course 219.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 121 - Epistemology (5)

A sustained look at central problems in epistemology. Topics might include the problem of other minds, the nature of justification and knowledge, skepticism of the external world, the nature and limits of human rationality, the problem of induction. (Formerly Knowledge and Rationality.)

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 122 - Metaphysics (5)

Survey of contemporary analytic metaphysics. Topics may include nominalism, metaphysical realism, and the ontological analysis of concrete particulars, including problems of modality and persistence through time.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 123 - Philosophy of Language (5)

Current theories of the nature and preconditions of language, the nature of meaning, and the nature of truth.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 124 - Other Minds (5)

An examination of the traditional philosophical problem of other minds and related contemporary scientific issues concerning what it is to encounter a mind that is not one's own and is relevantly unlike one's own.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 125 - Philosophy of Science (5)

An examination of various topics that arise in thinking about science. Different philosophical problems, such as realism, instrumentalism, confirmation, explanation, space and time, and rational decision making are extensively discussed and criticized.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 126 - Philosophy of Social Sciences (5)

Examines philosophical concerns regarding the methods and assumptions of the social sciences. For example, must the methods of the social sciences differ in some important ways from those used by the natural sciences? Another issue concerns problems arising from studying groups where the very notion of rationality appears to vary from culture to culture or over historical periods.

Prerequisite: Prerequisite(s): PHIL 9; one from course PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 127 - Philosophy of Biology (5)

Can developmental processes be reduced to gene expression? Does the history of life exhibit trends (e.g. increasing complexity)? How are we to understand key concepts such as fitness, species, adaptation, and gene? Is there such a thing as human nature? Course surveys these and other core philosophical topics in the biological sciences.

Prerequisite: Prerequisite(s): PHIL 9; PHIL 11 or PHIL 22 or PHIL 24; PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 130 - Agony, Despair, and Desire: Philosophers of Suffering (5)

By reading the great philosophers of the times, students receive an introduction to philosophical writing on suffering, a foundation in the traditional treatment of suffering, and an assessment of traditional accounts of suffering.

Prerequisite: Prerequisite(s): PHIL 9; one from course PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 133 - Philosophy of Mind (5)

Focuses on philosophical questions concerning the nature of mind. Central topics include the relation between mind and matter, and the nature of consciousness. Other topics typically explored include: artificial intelligence; animal consciousness and intelligence; and the relation between thought and language.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 135 - Philosophy of Psychology (5)

Looks at philosophical issues raised by current research on the nature of perception, cognition, and consciousness in psychology and cognitive science or neuroscience. Can there be a science of the mind? Could machines be conscious? Do animals have minds? How did the mind evolve? These and a host of related questions form the subject matter of this course.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C. Enrollment is restricted to sophomores, juniors, and seniors.

PHIL 140 - History of Ethics (5)

A careful study of any one or a number of selected primary texts in the history of moral philosophy, with some emphasis on the relation to contemporary issues.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 142 - Advanced Ethics (5)

An examination of central issues in ethical theory including the nature of and justification for the moral point of view, the place of reason in ethics, the status of moral principles, and the nature of moral experience.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 143 - Applied Ethics: Ethics Bowl (5)

Intensive application of ethics through Ethics Bowl-style debate. Cases change annually. Students develop oral advocacy skills and are given the opportunity to compete for a position on the extracurricular Ethics Bowl team.

PHIL 144 - Topics in Social and Political Philosophy (5)

A study of selected classical and contemporary writings dealing with topics such as the nature and legitimacy of the liberal state, the limits of political obligation, and theories of distributive justice and rights. (Formerly Social and Political Philosophy.)

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 147 - Topics in Feminist Philosophy (5)

Topics in feminist philosophy, which may include: the nature of feminist philosophy, feminist approaches to philosophical issues, social and political philosophy, theories of knowledge, ethics, aesthetics, and science, technology, and medicine studies. Presupposes some familiarity with philosophy or feminist scholarship.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 148 - The Holocaust and Philosophy (5)

By using the historiography of the Holocaust as a case study, examines the epistemology and ontology of historical knowledge, i.e., how the past is known, and what about it there is to know.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C. Enrollment is restricted to juniors and seniors.

PHIL 152 - Aesthetics (5)

Problems about form, meaning, and interpretation in art, as found in major aesthetic theories from the philosophical tradition, and also in a variety of encounters between recent philosophy and the arts.

Prerequisite: Prerequisite(s): PHIL 9; one from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 153 - Philosophy of Race (5)

Topics include conceptual-analytical and political-social issues. Selected topics may include: the ontology of race; race as real or constructed; scientific understandings of race; race and identity; and color-blind versus color-sensitive theories of justice and political policy.

Prerequisite: Prerequisite(s): PHIL 9; one from course PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or PHIL 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 171 - Faith and Reason (5)

Recent work in analytic philosophy of religion, concentrating on traditional theism. Topics include arguments for and against the existence of God, religious experience, miracles, the relation of faith and reason, and problems such as freedom and divine foreknowledge.

Prerequisite: Prerequisite(s): PHIL 9; one course from PHIL 11 or PHIL 22 or PHIL 23 or PHIL 24 or PHIL 80E or 80G or PHIL 80M or PHIL 80S; and PHIL 100A or PHIL 100B or PHIL 100C.

PHIL 180R - Readings in Philosophy (2)

Discussion-based course centered on readings in philosophy. Readings change each term and are a mixture of books, chapters from books, and articles. Prerequisite(s): One philosophy course. Enrollment by permission of instructor.

PHIL 190 - Senior Seminar (5)

Special topics. Format varies each quarter. Prerequisite(s): PHIL 9; and two from PHIL 100A, PHIL 100B, and PHIL 100C. Enrollment restricted to senior philosophy majors and by permission of the instructor.

PHIL 195A - Senior Essay (5)

Preparation of senior essay (approximately 25 pages) during one quarter. Students submit petition to sponsoring agency.

PHIL 195B - Senior Essay (5)

Under exceptional circumstances, a second senior essay continuing the work of the first essay is permitted but only when the first senior essay has been completed. Students submit petition to sponsoring agency.

PHIL 199 - Tutorial (5)**PHIL 199F - Tutorial (2)**

Students submit petition to sponsoring agency.

Graduate

PHIL 202 - Topics in Ancient Greek Philosophy (5)

Topics will vary each quarter and will focus on some major ancient Greek philosophical figure or work.

Prerequisite: Enrollment is restricted to philosophy graduate students.

PHIL 203 - Autism (5)

Explores autism and its implications for various fields of inquiry, especially philosophy. Previous familiarity with autism is not presupposed. Some background in philosophy of mind, cognitive science, and psychology recommended.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 214 - Probability and Confirmation (5)

Studies the philosophical foundations of probability, induction, and confirmation. Different interpretations of probability studied, and solutions to various problems and paradoxes investigated.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 222 - Metaphysics (5)

Advanced introduction to topics in 20th century and contemporary analytic metaphysics. Divided into five main parts dealing, respectively, with issues about the nature of existence, properties, time, change and persistence, and material constitution.

Prerequisite: Enrollment is restricted to philosophy graduate students.

PHIL 224 - Philosophy of Language (5)

Advanced introduction to issues in the philosophy of language—primarily concerning the nature of reference, meaning, and truth. Works from such 20th-century figures as Russell, Wittgenstein, Kripke, Lewis, and Putnam discussed. Topics include what it is for a sign or a bit of language to be meaningful, or for it to identify or represent something; what it is for a statement to be truthful; what it is to be a language; and how reference works when attributed to beliefs.

Prerequisite: Enrollment is restricted to philosophy graduate students.

PHIL 231 - Epistemology (5)

May focus on topics such as naturalized epistemology, probabilistic epistemology, theories of justification, a priori knowledge, memory, and virtue epistemology. (Formerly Metaphysics and Epistemology.)

Prerequisite: Enrollment is restricted to philosophy graduate students.

PHIL 232 - Advanced Topics in Value Theory (5)

Considers topics central to philosophical questions about value: ethics, normativity, practical reason, relativism, skepticism, responsibility, motivation, emotion, and so forth. In some instances, the investigation will proceed through influential historical figures, ancient to modern.

Prerequisite: Enrollment is restricted to philosophy graduate students.

PHIL 233 - Seminar in Philosophy of Mind (5)

A study of one or more topics in contemporary philosophy of mind.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 235 - Philosophy of Psychology (5)

Looks at philosophical issues raised by current research on the nature of perception, cognition, and consciousness in psychology and cognitive science or neuroscience. Can there be a science of the mind? Could machines be conscious? Do animals have minds? How did the mind evolve? These and a host of related questions form the subject matter of this course.

Prerequisite: Prerequisite(s): One course in philosophy, psychology, or linguistics. Enrollment is restricted to graduate students.

PHIL 237 - Making Up the Mind (5)

How does the mind come to be a thing which science can study? Readings focus on how diagnostic categories, for example, multiple personality disorder, attain scientific cachet and what issues surround the medicalization of the mind.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 239 - Philosophy of Religion (5)

Investigation of various topics in philosophy of religion.

Prerequisite: Enrollment is restricted to philosophy graduate students or by permission of instructor.

PHIL 246 - Ethics, Nature, and Natural Selection (5)

Explores the role, if any, that Darwinian theory and evolutionary biology should have on ethical theory. Topics range from classic work, including Darwin and classic expositors, to influential contemporary work on natural selection, in light of the best philosophical literature.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 270 - Research Seminar (5)

A research seminar to develop the skills of the profession with special focus on critical reading, constructing feedback, and philosophical research and writing. Must be completed by the third year. A substantial draft of a paper is required to enroll.

Prerequisite: Enrollment is restricted to philosophy graduate students.

PHIL 280 - Graduate Colloquia Course (2)

This colloquia series sponsors speakers each quarter. Students must attend all colloquia and are encouraged to form discussion groups after each lecture.

Prerequisite: Enrollment is restricted to philosophy graduate students.

PHIL 281 - The Pedagogy of Philosophy (2)

Provides training for graduate students in university-level pedagogy in general and in the pedagogy of philosophy specially, under the supervision of a faculty member.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 290A - Philosophy of History (5)

Examines issues that arise with respect to constructing histories. Inter alia, these include: the traditional philosophy of history (e.g., Hegel and Marx); modes of explanation (including narrative); the reality of the past; and underdetermination in history.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 290C - Advanced Topics in Ethics (5)

Topics vary but the course focuses on major questions in contemporary ethical theory, or figures influential on contemporary moral philosophy. Examines different foundational ethical principles and arguments for those principles, contrasting accounts of moral action and moral motivation, as well as the epistemological and motivational role of emotions in ethical theory.

Prerequisite: Enrollment is restricted to philosophy graduate students.

PHIL 290F - Topics in Philosophy of Biology (5)

Philosophy of biology is one of the fastest-growing areas of philosophy of science. Course is designed to give seniors and graduate students an overview of many of the diverse topics currently under discussion in modern philosophy of biology and provide a foundation for further research, regardless of previous experience with the biological sciences.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 290H - Environmental Ethics (5)

What is our proper moral stance toward the natural environment? This question encompasses our ethical relations to individual non-human animals, to other species of living beings, and toward the biotic community as a whole. It leads us to consider the broader question: What makes anything at all worthy of our moral respect or even our moral consideration? How are we to understand the very idea of the environment, the distinction between the human world, and the natural world, and the relationships between them.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 290J - Advanced Topics in the History of Ethics (5)

Careful study of any one of the main moral theories in the history of philosophy, with some emphasis on the relation to contemporary moral philosophy.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 290K - Philosophical Matters of Scientific Practice (5)

Considers the relevance of philosophical matters to the practice of science. Using quantum physics as a case study, explores historical and contemporary perspectives on issues such as those raised by the Schrodinger cat paradox, Bell's inequalities, and quantum erasers.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 290O - Major Figures in the History of Philosophy (5)

Focuses on philosophical writings and significance of a single major figure in the history of philosophy, ancient, medieval, or modern.

Prerequisite: Enrollment is restricted to philosophy graduate students.

PHIL 290P - Major Figures in Contemporary Philosophy (5)

Focuses on philosophical writings and significance of a single figure in contemporary (20th- and 21st-century) philosophy. May include, but not be limited to, Russell, Whitehead, Wittgenstein, Husserl, Carnap, Murdoch, Quine, Irigaray, Derrida, and Davidson.

Prerequisite: Enrollment is restricted to philosophy graduate students.

PHIL 290Q - Philosophy of Mathematics (5)

Introduction to the problems of contemporary analytic philosophy of mathematics. Do mathematical objects exist? Are mathematical statements true? How can we know? We will examine the historical background to contemporary debates and the positions which have been taken within them.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 290S - Topics in the Philosophy of Science (5)

An examination of a topic in current philosophy of science. The material for the course is chosen from topics such as realism and instrumentalism, scientific explanation, space and time, the confirmation of theories, laws of nature, and scientific abstraction.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 290W - History of Consciousness (5)

Historical study of philosophical theories of consciousness and self-consciousness. Problems include the relation of self and other, consciousness and body, and self-consciousness and ethical agency. Readings are from Kant, Hegel, Nietzsche, and Heidegger, followed by phenomenologists, poststructuralists, and analytic philosophy.

Prerequisite: Enrollment is restricted to graduate students.

PHIL 294 - Teaching-Related Independent Study (5)

Directed graduate research and writing coordinated with the teaching of undergraduates.

PHIL 295 - Directed Reading (5)

Directed reading which does not involve a term paper.

PHIL 295F - Readings in Philosophy (2)

Focuses on selected philosophical areas and/or specific philosophers. Students meet with the instructor to discuss readings and deepen their knowledge on a particular subject. Enrollment restricted to graduate students.

PHIL 296 - Special Student Seminar (5)

A seminar for graduate students arranged between students and a faculty member. Students submit petition to sponsoring agency.

PHIL 297 - Independent Study (5)

Students submit petition to sponsoring agency.

PHIL 297F - Independent Study (2)

Students submit petition to course sponsoring agency. Enrollment restricted to graduate students.

PHIL 299 - Thesis Research (5)

Enrollment restricted to students who have advanced to candidacy.

PHYE - PHYSICAL EDUCATION

Lower-Division

PHYE 5A - Aquatics: Swimming Level I (0)

Coeducational. Water exploration and primary skills development. Course is designed to teach only non-swimmers how to swim. The following is taught: Red Cross swimming instruction in overcoming fears, water adjustment, floating, breath holding, and rhythmic breathing. Skills to be learned are: water entries, sculling, treading, elementary backstroke, freestyle, methods of water safety, and survival techniques. Prerequisite(s): instructor determines skill level at first class meeting.

PHYE 5B - Aquatics: Swimming Level II (0)

Coeducational. Stroke readiness and development. Course is for those who have completed Swimming Level I or who can swim freestyle and demonstrate elementary backstroke. Skills to be learned are underwater swimming, turns, improvement of freestyle and elementary backstroke, beginning side stroke, backstroke, breaststroke, diving, personal safety skills, and

basic rescue techniques. Prerequisite(s): instructor determines skill level at first class meeting: pass Swimming Level I course or demonstrate equivalent skills.

PHYE 5C - Aquatics: Swimming Level III (0)

Coeducational. Stroke refinement and skill proficiency. Course teaches refinement of basic strokes and introduces butterfly, plus backstroke, surface diving, turns, endurance swimming, and survival techniques. Prerequisite(s): instructor determines skill level at first class meeting: pass in Swimming Level II course or possess equivalent skills in freestyle, sidestroke, elementary backstroke, and breaststroke.

PHYE 5D - Aquatics: Swimming Level IV (0)

Coeducational. Advanced skills. Designed to perfect the techniques and skills of all basic strokes plus butterfly, surface dives, survival swimming, basic diving, endurance swimming, and personal and rescue skills. Prerequisite(s): pass in Swimming Level III course or possess equivalent swimming skill requirements in freestyle, backstroke, sidestroke, or competitive swimming; instructor determines skill level.

PHYE 5E - Aquatics: Lifeguard Training (LT) (0)

Red Cross certified lifeguard training. Provides the necessary minimum skills training to qualify as a non-surf lifeguard. Certification includes CPR Pro, AED, PDT, D2, ADMIN, and Title 22 First Aid. Candidates must successfully pass final skill tests and written final exam with 80 percent score. Prerequisite(s): must have ability to swim 500 yards in ten minutes, tread water for one minute, strong swimming skills in free, back, breast, side, and elementary backstroke; must purchase Red Cross LT text book.

PHYE 5F - Water Safety Instructor (WSI) (0)

Coeducational. A Red Cross course designed to certify students who complete all required work as swimming instructors. Instruction in teaching techniques, stroke analysis, skilled swimming, class organization, pool safety, and pool maintenance. Practice teaching assignments outside of class with practical and written final exams. Screening test given at first class meeting. Prerequisite(s): must be 17 years old, possess valid ARC Instructor Candidate Training card (ICT), and ARC swimmers-level skills. (Emergency Water Safety (EWS), or Lifeguard Training (LT) certificate is highly recommended).

PHYE 5G - Aquatics: Swimming/Conditioning (0)

Open to all students who wish to explore swimming as a conditioning and fitness exercise. Students should know three competitive strokes, and should be able to swim fifteen minutes without stopping. Short health and fitness lectures precede some classes. Prerequisite(s): instructor determination at first class meeting.

PHYE 5H - Aquatics: Competitive Swimming (0)

Emphasis on competitive swimming and conditioning techniques. For students who want instruction at the

competitive level of swimming. Three hours per week.
Prerequisite(s): instructor determination at first class meeting.

PHYE 5R - Aquatics: Basic Scuba Diving (0)

Coeducational. Sections geared toward the successful completion of NAUI Scuba Diver Certification. The course is divided into three parts: lecture, pool lab, and open water experience. Four open water training dives are offered. Emphasis is on training for open water scuba diving, using the beach as a base of operation. Prerequisite(s): pass swimming skills tests and medical clearance. It is strongly recommended that students enroll in course 5S.

PHYE 5S - Aquatics: Advanced Scuba Diving (0)

Coeducational. Sections are offered to facilitate the development of the basic scuba diver's open water techniques. A minimum of six open water experiences is offered. Course is geared toward successful completion of NAUI Advanced Scuba Diver Certification. Prerequisite(s): course 5R or pass swimming skills test and medical clearance. (Formerly course 5T.)

PHYE 5T - Scuba Rescue Diving (0)

Coeducational. Course geared toward the successful completion of NAUI Rescue Diver Certification. Course consists of lecture, pool laboratory, and open-water experience. Emphasis is on training divers to manage risks and effectively handle limited in-water problems. Prerequisite(s): Scuba certification and medical clearance.

PHYE 5U - Aquatics: Scuba Divemaster (0)

Coeducational. A diving-leadership certification course for the experienced scuba student who wishes to assist with the scuba-instruction program at UCSC. Topics include teaching techniques, skin and scuba techniques, rescue techniques, and safety procedures. Specialty laboratories also offered with this course which cover a variety of diving skills. Prerequisite(s): Basic Scuba Certification and special prerequisite checking by instructor.

PHYE 9B - Boating: Beginning Dinghy Sailing (0)

Coeducational. Introductory course in practical boating safety using 15-foot sailboats. Includes introduction to rigging, nomenclature, seamanship, proper boat-handling techniques, and general boating and aquatic safety. Satisfactory completion meets prerequisites for intermediate-level dinghy course. Prerequisite(s): swimming ability.

PHYE 9C - Boating: Intermediate Dinghy Sailing (0)

Coeducational. Course includes a review of basic sailing with an emphasis on the further development and refinement of small-boat sailing techniques. Fifteen-foot sailboats are used with two students per boat.

Prerequisite: Prerequisite(s): PHYE 9B or equivalent skills.

PHYE 9D - Boating: Advanced Dinghy Sailing (0)

Coeducational. For students interested in high-performance sailing using Flying Juniors and Coronado 15s. Includes special techniques used in racing conditions.

Prerequisite: Prerequisite(s): PHYE 9C or equivalent skills.

PHYE 9H - Boating: Basic Rowing (0)

Coeducational. Course designed to cover types of rowing boats, nomenclature, fundamental skills, and specific safety and rescue aspects related to the activity. Students will row singly as well as in groups using 15-foot to 22-foot rowing dories. Prerequisite(s): swimming ability.

PHYE 9J - Boating: Intermediate Rowing (0)

Coeducational intermediate course designed to cover more advanced rowing techniques and the skills needed for safe open water rowing. Prerequisite(s): basic rowing or permission of instructor.

PHYE 9K - Boating: Ocean Kayaking (0)

Co-educational course that teaches novice kayakers the skills to safely use UCSC kayaks in the Monterey Bay. Topics include: basic paddling strokes and maneuvers; self and assisted deep-water rescues; beach launching; landing through surf; and marine hazards and navigation.

PHYE 9S - Boating: Beginning Keelboat Sailing (0)

Coeducational. Combines hands-on rigging and docking practice in the harbor and sailing practice on Monterey Bay with instruction in sail-trimming, de-powering, powering-up, person-overboard recovery techniques, boating safety, weather, ocean conditions, sailing theory, rigging, navigation, and the maritime rules of the road. Twenty-seven foot, ultralight, displacement keelboats are used.

Prerequisite: Prerequisite(s): PHYE 9C or equivalent skills.

PHYE 9T - Boating: Intermediate Keelboat Sailing (0)

Coeducational. Further development and refinement of boat-handling techniques, including advanced maneuvering, anchoring, and racing with an introduction to the use of spinnakers.

Prerequisite: Prerequisite(s): PHYE 9S.

PHYE 9X - Boating: Advanced Keelboat Sailing (0)

Coeducational. Designed for the experienced sailor who desires to bareboat larger vessels in the future. Topics include: ocean navigation; anchoring techniques; boat systems, such as diesel engines; boat plumbing and electronics; and docking. Prerequisite(s): course 9T and 40 or more hours of club keelboat useage. Enrollment by permission of instructor.

PHYE 15B - Court Sports: Basketball (0)

Coeducational. Instruction in fundamentals, offensive and defensive strategies, rules, and conditioning designed primarily for beginning and intermediate level players.

PHYE 15H - Court Sports: Racquetball (0)

Coeducational. The beginning section provides an introduction to the basic knowledge and skills involved in this indoor racquet sport. The advanced beginning section continues the development of the basic skills emphasizing increased shot variety and advanced strategy. The intermediate section offers the opportunity for further skill development and introduces more advanced offensive skills.

PHYE 15N - Court Sports: Tennis (0)

Coeducational. The beginning section introduces the basics of forehand, backhand, and serve. Advanced beginning section reviews these basics and introduces the volley, overhead, and lob. The intermediate section reviews all stroke mechanics and covers basic singles and doubles strategy. The advanced section includes use of spins, practice principles, detailed stroke analysis, and advanced play situations. Competitive Tennis is a year-long program for members of the intercollegiate tennis teams.

PHYE 15T - Court Sports: Volleyball (0)

Coeducational. Beginning/intermediate, intermediate, and advanced sections are offered for students who desire to learn and improve the basic skills, as well as to understand the rules. Competitive section is open to students interested in participation in the UCSC NCAA Women's Volleyball team. It covers information and practice in all aspects of the competitive volleyball season.

PHYE 20A - Dance: Ballet (0)

Coeducational. Sections offered at various technical levels graded from I to III. Emphasis on principles of movement, style, and execution of ballet technique. Section in ballet repertory where advanced students have the opportunity to perform is offered in the spring quarter.

PHYE 20B - International Folk Dance (0)

Coeducational. International folk dance with an emphasis on Balkan and Israeli dances. Sections are also offered periodically in Mexican dance.

PHYE 20C - Dance: Jazz (0)

Coeducational. Sections offered at various technical levels graded from I to III. Exploration of jazz dance emphasizing basic technique, styling, rhythm, and isolations. Jazz and contemporary music is used as accompaniment. Some background in ballet strongly recommended before continuing to Jazz II or III. Section in jazz dance repertory where advanced students have the opportunity to perform is offered in spring quarter.

PHYE 20D - Dance: Modern (0)

Coeducational. Sections offered at various technical levels graded from I to III. Emphasis on basic techniques and building phrases of movement. Section in choreography and improvisation offered in spring quarter. Section in dance repertory offered periodically.

PHYE 20F - Dance: Individual Studies in Dance (0)

Coeducational. Designed to give students the opportunity of pursuing their particular interests in the field of dance with the support and direction of a faculty member. Prerequisite(s): instructor determination at first class meeting.

PHYE 25A - Fencing: Epee (0)

Coeducational. Basic instruction in the techniques, strategy, and general methodology of modern fencing. Emphasis on épée fencing as a development from the traditional French and Italian dueling sword styles as they have evolved to form the modern electrical game.

PHYE 25B - Fencing: Foil (0)

Coeducational. Instruction in modern competitive French-Italian foil techniques for beginning, intermediate, and advanced levels. Emphasis on physical and mental conditioning leading to improved skill in recreational and competitive areas of involvement.

PHYE 25C - Fencing: Sabre (0)

Coeducational. Instruction and practice in basic offensive and defensive skills of modern Hungarian sabre technique. Emphasis on physical and mental conditioning as a foundation for more advanced levels of instruction. Preparation for recreational and competitive involvement.

PHYE 28K - Field Sports: Soccer (0)

Coeducational/Women's. Sections are offered in field soccer and indoor soccer. Instruction in the basic techniques, tactics, laws of the game, and injury prevention for beginners and advanced players. Prerequisite(s): determination at first class meeting.

PHYE 30G - Fitness Activities: Physical Conditioning (0)

Coeducational. An exercise course designed to increase the participants' strength, flexibility, coordination, and cardiovascular endurance. Special attention is given to understanding and utilizing sound and safe principles of body alignment and movement. Courses include, but not limited to: Pilates, cardio boxing, stretch and strengthen, and aerobics.

PHYE 30H - Fitness Activities: T'ai Chi Ch'uan (0)

Through balanced movement and breath control, T'ai Chi Ch'uan attempts to forestall many processes of aging by cultivating greater strength of body, mind, and spirit.

PHYE 30J - Fitness Activities: Strength Training (0)

Coeducational. An introduction to safe and effective methods of weight training and other personal conditioning activities. Topics covered include proper weight-training techniques, care of body and equipment, and elementary exercise physiology.

PHYE 30L - Fitness Activities: Yoga Exercises (0)

Coeducational. Sections offered at beginning, continuing beginning, and advanced beginning levels of Hatha Yoga.

PHYE 30N - Self-Defense Basics (0)

Self-defense is a simple, effective approach to maximize personal safety requiring no prior skill, knowledge, or physical fitness. Practice includes basic physical and verbal assertiveness skills appropriate for a wide range of situations including acquaintance and stranger assaults. Physical conditioning is an integral part of the course.

PHYE 43A - Martial Arts: Aikido (0)

Coeducational. A nonviolent, noncompetitive Japanese martial art emphasizing mind-body harmony, balance, relaxation, and the understanding of vital energy. Aikido self-defense techniques aim toward the creative resolution of conflict and the growth of the individual. Sections offered at beginning and experienced levels.

PHYE 43G - Martial Arts: Karate (0)

Coeducational. Sections offered at the beginning and intermediate/advanced levels. Covering basic skills, knowledge, and philosophy of Karate and providing instruction in the following aspects of martial arts study: fundamental techniques of self-defense, physical conditioning, emotional control, self-discipline, and self-confidence.

Graduate

PHYE 209B - Boating: Graduate Beginning Dinghy Sailing (0)

Coeducational. Introductory course in practical boating safety using 15-foot sailboats. Includes introduction to rigging, nomenclature, seamanship, proper boat-handling techniques, and general boating and aquatic safety. Satisfactory completion meets prerequisites for intermediate-level dinghy course.

Prerequisite: Prerequisite(s): swimming ability. Enrollment is restricted to graduate students.

PHYE 209C - Boating: Graduate Intermediate Dinghy Sailing (0)

Coeducational. Course includes a review of basic sailing with an emphasis on the further development and refinement of small-boat sailing techniques. Fifteen-foot sailboats are used with two students per boat.

Prerequisite: Prerequisite(s): PHYE 9B or PHYE 209B, or equivalent skills; and swimming ability. Enrollment is restricted to graduate students.

PHYE 209S - Boating: Grad Student Beginning Keelboat Sailing (0)

Coeducational. Combines hands-on rigging and docking practice in the harbor and sailing practice on Monterey Bay with instruction in sail-trimming, de-powering, powering-up, person-overboard recovery techniques, boating safety, weather, ocean conditions, sailing theory, rigging, navigation, and the maritime rules of the road. Twenty-seven foot, ultralight, displacement keelboats are used.

Prerequisite: Prerequisite(s): PHYE 9C or PHYE 209C. Enrollment is restricted to graduate students.

PHYS - PHYSICS

Lower-Division

PHYS 1 - Physics for Everyone (5)

Explores some of the great topics in classical and modern physics, including quantum mechanics and relativity, and the connections to a broad range of inquiry, from daily life to cosmology. Math, mainly algebra, is used in a way that is completely accessible to everyone. (Formerly Conceptual Physics).

PHYS 2 - Elementary Physics of Energy (5)

The physics of energy developed in a course accessible to non-science majors as well as science majors. Fundamental principles and elementary calculations, at the level of basic algebra, developed and applied to the understanding of the physics of energy. Topics include fossil fuels, renewable energy, solar cells and waste energy, waste-energy recovery, nuclear power, and global greenhouse effects.

PHYS 5A - Introduction to Physics I (5)

Elementary mechanics. Vectors, Newton's laws, inverse square force laws, work and energy, conservation of momentum and energy, and oscillations.

Prerequisite: Prerequisite(s): MATH 19A or MATH 20A; concurrent enrollment in PHYS 5L is required.

PHYS 5B - Introduction to Physics II (5)

A continuation of 5A. Wave motion in matter, including sound waves. Geometrical optics, interference and polarization, statics and dynamics of fluids.

Prerequisite: Prerequisite(s): PHYS 5A and PHYS 5L and MATH 19A or MATH 20A; concurrent enrollment in PHYS 5M is required. Corequisite: MATH 19B or MATH 20B.

PHYS 5C - Introduction to Physics III (5)

Introduction to electricity and magnetism. Electromagnetic radiation, Maxwell's equations.

Prerequisite: Prerequisite(s): PHYS 5A and PHYS 5L and MATH 19B or MATH 20B. Concurrent enrollment in PHYS 5N is required.

PHYS 5D - Introduction to Physics IV (5)

Introduces temperature, heat, thermal conductivity, diffusion, ideal gases, laws of thermodynamics, heat engines, and kinetic theory. Introduces the special theory of relativity and the equivalence principle. Includes the photoelectric effect, the Compton effect, matter waves, atomic spectra, and the Bohr model.

Prerequisite: Prerequisite(s): PHYS 5A and PHYS 5L, or PHYS 6A and PHYS 6L; and PHYS 5B or PHYS 6B; and MATH 19B or MATH 20B.

PHYS 5L - Introduction to Physics Laboratory (1)

Laboratory sequence illustrating topics covered in course 5A. One three-hour laboratory session per week.

Prerequisite: Prerequisite(s): concurrent enrollment in PHYS 5A is required.

PHYS 5M - Introduction to Physics Laboratory (1)

Laboratory sequence illustrating topics covered in course 5B. One three-hour laboratory session per week.

Prerequisite: Prerequisite(s): PHYS 5A and PHYS 5L; concurrent enrollment in PHYS 5B is required.

PHYS 5N - Introduction to Physics Laboratory (1)

Laboratory sequence illustrating topics covered in course 5C. One three-hour laboratory session per week.

Prerequisite: Prerequisite(s): Prerequisite(s): PHYS 5A and PHYS 5L. Concurrent enrollment in PHYS 5N is required. PHYS 5B and PHYS 5M recommended.

PHYS 6A - Introductory Physics I (5)

Elementary mechanics. Vectors, Newton's laws, inverse square force laws, work and energy, conservation of momentum and energy, and oscillations.

Prerequisite: Prerequisite(s): MATH 11A or MATH 19A or MATH 20A or AM 15A. Concurrent enrollment in PHYS 6L is required.

PHYS 6B - Introductory Physics II (5)

A continuation of 6A. Geometric optics; statics and dynamics of fluids; introduction to thermodynamics, including temperature, heat, thermal conductivity, and molecular motion; wave motion in matter, including sound waves.

Prerequisite: Prerequisite(s): PHYS 5A and PHYS 5L or PHYS 6A and PHYS 6L; and MATH 11B or MATH 19B or MATH 20B or AM 15B.

PHYS 6C - Introductory Physics III (5)

Introduction to electricity and magnetism. Elementary circuits; Maxwell's equations; electromagnetic radiation; interference and polarization of light.

Prerequisite: Prerequisite(s): PHYS 5A and PHYS 5L or PHYS 6A and PHYS 6L, and MATH 11B or MATH 19B or MATH 20B or AM 15B.

PHYS 6L - Introductory Physics Laboratory (1)

Laboratory sequence illustrating topics covered in course 6A. One three-hour laboratory session per week.

Prerequisite: Prerequisite(s): Previous or concurrent enrollment in PHYS 6A or PHYS 7A is required.

PHYS 6M - Introductory Physics Laboratory (1)

Laboratory sequence illustrating topics covered in course 6B. One three-hour laboratory session per week.

Prerequisite: Prerequisite(s): PHYS 5A, PHYS 6A, or PHYS 7A; and PHYS 5L, PHYS 6L or PHYS 7L; and previous or concurrent enrollment in PHYS 6B.

PHYS 6N - Introductory Physics Laboratory (1)

Laboratory sequence illustrating topics covered in course 6C. One three-hour laboratory session per week.

Prerequisite: Prerequisite(s): PHYS 6A and PHYS 6L or PHYS 5A and PHYS 5L; previous or concurrent enrollment in PHYS 6C; PHYS 6B and PHYS 6M are recommended.

PHYS 7A - Elementary Physics I (5)

Examines elementary mechanics, including vectors, kinematics, Newton's laws, work and energy, conservation of momentum and energy, fluid motion, and temperature and heat.

Prerequisite: Prerequisite(s): MATH 11A or MATH 19A or MATH 20A or AM 15A. Concurrent enrollment in PHYS 6L or PHYS 7L is required.

PHYS 7B - Elementary Physics II (5)

Examines elementary wave motion, light polarization, reflection and refraction; elementary electricity, including electric charge, Coulomb's Law, and electric field and potential; electrostatic energy, currents, conductors, resistance, and Ohm's Law; and magnetic fields, inductors, and circuits.

Prerequisite: Prerequisite(s): PHYS 7A, and MATH 11B, or MATH 19B, or MATH 20B, or AM 15B.

PHYS 7L - Elementary Physics Laboratory (1)

Laboratory sequence illustrating topics covered in course 7A. One three-hour laboratory session per week.

Prerequisite: Prerequisite(s): Concurrent enrollment in PHYS 7A is required.

PHYS 11 - The Physicist in Industry (2)

One two-hour meeting per week. Subjects include roles of the physicist in industry, the business environment in a technical company, economic considerations, job hunting, and discussions with physicists with industrial experience. Enrollment by permission of instructor. Priority given to applied physics upper-division students; other majors if space available.

PHYS 80U - Physics and Psychophysics of Music (5)

Fundamental theory of vibration, sound waves, sound propagation, diffraction, and interference. Free, coupled, and driven oscillations. Resonance phenomena and modes of oscillation. Fourier's theorem. Anatomy and psychophysics of the ear. Musical scales and intervals. Nature of plucked and bowed strings; guitar, violin, piano. Woodwind and brass

instruments. Architectural acoustics. High school algebra and basic knowledge of musical notation recommended.

PHYS 99 - Tutorial (5)

Students submit petition to sponsoring agency.

Upper-Division

PHYS 102 - Modern Physics (5)

Topics in quantum physics including the Schrodinger equation; angular momentum and spin; the Pauli exclusion principle; and quantum statistics. Applications in multi-electron atoms and molecules, and in solid-state, nuclear, and particle physics.

Prerequisite: Prerequisite(s): PHYS 5A, PHYS 5L, PHYS 5B, PHYS 5M, PHYS 5C, PHYS 5N and PHYS 5D; or PHYS 6A, PHYS 6L, PHYS 6B, PHYS 6M, PHYS 6C, PHYS 6N, and PHYS 5D; or equivalent.

PHYS 105 - Mechanics (5)

Particle dynamics in one, two, and three dimensions. Conservation laws. Small oscillations, Fourier series and Fourier integral solutions. Phase diagrams and nonlinear motions, Lagrange's equations, and Hamiltonian dynamics.

Prerequisite: Prerequisite(s): PHYS 5A and PHYS 5L and PHYS 116A and PHYS 116B; concurrent enrollment in PHYS 116C is required.

PHYS 110A - Electricity, Magnetism, and Optics (5)

Examines electrostatics, including the electric field, potential, solutions to Laplace's and Poisson's equations, and work and energy; electricity in matter (conductors, dielectrics); magnetostatics, including the magnetic field and vector potential, Ampere's and Faraday's laws; and magnetism in matter; Maxwell's equations; and conservation laws and gauge invariance.

Prerequisite: Prerequisite(s): PHYS 5C and PHYS 116A PHYS 116B and PHYS 116C.

PHYS 110B - Electricity, Magnetism, and Optics (5)

Examines electromagnetic waves, including absorption and dispersion, reflection and transmission, and wave guides; time-dependent vector and scalar potentials and application to radiation of charges and antennae; and electrostatics and relativity.

Prerequisite: Prerequisite(s): PHYS 110A and PHYS 116C.

PHYS 112 - Thermodynamics and Statistical Mechanics (5)

Consequences of the first and second laws of thermodynamics, elementary statistical mechanics, thermodynamics of irreversible processes.

Prerequisite: Prerequisite(s): PHYS 5D; and PHYS 116B or STAT 5 or STAT 131; and MATH 23A and MATH 23B.

Concurrent enrollment in PHYS 101B or PHYS 102; and PHYS 116A is required.

PHYS 115 - Computational Physics (5)

This course will apply efficient numerical methods to the solutions of problems in the physical sciences which are otherwise intractable. Examples will be drawn from classical mechanics, quantum mechanics, statistical mechanics, and electrodynamics. Students will apply a high-level programming language, such as Mathematica, to the solution of physical problems and develop appropriate error and stability estimates.

Prerequisite: Prerequisite(s): PHYS 101B or PHYS 102, and PHYS 105, PHYS 116A, PHYS 116B, and PHYS 116C, or equivalent. Basic programming experience in C or Fortran. No previous experience with Mathematica is required.

PHYS 116A - Mathematical Methods in Physics (5)

Infinite series, topics in linear algebra including vector spaces, matrices and determinants, systems of linear equations, eigenvalue problems and matrix diagonalization, tensor algebra, and ordinary differential equations.

Prerequisite: Prerequisite(s): MATH 23A.

PHYS 116B - Mathematical Methods in Physics (5)

Complex functions, complex analysis, asymptotic series and expansions, special functions defined by integrals, calculus of variations, and probability, and statistics.

Prerequisite: Prerequisite(s): PHYS 116A and MATH 23A and MATH 23B.

PHYS 116C - Mathematical Methods in Physics (5)

Fourier series and transforms, Dirac-delta function, Green's functions, series solutions of ordinary equations, Legendre polynomials, Bessel functions, sets of orthogonal functions, and partial differential equations.

Prerequisite: Prerequisite(s): PHYS 116A and PHYS 116B and MATH 23A and MATH 23B.

PHYS 120 - Polymer Physics (5)

Statistical properties polymers; scaling behavior, fractal dimensions; random walks, self avoidance; single chains and concentrated solutions; dynamics and topological effects in melts; polymer networks; sol-gel transitions; polymer blends; application to biological systems; computer simulations will demonstrate much of the above. Students cannot receive credit for this course and course 240.

Prerequisite: Prerequisite(s): PHYS 112 and PHYS 116B.

PHYS 129 - Nuclear and Particle Astrophysics (5)

The standard model of particle physics; general relativistic cosmology; the early universe and Big Bang nucleosynthesis; dark matter and structure formation; formation of heavy elements in stars and supernovae; neutrino oscillations; high-

energy astrophysics: cosmic rays and gamma-ray astronomy. (Formerly Nuclear and Particle Physics.)

Prerequisite: Prerequisite(s): PHYS 5D; and PHYS 101B or PHYS 102, and MATH 23B; students with equivalent coursework may contact instructor for permission to enroll.

PHYS 134 - Physics Advanced Laboratory (5)

Individual experimental investigations of basic phenomena in atomic, nuclear, and solid state physics.

Prerequisite: Prerequisite(s): PHYS 133; and PHYS 101B or PHYS 102.

PHYS 135 - Astrophysics Advanced Laboratory (5)

Introduction to the techniques of modern observational astrophysics at optical and radio wavelengths through hands-on experiments. Offered in some academic years as a multiple-term course: 135A in fall and 135B in winter, depending on astronomical conditions.

Prerequisite: Prerequisite(s): PHYS 133 and at least one astronomy course. Enrollment is restricted to physics (astrophysics) majors. Intended primarily for juniors and seniors majoring or minoring in astrophysics.

PHYS 135A - Astrophysics Advanced Laboratory (3)

Introduction to techniques of modern observational astrophysics at optical and radio wavelengths through hands-on experiments. Intended primarily for juniors and seniors majoring or minoring in astrophysics. Offered in some academic years as single-term course 135 in fall, depending on astronomical conditions.

Prerequisite: Prerequisite(s): PHYS 133 and at least one astronomy course. Enrollment is restricted to physics (astrophysics) majors.

PHYS 135B - Astrophysics Advanced Laboratory (2)

Introduction to techniques of modern observational astrophysics at optical and radio wavelengths through hands-on experiments. Intended primarily for juniors and seniors majoring or minoring in astrophysics. Offered in some academic years as single-term course 135 in fall, depending on astronomical conditions.

Prerequisite: Prerequisite(s): PHYS 135A. Enrollment is restricted to physics (astrophysics) majors.

PHYS 139A - Quantum Mechanics I (5)

Basic principles and mathematical techniques of nonrelativistic quantum mechanics: Schrodinger equation and Dirac notation; one-dimensional systems, including the free particle and harmonic oscillator; three-dimensional problems with spherical symmetry; angular momentum; hydrogen atom; spin; identical particles and degenerate gases. (Formerly Quantum Mechanics.)

Prerequisite: Prerequisite(s): PHYS 101B or PHYS 102; and PHYS 116A, PHYS 116B, and PHYS 116C.

PHYS 139B - Quantum Mechanics II (5)

Approximation methods in nonrelativistic quantum mechanics: time-independent perturbation theory (non-degenerate and degenerate) and addition of angular momenta; variational methods; the WKB approximation; time-dependent perturbation theory and radiation theory; scattering theory. (Formerly Quantum Mechanics.)

Prerequisite: Prerequisite(s): PHYS 101B or PHYS 102; and PHYS 139A, PHYS 116A, PHYS 116B, and PHYS 116C.

PHYS 143 - Supervised Teaching (2)

Supervised tutoring in selected introductory courses. Students should have completed course 101A and 101B as preparation. Students submit petition to sponsoring agency.

PHYS 150 - Quantum Computing (5)

Basic concepts in quantum mechanics including quantum states, measurements, operators, entanglement, entanglement entropy, "no cloning" theorem, and density matrices. Classical gates, reversible computing, quantum gates. Several quantum algorithms including Deutsch's algorithm, Simon's algorithm, Shor's algorithm and the Grover algorithm. Quantum error correction. Adiabatic quantum computing.

Prerequisite: PHYS 5A; and PHYS 116A or MATH 21 or AM 10.

PHYS 155 - Solid State Physics (5)

Interatomic forces and crystal structure, diffraction, lattice vibrations, free electron model, energy bands, semiconductor theory and devices, optical properties, magnetism, magnetic resonance, superconductivity.

Prerequisite: Prerequisite(s): PHYS 112 and PHYS 139A; students with equivalent coursework may contact instructor for permission to enroll.

PHYS 156 - Applications of Solid State Physics (5)

Emphasizes the application of condensed matter physics to a variety of situations. Examples chosen from subfields such as semiconductor physics, lasers, superconductivity, low temperature physics, magnetism, and defects in crystals.

Prerequisite: Prerequisite(s): PHYS 101B or PHYS 102.

PHYS 160 - Practical Electronics (5)

Provides a practical knowledge of electronics that experimentalists generally need in research. The course assumes no previous knowledge of electronics and progresses according to the interest and ability of the class. Based on weekly lectures. However, with the aid of the instructor, the students are expected to learn mainly through the design, construction, and debugging of electronics projects. Students are billed a materials fee.

Prerequisite: Prerequisite(s): PHYS 5C and PHYS 5N or PHYS 6C and PHYS 6N.

PHYS 171 - General Relativity, Black Holes, and Cosmology

(5)

Special relativity is reviewed. Curved space-time, including the metric and geodesics, are illustrated with simple examples. The Einstein equations are solved for cases of high symmetry. Black-hole physics and cosmology are discussed, including recent developments.

Prerequisite: Prerequisite(s): PHYS 105, PHYS 110A, PHYS 110B, PHYS 116A, and PHYS 116B.

PHYS 180 - Biophysics (5)

Physical principles and techniques used in biology: X-ray diffraction; nuclear magnetic resonance; statistics, kinetics, and thermodynamics of macromolecules; viscosity and diffusion; DNA/RNA pairing; electrophoresis; physics of enzymes; biological energy conversion; optical tweezers.

Prerequisite: Prerequisite(s): PHYS 112; students who have a biochemistry background may contact instructor for permission. Restricted to juniors and seniors.

PHYS 182 - Scientific Communication for Physicists (5)

Explores the communication of physics to a wide range of audiences, including writing articles from the popular to the peer-reviewed level; critically analyzing the communication of scientific discoveries in the media; structuring the physics senior thesis; writing grant applications; assembling a personal statement for job and graduate school application; and assembling and critiquing oral presentations.

Prerequisite: Prerequisite(s): PHYS 133 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to junior and senior majors in physics, astrophysics, applied physics, or physics education.

PHYS 191 - Teaching Practicum (5)

Designed to provide upper-division undergraduates with an opportunity to work with students in lower division courses, leading discussions, reading and marking submissions, and assisting in the planning and teaching of a course.

Prerequisite(s): excellent performance in major courses; instructor approval required; enrollment restricted to senior physics majors.

PHYS 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar under faculty supervision. (See course 42.) Prerequisite(s): upper-division standing; submission of a proposal supported by a faculty member willing to supervise.

PHYS 199 - Tutorial (5)

Students submit petition to sponsoring agency.

PHYS 199F - Tutorial (2)

Tutorial

Graduate

PHYS 202 - Introduction to Teaching in Physics (1)

A practical introduction to working as a teaching assistant for undergraduate classes in physics, including both teaching laboratories and running discussion sections. The training includes topics in classroom climate and inclusivity, active learning, motivating students, office hours, information technology, grading, communication with the instructor, and handling difficult situations. Students engaged in teaching in the same quarter are encouraged to apply the lessons in their classes and return with feedback to be discussed. Required course for first year graduate students.

Prerequisite: Enrollment is restricted to graduate students.

PHYS 205 - Introduction to Research in Physics (2)

Introduction to current research opportunities at UCSC for graduate students. Topics include: elementary particle physics, condensed matter and solid state physics, high energy astrophysics, biophysics, and cosmology. Selected topics related to career development may also be included.

Prerequisite: Enrollment is restricted to graduate students or by permission of instructor.

PHYS 210 - Classical Mechanics (5)

Generalized coordinates, calculus of variations, Lagrange's equations with constraints, Hamilton's equations, applications to particle dynamics including charged particles in an electromagnetic field, applications to continuum mechanics including fluids and electromagnetic fields, introduction to nonlinear dynamics.

Prerequisite: Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 212 - Electromagnetism I (5)

Electrostatics and magnetostatics, boundary value problems with spherical and cylindrical symmetry, multipole expansion, dielectric media, magnetic materials, electromagnetic properties of materials, time-varying electromagnetic fields, Maxwell's equations, conservation laws, plane electromagnetic waves and propagation, waveguides and resonant cavities.

Prerequisite: Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 214 - Electromagnetism II (5)

Lorentz covariant formulation of Maxwell's equations, dynamics of relativistic charged particles and electromagnetic fields, scattering and diffraction. Topics in classical radiation theory: simple radiating systems radiation by moving charges, multipole radiation, synchrotron radiation, Cerenkov radiation, bremsstrahlung and radiation damping.

Prerequisite: Prerequisite(s): PHYS 212. Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 215 - Introduction to Non-Relativistic Quantum Mechanics (5)

Mathematic introduction; fundamental postulates; time evolution operator, including the Heisenberg and Schrodinger pictures; simple harmonic oscillator and coherent states; one-dimensional scattering theory, including S-matrix resonant phenomena; two-state systems, including magnetic resonance; symmetries, including rotation group, spin, and the Wigner-Eckart theorem; rotationally invariant problems, including the hydrogen atom; gauge invariance, including Landau levels; introduction to path integral.

Prerequisite: Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 216 - Advanced Topics in Non-Relativistic Quantum Mechanics (5)

Approximate methods: time-independent perturbation theory, variational principle, time-dependent perturbation theory; three-dimensional scattering theory; identical particles; permutation symmetry and exchange degeneracy, anti-symmetric and symmetric states; many-body systems and self-consistent fields: variational calculations; second quantized formalism, including Fock spaces/number representation, field operators and Green functions; applications: electron gas; quantization of the electromagnetic field and interaction of radiation with matter: absorption, emission, scattering, photoelectric effect, and lifetimes.

Prerequisite: Prerequisite(s): PHYS 215. Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 217 - Quantum Field Theory I (5)

Lorentz invariance in quantum theory, Dirac and Klein-Gordon equations, the relativistic hydrogen atom, Green functions and canonical approach to field theory, quantum electrodynamics, Feynman diagrams for scattering processes, symmetries and Ward identities. Students learn to perform calculations of scattering and decay of particles in field theory.

Prerequisite: Prerequisite(s): PHYS 216 or exception by permission of the instructor. Enrollment is restricted to graduate students or by permission of the instructor.

PHYS 218 - Quantum Field Theory II (5)

Path integral approach to quantum field theory. Theory of renormalization and the renormalization group, introduction to gauge theories and spontaneously broken field theories. Applications to the standard model of strong, weak, and electromagnetic interactions.

Prerequisite: Prerequisite(s): PHYS 217. Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 219 - Statistical Physics (5)

The basic laws of thermodynamics, entropy, thermodynamic potentials, kinetic theory of gases, quantum and classical statistical mechanics, virial expansion, linear response theory. Applications in condensed matter physics.

Prerequisite: Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 220 - Theory of Many-Body Physics (5)

Finite temperature Green functions, Feynman diagrams, Dyson equation, linked cluster theorem, Kubo formula for electrical conductivity, electron gas, random phase approximation, Fermi surfaces, Landau fermi liquid theory, electron phonon coupling, Migdal's theorem, superconductivity.

Prerequisite: Prerequisite(s): PHYS 216 and PHYS 219. Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 221A - Introduction to Particle Physics I (5)

First quarter of a two-quarter graduate level introduction to particle physics, including the following topics: discrete symmetries, quark model, particle classification, masses and magnetic moments, passage of radiation through matter, detector technology, accelerator physics, Feynman calculus, and electron-positron annihilation.

Prerequisite: Prerequisite(s): PHYS 217 or concurrent enrollment. Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 221B - Introduction to Particle Physics II (5)

Second quarter of a two-quarter graduate level introduction to particle physics, including the following topics: nucleon structure, weak interactions and the Standard Model, neutrino oscillation, quantum chromodynamics, CP violation, and a tour of the Stanford Linear Accelerator Center.

Prerequisite: Prerequisite(s): PHYS 221A; PHYS 217 or concurrent enrollment. Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 222 - Quantum Field Theory III (5)

Focuses on the theoretical underpinnings of the standard model, including the spontaneous symmetry breaking, the renormalization group, the operator product expansion, and precision tests of the Standard Model.

Prerequisite: Prerequisite(s): PHYS 218 and PHYS 221B. Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 224 - Particle Astrophysics and Cosmology (5)

Particle physics and cosmology of the very early universe: thermodynamics and thermal history; out-of-equilibrium phenomena (e.g., WIMPs freeze-out, neutrino cosmology, Big Bang nucleosynthesis, recombination); baryogenesis; inflation; topological defects. High-energy astrophysical

processes: overview of cosmic ray and gamma ray astrophysics; radiative and inelastic processes; astroparticle acceleration mechanisms; magnetic fields and cosmic ray transport; radiation-energy density of the universe; ultrahigh-energy cosmic rays; dark-matter models; and detection techniques. (Formerly Origin and Evolution of the Universe.)

Prerequisite: Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 226 - General Relativity (5)

Develops the formalism of Einstein's general relativity, including solar system tests, gravitational waves, cosmology, and black holes.

Prerequisite: Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 231 - Introduction to Condensed Matter Physics (5)

Crystal structures, reciprocal lattice, crystal bonding, phonons (including specific heat), band theory of electrons, free electron model, electron-electron and electron-phonon interactions, transport theory.

Prerequisite: Prerequisite(s): PHYS 216 or equivalent course or by permission of the instructor. Enrollment is restricted to graduate students only, or by permission of instructor.

PHYS 232 - Condensed Matter Physics (5)

Magnetism (para, ferro, anti-ferro, ferri), spin waves, superconductivity, introduction to semiconductors.

Prerequisite: Prerequisite(s): PHYS 231. Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 233 - Advanced Condensed Matter Physics (5)

A special topics course which includes areas of current interest in condensed matter physics. Possible topics include superconductivity, phase transitions, renormalization group, disordered systems, surface phenomena, magnetic resonance, and spectroscopy.

Prerequisite: Prerequisite(s): PHYS 231. Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 234 - Soft Condensed Matter Physics (5)

A selection of topics from: liquid crystals, biological systems, renormalization group and critical phenomena, stochastic processes, Langevin and Fokker Planck equations, hydrodynamic theories, granular materials, glasses, quasicrystals.

Prerequisite: Prerequisite(s): PHYS 219 and PHYS 232. Enrollment is restricted to graduate students.

PHYS 240 - Polymer Physics (5)

Statistical properties polymers. Scaling behavior, fractal dimensions. Random walks, self avoidance. Single chains and concentrated solutions. Dynamics and topological effects in

melts. Polymer networks. Sol-gel transitions. Polymer blends. Application to biological systems. Computer simulations demonstrating much of the above. Students cannot receive credit for this course and course 120.

Prerequisite: Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 242 - Computational Physics (5)

This course will apply efficient numerical methods to the solution of problems in the physical sciences which are otherwise intractable. Examples will be drawn from classical mechanics, quantum mechanics, statistical mechanics, and electrodynamics. Students will apply a high-level programming language such as Mathematica to the solution of physical problems and will develop appropriate error and stability estimates.

Prerequisite: Prerequisite(s): basic programming experience in C or Fortran. No previous experience with Mathematica is required. Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 251 - Group Theory and Modern Physics (5)

Finite and continuous groups, group representation theory, the symmetric group and Young tableaux, Lie groups and Lie algebras, irreducible representations of Lie algebras by tensor methods, unitary groups in particle physics, Dynkin diagrams, Lorentz and Poincaré groups.

Prerequisite: Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 290 - Special Topics (5)

A series of lectures on various topics of current interest in physics at UC Santa Cruz.

Prerequisite: Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 291A - Cosmology (2)

Intensive research seminar on cosmology and related topics in astrophysics: nature of dark matter; origin of cosmological inhomogeneities and other initial conditions of the big bang; origin and evolution of galaxies and large scale structure in the universe.

Prerequisite: Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 291B - X-rays and Magnetism (2)

Research seminar on x-ray studies of the properties and behavior of magnetic materials. Topics include: the underlying physical interactions, experimental techniques, and selected examples from current research. This course includes a visit to the Advanced Light Source in Berkeley.

Prerequisite: Enrollment is restricted to graduate students.

PHYS 291C - Developments in Theoretical Particle Physics (2)

Seminar on the current literature of elementary particle physics, ranging from strong and weak interaction phenomenology to Higgs physics, supersymmetry, and superstring theory. Students may present their own research results.

Prerequisite: Prerequisite(s): PHYS 218. Enrollment is restricted to graduate students.

PHYS 291D - Experimental High-Energy Collider Physics (2)

Seminar on current results in experimental high-energy particle physics. Topics follow recently published results, including design of experiments, development of particle detector technology, and experimental results from new particle searches, quantum chromodynamics, and properties of heavy flavor quarks.

Prerequisite: Enrollment is restricted to graduate students.

PHYS 291E - Applied Physics (2)

Intensive research seminar on applied physics and related topics in materials science, including semiconductor devices, optoelectronics, molecular electronics, magnetic materials, nanotechnology, biosensors, and medical physics. Students may present their own research results.

Prerequisite: Enrollment is restricted to graduate students.

PHYS 291F - Experimental High-Energy and Particle Astrophysics Seminar (2)

Survey of current research in experimental high-energy and particle astrophysics. Recent observations and development in instrumentation for x-rays, gamma rays, and neutrinos, and evidence for dark matter and other new particles. Students lead discussion of recent papers.

Prerequisite: Enrollment is restricted to graduate students.

PHYS 291G - Condensed Matter Physics Research Seminar (2)

Weekly seminar series covering topics of current interest in condensed matter physics. Local and external speakers discuss their work.

Prerequisite: Enrollment is restricted to graduate students.

PHYS 292 - Seminar (0)

Weekly seminar attended by faculty and graduate students. Directed at all physics graduate students who have not taken and passed the qualifying examination for the Ph.D. program.

Prerequisite: Enrollment is restricted to graduate students only, except by permission of instructor.

PHYS 292F - Seminar (2)

Seminar

PHYS 297A - Independent Study (5)

Enrollment restricted to graduate students only, except by permission of instructor.

PHYS 297B - Independent Study (10)

Enrollment restricted to graduate students only, except by permission of instructor.

PHYS 297C - Independent Study (15)

Enrollment restricted to graduate students only, except by permission of instructor.

PHYS 298 - Theoretical and Experimental Research Project (5)

Enrollment restricted to graduate students only, except by permission of instructor.

PHYS 299A - Thesis Research (5)

Enrollment restricted to graduate students only, except by permission of instructor.

PHYS 299B - Thesis Research (10)

Enrollment restricted to graduate students only, except by permission of instructor.

PHYS 299C - Thesis Research (15)

Enrollment restricted to graduate students only, except by permission of instructor.

POLI - POLITICS

Lower-Division

POLI 1 - Politics: Power, Principle, Process, and Policy (5)

Systematic introduction to the nature of politics and government, organized around the dynamic relationship between power, principle, and process in democratic politics. Provides historic and contemporary overview; explores the interactions among government, laws, and societies at the national and international levels.

POLI 3 - Keywords: Concepts in Politics (5)

Introduces key concepts in political discourse and key debates generated by contested terms such as powers, ideology, and multiculturalism. Students read from canonical texts, feminist scholarship, historical materials, and contemporary cultural and postmodernist writings.

POLI 4 - Citizenship and Action (5)

What does a citizen do? What kind of citizen activity is appropriate to democratic aspirations? Course uses political theory to answer these questions as they relate to current and historical events, primarily in the North American context. Draws on texts ranging from Aristotle, Locke, Thoreau, Ellison, and Ranciere, as well as present-day debates, to bear on the relationship of citizen action and identity.

POLI 17 - U.S. and the World Economy (5)

Explores intellectual and empirical trends shaping the U.S. relationship with the global economy. Traces debates about liberalism and interventionism, surveys post-war American foreign economic policy and discusses varieties of capitalism emerging around the world.

POLI 20 - American Politics (5)

Introduces the study of politics through an analysis of the United States political system and processes. Topics vary, but may include political institutions, public policies, parties and electoral politics, and social forces.

POLI 21 - Governing the Golden State (5)

Introduces key principles for understanding state politics in California and how power is mobilized for transformative change. Analyzes distinctive features of California's political development and culture in the governance of enduring social problems and policy dilemmas.

POLI 45 - Music and Politics in Contemporary Society (5)

Introduces music to the study of politics. Considers the fields of music and identity; music and social movements; and theories of music, art, and revolution.

POLI 46 - Africa in Global Perspective (5)

Explores interdisciplinary methods, theories, and practices involved in producing and reproducing knowledges about Africa and the West within global politics. Examines ideas of international relations, international political economy, development, military structures, cultural formations, and the state through the critical use of film, literature, and scholarly texts.

POLI 60 - Comparative Politics (5)

Introduces the study of politics through the analysis of national political systems within or across regions from the developing world to post-industrial nations. Typical topics include: authoritarian and democratic regimes; state institutions and capacity; parties and electoral systems; public policies; social movements; ethnic conflict; and globalization.

POLI 61 - Politics of Social Policy (5)

Introduces social policy around the world. Some countries provide free and good-quality health and education, as well as a minimum income to all citizens. Others, instead, provide meager benefits to few citizens.

POLI 70 - Global Politics (5)

Can common global interest prevail against particular sovereign desires? Surveys selected contemporary issues in global politics such as wars of intervention, ethnic conflict, globalization, global environmental protection, and some of the different ways in which they are understood and explained.

Upper-Division

POLI 101 - Introduction to Research Methods (5)

Overview of research methods and data analytic techniques used in politics. Through hands-on learning, students critically evaluate social research reports, conduct investigations, describe data, assess statistical relationships, and test hypotheses. Prepares students to conduct the in-depth research required in upper-division courses.

Prerequisite: Enrollment is restricted to sophomore, junior, and senior politics majors during first and second pass enrollment.

POLI 102 - Doing Research (5)

Introduction to conceptualizing and executing qualitative research in the social sciences. Qualitative methods are non-statistical modes of social inquiry, including case studies, interviews, and archival research. Research methods cannot be done in a passive way. Really understanding methodology requires Doing Research.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 103 - Feminist Interventions (5)

Situates ongoing debates around feminist theory and practice within the context of political theory, the role of the state, and the position of women in contemporary (predominantly Western) society. Engages with classical political theory, second wave feminism, and the role of the state on matters pertaining to pornography and prostitution.

Prerequisite: Enrollment is restricted to politics, legal studies, and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 105A - Ancient Political Thought (5)

Explores tensions between reason and revelation, justice and democracy, and freedom and empire through close readings of ancient texts. Emphasis on Athens, with Hebrew, Roman, and Christian departures and interventions. Includes Sophocles, Thucydides, Socrates, Plato, Aristotle, Stoics, the Bible, and Augustine.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 105B - Early Modern Political Thought (5)

Studies republican and liberal traditions of political thought and politics. Authors studied include Hobbes, Locke, and Rousseau. Examination of issues such as authorship, individuality, gender, state, and cultural difference.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 105C - Modern Political Thought (5)

Studies in 19th- and early 20th-century theory, centering on the themes of capitalism, labor, alienation, culture, freedom, and morality. Authors studied include J. S. Mill, Marx, Nietzsche, Foucault, Hegel, Fanon, and Weber.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 108 - Revolt, Rebellion, Revolution (5)

Examines revolt, rebellion, and revolution as ideas in political theory, and as prisms through which we can analyze historical events. Introduces works of political theory (historical and contemporary), and looks at historical events considered to be revolts and/or revolutions.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 110 - Law and Social Issues (5)

Examines current problems in law as it intersects with politics and society. Readings are drawn from legal and political philosophy, social science, and judicial opinions.

Prerequisite: Enrollment is restricted to politics, legal studies, and Latin American and Latino studies/politics combined majors during first and second pass enrollment only.

POLI 111A - Constitutional Law (5)

An introduction to constitutional law, emphasizing equal protection and fundamental rights as defined by common law decisions interpreting the 14th Amendment, and also exploring issues of federalism and separation of powers. Readings are primarily court decisions; special attention given to teaching how to interpret, understand, and write about common law.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during priority enrollment only.

POLI 113 - Feminism and the Body (5)

Introduces the literature on the history of the body. Explores the multiple ways in which the body, in the West, has been the site of cultural and political inscription from the Middle Ages to the 19th century. Topics may include: pornography, criminality, sexuality, art, race, and medicine.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 114 - Thinking Green: Politics, Philosophies, and Practices of Sustainability (5)

A course on the political and philosophical sources of ecological and social sustainability and how they affect and inflect the design, implementation, and practices of

sustainability. Asks whether they offer a realistic alternative to liberalism and other political and economic ideologies and practices. (Formerly Thinking Green: Politics, Ethics, Political Economy.)

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 115 - Foundations of Political Economy (5)

Examines how ideas about labor, rights, exchange, capital, consumption, the state, production, poverty, luxury, morality, procreation, and markets were woven in political-economic discourse from 1690-1936. Readings include Locke, Mandeville, Smith, Malthus, Mill, Hegel, Marx, Lenin, and Veblen. Particular focus given to theoretical origins of and justifications for poverty and implications of economic interdependence for politics.

Prerequisite: Prerequisite(s): POLI 105B, POLI 105C, or POLI 120C. Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 117 - Manufactured Truth and Narratives of Power (5)

Introduction to techniques used to produce power, notably by manufacturing and distorting truth from overt propaganda to public relations or advertising. Each week will focus on one conceptual apparatus used to frame reality, its related techniques and strategies as well as its economic, social or political objectives. Frameworks will include bureaucratic rationality, totalitarian propaganda, colonial mythology, state euphemism, "democratic" story-telling, conspiracy theories, branding, and green-washing. Enrollment by permission of instructor.

POLI 118 - Critical Political Thought and Critical Theory (5)

Course uses a multidisciplinary approach to the study of politics through significant contemporary authors and approaches in critical theory. Topics include: democracy action, violence, subjectivity, identity, power and resistance, the body, political economy, and post-colonialism. (Formerly Topics in Contemporary Political and Critical Theory.)

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 120A - Congress, President, and the Court in American Politics (5)

Study of political development, behavior, performance, and significance of central governmental institutions of the U.S. Emphasizes the historical development of each branch and their relationship to each other, including changes in relative power and constitutional responsibilities.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 120B - Society and Democracy in American Political Development (5)

Examines the role of social forces in the development of the American democratic processes and in the changing relationship between citizen and state. Course materials address the ideas, the social tensions, and the economic pressures bearing on social movements, interest groups, and political parties.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 120C - State and Capitalism in American Political Development (5)

Examines the relationship between state and economy in the U.S. from the 1880s to the present, and provides a theoretical and historical introduction to the study of politics and markets. Focus is on moments of crisis and choice in U.S. political economy, with an emphasis on the rise of regulation, the development of the welfare state, and changes in employment policies.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 122 - Politics, Labor, and Markets (5)

Examines political and social dimensions of recent transformations in the U.S. labor market. Includes classical and contemporary theoretical debates over the nature and functions of work under capitalism. Focuses on shifts in the organization and character of work in a globalizing economy. Addresses recent trends in low-wage and contingent work, job mobility and security, and work/family relations. Includes attention to the roles and responses of business, labor, and government. (Formerly Politics, Labor, and Markets in the U.S.)

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined major during first and second pass enrollment.

POLI 121 - Race & Justice in America (5)

Examines how "race" is forged as a distinctive concept and logic of governance in American Politics; Undercurrents of racial reasoning in transcendent notions of "justice" in the U.S. are traced from the nation's founding into the 21st century.

Prerequisite: Enrollment is restricted to politics majors during first and second pass enrollment.

POLI 124 - Economic Inequality in America (5)

Examines the sources and implications of economic inequality in the United States. Explores theories of social class and its intersections with race and gender inequalities. Focuses on the role of politics and public policies in diminishing and/or exacerbating income and wealth inequalities.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 125 - Political Organizations in American Politics (5)

Introduces the literature on interest groups and attempts to answer the question: Do such groups promote or hinder American democracy? Class readings and lectures review and assess the participation of interest groups in the electoral process and in Congress, the executive branch, and the courts. Pays particular attention to the role business and environmental groups play in American politics and policy.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 127 - Parties and Partisanship in American Politics (5)

Explores several important topics in the study of parties and partisanship in American politics; for example, the development of the party system, parties as organizations, parties in government, parties in the electorate, polarization, partisan identification, and state-level variation.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 128 - American Elections and Voting Behavior (5)

Introduces key concepts pertaining to voting, elections, and political behavior in the United States. Several topics are covered, such as campaigns, electoral institutions, reform, political participation (including but not limited to voting), presidential and congressional elections, partisan identification, and polling.

Prerequisite: Enrollment is restricted to politics majors and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 129 - Policies and Politics of American Defense (5)

Examines the evolution of the policy and politics of American national security, from the Cold War to the present. Content of military policy explored with analytic focus on formation of policy and interactions between military policies and domestic policies.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 132 - California Water Law and Policy (5)

Explores the rich history and fundamental legal concepts surrounding water in California. Students identify, evaluate, and debate some critical water policy questions faced by Californians today and in the future.

POLI 134 - Congress: Representation and Legislation (5)

Examines the United States Congress and the nature of the representative and legislative processes. Topics include:

districting and elections; bicameralism; party organization; institutional and behavioral influences on legislative action; and the efficacy of Congress as a legislative body. Focuses on the contemporary Congress with comparisons to other legislative and representative institutions. (Formerly Congress: Representation and Legislation in Comparative Perspective.)

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 135 - Immigration Policy and Debate in the U.S. (5)

Course charts the history of immigration policy and debate in the U.S., highlighting the ways economic, social, and geopolitical factors influenced the processes and outcomes of immigration debate and policy making. Focuses on interaction between society and state in formulation and implementation of immigration policy, and the ways policy outcomes may differ from expectations.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 136 - Applied Public Policy (5)

Focuses on the application of theory to practice by creating an opportunity for students to explore and analyze the connections between federal, state, and local policies and their impacts on day-to-day programs in the Santa Cruz community and region.

Prerequisite: Enrollment is restricted to junior and senior politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 136F - Applied Public Policy Internship (2)

This internship in governmental, public policy, and advocacy organizations and leaders in the Santa Cruz area requires a minimum of 50 hours with an assigned field study organization, a field journal, and limited classroom work.

Prerequisite: Prerequisite(s): POLI 136. Enrollment is restricted to politics and Latin America and Latino studies majors.

POLI 140A - European Politics (5)

Explores the political and economic systems of advanced industrialized societies. In addition to specific comparisons between the countries of western Europe and the United States, covers important themes and challenges, including immigration, globalization, and the crisis of the welfare state. (Formerly Politics of Advanced Industrialized Societies.)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 140C - Latin American Politics (5)

Overview of major approaches to the study of Latin American politics. Introductory survey of historical and contemporary democratic populist, authoritarian, and revolutionary regimes.

Special attention is given to region's recent transitions toward democratic rule, market-based economic models, and decentralized governance. Evaluates institutional arrangements (including presidentialism, electoral rules and party systems), as well as a variety of social movements and strategies of resistance among subaltern social groups and classes.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 140D - Politics of East Asia (5)

Explores the political development of East Asia's primary democracies: Japan, South Korea, and Taiwan. Examines the historical origins of these states, the process through which they emerged from authoritarian roots, and topics such as protest, corruption, and women's political roles.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 141 - Politics of China (5)

Introduces themes of Chinese politics from 1949 to present, including: the establishment and substantial dismantling of socialism; movements and upheavals, such as the Cultural Revolution and 1989; and issues, such as Hong Kong and Tibet. Surveys current institutions, leaders, and policies.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 142 - Russian Politics (5)

Historical-political survey of Russia within the U.S.S.R. is followed by examination of the 1991 revolution, the attempt to recover a national identity and establish a unified Russian state. Highlighted in this course are cultural and political factors central to the Russian experience: personalistic modes of political organization, a remote and corrupt state apparatus, collectivist forms of thought and self-defense.

POLI 143 - Comparative Post-Communist Politics (5)

Comparative study of revolutionary transformations of East European, Soviet, and former Soviet nations to post-Communist political orders. Focus on reemergence of political society, social and economic problems of transition, and maintenance of many cultural norms and authority patterns associated with previous regime.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 144 - Andean Politics (5)

Examines similar political trends in four Andean countries: Bolivia, Colombia, Ecuador, and Peru. Trends include mobilization of indigenous populations, breakdown of traditional party systems, and reconstruction efforts in post-conflict environments. Students who have taken prior courses

in Latin American politics, including course 140C, will be best prepared for this course.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 146 - The Politics of Africa (5)

Comparative study of contemporary sub-Saharan African states. Selected issues and countries. Internal and external political institutions and processes are studied in order to learn about politics in contemporary Black Africa and to learn more about the nature of politics through the focus on the particular issues and questions raised by the African context.

Prerequisite: Enrollment is restricted to politics majors during first and second pass enrollment.

POLI 147 - The Politics of Territorial Conflict (5)

Examines the phenomenon of territorial conflict within countries. Focuses on territorial cleavages that occur when minority groups are geographically concentrated within particular territories, and emphasizes attempts to accommodate these cleavages through measure like autonomy, federalism, and decentralization.

POLI 148 - Social Movements (5)

Overview of social movements by analysis of specific theories and examples. Course connects the study of theories and movements to larger political processes. Topics may include: New Social Movement theory; gender and social movement; democratic, historical, transnational, global and/or local social movements.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 149 - Democratic Transitions (5)

Explores democratization processes from a variety of historical and geographical perspectives. Examines the role of foreign influences, economic development, civil society, elites, and institutions in the transition and consolidation of democratic systems.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics majors during first and second pass enrollment.

POLI 151 - Politics of Law (5)

Uncovers the important debates in politics and law around the functions of courts, litigation, and rights--and the political nature of law itself. Course is interdisciplinary, and draws from literature in political science, law, and sociology.

Prerequisite: Enrollment is restricted to politics, legal studies, and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 152 - Middle East Politics (5)

Investigates the evolution of the Arab nationalist state, from decolonization to the uprisings of 2010-2011. Examines the changes and continuities in Middle Eastern politics over the past 60 years by focusing on questions of violence, political economy, and culture.

Prerequisite: Prerequisite(s): POLI 60 or POLI 65 or POLI 70. Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 153 - Urban Politics (5)

Provides an introduction to issues and challenges facing cities in the U.S. and abroad, as well as the policy remedies available to government and the private sector. The first part of the course provides the foundations to the study of urban politics by examining core questions in local government institutions and urban coalitions. The second part of the course examines urban policies in a variety of areas, such as growth, redevelopment, housing, and poverty.

