

2019-20 UCSC General Catalog

WELCOME TO UC SANTA CRUZ

Welcome to UC Santa Cruz!

The student experience at UCSC is truly unique, fusing high academic standards with a passion for transformative engagement in the world. This experience is shaped by exceptional faculty members whose work is at the foremost edge of their fields and who are invested in helping students grow their own intellectual interests. As a result, UCSC is routinely ranked among the top universities in the world for research excellence and impact, and our students have opportunities to collaborate with the world's leading experts in the creation of new knowledge.

UCSC is known not just for its academic rigor, but also for the spectacular natural beauty of the campus. It is difficult to stand among our redwoods or to look out on the Monterey Bay and not feel how special this place is. Our commitment to conservation and sustainability is evident in our campus landscape.

However, what defines UCSC is not just the beautiful place or the brilliant people, but our diverse community. The motto of UCSC's first residential college is "the pursuit of truth in the company of friends." Since 1965, UCSC has been the site of innovation and experimentation about what a university community could and should be. Today, our residential college system provides flexible support and opportunities aimed at recognizing the student as a whole person and prioritizing their success. Only through community can we realize the responsibilities we have to one another, and the ways the pursuit of knowledge can improve the lives of our many communities — local, national, and global.

I encourage you to take advantage of all of the opportunities that UCSC has to offer. There is so much to learn about — from the depths of the ocean to the farthest stars and everything in between.

I welcome you to UC Santa Cruz and to our community of scholars.

Sincerely,

Cynthia Larive

Chancellor

INTRODUCING UC SANTA CRUZ

THE UNIVERSITY OF CALIFORNIA

The University of California opened its doors in 1869 with just 10 faculty members and 38 students, and it has since developed into one of the world's most distinguished university systems. Acclaimed for its research, scholarship, and dedication to undergraduate and graduate education, the UC system improves the lives of people in California and around the world through world-class educational opportunities, groundbreaking research, top-rated health care, and agricultural expertise.

Ten University of California campuses are located regionally throughout the state, and the system also includes five medical centers, three national laboratories, and more than 800 associated research institutes, laboratories, agricultural field stations, and extension centers.

The University of California includes more than 280,000 students and more than 227,000 faculty and staff. More than 27 million UC alumni live and work around the world. UC faculty have won 64 Nobel prizes and 63 National Medals of Science. UC academics include more than 580 members of the National Academy of Sciences and more than 500 members of the American Academy of Arts and Sciences.

THE UC SANTA CRUZ CAMPUS

Established in 1965, the University of California, Santa Cruz, is dedicated to excellence in undergraduate education, graduate studies, and research. Named to the 2017 US News & World Report top 50 Best Global Universities list, the campus has earned national and international recognition both for the impact of its research and for its long-established commitment to quality undergraduate instruction. UC Santa Cruz combines the facilities and resources of a world-class public research university with a distinctive undergraduate experience characterized by our college system. A strong program of general education is enhanced with opportunities for academic specialization and original research, and UC Santa Cruz also provides unparalleled opportunities for students to learn through hands-on experience. Strong commitments to environmental stewardship and community engagement are also central to the campus's core values.

Fall enrollment for the 2018-19 academic year was 19,700 students, of whom 1,900 were graduate students. UC Santa Cruz seeks and welcomes students, faculty, and staff of diverse ethnic and cultural experiences and is dedicated to enrolling a student body that reflects the state's ethnic and socioeconomic diversity. UC Santa Cruz is a Hispanic

Serving Institution member of the Hispanic Association of Colleges and Universities, with approximately 26 percent of undergraduates identifying as Hispanic or Latino (fall 2018).

The UC Santa Cruz faculty includes two of the University of California's honored University Professors, 22 members of the American Academy of Arts and Sciences, 10 members of the National Academy of Sciences, and 34 members of the American Association for the Advancement of Science. Five faculty members have been named MacArthur Fellows. UCSC faculty and researchers have received more than \$100 million annually in external funding over the past five years, totaling more than \$1.2 billion over the past 10 years.

The 10 residential colleges are supportive living and learning communities that characterize the UC Santa Cruz experience. All undergraduate students, whether they live in university housing or not, are affiliated with one of colleges. Self-contained and architecturally distinct, each college is a relatively small community of 30 to 110 faculty members and between 1,500 and 1,800 students, about half of whom live on campus. In addition to housing students in small-scale residential communities, each college provides academic support, organizes student activities, and sponsors events that enhance the intellectual and social life of the campus.

Each college has a distinctive quality derived from its core course and extracurricular programs and from its faculty fellows and their academic disciplines. However, all of the colleges are interdisciplinary, and all academic majors are open to students from all colleges. Detailed descriptions of the 10 colleges can be found in The Colleges (p. 1063) section of the catalog.

Undergraduate education. The campus offers more than 65 undergraduate majors in the arts, engineering, humanities, physical and biological sciences, and social sciences—as well as interdisciplinary major programs and minors. A complete list of academic programs and concentrations appears on the Fields of Study chart (p. 5), and detailed descriptions begin in the Academic Programs (p. 5) section of the catalog.

The major and minor programs are administered by departments within the academic divisions. In most cases, departments are composed of faculty in the same field, but interdisciplinary programs draw on faculty from several fields.

Undergraduate education at UC Santa Cruz is focused on student success. The college core courses give first-year students a small-seminar experience, including intensive work in reading, discussion, and critical reasoning, while also providing an orientation to academic life. With few exceptions, letter grades are assigned in all credit-bearing courses. In addition, academic performance in each course may be recorded by a narrative performance evaluation. To fulfill the campus's rigorous comprehensive requirement, every senior must pass a comprehensive examination or complete an equivalent body of work. See Evaluating Academic Performance (p. 1047) for additional information.

Original undergraduate research is encouraged, and hundreds of research papers coauthored by UC Santa Cruz

undergraduates and their professors have been published in journals. For additional information, visit the Undergraduate Research Opportunities website.

Global Engagement programs at UC Santa Cruz include Study Abroad opportunities and International Student and Scholar Services (ISSS). Global Engagement facilitates the exchange of people, ideas, and knowledge to support and promote the internationalization of teaching, learning, and research. Each year more than 500 UC Santa Cruz students broaden their academic horizons through the UC Education Abroad Program (UCEAP), which enables students to incorporate full-time study abroad as UC credit toward their degrees. The UC Santa Cruz campus also strongly encourages undergraduate students to take advantage of the many opportunities for public service, such as those provided through the campus's field programs, colleges, and Career Center. Individual studies, apprentice teaching, field studies, and internships can be important parts of the undergraduate experience (see Field Programs (p. 1058)).

Graduate education. UC Santa Cruz offers graduate study in more than 40 academic fields, incorporating a range of options for concentrated study in a specialized field. Graduate study at UC Santa Cruz emphasizes close interaction between faculty and students, independent student research, supervised teaching experience, and interdisciplinary work. Further graduate program information is provided in the Graduate Information (p. 1087) (p. 1087) section of the catalog.

Research. The UC Santa Cruz campus hosts a number of major research units. UC Observatories, the Santa Cruz Institute for Particle Physics (SCIPP), and the Institute of Marine Sciences conduct state-of-the-art research on topics ranging from the discovery of planets outside our solar system, to the detection of new sub-atomic particles, to the ecology of marine mammals. UC Santa Cruz is also a primary partner in inter-UC campus initiatives—such as the Institute for Quantitative Biomedical Research (QB3) and the Center for Information Technology Research in the Interest of Society (CITRIS)—which focus on human health and the use of information technology to solve social, environmental, and health-care problems.

The Humanities Institute is a hub for academic research, cross-discipline collaboration, and public engagement that oversees a range of topical centers, including the Center for Cultural Studies, the Center for Jewish Studies, the Center for Public Philosophy, the Linguistics Research Center, and the Dickens Project. Research enterprises within the arts benefit from the Arts Research Institute and the Center for Documentary Arts and Research, while the Institute of the Arts and Sciences emphasizes interdisciplinary exhibitions, events, and residency programs. The Center for Agroecology and Sustainable Food Systems, the Center for Integrated Spatial Research, the Chicano/Latino Research Center, and the Science & Justice Research Center provide pioneering directions for research in the social sciences. Engineering at UC Santa Cruz has focused on strategic initiatives that include the UC Santa Cruz Genomics Institute, the Institute for the Biology of Stem Cells, the Center for Games and Playable Media, and the Center for Sustainable Energy and Power

Systems. Beyond these organized research enterprises, UC Santa Cruz has a wide suite of investigator-driven research that spans the width and breadth of campus inquiry. For additional information see Resources for Learning and Research (p. 1093).

Location and facilities. The main UC Santa Cruz campus occupies 2,000 acres on the west side of the city of Santa Cruz, on Monterey Bay, about 75 miles south of San Francisco and 35 miles southwest of San José. Expansive meadows at the campus entrance gradually slope up to a redwood forest that covers most of the site. Each residential college is within easy access of the campus's central core, which includes library facilities, science laboratories, lecture halls, art studios, theater arts and music centers, a student union, and athletic facilities. Although the campus is spread out over many acres of hilly terrain, its programs are accessible to people with mobility impairments (see Disability Resource Center).

The UC Santa Cruz Coastal Science Campus, located on the edge of the Monterey Bay National Marine Sanctuary, provides extensive research and education facilities focused on marine and environmental sciences.

The city of Santa Cruz is a well-known recreational area and center for the arts. Mild weather, miles of beaches, and many cultural opportunities combine to make Santa Cruz an enjoyable place to study and live.

Accreditation. The University of California, Santa Cruz, is accredited by the Accrediting Commission for Senior Colleges and Universities of the Western Association of Schools and Colleges (WASC), 985 Atlantic Avenue, Suite 100, Alameda, CA 94501, (510) 748-9001, an institutional accrediting body recognized by the Council for Higher Education and the U.S. Department of Education.

Specific degree programs at UC Santa Cruz are also accredited: The Engineering Accreditation Commission of ABET, <http://www.abet.org> (Electrical Engineering); the American Chemical Society Committee on Professional Training (Chemistry); and the California State Commission on Teacher Credentialing (Education). To review accreditation documents, please contact the Office of the Vice Provost for Academic Affairs, Kerr Hall, (831) 459-1349, or vpaa@ucsc.edu.

Combined majors. In addition, students may complete a combined major leading to a B.A. degree in a number of designated fields. Combined majors currently available include those in Earth sciences/anthropology, economics/mathematics, environmental studies/biology, environmental studies/Earth sciences, environmental studies/economics, Latin American and Latino studies/politics, and Latin American and Latino studies/sociology. Students also have the option of pursuing a double major.

c = concentration, or emphasis, within a program. Some programs give students the option of following a general course of study or selecting a concentration; other programs require students to choose a concentration. Consult the program on the page indicated.

¹ A five-year contiguous bachelor's/master's pathway is available coordinating existing bachelor's degrees in computer engineering, robotics engineering, electrical engineering, and computer science and the M.S. in computer engineering.

² A five-year contiguous bachelor's/master's pathway is available coordinating the existing bachelor's degree and master's degree in computer science and engineering.

³ A Master of Fine Arts (M.F.A.) degree is awarded in digital arts and new media and social documentation.

⁴ Because California state law requires prospective teachers to earn a bachelor's degree in an academic discipline other than education, no undergraduate major is offered. All teaching credentials are earned postbaccalaureate. UCSC offers the professional clear Cross-cultural, Language, and Academic Development (CLAD), (CLAD) and Bilingual Cross-Cultural, Language and Academic Development (BCLAD) multiple subjects credentials, which are used in self-contained elementary classrooms (K-6) where all subjects are taught by the same teacher. UCSC also offers the CLAD and BCLAD single subjects credentials, which are used in departmentalized settings where the teacher is responsible for one subject (7-12).

⁵ A five-year contiguous bachelor's/master's pathway is available coordinating the existing bachelor's degree and master's degree in linguistics.

⁶ An intensive major is also available.

⁷ A five-year contiguous bachelor's/master's pathway is available coordinating an existing bachelor's degree from within the chemistry or biology programs (majors administered by the departments of MCD Biology, EE Biology, Chemistry and Biochemistry, and Biomolecular engineering) and the M.S. in microbiology and environmental toxicology.

⁸ A B.M. degree in music also available. A Doctor of Musical Arts (D.M.A.) degree in composition is also available.

⁹ A five year contiguous bachelor's/master's pathway is available coordinating the exiting bachelor's and master's degree in philosophy.

¹⁰ A five-year contiguous bachelor's/master's pathway is available coordinating the existing bachelor's degree and master's degree in physics. Students in the B.S./M.S. path can pursue concentrations in material and device physics, energy and the environment, computational physics, and medical biophysics.

¹¹ A five-year contiguous bachelor's/master's pathway is available coordinating existing bachelor's degrees in mathematics, computer science, robotics engineering, physics, applied physics, and applied physics (astrophysics) and the M.S. in scientific computing and applied mathematics.

¹² A five-year contiguous bachelor's/master's pathway is available coordinating the biomolecular engineering and bioinformatics bachelor's degree (bioinformatics concentration) with the master's degree.

¹³ A five-year contiguous bachelor's/master's pathway is available coordinating the existing bachelor's and master's degree in mathematics.

¹⁴ A five-year contiguous bachelor's/master's pathway is available coordinating existing bachelor's degrees and the M.S. in Statistical Science.

Degrees

B.A. = Bachelor of Arts

B.M. = Bachelor of Music

B.S. = Bachelor of Science

D.M.A. = Doctor of Musical Arts

Ed.D = Doctor of Education

M.A. = Master of Arts

M.F.A. = Master of Fine Arts

M.S. = Master of Science

Ph.D. = Doctor of Philosophy

ACADEMIC UNITS

ARTS DIVISION

Porter College, D Building,
(831) 459-4940
<http://arts.ucsc.edu>

The Arts Division offers both creative and critical studies of art and culture at the undergraduate and graduate level. The division is committed to building our students' capacity for creative and critical thinking. Instruction in the arts inspires and develops the skills needed for individual and collaborative creative thought, analysis, and action within and beyond the university. Our faculty consists of artists, performers, historians, critics, makers, and theorists working across the arts in a global context.

Undergraduate education in the arts includes bachelor of arts (B.A.) programs in art, art and design: games and playable media, film and digital media, history of art and visual culture, music, and theater arts, and a bachelor of music (B.M.) in music. There are also several minors offered in film and digital media, history of art and visual culture, electronic music, jazz music, theater arts, and dance.

Established graduate programs include the interdisciplinary digital arts and new media master of fine arts (M.F.A.) program, the social documentation master of fine arts (M.F.A.), the music master of arts (M.A.), and the theater arts master of arts (M.A.). Doctoral programs include the music composition doctor of musical arts (D.M.A.), and Ph.D. programs in music, visual studies, and film and digital media.

The Arts Division provides students with access to quality research, work and maker spaces, including a digital-arts research facility with two experimental media labs, along with a state-of-the-art music recital hall, practice rooms, electronic music studios, and recording facilities, four theaters for dramatic productions, filmmaking studios and editing suites, surround-sound screening theaters, drama and dance studios, painting and printmaking studios, a foundry (unique to the U.C. system), photography and computer laboratories, and specialized lecture and seminar classrooms. McHenry Library houses an extensive collection of books and periodicals on the arts, as well as an analog and digital slide collection, music scores and recordings, and one of the largest collections of films and DVDs in the University of California system. Exhibition space in the arts includes galleries for students, faculty, and visiting artists to show their work. The Sesnon Gallery presents curated exhibitions to the university community and the general public. The Institute of the Arts and Sciences, a focus for interdisciplinary creative work, exhibitions, conferences, symposia, and seminars offers a robust schedule of programming.

Other Division Highlights: The Theater Arts Department offers a wide variety of performances in four venues, ranging from faculty-directed productions of classics and musicals on our Mainstage to intimate student-created productions in our century-old converted barn. Student work is regularly

broadcast on SCTV, and Eyecandy, a student-run magazine and blog, publishes student critique on film, television, and digital media. The Music Department hosts an annual festival of contemporary music, April in Santa Cruz, and an opera in the spring quarter of each year, and presents a variety of solo and ensemble concert programs throughout the year. The History of Art and Visual Culture Department hosts a series of speakers and seminars each year on rotating topics that are supported by the Patricia and Rowland Rebele Endowed Chair. The Art Department sponsors regularly scheduled public presentations as well as quarterly open studios and a print and photo sale in the spring. The Digital Arts and New Media M.F.A. program regularly sponsors digital arts events, such as festivals, symposia, visiting speakers, and exhibitions of student work, both on- and off-campus, culminating in an annual exhibition of graduate thesis research each spring.

For more information about specific programs in the arts, please visit catalog listings and web sites for Art, Digital Arts and New Media, Games and Playable Media, Film and Digital Media, History of Art and Visual Culture, Music, and Theater Arts.

PROGRAMS OFFERED

Art B.A. (p. 14)

COURSES FOR NON-MAJORS

The Art Department offers courses for non-art majors that fulfill general education requirements and offer students a chance to explore art to see if it interests them as a major.

These courses include ART 10D, 2D Foundation; ART 10E, 3D Foundation; ART 10F, 4D Foundation; ART 80D, Fundamentals of Photography; ART 80E, Environmental Art in the Expanded Field (online course); ART 80F, Introduction to Issues in Digital Media; ART 80T, Digital Tools for Contemporary Artists; and ART 20L, Introduction to Drawing (online course).