POLI 154 - The Philippines and the World (5)

Introduces students to the histories, societies, and politics of the Philippines. Surveys major historical eras, and treats topics such as the state, revolts and revolution, labor, religion, the environment, martial law.

POLI 160A - Theories of International and World Politics (5)

Examination of analytical perspectives on international and world politics, international and global political economy, war and conflict, corporations and civil society. Explores theoretical tools and applications, recurring patterns of global conflict and cooperation, the nexus between domestic politics, foreign policy and international and world politics. This is not a current events course. (Formerly International Politics.)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 160B - International Law (5)

Origins and development of international law: international law is examined both as a reflection of the present world order and as a basis for transformation. Topics include state and non-state actors and sovereignty, treaties, the use of force, and human rights. (Formerly course 173.)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 160C - Security, Conflict, Violence, War (5)

Genesis and theories of conflict and war and their avoidance (past, present, future). Relationship between foreign policy and intra- and interstate conflict and violence. National security and the security dilemma. Non-violent conflict as a normal part of politics; violent conflict as anti-political; transformation of conflict into social and interstate violence. Interrelationships among conduct of war, attainment of

political objectives, and the end of hostilities. Civil and ethnic wars. Political economy of violence and war.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 160D - International Political Economy (5)

Introduction to the politics of international economic relations. Examines the history of the international political economy, the theories that seek to explain it, and contemporary issues such as trade policy, globalization, and the financial crisis. (Formerly course 176.)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

POLI 161 - Foreign Relations of China (5)

Explores China's rising international power and the implications thereof. Special emphasis on China's interactions with the United States and related issues (Korea, Taiwan, the South China Sea). Also addresses China's dealings with South Asia, Southeast Asia, Africa, Japan, international organizations, and more.

Prerequisite: Enrollment is restricted to politics and politics/Latin American and Latino studies combined majors during first and second pass enrollment.

POLI 163 - U.S. Foreign Policy (5)

Provides overview of U.S. foreign policy formulation; considers how U.S. political culture shapes foreign policy; examines governmental actors involved: the president, executive branch agencies, and Congress; then considers non-governmental actors: the media, interest groups, and public opinion.

Prerequisite: Enrollment is restricted to politics and politics/Latin American and Latino studies combined majors during first and second pass enrollment.

POLI 165 - Global Organization (5)

Addresses whether and how global organizations are changing the international system. Examines multilateral institutions, regional organizations, and nonstate actors. Overriding aim is to discern whether these global organizations are affecting the purported primacy of the state.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 166 - Politics of Migration (5)

Examines the magnitude and the political, economic, cultural, environmental, and social impact of today's movement of millions of people within and amongst states.

Prerequisite: Enrollment is restricted to politics majors and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 167 - Politics of International Trade (5)

Examines key issues in international trade, including the distribution of gains, fair trading practices, and preferential trade agreements. Focuses on the political dimensions of trade, the rules of the international trade system, and conflicts within countries that international trade generates.

Prerequisite: Enrollment is restricted to politics, and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 168 - Topics in International Relations and Global Politics (5)

Examines contemporary issues in international relations, global politics, and global political economy through theoretical and applied frameworks, program assessment, sectoral and structure analysis, and across levels of analysis.

Prerequisite: Prior enrollment in POLI 160A is recommended, but not required. Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 169 - Politics of Development (5)

Introduces the politics of development. Examines the theories, history, and economics of development. Analyzes several contemporary issues. Readings include contemporary writings in the field and classical works on theoretical approaches.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 172 - Liberalism, the State, and the War on Terror (5)

Examines the relation between the liberal State and perceived challenges to State sovereignty posed by transnational terrorism. How does terrorism as both a symbol and empirical phenomenon fit within the horizon of liberal ideology? What claim to sovereignty does the State make in the face of acts of terror? What political logic is required in/for a War on Terror? Students may not take both course 72 and this course for credit in the major.

Prerequisite: Enrollment is restricted to politics and politics/Latin America and Latino studies majors during first and second pass enrollment.

POLI 174 - Global Political Ecology (5)

Explores the global dimensions of complex environmental issues such as climate change, biodiversity, deforestation, and fisheries: how they are produced, how they manifest, and how they are governed in response.

Prerequisite: Enrollment is restricted to politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 175 - Human Rights (5)

Embraces an interdisciplinary approach to the study of human rights. Captures the malleable nature of human rights and the contours of its dual role as both law and discourse.

Prerequisite: Enrollment is restricted to politics and legal studies majors during first and second pass enrollment. Prior coursework in International Law (POLI 160B / LGST 160B) is recommended.

POLI 176 - Surveillance Society, Politics, and You (5)

Examines the growing role and presence of surveillance in the United States and around the world; the ways in which data are being collected and analyzed; and the transformation of bodies into binary digits.

Prerequisite: Enrollment is restricted to sophomore, junior, and senior politics and Latin American and Latino studies/politics combined majors during first- and second-pass enrollment.

POLI 182 - The Power to Punish (5)

Interrogates the presuppositions of punishment as legitimate state power. Decentering crime as punishment's conceptual predicate, wider analysis of the penal state's social-scientific, jurisprudential, and philosophical foundations force us to ask: What is punishment? Why punish? How, and whom, to punish?

Prerequisite: Enrollment is restricted to politics majors during first and second pass enrollment.

POLI 184 - Shariah and Political Thinking: Law and Politics in Modern Islamic Thought (5)

What defines just political rule in Islam? How do modern Muslim thinkers conceive the role of Islamic normative guidelines (Shariah) in the context of secular modern nation-states? Course surveys how major trends in modern Islamic thought try to answer this question.

Prerequisite: Enrollment is restricted to politics majors during the first and second pass enrollment.

POLI 185 - Political Psychology (5)

Provides a broad introduction to the growing interdisciplinary field of political psychology. Focuses on and critically analyzes classic and contemporary psychological perspectives, primarily through original sources. Draws upon theoretical ideas and experimental results to understand political actors, events, and processes.

Prerequisite: Enrollment is restricted to politics and combined politics and Latin America and Latino studies majors during first and second pass enrollment.

POLI 190B - Humanity, Sovereignty, and War (5)

Examines how enmity, the state, and war serve as limits for political conceptions of who we are, tensions between commitments to diversity and to peace, and liberal and humanitarian efforts to address these tensions. Students

examine works written prior to the liberal period (Hobbes), in response to it (Hegel and Schmitt) and finally a 20th-century liberal revival (Rawls), and discuss rights, conscience, political obligation, war, and the state.

Prerequisite: Prerequisite(s): two of the following: POLI 103, POLI 105A, POLI 105B, POLI 105C, POLI 105D, POLI 107, POLI 109, or POLI 115. Enrollment restricted to senior politics and Latin American and Latino studies/politics combined majors.

POLI 190C - Postcolonial Visions of Liberation (5)

How do postcolonial thinkers conceive of freedom and equality in the wake of a colonialism that irreversibly reshaped their modes of life? Course closely reads central works of postcolonial theory to examine how they address this question. (Formerly Humanitarian Action in World Politics.)

Prerequisite: Enrollment is restricted to senior politics and politics/Latin American and Latino studies combined majors.

POLI 190D - Early Anarchist and Socialist Thought (5)

Studies in 19th- and early 20th-century anarchist and socialist thought. Themes covered include property, labor, marriage, and the state. Readings drawn from Bakunin, Goldman, Fourier, Kropotkin, Perkins-Gilman, Proudhon, and Stirner.

Prerequisite: Prerequisite(s): two of the following: POLI 103, POLI 105A, POLI 105B, POLI 105C, POLI 105D, POLI 109, or POLI 115; or by permission of instructor. Enrollment is restricted to senior politics majors.

POLI 190E - Transitions (5)

Explores the role of new media in political protest; whether and how new media technologies such as social networking, text messaging, Twitter, and YouTube have changed the way opposition movements develop. (Formerly Transitions in the Information Age.)

Prerequisite: Enrollment is restricted to senior politics and Latin America and Latino studies/politics combined majors.

POLI 190F - Topics in Urban Governance (5)

Cities are at the frontlines of complex global issues including climate change, international terrorism, and transnational migration. Course situates cities in the dynamics of world politics, and explores the possibilities and prospects of global urban/global governance in the 21st Century.

Prerequisite: Enrollment is restricted to senior politics and Latin American and Latino studies/politics combined majors.

POLI 190G - Issues in International Law (5)

Explores theory and reality of international law; how it determines or governs or modifies policies of government. Emphasis on contemporary political and economic forces and international law in nuclear age, competing areas for new law, law of seas, human rights, new international economic issues, the environment.

Prerequisite: Enrollment is restricted to senior legal studies, politics, and Latin American and Latino studies/politics combined majors.

POLI 190H - The Substance of Democracy (5)

What is democracy? How can we identify it? How do we understand and identify political participation? What are the factors behind it? What role does protest have in democratic politics? These and similar questions are addressed in this course that focuses on topics of democratic politics in the United States and abroad.

Prerequisite: Enrollment is restricted to senior politics and combined politics/Latin American and Latino studies majors.

POLI 190J - Politics and Inequality (5)

Considers causes and consequences of inequality in modern societies. Emphasizes empirical analysis of contemporary forms of class, racial, and gender inequality and examination of normative theories of distributive justice. Major restrictions lifted during open enrollment.

Prerequisite: Enrollment is restricted to senior politics and Latin American and Latino studies/politics combined majors.

POLI 190L - Poverty Politics (5)

Examines theoretical, historical, and contemporary sources of poverty policies in the United States. Explores competing theories of the causes of poverty and the consequences of social provision. Focuses on successive historical reform efforts and contemporary dilemmas of race and urban poverty, gender and family poverty, work, and the politics of welfare reform.

Prerequisite: Enrollment is restricted to senior politics and Latin American and Latino studies/politics combined majors.

POLI 190M - Politics in American States (5)

State governments affect the lives of Americans every day. This course examines an array of issues pertaining to state politics, such as the foundations of American federalism, institutional organization, elections, political parties, direct democracy, and policy-making.

Prerequisite: Enrollment is restricted to senior politics and combined politics/Latin American and Latino studies majors.

POLI 190N - Problems and Solutions in U.S. Politics (5)

Examines problems and potential solutions to issues in U.S. politics, such as presidential power, partisan polarization, money in elections, foreign and security policy, civil rights and liberties, and taxation and spending.

Prerequisite: Enrollment is restricted to senior politics and Latin American and Latino studies/politics combined majors.

POLI 190O - Constitutional Meanings and Movements: Exploring the Ideas, Laws, and Politics in Social Change (5)

Explores how civic groups and social movements have confronted and shaped constitutional rights, equality, and

power. Examines a range of U.S. movements from the 18th Century to the 21st Century-era of Marriage Equality, Tea Party, and Dreamer movements.

Prerequisite: Enrollment is restricted to senior politics majors and Latin American and Latino studies/politics combined majors.

POLI 190P - Race: History of a Concept (5)

Examines how we came, by the late 19th century, to classify humanity into racial categories. In an effort to trace emergence of this very modern phenomenon, explores historical shifts that informed Europe's representation of cultural difference from the writings of ancient Greeks to the social Darwinism of 19th-century Britain.

Prerequisite: Enrollment is restricted to senior politics and Latin American and Latino studies/politics combined majors.

POLI 190Q - Theorizing Modernity (5)

Introduces central categories and material implications that underwrite discourses on modernity since the late 18th century. Students read across the disciplines in fields such as political theory, postcolonialism, history, science studies, anthropology, and feminist criticism.

Prerequisite: Prerequisite(s): any two of the following courses: POLI 105A, POLI 105B, POLI 105C, POLI 105D. Enrollment is restricted to senior politics and Latin American and Latino studies/politics combined majors during first and second pass enrollment.

POLI 190R - Comparative Law and Society (5)

Interdisciplinary investigation into functions of law across political, historical, and cultural contexts. Examines the international and comparative turn in public law scholarship and the role of law-based strategies in state building. Reviews literature in law, political science and legal anthropology.

Prerequisite: Prerequisite(s): POLI 160B. Enrollment is restricted to senior politics and Latin American and Latino studies/politics combined majors.

POLI 190T - Governance and Conflict in East Asia (5)

Students read recent books on East Asian countries that engage the long-standing themes of state power and societal resistance.

Prerequisite: Prerequisite(s): POLI 141 or POLI 161 or POLI 109, or by permission of instructor. Enrollment is restricted to senior politics majors.

POLI 190V - States in the Global South (5)

Focuses on the causes and consequences of state capacity in the global south, asking why states are much stronger in some countries than others and how their relative strength affects important substantive outcomes, including democracy, development, and security. (Formerly Problems in Latin American Politics.)

Prerequisite: Enrollment is restricted to juniors and seniors politics majors.

POLI 190W - Topics in Latin American Politics (5)

Examines how Latin American governments function and what major challenges countries in the region are facing. Focuses on democracy, economic development, gender and indigenous politics, social policies, poverty, and inequality.

Prerequisite: Enrollment is restricted to senior politics majors.

POLI 190Z - International Security (5)

Examination of selected issues, controversies, and theories relevant to security between and among nations. Topics vary, but may include: war, peace, nuclear proliferation, arms control, military and foreign policies, alternative conceptions of security.

Prerequisite: Enrollment is restricted to senior politics and Latin American and Latino studies/politics combined majors .

POLI 193 - Field Study in Politics (5)

Individual studies undertaken off campus with direct faculty supervision. Students submit petition to sponsoring agency.

POLI 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Various topics to be announced before each quarter. Students submit petition to sponsoring agency.

POLI 194F - Group Tutorial (2)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Various topics to be announced before each quarter. Students submit petition to sponsoring agency.

POLI 195A - Senior Thesis (5)

Preparation of a senior thesis over two or three quarters, beginning in any quarter. The grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency.

POLI 195B - Senior Thesis (5)

Preparation of a senior thesis over two or three quarters, beginning in any quarter. The grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency.

POLI 195C - Senior Thesis (5)

Preparation of a senior thesis over two or three quarters, beginning in any quarter. The grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students submit petition to sponsoring agency.

POLI 198 - Independent Field Study (5)

Individual studies undertaken off-campus for which faculty supervision is not in person (e.g. supervision is by

correspondence). Students submit petition to sponsoring agency.

POLI 198F - Independent Field Study (2)

Individual studies undertaken off-campus for which faculty supervision is not in person, but by correspondence. Students submit petition to sponsoring agency.

POLI 199 - Tutorial (5)

A student normally approaches a member of the staff and proposes to take a course 199 on a subject he or she has chosen which is not offered in other politics courses. Students submit petition to sponsoring agency.

POLI 199F - Tutorial (2)

A student normally approaches a member of the faculty and proposes to take a course 199 on a subject he or she has chosen which is not offered in other politics courses. Students submit petition to sponsoring agency.

Graduate

POLI 200A - Political and Social Thought Core Seminar (5)

Draws on history of political thought, contemporary social and critical theory, and the contributions of legal and institutional analysis of various kinds to engage in critical study of political practices that are experienced or understood as in some way limiting, oppressive, or wrong; to transform our understanding of these practices; to see their contingent conditions; and to articulate possibilities of governing ourselves differently. (Formerly Interpretive Problems in Political Theory: Language and Power.)

Prerequisite: Enrollment is restricted to graduate students.

POLI 200B - Social Forces and Political Change Core Seminar (5)

Concerns transformation of social forces into political ones. Focuses on formation, articulation, mobilization, and organization of political interests and identities, their mutual interaction, and their effects on state structures and practices and vice versa. Major themes are 1) social bases of political action: class, gender, race, and other determinants of social division and political identity and 2) relevant forms of political agency and action, including development of political consciousness and representation of interests and identities in the public sphere.

Prerequisite: Enrollment is restricted to graduate students.

POLI 200C - States and Political Institutions Core Seminar (5)

Introduces study of political institutions as instruments of collective decision making and action. Explores alternative theoretical approaches to development of political institutions, state and political economy, and security dilemmas.

Prerequisite: Enrollment is restricted to graduate students.

POLI 200D - Political Economy Core Seminar (5)

Introduction to the theories and methodologies of political economy. Focuses on the relationship between states and markets and considers the politics of economic choices and institutions germane to both national and global political institutions. Addresses origins and development of markets and capitalism; historical evolution of states and their economies; relationship between labor, capital, production, and consumption; regulation of production; macroeconomics and management of economies; and issues of national and global social welfare.

Prerequisite: Enrollment is restricted to graduate students.

POLI 201 - Logics of Inquiry (5)

Investigates approaches to study of politics and to enterprise of social science in general. Works from positivist, interpretive, historical, and critical approaches provide examples held up to critical and epistemological reflection.

Prerequisite: Enrollment is restricted to graduate students.

POLI 202 - Fundamentals of Political Research (5)

Gives students practical tools to transform research questions into viable and well-crafted research designs. Introduces conceptual development, various forms of data, and rules for case selection. The goal is to train students in a range of specific methods, including interviewing, ethnography, and archival work.

Prerequisite: Enrollment is restricted to graduate students.

POLI 203 - Making of the Modern (5)

Introduces, at the graduate level, some of the central conceptual categories and material implications that underwrite the world of the modern. Explores concepts including the individual, historicism, contract, and objectivity.

Prerequisite: Enrollment is restricted to graduate students.

POLI 204 - Bodies in History (5)

The human body has been productive of a wide range of varied and competing discourses. Among the themes covered are sexuality, hygiene, the grotesque, and criminality.

Prerequisite: Enrollment is restricted to graduate students.

POLI 205 - Critical Perspectives on Classical Political Economy (5)

Explores seminal works in classical political economy, particularly its consolidation at the moment that industrial society emerged from commercial society, as demonstrated in the writings of Bernard Mandeville, Adam Smith, and Thomas Malthus.

Prerequisite: Enrollment is restricted to graduate students.

POLI 207 - Political Economies of Affect (5)

Explores the potential in philosophical precursors to recent affect theory, alongside classical political economy and its

critics, to develop an alternative epistemology for political economy. Readings include: Aristotle, Spinoza, Deleuze, Hume, Negri, Hardt, Smith, Bergson, and Marx.

Prerequisite: Enrollment is restricted to graduate students.

POLI 208 - Race (5)

Considers the subject of race and racism from a political and historical perspective appealing to literatures from history, anthropology, science, and literary studies.

Prerequisite: Enrollment is restricted to graduate students.

POLI 209 - Radical Political Thought (5)

Focuses on early 19th- through early 20th-century socialist and anarchist thought, excluding Marx. Theorists studied include Saint-Simon, Fourier, Proudhon, Stirner, Bakunin, Kropotkin, Perkins Gilman, and Goldman. Some secondary literature and related contemporary theory is also treated.

Prerequisite: Enrollment is restricted to graduate students.

POLI 210 - Problems of Democracy in Comparative Perspective (5)

Democracy is an essential political concept, and a fundamentally contested one. Since the 1980s, scholars of comparative politics have attempted to explain why and when countries transition from authoritarianism to democratic institutions. However, regime change at the national level only sets the stage, leaving deeper questions about what democracy means in practice--how it plays out (or is undermined) throughout the state and at subnational levels; whom it includes and excludes; what options it opens; and what possibilities it forecloses. Such questions relate debates about the potential and the limitations of democracy in general.

Prerequisite: Enrollment is restricted to graduate students.

POLI 211 - Making and Unmaking Sovereignty (5)

Focuses on questions of sovereignty. Of what does sovereignty consist? How is it secured, proclaimed, and perpetuated? How is it insecure, contingent, and subject to contestation? How is the idea of individual sovereignty related to the idea of the sovereignty of the state? Our aim is less to answer these questions definitively than to explore them and understand how theorists (historical and contemporary) have explored them, and how different historical episodes illuminate them.

Prerequisite: Enrollment is restricted to graduate students.

POLI 213 - Who Governs the Globe? Exploring Agency and Authority in Contemporary World Politics (5)

Addresses the role of non- and sub-state actors in global governance. Explores the concept of agency in world politics, and the conditions under which these actors acquire global agency in contemporary world politics. Introduces various theoretical perspectives with which to identify and evaluate agency, with a focus on alternative sources of authority, identity, and power.

Prerequisite: Enrollment is restricted to graduate students.

POLI 214 - Thinking Green: Politics, Ethics, Political Economy (5)

Green political thought, philosophy, debates, and practices; history of ecological thought and comparative study of competing ideas and proposals. Critical examination of neo-liberal environmentalism.

Prerequisite: Enrollment is restricted to graduate students.

POLI 222 - Conflict and Change in American Politics and Policy (5)

Explores the dynamic and contested interaction between politics and policy in the U.S. context, through examining the historical development of key contemporary policy debates and political conflicts. Introduces recent scholarship, drawing on history, sociology, and political economy that has challenged traditional behavioralist approaches to understanding American politics and policy development.

Prerequisite: Enrollment is restricted to graduate students.

POLI 223 - Topics in American Political Development (5)

Explores several important topics that have emerged from the renewed interest in political development, and are visible within its scholarship in American Political Development; for example, state-building, institutional change, representation, culture, participation, political identity, and economic and social transformations.

Prerequisite: Enrollment is restricted to graduate students.

POLI 232 - United States Political History (5)

Covers several important themes and sets of readings from the literature on American political development. Topics include the origins and development of American political institutions, the evolution of democratic mechanisms, the rise and fall of social movements, and debates about the sources of policy regimes and political change, including the role of war.

Prerequisite: Enrollment is restricted to graduate students.

POLI 243 - Comparative Methods (5)

Introduces the comparative method in social science. Trains students in the use of this method by examining how scholars have used it to compare across national governments, subnational units, public policies, organizations, social movements, and transnational collective action.

Prerequisite: Enrollment is restricted to graduate students.

POLI 245 - Latin American Politics (5)

Surveys the Latin American political literature by studying: 1) critical moments in political development (e.g., state formation, democratization); 2) important political institutions (e.g., presidentialism, party, and electoral systems); and 3) influential political actors (e.g., unions, business associations, social movements).

Prerequisite: Enrollment is restricted to graduate students.

POLI 247 - Comparative Urban Politics (5)

Focuses on local government structures and the relationships with other levels of government. Examines institutions and administration; urban political economy (fiscal strain, poverty, inequality, and the efforts to attract economic investment); political machines; race and ethnicity.

Prerequisite: Enrollment is restricted to graduate students.

POLI 249 - Politics of Protest (5)

Explores topics related to protest and political participation from theoretical and empirical perspectives.

Prerequisite: Enrollment is restricted to graduate students.

POLI 255 - Comparative Anti-Colonialisms (5)

Political thought of anti-colonial movements in comparative, historical perspective, including 18th- to 20th-Century European colonies of America and Asia. Focuses both on the contemporary political thought of these movements as well as on historiographical approaches of secondary literature.

Prerequisite: Enrollment is restricted to graduate students.

POLI 257 - Women Interpret Islam (5)

Examines how prominent female Muslim thinkers have interpreted the Islamic tradition since the early 20th century. It surveys how thinkers who belonged to different intellectual traditions (liberal, Marxist, Islamist, feminist, etc.) engaged Islamic exegetical, legal, philosophical, theological and mystical traditions to find answers to the questions raised by their historical and sociopolitical contexts. These questions included: What is/are the Islamic understanding(s) of the purpose of individual and collective lives? What does freewill mean in Islam, and what is its relationship to responsibility towards oneself and one's community? Is there an Islamic notion of justice, and how does it relate to the way justice is defined by other intellectual traditions? What are the legitimate ways of exercising social and political authority to establish the Islamic vision(s) of the good life? How is establishing that vision related to the notion of jihad (striving in the path of God)? What implications does that vision, and its concomitant notions of justice and freewill, have on developing an Islamic understanding of the relationship between different genders, classes, and human groups?

Prerequisite: Enrollment is restricted to graduate students.

POLI 261 - Key Issues in Contemporary Chinese Politics (5)

Addresses topics ranging from the core institutions of the party-state to local politics, economic governance, and state-society interactions in multiple realms. Considers China in its own terms while evaluating the relevance of theoretical concepts from various fields in the social sciences. Aims to identify opportunities for new research projects.

Prerequisite: Enrollment is restricted to graduate students.

POLI 270 - Advanced Topics in Global Environmental Governance: Agency Beyond the State (5)

Explores if, how, and under what conditions agency and power are diffusing away from the state to non-state actors such as, NGOs/civil society, corporations, and international organizations.

Prerequisite: Enrollment is restricted to graduate students.

POLI 271 - Global Politics and Geo-Politics (5)

Explores global politics in relation to geo-political formations that are developing in concert with contemporary crises in capitalist globalization, but which are also shaped by a wide range of intersecting racial, sexual, environmental, national, and neocolonial politics as well.

Prerequisite: Enrollment is restricted to graduate students.

POLI 272 - Critical Interventions in IR Theory and Global Political Economy (5)

Seminar examines selections from the canonical literature in international relations theory and global political economy through a number of critical lenses, including constructivist, feminist, historical materialist, and subaltern approaches.

Prerequisite: Enrollment is restricted to graduate students.

POLI 275 - Contemporary Capitalism (5)

Examines genesis of new institutions within the force of social ties and networks. Studies how social and organizational relationships achieve individual or group goals in political and economic life, and influence institutional design. Considers when and what ties contribute to governance and economic performance, and when informal and formal organizations constitute an obstacle. (Formerly New Approaches to the Study of Capitalism.)

Prerequisite: Enrollment is restricted to graduate students.

POLI 291 - Teaching Assistant Seminar (2)

Two-hour weekly seminar required of teaching assistants in which pedagogic and substantive issues will be considered. The experience of performing teaching assistant duties constitutes subject matter for discussion. Students submit petition to sponsoring agency.

POLI 292 - Professional Development (2)

Primarily for first- and second-year graduate students. Students learn the norms and expectations of graduate school and a variety of professional roles. Students develop a plan for their graduate career and for establishing a professional network of mentors and peer audiences for their work.

Prerequisite: Enrollment is restricted to graduate students.

POLI 293 - Field Study (5)

Individual study undertaken off campus with direct faculty supervision. Students submit petition to sponsoring agency.

POLI 295A - Research Colloquium (2)

Weekly venue for Ph.D. students to present current research, exchange information on sources and resources, discuss and critique epistemologies and methods, and to formulate topics for QE field statements and the dissertation. There are no assigned readings. May be repeated for credit twice.

Prerequisite: Enrollment is restricted to graduate students.

POLI 295B - Advanced Research Seminar (5)

Weekly seminar for Ph.D. students in which to develop and write extended research papers on selected topics, to present current work, to discuss methods, data sources, and fieldwork, and to receive critiques and assessments from fellow students. May be repeated for credit twice.

Prerequisite: Enrollment is restricted to graduate students.

POLI 297A - Indep Study (5)

A student approaches a member of the staff and proposes to take a course 297 on a subject he or she has chosen that is not covered in other politics graduate courses or plans a graduate independent study that includes an undergraduate course. Students submit petition to sponsoring agency.

POLI 297B - Indep Study (10)

A student approaches a member of the staff and proposes to take a course 297 on a subject he or she has chosen that is not covered in other politics graduate courses or plans a graduate independent study that includes an undergraduate course. Students submit petition to sponsoring agency.

POLI 297C - Indep Study (15)

A student approaches a member of the staff and proposes to take a course 297 on a subject he or she has chosen that is not covered in other politics graduate courses or plans a graduate independent study that includes an undergraduate course. Students submit petition to sponsoring agency.

POLI 299A - Thesis Research (5)

Enrollment restricted to graduate students and permission of instructor. Students submit petition to sponsoring agency.

POLI 299B - Thesis Research (10)

Enrollment restricted to graduate students and permission of instructor. Students submit petition to sponsoring agency.

POLI 299C - Thesis Research (15)

Enrollment restricted to graduate students and permission of instructor. Students submit petition to sponsoring agency.

PORT - PORTUGUESE

Lower-Division

PORT 1 - First-Year Portuguese (5)

Introduces first-year Portuguese language instruction and requires no previous study of Portuguese. Classes emphasize all language skills: listening, speaking, reading, and writing, including cultural competence.

PORT 2 - First-Year Portuguese (5)

Introduces first-year Portuguese language instruction. Classes emphasize all language skills: listening, speaking, reading, and writing, including cultural competence.

Prerequisite: Prerequisite(s): PORT 1 or by placement exam.

PORT 3 - First-Year Portuguese (5)

Course completes first-year Portuguese language instruction. Classes emphasize all language skills: listening, speaking, reading, and writing, including cultural competence.

Prerequisite: Prerequisite(s): PORT 2 or by placement exam.

PORT 65A - Accelerated Intermediate Portuguese (5)

A systematic grammar review is combined with literacy and cultural readings, while communicative exercises focus on improving students' ability to understand and hold sustained conversations. Students expand their vocabulary and knowledge of Brazil and other Portuguese-speaking cultures through films, popular music, and other culturally authentic materials.

Prerequisite: Prerequisite(s): PORT 1B or PORT 60B, or by consent of instructor.

PORT 65B - Accelerated Intermediate Portuguese (5)

Sequential to course 65A, completes second-year accelerated instruction. A systematic grammar review is combined with literacy and cultural readings, while communicative exercises focus on improving students' ability to understand and hold sustained conversations. Students expand their vocabulary and knowledge of Brazil and other Portuguese-speaking cultures through films, popular music, and other culturally authentic materials.

Prerequisite: Prerequisite(s): PORT 65A, or by consent of instructor.

PORT 80 - Voices from the Portuguese-Speaking World: Portugal, Brazil and Africa (5)

Examines key literary texts and films of the Portuguese-speaking world (Brazil, Portugal, and Africa), and the strategies they use to portray notions of national identity, which were transformed and enriched by transnational contact. Taught in English.

PORT 99 - Tutorial (5)

Students submit petition to sponsoring agency.

PORT 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

PORT 199 - Tutorial (5)

Students submit petition to sponsoring agency.

PORT 199F - Tutorial (2)

Students submit petition to sponsoring agency.

PRTR - PORTER COLLEGE

Lower-Division

PRTR 1 - Academic Literacy and Ethos: Arts of Reading (5)

Teaches foundational concepts for intellectual exploration and personal development within an academic community: analysis, critical thinking, metacognition, engagement with others across difference, and self-efficacy. Engages Porter's intellectual tradition of investigating the contribution the arts and humanities make to a good life, a just society, and a flourishing world.

Prerequisite: Enrollment is restricted to first-year college members.

PRTR 2 - Reading films for Truth (5)

Building on the foundational skills, habits of mind, and interpretive proficiencies developed in Academic Literacy and Ethos: Arts of Reading (PRTR 1), students will explore the ways in which feature-length narrative and documentary films have approached the representation of truth.

Prerequisite: Prerequisite(s): PRTR 1 or permission of instructor.

PRTR 26 - Navigating the Research University (2)

Explores critical engagement in education in the context of a research university. Introduces first-year issues and success strategies and ways to participate in the institution's academic life. Investigates strategies for clarifying education goals and devising a plan for success. Students cannot receive credit for this course and Kresge 26 or Stevenson 26.

Prerequisite: Enrollment is restricted to first-year Porter and Kresge College members.

PRTR 35M - The Mockumentary Film (5)

Mockumentaries such as *Waiting for Guffman*, *This is Spinal Tap*, and *Woody Allen's Zelig* grow out of the documentary tradition; but instead of claiming to represent real-world phenomena, they blatantly distort. Ten mockumentaries and their documentary correlates are studied. (Formerly course 80J.)

PRTR 37L - Introduction to Laser Cutting, 3D Printing, and Vacuum Forming (2)

Design functional objects, sculpture, and other digitally inspired forms in a variety of 2D (Illustrator) and 3D applications (Cinema 4D, Ketch UP, or AutoCAD), then produce those models as physical objects with a variety of rapid-prototyping methods including laser cutting, 3D printing, and vacuum forming. (Formerly course 38C.)

Prerequisite: Enrollment is restricted to college members.

PRTR 41I - Improvisation (5)

Theory and practice of improvisation in the performing arts with an emphasis on acting improvisation techniques. Readings and films develop a theoretical and historical understanding of spontaneous invention on stage. Students attend area theater improvisational performances. (Formerly course 80I.)

PRTR 41S - Solo Performance Works in the Theater (2)

Explores solo performance works made for the theater. While all course texts fall within the narrative tradition, some center on performers' lives, others on socio-political issues. Course participants screen video recordings of live performances in class., ultimately creating their own brief solo performances. (Formerly course 20F.)

Prerequisite: Enrollment is restricted to college members.

PRTR 41W - Playwriting Workshop (2)

Explores different aspects of written drama: scene and character development, plot, dialogue, monologues, soliloquies, stage direction, setting, and structure. Excerpts of late 20th-century plays serve as the basis for class discussion. (Formerly course 22H.)

Prerequisite: Enrollment is restricted to college members.

PRTR 47K - Korean Music and Culture (2)

Introduction to the farmers band tradition. Theory and practice of drumming are emphasized, resulting in a group performance. (Formerly course 21A.)

PRTR 47S - Sound Art (2)

Several composers and performers of contemporary art music discuss the processes by which works are conceived in imagination, transcribed in notation, and realized in sound. After a brief introduction to contemporary music aesthetics, students attend a series of related presentations, seminars, and concerts. (Formerly course 28.)

Prerequisite: Enrollment is restricted to college members.

PRTR 51A - The Artist's Novel (2)

A cross-cultural survey of the *kunstlerroman*, or artist's novel, from its origins in late 18th-century Germany to contemporary Latin America and the United States, this course explores how this genre understands artistic development and the role of artists in society. (Formerly course 32B.)

Prerequisite: Enrollment is restricted to college members or by permission of instructor.

PRTR 61 - Seminar in Arts (2)

Theoretical and historical aspects of the arts from one culture or world area are explored through seminar discussion, library research, and film/video presentations. (Formerly course 33.)

Prerequisite: Priority given to college members. Others by permission of instructor.

PRTR 61B - Handmade Books (2)

This workshop teaches the history and construction of handmade books as a mode of personal and/or political expression leading to an exhibition of student work.

Prerequisite: Enrollment is restricted to college members or by permission of the instructor.

PRTR 61J - Jewish Personal Narratives on Film (2)

Considers Jewish-American filmmakers as they come to terms with their identity in autobiographical works. Students write responses to texts and create their own brief personal narratives. (Formerly course 39.)

Prerequisite: Enrollment is restricted to college members.

PRTR 61N - Personal Narratives in Theater and Film (2)

Considers filmmakers and monologue performers as they come to terms with their identity in autobiographical works. Students write responses to texts and create their own brief personal narratives. (Formerly course 23B.)

Prerequisite: Priority given to college members. Others by permission of instructor.

PRTR 61O - Documenting Oral History (5)

Students learn basic techniques of interview and camera work to document on film oral histories collected from community elders. Students develop their skills in writing, theater, visual art, music, or film to reinterpret oral histories as artwork. (Formerly course 80L.)

Prerequisite: Priority given to college members. Others by permission of instructor.

PRTR 61Q - Queering the Arts (2)

Exploration of the arts as a way to understand and experience how queerness has been expressed, repressed, denigrated, and

celebrated in visual arts, music, film, poetry, and dance. (Formerly course 32A.)

Prerequisite: Enrollment is restricted to college members.

PRTR 63F - Fractals, Chaos Theory, and the Arts (2)

A consideration of chaos theory and fractal geometry as applied by 20th-century artists in all media. All necessary math and computer skills are covered. Students complete essays or art projects. (Formerly course 34B.)

Prerequisite: Enrollment is restricted to college members.

PRTR 63W - Ways of Knowing (5)

Creativity in different disciplines is developed via different ways of knowing. Musical, visual, scientific, and spatial literacy demand understanding which is not primarily logocentric. Explores how practitioners of arts and science develop their work and conceptualize its execution. (Formerly course 80K.)

Prerequisite: Enrollment is restricted to college members.

PRTR 71A - Awakening Compassion: Transforming Our Relationship to Self and the World (2)

Develops the qualities of compassion and kindness toward oneself and others. Combining contemporary scientific research, mindfulness training, and traditional contemplative practices, this course supports students in the cultivation of a more discerning, thoughtful, and compassionate life. (Formerly course 60.)

PRTR 90A - Aesthetics and Politics: Spanish Civil War (5)

Addresses questions of aesthetics and politics through a critical and practical examination of some artistic, literary, and broadly cultural developments proper to the political left during the Spanish Revolution and Civil War (1934-1939). Enrollment is restricted to first-year, Challenge Program participants from Stevenson College, Merrill College, Porter College, and Kresge College.

PRTR 90B - Art and Politics After Google (5)

Addresses questions of aesthetics and politics through a critical and practical examination of some artistic, literary, and broadly cultural developments proper to the history of the Internet (1990s to the present).

Prerequisite: Enrollment is restricted to participants in the first-year scholars program.

PRTR 93 - Field Study (5)

Field Study

PRTR 95A - Arts Education in the Community (5)

Organized in small teams, participants engage with students from public elementary classrooms to develop fully-staged group performance projects by end of term. Students are guided by instructor's models of teaching techniques, designed to stimulate the imagination, and by diverse readings.

Prerequisite: Priority given to college members. Others by permission of instructor.

PRTR 99 - Tutorial (5)

Various topics to be arranged. Students submit petition to sponsoring agency.

PRTR 99F - Tutorial (2)

Various topics to be arranged. Students submit petition to sponsoring agency.

Upper-Division

PRTR 131C - Curatorial Practice (2)

Offers the opportunity to participate in programming interdisciplinary curatorial praxis, arts events, exhibitions, performances, lectures, and film screenings. Students are exposed to UCSC alumni and faculty members' research through visiting class lectures. Students learn basic protocol for arts programming and critical arts writing, and are required to create their own participatory curatorial project at Porter College. (Formerly course 100.)

Prerequisite: Enrollment is restricted to Porter College members.

PRTR 131P - What is Photography? History, Politics, and Critique of Photographic Representation (5)

We live in a world permeated with photographic images, but do we really notice photographs? Do we understand how they work and what they mean? Do we know how to read them? Now that our phones and cameras have merged, we might also say that we live in a world that is forever inviting, imploring us to take photos; we might say we live in a world in which it is almost impossible not to take photos. Are we all photographers now? Do we choose to take photographs or has photography, in a sense, chosen us?

PRTR 135W - Women and the Silent Screen: An Interactive history (5)

Students learn about women's engagement with early movie culture, conduct their own historical research, and collaborate on building a web site that brings this knowledge to a public audience. (Formerly course 130A.)

Prerequisite: Enrollment is restricted to college members.

PRTR 141C - Shakespeare's Clown Characters (5)

This performance-based course explores Shakespeare's clowns, jesters, and fools (the characters as well as the performers who originated them). Examines the comic traditions from which Shakespeare drew his inspiration, and considers how Shakespeare's work continues to influence contemporary comedy practices. No experience with Shakespeare or performance is necessary. (Formerly course 130C.)

Prerequisite: Enrollment is restricted to college members.

PRTR 141L - Long Form Improvisation (5)

Focuses on long-form (acting) improvisation, building participants' knowledge and skills through practical and theoretical readings, by viewing relevant performances, and by improvising in class and in small groups outside class. Participants perform in a final public showing.

Prerequisite: PRTR 41I, PRTR 80I, or equivalent college-level experience or coursework.

PRTR 141W - Improvisation Workshop (5)

For practitioners of acting improvisation, this course deepens participants' knowledge and skills through practical and theoretical readings, by viewing performances, and by improvising in class and in small groups outside class. Participants perform in a final public showing. (Formerly course 180L.)

Prerequisite: Prerequisite(s): PRTR 41I or equivalent college-level experience or coursework.

PRTR 147O - Opera Workshop/Music Practicum (2)

Rehearsal of the principal vocal parts of an opera in preparation for a full production. Consideration of the dramatic aspects of each role and the interrelationships of the characters. (Formerly course 121C.)

PRTR 147P - Advanced Music Practicum (2)

The practice of music in a particular area of the world at an advanced level. Students learn the music of one world area or culture over the quarter and study the associated cultural background. Enrollment limited. (Formerly course 121.)

PRTR 151F - Writing the Future: Science Fiction (5)

Investigates how science fiction's utopic and/or dystopic projections give insights about equality, democracy, justice, and difference at the same time they register contemporary anxieties about community, kinship, war, viruses, genetic engineering, robotics, surveillance, and environmental degradation.

PRTR 151P - Building the Poem: Process, Form, and the Embodied Text (5)

Investigates form as it guides poetic utterance. Students complete texts to fit forms including broadsides, pamphlets, and books. Composition is guided by production methods, from holographic texts to letterpress and digital composition. (Formerly course 130B.)

Prerequisite: Enrollment is restricted to college members.

PRTR 151S - Introduction to Shakespeare (5)

Introduces Shakespeare's works, focusing on representative examples drawn from the range of genres in which he wrote; poetry, comedy, history, tragedy, and tragicomedy. (Formerly course 161.)

PRTR 161B - Handmade Books (5)

Teaches the construction and history of handmade books as artistic expression. Coursework covers a variety of structures, the analysis of book content, and the integration of design and concept. Covers the generation of content; explorations in typography; and folded, glued, and stitched structures.

PRTR 170F - Freedom and Race (5)

Interrogates the relationship between freedom and race in our current political moment by looking to historical and theoretical models that inform the present. Considers how race operates in legal, scientific, and visual discourses to shape individual and collective freedoms.

PRTR 171N - Nature in Indigenous American Culture (5)

Explores indigenous American relationships with other-than-human nature. Studies prehistoric through contemporary beliefs and practices. Emphasis on North America but may also include attention to Central or South American cultures' relationships with nature. Features films, writings, and artwork by indigenous American people. (Formerly course 165.)

Prerequisite: Prerequisite(s): Entry level writing and composition requirements.

PRTR 175S - Data and Democracy (5)

Critically interrogates the multiple meanings of data and democracy. Students examine case studies on the mobilization and framing of democracy in particular moments. Students also analyze concerns and opportunities provided by data management and archival practices of evidence and cataloging.

PRTR 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar by an upper-division student under faculty supervision. (See course 42.)

PRTR 193 - Field Study (5)

Field Study

PRTR 193J - The Literary Journal: Process to Product (5)

Provides a combination of theoretical background and hands-on experience in literary magazine editing and publishing. Students collaborate to produce a special Santa Cruz issue of Stone Soup, the for kids, by kids journal founded at Porter College. Enrollment is by permission of the instructor. Enrollment is restricted to sophomore, junior, and senior Porter college members majoring in art; art and design; games and playable media; art history; the history of art and visual culture; literature; or film and digital media.

PRTR 194 - Group Tutorial (5)

A program of independent study arranged between a group of students and a faculty instructor.

PRTR 198 - Ind Field Study (5)

Ind Field Study

PRTR 199 - Tutorial (5)

Tutorial

PRTR 199F - Tutorial (2)

Individual projects carried out under the supervision of a Porter faculty member. Students submit petition to sponsoring agency.

PSYC - PSYCHOLOGY

Lower-Division

PSYC 1 - Introduction to Psychology (5)

Introduces prospective majors to the scientific study of behavior and mental processes and also provides an overview for non-majors. Emphasizes social, cognitive, developmental, and personality psychology and their interrelations.

PSYC 2 - Introduction to Psychological Statistics (5)

An introduction to elementary statistical principles and techniques relevant to psychological research. Topics covered include basic parametric and nonparametric statistics, analysis of variance, and simple factorial designs. This course is prerequisite to course 181.

Prerequisite: Prerequisite(s): PSYC 1 or PSYC 20; and AM 3 or AM 6 or MATH 3 or MATH 4 or MATH 11A or satisfactory placement score on math placement exam or CEEB Advanced Placement Calculus AB exam.

PSYC 10 - Introduction to Developmental Psychology (5)

Addresses psychological development from conception through adolescence. Provides an overview of developmental psychology.

Prerequisite: Prerequisite(s): PSYC 1; and AM 3, or AM 6, or MATH 3 or higher level Mathematics course; and PSYC 2 or STAT 5 or STAT 7 and STAT 7L.

PSYC 20 - Cognition: Fundamental Theories (5)

Introduces basic concepts in cognitive psychology with a focus on theoretical explanations of cognitive functioning. Topics include perception, attention, memory, concepts, language, visual cognition, executive functions, and reasoning processes. (Formerly course 20A.)

PSYC 40 - Introduction to Social Psychology (5)

An analysis of contemporary research in social psychology and of what that research can teach us about the world we live in. Problems of conformity, propaganda, prejudice, attraction, and aggression. Focuses on a person's relationship with other people, how he or she influences them and is influenced by them.

PSYC 60 - Introduction to Personality Psychology (5)

An overview of major personality theories from Freud to the modern day, and an introduction to contemporary research on personality development and assessment.

Prerequisite: Prerequisite(s): PSYC 1.

Upper-Division

PSYC 100 - Research Methods in Psychology (7)

An introduction to research methods used to investigate human psychology. Course emphasizes critical thinking, designing and conducting research, analyzing and interpreting data, and writing a professional research report.

Prerequisite: Prerequisite(s): Entry Level Writing and Composition requirements; AM 3 or AM 6, or MATH 3 or higher level Mathematics course; and PSYC 2, or STAT 5, or STAT 7 and STAT 7L.

PSYC 101 - Topics in Developmental Psychology (5)

These topics, offered at different times by different instructors, examine selected topics in developmental psychology. (Formerly course 100.)

PSYC 102 - Adolescent Development: Adolescence into Young Adulthood (5)

Focuses on individual and relational development from early adolescence into emergent adulthood. Emphasis on the mutual influences of family relationships and adolescent development, and on the interface of family, peer group, and school experience in cultural contexts.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.

PSYC 103 - Adult Development and Aging (5)

Overview of the cultural, societal, biological, interpersonal, and cognitive processes of adult development and aging. Class discusses how each of these contexts and processes promotes stability and change as adults experience adulthood, reflect on their lives, and prepare for death.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.

PSYC 104 - Development in Infancy (5)

Focuses on psychological development in infancy. Presents research on perceptual, cognitive, and social-emotional development during the first two years of life. (Formerly course 101.)

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100. Enrollment is restricted to psychology and cognitive science majors.

PSYC 105 - Children's Thinking (5)

Cognition in children from infancy through adolescence. Basic and current research on children's understanding of the social and physical world. Focus on major theoretical

perspectives: especially Piaget's constructivist approach and sociocultural approach.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.
Enrollment is restricted to psychology and cognitive science majors and minors.

PSYC 106 - Social and Emotional Development (5)

An examination of contemporary theory and research on social and emotional development from infancy through childhood.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.

PSYC 107 - Gender and Development (5)

Examines the developmental psychology of gender in childhood and adolescence.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.
Enrollment is restricted to psychology majors.

PSYC 108 - Educational Psychology (5)

An overview of psychological theories and principles applied to formal and informal educational settings. Topics include: learning, motivation, cultural diversity, individual differences, and assessment. Students complete a research project.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.

PSYC 112 - Moral Development (5)

How and why do children develop into moral beings? This course covers key theories and empirical research about the cognitive, emotional, and behavioral aspects of moral development, including psychoanalytic, behaviorist, constructivist, nativist, and evolutionary approaches.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.

PSYC 114 - Human Development as a Cultural Process (5)

Examines interdisciplinary theory, research, and methods of studying the cultural basis of human development, and variations and similarities in human lives and practices in the United States and worldwide cultural communities.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.

PSYC 115 - Lifespan Developmental Psychopathology (5)

Examines theory and research on developmental psychopathology. Emphasizes the origin and longitudinal course of disordered behavior. Explores the processes underlying continuity and change in patterns of adaptation and age-related changes in manifestations of disorders.

Prerequisite: Prerequisite(s): PSYC 10, PSYC 100, and PSYC 170.

PSYC 116 - Communication Technologies, Culture, and Human Development (5)

What is the role of Information Communication Technologies (ICTs) in human development and sociocultural change? Offers insights into how human cultures are changing with the

proliferation of ICTs by examining how ICTs are incorporated into cognitive, social, and identity development in late childhood through adulthood.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.

PSYC 117 - Child Advocacy (5)

Making children's lives better is the ultimate objective of the developmental scientists who study children's development and the professional practitioners who work with children and families. Course bridges basic and applied research in effort to redesign future policy and practice initiatives for children and families.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.

PSYC 118A - Children and War (5)

Examines the development and behavioral ecology of children affected by war. Discusses refugee children, displaced children, abandoned children, orphaned children, children living in protracted conflict, and child soldiers. Reviews child protection strategies and psychosocial intervention for war-affected children.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.

PSYC 118B - Children in Extreme Circumstances (5)

Reviews child survival in life-threatening contexts. Examines the lives of street children, institutionalized children, orphans, children in extreme poverty, enslaved children, war-affected children, abandoned children, and children whose parents have HIV/AIDS and other life-threatening illnesses.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.

PSYC 118C - Theory of Mind (5)

Reviews recent research on how children come to understand the human mind, such as desire, belief, goals, and intention. Also discusses the implications of this research on typically and atypically developing children.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.
Enrollment is restricted to psychology majors.

PSYC 118D - Growing Up in Panem: Developmental Psychology of the Hunger Games (5)

Uses The Hunger Games trilogy to explore contextual factors in child development and critically examine the parallels between Panem and the real world using psychology research. Topics include poverty, media, oppression, exposure to violence, resilience and resistance,

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100.

PSYC 119A - Development as a Sociocultural Process (5)

Examines theory and research in sociocultural approaches to how people (especially children) learn and develop through participating in activities of their communities with other people. Emphasizes the organization of social interactions and learning opportunities, especially in communities in the Americas where schooling has not historically been prevalent.

Satisfies seminar requirement. Satisfies senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing, Composition requirements; PSYC 100, or ANTH 1 or ANTH 2, or EDUC 92A, or EDUC 92B, or EDUC 92C, or LALS 1, or SOCY 1. Enrollment is restricted to seniors or by permission.

PSYC 119D - Cultural Perspectives on Adolescent Development (5)

Examines cultural influences on adolescence from diverse cultural, ethnic, and socioeconomic communities from the perspective of current interdisciplinary theories and research. Topics include: identity development; changes from early adolescence to adulthood; links among family, school, peer, and community experiences; programs for youth; and implications of bridging research, social policy, and community practice. Includes research practicum. Satisfies the seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology majors or permission of instructor.

PSYC 119E - The World of Babies (5)

Focuses on how infants learn about intuitive physics, naive psychology, and shared culture. Also discusses how cultural communities shape infants' learning. Satisfies the seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and PSYC 100. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 119F - Language Development (5)

An introduction to language development in young children. Explores current theory and research in language development; and focuses on the preschool years. Satisfies the seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements, PSYC 10 and PSYC 100. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 119H - Children, Research, and Policy (5)

Explores ways that research in developmental psychology can be used to address real-world problems facing children. With an analytical focus on evidence and generalizability, we will investigate research-policy connections in topics of popular interest (e.g., child custody, poverty). Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement (Formerly Developmental Psychology Research and Real World Problems)

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and PSYC 100. Enrollment is restricted to senior psychology majors.

PSYC 119I - Special Topics in Narrative Development (5)

Examines a special topic of current interest in developmental psychology centering on the features of self-identity that develop in the context of telling stories of individual and/or shared experiences, such as self-defining memories or family stories. Satisfies the seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and PSYC 100; Enrollment is restricted to senior psychology majors. PSYC 60 recommended.

PSYC 119K - Emotional Development (5)

Covers classic and contemporary work on the nature and development of human emotions. Both theoretical perspectives and empirical research are discussed. Major topics include: emotion-cognition interplay, the measurement of emotion, universality and cultural variability, and emotional communication. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology majors.

PSYC 119M - Identity Development in Social and Cultural Contexts (5)

Senior seminar that focuses on identity development in adolescence and young adulthood. Discusses theory and research on the development of personal and social identities and the sociocultural contexts in which these personal and social identities are negotiated. Satisfies seminar requirement. Satisfies senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and PSYC 100; PSYC 102 strongly recommended. Enrollment is restricted to senior psychology majors or by permission of instructor.

PSYC 119N - Hunger Games Seminar: Growing Up in Panem (5)

Uses The Hunger Games trilogy to explore contextual factors in child development and critically examines the parallels between Panem and the real world using psychology research. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 100 and satisfaction of Entry Level Writing, Composition requirements. Enrollment is restricted to senior psychology majors.

PSYC 119P - Children and Technology (5)

Covers current research and theory related to children and technology. Topics include: how children learn to use new

technologies; how technology use impacts children's thinking; computer gaming and aggression; and how children's social relationships are influenced by technology. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 1, PSYC 10 and PSYC 100; and satisfaction of Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 119S - The Developmental Psychology of Love (5)

Drawing upon key theoretical and empirical findings from across psychology's subfields, this course explores how the experience and expression of love evolves across the life course and how the unique contributions of both partners to relationship dynamics contour relationship trajectories. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 100; satisfaction of entry-level writing and composition requirements. Enrollment is restricted to senior psychology majors.

PSYC 119T - Media Contexts of Adolescent and Young Adult Development (5)

Focuses on the role of media in adolescents' and young adults' identity development, friendships, and peer relationships. Topics include: globalization; physical/body image; friendships and peer acceptance; and educational and career goals. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, PSYC 10 and PSYC 100. PSYC 102 is recommended. Enrollment is restricted to senior psychology majors.

PSYC 120 - Visual and Spatial Cognition (5)

Focuses on high-level perception and visual, spatial, and other sensorimotor representations as elements of human cognition. Topics include imagery, visual attention, mental models, spatial language, the body schema, near-body space, and brain organization for representing space.

Prerequisite: Prerequisite(s): PSYC 1 or PSYC 20 or PSYC 20A; and PSYC 100. Enrollment is restricted to cognitive science and psychology majors and minors.

PSYC 120D - Deafness and Sign Language (5)

Explores what we can learn about human cognition by studying sensory loss and language in a different sensory modality. Topics include brain organization, sensory compensation, working memory, visual cognition, and psycholinguistics. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 1 or PSYC 20 or PSYC 20A, and PSYC 100. Enrollment is restricted to psychology and cognitive science majors and minors.

PSYC 121 - Perception (5)

Introduces the study of human perception. Topics include: the structure and function of the human eye and early visual cortex, perception of motion, color, and objects; recognition of faces; and audition, sensory integration, and synesthesia.

Prerequisite: Prerequisite(s): PSYC 100; and PSYC 20A or PSYC 20B. Enrollment is restricted to psychology and cognitive science majors and minors.

PSYC 123 - Cognitive Neuroscience (5)

An examination of the physiological mechanisms of psychological processes, including sensory systems, motor systems, control systems, and memory and learning. Principles of nervous system organization are discussed at each level. (Formerly Behavioral Neuroscience)

Prerequisite: Prerequisite(s): PSYC 100. Enrollment is restricted to psychology and cognitive science majors and minors.

PSYC 124 - Psychology of Reading (5)

Focuses on the cognitive processes that underlie reading in adults. Additional topics include different writing systems, learning to read, and reading deficits. Recommended for upper-division students.

Prerequisite: Prerequisite(s): PSYC 100. Enrollment is restricted to psychology and cognitive science majors and minors.

PSYC 125 - The Psychology of Language (5)

An analysis of human communication as a function of psychological, linguistic, and social factors. Focuses on language comprehension and production, including the processing of sounds, words, syntax, semantics, pragmatics, and dialogue.

Prerequisite: Prerequisite(s): PSYC 100. Enrollment is restricted to psychology and cognitive science majors and minors.

PSYC 127 - Computer Mediated Communication (5)

Provides an introduction to cognition as it relates to how people communicate using computers and the Internet. Focuses on the cognitive and social aspects of communication.

Prerequisite: Prerequisite(s): PSYC 100. Enrollment is restricted to psychology and cognitive science majors and minors.

PSYC 128 - Human Factors (5)

Human factors psychology studies human-machine interaction and computer usability, and involves diverse topics including user requirements analysis, user interface design, implementation and evaluation.

Prerequisite: Prerequisite(s): PSYC 100. Enrollment restricted to psychology and cognitive science majors and minors.

PSYC 129 - Human Learning and Memory (5)

Examines basic theories, models, methods, and research findings in human memory. Both traditional and nontraditional topics are covered.

Prerequisite: Prerequisite(s): PSYC 100. Enrollment is restricted to psychology and cognitive science majors and minors.

PSYC 130 - Deception, Brain, and Behavior (5)

Focuses on behavioral and brain manifestations of deception. Topics include developmental changes that allow us to understand and to use deception, physical implications of lying expressed in the face, voice, posture, and brain activity. Also covers mechanical or behavioral techniques used in deceptive behavior, whether in the form of overt behavior or brain activity.

Prerequisite: Prerequisite(s): PSYC 100; and PSYC 20 or any upper-division cognitive course. Enrollment is restricted to psychology and cognitive science majors and minors.

PSYC 130D - Evolutionary Psychology (5)

Introduction to how evolutionary principles can help us understand origins of the human mind. Covers evolutionary approaches to cognitive, social, and developmental psychology with emphasis on how cognition has been shaped by natural selection.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 132 - Neural Modeling (5)

Introduces students to the use of computer simulations in experimental psychology. Students use existing software to explore topics in cognition such as learning, memory, and psycholinguistics. One upper-division course in cognitive psychology (courses 120-139) is recommended.

Prerequisite: Prerequisite(s): PSYC 100. Enrollment is restricted to psychology and cognitive science majors and minors.

PSYC 135 - Feelings and Emotions (5)

Focuses on contemporary research in the psychology of human emotions. Special attention given to work in cognitive science, including psychology, linguistics, philosophy, and anthropology, on how emotions are central to understanding human action and mental life.

Prerequisite: Prerequisite(s): PSYC 100 and psychology and cognitive science majors and minors; or linguistics, philosophy, or anthropology majors.

PSYC 137 - Mind, Body, and World (5)

Psychologists primarily view the mind as being separate from the body, and the body as being separate from the external world. This course questions this widely held position and explores the way that minds arise from individuals' bodily interactions with others and the world around them. Particular

attention is paid to the role of human embodiment in language use and everyday cognition.

Prerequisite: Prerequisite(s): PSYC 100 and psychology and cognitive science majors; or linguistics, philosophy, or anthropology majors.

PSYC 138 - Computer Programming for the Cognitive Sciences (5)

Offers a practical introduction to computer programming for psychology and cognitive science students. Students learn simple and effective techniques for collecting, parsing, and analyzing behavioral data from behavioral experiments. Students create programs to present visual stimuli, collect keyboard responses, and then write response time and accuracy to datafiles on disk. Students then write new programs to extract information from the datafiles, perform statistical analysis, and present summaries of the findings. Students learn to use the Python programming language for cross-platform application development. No previous programming experience is necessary.

Prerequisite: Prerequisite(s): PSYC 1 or PSYC 20A or PSYC 20B, and PSYC 100. Enrollment is restricted to psychology and cognitive science majors.

PSYC 139B - Consciousness (5)

Provides a psychological study of human consciousness. Aim is to explore the following questions: What is consciousness? Where does consciousness come from? What functions does consciousness have in everyday cognition? How do we best scientifically study consciousness? These issues are examined from the perspective of contemporary research in cognitive science. Satisfies seminar requirement. Satisfies senior comprehensive requirement.

Prerequisite: Prerequisite(s): Entry Level Writing and Composition requirements and PSYC 100. Enrollment is restricted to senior psychology, philosophy, anthropology, linguistics, and cognitive science majors.

PSYC 139D - Modeling Human Performance (5)

Hands-on experience using computational modeling to understand human cognitive-task performance by comparing simulated and human data. Satisfies senior seminar requirement. Satisfies senior comprehensive requirement. Enrollment restricted to senior psychology, cognitive science, computer science, and computer engineering majors, or by permission of instructor. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): Entry Level Writing and Composition requirements; PSYC 100, and at least one of the following: PSYC 121, PSYC 123, PSYC 128, PSYC 129, PSYC 132, PSYC 138; or CSE 5J, CSE 11, CSE 14, CSE 103, CSE 140.

PSYC 139F - Psychology and Evolutionary Theory (5)

Human psychology is examined from the viewpoint of evolutionary theory, including perspectives from ethnology, anthropology, and neuropsychology. Upper-division students

from diverse backgrounds are encouraged to enroll. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): Entry Level Writing and Composition requirements and PSYC 100. Enrollment is restricted to senior psychology, anthropology, biology, philosophy, sociology, cognitive science, and feminist studies majors.

PSYC 139G - Conversations (5)

Explores how conversations work and how speakers accomplish their goals in an interaction. Topics include conversational structure, turn-taking, politeness, and the functions and use of collateral signals, among others. Collateral signals include pauses in speech, words like um, uh, you know, and like, and processes, such as how words and utterances are produced. Satisfies seminar requirement. Satisfies senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and PSYC 100. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 139H - Weird Science (5)

Explores the relationship between science and pseudoscience from a cognitive psychological perspective, including discussion of collection and selection of data, statistical assessment of data, cognitive illusions, memory distortions, reasoning, and decision-making. Also highlights the dissemination of scientific knowledge. Satisfies seminar requirement. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement. (Formerly course 134.)

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and PSYC 100. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 139J - Forgetting (5)

Explores forgetting as an essential and adaptive process in human memory. Topics include: intentional and unintentional forms of forgetting; the (re)constructive nature of memory; and cases of extreme remembering. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and PSYC 100. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 139K - Face Recognition (5)

To navigate our social world, we need to extract a wealth of information from faces, including identity, expression, gaze, age, and gender. This seminar reviews current topics in face-recognition research, from cognitive, neuroscience, developmental, social, and computational perspectives.

Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and PSYC1 or PSYC 20 or PSYC 20A; and PSYC 100. Enrollment is restricted to senior cognitive science, neuroscience, and psychology majors.

PSYC 139L - Illusions (5)

Illusions arise when our perception differs from reality. In this course, students investigate the mechanisms of visual, auditory, and proprioceptive illusions as an approach to understand the capacities and limitations of our perceptual system. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 100, and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 139M - Human-Robot Interaction (5)

Explores the social and psychological processes underlying the design and evaluation of robotic systems that coexist with people. Topics include: current texts in the philosophy, psychology, and state-of-the art. Students develop new psychological explorations in human-robot interaction. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 100, and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 139N - Diversity in Cognitive Psychology (5)

Lists of influential contributors to cognitive psychology insufficiently represent the influence of more diverse, non-traditional scientists. This course profiles the life and work of women and minority scientists who've made well-documented contributions to cognitive psychology, as well as those who've received less recognition. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 1 and PSYC 100, and PSYC 20A or PSYC 20B or PSYC 105; and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior cognitive science or psychology majors.

PSYC 139P - Natural and Artificial Intelligence (5)

Introduces one approach used in artificial intelligence: deep learning. This approach is inspired by the architecture and processing of real neural networks. Students learn about the algorithms developed and their applications in simulating intelligence. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 2 and PSYC 100; and PSYC 20A or PSYC 20B; and Entry Level Writing and

Composition requirements. One upper-division cognitive course is strongly recommended. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 140B - African American Psychology (5)

Incorporates historical and conceptual foundations; issues of social psychology; individual and developmental processes; and adjustment and clinical issues. Readings expose students to attributes of African American culture that have an impact on the psychology of African Americans as well as methodological issues relevant to key psychological topics.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 140F - Mind, Society, and Culture (5)

Introduces how social, cultural, and historical contexts shape psychological experiences, including self-concept, perception, emotion, health, and behavior. Draws from theories and research in psychology, sociology, and anthropology to highlight cultural variations in national populations (e.g., North Americans, East Asians) and multicultural populations within the United States (e.g., working-class Americans, African Americans, Mexican Americans, Native Americans).

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 140G - Women's Lives in Context (5)

Examines gender as a psychological and social factor that influences women's experiences in different contexts. Cuts across other areas of psychology by taking a women-centered approach. Emphasis also placed on understanding how intersections between gender, race and ethnicity, sexual orientation, socioeconomic status, etc., impact women's psychological well-being.

Prerequisite: Prerequisite(s): PSYC 100, or SOCY 3A. Enrollment is restricted to junior and senior psychology and sociology majors.

PSYC 140H - Sexual Identity and Society (5)

Addresses sexual and gender identity diversity in social, historical, and political context. Highlights current social justice issues and cultural ideologies related to sexual and gender identity diversity. Discusses social and scientific activism for sexual liberation; gay and lesbian identities and communities; sexuality beyond binaries and categories (e.g., bisexuality, pansexuality); asexuality; kink/fetish; transgender identities and sexualities; sexual fluidity and heteroflexibility; and queer sexual ethics and politics.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 140L - Women's Bodies and Psychological Well-Being (5)

Examines how women's bodily experiences (e.g., sexual objectification, violence, menarche, sexual health) are uniquely tied to their subordinate status and impacts their psychological well-being. Theories of gender inequality will address how social control directed at women's bodies through power relations embedded in societal institutions

contributes to women's marginalized status. Enrollment restricted to junior and senior psychology, sociology, feminist studies, and community studies majors.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; and PSYC 100, or SOCY 103B, or FMST 100. Enrollment restricted to junior and senior psychology, sociology, feminist studies, and community studies majors.

PSYC 140M - Legitimizing (In)Equality: Attitudes, Beliefs, and Social Policy (5)

Drawing on research in social psychology, political psychology, and critical policy studies, course examines how beliefs legitimize inequality, influence intergroup relations, and inform policy attitudes. Both hierarchy-enhancing and hierarchy-attenuating beliefs are reviewed.

Prerequisite: Prerequisite(s): PSYC 100. Enrollment is restricted psychology, community studies, legal studies, politics, and sociology students.

PSYC 140Q - Social Psychology of Gender (5)

Considers individual, interpersonal, and cultural influences on gender similarities and differences in thinking, motivation, and behavior. Emphasizes factors related to power and status inequalities between women and men.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 140T - Psychology of Trauma (5)

Overview of psychological theory and research on trauma and traumatic stress, including responses to childhood trauma (especially sexual abuse), combat, and natural disasters. Variety of theoretical frameworks presented, including developmental, cognitive, neuropsychological, clinical, and social/contextual.

Prerequisite: Prerequisite(s): PSYC100 or permission of instructor.

PSYC 141 - Privacy and Surveillance (5)

Survey of theory and research on privacy and surveillance. Topics include: the functions of privacy; threats to privacy in multiple domains; the psychological impact of surveillance; historical and cultural differences in privacy and surveillance practices; and the relationship between privacy, surveillance, and social justice.

Prerequisite: Prerequisite(s): PSYC 100, or by permission of the instructor.

PSYC 142 - Psychology of Oppression and Liberation (5)

Provides theoretical frameworks for understanding interlocking systems of oppression from the perspective of the oppressed as well as the oppressor nationally and internationally. Goes beyond mainstream (traditional) psychology and emphasizes critical psychological perspectives that include micro- and macro-level theories of oppression; importance of ideology in oppressive systems; and theories of social change and liberation across contexts.

Prerequisite: Prerequisite(s): PSYC 100 or feminist studies, sociology, community studies, or politics majors.

PSYC 144 - Latinx Psychology (5)

Offers an overview of psychological frameworks and interdisciplinary research for understanding Latinx populations, behaviors, identities, and values systems related to their mental health. Examines socio-cultural contexts, best research practices, and culturally responsive strategies for working with Latinx communities.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 145 - Social Influence (5)

An advanced course for upper-division undergraduates interested in the study of the persuasion process. The course investigates common influence tactics and how those tactics are used in various settings.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 145D - Social Psychology of Autocracy and Democracy (5)

Humans are the only animal capable of living in both authoritarian and democratic regimes. Course explores the nature of these forms of social relationships with a goal of promoting democracy. Topics include: obedience to authority, conformity, self-justification, propaganda, power, and conflict resolution.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 146 - The Social Context (5)

A systematic analysis of the social and contextual determinants of human behavior, with special attention given to concepts of situational control, social comparison, role and attribution theories, as well as the macrodeterminants of behavior: cultural, historical, and sociopolitical context.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 147A - Psychology and Law (5)

Current and future relationships between law and psychology, paying special attention to gaps between legal fictions and psychological realities in the legal system. Topics include an introduction to social science and law, the nature of legal and criminal responsibility, the relationship between the social and legal concepts of discrimination, and the nature of legal punishment.

Prerequisite: Prerequisite(s): PSYC 100; and PSYC 40 is highly recommended prior to taking this course. Enrollment is restricted to psychology, pre-psychology, and legal studies majors.

PSYC 147B - Psychology and Law (5)

Continuing discussion of current and future relationships between law and psychology and to contrasting psychological realities with legal fictions. Special attention is given to the criminal justice system including crime causation, the

psychology of policing and interrogation, plea bargaining, jury selection and decision making, eyewitness identification, and the psychology of imprisonment.

Prerequisite: Prerequisite(s): PSYC 147A.

PSYC 148 - Stereotyping, Prejudice, and Racism (5)

Introduction to and analysis of the social psychology of stereotyping, prejudice, and racism in the United States. Examines how individuals both perpetuate and experience these phenomena, through the lens of race as a system of privilege and disadvantage.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 149 - Community Psychology: Transforming Communities (5)

Introduces community psychology, a discipline that blends social psychology, sociology, and anthropology. Topics include levels of analysis, ecologies, prevention, intervention, feminisms, empowerment, sense of community, coalition building, and social justice and action.

Prerequisite: Prerequisite(s): PSYC 100. Enrollment is restricted to juniors and seniors.

PSYC 150 - Social Psychology of Flimflam (5)

Why do we believe strange things? This course investigates such flimflams as beliefs in the Loch Ness Monster, quack health care, and racial superiority to illustrate the underlying social psychological principles that lead us to adopt weird attitudes.

Prerequisite: Prerequisite(s): PSYC 100. Enrollment is restricted to psychology majors.

PSYC 153 - The Psychology of Poverty and Social Class (5)

Examines how social class shapes attitudes, beliefs, and behaviors. Emphasis is placed on structural barriers and their impact on the well-being of low-income groups. Strategies for reducing classist discrimination, improving interclass relations, and strengthening social policy are discussed.

Prerequisite: Prerequisite(s): PSYC 100, or anthropology, community studies, economics, legal studies, politics, sociology, or feminist studies majors.

PSYC 155 - Social-Community Psychology in Practice (5)

This service-learning course requires time in the classroom and the field. Students gain a deep understanding of social justice paradigms, community-based collaborative research, ethics, field-based research, reflexivity, and socio-cultural development modes. Prerequisite(s): Courses 3 or 100; courses 149 and 182 are recommended prior to taking this course. Admission by application and interview only. (Formerly course 159P.)

PSYC 159A - Sexual Identity (5)

Considers the experience of lesbian, gay, bisexual, and transgender individuals from a psychological perspective.

Reviews theory and research on compulsive heterosexuality, heterosexism and homophobia, culture and sexual-identity diversity, issues of history and community of LGBT individuals, and perspectives on sex, gender, and sexuality from queer theory. Satisfies the seminar requirements. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 100, and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology majors.

PSYC 159D - Psychology of Sexual Aggression (5)

An overview of psychological theory and research related to sexual aggression, focusing on both perpetration and victimization. Includes a discussion of the social construction of masculinity and femininity, media representations of sexual violence, and alternative (non-aggressive) visions of sexuality. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): Entry Level Writing and Composition requirements; and PSYC 100. Enrollment is restricted to senior psychology or feminist studies majors or permission of instructor.

PSYC 159E - Peace Psychology (5)

Is war inevitable? What is peace? Is it more than the absence of violence? Explore how psychology—the study of human behavior—can help to decrease violence and enhance cooperation at multiple levels including the personal, interpersonal, community, and international arenas. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): Entry Level Writing and Composition requirements; and PSYC 100. Enrollment is restricted to senior psychology majors.

PSYC 159H - Community-Based Interventions (5)

Topics include: what makes a successful intervention; what happens before the formal intervention begins; the ethics involved with interventions; different methods for assessing interventions; and different praxis models. Satisfies the seminar requirement. Satisfies the senior comprehensive requirement. A service component is involved.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and PSYC 100. Enrollment is restricted to senior psychology majors.

PSYC 159I - Psychology of Immigration (5)

Provides an overview of the social and cultural psychological study of immigrants in the United States. Examines the migration/immigration process; immigrants' social identities; schooling of immigrant youth; and impact of policy on the well-being of immigrants. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 100 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology majors.

PSYC 159J - Social Psychology of Social Justice (5)

Why do some situations seem fair and others unfair? Are all people concerned with justice or are some scoundrels? This course looks at the principles of distributive, procedural, and retributive justice and at real world applications of theories. Satisfies seminar requirement. Satisfies senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology majors.

PSYC 159N - Psychology of Mentoring (5)

Looks at the psychological studies of mentoring. Examines empirical studies and connects those to lived experience. Critical inquiry is stressed. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and PSYC 100. Enrollment is restricted to senior psychology majors.

PSYC 159P - Race, Ethnicity, and Environmental Inequality (5)

Examines racially and ethnically marginalized and dominant conceptions of the environment throughout U.S. history. Also explores events and policies revealing how human behavior shapes and is shaped by environmental inequality, and strategies for achieving environmental justice. Satisfies the seminar requirements. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 100; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology majors.

PSYC 159R - Achievement Disparities: A Social Psychological Perspective (5)

In this interactive seminar, we draw on research and theories in social and cultural psychology to examine persisting disparities in education and achievement for varying social groups (e.g., race/ethnicity, gender, social class) and to identify intervention strategies for reducing these disparities. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 100, and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology majors.

PSYC 159S - Queer Intimacies (5)

Examines the science of relationship diversity through the lens of social psychology. Reviews popular and psychological literature on same-sex relationships, polyamory/consensual non-monogamy, kink/fetish/BDSM relationships, chosen families, asexuality, and transgender intimacy. Concludes with discussion of the impact of queer intimacies on heterosexuality. Satisfies the seminar requirements. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and PSYC 100. Enrollment is restricted to senior psychology majors.

PSYC 159X - Psychology of Social Activism (5)

Covers social-psychological scholarship relevant to social justice activism that receives limited academic attention in conventional psychology. The seminar aims at understanding how knowledge gained in action-oriented research can be applied to social change. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, and PSYC 100. Enrollment is restricted to senior psychology majors.

PSYC 165 - Systems of Psychotherapy (5)

A review of the major methods of psychotherapy most currently practiced, including ethical standards and dilemmas, and client-therapist-system variables affecting efficacy.

Prerequisite: Prerequisite(s): PSYC 100; PSYC 60 or PSYC 170 recommended.

PSYC 166 - Personality Assessment (5)

How do we really know a person? Provides experience assessing such individual differences as intimacy motivation, dominance, creativity, and well-being. Students construct their own personality test and learn to evaluate the kinds of self-report, observational, projective, and interview techniques used in organizational and clinical contexts.

Prerequisite: Prerequisite(s): PSYC 100; PSYC 60 highly recommended as preparation.

PSYC 167 - Clinical Psychology (5)

Serves as an in-depth introduction to the field of clinical psychology. Covers issues of clinical assessment, interviewing, testing, and a range of therapeutic modalities.

Prerequisite: Prerequisite(s): PSYC 100; PSYC 170 is recommended as preparation. Enrollment is restricted to psychology majors.

PSYC 168 - The Study of Dreams (5)

An overview of dream studies by several major theorists and researchers of the 20th century, including Freud, Jung, and Hall. An emphasis on studies that reveal cognitive conceptions and personal concerns through quantitative and qualitative analyses of sets of dreams from individuals and groups. Other topics covered more briefly include dream recall, children and dreams, and the role of dreams within cultures.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 169 - Community Mental Health (CMH) (5)

How can we improve mental health? Examines theory, method, and efficacy research of outreach, prevention, and intervention methods with various mental health populations

in community settings (e.g., victims of sexual violence, new immigrants, those with severe mental illness, children in foster care). Presents characteristics of successful CMH agencies and programs and how to develop one's own agency or intervention model.

Prerequisite: Prerequisite(s): PSYC 100. PSYC 60 or PSYC 170 recommended.

PSYC 170 - Abnormal Psychology (5)

Survey of theory, research, and intervention in human psychopathology. Covers psychological, biological, developmental, and socio-cultural approaches.

Prerequisite: Prerequisite(s): PSYC 100; PSYC 60 highly recommended as preparation.

PSYC 171 - Childhood Psychopathology (5)

A critical and intensive exploration of a wide variety of specific disorders within their biological, developmental, and social contexts. Concepts of psychopathology in childhood, major and minor diagnostic systems, and a variety of theories of etiology are explored. General intervention strategies and a wide range of specific psychotherapy systems for treatment are closely examined and demonstrated.

Prerequisite: Prerequisite(s): PSYC 10 and PSYC 100. PSYC 170 strongly recommended.

PSYC 172 - Health Psychology (5)

Course examines the psychological aspects of health, illness and healing. Focuses primarily on etiology, treatment and prevention; specific topics include stress and the immune response, social support, compliance, health beliefs, and the healing relationship. (Formerly course 140C.)

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 175 - Personality, Relationships, and Emotions (5)

Explores the reciprocal development of personalities and emotions/emotion regulation in the context of close relationships.

Prerequisite: Prerequisite(s): PSYC 100. PSYC 10 and PSYC 60 recommended as preparation.

PSYC 178 - Critical Thinking: Child Abuse (5)

Examines child abuse from a variety of areas. Topics include underdetection and overreporting, attachment, sexual and emotional abuse, family violence, prolonged and repeated trauma, and violent marriages. Psychodynamic factors and methodological issues in the study of child abuse effects will be studied.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 179A - Theories of Moral Psychology (5)

A seminar course with focus on theories of moral development from the psychoanalytic, social learning, cognitive-developmental, and humanistic perspectives. Students confront and discuss moral dilemmas from the four

perspectives, working toward their own individual theories of pro-social behavior. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement. Prerequisite(s): essay required on a moral issue or dilemma relevant to the student's life.

Prerequisite: Prerequisite(s): Entry Level Writing and Composition requirements; and PSYC 100. Enrollment is restricted to senior psychology majors.

PSYC 179B - Children and Divorce (5)

Explores history and psychology of divorce and the short- and long-term effects of divorce on children. Examines wide range of findings that have drawn diametrically opposed conclusions; delves into social attitudes and legal structures that have impeded and enhanced divorce transitions for children and parents; investigates future models for divorcing that are child-friendly and consistent with findings from newly emerging longitudinal research on children and divorce. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements; PSYC 100. Enrollment is restricted to senior psychology majors.

PSYC 179D - Psychological Interpretation (5)

Seminar explores analytic, Jungian, and object-relations interpretive systems in-depth, using qualitative research methods on film, music, literature, and art, as well as psychological measures such as TAT, dream, and interview protocols. Interprets psyche of author, audience, and engendering culture. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 100, and PSYC 60 or PSYC 165; satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology majors.

PSYC 179F - The Path to a Science of Dreaming (5)

Focuses on the methods and empirical findings that led gradually to development of a neurocognitive theory of dreaming between 1953 and 2016. Emphasis is on the difficulties of adapting methods useful in studying waking thought to the study of dreaming, the counterintuitive nature of many of the findings, the importance of replicating new results, and the general lessons about the nature of science that can be drawn from this particular scientific odyssey. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): PSYC 100 and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to senior psychology and cognitive science majors.

PSYC 179G - Child, Youth, and Family Assistance in the Community (5)

Allows students in psychology field study to conduct senior capstone projects on topics related to their service learning

(field study). The seminar is devoted to creating projects related to community systems that address the needs of at-risk child, youth, and families. Students in the seminar should be pre-enrolled in course 193. Satisfies the senior seminar requirement. Satisfies the senior comprehensive requirement.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements and PSYC 100. Enrollment is restricted to senior psychology majors.

PSYC 181 - Psychological Data Analysis (5)

Intermediate statistical methods widely used in psychology (e.g., ANOVA, ANCOVA, multiple-comparisons, bivariate correlation, multiple regression, repeated-measures), corresponding SPSS or R programs, and elements of measurement theory.

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 182 - Qualitative Research Methods (5)

Designed to equip students with the ability to evaluate, conceive, and carry out psychological research. A variety of techniques (interpretive, phenomenological analysis, grounded theory and narrative inquiry) are examined and experienced. Students carry out research projects.

Prerequisite: Prerequisite: PSYC 100.

PSYC 183 - History and Systems of Psychology (5)

An overview of the history of psychology. Examines issues of paradigm and philosophy of science. Reviews central paradigms in the history of the discipline. Assumes a critical-historical approach, linking scientific knowledge produced to prevailing societal beliefs about mind and behavior. (Formerly course 180)

Prerequisite: Prerequisite(s): PSYC 100.

PSYC 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar (course 42) under faculty supervision. Available only to upper-division or graduate students. Students submit petition to sponsoring agency.

PSYC 193 - Field Study (5)

Series designed to provide advanced psychology undergraduates opportunity to apply what they have learned in the classroom to direct experience in a community agency. Students earn academic credit by working as interns at a variety of psychological settings where they are trained and supervised by a professional within the agency. Faculty also supervise the students' academic work by providing guidance and helping them integrate psychological theories with their hands-on intern experience. A two-quarter commitment. Students submit petition to sponsoring agency. Prerequisite(s): courses 3 or 100. Enrollment restricted to junior and senior psychology majors.

PSYC 193A - Developmental Field Study (5)

Work in a community-based setting while completing self-directed academic work focused in the developmental area under the guidance of a faculty member. Students submit petition to sponsoring agency; applications due one quarter in advance to the Psychology Field Study Office.

Prerequisite(s): courses 3 or 100. Enrollment restricted to junior and senior psychology majors.

PSYC 193B - Cognitive Field Study (5)

Work in a community-based setting while completing self-directed academic work focused in the cognitive area under guidance of a faculty member. Students submit petition to sponsoring agency; applications due one quarter in advance to the Psychology Field Study Office. Prerequisite(s): courses 3 or 100. Enrollment restricted to junior and senior psychology majors.

PSYC 193C - Social Field Study (5)

Work in community-based setting while completing self-directed academic work focused in the social area under guidance of a faculty member. Students submit petition to sponsoring agency; applications due one quarter in advance to the Psychology Field Study Office. Prerequisite(s): courses 3 or 100. Enrollment restricted to junior and senior psychology majors.

PSYC 193D - Clinical/Personality Field Study (5)

Work in community-based setting while completing self-directed academic work focused in clinical or personality area under guidance of a faculty member. Students submit petition to sponsoring agency; applications due one quarter in advance to the Psychology Field Study Office. Prerequisite(s): courses 3 or 100. Enrollment restricted to junior and senior psychology majors.

PSYC 194A - Research Internship in Developmental Psychology (5)

Provides students with intensive experience conducting current research in developmental psychology. Students submit petition to sponsoring agency. (Formerly Advanced Developmental Research.)

PSYC 194B - Research Internship in Cognitive Psychology (5)

Provides students with intensive experience conducting current research in cognitive psychology. Students submit petition to sponsoring agency. (Formerly Advanced Cognitive Research.)

PSYC 194C - Research Internship in Social Psychology (5)

Provides students with intensive experience conducting current research in social psychology. Students submit petition to sponsoring agency. (Formerly Advanced Social Research.)

PSYC 195A - Senior Thesis (5)

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term

course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students contemplating a senior thesis should have a superior academic record and be well prepared with a suitable background of previous coursework or independent study for performing their proposed research. Students must file a petition with the Psychology Office the quarter in which they would like to begin the thesis. Senior thesis petitions are available in the Psychology Department Office. Check with office for enrollment conditions.

PSYC 195B - Senior Thesis (5)

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students contemplating a senior thesis should have a superior academic record and be well prepared with a suitable background of previous coursework or independent study for performing their proposed research. Students must file a petition with the Psychology Office the quarter in which they would like to begin the thesis. Senior thesis petitions are available in the Psychology Department Office. Check with office for enrollment conditions.

PSYC 195C - Senior Thesis (5)

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. When taken as a multiple-term course extending over two or three quarters, the grade and evaluation submitted for the final quarter apply to each of the previous quarters. Students contemplating a senior thesis should have a superior academic record and be well prepared with a suitable background of previous coursework or independent study for performing their proposed research. Students must file a petition with the Psychology Office the quarter in which they would like to begin the thesis. Senior thesis petitions are available in the Psychology Department Office. Check with office for enrollment conditions.

PSYC 198 - Independent Field Study (5)

Provides psychology majors with the opportunity to apply what has been learned in the classroom to direct experience in a community agency outside the local community. Students earn academic credit by working as interns at a variety of psychological settings, where they are trained and supervised by a professional on site. Faculty also supervise the students' field study, providing guidance and help integrating psychological theories with their hands-on experience. Two-quarter commitment required. Admission requires completion of lower-division psychology major requirements; students submit petition to sponsoring agency. Applications are due one quarter in advance to the Psychology Field Study Office. Enrollment restricted to junior and senior psychology majors.

PSYC 199 - Tutorial (5)

Individual directed study for upper-division undergraduates. Students must file a petition with the Psychology Office the quarter in which they would like to take the tutorial. Petitions may be obtained in the Psychology Department Office.

PSYC 199F - Tutorial (2)

Specialized study with individual faculty as psychology peer advisors. May not be applied toward major requirements. Students submit petition to sponsoring agency. Application and interview required during the previous quarter. Enrollment restricted to junior and senior psychology majors.

PSYC 199G - Tutorial (3)

Specialized study with individual faculty. May not be applied toward major requirements. Students submit petition to sponsoring agency.

Graduate

PSYC 201 - Teaching in Psychology (5)

Provides graduate students with practical teaching skills in the areas of developing and stating a general philosophy of teaching, course design, writing a course syllabus, assessment techniques, evaluation procedures, effective teaching strategies, and media use.

Prerequisite: Enrollment is restricted to psychology graduate students.

PSYC 202M - Introduction to Matlab (5)

Introduces the programming language Matlab, focusing on its data analysis, visualization, stimulus presentation, and data-collection tools. Students develop Matlab skills by completing weekly assignments and a term project. No previous programming experience is required.

Prerequisite: Prerequisite(s): PSYC 204 or by permission of the instructor. Enrollment is restricted to psychology graduate students.

PSYC 202R - Introduction to R (5)

Teaches students how to use the statistical programming language and environment R to load, analyze, simulate, and visualize data. Assumes a basic understanding of descriptive and inferential statistics, but no prior experience with programming.

Prerequisite: Enrollment is restricted to psychology graduate students, or by permission of the instructor.

PSYC 204 - Quantitative Data Analysis (5)

Intermediate statistical methods widely used in psychology (e.g., ANOVA, ANCOVA, multiple comparisons, repeated-measures) and corresponding SPSS or R programs.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 205 - Categorical Data Analysis (5)

Application of statistical methods for analyzing binomial and multinomial response variables in survey and experimental designs. Topics include hypothesis testing, confidence intervals, assessing effect size, sample size requirements, and

an introduction to logistic regression models. Data analysis applications use SAS, SPSS, and R.

Prerequisite: Prerequisite(s): PSYC 204 or by permission of the instructor. Enrollment is restricted to graduate students.

PSYC 210 - The Experimental Method in Social Psychology (5)

Explores the philosophy and practice of the experimental method in social psychology.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 211A - Proseminar: Social Justice and the Individual (5)

Provides an introduction to social psychology, focusing on various individual-level social justice topics, including the self, social comparison, individual and collective identity, social historical and social structural determinants of behavior and various policy and social change-related issues.

Prerequisite: Enrollment is restricted to psychology graduate students; undergraduates planning graduate work in social psychology may enroll with permission of instructor.

PSYC 211B - Social Justice, Society, and Policy (5)

Provides an introduction to social psychology, focusing on empirical and theoretical developments related to social justice and group and intergroup dynamics. Topics include: prejudice and discrimination, power, collective action, and psychology's relationship to social policy. (Formerly *Proseminar: Groups in Society*.)

Prerequisite: Enrollment is restricted to psychology graduate students. Undergraduates planning graduate work in social psychology may enroll with permission of instructor.

PSYC 213 - Special Topics in Social Psychology (5)

Focuses on particular issues of theoretical and practical importance in social psychology. Topics vary from year to year and often concentrate on issues of social justice, social identity, intergroup relations, and social policy.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 214A - Multivariate Techniques for Psychology (5)

Introduces multiple regression, analysis of covariance, and random coefficient models. Both methodological and statistical aspects of data analysis are discussed. Practical problems of estimating and testing in general linear models are addressed. Students gain experience in carrying out and interpreting analysis using SPSS and R.

Prerequisite: Prerequisite(s): PSYC 204. Enrollment is restricted to graduate students.

PSYC 214B - Advanced Multivariate Techniques for Psychology (5)

Introduces factor analysis and structural equation modeling (SEM). Develop skills in defining, estimating, testing, and critiquing models. Topics include the rationale of SEM, model identification, goodness of fit, and estimation. Learn

how to use relevant software packages (R, SAS, LISREL, EQS, or AMOS) to conduct exploratory and confirmatory factor analyses and latent variable path analyses.

Prerequisite: Prerequisite(s): PSYC 214A.

PSYC 215 - Production and Comprehension of Spontaneous Communication (5)

Seminar on spontaneous communication. Typical topics include discourse markers (including historical origins, cross-linguistic borrowing, second-language learning, children's acquisition), enquoting devices, backchannels, and spontaneous written communication. (Formerly Production and Comprehension of Spontaneous Speech.)

Prerequisite: Enrollment is restricted to psychology graduate students.

PSYC 220 - Special Topics in Human Memory (5)

Topics announced when offered. Seminars involve discussion and critical evaluation of current, historical, and interdisciplinary readings relevant to topic. Emphasis on development of research ideas.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 221 - Visual Perception (5)

Seminar to study human perception, its methodology, and driving issues as illustrated by selected research topics (e.g., adaptation to unusual sensory environments). Where possible, parallels with other areas of psychology are drawn.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 222 - Topics in Lexical Organization (5)

The recognition of words is a critical step in natural language processing. Discusses a range of contemporary issues related to the representation of a word and the access of this information from the perspective of psychology, linguistics, and artificial intelligence.

Prerequisite: Enrollment is restricted to psychology graduate students; undergraduates who have completed PSYC 124 may enroll with permission of instructor.

PSYC 224A - Proseminar: Cognitive I (5)

A proseminar reviewing current topics in cognitive psychology, designed to introduce new graduate students to the field.

Prerequisite: Enrollment is restricted to psychology graduate students.

PSYC 224B - Proseminar: Cognitive II (5)

A proseminar reviewing current topics in cognitive psychology, designed to introduce new graduate students to the field.

Prerequisite: Enrollment is restricted to psychology graduate students.

PSYC 225A - Introduction to Developmental Research I (3)

Examines the rationale and techniques of research in developmental psychology. Topics include theories and paradigms in developmental psychology; translating theoretical ideas into researchable hypotheses; diversity issues in sampling; and conducting ethical research. Multiple-term course; students receive 6 credits in the second quarter of attendance; the grade and evaluation submitted for the final quarter applies to both quarters.

Prerequisite: Enrollment is restricted to psychology graduate students or with instructor's permission.

PSYC 225B - Introduction to Developmental Research II (3)

Examines the rationale and techniques of research in developmental psychology. Topics include selecting appropriate research designs; measurement and statistical approaches for research problems; issues of validity; and communicating research findings. Multiple-term course; students receive 6 credits in the second quarter of attendance; the grade and evaluation submitted for the final quarter applies to both quarters.

Prerequisite: Prerequisite(s): PSYC 225A. Enrollment is restricted to psychology graduate students or with instructor's permission.

PSYC 225C - Introduction to Developmental Research III (5)

Focuses on drawing reasonable conclusions from research findings by working on students' first-year research projects and critiques of existing research. (Formerly course 225B, Introduction to Developmental Research II.)

Prerequisite: Prerequisite(s): PSYC 225A and PSYC 225B. Enrollment is restricted to developmental psychology graduate students or by permission of the instructor.

PSYC 227 - Contemporary Issues in Psychology of Language (5)

Special topics in thought and language are examined from the perspectives of cognitive science. Particular attention given to embodied experience and higher-order cognition.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 230 - Research in Cognitive Psychology Seminar (5)

Colloquium series to study and critique research in cognitive psychology and cognitive science.

Prerequisite: Enrollment is restricted to psychology graduate students.

PSYC 231 - Research in Social Psychology Seminar (5)

Seminar to study, critique, and develop research in social psychology.

Prerequisite: Enrollment is restricted to psychology graduate students.

PSYC 232 - Evolution of Cognition (5)

Explores current research on evolution of human cognition, drawing on findings from other species and from the archaeological record. Topics include language, working memory, episodic memory, numerical abilities, and social cognition.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 235 - Infant Development in Contexts (5)

Seminar on how contextual factors influence the development in infancy, especially on cognitive domains. Discusses at least four types of contextual factors: cultural, experiential, event, and interpersonal contexts.

Prerequisite: Enrollment is restricted to psychology graduate students.

PSYC 242 - Research in Developmental Psychology Seminar (5)

Seminar to study, critique, and develop research in developmental psychology.

Prerequisite: Enrollment is restricted to psychology graduate students.

PSYC 244A - Proseminar I: Cognitive and Language Development (5)

Explores major theories and research in the fields of cognitive development and language development. Begins with classic theorists, such as Piaget and Vygotsky, and proceeds to theories and research on topics of current interest.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 244B - Proseminar II: Social and Personality Development (5)

An examination of contemporary theory and research on social and personality development across the lifespan.

Prerequisite: Enrollment restricted to graduate students.

PSYC 246 - Cultural Diversity in Human Development (5)

Examines cultural influences in development from the perspective of current theories and empirical research in developmental psychology and related fields (including social psychology, anthropology, sociology, history, education, and social policy). Focuses on understanding development in diverse cultural, ethnic, and socioeconomic communities by examining the interplay of social, cultural, institutional, and psychological processes.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 247 - Special Topics in Developmental Psychology (5)

Focuses on particular issues of theoretical importance in developmental psychology. Topics vary from year to year. Particular issues in language, culture, cognitive, social, and personality development may be covered.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 248 - Survey Methods (5)

Practicum to give students hands-on experience with survey methods by conducting their own survey on the topic of their choice. Course requires the survey to be conducted off campus at a local agency or program chosen by student with approval of instructor.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 249 - Field Methodologies and Social Ethnography (5)

Designed to train graduate students in applied field methods. Emphasis is on gaining knowledge and experience with actual field methods, by conducting social ethnography in the community. Field research in community placements required.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 250 - Prejudice and Social Relations (5)

Examines the ways in which the various branches of psychology have approached the issue of prejudice. Attention paid to the assumptions underlying each approach and their relation to core psychological ideas such as the self and emotion.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 251 - Feminist Theory and Social Psychology (5)

Course bridges feminist theory and social psychological research to explore connections between theory covered and empirical studies on various topics in social psychology. Seminar format allows students opportunity for extensive discussion.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 252 - Special Topics in Cognitive Psychology (5)

Focuses on particular issues in cognitive psychology. Topics vary from year to year. Particular issues in language, memory, perception, cognitive modeling, cognitive neuroscience, and more are covered.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 253 - Theory and Research in Intergroup Relations (5)

Examines, compares, and contrasts a variety of theories in intergroup relations while examining relevant empirical research. The relevance of both theory and research findings to contemporary social issues is explored.

Prerequisite: Enrollment is restricted to psychology graduate students; undergraduates considering graduate work in social psychology are encouraged to enroll with permission of instructor.

PSYC 254 - Psychology of Gender (5)

Course reviews recent theory, research, and applications in the psychology of gender. Developmental, social-

psychological, cultural, and feminist approaches are emphasized.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 255 - Qualitative Inquiry in Psychology (5)

A broad survey of qualitative inquiry in psychology. Presents epistemologies; reviews ethnography, interpretative-phenomenological analysis, grounded theory, interviewing and narrative analysis, discourse analysis, focus groups, thematic analysis, content analysis, intuitive inquiry; discusses disciplinary guidelines for reporting and reviewing qualitative research.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 256 - Psychology of Social Class and Economic Justice (5)

Course examines the social psychological antecedents, correlates, and consequences of economic inequality in contemporary U.S. society. The impact of social class on attitudes, beliefs, and behaviors is assessed. Strategies for reducing classist discrimination, improving interclass relations, and strengthening social policy are discussed.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 261 - Participatory Action Research (5)

Participatory Action Research (PAR) is a theoretical standpoint and collaborative methodology that is designed to ensure that those affected by the research project have a voice in that project. Topics include philosophies of science; defining and evaluating PAR; ethics; and reflexivity.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 264 - Transnational Feminism, Development, and Psychology (5)

A transnational feminist lens examines international development as linked to broader ideologies that transform gender relations and enhance women's empowerment. A social-psychology framework brings theoretical and practical import to the issues and examines how research can contribute to social justice and women's human rights.

Prerequisite: Enrollment is restricted to graduate psychology students, or by permission of instructor.

PSYC 290B - Advanced Developmental Research and Writing (2)

Tailored to graduate students' interests among topics involving research and scholarship in sociocultural approaches to development, methods for research design, data collection, coding, and analysis, and preparing and reviewing grant proposals and journal manuscripts. Multiple-term course; students receive 6 credits in the third quarter of attendance; the performance evaluation and grade submitted for the final quarter applies to all three quarters.

Prerequisite: Enrollment is restricted to graduate students.

PSYC 290C - Professional Development (5)

Designed to aid advanced psychology graduate students with development of competence in professional activities (e.g., preparing a vita, making job and conference presentations, submitting and reviewing manuscripts and grant proposals, professional communication, career decisions).

Prerequisite: Enrollment is restricted to advanced psychology graduate students.

PSYC 290E - Grant Writing for Psychologists (5)

Discusses how to write and put together a grant proposal for psychological research, culminating in a completed proposal.

Prerequisite: Enrollment is restricted to psychology graduate students.

PSYC 293 - Field Study (5)

Student-designed and student-conducted research carried out in field settings.

PSYC 297A - Independent Study (5)

Independent study and research under faculty supervision.

PSYC 297B - Independent Study (10)

Independent study and research under faculty supervision.

PSYC 297C - Independent Study (15)

Independent study and research under faculty supervision.

PSYC 297F - Independent Study (2)

Independent study and research under faculty supervision.

PSYC 299A - Thesis Research (5)

PSYC 299B - Thesis Research (10)

PSYC 299C - Thesis Research (15)

PUNJ - PUNJABI

Lower-Division

PUNJ 1A - Accelerated First-Year Punjabi (5)

Accelerated instruction in elementary Punjabi language. Students develop skills in speaking, reading, writing, and listening to real-life Punjabi. The accelerated pace allows for a rapid mastery of grammar and vocabulary; the course is designed for motivated beginning students.

PUNJ 1B - Accelerated First-Year Punjabi (5)

Second quarter of accelerated instruction in the Punjabi language. Students develop skills in speaking, reading, writing, and listening to real-life Punjabi. The accelerated pace allows for a rapid mastery of grammar and vocabulary; the course is designed for motivated beginning students.

Prerequisite: Prerequisite(s): PUNJ 1A or permission of the instructor.

RUSS - RUSSIAN

Lower-Division

RUSS 1 - First-Year Russian (5)

Aural comprehension, speaking, reading, and writing. Recitation and laboratory. Elementary sequence (1-2-3) begins in the fall quarter only. (Formerly Instruction in the Russian Language.)

RUSS 2 - First-Year Russian (5)

Aural comprehension, speaking, reading, and writing. Recitation and laboratory. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. (Formerly Instruction in the Russian Language.)

Prerequisite: Prerequisite(s): RUSS 1 or by consent of instructor.

RUSS 3 - First-Year Russian (5)

Aural comprehension, speaking, reading, and writing. Recitation and laboratory. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting. (Formerly Instruction in the Russian Language.)

Prerequisite: Prerequisite(s): RUSS 2 or by consent of instructor.

RUSS 94 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

RUSS 99 - Tutorial (5)

Students submit petition to sponsoring agency.

RUSS 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

RUSS 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

RUSS 199 - Tutorial (5)

Students submit petition to sponsoring agency.

RUSS 199F - Tutorial (2)

Students submit petition to sponsoring agency.

SCIC - SCIENCE COMMUNICATION

Upper-Division

SCIC 104B - Field Sketching in Color (5)

Covers field-adapted color illustration techniques including watercolor, colored pencil, inkwash, and mixed media. Field trips to various natural environments provide opportunities to sketch plants, mammals, birds, insects, landscapes, and other subject matter. In addition to in-class assignments, students produce a field sketchbook and a final project. Appropriate for students with demonstrated interest in science illustration through previous course work in science and art or through extracurricular activity in the field or a strong desire to learn the skills of the field. Enrollment process differs for Summer Session.

SCIC 106A - Introduction to Natural Science Illustration (5)

Introduction to graphite, pen and ink, coquille, and scratchboard, along with training in essential skills for creating accurate and dynamic scientific illustrations. Attention to the demands of the printing process along with basics of proportion, perspective, and composition. Appropriate for students with a demonstrated interest in science illustration through previous course work in science and art, or through extracurricular activity in the field, or a strong desire to learn the skills of the field.

SCIC 160 - Introduction to Science Writing (5)

A rigorous examination and practice of the skills involved in writing articles about science, health, technology, and the environment for the general public. Covers the essential elements of news writing and explanatory journalism, including developing a story idea, interviewing scientists, fact checking, composition, and editing of multiple drafts about scientific research.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and C1, C2 requirements. Enrollment is restricted to junior and senior physical and biological sciences majors.

SCIC 199 - Tutorial (5)

Students submit petition to sponsoring agency.

SCIC 199F - Tutorial (2)

Students submit petition to sponsoring agency.

Graduate

SCIC 200 - Introduction to Science Communication for

Scientists (3)

Instructs science students in communicating about their work with the non-scientist public, including written, visual, and audio forms of communication. Enrollment is restricted to graduate students in science and engineering studies or advanced undergraduates in declared science and engineering majors. Enrollment is by interview with the instructor to confirm level of scientific training and writing experience.

SCIC 201A - Reporting and Writing Science News (5)

A survey of the conventions of newspaper journalism and the special application of those conventions to scientific and technological subjects.

Prerequisite: Enrollment is restricted to graduate students formally accepted into the writing track of the Science Communication Program.

SCIC 201B - The Science Feature (5)

A survey of selected feature articles in the current national science magazines, with attention to strategy, level of complexity, explanation technique, and style. Writing assignments include a publishable feature article.

Prerequisite: Enrollment is restricted to graduate students formally accepted into the writing track of the Science Communication Program.

SCIC 201C - Profile and Essay Writing (5)

A survey of science and nature profiles and essays. Purpose, content, form, and style are considered. Writing assignments include original profiles and essays on current issues in science, technology, and society. (Formerly The Science Essay.)

Prerequisite: Enrollment is restricted to graduate students formally accepted into the writing track of the Science Communication Program.

SCIC 201D - Policy and Investigative Reporting (5)

Rigorous examination of techniques for reporting topics where science and technology meet public policy and society. Covers essential skills of investigative reporting, including obtaining documents through Public Records Act requests, using online reporting resources, and writing about ethical and legal issues.

Prerequisite: Enrollment is restricted to graduate students formally accepted into the writing track of the Science Communication Program.

SCIC 201E - Multimedia Science News (5)

Introduces web-media tools for reporting science stories and enhancing coverage for broad audiences, including video packages, narrated slideshows, podcasts, blogs, and still photography. Laboratory sections address skills for handling equipment and online editing.

Prerequisite: Enrollment is restricted to graduate students formally accepted into the writing track of the Science Communication Program.

SCIC 202 - Writing and Editing Workshop (5)

Theory and practice of writing and editing articles on scientific, medical, environmental, and technological subjects for newspapers, magazines, and special publications directed at non-technical readers.

Prerequisite: Enrollment is restricted to graduate students formally accepted into the writing track of the Science Communication Program.

SCIC 297 - Independent Study (5)

A media internship is completed with faculty tutorial assistance, to satisfy a need for the student when a regular course is not available. Enrollment restricted to graduate students formally accepted into the writing track of the Science Communication Program.

SCIC 297B - Independent Study (10)

Independent Study

SOCD - SOCIAL DOCUMENTATION

Graduate

SOCD 200 - Approaches to Social Documentation (5)

Comprehensive review and analysis of documentary strategies aimed at societal critique and social change, evaluating changes in argument, evidence, and process over development of the discipline.

Prerequisite: Enrollment is restricted to graduate students.

SOCD 201A - Introduction to Documentary Field Production and Editing (5)

Designed to provide supplemental instruction on specific topical and/or technical matters related to social documentation. Topics include technical standards and innovations within the field of social documentation, documentary subjects, location production, and/or the work of individual professional documentarians. (Formerly course 290, Special Topics in Social Documentation.)

Prerequisite: Enrollment is restricted to social documentation graduate students.

SOCD 201B - Advanced Documentary Field Production and Editing (5)

Intensive directing and producing course that covers conceptualization, research, treatment and proposal writing, interview technique, camera, editing, production, and

distribution. (Formerly course 280, Video Production of the Social Documentary.)

Prerequisite: Enrollment is restricted to social documentation graduate students. Open to qualified undergraduates with permission of instructor.

SOCD 201C - Project Planning for the Social Documentary (5)

Workshop seminar in project planning focusing on the form and content of the documentary project; research and preproduction; technical, financial, and logistical plans; and coordination with subjects and resources. (Formerly course 270.)

Prerequisite: Enrollment is restricted to social documentation graduate students.

SOCD 202 - Multiple-Platform Social Documentary Production (5)

Introduction to social documentary genres including video, photography, new media and other mediums, which addresses social-scientific research and methodology in the context of these processes. (Formerly Practice of Social Documentary.)

Prerequisite: Enrollment is restricted to social documentation graduate students.

SOCD 203 - Documentary Research Methods and Social Science Representation (5)

Designed to acquaint students with how social science research represents social reality and how social documentarians represent social reality. Designed to encourage comparison among different modes of social science research and between social science and different modes of social documentation representations of social life. (Formerly course 208, Social Science Research and Social Representation.)

Prerequisite: Enrollment is restricted to graduate students.

SOCD 204 - Ethnographic Writing and Social Documentation (5)

Graduate-level advanced seminar explores ways that seeing, hearing, and knowing are influenced by culture, power, race, and other factors. Readings emphasize how documentary subjects are constituted and known, addressing questions of epistemology, social constructivism, objectivity, and method. (Formerly Ways of Seeing and Hearing.)

Prerequisite: Enrollment is restricted to graduate students.

SOCD 292 - Special Topics (2)

Provides supplemental instruction on specific topical and/or technical matters related to social documentation. Topics include technical standards, artistic strategies, and innovations within the field of social documentation, documentary subjects, and/or work of individual professional documentarians.

Prerequisite: Enrollment is restricted to graduate students.

SOCD 293 - Studies and Practice for Social Documentation, Filmmaking, and New Media (5)

This thematic, graduate-level, hybrid, production/critical studies course provides opportunities to learn specific technical skills while engaging in the analysis and critical interpretations of cinema, social documentary, animation, art, television, and new media. Technical topics may include animation; motion graphics; interactive web media; and installation, editing, cinematography, and sound.

Prerequisite: Enrollment is restricted to graduate students in social documentation. Graduate students from other programs may enroll by permission of the instructor.

SOCD 294A - Production/Analysis/Editing (5)

Workshop seminar oriented toward actual fieldwork, production, and preparation for editing of the thesis project in the student's chosen genre. Techniques of collection and recording, analysis, preparation, and editing taught.

Prerequisite: Enrollment is restricted to social documentation graduate students.

SOCD 294B - Production/Analysis/Editing (5)

Workshop seminar oriented toward the editing and creative assemblage of the thesis project in the student's chosen genre. Techniques of preparation, exhibition, and editing taught.

Prerequisite: Enrollment is restricted to social documentation graduate students.

SOCD 294C - Production/Analysis/Editing (5)

Social documentation students in the final phase of completing their master's thesis receive guidance in shaping their projects, receive feedback, and are taught key elements of structure and narrative at a time when the demand for clarity and social documentation exposition is crucial.

Prerequisite: Prerequisite(s): SOCD 294A and SOCD 294B. Enrollment is restricted to social documentation graduate students.

SOCD 295 - Project Completion (5)

Individualized study for second-year graduate students working on and completing their final projects. Limited to students enrolled in the social documentation program during their final quarter of study.

SOCD 297 - Independent Study (5)

Study either related to a course being taken or a totally independent study. Enrollment restricted to graduate students. Students submit petition to sponsoring agency.

SOCD 297F - Independent Study (2)

Students submit petition to course-sponsoring agency. Enrollment restricted to graduate students.

SOCY - SOCIOLOGY

Lower-Division

SOCY 1 - Introduction to Sociology (5)

A systematic study of social groups ranging in size from small to social institutions to entire societies. Organized around the themes of social interaction, social inequality, and social change. Fulfills lower-division major requirement.

SOCY 3A - The Evaluation of Evidence (5)

Introduces students to major types of data and data analysis used in sociology. Designed to give students a foundation in understanding social science research articles, reports, and media reports used in political and policy debates. Topics include: general principles of research design, measurement, inductive and deductive modes of reasoning, experimental design, field work and ethnographic design, and reading and understanding basic quantitative forms of data and analysis. (Formerly course 103B, The Logic and Methods of Social Inquiry.)

Prerequisite: Enrollment is restricted to majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 3B - Statistical Methods (5)

Introduces basic quantitative data analysis found in sociological research and policy reports. Topics include: inferential statistics, such as probability distributions, sampling, and testing; and descriptive statistics, such as measures of association, bivariate, and multivariate analysis. (Formerly course 103A.)

Prerequisite: Enrollment is restricted to majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 10 - Issues and Problems in American Society (5)

Exploration of nature, structure, and functionings of American society. Explores the following: social institutions and economic structure; the successes, failures, and intractabilities of institutions; general and distinctive features of American society; specific problems such as race, sex, and other inequalities; urban-rural differences. Fulfills lower-division major requirement.

SOCY 15 - World Society (5)

Introduction to comparative and historical sociology. Focuses on the global integration of human society. Examines social changes such as industrialization, globalization, colonial rule, and the rise of Islamic fundamentalism. Uses social theory (including ideas from Marx, Weber, and Adam Smith) to explore the making of institutions like the nation-state, the World Trade Organization, the World Bank, and the

International Monetary Fund. Fulfills lower-division major requirement.

SOCY 30A - Introduction to Global Information and Social Enterprise Studies (5)

The first class in a three-quarter sequence that prepares students for designing social justice and sustainability projects using social-enterprise methodologies to transfer information and communications technologies (ICT) to community and non-governmental organizations. Tuesday's class topics include globalization, info-exclusion, social justice, information revolution, global civil-society networks, social entrepreneurship, and organizational assessment. Thursday's technical laboratory teaches students to develop practical ICT skills for working solidarity with community organizations in areas such as web design, graphic design, and digital networking.

SOCY 99 - Tutorial (5)

Directed reading and research. Petitions may be obtained from the Sociology Department Office. Ordinarily call numbers for this course will not be issued after the first week of instruction. Students submit petition to sponsoring agency.

Upper-Division

SOCY 105A - Classical Social Theory (5)

This intensive survey course examines the intellectual origins of the sociological tradition, focusing on changing conceptions of social order, social change, and the trends observed in the development of Western civilization in the modern era. Readings are all taken from original texts and include many of the classical works in social theory with special emphasis on the ideas of Marx, Weber, and Durkheim, which constitute the core of the discipline. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements. Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 105B - Contemporary Social Theory (5)

Surveys major theoretical perspectives currently available in the discipline including functionalism, symbolic interactionism, ethnomethodology, conflict theory, critical theory, neo-Marxism, and feminist theory. Prerequisite(s): course 105A and satisfaction of the Entry Level Writing and Composition requirements.

Prerequisite: Prerequisite(s): SOCY 105A and satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 107A - Designing ICT Projects for Social Enterprise (5)

Covers designing doable ICT-based projects to support the goals of community and NGOs. Topics include: social entrepreneurship/enterprise case studies; step-by-step project design; integrating social and technical solutions; project management. Technical topics include: Internet resources; advanced web/database design; computer networks/maintenance. Prerequisite(s): SOCY 30A and by permission of instructor. (Formerly SOCY 30B.)

SOCY 107B - Project Implementation and Grant Writing for Social Entrepreneurs (3)

Covers conversion of ICT project into a fundable grant proposal for social justice, integration of social activism, entrepreneurship and justice, and implementation of project. Topics include: funders, proposal design, field methods, project assessment, innovative ICT applications, action research methods. (Formerly course 30C.)

Prerequisite: Prerequisite(s): SOCY 107A or SOCY 30B.

SOCY 111 - Family and Society (5)

Focuses on the interaction between family and society by considering the historical and social influences on family life and by examining how the family unit affects the social world. Readings draw on theory, history, and ethnographic materials.

Prerequisite: Enrollment is restricted to juniors and seniors.

SOCY 113C - Topics in Civic Engagement (2)

Explores the historical origins of contemporary civic polarization through the decades of political, cultural, technological, and legal changes that have resulted in our current combative political environment.

Prerequisite: Enrollment is restricted to juniors and seniors.

SOCY 114 - Sports and Society (5)

Explores the interconnections between sports and society using sociological theories and methods. Topics include class, race, and gender; mass media and popular culture; political economy; education and socialization; leisure patterns (participants and spectators); globalization and cross-national comparisons.

SOCY 115 - Green Governance (5)

Working collaboratively in group interactive laboratories, students assess the effectiveness of various forms of public and private decision-making in the creation of a sustainable future. Electrical Engineering 80S or the Rachel Carson College core course recommended as prerequisites.

SOCY 116 - Communication, Media, and Culture (5)

Examines media institutions, communication technologies, and their related cultural expressions. Focuses on specific ways the media—including media studies and criticism—operates as social and cultural factor. Contemporary theory or

equivalent in related fields recommended. (Formerly Communication and Mass Media.)

Prerequisite: Prerequisite(s): SOCY 105A and SOCY 105B. Enrollment is restricted to junior and senior majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 117E - Migrant Europe (5)

Introduction to questions of immigration, nationalism, and racism in contemporary Europe. Addresses colonial roots of migration to Europe; patterns of immigration and responses to immigrants across different European regions; and political movements led by immigrants and other people of color.

Prerequisite: Prerequisite(s): SOCY 1, or SOCY10 or SOCY 15 or CRES 10 or LGST 10; or by permission of the instructor.

SOCY 117M - Immigration Enforcement and Deportations (5)

The intensification of immigration enforcement in the United States and the associated rise of mass deportations have reached the lives of millions of immigrants and local communities. Course covers the context, determinants, and consequences of enforcement and deportation practices.

Prerequisite: Prerequisite(s): SOCY 1 or SOCY 10 or SOCY 15 or LALS 1. Enrollment restricted to sophomores, juniors, and seniors.

SOCY 118 - Popular Music, Social Practices, and Cultural Politics (5)

Considers the role of popular music as a site of contemporary social practices and cultural politics. Examines the institutional organization and production of popular music, its cultural meanings, and its social uses by different communities and social formations. Also examines popular music as a vehicle through which major cultural and political debates about identity, sexuality, community, and politics are staged and performed.

Prerequisite: Prerequisite(s): SOCY 105A or SOCY 105B. Enrollment is restricted to juniors and seniors.

SOCY 119 - Sociology of Knowledge (5)

If people define things as real, they are real in their consequences, quipped W.I. Thomas. Surveys sociological theories about where and how knowledge comes from, and the politics of knowledge, with reference to contemporary debates surrounding issues, such as climate change, genetics, and inequality.

Prerequisite: Prerequisite(s): SOCY 105A or SOCY 105B, or by permission of the instructor.

SOCY 120 - Gender, Race/Ethnicity, Sexuality and Cultural Politics (5)

Focuses on the role feminist discourses play in cultural politics emphasizing sex, sexuality, and sex work as related to gender, race, and class. Examines the relationship between academic and popular feminisms. Interrogates post-feminism,

third-wave feminism, and generational differences in feminisms. Formerly Gender, Sexuality, and Cultural Politics.)

Prerequisite: Prerequisite(s): SOCY 126 recommended. Enrollment is restricted to junior and senior sociology, critical race and ethnic studies, feminist studies, global information and enterprise, and Latin America/sociology majors, proposed majors, and minors.

SOCY 121 - Sociology of Health and Medicine (5)

Analysis of the current health care crises and exploration of the social relationships and formal organizations which constitute the medical institution. Study of the political, economic, and cultural factors which affect the recognition, distribution, and response to illness.

Prerequisite: Enrollment is restricted to junior and senior majors and minors in biochemistry; biological sciences; community studies; critical race and ethnic studies; sociology; the Latin American studies/sociology combined majors; and proposed sociology majors.

SOCY 121G - Genomics and Society (5)

Teaches critical skills for analyzing the co-production of genomics and society. Examines issues at stake as societies across the world increasingly turn to genomic data to cure disease, solve crimes, regulate immigration, revitalize economies, and answer age-old questions about who we are.

Prerequisite: Prerequisite(s): SOCY 10 and SOCY 105B, or by permission of the instructor. Enrollment is restricted to juniors and seniors.

SOCY 122 - The Sociology of Law (5)

Explores the social forces that shape legal outcomes and the ways law, in turn, influences social life. Traces the history and political economy of American law; the relation between law and social change; how this relation is shaped by capitalism and democracy; and how class, race, and gender are expressed in welfare and regulatory law.

Prerequisite: Enrollment is restricted to majors and minors in legal studies, sociology, Latin American/sociology combined, and global information and social enterprise.

SOCY 123 - Law, Crime, and Social Justice (5)

Blends the latest research in criminology with that from social stratification, inequality, and social welfare policy with the objective of exploring the relationship between levels of general social justice and specific patterns of crime and punishment. The focus is primarily on the U.S. although many other industrialized democracies are compared. An introductory course in sociology is recommended as preparation.

SOCY 124 - Visual Sociology (5)

Learn to critically consume documentary, ethnographic film, photojournalism, and the genre of realism as these methods are increasingly used to describe the social world. Addresses

theoretical, methodological, practical, and ethical issues of creating visual media. Optional media lab teaches students how to create visual products as well. (Formerly *Visual Ethnography*)

Prerequisite: Prerequisite(s): Enrollment is restricted to juniors and seniors.

SOCY 125 - Society and Nature (5)

A healthy society requires a stable and sustainable relationship between society and nature. Covering past, present, and future, the course covers environmental history of the U.S., the variety and extent of environmental problems today, and explores their likely development in our lifetimes.

Prerequisite: Enrollment is restricted to sophomore, junior, and senior majors, proposed majors, and minors in sociology, global information and enterprise, and Latin American studies/sociology combined.

SOCY 126 - Sex and Sexuality as Social Practice and Representation (5)

Explores social and cultural aspects of human sexuality and reproduction, including how and why meanings and behaviors are contested. Analyzes sexuality and reproduction as forms of social and political control as well as cultural expression and self-determination. (Formerly Sociology of Sex)

Prerequisite: Enrollment is restricted to junior and senior sociology, critical race and ethnic studies, feminist studies, Latin American/sociology combined, and global information and social enterprise majors, proposed majors, and minors.

SOCY 127 - Drugs in Society (5)

Explores the history of the use and abuse of consciousness-altering substances like alcohol and other drugs. Social-psychological theories of addiction are reviewed in tandem with political-economic analyses to identify the social conditions under which the cultural practices involved in drug use come to be defined as public problems. An introductory sociology course is recommended prior to taking this course.

Prerequisite: Enrollment is restricted to majors and minors in legal studies, sociology, Latin American/sociology combined, and global information and social enterprise.

SOCY 127P - Sociology of Drugs, Botanicals and Pharmaceuticals (5)

Engages the social, historical, and economic trajectories of the drugs, illicit and licit, botanical and pharmaceutical within U.S. society. Through an examination of case studies, and other texts of encounter, explores how international, state, and local actors mediate as interlocutors between globalized interests, local knowledges, and the molecules we have increasingly come to know, ingest, and incorporate. Enrollment restricted to junior and senior sociology, biology, biochemistry and molecular biology, community studies, Latin American/sociology combined, and global information and social enterprise majors, proposed majors, and minors.

Prerequisite: Prerequisite(s): SOCY 1 or SOCY 10 or SOCY 15; or by permission of the instructor.

SOCY 128 - Law and Politics in Contemporary Japan and East Asian Societies (5)

Introduction to contemporary analysis of Japan's race relations, ethnic conflicts, and a government's failure to restore remedial justice for war victims in Japan, Asia, and the U.S. Specific issues include comfort women, national or state narratives on Hiroshima, forced labor during World War II, and Haydon legislation that allows war victims to sue the Japanese government and corporations in California.

Prerequisite: Enrollment restricted to sophomore, junior, and senior majors, proposed majors, and minors in legal studies, sociology, community studies, Latin American/sociology combined, global information and social enterprise, and critical race and ethnic studies.

SOCY 128A - Research Methods in Legal Studies and Critical Criminology (5)

Introduces survey research methods including problem formulation, research design, instrument construction, data collection, codification, data processing, computer analyses, and report writing. The greater emphasis is placed on statistical analyses and questionnaire constructions.

Prerequisite: Enrollment is restricted to sophomores, juniors, and seniors.

SOCY 128C - Social History of Democracy, Anarchism, and Indigenism (5)

Provided an overview of socio-political theories and thoughts from Athenian Direct Democracy in 500 BC, to Classical Liberalism, Social Contract, Libertarian Socialism, Anarcho-Syndicalism, Neo-Liberalism, Anarcho-Primitism, and lastly Indigenism in relation to the revival of indigenous knowledge, the Mother Earth law, and the restoration of the nature's rights as espoused by many governments in the Third World today.

Prerequisite: Prerequisite(s): SOCY 1, SOCY 10, or SOCY 15. Enrollment restricted to sophomore, junior, and senior sociology, critical race and ethnic studies, community studies, legal studies, Latin American/sociology combined, and GISES majors, proposed majors, and minors.

SOCY 128I - Race and Law (5)

An introduction to comparative and historical analyses of the relation between race and law in the U.S. Emphasis on examinations of continuous colonial policies and structural mechanisms that help maintain and perpetuate racial inequality in law, criminal justice, and jury trials. (Formerly Race and Justice)

Prerequisite: Enrollment restricted to sophomore, junior, and senior majors, proposed majors, and minors in legal studies, sociology, community studies, Latin American/sociology combined, global information and social enterprise, and critical race and ethnic studies.

SOCY 128J - The World Jury on Trial (5)

Adoption of the jury and its varied forms in different nations provides ideal opportunities to examine differences between systems of popular legal participation. Course considers reasons why the right to jury trial is currently established in Japan or Asian societies, but abandoned or severely curtailed in others. American jury contrasted with other forms of lay participation in the legal process.

Prerequisite: Enrollment restricted to sophomore, junior, and senior majors, proposed majors, and minors in legal studies, sociology, community studies, Latin American/sociology combined, global information and social enterprise, and critical race and ethnic studies.

SOCY 128M - International Law and Global Justice (5)

Examines war crimes, crimes against humanity, and the evolution and role of the International Criminal Court (ICC). Examines the evolution of the concept of international law, the rationale for its birth and existence, roots of international conflicts and genocides, possible remedies available to victims, mechanisms for the creation and enforcement of international legal order, as well as the role of colonialism, migration, poverty, race/ethnic conflicts, gender, and international corporations in creating and maintaining conflicts and wars.

Prerequisite: Enrollment restricted to sophomore, junior, and senior majors, proposed majors, and minors in legal studies, sociology, community studies, Latin American/sociology combined, global information and social enterprise, and critical race and ethnic studies.

SOCY 129 - Popular Culture and Cultural Studies (5)

Examines the hidden politics of popular pleasure, studying the workings of domination and transgression in popular culture and everyday life. Explores not only media representations but cultural practices as well. Examines both cultural production and consumption. Considers how hegemonic discourses render the politics of resistance invisible. (Formerly *Popular Culture*.)

Prerequisite: Prerequisite(s): SOCY 105A or SOCY 105B. Enrollment is restricted to junior and senior majors and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 130 - Sociology of Food (5)

Following food from mouth to dirt, explores the politics, economy, and culture of eating, feeding, buying, selling, and growing food. Topics cover both the political economy of the food system as well as how body and nature are contested categories at either end of this system.

Prerequisite: Enrollment is restricted to juniors and seniors. Enrollment is restricted to sociology majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined majors.

SOCY 131 - Media, Marketing, and Culture (5)

Explores relationship between modern forms of cultural production and the economy and society in which they emerge. Course reads, screens, and discusses variety of the cultural texts: from the historical and theoretical to the commercial, popular, and counter-cultural. (Formerly Culture, Economy, and Power.)

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and social enterprise, community studies, and Latin American studies/sociology combined.

SOCY 132 - Sociology of Science and Technology (5)

Reviews social and cultural perspectives on science and technology, including functionalist, Marxist, Kuhnian, social constructionist, ethnographic, interactionist, anthropological, historical, feminist, and cultural studies perspectives. Topics include sociology of knowledge, science as a social problem, lab studies, representations, practice, controversies, and biomedical knowledge and work.

Prerequisite: Enrollment is restricted to junior and senior majors/minors in sociology; biology; biochemistry; community studies; critical race/ethnic studies; global information/social enterprise; Latin American studies/sociology combined; proposed sociology majors.

SOCY 133 - Currents in African American Cultural Politics (5)

Takes as its subject, the dialogues, debates, conceptions, and strategies of self representation produced by blacks in the U.S. and Atlantic world in the twentieth and twenty-first centuries. These issues are examined through the insights of feminist theory, cultural studies, media studies, sociology, and African American studies.

Prerequisite: Enrollment is restricted to juniors and seniors.

SOCY 134 - Television and the Nation (5)

The role of American network television in the production of the post-war American national imagination is our focus. Our approach will explore issues of media power, especially television's industrial apparatus, its network structure, its strategies of representation in relationship to the construction of the image of the nation, and the meaning of citizens, consumers, and audiences.

Prerequisite: Enrollment is restricted to junior and senior majors and minors in sociology, Latin American and Latino studies/sociology combined, global information and social enterprise studies, history, literature, and film and digital media.

SOCY 136 - Social Psychology (5)

Major theories and concepts in sociological study of social psychology. Topics include identity and social interaction, deviance, sociology of emotions, social narratives, and the social construction of reality.

Prerequisite: Enrollment is restricted to junior and senior sociology and Latin American studies/sociology majors and proposed majors, and sociology and global information and social enterprise minors.

SOCY 137 - Deviance and Conformity (5)

Why certain social acts are considered threatening and how individuals or groups become stigmatized. Sociological analysis of the institutions and processes of social control and the experience of becoming deviant and living with a stigmatized identity. Introductory course in sociology recommended.

Prerequisite: Enrollment is restricted to junior and senior sociology majors, minors, and proposed majors, global information and social enterprise studies minors, and Latin American and Latino studies/sociology combined majors and proposed majors.

SOCY 139 - Field Research Methods (5)

Research practicum which examines methods and problems of qualitative field research both through examining literature published in this tradition and by carrying out directed field exercises. Students also design and carry out their own research project.

Prerequisite: Prerequisite(s): SOCY 3A.

SOCY 139D - Critical Digital Methods (5)

Introduces critical digital methods to examine ethical and epistemological concerns with Big Data, archives and digital collections, organizational records, mobile ethnographies, social media, and crowd-sourced data. Students use open-source text mining and data-visualization programs.

Prerequisite: Prerequisite(s): SOCY 1, SOCY 10, or SOCY 15; and SOCY 3A. Enrollment is restricted to junior and senior sociology, Latin American and Latino studies/sociology, and global information and social enterprise majors, proposed majors, and minors.

SOCY 139G - Introduction to Geographic Information Systems (GIS) (5)

Introduces Geographic Information Systems (GIS) including methods to analyze geographic data and create maps. Students learn software, such as Google Map APIs and Bing Maps APIs, and focus on the ArcGIS mapping software. A course in statistics is recommended as preparation.

Prerequisite: Enrollment restricted to junior and senior anthropology, environmental studies, sociology, Latin American and Latino studies/sociology combined, and GISES majors, proposed majors, and minors; other majors by permission of instructor.

SOCY 139T - Community-Engaged Research Practicum (5)

Covers the theories and methods associated with community-based and participatory action research. Students review relevant scholarship then engage in a collective field research project in collaboration with a community organization.

Themes, collaborations, and research projects vary. Enrollment is by permission of the instructor.

SOCY 140 - Social Psychology of Power (5)

This course uses historical, sociological, and social psychological materials to introduce students to issues concerning class and power, religion and power, minorities and power, women and power, the rise of the New Right, and the successes and failures of the Left.

Prerequisite: Prerequisite(s): SOCY 1, SOCY 10, SOCY 15, or PSYC 40. Enrollment is restricted to juniors and seniors.

SOCY 142 - Language and Social Interaction (5)

Concerns the routine and taken-for-granted activities that make up our interactions with one another, consisting in large part—but not exclusively—of verbal exchanges. Emphasis on the socially situated character of communication, whether intimacy between two people or dominance of a group.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, language studies, linguistics, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 143 - Conversation Analysis (5)

A working seminar, involving the analysis of actual conversations. Covers fundamental ethical, conceptual, and methodological issues that arise in the collection of conversational data, as well as the skills and techniques of conversation analysis. Given our operating assumption, that talk is a primary means of constructing social identities, there is a heavy thematic emphasis on gender, status, and power in conversation.

Prerequisite: Prerequisite(s): SOCY 142 or by permission of instructor. Enrollment is restricted to juniors and seniors.

SOCY 144 - Sociology of Women (5)

Analysis of the social significance and social production of gender. Some consideration of how sex differences have developed. Major emphasis on the impact of gender as a categorical imperative in the present social context. In this context, the course is also about sexual segregation, sexual inequality, and the dynamics of interpersonal power.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, feminist studies, global information and enterprise, and Latin American studies/sociology combined.

SOCY 145 - Sociology of Masculinities (5)

Examines conflicting views on the development and state of modern masculinity as adaptation, transitional phase, or pathology. Did men lose the gender war? Do boys need rescuing? What are common and divergent social experiences of men within race, class, gender, culture, era? An introductory sociology course recommended. (Formerly Sociology of Men.)

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, psychology, global information and social enterprise, and Latin American studies/sociology combined majors.

SOCY 148 - Educational Inequality (5)

Examines educational inequality in the United States, focusing on contemporary debates and issues, especially in the California context. Covers schooling from preschool to higher education, and examines educational inequality from a system, setting, and individual-level perspective. (Formerly Sociology of Learning.)

Prerequisite: Prerequisite(s): SOCY 3A and SOCY 3B, or by instructor permission. Enrollment restricted to junior, senior majors, proposed majors, and minors in sociology, education, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 149 - Sex and Gender (5)

Modern analyses of sexuality and gender show personal life closely linked to large-scale social structures: power relations, economic processes, structures of emotion. Explores these links, examining questions of bodily difference, femininity and masculinity, structures of inequality, the state in sexual politics, and the global re-making of gender in modern history. Recommended as background: any lower-division sociology course.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined majors.

SOCY 150 - Sociology of Death and Dying (5)

Explores contemporary, historical, cross-cultural and interdisciplinary perspectives on the social psychology of death and dying. Cultural norms and institutional contexts are studied, along with the individual experience, and the ways in which our perspectives on death and dying influence our experiences of life and living.

Prerequisite: Enrollment is restricted to juniors and seniors.

SOCY 152 - Body and Society (5)

Critically examines the place of the human body in contemporary society. Focuses on the social and cultural construction of bodies, including how they are gendered, racialized, sexualized, politicized, represented, colonized, contained, controlled, and inscribed. Discusses relationship between embodiment, lived experiences, and social action. Focuses on body politics in Western society and culture, especially the United States.

Prerequisite: Enrollment is restricted to junior and senior majors and minors and proposed majors and minors in sociology, global information and enterprise, and Latin American studies/sociology combined.

SOCY 153 - Sociology of Emotions (5)

Examines sociological approaches to the understanding of emotions and the application of these approaches to work, learning, interpersonal relationships, health and illness, sports, and other aspects of everyday life.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined majors.

SOCY 155 - Political Consciousness (5)

Explores the relationship between consciousness, ideology, and political behaviors from voting to rebellion. Special attention is given to the lived experience and the identity interests that complicate the nexus of class position and political ideology. An introductory sociology course is recommended as preparation.

SOCY 156 - U.S. Latinx Identities: Centers and Margins (5)

Explores historical and contemporary constructions of Latinx identities and experiences in U.S. Particular emphasis placed on transcultural social contexts, racial formations, and intersections with other identities including sexuality and gender. (Formerly U.S. Latina/o Identities: Centers and Margins).

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and enterprise, Latin American studies, and Latin American studies/sociology combined.

SOCY 157 - Sexualities and Society (5)

Explores controversies in the sociology of sexuality. Focuses on tensions and disagreements that characterize debates over sex and society, and attempts to identify political and theoretical issues at stake in these debates.

Prerequisite: Enrollment is restricted to sophomore, junior and senior majors, proposed majors, and minors in sociology, feminist studies, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 158 - Politics of Sex Work and Erotic Labor (5)

Examines sex work in an historical and cultural context, considering how it has changed over time. Considers the relationship of pornography, exotic dance, and selling sex on the Internet to racialization, queer politics, globalization, and tourism. Employs theories and methods of cultural studies in rethinking historical debates on sex work.

Prerequisite: Prerequisite(s): SOCY 120 and SOCY 126. Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, feminist studies, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 163 - Global Corporations and National States (5)

Examines the nature and development of the capitalist world system since 1945. Emphasis is on the power of multinational

corporations as managers of the world system and the response of states: role of multilateral agencies such as the World Bank, International Monetary Fund, United Nations.

Prerequisite: Prerequisite(s): SOCY 15. Enrollment is restricted to sophomore, junior, and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 164 - Capitalism and Its Critics (5)

Through comparative analysis of texts by several social theorists, explores the rise and consequences of capitalism. How has capitalism affected how humans understand and act in the world? How do oppressions along the lines of race, gender, sexuality, and nations intersect with capitalism? Is resistance desirable and/or possible?

Prerequisite: Enrollment is restricted to junior and senior sociology, global information and enterprise, and combined Latin American and Latin Studies/sociology majors, proposed majors, and minors, or by instructor permission.

SOCY 164T - Marx and Marxist Theory (5)

Along with studying Marx's anatomy of capitalist society, this course also explores the work of Marxist theorists from the early 20th century through the contemporary moment. (Formerly Social Theory and the Marxian Tradition.)

Prerequisite: Prerequisite(s): SOCY 105A or consent of instructor.

SOCY 166 - Economics for Non-Economists (5)

Fosters economic literacy among students who are not economics majors but are interested in the political and social ramifications of economic change. Emphasizes economic institutions and policy and is taught by case-study method, which requires active student participation.

Prerequisite: Enrollment is restricted to juniors and seniors.

SOCY 167 - Development and Underdevelopment (5)

Examines contemporary debates about development in the Third World: alternative meanings of development, recent work on the impact of colonial rule, how some economies have industrialized, ideas about agrarian change, and recent research on paths out of poverty. Students work in pairs to examine a development in one country since World War II. Course 15 recommended.

Prerequisite: Enrollment is restricted to sophomore, junior, and senior majors, proposed majors, and minors in sociology, anthropology, politics, global economics, global information and social enterprise, and Latin American studies/sociology combined majors.

SOCY 168 - Social Justice (5)

What is social justice? People answer this question differently, depending upon their sociological perspective. Using a combination of political philosophy and sociological studies, explores five perspectives on social justice within the

Western sociological tradition: utilitarianism, Marxism, liberal egalitarianism, communitarianism, and pluralism. Students pick a topic and learn to articulate different visions of socially just change based on these perspectives.

Prerequisite: Prerequisite(s): SOCY 105A.

SOCY 169 - Social Inequality (5)

A survey of theories and systems of social stratification focusing on such phenomena as race, class, power, and prestige.

Prerequisite: Enrollment is restricted to junior and senior sociology and Latin American studies/sociology combined majors.

SOCY 170 - Ethnicity and Race (5)

Examines the enduring and changing status of ethnic and racialized minority groups in the United States, such as Latina/os, African Americans, Asian Americans, indigenous peoples within the U.S., as intersecting, historically situated, and dynamically produced categories of social identity and organization. (Formerly Ethnic and Status Groups.)

Prerequisite: Prerequisite(s): SOCY 1 or SOCY 10 or CRES 10.

SOCY 170P - The Political Economy of Race (5)

Explores the enduring racial and economic legacies of slavery and colonialism in relation to contemporary social problems, with an emphasis on segregation, policing, the prison industrial complex, immigration, and borders.

Prerequisite: Prerequisite(s): SOCY 1 or SOCY 10 or SOCY 15 or CRES 10, or by permission of the instructor.

SOCY 171 - Exploring Global Inequality (5)

Seminar focusing on readings of key texts and recent research papers on several dimensions of global inequality (material, health, gender, cultural, migration) to find innovative ways of understanding the connections among different dimensions of inequality and of visualizing inequality in digital media. Students prepare visual presentations on contemporary social inequalities suitable for an online (for example, <http://ucatlas.ucsc.edu/>) or print atlas.

Prerequisite: Enrollment is restricted to seniors.

SOCY 172 - Sociology of Social Movements (5)

Through readings on social movements that span the 20th century, course examines the causes of popular mobilizations, their potential for rapid social change, and the theories developed to understand and explain their role in modern social life.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined majors.

SOCY 173 - Water (5)

Analyzes access to clean water, both in the American West and global South. Reviews water quality, pivotal role of water in settlement and society, history and contemporary inequalities, water supplies, international conflict over water, climate change, and human use of water.

Prerequisite: Enrollment is restricted to junior and senior sociology majors, and proposed majors, and minors in sociology, environmental studies, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 173X - Water and Sanitation Justice (5)

In the global North and South, inequalities in water and sanitation are issues of justice as much as income. One billion people worldwide lack safe water, 2.5 billion lack basic sanitation. Course explores: North-South comparison, water governance, human rights, poverty, climate justice, irrigation, and more.

SOCY 174 - Twenty-First-Century African American Social Structure (5)

A sociological overview of African American society in the 21st century. The changing patterns of social/cultural organization, class structure, and modes of political action are analyzed. This analysis is located within the framework of migration, urbanization, and social struggle among black Americans.

Prerequisite: Prerequisite(s): SOCY 10 or SOCY 20.

SOCY 176 - Women and Work (5)

Examines the history of women and work; women's current conditions of work and political, economic, and social factors affecting these conditions; means by which women may shape working conditions including contributing leadership, developing policies, building unity, and creating alliances.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, feminist studies, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 176A - Work and Inequality (5)

Addresses how work is organized and shapes life changes. Covers: the history of paid work; the impact of technology; race/class/gender at work; professional and service work; work and family; collective responses to work; and challenges of work in a globalizing economy. (Formerly Work and Society.)

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, community studies, global information and social enterprise, and Latin American studies/sociology combined majors.

SOCY 177 - Urban Sociology (5)

Historical and contemporary examination of urban life including community, race, geography, urban and suburban

cultures and lifestyles, stratification, housing, crime, economic and environmental issues, demographic changes, and global urbanization.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 177A - Latinos/as and the American Global City (5)

Examines roles of emerging Latino/a majorities in urban centers across the U.S. Explores the Latinization of U.S. cities and various factors affecting the life chances of Latinos/as including, but not limited to, immigration, segregation, social movements, and other forms of political participation.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, Latin American and latino studies, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 177E - Eco-Metropolis: Research Seminar in Urban and Environmental Studies (5)

Explores the intersection of cities and the environment through the emerging field of urban environmental studies. Focuses on varied and often contested efforts at urban sustainability in recent history. Draws on literatures in environmental history, environmental and urban sociology, geography, political ecology, and cultural studies.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, community studies, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 177G - Global Cities (5)

Explores how global cities have facilitated increasing integration of the diverse cultures and economies of the world. Using historical, sociological, and comparative methods, analyzes how these spaces both enable and constrain transnational flows of capital, labor, information, and culture.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, community studies, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 178 - Sociology of Social Problems (5)

Views problems in society not as given but as social constructs. Examines the ways in which conditions in society become identified and defined as problems and consequences that follow from such a process.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 178T - Special Topics in Sociology (5)

Taught on a rolling basis by faculty members with each offering varying by instructor. Topics are announced by the department.

Prerequisite: Prerequisite(s): SOCY 1 or SOCY 10 or SOCY 15. Enrollment is restricted to sophomores, juniors, and seniors.

SOCY 178Z - Disability and Society (5)

An in-depth exploration of Disability Studies, an interdisciplinary field of research that seeks to question and critique dominant Western understandings of disability and to advance discussions around issues of intersectionality, equality, inclusionary politics of access, and social justice.

SOCY 179 - Nature, Poverty, and Progress: Dilemmas of Development and Environment (5)

Concerns about environmental change, including global warming, threats to the ozone layer, and industrial pollution, raise questions about Third World development. Simple views of the relation between society and nature, such as blaming population growth, industrialization, or poor people, seem to preclude higher living standards. Uses debates and case studies to explore more subtle and optimistic views of social-natural relations.

Prerequisite: Enrollment is restricted to sophomore, junior, and senior majors, proposed majors, and minors in environmental studies, sociology, global information and social enterprise, and Latin American studies/sociology combined majors. SOCY 15 recommended.

SOCY 180 - Social Movements of the 1960s (5)

Examines the roots, development, and political outcomes of black civil rights organizations during the Sixties. Explores social and structural forces, mobilization of black communities, strategies and tactics used, nature of the relationships between various civil rights organizations, unity and disunity among organizations, leadership gains, and impact on race relations in the U.S.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined majors.

SOCY 184 - Hunger and Famine (5)

Why do famines happen? Why are some hungry and some over-fed? Recent advances in the understanding of food crises and chronic undernutrition are the focus of this course.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined.

SOCY 185 - Environmental Inequality (5)

Modern society not only assaults nature, it does so in ways that reproduce existing social inequalities. This course

reviews three types of contemporary environmental inequality (environmental racism, displacement, and privilege), and the processes that produced them, with a focus on industrialization, urbanization, and the rise of capitalism in Europe and the United States. Students may not receive credit for this course and Environmental Studies 147.

Prerequisite: Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, community studies, global information and social enterprise, environmental studies, and Latin American studies/sociology combined.

SOCY 187 - Feminist Theory (5)

Examination of shifts in 20th- and 21st-century feminist theory and epistemology. Considers various deconstructive challenges to second wave feminism based on the politics of race, ethnicity, nation, sexuality, and class. Focus changes regularly.

Prerequisite: Prerequisite(s): SOCY 1 or FMST 1. Enrollment is restricted to sophomores, juniors, and seniors.

SOCY 188A - Social Change in the Global Economy (5)

Explores local dimensions of globalization, focusing on experiencing more global divisions of labor in both industrialized and developing countries. Themes include: economic integration and dislocation; new forms of governance; globalizing consumption and culture; gender; and popular resistance.

Prerequisite: Prerequisite(s): SOCY 15. Enrollment is restricted to junior and senior majors, proposed majors, and minors in sociology, global information and social enterprise, and Latin American studies/sociology combined majors.

SOCY 193 - Field Study (5)

Provides for (department-sponsored) individual field study in the vicinity of the campus under the direct supervision of a faculty sponsor (as opposed to course 198 where faculty supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. Ordinarily call numbers for this course will not be issued after the first week of instruction. Students submit petition to sponsoring agency.

SOCY 193F - Field Study (2)

Provides for department-sponsored individual field study in the vicinity of campus under the direct supervision of a faculty sponsor. May not be counted toward major requirements. Students submit petition to sponsoring agency.

SOCY 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

SOCY 194F - Group Tutorial (2)

Small group study of a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

SOCY 195A - Senior Thesis (5)

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. The senior thesis satisfies the comprehensive requirement. Course is for independent thesis research and writing. Courses may be taken consecutively or concurrently. Prerequisite(s): course 103B. Students submit petition to sponsoring agency.

SOCY 195B - Senior Thesis (5)

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. The senior thesis satisfies the comprehensive requirement. Course is for independent thesis research and writing. Courses may be taken consecutively or concurrently. Prerequisite(s): course 103B. Students submit petition to sponsoring agency.

SOCY 195C - Senior Thesis (5)

Preparation of a senior thesis over one, two, or three quarters, beginning in any quarter. The senior thesis satisfies the comprehensive requirement. Course is for independent thesis research and writing. Courses may be taken consecutively or concurrently. Completion of course 195C (completion of the thesis) satisfies the W general education requirement. Prerequisite(s): course 103B and satisfaction of the Entry Level Writing and Composition requirements. Students submit petition to sponsoring agency.

SOCY 196A - Capstone: The Sociologist as Public Intellectual (5)

Students hear a selected group of faculty discuss their current research and how that research furthers public understanding and discussion of some vital contemporary social issue.

Prerequisite: Enrollment is restricted to junior and senior sociology majors.

SOCY 196B - Capstone: The Sociologist as Public Intellectual (5)

Students hear a selected group of faculty discuss their current research and how that research furthers public understanding and discussion of some vital contemporary social issue. This version of the capstone is only available to students who have consulted with the department and were determined to need the alternate Disciplinary Communications (DC) requirement. Students must consult with the department to determine if they cannot satisfy the DC requirement through the regular pathways, course 103B or courses 105A and 105B. Prerequisite(s): Consultation with department undergraduate adviser. Enrollment restricted to junior and senior sociology majors.

SOCY 196G - Project Practicum: Global Information and Social Enterprise (5)

Project practicum and evaluation are required for completion of major or minor in global information and social enterprise studies (GISES). Projects require approval in advance by the director of GISES. Completed projects must be uploaded electronically on the website or archive of the Everett Program.

Prerequisite: Prerequisite(s): SOCY 30C or SOCY 107B.

SOCY 198 - Independent Field Study (5)

Provides for (department-sponsored) individual study program off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. Ordinarily call numbers for this course will not be issued after the first week of instruction. Students submit petition to sponsoring agency.

SOCY 199 - Tutorial (5)

Advanced directed reading and research. Petitions may be obtained from the Sociology Department Office. Students submit petition to sponsoring agency.

SOCY 199F - Tutorial (2)

Advanced directed readings and research. Petitions may be obtained from the Sociology Department Office. Students submit petition to sponsoring agency.

Graduate

SOCY 201 - The Making of Classical Theory (5)

Examines the establishment of theory in the discipline of sociology. Introduces students to close readings and analysis of a core selection of social theory. Problematizes the construction, maintenance, and reproduction of a theoretical canon in sociology.

Prerequisite: Enrollment is restricted to sociology graduate students and by permission number.

SOCY 202 - Contemporary Sociological Theory (5)

Intensive survey of major tendencies in modern social thought, including functionalism, symbolic interactionism, ethnomethodology, critical theory, structuralism, phenomenology, neo-Marxism, and feminist theory.

Prerequisite: Enrollment is restricted to sociology graduate students and by permission number.

SOCY 203 - Sociological Methods (5)

Approaches methods as a series of conscious and strategic choices for doing various kinds of research. Introduces students to the epistemological questions of method in social sciences; to key issues in technique, particularly control, reliability, and validity; and to good examples of social research.

Prerequisite: Enrollment is restricted to sociology graduate students and by permission number.

SOCY 204 - Methods of Quantitative Analysis (5)

Students are provided with intuitive explanation of fundamental concepts in statistics and learn how to use statistics to answer sociological questions. Experience and

guidance in using computers to efficiently analyze data are provided.

Prerequisite: Enrollment is restricted to sociology graduate students and by permission number.

SOCY 205 - Field Research Methods (5)

Gives students first-hand experience doing fieldwork with an emphasis on participant observation and some interviewing. Students submit weekly field notes and a final project analysis. At seminar meetings, field experiences and relevant literature are examined.

Prerequisite: Enrollment is restricted to sociology graduate students and by permission number.

SOCY 206 - Comparative Historical Methods (5)

Overview of research strategies and methods used in historical and social sciences. Students read works exemplifying a variety of analytical approaches. Written assignments cultivate critical skills, weighing of tradeoffs inherent in all methodological choices, and elaboration of hypothetical research designs.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 208 - Writing Practicum (5)

Writing intensive course designed to facilitate the completion of the master's thesis, orals field statement, or the dissertation in sociology. The seminar is convened by a faculty member in conjunction with students and their adviser or appropriate committee chair. Students are expected to produce and present drafts of work completed in the seminar.

Prerequisite: Enrollment is restricted to sociology graduate students and by permission number.

SOCY 209 - The Analysis of Cultural Forms (5)

Examines material and symbolic forms such as media products, cultural artifacts, language, nonverbal communication and social practices using discourse, textual, content, interpretive, and conversation analyses as well as ethnography and different channels of communication. Theoretically, relies on cultural studies, communication studies, cultural sociology, film studies, and ethnomethodology.