Undergraduate Program

The Art Department offers an integrated program of study in theory and practice exploring the power of visual communication for personal expression and public interaction. The department provides students with the means to pursue this exploration through courses that provide the practical hands-on learning skills for art production in a variety of media within the contexts of critical thinking and broad-based social perspectives.

The art program at UC Santa Cruz is composed of courses in drawing, animation, painting, photography, sculpture, print media, intermedia, critical theory, electronic art, public art, environmental art, social art practice, and interactive technologies. Baskin visual arts studios provide world-class facilities for art production in these areas. The Art Department is committed to pursuing a continuing dialogue about what constitutes basic preparation in the arts while offering students experience in established practices, new genres, and new technologies.

Students graduating with a major in art may become professional artists or pursue careers in such diverse areas as arts administration, arts management, museum education, art direction, communication design, web design, digital imaging, curating, art education, multi-media specialist, industry consultant, model maker, and publishing. Many students who want to teach at the college level continue their education in graduate school.

ART B.A.

Information and Policies

Introduction

The Art Department offers an integrated program of study in theory and practice exploring the power of visual communication for personal expression and public interaction. The department provides students with the means to pursue this exploration through courses that provide the practical hands-on learning skills for art production in a variety of media within the contexts of critical thinking and broad-based social perspectives.

The art program at UC Santa Cruz is composed of courses in drawing, animation, painting, photography, sculpture, print media, intermedia, critical theory, electronic art, public art, environmental art, social art practice, and interactive technologies. Baskin visual arts studios provide world-class facilities for art production in these areas. The Art Department is committed to pursuing a continuing dialogue about what constitutes basic preparation in the arts while offering students experience in established practices, new genres, and new technologies.

Students graduating with a major in art may become professional artists or pursue careers in such diverse areas as arts administration, arts management, museum education, art direction, communication design, web design, digital imaging, curating, art education, multi-media specialist, industry consultant, model maker, and publishing. Many students who want to teach at the college level continue their education in graduate school.

Academic Advising for the Program

For more information and advising on the art major, please contact the undergraduate adviser at visart@ucsc.edu. For junior transfer students, please also see more detailed information below under Transfer Information and Policy.

Getting Started in the Major

Acceptance to the Art Major:

Students should contact the undergraduate art adviser if they are interested in pursuing an art major and should meet with the adviser in their first quarter at UC Santa Cruz if they intend to enroll in art courses their frosh year. A portfolio is not required for entering frosh. Students are recommended to pass two foundation courses in their first year in order to meet the campus deadline to declare the major. However, all three foundation courses (Art 10D, Art 10E, Art 10F) are requirements for the major. Delaying taking these classes until the sophomore year may delay a student's graduation.

Getting into Studio Classes:

Studio art classes are very small (average 25 students) compared to courses from other departments on campus that can accommodate large numbers of students. Frosh may not take any lower division studios until they complete all three of the Art 10 series foundation courses.

General Education Requirements:

If you are not able to get into a foundation or studio course in a particular quarter at UCSC, you can enroll in courses that fulfill the general education requirements. You should balance major requirements and general education requirements throughout your career at UCSC and not focus completely on your GEs in your frosh or sophomore years, as this could delay your graduation.

Program Learning Outcomes

Students who earn a Bachelor of Arts (B.A.) in Art will gain the skills, knowledge, and understanding that will enable them to:

- demonstrate proficiency in a range of techniques and media;
- demonstrate the ability to imagine, create, and resolve a work of art;
- demonstrate communication through familiarity with and ability to analyze, both verbally and in writing, issues and forms of contemporary art with a clear understanding of historical precedents; and
- demonstrate critical thinking through the ability to articulate an insightful response and analysis of a work of art in order to participate in discussions and studio critiques.

Major Qualification Policy and Declaration Process**Major Qualification**

Students entering UCSC as frosh may apply for admission to the art major after completing two of the following:

ART 10D	2D Foundation	5
ART 10E	3D Foundation	5
ART 10F	4D Foundation	5

Portfolio

A portfolio is not required for entering frosh students. Students should contact the undergraduate art adviser if they are interested in pursuing an art major and intend to enroll in foundation courses (Art 10_) their freshman year. Acceptance into the art major is contingent on passing two of the three foundation courses that we offer. All three foundation classes are prerequisites to lower-division studios. Consequently, it is essential that students interested in pursuing the art major take the three foundation courses in their freshman year.

Transfer students should consult the Transfer and Information Policy section.**Appeal Process**

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 days from the date the notification was mailed. Within 15 days of receipt of the

appeal, the department will notify the student and college of the decision. Appeals should be sent via email to visart@ucsc.edu.

How to Declare a Major

Students who complete the major qualification requirements may declare the major by meeting with the academic adviser (visart@ucsc.edu) and filling out the declaration form.

Transfer Information and Policy**Transfer Admission Screening Policy**

Prospective transfer students should complete three courses articulated to courses in the Art 20 series in three different media.

Students applying for fall entry must pass a portfolio review in early April and be admitted to UC Santa Cruz to declare the art major. Admission to UCSC does not guarantee eligibility to declare the major, nor does passing the portfolio review guarantee admission to the campus. Transfer students must identify themselves as proposed art majors when applying to the university in order to receive information on the portfolio review deadlines and the materials required for the review. If a student is admitted to UCSC and does not pass the portfolio review, the student will need to pursue an alternate major. Students will be notified of the results of the portfolio review before they need to submit their Statement of Intent to Register for UC Santa Cruz.

For timely graduation, transfer students should also complete two history of art and visual culture courses prior to transfer, including one in Western art and culture and one in non-Western art and culture.

Getting Started at UCSC as a Transfer Student

Once a student is accepted to the university, has passed the portfolio review and has submitted their Statement of Intent to Register, the undergraduate adviser will be in contact with the student to declare their major and set up a program of study.

Letter Grade Policy

This program does not have a letter grade policy.

Three-Year Pathway

The Art Department has a three-year pathway designed for students who want to complete their Art B.A. in three years. It is an intensive program which includes all of the courses for the current art B.A. major, as well as all of the general education requirements and electives for the university. Students should begin this pathway in their frosh year to be able to complete the required courses in three years. Summer Session attendance is required for all three years. For more information, contact the undergraduate adviser.

Course Substitution Policy**Double Majors and Major/Minor Combinations**

Policy

Study Abroad

The UC Education Abroad Program (EAP) offers students the opportunity for study abroad. Art majors may participate in EAP in their junior year. When considering attending EAP, the student should be mindful that only three courses may be substituted in the art major and each must receive a grade of C or better.

Materials Fee

Art students should be aware of the materials fee required for some studio courses. The fee is billed to the student's account for specific course materials purchased by the Art Department through the university. Fees generally range from \$15 to \$175 per course. Students may incur additional expense purchasing individual supplies.

Requirements and Planners

Course Requirements

The minimum requirements for art majors who were admitted to UC Santa Cruz in their frosh year are completion of nine lower-division and eight upper-division courses (consisting of seven upper-division studio courses and ART 190A) and satisfaction of the senior comprehensive requirement. Junior transfer students complete seven lower-division and eight upper-division courses and their senior comprehensive requirement. The comprehensive requirement may be fulfilled by Art 190B, Senior Project, as part of the required seven upper-division studios. The comprehensive requirement may also be fulfilled by a review of the students artwork by a ladder rank faculty. If the latter choice is selected, the student must then complete seven upper-division studios. A maximum of three courses total from outside the Art Department (including UC Education Abroad Program (EAP) courses) may be substituted for regular art courses with the approval of a major adviser. In courses taken outside the UC Santa Cruz Art Department, students must have received a grade of C or higher.

Students plan their course of study in consultation with a faculty adviser.

Lower-Division Courses

Students complete nine courses as follows:

The Foundation

All of the following (two of the 10 series are waived for junior transfers):

ART 10D	2D Foundation	5
ART 10E	3D Foundation	5
ART 10F	4D Foundation	5

Introduction to Contemporary Art Practice

Three of the following (junior transfers should complete them at community college):

ART 20G	Introduction to Print Media and Drawing	5
ART 20H	Introduction to Sculpture and Public Art	5
ART 20I	Introduction to Photography	5
ART 20J	Introduction to Drawing and Painting	5
ART 20K	Introduction to New Media and Digital Artmaking	5
ART 20L	Introduction to Drawing	5

Digital Tools

Students must take:

ART 80T	Digital Tools for Contemporary Art Practice	5
---------	---	---

Critical Theory and Historical Context

Students complete two courses from History of Art and Visual Culture (HAVC), one in Western Art and Culture and one in non-Western Art and Culture. Students take one course from each of the sections below:

Western Art and Culture: HAVC 30-HAVC 46, HAVC 48, HAVC 85, HAVC 133A-HAVC 143B, HAVC 143D-HAVC 143G, HAVC 157B-HAVC 157D, HAVC 186, HAVC 190O-HAVC 190S, HAVC 191B-HAVC 191N, HAVC 191P-HAVC 191S.

Non-Western Art and Culture: HAVC 10-HAVC 27, HAVC 50-HAVC 80, HAVC 110-HAVC 127F, HAVC 143C, HAVC 151-HAVC 155, HAVC 160A-HAVC 179, HAVC 190A-190N, HAVC 190T-HAVC 191A, HAVC 191O.

Note: Students may use Advanced Placement (AP) in Art History in lieu of the Western-emphasis HAVC requirement.

Students may contact the undergraduate adviser for updates to these lists.

Upper-Division Courses

Students complete eight courses as follows:

Studio Work

Students take seven upper-division studio courses. These include courses numbered ART 101-ART 189, ART 190B, ART 194, ART 196, ART 198, and ART 199. Art 190B satisfies both an upper-division studio as well as the comprehensive requirement.

Transfer students are strongly encouraged to take ART 194 during their junior year.

Electives

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major’s upper-division Disciplinary Communication (DC) requirement. The DC requirement in art is satisfied by completing:

ART 190A Writing for Artists 5

Comprehensive Requirement

All art majors satisfy the capstone/comprehensive requirement with the following:

- Completing the following course:
ART 190B Senior Project 5

No course credit is given for either the exhibition or portfolio submission. Consequently, students choosing one of these options must complete seven upper-division studios. Students utilizing Art 190B, Senior Project, for their comprehensive requirement may use this as one of their seven upper-division studios.

Art Major Planner (Incoming Frosh)

The following is a recommended academic plan for students to complete:

Year	Fall	Winter	Spring
	ART 10E	ART 10D	ART 10F
1st (frosh)			
2nd (soph)	ART 20 series	ART 20 series	ART 20 series
	HAVC*	ART 80T	HAVC*
3rd (junior)	UD studio	ART 190A	UD Studio
		UD studio	
4th (senior)	UD studio	UD studio	UD studio or ART 190B
	UD studio		

*Courses from history of art and visual culture (one with a Western emphasis, one with a non-Western emphasis). See Course Requirements section.

ART 190A Writing for Artists 5

Plus one of the following options:

- Presenting an exhibition and, by appointment, meeting with a faculty member for review and critique of the exhibition; or
- Submitting a portfolio and, by appointment, meeting with a faculty member for review and critique of the portfolio; o

Senior majors should meet with their faculty adviser about this requirement.

Planners

Art Major Planner (Incoming Frosh)

The following is a recommended academic plan for students to complete

In addition to the specific courses shown in these planners, a student must complete courses satisfying the CC, ER, MF, SI, SR, TA, and C General Education requirements.

Art Major Planner (Junior Transfers)

The following is a recommended academic plan for junior transfers who have completed three lower-division studios across three different media and partial IGETC:

Year	Fall	Winter	Spring
	UD studio	ART 190A	UD studio
1st (junior)	ART 10_ †	ART 80T	HAVC*
	UD studio	UD studio	UD studio
2nd (senior)	HAVC*	UD studio	UD studio or ART 190B

† Art 10_: Only one of the three 10 series courses is required for junior transfers. Other 10_ series courses are offered in winter and spring.

*Courses from history of art and visual culture (one with a Western emphasis, one with a non-Western emphasis). It is highly recommended that junior transfers take history of art and visual culture courses at the community college. Western emphasis courses are listed as “Europe and the Americas,” all others are non-Western on assist.org.

Undergraduate Program

ART AND DESIGN: GAMES AND PLAYABLE MEDIA B.A.

Information and Policies

Introduction

The Art and Design: Games and Playable Media (AGPM) Bachelor of Arts (B.A.) degree at UC Santa Cruz focuses on the creation of novel game systems, spaces, and configurations that can produce broad ranges of player experiences, for a wide variety of purposes. It does this through:

- courses in related theory, history, and critical interpretation;
- courses that take a practice-based approach to experimental game creation;
- courses that provide a foundation in working with game media forms;
- courses that provide a foundation in working with game technical materials.

This degree complements the Computer Science: Computer Game Design (CGD) Bachelor of Science (B.S.), which focuses particularly on the technical materials. The B.A. focuses more on experience design (in particular) as well as

on history, theory, and media creation—while still taking advantage of courses developed for the B.S. and creating a shared community with those students.

Students in the AGPM major learn to understand game design as an art in and of itself, positioned within the context of a number of more disciplinary approaches. Furthermore, students understand game design as a practice of creation, within a much larger and deeper social and historical context.

The AGPM B.A. in the Arts Division ensures that students have the needed programming skills, and equally importantly, that they meld such technical skills with critical and historical understanding, which is essential for the production of socially conscious, inclusive, and emotionally engaging games.

Upper-division studio courses require coursework to be completed on computers. All students in the B.A. program are strongly encouraged to own a laptop computer. This expense is separate from the cost of tuition and other fees.

While pursuing coursework in the major, all students are to encouraged to build portfolios that showcase their growing body of work, with an emphasis on material from courses such as ARTG 80L, CPM 80K, and ARTG 120, and CPM 120.

Academic Advising for the Program

Please refer to the AGPM advising page for the most up-to-date information on drop-in hours and appointments.

You can reach the AGPM office via phone by calling (831) 459-1554.

If you are a prospective junior transfer hoping to join AGPM, please be sure to carefully read the section below on Transfer Information and Policy.

Getting Started in the Major

Students interested in entering the Art & Design: Games & Playable Media (AGPM) program as frosh can do so as long as they are admitted into UC Santa Cruz.

Incoming frosh **do not** need to satisfy any programming or art requirements prior to arriving at UCSC.

While frosh may not need to satisfy specific requirements, they are urged to make games—using any materials, from Javascript to cardboard—and carefully study game systems. Developing an arts practice in any medium is also helpful, including drawing, writing, music, sculpture, filmmaking, and others. Finally, deepening your understanding of technology is good preparation, including computer programming, participating in maker groups, or whatever else grabs your interest.

Program Learning Outcomes

Students who earn a B.A. in Art and Design: Games and Playable Media gain the skills, knowledge, and understanding that enable them to:

Program Learning Outcomes (PLO)

PLO 1: Demonstrate understanding of the connections between technical commitments and game system design, on one hand, and player experience and cultural communication goals, on the other.

PLO 2: Demonstrate the ability to define, develop, and communicate artistically innovative game ideas—situated historically and employing the methods of multiple art practices.

PLO 3: Demonstrate the ability to design and build a technical system in response to an artistic goal for audience experience that employs a fundamental understanding of algorithms and data structures.

PLO 4: Demonstrate an understanding of game history and interpretation sufficient to do independent research on a topic, identify relevant games and secondary literature, think critically about a particular games-related topic, and make a convincing, research-based argument about games.

PLO 5: Demonstrate the ability to collaboratively plan, organize, and execute complex, team-oriented projects, using appropriate communication and coordination techniques.

PLO 6: Demonstrate the ability to effectively use techniques for understanding how players experience a game system, and to compare this with a project's artistic goals—then successfully iterate and revise project shape, scope, and function based on external feedback and personal/team constraints.

Major Qualification Policy and Declaration Process

Major Qualification

Prior to declaring the AGPM major, students must complete the following Major Qualification courses with a grade of C or better (these courses can also be taken as Pass/No Pass):

ARTG 80H	Critical History of Digital Games	5
ARTG 80I	Foundations of Play	5
CMPM 80K	Foundations of Video Game Design	5
Either this course		
CMPM 35	Data Structures for Interactive Media	5
or this course		
CSE 101	Algorithms and Abstract Data Types	5

Note: CMPM 35 and CSE 101 have computer science and mathematics prerequisites that are not considered in the major declaration process. Grades in these courses are not considered for qualification.

Students receiving a C-, D+, D, D-, F or NP in one of the major qualification courses or associated labs may only declare once they have passed the same or equivalent course or lab with a grade of C or better.

Students need to complete these major qualification courses early in their studies so that the petition to major status is accomplished by the end of their sophomore year.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student and college of the decision. Appeals should be emailed to the AGPM adviser.

How to Declare a Major

Students that have successfully passed all of the major qualification courses complete and sign the major declaration petition form and email it to the AGPM adviser.

Transfer Information and Policy

Transfer Admission Screening Policy

In preparation for transfer to AGPM, students are required to demonstrate proficiency in programming, visual art, and game design. Complete the following courses:

Minimum grade of C (2.0) in courses articulated to UCSC's Computer Science and Engineering

CSE 30	Programming Abstractions: Python	7
--------	----------------------------------	---

Students entering UCSC through fall 2021 also have the option to use a course articulated to CSE 15/CSE 15L (previously offered for this requirement as CMPS 12B/M, Introduction to Data Structures).