Prerequisite: Enrollment is restricted to sociology graduate students.

SOCY 220 - Global Transformation: Macrosociological Perspectives (5)

Classical concepts and contemporary approaches in macrosociology, the study of large-scale, long term social change. Readings drawn primarily from the Marxian and Weberian traditions (new institutionalism, varieties of neo-Marxism, environmental history, state centrism) as they focus on agrarian and industrial structures and commodity chains; household, village, and neighborhood organization; social movements and revolutions; culture, ideology, and

consciousness; policy analysis; comparative urban, national, and civilizational development.

Prerequisite: Enrollment is restricted to sociology graduate students.

SOCY 222 - Political Sociology (5)

A survey of major works and themes in the relationship of politics and society, with primary emphasis on the compatibilities and contradictions of pluralist, elite, and class perspectives on the state.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 223 - Sociology of the Environment (5)

Advanced treatment of the dominant ideas of nature and the environment in the West and their relationship to the development of Western capitalism. Leading Western theories of environmental crisis and their relation with ideologies of environmentalism and environmental movements.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 224 - Globalization: Theories and Social Movements (5)

Examines the structures, processes, and movements associated with globalization processes. Reviews political economy theories, cultural theories systems, state industrial policies, and popular responses to globalization. Also assesses contribution of resistance movements informed by class, ethno-nationalism, religion, or gender.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 225 - Political Economy for Sociologists (5)

Examines rudiments of historical materialism in light of advances in cultural and ecological Marxism. Basic categories of Marxist political economy. Thematic focus on the first and second contradictions of capitalism in world economy today.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 227 - Learning from Environmental Historians (5)

Looks at several major themes in the sociology of the environment and asks how the works of environmental history address those themes. Includes reflections on how history as a method interrogates social questions. Possible themes include: sustainability; social justice; universalism vs. particularity; city and country; and social movements.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 229 - Work and Labor Markets in the New Economy (5)

Focuses on the interaction of work restructuring and existing race/class/gender inequalities. Themes include: the labor process and theories of consent; labor market segmentation; job and occupational segregation; information technologies, flexible work, and post-industrialism; flexible employment relations; and low-wage service and labor markets.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 230 - Theory and Method in the Sociology of Marx (5)

Examines theoretical and methodological implications of Marxist theory for empirical social research. Analyzes how historians and social scientists apply Marxist method in explaining society, social change, globalization, culture, and late capitalism. Goal is to assist students to employ Marxist theory and method creatively in their research projects.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 240 - Inequality and Identity (5)

Explores recent theoretical and empirical studies of race, class, gender, and sexuality with an emphasis on the production of identities and their relationship to processes and structures of power in a postcolonial context.

Prerequisite: Enrollment is restricted to sociology graduate students.

SOCY 241 - Cross-National and Cross-Cultural Research (5)

Seminar examining theoretical and methodological issues in doing cross-national and cross-cultural research. In addition to a consideration of different research paradigms and approaches, representative works from each comparative tradition are examined.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 242 - Feminist Research Seminar (5)

Provides scholarly support to students doing feminist research. Examines issues concerning conceptualization of feminism and feminist research. Explores relation of feminist research to intersections of gender, class, and race; to the self; to power; and to transformative social praxis. Students present and are given assistance with their work, as well as listen to, read, and assist with the work of others.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 244 - Race and Ethnicity (5)

A critical survey of the theoretical issues of persistence and change, public policy, and recent empirical studies in the field of race and ethnic relations. Readings introduce comparative race relations and a historical background of major theoretical paradigms in the field which purport to explain race and ethnic relations in general and race relations in America specifically.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 245 - Feminist Theory (5)

Examination of shifts in 20th- and 21st-century feminist theory and epistemology. Explores the decentering of universalist feminist theories and asks what constitutes feminist theory after gender has been decentered. Considers various deconstructive challenges to second-wave feminist theory based on the politics of race, ethnicity, nation, sexuality, and class. Focus changes regularly.

Prerequisite: Enrollment is restricted to sociology graduate students.

SOCY 246 - Class, Culture, and Movement (5)

Analyzes impact of ethnicity, gender, and religion on the class situation of laboring people in a globalized economy by intensive reading and critique of classic studies, explaining how social movements reflect combinations of social relations and cultural practices.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 247 - Race and Class (5)

Introduces the student to the recent literature on race and class. Covers several different theoretical perspectives including internal colonialism, labor market segmentation theories, racial formation, and neo-gramscian cultural analyses. In addition to study of theory, also compares theoretical perspectives to the historical experience of minority groups, in particular, blacks, Hispanics, and Asians.

Prerequisite: Enrollment is restricted to sociology graduate students.

SOCY 249 - Feminisms and Cultural Politics (5)

Focuses on the role feminist discourses play in contemporary cultural politics with the main focus on the politics of sex, sexuality, and sex work. Begins with considerations of (mis)representations of feminisms in popular cultures; considers the relationship between academic and popular feminisms; and interrogates the meaning of terms *post-feminism* and *third-wave feminism*.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 250 - Course Design and Grant-Writing Seminar (5)

A professional training seminar devoted to the philosophical, conceptual, and practical issues of course design, pedagogy, and grant writing. Topics covered: institutional contexts; curriculum (including syllabi, course content, assignments, evaluation); pedagogy; teaching as work/labor process; grant writing; budgets.

Prerequisite: Enrollment is restricted to sociology graduate students.

SOCY 252 - Symbolic Interactionism and Sociology of Emotions (5)

Examines classic and contemporary theories and concepts that play a major role in sociological studies of identity, symbolic and social interaction, and the sociology of emotions. Examines how cultural forms, rules, and rituals define, structure, and mediate emotions and how identities are situated within social institutions.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 253 - Race, Crime, and Justice (5)

An introduction to comparative and historical analyses of relations between race and the criminal justice system.

Specific topics include defining race/ethnicity, sentencing disparities, jury nullification, jury selection and decisions, prosecutorial misconduct, government's charging and investigative discretions, and other racially biased law enforcement practices and criminal court processes. Also covers a number of highly publicized trials that involved unmistakable elements of race and racism such as Chin, King, Simpson, and Unabomber cases. Students are also exposed to World Wide Web (Internet) to learn how to do research in the field of criminal justice.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 255 - Engaging Cultural Studies (5)

Examines feminist and ethnic studies production, appropriation, and transformation of cultural studies theories and methodologies. Considers the utility of various theoretical apparatuses and methodological strategies employed in the interdisciplinary site that combines feminist, ethnic, and cultural studies.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 256 - Urban Sociology (5)

Introduction to core writings and key theoretical paradigms in urban sociology. Examines the history and contemporary conditions of cities in the U.S. and the urban experience. Urbanization, suburbanization, community, social inequality, urban politics, relationship between the built environment and human behavior.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 257 - Colonialism, International Law, and Global Justice (5)

Examines colonialism, war crimes, crimes against humanity, and legal remedies, and the role of the International Criminal Court (ICC); traces the history of colonial expansionism, starting from the Roman Empire to the present American imperial dominance in global politics.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 258 - Global Lay Justice Systems and Direct Democracy (5)

Introduces historical analysis of lay justice participation. Examines global exploration of the use of lay judge institutions in citizen's movements and the assumption that juries are a derivative institution of democratic ideals. Focuses on corporate media creation of anti-jury sentiment.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 259 - Space and the Politics of Difference (5)

Brings together the fields of sociology and geography to explore the complex and multiple ways of thinking together space and social difference. Course texts examine the co-constitution of space with bodies, subjectivities, and social formations.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 260 - Culture, Knowledge, Power (5)

An introduction to theoretical approaches and exemplary studies of culture, knowledge, and power which critically interrogate the relationship between cultural formations and the production, circulation, and meaning of knowledges, materials, artifacts, and symbolic forms. Explores the concrete ways that power is organized and operates through different forms and sites, how it interpolates with other forms of power, and examines knowledges and culture as specific forms of power and sites of political struggle.

Prerequisite: Enrollment is restricted to sociology graduate students.

SOCY 261 - Sociology of Knowledge (5)

Explores three main issues: the social determination of knowledge, including natural science; the character of intellectual labor and intellectuals as a social group; the role of organized knowledge and knowledge industries in contemporary social change. Texts examined include class-based theories (Lukacs, Mannheim, Gramsci), feminist standpoint analysis (Smith, Harding, etc.), and theories of postmodern culture (Lyotard, Harvey, etc.).

Prerequisite: Enrollment is restricted to graduate students.

SOCY 262 - Cultural Practice and Everyday Life (5)

Examines contemporary debates about the role of mass produced expressive symbols in modern industrial societies, and the circumstances of cultural production for its impact on the creation, organization, and use of cultural artifacts. Concern with the use and experience of popular symbols for the ways that their use involves the creation of meanings and the role of such meanings in the social organization of society.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 263 - Cultural Politics of Difference (5)

Considers the cultural turn and the turn to difference in understanding relations of power and struggles over representation in studies of race, media, and culture. Examines national identity, difference, subjectivity, and authenticity, especially as they bear on quests to create new identifications, alignments, and efforts to protect existing identities.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 264 - Science, Technology, and Medicine (5)

Explores social and cultural perspectives on science, technology, and medicine. Analyzes theoretical approaches that open up black boxes of scientific and biomedical knowledge, including the politics of bodies, objects, and health/illness. Links are made to medical sociology.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 268A - Science and Justice: Experiments in Collaboration (5)

Considers the practical and epistemological necessity of collaborative research in the development of new sciences and technologies that are attentive to questions of ethics and justice. Enrollment is by permission of instructor. Enrollment is restricted to graduate students.

SOCY 268B - Science and Justice Research Seminar (5)

Provides in-depth instruction in conducting collaborative interdisciplinary research. Students produce a final research project that explores how this training might generate research that is more responsive to the links between questions of knowledge and questions of justice. Prerequisite(s): Sociology 268A, Biomolecular Engineering 268A, Feminist Studies 268A, or Anthropology 267A. Enrollment is by permission of instructor. Enrollment is restricted to graduate students.

SOCY 282 - Social Policy Research (5)

Policy research. Covers a variety of theoretical perspectives found in policy studies. Surveys various methodological approaches used in policy research. Theories and methods linked to research agendas on the various phases of the policy life cycle. Students are required to design a research proposal.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 290 - Advanced Topics in Sociological Analysis (5)

The topics to be analyzed each year vary with the instructor but focus upon a specific research area. Enrollment restricted to graduate students by consent of the instructor.

SOCY 293 - Going on the Job Market (5)

A seminar devoted to the practical problems of securing a job as a professional sociologist. Topics covered: researching colleges, universities, and public and private organizations that employ sociologists; designing a curriculum vitae; writing an application letter; preparing a job talk; handling questions during the interview process; the etiquette of visiting (and its aftermath); finding out about them; and the terms of employment: what is negotiable and what is not.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 294 - Writing for Social Scientists (5)

Seminar on the genres of social science writing, and the problems of starting and finishing a publishable thesis, book, or article. For advanced graduate students working on the composition of their dissertations and journal articles.

Prerequisite: Enrollment is restricted to graduate students.

SOCY 297 - Independent Study (5)

Students submit petition to sponsoring agency.

SOCY 299 - Thesis Research (5)

Students submit petition to sponsoring agency.

SPAN - SPANISH

Lower-Division

SPAN 1 - First-Year Spanish (5)

The first-year program is aimed at developing proficiency in Spanish. Listening, speaking, reading, and writing are addressed through classroom practice and supplemented by language laboratory work. Classes are taught entirely in Spanish and are held three days a week. (Formerly Instruction in the Spanish Language.)

Prerequisite: Prerequisite(s): Placement into Spanish 1 via the online Spanish Placement Examination.

SPAN 1A - Accelerated Beginning Spanish (5)

The first part of a sequence (courses 1A and 1B) that covers first-year Spanish in two quarters. Taught entirely in Spanish at an accelerated pace. Aimed at developing students' proficiency in speaking, listening, reading, and writing.

Prerequisite: Prerequisite(s): Placement into Spanish 1A via the online Spanish Placement Examination.

SPAN 1B - Accelerated Beginning Spanish (5)

The second part of a sequence (courses 1A and 1B) that covers first-year Spanish in two quarters. Taught entirely in Spanish at an accelerated pace. Aimed at developing students' proficiency in speaking, listening, reading, and writing.

Prerequisite: Prerequisite(s): SPAN 1A.

SPAN 2 - First-Year Spanish (5)

The first-year program is aimed at developing proficiency in Spanish. Listening, speaking, reading, and writing are addressed through classroom practice and supplemented by language laboratory work. Classes are taught entirely in Spanish and are held three days a week. (Formerly Instruction in the Spanish Language.)

Prerequisite: Prerequisite(s): SPAN 1 or placement into Spanish 2 via the online Spanish Placement Examination.

SPAN 3 - First-Year Spanish (5)

The first-year program is aimed at developing proficiency in Spanish. Listening, speaking, reading, and writing are addressed through classroom practice and supplemented by language laboratory work. Classes are taught entirely in Spanish and are held three days a week. (Formerly Instruction in the Spanish Language.)

Prerequisite: Prerequisite(s): SPAN 2 or placement into Spanish 3 via the online Spanish Placement Examination.

SPAN 4 - Second-Year Spanish (5)

Includes comprehensive grammar review, composition, readings, and discussion. Reading and audiovisual material

deal with various sociopolitical and cultural issues in the Spanish-speaking world. Classes are conducted in Spanish.

Prerequisite: Prerequisite(s): SPAN 1B or SPAN 3 or placement into Spanish 4 via the online Spanish Placement Examination.

SPAN 5 - Second-Year Spanish (5)

Includes comprehensive grammar review, composition, readings, and discussion. Reading and audiovisual material deal with various socio-political and cultural issues in the Spanish-speaking world. Classes are conducted in Spanish.

Prerequisite: Prerequisite(s): SPAN 4 or placement into Spanish 5 via the online Spanish Placement Examination.

SPAN 5M - Medical Spanish (5)

Students learn medical vocabulary, useful expressions, suitable grammatical structures, and cultural background to be able to interact with Spanish-speaking patients and doctors. Medical Spanish fulfills language requirement for the health sciences and human biology majors.

Prerequisite: Prerequisite(s): SPAN 4; or SPHS 4, or SPHS 5, or SPHS 6; or placement into Spanish 5 via the online Spanish Placement Examination. Enrollment is restricted to health sciences and human biology majors.

SPAN 6 - Second-Year Spanish (5)

Increases oral and written proficiency using authentic reading materials which focus on such topics as social class, ethnicity, education, religion, economic, and political developments in the Spanish-speaking world.

Prerequisite: Prerequisite(s): SPAN 5 or SPAN 5M or placement into Spanish 6 via the online Spanish Placement Examination.

SPAN 94 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

SPAN 99 - Tutorial (5)

Students submit petition to sponsoring agency.

SPAN 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

SPAN 114 - Advanced Conversation and Composition (5)

Advanced conversation and composition based on extensive readings in the humanities and social sciences. Students interested in this course who have not taken the prerequisite should meet with the instructor prior to the first class meeting.

Prerequisite: Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements; SPAN 6, or SPAN

56, or SPHS 6, or placement into Spanish 114 via the online Spanish Placement Examination.

SPAN 140 - Sounds of Spanish (5)

Examines the sound system of Spanish, compares the English and Spanish systems of pronunciation, and teaches the phonetic/phonological variation across dialects of Spanish.

Prerequisite: Prerequisite(s): SPAN 6 or SPHS 6; and LING 50.

SPAN 150 - Topics in Hispanic Linguistics: Introduction to Hispanic Linguistics (5)

Taught in Spanish. Students learn the major properties of the Spanish language from a linguistics perspective. Topics covered include: phonetics/phonology, morphology, and syntax. (Formerly Languages 150.)

Prerequisite: Prerequisite(s): LING 50; and SPAN 6 or SPHS 6 or equivalent Spanish proficiency.

SPAN 151 - Topics in Hispanic Linguistics: Varieties of Spanish (5)

Taught in Spanish. Explores the linguistic variety of the Spanish language in the Iberian Peninsula, the former Spanish colonies, and the Americas from a descriptive, synchronic perspective. Issues of languages in contact, variation in speech communities, and bilingualism are also introduced.

Prerequisite: Prerequisite(s): SPAN 150. Enrollment is restricted to senior Spanish studies majors.

SPAN 152 - Topics in Hispanic Linguistics: Spanish in the U.S. (5)

Taught in Spanish. Serves as a linguistic introduction to the varieties of Spanish that are currently spoken in the United States. Some central topics include: code-switching, language maintenance, and language contact phenomena. (Formerly Languages 152.)

Prerequisite: Prerequisite(s): SPAN 150. Enrollment is restricted to senior Spanish studies majors.

SPAN 153 - Topics in Hispanic Linguistics: Spanish as a Second Language (5)

Taught in Spanish. Examines the Spanish language as it is acquired and used by non-native speakers. Provides an overview of language-teaching methodologies and in-depth treatment of areas of Spanish grammar/lexicon that are generally problematic for English-speaking learners.

Prerequisite: Prerequisite(s): SPAN 150. Enrollment is restricted to senior Spanish studies majors.

SPAN 154 - Topics in Hispanic Linguistics: Spanish Pragmatics (5)

Explores how Spanish is used in context by speakers to achieve particular meanings and to realize various speech acts (e.g., requests, apologies, etc.) in socially appropriate ways.

Pragmatic variation across the Spanish-speaking world is examined in depth.

Prerequisite: Prerequisite(s): SPAN 6 or SPHS 6; and SPAN 150. Enrollment is restricted to juniors and seniors majoring in Spanish studies, language studies or linguistics.

SPAN 156A - The Language of Latin America Cinema (5)

Explores Latin American culture through its cinematic art. Students are exposed to and participate in discussion, analysis, and commentary on important social, historical, and political issues presented in the films. Provides a greater understanding of Latin America, and works toward advanced communicative proficiency and comprehension of linguistic variations in countries such as Cuba, Argentina, México, Bolivia, Chile, and others.

Prerequisite: Prerequisite(s): SPAN 6 or SPHS 6 or placement into Spanish 156A via the online Spanish Placement Examination.

SPAN 156E - Spanish Culture (5)

A broad survey of Spanish cultural topics, including history, politics, religions, art forms, music, and films. It is based on extensive conversations, discussion, and composition. Particular emphasis is placed on key changes that have occurred during the 20th century in Spain. Classes conducted through commentary on texts read (or viewed), oral presentations, and debate. Recommended for students preparing to go to Spain with EAP.

Prerequisite: Prerequisite(s): SPAN 6 or SPHS 6 or placement into Spanish 156E via the online Spanish Placement Examination.

SPAN 156F - El Humor en Espanol (5)

Topic-oriented language course on sociopolitical and historical issues as seen through humor in different genres and media. Topics include Mafalda and Condorito (comic strips), Rius (collage of comic strips, photographs and original documents), Continflas and Almodovar (cinema), El Teatro Campesino (theater), Ana L., Vega (literature), Les Luthiers (song and music). Course deals with written and oral discourse pertaining to the following Spanish language varieties: Rio de la Plata, Mexican, Caribbean, U.S., and Peninsular. Intensive writing and speaking in Spanish.

Prerequisite: Prerequisite(s): SPAN 6 or SPHS 6 or placement into Spanish 156F via the online Spanish Placement Examination.

SPAN 156J - Contemporary Central America (5)

Introduces Central American cultures, including an overview of historical, political, and socioeconomic development, and cultural products, such as literature, film, and visual arts. Emphasis placed on the forces that shaped contemporary Central America, cultural and ethnic diversity, identity, revolutionary processes, diaspora, and building democracy in post-civil conflict societies. Draws attention to the linguistic features of Central American variations of Spanish. The class is conducted in Spanish with high expectations to enhance

oral and written proficiency through writing assignments, research tasks, group presentations, analysis, discussion, and debate.

Prerequisite: Prerequisite(s): SPAN 6 or SPHS 6 or placement into Spanish 156J via the online Spanish Placement Examination.

SPAN 156K - Spanish Discourse Analysis (5)

Focuses on the main linguistic approaches that have discourse (i.e. pieces of talk larger than a sentence) as their main object of study. Reviews the theoretical foundations of each approach and the main tools used, with special attention to those studies developed about Spanish in all its varieties.

Prerequisite: Prerequisite(s): SPAN 6 or SPHS 6, and LING 50.

SPAN 156M - Mexico and the Southwest (5)

An interdisciplinary survey of the cultural history of the Mexican people in both Mexico and the U.S. Southwest. Topics include literature, art, folklore, oral tradition, music, politics, as well as everyday cultural manifestations. Conducted in Spanish. May be counted toward fulfillment of upper-division major requirements for Latin American and Latino studies and language studies. (Formerly Spanish for Spanish Speakers 125.)

Prerequisite: Prerequisite(s): SPAN 6 or SPHS 6 or equivalent Spanish proficiency.

SPAN 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

SPAN 199 - Tutorial (5)

Students submit petition to sponsoring agency.

SPAN 199F - Tutorial (2)

Students submit petition to sponsoring agency.

SPHS - SPANISH FOR HERITAGE SPEAKERS

Lower-Division

SPHS 4 - Spanish for Heritage Speakers (5)

Deals with orthography, lexicon development, morphology, syntax, and other linguistic topics as applied to the development of all language skills (listening, reading, speaking, and writing). Emphasizes reading and writing about well-known and pivotal authentic texts of varying genres and formats from the Spanish-speaking world. Emphasis is on the United States, Mexico, and Spain. Students need to use the

self-placement questionnaire posted on the Language Program web page.

Prerequisite: Prerequisite(s): Placement into Spanish for Heritage Speakers 4 via the online Spanish Placement Examination.

SPHS 5 - Spanish for Heritage Speakers (5)

Deals with orthography, lexicon development, morphology, syntax, and other linguistic topics as applied to the development of all language skills (listening, reading, speaking, and writing). Emphasizes reading and writing about well-known and pivotal authentic texts of varying genres and formats from the Spanish-speaking world. Emphasis is on Central America and the Caribbean.

Prerequisite: Prerequisite(s): SPHS 4 or by consent of program coordinator.

SPHS 6 - Spanish for Heritage Speakers (5)

Deals with orthography, lexicon development, morphology, syntax, and other linguistic topics as applied to the development of all language skills (listening, reading, speaking, and writing). Emphasizes reading and writing about well-known and pivotal authentic texts of varying genres and formats from the Spanish-speaking world. Emphasis is on South America.

Prerequisite: Prerequisite(s): SPHS 5.

SPHS 94 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor. Students submit petition to sponsoring agency.

SPHS 99 - Tutorial (5)

Students submit petition to sponsoring agency.

SPHS 99F - Tutorial (2)

Students submit petition to sponsoring agency.

Upper-Division

SPHS 115 - El ensayo lectura, análisis y redacción (5)

Centers on three areas: essay reading, essay analysis and interpretation, and essay writing. Student read representative essays by Latin American writers, analyze their discourse structure, and apply the lessons learned to their own writing.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; SPAN 6 or SPHS 6. Enrollment restricted to sophomore, junior, and senior Spanish studies majors.

SPHS 194 - Group Tutorial (5)

Provides a means for a small group of students to study a particular topic in consultation with a faculty sponsor.

SPHS 199 - Tutorial (5)

Students submit petition to sponsoring agency.

SPHS 199F - Tutorial (2)

Students submit petition to sponsoring agency.

STAT - STATISTICS

Lower-Division

STAT 5 - Statistics (5)

Introduction to statistical methods/reasoning, including descriptive methods, data-gathering (experimental design and sample surveys), probability, interval estimation, significance tests, one- and two-sample problems, categorical data analysis, correlation and regression. Emphasis on applications to the natural and social sciences. Students cannot receive credit for this course if they have already received credit for course 7. (Formerly AMS 5.)

STAT 7 - Statistical Methods for the Biological, Environmental, and Health Sciences (5)

Case-study-based introduction to statistical methods as practiced in the biological, environmental, and health sciences. Descriptive methods, experimental design, probability, interval estimation, hypothesis testing, one- and two-sample problems, power and sample size calculations, simple correlation and simple linear regression, one-way analysis of variance, categorical data analysis. (Formerly AMS 7.)

Prerequisite: Prerequisite(s): score of 300 or higher on the mathematics placement examination (MPE), or AM 3 or AM 6 or AM 11A or AM 15A or MATH 3 or MATH 11A or MATH 19A. Concurrent enrollment in STAT 7L is required.

STAT 7L - Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory (2)

Computer-based laboratory course in which students gain hands-on experience in analysis of data sets arising from statistical problem-solving in the biological, environmental, and health sciences. Descriptive methods, interval estimation, hypothesis testing, one- and two-sample problems, correlation and regression, one-way analysis of variance, categorical data analysis. (Formerly AMS 7L.)

Prerequisite: Prerequisite(s): score of 300 or higher on the mathematics placement examination (MPE), AM 3 or AM 6 or AM 11A or AM 15A or MATH 3 or MATH 11A or MATH 19A. Concurrent enrollment in STAT 7 is required.

STAT 80A - Gambling and Gaming (5)

Games of chance and strategy motivated early developments in probability, statistics, and decision theory. Course uses popular games to introduce students to these concepts, which underpin recent scientific developments in economics, genetics, ecology, and physics. (Formerly AMS 80A.)

STAT 80B - Data Visualization (5)

Introduces the use of complex-data graphical representations to extract information from data. Topics include: summary statistics, boxplots, histograms, dotplots, scatterplots, bubble plots, and map-creation, as well as visualization of trees and hierarchies, networks and graphs, and text. (Formerly AMS 80B.)

Upper-Division

STAT 108 - Linear Regression (5)

Covers simple linear regression, multiple regression, and analysis of variance models. Students learn to use the software package R to perform the analysis, and to construct a clear technical report on their analysis, readable by either scientists or nontechnical audiences. (Formerly AMS 156.)

Prerequisite: Prerequisite(s): STAT 132 and satisfaction of the Entry Level Writing and Composition requirements.

STAT 131 - Introduction to Probability Theory (5)

Introduction to probability theory and its applications. Combinatorial analysis, axioms of probability and independence, random variables (discrete and continuous), joint probability distributions, properties of expectation, Central Limit Theorem, Law of Large Numbers, Markov chains. Students cannot receive credit for this course and course 203 and Computer Engineering 107. (Formerly AMS 131.)

Prerequisite: Prerequisite(s): AM 11B or ECON 11B or MATH 11B or MATH 19B or MATH 20B.

STAT 132 - Classical and Bayesian Inference (5)

Introduction to statistical inference at a calculus-based level: maximum likelihood estimation, sufficient statistics, distributions of estimators, confidence intervals, hypothesis testing, and Bayesian inference. Students cannot receive credit for this course and course 206. (Formerly AMS 132.)

Prerequisite: Prerequisite(s): STAT 131 or CSE 107.

STAT 198 - Independent Study or Research (5)

Students submit petition to sponsoring agency.

STAT 198F - Independent Study or Research (2)

Students submit petition to sponsoring agency.

Graduate

STAT 200 - Research and Teaching in Statistics (3)

Focuses on basic teaching techniques for teaching assistants, including responsibilities and rights, leading discussion or lab sessions, presentation techniques, maintaining class records, and grading. Examines research and professional training, including use of library, technical writing, giving seminar and

conference talks, and ethical issues in science and engineering.

Prerequisite: Enrollment is restricted to graduate students.

STAT 202 - Linear Models in SAS (5)

Case study-based course teaches statistical linear modeling using the SAS software package. Teaches generalized linear models; linear regression; analysis of variance/covariance; analysis of data with random effects and repeated measures. (Formerly AMS 202.)

Prerequisite: Prerequisite(s): STAT 108 or STAT 208, or permission of instructor. Enrollment is restricted to graduate students.

STAT 203 - Introduction to Probability Theory (5)

Introduces probability theory and its applications. Requires a multivariate calculus background, but has no measure theoretic content. Topics include: combinatorial analysis; axioms of probability; random variables (discrete and continuous); joint probability distributions; expectation and higher moments; central limit theorem; law of large numbers; and Markov chains. Students cannot receive credit for this course and course 131 or Computer Engineering 107. (Formerly AMS 203.)

Prerequisite: Enrollment is restricted to graduate students, or by permission of the instructor.

STAT 204 - Introduction to Statistical Data Analysis (5)

Presents tools for exploratory data analysis (EDA) and statistical modeling in R. Topics include numerical and graphical tools for EDA, linear and logistic regression, ANOVA, PCA, and tools for acquiring and storing large data. No R knowledge is required. Enrollment is restricted to graduate students and by permission of instructor. (Formerly AMS 204.)

Prerequisite: Enrollment restricted to graduate students.

STAT 205 - Introduction to Classical Statistical Learning (5)

Introduction to classical statistical inference. Topic include: random variables and distributions; types of convergence; central limit theorems; maximum likelihood estimation; Newton-Raphson, Fisher scoring, Expectation-Maximization, and stochastic gradient algorithms; confidence intervals; hypothesis testing; ridge regression, lasso, and elastic net.

Prerequisite: Prerequisite(s): STAT 203. Enrollment is restricted to graduate students.

STAT 205B - Intermediate Classical Inference (5)

Statistical inference from a frequentist point of view. Properties of random samples; convergence concepts applied to point estimators; principles of statistical inference; obtaining and evaluating point estimators with particular attention to maximum likelihood estimates and their properties; obtaining and evaluating interval estimators; and hypothesis testing methods and their properties. (Formerly AMS 205B.)

Prerequisite: Prerequisite(s): STAT 203 or equivalent. Enrollment is restricted to graduate students.

STAT 206 - Applied Bayesian Statistics (5)

Introduces Bayesian statistical modeling from a practitioner's perspective. Covers basic concepts (e.g., prior-posterior updating, Bayes factors, conjugacy, hierarchical modeling, shrinkage, etc.), computational tools (Markov chain Monte Carlo, Laplace approximations), and Bayesian inference for some specific models widely used in the literature (linear and generalized linear mixed models). (Formerly AMS 206.)

Prerequisite: Prerequisite(s): STAT 131 or STAT 203, or by permission of the instructor. Enrollment is restricted to graduate students.

STAT 206B - Intermediate Bayesian Inference (5)

Bayesian statistical methods for inference and prediction including: estimation; model selection and prediction; exchangeability; prior, likelihood, posterior, and predictive distributions; coherence and calibration; conjugate analysis; Markov Chain Monte Carlo methods for simulation-based computation; hierarchical modeling; Bayesian model diagnostics, model selection, and sensitivity analysis. (Formerly AMS 206B.)

Prerequisite: Prerequisite(s): STAT 203. Enrollment is restricted to graduate students; undergraduates may enroll by permission of the instructor.

STAT 207 - Intermediate Bayesian Statistical Modeling (5)

Hierarchical modeling, linear models (regression and analysis of variance) from the Bayesian point of view, intermediate Markov chain Monte Carlo methods, generalized linear models, multivariate models, mixture models, hidden Markov models. (Formerly AMS 207.)

Prerequisite: Prerequisite(s): STAT 206 or STAT 206B; enrollment is restricted to graduate students or by permission of instructor.

STAT 208 - Linear Statistical Models (5)

Theory, methods, and applications of linear statistical models. Review of simple correlation and simple linear regression. Multiple and partial correlation and multiple linear regression. Analysis of variance and covariance. Linear model diagnostics and model selection. Case studies drawn from natural, social, and medical sciences. Course 205 strongly recommended as a prerequisite. Undergraduates are encouraged to take this class with permission of instructor. (Formerly AMS 256.)

Prerequisite: Prerequisite(s): course STAT 205B or permission of instructor. Enrollment is restricted to graduate students.

STAT 209 - Generalized Linear Models (5)

Theory, methods, and applications of generalized linear statistical models; review of linear models; binomial models for binary responses (including logistical regression and

probit models); log-linear models for categorical data analysis; and Poisson models for count data. Case studies drawn from social, engineering, and life sciences. (Formerly AMS 274.)

Prerequisite: Prerequisite(s): STAT 205B or STAT 256. Enrollment is restricted to graduate students.

STAT 222 - Bayesian Nonparametric Methods (5)

Theory, methods, and applications of Bayesian nonparametric modeling. Prior probability models for spaces of functions. Dirichlet processes. Polya trees. Nonparametric mixtures. Models for regression, survival analysis, categorical data analysis, and spatial statistics. Examples drawn from social, engineering, and life sciences. (Formerly AMS 241.)

Prerequisite: Prerequisite(s): STAT 207. Enrollment is restricted to graduate students.

STAT 223 - Time Series Analysis (5)

Graduate level introductory course on time series data and models in the time and frequency domains: descriptive time series methods; the periodogram; basic theory of stationary processes; linear filters; spectral analysis; time series analysis for repeated measurements; ARIMA models; introduction to Bayesian spectral analysis; Bayesian learning, forecasting, and smoothing; introduction to Bayesian Dynamic Linear Models (DLMs); DLM mathematical structure; DLMs for trends and seasonal patterns; and autoregression and time series regression models. (Formerly AMS 223.)

Prerequisite: Prerequisite(s): STAT 206B, or by permission of instructor. Enrollment is restricted to graduate students.

STAT 224 - Bayesian Survival Analysis and Clinical Design (5)

Introduction to Bayesian statistical methods for survival analysis and clinical trial design: parametric and semiparametric models for survival data, frailty models, cure rate models, the design of clinical studies in phase I/II/III. (Formerly AMS 276.)

Prerequisite: Prerequisite(s): STAT 207 or by permission of instructor. Enrollment is restricted to graduate students.

STAT 225 - Multivariate Statistical Methods (5)

Introduction to statistical methods for analyzing data sets in which two or more variables play the role of outcome or response. Descriptive methods for multivariate data. Matrix algebra and random vectors. The multivariate normal distribution. Likelihood and Bayesian inferences about multivariate mean vectors. Analysis of covariance structure: principle components, factor analysis. Discriminant, classification and cluster analysis. (Formerly AMS 225.)

Prerequisite: Prerequisite(s): STAT 206 or STAT 206B, or by permission of instructor. Enrollment is restricted to graduate students.

STAT 226 - Spatial Statistics (5)

Introduction to the analysis of spatial data: theory of correlation structures and variograms; kriging and Gaussian processes; Markov random fields; fitting models to data; computational techniques; frequentist and Bayesian approaches. (Formerly AMS 245.)

Prerequisite: Prerequisite(s): STAT 207. Enrollment is restricted to graduate students.

STAT 229 - Advanced Bayesian Computation (5)

Teaches some advanced techniques in Bayesian Computation. Topics include Hamiltonian Monte Carlo; slice sampling; sequential Monte Carlo; assumed density filtering; expectation propagation; stochastic gradient descent; approximate Markov chain Monte Carlo; variational inference; and stochastic variational inference. (Formerly AMS 268.)

Prerequisite: Prerequisite(s): STAT 207, or by permission of the instructor. Enrollment is restricted to graduate students; undergraduates may enroll by permission of the instructor.

STAT 243 - Stochastic Processes (5)

Includes probabilistic and statistical analysis of random processes, continuous-time Markov chains, hidden Markov models, point processes, Markov random fields, spatial and spatio-temporal processes, and statistical modeling and inference in stochastic processes. Applications to a variety of fields. (Formerly AMS 263.)

Prerequisite: Prerequisite(s): STAT 205B or STAT 246, or by permission of instructor.

STAT 244 - Bayesian Decision Theory (5)

Explores conceptual and theoretical bases of statistical decision making under uncertainty. Focuses on axiomatic foundations of expected utility, elicitation of subjective probabilities and utilities, and the value of information and modern computational methods for decision problems. (Formerly AMS 221.)

Prerequisite: Prerequisite(s): STAT 206. Enrollment is restricted to graduate students.

STAT 246 - Probability Theory with Markov Chains (5)

Introduction to probability theory: probability spaces, expectation as Lebesgue integral, characteristic functions, modes of convergence, conditional probability and expectation, discrete-state Markov chains, stationary distributions, limit theorems, ergodic theorem, continuous-state Markov chains, applications to Markov chain Monte Carlo methods. (Formerly AMS 261.)

Prerequisite: Prerequisite(s): STAT 205B or by permission of instructor. Enrollment is restricted to graduate students.

STAT 266A - Data Visualization and Statistical Programming in R (3)

Introduces students to data visualization and statistical programming techniques using the R language. Covers the basics of the language, descriptive statistics, visual analytics, and applied linear regression. Enrollment is by permission of the instructor. (Formerly Applied Math and Statistics 266A and Computer Science 266A.)

STAT 266B - Advanced Statistical Programming in R (3)

Teaches students already familiar with the R language advanced tools such as interactive graphics, interfacing with low-level languages, package construction, debugging, profiling, and parallel computation. (Formerly Applied Math and Statistics 266B and Computer Science 266B.)

Prerequisite: Prerequisite(s): STAT 266A or CSE 266A.

STAT 266C - Introduction to Data Wrangling (3)

Introduces students to concepts and tools associated with data collection, curation, manipulation, and cleaning including an introduction to relational databases and SQL, regular expressions, API usage, and web scraping using Python. (Formerly Applied Math and Statistics 266C and Computer Science 266C.)

Prerequisite: Prerequisite(s): STAT 266A or CSE 266A.

STAT 280B - Seminars in Statistics (2)

Weekly seminar series covering topics of current research in statistics.

Prerequisite: Enrollment is restricted to graduate students.

STAT 280D - Seminar in Bayesian Statistical Methodology (2)

Weekly seminar/discussion group on Bayesian statistical methods, covering both analytical and computational approaches. Participants present research progress and finding in semiformal discussions. Students must present their own research on a regular basis. (Formerly AMS 280D.)

Prerequisite: Enrollment is restricted to graduate students.

STAT 285 - Seminar in Career Skills (2)

Seminar in career skills for applied mathematicians and statisticians. Learn about professional activities such as the publication process, grant proposals, and the job market.

Prerequisite: Enrollment is restricted to graduate students, typically within two years of their expected Ph.D. completion date.

STAT 291 - Advanced Topics in Bayesian Statistics (3)

Advanced study of research topics in the theory, methods, or applications of Bayesian statistics. The specific subject depends on the instructor. Enrollment is restricted to graduate students and by permission of instructor. (Formerly AMS 291.)

STAT 296 - Masters Project (2)

Independent completion of a masters project under faculty supervision. Students submit petition to sponsoring agency. Enrollment is restricted to graduate students.

STAT 297A - Independent Study or Research (5)

Independent study or research under faculty supervision. Students submit petition to sponsoring agency. Enrollment is restricted to graduate students.

STAT 297B - Independent Study or Research (10)

Independent study or research under faculty supervision. Students submit petition to sponsoring agency. Enrollment is restricted to graduate students.

STAT 297C - Independent Study or Research (15)

Independent study or research under faculty supervision. Students submit petition to sponsoring agency. Enrollment is restricted to graduate students.

STAT 297F - Independent Study (2)

Independent study or research under faculty supervision. Students submit petition to sponsoring agency. Enrollment is restricted to graduate students.

STAT 299A - Thesis Research (5)

Thesis research under faculty supervision. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

STAT 299B - Thesis Research (10)

Thesis research under faculty supervision. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

STAT 299C - Thesis Research (15)

Thesis research under faculty supervision. Students submit petition to sponsoring agency. Enrollment restricted to graduate students.

STEV - STEVENSON COLLEGE

Lower-Division

STEV 1 - Academic Literacy and Ethos: Self and Society (5)

Teaches foundational concepts for intellectual exploration and personal development within an academic community: analysis, critical thinking, metacognition, engagement with others across difference, and self-efficacy. Examines the roots of modern society using diverse religious texts and major classical and modern philosophical works.

Prerequisite: Enrollment is restricted to first-year college members.

STEV 2 - Self and Society 2 (5)

Winter quarter of Stevenson's core course continues development of analytical writing, critical reading, and effective speaking in exploring conflicts inherent in modern society. Investigates themes of colonization, race, gender, class, and cultural conflict. (Formerly course 81A.)

Prerequisite: Enrollment is restricted to first-year and sophomore college members.

STEV 10 - Skills for College and Beyond (2)

Applications of practical skills for effective, meaningful study in the context of a full, busy life. Topics include learning styles, time management, test preparation, and life balance. Specific techniques for efficient reading comprehension, note-taking, memorization, and self-assessment are introduced. Enrollment restricted to college members and by permission of instructor.

STEV 16 - Stevenson Community Garden (2)

Hands-on course in ecological horticulture at the Stevenson garden. Students grow the Stevenson community through gardening and projects focused on building a healthy and regenerative local-foods culture. Enrollment by interview only. Enrollment restricted to Stevenson College members.

STEV 18 - Eighteenth Century Kabbalistic Thought and Literature (2)

Emphasis on analyzing (translations of) original text to explore critical areas of kabbalistic thought, including tzimtzum, the sefirot, theodicy, and hermeneutics.

STEV 21 - Citizens and Nations: Self and Society in the 19th Century (2)

A reading seminar focusing on a set of key texts. Examines how the political and industrial revolutions of the 19th century fundamentally transformed the relationships between individuals and their respective societies.

Prerequisite: Enrollment is restricted to Stevenson College members.

STEV 22 - Self and Society in Classical Social Theory (2)

Reading seminar focusing on a set of key texts from classical social theory. Explores the transition from traditional to modern societies. Authors addressed may include Locke, Rousseau, de Tocqueville, Marx, Weber, and Durkheim.

Prerequisite: Enrollment is restricted to Stevenson College members.

STEV 23 - Monsters and the Monstrous in the Early British Novel (5)

Examines figurations of monsters and the monstrous in the 18th- and 19th-Century British novel to explore the function

of monsters as cultural tools for affirming and subverting social boundaries.

STEV 24A - Cultural Intelligence: Developing a Higher CQ (Cultural Intelligence) (2)

We begin by examining the three basic facets involved in developing one's cultural intelligence (CQ): cognitive, motivational, and behavioral. Topics include: complexities of intercultural communication; importance of cultural self-identity and filters; power and privilege; and their impact on one's perceptions. (Formerly course 24.)

STEV 24B - Developing Facilitation Skills for Cultural Intelligence (2)

Presents six dimensions of facilitation: goal development, cognitive aspects, confronting resistance, managing emotions, methods of learning, and creating a supportive and respectful climate. Students practice different styles of facilitation to learn which one(s) fit their personal styles and goal(s) for any given workshop. The importance of developing cultural intelligence is presented as well. Students must be available to facilitate diversity trainings. Enrollment is restricted to sophomores, juniors, seniors, and graduate students and by instructor consent.

STEV 26 - Navigating the Research University (2)

Explores critical engagement in education in the context of a research university. Introduces first-year issues and success strategies and ways to participate in the institution's academic life. Investigates strategies for clarifying education goals and devising a plan for success. Students cannot receive credit for this course and Porter 26 or Kresge 26.

Prerequisite: Enrollment is restricted to first-year students.

STEV 27 - Service Learning (2)

This online course frames and supports the service-learning experiences of students engaged in field placements both here in Santa Cruz and in their home communities. Students approach social challenges thematically (e.g., homelessness, environmentalism, domestic violence, etc.) and consider how different disciplines might engage these issues. They consider how our community partners conceptualize and address social issues and how these conceptions connect, or fail to connect, with academic approaches.

STEV 30 - Thesis Writing and Editing (2)

Identifies and examines the assumptions, expectations, and formats of writing in students' fields, with the goal of beginning—or continuing—academic research. Prerequisite(s): satisfaction of the Composition requirement. Enrollment restricted to junior and senior college members and by permission of instructor.

STEV 33 - Self and Society Examined Through Ethical Dilemmas (2)

Examines ethical dilemmas in contemporary topics, such as the status of moral principles during warfare; animal rights and the ethics of eating meat; privacy in the age of the

Internet; imprisonment and rehabilitation; legal and illegal immigration; same-sex marriage; and health care.

STEV 35 - Everyday Ethics for College Life (2)

Exploration of and reflection on everyday values and virtues such as integrity, open-mindedness, honesty, and community. Objectives include learning how to think about moral dilemmas and how to begin drafting one's own code of ethics.

Prerequisite: Enrollment is restricted to college members.

STEV 36 - Women in the Bible (5)

A seminar-style course intended to sharpen analytical skills by critically analyzing biblical narratives about women: stories about heroism, betrayal, love, loyalty, infidelity, motherhood, and leadership. Students explore biblical personalities and perspectives, analyzing how these are conveyed in the biblical narrative.

STEV 37 - Critical Thinking and Skepticism (5)

Focuses on the acquisition and application of critical thinking skills and examines skeptical perspectives on a variety of issues. Topics include rationality, fallacies, cognitive biases, religion and the paranormal, media biases, and the costs and benefits of arguing with people.

STEV 40 - The Self Under Moral Siege: Challenges for the Individual in 20th-Century Totalitarian Europe (2)

Examines how individuals and communities confronted dilemmas when laws, state ideology, and war challenged traditional morality. Themes include: ethics, responsibility, victimhood, moral compromise, retribution, and reconciliation.

Prerequisite: Enrollment priority given to Stevenson College students.

STEV 41 - Spirituality in a Modern World (2)

Investigates scientific and pragmatic perspectives on spirituality from William James to Fritjof Capra. Explores spirituality in Western and Eastern traditions from Martin Buber to Pema Chodron. Students analyze, support, and articulate their spiritual positions in a culminating paper.

Prerequisite: Enrollment is restricted to Stevenson College members.

STEV 50A - Stevenson Alumni Careers in Law (2)

Connecting Stevenson students with alumni who provide practical advice for careers in law. Topics covered include the variety of career possibilities in law, preparing for law school, internships, networking, applying for jobs, and interviewing.

Prerequisite: Enrollment is restricted to College members.

STEV 50B - Stevenson Alumni Careers in Science and Technology (2)

Connecting Stevenson students with alumni who provide practical advice for careers in science and technology. Topics covered include internships, graduate school, networking,

applying for jobs, interviewing, and adapting to a rapidly changing job market.

Prerequisite: Enrollment is restricted to College members.

STEV 60 - Centering Black Women as Leaders (5)

Interrogates the leadership of Black women through the lens of critical race/feminist/leadership theories, examining the narratives on BW leaders in case studies. Students will examine their own development and learning in our oppressive context.

STEV 80F - Academic Success in the College Core Course (3)

Provides support for reading, understanding, and engaging with difficult Core texts; models and facilitates college-level discussion; provides instruction in collaborative processes; encourages community-building with the college; and helps acclimate students to university culture. Enrollment is restricted to first-year Stevenson students who have been placed in the Multilingual Curriculum.

STEV 80G - Self and Society Through Film (5)

Uses feature films and documentaries to address and discuss perspectives of self and society. Films include Star Wars, The Hunger Games, and The Matrix.

STEV 80H - Rainbow Theater: An Introduction to Multicultural Theater (5)

Introduction to Asian American, Chicano/Latino, and African American plays through reading of major authors, discussion of social and historical context of their work, and development of a production of a one-act play from each cultural group. In-depth examination of key historical context of these three cultural groups. Video presentations followed by class discussion. Enrollment by audition.

STEV 80T - Self and Society for Transfer Students (5)

Condensed version of Stevenson's core course for transfer students. Develops analytical writing, critical reading, and effective speaking by considering influential philosophical works while exploring cultural conflicts in modern society. Themes include imperialism, racism, and class conflict.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to college members.

STEV 90 - The Nuclear Pacific (5)

Examines the history of nuclear weapons and nuclear power in the Pacific region from 1945 to 2013. Students do research on nuclear science, medicine, energy, and weapons testing and their social, political, demographic, and environmental impacts.

Prerequisite: Enrollment is restricted to College Scholar Students.

STEV 96 - Theory and Practice of Peer-Guided Learning for Tutors and Learning Assistants (2)

Provides first-time tutors and supplemental-instruction learning assistants with the theoretical background and practical interactive teaching and learning strategies essential for planning, implementing, and evaluating effective peer-guided learning. (Formerly Education 96.)

STEV 99 - Tutorial (5)

Tutorial

Upper-Division

STEV 120 - Self and Society: Teaching Practicum (5)

Each student facilitates one of the discussion sections of Stevenson 81A or attends lectures, and meets with staff for practicum on the teaching process. Prerequisite(s): qualifications as determined by instructor at first class meeting.

STEV 121 - Advanced Research and Strategic Planning for Graduate School (5)

Guided by a faculty mentor, students engage in an advanced research experience including developing a research proposal, conducting research, and writing and presenting a research paper. Students also prepare for graduate school by practicing the graduate school application process. Enrollment is restricted to students accepted into the Educational Opportunity Programs faculty mentor program. Enrollment also restricted to junior and senior majors in the Divisions of Arts, Humanities, and Social Sciences.

STEV 175S - Data and Democracy (5)

Critically interrogates the multiple meanings of data and democracy. Students examine case studies on the mobilization and framing of democracy in particular moments. Students also analyze concerns and opportunities provided by data management and archival practices of evidence and cataloging.

STEV 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar under faculty supervision (see course 42). Prerequisite(s): upper-division standing and a proposal supported by a faculty member willing to supervise.

STEV 193 - Field Study (5)

Provides for individual programs of study, sponsored by the college and performed off-campus. This course may be counted for up to three courses of credit in any quarter. Prerequisite(s): approval of student's adviser and the academic preceptor, and, in the case of full-time study, the board of studies supervising the major.

STEV 194 - Group Tutorial (5)

A program of independent study arranged between a group of students and a faculty instructor. Enrollment restricted to members of Stevenson College. Enrollment limited to 12.

STEV 194F - Group Tutorial (2)

A program of independent study arranged between a group of students and a faculty instructor. Course designed for members of Stevenson College. Students submit petition to sponsoring agency. Enrollment limited to 10.

STEV 198 - Independent Field Study (5)

Provides for college-sponsored individual study programs off campus, for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. Prerequisite(s): approval of the student's adviser, certification of adequate preparation, approval by the academic preceptor.

STEV 198F - Independent Field Study (2)

Provides for college-sponsored individual study programs off campus, for which faculty supervision is not in person (e.g., supervision is by correspondence). Up to three such courses may be taken for credit in any one quarter. Students submit petition to sponsoring agency. Requires approval of the student's adviser and academic preceptor

STEV 199 - Tutorial (5)

Individual projects carried out under the supervision of a Stevenson faculty member. Students submit petition to sponsoring agency.

STEV 199F - Tutorial (2)

Individual projects carried out under the supervision of a Stevenson faculty member. Students submit petition to sponsoring agency.

THEA - THEATER ARTS

Lower-Division

THEA 7 - Arts Dean's Lecture Series on Creative Entrepreneurship (2)

Course features a distinguished roster of guest speakers of arts practitioners, educators, and advocates who provide illuminating insights, practical tools, and personal stories on how to shape an artistic or arts-related career in today's creative economies. Speakers cover a lively range of topics, ranging from the importance of the entrepreneurial mindset and fundamental marketing skills to how to transform a vision into a company. Series will also shed light on ways artists can bring their talents to commercial enterprises.

THEA 8 - Introduction to Iranian Theatre (2)

Introduces Iranian theater covering Ta'zieh religious performance, Ruhuzi improvised drama, Naghali storytelling, and modern efforts in national and diasporic theaters fusing indigenous and western styles. No prior knowledge of Iran is required and readings are in English.

THEA 10 - Introduction to Theater Design and Technology (5)

Addresses imagination and creativity. Using the framework of theater production, students explore the process of translating a script into a performance. Topics include visual literacy, creative problem solving, establishing effective working teams, tear sheets, storyboarding, drawing, sound and color theory. This course is a prerequisite for all upper-division design courses.

THEA 12 - Stage Management (5)

Designed to acquaint students with the complexities of staging productions from the audition process to final performance. Directing, lighting, scenic production, sound, cueing, and personnel management are aspects that will be touched upon in class. Students are billed a materials fee. (Formerly *Production Management*.)

THEA 14 - Drawing (5)

A fundamental course in drawing from still life, the figure, and in the landscape. The approach is from the tonal and volumetric aspects of the object. Color is introduced as the course progresses. Instruction fashioned to the individual needs of the student. The inexperienced are welcomed as well as the experienced. Students are billed a materials fee.

THEA 15 - Special Topics in Textiles (5)

Introduces varied techniques in textile manipulation to create scenic and costume-design properties including drapery, upholstery, masks, bags, and millinery. Students learn basic sewing and surface-design methods, such as knitting, screen-printing, painting/dyeing, and distressing.

THEA 17 - Costume Construction (5)

The process of interpreting a costume designer's sketch into a finished theatrical costume. Some techniques included are dyeing, fabric selection, draping, flat pattern drafting, pattern manipulation, adaptation, fitting, and alteration. Using various techniques, students make basic pattern pieces and learn to modify them to create costumes. Students are billed a materials fee.

THEA 18 - Drafting for Theatrical Production (5)

An examination of the fundamentals of drafting scale drawings for production, including floor plans, elevations, sections, working drawings, dimensions, layout, and lettering. Students learn isometric drawing, perspective, and rendering techniques. Students are billed a materials fee.

THEA 18C - Drafting-Computer Aided (5)

In-depth exploration of computer-aided drafting, specifically the programs Vectorworks, Spotlight, and Renderworks.

Topics include: the user interface, ground plan, section and detail views, paper space vs. working space, tool palettes, USITT drafting standards, layers, line weights, objects, classes, library annotations, importing rasters, and 3D modeling. Students required to do weekly projects such as ground plans, lighting plots, perspectives, and detail drawings, as well as turn in a major final project, and complete a mid-term, final, and quizzes. Students are billed for a materials fee.

Prerequisite: Enrollment is restricted to theater arts majors.

THEA 19 - Design Studio: Lighting Studio A (5)

An introduction to the theory and practice of lighting design with attention to the practical skills and creative approaches to lighting performance pieces; the technical side of lighting design via demonstrations, lectures, and labs. Students complete projects evolving and executing concepts for lighting chosen pieces. Students are billed a materials fee.

Prerequisite: Prerequisite(s): THEA 10.

THEA 20 - Introductory Studies in Acting (5)

Introduction to basic acting skills and the problems of performance. Concentrates on expanding a range of expression and ability to respond to and analyze dramatic text. Designed for students with little or no experience in acting.

THEA 21 - Acting Studio I: Psychological Realism (5)

Explores the fundamentals from the work of Konstantin Stanislavski as developed at the Moscow Art Theater to the works of his and our contemporary playwrights. Specifically, students apply those techniques of action, physical score, given circumstances, subtext, interior monologue, goals, and objectives, throughline, superobjective, and emotional recall to works of Henrik Ibsen, Anton Chekov, and relevant American realists, such as Sam Shepard, August Wilson, etc. Designed for students focused on acting as an academic or professional discipline. Admission by audition at first class meeting (see the department office or theater.ucsc.edu for more information). (Formerly course 21A, Acting Studio 1A: Psychological Realism.)

THEA 22 - Indonesian Dance and Drama (5)

Students learn the basic movement repertoire of the specific characters of the Indonesian dance-drama/puppetry tradition over the quarter with explication of how these types operate in their own cultural context. Course culminates in an open showing of scene work.

THEA 23 - Voice for the Actor (5)

Introduces using the spoken voice effectively and powerfully on stage and off. Physical release, alignment, breath, resonance, and articulation are explored. Students gain an understanding of how the voice relates to the self, the body, and breath and become more aware of tensions and habits that may impede vocal and speech use.

THEA 24 - Movement for Performers (5)

Students develop awareness and extension of personal movement repertoire through observation, movement experience, and exploration.

THEA 25 - Understanding Shakespeare (5)

Emphasizes key theoretical and practical modes of dramaturgy in order to research, analyze, and interpret the dramatic works and performances of Shakespeare within historical and contemporary contexts. (Formerly Shakespearean Dramaturgy.)

THEA 30 - Introduction to Dance Theory and Technique (5)

Intensive instruction in developing the dancer's mind/body, with introduction to movement theory and practice. Students are billed a materials fee.

THEA 31A - Dance Studio I: Asian or Asian Diasporic Practice (5)

Introduces Asian or Asian diasporic dance practice through physical training and theoretical engagement. Focuses on basic techniques of performance practice and critical engagement with aesthetic, cultural, and/or historical context. Students are billed a materials fee.

THEA 31B - Dance Studio I: Ballet (5)

Introduces classical ballet as a form of ethnic dance. Focus on combining basic training in ballet technique with academic studies to achieve a synthesis in the understanding of dance as a performing arts practice in diverse socio-cultural and historical contexts. Emphasis on simple phrasing and articulation into more complex material requiring richer dynamic range. Attention to the anatomical principles that governs ballet mechanics. Students are billed a materials fee.

THEA 31C - Dance Studio I: Contemporary Dance Theory and Technique (5)

Intensive instruction in contemporary dance technique. Combining movement theory and practice, students will develop basic knowledge of anatomical function (somatics) and a foundational embodiment of contemporary dance technique.

Prerequisite: Prerequisite(s): THEA 30.

THEA 31E - The Dance Experience (2)

Introduction to contemporary dance theory and practice. Focus on basic dance technique, range of styles, and aesthetic points of view of historically significant contemporary dance choreographers in America and worldwide. Students are billed a materials fee. (Formerly course 31C.)

THEA 33C - Dance Studio I (5)

Intensive instruction in developing the dancer's physical instrument. Intended for students who have a previous fundamental knowledge of the basics of classic dance, combined with movement theory. Students are billed a

materials fee. Formerly Theater Arts 33, Advanced Introduction to Modern Dance.

Prerequisite: Prerequisite(s): THEA 30.

THEA 36 - Introduction to Dance Composition (5)

Introduces dance improvisation and choreographic practice. Observation and recognition of personal movement patterns and discovering new sources for creative material. Students are billed a materials fee.

THEA 37 - African Dance (5)

A griot (musician-entertainer from western Africa) from Burkina Faso teaches The African Journey, which emphasizes dance as combined in Africa, including singing, history, oral tradition, and storytelling. Students are billed a materials fee.

THEA 38 - Dance on Film (2)

Introduces dance on film, examining such topics as narrative storytelling in dance films (documentary and fiction); cinematic strategies for representing the kinesthetic; and dance film as a unique and distinct art form.

THEA 40 - Introduction to Directing (5)

An overview of the analytical and creative processes that inform the director's work. Close examination of texts, concepts, and selected directors and directorial choices.

THEA 41 - Fundamentals of Directing (5)

An experience designed to develop an active and creative vision leading to a concept that takes an audience on a memorable journey with lives that are created on the stage. Students direct a monologue, a dual scene, and a final project which represents the collaborative nature of the art of directing. Topics include blocking techniques, history of directing, how to work with designers, rehearsal techniques, and strategies for actor coaching.

THEA 50 - Fundamentals of Theater Production (2)

Work is on various aspects of theatrical production, including scenery, lighting, costumes, sound, stage management, and video documentation. Satisfies the department's technical experience requirement.

THEA 52 - Basic Stagecraft (5)

Provides introduction to technical theater and basic stagecraft. Course examines two-dimensional and three-dimensional scenery, scenic engineering, the physical theater, stage and scene shop equipment, project organization and process, technical theater graphics, materials, and theatrical construction techniques.

Prerequisite: Prerequisite(s): THEA 10.

THEA 55A - Workshop in Performance: Barnstorm (5)

Process-oriented investigation of practical theater production by working in and on productions in the Barnstorm season. Requires a total of 150 hours working backstage or onstage.

Admission by audition at first class meeting; see department office for more information.

THEA 55B - Workshop in Performance: Barnstorm Lab (2)

Process-oriented investigation of practical theater production by working in and on productions in the Barnstorm season. Requires a total of 50 hours working backstage or onstage. Admission by audition at first class meeting; see department office for more information.

THEA 61A - Ancient and Medieval Drama (5)

Ancient enmities; horrific acts of parricide; monumental errors; suffering and contrition. This course examines the enormous appeal of the ancient Greek tragic and comic visions from their inception through their enthusiastic adaptation by the Romans and on into the Middle Ages. For comparison purposes, Greek and Roman dramas are studied back-to-back with the contemporary non-Western dramatic forms of Noh and ancient Sanskrit drama.

THEA 61B - Drama from the Renaissance to the Modern Age (5)

Examines major trends in European drama from the rediscovery of ancient Greek and Roman drama in the early 17th century to the late 19th century. Examines major trends in European drama from the discovery of ancient Greek and Roman drama in the early 17th century to the late 19th century. These trends include neo-classical drama, the rise of middle-class drama, social realism, romanticism, early naturalism, and the well-made play. These trends are compared with the parallel developments of the non-Western forms of Japanese Kabuki and Javanese Wayang. (Formerly Tragedy.)

THEA 61C - The Birth of the Modern: Drama and Performance After the Renaissance (5)

Examines dramatic and theatrical works that sprang into being in the wake of the European Renaissance. Follows the ways modern artists have dramatized their questions, struggles, beliefs, and despair in the face of world wars, cultural fragmentation, unprecedented prosperity, and new technologies.

THEA 64 - Shakespeare and Adaptation in Text and Performance (5)

Juxtaposes Shakespeare's plays with sources Shakespeare may have adapted and adaptations that his works, in turn, have spawned. Explores Renaissance stage and printing practices and the processes of adapting for page and stage.

THEA 80A - Introduction to African American Theater (5)

Surveys African American theater from late 19th century to contemporary 21st-century playwrights and examines dramatic narratives to trace creation, evolution, and development of African American cultural identity formation in American theater.

THEA 80B - Rock 'n' Roll Design (5)

Examination of the genesis, history, and development of technical theater practices used in large arena rock shows. Topics will include the development of rigging practices used in arenas, touring logistics, lighting instrumentation and aesthetics of rock shows, and the nature, practice, and approach of sound in these venues.

THEA 80C - Monsters (5)

Examines the operation of monsters in plays from Ancient Greece to today, inquiring as to why these powerful cultural tools for the expression of social tension show no sign of diminishing despite our ostensible advance into scientific rationalism.

THEA 80D - Commercial Design 1900 to Present (5)

History of 20th-century commercial design for the theater through the eyes of the Western consumer. (Formerly course 161W, *Critical Survey of Commercial Design, 1900 to Present*.)

THEA 80H - Hamlet Conundrums (5)

Offered online, the course explores major issues of interpretation of Shakespeare's classic play, which has occupied the minds of audiences, directors, designers, performers, and critics during its 400-year history. In doing this, it offers a sense of history of people's preoccupations with and thoughts about the play. Students taking this class are expected to complete the course during the quarter for which they are enrolled. All students enrolled in this course should visit elsinore.ucsc.edu and write to elsinore@ucsc.edu.

THEA 80K - Shakespeare 4every1 (5)

Introduces all students, regardless of experience, to the plays and theater of Shakespeare, and directly addresses linked relevance to contemporary 21st century American culture.

THEA 80L - Muppet Magic: Jim Henson's Art (5)

The artistic and social impact of the Muppets on American puppetry, children's television, and Hollywood film is explored through viewings, guest lectures, and analysis. Henson's legacy in artistic innovation, mainstreaming of puppet theater for adult audiences, and establishment of puppetry in media and marketing are also explored.

THEA 80M - Chicano/a Teatro (5)

Introduction to Teatro Chicano/a with examination of how cultural diversity plays a role in theater. Through lectures, films, and workshop exercises, reflect upon the process of Teatro Chicano. Students write their own acts, improvise, and perform in class.

THEA 80N - Walt Disney (5)

An examination of Walt Disney's creation of the American vision of family entertainment. Particular attention will be paid to the classic animated feature films of Walt Disney and to the way this Disney invention has been preserved and

developed since his death. We will also look at the live action films, theme parks, and other Disney creations.

THEA 80P - Pixar - Story Matters (5)

Emphasizes script development by exploring dramatic writings from ancient to contemporary theater, then focusing on Pixar screenplays with their universal themes and compelling characters. Film analysis of Pixar movies delves into animation history, fairytale, psychology, and popular culture. (Formerly The Pixar Feature.)

THEA 80Q - Introduction to Queer Theater (5)

Examines the history of the queer perspective in dramatic literature, from the Greeks to Marlowe and Shakespeare through the calcification of homosexuality in the era of Freud, then traces theater stewardship by gay and lesbian artists from within the closet and without.

THEA 80R - Bollywood Dance and Culture in India and Indian Diaspora (5)

Bollywood is the largest film industry in the world. Students learn several fundamental footsteps, eye, hand and body movements, to perform Bollywood dance. They also learn various traditions of Indian classical, folk, and Bollywood dance terms.

THEA 80S - Theater Arts Education and the Community (5)

This course is designed to develop ways in which we can direct our interest in the arts into concrete and successful community projects. Although the emphasis will be on developing skills to work within K-12 classrooms, other community projects will be discussed and designed.

THEA 80T - Flashmob Performance in the Information Age (5)

Flashmobs represent a new social configuration using information technology. Course covers the history of experiments in art and technology and the role of mass performance in society. Students consider the socio-cultural ramifications of flashmobs and participate in them.

THEA 80U - Everybody Dance Now (5)

Examines dance as a primary mode of human communication and expression. Through readings and the viewing of recorded and live performances, students compare and contrast dance traditions of the world.

THEA 80V - The Circus in American Culture (5)

Circus arts from their shamanic roots to contemporary practice will be analyzed in a historical, aesthetic, and creative dimension. Lecture, discussion, and demonstrations will explore the theory and practice of American circus arts. In section, students will explore basic circus skills from clowning to tumbling to exhibition of freaks.

THEA 80X - The Performance of Story in Theater and Film (5)

An examination of the theory and practice of theater and film, comparing and contrasting works that have been adapted from one genre to another. Lecture, film and video viewing and

discussion of materialist, psychoanalytic, and feminist approaches will be shared.

THEA 80Y - American Musical Theater (5)

The history of American musical theater, from its roots to today, is studied through scripts, scores, and film. Major composers and lyricists' work is shown, discussed, and analyzed.

THEA 80Z - Indian Dance (5)

Study of Indian classical dance through embodied training and theoretical engagement. Training in the foundational elements of abstract rhythmic dance, including drum syllables and associated steps, and introduction to abhinaya (storytelling). Students are billed a materials fee.

THEA 99 - Tutorial (5)

Students must file their petitions for this course with the department office by the end of the fifth day of instruction in the quarter in which they would like to take the tutorial. Prerequisite(s): petition required, approved by instructor and department.

Upper-Division

THEA 100A - Asian Theater/Dance and Global Impacts (5)

Overview of selected theater/dance performance genres of India, Indonesia, China, Korea, and Japan with attention to how cultural, political, and social flows have impacted contemporary performance in Asia and beyond. Lectures supplemented by workshops.

THEA 100B - Black Theater USA (5)

Spanning slavery, emancipation, reconstruction, the great depression, civil rights, and the black power/black arts movements, course explores African American drama from literary, historical, and biographical perspectives in lecture/discussions, film excerpts, dramatizations, and visits from award-winning guests.

THEA 100C - Courts, Courtesans, Shamans, and Clowns: Asian Drama (5)

Asian court and popular performance are traced. Sanskrit drama is contrasted with Indian epic recitation, medium, and courtesan dance. Gender specialization is noted in Indonesian courts using Indian and local legends in dance, mask/puppetry, and clowning. Buddhist and Confucian impulses in Chinese theater and early Korean and Japanese mask and puppetry are introduced. Students are evaluated on participation, tests, writing, and a performance project.

THEA 100W - Black/African Diasporic World Theater (5)

Examines major black African diasporic playwrights and theater. Focuses on the historical, cultural, and literary contexts that gave rise to the works of dramatists such as Ama Ata Aidoo, Derek Walcott, Wole Soyinke, Aime Cesaire, Debbie Green Tucker, and Paul Boakye.

Prerequisite: Prerequisite(s): THEA 61 or THEA 60A or THEA 60B or THEA 60C.

THEA 103 - Design Concept Development (5)

Students develop an advanced design project related to theatrical production, apparel or housewares, marketing collateral, packaging or product development, or any related fields. Students address research and development, materials sourcing, budgeting, fabrication, and portfolio-quality presentation materials. Prerequisite(s): Theater Arts 10; or two courses from ART 10D, 10E, and 10F. Enrollment is by permission of the instructor. Theater Arts 106 is recommended as preparation.

THEA 104 - Multimedia Authoring (5)

Introduces students to basic tools for the creation of multimedia digital projects. Special attention is given to the integration of video, sound, graphics, text and virtual reality and to the creation and execution of strategies for interaction between users and the projects themselves. With this in mind, students design and create computer puzzles and games.

THEA 106 - Digital Illustration (5)

Introduces digital rendering techniques using the Adobe Creative Suite. Using Adobe Creative Suite, students solve design problems. Enrollment by permission of the instructor.

THEA 108 - Theater and Interaction Design (5)

Investigates interactive media including computer games, virtual reality, and participatory theater to inform design practice. Examines Aristotle's Poetics with some modernist excursions. Also examines the various values embedded in works--artistic, civic, spiritual, and political.

Prerequisite: Enrollment is restricted to juniors and seniors.

THEA 113 - The History of Design for Theater (5)

The development of scenic design from the Greek period to the present. Concentration is on the changing styles of set design in relation to the changing attitudes toward dramatic literature, art, and theater architecture.

THEA 114 - Sound Design and Engineering for the Theater (5)

Mixing theory with practice, this course covers everything from script analysis and sound-design paperwork to how to use the software and hardware needed to bring a sound design to reality. (Formerly Design Studio: Sound.)

Prerequisite: Prerequisite(s): THEA 10.

THEA 115A - Design Studio: Scenic Design (5)

Advanced work in principles and theory of scenic design. Students are billed a materials fee.

Prerequisite: Prerequisite(s): THEA 10.

THEA 115B - Design Studio: Scenic Design B (5)

Advanced theory and practice of theatrical set design.

Prerequisite: Prerequisite(s): THEA 115.

THEA 116A - History of Clothing and Costume (5)

Survey of clothing and theatrical costumes; emphasis on dress of the audience and actor in historical periods of theatrical activity. Students are billed a materials fee.

THEA 117 - Design Studio: Costume (5)

Students learn advanced principles and theory of costume design, and apply these toward a large project for theatrical/film production or for character design for animation and gaming. Students are billed a materials fee.

THEA 117A - Advanced Costume Construction (5)

Advanced principles in costume construction, including tailoring, advanced pattern drafting, and draping techniques. Focuses on translating modern techniques into historical garment construction. Teaches how to study artifacts and do primary research to unlock the past.

Prerequisite: Prerequisite(s): course 17.

THEA 118 - Design Studio: Scene Painting (5)

Emphasis on techniques used in painting scenery for the theater. Students are billed a materials fee.

Prerequisite: Prerequisite(s): THEA 10.

THEA 119 - Design Studio: Lighting Studio B (5)

The theory and practice of lighting design with emphasis on practical application. Light plots, electricity, optics, design, and manipulation of lighting for the theater and related performance events are investigated. The student explores mechanics and aesthetics with hands-on experience. Students are billed a materials fee.

Prerequisite: Prerequisite(s): THEA 19.

THEA 120 - Voice and Movement for Performers (5)

Intensive work on the voice and body involving breathing, relaxation, and an understanding of anatomy as it pertains to voice and movement. Awareness and extension of personal vocal and movement repertoire through observation, experience, and exploration. Active preparation for performance (emphasizing Shakespeare) with work on phonetics and scansion and integration of physical technique.

THEA 121 - Acting Studio II: Shakespeare (5)

This acting studio centers around Shakespeare and specific techniques used in performing his plays. Continues concentrated work on basic acting skills and textual analysis through scene study. Courses 21 and 23 are recommended as preparation. Admission is by audition at the first class meeting (see the department office or theater.ucsc.edu for more information). (Formerly Acting Studio II.)

THEA 122 - Indian Performance: Rama, Siva, Krishna (5)

Study of the classical theater and dance of India, with attention to performance practice, aesthetic theory,

relationship to religious practice devoted to Rama, Siva, and Krishna, political implications and intercultural experimentation.

THEA 123 - Acting and Shakespeare (5)

Challenges of performing Shakespearean and Renaissance plays are explored through confronting the acting problems they pose. Attention to verse scansion, character analysis, and textual meaning. Strategies for enacting scenes and monologues are tested in class presentations.

THEA 124 - Movement for Performers (5)

Awareness and extension of personal movement repertoire, through observation, movement experience, and exploration.

THEA 126 - Acting Studio III (5)

Individual work on acting skills and problems, with emphasis on individual interpretation and scene work with other students. Courses 21 and 124 are recommended as preparation. Admission is by audition at the first class meeting (see the department office or theater.ucsc.edu for more information).

THEA 126M - The Meisner Technique: A Practical Exploration (5)

An intensive immersion into the teaching techniques and actor-training originated by Sanford Meisner. Presents exercises and projects utilizing improvisation, physical activities, and, finally, memorized text. Courses 21 and 124 are recommended as preparation. Admission is by audition at the first class meeting (see the department office or theater.ucsc.edu for more information).

THEA 128 - Choreographic Workshop (2)

Intensive upper-division choreographic workshop that begins from the key motifs of historical dance to develop original work. Dancers made available to the student choreographers. Concurrent enrollment in course 139 is required.

THEA 131A - Dance Studio II: Asian or Asian Diasporic Practice (5)

Continues the study of an Asian or Asian diasporic dance theory and practice. Focuses on intermediate dance technique, refinement of performance expression, and creative ownership of material, alongside critical engagement with aesthetic, cultural, and/or historical context. Students are billed a materials fee.

Prerequisite: Prerequisite(s): THEA 31A or permission of instructor.

THEA 131B - Dance Studio II: Ballet (5)

Continued study of classical ballet theory and practice with progressions in barre, center, and across the floor exercises. Focus on contemporary ballet and critical dance studies. Emphasis on musicality, strength and coordination, and refinement in épaulement in adagio and allegro sequences. Attention to body alignment and maintaining the kinetic

integrity of the body while moving through space. Students are billed a materials fee.

Prerequisite: Prerequisite(s): THEA 31B or by permission.

THEA 131C - Dance Studio II: Advanced Contemporary Forms and Practices (5)

Continued study of contemporary dance theory and practice. Focus on intermediate dance technique, individual and group movement invention, choreographic voice, and theatrical applications. Students are billed a materials fee.