Minimum grade of C (2.0) in two courses articulated to courses in the following list:

ART 15	Introduction to Drawing for the Major	5
ART 20	Any course in the ART 20 series	
ARTG 80G	Visual Communication and Interaction Design	5
ARTG 80H	Critical History of Digital Games	5
ARTG 80I	Foundations of Play	5
CMPM 25	Introduction to 3D Modeling	5
CMPM 26	Introduction to 3D Animation	5
CMPM 80K	Foundations of Video Game Design	5
FILM 20P	Introduction to Production Technique	5
MUSC 1C	University Concert Choir	2
MUSC 2	University Orchestra	2
MUSC 3	Large Jazz Ensemble	2

MUSC 5A	West Javanese Gamelan Ensemble: Beginning	2
MUSC 5B	West Javanese Gamelan Ensemble: Intermediate	2
MUSC 5C	West Javanese Gamelan Ensemble: Advanced	2
MUSC 6	Classical Guitar Ensemble	2
MUSC 8A	Beginning Balinese Gamelan	2
MUSC 8B	Advanced Balinese Gamelan	2
MUSC 9	Wind Ensemble	2
MUSC 10	Eurasian Ensemble	2
THEA 10	Introduction to Theater Design and Technology	5
THEA 14	Drawing	5
THEA 15	Special Topics in Textiles	5
THEA 17	Costume Construction	5
THEA 18	Drafting for Theatrical Production	5
THEA 19	Design Studio: Lighting Studio A	5
THEA 20	Introductory Studies in Acting	5
THEA 21	Acting Studio I: Psychological Realism	5
THEA 22	Indonesian Dance and Drama	5
THEA 30	Introduction to Dance Theory and Technique	5
THEA 31C	Dance Studio I: Contemporary Dance Theory and Technique	5
THEA 33C	Dance Studio I	5
THEA 36	Introduction to Dance Composition	5
THEA 37	African Dance	5
THEA 40	Introduction to Directing	5
THEA 50	Fundamentals of Theater Production	2
THEA 80Z	Indian Dance	5

Additional Suggested Courses

Students are highly encouraged to complete all general education requirements before coming to UC Santa Cruz.

Transfer students who meet the requirements above and complete general education requirements will be able to complete the major in two years as shown in the academic plan in the Planners section of the Requirements and Planners tab on this page. Because of the number of credits required by the B.A., transfer students who have general education requirements remaining may need to take summer session courses and/or additional courses over the academic year to allow graduation in two years. If a student meets the requirements for major qualification but cannot complete general education requirements, taking community college courses that are articulated for credit with courses in the Foundational Courses and lower-division "Arts Requirements and Electives" courses listed in the Requirements and Planners tab is recommended.

Getting Started at UCSC as a Transfer Student

Transfer students are strongly advised to attend a UCSC Summer Orientation session for transfer students. Transfer

students should consult with an AGPM academic adviser prior to enrolling in classes to determine their status and to begin the declaration of major process as soon as possible.

Please see a recommended academic plan for junior transfer students in the Planners section of the Requirements and Planners tab on this page.

Letter Grade Policy

All courses used to satisfy any of the Art and Design: Games and Playable Media major requirements can be taken for a letter grade or as Pass/No Pass. This includes both introductory lower-division and advanced upper-division requirements, and with the major qualification courses. A grade of "Pass" is equivalent to meeting the requirement of "C or better" in the Major Qualification policy.

Course Substitution Policy

Students are able to petition a course to count as a substitute for any given elective requirement via the AGPM Course Substitution Petition form. Once submitted, requests are reviewed by the program chair. After they come to a decision, the AGPM adviser will reach out to the student and let them know whether their petition was approved or not.

Double Majors and Major/Minor Combinations Policy

Students may choose to do a double major or minor along with the AGPM program, but are advised that AGPM has a high number of course requirements. As a result students may be required to petition for a later graduation date in order to complete a double major or minor.

Study Abroad

Honors

Requirements and Planners

Course Requirements

The AGPM major requires a minimum of eight lower-division and 11 upper-division courses in residence and satisfaction of the senior comprehensive requirement.

Lower-Division Courses

Foundational Courses

Complete the following six courses:

ARTG 80H	Critical History of Digital Games	5
ARTG 80I	Foundations of Play	5
CMPM 80K	Foundations of Video Game Design	5
CSE 20	Beginning Programming in Python	5
CSE 30	Programming Abstractions: Python AND	7

Either this course			
CMPM 35	Data Structures for Interactive Media	5	
or this course			
CSE 101	Algorithms and Abstract Data Types	5	

Notes:

- CSE 101 has computer science and mathematics prerequisites.
- Students with prior programming experience, AP credit, or who test out of CSE 20 can start with CSE 30.

Film and Digital Media 80V

Complete the following course:

FILM 80V	Video Games as Visual Culture	5	
----------	-------------------------------	---	--

Lower Division Arts Elective

Complete one lower-division course from the following:

(Check with the Art Department and the General Catalog for restrictions or prerequisites on art courses.)

ART 10D	2D Foundation	5	
ART 10E	3D Foundation	5	
ART 10F	4D Foundation	5	
ARTG 80G	Visual Communication and Interaction Design	5	
MUSC 1C	University Concert Choir	2	
MUSC 2	University Orchestra	2	
MUSC 3	Large Jazz Ensemble	2	
MUSC 5A	West Javanese Gamelan Ensemble: Beginning	2	
MUSC 5B	West Javanese Gamelan Ensemble: Intermediate	2	
MUSC 5C	West Javanese Gamelan Ensemble: Advanced	2	
MUSC 6	Classical Guitar Ensemble	2	
MUSC 8A	Beginning Balinese Gamelan	2	
MUSC 8B	Advanced Balinese Gamelan	2	
MUSC 9	Wind Ensemble	2	
MUSC 10	Eurasian Ensemble	2	
MUSC 80L	Artificial Intelligence and Music	5	
THEA 14	Drawing	5	
THEA 15	Special Topics in Textiles	5	
THEA 17	Costume Construction	5	
THEA 18C	Drafting-Computer Aided	5	
THEA 19	Design Studio: Lighting Studio A	5	
THEA 20	Introductory Studies in Acting	5	
THEA 21	Acting Studio I: Psychological Realism	5	
THEA 22	Indonesian Dance and Drama	5	
THEA 30	Introduction to Dance Theory and Technique	5	
THEA 31C	Dance Studio I: Contemporary Dance Theory and Technique	5	
THEA 33C	Dance Studio I	5	
THEA 36	Introduction to Dance	5	

	Composition		
THEA 37	African Dance	5	
THEA 40	Introduction to Directing	5	
THEA 50	Fundamentals of Theater Production	2	
THEA 80Z	Indian Dance	5	

History of Art and Visual Culture Requirement

Complete any one 5-credit History of Art and Visual Culture (HAVC) course. This can be either a lower- or upper-division course.

Upper-Division Courses**Game Design Requirements**

Complete all the following courses:

CMPM 120	Game Development Experience	5	
ARTG 120	Game Design Experience	5	
ARTG 170	Game Design Studio I	5	
ARTG 171	Game Design Studio II	7	
ARTG 172	Game Design Studio III	7	

Electives**Media Creation Electives**

Check with course home departments and catalog for availability, prerequisites, or enrollment restrictions. ART courses may have restrictions or prerequisites. FILM courses have prerequisites and/or require an application, and are generally restricted to Film and Digital Media majors. MUSC courses are restricted to students in the electronic music minor, who will fulfill all of their media creation electives through the courses required for that minor.

Complete four courses from the following courses (**note:** completion of CMPM 25 and CMPM 26 counts as one Media Creation elective):

ART 101	Introduction to Computer Programming for the Arts	5	
ART 102	Interactive Arts	5	
ART 103	Interactive Art: Object, Interface, Robotics	5	
ART 104	Digital Video	5	
ART 106A	2D Animation	5	
ART 106E	3D Modeling and Animation	5	
ART 108	New Media and Social Practice Artmaking	5	
ARTG 118	Digital Drawing/Painting for Game Design	5	
ARTG 129	Special Topics in Game Design	5	
CMPM 25	Introduction to 3D Modeling	5	
CMPM 26	Introduction to 3D Animation	5	
CMPM 150	Creating Digital Audio	5	
DANM 140	Introduction to 3D Printing, Laser Cutting, and More	5	
FILM 170A	Fundamentals of Digital Media Production	5	
FILM 171D	Social Information Spaces	5	
FILM 173	Narrative Digital Media	5	

FILM 177	Workshop Digital Media Workshop: Computer as Medium	5
FILM 179A	Special Topics in Animation	5
FILM 179B	Documentary Animation Workshop	5
FILM 189	Advanced Topics in Digital and Electronic Media Studies	5
MUSC 123	Electronic Sound Synthesis	5
MUSC 124	Intermediate Electronic Sound Synthesis	5
MUSC 125	Advanced Electronic Sound Synthesis	5
MUSC 167	Workshop in Electronic Music	2
THEA 104	Multimedia Authoring	5
THEA 106	Digital Illustration	5
THEA 114	Sound Design and Engineering for the Theater	5
THEA 117	Design Studio: Costume	5
THEA 124	Movement for Performers	5
THEA 157	Playwriting	5
THEA 159	Advanced Playwriting	5
DANM 220	Introduction to Programming for the Arts	5

ARTG 118, ARTG 129: may be repeated for credit

Completion of CMPM 25 AND CMPM 26 counts as one Media Creation elective.

DANM 140 also offered as ART 105

FILM 170A, FILM 189: Prerequisite is FILM 20C or CSE 101 or CSE 111

FILM 171D, FILM 173, FILM 177: Prerequisite is FILM 170A

FILM 179A, FILM 179B: By application. Recommended prerequisite is FILM 170A

THEA 117 also offered as ART 147T

Game Design/Human-Computer Interaction Electives

CMPM and CSE courses may have restrictions or prerequisites.

Complete two of the following:

DANM 219	Introduction to Electronics for Artmaking	5
CMPM 131	User Experience for Interactive Media	5
CMPM 146	Game AI	5
CMPM 147	Generative Design	5
CMPM 148	Interactive Storytelling	5
CMPM 151	Algorithmic Music for Games	5
CMPM 163	Game Graphics and Real-Time Rendering	5
CMPM 176	Game Systems	5
CMPM 177	Creative Strategies for Designing Interactive Media	5
CMPM 178	Human-Centered Design Research	5

CMPM 179	Game Design Practicum	5
CSE 118	Mobile Applications	5
CSE 183	Web Applications	5

CMPM 179 also offered as ARTG 179; may be repeated for credit

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in Art and Design: Games and Playable Media is satisfied by completing:

ARTG 170	Game Design Studio I	5
----------	----------------------	---

Comprehensive Requirement

Students satisfy the senior comprehensive requirement by receiving a passing grade in all three courses of the game design studio sequence (ARTG 170, ARTG 171, and ARTG 172). This sequence will meet in collaboration with CMPM 170, CMPM 171, and CMPM 172.

ARTG 170	Game Design Studio I	5
ARTG 171	Game Design Studio II	7
ARTG 172	Game Design Studio III	7

Planners

The following is a recommended academic plan for students to complete during their first two years as preparation for the AGPM major.

Art and Design: Games and Playable Media B.A. Planner

	Fall	Winter	Spring	Summer
1st (frosh)	ARTG 80I ^MATH 3, Precalculus	CMPM 80K	<u>CSE 20</u> HAVC elective	
2nd (soph)	<u>CSE 30</u> ARTG 80H	CMPM 35 FILM 80V	CMPM 120* ARTG 120*	
3rd (junior)	Lower- division arts elective** Media Creation elective 1	Media Creation elective 2	Media Creation elective 3	
4th (senior)	GD & HCI elective 1	GD & HCI elective 2	Media Creation elective 4	ARTG 170 ARTG 171 ARTG 172

^ The prerequisite for CSE 30 can be satisfied in any of the following ways: successfully passing MATH 3, MATH 11A, MATH 19A, AM 3, AM 11A/ECON 11A, or a score of 400 or higher on the mathematics placement examination.

* ARTG and CMPM 120 are also offered during the summer. ** We highly recommend that students enroll in ARTG 80G for their LD Arts Elective course.

In addition to the specific courses shown in the four-year planner, a student must complete courses satisfying the CC, ER, SR, SI, and TA general education requirements.

Transfer Students Planner

	Fall	Winter	Spring	Summer
	Lower-division arts elective**	<u>CMPM 35</u>	CMPM 120*	
1st (junior)	<u>ARTG 80H</u>	CMPM 80K	ARTG 120*	
	<u>ARTG 80I</u>	<u>FILM 80V</u>	Media Creation elective 1	
	<u>ARTG 170</u>	<u>ARTG 171</u>	<u>ARTG 172</u>	
2nd (senior)	GD & HCI elective 1	GD & HCI elective 2	Media Creation elective 3	
	HAVC elective	Media Creation elective 2	Media Creation elective 4	

The two-year planner assumes that a student has completed all general education requirements before coming to UCSC.

Graduate Program

DIGITAL ARTS AND NEW MEDIA M.F.A.

Introduction

New technologies have profoundly changed contemporary culture and inevitably altered the role of the arts in society. The Digital Arts and New Media (DANM) Master of Fine Arts (M.F.A.) Program serves as a center for the development and study of digital media and the cultures that they have helped create. Faculty and students are drawn from a variety of backgrounds, such as the arts, computer engineering, humanities, the sciences, and social sciences, to pursue interdisciplinary artistic and scholarly research and production in the context of a broad examination of digital arts and cultures.

The Digital Arts and New Media M.F.A. Program is a two-year program organized into four interdependent and equally important pursuits:

New Praxis—The term “praxis” has many meanings, which include “translating ideas into action” and “action and reflection upon the world in order to change it.” New Praxis in DANM is comprised of “critique” and “practicum” which provide students with both the practical training and critical dialogue necessary to pursue their own individual goals as artists and cultural practitioners.

Studies—DANM “studies” include required core seminars that allow students first to explore an array of recent methods and approaches in digital arts and culture, and then to pursue

the construction of specific genealogies and theories with a sustained focus on a particular topic, by engaging in various dialogues at the intersection of theory and practice while developing their thesis project and paper.

Collaborative Research—Students and faculty engage in research collaborations resulting in publications and exhibitions in various research areas. These collaborative research projects vary in topic each year, depending on participating faculty and may include topics such as critical and performative technologies, digital installations and performances, interactive and playable media. Students collaborate on faculty-initiated and -directed research projects. This work is intended to provide the student with the opportunity to learn collaborative and practical research methodologies, and to participate in a professional-level research project. The collaborative-project group experience is intended to inform, but not necessarily contribute to, the student’s thesis project.

Pedagogy—DANM trains future arts academics through practical experience. Students may be awarded teaching assistantships as part of their overall support package as well as opportunities to assist faculty in workshops.

Applications

Prospective students in the Digital Arts and New Media program will have a foundation in the arts with some demonstrated interest in technology or a foundation in technology with demonstrated background in the arts. Many, but not all, entering students will have completed a Bachelor of Arts (B.A.) program in one or more of the arts disciplines (art or art history, film, multimedia, music, theater, video, etc.) or a Bachelor of Science (B.S.) program in computer science or computer or electrical engineering. Other successful applicants will have a B.A. or B.S. in another field but will be able to show substantial achievement in the arts, in technology, or in digital arts.

Prospective students are asked to identify their choice of research group in their application and statement of purpose. Admissions are tied to DANM project group foci. New students are admitted into a specific project group based on the quality and relevance of the student’s prior work and expertise to the group project in their chosen area of focus.

In certain cases, students who demonstrate excellent potential for the program but lack proficiency in a “cross discipline” will be admitted to the program with the understanding that they will take courses during their first two quarters of study to make up that deficiency. An arts student lacking sufficient programming experience, for example, will be expected to take one or two programming courses in their first two quarters in addition to the DANM program requirements.

Students will apply online through the Division of Graduate Studies website between October and January for the following fall quarter. In addition to submitting an online application, students will be expected to submit an online portfolio. Further information can be found at the Division of Graduate Studies website.

Requirements

Course Requirements

The DANM M.F.A. Program requires 72 credits of academic course work. In the first year, students generally take three courses each term. In the second year, students primarily take elective courses, work with their thesis committees, and pursue independent and directed research leading to the completion of the thesis project and paper. Students may choose to take an elective offered by the program or choose an elective from a broad array of graduate courses offered on campus with the approval of their adviser.

Research group leaders are encouraged to customize the DANM curriculum for students admitted to their group in order to create a specialized "pathway" through the major that emphasizes courses and skills related to their area of research. For example a research group may replace the DANM 250 Collaborative Research Group course series with existing graduate courses in their home department, or require certain courses to fill elective slots. The pathways and course replacements are approved by the DANM director in the form of a memorandum of understanding (MOU) between DANM and the chairs of any department whose courses are being used in the pathway.

During the admissions process students will be directed to follow the standard DANM curriculum or a custom pathway depending on the research group they are admitted to.

New Praxis

New Praxis in DANM is comprised of "practicum" and "critique."