THEA 135 - Choreography I (5)

Students explore sources for movement; gain expressivity in a wide range of movement elements; work in ensemble and solos; and explore the use of scores to develop collaborative skills. Students are billed a materials fee. (Formerly Dance Improvisation and Theory.)

Prerequisite: Prerequisite(s): THEA 36 or by permission of the instructor. Contact Prof Lee before the first day of instruction: cleel85@ucsc.edu.

THEA 136 - Choreography II (5)

Advanced study, exploration, and analysis of choreographic form and content. Solo, duet, and group work are created with a focus on developing the creative process, interpreting styles and trends, and knowledge of compositional devices and generative movement practices. Enrollment by permission of instructor. May be repeated for credit. (Formerly Choreography.)

THEA 137 - Studies in Performance (Dance) (5)

Studies in dance, taken in connection with performance in a major dance concert. Students are required to work on all aspects of the production. Students work with guest and faculty choreographers. May be repeated for credit with consent of instructor. Students are billed a materials fee. Admission by audition held late winter quarter; see department office for more information.

THEA 137A - Studies in Performance (Dance): Asian (5)

Studies in Asian or Asian diasporic dance theory and practice, taken in connection with performance in a major dance concert. Students are required to work on all aspects of the production. Students work with guest and faculty choreographers. Students are billed a materials fee.

Prerequisite: Prerequisite(s): THEA 31A or by permission of the instructor. Concurrent enrollment in THEA 131A is required.

THEA 139 - Random: With a Purpose (5)

Participation in a student-choreographed and directed dance concert under faculty supervision. Rehearsals culminate in public performances. Students are billed a materials fee. Auditions to be held on the first day of class.

THEA 141 - Play Direction Studio I (5)

Basic studio exploration through scene problems and exercises of the development of directing principles. Intensive work on the director's pre-rehearsal work from text selection, analysis, and casting. Audition at first class. (Formerly Future Stages.)

THEA 142 - Play Direction Studio II (5)

Intensive studio exploration of the art and craft of directing. Primary focus on text analysis, collaboration with designers, developing a point of view and visual/auditory language for the play, staging techniques, and communication techniques with actors.

Prerequisite: Prerequisite(s): THEA 40, or THEA 141, or permission of instructor.

THEA 151 - Studies in Performance (Drama) (5)

Studies in theater, taken in connection with participation in a Theater Arts Department sponsored production. Enrollment is limited to those persons chosen to take part in a particular production. Admission by audition; audition schedule to be announced at first class meeting.

THEA 151A - Studies in Performance: African American Theater Arts Troupe (5)

Studies in drama; emphasis on African American theater taken in connection with participation in a theater arts sponsored production. Enrollment by audition only, and limited to those persons chosen to take part in a particular production.

THEA 151I - Studies in Performance: Indonesian Dance and Drama (5)

Studies in drama; emphasis on Indonesian theater taken in connection with participation in a theater arts sponsored production. Enrollment by audition only, and limited to those persons chosen to take part in a particular production.

THEA 152 - Advanced Stagecraft (5)

Exploration of stage technology from the scene shop's perspective. Conversion of scenic designs to construction drawings. Pursuit of scenic-engineering and construction techniques using steel, wood, and other materials. Training on use of stage machinery: rigging, flying, wagons, tracking, and propulsion.

Prerequisite: Prerequisite(s): THEA 52.

THEA 153 - Taking It to the Street: Performance and Politics/Politics of Performance (5)

Covers the theory, history, and practice of performance and new media as sociopolitical intervention. Includes performance in an urban context; site-specific and street theater; puppetry; environmental theater; culture jamming, including radio, television, billboards, and records; and digital interventions. Students are billed a materials fee. (Formerly Art 175.)

THEA 154 - Shakespeare Santa Cruz: Writing in Response to the Bard (5)

Uses writing to respond to Shakespeare Santa Cruz's summer productions. Requires frequent assignments, such as reviews, interviews, performance notes, comparisons of productions, background pieces, and reflective essays. Students regularly revise work in response to instructor and peer feedback.

Prerequisite: Prerequisite(s): Satisfaction of the Entry Level Writing and Composition requirements.

THEA 155 - Shakespeare to Go (5)

A process-oriented investigation of Shakespeare consisting of work which may culminate in a final production. Requires a two-quarter commitment (winter and spring) with credit given in winter and touring in spring. Contact theater@ucsc.edu for details. Admission by audition at first class meeting (see department office or theater.ucsc.edu for more information). (Formerly Workshop Experiments in Performance.)

THEA 157 - Playwriting (5)

Students are given the opportunity to write their own scripts and refine them as the result of class discussion and scenework with actors. Work is on specific problems involving such elements as the structuring of a plot or the development of character.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

THEA 158 - Chautauqua Workshop (5)

Advanced course that provides directors, writers, and performers with an opportunity to develop new works in performance. Students enrolling in this course as playwrights are selected on basis of submissions turned in the previous quarter. Students are billed a materials fee. Students taking the course as directors are required to obtain consent of the instructor. Other students may enroll as usual.

THEA 159 - Advanced Playwriting (5)

A study, through practice, of the constituent elements in the construction of a drama. Students concentrate, in particular, on the organization of complex plots, the expression of character through conflict, and maximizing the emotional impact of dramatic situations.

Prerequisite: Prerequisite(s): THEA 157 or equivalent, satisfaction of the Entry Level Writing and Composition requirements.

THEA 160 - Dramatic Theories (5)

An examination of the theories of acting and directing from the 19th century to our own time, starting with the classic theater and concentrating on the 20th-century debate centered in Stanislavski and Brecht, Grotowski, and Robert Wilson. This course must be taken prior to student's senior year; required for course 185.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

THEA 161A - Irish Theater (5)

Examines the idea of a National Theater in Ireland from its beginnings in the founding of the National Literary Society in 1892 to the current vitality of the contemporary Irish Theater.

THEA 161C - Theater and Drama of the Renaissance (5)

Examines selected plays from the Renaissance (1580-1680, Italy, Spain, England, and France) from a theatrical viewpoint. Covers Renaissance theater buildings and related critical materials. (Formerly The Theater and Drama of Renaissance Europe.)

THEA 161D - Asian Theater: An Anthropological Approach (5)

Art serves simultaneously to educate its audience to the group's traditional values and to test new ideas. Indian, Indonesian, and Japanese forms are studied in relation to their cultural context. Through videotapes, lecture demonstrations, performances, and scenework, students explore the forms.

THEA 161E - Mass Performance (5)

Explores the phenomenon of mass performance--when thousand of people perform the same thing at the same time. From political festivals, such as those of the French Revolution, to flash mobs, and covering the 19th century craze of mass gymnastics as well as Olympic opening ceremonies, the course analyzes the ideas and techniques behind mass performance. Students sharpen their critical skills in analyzing performance by working with texts, videos, live performance, and archives.

THEA 161H - Shakespeare In Asia (5)

Shakespeare takes life in Asian reinterpretations that revivify languishing genres, duck political censorship, and explore new theatrical worlds. Indian, Japanese, Chinese, and Southeast Asian Shakespeares (1868 to the present) are introduced via lecture, critical reading, videos, and scene work.

THEA 161M - Sexuality, Gender, Drama, and Performance (5)

Exploration and analysis of the interrelationships between gender, sexuality, and performance on stage and on the page. Topics include gender and homosexuality in the history of performance and dramatic literature, drag, queer Shakespeare, closet drama, same-sex performance conditions (e.g., Greece) vs. dual-gendered (e.g., Restoration England). Combines study of theoretical texts and script with analysis and practice. (Formerly *Gender and Performance*.)

THEA 161P - Theater in the Chicano Power Movement (5)

Covers the rise of Teatro Chicano as a cultural-political force within the 1960's Chicano Power Movement starting with founding playwright Luis Valdez and El Teatro Campesino and covering Chicana/o playwrights inspired by the

movement, e.g. Cherrie Moraga, Luis Alfaro, and Josefina Lopez.

THEA 161Q - Queer Theatrics: Representations and Sensibilities (5)

An examination of the idea, form, and significance of queer/gay sensibility and representation in the English-speaking theater from the Renaissance to the present.

THEA 161R - Theater of American Cultures (5)

Interrelationship of ethnicity and the rise of significant American theater groups including the black theater movement, Chicano Teatro, and Asian American theater will be shared via lecture, viewing, and discussion.

THEA 161S - American Drama: Politics and Theater (5)

The dream of group theater, a long-term partnership of actors, directors, and playwrights, has fueled extraordinary and exciting change in the 20th-century American theater theory and practice. We examine ten exemplary manifestations of this dream.

THEA 161T - Women in Theater (5)

Explores female playwrights from textual, historical, and multicultural perspectives. Progresses from *Trifles* (1916) through the Harlem Renaissance, Broadway's Lillian Hellman, and today's post-feminist theatrical explosion in lectures, films, dramatizations, and award-winning playwrights' visits.

THEA 161U - Performance of Story in Theater and Film (5)

Examination of theory and practice of theater and film comparing and contrasting works having been adapted from one genre to another. Lecture, film, and video viewing. Discussions of materialist, psychoanalytic, and feminist approaches shared. Students cannot receive credit for this course and course 80X.

THEA 161X - Experimental Performance (5)

Investigates the world of experimental performance, sharpening critical skills in reading texts, videos, live performance, and archives. The focus will be on modes of performance that broke with their contemporary norms, including dance, theater, puppetry, and other gatherings.

THEA 161Y - Modern Ancient Drama (5)

Studies 20th- and 21st-century productions and adaptations of ancient Greek and Roman drama in theater, dance, music, and film, including Stravinsky, Graham, Pasolini, and Taymor. Discusses artists' goals, the sociopolitical context, ideas of authenticity and audience response.

THEA 163A - Shakespeare (5)

Focuses on selected plays of Shakespeare. Explores the range and variety of interpretations of the plays, both in critical writings and in performance. Also studies other writings and graphic art created on the subjects and themes of the plays.

THEA 163E - Chekhov and His Impact (5)

Delves into the work of Chekhov and the Moscow Art Theater. Stanislavski's acting techniques are related to the scripts through scene work. The impact on later Russian innovators, especially Meyerhold, and on the American theater is considered.

THEA 163G - Special Studies in Playwrights: Artaud (5)

Antonin Artaud through three critical lenses: influence on modern and contemporary theater, subject and site of psychoanalytic and social criticism, and theater practitioner. Exercises cultural, historical, and analytic approaches to his work. Prerequisite: course 160 recommended.

THEA 163H - Henrik Ibsen and His Impact: Ghosts of the Future (5)

Examines representative texts of Ibsen's work: early plays, realistic middle plays, and late plays. The cultural/historical context of Ibsen's oeuvre is considered as well as its impact, through contemporary translations and productions, on subsequent theater theory and practice.

THEA 163K - Special Studies in Playwrights: Euripides (5)

Examines the works of the classical Athenian tragedian Euripides. The class undertakes a thorough consideration of the playwright's plays in cultural, historical, theatrical, and literary context.

Prerequisite: Prerequisite(s): THEA 61A or permission of the instructor.

THEA 164 - Issues in Dance History and Theory (5)

A research seminar. Topics range from critical dance cultures, cognitive dance studies, problems in dance aesthetics, criticism, or theory to particular movements, periods, or the work of a choreographer. Discussions may be supplemented by a movement practice component.

THEA 165 - Dance Modernism (5)

An overview of 20th-century dance within the perspective of modernism. Topics may include romanticism, natural dance, Orientalism, Ausdruckstanz, U.S. modern dance and neo-classicism, chance procedure, postmodernism, the avant-garde commodity marketplace, and critical dance cultures. Discussions may be supplemented by a movement practice component.

THEA 166 - Ballet: A History (5)

Chronological critical and historical overview of ballet as a form of ethnic dance from its European origins to the present. Focus is on development of form in Americas and Asia as it crossed with other socio-culturally constructed categories such as race, gender, class, and sexual orientation. Discussions may be supplemented by a movement practice component.

THEA 167 - Africanist Aesthetics: Live Dialogues in the Americas and Africa (5)

Examines the transnational currents in expressive culture and the performing arts among the peoples of Africa and Latin America, and Latinos and African Americans in the United States.

THEA 185 - Senior Seminar (5)

A required seminar for majors involving readings and discussions of important texts in dance, design, and drama.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; THEA 160.

THEA 190 - Group Projects (5)

Prerequisite(s): petition required, approved by instructor and department.

THEA 192 - Directed Student Teaching (5)

Teaching a lower-division seminar under faculty supervision. (See courses 42 and 45). Petition required, approved by instructor and department.

THEA 193 - Proseminar (5)

Exposes students to an aspect of the theory or practice of theater arts. Visiting scholars share their area of expertise in lectures to a small group of students.

THEA 193F - Proseminar (2)

Exposes students to an aspect of the theory or practice of theater arts. Visiting lecturers share their area of expertise in lectures to a small group of students.

THEA 198 - Independent Field Study (5)

Provides for department-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Students engaging in field study must complete application procedures for such study by the fifth week of the previous quarter. Petition required, approved by instructor and department.

THEA 198F - Independent Field Study (2)

Provides for department-sponsored individual study programs off campus for which faculty supervision is not in person (e.g., supervision is by correspondence). Students engaging in field study must complete application procedures for such study by the fifth week of the previous quarter. Petition required, approved by instructor and department.

THEA 199 - Tutorial (5)

Individual study in areas approved by sponsoring instructors. Students submit petition to sponsoring agency.

THEA 199F - Tutorial (2)

Individual study in areas approved by sponsoring instructors. Students submit petition to sponsoring agency.

Graduate

THEA 251 - Graduate Student Production (5)

Participation by a graduate student in a departmental production of a play, dance concert, or other performance event under supervision of the Instructor-of-Record. Rehearsals culminate in public performance. Enrollment is restricted to graduate students and determined by audition with the instructor and in consultation with the Director of Graduate Studies.

THEA 290A - Text Analysis (5)

Presents a range of performance blueprints (texts, scores, libretti, etc.), and introduces key methodologies for translating text into performance. A final paper required.

Prerequisite: Enrollment is restricted to graduate students in theater arts.

THEA 290B - Performance Histories (5)

Contextualizes major movement in performance. Students are exposed to a wide range of historical and visual material pertinent to the creation of theater and dance. A final paper is required.

Prerequisite: Enrollment is restricted to graduate students in theater arts.

THEA 290C - Performance Analysis (5)

Examines the production approaches of a range of performance practitioners, production companies, and performance traditions. Includes exercises in analysis and reconstruction of performance. A final reconstruction project is required.

Prerequisite: Enrollment is restricted to graduate students in theater arts.

THEA 291 - Field Study (5)

Student-designed and conducted research carried out in field settings. A brief prospectus must be filed with the department office before undertaking the research, and a brief final report of activities must be filed upon return. Course intended for students with graduate standing in theater arts. Petition required, approved by instructor and department.

THEA 292 - Teaching-Related Independent Study (5)

Directed graduate research and writing coordinated with the teaching of undergraduates. Course intended for graduate students in theater arts. Petition required, approved by instructor and department.

THEA 293 - Performance Research Project (10)

Internship with a professional theater company in the student's area of emphasis. This work will have a significant academic component supervised and assessed by a theater arts faculty member during the quarter it is taken. Enrollment restricted to graduate students.

THEA 294 - Future Stages (5)

Working in an experimental theater with access to new performance technologies, course explores how cross-media practice can expand on basic theatrical relationships in new and culturally relevant ways.

Prerequisite: Enrollment is restricted to graduate students.

THEA 295 - Group Critique (5)

Peer review and constructive assessment of works in progress. Students are required to give individual presentations to the group at least once a quarter. Educational objectives are to develop the ability to articulate themes and ideas in student's body of work; to strengthen critical skills in making, evaluating, and discussing theater art; to explore the role of the audience in context and criticism; and to investigate the ways artists construct, use, and maintain support communities.

Prerequisite: Enrollment is restricted to graduate students.

THEA 297 - Independent Study (5)

Independent study or research for graduate students in theater arts. Petition required, approved by instructor and department.

THEA 297F - Independent Study/Graduate (2)

Independent study or research for graduate students in theater arts. Petition required, approved by instructor and department. Enrollment restricted to graduate students in theater arts.

THEA 299 - Capstone Thesis (5)

Involves participation in a major collaborative performance project (either faculty-directed or graduate student-directed with faculty supervision) or a research project group. Includes a written thesis, though the length will vary depending upon the student's particular emphasis.

Prerequisite: Enrollment is restricted to graduate students.

UCDC - UCDC

Upper-Division

UCDC 194A - UCDC Internship Research Seminar (5)

Weekly seminar that focuses on the production of a major research paper or equivalent scholarly undertaking connected to an internship in Washington, D.C., government, non-profit, or private institution. Seminar stresses institutional analysis, the development of bibliographic expertise in the use of Washington-based resources, and participant-observer skills. Required for and enrollment is restricted to students participating in the UCDC Program. (Formerly Social Sciences 194A.)

UCDC 194B - UCDC Internship (7)

A 30- to 36-hour-per-week internship in a Washington, D.C., government, non-profit, or private institution. Required for and enrollment is restricted to UCDC program participants.

UCDC 199 - Tutorial (5)

A program of directed study arranged with a Social Sciences Division faculty member. Enrollment is restricted to participants in the UCDC program. (Formerly Social Sciences 199.)

UCDC 199F - Tutorial (2)

A program of directed study arranged with participating faculty. Class time is proportionally less than a 5-credit course. Enrollment is restricted to participants in the UCDC program. (Formerly Social Sciences 199F.)

WRIT - WRITING

Lower-Division

WRIT 1 - Introduction to Composition (5)

Provides declarative knowledge and procedural knowledge about writing, with a special focus on genre, rhetorical situation, revision, editing, and making connections between texts and one's own perspective.

Prerequisite: Prerequisite(s): College 1 and WRIT 26; or College 1 and AWPE score of 2-6 or AWPE for Multilingual Students (AWPE-MLS) score of 6.

WRIT 1A - Introduction to Composition (5)

Provides declarative knowledge and procedural knowledge about writing, with a special focus on genre, genre conventions, and rhetorical situation. Provides opportunities for composing in a number of genres. (Formerly Writing 1)

Prerequisite: Prerequisite(s): WRIT 27. Enrollment is restricted to first-year students and sophomores.

WRIT 1E - Introduction to Composition (5)

Provides declarative knowledge and procedural knowledge about writing, with a special focus on genre, rhetorical situation, revision, editing, and making connections between texts and one's own perspective. Designed to support multilingual learners.

Prerequisite: Prerequisite(s): College 1 and WRIT 26; or College 1 and AWPE score of 2-6 or AWPE for Multilingual Students (AWPE-MLS) score of 6.

WRIT 2 - Rhetoric and Inquiry (5)

Provides declarative knowledge about writing, with a special focus on writing from research, composing in multiple genres, and transferring knowledge about writing to new contexts.

Prerequisite: Prerequisite(s): College 1 and satisfaction of the Entry Level Writing; or College 80A, 80D, or 80F and satisfaction of the C1 requirement. Enrollment is restricted to frosh, sophomore and junior students.

WRIT 2H - Rhetoric and Inquiry, Honors (5)

Provides declarative knowledge and procedural knowledge about writing, with a special focus on writing from research, composing in multiple genres, and transferring knowledge about writing to new contexts. Designed for advanced students.

Prerequisite: Prerequisite(s): College 1 and satisfaction of the Entry Level Writing Requirement. Enrollment is restricted to College Scholars or students with an AWPE score of 10-12.

WRIT 11A - Adjunct Tutorial in Writing (2 credits per quarter) (2)

A tutorial designed to provide follow-up assistance in writing for students who have passed the Entry Level Writing Requirement, but wish to continue to work on various aspects of their writing. Counts only for academic standing and financial aid purposes, but does not apply toward degree requirements (i.e., counts as workload credit only). Prerequisite(s): approval of the Writing Program; satisfaction of the Entry Level Writing Requirement.

WRIT 11B - Adjunct Tutorial in Writing (2 credits per quarter) (2)

A tutorial designed to provide follow-up assistance in writing for students who have passed the Entry Level Writing Requirement, but wish to continue to work on various aspects of their writing. Counts only for academic standing and financial aid purposes, but does not apply toward degree requirements (i.e., counts as workload credit only). Prerequisite(s): approval of the Writing Program; satisfaction of the Entry Level Writing Requirement.

WRIT 11C - Adjunct Tutorial in Writing (2 credits per quarter) (2)

A tutorial designed to provide follow-up assistance in writing for students who have passed the Entry Level Writing Requirement, but wish to continue to work on various aspects of their writing. Counts only for academic standing and financial aid purposes, but does not apply toward degree requirements (i.e., counts as workload credit only). Prerequisite(s): approval of the Writing Program; satisfaction of the Entry Level Writing Requirement.

WRIT 23 - Grammar and Rhetoric: Language for Writing (5)

Builds on writing skills gained in previous writing courses; focuses on effective language use in academic writing. Students reinforce their written English proficiency by reading, studying, practicing, and writing structures and patterns of written English.

Prerequisite: Enrollment is restricted to fourth-quarter students who have not passed the Entry Level Writing Requirement. Open to others by permission of instructor.

WRIT 25 - Writing About Place (5)

Students explore the UCSC discourse community including classroom culture, then widen their lens to include the larger Santa Cruz community. Writing moves beyond the paragraph level to include oral communication and presentation skills.

Prerequisite: Prerequisite(s): AWPE for Multilingual Students (AWPE-MLS) score of 2-3.

WRIT 26 - Writing About Language (5)

Students explore language acquisition and how to best optimize their own language learning by engaging in a primary research project. Through the research project, students learn to use academic discourse conventions in their own writing.

Prerequisite: Prerequisite(s): WRIT 25 or AWPE for Multilingual Students (AWPE-MLS) score of 4-5.

WRIT 27 - Writing About Genre (5)

Using the theme of Rhetoric and Genre, this course prepares students to transfer into the mainstream composition curriculum by training them to analyze, understand, assess, and successfully produce different genres of writing. Upon passing this course, students satisfy the Entry-level Writing Requirement (ELWR).

Prerequisite: Prerequisite(s): WRIT 26 or placement by examination.

WRIT 30 - Genre Study: STEM (2)

Engages students in an examination of the textual practices and products (genres) through which knowledge in science, technology, engineering, and mathematics (STEM) fields is created, documented, and disseminated. Enrollment is by interview only and restricted to Summer Academy, first-year participants.

WRIT 64 - Newswriting Workshop (5)

Introduction to the basic techniques of newswriting, including practice in leads, formats, and different kinds of news reporting. Emphasis on developing skills in research, interviewing, and shaping stories. Includes an examination of the contemporary media. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements, instructor determination at first class meeting.

WRIT 70 - Communication and Rhetoric: An Introduction (5)

This course introduces the field of contemporary communication studies, locating its roots in rhetoric and showing how key concepts play out in mass media and other settings as well as in everyday life.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing requirement.

WRIT 93 - Field Study (5)

For lower-division students: supervised study within commuting distance of campus. May include internships at

magazines, newspapers, publishing houses, or newsletters of corporations, and civic or service organizations.

Prerequisite(s): satisfaction of the Entry Level Writing requirement; certification of adequate preparation; approval of Writing Program.

WRIT 93F - Field Study (2)

For lower-division students: supervised study within commuting distance of campus. May include internships at magazines, newspapers, publishing houses, or newsletters of corporations, and civic or service organizations. Students submit petition to sponsoring agency.

WRIT 99 - Tutorial (5)

Individual, directed study for lower-division students in expository writing, editing, or journalism. Students submit petition to sponsoring agency.

WRIT 99F - Tutorial (2)

Individual, directed study for lower-division students in expository writing, editing, or journalism. Students submit petition to sponsoring agency.

Upper-Division

WRIT 101 - Introduction to the History, Theory, and Practice of Rhetoric (5)

A survey of classical and contemporary ideas about rhetoric which explores, practically and theoretically, the best means of persuasion in any situation whatsoever and will consider the nature of human discourse in diverse areas of knowledge.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

WRIT 102 - The Rhetoric of the Social Sciences (5)

Develops rhetorical facility in disciplinary writing for upper-division social science majors. Requires critical and disciplinary reading, writing in modes appropriate to social science disciplines, and a substantial research or critical paper within the student's own discipline.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

WRIT 103 - Rhetoric of the Natural Sciences (5)

This course explores writing genres within the natural sciences. Emphasis is on the relationships between good science and good writing, clear thinking and clear writing. Frequent papers and substantive revisions required.

Prerequisite: Prerequisite(s): completion of 10 units coursework in the natural sciences, satisfaction of the Entry Level Writing and Composition requirements. Enrollment is restricted to juniors and seniors during priority enrollment.

WRIT 104 - Writing in the Arts (5)

A writing course focusing on the purposes and composition of various genres of writing about and in the performing arts, visual arts, and music such as reviews, program and exhibit notes, journal and magazine articles, grant proposals, and press releases.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

WRIT 106 - Public Speaking (5)

Students learn strategies to write, analyze, and deliver effective speeches of various kinds as well as professional presentations using PowerPoint and other visuals.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

WRIT 107 - Technical and Business Writing: An Overview (5)

An exploration of the conventions and formats of business and technical writing. Course work involves writing effective resumes, proposals, letters, end-user manuals, and the fundamentals of Web site design.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

WRIT 108 - Electronic Communication (5)

An introduction to the evolving conventions of effective Web site design as well as collaborative writing. Course work includes evaluation of Web site content and structure and creation of hypertext.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

WRIT 109 - Argument and Practical Reasoning (5)

An investigation of contemporary persuasive discourse with special attention to the elements and forms of argument, the nature of evidence, questions of validity and probability, and the workings of rhetorical reasoning. Emphasizes the analysis of arguments rather than their construction.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

WRIT 110A - Writing in the Professions (5)

Study of writing required in the selected professions, including law, politics, and government. Considers the rhetoric of each discipline and relevant texts. Includes lectures from visiting professionals and a series of writing assignments based on reading and research. Topic may vary from year to year, focusing on the rhetoric of other professional divisions: medicine, engineering, economics, and so forth.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

WRIT 120 - Editing English Prose (5)

This course offers extended, detailed instruction in editing one's own and other people's prose for accuracy, clarity, appropriateness, and effectiveness. It provides some history of theories of style and stylistic analysis, and instruction in prose variation according to social context.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

WRIT 159 - Grammar for Tutors and Teachers (3)

English grammar from a pedagogical perspective, emphasizing structures, patterns, and conventions of written English that commonly challenge basic writers. Students learn strategies for helping multilingual and other writers improve their writing skills by increasing their awareness of grammar.

Prerequisite: Prerequisite(s): WRIT 169, or by instructor permission.

WRIT 161 - Academic Writing and Research Methods (5)

Introduces library and field research methods and also provides instruction and practice in writing from research, addressing issues such as voice, argument, and documentation. Students write four lengthy essays and do considerable informal writing. Course 161 includes sections for re-entry women, transfer students, and students in the EOP Faculty Mentor Program. Prerequisite(s): satisfaction of Entry Level Writing and Composition requirements. Students should contact the instructor for enrollment information.

WRIT 163 - Advanced Workshop in Expository Writing (5)

A composition course for students who, having mastered basic writing skills, wish to concentrate on increasing their effectiveness as rhetoricians, prose stylists, and editors. Assignments include writing and revising essays, responding to other students' work, and reading published essays.

Prerequisite: Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements.

WRIT 165 - Practicum in Reporting (5)

In-depth, community-based reporting, with an emphasis on skills ranging from interviewing techniques to profiles, integrating research with writing. Students choose a specific area or desk of concentration, and all the stories reflect that beat. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; a writing sample, completed in class, is required at first class meeting. Enrollment restricted to journalism minors during priority enrollment.

WRIT 166A - Magazine Writing (5)

Introduces students to the various forms of magazine writing, as well as to pertinent reporting techniques. Students work intensively on process, style, and editing, producing numerous formal and informal pieces. Enrollment priority will be given to journalism minors. Students produce a writing sample on the first day of class. Prerequisite(s): satisfaction of Entry

Level Writing and Composition requirements; course 64 or permission of instructor.

WRIT 166B - Investigative Reporting (5)

Students acquire basic investigative and research skills, with particular emphasis on how to develop investigative subjects, obtain data, check accuracy, and convert information into well written, publishable articles. Priority given to students concentrating in journalism. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; interview with instructor to review journalism portfolio.

WRIT 166D - Minorities in Journalism (5)

Focuses on the minority press and how it has shaped journalism in the U.S. as well as viewing how the media has dealt with this segment of our society. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements and consent of instructor.

WRIT 166J - Online Journalism (5)

A course in using electronic sources to report articles for publication and in publishing journalistic pieces online. Prerequisite(s): course 64 or journalism experience; instructor determination at first class meeting.

WRIT 166N - The Rhetoric of Radio (5)

Examines the theory and practice of radio. Students explore how the formats of radio create its meaning, and investigate radio's place in the landscape of the media, particularly in the U.S. and Mexico. Prerequisite(s): satisfaction of the Entry level Writing and Composition requirements and consent of instructor.

WRIT 167 - Making the News (5)

A writing course examining news and feature articles in popular print media. Students write their own articles and analyze how a particular content is mandated by conventional forms, by the structure of the industries, and by ideas of newsworthiness. Designed for journalism minors and students for whom a course in media criticism is central to their program. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; qualifications determined by instructor at first class meeting.

WRIT 169 - Theory and Practice of Tutoring Writing (3)

An introduction to theory and research on the composing process and practical strategies for teaching writing, especially in tutorial situations. Recommended for writing assistants. Prerequisite(s): instructor determination at first class meeting; course intended for writing tutors only.

WRIT 180 - Seminar in Editing and Publishing (5)

Newswriting seminar for *City on a Hill* editors and writers. Weekly sessions evaluate newspaper in depth, including writing, reporting, and issues in journalism ranging from ethics to legal questions. Prerequisite(s): instructor determination at first class meeting; open only to editors, interns, and writers at *City on a Hill* Press.

WRIT 189 - Methods of Teaching Writing (5)

Supervised by a writing instructor, each student attends a weekly seminar on teaching writing and either assists in a class or serves as a facilitator of a small writing group in a course at UCSC or a public school. Students submit petition to sponsoring agency.

WRIT 191A - Internship in Writing (5)

Regular writing for newspaper or magazine. Students submit petition to sponsoring agency.

WRIT 191B - Internship in Editing (5)

Work in an editorial position involving critique and guidance of reporters. Students submit petition to sponsoring agency.

WRIT 191C - Internship in Publishing (5)

All phases of work for a publishing house, from manuscript reading to editorial. Students submit petition to sponsoring agency.

WRIT 191D - Internship in Broadcasting (5)

Writing, editing, scheduling, and/or broadcast work for television or radio. Students submit petition to sponsoring agency.

WRIT 192 - Directed Student Teaching (5)

Teaching of a lower-division seminar under faculty supervision. (See course 42.) Students submit petition to sponsoring agency.

WRIT 193 - Field Study (5)

For upper-division students: supervised study within commuting distance of the campus. May include internships at magazines, newspapers, publishing houses, or newsletters of corporations, and civic or service organizations. Prerequisite(s): satisfaction of Entry Level Writing requirement; students submit petition to sponsoring agency.

WRIT 193F - Field Study (2)

For upper-division students: supervised study within commuting distance of the campus. May include internships at magazines, newspapers, publishing houses, or newsletters of corporations, and civic or service organizations. Students submit petition to sponsoring agency.

WRIT 194 - Group Tutorial (5)

A writing, editing, or publishing project undertaken by a small group of students under the direct supervision of a writing instructor. Students submit petition to sponsoring agency.

WRIT 195 - Senior Thesis (5)

Individual work on a thesis for any campus major or individual major. Faculty in the Writing Program help students on all phases of work, from selection and focus to development of bibliographies, research techniques, revision, and editing. Students submit petition to sponsoring agency.

WRIT 196 - Developing and Editing Field Documentation (2)

Helps students transform field documentation into fully developed, professional projects. Employs a weekly production schedule and teaches principles of rhetoric as a means of effectively selecting and arranging documentary materials. Prerequisite(s): satisfaction of the Entry Level Writing and Composition requirements; interview with instructor to review documentary materials.

WRIT 198 - Independent Field Study (5)

Individual study for which faculty supervision is possible only by correspondence. May include internships at newspapers, magazines, publishing houses, or the newsletters of corporations, and civic or service organizations.

Prerequisite(s): satisfaction of Entry Level Writing requirement; students submit petition to sponsoring agency.

WRIT 198F - Independent Field Study (2)

Individual study for which faculty supervision is possible only by correspondence. May include internships at newspapers, magazines, publishing houses, or the newsletters of corporations, and civic or service organizations. Students submit petition to sponsoring agency.

WRIT 199 - Tutorial (5)

Individual, directed study for upper-division students in expository writing, editing, or journalism. Students submit petition to sponsoring agency.

WRIT 199F - Tutorial (2)

Individual, directed study for upper-division students in expository writing, editing, or journalism. Students submit petition to sponsoring agency.

Graduate

WRIT 202 - Writing and Learning Seminar (3)

Strategies for teaching assistants to help undergraduates become better learners and writers in disciplinary courses. Topics include using writing to improve reading and thinking, analysis of assignments, avoiding plagiarism, responding to and evaluating papers, ESL writers, peer response, and technological aids.

Prerequisite: Enrollment is restricted to graduate students.

WRIT 203 - Teaching Writing (5)

Prepares graduate students to teach first-year composition at UCSC and elsewhere. Development of a syllabus, teaching strategy, and class plans based on study of composition and rhetorical theories, research on students' writing development, and effective writing pedagogies.

Prerequisite: Enrollment is restricted to graduate students.

YIDD - YIDDISH

Lower-Division

YIDD 1 - First-Year Yiddish (5)

Introduces the Yiddish language. Students learn to speak and to ask others in Yiddish about themselves and about common situations (the classroom, work, family), and learn to read and write simple Yiddish texts. (Formerly Introduction to Yiddish.)

YIDD 2 - First-Year Yiddish (5)

Follows course 1 (formerly Hebrew 10), expanding vocabulary to include the weather, physical health and sickness, holidays, clothing, etc., and increasing student ability for self-expression using different tenses and grammatical cases. (Formerly Introduction to Yiddish.)

Prerequisite: Prerequisite(s): YIDD 1 or by consent of instructor.

YIDD 3 - First-Year Yiddish (5)

Follows course 2, expanding vocabulary to include food, travel, and academic life, with an emphasis on the expression of feelings and opinions, agreement and disagreement, making use of all tenses and all grammatical cases.

Prerequisite: Prerequisite(s): YIDD 2 or by permission of the instructor.

YIDD 99F - Tutorial (2)

Students submit petition to sponsoring agency.

UNDERGRADUATE INFORMATION

In this section:

Undergraduate Admission (p. 1028)

Undergraduate Expenses (p. 1033)

Undergraduate Academic Program (p. 1039)

The Colleges and Student Life (p. 1063)

UNDERGRADUATE ADMISSION

In this section:

Admission Procedures (p. 1029)

Admission as a Transfer Student (p. 1031)

Admission of U.S. Students from Outside California (p. 1028)

Admission of International Students (p. 1029)

Readmission (p. 1033)

Admission to Special Categories (p. 1033)

Nondiscrimination, Harassment, and Affirmative Action Policies (p. 1029)

Undergraduate admission to the University of California is based on multiple academic factors, as well as on personal achievements. The university has minimum admission qualifications, which are the same for each of the UC campuses, but when the number of minimally qualified applicants exceeds a campus's capacity for admission, additional faculty-approved selection criteria are applied.

If you are considering applying to UC Santa Cruz, the Office of Undergraduate Admissions wants to help you learn more about the campus, its distinctive educational programs, and its selection process for both first-year and transfer applicants. For more information, see Undergraduate Admissions.

The University of California, Santa Cruz, continues to take positive steps to increase the diversity of the student population, including applicants coming from low socioeconomic backgrounds, students with disabilities, current members of the military, military veterans, and non-traditionally aged students. In addition, the campus welcomes students from throughout the U.S. and the world. The University of California, in accordance with applicable federal and state law and university policy, does not discriminate on the basis of race, color, national origin, religion, sex, gender, gender identity, gender expression¹, physical or mental disability, medical condition (cancer related or genetic characteristics), genetic information, ancestry, marital status, age, sexual orientation, citizenship, or

service in the uniformed services². The university also prohibits sexual harassment.

Admission by Exception. Admission by Exception is granted to a very small percentage of applicants who do not meet UC requirements. Such factors as academic accomplishments in light of a person's life experiences and/or special circumstances, socioeconomic background, special talents and/or achievements, contributions to the community, and the applicant's answers to the Personal Insight Questions are taken into consideration.

Campus Safety. UC Santa Cruz campus crime statistics can be viewed in the annual Clery Report, available at the UC Santa Cruz Police Department website.

Graduation rates. The following graduation-rate information is listed in compliance with the 1990 Title I: Federal Right-to-Know Act, Section 103. Fifty-two percent of the students who entered as first-year students in 2013 graduated in four years; 71 percent of those who entered in 2012 graduated in five years; and 77 percent of those who entered in 2011 graduated in six years. These graduation rates are well above the national averages. Among the most recent entering cohorts, those who entered as first-year students took an average of 4.4 years to graduate, and students transferring to UCSC as juniors averaged 2.5 years.

In accord with the Education Amendments of 1976, Section 493A, more detailed information regarding retention is available at the Institutional Research website.

¹Pregnancy includes pregnancy, childbirth, and medical conditions related to pregnancy or childbirth.

²Service in the uniformed services includes membership, application for membership, performance of service, application for service, or obligation for service in the uniformed services.

Admission of U.S. Students from Outside California

UC Santa Cruz welcomes students from across the U.S. to enhance our vibrant campus community. Out-of-state applicants must meet the same admission qualifications as California students, but with a higher GPA. Detailed information for UC Santa Cruz is provided at Out-of-State Students. Information for all 10 general campuses of the University of California can be viewed at University of California Admissions.

Students who are not California residents are assessed nonresident tuition in addition to educational and registration fees. Residency for fee purposes is determined after admission based on documentation provided in a Statement of Legal Residency. See California Residence for Tuition Purposes.

Admission of International Students

The University of California welcomes students from countries throughout the world to enhance our vibrant campus community. The academic credentials of applicants from other countries are evaluated by Admissions specialists in accordance with UC faculty-approved regulations governing admission.

UC Santa Cruz accepts applications from international students for the fall quarter, and students should begin application inquiries a year before the quarter of desired admission. Openings for the winter quarter may be limited. If you are interested in applying for winter, check with the Office of Undergraduate Admissions.

If your native language is not English, you must certify proficiency in English. Further information is available on the Office of Undergraduate Admissions website.

A financial certificate and official academic records will be required if you are admitted to the university. Generally, nonimmigrant students must provide documentation that sufficient funds will be available to cover nonresident tuition, educational fees, and living expenses. The university does not offer need-based financial assistance to international students.

For information about services for international students, see the Global Engagement Office website.

Nondiscrimination, Harassment, and Affirmative Action Policies

The University of California, in accordance with applicable federal and state law and university policy, does not discriminate on the basis of race, color, national origin, religion, sex, gender, gender identity, gender expression, pregnancy¹, physical or mental disability, medical condition (cancer related or genetic characteristics), genetic information, ancestry, marital status, age, sexual orientation, citizenship, or service in the uniformed services². The university also prohibits sexual harassment.

This nondiscrimination policy covers admission, access, and treatment in University programs and activities.

Inquiries regarding the University's student-related nondiscrimination policies may be directed to Conduct and

Community Standards, (831) 459-1738, or email conduct@ucsc.edu.

Inquiries regarding the University's affirmative action, equal employment opportunity, nondiscrimination, and harassment policies as they relate to student employment may be directed to the Office for Diversity, Equity, and Inclusion, (831) 459-3676 or email cbene@ucsc.edu.

Inquiries regarding the UC Policy on Sexual Violence and Sexual Harassment and UC Santa Cruz Procedures for Reporting and Responding to Reports of Sexual Violence and Sexual Harassment and/or any other violations of Title IX (sex/gender discrimination; harassment or discrimination based on sexual orientation, gender identity, gender expression, or pregnancy) may be directed to Title IX Officer Cherie Scricca, (831) 459-2462, or email cscricca@ucsc.edu.

Student inquiries regarding disability or disability accommodations may be addressed to the Director, Disability Resource Center, (831) 459-2089; or email drc@ucsc.edu.

Students with disabilities who are unable to resolve accommodation or discrimination concerns may contact the campus ADA Compliance Officer by phone, (831) 459-4380, or email ashish@ucsc.edu.

¹**Pregnancy** includes pregnancy, childbirth, and medical conditions related to pregnancy or childbirth.

²**Service in the uniformed services** includes membership, application for membership, performance of service, application for service, or obligation for service in the uniformed services.

Admission Procedure

The University of California Application for Undergraduate Admission and Scholarships becomes available beginning August 1 for the following academic year. Students may access applications online.

In addition to the application, the above site includes a wealth of information for prospective UC students about undergraduate education, admission, financial aid, and various topics of interest.

APPLICATION FILING PERIODS

Applications for the fall quarter must be submitted during the month of November and applications for winter quarter admission are accepted only for transfer students in certain majors. Check the Office of Admissions in mid-June to see details on winter quarter admission. UCSC does not accept applications for spring quarter admission.

APPLICATION FEES

The application fee is \$70 (\$80 for international nonimmigrant applicants) to apply to one campus of the University of California. For each additional campus you select, you must pay an extra \$70 fee (\$80 for international nonimmigrant applicants). These fees are subject to change and are not refundable. The online application includes payment instructions.

FEE WAIVERS

The University of California will waive application fees for up to four campuses for certain students who otherwise would be unable to apply for admission. To qualify for the fee waiver, you must meet specific requirements related to your family income and size. The fee waiver is for U.S. citizens and permanent residents only. We encourage students who qualify for a fee waiver to take full advantage of the fee waiver by applying to the maximum of four UC campuses.

Students who qualify for fee waivers and who select more than four campuses must pay \$70 for each additional choice. Methods of obtaining fee waivers are listed below.

An online fee waiver form is available to applicants when they apply. The application automatically determines if you are eligible for the fee waiver as soon as it is complete.

High school students: Use the College Board fee waiver. It is available from your school counselor.

EOPS community college students: If you are enrolled in Extended Opportunity Programs and Services (EOPS) at a California community college, obtain a fee waiver authorization from the EOPS Office.

ADMISSION AS A FIRST-YEAR STUDENT (FRESHMAN)

The university considers you a freshman applicant if you have graduated from high school and have not enrolled in a regular session at any college or university. If you attend a summer session immediately after graduating from high school, you are still a freshman applicant.

The admission and selection process to UC Santa Cruz reflects the academic rigor and preparation needed for admission to a major research institution. Meeting the minimum qualifications for the university does not guarantee you admission as a freshman. Students are encouraged to achieve well beyond the minimum qualifications to enhance their chances for selection.

UC Santa Cruz uses a holistic approach in selecting freshmen for admission. Applicants are thoroughly reviewed to determine the full spectrum of their academic and personal achievements, viewed in the context of their academic and

personal opportunities. UCSC uses 14 faculty-approved criteria to determine an individualized, single score for each applicant.

Information regarding the admission and selection process for UC Santa Cruz can be accessed on the Undergraduate Admissions website. This site provides information on the minimum qualifications for the University of California for both residents and nonresidents of California, including international students (see also Admission of Students from Outside California and Admission of International Students).

HIGH SCHOOL PREPARATION FOR UNIVERSITY WORK

Carefully planned high school coursework provides you with the best preparation for your undergraduate university studies, and allows for advanced preparation for your chosen field of study. Most important, students who master certain basic knowledge and skills in high school substantially increase their chances of success at the university. (Requirements for transfer students are explained in the Admission as a Transfer Student section.)

The basic foundation of UC qualifications is the completion of college preparatory courses required for admission (see “a–g” Subject Requirements below). However, you should take courses beyond the minimum levels in reading, writing, and mathematics in order to be adequately prepared for basic university courses that you may be expected to take freshman year.

A well-prepared student will have mastered the equivalent of four years of English composition and literature with a focus on expository writing; four years of mathematics, including a precalculus course in the senior year; two to three years of a language other than English; two to three years of laboratory science; two or more years of history and social sciences; and one or more years of visual or performing arts.

You should also give careful thought to the general field of study, and perhaps the specific major, you want to pursue at the university. By making this decision in advance, you can plan to take additional courses in high school related to the field.

SUBJECT REQUIREMENTS

The “a–g” subject requirements are described in detail on the Admissions website.

1. History/social science—two years required.
2. English—four years required.

3. Mathematics—three years required, four years recommended.
4. Laboratory science—two years required, three years recommended.
5. Language other than English—two years required, three years recommended.
6. Visual and performing arts discipline (VPA)—one year required.
7. College preparatory electives—one year required.

Senior-Year (12th-Grade) Program. The senior year should be used to prepare you for your first year at the university and should include honors and advanced courses, as well as courses that will strengthen overall preparation. A challenging, successfully completed senior-year program is a natural bridge between high school and university coursework in the intended major. A strong senior program is one of the selection criteria used at UC Santa Cruz.

HIGH SCHOOL PROFICIENCY EXAMINATION

While the University of California expects all freshman applicants to have graduated from high school/secondary school, in lieu of the regular high school diploma (or its equivalent), the university will accept the following:

- Certificate of Proficiency, awarded by the State Board of Education upon successful completion of the California High School
- Proficiency Examination
- General Educational Development (GED) Certificate
- Proficiency tests from other states and other countries

TRANSFER CREDIT

Transfer credit may be granted to a freshman applicant for acceptable college courses taken while still in high school if an official transcript is received from the college where the coursework was completed.

Transfer credit is granted for specified College Board Advanced Placement Examinations completed with a score of 3, 4, or 5 and for specified International Baccalaureate Higher Level Exams completed with a score of 5, 6, or 7. A score of 30 or higher on the International Baccalaureate Diploma is also awarded transfer credit.

Transfer credit is granted for specified GCE and Hong Kong A-Level Examinations.

Students should be advised that college courses taken before or after attending UCSC may duplicate AP, IB, and/or A-Level Examinations. Additionally, exams may duplicate each other (for example, an AP or IB exam in the same subject area). If the student does duplicate an exam with another exam of the same subject content, and/or an exam with a college course, UCSC awards credit only once.

Admission as a Transfer Student

The University of California defines a transfer applicant as a student who has been a registered student in a college or university, or in college-level extension classes following high school graduation. Summer session attended immediately following high school graduation is excluded in this determination. If you are a transfer applicant, you cannot disregard your college record and apply for admission as a freshman.

The admission and selection process for transfers to UC Santa Cruz reflects the academic rigor and preparation needed for admission to a major research institution. Meeting the minimum qualifications for the university does not guarantee you admission as a transfer student. It is expected that students will have completed the lower-division courses required by their intended major prior to transfer. See Screening Major Selection Criteria for an annual listing of all majors that require specific courses/grades prior to transfer to UCSC.

Transfer applicants are thoroughly reviewed to determine their full spectrum of academic and personal achievements, including transfer coursework completed for their intended major. UCSC uses faculty-approved criteria to determine which transfer students will be selected for admission. UC Santa Cruz gives the highest priority to junior-level transfer students coming from California community colleges.

Information regarding the admission and selection process for UC Santa Cruz can be accessed at the Undergraduate Admissions website. This site provides information on the minimum qualifications for the University of California for students in California, in other states, and outside the U.S.

UC SANTA CRUZ TRANSFER ADMISSION GUARANTEE (TAG) PROGRAM

UC Santa Cruz's TAG (Transfer Admission Guarantee) Program is designed for California community college transfer students at the junior level. The benefits of participating in UCSC TAG include informational mailings,

and invitations to events. All California community colleges participate in the UC Santa Cruz TAG program.

The UC TAG application must be submitted online between September 1 and September 30 for the following fall quarter. UCSC accepts transfer admission agreements for fall quarter only.

Further information may be found at Transfer Admission Guarantee (TAG) Program.

UC TRANSFER ADMISSION PLANNER (TAP)

The UC Transfer Admission Planner is an online tool designed to help prospective UC students transferring from California community colleges track and plan their coursework, including those students who are seeking a Transfer Admission Guarantee (TAG) with one of the seven participating UC campuses.

Further information may be found at UC Transfer Admission Planner.

CREDIT FOR COURSES TAKEN ELSEWHERE

The university gives unit credit to transfer students for courses they have completed at other accredited colleges and universities, including courses taken at recognized institutions outside of the U.S. To be accepted for credit, your courses must be comparable to those offered at the university, as determined by the UC Santa Cruz Undergraduate Admissions Office. The UC Santa Cruz department sponsoring your major decides which transfer courses may be used to satisfy major requirements.

A total of 70 semester units (105 quarter units) of lower-division credit toward a university degree may be earned at other colleges/universities. Only subject credit will be granted for courses taken in excess of that cap. Please note that credit from another University of California campus is exempt from this limitation.

Applicants will not be considered for admission if they have completed 90 semester units (135 quarter units) or more of UC-transferable upper-division and lower-division combined credit. If students have earned all of their credits as lower-division credits, they are not affected by this limit. All coursework completed at California community colleges is considered lower division. Advanced Placement (AP) or International Baccalaureate Higher Level (IBH) credit is permitted to exceed the 90-semester unit maximum by the number of AP or IBH units granted.

Opportunities to take courses at UC Santa Cruz as a nonmatriculated student are available through Summer

Session, Open Campus/Concurrent Enrollment through UC Extension, and Intersegmental Cross-Enrollment.

UC SANTA CRUZ TRANSFER SERVICES

The Office of Undergraduate Admissions provides information to all students who wish to transfer to UC Santa Cruz. For prospective transfer students and their families, Undergraduate Admissions offers Transfer Information Sessions. Transfer Information Sessions are small-group meetings in which an adviser presents information about transfer admissions and transfer-related student services. Please note that pre-evaluations of transcripts are not available as part of the sessions. These sessions are designed for students who have not yet applied to UCSC. Students and their families may make reservations at Transfer Information Sessions.

Student-led guided tours take place year-round and also require advance reservations. Please see Undergraduate Admissions website to make a reservation.

In addition, UC Santa Cruz Admissions counselors visit many community colleges in California. Check with your counseling department or transfer center to determine whether a UCSC counselor will be visiting your community college.

UC SANTA CRUZ OFFICE OF ADMISSIONS TRANSFER PREPARATION PROGRAM (TPP)

The UC Santa Cruz Transfer Preparation Program (TPP) supports prospective transfer students from California community colleges and assists them in enrolling at UC Santa Cruz, as well as at other campuses. TPP Admissions representatives work most closely with students who are attending one of the 13 community colleges in the region to plan a successful transfer program, but will assist any California community college student who has questions.

The Transfer Preparation Program also collaborates with programs and initiatives that strengthen the transfer process and support individual students in making a successful transition to a four-year institution.

Further information may be found at Transfer Preparation Program.

Readmission

If you are an undergraduate who wants to return to UC Santa Cruz after an absence of a portion of a quarter or more, you must file an Application for Readmission. The application form is available online at Undergraduate Advising. The completed application should be filed with the Office of Undergraduate Admissions during the appropriate period:

Quarter of Attendance	Application Filing Period
Fall quarter	November 1–April 1
Winter quarter	July 1–October 1
Spring Quarter	October 1–January 2

There is a \$70 filing fee, which is nonrefundable and nontransferable. The filing fee will be billed to your student account; you are responsible for this fee even if you do not return to UCSC.

If during your absence you attended another UC campus, an official transcript must be submitted to the Office of Undergraduate Admissions before your application will be sent to your college for approval. If you attended another collegiate institution, your UC Santa Cruz college may require a transcript. If you left for health reasons, clearance from the Cowell Student Health Center is required. You must pay all outstanding bills owed to the university before you will be permitted to register.

Admission to Special Categories

Admission to either of the categories described below is at the sole discretion of UC Santa Cruz, and only when enrollment allows. Students seeking their first undergraduate degrees have priority over students who have already earned an undergraduate degree. For information on applying for admission in the categories described below, please contact the Office of Undergraduate Admissions.

SECOND BACHELOR'S DEGREE

If your educational goals have changed substantially since receiving your bachelor's degree, you may be eligible to pursue a second undergraduate degree at UC Santa Cruz. Applications from students interested in pursuing a second baccalaureate program will be considered as campus enrollment allows. Priority is given to applicants who have not yet had the opportunity to complete a bachelor's degree.

You must meet regular university admission qualifications, and your experience or previous scholarship record must

show potential for academic success in your proposed area of study. Additional selection criteria will be applied, and admission is subject to approval by the appropriate department.

For a second degree, you must fulfill major and residence requirements, as well as UC systemwide requirements in American History and Institutions and the Entry Level Writing Requirement. You must enroll for at least three quarters and are usually restricted to six quarters total.

LIMITED STATUS

If you have already completed an undergraduate degree and you have a particular reason to take specific undergraduate university classes, you may be eligible to enroll in a non-degree program as a limited-status student. Applications from students interested in limited-status enrollment are permitted as campus enrollment allows. Priority is given to applicants who have not yet had the opportunity to complete a bachelor's degree.

Your proposed program of study must either prepare you for graduate or professional school or satisfy some definite educational need or interest. Participants generally enroll full-time for a specified period that does not exceed three quarters. You must meet regular university admission qualifications, and your experience or previous academic record must show potential for success in your proposed program. Additional selection criteria will be applied, and admission is subject to approval by the appropriate department.

UNDERGRADUATE EXPENSES

Expenses

In determining the cost of attending UC Santa Cruz each quarter, students should consider both required fees and personal expenses. The figures below are provided to help you draw up a realistic personal budget. If you then conclude you will need financial assistance in order to attend UCSC, you should read the Financial Aid section below. Fees and additional financial information for graduate students appear in the Graduate Studies (p. 1087) section. Tuition, fees, and other charges are subject to change without notice by the UC Regents. For the most current fee information, check Undergraduate Student Fees.

Required Fees

Required fees are due and payable before the start of each quarter. At the beginning of each quarter, you will need sufficient funds to cover tuition and fees, housing, books and supplies, and UC student health insurance (waivable). For many financial aid recipients who are enrolled at least half

time, tuition and fees on the student account are paid automatically with approved student aid funds. If you are a financial aid recipient, please note that checks and direct deposits for scholarships, grants, and loans in excess of university charges are not available to you until after the first day of instruction each quarter.

The Student Services Fee funds student services that provide a supportive and enriching learning environment and that are complementary to, but not part of, the instructional program. Programs include, but are not limited to, services related to the physical and psychological health and well being of students; social and cultural activities and programs; services related to campus life; and educational and career support.

Tuition helps support student financial aid and related programs; administration; libraries; operation and maintenance of facilities; the university's operating budget; and all costs related to instruction, including faculty salaries.

Santa Cruz Campus Fees help support a wide range of student services, including college and campuswide student government, extracurricular programs and recreation facilities, campus child care, community and public service projects, Educational Opportunity Programs and scholarships, and free-fare use of the local transit systems. Campus fees paid by graduate students are provided at Student Fees.

In addition, all students, including international students, are assessed a mandatory Health Insurance Premium. The Cowell Student Health Center provides the primary care services for the plan while a contracted insurance company provides major medical and hospitalization insurance. Dependent coverage is also available. Detailed information is available at the Health Center website or at the Student Health Insurance Office, (831) 459-2389.

Waivers from the mandatory health insurance premium are available if you can show that your private insurance provides coverage equal to or better than the student health insurance plan. Deadlines for applying for a waiver are listed in the Schedule of Classes.

Some courses charge an additional **Course Materials Fee**. These fees recover the cost of materials, supplies, equipment, and support services not covered by the normal instructional budget. The fees are reviewed and approved annually by the Miscellaneous and Course Materials Fee Advisory Committee. The list of specific courses charging fees in 2019–20 is available in the quarterly Schedule of Classes and on the web at Course Fees.

Nonresident Tuition

If you are a resident of a state other than California or of another country, you must also pay nonresident tuition, the nonresident educational fee, and other required fees (university registration and Santa Cruz campus fees). The criteria for residency appear in California Residence and Nonresident Supplemental Tuition (p. 1100).

Non-U.S. citizens note: Regardless of how long you live in California, only U.S. citizens and holders of immigrant visas may become qualified for resident classification.

Undergraduate Budget 2019-20

Undergraduate Budget, 2019-20

	California Residents		Nonresidents	
	One Quarter	F-W-S Quarters	One Quarter	F-W-S Quarters
Students Living On Campus				
Required Tuition and Fees				
Student Services Fee (formerly University Registration Fee)**	\$376.00	\$1128.00	\$376.00	\$1128.00
Tuition (formerly Educational Fee)**(a)	3,814.00	11,442.00	13,732.00	41,196.00
Campus Based Fees	473.82	1,421.46	473.82	1,421.46
USHIP Health Insurance (waivable) (see above)	1,006.00	3,018.00	1,006.00	3,018.00
Subtotal	\$5,669.82	\$17,009.46	\$15,587.82	\$46,763.46
Estimated Personal Expenses (b)				
Room and board	\$5,650.00	\$16,950.00	\$5,650.00	\$16,950.00
Books and supplies	362.00	1,086.00	362.00	1,086.00
Personal Expenses	562.00	1,686.00	562.00	1,686.00
Transportation	229.00	687.00	229.00	687.00
Subtotal	6,803.00	20,409.00	6,803.00	20,409.00

Total	\$12,472	\$37,418	\$22,390	\$67,172
Budget	.82	.46	.82	.46

**Subject to change based on state appropriation and UC Board of Regent’s approval

a) Undergraduates who are unable to maintain a full-time program of study because of employment responsibilities, family obligations, or health problems may be eligible for a 50 percent reduction in tuition. One quarter at \$1,907; two quarters at \$3,814.

b) Estimated personal expenses for students living off campus total \$5,616 per quarter or \$16,848 for three quarters. Estimated personal expenses for students living with family total \$3,648 per quarter or \$10,944 for three quarters.

Late Fees

You may be assessed late fees if you fail to make university payments or enroll by the specified deadlines. For example, late fees are assessed on a graduated basis for each month there is an unpaid balance on your university account. Late fee amounts of \$50 each are assessed for a late registration payment and/or late enrollment, \$25 for a late housing payment, and \$12.50 for miscellaneous fees. Deadlines are published in the Schedule of Classes, and they appear on the Statement of Account.

Estimated Personal Expenses

The figures given for estimated personal expenses are for a single undergraduate living on campus. Expenses will be higher for married students, students with children, and graduate students. The information is as current and as realistic as possible; however, expenses for students vary in accordance with lifestyles, priorities, and obligations.

Room and board (in college residences). Rates for room and board in the college residence halls depend on the type of accommodation and meal plan. The current rates may be found on the campus Housing Office website. The room and board amount in the Undergraduate Budget table above is the average cost for an on-campus student with the average meal plan and additional Flexi Dollars.

Personal Expenses. This budget item covers a broad range of expenses including clothing, laundry, personal grooming, recreation, and health maintenance. It also covers minimum expenses for modest travel to visit family.

Rates are paid quarterly. The rate ranges listed above do not cover periods of academic recess, nor does the budget above. Housing charges are normally payable at the beginning of each quarter. However, students may arrange with the Campus Housing Office to pay monthly.

More detailed information on room and board expenses for the individual colleges is available in the Undergraduate Housing Rates brochure distributed as part of the admission process or available from the Campus Housing Office, 104 Hahn Student Services Building, (831) 459-2394.

Fee Refunds

Students who cancel their registration before the first day of instruction in a given quarter are refunded all required fees minus a \$10 service charge. New undergraduate students who cancel their registration before the first day of instruction are entitled to a refund of all required fees except the nonrefundable \$250 undergraduate Statement of Intent to Register (SIR) Fee (applied toward the Student Services Fee).

Once the quarter has begun, students must petition for withdrawal. The percentage of fees refunded is determined by the effective date of the withdrawal, according to the schedule below. A student is not eligible for university services after the effective date of withdrawal.

A student entering the armed forces before the sixth week of the quarter is entitled to a full refund of the Student Services Fee—provided no course credit is received.

More detailed information on withdrawal and refund procedures is included in the quarterly Schedule of Classes and The Navigator, both online at the Registrar's website, and in the Graduate Student Handbook. Information on refunds of room and board charges is contained in the campus housing contract, provided to all applicants for on-campus housing. For more information on how withdrawing affects your financial aid, refer to the Financial Aid and Scholarship Office website at Financial Aid and Scholarships website.

Schedules of Refunds

All Continuing and Readmitted Students and New Students Not Receiving Federal Financial Aid

Number of calendar days	Percentage of fees refunded*
1st day of instruction	100
2-7	90
8-18	50
19-35	25
36 and over	0

New Students Who Receive Federal Financial Aid and Withdraw during Their First Academic Term

Number of calendar days	Percentage of fees refunded*
1st day of instruction	100
2-7	90
8-14	80
15-21	70
22-28	60

29-35	50
36-42	40
43 and over	0

* For new students, the nonrefundable \$250 Undergraduate Statement of Intent to Register Fee is withheld from the University Registration Fee; the schedule of refunds applies to the balance of fees. Percentages listed (days 1–35 or days 1–42) should be applied individually to Nonresident Tuition, the Educational Fee, the University Registration Fee, and Santa Cruz campus fees. The Health Insurance Fee is nonrefundable.

Deferred Payment Plan

The Deferred Payment Plan (DPP) provides an alternative method of budgeting and paying registration fees. Fees not covered by scholarships, loans, or other financial aid, can be paid in monthly installments. Students have a choice of applying for a three-month plan for individual quarterly fees, or, at the beginning of the fall quarter only, for a nine-month plan to be used for the fall, winter, and spring quarters. A nonrefundable application fee of \$25 for the three-month plan, or \$60 for the nine-month plan, is billed to the student account upon receipt of the DPP application. Any student in good financial and academic standing may apply for DPP. Students receiving financial aid sufficient to cover registration fees in full are not eligible for this plan. For more information about how to apply for DPP, application deadlines, and campus policies regarding the program, contact the Office of Student Business Services, 203 Hahn Student Services Building, (831) 459-2107, email oarinfo@ucsc.edu, or visit the Student Business Services website.

Financial Aid

The university maintains a robust financial aid program of grants, scholarships, loans, and part-time employment for undergraduate students who require financial assistance. The Financial Aid and Scholarships Office administers these resources to help bridge the gap between the cost of education and what parents and students can reasonably contribute.

If you are a dependent student, the contribution expected from you and your parents is determined through an analysis of your family's financial strength, considering such variables as income, number of dependents, living expenses, and savings and investments (excluding your primary residence). Federal, state, and university policies and procedures are applied. The same analysis is used for married and independent students with the exception of parent information. The federal definition of an "independent student" is used to determine your dependency when you complete the Free Application for Federal Student Aid (FAFSA).

The UC Blue and Gold Opportunity Plan is a Financial Aid Initiative that ensures that undergraduate California residents whose families earn a total income less than \$80,000, meet application deadlines, and who demonstrate enough financial need are guaranteed to receive gift aid from all sources to cover UC systemwide tuition and fees. Qualified students must be in their first four years of attendance (first two for transfer students).

No student will receive more scholarship and grant support than the calculated financial need. All sources of scholarship and grant awards (federal, state, institutional, and private sources, including outside agency scholarships) will count toward covering fees and meeting the Blue and Gold Opportunity Plan commitment. The majority of students who meet the income eligibility standard receive much more grant and scholarship funding than the plan covers.

In addition to the minimum funding under the Blue and Gold Opportunity Plan, undergraduates with sufficient financial need will receive additional grant support to help defray other educational expenses (e.g., books, living expenses, and transportation).

Application Deadlines

The Free Application for Federal Student Aid (FAFSA) may be submitted online at the Federal Student Aid website on or after Oct. 1 of the year prior to the academic year you wish to receive aid (e.g., Oct. 1, 2019, for applicants for fall 2020). Students who are ineligible to complete the FAFSA, but who meet AB 540 criteria, may be eligible to file the Dream Application. Submit a financial aid application each year before the priority deadline of March 2 to be eligible for all types of aid.

Students admitted for fall quarter will receive an estimated financial aid award in April.

The Financial Aid and Scholarships Office may require additional documentation from applicants. These applicants will be sent an email instructing them to login to MyUCSC and view their "To Do List," where required documents are requested (e.g., copies of student and parent tax returns or other forms). These documents must be received by the deadline on the "To Do List" for a student to be considered for all sources of aid administered by UC Santa Cruz. The deadline is June 2.

Conditional awards for admitted students may change as a result of the review of documentation.

Applicants who submit verification documents after the deadlines will be considered for aid based on availability.

Students admitted for winter quarter must have submitted a FAFSA by their admission notification date. Items requested on your MyUCSC "To Do List" must be submitted by December 2. Award notifications will be made as soon as possible after you are admitted/readmitted and all requested financial aid documents are received.

Types of Aid

If you apply for financial aid and meet the application deadlines, you are considered for all types of aid described below. Based on your financial need, your financial aid package may include a combination of grants, scholarships, loans, and work opportunities.

Grants

- **UC Santa Cruz Grants** are awarded to students based on financial need.
- **Cal Grant A & B** (eligible California residents) are awarded by the California Student Aid Commission to California residents who meet eligibility requirements and who demonstrate financial need and academic achievement. In addition to submitting a FAFSA or Dream Application*, first time applicants must also complete and submit the Cal Grant GPA Verification Form no later than March 2. Cal Grant A and B awards pay Tuition and Student Services Fees at UC.
- **Middle-Class Scholarship Grants** are provided by the California Student Aid Commission to eligible California resident students with total family incomes under \$171,000 and net assets less than \$171,000. Grants are awarded on a sliding scale with a cap of 40 percent of systemwide tuition, after considering other forms of grant aid.
- **Federal Pell Grants** are offered to eligible undergraduate students who demonstrate significant financial need based on the expected family contribution (EFC). Awards are variable depending upon the EFC; the maximum Pell Grant for 2019-20 is \$6,195.
- **Federal Supplemental Educational Opportunity Grants** are awarded to undergraduate students who demonstrate significant financial need. These grants supplement the UC Santa Cruz Grant program. Students must meet application deadlines to be considered. The maximum award is \$4,000.

Scholarships

- **UC Santa Cruz Scholarships** range from \$250 to \$10,000 per year. (The average award is about \$1,500.) Funding comes from private donors, alumni, and the university. Entering UCSC students are considered for scholarships based on responses to scholarship questions on the UC Application for Undergraduate Admission. Your application essay will serve as your scholarship essay. Selected students are notified throughout the academic year. All continuing students are automatically considered for scholarships based on various factors including cumulative GPA.
- **Regents Scholarships** are the most prestigious merit scholarships awarded to undergraduates. Freshman

Regent Scholars receive a total of \$20,000 paid over four years. New junior transfers and continuing students selected in the junior year receive the Regents Scholarship for a total of \$10,000 paid over two years. The scholarship amount varies for continuing students based on the year in college and year appointed.

- **Other Scholarships:** Some campus scholarships are restricted to students from particular geographic areas or family backgrounds, or are limited to students in particular majors, classes, or colleges. The donors have different reasons for giving, and their varied interests are reflected in the wide range of scholarships available. Merit and restricted scholarship awards range up to \$5,000.

Need-Based Loans

- **University Loans** are offered to first-year undergraduate students. Repayment begins nine months after a student falls below half time enrollment or graduates from the university. During repayment, the interest rate accrues at 5 percent annually.
- **Federal Direct Subsidized Student Loans** are funded by the federal government and can be borrowed up to the federal limits based on student status (please see Direct Loan Limit Chart below). Students pay an origination fee, which is deducted from the total accepted amount of the loan. Repayment begins six months after a student falls below half time enrollment. Interest rates and loan fees are updated annually and are hosted by Federal Student Aid.
- **CA Dream Loans** are provided to eligible undocumented AB 540 undergraduates to help cover the cost of attending UC. The CA Dream loan program is funded by the state and UC, and aims to close that gap and provide eligible students with the opportunity to borrow student loans to help pay for their education. Repayment begins nine months after a student falls below half-time enrollment or graduates from the university. During repayment, the interest rate accrues at 5 percent annually.

Non-Need-Based Loans

The following loans are available to both undergraduate and graduate students:

- **Federal Direct Unsubsidized Student Loans** are funded by the federal government and can be borrowed up to the federal limits based on student status (please see Direct Loan Limit Chart below). Unsubsidized loans are offered to students who do not demonstrate financial need or who have exhausted all need based aid. Interest accrues on unsubsidized loans from the date the loan is disbursed. The student pays an origination fee which is deducted from the total accepted amount of the loan. Students may begin repaying principal and interest on Federal Direct

Unsubsidized Student Loans immediately, pay only interest immediately, or defer both principal and interest until they are no longer enrolled in school at least half time.

- Federal Direct Parent Loans for Undergraduate Students (PLUS).** Parents of dependent students can apply for a PLUS loan and may borrow up to the full cost of attendance as defined by the UCSC Financial Aid and Scholarships Office. Applicants must pass a modest credit check through the Department of Education for the loan to be approved. Repayment begins six months after a student falls below half time enrollment. Interest rates and loan fees are updated annually and are hosted by Federal Student Aid. Loan repayments begin 60 days after the last disbursement for the academic year (the last disbursement is typically the first day of spring quarter). Parents do have the option to defer payment, similar to the student’s ability to defer on their Federal Direct loan above. See your loan servicer for more information.

Annual and Lifetime Federal Direct Student Loan Limits

	Subsidized Loans	Unsubsidized Loans	Combined Subsidized and Unsubsidized Loans
Dependent Students			
Freshman	\$3,500	\$2,000	\$5,500
Sophomores	\$4,500	\$2,000	\$6,500
Juniors and Seniors	\$5,500	\$2,000	\$7,500
Lifetime Loan Limits	\$23,000	\$31,000	
Independent Students¹			
Freshman	\$3,500	\$6,000	\$9,500
Sophomores	\$4,500	\$6,000	\$10,500
Juniors and Seniors	\$5,500	\$7,000	\$12,500
Lifetime Loan Limits	\$23,000	\$57,000	
Graduate Students			
Lifetime Loan Limits	N/A	\$20,500	\$20,500
		\$138,500	

¹ Refers to students who answered "yes" to any dependency status question on the FAFSA. These loan limits also apply to

dependent undergraduate students whose parents were denied a PLUS loan due to adverse credit history.

Other Loans

The University of California develops and publishes lists of private lenders who offer the most favorable terms for UC borrowers. Lender lists may be found on UCSC’s Financial Aid and Scholarships website under Private Loans and are also available at www.elmselect.com.

Federal Work-Study

Federal Work-Study gives students who demonstrate financial need the opportunity to work part-time to earn money to help cover expenses while enrolled at UC Santa Cruz.

Some on-campus and community jobs are posted online at the Career Center website Career Center website. Not all campus jobs are posted with the Career Center. Another way to locate on-campus jobs is through networking. Examples include talking to students, staff, and faculty at your college, in your dorm and dining hall, and in the academic departments. The Career Center can help you with résumé writing and job-search strategies. Jobs are competitive, and this award does not guarantee a position.

Loan Forgiveness Programs

The federal government will forgive all or part of a student loan under certain circumstances. Examples of these include performing volunteer work or military service and practicing medicine in certain communities. For a summary of such exemptions, visit the Federal Student Aid website.

More Information

For more information about applying for financial aid, rights and responsibilities, and document deadlines contact the Financial Aid and Scholarships Office at (831) 459-2963 or visit us at 205 Hahn Student Services Building.

Veterans Benefit Services

The Veterans Benefit Services staff in the Office of the Registrar serves as the VA Certifying Official and liaison with the U.S. Department of Veterans Affairs (VA) for students who as veterans, veterans’ dependents, or reservists receive education benefits. Students who are veterans or veterans’ dependents should contact the Veterans Benefit Services office as soon as they receive notification of admission to UCSC to ensure timely processing of their benefit claims.

The Veterans Benefit Services staff assists with the California Department of Veterans Affairs’ college fee-waiver program for dependents of veterans who have service-connected

disabilities or who have died from service-related causes. California resident students may apply for the college fee-waiver program at their County Veterans Services Office. Claims for fee waivers should be presented to the university during the academic year for which the claim applies. Retroactive approval can be granted only in situations in which students applied for the exemption in a timely manner but approval was delayed by the VA's processing of an original or reopened service-connected disability compensation claim. A copy of the initial denial letter and Disability Rating from the VA is required to document such circumstances.

UCSC will not prevent enrollment, assess late registration fees, require alternate or additional funding, or deny access to campus resources available for students using VA Education Chapter 33 (Post-9/11 GI Bill®) or Chapter 31 (Vocational Rehabilitation) benefits while payment is pending from the VA (up to 90 days). To qualify, provide a Certificate of Eligibility or an eBenefits GI Bill Statement of Benefits and all required VA forms needed to certify enrollment by the first day of class. For more information please see the Veterans Benefits and Transition Act of 2018, section 103.

Veterans Benefit Services is located at 190 Hahn Student Services Building. For more information, visit the Veterans Benefit Services website, call (831) 459-2709 or (831) 459-2910, or email vets_benefits@ucsc.edu.

During their transition to the university and while they are enrolled as UCSC students, military veteran students are provided a broad range of academic and support services by the Veterans Education Team Support (VETS) through Services for Transfer and Re-Entry Students (STARS). The Veterans Center is located at Kresge College right inside the entrance, off the main parking lot. Contact the VETS staff at (831) 459-1520, or send an email to vets@ucsc.edu, or visit the STARS website.

UNDERGRADUATE ACADEMIC PROGRAM

Planning Your Academic Program

UC Santa Cruz is on the quarter system. Three quarters—fall, winter, and spring—constitute the regular academic year. Most courses are 5 quarter credits and require approximately 15 hours of work per week. You are normally expected to enroll in 15 credits each quarter; enrolling in fewer than 12 or more than 19 credits requires approval. If you maintain a B average, you may enroll in more courses without special approval.

Students who enter as frosh are expected to graduate in four years. To do so, you must pass an average of 45 credits per year, for a total of 180 credits. To complete certain majors

with extensive requirements, transfer students may need more than two years.

Your advisers can help you plan a program that fulfills graduation requirements while meeting your educational goals (see Advising: From Course Selection to Careers (p. 1051)).

Here is what to expect during four years at Santa Cruz:

During your freshman year, complete your college core course and satisfy the Entry Level Writing Requirement. Begin to take foundation courses for potential majors, along with general education requirements.

If you are uncertain about your choice of major, you may intentionally explore different fields of study during your first two years at Santa Cruz by taking foundation courses that will help you both identify whether a major is a good fit for you and will satisfy prerequisites for declaring the major. Students who enter as lower-division students are expected to declare a major during their second quarter at UCSC, if they have not done so previously. Students interested in majors requiring heavy course prerequisites, such as music and most majors in the physical and biological sciences and engineering, should be certain they start the appropriate sequences in the first year; information is available through your department's advising office.

During your junior and senior years at Santa Cruz, you concentrate on the upper-division requirements for your major and complete your comprehensive requirement, as well as complete your general education requirements. If you entered UCSC without having fulfilled the requirement in American history and institutions, you will need to do so before you graduate.

Transfer students should complete any lower-division requirements for their intended major that are offered at their current campus, and should ensure they have completed any major preparation requirements for admission. Some students may also find it helpful to complete courses that fulfill general education requirements.

Graduation Requirements

To qualify for a bachelor's degree, you must meet the following conditions:

- Earn a minimum of 180 credits, each with a grade of D minus or better (or Pass)
- Satisfy the university requirements in American history and institutions and in Entry Level Writing (English composition)
- Meet the UCSC residence requirement
- Satisfy each of the campus general education requirements with a course grade of Pass, C (2.0 grade point average), or better

- Satisfy requirements of your UCSC college
- Complete an approved major program, including its comprehensive requirement, with grades of Pass, C (2.0 GPA), or better in all courses satisfying major requirements. Some majors require grades higher than C to qualify to declare the major. In some majors, courses graded Pass may not be used to satisfy major requirements.
- Have an overall GPA of at least 2.0 in all letter-graded courses taken at UCSC and other University of California campuses
- Have no more than 25 percent of your UCSC credits graded on a Pass/No Pass basis. This includes any credits completed in the Education Abroad Program or at another UC campus in an intercampus exchange program. Departments may require that some or all courses used to satisfy the major must be taken for a letter grade.

UC Santa Cruz students are responsible for selecting courses necessary to fulfill graduation requirements and prepare for advanced study or a career. It is essential that you consult regularly with academic advisers about course selection.

Transfer students may be able to use some of the courses they completed at other schools to help meet the 180-credit requirement. (Semester-system credits can be multiplied by 1.5 to derive equivalent quarter-system credit.) The Office of Admissions determines which courses are transferable.

University Requirements

UC Santa Cruz administers three requirements from the University of California: (1) American history and institutions, (2) Entry level writing, and (3) UCSC residence.

American History and Institutions

Every candidate for a bachelor's degree must demonstrate knowledge of American history and institutions. Fulfill this requirement in one of the following ways:*

- Achieving a score of 550 or higher on the SAT Subject Examination in U.S. History
- Achieving a score of 3, 4, or 5 on the College Board Advanced Placement Examination in U.S. History, or by achieving a score of 5, 6, or 7 on the IBH History of the Americas Examination
- Completing a college-level course in U.S. history and institutions
- Certification of completion of the requirement on a transcript from an accredited California institution of higher education
- Completing an acceptable history or government course in high school that satisfies the subject requirement for admission to the university, described in Subject Requirements.

A list of courses that fulfill the American History and Institutions requirement, as well as information for satisfying this requirement outside UCSC, is available [here](#).

Entry Level Writing Requirement

Every candidate for a bachelor's degree must demonstrate an acceptable level of ability in English composition. Before your fourth quarter of enrollment, you must fulfill this requirement in one of the following ways:

- 30 or better on the ACT, English Language Arts; or
- 30 or better on the ACT, Combined English/Writing (last administered June 2015); or
- 680 or better on the SAT, Evidenced-Based Reading and Writing*; or
- 680 or better on the SAT Reasoning Test, Writing (last administered January 2016); or
- 3 or above on either Advanced Placement Examination in English; or
- 5 or above on an International Baccalaureate Higher Level English A: Literature exam (formerly known as Higher Level English A1 exam); or
- 6 or above on an International Baccalaureate Standard Level English A: Literature exam (formerly known as Standard Level English A1 exam); or
- 5 or above on an International Baccalaureate Higher Level English A: Language and Literature exam; or
- 6 or above on an International Baccalaureate Standard Level English A: Language and Literature exam

California high school seniors who have been admitted to UCSC must take the systemwide UC Analytical Writing Placement Examination, given in May, unless they have already satisfied the requirement. For additional information on fulfilling the requirement, see the Writing Department's program statement.

Residence

Every candidate for a bachelor's degree must be registered at UCSC for a minimum of three quarters. In addition, of the final 45 quarter credits, 35 must be in regular courses of instruction taken as a registered student at UCSC (including during the

summer session). Courses taken through University Extension or the Intercampus Visitor Program do not constitute regular courses and therefore do not satisfy residence requirements.

The credit requirement for residence is applied differently to students participating in one or more of the [off-campus study programs](#) approved by the Academic Senate or the division. Participating students may satisfy the requirement in either of two ways:

1. Complete 35 of their final 45 credits before leaving the Santa Cruz campus to participate in one or more [off-campus approved study programs](#). In this scenario, students do not have to return to Santa Cruz for any additional coursework after they have finished the program(s).
2. Complete 35 of their last 90 credits at the Santa Cruz campus, with a minimum of 10 credits completed at UCSC after their return from the [approved off-campus study program\(s\)](#).

A student who takes courses outside UCSC, e.g., at community college, may choose at the time of graduation to have only some of the credits completed outside counted toward the 180-credit graduation requirement in order to meet the residency requirement. Subject credit will still be given for lower-division courses and courses at other campuses of the University of California that are not counted toward the graduation requirement. This will not require a petition, and the credit will be reduced by the Office of the Registrar, in consultation with department or college advisers, or the Admissions Office, as needed.

General Education Requirements

The general education requirements introduce you to various kinds of information, reasons for learning, and approaches to acquiring knowledge, and promote responsible use of what is learned. Obviously, general education requirements alone cannot achieve these ends. You are urged to look for as many opportunities as possible to gain a richer understanding of your own cultural heritage and social situation; insight into countries, societies, and eras besides your own; proficiency in another language; understanding of the nature of ethical and moral choice; and expanded knowledge of science and technology. The formal requirements described here should be considered foundations for exploration.

Complete List of Courses That Fulfill General Education Requirements by Course Title

Complete List of Courses That Fulfill General Education Requirements by Course Number

The general education requirements are meant to accomplish several goals:

- Provide students with a base of knowledge and skills that future learning can build on.
- Expose students to a broad range of disciplines and methodologies, to better prepare them for a world of complex problems and rapid changes.
- Enhance the abilities of students to approach problems in appropriately analytical ways.
- Prepare students to function as responsible and informed participants in civic life, considering pressing societal issues (such as the environment, the economy) productively and from a variety of perspectives.

Each area has a general education code, and only courses with that code satisfy the requirement. Codes appear in the course descriptions in this catalog and in the “General Education” field on the MyUCSC Class Search page. Students should review the requirements for their proposed or declared major(s) to ascertain whether some of their general education requirements will be fulfilled by completing their major. As a general rule, each course satisfies only one of the general education requirements.

General Education Requirements

Category	General Education Code	Number of Required Credits
Cross-Cultural Analysis	CC	5
Ethnicity and Race	ER	5
Interpreting Arts and Media	IM	5
Mathematical and Formal Reasoning	MF	5
Scientific Inquiry	SI	5
Statistical Reasoning	SR	5
Textual Analysis	TA	5
Perspectives (choose one from the following three categories)	PE-E PE-H PE-T	5
Environmental Awareness		
Human Behavior		
Technology and Society		
Practice (choose one from the following three categories)	PR-E PR-C PR-S	2
Collaborative Endeavor		
Creative Process		
Service Learning		
Composition	C	5
Disciplinary	DC	5*

Communication

*Students satisfy the Disciplinary Communication (DC) requirement by completing one to three upper-division courses required for their major, totaling a minimum of five credits and must be taken at UCSC. The DC requirement must be completed at UCSC—transfer courses do not apply to this requirement.

Cross-Cultural Analysis (CC code: one 5-credit course or equivalent). Courses that carry the CC GE designation aim to prepare students for a globalizing world, with increased interaction and integration among peoples, economies, and governments. These courses aim to encourage a broader and deeper understanding of cultures and societies outside the United States. Such courses might provide an in-depth examination of one culture, or one aspect of such culture (for example, art, music, history, language). Alternatively, these courses might aim to help students develop skills of cross-cultural comparison and analysis. A third option is courses that explore topics that are inherently cross-cultural such as international relations or the processes of economic globalization. Whatever the approach, *these courses all aim to help students develop the openness and critical perspective necessary for cross-cultural understanding.* Although themes of privilege and oppression are centrally relevant to the history and current experience of many cultures, such themes are not required to be addressed in cross-cultural awareness courses.

Ethnicity and Race (ER code: one 5-credit course or equivalent). Courses that carry the ER GE designation prepare students for a state and a world that are increasingly multiethnic and multiracial. Beyond familiarizing students with the culture and/or history of one or more ethnic or racial groups, these courses also aim to develop theoretical and practical understanding of questions such as (but not limited to):

1. how categories of ethnicity and race are constructed
2. the role that ethnicity and race can play in identity formation
3. how ethnicity and race have historically been used to justify forms of enforced inequality
4. contributions of people of various ethnicities to society and to political change

Whatever the approach, *these courses are particularly concerned with how ethnicity and race may intersect with other categories such as gender, class, or sexual orientation, to shape self-understanding and patterns of human interaction.* While such courses may often adopt an historical perspective on the issues they consider, they will provide a critical perspective on race/ethnicity relevant to the present.

Interpreting Arts and Media (IM code: one 5-credit course or equivalent). Courses that carry the IM GE designation explore the complex ways in which information of all kinds is represented by visual, auditory, or kinesthetic means, or through performance. Contemporary life bombards

us with visual and auditory media, often in the form of advertising or advocacy. These courses build in-depth understanding of one or more forms of artistic media: that is, media in which non-textual materials play primary roles. They offer skills in the practice, analysis, interpretation, and/or history of one or more of these media, as well as the ability to analyze the means by which these media encode and convey information.

Mathematical and Formal Reasoning (MF code: one 5-credit course or equivalent). Courses that carry the MF GE designation emphasize university-level mathematics, computer programming, formal logic, or other material that stresses formal reasoning, formal model building, or the application of formal systems. These courses generally focus on one of the following:

1. mathematical reasoning and proof (at least MATH 3 pre-calculus or equivalent)
2. formal logic
3. computer programming
4. other formal systems (e.g., generative grammars, economic models, formal music theory)

Whichever particular approach is used, *these classes aim to teach students to think with rigor and precision, using formal or mathematical models to teach the value of logical reasoning and dispassionate analysis.*

Scientific Inquiry (SI code: one 5-credit course or equivalent). Courses that carry the SI GE designation teach students about the essential role of observation, hypothesis, experimentation and measurement in the physical, social, life, or technological sciences. Students should acquire key concepts, facts, and theories relevant to the scientific method. By the end of the course they should be able to articulate an understanding of the value of scientific thinking in relation to issues of societal importance. Such courses would allow students to acquire key concepts, facts, and theories relevant to the:

1. physical scientific method
2. social science aspect
3. life sciences
4. technological method

Statistical Reasoning (SR code: one 5-credit course or equivalent). Courses that carry the SR GE designation focus on developing skills in approaching quantitative data and statistical reasoning. These courses help students interpret quantitative claims and make judgments in situations of statistical uncertainty. Such courses might include topics such as:

1. ways of presenting and misrepresenting data
2. statistical inference
3. experimental design and data analysis

Textual Analysis and Interpretation (TA code: one 5-credit course or equivalent). Courses that carry the TA GE designation have as their primary methodology the interpretation or analysis of texts. The aim of these courses is to develop higher-order reading skills and to train students how to read attentively, to think critically and analytically, to produce and evaluate interpretations, to assess evidence, and to deploy it effectively in their own work. These abilities are not only necessary for academic success, but also for full participation in civic life at every level. *Textual analysis is the examination of how and whether a piece of writing or speaking achieves its aims, whether these are rhetorical and persuasive or aesthetic.* Such courses should pay substantial attention not only to what information a poem, political speech, or scientific essay conveys, but to how it goes about doing so (by mobilizing particular metaphors, through plain speaking, via flowery language, by calling on scientific authority, or other mechanism). Please note that close reading leading to summary does not on its own constitute textual analysis.

Perspectives (one 5-credit course or equivalent from any of the three following categories):

Perspectives: Environmental Awareness (PE-E code). Courses that carry the PE-E GE designation teach students about the complexity of particular ecosystems and/or people's interactions with nature so that students will better understand the environmental issues and trade-offs that are likely to arise in their lifetimes. The interactions between people and the Earth's environment are subtle, complex, and influenced by a variety of natural, scientific, economic, cultural, and political factors. Courses deal with one or more of the following topics:

1. The study of particular ecosystems or environments
2. Natural forces, processes, and their effect on ecosystems
3. Climates, climate models, and climate change
4. Evolution and adaptation to the environment
5. Bio-diversity and/or the robustness of nature and its feedback mechanisms
6. How cultures relate to their natural environments
7. Human efforts to create, preserve, and modify environments
8. Management of natural resources (such as fossil fuels, forests, and fisheries)
9. Issues of sustainability (such as sustainable agriculture or renewable energy)

10. Pollution and its effect on ecosystems

11. Ecological impacts of non-native species and other ecological disasters

Perspectives: Human Behavior (PE-H code). Courses that carry the PE-H GE designation help students to prepare for a world in which many of the most pressing challenges (such as genocide, environmental degradation, poverty) are impacted by human thoughts, decisions, or practices. As well, they provide a kind of "owner's manual" for students to assist them in understanding themselves, their roles (for example, parent, partner, leader), and their social groups (family, workplace, neighborhood, nation). These courses impart specific knowledge about some aspect of individual human behavior or the operation of human groups. As well, they are likely to provide an introduction to one or more specific methodologies, such as ethnography, longitudinal analysis, or experimentation. A central aim, however, is to help students appreciate that better solutions to problems (whether global or personal) can often be found by incorporating information about how humans think, feel, and act.

Perspectives: Technology and Society (PE-T code). Courses that carry the PE-T GE designation focus on understanding technological advances, how they are developed, and their impacts on society. Imparting a basic understanding of the dynamic technological society in which we live is an essential goal of academic institutions. The study of technology helps satisfy the need of society for knowledgeable people able to understand, participate, and guide the rapid technological advances that play such a vital role in our world.

Practice (one minimum 2-credit course from any of the three following categories):

Practice: Collaborative Endeavor (PR-E code). Courses that carry the PR-E GE designation teach students strategies and techniques for working effectively in groups to produce a finished product. For example, students might learn specialized practical information, such as how to use change-management software to monitor and manage changes initiated by multiple group members. Alternatively, they might learn basic information about leadership, teamwork, and group functioning, which they can incorporate into their own group process. *What is common to all courses that carry the PR-E general education requirement is that some instruction regarding the process of collaboration is provided in addition to instruction specific to the academic discipline and the products being produced.* In other words, assigning group work is not sufficient; explicit instruction in techniques of collaboration is required.

Practice: Creative Process (PR-C code). Courses that carry the PR-C GE designation teach creative process and techniques in a context of individual or collaborative participation in the arts, including creative writing. For creative writing, students will publish an informal group

collection or individual dossier of their successful writings. Courses may combine theory and experiment in the creation of a new artwork, or new interpretation(s) of an existing artwork. Creative Process courses include studies in individual or group creativity or improvisation, and/or ensemble rehearsal and performance. Students who elect to satisfy this requirement will take at least two credits of individual or group creative work; however, the requirement may be satisfied within courses of greater than two credits. Where appropriate, sponsoring units may require a sequence of two or three 2-credit courses with the PR-C designation assigned to the final quarter. For sequences culminating in a semi-professional public performance, an audition at which students demonstrate aptitude and a foundation of skills will be required.

Practice: Service Learning (PR-S code). Courses that carry the PR-S GE designation provide supervised learning experiences where students reflect on, communicate, and integrate principles and theories from the classroom in real-world settings. Service learning provides students with an opportunity to integrate their academic coursework with community involvement. Students gain valuable practical skills while giving back to the community.

Composition. The general education writing requirements at UCSC consist of the Entry-Level Writing Requirement (ELWR), and Composition (C). Successful completion of College 1 and ELWR are prerequisites for students' enrollment in the C course (Writing 2). Students must successfully complete Writing 2 before the seventh quarter of enrollment..

Disciplinary Communication (DC) requirement. The goal of this requirement is to ensure that students acquire the skills in writing and other forms of communication appropriate for their discipline. Students satisfy the DC requirement by completing 1 to 3 upper-division courses required for their major, totaling a minimum of 5 credits. The DC requirement must be taken at UCSC and is automatically fulfilled by the completion of major requirements.

Advanced Placement and International Baccalaureate Examinations

Advanced Placement Exams (AP) and International Baccalaureate Higher Level Exams (IBH) Table

The university grants credit for College Board Advanced Placement (AP) Examinations on which a student scores 3, 4, or 5 and for International Baccalaureate Higher Level (IBH) Examinations on which a student scores 5, 6, or 7. The university does not grant credit for IB standard or subsidiary level exams. Students completing the International

Baccalaureate Diploma with a score of 30 or higher receive 30 quarter credits. The credit is applied toward the total credits required for graduation and toward the UCSC campuswide general education requirements, as indicated in the table on pages 29–30, Advanced Placement (AP)/International Baccalaureate Higher Level (IBH) Examinations. Students should be aware that AP, IB, and college-level courses will not be granted duplicate credit. In these cases, the university will award credit for only one.

AP and IBH Examination Credit Toward Degree Requirements

Certain departments also allow prospective majors to obtain waivers for prerequisite courses. In all cases, a student should contact the particular department to discuss his or her plans with an adviser. Please note that approval is not automatic; a petition must be filed with most departments.

Credit for Transfer Students

General Education Requirements

Transfer students may apply courses taken at other institutions toward lower-division general education requirements. The disciplinary communication course(s) (DC code) must be taken at UCSC.

If you are currently attending one of the California community colleges, see the ASSIST website, or consult with the UCSC Office of Admissions or your current counselor to determine which college courses satisfy UCSC general education requirements.

Transfer students who have satisfied the general education or breadth requirements of another UC campus prior to transfer will be considered to have completed the UCSC general education requirements, with the exception of the DC requirement. Completion of the Intersegmental General Education Transfer Curriculum (IGETC) prior to enrollment at UCSC will also be accepted in lieu of the campus general education requirements, with the exception of the DC requirement.

Intersegmental General Education Transfer Curriculum

(IGETC)

The Intersegmental General Education Transfer Curriculum (IGETC) is a series of courses that prospective California community college transfer students may complete to satisfy the lower-division breadth/general education requirements at any University of California or California State University (CSU) campus (see the IGETC table below). This curriculum is the result of an agreement by the University of California, the California State University, and the California community colleges, aimed at simplifying the transfer process for community college students. The IGETC is intended exclusively for California community college transfers and is not an option for continuing UCSC students (including students who transferred to UCSC without having completed IGETC before their first quarter) or for students transferring from four-year colleges or universities.

Official certification for IGETC can only be obtained through a student's community college. Once the official certification is received, students who complete the IGETC prior to transfer are not required to satisfy the UCSC lower-division general education requirements. For students who are partially certified, meaning that they are only missing one or two courses for complete certification, you will be contacted by the Office of Admissions only after the official certification is received. Courses used to satisfy IGETC must be completed with a grade of C (2.0) or better. A grade of Credit or Pass may be used if the community college's policy states that it is equivalent to a grade of C (2.0) or better.

IGETC is not recommended for majors that require extensive course preparation, such as any major in the Jack Baskin School of Engineering or the Division of Physical and Biological Sciences.

You may not return to your previous institution to complete IGETC after entering a degree program at UC Santa Cruz. If you do not complete IGETC or partial IGETC prior to beginning at UC Santa Cruz, you are required to complete the UC Santa Cruz general education requirements.

IGETC Subject and Unit/Credit Requirements

Subject Area	Courses Required	Units/Credits Required
1. English Communication One course in English composition and one course in critical thinking/English composition. (Students transferring to CSU must take an additional course in oral communication.)	2 courses	6 semester units or 8-10 quarter credits
2. Mathematical Concepts and Quantitative Reasoning	1 course	3 semester units or 4-5 quarter credits
3. Arts and Humanities	3 courses	9 semester

Three courses with at least one from the arts and one from the humanities. units or 12-15 quarter credits

4. Social and Behavioral Sciences 3 courses 9 semester units or 12-15 quarter credits
Three courses from at least two disciplines or an interdisciplinary sequence.

5. Physical and Biological Sciences 2 courses 7-9 semester units or 9-12 quarter credits
One physical science course and one biological science course, at least one of which includes a laboratory.

6. Language Other Than English Proficiency Proficiency
Proficiency equivalent to two years of high school in the same language. (Not required of students transferring to CSU.)

Total 11 courses 34 semester units or 45-57 quarter credits

Major Requirements and Course Prerequisites

Students who believe they have taken courses at other institutions that satisfy major requirements or UCSC course prerequisites should contact their major adviser for review.

College Requirements

You must fulfill the requirements of your college in addition to those of your major and of the university. Each college has established a core course, which all first-year students are required to complete. Students admitted as transfer students are exempt from the core course requirement but may take the course at their option on a space-available basis. College requirements are outlined below.

COLLEGE NINE

- College Nine 1, Academic Literacy and Ethos: International and Global Perspectives

COLLEGE TEN

- College Ten 1, Academic Literacy and Ethos: Social Justice and Community, fall quarter

COWELL

- Cowell 1, Academic Literacy and Ethos: Imagining Justice, fall quarter

CROWN

- Crown 1, Academic Literacy and Ethos: Ethical and Societal Implications of Emerging Technologies, fall quarter

KRESGE

- Kresge 1, Academic Literacy and Ethos: Power and Representation, fall quarter

MERRILL

- Merrill 1, Academic Literacy and Ethos: Reading Ourselves, Reading the World, fall quarter

OAKES

- Oakes 1, Academic Literacy and Ethos: Communicating Diversity for a Just Society, fall quarter

PORTER

- Porter 1, Academic Literacy and Ethos: Arts of Reading, fall quarter

RACHEL CARSON COLLEGE

- Carson 1, Academic Literacy and Ethos: Environment & Society, fall quarter.

STEVENSON

- Stevenson 1, Academic Literacy and Ethos: Self and Society, fall quarter

and

- Stevenson 2, Self and Society 2, winter quarter

Major and Minor Requirements

To qualify for a bachelor's degree at UCSC, you must complete the minimum requirements for a major program, as well as satisfy university, campus, and college requirements.

At UCSC, you have the option of pursuing a single major, a double major, or a combined major. The minimum requirements for an established major program are set by the sponsoring department. (If you are a transfer student, the department will determine which of your transferable courses may be used to satisfy major requirements.) The major involves substantial work in the discipline and requires no fewer than 40 upper-division or graduate credits. Only courses in which you earn a grade of Pass, C (2.0 GPA), or better satisfy major or minor requirements.

Additional Majors or Minors

To complete multiple majors and minors, you must fulfill all of the requirements for all majors and minors declared, including the comprehensive requirement for each major. In general, a single thesis may not be used for more than one major. You may count courses for more than one major or minor, as long as each major includes 40 upper-division credits not used to satisfy the minimum upper-division credits of any other major or minor, and each minor includes at least 25 upper-division credits not used to satisfy the minimum upper-division credits of any other major or minor.

The diploma of a student who has completed a double major in history and music, for example, would read "Bachelor of Arts with Majors in History and Music."

Declaring a Major

The field of interest you indicate on your application to UCSC does not automatically place you in a major. You are advised to declare your major as soon as possible. Students who enter as lower-division students are required to declare a major before enrolling in the equivalent of their third year.* You will not be allowed to enroll in classes for the equivalent of your third year until you have declared a major. Junior transfer students must declare a major during their second quarter at UCSC by the deadline printed in the Academic and Administrative Calendar.

Be sure you are aware of all the necessary criteria for qualifying for the major. It is wise to apply for major status as soon as you feel sure of the field you wish to enter and have met qualification requirements (if any) for the major you wish to pursue.

Determine the requirements for possible majors as soon as possible. Certain majors require substantial preparation, with many interlocking course sequences and qualifying grades in major foundation courses. If you intend to pursue such a

major, start work toward it early in your undergraduate career, and review your progress toward qualification regularly. (Review majors that interest you in the Academic Programs (p. 5) section of the catalog). Academic advisers can offer assistance in selecting courses appropriate to your individual needs.

***Note:** This is the year you would become a junior given normal progress to degree. For example, if you transfer to UCSC as a beginning sophomore, it is your second year here.

Comprehensive Requirement

Every major at UCSC includes a senior exit requirement designed to integrate the knowledge and skills learned throughout the curriculum. This capstone requirement may be a senior thesis, senior seminar, comprehensive examination, or some other integrative experience. Choices for satisfying this requirement are specified with the requirements for each major.

Minor Programs

See Fields of Study for undergraduate minors currently offered at UC Santa Cruz. Completion of a minor is optional. If you wish, you may complete more than one minor.

The sponsoring department establishes the course requirements for a minor. The minor involves substantial work in the discipline and requires no fewer than 25 upper-division or graduate credits. The minor appears on your official transcript but not on your diploma.

Combined Major

A combined major allows you to complete a course of study involving two disciplines offered as regular programs at UC Santa Cruz.

Examples of combined majors include environmental studies/economics and Latin American and Latino studies/politics. A combined major is designed by faculty representatives from both disciplines. In general, fewer courses are required than for a double major, and students complete the comprehensive requirements as specified for each combined major. Combined majors currently available are listed in the footnotes in the Fields of Study.

The diploma of a student who has completed a combined major in environmental studies and economics, for example, would read “Bachelor of Arts with a Major in Environmental Studies/Economics.”

Individual Major

Students may also work with three faculty members to define an individual major specific to their academic goals. Proposals for individual majors require considerable effort to develop, and students are advised to consider double major, combined major, and major/minor alternatives. College

advising offices can provide information on the individual major proposal and approval process.

Catalog Rights

Effective for all undergraduates who entered in fall quarter 1993 or after, students may follow the degree requirements from either the UCSC General Catalog published at the time of entering UCSC or subsequent catalog(s). Students need not follow a catalog in its entirety but may elect to follow different catalog years for their college requirements, university and general education requirements, requirements of their major(s), and requirements of any minor(s).

Catalog year will initially be set for the first year of enrollment at UCSC. Students may elect to follow requirements from other catalog year(s) when filing the Petition for Major/Minor Declaration. All requirements for graduation outlined in the catalog(s) selected must be met before graduation. Changing catalog year(s) is done by contacting your major adviser (for major or minor requirements) or your college adviser (for college, university, and general education requirements).

Students transferring from other collegiate institutions may elect to meet as graduation requirements one of the following:

- those in effect at the time of transfer to UCSC;
- those subsequently established; or
- those in effect when the student entered a previous collegiate institution, provided that entry was not more than three years prior to the time of transfer to UCSC.

Students who seek readmission to UCSC after a break in attendance greater than two years (six regular quarters) must adhere to the graduation requirements in effect at the time of readmission or those subsequently established.

Although general education requirements are determined by catalog year, the specific courses that satisfy a particular GE requirement can change from year to year. The Office of the Registrar annually publishes an updated list of courses that satisfy each GE requirement (except Disciplinary Communication). Since the GE status of a course may change, to fulfill a GE requirement, a student must take the course in a year in which its GE status is recognized.

The courses that satisfy the Disciplinary Communication GE requirement for each major are published in each year’s General Catalog. Students should consult the General Catalog for the year in which they plan to take their DC course(s) to find out the courses that are needed.

Students who entered prior to 1993 should see an adviser. Their catalog year(s) for graduation, whether the year they entered UCSC or subsequent year(s), will be decided at the discretion of their major department and/or their college.

Institutional Responsibility

Undergraduate students who have made significant progress toward a degree in a specific major can assume that a degree will be granted if they meet all catalog degree requirements and maintain continuous enrollment and progress.

Should UCSC find it necessary to discontinue a specific major, every effort will be made to allow currently enrolled majors to complete their degrees within a reasonable period of time. This may include (1) movement to a similar or related degree track; (2) substitution of requirements; (3) development of an individual major proposal; or (4) completion of courses at another University of California campus through the Intercampus Visitor Program. Students with questions concerning this policy should contact their major and college advising offices.

In all cases, any financial obligations are the responsibility of the individual student involved.

Evaluating Academic Performance

UC Santa Cruz has one of the more comprehensive systems for evaluating students' academic performance of any research university in the United States. The evaluation system consists of two major components: the assignment of a final grade in the course and an optional evaluation of your performance.

Evaluations

Beginning fall 2010, undergraduate evaluations are at the option of the faculty. In each course for which you receive a grade of D or better (or P) an evaluation of your academic performance may be submitted. An evaluation may:

- Describe the strengths and weaknesses of your performance in the various areas of class activity (discussion, laboratory work, term papers, examinations)
- Assess your general understanding of the course content
- Recognize additional or particularly outstanding work

Evaluations may be used at UCSC in academic advising, reviewing scholarship applications, and awarding Honors in the major. Evaluations are a permanent part of your academic record. All students may request transcripts either with or without evaluations.

Grades

At the end of each course, you will receive one of the following grade notations:

A excellent

B good

C fair

D poor

F fail

P passing

NP not passing

I incomplete

IP in progress

W withdrawal

The grades of A, B, C, and D may be modified by a plus (+) or a minus (-). You will not receive credit for graduation in any course in which you receive a final grade of F or NP. The grades I and IP are temporary grades used in special circumstances. The final notation W indicates that you officially withdrew from the course before completing it.

Grade Points

Grade points are assigned to a letter grade as follows:

4.0 = A+

4.0 = A

3.7 = A-

3.3 = B+

3.0 = B

2.7 = B-

2.3 = C+

2.0 = C

1.7 = C-

1.3 = D+

1.0 = D

0.7 = D-

0.0 = F

The grades P and NP are not included in calculating your GPA and so are not assigned grade points. Courses in which the interim grades I and IP are assigned earn no grade points or credit until the interim grade is replaced by a final letter grade.

Grade Point Average (GPA)

Undergraduates entering UCSC in fall 2001 and thereafter have a UCSC cumulative grade point average calculated from UCSC courses, courses taken through the Education Abroad

Program, and courses taken at another UC campus as part of the Intercampus Visitor Program.

A grade point average is determined by dividing the number of grade points earned by the number of credits attempted for a letter grade. In calculating your UCSC GPA, the interim grades IP and I are not included in the computation because you do not earn those credits until they are replaced with a final grade. (However, when checking for whether you have satisfied the 2.0 UC GPA requirement for graduation, these interim grades are included and counted as courses with grade F [or NP]).

If you repeat a course in which you have received a C-, D+, D, D-, or F, only the last grade recorded shall be computed in your GPA for the first 15 credits of repeated work. After the 15 credit maximum is reached, the GPA will be based on all grades assigned and total credits attempted.

Undergraduates who entered UCSC for the first time in or after fall 1997 and before fall 2001 have a UCSC cumulative grade point average only if they have elected letter grades in at least two-thirds of the cumulative credits attempted. Undergraduates who entered UCSC prior to fall 1997 cannot have an official UCSC grade point average calculated.

Pass/No Pass Option

Students in good academic standing may request to take specific courses on a Pass/No Pass basis. Students receive a P (Pass) for work that is performed at C level or better. Work performed at below a C level receives a notation of NP on the student's transcript, and no academic credit is awarded for the course. Requests for Pass/No Pass grading must be submitted and confirmed by the Grade Option deadline printed in the Academic and Administrative Calendar. If you request P/NP grading in a course and you are later placed on academic probation, your P/NP grading request will be canceled.

No more than 25 percent of the UCSC credits applied toward graduation may be graded on a Pass/No Pass basis. This includes any credits completed in the Education Abroad Program or on another UC campus in an intercampus exchange program. Students must be careful about the use of the Pass/No Pass option. Some courses may only be taken Pass/No Pass, and therefore count against the 25 percent Pass/No Pass limit. Several majors require all or most major requirements to be taken for a letter grade; read the major requirements section carefully before using the Pass/No Pass option for any course in a major you are considering.

Incomplete

The notation I may be assigned, at the discretion of the faculty teaching the course, when your work for a course is of passing quality but for which some specific required work has not been completed. You must make arrangements with the instructor before the end of the course in order to receive an Incomplete. To remove the Incomplete, you must submit the remaining coursework and file a petition by the deadline printed in the Academic and Administrative Calendar

(generally the end of the following quarter). If you do not meet the deadline, the Incomplete lapses to a No Pass or an F, depending on the grading option selected at the beginning of the quarter.

The notation IP (In Progress) is reserved for a single course extending over two or three terms of an academic year. The grade for such a course may be awarded at the end of the course and shall then be recorded as applying to each of the terms of the course. A student satisfactorily completing only one or two terms of a course extending over two or three terms of an academic year will be given grades for those terms. The grade option selected in the first quarter of the multiple-term sequence applies to all quarters of the sequence.

Grade changes (except for I and IP, as above) are allowed only to correct clerical or calculation errors by the instructor and must be submitted to the Office of the Registrar by the instructor in charge of the course within one year of the close of the quarter for which the original grade was submitted.

Student Responsibility

Students are responsible for using the Academic Information Systems (AIS) to set and confirm choices for grading options and for ensuring timely completion of all requirements. Students view their schedule at MyUCSC.

Course Loads

The usual course load for UCSC undergraduates is 15 to 19 credits, most often as three 5-credit courses and associated laboratories and sections. After instruction begins, students with a UCSC GPA of 3.0 may enroll in up to 22 credits without special approval and may seek approval for higher loads from their college advising office. Students in their first quarter or with a lower GPA must seek approval from their college advising office for enrollment in more than 19 credits.

College approval is required to carry fewer than 15 credits.

Academic Progress

Academic progress is a measure of the completion of courses with a D- or better, or Pass. Colleges monitor academic progress to ensure you are progressing toward your degree, which must be earned within 15 quarters of enrollment (five years).

Minimum progress is based on length of time at UCSC. The minimum acceptable progress is completion of 36 credits for each academic year, 12 credits for each additional full-time term, and four-fifths of credits attempted for each part-time term. Progress is measured cumulatively, not term by term. For example, a full-time student must complete 48 credits by the end of the first quarter of the second year.

If you do not maintain minimum progress, your college may require you to take higher course loads, complete Summer Session courses, or make other adjustments to your study plan.

A separate financial aid satisfactory academic progress policy (FASAP) defines the GPA and progress requirements for remaining eligible to receive financial aid. Information can be found on the Undergraduate Academic Progress and Financial Aid Information website.

Academic Standing

Academic standing is a measure of performance in completed courses. You must maintain a 2.0 UCSC GPA in order to remain in good academic standing.

If your UCSC term or cumulative GPA falls below 2.0 at the end of any term, you will be placed on academic probation for the next term. You will need to work with your college and major advisers to determine the best way to return to good academic standing. Be sure to take full advantage of the many learning support services available at UCSC.

If your UCSC GPA for any term falls below 1.5, or if you are on academic probation and your cumulative GPA at the end of a term is below 2.0, you are also subject to disqualification. This means that your enrollment at UCSC may be barred for a specific period of time, or you may be disqualified indefinitely from attending the University of California. In many cases, a specific study plan can be developed with your college that will enable you to remain enrolled at UCSC.

For students who entered UCSC prior to fall 2001, academic standing and progress are calculated differently. Contact your college office or see *The Navigator* for more information.

Financial aid's satisfactory academic progress policy (FASAP) is separate from the Academic Standing policy, and defines additional GPA and progress requirements for remaining eligible to receive financial aid. Information can be found on the Undergraduate Academic Progress and Financial Aid Information website.

Maximum Credits and Years

Students are expected to complete their degree objective(s) within four years, with maximum enrollment limits of at most 225 credits and five academic years (Advanced Placement and International Baccalaureate units are not counted). Upper-division transfer students are expected to complete their degree objective(s) within at most 135 UCSC credits and three academic years.

Colleges may make exceptions to the credit maximum for students in certain cases. Such exceptions are conditional on maintaining academic standing, minimal progress, and progress toward the degree objective(s).

Students in danger of exceeding the credit limit or the five-year or three-year limit may be required to modify their degree objective, such as by completing a major without a minor or double major, or completing a related major with fewer course requirements.

Repeating Courses

Undergraduates may repeat courses in which they earn a C-, D+, D, D-, F, No Pass, or W. For an undergraduate to repeat a course more than once requires approval of the student's college. A grade of W counts as an attempt. Courses in which a C-, D+, D, D-, or F is earned may not be repeated on a Pass/No Pass basis. Courses in which a grade of No Pass is earned may be repeated on the same basis or for a letter grade. For the first 15 credits of repeated courses, the original grade is excluded from the GPA, and only the grade from the repetition is used. After the 15-credit maximum is reached, all grades are included in the GPA. However, credit is not awarded more than once for the same course. The grade assigned each time the course is taken will be permanently recorded on the official transcript.

Academic Integrity

The university is dedicated to the unhindered pursuit of knowledge and its free expression. It is essential that faculty and students pursue their academic work with the utmost integrity. This means that all academic work produced by an individual is the result of the sole effort of that individual and acknowledges the contributions of others explicitly. It is the responsibility of students and faculty to be absolutely clear about what constitutes plagiarism, cheating, or other violations of academic integrity. Violations of academic integrity by students result in both academic sanctions (e.g., failing the course) and disciplinary sanctions (e.g., suspension or dismissal). Consult the campus's undergraduate academic misconduct policy for more information.

Undergraduate Honors

UC Santa Cruz awards several honors for outstanding academic achievement.

Dean's Honors

Students will be eligible for quarterly Dean's Honors if they have earned a minimum of 15 units that quarter, of which at least 10 are graded, with a term grade point average (GPA) equal or higher than that required for University Honors at graduation in their group* for the current academic year. The notation "Dean's Honors" will appear on the transcript.

***Note:** GPA thresholds for Baskin School of Engineering majors are calculated separately from those of majors in all other divisions.

Honors at Graduation

Honors at graduation are awarded by the university and by the separate majors based on a review of their graduates' academic records. In general, honors are limited to 15 percent of the graduating class. University Honors are based on the cumulative UC GPA. Faculty review of major honors may involve additional criteria.

University Honors

To be considered for University Honors at graduation, students must have completed 70 or more credits at the University of California and have attained in their group* a UC GPA that places them in the rankings as follows: Summa Cum Laude, top 2 percent; Magna Cum Laude, next 3 percent; Cum Laude, next 10 percent. Each year and for each group, the registrar will calculate the GPA thresholds required for these levels of University Honors, based on the GPAs of recent graduates. The notation "University Honors" will appear on the diploma and transcript.

* **Note:** GPA thresholds for Baskin School of Engineering majors are calculated separately from those of majors in all other divisions.

Honors in the Major

At graduation, the department sponsoring a student's major program may confer Honors or Highest Honors in the major. This notation appears on the transcript as well as on the diploma. In general, no more than 15 percent of the graduation class in a major will be awarded Honors at graduation.

Deadlines

To ensure consideration for honors in the major, students should apply to graduate by the Registrar's deadline.

Any student who has a reportable disciplinary sanction for a violation of academic integrity policies may be ineligible for any honors designation, at the discretion of the agency that awards the designation.

Undergraduate Honors Opportunities

College Scholars Program

The UC Santa Cruz College Scholars Program offers a congenial and stimulating academic home for a select group of well-prepared students at UC Santa Cruz. College Scholars can expect to challenge themselves academically, find other students who are similarly motivated, and explore undergraduate research. This enriched program of study includes special courses, seminars, colloquia, and other events during each quarter of the academic year. College Scholars participate in demanding, small-scale, and research-oriented courses that catalyze creative thinking and offer a springboard to other undergraduate research opportunities.

Admission to the Fall Start cohort of the College Scholars Program is by invitation. A select group of UCSC applicants offered admission to the university will be invited to join the program, based on their record of academic achievement. Students can also apply for the College Scholars Program after the fall of their first year ("Spring Start"). In this case, students will join the program during the spring research

colloquium. Spring Start students are selected based on applications submitted through their college.

Honor Societies

Many UC Santa Cruz students are members of departmental, professional, local, and national honor societies whose goals are to recognize and improve scholastic standing in an area of interest. Among these are Phi Beta Kappa, the oldest national society that advances scholarship and recognizes excellence in the liberal arts and sciences; Tau Beta Pi, the engineering honor society that recognizes students of distinguished scholarship, exemplary character, and dedication to service; the Golden Key International Honour Society, which provides recognition and leadership opportunities to top-performing students; and Psi Chi, which encourages, stimulates, and maintains excellence in scholarship, and advances the science of psychology.

Awards and Scholarships

UC Santa Cruz has a variety of scholarship and award opportunities that are designed to reward, encourage, and assist students in pursuing academic excellence and leadership roles. Students can find such opportunities through their colleges, departments, divisions, and various external agencies.

UCSC provides support for students for a variety of prestigious scholarships and awards such as the Karl S. Pister Leadership Opportunity Award, Deans' and Chancellor's Awards, Steck Foundation Award, Boren Scholarship, Donald A. Strauss Scholarship, Fulbright U.S. Student Program, Scholarship, Marshall Scholarship, and Rhodes Scholarship.

Transcripts

Academic records are maintained by the Office of the Registrar, which will issue an official transcript only on your authorized request.

For information on ordering transcripts, please refer to Registrar's Registrar's transcripts website.

If you have outstanding financial obligations to the university, a hold may be placed on your transcript. Students may access their unofficial transcript on MyUCSC.

Transcripts for UCSC Extension courses should be requested from UCSC Extension Records, 3175 Bowers Ave., Santa Clara, CA 95054-3003, (408) 861-3700.

Privacy of Records

UCSC students are informed annually of the federal Family Educational Rights and Privacy Act (FERPA) and its provisions. This act, which the institution follows, was designed to protect the privacy of education records and to provide guidelines for the correction of inaccurate or misleading data through informal and formal hearings. Students also have the right to file complaints with the Family

Educational Rights and Privacy Act Office concerning alleged failures by the institution to comply with the act.

UCSC policy explains in detail the procedures to be used by the institution for compliance with the provisions of the act. FERPA guidelines are available at Privacy of Student Records. The full text of the University of California policies applying to the Disclosure of Information from Student Records is online:
registrar.ucsc.edu/records/disclosure/index.html.

Questions concerning the Family Educational Rights and Privacy Act may be referred to the Office of the Registrar, 190 Hahn Student Services Building.

Advising: From Course Selection to Careers

Academic Advising

Academic advising at UC Santa Cruz aims to assist students in clarifying their educational goals and in developing academic plans to achieve them. The core of UCSC's advising system is housed in the colleges and academic programs and is supplemented by advising and support services throughout the campus.

College academic advisers (some of whom are called "academic preceptors") are generalist advisers who focus on orientation to the university, pre-major advising, academic success, and campuswide requirements such as general education and university requirements. Each college has an advising team that can provide you with individual and group advising and can refer you to resources and educational opportunities. You remain affiliated with your college advisers throughout your undergraduate career.

Staff advisers in UCSC's academic programs (sometimes called "major advisers") focus on areas related to a student's major or minor. Major advisers can help you understand declaration and major requirements, and can assist you in planning a program of study. They can help you identify enrichment opportunities within the major and refer you to appropriate faculty advisers. Faculty advisers may serve as mentors in your field, recommending courses and helping you refine your educational goals. For transfer students and for students in many majors (such as those in the physical and biological sciences, engineering, and the arts), it is important to review information provided by major advisers prior to your first quarter on campus.

For help in assessing career interests and exploring and choosing career options, contact the Career Center. The staff also can assist you with choosing a major, résumé preparation, interviewing skills, applying for an internship, and job-search strategies.

If you plan to go on to graduate school, consult with faculty in your major. Faculty advisers are the best people to ask about the quality of graduate programs in your field of interest. In addition, the Career Center offers advising and workshops on applying to graduate school.

If you intend to pursue graduate study in a field not offered as a major at UCSC, you can often prepare for your intended program through one of the campus's regular majors. You must plan your studies carefully, however, and advising will be especially important. The Career Center has information that will help prepare you for graduate and professional programs. The following are some fields in which UCSC alumni have pursued graduate study and successful careers:

- Business
- Conservation
- Film
- Finance
- Guidance and counseling
- Health fields
- High-tech industry
- Human resources
- Industrial and labor relations
- International relations
- Law
- Marketing
- Museum administration
- Public administration
- Urban planning

The Career Center includes advisers with specialized expertise in preparing for careers in medicine or another health-related field (including dentistry, nursing, nutrition, occupational therapy, optometry, osteopathic medicine, pharmacology, physical therapy, public health, and veterinary medicine), and in preparing for careers in law.

A number of programs provide additional academic and comprehensive support services to students with specific needs. Educational Opportunity Programs (EOP), Services for Transfer and Re-Entry Students (STARS), and the Disability Resource Center are described below. Counseling on personal and family issues is available through Counseling and Psychological Services. If you need assistance that is not listed in this section, consult The Navigator or check with your college advisers.

Your first step in accessing advising at UCSC is to complete the online Slug Orientation courses.

Orientation

All new UC Santa Cruz students are expected to participate in an online orientation. This orientation begins the process of academic advising and provides a comprehensive introduction to all aspects of UCSC. After participating in online orientation, students may choose and enroll in classes for their first term.

Summer Orientation is held over the course of the summer and includes separate programs for first-year and transfer students. Orientation is mandatory for all students, and is a gateway to enrolling in the first quarter's classes.

Fall Welcome Week, scheduled approximately five days prior to the beginning of fall quarter, is the next step in the orientation and advising process for new students entering fall quarter. It provides students with an opportunity to settle into life at UCSC, take advantage of important services, and continue their academic advising. Questions about Summer Orientation and fall Welcome Week can be directed to the Office of Campus Orientation Programs at (831) 459-5468, or via email to orientation@ucsc.edu. Information is also available at Campus Orientation.

International Orientation is required for all international students regardless of residency status. The mandatory International Orientation program eases students' transition to university life and introduces students to a research university's academic expectations, UC level writing norms, campus resources, and the UCSC and Santa Cruz communities. International Orientation is scheduled prior to Welcome Week and the beginning of fall quarter. For more information, please visit the International Orientation website.

Career Center

UC Santa Cruz graduates find success in many different career fields. Their superior education is the foundation for this success. The staff at the Career Center will help you link your educational experience to the world of work. The center provides a variety of employment and career-development services to help students obtain rewarding and successful careers.

Both undergraduate and graduate students are encouraged to visit the Career Center often throughout their time on campus. The first step is to meet with a career adviser to begin developing a focused career plan. Simply sign up online for an advising appointment through SlugQuest on the Career Center website. Advisers assist students in selecting majors, finding internships and part-time jobs, applying to graduate school, conducting a job search, and much more. Workshops offered by the Career Center include: Finding and Applying to Internships; Résumé and Cover Letter Writing; Applying to Graduate and Professional School; and special workshops on specific majors or career fields. Check out the Career Planning Guide for additional career development activities suggested for students from first year through senior year.

Your college experience is likely to include a part-time job or internship in your area of interest. An internship is one of the

best ways to gain practical work experience in your area of interest. The Career Center has hundreds of opportunities available. Off-campus and on-campus employment opportunities (both work-study and non-work-study) are posted on the Career Center's website.

The Career Center's website contains a wealth of material on career exploration, graduate and professional schools, job search, career fields, internships, and employers. One of the most exciting online resources is the Career Advice Network, which helps students connect with alumni in their field of interest who have a desire to assist other Slugs.

UC Santa Cruz students and alumni looking for full-time career opportunities need look no further than SlugQuest—an online site that lists job openings targeted to UCSC graduates. You may connect to SlugQuest on the Career Center website. Another way to obtain a career position is to participate in the On-Campus Interview Program. Recruiters visit campus every fall, winter, and spring to interview and hire students. The Career Center website has a list of participating companies.

The Career Center sponsors several major events every academic year. The Graduate and Professional School Fair brings representatives from the nation's top universities to campus to share information about their advanced-degree programs. Job and internship fairs, which bring hiring companies to campus, take place multiple times each year. Students looking for a job or internship will want to arrive prepared with a great résumé. Other events include the Multicultural Career Conference, which brings students and alumni together to develop mentor relationships and explore careers.

The Career Center—located at the Bay Tree Building, Room 305, in Quarry Plaza—can be reached at (831) 459-4420. Office hours are 8 a.m. to 5 p.m.

Educational Opportunity Programs (EOP)

The Educational Opportunity Programs (EOP) provide a variety of academic and personal support designed to improve the retention and academic success of first-generation low-income and educationally disadvantaged college students. EOP helps ensure that these students successfully complete their undergraduate education and acquire the skills to prepare for graduate and professional school, as well as for future leadership roles. EOP offers the following programs.

Advising Programs and Services

EOP Advising programs and services are designed to facilitate personal growth and development with the goal of achieving academic and social integration, academic achievement, and exposure to opportunities beyond the baccalaureate degree. These programs and services include:

- Advising and counseling
- Personal counseling

- Referrals to resources, programs, and opportunities
- Peer advising

Bridge Program

The Bridge Program is a first-year experience program that supports and guides students in their transition from high school to the university. Participants are first-generation college students who may come from low-income backgrounds and under-resourced California high schools. The program is designed to prepare students for the academic rigors of the university by providing them with the tools and resources necessary to achieve academic excellence in their first year and throughout their undergraduate career.

Support Services for AB540 Students

AB540 Student Services provides a broad range of support services designed to address the needs of AB540 students. These services address the gaps that AB540 students face within the university and enhance student achievement. Services provided to students include mentoring, community-building events and programs, personal advising, and student-based support.

Textbook Lending Program

This program is designed to assist students in obtaining required textbooks that they would not be able to purchase on their own due to cost. To receive textbook assistance, students must demonstrate financial hardship and must have exhausted all other forms of financial aid available to them. This includes all forms of loans (subsidized and unsubsidized).

Pre-Graduate Programs

EOP also sponsors two pre-graduate programs designed to increase the placement of EOP students in professional and doctoral programs and to encourage the pursuit of academic careers.

- **The Graduate Information Program (GIP)** supports students seeking to pursue graduate and professional school education. Services include graduate and professional school advising; graduate school application and internship-related workshops; graduate school resource library and website; website to conferences and forums
- **Pathways to Research (P2R)** exposes undergraduate students to research opportunities and research-based graduate programs. With the assistance of their graduate mentor, participating students determine their short-term goals for the quarter and long-term goals for the school year related to exploration of and involvement in research. Students engage in bi-weekly meetings with their mentor to report on progress and plan next steps to reach their goals. P2R is a two-quarter commitment (Winter and Spring). Mentees will receive a \$300 stipend upon successful completion of the program.

For information about any of these programs, please call the EOP office at (831) 459-2296 or visit eop.ucsc.edu.

MARC and IMSD Programs

The Division of Physical and Biological Sciences sponsors two National Institutes of Health grant programs: the Maximizing Access to Research Careers (MARC) Program and the Initiative for Maximizing Student Development (IMSD) Program. Though separately funded, the projects share a similar mandate: to increase the number of well-prepared, under-represented, ethnic-minority, and disadvantaged-background students who are admitted to graduate or professional schools in biomedical sciences. The program seeks students from groups that have traditionally been denied equal access to educational opportunities in the science professions.

UCSC students should apply in their sophomore year or as juniors staying a 5th year. Both programs require a two-year commitment. In addition, a student should be in the process of completing specific introductory courses in biology, chemistry, and mathematics because the program begins in the summer. The MARC and IMSD programs aim to introduce students to program faculty, their research, and laboratory research techniques. After students successfully complete the summer program, they have the opportunity to work in a faculty lab for the following academic year. Financial compensation is available for laboratory research and participation in the summer program.

MARC and IMSD are housed under the STEM Diversity Programs and run in conjunction with UC LEADS and CAMP. The STEM Diversity Programs also work with other offices to help make the most of campus resources and provide practical assistance with the graduate school admission process. Additionally, the staff maintains an information file on summer enrichment programs (which can provide you with vital research experience), conferences, professional development workshops, journal clubs, and seminar courses. Students admitted to the program are supported by a well-equipped student office, which provides additional academic support and a convenient place for students to meet.

For further information, contact the STEM Diversity Programs office to learn more about eligibility requirements and visit the STEM Diversity Programs website or email STEM Diversity Programs Director Yulianna Ortega at yuli@ucsc.edu. The application will be available Dec. 1, 2016. Deadline for 2017-2019 cohorts is Feb. 10, 2017.

Academic Excellence Program (ACE)

ACE is a nationally recognized academic support program that is designed to increase the diversity of students who earn bachelor's degrees in science, technology, engineering, and mathematics (STEM). ACE offers active-learning problem

solving sessions for selected mathematics and science courses.

The sessions provide a structured setting where students teach and learn from each other. An ACE session leader, who has an academic background in the subject, facilitates the problem solving sessions. Undergraduate co-leaders/peer mentors assist, bringing the student-to-teacher ratio to approximately 12:1. In addition to attending their ACE problem-solving sessions, students meet weekly with their peer mentor, who shares study strategies as well as opportunities for undergraduate teaching and research internships. ACE session leaders offer weekly office hours, as well as examination review sessions and academic and career planning. ACE students join a community of STEM scholars who are dedicated to academic excellence and success.

Applications are accepted quarterly for the upcoming term. Enrollment in ACE is limited and priority is given to EOP students who are planning to pursue a STEM major. For more information, visit the ACE website.

Multicultural Engineering Program (MEP)

Also known as the MESA Engineering Program, MEP is the university-level component of Mathematics, Engineering, Science Achievement (MESA), a statewide program of the University of California Office of the President. At UC Santa Cruz, MEP is supported by the Baskin School of Engineering. Its goal is to promote the retention and graduation of a diverse population of students, especially those from groups that remain the most underrepresented in engineering studies.

MEP provides academic and personal support for engineering students who are first-generation college students, are the first in the family to pursue engineering or computer science studies, or are from a low-income (limited financial resources) or educationally disadvantaged background. MEP's academic learning community supplements students' undergraduate experience and encourages them to continue their education by attending graduate school. MEP has a strong support system and engages students' full participation in a variety of services and activities. These include academic advising, personal counseling, tutorial services, drop-in assistance, individual and small-group study, study-skills workshops, peer-support networks, community-building activities, scholarships, and an engineering Summer Bridge program for a select group of entering first-year students.

MEP's well-equipped study center and computer lab provides 24-hour access to computer workstations and printer, textbooks, individual lockers, and a place for students to gather and study. Students who have participated in pre-university service programs (e.g., Early Academic Outreach, Upward Bound, MESA, Talent Search, Puente, DEEP, Smith Scholastic Society) are encouraged to apply to MEP.

For further information, call (831) 459-2868, visit the MEP website, or drop by the School of Engineering Undergraduate Affairs Office, 231 Baskin Engineering Building.

Services for Transfer and Re-entry Students (STARS)

Services for Transfer and Re-entry Students (STARS) offers a broad range of personal and academic support services for all transfer and re-entry students (undergraduates 25 years and older, graduate students 29 years and older), students who are parents regardless of age, and military veterans. These services include admissions information; orientations for new students; academic seminar courses; study skills workshops; tutorial services; informal academic advising; drop-in assistance; social, recreational, and cultural programs; scholarships; newsletters; and study centers with computer workstations. STARS also acts as a clearinghouse for information about campus and community resources for UCSC's large transfer and re-entry student populations.

STARS is located at Kresge College, on the floor above the College Office. All current and prospective transfer and re-entry students are invited to visit. Hours are 9:00 a.m.-7:00 p.m., Monday through Thursday, and to 5:00 p.m. on Friday.

Veterans Education Team Support (VETS) is a STARS program for veterans returning to school. In this peer mentor program, veterans meet each other and receive assistance as they navigate admission and transition into university life. Ongoing personal and academic support and outreach to prospective students are also offered.

The Smith Renaissance Scholars Program, which helps current and former foster youths pursue their educational goals, is affiliated with STARS.

The Osher Lifelong Learning Institute at UCSC, a UC/community organization dedicated to continuing education, is also under the STARS umbrella. The organization hosts monthly meetings with university faculty, offers courses taught primarily by emeriti faculty, and coordinates a wide variety of peer-led interest groups.

The Retirees and Emeriti Center, located at STARS, provides a resource for faculty and staff of UC Santa Cruz as they transition to and engage in retirement.

For further information regarding all the STARS programs, call (831) 459-2552. For current programs and activities, visit the STARS website.

Disability Resource Center (DRC)

The campus accommodates students with disabilities and welcomes their attendance at UCSC. The Disability Resource Center (DRC) provides services such as disability-related advising, authorization for testing accommodations, conversion of print materials into alternative formats (audio, electronic, Braille), adaptive equipment loans, notetakers, sign language interpreters, real-time captioning services and referrals to appropriate campus or community resources.

The Disability Resource Center is located at 125 Hahn Student Services Building and can be reached by phone at (831) 459-2089, or via email at drc@ucsc.edu. More information is available on the Disability Resource Center website.

Campus access for people with mobility impairments.

Visit the campus Americans with Disabilities Act website for more information about accessibility maps, vehicles equipped with wheelchair lifts that can transport students throughout campus, and permits for accessible or medical parking spaces that are adjacent to all campus buildings. Most buildings on campus have wheelchair-accessible ramps, modified rest rooms, and other facilities. If necessary, classes are rescheduled to meet accessibility needs.

Questions and concerns can be directed as follows:

- Education/program accessibility should be addressed to the director of the Disability Resource Center, at (831) 459-2089 (voice).
- Facility or transportation access should be directed to Facilities Access Coordinator (831) 459-3759 (voice).
- Computing access to the campus should be directed to IT Accessibility Coordinator (831) 459-2410.
- Accommodating job applicants or current employees with disabilities should be directed to (Disability Management Coordinator, Benefits Office (831) 459-4602 or Assistant Director for EEO, Office for Diversity, Equity, and Inclusion (831) 459-3676.

ROTC and Military Affairs

UC Santa Cruz Air Force ROTC

Students interested in participating in Air Force Reserve Officer Training Corps (AFROTC) have the option of attending AFROTC classes at San José State University while taking other academic classes at UC Santa Cruz.

San José State University supports a wing of AFROTC with cadets from San José State University, Santa Clara University, Stanford University, UC Santa Cruz, and many local community colleges. The Air Force ROTC program is designed to provide instruction in leadership, management, and national security studies along with military education and training. This prepares the cadet for assignment to positions of responsibility and importance in the modern Air Force. Instruction is conducted on and off campus. This program offers all eligible students the opportunity to obtain an officer's commission in the United States Air Force while earning their college degrees.

Program Overview

Our faculty brings a wealth of experience and diversity to the program. Instructors are Active Duty Air Force officers from various career areas and provide students with a first-rate academic education and military training experience. Each faculty member also acts as a student adviser to guide

students through the program and help them reach the goal of an officer's commission in the United States Air Force.

College students wishing to commission as an Air Force officer through ROTC may enroll in a three-, or four-year program. Students attend Air Force ROTC classes along with other college courses and receive elective academic credit. AFROTC courses are sequenced by subject area for specific and logical reasons. Please see <http://www.sjsu.edu/afrotc/> for course information. After successfully completing all requirements, the cadets are commissioned as Air Force officers.

For information on the Air Force ROTC program, contact the Department of Aerospace Studies, AFROTC Det 045, One Washington Square, Industrial Studies Building, Room 214, San Jose State University, San Jose, CA, 95192-0051. Phone: (408) 924-2960. Email afrotc@sjsu.edu or visit the website: <http://www.sjsu.edu/afrotc/>. Students may call or inquire about program prerequisites, scholarship availability, and class schedules at the Department of Aerospace Studies.

UC Santa Cruz Army ROTC

The Army ROTC (Reserve Officers' Training Corps) is one of the best leadership courses in the country and can be part of your college curriculum. UC Santa Cruz students have the opportunity to take ROTC courses with cadets from other local campuses including Santa Clara University, Stanford, and San Jose State University. Cadets from UC Santa Cruz have flexible options to meet ROTC class requirements such as local classes on campus, shuttles to Santa Clara University, or by virtual attendance of classes at Santa Clara University through the Army's online meeting application. During classes, leadership labs, physical training, and field training exercises, Army ROTC students will learn firsthand what it takes to lead others, motivate groups and conduct missions as an officer in the Army. Upon graduation from Army ROTC, students will earn the bar of a second lieutenant and be commissioned into the Active Army, Army Reserve or Army National Guard.

Army ROTC at Santa Clara University is a program that fosters the development of cadets' academic, athletic, professional, and mental strengths. Students attend class and physical training for three hours each week, along with a Wednesday lab session that features hands-on instruction regarding Army operations and leadership situations. This program is ideally designed as a four-year process. Cadets spend their first two years familiarizing themselves with the Army, and in their third year they are expected to perform and improve as leaders in preparation for a summer leadership development camp at Ft. Knox, Kentucky. The fourth and final year of Army ROTC introduces cadets to the responsibilities of military staff, teaching them to plan, train, lead, and develop their junior cadets in preparation for their commission. A typical four-year education with Santa Clara University ROTC comes with a service obligation of four years in the Army.

Army ROTC also gives cadets the opportunity to gain further Army experience by earning appointments to Army training schools where they will parachute from airplanes or rappel

from helicopters. In addition, cadets are allowed a single quarter of study abroad, as well as the opportunity to participate in Army-funded immersion trips to dozens of countries across the globe in the summer months.

Cadets who graduate from the program will compete for active duty and reserve positions across the Army. Active officers have a full-time position and serve for a minimum of four years. Reserve officers serve for eight years part-time in either the National Guard or Army Reserve.

For more information about ROTC opportunities and scholarships contact Mario Morales by email at mcmorales@scu.edu or by phone at 408-554-6840, or visit the Army ROTC website at <http://www.scu.edu/rotc/>.

For more information regarding Army ROTC please visit the Army ROTC website at <http://www.goarmy.com/rotc.html>.

Undergraduate Research

At the best research universities, professors bring knowledge and creativity from their cutting-edge research into the classroom, integrating the canon of the discipline with its future directions. UC Santa Cruz takes this further with a special tradition of undergraduate research outside the classroom. UC Santa Cruz, its departments, and faculty offer undergraduates many ways to get involved in research and creative activities. These opportunities develop advanced skills and insights and provide an early introduction to the nature of graduate studies. Research projects can help students launch careers, secure admissions to top graduate schools, and truly make an impact on society.

Many majors incorporate research into their senior comprehensive requirement, with options or requirements of a senior thesis, capstone project, or other creative endeavor based on students' individual research. Other opportunities for undergraduates include structured internships or research programs, joining ongoing faculty research or creative projects, or developing their own projects under faculty supervision. The following sections discuss a sampling of UCSC's international education, field-study, and exchange programs, which enable students to deeply enrich their undergraduate experience and education as they learn by doing. For additional information, see Undergraduate Research Opportunities.

UC LEADS

After being selected as UC LEADS Scholars, students begin a two-year program of scientific research and graduate school preparation guided by individual faculty mentors and program staff. Scholars are provided with an excellent opportunity to explore their discipline, experience a research environment, and improve their opportunities for future study in their chosen field. Each scholar is mentored by a member of the UC faculty who assists the student in designing a plan of

research and enrichment activities tailored to his or her individual interests and academic goals. Scholars attend the annual statewide symposium, as well as are sponsored to participate in another STEM conference of their choice each year.

The UC LEADS program is headquartered in the STEM Diversity Programs office, along with MARC, IMSD and CAMP. To learn more about eligibility requirements and the UC LEADS program, visit the STEM Diversity Programs website or email STEM Diversity Programs Director Yulianna Ortega at yuli@ucsc.edu. The application will be available Dec. 1, 2016. The deadline for 2017-19 cohorts is Feb. 10, 2017.

California Alliance for Minority Participation (CAMP)

CAMP is a statewide initiative that aims to support and retain underrepresented undergraduates to achieve their degrees in the biological sciences, physical sciences, mathematics, and engineering.

By integrating research and undergraduate education, CAMP creates a cohesive set of experiences that fully prepares undergraduates for graduate studies. CAMP motivates participants through cooperative learning, internships, faculty mentored research, and travel to professional conferences.

The CAMP program is headquartered in the STEM Diversity Programs office along with MARC, IMSD and UC LEADS. To learn more about eligibility requirements and the CAMP program, visit the STEM Diversity Programs website or email STEM Diversity Programs Director Yulianna Ortega at yuli@ucsc.edu. The application will be available Dec. 1, 2016. The deadline for 2017-19 cohorts is Feb. 10, 2017.

Global Engagement

Global Engagement actively supports UCSC's teaching research, and service missions. IEO oversees UCSC Programs Abroad and International Scholar and Student Services (ISSS).

For further information, contact Global Engagement, 103 Classroom Unit Building, (831) 459-2858, email: global@ucsc.edu.

Programs Abroad

UCSC Programs Abroad offers undergraduate and graduate students the opportunity to study through the University of California Education Abroad Program (UCEAP) on more than 350 programs in more than 40 countries as part of their regular UCSC academic program. The program serves students at all UC campuses and is administered by the

University Office of the Education Abroad Program in Santa Barbara. Information is available at eap.ucop.edu.

Additionally, UCSC Programs Abroad assists students participating in study-abroad opportunities through UCSC directly, through other UC campuses, and through privately sponsored organizations. UCSC Programs Abroad seeks to bring these programs within reach of all students.

International Scholar and Student Services

The International Scholar and Student Services (ISSS) office provides immigration advising and advocacy as well as cultural and academic programming for UCSC's growing global community. ISSS assists students, scholars, researchers, and faculty members in maintaining their legal status while in the United States, serving as UCSC's official liaison to U.S. government agencies related to immigration matters. ISSS serves more than 1,000 international clients and their accompanying family members who come to the campus each year.

Fulbright Grants for Graduate Study and Research Abroad

Global Engagement facilitates the Fulbright annual awards competition for the Graduate Study and Research Abroad Program for currently enrolled UCSC students.

Field and Exchange Programs

UCDC Program at the UC Washington Center

The UCDC Program supervises and supports students who pursue a quarter of academic study and internship work in the nation's capital. Internship placements are geared toward student interests, including but not limited to government and public policy, science and the environment, education and the arts, advocacy and nonprofit organizations, law, and business and finance. Students live in the UC Washington Center with students from other UC campuses, which provides an intellectual and social community throughout the quarter.

The program is open through an application process to juniors and seniors (occasionally sophomores) **in all majors**. Students enroll for fall, winter, or spring quarter, earn 12 to 17 course credits, complete an internship, and continue to be registered as full-time students. Applicant selection is based on academic record, a written statement, letters of

recommendation, and in some cases a personal interview. Financial-aid eligibility is maintained.

Interested students with strong academic records are encouraged to apply. For further information, visit the UCDC website or email the UCDC Coordinator at ucdc@ucsc.edu.

Intercampus Visitor Program

UCSC students may take advantage of educational opportunities at other campuses of the University of California through the Intercampus Visitor Program. This program enables you to take courses not available at Santa Cruz, to participate in special programs, or to study with distinguished faculty at other campuses.

To qualify for participation in this program, you must be in good standing after completing at least three quarters in residence at Santa Cruz. Each host campus establishes its own criteria for accepting students from other campuses as visitors. You must also have the approval of your college. Consult with your department about how courses taken at the host campus may apply to your major requirements.

Applications are available at the Intercampus Visitor Program website. Additional information is available from the special programs coordinator in the Office of the Registrar, (831) 459-4412. The application form contains a great deal of useful information about the program and how and when to file; please read it carefully. A nonrefundable application fee of \$70 is due when the application is filed.

Cross-Campus or Simultaneous Enrollment with Other University of California Campuses

Undergraduate students enrolled at UCSC may enroll, without formal admission and without payment of additional university fees, in courses at another UC campus on a space-available basis at the discretion of the appropriate campus authorities on both campuses. Simultaneous enrollment refers to UC courses not offered through UC Online. Additional information about online UC courses is available through UC Online.

Currently registered students must meet all of the following requirements to be eligible to enroll in one class through the Cross-Campus and Simultaneous Enrollment Programs: completion of a minimum of 12 credits at UCSC as a matriculated student, be in good academic standing, and demonstrate appropriate academic preparation as determined by the host campus. Full-time students must be enrolled in at least ten credits at UCSC. University Part-Time students must be enrolled in at least five credits at UCSC and may enroll in up to ten credits total.

Information about Cross-Campus Enrollment is available through UC Online. Applications for Simultaneous

Enrollment are available at the Office of the Registrar, 190 Hahn Student Services Building or online. For more information, call (831) 459-4412 or email registrar@ucsc.edu, or visit the website at Simultaneous Enrollment.

Part-Time Program

If you are unable to attend the university full-time because of family obligations, employment responsibilities, or a medical condition, or you are in your final quarter before graduation, you may qualify for the Part-Time Program. This program enables students to pursue a bachelor's degree part-time in any major offered at UC Santa Cruz. To participate, undergraduate students must file a Part-Time Program application by the appropriate deadline. Full-time students normally take three 5-credit courses per quarter; part-time students may enroll in a maximum of 10 credits.

Students approved for enrollment on a part-time basis pay the same fee as full-time students but pay only one-half of the tuition. Part-time nonresidents pay one-half of nonresident tuition. Financial aid awards may be affected by enrolling part-time. Students who use the part-time fee reduction may not also use the UC employee reduction. Part-Time Program applications are submitted online to the Office of the Registrar. For more information, call (831) 459-4412, or email registrar@ucsc.edu. More information is available on the Part-Time Program website.

Domestic Exchange Programs

UCSC has exchange programs with the University of New Hampshire (UNH) and the University of New Mexico (UNM). UNH is located near the New Hampshire seacoast in the picturesque colonial town of Durham, a little more than an hour from Boston, Massachusetts. UNM is located in Albuquerque, a city of approximately half a million population, situated on the banks of the Rio Grande. Both schools give students the opportunity for an educational experience in an entirely different environment.

While enrolled in the exchange program, students maintain their status at UCSC, and they are expected to return to complete their studies following enrollment at UNH or UNM. Both universities are on the semester system and students may participate in one semester or the entire academic year.

Participants are selected from among students who are in good academic standing. Successful applicants will be expected to confirm their participation at the beginning of spring quarter. Each department of study determines the applicability of UNH and UNM courses toward requirements for the major. Letter grades earned while at UNH and UNM will not be calculated into the UCSC GPA or the UC GPA. Further information is available from the exchange program coordinator in the Office of the Registrar, by phone at (831) 459-4412, and at the Domestic Exchange Programs website.

Intersegmental Cross-

Enrollment

This program permits a student who is currently enrolled in a California community college or a California State University campus and who meets certain eligibility criteria to enroll in one undergraduate course at UCSC each term, on a space-available basis. A student is qualified to participate in this program if he or she meets the following requirements:

- has completed at least one term at the home campus as a matriculated student and is enrolled in at least 6 credits at the home campus during the term in which he or she seeks to cross-enroll;
- has a grade point average of 2.0 for work completed;
- has paid tuition or fees required by the home campus for the academic term in which he or she seeks to cross-enroll;
- has appropriate academic preparation as determined by the host campus, consistent with the standard applied to currently enrolled students;
- is a California resident for tuition purposes at the home campus; and
- has not previously been admitted to and registered at UCSC.

Applications are available online. The application form contains a great deal of useful information about the program and how and when to file. Please read it carefully.

Field Programs and Internships

Many UC Santa Cruz students complement their major programs with field experience or internships, which also provide opportunities to become involved in public service activities in the local community and throughout the world. Most of the field programs described below are open to students in a range of majors, although some are restricted to students pursuing a designated area of study. Students in all majors may apply for internships sponsored by the Career Center.

In addition to the off-campus placements provided by the programs described below, independent field study opportunities are available through some UCSC colleges and departments.

Chancellor's Undergraduate Internship Program (CUIP)

The Chancellor's Undergraduate Internship Program (CUIP) provides on-campus internships in programs and departments throughout UC Santa Cruz. Interns work with a mentor to develop personal and professional skills and take a leading role in producing projects. A two-unit leadership seminar class is required for fall, winter, and spring quarters. A

scholarship of \$8,200 is paid toward the intern's registration fees for the academic year.

Community Studies Field-Study Program

Community Studies is the oldest interdisciplinary undergraduate degree program at UCSC. Its hallmarks are a focus on social justice and a distinctive pedagogy that integrates classroom learning and an extended six-month field study. Not only is the full-time field study a requirement of the major, it is the centerpiece of a core curriculum through which students prepare for, then immerse themselves in a setting where they participate in and analyze the social justice work of an organization. Upon return from field study, students integrate topical and experiential learning in a capstone project (usually a senior essay) that uses their field notes as a key source for analysis.

With the guidance of faculty and staff advisers, community studies students choose field placements related to one of the program's areas of focus in economic justice and health justice. Placements have included community health clinics, women's and feminist organizations, immigrant-rights centers, media and policy advocacy organizations, homeless resource and support groups, sustainable development projects, queer and transgender organizations, neighborhood or workers' collectives, civil rights groups, community food security programs, legal clinics, community-based cultural organizations, programs for seniors, tenant or labor unions, HIV/AIDS advocacy groups, harm reduction programs, government agencies and the offices of elected officials, and many other organizations committed to working for social justice. As political, economic, cultural and technological landscapes shift, so do the needs and opportunities for social justice organizing. Throughout its history Community Studies has been noteworthy for being attuned and responsive to innovative in field-study opportunities in a changing world.

The practical experience gained from the six-month field study, combined with their topical learning, provides graduates with many choices. About half go on to graduate or professional study in education, urban studies, public health, public administration, social work, planning, law, policy studies, medicine, nursing, or academic disciplines like sociology, anthropology, and politics. Others enter the work world directly, in many cases continuing with non-profit agencies like those in which they did their field study. Community Studies graduates are social entrepreneurs, community organizers, program directors, public officials, teachers, therapists, librarians, social workers, news directors, union officials, labor organizers, forest management consultants, reporters, youth workers, and artists. According to a recent alumni survey, almost 100 alumni have founded nonprofit social justice organizations, and many more have served on nonprofit boards and/or in executive director positions.