Practicum

This area of praxis is designed to allow students to develop the conceptual, technical, and practical skills they need to successfully complete projects that realize their own individual goals as digital media artists. Complete all of the following courses:

DANM 210	Project Design Studio	5
DANM 215	MFA Exhibition Production	5
DANM 299	Thesis Research	5

DANM 299 is required to be taken twice.

Critique

This area of praxis is designed to allow students to present their own work and review the work of their fellow students as a means of engaging in the critical dialogue necessary to pursue their own individual goals as digital media artists. Complete both the following courses:

DANM 211	Critique	5
----------	----------	---

DANM 280 is required to be taken every quarter.

Studies

Complete the following courses:

DANM 201	Recent Methods and Approaches to Digital Arts	5
----------	---	---

DANM 202	and Culture Dialogues and Questions in Digital Arts and Culture	5
----------	---	---

Electives

Students take elective courses as needed to address areas of needed skill development or thesis topic specialization, meet the total 72-credit requirement, and/or maintain their full-time status in a given quarter. Some research group pathways will require certain courses in place of these elective credits.

The following courses are approved electives; any other available graduate-level courses or independent studies offered on campus may count for credit as approved by the student's adviser.

DANM 219	Introduction to Electronics for Artmaking	5
DANM 220	Introduction to Programming for the Arts	5
DANM 281	Special Topics in Digital Arts and New Media	5

Collaborative Research Group

Students participate in a three-quarter-long, collaborative-research project. This work is intended to provide the student with the opportunity to learn collaborative and practical research methodologies, and to participate in a professional-level research project.

Project group topics change each year, so the related project group courses will either be three courses in the DANM 250 series or a combination of other graduate courses as specified in a research group pathway.

Other Requirements

Thesis Requirement

Students are required to complete a thesis project and written paper under the supervision of their thesis committee. The thesis will be an arts project with digital documentation accompanied by a written paper. Thesis projects may be individual or collaborative and are expected to grow out of the research pursued in the project groups during the three quarters prior as well as work developed in new praxis courses. Each student will be expected to complete a 20- to 30-page paper discussing the student's preparatory research as well as the theoretical significance of the project. In the case of collaborative projects, each student will be required to submit his or her own paper. During the thesis year, students will make at least two progress presentations to their thesis committee. A completed thesis project and paper must be submitted to and approved by the thesis committee before the degree can be awarded.

Planner

Student Planner

	Fall	Winter	Spring
Year	DANM 201	DANM 211	DANM 202

1	DANM 210	Research group course	Research group course
	Research group course	DANM 280	DANM 280
	DANM 280		
Year 2	DANM 280	DANM 215	DANM 280
	Elective	DANM 280	DANM 299
	Elective	DANM 299	Elective

*Students will be provided with a custom course planner if their research group has a specialized pathway in the major.

Applying for Graduation

By the end of the second week of the quarter of graduation, students complete the Application for Masters Degree form and submit to the DANM graduate adviser. After successfully completing an Oral Defense of their thesis, the student submits their completed thesis to ProQuest via upload, and a hard copy of their thesis title page, signed in ink by all thesis committee members, to the Graduate Division office.

Social Documentation Designated Emphasis (p. 45)

Undergraduate Program

The film and digital media major at UC Santa Cruz offers an integrated curriculum involving theory, criticism, and cultural analysis, as well as a production program in the aesthetics and techniques of film and digital media. This bachelor of arts degree program provides students with the critical skills, theoretical concepts, and historical knowledge necessary to conduct informed analysis of cinema, television, video art, and new media, along with the up-to-date technical knowledge, practical skills, and artistic contexts needed for the production of film, video, and digital media. The major provides a course of study that develops an understanding of moving image and digital media as essential tools of communication and artistic practice.

The UCSC program is interdisciplinary, combining theory and practice in film, video, and digital media with study in other areas of the arts, humanities, and social sciences that help students understand the role these media play in society. Students who are not majors in film and digital media, but interested in our courses, are welcome to enroll in an 80 series course.

As the technologies of film and video have merged with digital computer-based moving images and interactive media, and as digital media continues to expand into everyday experience, students in the major are uniquely positioned to excel in these fields. Graduates of the UCSC film and digital media program have enjoyed considerable success both in the professional world and in gaining admission into top graduate schools in the field.

FILM AND DIGITAL MEDIA B.A.

Information and Policies

Introduction

Students in the general film and digital media major develop an understanding of major movements in world cinema and different aesthetic approaches to the medium, while studying the cultural impact of television and the rise of video and digital art in recent decades.

The critical studies concentration is designed for film and digital media majors who have a special aptitude for and interest in the history and theory of film, television, video, and digital media. This rigorous program can help prepare undergraduates for graduate work in critical studies.

Students in the production concentration are encouraged to demonstrate technical proficiency and creative vision in film and digital media production while also studying the histories and theories of these media. Within the production concentration, students may choose based on their interests to complete a film production pathway or a digital media pathway.

The integrated critical practice concentration is designed for film and digital media majors who have a special aptitude for and interest in combining work in critical studies and production. The concentration provides them with a more rigorous pathway through the major and, in their senior year, allows them to work on a senior project that integrates creative and intellectual work.

Students in all facets of the major acquire skills in media analysis while maintaining a broadly based, liberal arts perspective.

Students enrolled in film and digital media production classes have access to audio, video, and digital production and postproduction equipment. Facilities include a digital media lab; stop-motion animation lab audio recording studio; sound stage with green screen; digital nonlinear editing rooms; video format conversion rooms; a computerized sound effects library; and student equipment checkout. Additionally, computer laboratories equipped for digital image manipulation, web authoring, and interactive interface design and viewing rooms are available. The critical studies facilities include classrooms equipped for high-end film, video, and data projection. The library holdings in film and video history, theory, and literature are complemented by a large collection of films, videos, laser disks, and DVDs, including a diverse range of international feature films, experimental film and video work, animation, silent films, and documentaries.

Some courses offered by the Film and Digital Media Department are restricted in enrollment; admission is based on completion of prerequisites and other specific written application requirements. Admission to advanced film production courses is generally restricted to third- and fourth-year students and is based on the submission of a portfolio of work produced in the introductory production class (FILM 170B) for the film production pathway. Students pursuing the

digital media pathway must earn a grade of B or better in FILM 170A for acceptance into that pathway and other digital media production workshops.

Upper-division digital media and production studio courses require coursework to be completed on computers. Instruction in and software for production courses utilizes the macOS platform and primarily consists of Apple and Adobe video production software packages. Many UCSC students purchase laptop computers. Film and digital media students who are considering purchasing a laptop computer for production work are encouraged to consult with the department's operations staff. A list of recommended computer configurations and information regarding education pricing on software packages is available here.

Academic Advising for the Program

Students seeking advice regarding the major may email fdmadvising@ucsc.edu or call the department's main line at (831) 459-3204. Transfer students please also see the sections below regarding Transfer Information and Policy, Transfer Admission Screening Policy and Getting Started at UCSC as a Transfer Student.

Getting Started in the Major

Though no preparatory classes are required to be successful in the major, prospective students may opt to study introductory film analysis and production courses to become familiar with film and media concepts and techniques.

Program Learning Outcomes

Students who earn a B.A. in film and digital media will gain the skills, knowledge, and understanding that will enable them to:

1. Demonstrate their ability to employ research skills, including the use of appropriate print and technology sources in the discipline, to construct effective arguments.
2. Demonstrate that they understand the pre-production, production, and postproduction digital media and filmmaking process.
3. Demonstrate the relationship between different types of form and meaning through the creation of film and digital media projects or the critical analysis of them.
4. Demonstrate their ability to work collaboratively to produce a film or digital media project.
5. Demonstrate broad knowledge of film and media history internationally.
6. Demonstrate scholarly writing skills appropriate to the discipline of film and digital media.
7. Demonstrate an ability to analyze, interpret, and critique films and media from a variety of theoretical perspectives using the critical vocabulary and methodologies of the discipline.

8. Demonstrate their ability to articulate and defend their research and practice in a critical environment.

Major Qualification Policy and Declaration Process

Major Qualification

Declaration of the Film and Digital Media Pre-Major

Students who have completed one lower-division course (FILM 20A, FILM 20B or FILM 20C) with a grade of C or better are eligible to declare the film and digital media pre-major. Pre-majors are expected to complete the requirements to declare the major by the end of their second year. Transfer students must declare the pre-major no later than their second quarter in residence.

Declaration of the Film and Digital Media Major

Prior to declaring the film and digital media major, students must pass FILM 20A and FILM 20B or FILM 20C with a grade of C or better. Students may choose to take FILM 20P to fulfill the third lower-division requirement but this course does not count toward declaring the major.

Acceptance into the film and digital media major does not constitute acceptance into any of the concentrations (production, critical studies, or integrated critical practice). Transfer students should also consult the Transfer and Information Policy section for instructions about declaring the major.

Appeal Process

Students may appeal a negative decision within 15 days by submitting an appeal letter to the Film and Digital Media undergraduate adviser. The department will notify the student of the outcome within 15 days of receipt of the appeal.

How to Declare a Major

All students are required to attend a declaration of pre-major or major workshop in order to officially declare the major. Declaration workshops are offered each quarter before the deadline to declare and are posted on the department's website. Please contact fdmadvising@ucsc.edu with questions.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz. Prospective transfer students entering at the junior level are encouraged to complete FILM 20A through UCSC Summer Session prior to their transfer, especially if they will be pursuing one of the concentrations available. Transfer students should be able to complete the general major within two years.

Students who have not fulfilled their general education requirements prior to transferring and pursue one of the film and digital media concentrations, a double major or minor, or

study abroad may need additional time to complete their requirements.

Getting Started at UCSC as a Transfer Student

All transfer students must enroll in at least one lower-division major course (FILM 20A, FILM 20B, or FILM 20C) during their first quarter in residence. Transfer students are strongly encouraged to enroll in FILM 20A during the Summer Session preceding their first quarter in residence. After completing one lower-division course (FILM 20A, FILM 20B, or FILM 20C) with a grade of C or better, transfer students may declare the film and digital media pre-major.

At least one course out of FILM 20A, FILM 20B, or FILM 20C must be taken at UCSC. Transfer students who wish to have equivalent lower-division courses count toward their film and digital media major requirements must petition the department unless the courses are articulated at assist.org.

Letter Grade Policy

Students pursuing this major must take the courses required to declare, FILM 20A, FILM 20B and/or FILM 20C for a letter grade.

Course Substitution Policy

The department allows up to two courses to substitute for major requirements. At least one course out of FILM 20A, FILM 20B, or FILM 20C must be taken at UCSC.

Double Majors and Major/Minor Combinations Policy

Study Abroad

The department strongly encourages students to explore studying abroad while attending UCSC. We allow up to two courses from abroad to substitute for major requirements. See Course Substitution Policy above for details. An exception is allowed for students who are in the Sussex Exchange Program which allows up to three course substitutions if approved by our faculty.

Honors

Honors in film and digital media are awarded to graduating seniors whose academic performance in their major coursework is judged by a faculty committee to be consistently excellent to outstanding. Students must have at least a cumulative GPA of 3.5 in the major to be considered for Honors.

Three Year Pathway

The Film and Digital Media Department has a three-year pathway designed for students who want to complete their Film and Digital Media B.A. in three years. It is an intensive program which includes all of the courses for the current film and digital media general major as well as all general education requirements and electives required for the university. Students may complete all courses required for the general major only. No concentration options are available

for this pathway, though the general major does allow students to take up to two production courses. Students should begin this pathway in their frosh year to be able to complete the required courses in three years. A sample planner can be found on the university advising website. For more information, contact the undergraduate adviser.

General Film and Digital Media Major

The general film and digital media major requires three lower-division and nine upper-division courses in residence and satisfaction of the senior comprehensive requirement. Students must include among these 13 courses at least one upper-division, 5-credit course that focuses on diversity (i.e., non-Western perspectives; races/ethnicities, genders, classes, sexualities or abilities). A list of courses satisfying the department's diversity requirement is available at the department office. Students in the general film and digital media major may apply for admission to the critical studies concentration (see Critical Studies Concentration below), the production concentration (see Production Concentration below), or the more rigorous integrated critical practice concentration (see Integrated Critical Practice Concentration below) within the major.

Course Requirements

Lower-Division Courses

FILM 20A	Introduction to Film Studies	5
----------	------------------------------	---

Two additional 20-level courses:

FILM 20B	Introduction to Television Studies	5
FILM 20C	Introduction to Digital Media	5
FILM 20P	Introduction to Production Technique	5

FILM 20P cannot be used toward declaring the major

Upper-Division Courses

Core Curriculum

Students in the general major complete the following required upper-division core curriculum:

FILM 120	Introduction to Media Theory	5
----------	------------------------------	---

One course from each of the following three groups:

Group 1:

FILM 130	Silent Cinema	5
FILM 132A	International Cinema to 1960	5
FILM 132B	International Cinema, 1960 to Present	5

Group 2:

FILM 134A	American Film, 1930-1960	5
FILM 134B	American Film, 1960-Present	5

Group 3:

FILM 136A	Experimental Film and Video	5
FILM 136B	History of Television	5
FILM 136C	Visual Culture and Technology: History of New	5

	Media	
FILM 136D	Documentary Film and Video	5

Plus one course from the following to satisfy the senior comprehensive requirement:

FILM 194A	Film Theory Seminar	5
FILM 194B	Electronic Media Theory Seminar	5
FILM 194C	New Media Theory Seminar	5
FILM 194D	Film History Seminar	5
FILM 194E	International Cinemas	5
FILM 194F	Film and the Other Arts	5
FILM 194G	New(s) Media	5
FILM 194S	Special Topics Seminar	5

Electives

Five upper-division elective courses are to be chosen from the following:

- up to five additional upper-division critical studies courses in film and digital media (see Electives for the Integrated Critical Practice Concentration for a list of upper-division critical studies courses)
- up to two upper-division courses in film and digital media production (see Production Concentration for a list of upper-division production courses)
- up to two upper-division courses offered by other departments or another institution; course substitutions must be pre-approved by the Film and Digital Media Department
- at least one course must focus on diversity, i.e. non-Western perspectives; races/ethnicities, genders, classes, sexualities, or abilities. See list below.

Courses that Satisfy the Diversity Requirement

ANTH 110P	India and Indian Diaspora through Film	5
FILM 132A	International Cinema to 1960	5
FILM 132B	International Cinema, 1960 to Present	5
FILM 165A	Film, Video, and Gender	5
FILM 165B	Race on Screen	5
FILM 165C	Lesbian, Gay, and Queer Film and Video	5
FILM 165D	Asian Americans and Media	5
FILM 165E	Chicana/o Cinema, Video	5
FILM 165G	Gender and Global Cinema	5
LALS 122	Media and Nationalism	5
LALS 124	Brazilian Cinema	5

Students may submit a petition to the department to have other courses reviewed to satisfy the diversity requirement. Please send course syllabi to fdmadvising@ucsc.edu for review.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. Film and digital media majors receive detailed information and

guidance about the major's DC requirement from the department's undergraduate adviser.

The DC requirement is met by passing one course from each of the two following categories:

First Category

FILM 130	Silent Cinema	5
FILM 132A	International Cinema to 1960	5
FILM 132B	International Cinema, 1960 to Present	5
FILM 134A	American Film, 1930-1960	5
FILM 134B	American Film, 1960-Present	5

Second category:

FILM 194A	Film Theory Seminar	5
FILM 194B	Electronic Media Theory Seminar	5
FILM 194C	New Media Theory Seminar	5
FILM 194D	Film History Seminar	5
FILM 194E	International Cinemas	5
FILM 194F	Film and the Other Arts	5
FILM 194G	New(s) Media	5
FILM 194S	Special Topics Seminar	5
FILM 196A	Senior Project in Narrative Production	5
FILM 196B	Senior Project in Screenwriting	5
FILM 196C	Senior Documentary Workshop	5
FILM 197	Senior Digital Media Workshop	5

Comprehensive Requirement

Senior Seminar

Seniors in the general film and digital media major satisfy the comprehensive requirement with a senior seminar (courses in the FILM 194 series).

FILM 194A	Film Theory Seminar	5
FILM 194B	Electronic Media Theory Seminar	5
FILM 194C	New Media Theory Seminar	5
FILM 194D	Film History Seminar	5
FILM 194E	International Cinemas	5
FILM 194F	Film and the Other Arts	5
FILM 194G	New(s) Media	5
FILM 194S	Special Topics Seminar	5

Planners

Plan One is a guideline for students committed to the major early in their academic career and interested in pursuing a concentration; Plan Two is a guideline for students considering the major after their freshman year.

Students who are interested in the production concentration, the critical studies concentration, or the integrated critical practice concentration should consider Plan One to be better prepared for the application process to the concentrations. However, four-year students following Plan Two may also be able to pursue a concentration and still meet their expected graduation term.

*Students who completed FILM 20A in UCSC Summer Session or have an approved substitution will be given enrollment priority for an additional upper-division elective. These students will attend a declaration workshop to create an academic plan and declare the pre-major in fall quarter.

**Students who earned a C or better in the fall offering of FILM 20A attend a winter declaration workshop to create an academic plan and declare the pre-major. Students will be

admitted to the major at the end of winter quarter after passing FILM 20C with a C or better.

***The following general education requirements cannot be satisfied with Film and Digital Media courses: MF, SI, SR, TA, C

Critical Studies Concentration

The critical studies concentration provides a more rigorous pathway than the general major and offers classes specifically reserved for seniors who have exceptional abilities. Students are eligible to apply for the critical studies concentration in spring quarter of their junior year, provided they have completed FILM 120 and at least three other upper-division critical studies classes. Applicants must already be declared film and digital media majors in good academic standing.

Students will be asked to submit the following application materials:

- a completed application form
- a one-page statement of purpose
- a sample essay
- a FDM faculty statement of support (submitted directly to the department)

Application materials and instructions are available at the Film and Digital Media Department office. Applications are reviewed by a committee of film and digital media critical studies faculty. Admission to the critical studies concentration will be granted to students who have excellent grades in film and digital media courses, an outstanding writing sample, a clear statement of purpose, and a strong FDM faculty endorsement. Students may reapply a second time if not accepted, but not later than the first quarter of their senior year. Students accepted in the fall quarter of their senior year are not eligible to propose a student-directed seminar as part of their senior comprehensive requirement.

Course Requirements

Lower-Division Courses

FILM 20A Introduction to Film Studies 5

Two additional 20-level courses:

FILM 20B Introduction to Television Studies 5

FILM 20C Introduction to Digital Media 5

FILM 20P Introduction to Production Technique 5

FILM 20P cannot be used toward declaring the major

Upper-Division Courses

Core Curriculum

Students in the critical studies concentration complete the following required upper-division core curriculum:

FILM 120 Introduction to Media Theory 5

One course from each of the following five groups:

Group 1:

FILM 130 Silent Cinema 5
 FILM 132A International Cinema to 1960 5
 FILM 132B International Cinema, 1960 to Present 5

Group 2:

FILM 134A American Film, 1930-1960 5
 FILM 134B American Film, 1960-Present 5

Group 3:

FILM 136A Experimental Film and Video 5
 FILM 136B History of Television 5
 FILM 136C Visual Culture and Technology: History of New Media 5
 FILM 136D Documentary Film and Video 5

Group 4:

FILM 165A Film, Video, and Gender 5
 FILM 165B Race on Screen 5
 FILM 165C Lesbian, Gay, and Queer Film and Video 5
 FILM 165D Asian Americans and Media 5
 FILM 165E Chicana/o Cinema, Video 5
 FILM 165G Gender and Global Cinema 5

Group 5:

FILM 187 Advanced Topics in Television Studies 5
 FILM 189 Advanced Topics in Digital and Electronic Media Studies 5

And three courses to satisfy the senior comprehensive requirement:

One course from the following:

FILM 194A Film Theory Seminar 5
 FILM 194B Electronic Media Theory Seminar 5
 FILM 194C New Media Theory Seminar 5
 FILM 194D Film History Seminar 5
 FILM 194E International Cinemas 5
 FILM 194F Film and the Other Arts 5
 FILM 194G New(s) Media 5
 FILM 194S Special Topics Seminar 5

Plus the following course:

FILM 199 Tutorial 5

FILM 199 supervised independent study for thesis or student-directed seminar preparation

Plus one of the following courses:

FILM 192 Directed Student Teaching 5
 FILM 195 Senior Thesis/Project 5

Electives

Two upper-division elective courses are to be chosen from the following:

- up to two additional upper-division critical studies courses in film and digital media (see Electives for the Integrated Critical Practice Concentration for a list of upper-division critical studies courses)
- up to one upper-division course in film and digital media production (see the Production Concentration for a list of upper-division production courses)
- up to one upper-division course offered by other departments; course substitutions must be pre-approved by the Film and Digital Media Department

FILM 194G	New(s) Media	5
FILM 194S	Special Topics Seminar	5

Plus the following course:

FILM 199	Tutorial	5
----------	----------	---

Plus one of the following courses:

FILM 192	Directed Student Teaching	5
FILM 195	Senior Thesis/Project	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major’s upper-division Disciplinary Communication (DC) requirement. Film and digital media majors receive detailed information and guidance about the major's DC requirement from the department's undergraduate adviser.

The DC requirement is met by passing one course from each of the two following categories:

First category

FILM 130	Silent Cinema	5

FILM 194	FILM 199	FILM 192/ FILM 195			
			Two additional 20-level courses:		
			FILM 20B	Introduction to Television Studies	5
			FILM 20C	Introduction to Digital Media	5
			FILM 20P	Introduction to Production Technique	5
<p>*Students who completed FILM 20A in UCSC Summer Session or have an approved substitution will be given enrollment priority for an additional upper-division elective. These students will attend a declaration workshop to create an academic plan and declare the pre-major in fall quarter.</p> <p>**Students who earned a C or better in the fall offering of FILM 20A attend declaration workshop to create an academic plan and declare the pre-major. Students will be admitted to the major at the end of winter quarter after passing FILM 20C with a C or better.</p> <p>***The following general education requirements cannot be satisfied with Film and Digital Media courses: MF, SI, SR, TA, C</p>			<p>FILM 20P cannot be used toward declaring the major</p>		
<p>Production Concentration</p> <p>Admission to the production concentration is selective, based on promise and accomplishment shown in the student's work. After completing FILM 170B (prerequisite for most film/video production courses) students may apply to the production concentration. Students who complete FILM 170A (prerequisite for most digital media production courses) with a B or better are also eligible to pursue the production concentration though they will aim to fulfill the requirements with digital media production courses and other production courses that do not require the FILM 170B prerequisite.</p> <p>FILM 170B students apply by submitting works created in FILM 170B to a portfolio review conducted at the end of each quarter. These student works are reviewed by a committee of film and digital media production faculty. Instructions for the portfolio review are available at the Film and Digital Media Department office. Students should note that production courses are in high demand and that faculty/student ratios and equipment resources limit the number of applicants accepted into the production concentration. Students may apply a second time if not accepted.</p> <p>FILM 170A students who complete the course with a B or better apply by submitting a statement of intent to pursue the digital media pathway in production. Students are required to meet with the undergraduate adviser to discuss their digital media plan prior to submitting their statement of intent.</p> <p>If a student accepted into the production concentration is unable to meet all the requirements for the concentration, they will be advised to complete the graduation requirements for the general major. Application materials and instructions for all production courses are available each quarter online.</p>			<p>Upper-Division Courses</p> <p>Students in the production concentration complete the following required upper-division core curriculum:</p> <p>FILM 120 Introduction to Media Theory 5</p> <p>Plus one of the following courses:</p> <p>FILM 170A Fundamentals of Digital Media Production 5</p> <p>FILM 170B Fundamentals of Film and Video Production 5</p> <p>FILM 170A: prerequisite for most digital media production courses</p> <p>FILM 170B: prerequisite for most film/video production courses</p>		
<p>Course Requirements</p> <p>Lower-Division Courses</p> <p>FILM 20A Introduction to Film Studies 5</p>			<p>Upper-Division Production Courses</p> <p>Two upper-division film and digital media production courses from the following:</p> <p>FILM 150 Screenwriting 5</p> <p>FILM 151 Film Directing 5</p> <p>FILM 170A Fundamentals of Digital Media Production 5</p> <p>FILM 170B Fundamentals of Film and Video Production 5</p> <p>FILM 171A Sound 5</p> <p>FILM 171C Special Topics Workshop: Found Footage 5</p> <p>FILM 171D Social Information Spaces 5</p> <p>FILM 171F Special Topics Workshop: Autobiographical Film 5</p> <p>FILM 171S Special Topics in Film and Digital Media Production 5</p> <p>FILM 172 Narrative Video Workshop 5</p> <p>FILM 173 Narrative Digital Media Workshop 5</p> <p>FILM 175 Documentary Video Workshop 5</p> <p>FILM 176 Experimental Video Workshop 5</p> <p>FILM 177 Digital Media Workshop: Computer as Medium 5</p> <p>FILM 178A Personal Computers in Film and Video 5</p> <p>FILM 178B Advanced Personal Computers in Film and Video 5</p> <p>FILM 179A Special Topics in Animation 5</p> <p>FILM 179B Documentary Animation Workshop 5</p>		

If FILM 170A is taken as the prerequisite for the digital media courses, FILM 170B may be used to satisfy one of the two other required upper-division production course requirements. If 170B is taken as the prerequisite for the film/video courses, FILM 170A may be used to satisfy one of the two other required upper-division production course requirements.

Two critical studies courses taken from two of the three following groups:

Group 1:

FILM 130	Silent Cinema	5
FILM 132A	International Cinema to 1960	5
FILM 132B	International Cinema, 1960 to Present	5

Group 2:

FILM 134A	American Film, 1930-1960	5
FILM 134B	American Film, 1960-Present	5

Group 3:

FILM 136A	Experimental Film and Video	5
FILM 136B	History of Television	5
FILM 136C	Visual Culture and Technology: History of New Media	5
FILM 136D	Documentary Film and Video	5

One course from the following to satisfy the senior comprehensive requirement:

FILM 194A	Film Theory Seminar	5
FILM 194B	Electronic Media Theory Seminar	5
FILM 194C	New Media Theory Seminar	5
FILM 194D	Film History Seminar	5
FILM 194E	International Cinemas	5
FILM 194F	Film and the Other Arts	5
FILM 194G	New(s) Media	5
FILM 194S	Special Topics Seminar	5
FILM 196A	Senior Project in Narrative Production	5
FILM 196B	Senior Project in Screenwriting	5
FILM 196C	Senior Documentary Workshop	5
FILM 197	Senior Digital Media Workshop	5

Electives

Four upper-division elective courses are to be chosen from the following:

- up to two additional upper-division film and digital media production courses (FILM 150 through FILM 179B, see complete list above)
- at least two additional upper-division film and digital media critical studies courses (see Electives for the Integrated Critical Practice Concentration for a list of upper-division critical studies courses)
- up to two upper-division critical studies or production elective courses from another department or another

institution; course substitutions must be pre-approved by the Film and Digital Media Department.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. Film and digital media majors receive detailed information and guidance about the major's DC requirement from the department's undergraduate adviser.

The DC requirement is met by passing one course from each of the two following categories:

First category

FILM 130	Silent Cinema	5
FILM 132A	International Cinema to 1960	5
FILM 132B	International Cinema, 1960 to Present	5
FILM 134A	American Film, 1930-1960	5
FILM 134B	American Film, 1960-Present	5

Second category

FILM 194A	Film Theory Seminar	5
FILM 194B	Electronic Media Theory Seminar	5
FILM 194C	New Media Theory Seminar	5
FILM 194D	Film History Seminar	5
FILM 194E	International Cinemas	5
FILM 194F	Film and the Other Arts	5
FILM 194G	New(s) Media	5
FILM 194S	Special Topics Seminar	5
FILM 196A	Senior Project in Narrative Production	5
FILM 196B	Senior Project in Screenwriting	5
FILM 197	Senior Digital Media Workshop	5
FILM 196C	Senior Documentary Workshop	5

Comprehensive Requirement

Seniors in the production concentration satisfy the comprehensive requirement with one of the following courses:

FILM 194A	Film Theory Seminar	5
FILM 194B	Electronic Media Theory Seminar	5
FILM 194C	New Media Theory Seminar	5
FILM 194D	Film History Seminar	5
FILM 194E	International Cinemas	5
FILM 194F	Film and the Other Arts	5
FILM 194G	New(s) Media	5
FILM 194S	Special Topics Seminar	5
FILM 196A	Senior Project in Narrative Production	5
FILM 196B	Senior Project in Screenwriting	5
FILM 196C	Senior Documentary Workshop	5
FILM 197	Senior Digital Media Workshop	5

Planners

The following are two recommended academic plans for students pursuing the production concentration for the film and digital media major. Plan One is a guideline for students committed to the major early in their academic career; Plan Two is for students considering the major.

Students who are interested in the production concentration should consider Plan One to be better prepared for application to production studio classes in their junior year. However, four-year students following Plan Two should be able to pursue a concentration and still meet their expected graduation term. FILM 20A is not guaranteed to any incoming frosh and most four-year students will use Plan Two as a guideline.

Plan One

Year	Fall	Winter	Spring
1st (frosh)	<u>FILM 20A</u>	FILM lower-division requirement	FILM lower-division requirement

*Students who completed FILM 20A in UCSC Summer Session or have an approved substitution will be given enrollment priority for an additional upper-division elective. These students will attend a declaration workshop to create an academic plan and declare the pre-major in fall quarter.

**Students who earned a C or better in the fall offering of FILM 20A attend declaration workshop to create an academic plan and declare the pre-major. Students will be admitted to the major at the end of winter quarter after passing FILM 20C with a C or better.

***The following general education requirements cannot be satisfied with Film and Digital Media courses: MF, SI, SR, TA, C

Integrated Critical Practice Concentration

The integrated critical practice concentration (ICPC) provides a more rigorous pathway than the general major and offers classes specifically reserved for seniors with exceptional abilities in both critical studies and production who seek to combine creative and scholarly work. Students are eligible to apply for the integrated critical practice concentration in the last quarter of their junior year, provided they have completed FILM 120 and at least three other upper-division critical studies classes. Students not already admitted to the

production concentration should apply simultaneously to the production and ICPC concentration. Acceptance into the production concentration is a required pre-condition for acceptance into the integrated critical practice concentration. Applicants must already be declared film and digital media majors in good academic standing.

Students will be asked to submit the following application materials:

- a completed application form
- a one-page statement of purpose
- a sample essay
- a FDM faculty statement of support (submitted directly to the department)

Application materials and instructions are available at the Film and Digital Media Department Office. Student application materials are reviewed by a committee of film and digital media faculty. Admission to the integrated critical practice concentration will be granted to students who have excellent grades in film and digital media courses, an outstanding writing sample, a clear statement of purpose outlining a senior project that integrates critical studies and production work, and a strong FDM faculty endorsement. Students may apply a second time if not accepted, but not later than the first quarter of their senior year.

Course Requirements

Lower-Division Courses

FILM 20A Introduction to Film Studies 5

Two additional 20-level courses:

FILM 20B Introduction to Television Studies 5

FILM 20C Introduction to Digital Media 5

FILM 20P Introduction to Production Technique 5

FILM 20P cannot be used toward declaring the major

Upper-Division Courses

Students in the integrated critical practice concentration complete the following required upper-division core curriculum:

FILM 120 Introduction to Media Theory 5

One course from each of the following five groups:

Group 1:

FILM 130 Silent Cinema 5

FILM 132A International Cinema to 1960 5

FILM 132B International Cinema, 1960 to Present 5

Group 2:

FILM 134A American Film, 1930-1960 5

FILM 134B American Film, 1960-Present 5

Group 3:

FILM 136A Experimental Film and Video 5

FILM 136B History of Television 5

FILM 136C Visual Culture and 5

Technology: History of New Media

FILM 136D Documentary Film and Video 5

Group 4:

FILM 170A Fundamentals of Digital Media Production 5

FILM 170B Fundamentals of Film and Video Production 5

Group 5:

FILM 194A Film Theory Seminar 5

FILM 194B Electronic Media Theory Seminar 5

FILM 194C New Media Theory Seminar 5

FILM 194D Film History Seminar 5

FILM 194E International Cinemas 5

FILM 194F Film and the Other Arts 5

FILM 194G New(s) Media 5

FILM 194S Special Topics Seminar 5

Two courses to satisfy the senior comprehensive requirement:

The following course:

FILM 199 Tutorial 5

Plus one of the following courses:

FILM 195 Senior Thesis/Project 5

FILM 196A Senior Project in Narrative Production 5

FILM 196B Senior Project in Screenwriting 5

FILM 196C Senior Documentary Workshop 5

FILM 197 Senior Digital Media Workshop 5

Electives

And five upper-division elective courses to be chosen from the following:

Two upper-division critical studies courses in film and digital media chosen from the following:

FILM 160 Film Genres 5

FILM 162 Film Authors 5

FILM 165A Film, Video, and Gender 5

FILM 165B Race on Screen 5

FILM 165C Lesbian, Gay, and Queer Film and Video 5

FILM 165D Asian Americans and Media 5

FILM 165E Chicana/o Cinema, Video 5

FILM 165G Gender and Global Cinema 5

FILM 168 National Cinema and Culture 5

FILM AND DIGITAL MEDIA MINOR

The minor in film and digital media offers a foundation in visual culture and contributes important scholarly techniques of value to other disciplines. Students earn a minor in film and digital media by completing eight courses: FILM 20A and FILM 20B or FILM 20C, and six upper-division courses including three from the core curriculum of the general major and three electives. There is no production component in the minor, nor is there a comprehensive requirement.

DECLARING THE FILM AND DIGITAL MEDIA MINOR

Students who pass FILM 20A, FILM 20B or FILM 20C are eligible to declare the film and digital media minor.

Course Requirements

Lower-Division Courses

Complete the following course:		
FILM 20A	Introduction to Film Studies	5
Plus one of the following courses:		
FILM 20B	Introduction to Television	5

	Studies	
FILM 20C	Introduction to Digital Media	5

Upper-Division Courses

Students in the minor must complete the following upper-division core curriculum.