The field study program is open to Community Studies majors only. The entire major usually takes two years to complete. For more information, see the Community Studies website.

Economics Field-Study Program

The Economics Department offers its majors the opportunity to integrate their academic knowledge with career-related work. The field-study program places students in internships under the supervision of a faculty sponsor and a professional in the workplace. Students can select from a wide variety of field placements such as accounting firms, community nonprofits, government agencies, brokerage firms, marketing agencies, banks, and businesses in Santa Cruz and beyond. Students apply and prepare for field study a quarter in advance. Acceptance into the field-study program is determined by academic standing, class level, and successful completion of Economics 100A, 100B, and 113 (see Economics courses (p. 752)). Students may earn a maximum of 10 credits and complete up to two quarters in a field placement.

Along with the training and supervision by a professional in the workplace, students receive guidance from a faculty sponsor who directs their academic project. Completion of this project and the job supervisor's evaluation of performance earn the student credit. Economics Field Study (Economics 193 or 198, see Economics courses (p. 752)) does not satisfy an upper-division requirement for the major and is available on a passing/not passing (P/NP) basis only.

Further information is available from the Economics Field Study Office, 402 Engineering 2 Bldg.; by phone at (831) 459-5028; or by email at econintern@ucsc.edu.

Environmental Studies Field and Internship Program

Open to all UCSC students, the Environmental Studies Field and Internship Program is an integral academic component of the environmental studies major, and it augments the research and professional development of undergraduate students (see Environmental Studies). Interns are placed, individually and in groups, in both on-campus and off-campus agencies, where their work often results in publications and resource documents, and in many cases serves as the primary basis for policy formation within a particular agency or organization. Placements have included research for small businesses; learning all aspects of running an organic farm; writing policy documents for state agencies, nongovernmental organizations, and planning departments; assignments as natural history interpretive guides for state and national parks; and apprentice positions with consultants, architects, solar-energy designers, agroecologists, and teachers. Student intern placements are also obtainable working with coffee growers, teachers, and agricultural specialists in Costa Rica, Nicaragua, El Salvador, and Mexico.

Part- and full-time placements are available, and students may receive two to 15 course credits for their work. Each student's placement is supervised by a team of supporters: a faculty adviser, field sponsor, and the internship coordinator. Students spend 12 to 15 hours each week on their assignments for every 5 credits they receive.

Internships and fieldwork are designed to complement a student's coursework and are available for both lower- and upper-division credit. Often, the internship leads to a summer job or employment after graduation. Qualified environmental studies majors may undertake a senior internship to fulfill the department's comprehensive requirement. In addition, internships provide a fieldwork component for some environmental studies courses. Undergraduates are also afforded ample opportunities to intern on faculty and graduate-student research projects.

Further information is available from the Environmental Studies Field and Internship Program Office, 491 Interdisciplinary Sciences Building, (831) 459-2104, email: ckrohn@ucsc.edu. More information is available at envs.ucsc.edu/internships.

The Everett Program (formerly the Global Information Internship Program)

The Everett Program is focused on connecting the university to community partners on a global scale. It supports social change using the tools of technology, social entrepreneurship, and research.

The Everett Program recruits highly motivated and innovative students who are committed to developing social enterprises and contributing to social justice and environmental sustainability movements at the global and local levels. The program consists of three quarters of rigorous classes, practical technology labs, and project labs. It empowers students to focus their passion for social change by teaching them how to research, plan, design, fund, implement, and evaluate projects in collaboration with community change agents, using information and communication tools. Students are supported and encouraged to participate in outside-of-class trainings, competitions, outside grants, and opportunities to connect with the Everett alumni network.

Everett-sponsored students have worked with Muslim feminists in Malaysia, coffee farmer co-ops in Central America, democracy-advocating NGOs in Ghana, and aspiring high school students in Watsonville. For more information, see www.everettprogram.org. As managers of the program, past students who have become Everett Fellows also facilitate peer-to-peer technology and project labs throughout the year. These focus on training students in valuable skills such as participatory mapping, website and graphic design, digital video storytelling, social media campaigns, and robotic programming. The Everett Program's year-long series is interdisciplinary and counts as an upper-division elective for several social science majors. It also serves as a foundation for the major and minor in global information and social enterprise studies (GISES), which is sponsored by the Department of Sociology. For more information on the GISES and Intensive Sociology major and minor, please see Sociology Department Majors and Minors.

Fieldwork in Education Programs

The M.A. in Education/California SB 2042 Preliminary Teacher Credential program provides students with necessary

credential preparation for K–12 teaching in the California public schools. Preparation is offered for the Multiple Subject Preliminary credential (typically Grades K–6), and the Single Subject Preliminary credential (typically Grades 7–12) in the following subject areas: English, math, social science, and science. Credential students may also pursue a Bilingual Authorization in Spanish. Students pursuing the Education M.A./California Preliminary Credential must complete a three-quarter student teaching course sequence. Student teaching placements are restricted to enrolled students. The student-teaching sequence consists of five courses: Education 200, 201, 202A, 202B, and 202C. Fall and winter quarters of the sequence involve part-time placements in public schools in Santa Cruz County, Monterey County, and Santa Clara County. Spring quarter is a full-time experience in which student teachers take over full responsibility for the daily instructional program of the classroom in which they are placed. Substantial fieldwork in K–12 classrooms is also incorporated in other courses required for the teaching credential.

The minor in education is an undergraduate program in which students explore the history of educational thought and philosophy; the politics and economics of education, learning theory, and pedagogy; and issues of cultural and linguistic diversity related to schooling. As a part of the six-course minor sequence, students engage in field study in local schools through Education 180, Introduction to Teaching.

For more information, contact the Education Department, 1280 McHenry Library Building, (831) 459-4102, or education@ucsc.edu.

Health Sciences Internship Program

A requirement of the Human Biology major, the Health Sciences Internship Program offers students a unique opportunity for personal growth and professional development. Paired with a professional mentor, students spend one quarter interning in a health-related setting. Placement opportunities cover a broad range, from individual physicians to community clinics and hospitals, hospices, non-profits, and public health agencies. The Health Sciences Internship coordinator works with students to prepare them for their internship and maintains a list of appropriate placements. Junior and senior human biology majors only are eligible to apply. Applications are due two quarters in advance. For further information, contact the Health Sciences Internship Coordinator, Caroline Berger, at (831) 459-5647 or cberger@ucsc.edu.

Latin American and Latino Studies Field-Study and Internship Opportunities

All Latin American and Latino Studies majors are strongly encouraged to undertake either (1) a field study in Latin America, the Caribbean, or a Latino/a community in the U.S.; or (2) formal academic study abroad through the UC Education Abroad Program (UCEAP). These paths are the best ways to improve language skills, explore the nature and direction of specific academic and career interests in relation to Latin American and Latino studies, and deepen cross-

cultural understanding and relationships based on personal experience.

Field studies comprise independent, community-based study projects for academic credit, done under faculty sponsorship and arranged on an individual basis. Students can do full-time field study for one quarter for full academic credit, part-time field study scheduled in conjunction with formal coursework at UCSC, or field study as an extension of the UC Education Abroad Program (UCEAP). Projects vary widely, but students who want to develop a field-study proposal are expected to prepare for it by acquiring fluency in the appropriate language, prior cross-cultural experience, and upper-division coursework on the region and/or topic that is to be the focus of the study.

Students who wish to pursue a full-time field study are advised to speak with their faculty advisor to assess their eligibility and preparation, as well as to receive needed guidance, ideally a quarter or two in advance.

Many of the students who have done full-time field study have developed a senior thesis based on that work. Students who pursue a part-time field study are highly encouraged to discuss their plan with their faculty advisor as well.

Local opportunities for internships and field study in Latino/a communities on California's Central Coast are numerous. Credit for up to three upper-division courses may be applied toward the major from field study; however, course credit from field study and study abroad combined may not exceed three upper-division courses. Students should check the Latin American and Latino Studies Department website for further information regarding the field-study process and course credit. A listing of local field-study programs and petition forms are available at the LALS Department office, 32 Merrill Academic Building.

For more information, contact the LALS office at (831) 459-2119 (aalvares@ucsc.edu).

Psychology Field-Study Program

The Psychology Field-Study Program provides qualified students an opportunity to integrate what they have learned in the classroom with direct service to a community agency. Each year, more than 200 students develop new skills and clarify personal and professional goals by working as interns in schools, criminal justice programs, and mental health and other social service agencies, where they are supervised by a professional within that organization. Psychology faculty members sponsor field-study students, helping them to synthesize their intern experience with psychology coursework and guiding them through an academic project.

Junior and senior psychology majors in good academic standing are eligible to apply for this competitive program.

There is a minimum commitment of two quarters.

Interested students should attend an information meeting, held every quarter, for a general overview and application. The schedule for each quarter is posted at the start of instruction. For more information, visit the Psychology Field Study Program website.

University of California Center Sacramento

The University of California Center Sacramento offers students a chance to spend a quarter fully immersed in legislative and/or community service programs in the state capital. Students intern a minimum of 24 hours per week in the Assembly, Senate, Governor's Office, and with state agencies and nonprofit organizations. They also enroll in related courses taught at the UC Sacramento Center one block from the Capitol Building. Students live with other UC campus participants in a living and learning community. This opportunity is available to students from any major and is open to undergraduate and graduate students. For information, see the UCSC Career Center website.

The University of California Center Sacramento offers students a chance to spend a quarter fully immersed in legislative and/or community service programs in the state capital. Students intern a minimum of 24 hours per week in the Assembly, Senate, Governor's Office, and with state agencies and nonprofit organizations. They also enroll in related courses taught at the UC Sacramento Center one block from the Capitol Building. Students live with other UC campus participants in a living and learning community. This opportunity is available to students from any major and is open to undergraduate and graduate students. For information, see the UCSC Career Center website.

Summer Session Courses and Programs

UCSC Summer Session offers UCSC students a chance to accelerate progress toward their degrees and welcomes visitors from other colleges and universities as well as members of the community (including high school juniors and seniors). A broad range of 250 courses are taught by UCSC faculty, lecturers, and graduate students. Often significantly smaller in size than during the fall, winter, and spring quarters, Summer Session classes include major requirements and qualifying courses, lower- and upper-division courses, general education courses, and online courses. Most are five weeks long. Students may enroll in multiple classes in one or all of the sessions, with a maximum of 30 credits total.

Tutoring, advising, and other academic and personal support is available, as are on-campus housing and dining, OPERS fitness center and outdoor recreation, campus employment, and more. Many course restrictions are lifted in summer, giving students new opportunities. Special summer-only programs include the Summer Academies for new fall admits and the renowned one-week Dickens Universe. Please visit summer.ucsc.edu for courses and details or email summers@ucsc.edu.

UCSC Silicon Valley

Extension

In April 2016, UCSC Extension opened its doors to the UC Santa Cruz Silicon Valley Campus. Located at 3175 Bowers Avenue in Santa Clara, the Silicon Valley Campus is a beautiful new facility outfitted with the latest educational technologies just a stone's throw from the Santa Clara Square. UC Santa Cruz undergraduates and graduate students, as well as community members seeking continuing education, have their choice of certificate programs in more than 40 disciplines and services designed to meet the needs of Silicon Valley and greater Bay Area.

UCSC Extension provides professional training that reflects the academic rigor of the University of California and the hands-on, roll-up-your-sleeves practicality of Silicon Valley culture. Developed with guidance from key industry leaders and academic experts, UCSC Extension's certificate programs match the demands of a wide range of industries, including engineering, business, education, bioscience, and environmental safety. The Silicon Valley Campus is also home to the University of California Scout program, graduate programs affiliated with UCSC's Baskin School of Engineering, and an English language school designed to equip English language learners with the skills necessary to accelerate learning or take the next step in their careers.

Extension's career-oriented programs cover the latest best practices, tools, and technologies in engineering and technology, business and management, applied and natural sciences, and education. While most certificates can be completed within one year, coursework is graded and substantial, typically involving lectures, readings, presentations, and final projects or examinations.

Extension also has a robust international department, English language program, and Optional Training Program (OPT), and offers F1 visa guidance and internship opportunities.

Regularly enrolled UCSC students may obtain degree credit for Extension courses numbered 1–299. Lower division courses are numbered 1–099, upper division offerings are 100–199, and graduate-level courses are 200–299. Upon submission of the Extension transcript to the Office of Admissions, the course credit may be applied toward a bachelor's degree at UCSC. Many Extension courses are recognized for graduate degree credit by other universities (acceptance of course credit is based upon approval by the accepting university).

Students can study in a few different ways: in classrooms or labs at our Silicon Valley location; online, via our dynamic learning platform; and in hybrid courses, which offer a combination of classroom meetings and online learning. Many courses have both online and classroom sections available each quarter to ensure that students with commutes, jobs, and family obligations can find courses that fit their schedules.

Visit UCSC Extension or call (408) 861-3700 to enroll or to learn more about courses and programs.

Open Campus/Concurrent Enrollment

Concurrent Enrollment Through Extension is a cooperative arrangement between UC Santa Cruz and UCSC Silicon Valley Extension that enables members of the public to enroll in one or two regular UCSC undergraduate or graduate courses per quarter for credit. The program is administered by UCSC Silicon Valley Extension, and course credit granted appears on a UCSC Silicon Valley Extension transcript. Participants must meet certain criteria outlined in the Concurrent Enrollment application. An application fee is charged for each quarter of enrollment in addition to course fees. A first-time application fee of \$110 applies.

Concurrent Enrollment through Extension may be used as a path toward a part-time or full-time degree program or as a way of studying subjects of personal or occupational interest. Credit earned through this program may be used toward degree requirements, when applicable, if participants subsequently seek admission to the university and are accepted.

Financial aid is not available to participants in the Concurrent Enrollment program.

For further information and to obtain an application packet, contact UCSC Silicon Valley Extension, 3175 Bowers Ave., Santa Clara, CA 95054, (408) 450-4920, or email opencampus@ucsc.edu.

THE COLLEGES AND STUDENT LIFE

The Colleges

About UCSC's Colleges

UC Santa Cruz combines the resources of a world-class public research university with a distinctive undergraduate experience characterized by our college system. Each college is a vibrant living/learning community supported by faculty and staff who provide academic support, organize student activities, and sponsor events that enhance the intellectual and social life of the campus. The colleges are committed to fostering a nurturing and academically thriving environment for students of all backgrounds. Each college strives to promote the attributes of a diverse and multicultural community in its own unique way.

In order of founding, the colleges are Cowell, Stevenson, Crown, Merrill, Porter, Kresge, Oakes, Rachel Carson College, College Nine, and College Ten. Self-contained and architecturally distinct, each college is a relatively small community of 30 to 110 faculty members and between 1,500 and 1,800 students, about half of whom live on campus. Each

college has its own housing, as well as academic and recreational programming, and each is an integral part of the larger campus. The colleges have their own academic emphases and cultural traditions, although each seeks faculty and students from a variety of disciplines to foster broad intellectual interests. The colleges play a primary role in academic advising and are the center of student life. Students graduate from their college. At the same time, all university academic programs, resources, and student services are open to students of every college.

All undergraduate students are affiliated with one of our 10 colleges, their home within the larger university. During the process of accepting the offer of admission, entering students are asked to list several colleges in order of preference; whenever possible, students are assigned to one of their preferred colleges. The information students need to rank their college preferences can come from a variety of sources—personal acquaintance, a campus visit, literature available from the colleges, campus websites, and the descriptions in this section of the catalog. Students also have the option to indicate “no preference,” meaning they will be fine with any of our 10 colleges, and the Admissions Office will assign those students to one of the colleges.

Similarities and Differences

The colleges are small-scale residential communities, each providing an academically and socially supportive environment and offering special programs designed to help students transition to campus life, build a strong connection with the campus, and get the most out of their UCSC experience.

Each college provides academic advising as well as academic and general campus orientations to help you plan your academic program. College academic preceptors and advisers provide advice on general academic matters outside a student’s major, including general education, choosing a major, and strategies for academic success. Psychological and personal counseling is also available in each college. The faculty, or fellows, of each college come from a variety of academic disciplines; many faculty have their offices in the colleges.

Each college offers a distinctive academic core course for entering frosh. The required course provides a significant bridge between academic and residential life, since all frosh, regardless of major, will be in the course, and most will be in residence as well. The colleges also offer selected courses in their area of interdisciplinary emphasis and host events and speakers that enhance this focus.

Architecturally distinct, each college was planned by a different architect who was encouraged to convey the distinct personality of that college through the design of its buildings and their placement in the natural environment. The particular style of housing varies among the colleges, ranging from residence halls, with a mix of shared and private rooms, to apartment-style housing, where students live together in small groups and may do some of their own cooking. Each college’s residential program is a team effort. Live-in student and professional staff members provide orientation and support

services, organize activities and events, provide referral information about academic or personal concerns, and assist with roommate problems.

Changing Colleges

Most students develop friendships and intellectual attachments within their affiliated college, and remain members of that college throughout their undergraduate years. Some students find that changing academic interests draw them to a different college. During specified filing periods, students may request a change of college with the approval of both college administrations.

Cowell College

Cowell College inaugurated the Santa Cruz campus when it opened with a pioneer class of 600 students in 1965. The founding faculty shaped an educational program that challenged and enriched students through wide-ranging inquiry and disciplined study. Today, Cowell has more than 1,500 affiliated students and over 90 faculty fellows. Its motto—The Pursuit of Truth in the Company of Friends—expresses a continuing commitment to create a serious academic environment within a humane and broadly inclusive community. The college is named for the S. H. Cowell Foundation, which endowed the college at its founding.

ACADEMIC EMPHASES

The academic theme of the college encourages students to pursue their general and disciplinary study with attention to the values of liberal arts education: understanding one’s individual perspectives by exploration of one’s historical background and world context. Students affiliated with the college pursue majors from all departments on campus.

Additional information about Cowell College academics, including Core Course requirements and other academic programs, is available here. (p. 591)

COLLEGE COMMUNITY AND FACILITIES

Cowell’s seven residence halls and three apartment buildings are arranged in three quadrangles on a hillside overlooking the city of Santa Cruz and Monterey Bay. About 700 students are housed in the college. Most floors are mixed gender with all students sharing common lounges and other facilities, but single-gender floors are provided for those who prefer this arrangement. Apartments house continuing students, mostly juniors and seniors. The residential staff members facilitate diverse educational, social, and recreational programming to enhance the living and learning environment.

Arranged around the college’s central courtyard are the dining hall, the Page Smith Study Library, the Mary Holmes Fireside

lounge, the cafe, and conference rooms and classrooms. The Cowell Press, where students can learn the fine technique of hand-operated letterpress printing, is a stone's throw away from the plaza. Also nearby is the Eloise Pickard Smith Gallery, including the Ann Dizikes Annex.

Since the college's founding, regularly scheduled College Nights in the dining hall have offered students, staff, and faculty a special meal and a rich mix of programs. Community life is enlivened by many other scheduled and impromptu intellectual, cultural, and social events.

The Student Senate meets weekly to discuss campus issues and student government. The Senate advises the college on the allocation of funds for student activities and programs. Members of the Senate are selected each year by lot, but any student may become a voting member by steady attendance at meetings. The college's student groups, staff, and faculty work together to create a supportive community for students from all ethnic groups, all religious traditions, and all sexual orientations and to increase awareness of the many dimensions of diversity in the community.

For more information on the college, see the Cowell College website or call (831) 459-2253.

COWELL FELLOWS AND STAFF

Cowell College faculty fellows are listed on the college's faculty directory.

College staff are listed on the college's staff page.

Stevenson College

"We are Stevensonians; we are free agents of history and masters of our own destinies. Every one of us is important, and we cherish our differences as much as we cherish our shared values of love, chivalry, honesty, hard work, and responsibility."

—Seung Kyun Joseph Mok,

Stevenson Alumnus/Regents Scholar

Stevenson College is named after former statesman and U.S. Ambassador to the United Nations Adlai E. Stevenson. Our faculty, students, and staff take pride in intellectual critical inquiry, academic and civic leadership, and respect for students' concerns about shared student governance, human rights, and social justice.

Stevenson College has a long-standing reputation for excellence in liberal education. The college strives to provide an academically, culturally, and socially supportive environment for all its members, fostering social responsibility and academic achievement. Stevenson alumni can be found in legal, political, educational, engineering, medical, computer and information sciences, business, and public administration careers, among others.

The college's faculty and staff offer professional and personal service for the diverse needs of students. Faculty and staff assist students in all areas of their academic and social experience at Stevenson College, and are committed to instilling respect for the diverse backgrounds of Stevenson students.

ACADEMIC EMPHASES

The faculty at Stevenson, drawn from a variety of disciplines in the social sciences, humanities, and physical and biological sciences, share a common concern for the study of social processes that shape modern society and determine the quality of our individual lives throughout various global regions and periods of world history. Linguistics, history, sociology, politics, psychology, biology, chemistry, and computer science are strongly represented in the college.

Additional information about the Stevenson College academics, including Core Course requirements and other academic programs, is available here. (p. 604)

COLLEGE COMMUNITY PROGRAMS

- College Nights
- Stevenson Student Council
- Social and Multicultural Programs/Activities
- Cultural Arts and Diversity Rainbow Theater
- Stevenson Finals Study Breaks at the Provost House

Stevenson holds regular College Nights, a long-held tradition where Stevenson faculty, staff, and students get together for a special, themed dinner followed by entertainment.

The Stevenson Student Council meets on Thursday evenings. This group is responsible for allocating college membership fees to student activities. The council also serves as a forum for the discussion of college and campus-wide issues and appoints student representatives to college and campus-wide committees.

FACILITIES

- Eight small residence halls, three of which are themed houses:
- LGBTQIA+
- Diversity and Social Justice House
- The Rosa Parks African American Theme House (R. PAATH)

- Three apartment buildings
- Stevenson Coffee House
- Wagstaff Fireside Lounge
- Writers' Center
- Stevenson Library
- Stevenson Event Center
- Silverman Conference Room
- Recreation room
- Stevenson Garden
- Stevenson Music Practice Rooms

Stevenson has a wide variety of facilities and activities to appeal to many tastes. The college, designed by San Francisco architect Joseph Esherick, has won many architectural awards. The buildings are situated amid redwood trees and sprawling lawns, and the main quad overlooks Monterey Bay. Stevenson is situated close to the campus bookstore, restaurants, McHenry Library, gym, and pool. There are eight small residence houses at the college providing a choice of single-gender or mixed-gender floors; each house accommodates about 90 undergraduates. The apartments provide space for continuing students. Nearby are a picnic area, playing fields, and a garden.

The Stevenson Coffee House, which has become the gathering place in the college, is a friendly and inviting spot to enjoy lunch or an espresso and pastry—indoors or out on the patio. It is the scene of lively conversation, occasional musical entertainment, and chess matches. Adjoining the Coffee House is the recreation room, with Ping-Pong, a pool table, and televisions. This area is also the site of much socializing and spontaneous group activity.

In contrast, the Stevenson Library is a striking building designed for quiet reading and study. The Wagstaff Fireside Lounge, a retreat for relaxed discussion, is also used for recitals, special lectures, meetings, and residence house activities. Art exhibits (both student and professional) are on display throughout the year in the lounge, library, and coffee house.

For more information on the college, see the Stevenson College website or call (831) 459-4930.

STEVENSON COLLEGE FELLOWS AND STAFF

Stevenson College faculty fellows are listed on the college's faculty directory.

Stevenson College staff are listed on the college's staff page.

Crown College

Crown College seeks to provide our students with a living and learning environment in which they can positively develop intellectually and socially. Crown is traditionally viewed as the “science college,” and the majority of our affiliated faculty fellows teach in the STEM (Science, Technology, Engineering, and Math) fields. However, half of our students major in the social sciences, arts, and humanities.

Crown is located on a hilltop surrounded by a redwood forest. The core buildings consist of an administration office, dining commons, lounge spaces, study spaces, faculty offices, and classrooms built around a large patio and central fountain. The award-winning architecture with its white walls and high-pitched tiled roofs suggests a hillside Mediterranean village. The college's residential facilities house approximately 800 students. The facilities at Crown College were built through a partnership of public funds and a gift from the Crown Zellerbach Foundation.

ACADEMIC EMPHASES

From the time of its founding in 1967, issues pertaining to the role of science and technology in society have been a focus of special interest at Crown College. We approach these issues from an interdisciplinary perspective that recognizes the influence of social and cultural factors on the scientific enterprise, as well as the ways in which science and technology influence our society.

More recently, Crown is adding an entrepreneurship and innovation component through its partnership with the Center for Innovation and Entrepreneurial Development (CIED). This partnership includes co-sponsoring talks and slams as well as a summer class in entrepreneurship.

Additional information about Crown College academics, including Core Course requirements and other academic programs, is available here. (p. 593)

COLLEGE COMMUNITY AND FACILITIES

Crown sponsors a wide variety of co-curricular events spanning cultural, educational, and social areas of interest. One popular series is the Science/Public Affairs Tables, informal dinners at the Provost House offering students an opportunity to socialize with a faculty member outside the classroom and learn about their research interests.

Students become involved in Crown life by both initiating and participating in a wide range of activities. Social activities vary each year according to the interests of students. Typical events include College Nights, themed dinners with special menus and entertainment that are open only to the Crown community; dances, including the Glow Dance and the

Crown/Merrill Semi-Formal; and study breaks and stress relievers. Unique to Crown, and a collaboration between student and academic life, the Social Fiction Conference examines issues of social justice in the ever-changing context of science fiction, fantasy, gaming, and anime.

Outdoor activities organized by the student senate, the College Programs Office, or residential staff range from whale watching on the Monterey Bay to visiting the Exploratorium in San Francisco, and from backpacking to stargazing.

Crown Student Senate (CSS), the elected student government at Crown, holds open weekly meetings to determine funding allocations for student activities and to discuss issues of concern to students and the college. CSS also sponsors events to entertain, including the very popular Casino Night.

At Crown College, we believe that the experience of living in our on-campus residence halls and apartments offers students not only support for their academic experiences, but also unique opportunities for learning about the concept of community. When college students feel connected to a community during their studies, they experience a smoother transition to university life, greater academic success, and higher satisfaction with their college experience. The Crown Residential Education team understands community not as a product we can deliver to our students, but as an experience that they are responsible for creating for and with each other. Even so, we do not ask our students to undertake this weighty task on their own. The Residential Education team partners with students, striving to be “good companions” on their journey by facilitating experiences that help them to cultivate and apply the knowledge, skills, and abilities needed to create, participate in, and lead caring and socially just communities.

Crown offers two types of residential facilities: residence halls and apartments. Eight traditional residence halls each house approximately 80 students in single and triple rooms in a coed environment (single-gender bedrooms with all gender bathrooms) or on a few all-female floors. For students interested in living and learning in a special-interest environment, Crown provides the Gaming House, Outdoor Pursuits House, and College Scholars and Science Learning Communities.

The college also has apartments for approximately 270 continuing students. Like the residence halls, the apartments are built on a small scale. Each three-story building has two or three apartments per floor that house four to six students in a combination of single, double, and triple rooms and include a kitchen, living room, dining room, bathroom, and outside deck.

Other facilities in the college include the Crown Library study space; a computer laboratory with Mac workstations, which provides students with access to several kinds of systems and an array of applications and instructional software selected to support academic coursework; the Fireside Lounge with a piano and a television; and the Music Practice Room. The Crown-Merrill Community Room, with a television, pool table, foosball, and ping-pong table, provides an informal place to study or just visit with friends. Dining facilities boast continuous dining and Banana Joe’s take-out and quick mart.

For general information, call the College Office at (831) 459-2665 or visit the Crown College website. For residential information, call the Housing and Residential Education Office at (831) 459-5689.

CROWN FELLOWS AND STAFF

Crown College faculty fellows are listed on the college's faculty directory.

Crown College staff are listed on the college's staff page.

Merrill College

Merrill College seeks to expand its students’ awareness of their own heritage and of the diversity of cultures around the world, past and present. Merrill faculty specialize in a number of different areas of study, concentrating especially on social theory, international affairs, and social change, and from a variety of disciplinary perspectives including history, the social sciences, literature, and foreign language study. The college makes a special effort to be a home for students from different cultural backgrounds and for international students; it presents unique opportunities to those who value multicultural perspectives.

Merrill houses the departments of politics, legal studies, and Latin American and Latino studies. It also hosts KZSC, the campus radio station; the Chicano Latino Research Center (CLRC); UCSC’s Cantú Queer Center; the student-run Pottery Co-op (the only one of its kind at UCSC); and the Ming Ong Computer Center, a computer facility with more than 40 personal computers.

ACADEMIC EMPHASIS

Cultural Identities and Global Consciousness is the ethos of Merrill College. This pairing signals the college’s commitment to drawing on the “funds of knowledge” brought by individual college members to the community of scholars, and a corresponding commitment to understanding these identities within a larger global context.

Additional information about Merrill College academics, including Core Course requirements and other academic programs, is available here. (p. 596)

COLLEGE COMMUNITY AND FACILITIES

At Merrill College, we believe that the experience of living in our on-campus residence halls and apartments offers students not only support for their academic experiences, but also unique opportunities for learning about the concept of

community. When college students feel connected to a community during their studies, they experience a smoother transition to university life, greater academic success, and higher satisfaction with their college experience. The Merrill Residential Education team understands community not as a product we can deliver to our students, but an experience that they are responsible for creating for and with each other. Even so, we do not ask our students to undertake this weighty task on their own. The Residential Education team aims to partner with students, striving to be “good companions” on their journey by facilitating experiences that help them to cultivate and apply the knowledge, skills, and abilities needed to create, participate in, and lead caring and socially just communities.

Located on a hilltop between UCSC’s famed Chadwick Garden and Santa Cruz’s Pogonip parkland, Merrill’s recently renovated, award-winning buildings thread upward through the edge of a redwood forest. Four residence halls house approximately 600 students in two high-rise structures and two smaller buildings. The Merrill Residence Halls offer a coed environment (single-gender bedrooms with all gender bathrooms) as well as a few all-female floors and trans-inclusive housing options.

Glass curtain walls provide views from the A & B Buildings of the reconstructed college center and new restaurant building. Merrill’s plaza, complete with Vivas Organic Mexican Restaurant and a large lawn, makes excellent use of the ample sunshine and provides common space for students living in the residence halls and other housing options.

The apartments, located a short distance from the central area of the college, house approximately 200 continuing Merrill students. Grouped amid winding pathways and redwood trees, these three-story buildings have two or three apartments per floor. Each apartment houses four to six students in a combination of single, double, and triple rooms, and comes fully equipped with a kitchen and a bathroom, a large living area, and an outside deck. Residents of the apartment complex share a large community room, two laundry rooms, and plenty of outdoor space.

Facilities at Merrill include the Cultural Center, where large events (including “Merrill, the Musical” and the Crown/Merrill Semi-Formal) take place; the Baobab Lounge, which provides study space, informal gathering space, a piano, and a television; and Casa Latina and Merrill Academic Success (MAS), which provide Merrill students with quiet places to study. Finally, at the student-run pottery co-op, students can throw, fire, and glaze their pieces in the workshop space.

The physical facilities of Merrill College were provided through a partnership of public funds and gifts from the Charles E. Merrill Trust and the family of Ming Ong, a student in the 1980s.

For more information, visit the Merrill College website or call (831) 459-2144. For residential information, call the Housing and Residential Education Office at (831) 459-5689.

MERRILL COLLEGE

FELLOWS AND STAFF

Merrill College faculty fellows are listed on the college's faculty directory.

Merrill College staff are listed on the college's staff page.

Porter College

Porter College was founded in 1969 as the fifth of UC Santa Cruz’s residential colleges and was later renamed in honor of a generous grant from the Porter-Sesnon family. Its mission is to foster achievement in all areas of study. Porter is especially dedicated to achievement in the arts, believing that creative inquiry is an essential part of a rigorous and broad-minded education, a flourishing society, and a happy life.

ACADEMIC EMPHASES

The Porter campus is the administrative home of the Arts Division and the History of Art and Visual Culture Department, but Porter College faculty fellows hail from every academic division on campus and from many non-academic professions. All of them share the philosophy of education that the college’s curriculum embodies: first, discover how to learn; then, learn by doing; and finally, let your learning make a difference in the world.

The Porter College curriculum encourages students to explore unusual topics and provocative ideas, to test and revise hypotheses about the meaning of their experiences, to learn from the failures that are an inevitable part of new learning and discovery, and to assume responsibility for the decisions they make in their studies.

Additional information about Porter College academics, including Core Course requirements and other academic programs, is available here. (p. 600)

COLLEGE COMMUNITY AND FACILITIES

The traditional residence halls and apartments play an important role in bringing the college community together. Students are encouraged to spend their beginning years in residence in the college, where housing is available for 1,300 students. The residence halls are divided into smaller units or “halls,” with from 30 to 35 students sharing a wing and restroom facilities. Theme or hall options include Single Gender, LGBTQIA+, Gaming, and Substance-Free (just to name a few). The six-person apartments are reserved for upper-division students.

Porter College is also home to the Transfer Community at Porter, a transfer student living/learning community. All on-campus incoming transfer students reside at Porter regardless

of their college affiliation. Special programs are designed to help new transfer students adapt to life at UCSC.

In addition to traditional classrooms, Porter has many specialized facilities, such as student art galleries, a study center, and a dining hall that converts to a theater space. Porter College also features a MakerSpace Co-op dedicated to promoting Porter's creativity, building community, and providing a constructive positive outlet. Additionally, the MakerSpace has tools and materials available to use for personal crafting projects or even class assignments. The Arts Instructional Computing Laboratories, located at Porter College, consist of two high-end labs oriented toward the arts.

Porter provides many opportunities for relaxation and recreation to balance the intellectual demands of a university education. The Residential Life and Activities Office staffs organize formal and informal events, including open-mic nights, dances, recreational activities, and the mural painting program.

Many students and faculty perform or exhibit their work at Porter. The Sesnon Gallery, the Porter/Kresge Dining Hall, the Quad, and the faculty gallery host a wide range of artistic, cultural, and academic events each year.

For more information, call (831) 459-2273 or visit the Porter College website.

PORTER COLLEGE FELLOWS AND STAFF

Porter College faculty fellows are listed on the college's faculty directory.

Porter College staff are listed on the college's staff page.

Kresge College

ACADEMIC EMPHASES

Kresge's academic life is centered on the integration of living and learning in a community that values self-determination, consensus-building, intellectual freedom, sustainability, and justice. These principles take shape in a curriculum that emphasizes participatory learning, hands-on experience, and conscientious academic inquiry that transcends the walls of traditional classrooms. Ranging from agroecology to photography, writers' workshops to natural history, and journalism to service learning, Kresge's courses offer varied ways for Kresge students to fulfill GE requirements while broadening their educational experience in the company of dedicated and imaginative faculty.

Additional information about Kresge College academics, including Core Course requirements and other academic programs, is available here. (p. 594)

RESIDENTIAL LIFE

The architecturally renowned Kresge campus offers apartments rather than residence halls. The Kresge apartments attract students with a sense of independence and community participation.

Distinctively designed, the apartments at Kresge Proper are configured for five to nine people. Kitchen and living areas look out onto the street, with other rooms facing the surrounding redwood forest. J and K Building's three-person apartments are reserved for continuing upper-division students. These two-bedroom apartments have a kitchen and combination dining and living area.

Kresge is home to the Writer's House, a living/learning community for students interested in creative writing and journalism (regardless of major), and the Ecovillage, a community for students who want to actively create a new world based on cooperation and sustainable living.

The Residential Life and College Programs staff at Kresge work to bring students of similar interests together academically and socially by designing fun and unique programs based on student interest. Programs that focus on celebrating the diversity of the residential community, and on enhancing academic success through music events, mural painting, and food-centered events are common.

COMMUNITY LIFE

A wide variety of events and activities shape community life at Kresge. Lectures, workshops, dances, and concerts are a regular part of student life at the college. The nature and tenor of these events are a reflection of the diverse interests of students and staff, who are committed to providing voice and opportunity for all community members.

Students actively shape the college community through participation in Kresge Parliament, an openly structured student organization responsible for voting the allocation of all college membership fees in support of activities and events. Parliament and Town Meetings also serve as a forum for the discussion of college and campus-wide issues with college staff and faculty. Additionally, students can get involved in the Kresge Multicultural Education Committee (KMEC), Music Co-op, Food Co-op, Photo Co-op, or the Kresge Garden.

TRANSFER STUDENTS

In recognition of the wealth of diversity that transfer students bring to the community—in terms of culture and experience—Kresge is the home of the STARS program (Services for Transfer and Re-entry Students). This is a staffed facility where students can gather to relax, socialize, hold meetings, and obtain campus information and resource support in a central location regardless of college affiliation. The resource center offers workshops, social evenings, and special events tailored to meet the needs of transfer students. STARS also offers special advising workshops and two- and

three-credit courses designed to help transfers in the process of entering the university and moving forward in their careers.

FACILITIES

At the entrance to the college is the restful Piazzetta, with a beautiful, architecturally designed fountain, and the Kresge Garden, the largest student-run garden on campus. Leading off from the Piazzetta are STARS, the Seminar Room with a kitchen, the Commuter Lounge, and a student lounge equipped with television and DVD player. In addition to STARS, as a unique facility on the campus, the Commuter Lounge is a place for off-campus students who want to use a kitchen, shower, or lockers while on campus. Kresge's Photo Lab Co-op is above the Piazzetta and offers 24-hour accessibility to darkroom equipment. Adjacent to the nearby meadow is an outdoor basketball court. The college includes a study center with soaring ceilings and walls of glass overlooking the forest, which also houses a writing center, a computer lab equipped with PCs for student use, and a student-run Food Co-op, where organic produce is sold and working memberships are available.

Kresge College is undergoing a four year redevelopment project. As a part of the first construction phase of the project the Town Hall, Music Co-op and the Owl's Nest Cafe will be off-line. More details and updates about the Kresge Project can be found on the Kresge web page.

For more information, call (831) 459-2071 or visit the Kresge College website.

KRESGE COLLEGE FELLOWS AND FACULTY

Kresge College faculty fellows are listed on the college's faculty directory.

Kresge College staff are listed on the college's staff page.

Oakes College

Oakes was founded in 1972 to provide high-quality education to students from diverse cultural and social backgrounds. Students, staff, and faculty associated with the college believe that learning takes place not only in the classroom, but also in residential settings. For that reason, they work hard to create a multicultural community whose members strive to achieve ambitious goals—including equal access to educational opportunity and freedom from oppression—while simultaneously affirming and celebrating their distinctive cultural backgrounds.

ACADEMIC EMPHASES

As a result of their experience at Oakes College, students will cultivate equity and justice. This is what drives Oakes College. The broad learning outcomes are for Oakes students to understand the self, community, systemic oppression, and action for change.

The Oakes College faculty represents a wealth of expertise from the natural sciences to the humanities, and we are proud to have some of the top scholars in the world among our faculty fellows. Our students major in nearly every discipline at UCSC—from economics and computer science, to theater arts and Latin American and Latino studies—and they are well supported by the depth and breadth of the Oakes College faculty and the extensive knowledge of our advising team. Oakes graduates have gone on to successful careers in fields such as medicine, law, education, medical research, and community service.

Additional information about Oakes College academics, including Core Course requirements and other academic programs, is available here. (p. 598)

COLLEGE COMMUNITY AND FACILITIES

Oakes College, located on the west side of the UCSC campus, commands a sweeping view of Monterey Bay. Students may choose between apartment and residence hall living. The residence halls have attractive courtyards, and views of the ocean and the city of Santa Cruz. Students can also share an apartment-style living space, which includes a common living area and small kitchen. Full-time coordinators for residential education and neighborhood assistants help residents develop cooperative ways of living together. As one student put it, "Oakes is a community where people of many different backgrounds, interests, and goals form a friendly neighborhood. We share our cultures and adapt to the different lifestyles of our neighbors." The residential program is designed to assist all students in integrating their academic and social lives. The residential staff host activities sponsored through its wellness, academic success, leadership, and social justice and diversity committees.

The college staff seek to nurture and sustain a community in which mutual respect, understanding, and concern for others are the norm. Within that atmosphere of community expectations, students are also supported and encouraged to find room for their own creative personal expression.

The other facilities at Oakes further support the special programs of the college and provide recreational opportunities for the students. College facilities include the Learning Center, a multipurpose room for lectures, movies, and small theater productions; a college study center that is a quiet space

for individual study, and a dining facility shared with Rachel Carson College. Adjacent to the Oakes Café is the Guzman Room, a social and group study space. Oakes is also home to the Underdome, a small outdoor basketball court great for friendly three-on-three competition. Additional recreational facilities located close to the college include tennis courts, a large recreational field, and an indoor basketball court.

Oakes is named after Roscoe and Margaret Oakes in recognition of their generous philanthropy through the San Francisco Foundation.

For further information, call (831) 459-2558 or visit the Oakes College website.

OAKES COLLEGE FELLOWS AND STAFF

Oakes College faculty fellows are listed on the college's faculty directory.

Oakes College staff are listed on the college's staff page.

Rachel Carson College

Rachel Carson College is dedicated to environment and society, and the college has organized a vigorous intellectual life around this theme. The college examines environmental issues from multiple perspectives, through the social and natural sciences, engineering, public policy, and science and technology studies. Rachel Carson College offers students a sense of community and opportunities to augment academic work with a wide range of extracurricular activities. These include events such as Earth Week, sustainability internships, and a minor in sustainability studies.

Rachel Carson College students major in nearly every discipline offered at UCSC, while sharing a strong commitment to environmental stewardship. We teach our students and graduates to become environmentally aware green citizens, with the capacity to evaluate sustainability policies and strategies and with the skills needed for hands-on engagement in the many projects and activities that will be required to ensure the future of the planet and human civilization.

ACADEMIC EMPHASES

Rachel Carson College's academic classes focus on the theme of environment and society. The college sponsors a number of educational initiatives and courses aimed at furthering its theme and mission, as well as programs offering experiential learning for students.

Additional information about Rachel Carson College academics, including Core Course requirements and other academic programs, is available here. (p. 601)

COLLEGE

COMMUNITY AND FACILITIES

Rachel Carson College is located on a sunny, terraced hillside on the west side of the UCSC campus, offering a spectacular view of Monterey Bay and the coastline as well as the redwood-covered hills. The college is designed to encourage interaction among resident and commuter students, with outdoor spaces for relaxing and informal opportunities to socialize. These include small residence hall patios, grass quadrangles, and a large plaza—the heart of the college—where pedestrian traffic converges. Adjacent to the college are recreational facilities that include the West Field House, tennis courts, basketball and sand volleyball courts, and playing fields. The Theater Arts and Music Centers, McHenry Library, and Porter and Oakes Colleges are a short walk from the college. Other parts of the university are easily accessible by foot, bicycle or frequent shuttle buses.

Rachel Carson College's facilities include an academic building that accommodates the college and faculty offices, the Sociology Department, associated research centers, classrooms, and a computer lab with printers. Approximately 500 students live in the college's community of two- and three-story residence halls, which provide single, double, and triple rooms as well as suites. The residence halls include laundry facilities and lobbies that serve as living rooms—favorite places where residents gather to relax, watch television, and catch up on the news of the day. A number of these are themed residences that focus on special programming related to the respective theme. Another 300 students are housed in Rachel Carson College's two-, three-, and four-bedroom apartments.

The college's residential staff includes both coordinators for residential education, who are full-time live-in professionals, and undergraduate resident assistants. The residential staff plans a variety of educational and recreational events, including community barbecues, outdoor movies, and student-initiated events that celebrate the diversity of our community. More intimate gatherings include study breaks, coffee talks, and potlucks. The residential staff is available to ease the transition to college life, making the college a comfortable new home for our residents.

The Student Commons building contains the Student Life Office, the office of Rachel Carson College's college programs coordinator, the office of the Student Environmental Center, and a large

meeting room for student use. A study center is located across the plaza. The Rachel Carson College Café is a favorite haven and gathering place for students, faculty, staff, and other members of the campus community.

In conjunction with the student government and student organizations, the Rachel Carson College Student Programs Office plans social, multicultural, and educational events for the college community. Weekly programs including open mics, music, art shows, and guest speakers accommodate the diverse spectra of cultural and artistic interests of the students.

College Night, a quarterly cultural event, provides an opportunity for students to learn about a variety of cultures through entertainment, education, and delicious cuisine. In addition, the Student Programs Office works closely with the Student Environmental Center to bring programs that educate and build long-lasting networks, which aim to address the environmental issues affecting our world today.

Above all, Rachel Carson College seeks to create a community of inclusion, in which each person is encouraged to share and explore beliefs, worldviews, values, and ideas in an atmosphere of mutual support and trust.

For more information, contact the college at (831) 459-2361, email 8housing@ucsc.edu, or visit the the Rachel Carson College website.

RACHEL CARSON COLLEGE FELLOWS AND STAFF

Rachel Carson College faculty fellows are listed on the college's faculty directory.

Rachel Carson College staff are listed on the college's staff page.

College Nine

ACADEMIC EMPHASES

College Nine's theme of International and Global Perspectives emphasizes the causes and consequences of our increasingly interconnected world. Our academic and co-curricular programs analyze economic and cultural globalization, immigration, ethnic conflicts, genocide, and human rights, among other issues. Students interested in these issues either as their major focus or as part of their general education are invited to join the College Nine community.

Additional information about College Nine academics, including Core Course requirements and other academic programs, is available here. (p. 587)

COLLEGE COMMUNITY

Founded in 2000, College Nine is one of the newest colleges at UCSC. College Nine creates an integrated living and learning environment through engaging academic and extracurricular programs focusing on the theme of International and Global Perspectives. Students and staff collaborate to develop an array of programs exploring the many aspects of the college's theme. Some of the programs include faculty presentations, guest speakers, conferences, debates, films, arts events, and interactive workshops. These

programs unite community members in an atmosphere of mutual respect, in which important contemporary and controversial issues are discussed.

College Nights

College Nights are community programs that feature a special dinner menu, entertainment, educational displays, and activities that relate to the college theme of International and Global Perspectives. College Nights provide an opportunity to gather as a community several times a year to enjoy a meal and share conversations. Planned by students and staff, past College Nights have focused on Earth Day and sustainability, music and dance from around the world, and global popular culture. College Nights are held in the Dining Commons and are open to all College Nine students.

Student Government

The College Nine Student Senate serves as the student government for College Nine and represents its students to the college and campus administrations and to the Student Union Assembly (SUA), the campuswide student governance board. The Senate appoints representatives to campus and college committees, provides monetary support to student organizations, hosts community programs, and consults with college administration on policies development.

International Living Center

The International Living Center (ILC) at College Nine offers a unique living environment fostering understanding, cooperation, and friendship among upper-division students from different nations, cultures, and backgrounds. Half of the residents are students from the United States, and the other half are students from various countries around the world. Students reside in the Colleges Nine and Ten Apartments. Based out of the International Living Center, the International Affairs Group (IAG) offers all Colleges Nine and Ten community members the opportunity to engage in lively discussions about important current international issues with one another through guest speakers, film, literature, media, and personal experience.

iFloor

The iFloor is a mix of international first-year students and U.S. first-year students who apply to live in this intentional intercultural community housed within the College Nine residence halls. This unique community offers residents opportunities to make meaningful, lifelong friendships and connections that extend beyond borders.

Co-curricular Programs and Opportunities

Getting involved in co-curricular activities is a predictor of college success. Not only do college activities help students make friends, they foster leadership and group cooperation skills. There are many opportunities at College Nine for student involvement. These include the following groups as well as many other programs, activities, and clubs.

(H)ACER

The (H)ACER Program at Colleges Nine and Ten provides undergraduate students with a variety of opportunities to learn with and from the local community and produce knowledge that diversifies the voices and perspectives represented within academia. (H)ACER trains students in participatory, critical, and feminist research methodologies and creates opportunities for students to work and conduct research in real-world contexts. In collaboration with our community partners, students engage in projects that address pressing issues such as social, economic, educational, and environmental injustice through an approach that pushes against deficit and damage-centered frameworks and honors the knowledge of community members.

Practical Activism: Tools for Local and Global Change

The annual Practical Activism Conference is a daylong, student-led conference featuring keynote speakers, multiple workshops, various on- and off-campus organizations, performances, and a variety of hands-on activism activities. Students gain valuable leadership and organizing skills through developing and planning this exceptional program, which involves collaboration among faculty, staff, and the local community. Visit practicalactivism.ucsc.edu for more information.

Community Garden

The Community Garden Club meets weekly to discuss sustainability issues, integrate the themes of our colleges into the garden design and practice, and work together on soil preparation, planting, and harvesting. Members of the Garden Club learn about opportunities to work with our sister garden at Calabasas Elementary School in Watsonville.

Intercultural Community Weekend

This two-day retreat provides international and U.S. students from diverse backgrounds the opportunity to explore various components of intercultural communication. Through a series of structured exercises and small-group discussions, students share perspectives on intercultural issues, values orientation, and cross-cultural communication. The goal of the workshop is to build community and friendship between international and U.S. students as well as to increase students' understanding of the complexity of communicating across cultures.

PHYSICAL SURROUNDINGS

College Nine is situated in a redwood grove next to the Social Sciences 1 and 2 Buildings near the heart of campus. One of the campus's Instructional Computing Labs is conveniently located in the Social Sciences 1 Building. A nature preserve serves as College Nine's "backyard." College Nine students have immediate access to hiking, running, and mountain bike trails in the adjacent forest.

Residence halls offer approximately 600 single and triple bedrooms. These fully furnished residence halls include adjacent student study spaces, recreational areas, and Internet connections. In addition, there is a state-of-the-art dining hall with an adjoining multipurpose room and recreation lounge for both College Nine and College Ten.

College Nine and College Ten also house approximately 400 upper-division students in apartments, with single, double, and triple bedrooms. All apartments have full kitchens, living rooms, bathrooms, and Internet connections. Ground-floor apartments have decks, and most upper apartments have private balconies.

For more information about academic or general college programs, call (831) 459-5034, email 910capc@ucsc.edu, or visit the College Nine website.

COLLEGE NINE FELLOWS AND STAFF

College Nine faculty fellows are listed on the college's faculty directory.

College Nine staff are listed on the college's staff page.

College Ten

ACADEMIC EMPHASES

College Ten's theme of Social Justice and Community addresses a range of social problems and their impacts on society. In particular, the academic and co-curricular programs consider the injustices that many people confront in their lives, and possible policies for addressing social, political, and economic inequalities. In addition, the college provides students with opportunities to make their own positive contributions to social change through community involvement or scholarly research.

Additional information about College Ten academics, including Core Course requirements and other academic programs, is available here. (p. 589)

COLLEGE COMMUNITY

Founded in 2002, College Ten is the newest college at UCSC. College Ten creates an integrated living-and-learning environment through engaging academic and extracurricular programs focusing on the theme of Social Justice and Community. Students and staff collaborate to develop an array of programs exploring the many aspects of social justice. Some of the programs include faculty presentations, guest speakers, debates, films, arts events, and interactive workshops. These programs unite community members in an atmosphere of mutual respect, in which contemporary and controversial issues are discussed.

College Nights

College Nights are community programs that feature a special dinner menu, entertainment, educational displays, and activities that relate to the college theme of Social Justice and Community. College Nights provide an opportunity to gather as a community several times a year to enjoy a meal and share conversations. Planned by students and staff, past College Nights have focused on Earth Day and sustainability, music and dance from around the world, and global popular culture. College Nights are held in the Dining Commons and open to all College Ten students.

Student Government

The College Ten Student Senate serves as the student government for College Ten and represents its students to the college and campus administrations and to the Student Union Assembly (SUA), the campuswide governance board. The Senate appoints representatives to campus and college committees, provides monetary support to student

organizations, hosts community programs, and consults with college administration on policies development.

Rumi's Field

Named after a renowned peace-seeking Sufi poet, Rumi's Field offers a space for students who wish to learn, live, and interact using the skills of Nonviolent Communication and exploring social justice through the lens of nonviolence. Nonviolent Communication (NVC) strengthens one's ability to inspire empathy from others and respond compassionately even under difficult circumstances. This mixed community of College Ten first-year and continuing students offers the opportunity to engage in dialog and resolve conflict using NVC consciousness as a tool for personal and societal transformation.

Co-curricular Programs and Opportunities

Getting involved in co-curricular activities is a predictor of college success. Not only do college activities help students make friends, they foster leadership and group cooperation skills. There are many opportunities at College Ten for student involvement. These include the following groups as well as many other programs, activities, and clubs.

Practical Activism: Tools for Local and Global Change

The annual Practical Activism Conference is a daylong, student-led conference featuring keynote speakers, multiple workshops, various on- and off-campus organizations, performances, and a variety of hands-on activism activities. Students gain valuable leadership and organizing skills through developing and planning this exceptional program, which involves collaboration among faculty, staff and the local community. Visit practicalactivism.ucsc.edu for more information.

(H)ACER

The (H)ACER Program at Colleges Nine and Ten provides undergraduate students with a variety of opportunities to learn with and from the local community and produce knowledge that diversifies the voices and perspectives represented within academia. (H)ACER trains students in participatory, critical, and feminist research methodologies and creates opportunities

for students to work and conduct research in real-world contexts. In collaboration with our community partners, students engage in projects that address pressing issues such as social, economic, educational, and environmental injustice through an approach that pushes against deficit and damage-centered frameworks and honors the knowledge of community members.

Multicultural Community Weekend

This two-day retreat provides students from diverse backgrounds the opportunity to explore aspects of social justice, diversity, and community through a series of exercises and discussions (both structured and informal). Participants explore issues impacting our individual identities (e.g., race, class, gender, sexual orientation, ability, religion), increase their understanding of the complexities of communicating across diverse experiences and backgrounds, build communication skills, and share in celebrating and deconstructing the diversity of our community. Students apply for this opportunity in the fall.

Terry Freitas Café

Located at College Ten, the Terry Freitas Café is a student-run lounge with a long legacy as a favorite gathering place among students. It is open daily for social justice performances, music, and social interaction. Café student baristas serve coffee and various snacks for a small donation. The café is named after former UCSC student Terry Freitas, who dedicated his life to making the world a more socially just place.

Community Garden

The Community Garden Club meets weekly to discuss sustainability issues, integrate the themes of our colleges into the garden design and practice, and work together on soil preparation, planting, and harvesting. Members of the Garden Club learn about opportunities to work with our sister garden at Calabasas Elementary School in Watsonville.

PHYSICAL SURROUNDINGS

College Ten is situated in a redwood grove next to the Social Sciences 1 and 2 Buildings near the heart of campus. One of the campus's Instructional Computing Labs is conveniently located in Social Sciences 1. A nature preserve serves as College Ten's "backyard." College Ten students have immediate access to hiking, running, and mountain bike trails in the adjacent forest.

Residence halls offer approximately 600 single and triple bedrooms. These fully furnished residence halls include student study spaces, recreational areas, and Internet connections. In addition, there is a state-of-the-art dining hall with an adjoining game room and Freitas Café, a coffee lounge for both Colleges Nine and Ten. Colleges Ten and Nine also house approximately 400 upper-division students in apartments, with single, double, and triple bedrooms. All apartments have full kitchens, living rooms, bathrooms, and Internet connections. Ground-floor apartments have decks, and most upper apartments have private balconies.

For more information about academic or general college programs, call (831) 459-5034, email 910capc@ucsc.edu, or visit the College Ten website.

COLLEGE TEN FELLOWS AND STAFF

College Ten faculty fellows are listed on the college's faculty directory.

College Ten staff are listed on the college's staff page.

Student Life

Campus life is all about learning, discussion, and debate; meeting people from diverse backgrounds; making new and lasting friendships; attending cultural celebrations and artistic and musical performances; and getting involved with student organizations and clubs. UCSC provides a wealth of opportunity for personal growth within the context of a rich and meaningful academic experience. Students live, study, and socialize with others from their college as well as with students from the other colleges. UCSC's colleges (see The Colleges (p. 1063)) and various campus units provide a wide range of student services to respond to individual needs, interests, and levels of personal development. In addition, students can take advantage of the campus's stunning natural setting, the friendly and engaging local community, and easy access to the Monterey and San Francisco Bay areas.

Santa Cruz Community

Located on the northern tip of Monterey Bay, Santa Cruz is famous for its Mediterranean climate, forested state parks, and miles of scenic beaches. Recreational opportunities abound—hiking through redwood forests, bicycling along mountain roads, and surfing, sailing, and scuba diving. The Santa Cruz Mountains are minutes away; the majestic Sierra Nevada is a four-hour drive to the east.

The metropolitan centers of the San Francisco Bay Area are easily accessible. By car, Berkeley and San Francisco are less than two hours from campus. San José, Monterey, and Carmel are one hour away.

The city of Santa Cruz, with a population of about 60,000, was originally founded as a Spanish mission. Santa Cruz is a

small community with cosmopolitan appeal and a strong awareness of environmental and political issues.

Housing

At UC Santa Cruz, students are housed in small-scale residential communities, which provide close-knit living environments within the larger university. Each community provides an academically and socially supportive environment and offers special programs designed to help students transition to campus life, build a strong connection with the campus, and get the most out of their UCSC experience. A space in university housing is guaranteed to all new undergraduate students entering in the fall quarter who submit all forms and required fees by stated deadlines.

After accepting the UC Santa Cruz offer of admission, all undergraduate students become affiliated with one of our 10 colleges. Once affiliated with a college, all students are sent information about the housing options available, and instructions for completing the online housing application/contract process. The housing options available to you will differ depending on whether you are a freshman or a transfer student—though all students have access to campus dining facilities. Housing application periods open in mid-May for new freshmen and mid-June for new transfers entering in the fall.

College Residences

The colleges differ in academic focus, environment, location, architecture, and programs offered. However, all 10 colleges are dynamic, engaging learning communities that offer opportunities for students to help build and shape their experiences.

Freshmen are generally assigned to live in residence halls at their college, except at Kresge College, which has all apartments. Residence hall floors are typically shared by 15 to 50 students and have common bathrooms. Students can request to live in a mixed-gender (students of any gender live on the same floor or apartment, though bedrooms are single-gender) or single-gender (students of a single gender live on the same floor or apartment) area. Room assignments allowing transgender and gender-nonconforming students and their allies to live together in the same room regardless of gender or legal gender are also available by request. Apartments, typically shared by four to seven students, have common living/dining rooms, kitchens, and bathrooms, and a combination of shared and private bedrooms. Each community provides accessible housing for students with disabilities. Incoming transfer students reside at the Transfer Community, or the University Town Center, regardless of college affiliation.

A variety of theme-housing options are available for those who are interested. Based on academic pursuits, hobbies, individual backgrounds, and lifestyle preferences, these options serve to complement a student's experience in residence.

Each college's residential program is a team effort. Live-in student and professional staff members provide orientation and support services, organize activities and events, provide referral information about academic or personal concerns, and assist with roommate problems.

All students living in campus residence halls (including the transfer community) have a meal plan included in their housing contract. Meal plans are optional for apartment residents. Students with meal plans may use their student ID cards to access any of the dining halls on campus. Meal plans include Flexi Dollars (a dollar-for-dollar exchange for "food dollars" that can be used at college coffee shops, campus restaurants, and all dining halls). Additional Flexi Dollars may be added to any meal plan. More information on the colleges, including videos, can be found here and at the Housing website.

Redwood Grove

Located on the west side of campus, the Redwood Grove apartments are an extension of the transfer community at Porter College, and provide an apartment living environment for a limited number of incoming transfer students. Each apartment has private and shared bedrooms, a living room, kitchen, dining room, and bathroom. Information is available at Redwood Grove and by email at redwoodgrove@ucsc.edu.

The Village

Located in the Lower Quarry, The Village is a unique community for continuing students. Each of the 17 houses features nine single bedrooms, three bathrooms, and a kitchenette. A meal plan is optional. A manager's apartment, office, laundry facility, community kitchen, and community lounge are located on site. Information is available at The Village and by email at village@ucsc.edu.

University Town Center

The University Town Center, located at the corner of Pacific and Cathcart in downtown Santa Cruz, houses continuing and transfer students in two- and three-person studio apartments. A meal plan is optional. Information is available at UTC and by email at utc@ucsc.edu.

Family Student Housing

Family Student Housing has apartments for students and their families. Students must reside with at least one eligible family member on a permanent, full-time basis. Eligible family members include children, a spouse or adult partner, a parent, or a sibling. The apartments are unfurnished, and each has two bedrooms, a bathroom, a small study, a combined living/dining area, and a kitchen. Several apartments are accessible to people with mobility impairments. Also, see information on child care and youth programs, below. Information is available at Family Student Housing, and by email at fsh@ucsc.edu.

Camper Park

A 42-space Camper Park is located on the north side of campus and includes university-owned single-occupant recreational vehicles that are rented to students. The park includes a community building with rest rooms, showers and laundry facilities, and a lounge/study room. Information is available at Camper Park and by email at camperpark@ucsc.edu.

Graduate Student Housing

Conveniently located adjacent to "Science Hill," home to many of UCSC's main academic facilities, each apartment offers four single bedrooms, a living room, kitchen, dining room, and bathroom. Ground floor apartments have decks, while upper apartments have private balconies. Information is available at grad housing and by email at gradhsg@ucsc.edu.

Campus Housing Office

The Housing Office is responsible for the application and contract records for all single students living in campus residence halls and apartments, The Village, University Town Center, and Graduate Student Housing. Advisers are available on a drop-in basis to assist students with any questions regarding housing contract policies and procedures, housing and dining charges, payment plan options, meal plans, and more.

Location: 104 Hahn Student Services Building (8 a.m. to 5 p.m., Monday through Friday). Information is available at housing and by email at housing@ucsc.edu.

Community Rentals Office

Students interested in finding their own accommodations in the off-campus community are encouraged to use the resources available through the UCSC Community Rentals Office. Community Rentals maintains online rental listings to assist students in locating rental housing and serves as an information and advising resource.

Location: 104 Hahn Student Services (8 a.m. to 5 p.m., Monday through Friday). Information is available at community rentals and by email at communityrentals@ucsc.edu.

The Office of Physical Education, Recreation and Sports (OPERS)

Physical education classes and the recreation, sports, and fitness programs offered by OPERS provide a variety of interesting and challenging activities in which you are invited to participate. The emphasis is on opportunities to develop knowledge, skills, and habits related to wellness that last through a lifetime of enjoyable physical and recreational activity.

You can obtain further information about the programs described below from the Office of Physical Education, Recreation, and Sports located at the East Field House, (831) 459-2531. See OPERS.

Physical Education Courses

Physical Education offers students an opportunity to learn and improve skills in a variety of areas while gaining knowledge about the relationship between fitness and wellness. With these experiences, students are more equipped to make important choices leading to healthy lifestyles.

Regularly scheduled courses, which carry no academic credit but are recorded on your transcript, are available in a broad range of physical activities (see Physical Education). Many classes are small, and all offer expert instruction and welcoming environments. Students may enroll in as many courses as they desire and are permitted to repeat any course. While many of the courses are for students at the beginning level, some are designed for the more advanced student.

Subjects offered include swimming, scuba, sailing, rowing, kayaking, basketball, racquetball, tennis, volleyball, ballet, folk dance, jazz dance, modern dance, fencing, soccer, tai chi chuan, strength training, fitness and conditioning, yoga, aikido, and more. See the Physical Education website for more information.

Intramural Sports

Intramural Sports offers a wide collection of recreational and competitive activities designed to encourage participation for all eligible people to play on campus. The program prides itself on sportsmanship, inclusion, and justice.

Intramurals are structured for different skill levels and are conducted in a safe, supervised environment. You do not need to be an experienced athlete to play! Intramural Sports are open to all UC Santa Cruz students, faculty, staff, and alumni or community members with current memberships. Intramural Sports are a fun way to play, meet friends, learn new sports, test physical ability, and relieve the stress of daily routines. Most activities allow you to select the days and times you play, as well as the people on your team. See the Intramural Sports website for more information.

Sports Clubs

UCSC Sports Clubs are split into two separate categories: Competitive Sports Clubs and Recreational Sports Clubs. Competitive Sports Clubs compete against other universities in sanctioned leagues, tournaments and matches. Non-Competitive Sports Clubs either have two or less competitions per year or their focus is entirely at the recreational level. See the OPERS website for more information.

Intercollegiate Athletics

UC Santa Cruz offers the only National Collegiate Athletic Association (NCAA) Division III program in the UC system. As a Division III member, the program offers no scholarships or grants in aid that are based on athletic ability. UCSC

sponsors the following intercollegiate sports: men's and women's basketball, soccer, swimming and diving, tennis, volleyball, cross country, track, and women's golf. For information on teams, rosters, schedules, and the Slug Booster Club, see Go Slugs.

Recreation Program

The Recreation Program is designed to provide the UCSC community with an opportunity to gain skills, have fun, be challenged, and make personal connections through outdoor, recreational, and hands-on learning experiences. We offer a wide range of courses that provide opportunities for beginners as well as more experienced participants. You can expect well-organized classes, activities, and informal teaching. Be prepared to be active and involved. Courses are led by recreation instructors and UCSC student leaders. Student leaders make up the foundation of the Recreation Program, bringing experience and enthusiasm to the programs they lead.

The Equipment Rental Center offers recreational equipment including surfboards, wetsuits, and high-quality backpacking and camping gear. If you are interested in planning your own outing, contact the Recreation Program Office for assistance. The office also provides bicycle licensing and offers a free weekly drop-in bicycle maintenance program. Open recreation hours are scheduled quarterly; you are strongly encouraged to use the facilities. Sports equipment may be borrowed without charge. See the Recreation Calendar for activities offered, and see the Recreation website for more information.

Banana Slug Mascot

The Banana Slug, a bright yellow indigenous gastropod found in the campus's redwood forest, was the unofficial mascot for UCSC's coed teams beginning in the university's early years. In 1981, when some campus teams wanted more organized participation in extramural competition, UCSC joined Division III of the NCAA. Since the application required an official team name, UCSC's then-chancellor polled the student players, and out of this small group emerged a consensus for a new moniker—the sea lions. It was a choice that the chancellor considered more dignified and suitable to serious play than the Banana Slugs. But the new name did not find favor with the majority of students, who continued to root for the Slugs even after a sea lion was painted in the middle of the basketball floor. After five years of dealing with the two-mascot problem, an overwhelming pro-Slug straw vote by students in 1986 convinced the chancellor to make the lowly but beloved Banana Slug UCSC's official mascot.

Facilities

To make it convenient for you to utilize campus physical education, recreation, and sports facilities, field houses are located on the east and west sides of the campus. Both the East Field House and the West Field House offer a gymnasium, tennis courts, outdoor basketball and volleyball courts, and locker rooms. The East Field House also has the Wellness Center, which offers two floors of cardiovascular

and strength-training equipment, a dance studio, the martial arts room, handball/racquetball courts, 50-meter swimming pool, half-mile jogging path, and sports fields. An outdoor strength-training and cardiovascular-fitness court is located near the east jogging track. In addition, personal training and drop-in fitness classes are offered through FitLife. More information is available on the FitLife website.

The UCSC Community Boating Center is located on FF Dock at the Santa Cruz Small Craft Harbor. The boating program offers PE instruction as well as a boating club with boat usage for students and community members alike. Boating courses are offered for dinghies, 24'–32' keel boats, sea kayaks, and rowing shells. See boating.

Sustainable Living Center Programs

Program in Community and Agroecology (PICA), an academic program of the Environmental Studies Department, is an experiential living/learning program at UCSC. Students use agroecology principles in the maintenance of a half-acre organic garden, work together to develop community projects, and share in the many aspects of sustainable living—by harvesting, cooking, and eating healthy food grown organically right next to their rooms. Through a unique collaboration that integrates classroom instruction and community-based experience, PICA has become a model experiential learning program that allows students to practice sustainability at a hands-on level. All UCSC students are invited to come and participate in PICA activities such as sustainability workshops and garden workdays. For further information, please visit the PICA website.

On-campus living at PICA. The PICA residential program offers students an alternative to traditional on-campus living. At the Village in the Lower Quarry, students from across academic disciplines come together to create a sustainable living environment on campus. PICA residents grow organic food at the nearby Foundational Roots Garden, come together to share in weekly community meals, and manage a Village-wide composting program. This living/learning experience allows students a way to link healthy communities with healthy food systems.

Friends of CAN (FoCAN) is a UCSC student organization affiliated with the Community Agroecology Network (CAN), a nonprofit organization that works with partner communities in rural Mexico and Central America to develop self-sufficiency and sustainable farming practices. CAN promotes integrated approaches to sustainable community development as a means to sustain rural livelihoods and environments through three programs: Action Education, Trade Innovations, and Action Research Initiatives. CAN's Field Study opportunities, intercultural exchanges, research, and the annual Agroecology Shortcourse inspire action for environmental sustainability and social justice.

Field Studies. The CAN Field Study program provides college students and recent graduates the opportunity to live and learn in rural Mexico and Central America. It offers

students a realistic first step in doing international work that focuses on environmental sustainability and social justice. In developing close relationships with a rural community and working with them on a project, students come to understand the complexity and satisfaction of engaging meaningfully in international community development. CAN also offers local internship and volunteer opportunities to students interested in engaging with community projects connected to CAN's international partners in Mexico and Central America.

Together PICA and FoCAN facilitate hands-on learning activities that engage students with all aspects of a sustainable food system—from growing organic food that supports local communities to conscious consumerism on a global level.

Student-Run Cooperatives

Kresge Food Co-op

Mission statement: “We are a group of students whose goal is to run a natural food store through consensus decision-making and group responsibility. We embrace cooperation as our tool for social change. We are not for profit; we are for collective power. As a cooperative business we seek to educate all members of the community, including ourselves. We use our buying power to reflect our ideals regarding ecological, social, and political issues. For this reason we carry healthful, locally based, cruelty-free, organic products. We focus on products that are good for the earth, the people who produce them, and the people who consume them. Open to all, we provide a space where good food and revolutionary action meet at the checkout line.” See the Kresge Food Co-op website, or contact the group at kresgenaturalfoodscoop@gmail.com for more information.

Bike Co-op

The Bike Co-op is student owned and operated, run cooperatively, and nonprofit. Whether you need to purchase a bike, repair a bike, or want to learn, the co-op can accommodate your needs. People are encouraged to attend meetings, learn more about cooperatives, and get involved. The Bike Co-op is located at the Redwood Building, next to the Student Union.

Transportation and Parking Services (TAPS)

Transportation and Parking Services (TAPS) provides and manages access to the UC Santa Cruz campus, with a focus on sustainable transportation methods. By providing alternatives to bringing a car to campus, TAPS helps reduce the demand for on-campus parking, reduce greenhouse gas emissions, and mitigate the impacts of travel on the surrounding community. These efforts support the Campus Sustainability Plan, and are one of the reasons that UC Santa Cruz regularly ranks as one of the “greenest” colleges in the nation.

To support these efforts, parking for undergraduate students is either prohibited or extremely limited. Freshman and sophomore students who live on campus are not eligible to purchase parking permits. Those who are eligible to purchase permits (juniors and seniors who live on campus, as well as all commuting students) may apply for a permit; however, due to the limited number of parking spaces on campus, there is no guarantee of actually being able to purchase one. Historically, permits have sold out before the start of fall quarter, and have only been available through an appeals process for the remainder of the academic year. (Those with a documentable need for a parking permit, such as job or family responsibilities, or health-related needs, may use the appeal process to request a permit.)

Off-campus parking options are also extremely limited, and typically sold out before classes begin in fall quarter. If you will be living on campus, and are not eligible to purchase an on-campus parking permit, you should not expect to be able to park your vehicle anywhere nearby.

For additional information, visit the TAPS website.

Transportation Options

Airports and Long-Distance Bus Service: The nearest commercial airport is in San José, approximately 35 miles from Santa Cruz. The San Francisco Airport is about 70 miles from campus. Both airports are accessible by commercial van and limousine services. Santa Cruz is also served by commercial bus lines on a regularly scheduled basis.

Campus Transit: On-campus buses and paratransit services are provided on a no-fare basis; these services are supported by the mandatory Student Transit Fee. TAPS buses operate on campus from approx. 7:30 a.m. to 11:30 p.m. Monday through Friday, and from 6:00 p.m. to 11:30 p.m. on weekends. TAPS also operates a Night Owl service to transport UCSC affiliates between the campus and downtown Santa Cruz. The Night Owl operates until 2:30 a.m. on Friday and Saturday.

Metro Buses: Santa Cruz Metro Transit District is the bus service provider for Santa Cruz County. Metro operates more than 25 bus routes throughout the county, including five routes to and from UC Santa Cruz, and one route between the main UCSC campus and the Coastal Science Campus (CSC). UCSC students can ride Metro buses throughout the county by showing a student ID card with a current quarter validation sticker; no additional fare is required to ride.

Bike Program: TAPS offers a variety of programs to support those who choose bicycles as their main mode of travel, including over 3,500 bike-rack spaces, bike “fix-it” stations, quarterly bike helmet giveaways and morning bike shuttles that run from an off-campus location up to campus. Popular bike services include the Bike Library, which lends bikes for free on a quarterly basis, free weekly bike maintenance clinics, and free bike skills classes.

Car Sharing: Zipcar is a membership-based car share program that allows students 18 and over to rent cars on campus on an hourly or daily basis. Use fees start at \$5.50 per

hour and include all vehicle fees, gas, insurance, mileage, and reserved parking on campus. Members have access 24 hours per day to 24 vehicles—18 on campus and 7 at other nearby Santa Cruz locations. For detailed information, visit the campus Zipcar website.

Ridematching: Zimride is a social networking ridematching program exclusive to the UCSC community. You can find someone to share your regular commute or one-time trip through Zimride, even if you don't have a car—just post the ride you need. If you have a car, you can share your Zipcar trip with others and save on costs. For more information, see the Zimride website.

Walking: UC Santa Cruz is one of the most beautiful campuses in the world, and the best way to experience it is on foot! Walking is the single most sustainable means of getting around (and often the most direct way, as well) so be sure to bring a pair of sturdy walking shoes. A walking map of the campus is provided to all new students.

Student Health Services

Located on McLaughlin Drive across from Colleges Nine and Ten, the Student Health Center provides quality health care focused on the particular needs of students. All registered students can access the Student Health Center and can always have a consultation with a nurse. Care is provided by board-certified physicians, nurse practitioners, and physician assistants. Students can be seen by appointment or, in cases of illness or injury, on the same day at the Same Day Clinic. In case of emergencies, either during the day or after normal operating hours, please call 911.

In addition, the Student Health Center offers counseling and psychiatry services, nutritional counseling, health promotion, X-ray, laboratory, optometry, and pharmacy services on site. The center is open weekdays during the regular academic year. For summer services and hours, or for additional information, visit the Student Health Center website or email healthcenter@ucsc.edu.

Student Health Insurance

To ensure that emergencies and other health care costs do not interfere with a student's education, all University of California students are mandated by the UC Regents to carry health insurance. A comprehensive and affordable program specifically designed for students is available through the university via the University of California Student Health Insurance Plan (UC SHIP). All students are automatically enrolled in UC SHIP and billed quarterly through their student account, unless they choose to waive this coverage by providing proof of suitable insurance annually by the specified deadlines. For detailed information regarding insurance coverage and the waiver process, see Billing and Insurance Information page on the Student Health Center website. The Student Health Center only accepts UC SHIP, not any other health insurance plans.

For students who successfully waive UC SHIP, it is recommended that students and families consider adding

CruzCare, which provides access to the Student Health Center for illnesses and injuries and covers in-house laboratory tests and X-rays, for a quarterly flat fee. Fees will be assessed for most visits for students without UC SHIP or CruzCare.

Immunization and Tuberculosis Screening Requirements

UC-wide, all incoming UC students, (frosh, graduate, transfer, and returning) are **required** to obtain specific vaccines and tuberculosis (TB) screening *before coming to campus*. Compliance with this requirement will be tracked by student's submission of an online Immunization form and TB Risk screening. These forms **must be** submitted securely online at student health. Failure to complete this process will result in an enrollment hold. For more information about UCSC Student Health Services and the UC-wide immunization requirements, please visit the Student Health Center website.

Student Health Outreach and Promotion (SHOP)

SHOP is UC Santa Cruz's destination for information, conversation, and self-exploration. It's the place for students to go to learn about health and wellness in a safe, non-judgmental environment.

SHOP provides opportunities for students to explore and enhance their health and wellness as they pursue their academic goals. SHOP offers information, education, resources, and support on issues related to alcohol and other drugs, sexually transmitted infections and sexual health and other concerns relevant to college students. All UCSC students are welcome and encouraged to drop in and speak with SHOP's professional and student staff. Students can get involved with SHOP by becoming peer educators, HIV test counselors, volunteers for the Condom Co-op, and/or CUIP interns.

Alcohol and Other Drug (AOD) Education

SHOP empowers students to reduce risks related to substance use/abuse. Students can meet with staff confidentially to discuss their personal AOD involvement, discuss concerns about friends or family members, obtain educational materials, participate in workshops, and access resources for students in recovery. Educators provide formal and informal sessions and workshops for students, college residential staff, and other campus groups. For information call (831) 459-1417 or visit the SHOP website. **NOTE:** In January 2014, UC Santa Cruz implemented a campuswide smoke and tobacco-free policy.

HIV and Other Sexually Transmitted Infection (STI) Prevention

SHOP offers many resources for promoting sexual health, including:

- Free, anonymous HIV testing with Orasure (no needles) provided by student peer test counselors. Results in 20 minutes.

- The Condom Co-op, selling safer sex supplies at reduced cost.
- The Birth Control Patrol—make an appointment with a peer to choose a contraceptive option.
- Workshops, activities, and events.
- Sexual health questions? Speak to a SHOP staff person.

SHOP is located at the Student Health Center. For more information, visit the SHOP website, call (831) 459-3772, or email shop@ucsc.edu.

Campus Advocacy, Resources and Education (CARE)

Campus Advocacy, Resources and Education (CARE) provides support, advocacy, resources, and violence prevention education to the UC Santa Cruz community. We respond to the needs of students, staff, and faculty impacted by sexual assault, dating/domestic violence, and stalking by providing confidential advocacy services. CARE services are survivor-centered and trauma-informed.

To request an appointment with a confidential CARE Advocate, email care@ucsc.edu or call 831-502-CARE (2273).

CARE also works collaboratively with students, faculty, and staff to educate the campus community about the vital role that each of us has in preventing violence and creating a culture of consent and respect. We supervise a peer prevention education program for students covering topics including:

- How to support survivors
- Reporting options
- Healthy communication and relationships
- Bystander intervention skills
- Media literacy

CARE is located at Kresge 714, near the Owl's Nest Cafe. Find us online at CARE, or follow us on Facebook by searching "UCSC CARE."

Counseling and Psychological Services (CAPS)

Counseling and Psychological Services (CAPS) offers a range of professional services to undergraduate and graduate students seeking help with personal concerns. We provide assistance for students with academic and personal stress, relationship and family issues, drug and alcohol problems, psychological problems, and crisis situations. Psychiatry services include diagnostic evaluations or prescribing of medication in certain situations. Depending on a student's needs, a student may be provided with brief individual or couples counseling, group counseling, psychiatric services, crisis intervention, or a referral for open-ended or long-term

therapy off campus. CAPS also provides ADHD assessments, psychosocial groups, and online options. Information provided to any CAPS professional staff member is confidential within the student health center and cannot be released without a student's permission except in specific circumstances involving risk and safety. All services are aimed at helping students gain greater personal effectiveness and academic success. Professional staff members are available at various locations on campus, including the Student Health Services building, the colleges, and Family Student Housing. Emergency on-site crisis services and after hours crisis services are also available.

Staff members are available to provide consultation to staff, faculty, individuals, or family members for assistance in helping students in distress. Counseling psychologists can also provide trainings and programs on a variety of mental health topics, stress and coping skills, multicultural issues, and organizational development.

For more information visit the Counseling and Psychological Services website or call (831) 459-2628.

Resource Centers

African American Resource and Cultural Center (AARCC)

The African American Resource and Cultural Center (AARCC) develops and fosters co-curricular initiatives that promote academic success, leadership training, student development, and social engagement. Since the center's inception in 1991, the program's primary mission has been to serve as a key resource to acclimate students to general campus life and academic culture. In addition, the program provides advocacy and support in helping to monitor students' academic progress and subsequent achievement of their educational goals. AARCC works closely with overall campus outreach efforts to enhance the recruitment and retention of students who self-identify within the African diaspora.

AARCC works directly with numerous (student) organizations, which include, but are not limited to, National Society of Black Engineers (NSBE), African/Black Student Alliance (A/BSA), African American Theater Arts Troupe (AATAT), African Student Union (ASU), Black Sistas United, (BSU) Black Men's Alliance (BMA), Destination Higher Education (DHE), Rainbow Theatre, Rosa Parks African American Theme House (R.PAATH), Delta Sigma Theta Sorority (DST), Black And Queer Questioning (BLAQQ), Black Campus Ministries (BCM), and UMOJA.

AARCC works collaboratively with various campus units/departments and in the surrounding community to enhance cultural and ethnic diversity initiatives on the UCSC campus. AARCC is located on the third floor of the Bay Tree Building in Quarry Plaza, and is open Monday through Friday from 10 a.m. to 5 p.m. For more information, call (831) 459-3207, email aarcc@ucsc.edu, or visit the AARCC website.

American Indian Resource Center (AIRC)

The American Indian Resource Center (AIRC) works in collaboration with other resource centers, faculty, staff, students, and organizations such as the Student Alliance of North American Indians (SANAI), the University of California American Indian Counselors/Recruiters Association, the Amah Mutsun Tribal Band of California Indians, as well as the indigenous tribal community leaders of the region to develop co-curricular programming, cultural activities, and events that assist public understanding of native peoples. Invested in creating a campus climate that supports all students, the center provides leadership development, internship opportunities, mentoring, and personal and academic advising. The AIRC is located on the third floor of the Bay Tree Building in Quarry Plaza. For more information, call (831) 459-2881, email airc@ucsc.edu, or visit the AIRC website.

Asian American/Pacific Islander Resource Center (AA/PIRC)

The Asian American Pacific Islander Resource Center (AA/PIRC), established in 1999, provides and enhances opportunities for developing leadership, building a stronger sense of community on campus, and linking students to community service opportunities. AA/PIRC offers education and dialogue on issues affecting Asian American/Pacific Islanders with the goal of addressing students' multiple and diverse academic, social, cultural, and other co-curricular needs. Students can also gain leadership experience through the AA/PIRC Internship, volunteering, and/or participating in student programs.

AA/PIRC is located on the third floor of the Bay Tree Building at the Ethnic Resource Centers. Add your email address to AA/PIRC's listserv to receive campus and community announcements. For more information, call (831) 459-5349; email aapirc@ucsc.edu; or visit the AA/PIRC website.

Chicano Latino Resource Center (El Centro)

The Chicano Latino Resource Center (El Centro) is a hub of organized activities and resources that support Chicana/o/x and Latina/o/x student transition, retention, and academic advancement at the university. Through collaborative efforts with campus partners, students can participate in a host of activities that encourage intellectual growth, leadership development, preparation for graduate or professional school, and career options. El Centro encourages and supports student and community development through cultural and educational programming. Annual programs include the following: Bienvenida—New Student Welcome Program; Día de los Muertos; Pachanga; Cesar Chavez Convocation; dialogue on academic, social, cultural, and personal issues that affect the Chicanx and Latinx communities; and a weekly online newsletter; CHISME E-News. El Centro offers student internships that support leadership-skills development, while students help to organize events and activities. For more information or to schedule an appointment, call (831) 459-5806 or email elcentro@ucsc.edu, or visit El Centro.

Cantú Queer Center

The Cantú Queer Center at UC Santa Cruz provides an open, inclusive, intersectional, and welcoming space, promoting education about all genders and sexualities, and empowering self-exploration of these identities. We serve as a resource to LGBTQQIA students by providing opportunities for leadership and personal development and through programs and services that work to eliminate heterosexism, bi-phobia, and gender-identity oppression. We strive to develop an atmosphere of acceptance and well-being from which the campus community can fulfill the academic mission of the university.

Besides the Cantú Queer Center, there are two queer spaces on campus tucked within McHenry Library: the GLBTI Reading Room on the 4th Floor, and the Gloria Anzaldua Reading Room on the 3rd Floor. Both spaces have beautiful displays that will make you feel at home. You can drop by and use these rooms if they are available or reserve them for individual or group use.

The Cantú Queer Center is open Monday through Friday; usual hours are 9 a.m. to 5 p.m. You can reach the center at (831) 459-2468 or via email at queer@ucsc.edu. The Cantú Queer Center website provides an overview.

Women's Center

The Women's Center is devoted to helping students maximize their academic and personal success at UCSC. The center is a student-run resource center that creates and sponsors student-oriented programs, workshops, writing collectives, film screenings, and discussions throughout the academic year. Topics addressed include women's leadership and empowerment, gender and sexuality, race and culture, health and wellness, reproductive rights, advocacy to end sexual violence, and much more. Center staff are available as a resource for on- or off-campus referrals and informal advising.

All students are encouraged to get involved in the center's annual events, which include Sister Solidarity: Women's Heritage Month, Take Back The Night, and more. Other opportunities for involvement include volunteering and work-study paid internships. The center is the ideal space to study, take a break from classes, check out a book from the lending library, and connect with the women's community.

The Women's Center is located at the Cardiff House, an historic farmhouse near the Carriage House in the lower campus. Center hours are Monday through Friday, 9:00 a.m. to 5:00 p.m. For more information, please contact (831) 459-2072, email women@ucsc.edu, or visit the Women's Center website.

The Student Union

The Student Union is a student-governed facility where students can study, take a break and lounge, meet friends, play pool, use computers, or watch television. Located in the Quarry Plaza across from the Bay Tree Bookstore, the Student Union complements college facilities by providing a centrally

located place for social, recreational, and educational gatherings for all students and members of the campus community.

The Student Union is also home to the campuswide student governing body (Student Union Assembly) and to student organizations, the Bike Co-op, Engaging Education, and Student Organization Advising and Resources (SOAR).

The Union is open Monday through Thursday 9 a.m. to 9 p.m., Friday 9 a.m. to 6 p.m. The Union is closed holidays and quarter breaks. For more information, call (831) 459-3167.

Student Activities

Campuswide Student Activities: SOMeCA

SOMeCA brings together three dynamic areas of campuswide student engagement: Student Organization Advising and Resources (SOAR), Student Media, and Cultural Arts and Diversity. The organizations and programs of SOMeCA offer students a place of self-discovery. SOMeCA's professional and experienced staff offers mentorship, leadership training, organizational development advising, and project management to all students. Visit the SOMeCA website for more information.

Student Organization Advising and Resources (SOAR)

UCSC offers the student body over 180 student-initiated organizations including academic, cultural, environmental, political, professional, religious, service, and Greek-letter organizations. Students who are actively involved in a student organization gain valuable and transformative leadership skills ranging from conflict mediation to project planning.

Student organizations create a number of events from general body meetings to well-established major scale programming. For example, student leaders host high school students to encourage and support their entrance into college. Others produce major campuswide events to raise funds for cancer research and local community nonprofits. Performing arts organizations perform at conferences and competitions across the country. Student leaders gain real-world experience grounded in the knowledge, values, and skills necessary for navigating the global workplace and engage in dynamic civic participation.

Student organization membership is open to all UCSC students. Learn more at the Student Organization Advising and Resources (SOAR) office. Contact SOAR at (831) 459-2934, email soar@ucsc.edu, or visit the SOAR website. SOAR is located on the second floor of the Student Union.

Student Media

Student Media at UC Santa Cruz include print publications and broadcast organizations. Every year, hundreds of students enrich their educational experience through internships, academic credit, fellowships, and employment opportunities with media organizations.

The award-winning student newspaper of record, *City on a Hill Press*, covers campus and local news, sports, music, and offers art reviews and commentary. *Fish Rap Live!* provides an alternative forum for free expression of ideas, humorous coverage of local and campus events, and personal journalism. TWANAS, the Communities of Color and Native American Students Press Collective, publishes a news magazine that broadens awareness of perspectives of color in the campus community. Other campus magazines include the critical film journal, *EyeCandy*; *Leviathan Jewish Journal*; *Scientific Slug*, which blends coverage of research on campus with science-focused art and poetry; Fruitcake, which looks at life through the lens of graphics and cartoons; the philosophy journal, *Kalopsia*; and *Gaia*, which focuses on environmental issues. Annual literary journals include *Chinquapin*, *Red Wheelbarrow*, *ALAY*, and *Matchbox*.

Artistic, narrative, experimental, documentary, news, and public-service film and video are produced by broadcast organizations, including the Film Production Coalition, On the Spot, Slugworks Animation, Banana Slug Network, and others. Students from all disciplines are encouraged to participate.

To contact student media organizations, call the Student Media Center at (831) 459-2840 or SCTV at (831) 459-5360. Visit the Student Media website for links to print, radio, and broadcast organizations.

Cultural Arts and Diversity (CAD)

Cultural Arts and Diversity (CAD) strives to enhance the cultural climate of UCSC and its surrounding community by celebrating diversity. CAD fosters the spirit of unity between cultures by providing students with outlets for the creative talents of various cultures through theater, lectures, presentations, and productions. By promoting access to resources and services that support these endeavors, CAD strives to provide cultural awareness and diversity, build collaborative partnerships and community outreach, enhance retention and recruitment efforts, and provide opportunities for leadership and educational development. The Cultural Arts and Diversity Center promotes the following programs:

- African American Theater Arts Troupe
- Rainbow Theater
- Rainbow/African American Theater Arts Troupe Outreach
- Classes offered through Theater Arts and Stevenson College

Contact the CAD Office at (831) 459-1861 or visit the CAD website.

UC Santa Cruz and Systemwide Student Governance

UC Santa Cruz offers a wide variety of opportunities to participate in university governance at the college, campus, systemwide, and national levels. Regardless of what level you

choose, participating in student government provides a wonderful opportunity to practice leadership skills, meet others who share your interests, and learn a great deal about yourself and the university.

Student Union Assembly

The Student Union Assembly (SUA) is the undergraduate advocacy organization and the official student voice of UC Santa Cruz. It comprises three representatives from each college government; six elected officers (president, vice president of external affairs, vice president of internal affairs, vice president of academic affairs, and vice president of diversity and inclusion); and one appointed representative from each of the following student organizations that represent historically underrepresented people within the UC system: African/Black Student Alliance; Asian Pacific Islander Student Alliance; Queer Student Union; Movimiento Estudiantil Chicano/a de Aztlán; Student Alliance of North American Indians; and Ethnic Student Organization Council. The SUA also provides paid part-time internship opportunities for students. These internships include, but are not limited to, field organizers, treasurers, outreach and publicity, and strategy and planning.

The SUA conducts open meetings every Tuesday at 8 p.m. throughout the academic year. Students interested in advocacy, activism, and politics, as well as those concerned with their own and their friends' lives, are invited to get involved. The assembly operates via issue-specific campaigns and around general campus concerns. In the past, the SUA has formed campaigns around fighting fee hikes, defending affirmative action, saving financial aid on a national and state level, striving for reasonable campus growth, and reforming UC Regents' procedures. Current issues include fighting to make a UC education affordable, fighting to stop balancing budgets on the backs of students, fighting for the rights of UC workers, and working with community groups because UCSC students are also Santa Cruz residents. The SUA also works with the UC Student Association and the United States Student Association on systemwide, statewide, and national issues. For more information, visit the SUA website.

Systemwide Student Government: UCSA

The UC Student Association (UCSA) is the statewide association of graduate and undergraduate student governments from the 10 UC campuses. UCSA is the officially recognized voice of the students to the UC Board of Regents, various UC administrative offices, and the UC Office of the President. Issues covered by UCSA include UC fees and financial aid, comprehensive admissions policies, and academic policies, as well as broader issues of social responsibility such as environmental concerns and civil rights.

The SUA office provides grassroots membership and support for the two main UCSA offices in Oakland and Sacramento. The campus office organizes students to run the grassroots campaigns that are adopted each summer during the UCSA Congress. At this session, delegates from the 10 UC campuses come together and choose the critical issues to be worked on for the next year. Issues in the past have included voter

registration drives, letter-writing campaigns on particular UC issues, and increases in financial aid. UCSA provides a thorough introduction to UC politics and student representation. Students may also serve on systemwide committees through UCSA and gain a wide knowledge of the entire UC system through their service.

Two officers help to coordinate UCSA activities on our campus. The Student Union Assembly vice president of external affairs (VPE) is the official representative to the UCSA Board of Directors. This position has voting rights for UCSC, is the primary contact regarding all UCSA issues, and coordinates all lobbying of UCSA and local, state, and federal governments on behalf of UCSC students. The organizing director (OD) coordinates with the VPE to effectively run the grassroots campaigns that are sponsored by UCSA each year. These positions are elected for one-year terms during spring quarter every year.

The Student Union Assembly's VPE may be contacted at suavpe@ucsc.edu.

College Student Governments

Each college has its own student government, encouraging students to participate in program development and implementation, as well as determining where college membership fees should be allocated. Student governments give students a voice at the college and with the campuswide student government. Like the colleges themselves, each college governing body has its own character, structure, and meeting times and dates. For information, contact the programs coordinator at your college.

The Graduate Student Association (GSA)

The Graduate Student Association (GSA) advocates for graduate student interests with regard to tuition and fees, health insurance, transportation, housing, graduate student well-being, support for marginalized grad students, and other important issues. The GSA ensures graduate student representation on campus committees and works with the campus and UC administration to implement GSA Council goals. The GSA also works with state- and UC-wide bodies to represent the UCSC graduate community beyond our campus. The GSA awards research and travel grants to graduate students in order to provide funding for professional development, cover the cost of supplies, subscriptions, and books needed for research, and to assist with funding travel for conferences, research, and workshops. The GSA also organizes and co-sponsors events for graduate students, including international grads and grads from historically marginalized communities.

The GSA is funded by student fees and operated by an Executive Board. Representatives from departments that offer graduate degrees make up the GSA Council. The Council meets three times per quarter to strategize around and discuss issues that impact graduate students. For more information, contact the GSA website or email gsainfo@ucsc.edu.

Student Representation on Campuswide

Committees

Serving on a campus advisory committee is a recognized channel for student involvement in the university's decision-making processes. Advisory committees composed of faculty, staff, and student representatives are established to develop and recommend policies on a wide range of topics. Each year the Student Committee on Committees (composed of one student appointed by each college and chaired by the Vice President of Internal Affairs of the Student Union Assembly) nominates more than 100 students to serve on over 50 administrative and Academic Senate committees. For information about the selection process, see the Student Union Assembly website.

Community Service Opportunities

Community service is a vital part of the university's mission. It is possible for individual students, as well as campuswide student organizations, to develop service projects that link the university with the broader Santa Cruz community. With the financial support of the campus' Community Service Project funding, students have aided local groups such as Students Toward Achievement in Writing Success, the Strange Queer Youth Conference, and the Walnut Avenue Women's Center.

The Student Volunteer Center, located in the Dean of Students Office at Hahn Student Services, connects students with local volunteer opportunities based on skills and interest. Volunteer opportunities range from aiding youth and elderly to addressing homelessness and environmental issues. The Student Volunteer Center also sponsors events for the campus community where students can volunteer their time.

For more information about service opportunities, see the Student Volunteer Center website, call (831) 459-3363, or email volunteer@ucsc.edu.

Campus Cultural Programs

Throughout the year, UCSC offers frequent and varied cultural opportunities. Students, faculty, and staff may participate as audience members, performers, or behind-the-scenes support crew. The considerable range of offerings includes art exhibits, lectures, films, concerts, recitals, and dance and drama presentations. Programs vary from single performances to weeklong cultural celebrations. The colleges host a number of events, and the departments frequently engage speakers of particular academic interest to address the campus community or present lecture-demonstrations.

The Arts Division serves as a gateway to the entire university, presenting high-quality research and work by faculty, students, and guest artists. Art exhibitions, film screenings, digital arts presentations, music recitals, as well as theater, dance, and music presentations, are offered in conjunction with the academic programs. The Arts Division also offers regular public lectures and colloquia to introduce audiences to professional practitioners and scholars in the traditional and digital arts.

In addition to attending Arts Division activities, UCSC students are invited to participate in a wide variety of division

activities that are open to all UCSC students. Join an Indonesian gamelan ensemble, sing in the UCSC Concert Choir, play in the UCSC Orchestra, or audition for a theater or dance production.

For up-to-date information about cultural offerings from the Arts Division, contact the Arts Division Events Office at (831) 459-2787 and visit online at arts.ucsc.edu and on Facebook.

Bay Tree Bookstore

UCSC's Bay Tree Bookstore is located in the Quarry Plaza complex in the center of campus, at the intersection of Hagar Drive and Steinhart Way. The bookstore serves as the campus resource for UCSC course materials, including new and used course books and customized faculty publications; general reading and reference books; a wide variety of school and personal supplies (including computers and computer supplies); and many other items such as residence hall living needs, small appliances, backpacks, UCSC emblematic apparel, art supplies, posters, gifts, greeting cards, testing supplies, and academic regalia. Services include online reservations for course materials, textbook rentals, student debit accounts, special ordering of books, book buyback services, fax services, passport processing, and limited check cashing. The bookstore also houses the campus's convenience store (the Express Store), Student ID Card Services, and a self-service postal kiosk. For more information, call (831) 459-4544, or see the Bay Tree Bookstore website.

Child Care and Early Education Services

Child Care and Early Education Services offers programs for children of students currently enrolled in classes at UCSC. Our center is located on campus near the West Entrance in Family Student Housing. Free or low-cost tuition rates are available for students who meet the eligibility requirements for subsidized care (please see the Eligibility for State Funding Chart at child care). All meals are included in the program (breakfast, lunch, and afternoon snack).

Our programs are dedicated to providing the highest quality developmental care possible in a secure, homelike environment characterized by warmth, affection, and support. The classrooms stress the importance of meeting children's needs in all areas of development: social, emotional, physical, cognitive and creative. Our program emphasizes nature-based learning incorporating the beautiful UCSC campus environment, garden activities, outdoor play, all supporting a S.T.E.M. curriculum.

Programs are open to all children without regard to religion, color, ethnicity, gender, and physical or mental ability. All of our centers are located in the Family Student Housing Complex. Each center is open most days during the academic year from September through June, and closed during the summer months, administrative and university holidays, and staff development days. In addition, Early Education Services

will run a modified program during the summer months. All of the child care spaces are provided for children of student families only. The majority of the spaces are reserved for students who meet the qualifications for subsidized care. Fee-for-service spaces at a below market rate may be available for student families whose income exceeds state-subsidy requirements.

Information about programs, fees, and applications is available at child care and at the Early Education Services Office in the Community Building at Family Student Housing; at (831) 459-2967, or by email at earlyeducation@ucsc.edu.

Infant-Toddler Center

The Infant-Toddler Center serves children ages 11 to 36 months. Small groups, low child-to-adult ratios, and primary caregivers ensure consistent and nurturing care. The hours of operation are 7:30 a.m. to 5:30 p.m.

Preschool Center

The preschool classroom serves children from three years of age until they enter transitional kindergarten. The classroom provides small groups with low child-to-adult ratios, and an environment that supports a stimulating and rich curriculum that helps prepare children for kindergarten. The hours of operation are 7:30 a.m. to 5:30 p.m.

School Age Center

The School Age Program provides an after-school recreation program for children during the academic year. The program provides developmentally appropriate arts and crafts, life skills and sports activities, occasional community outings and quiet time for homework. The hours of operation are 12:30 p.m. to 5:30 p.m. for kindergarteners; and 2:30 p.m. to 5:30 p.m. on Mondays, Tuesdays, Thursdays, and Fridays for 2nd through 5th graders. On Wednesdays (public school minimum days), care is available from 12:30 p.m. to 5:30 p.m. for all school-age children. Extended care is available on a sign-up basis on some Santa Cruz City Schools closure days (university closure days excluded).

UC Santa Cruz Alumni Programs

Once a banana slug, always a banana slug! From the moment students step on campus they become part of the UC Santa Cruz community for life—transforming from students to alumni.

The UC Santa Cruz Alumni community is over 100,000 strong—a network of dynamic, innovative, successful, philanthropic, and world-changing individuals around the world. UC Santa Cruz alumni are part of the 1.7 million University of California alumni living and working around the globe as leaders and contributors in our communities, businesses, and culture. UC Santa Cruz alumni are advocates,

volunteers, supporters, friends, and ambassadors for their alma mater.

Opportunities abound for alumni to stay involved in the UC Santa Cruz community through networking, mentoring, attending events, volunteering, and engaging in philanthropic opportunities. Alumni stay connected through online alumni networks and social media. Programs like the Career Advice Network (CAN) and the annual Multicultural Career Conference create opportunities for alumni to mentor students toward success.

UC Santa Cruz Alumni programs are governed by the Alumni Council, an elected board of alumni volunteers. The Alumni Council seeks to build a robust connection between students and alumni, connect alumni where their passions are the strongest, and to strengthen the alumni network throughout the UC Santa Cruz community for personal and professional advancement. The alumni network supports students and alumni through the pivotal moments in life.

UC Santa Cruz Alumni promotes excellence through scholarships and awards. Alumni support student scholarships each year, including the Alumni Association Scholarship, College Service Award, Graduate Student Awards, and Leadership Service Awards. Alumni enrich campus and college intellectual life and recognize and celebrate notable members of the UC Santa Cruz community by presenting two annual awards each year, the Alumni Achievement Award and Outstanding Staff Award, and by publishing articles about notable alumni in UC Santa Cruz publications. For information visit the UC Santa Cruz Alumni website.

University Interfaith Council

The University Interfaith Council (UIC) seeks to integrate spirituality with academic life and to promote tolerance, peace, and understanding of all faiths and spiritual traditions. The UIC is open to all religious groups. Programs include celebrations and interfaith gatherings; educational events, including religious study courses; community service; worship/meditation; and spiritual care and counseling for students, faculty, and staff. The UIC strengthens a campuswide sense of spirituality and increases awareness of options for spiritual life on campus. For more information on University Interfaith Council events and discussion boards, visit the UIC website.

GRADUATE INFORMATION

UC Santa Cruz offers graduate study in more than 40 academic fields. Graduate programs encourage close working relationships between students and faculty to promote rapid learning and professional growth. Many graduate programs have interdisciplinary components, and students are encouraged to explore connections between fields as they acquire mastery in their areas of specialization.

There are extensive opportunities for graduate students to engage in significant independent study and research (see Resources for Learning and Research (p. 1093)). Graduate students are also encouraged to obtain teaching experience, primarily as supervised teaching assistants. They are highly valued members of the UCSC community, contributing substantially to the research and teaching conducted on the campus.

In this section:

Graduate Admission (p. 1087)

Graduate Expenses (p. 1087)

Graduate Academic Program (p. 1089)

Campus Life (p. 1090)

GRADUATE ADMISSION

APPLICATION FOR GRADUATE STUDIES

Applications for admission to UC Santa Cruz graduate programs are available online. Applications for the upcoming academic year are available starting October 1 of the prior year.

Instructions and requirements for admission to UC Santa Cruz are posted on the Graduate Admissions website. Please read all instructions thoroughly.

Deadlines vary by program and are posted online.

Please contact the program you are applying to with questions about the application. If there are any problems with the online application, please email gradadm@ucsc.edu; technical questions or issues can go to gradapphelp@ucsc.edu.

GRADUATE EXPENSES

Fees and Expenses

Tuition, fees, and other charges are subject to change without notice by the Regents of the University of California. For current fee information, check registration fees and graduate student budgets.

For information on fee refunds, see Finances (p. 1033).

Students should not plan to undertake graduate study without assured funding, since outside employment in the Santa Cruz community can be difficult to obtain.

Financial aid recipients should note that fellowship, grant, and loan checks or bank deposits in excess of university charges are refunded to students via direct deposit or check, but are not available to you until the first week of instruction each quarter.

The Student Services Fee supports student services that provide a supportive and enriching learning environment and that are complementary to, but not part of, the instructional program. Programs include, but are not limited to, services related to the physical and psychological health and well-being of students, social and cultural activities and programs, services related to campus life, and educational and career support.

Tuition helps support student financial aid and related programs; administration; libraries; operation and maintenance of plant; the university's operating budget; and all costs related to instruction, including faculty salaries.

Campus-Based Fees help support a wide range of student services, including extracurricular programs, campus child care, community and public service projects, and free-fare use of the local transit systems.

In addition, all students are assessed a mandatory Health Insurance Premium. The Cowell Student Health Center provides primary care services for the plan, while a contracted insurance company provides major medical and hospitalization insurance. Dependent coverage is also available. Detailed information is on the UCSC Student Health Insurance website, or contact (831) 459-2389.

Waivers from the mandatory insurance fee are available for students who can show that their outside plan provides coverage equal to or better than the student health insurance plan. Deadlines for applying for a waiver are listed in the Schedule of Classes and the Graduate Student Handbook.

NONRESIDENT TUITION

A resident of a state other than California or of another country must also pay nonresident tuition. See general criteria for residency (p. 1100) elsewhere in this catalog.

Non-U.S. citizens note: Regardless of how long you live in California, only U.S. citizens and holders of immigrant visas may become qualified for resident classification.

LATE FEES

Late fees may be assessed if a student fails to make university payments or enroll by the specified deadlines. Deadlines are published online in the Graduate Student Handbook and the Schedule of Classes, and they appear on the Statement of Account.

DEFERRED PAYMENT PLAN

See the information under undergraduate expenses (p. 1033).

Graduate Student Budget

Graduate Student Fees 2019-20

	One Quarter	F-W-S Quarters
Student Services Fee (formerly University Registration Fee)	\$376.00	\$1,128.00
Tuition (formerly Educational Fee)	\$3,814.00	\$11,442.00
Campus-Based Fees	\$412.70	\$1,238.10
GSHIP Health Insurance (waivable)	\$1,619.00	\$4,857.00
Total for California Residents	\$6221.70	\$18,665.10
Nonresident Supplemental Tuition (a)	\$5,034.00	\$15,102.00

Total for Nonresidents of California **\$11,255.70** **\$33,767.10**

(a) A limited number of Nonresident Tuition Fellowships are available. Please refer to the Financial Support (p. 1088) section.

For information on fee refunds, see Fees and Expenses (p. 1087).

Minimum annual expenses, including registration fees, for a single graduate student living on campus are estimated to be \$44,539.08 per academic year. Students should not plan to undertake graduate study without assured funding, since outside employment in the Santa Cruz community can be difficult to obtain. An estimated sample student budget for the 2019-20 academic year is provided below. Non-California residents should add \$15,102 in nonresident tuition and fees to the total.

Graduate Student Budget, 2018-19

Fees	\$18,665.10
Books and supplies	\$1,146.00
Room and board (on or off campus) (a)	\$21,495.00
Transportation (b)	\$1,272.00
Personal	\$2,310.00
Total	\$44,888.10

a) Estimated room and board for graduate students living with family is \$5,622.

b) Expenses of owning a car and parking on campus are not included here. For parking fees, see Transportation and Parking Services.

c) Some graduate programs are also assessed a professional fee.

Financial Support

FINANCIAL SUPPORT

The University of California, Santa Cruz, makes a strong effort to provide financial support to all graduate students who make normal progress in their program of studies. Certain kinds of support are awarded on the basis of academic merit, and others are granted on the basis of need. Students are encouraged to apply for both kinds of assistance by submitting the Free Application for Federal Student Aid (FAFSA). This form must be submitted after October 1 prior

to the academic year for which you are requesting aid. The FAFSA may be filled out online and filed electronically at the FAFSA website. Applications for student loans for each academic year will be accepted until April of that academic year. More detailed information about the application process and loans can be found at Financial Aid. Students may also visit the Financial Aid and Scholarships Office, 205 Hahn Student Services Building, or call (831) 459-2963.

FELLOWSHIPS, ASSISTANTSHIPS, GRANTS

Students who received **Cal Grant A or B** as undergraduates within the last 15 months may request a one-year extension from the California Student Aid Commission to attend a teacher credential program. Renewal of these awards requires the student to submit the FAFSA by March 2nd. In addition, the student must submit a Request for Teaching Program Benefits Form (Form G-44) to the California Student Aid Commission.

The federal **Teacher Education Assistance for College and Higher Education (TEACH) Grant Program** provides grants to students who intend to teach in a high-need field in a public/private elementary or secondary school that serves students from low-income families. The program at UCSC is for M.A. Education students. In exchange for receiving this grant, you must sign an Agreement to Serve and complete online counseling. This grant converts to a loan with retroactive interest if the Service Agreement is not fulfilled. More information and a fact sheet can be found at the Federal Student Aid TEACH Grants website.

Teaching Assistantships are offered by academic departments. Departments may decide to assign assistantships to students outside of the department. Opportunities are shared among departments and students should inquire with their graduate department adviser about applying for assistantships. Salary information is posted online by the Academic Personnel Office.

Graduate Student Researcher Internships are assigned by faculty and sponsoring campus agencies. Students should inquire with faculty about GSR opportunities. Salary scales (steps) vary by department/division. Salary information is posted online by the Academic Personnel Office.

STUDENT LOANS

Graduate students can qualify for federal student loans by completing the FAFSA. Graduate students are eligible for Unsubsidized and Graduate PLUS loan programs. For additional information, see the UCSC Financial Aid and Scholarships website.

LOAN FORGIVENESS

PROGRAMS

The federal government will forgive all or part of a student loan under certain circumstances. This can include performing volunteer work or military service, or practicing medicine in certain communities. For a summary of such exemptions, visit the Federal Student Aid website.

GRADUATE ACADEMIC PROGRAM

Degrees and Programs

UC Santa Cruz offers graduate programs leading toward the following degrees: master's of arts, master's of sciences, master's of fine arts, doctor of musical arts, and doctor of philosophy. See our full list of programs and read about each program's application requirements.

Administration

At UC Santa Cruz, individual graduate programs are directed by the academic departments. Overall policy is determined by the Graduate Council, and coordination and record keeping for matters common to all graduate students—such as admission applications, fellowships, and advancement to candidacy—are the responsibility of the Division of Graduate Studies. The dean of graduate studies is the chief administrative officer. Graduate policies and other information can be found online in the Graduate Student Handbook.

Catalog Rights

Students matriculating in a given graduate program will select the UCSC General Catalog they will follow to meet their requirements; either the catalog published the year they enter the program, or any subsequent catalog published prior to the year they are awarded the degree sought. Students who seek readmission after a break in attendance of more than two years (six regular quarters) must adhere to the graduation requirements in effect at the time of readmission or to those subsequently established for all portions of the degree requirements not already fulfilled. The readmitting program will determine which degree requirements remain to be fulfilled. A student must follow the chosen catalog in its entirety, including both the individual degree program and general university requirements. General university requirements may be found in the Graduate Student Handbook.

Evaluation of Performance

Graduate students are graded Satisfactory/Unsatisfactory (S/U), or by request A, B, C, D, F. The grades A, B, or S are awarded for satisfactory work. A grade of C, D, or U will not satisfy requirements for the graduate degree. Courses in which a graduate student receives a grade of C, D, F, or U may be repeated. Credit points will be counted once, and the most recently earned grade will determine whether a degree requirement has been met. Repeating a course more than once requires the prior written approval of the dean of graduate studies.

Graduate student performance may also be evaluated according to the Narrative Evaluation System. Evaluations may be used by academic advisers and become part of the student's official academic record. Read the FAQs for Students: Evaluations for an explanation of the narrative process.

Please also refer to the statement on Academic Integrity; Appendix F, Graduate Student–Faculty Adviser Relationship Guidelines; and Appendix O, Official University Policy on Academic Integrity for Graduate Students, published in the Student Policies and Regulations Handbook.

Duplication of Higher Degrees

It is the policy of UC Santa Cruz campus to prohibit the pursuit of duplicate advanced degrees. However, applicants may petition the graduate dean for an exception to this policy if the degree sought is in a field of study distinctly different from the field in which the original advanced degree was attained.

In order for a student who already holds the doctorate to be admitted or readmitted to work toward a second Ph.D.—or toward an academic master's degree—each of the following conditions must be met:

- The applicant must petition the graduate dean in writing prior to the application deadline for the program in question.
- The department sponsoring the program to which admission is sought must support the applicant's petition.
- The department must present the graduate dean with a clear and complete outline of the program required for the degree sought, and must explain the intellectual separateness of the proposed program from that completed by the applicant in attaining the earlier degree.
- The graduate dean will review all materials submitted and decide whether or not to admit the applicant, consulting with the Graduate Council when appropriate. Admission to a professional master's program after a Ph.D., or to an academic master's program after a professional doctorate, is not subject to these restrictions.

Transfer of Credit

UC Santa Cruz does not automatically grant credit for graduate-level work undertaken at other universities. Each department determines credit transferability on an individual basis.

CAMPUS LIFE

Diversity-Enhancement Programs

The Eugene Cota-Robles Fellowship and the Dissertation-Year Fellowship are part of the University of California's Academic Career Development Program.

The Eugene Cota-Robles Fellowship is a merit-based diversity-enhancement program that provides financial support for students from diverse backgrounds to pursue and successfully complete a graduate degree. This fellowship is awarded to entering doctoral students who have overcome significant obstacles to achieve a baccalaureate-level degree, and whose economic, educational, or social background contributes to intellectual diversity of the graduate student population. Departments identify applicants from among their pool of admissions applications. Applicants should refer to the information under Financial Support in the application to gain a better understanding of this fellowship. Fellowship recipients must be U.S. citizens or permanent residents.

The Dissertation-Year Fellowship is available to continuing students who are advanced to candidacy. Enrolled students are assisted through formal and informal group orientations, individual advice about academic matters, financial aid, postdoctoral opportunities, and the provision of information about career planning, health care, and housing.

Departments nominate applicants for this fellowship from among their qualified students. For information, see the Division of Graduate Studies website.

Student Life

The campus offers a variety of programs to enhance the quality of student life, all of which are available to graduate students. These include child care, sports and recreation, health services, cultural events, transportation services, and the UCSC Women's Center. See undergraduate Student Life (p. 1063) for information on these services and a description of the local community. See Disability Resource Center for services available to students with disabilities.

Graduate Student Association

The Graduate Student Association (GSA) is an organization of all graduate students at UCSC.

The GSA advocates for graduate student interests with regard to tuition and fees, health insurance, transportation, housing, graduate student well-being, support for marginalized grad students, and other important issues. The GSA ensures graduate student representation on campus committees and works with the campus and UC administration to implement GSA goals. The GSA also works with statewide and UC-wide bodies to represent the UCSC graduate community beyond our campus.

The GSA awards research and travel grants to graduate students and also organizes and co-sponsors events for graduate students, including international graduate students and grads from historically marginalized communities.

The GSA is funded by student fees and operated by an executive board. Graduate students elect representatives from departments which offer graduate degrees to participate on the GSA Council. The council meets three times per quarter to strategize around and discuss issues that impact graduate students. For more information, contact the GSA website or email gsainfo@ucsc.edu.

Graduate Student Commons

Located in the Quarry Plaza, the Graduate Student Commons (GSC) serves the needs and interests of graduate students at UCSC. The GSC is open 24 hours a day and is accessible by student ID card.

The Graduate Student Commons offers a wide range of professional development workshops, health and wellness, and social activities each quarter to support graduate students at UCSC. Visit the Graduate Student Commons website to learn about upcoming programming.

Housing

As at all UC campuses, finding housing may be a challenge. Students who wish to reside on campus should submit their application as soon as possible. Likewise, students who wish to live off campus should start looking at available rentals as soon as possible.

On-campus Graduate Student Housing is available for 82 graduate students. Visit the Grad Housing website, or email gradhsg@ucsc.edu.

Students with families may apply to live in Family Student Housing, a complex of two-bedroom unfurnished apartments. Refer to the Family Student Housing website, or email fsh@ucsc.edu.

To assist students in locating living accommodations in the surrounding communities, the Community Rentals Office maintains a list of available rentals.

Global Engagement

The Global Engagement Office facilitates the exchange of people, ideas, and knowledge to support and promote the internationalization of the teaching, learning, and research at UC Santa Cruz. Global Engagement oversees UCSC Study Abroad and supports international students through the International Student and Scholar Services Program (ISSS). For further information, contact the Global Engagement Office: 101 Classroom Unit Building, (831) 459-2858, email: global@ucsc.edu.

International Student Scholar Services

International Student and Scholar Services (ISSS) provides immigration advising and advocacy as well as cultural and academic programming for UCSC's growing global community. ISSS assists students, scholars, researchers, and faculty members in maintaining their legal status while in the United States, serving as UCSC's official liaison to U.S. government agencies related to immigration matters. For information, see the ISSS website.

Fulbright Grants for Graduate Study and Research Abroad

The Global Engagement Office facilitates the Fulbright annual awards competition for the Graduate Study and

Research Abroad Program for currently enrolled UCSC students.

Study Abroad

UCSC Study Abroad offers undergraduate and graduate students the opportunity to study through the University of California Education Abroad Program (UCEAP) as part of their regular UCSC academic program, with more than 400 programs in more than 40 countries. UCEAP serves students at all UC campuses. Study Abroad also assists students participating in study-abroad opportunities through UCSC directly, through other UC campuses, and through privately sponsored organizations. Study Abroad seeks to bring these programs within reach of all students.

University Library

The UC Santa Cruz University Library supports the research and learning needs of the campus community from two locations: McHenry Library at the center of campus, and the Science and Engineering Library on “Science Hill.” The Library is a second home for many students, providing space for individual quiet study as well as reservable group study spaces. Each library’s Information Commons offers computer workstations, scanners, and printers as well as circulating laptop and Chromebook computers. McHenry Library hosts the Global Village Café, a perfect place to recharge during marathon study sessions.

The University Library provides access to a wide variety of scholarly resources. Access to eBooks, eJournals, and streaming media is available on campus and off, the latter via the campus’s Virtual Private Network. While the majority of the Library’s print materials are housed in open stacks and accessible to all faculty, students, and staff, the campus community also has access to millions of other books and journals through shared licensing and the Interlibrary Loan service.

The Reserves service lends copies of assigned class readings and media on a short-term basis so that all students can access the course materials they need to succeed.

Special Collections acquires and manages rare book and primary source collections that are accessible to students, faculty, and the general public. Holdings include a significant book collection including an unusually large number of artists’ books, fine press, and early printing, as well as over 500 archival collections, with particular strengths in 20th century photography, literature, art, music, and astronomy.

The David Kirk Digital Scholarship Commons (DSC) at McHenry Library provides access to new work spaces and high-end computer software. The DSC invites all members of the UCSC community to build digital and web-based projects, collaborate on research, and experiment with innovative tools and methods.

Other important collections and services include:

- The Digital Collections website contains a growing treasury of digitized photographs, maps, artwork, oral history transcripts, and sound recordings, as well as “born digital” materials, focusing on the most rare and unique collections.
- The Video Game Lab at the Science and Engineering Library provides access to more than 2,000 games and 30 gaming consoles as well as books to support game design and studies.
- The Ask-A-Librarian service provides expert in-person and online research assistance.

For more information, see the University Library website.

Natural Reserve System (NRS)

The University of California administers 39 natural reserves throughout the state. UC Santa Cruz has responsibility for four—the Landels-Hill Big Creek Reserve, Fort Ord Natural Reserve, Año Nuevo Island, and Younger Lagoon Natural Reserve—in addition to UCSC’s own Campus Natural Reserve. The purpose of the NRS is to establish and maintain, for teaching and research, a system of natural areas that encompass diverse and undisturbed examples of California’s terrain, both aquatic and terrestrial. The reserves are open to all qualified individuals and institutions for scholarly work concerned with the natural environment. Such work usually deals with ecological topics or experimental studies in a natural setting.

At UCSC, the reserves play an important role in supporting experiential learning (course support, internships, and research support) for undergraduate students interested in the ecological, physical, and environmental sciences. The close proximity of two of the reserves (Campus Reserve and Younger Lagoon) makes it possible for faculty and students to walk out the classroom door and into a living laboratory and outdoor classroom. These two reserves serve over 3,500 students, dozens of courses across multiple disciplines, and 150 undergraduate internships each year.

Information about the reserves is available at the UC Santa Cruz Natural Reserves website. Information about the UC system's NRS holdings and management is available at the University of California Natural Reserve System website. You may also contact the UCSC Natural Reserve director, c/o Environmental Studies Department, 467 Natural Sciences 2 Building, at (831) 459-4867, or by email at ghdayton@ucsc.edu.

Computing Facilities and Technology Services

INFORMATION TECHNOLOGY SERVICES (ITS)

Information Technology Services (ITS) at UCSC provides a broad spectrum of IT-related resources, services, and support to students, faculty, and staff in the areas of computing, network, telephones, media services, information systems security, web, email, and instructional technology.

ITS operates the campus network, which interconnects computers, workstations, instructional computing labs, and computer-equipped classrooms with each other and the Internet. In addition, wireless access is available across campus. ITS also provides the campus with technical services and computer support through the ITS Support Center.

PURCHASING A COMPUTER?

If you are planning on buying a new computer, UCSC recommends purchasing a laptop with both wired and wireless network capability. The campus supports both PC and Mac computers. An excellent source for purchasing computers and computer products is the campus Bay Tree Bookstore, (831) 459-2082. Through university-negotiated contracts, pricing is almost always below outside market prices.

UCSC ACCOUNT (CRUZID) AND EMAIL

All students, faculty, and staff have a UCSC account called CruzID and a UCSC email account powered by Google. Your CruzID is part of your email address, e.g., cruzid@ucsc.edu. All official UC and UCSC communication is emailed to the @ucsc.edu address. In addition to email, CruzID gives

individuals access to many campus systems and applications. More information is available at UCSC Email Services.

RESIDENTIAL NETWORK

ITS provides in-room Internet access (called ResNet) to students living on campus. Network services are available to undergraduate and graduate students living in university housing (except for the Camper Park). For assistance with network connections, contact ResNet at resnet@ucsc.edu or call (831) 459-HELP (4357).

COMPUTING LABS FOR DROP-IN USE AND ACADEMIC CLASSES

ITS manages 12 computer labs throughout the campus. These labs have more than 300 computers available for students to use that include PC, Mac, and Sun workstations. Wireless access is available in all labs. More extensive lab information, including hardware and software specifications and hours of operation, is available at the Computer Labs page.

ACADEMIC COURSE MATERIALS ON THE WEB

Canvas is the campus online course-management system used to create sophisticated web-based course materials to supplement, but not replace, classroom instruction. Canvas uses a web browser as the interface for the course.

Faculty using Canvas can incorporate a wide variety of tools in their course site, such as a course calendar, student conferencing system, electronic mail, group projects with student-created web pages, and quizzes. Outside of class time, students can use Canvas to view course materials, participate in web-based class discussions, collaborate on student group projects, and take quizzes.

DISABILITY ACCOMMODATIONS FOR INSTRUCTION

UCSC computing labs have common adaptive technologies—such as enlarged type for students with low vision and Dvorak keyboards for students with repetitive strain injuries. If you have a disability and require adaptive or assistive technology to use lab computers, library facilities, or other campus

services, please contact the Disability Resource Center (DRC) so that they can coordinate services for you. You can also reach the DRC at (831) 459-2089 (voice), or (831) 459-4806 (TTY).

ITS SUPPORT CENTER FOR TECHNICAL AND COMPUTER HELP

The ITS Support Center is open to all students, staff, and faculty and provides general computer help, assistance with CruzID accounts and email, and other technical-support needs. The Support Center is located at 54 Kerr Hall and is open Monday through Friday from 8 a.m. to 5 p.m.

COMPUTING POLICIES

Individuals using UCSC computing services must comply with the University of California, state, and federal policies and laws. These policies define how ITS will approach security, how faculty, staff, and students are to approach security, and how certain situations will be handled.

Baskin School of Engineering (BSOE)

The Baskin School of Engineering is known for rigorous engineering research with a focus on engineering for social good. From data science, to life and health and cyber-physical systems, BSOE is shaped around the opportunities and challenges of the 21st century. Much of our research takes place in collaborative interdisciplinary centers and institutes,

outfitted with modern equipment and instrumentation, and providing opportunities for graduate and undergraduate students to work side by side with world-class engineering faculty.

Facilities and resources include class 100 clean rooms, nanofabrication equipment, modern microscopy facilities, ultrafast optics and single particle spectroscopy labs, an immersive virtual reality CAVE lab, modern gaming equipment, and one of the most advanced stem cell research facilities in the western United States.

Humanities Division

RESEARCH PROGRAMS

The Humanities Institute at UC Santa Cruz is a hub for academic research, cross-discipline collaboration, and public engagement. We incubate ideas and foster innovation by funding projects, centers, and research clusters that enable faculty and students to work on some of the biggest problems of our day.

The Institute is a source, resource, and force for humanities-based inquiry and engagement with world events. We're passionate about expanding the field of humanities scholarship with digital tools and an interdisciplinary focus. And we believe strongly that the core subjects of the humanities—philosophy, history, language and literature—should be accessible to everyone. That's why we're committed to engaging with the broadest community possible—from first-generation undergraduate students, to

local residents, to anyone interested in compelling ideas and making sense of this increasingly complex world.

As part of the University of California system, the Institute is able to leverage the resources of the finest public university system in the world. Part of what makes the UC system of universities great—and what makes us different from so many universities around the globe—is the central role of the humanities in our educational experience, not only in the curriculum, but also in the vibrant intellectual life of our campuses. Here at UC Santa Cruz, we possess an especially rich tradition of innovation, creativity, and collaboration in the humanities.

Centers include:

Center for Cultural Studies

Center for Jewish Studies

Center for Public Philosophy

Center for the Study of Pacific War Memories

Center for World History

Dickens Project

Digital Humanities Initiative

Gail Project

Language of Conservation Project

Linguistics Research Center

Morton Marcus Poetry Reading

Nido de Lenguas

Shakespeare Workshop

Sikh and Punjabi Studies

Undergraduate students in the humanities actively participate in the work and the activities of the centers and projects above. In addition, The Humanities Institute gives out 10 research fellowships annually to undergraduate students working on humanities projects. The students' work is showcased at the annual divisional award ceremony in the spring quarter.

UNIVERSITY ADMINISTRATION

The Regents of the University of California
 University of California Organization Chart
 UC Santa Cruz Administration

CALIFORNIA RESIDENCE AND NONRESIDENT SUPPLEMENTAL TUITION

RESIDENCY INFORMATION FOR TUITION PURPOSES

The Residence Policy and Guidelines is the main source of residency information and is utilized by the campus residence deputy to make determinations regarding residency. Read the full text of the Residency Policy and Guidelines.

If you do not meet the University of California requirements for residence for tuition purposes on the residence determination date for each term in which you propose to attend the university, you must pay a Nonresident Supplemental Tuition in addition to all other fees. The residence determination date is the day instruction begins at the last of the University of California campuses to open for the quarter.

STATEMENT OF

LEGAL RESIDENCE

New undergraduate and graduate students and returning students with an absence of two or more terms must submit a Statement of Legal Residence (SLR). This form is used to determine the fees that will be assessed. Students who do not submit the SLR will be classified as a Nonresident and will be assessed the Nonresident Supplemental Tuition.

PETITIONING FOR CHANGE OF CLASSIFICATION

Continuing students must submit a Petition for Change of Legal Residence Status to the residency deputy by the filing deadline. Late petitions will not be accepted.

TIME LIMITATION ON PROVIDING DOCUMENTATION

If additional documentation is required for residence classification but is not readily accessible, you will have until the third week of instruction of the applicable term to provide it. Failure to meet this deadline will result in your file being closed and your status remaining as a nonresident.

INCORRECT CLASSIFICATION

If you are incorrectly classified as a resident, your classification will be corrected and you will be required to pay all nonresident tuition not paid. If you concealed information or furnished false information and were classified incorrectly as a result, you are also subject to university discipline. Resident students who become nonresidents must immediately notify the campus residence deputy.

INQUIRIES AND APPEALS

Inquiries

All inquiries regarding residence requirements, determination, and/or recognized exceptions should be directed to the Residence Deputy, Office of the Registrar, 190 Hahn Student Services Building, University of California, Santa Cruz, 1156 High Street, Santa Cruz, CA 95064-1077, reg-

residency@ucsc.edu, or to the Residence Analyst, University of California Office of the General Counsel, 1111 Franklin Street, 8th Floor, Oakland, CA 94607-5200, or email residency.appeal@ucop.edu.

Appeals

Students denied resident status might have the right to appeal. Appeals must be filed within 30 days of notification of the campus residence deputy's decision.

Instructions and Application to Appeal a Nonresident Classification

RESIDENCY DISCLAIMER

This is only a summary of the UC Residence Regulations and is not a complete explanation of the law regarding residence classification. Changes may be made to the residence requirements between the publication date of this statement and the relevant residence determination date. Any student, following a final decision on residence classification by the residence deputy, may appeal in writing to the residence specialist within 30 days of notification of the residence deputy's final decision.

No other University of California personnel are authorized to provide information regarding residence requirements.

PRIVACY NOTICE

All of the information requested on the Statement of Legal Residence form is required [established by Regents Policy 3105 as set forth in the UC Residence Policy and Guidelines] for determining whether or not you are a legal resident for tuition purposes. You have the right to inspect university records containing the residence information requested on this form. The records are maintained by the Office of the Registrar, 190 Hahn Student Services Building, University of California, Santa Cruz, 1156 High Street, Santa Cruz, CA 95064-1077.

POLICIES

UC Santa Cruz Police Department

UC Santa Cruz Police Department officers are duly sworn peace officers under section 830.2(b) of the California Penal Code. The officers are armed and possess the same authority and responsibility, by law, as those in municipal police departments. Officers patrol the campus 24 hours a day, 365

days a year, on foot, bicycle, motorcycle, or by car. They enforce the law, arrest violators, investigate and suppress crime, investigate traffic and bicycle accidents, and provide a full range of services to the community. For more information about the UC Santa Cruz Police Department, please visit police.ucsc.edu.

Reporting Procedures

It is important that all crimes, emergencies, and/or suspicious, disturbing, or threatening behaviors occurring on campus be immediately reported to the Police Department to ensure that appropriate action can be taken. Emergencies requiring police, fire, or medical aid can be reported in person or by dialing 911 from any campus phone, cell phone, or landline phone. Emergencies can also be reported by using one of the "Blue Light" emergency phones or elevator phones located throughout the campus. If there is a fire and no telephone is available, activate one of the fire alarm manual pull stations located throughout campus buildings.

Individuals may also report in person at the UC Santa Cruz Police Department located at the base of the campus near the main entrance. Activities or incidents occurring outside of the UC Santa Cruz jurisdiction should be reported immediately to the agency having jurisdiction where the property is located.

Phone Numbers To Call

- **9-1-1 for any emergency situation with serious threat to life or property.**
- **(831) 459-2345.** If unable to dial 9-1-1 from the phone being used for any emergency situation with serious threat to life or property.
- **(831) 459-4980:** Telecommunications Device for the Deaf, 24 hours.
- **(831) 459-2231:** Ext 1. Non-emergency calls for assistance.
- **(831) 459-2100:** Community Safety Program Dispatch Line, 7 p.m. to 3 a.m. nightly.
- **(831) 459-3TIP or (831) 459-3847:** Anonymous Tip Line.

Lost and Found

The UC Santa Cruz Police Department provides a lost and found service. Only items valued at approximately \$300 or more are accepted, and are kept for 90 days. Exceptions are made for found wallets, cash, driver licenses or identification cards, bank cards, and keys. To drop off a found item or to inquire about a lost item, please visit the Police Department or call (831) 459-2231.

Parking Enforcement

Parking Enforcement is a unit within the Police Department, and parking citations are processed by their Records and Citations office. Citations may be paid or contested online at Paymycite.com 24 hours a day, or in person during business hours.

Community Safety Program

Community Safety Officers (CSOs) work in conjunction with the UC Santa Cruz Police, Santa Cruz City Fire, and the administration of university residential communities (both on- and off-campus) to ensure a safe and secure living environment for all residents.

CSOs work in teams and are trained to assist police and fire departments with emergency response, first aid, CPR, and disaster response, across campus and in all residential communities. They carry radios linked to the UC Santa Cruz Police Dispatch Center and are visible in the communities at night from 7 p.m. to 3 a.m. CSOs may be contacted through the UC Santa Cruz Police Dispatch Center at (831) 459-2100.

Jeanne Clery Disclosure of Campus Security and Campus Crime Statistics Act

Choosing a postsecondary institution is a major decision for students and their families. Along with academic, financial and geographic considerations, the issue of campus safety is a vital concern. In 1990, Congress enacted the Crime Awareness and Campus Security Act of 1990, which amended the Higher Education Act of 1965 (HEA). This act required all postsecondary institutions participating in HEA's Title IV student financial assistance programs to disclose campus crime statistics and security information. The act was amended in 1992, 1998, and 2000. The 1998 amendments renamed the law the Jeanne Clery Disclosure of Campus Security Policy and Campus Crime Statistics Act in memory of a student who was slain in her dorm room in 1986. It is generally referred to as the Clery Act. More information about the Clery Act can be found at: Clery.Center.

Campus Security Authorities

Although UC Santa Cruz has a police department, victims of crime may be more inclined to report to someone other than the police. For this reason the Clery Act requires all institutions to collect crime reports from a variety of individuals and organizations that the Clery Act refers to as Campus Security Authorities (CSA). A CSA is an official of the university who has significant responsibility for student and campus activities. They are usually found in departments responsible for, but not limited to, student and campus activities, the police department, community safety programs, student conduct/judicial affairs, housing, athletics, or human

resources. This designation also includes any other individual who has been specified by UC Santa Cruz to receive reports of offenses.

CSAs are responsible for immediately reporting crimes and incidents that occur on the UC Santa Cruz campus or affiliated property to the UC Santa Cruz Police Department. More information about CSA responsibility is located at UCSC's Jeanne Clery Campus Security Act webpage.

Annual Campus Security and Fire Safety Report

On October 1 of each year, an email notification is sent to all enrolled students and to academic and staff personnel, providing the website to access the **Campus Security and Fire Safety Report**. This report includes statistics for the previous three years concerning reported crimes that occurred on campus; in certain off-campus buildings or property owned or controlled by UC Santa Cruz; and on public property within, or immediately adjacent to and accessible from, the campus.

The report also includes information on fire protection systems, fire prevention policies, as well as institutional policies concerning other safety and security matters. You can obtain a copy of this report by contacting the UC Santa Cruz Police Department, 1156 High Street, Santa Cruz, CA 95064, (831) 459-2231, or at the Police Department website.

The UC Santa Cruz Police Department submits the annual crime and fire statistics published in this report to the Department of Education. The statistical information gathered by the Department of Education is available to the public through the Department of Education website.

Consequences for Non-Compliance with the Clery Act

Possible consequences for an institution's non-compliance with the Clery Act include:

- A suspension or limiting of the institutions Title IV funding;
- The Department of Education may issue a civil fine up to \$35,000 per violation;
- The institution may suffer reputational loss due to negative media attention;
- Failure to comply with the Clery Act can be used in various litigation matters.

Increased Safety Measures and Safeguards

Pursuant to California Education Code section 67380, each UC campus is required to provide information regarding special safeguards that have been established for particular facilities or activities in the preceding 18 months to increase safety, and any changes in safety precautions expected to be made during the future 24 months.

The following programs or safeguards have been or will be instituted:

- Increased Police Student Ambassador Patrols and Safe Rides App
- Increased safety education and training, including Community Response to Workplace Violence and Active Shooter Incidents.
- Environmental Health and Safety safeguards and improvements
- Increased VHF radio and WiFi coverage on the campus
- Implementation of new tools for navigating the campus

Increased Police Student Ambassador Patrols

The UC Santa Cruz Police Student Ambassador program provides walking and vehicular crime prevention patrols at the Coastal Biology Campus (Long Marine Lab) and at McHenry Library. These patrols have assisted in enforcement of the campus smoking policy, non-research animal policy, and with other efforts to deter criminal activity in these locations. They also provide security at events and locations on the campus upon request. For more information, send an email to police@ucsc.edu.

Night Safety Escort Service—Safe Ride App

The UC Santa Cruz Police Department offers members of the community the ability to request a "Safe Ride" (free transportation from one location on campus to another) using their smart phones. Police Student Ambassadors, who manage the Night Safety Escort Program, provide the "Safe Ride" from 7:00 p.m. to 12:15 a.m., Monday through Thursday when classes are in session (except Summer Session).

Individuals may request a ride by downloading the TapRide application on their mobile device, and select University of California, Santa Cruz, Safe Ride program. They will be prompted to use their UC Santa Cruz credentials to log in and request a ride. Individuals may also request a ride during these hours by calling the dispatch center at (831) 459-2100. **There may be exceptions for holidays and finals week.**

This program is not intended to replace existing transportation services such as the Metro Bus and Campus Shuttles or to discourage individuals from walking in groups, but is intended to provide a safe and reliable means of transit from one location to another on the campus. The Night Safety Escort Program cannot provide escort services to or from off-campus locations.

Intoxicated and/or disorderly students will not be transported, nor is food or alcohol allowed in the shuttle. The Police Student Ambassadors reserve the right to refuse transport. Additionally, the Police Student Ambassadors may provide walking escorts in lieu of using a vehicle.

Tools for Navigating the UC Santa Cruz Campus

The Wayfinding Workgroup seeks to improve the tools available for navigating the campus. Over the past 18 months, it has worked on improving temporary signage, recommended improvements to the campus entrance, and developed a pilot project in the Science Hill area. Over the next two years, the group's tasks include writing a campus policy on signage and developing outreach to inform campus constituents about the best ways to direct people to specific locations.

The campus is also in the process of developing a Master Pedestrian Plan to promote walking as the most sustainable way to traverse the campus. The final plan will include an assessment of existing conditions, including gaps in the pedestrian infrastructure, and a plan to create a more pedestrian-friendly campus.

In a parallel effort, Transportation and Parking Services (TAPS) is revising the information posted at each transit stop, including an overall map of the campus, and an enlarged map of the half-mile radius surrounding each stop. TAPS has also launched a bus tracking system app (developed in conjunction with the campus Computer Science Department) that allows riders to see each active campus shuttle in real time on a campus map.

Drug-Free Schools and Communities Act

In compliance with the federal Drug-Free Schools and Communities Act, UC Santa Cruz annually notifies students, faculty, and staff of policies, procedures, and potential consequences related to unlawful possession, use, or distribution of drugs and alcohol on campus. This notice is distributed to students through the colleges and the Graduate Studies Division, and to faculty and staff via email. The university also conducts a biannual review of programs related to drugs and alcohol to determine effectiveness, implement changes, and ensure that disciplinary sanctions are consistently enforced. This review is coordinated by the Dean of Students Office. For information, email deanofstudents@ucsc.edu.

Smoking on Campus Policy

The University of California is smoke and tobacco-free at all campus locations. The use of marijuana is prohibited under federal regulations. Use of all forms of tobacco, including smokeless tobacco products and unregulated nicotine products (e.g. "e-cigarettes"), is strictly prohibited within the boundaries of university-controlled properties, including parking lots. Assistance to students, faculty, and staff to overcome addiction to tobacco, nicotine, or marijuana products is also available through the UC health and benefits plans, Faculty/Staff Wellness Programs, Student Health Center, Faculty Staff Assistance Programs (FSAP), and Counseling Center. For more detailed information about the policy, help quitting, and other resources, see the UCSC Smoke and Tobacco-Free website.

Graduate Student–Faculty Adviser Relationship Guidelines

The University of California, Santa Cruz, expects professional, fair, and frequent communication between graduate students and their advisers. Open communication and mutual respect should be the foundation of the relationship between a graduate student and faculty adviser. The graduate adviser and the graduate student should discuss their student-adviser relationship early, and clearly communicate mutual and agreeable expectations from the beginning. Regular interactions, especially face-to-face meetings, are essential in ensuring that expectations and goals are met.

In an optimal learning environment, the faculty adviser should provide timely and constructive feedback on performance and expectations; timely and sufficient warning of inadequate performance; appropriate recognition of a student's intellectual contributions; and academic and professional advice on all stages of the graduate career. The graduate student should be an active participant in seeking advice and getting feedback on progress, keeping the faculty adviser informed of plans, progress, and obstacles, and contributing during regular progress assessments. The faculty adviser and the student each have the duty and responsibility to initiate meetings as necessary to foster and protect the success of the relationship.

Professionalism and fairness should guide the graduate student–faculty adviser relationship. Graduate students and faculty should avoid relationships that conflict with their particular roles and responsibilities. Faculty advisers and

graduate students are bound by policies that prohibit discrimination and harassment. Graduate students may be entitled to accommodations under the Americans with Disabilities Act. (See Appendix E: Policies and Regulations and Nondiscrimination and Affirmative Action Policies (p. 1105).) When concerns and conflicts arise, they should be raised and attended to professionally, honestly, and promptly. Retaliation and discrimination against students for raising concerns are prohibited.

If something happens that upsets the faculty adviser–graduate student relationship and cannot be resolved either by direct or indirect discussion, a graduate student can seek assistance from a trusted faculty member, the dean of graduate studies, the graduate director, the department chair, conflict resolution, counseling and psychological services, and/or the Title IX Office. Graduate students may request confidentiality. Many departments have developed processes to address a range of potential concerns. For information about grievance and appeal procedures, see Appendix E: Policies and Regulations and Nondiscrimination and Affirmative Action Policies (p. 1105). For a description of additional informal and formal grievance and appeal processes available to UCSC graduate students, please refer to the Graduate Student Handbook.

Student Conduct and Community Standards

A comprehensive list of student policies and codes of conduct is available online: Student Policies and Regulations Handbook. The Student Policies and Regulations Handbook is also available in alternate formats from the Conduct and Community Standards Office.

The Student Conduct and Community Standards Office is responsible for the adjudication of all nonacademic student and student organization misconduct for UCSC. In this capacity, Student Conduct and Community Standards administers the Code of Student Conduct in accordance with Section 100.00 of the Student Policies and Regulations Handbook. Allegations of misconduct may be brought by students, faculty, staff, police, visitors to the campus, and members of the local community. Allegations may be made by submitting a report at the Conduct and Community Standards webpage.

The Student Conduct and Community Standards Office is located in 245 Hahn Student Services and can be reached by phone at (831) 459-1738, by fax at 459-3188, or via email at conduct@ucsc.edu.

Sexual harassment and sexual violence/Title IX (p. 1106)

Student-Related Matters

The University of California, in accordance with applicable federal and state law and university policy, does not discriminate on the basis of race, color, national origin, religion, sex, gender, gender identity, gender expression, pregnancy*, physical, mental health or cognitive disability, medical condition (cancer-related or genetic characteristics), genetic information, ancestry, marital status, age, sexual orientation, citizenship, or service in the uniformed services. The university also prohibits sexual harassment.

This nondiscrimination policy covers admission, access, and treatment in university programs and activities.

Inquiries regarding the university's student-related nondiscrimination policies may be directed to Conduct and Community Standards, (831) 459-1738, or email conduct@ucsc.edu.

Inquiries regarding the university's affirmative action, equal employment opportunity, and nondiscrimination policies as they relate to student employment may be directed to Sonjé Dayries, JD at the Office for Diversity, Equity, and Inclusion: 831-459-2686 or email or email sdaryries@ucsc.edu.

Inquiries regarding the UC Policy on Sexual Violence and Sexual Harassment and UC Santa Cruz Procedures for Reporting and Responding to Reports of Sexual Violence and Sexual Harassment and/or any other violations of Title IX (sex/gender discrimination; harassment or discrimination based on sexual orientation, gender identity, gender expression, or pregnancy) may be directed to Title IX Officer Isabel Dees, (831) 459-2462, or email idees@ucsc.edu.

Student inquiries regarding disability or disability accommodations may be addressed to the Disability Resource Center, (831) 459-2089; or email drc@ucsc.edu.

Students with disabilities who are unable to resolve accommodation or discrimination concerns may contact the campus ADA compliance officer by phone, (831) 459-2295, or email wkidder@ucsc.edu.

*Pregnancy includes pregnancy, childbirth, and medical conditions related to pregnancy or childbirth.

Employment-Related Matters

The University of California is committed to providing a workplace free of discrimination and harassment. The university prohibits discrimination against any person employed; seeking employment; or applying for or engaged in a paid or unpaid internship or training program leading to

employment with the University of California. In addition, the university prohibits harassment of an employee, applicant, paid or unpaid intern, volunteer, person participating in a program leading to employment, or person providing services pursuant to a contract. The university undertakes affirmative action, consistent with its obligations as a federal contractor. The University of California is an Equal Opportunity/Affirmative Action Employer. All qualified applicants will receive consideration for employment without regard to race, color, religion, sex, national origin, disability, age or protected veteran status.

The university prohibits discrimination against any person employed; seeking employment; or applying for or engaged in a paid or unpaid internship or training program leading to employment with the University of California on the basis of race, color, national origin, religion, sex, gender, gender expression, gender identity, gender transition status, pregnancy¹, physical, mental health or cognitive disability, medical condition (cancer-related or genetic characteristics), genetic information (including family medical history), ancestry, marital status, age, sexual orientation, citizenship, or service in the uniformed services², including protected veterans. This policy applies to all employment practices, including recruitment, selection, promotion, transfer, merit increase, salary, training and development, demotion, and separation.

In addition, the university prohibits harassment based on the above protected characteristics of an employee, applicant, paid or unpaid intern, volunteer, person participating in a program leading to employment, or person providing services pursuant to a contract.

If the harassment is sexual in nature, the university's Sexual Violence and Sexual Harassment (SVSH) policy will apply. Local SVSH resource information can be found at the UC Sexual Violence Prevention and Response website.

University policy prohibits retaliation for bringing a complaint of discrimination or harassment pursuant to this policy against any person employed; seeking employment; providing services pursuant to a contract; or applying for or engaged in a paid or unpaid internship, volunteer capacity, or training program leading to employment with the University of California. This policy also prohibits retaliation against a person who assists someone with a complaint of discrimination or harassment, or participates in any manner in an investigation or resolution of a complaint of discrimination or harassment. Retaliation includes threats, intimidation, reprisals, and/or adverse actions related to employment.

While absolute confidentiality cannot be promised, those hearing and investigating discrimination and harassment complaints apply a strict business need-to-know standard when sharing or disclosing information as needed to conduct an investigation, to work toward a resolution, and as university policy, campus policy, and state or federal law dictate. We ask that all involved parties maintain an appropriate level of confidentiality.

UC Santa Cruz maintains comprehensive complaint processes to address discrimination and harassment concerns to ensure

that appropriate confidentiality is maintained; that reporters and responding parties receive timely responses; that investigations are conducted in a timely fashion by impartial, qualified personnel; systems are in place for documenting and tracking progress; and that appropriate remedial actions and resolutions are offered.

University policy is intended to be consistent with the provisions of applicable state and federal laws.

Inquiries regarding the university's affirmative action, equal employment opportunity, and harassment and nondiscrimination policies for academic, staff and student employment may be directed to Sonjé Dayries, JD at the Office for Diversity, Equity, and Inclusion, 831-459-2686 or email sdayries@ucsc.edu.

NOTES:

1. **Pregnancy** includes pregnancy, childbirth, and medical conditions related to pregnancy or childbirth.
2. **Service in the uniformed services** includes membership, application for membership, performance of service, application for service, or obligation for service in the uniformed services.

Sexual Harassment and Sexual Violence Title IX

The University of California cherishes the free and open exchange of ideas and expansion of knowledge. Maintaining this freedom and openness requires objectivity, mutual trust, and confidence; it requires the absence of coercion, intimidation, or exploitation. The principal responsibility for maintaining these conditions must rest upon those members of the university community who exercise the greatest authority and leadership: faculty, managers, and supervisors.

The university has therefore instituted a number of measures designed to protect the campus community from sexual harassment and sexual violence. Students, faculty, and staff who would like information or a consultation about gender-based discrimination, sexual harassment, or sexual violence; would like to understand resources and reporting options; would like to file a formal complaint; would like to request a training session; and/or would like copies of the UC Policy on Sexual Violence and Sexual Harassment and/or the UC Santa Cruz Procedures for Reporting and Responding to Reports of Sexual Violence and Sexual Harassment may consult the Title IX Office website or contact Isabel Dees, Title IX Officer, at (831) 459-2462, or via email at idees@ucsc.edu. Individuals seeking additional resources and information regarding rights and reporting options for those impacted by sexual harassment and sexual violence may also consult the CARE website.