One course from each of the following three groups:

Choose one of the following courses:

FILM 130	Silent Cinema	5
FILM 132A	International Cinema to 1960	5
FILM 132B	International Cinema, 1960 to Present	5

Plus one of the following courses:

FILM 134A	American Film, 1930-1960	5
FILM 134B	American Film, 1960-Present	5

Plus one of the following courses:

FILM 136A	Experimental Film and Video	5
FILM 136B	History of Television	5
FILM 136C	Visual Culture and Technology: History of New Media	5
FILM 136D	Documentary Film and Video	5

And three upper-division elective courses to be chosen from the following:

Any three additional upper-division film and digital media critical studies courses other than production studio courses (FILM 150, FILM 151, FILM 170A through FILM 179B) that have not been used to satisfy the above upper-division core curriculum. One of the electives may be substituted from another department or institution. Course substitutions must be approved by the Film and Digital Media Department.

FILM 130	Silent Cinema	5
FILM 132A	International Cinema to 1960	5
FILM 132B	International Cinema, 1960 to Present	5
FILM 134A	American Film, 1930-1960	5
FILM 134B	American Film, 1960-Present	5
FILM 136A	Experimental Film and Video	5
FILM 136B	History of Television	5

FILM 194S	Special Topics Seminar	5

Graduate Program

The Doctor of Philosophy (Ph.D.) program in film and digital media challenges the traditionally conceived borders between creative and critical practice. The program enables dialogue between creative practice and theoretical knowledge as related forms of intellectual work and provides the conditions for students to realize a wide range of possible projects, including those that exist across the traditional divides of critical studies and production.

SOCIAL DOCUMENTATION M.F.A.

Introduction

The Master's of Fine Arts (M.F.A.) in Social Documentation (SocDoc) is an innovative and unique interdisciplinary two-year program in the Film and Digital Media Department (FDM) that trains students to critically analyze, frame and reflect upon contemporary social issues through the art of documentary media. SocDoc M.F.A. students produce documentary video, photography and other media throughout the program culminating in well-researched, socially engaged and aesthetically crafted thesis project. In a rapidly expanding and changing field, the Social Documentation M.F.A. invites students to investigate critical social issues through an interdisciplinary approach that fuses arts based, social science and humanities research methods to the art of documentary media and storytelling. We don't just tell a story; our students go beyond the story to place individuals in context and struggles in history, deepening the public's understanding of the societies in which we live and with which we connect. Documentaries produced in the program have called attention to a range of under-recognized communities, problems, and structural inadequacies.

Upon completion of the program, Master's of Fine Arts graduates will be qualified to enter a range of documentary-related professions. Degree holders may work within industries such as public broadcasting, as independent producers and artists, at archives or museums, or within organizations committed to exploring the relationships

between media and social change. As a terminal degree, M.F.A. degree holders are also qualified to teach arts, documentary and/or digital media at institutions of higher learning.

Objectives

The Social Documentation M.F.A. program aims to train graduate students in critical thinking, social science analysis, arts-based approaches, and ethical standards for engaging with and documenting underrepresented communities. Additionally, students receive training in video production, animation and new media. In supplement to this broad curriculum, the FDM Department offers one-to-two-day master classes in audio and visual production taught by professionals in the field. The program's adviser structure requires M.F.A. students to work with faculty from FDM and across the UCSC campus, providing students with a broad range of research approaches and aesthetic models for documentary practice. For example, a student may take courses in anthropology, feminist studies, history, literature and sociology wherein they learn social science and humanities research methodologies related to their topic of study. And a student will take a variety of required and elective courses within the Film and Digital Media Department where they will engage with the history and theory of documentary representations and receive technical instruction and professionalization in a variety of production and post-production techniques.

The core curriculum concentrates on critical approaches to the production of documentary media and on the role of documentary in framing and effecting social change. M.F.A. candidates may work in film or video; in photography (a book, a photo essay, gallery exhibition and/or time-based media); animation and multimedia; audio productions; and/or transmedia and web-platform projects. Graduates are expected to generate work that will have an impact on the world outside the academy and in the public realm. The M.F.A. thesis project, which constitutes the culmination of the two years of study, is to be given a public exhibition and becomes the springboard for continuing work after graduation.

Requirements

Course Requirements

The Social Documentation M.F.A. program offers a required and foundational core curriculum in the theory, history and practice of social documentary. Students work with three faculty advisers to design an individualized course of study that supplements the core curriculum with classes that support the student's specific project, both in terms of content and technical production. Toward that end, students take elective courses in their area of interest in the social sciences and/or humanities, write and develop a written thesis, and then create a final documentary media project.

A total of 72 credits is required to complete the SocDoc M.F.A. Required courses include seminars on social documentary history; practice, theory, and social science research; and technical instruction on production and post-

production processes and techniques. Full-time enrollment is required.

First Year (30 credits):

SOCD 200	Approaches to Social Documentation	5
SOCD 201A	Introduction to Documentary Field Production and Editing	5
SOCD 201B	Advanced Documentary Field Production and Editing	5
SOCD 201C	Project Planning for the Social Documentary	5
SOCD 202	Multiple-Platform Social Documentary Production	5
SOCD 203	Documentary Research Methods and Social Science Representation	5

Second Year (30 credits):

SOCD 204	Ethnographic Writing and Social Documentation	5
SOCD 293	Studies and Practice for Social Documentation, Filmmaking, and New Media	5
SOCD 294A	Production/Analysis/Editing	5
SOCD 294B	Production/Analysis/Editing	5
SOCD 294C	Production/Analysis/Editing	5
SOCD 295	Project Completion	5

Additional Course Requirements

Electives (12 credits)

In addition to the required courses above, 12 credits of electives (offered by departments) are identified individually in consultation with the director of Graduate Studies and faculty advisers. SocDoc students choose elective courses based on their research needs and interests and will be advised to take graduate elective courses offered by their thesis advisers. Students may also elect to take independent studies with their advisers as a form of concentrated study in a specialized area.

Advancing to Candidacy

To satisfy requirements for the M.F.A. degree, a student must complete and pass all of the required first-year courses and electives, assemble a committee of three advisers, develop a thesis proposal and successfully pass a qualifying examination (QE). The thesis proposal serves as the basis for the QE and includes: a description of the subject to be documented, a treatment or narrative outline, a work plan including budget and timeline, and a preliminary annotated bibliography and filmography/videography of related works.

Approval of the written proposal and satisfactory completion of the qualifying examination is a prerequisite for advancement to further coursework or fieldwork on the master's project. The successful pre-qualifying examination proposal should address the following questions:

- What is the story to be told?
- What is the stylistic approach?
- What is the social analysis that will guide, inform, and underwrite the story?
- How will that analysis be enacted in the documentary?
- What kinds of evidence will be generated to persuade the audience that the analysis is accurate?
- How will the documentary use social analysis to make the personal political, and how will it move from analysis to critique?

The second year is focused on completion of the final documentary project, required for the M.F.A. degree. This project must reflect original research and creative activity while demonstrating a command of the field or topic of study. With an understanding of budgetary, equipment, and time limitations, students' projects should reflect a level of quality appropriate for publication, exhibition, or broadcast (including digital/web-cast).

Typically, the expectation in each medium is as follows:

Documentary Film/Video. One 20-minute documentary suitable for professional distribution and public exhibition.

Documentary Photography. One major exhibition on or off campus with a minimum of 10-20 images with text, and/or a 10-minute multimedia presentation and/or a publication-ready book of photographs and essay(s).

Documentary Animation. One complete documentary animation suitable for professional distribution and public exhibition.

Transmedia Projects. One complete documentary transmedia project suitable for professional distribution and public exhibition.

Audio Documentary/Sound Recording. One 20-30-minute documentary suitable for radio broadcast or museum/public installation.

The final M.F.A. critique consists of a presentation and discussion of the student's thesis work with their three advisers. In addition, every project must be accompanied by a written M.F.A. thesis describing its relationship to its field and must document its research via field notes, bibliographies, archival searches, filmographies, videographies, and photography searches. Final deliverables also include a basic website for the thesis project along with production stills, a press kit, and a draft civic engagement campaign. A public presentation of the project will complete graduation requirements. All materials will be filed in digital form and archived for future reference and access. All final projects, in every medium, must be submitted in the formats specified by the director of Graduate Studies.

Applying for Graduation

You must submit an Application for the M.F.A. to your graduate coordinator for review by the end of the second week of the quarter in which you intend to receive the certificate. The graduate coordinator will forward your application to the Graduate Division.

Please see Registration Requirements for all Graduate Degrees for details about registration requirement the quarter you intend to graduate.

For additional forms and information please visit the UCSC Graduate Division website.

FILM AND DIGITAL MEDIA PH.D.

Introduction

Focusing on a diverse range of cultural production that includes cinema, television, video art, and Internet-based media, Ph.D. students interrogate the historical, aesthetic, political, ideological, and technological aspects of these media forms across a range of international contexts, investigating their points of connection and convergence as well as their relationship to broader cultural and historical change. The program thus prepares students for intellectually informed creative practice as well as theoretical and critical production in a range of environments, not limited to traditional academic contexts.

Advancement to Candidacy

Course Requirements

- A minimum of 108 units of study in coursework at UCSC. Residence for a minimum of six quarters.
- Applicants who already hold an M.A. or M.F.A. degree may petition to waive up to 30 credits of coursework; such a waiver is subject to the approval of the director of Graduate Studies.
- Residence for a minimum of six quarters.
- When in residence, students will take a minimum of 36 credits per year until advancement to candidacy.
- First year students will be required to take the three foundational courses (FILM 200A-FILM 200B-FILM 200C), plus at least two film and digital media graduate elective courses.*
- Second year students must then take at least four film and digital media graduate elective courses.*
- Students are not permitted to enroll in FILM 295 (Directed Reading) classes during their first year and are limited to one during their second year, unless they enter the program with an M.A. or M.F.A.

- Third year students arrange three Directed Readings (FILM 295) to prepare for the three topic areas of their qualifying examination.
- Prior to advancing to candidacy, students will continue to meet the minimum number of credits with other 2-5 credit elective courses as appropriate.
- A student will thus take at least nine film and digital media graduate courses over the degree, not including FILM 295, FILM 297 and FILM 299 classes.
- The remaining course units may be selected from film and digital media graduate courses or graduate courses other departments, subject to approval from the student's faculty adviser.
- Students must obtain permission from the Director of Graduate Studies, their faculty adviser to take advanced undergraduate courses.
- Students are expected to complete at least one year of supervised teaching as part of the degree requirements.

*Non-film and digital media graduate courses that are taught by film and digital media faculty can count as film and digital media graduate electives. Graduate electives in this category are listed in the annual and quarterly courses posted on the Programs page on department's website, select Courses.

Foreign Language Requirements

Students must demonstrate proficiency in a language other than English. This may include a computer programming language instead of a natural language when such a language is integral to the student's field of study. The language requirement may be satisfied in one of two ways:

- by passing an upper-division course in a language related to the student's research
- by passing a reading proficiency test administered by a qualified person approved by the director of Graduate Studies.

A student must pass the language requirement before taking Ph.D. qualifying examinations. There are three exceptions. (Documentation for the exception must be received and approved by the director of Graduate Studies at least two months before the qualifying examination.)

- The "foreign" language requirement may be waived for a non-English native speaker who has passed the proficiency test in English required for admission.
- The requirement may be waived for a student who is a native speaker of another language in addition to English. The student must submit a statement to the director of Graduate Studies attesting to their proficiency in the additional native language.
- The requirement may be waived if a student has proof of proficiency in a language other than English in the form of a language major or minor from recent undergraduate or master's level education or

equivalent. This must have been completed within the past five years at an accredited institution.

Teaching Requirement

Students are expected to complete at least one year of supervised teaching as part of the degree requirements.

Pre-Qualifying Requirements

During the first year of study in FILM 200A-FILM 200B-FILM 200C classes, students will be introduced to the methodologies of developing a critical practice approach. This will occur while students simultaneously strengthen, with the appropriate elective classes, areas of theory or practice that pertain to their focus.

During the second year, the student will focus on selecting classes from the film and digital media elective series numbered FILM 200-FILM 289. Students will also be encouraged to take electives from other graduate programs on campus.

At the end of the second year, students undergo a second year review which functions as the master's examination. Students will submit four to five coursework projects for the examination. One of these must be the final project from FILM 200C. Students will also submit a statement about that work and its contexts, which will form the basis for oral examination questions by faculty members.

Students may nominate faculty members to the committee. The student's faculty adviser and the Director of Graduate Studies will assemble the committee, taking into account the student's nominations. The committee will have a minimum of three faculty members, at least two of whom must be from the film and digital media faculty. One of those two must be the faculty adviser, who will chair the meeting. The committee must also include the Director of Graduate Studies. (The Director of Graduate Studies will not necessarily sit on the student's committee for future exams/reviews.) The examination is closed; only the student and the faculty committee will be present.

For students entering without a master's degree, the committee will recommend one of three grades for the M.A. examination: fail, pass, or pass with permission to proceed. Students who fail may retake the oral component of the examination one time. A student with a pass only may leave the program with the degree of master of arts. Students who pass with permission to proceed may enter the third year of coursework toward the Ph.D. For students entering with a master's degree, the committee will discuss the result of the review and its recommendations for further progress in the program, including the timeline to the Ph.D. qualifying examination (QE).

Qualifying Examination

The third year will be spent developing three qualifying examination topics that will lead to the dissertation in close consultation with the student's faculty adviser. (This may occur earlier for students who enter with a master's degree.) Students work with three faculty members to develop three

distinct topic areas with a corresponding bibliography/mediagraphy in FILM 295 (Directed Reading). Topic areas must be pre-approved by the director of Graduate Studies who will ensure that the breadth requirement is met.

Students will also begin assembling a qualifying examination committee. The QE committee will be comprised of four faculty members, at least one of whom must be from another discipline at UCSC or from another campus. Students will also nominate a faculty member to chair the examination committee. The chair should be a tenured faculty member from the Film and Digital Media Department, holding a Ph.D., but should not be the student's primary faculty adviser or the person who will chair the dissertation. The composition of the QE committee must be approved by the Graduate Division and must be submitted to the director of Graduate Studies at least five weeks prior to the written examination.

The qualifying examination will typically be scheduled for the fall of the fourth year and no later than the end of the fourth year. (Students who enter with a master's degree may be eligible to take the qualifying examination before their fourth year.) The QE will consist of a written examination and an oral examination. A student who fails the Ph.D. qualifying examination will be permitted to re-take it one time. During the qualifying examination quarter, students may enroll in up to two FILM 299 (Thesis Research) classes with members of their committee.

Post-Qualifying Requirements

No later than two academic quarters after successfully passing the qualifying examination, students must submit a Dissertation Prospectus. The candidate's qualifying examination committee must approve this prospectus. After the dissertation prospectus has been approved, the student will schedule a dissertation colloquium open to all film and digital media faculty and graduate students. The colloquium can be scheduled before or shortly after the official advancement to candidacy.

Students will advance to candidacy once they have successfully:

- Completed all required coursework with satisfactory grade
- Satisfied the language requirement
- Passed the Ph.D. qualifying examination
- Submitted a dissertation prospectus approved by their dissertation committee
- Organize an approved dissertation committee, through the dissertation nomination form.

Dissertation

Dissertation

Completion of the Degree

Upon successful advancement to candidacy, students must then complete the following requirements for the Ph.D.

The dissertation, or Ph.D. thesis, is to be an original contribution of high quality to the field of film and digital media. If a student's thesis contains a substantial creative component, the thesis project must also include a written component of no less than 75 pages. The dissertation must be approved by a committee consisting of a minimum of three faculty members, at least two must be from the film and digital media faculty. If the dissertation director does not hold a Ph.D. degree, then the majority of the remaining committee members must hold Ph.D.s.

The Ph.D. candidate shall submit the dissertation providing a minimum of 45 days for the committee members to review it. Once the committee has deemed it ready to defend, the candidate will work with the department and committee to schedule the oral dissertation defense.

Dissertation Defense

The oral defense will be comprised of a brief introduction of the dissertation's form and content, and an articulation of the scholarly and artistic intervention it forges; the student will then answer questions posed by their dissertation committee. Invited members of the academic community may attend the defense, but the discussion will remain among the candidate and the committee.

Once the student has passed the oral dissertation defense, responds to any questions or suggestions for revisions, and has the dissertation approved by the committee, they will be eligible to "Announce Candidacy for Ph.D." by submitting the dissertation and required documents to the Division of Graduate Studies.

Academic Progress

Normative time for completion of the program is six years. The first two years of the program are primarily devoted to coursework. Preliminary exams for the master's degree occur in the spring of the second year. By the end of the third year, students should have formulated a dissertation topic and proposal deriving from their work in that year and should have nominated a Ph.D. qualifying examination committee and dissertation committee. Qualifying examinations for advancement to Ph.D. candidacy typically occur in the fall of the fourth year. These are approximate timelines, subject to variation depending on previous degree(s), transfer credits, substitutions, progress in program, leaves and/or other factors.

Applying for Graduation

You must submit an application for the Ph.D. to your graduate coordinator for review by the end of the second week of the quarter in which you intend to receive the certificate. The graduate coordinator will forward your application to the Graduate Division.

Please see Registration Requirements for all Graduate Degrees for details about registration requirement the quarter you intend to graduate.

For additional forms and information please visit the UCSC Graduate Division website.

FILM AND DIGITAL MEDIA DESIGNATED EMPHASIS

Introduction

UC Santa Cruz graduate students enrolled in doctoral programs may obtain a designated emphasis in film and digital media as part of their Ph.D. degree.

Requirements

Students must meet the following requirements in order to obtain the designated emphasis:

Committee Composition and Departmental Approvals

Secure approval from a member of the film and digital media core faculty to serve as the adviser for the designated emphasis.

Course Requirements

Successfully complete four graduate courses (not independent studies) taught by either core or affiliated faculty of the film and digital media Ph.D. program. The courses must be pre-approved by the student's designated emphasis adviser.

Writing, Research and/or Teaching Requirements

Submit a significant piece of writing, or a project that includes both writing and creative practice, that demonstrates competence in the field of film and digital media. A writing submission could take the form of a seminar paper or dissertation chapter. A writing/creative project may be constituted from a range of possible media such as film, video, web-based or other digital media. The submitted project must meet the approval of the student's film and digital media adviser.

SOCIAL DOCUMENTATION DESIGNATED EMPHASIS

Introduction

UC Santa Cruz graduate students enrolled in doctoral programs may obtain a designated emphasis in social documentation as part of their doctoral or master of fine arts degree.

Requirements

Students must meet the following requirements in order to obtain the designated emphasis:

Committee Composition and Departmental Approvals

Secure approval from a member of the Film and Digital Media (FDM) faculty to serve as the adviser for the designated emphasis.

Have one faculty member from the FDM faculty serve on the student's qualifying examination committee or dissertation committee.

Course Requirements

Successfully complete four graduate courses within the Social Documentation Program curriculum. The courses must be pre-approved by the student's FDM faculty adviser. In most cases, these courses would include SOCD 200, SOCD 202, and two others, but may be adapted to fit the needs of particular students.

Writing, Research and/or Teaching Requirements

Submit a significant piece of documentary work that demonstrates competence in the field of social documentation. This project could consist of a digital video or photography project, or possibly an audio or web-based piece, focused on the student's area of study and thus constituting a parallel investigation into the subject of the Ph.D. or M.F.A. dissertation. In certain circumstances, a documentary project on a subject other than the dissertation could be approved, but generally that would not be the case. The submitted project must meet the approval of the student's FDM faculty adviser.

History of Art and Visual Culture

D-201 Porter College
(831) 459-4564
havic@ucsc.edu
<http://havic.ucsc.edu>

PROGRAMS OFFERED

History of Art and Visual Culture B.A. (p. 1)

History of Art and Visual Culture Minor (p. 10)

Visual Studies Ph.D. (p. 11)

Visual Studies Designated Emphasis (p. 13)

Courses for Non-Majors

History of Art and Visual Culture (HAVC) courses numbered 1-89 are lower-division introductory courses for non-majors. Most upper-division HAVC courses are also open to non-majors, but we recommend first completing at least one year of university coursework before taking upper-division classes.

Undergraduate Program

In the History of Art and Visual Culture (HAVC) Department, students study the production, use, form, and reception of visual products and cultural manifestations past and present. Objects of study include paintings, sculptures, and architecture, which are within the traditional purview of art history, as well as art and non-art objects and visual expressions that sit beyond disciplinary boundaries. The HAVC Department offers courses covering a wide variety of material from the cultures of Africa, the Americas, Asia, Europe, the Mediterranean, and the Pacific Islands, including media as diverse as ritual, performative expression, bodily adornment, landscape, the built environment, installation art, textiles, manuscripts, books, photography, film, video games, apps, websites, and data visualizations.

HAVC students at UC Santa Cruz investigate complex questions concerning the social, political, economic, religious, and psychological impact of images from the perspective of their producers, users, and viewers. Visual objects play a central role in the formation of values and beliefs, including the perception of gender, sexuality, ethnicity, race, and class. Through attentive historical study and close analysis, students are taught to recognize and assess these systems of value, and are introduced to theoretical and methodological frameworks for future research.

HISTORY OF ART AND VISUAL CULTURE, B.A.

Information and Policies

Introduction

The History of Art and Visual Culture (HAVC) curriculum guides students in acquiring skill in critical thinking about art and visual culture, leading to a bachelor of arts (B.A.) degree. Each student who chooses to major in HAVC devises an individual study plan with a faculty adviser. The lower-division HAVC courses numbered 1-99, intended for general education students and prospective majors, provide an introduction to the field of visual culture according to geographic areas and visual traditions within those areas. Upper-division HAVC courses numbered 100-189 cover a broad range of issues in various aspects of world cultures from earliest times to the present. Advanced upper-division courses focus on selected fields, topics, and methods. The most advanced HAVC courses, numbered in the 190-191 series, are taught in seminar format. Students also have the opportunity to take independent study courses and write senior theses.

Academic Advising for the Program

Undergraduate Adviser

The undergraduate adviser offers specific information about navigating through the program and the curriculum and assists students with requirements, prerequisites, policies and procedures, learning support, scholarships, and special opportunities for undergraduate research. Please contact the HAVC undergraduate adviser at havic@ucsc.edu.

Transfer students should also consult the Transfer Information and Policy section below.

Faculty Advisers

Faculty are the best resource for learning about the philosophies and foundations of history of art and visual culture. Faculty advisers work individually with students to develop a specific course of study, recommend additional courses of interest, and discuss long-term career goals including education beyond the baccalaureate. A faculty adviser is assigned to each student by the undergraduate adviser during the declaration of major meeting. Students may change to an adviser who specializes in their field of interest within HAVC.

Getting Started in the Major

Lower-Division Coursework

It is recommended that students begin by taking four lower-division HAVC courses from four different geographic regions.

Languages

All majors are encouraged to study at least one foreign language. Graduate programs in visual culture, art history, and other related disciplines generally require competence in one or more languages beyond English. Students are encouraged to consult with their faculty adviser to discuss an appropriate course of language study.

Program Learning Outcomes

Graduates from the history of art and visual culture B.A program will have demonstrated the following:

Program Learning Outcome (PLO) 1: Breadth of Cultural Knowledge

Students will be able to demonstrate an appreciation for, and foundation in, visual studies grounded in a range of historical, social, cultural, and ideological perspectives.

PLO 2: Critical Thinking

Students will be able to apply critical thinking skills that will enable them to analyze and solve problems through observation, experience, reflection, interpretation, analysis, evaluation, and/or explanation of visual, material, and historical cultural forms and values. Students will demonstrate critical thinking skills through oral and/or written communication.

PLO 3: Research Proficiency

Students will be able to formulate research questions that expand their knowledge of art and visual culture. Students will be able to apply research methods to answer these questions by consulting the current literature and developing independent results through archival, library, or field research.

PLO 4: Written Communication

Students will be able to present clear visual and historical analysis and interpretation in writing. Students will be able to demonstrate standard writing conventions in visual studies appropriate to purpose and context.

Major Qualification Policy and Declaration Process

Major Qualification

To be eligible to declare the major, students must pass two lower-division HAVC courses chosen from two different geographic regions from the lists below:

- History of Art and Visual Culture 10-19 Africa and its Diaspora
- History of Art and Visual Culture 20-29 Asia and its Diaspora
- History of Art and Visual Culture 30-49 Europe and the Americas
- History of Art and Visual Culture 50-69 Mediterranean
- History of Art and Visual Culture 60-69 Native Americas
- History of Art and Visual Culture 70-79 Oceania and its Diaspora

Transfer students should also consult the Transfer Information and Policy section.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student and college of the decision. Students should submit their appeal via email to havc@ucsc.edu.

How to Declare a Major

Students who are eligible to declare the HAVC major must consult with the undergraduate adviser. Please make an appointment or visit during drop-in hours to complete a Petition for Major Declaration and Academic Planning form with the HAVC undergraduate adviser. Students will then be referred to a HAVC faculty adviser to complete the declaration process.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

Transfer students are, however, encouraged to complete some of their lower-division history of art and visual culture requirements prior to transfer. Refer to the ASSIST articulation agreements at www.assist.org for approved lower-division courses offered at community colleges. Please keep in mind that students must complete four lower-division courses from four different geographic regions for the HAVC major requirements.

Transfer credit for lower- or upper-division courses from four-year institutions or community colleges not included in the ASSIST system is evaluated on a case-by-case basis; students must submit a Petition for Transfer Credit, Substitution, or Waiver and course syllabus to the HAVC Department for review.

A student may transfer **up to five** art history courses toward the major, only two of which may be upper-division. HAVC majors must take a minimum of eight regularly scheduled HAVC courses from members of the HAVC faculty.

Transfer students are strongly encouraged to contact the HAVC Department for advisement before enrolling at UCSC.

Getting Started at UCSC as a Transfer Student

Students seeking to declare the HAVC major must consult with the undergraduate adviser. Transfer students must pass two HAVC courses chosen from two different geographical regions (or have completed two art history courses from two different geographical regions from their community college or another four-year institution). Students seeking to declare the HAVC major may make an appointment or visit during drop-in hours to complete a Petition for Major Declaration and Academic Planning form with the HAVC undergraduate adviser. Students will then be referred to a HAVC faculty adviser to complete the declaration process.

Letter Grade Policy

Only courses with grades of C or better can be used to fulfill major requirements. Courses in which you receive a grade of C-, D+, D, D- or F cannot be used to satisfy a major requirement. Courses can also be taken for Pass/No Pass to satisfy your major requirements. Please consult with your college academic adviser or the Office of the Registrar to determine your limits on selecting the Pass/No Pass grading option.

Course Substitution Policy

For the major, a student may transfer **up to five** art history courses taken from other institutions: up to three lower-division courses and up to two upper-division courses.

Students must submit a Petition for Transfer Credit, Substitution, or Waiver and course syllabus to the HAVC Department for review.

Double Majors and Major/Minor Combinations Policy

Study Abroad

The University of California's Education Abroad Program provides an excellent opportunity to take courses related to the history of art and visual culture in a range of locations. The department strongly

encourages HAVC majors and minors to take advantage of this educational opportunity. Successfully completed EAP courses count as in-residence UC credit.

Upon return, you must submit a Petition for Transfer Credit, Substitution, or Waiver to substitute EAP courses for HAVC major requirements (EAP courses do not automatically satisfy major requirements). Petitions are evaluated on a case-by-case basis. We look for evidence that the course(s) provided critical analysis of the class material in its social and cultural context, as well as significant reading and writing requirements. We recommend you retain all relevant documentation (syllabi, reading lists, papers written, etc.) to support your case. We also suggest you consult with your HAVC adviser to plan your EAP courses in advance.

For additional information, visit the UC Education Abroad Program website.

Honors

Honors and Highest Honors in the Major

Highest Honors and Honors are awarded in the History of Art and Visual Culture major to students who have shown a consistently outstanding level of performance throughout their coursework and maintained a superior GPA in the major. These distinctions are earned by only a small percentage of each graduating class. This notation appears on the transcript as well as on the diploma.

- Highest Honors in the major will be awarded to students with a GPA of 3.9 and above in all HAVC courses and with HAVC Department approval*
- Honors in the major will be awarded to students with a GPA of 3.7 and above in all HAVC courses and with HAVC Department approval*

* Department approval is guided by consideration of criteria such as overall performance in HAVC coursework and the number of courses taken for a letter grade.

Honors in the Senior Comprehensive Requirement

All seniors must complete one seminar, courses from the 190–191 series, as their “senior exit” course to satisfy the senior comprehensive requirement. Seminars can be taken for senior exit credit only by permission of the instructor. Within the context of this advanced seminar, students will work under the close supervision of their professor to produce a written project that demonstrates a high level of achievement in research, writing, and critical thinking. Students whose performance is outstanding are eligible for honors in the senior comprehensive.

Careers

The preparation students receive from the bachelor of arts (B.A.) degree in HAVC can lead to successful careers in education, law, business, and social services, in addition to more disciplinary-specific careers in museum curating, art restoration, library and information science, heritage studies, design, criticism, arts education and administration, and advanced studies in architecture, visual culture, and art history.

General Major

Course Requirements

The HAVC major requires four lower-division and nine upper-division courses including the satisfactory completion of the senior comprehensive requirement. Students must take courses in each of the

six different geographic regions to ensure cultural, methodological, and disciplinary breadth.

Lower-Division Courses

Take four courses from four different geographic regions listed below.

HAVC 80 may be used to fulfill a lower-division requirement for one of the following geographic regions: 10s (Africa), 60s (Native Americas), or 70s (Oceania).

HAVC 10 - HAVC 19: Africa and its Diaspora

HAVC 10	Introduction to African Visual Culture	5
---------	--	---

HAVC 20 - HAVC 29: Asia and its Diaspora

HAVC 20	Visual Cultures of Asia	5
HAVC 22	Religion and Visual Culture in China	5
HAVC 24	Southeast Asia Visual Culture	5
HAVC 27	Image and Ideology in Indian Art	5

HAVC 30 - HAVC 49: Europe and the Americas

HAVC 30	Introduction to European Visual Culture	5
HAVC 40	Museum Cultures: The Politics of Display	5
HAVC 41	Introduction to Modern Art	5
HAVC 43	History of Modern Architecture	5
HAVC 44	Designing California: Architecture, Design, and Environment	5
HAVC 45	Photography Now	5
HAVC 46	Introduction to U.S. Art and Visual Culture	5
HAVC 47	Introduction To Contemporary Art	5

Upper-Division Courses**Take this course:**

HAVC 100A	Approaches to Visual Studies	5
-----------	------------------------------	---

Students are recommended to take HAVC 100A during winter quarter of sophomore year. HAVC 100A is a prerequisite for the senior comprehensive requirement. If it is not completed by the end of the junior year, students may have difficulty enrolling in a seminar to fulfill their senior comprehensive, which may delay graduation.

Plus two upper-division geographical regional courses:

Take two upper-division geographical regional courses from two geographical regions listed below not studied as part of the lower-division regional requirement.

HAVC 110 - HAVC 119: Africa and its Diaspora

HAVC 110	Visual Cultures of West Africa	5
HAVC 111	Visual Cultures of Central Africa	5
HAVC 115	Gender in African Visual Culture	5
HAVC 116	African Architecture	5
HAVC 117	Contemporary Art of Africa	5
HAVC 118	Art of the Contemporary African Diaspora	5
HAVC 119	Arts and Politics of African Urban Space	5

HAVC 120 - HAVC 129: Asia and its Diaspora

HAVC 122A	Sacred Geography of China	5
HAVC 122B	Constructing Lives in China: Biographies and Portraits	5
HAVC 122C	Writing in China	5
HAVC 122D	Chinese Landscape Painting	5
HAVC 122F	Bodies in Chinese Culture	5

Concentration in Curation, Heritage, and Museums

This program is for HAVC majors who wish to pursue the study and practice of curation, heritage, and museums. Students will expand on the broad knowledge they gain through the major by means of a variety of historical, theoretical, and practical courses within the domains of curation, museum studies, and critical cultural heritage studies. Students can use the concentration as a launching point toward internships or jobs in museums or cultural heritage institutions or to identify their interests for future graduate study.

Course Requirements

The HAVC major requires four lower-division and nine upper-division courses including the satisfactory completion of the senior comprehensive requirement. Students must take courses in each of the six different geographical regions listed below to ensure cultural, methodological, and disciplinary breadth.

In fulfilling the major requirements, students in the concentration must successfully complete four courses from the "Approved Concentration Courses" list below. No more than one of the four courses can be lower-division and at least two of the four courses must be HAVC-sponsored courses. Concentration courses fulfill the elective requirement, and if appropriate, concentration courses can be used to fulfill the

geographical regions requirement. Students can petition to apply courses that are not on the approved list. Approval of petitions will be determined by the amount of relevant course content and assignments.

Lower-Division Courses

Four courses from four different geographical regions listed below.

HAVC 10-HAVC 19 Africa and its Diaspora:
 HAVC 10 Introduction to African Visual Culture 5

HAVC 20-HAVC 29 Asia and its Diaspora:

HAVC 20 Visual Cultures of Asia 5
 HAVC 22 Religion and Visual Culture in China 5
 HAVC 24 Southeast Asia Visual Culture 5
 HAVC 27 Image and Ideology in Indian Art 5

HAVC 30-HAVC 49 Europe and the Americas:

HAVC 30 Introduction to European Visual Culture 5
 HAVC 40 Museum Cultures: The Politics of Display 5
 HAVC 41 Introduction to Modern Art 5
 HAVC 43 History of Modern Architecture 5
 HAVC 44 Designing California: Architecture, Design, and Environment 5
 HAVC 45 Photography Now 5
 HAVC 46 Introduction to U.S. Art and Visual Culture 5
 HAVC 47 Introduction To Contemporary Art 5
 HAVC 48 Climate Justice Now Art, Activism, Environment Today 5
 HAVC 49 From Memes to Metadata: an Introduction to Digital Visual Culture 5

HAVC 50-HAVC 59 Mediterranean:

HAVC 50 Ancient Mediterranean Visual Cultures 5
 HAVC 51 Greek Eyes: Visual Culture and Power in the Ancient Greek World 5
 HAVC 55 Unclothed: The Naked Body from Antiquity to the Present 5
 HAVC 58 Gardens of Delight: Fifteen Centuries of Islamic Visual Culture 5

HAVC 60-HAVC 69 Native Americas:

HAVC 60 Indigenous American Visual Culture 5

HAVC 70-HAVC 79 Oceania and its Diaspora:

HAVC 70 Visual Cultures of the Pacific Islands 5

HAVC 80 may be used to fulfill a lower-division requirement for one of the following geographic regions: 10s (Africa), 60s (Native Americas), or 70s (Oceania).

Upper-Division Courses

Take the following course:

HAVC 100A Approaches to Visual Studies 5

Students are recommended to take HAVC 100A during winter quarter of sophomore year. HAVC 100A is a prerequisite for the senior comprehensive requirement. If it is not completed by the end of the junior year, students may have difficulty enrolling in a seminar to fulfill their senior comprehensive, which may delay graduation.

Plus two upper-division geographical region courses:

One course each from the two geographic regions not covered by lower-division courses, as listed below.

HAVC 110-HAVC 119 Africa and Its Diaspora:

HAVC 110 Visual Cultures of West Africa 5
 HAVC 111 Visual Cultures of Central Africa 5
 HAVC 115 Gender in African Visual Culture 5
 HAVC 116 African Architecture 5
 HAVC 117 Contemporary Art of Africa 5
 HAVC 118 Art of the Contemporary African Diaspora 5
 HAVC 119 Arts and Politics of African Urban Space 5

HAVC 120-HAVC 129 Asia and Its Diaspora:

HAVC 122A Sacred Geography of China 5
 HAVC 122B Constructing Lives in China: Biographies and Portraits 5
 HAVC 122C Writing in China 5
 HAVC 122D Chinese Landscape Painting 5
 HAVC 122F Bodies in Chinese Culture 5
 HAVC 123A Modernity and the Arts of India 5
 HAVC 123B Religions and Visual Culture of South Asia 5
 HAVC 124A Arts of Ancient Southeast Asia 5
 HAVC 124B History of Photography in Southeast Asia 5
 HAVC 124C Arts and Politics in Theravada Traditions 5
 HAVC 124D Contemporary Art of Southeast Asia and its Diaspora 5

HAVC 170	Art of the Body in Oceania	5
HAVC 172	Textile Traditions of Oceania	5
HAVC 178	Museums and Cultural Heritage in Oceania	5
HAVC 179	Topics in Oceanic Visual Culture	5

Plus five upper-division HAVC courses

These do not include courses in the HAVC 190 or HAVC 191 series.

Electives

The department encourages students to take cross-regional and topical courses in the 180 series. Courses from the 180 series fulfill upper-division major elective requirements, but do not fulfill specific regional requirements. There are occasional exceptions, which are noted in the catalog course descriptions.

Approved Concentration Courses

HAVC 40	Museum Cultures: The Politics of Display	5
HAVC 141I	Be Here Now: Art, Land, Space	5
HAVC 141M	Museum Practices	5
HAVC 141N	Data Cultures: Art, Technology, and the Politics of Visual Representation	5
HAVC 143A	Contemporary Architecture and Critical Debates	5
HAVC 178	Museums and Cultural Heritage in Oceania	5
HAVC 185	Art and Community: Arts Professions and Community Engagement	5
HAVC 188A	Introduction to Curatorial Studies	5
HAVC 188M	Heritage, Memory, and Material Culture	5
HAVC 191M	Museum Exhibitions	5
ANTH 187	Cultural Heritage in Colonial Contexts	5
ANTH 187B	Cultural Resource Management	5
ANTH 196J	Imagining America	5
HIS 104D	Museums and the Representation of Native American History, Memory, and Culture	5
JWST 185N	The Holocaust in a Digital World	5

Students may petition for HAVC 199 or HIS 199 to count for a concentration course under certain circumstances. Students should consult the HAVC undergraduate adviser prior to enrolling.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. Students in HAVC meet the DC requirement by completing:

HAVC 100A	Approaches to Visual Studies	5
-----------	------------------------------	---

Comprehensive Requirement

All seniors must complete one seminar, from the HAVC 190–HAVC 191 series, as their “senior exit” course to satisfy the senior comprehensive requirement. Seminars can be taken for senior exit credit only by permission of the instructor. Within the context of this advanced seminar, students will work under the close supervision of their professor to produce a written project that demonstrates a high level of achievement in research, writing, and critical thinking. Students whose performance is outstanding are eligible for honors in the senior comprehensive requirement.

HISTORY OF ART AND VISUAL CULTURE MINOR

The history of art and visual culture (HAVC) minor works well when combined with other programs offered at UC Santa Cruz. Many students choose to combine HAVC with other major/minor programs such as anthropology, art, education, history, psychology, business and management economics, and classical/Italian studies.

For the minor, a student may transfer **up to three** lower-division art history courses (from three different geographic regions) taken from other institutions. HAVC minors must take a minimum of six regularly scheduled HAVC courses from members of the HAVC faculty. Refer to the ASSIST articulation agreements for approved lower-division courses offered at community colleges. Transfer credit for lower- or upper-division courses from four-year institutions or community colleges not included in the ASSIST system is evaluated on a case-by-case basis; students must submit a Petition for Transfer Credit, Substitution, or Waiver and course syllabus to the HAVC Department for review.

Course Requirements

Nine courses, as follows:

Lower-Division Courses

Students take three courses from three different geographical regions. These are:

HAVC 10-HAVC 19 Africa and its Diaspora:

HAVC 10 Introduction to African Visual Culture 5

HAVC 20-HAVC 29 Asia and its Diaspora:

HAVC 20 Visual Cultures of Asia 5
 HAVC 22 Religion and Visual Culture in China 5
 HAVC 24 Southeast Asia Visual Culture 5
 HAVC 27 Image and Ideology in Indian Art 5

HAVC 30-HAVC 49 Europe and the Americas:

HAVC 30 Introduction to European Visual Culture 5
 HAVC 40 Museum Cultures: The Politics of Display 5
 HAVC 41 Introduction to Modern Art 5
 HAVC 43 History of Modern Architecture 5
 HAVC 44 Designing California: Architecture, Design, and Environment 5
 HAVC 45 Photography Now 5
 HAVC 46 Introduction to U.S. Art and Visual Culture 5
 HAVC 47 Introduction To Contemporary Art 5
 HAVC 48 Climate Justice Now Art, Activism, Environment Today 5
 HAVC 49 From Memes to Metadata: an Introduction to Digital Visual Culture 5

HAVC 50-HAVC 59 Mediterranean:

HAVC 50 Ancient Mediterranean Visual Cultures 5
 HAVC 51 Greek Eyes: Visual Culture and Power in the Ancient Greek World 5
 HAVC 55 Unclothed: The Naked Body from Antiquity to the Present 5
 HAVC 58 Gardens of Delight: Fifteen Centuries of Islamic Visual Culture 5

HAVC 60-HAVC 69 Native Americas:

HAVC 60 Indigenous American Visual Culture 5

HAVC 70-HAVC 79 Oceania and its Diaspora:

HAVC 70 Visual Cultures of the Pacific Islands 5

HAVC 80 may be used to fulfill a lower-division requirement for one of the following geographic regions: 10s (Africa), 60s (Native Americas), or 70s (Oceania).

Upper-Division Courses

Students complete six courses planned in consultation with a faculty adviser. These are HAVC courses numbered 100-189.

Graduate Program

VISUAL STUDIES PH.D.

Introduction

The History of Art and Visual Culture Department offers a course of study leading to the Ph.D. in visual studies. The Ph.D. is designed to steep our graduates in the most theoretically relevant methodologies for understanding the significance of visual artifacts and the social and cultural qualities of human vision (termed *visuality*); provide students with exposure to a range of cultural perspectives and visual artifacts drawn from around the world; and cultivate in our graduates the necessary skills and knowledge to secure and excel in academic and curatorial positions. The program is both interdisciplinary and flexible. Students work closely with their advisers and the director of graduate studies to craft personalized courses of study that advance their intellectual and professional goals.

The program employs a wide range of visual evidence for examination, without being constrained by traditional hierarchies of art. Fine arts, architecture, photography, film, performances, rituals, utilitarian objects, and popular entertainments are among the types of primary material used in our curriculum for the investigation of visual culture. Our program at UCSC is particularly adept at illustrating significant differences in how disparate cultural groups interpret their visual worlds, given the breadth of cultural perspectives taught by our faculty. With scholars focusing on cultures in Africa, the Americas, Asia, Europe, the Mediterranean, and the Pacific Islands, visual studies at UCSC offers students an unparalleled opportunity to consider the role of social and cultural forces in guiding how and what humans see.

Advancement to Candidacy

Course Requirements

Students take a minimum of 60 credits during their first two years of study, comprised of three core courses and nine electives.

Take the following three core courses:

HAVC 201A	Introduction to Visual Studies and Critical Theory	5
HAVC 202	Introduction to Visual Studies Methods	5
HAVC 204	Grant Writing	5

HAVC 201A: fall of the first year

HAVC 202: winter of the first year

HAVC 204: second year

Take nine electives:

Of the nine elective courses, at least five must have a visual studies designation (i.e., taught by core or affiliated faculty), and at least three must be drawn from departments outside of visual studies. Among the five visual studies electives, at least three must be from the HAVC courses numbered 212-282 and taught by core faculty, and at least one of the three must be a seminar course on a subject outside the student's disciplinary focus. Only two of the five visual studies electives may be independent study courses. Please review the visual studies website for a list of electives offered in the current year.

Field Clusters/Field Specialties

Appreciating that most of our graduates will be required to fit themselves back into traditional disciplinary structures once they enter the academic job market, the program is designed to provide students with both new means of interpreting visual evidence and suitable depth of understanding in older disciplinary traditions. While all graduates will acquire a shared foundation in different approaches to visuality (attained through our core course requirements), individual student programs vary considerably depending on the type of department or other intellectual and professional context in which the student hopes to secure employment after graduation. In addition to completion of the core courses required of all students, students will develop a cluster of individualized field courses in consultation with their adviser based on their particular professional goals.

To provide our students with the disciplinary background to facilitate employment within curatorial departments in museums and non-visual studies departments at colleges and universities, each student is required to take a minimum of four 5-credit courses in a disciplinary cluster (beyond the core course requirements). This requirement pertains both to students entering with a B.A. and an M.A. Acceptable field cluster courses might center on a medium (i.e., painting or architecture), a temporal/stylistic category (i.e., Early Modern or Postmodernism), a cultural, national, or social group (i.e., Pacific Islanders or China), or a disciplinary approach (i.e., cultural anthropology or gender studies). Field clusters are developed in consultation with the student's adviser based on the student's intellectual and professional goals. To count toward the degree, field clusters must receive prior approval from the director of graduate studies.

Foreign Language Requirements

Students must demonstrate reading knowledge of one foreign language prior to the start of their second year (either by attaining a score of 550 or higher on the Educational Testing Service Graduate Student Foreign Language Test or by passing a reading/translation examination administered by the department).

Students are encouraged to master a second foreign language. Based on a student's area of interest, and the joint assessment of the student's adviser and the director of graduate studies, proof of proficiency in an additional language or languages may be required prior to the student being admitted to candidacy for the Ph.D. Should proficiency in additional

languages be required, it must be demonstrated prior to the close of the student's third year of study.

Qualifying Examination

After completing all coursework and passing one language examination, students are required to pass a qualifying examination prior to the close of the winter quarter of their third year, unless a petition for an extension, demonstrating reasonable cause, is approved by the visual studies director of graduate studies. The qualifying examination is divided into three topic areas, with each one including a written and an oral component. Each topic area should display historical breadth and variety of media. Two of the topic areas should ideally relate to the future dissertation topic, while one of the remaining must constitute an outside area, examining a topic that is chronologically, geographically, and/or methodologically distinct from the other two.

During their second year, a student should consult with their adviser to assemble a group of four faculty members who will serve as examiners and aid the student in assembling the necessary topic areas, compiling the needed reading lists, and preparing for the written and oral components of the examination in each area. The examination will have two parts. In part one, students will respond in writing to three general questions, posed by three of their examiners in the pre-arranged topic areas. In part two, students will gather together with their examiners to field questions probing and clarifying the previously submitted written component of the qualifying examination. In order to pass the qualifying examinations, students must receive the unanimous endorsement of the committee members.

Post-Qualifying Requirements**Dissertation Prospectus and Colloquium**

After passing the qualifying examination, a student must complete an approved dissertation prospectus and a colloquium. The written dissertation prospectus is due no later than the end of the second quarter following the student's completion of the qualifying examination. The prospectus is a brief, concise essay of approximately 25 pages (with bibliography) that defines the scope, methodology, and rationale for the proposed dissertation. It is prepared in consultation with the student's dissertation adviser, who must approve of the document prior to sending it to the colloquium committee. The prospectus must be sent to the colloquium committee at least one month before the colloquium.

The dissertation adviser, in consultation with the student and director of graduate studies, will invite four to five faculty members, in appropriate fields, to be on the colloquium committee, attend the colloquium, provide input on the prospectus, and assess the student's preparedness to begin researching and writing the dissertation. Faculty participating in the colloquium may or may not have been members of the qualifying examination committee, and should represent faculty whose expertise has bearing on the student's project. A student will pass the colloquium after having demonstrated to the satisfaction of all colloquium committee members

adequate preparation to begin researching and writing the dissertation.

Advancement to Candidacy

Advancement to candidacy follows and is contingent upon passing the qualifying examination, all needed language examinations, completing an approved dissertation prospectus, passing the colloquium, and the subsequent appointment of a dissertation reading committee of at least three members. The requirements for advancement to candidacy must be completed no later than the end of the winter quarter of the fourth year.

Dissertation

The dissertation must make a significant and original contribution to the field of visual studies, as judged by each dissertation committee member.

Dissertation Defense

An oral defense of the dissertation is the only final examination requirement, unless a petition to waive the oral defense, demonstrating reasonable cause, is approved by the student's primary adviser and the visual studies director of graduate studies. The student's dissertation committee, under the direction of an exam moderator, will conduct the examination. The moderator is selected in consultation with the faculty adviser and must be a visual studies core or affiliated tenured faculty who is not part of the dissertation reading committee.

Normative Time from Matriculation to Degree

The visual studies Ph.D. program at UCSC is designed to require six years of study. During the pre-candidacy period students will devote themselves to coursework, completion of the language examination, some teaching, preparation for and completion of qualifying examinations, completion of an approved version of their prospectus, passing their colloquium and selecting their dissertation committee. Requirements for advancing to candidacy must be completed by the end of winter quarter of the fourth year. Students will finish their dissertation and successfully defend it before the end of their sixth year.

VISUAL STUDIES DESIGNATED EMPHASIS

Introduction

Requirements

Graduate students enrolled in doctoral programs at UC Santa Cruz may obtain a Designated Emphasis in visual studies on their Ph.D. degree by meeting the following requirements:

Committee Composition and Departmental Approvals

Secure approval from a core member of the visual studies faculty to serve as an adviser for their designated emphasis.

Have at least one core member of the visual studies faculty serve on either their qualifying examination or dissertation committee.

Course Requirements

Successfully complete four graduate courses taught by either core or affiliated members of the Visual Studies program. The courses must form a coherent cluster in visual studies and be pre-approved by the student's designated emphasis adviser.

Writing, Research and/or Teaching Requirements

Submit a significant piece of writing that demonstrates competency in the field. The writing could take the form of a seminar paper or dissertation chapter. The essay must meet the approval of the student's visual studies adviser.

Music

244 Music Center

PROGRAMS OFFERED

Music B.A. (p. 59)

Music B.M. (p. 63)

Western Art Music Minor (p. 68)

Electronic Music Minor (p. 69)

Jazz Minor (p. 70)

Music M.A. (p. 70)

Music D.M.A. (p. 71)

Music Ph.D. (p. 73)

The UCSC music curriculum is distinctive in developing musicians who integrate scholarship with performance. Although this rigorous program primarily addresses Western art music, it also incorporates the study of world music cultures in both their art and vernacular traditions. A major in music establishes a substantial foundation for further academic or performance studies. Two undergraduate majors are offered: the Bachelor of Music (B.M.), which especially develops the student's attainment in performance, and the Bachelor of Arts (B.A.), which cultivates greater breadth in the student's academic achievement. Three minors in music are also offered: one in electronic music, one in music, and one in jazz. The electronic music and jazz minors are open to music majors, as well as to students pursuing other majors.

There are three graduate programs in music: the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees in music and the Doctor of Musical Arts (D.M.A.) degree in music composition. The Master of Arts (M.A.) degree in music has emphases in composition, musicology/ethnomusicology, or performance practice, and integrates studies in performance, composition/analysis, and research. The Doctor of Philosophy (Ph.D.) degree in music has an emphasis in cross-cultural studies, and aims to provide doctoral students with an integrative framework for music scholarship, emphasizing the ways in which musicology and ethnomusicology interact and complement one another. The Doctor of Musical Arts (D.M.A.) degree in music composition has tracks in computer-assisted composition and world music composition and seeks to develop accomplished, active, and articulate composers who have a broad awareness of the diverse styles, cultural influences, media, venues, and technical means available to them in the 21st century.

The Music Center includes a 400-seat recital hall that has recording facilities, specially equipped classrooms, individual practice and teaching studios, a student computer laboratory,

rehearsal space for ensembles, a gamelan studio, and studios for electronic and computer music. McHenry Library has a separate music section and listening rooms that have individual audio and video facilities. Recording and media equipment is available from the Learning Technologies center.

Courses for non-majors

All music courses are open to non-majors, with many fulfilling general education requirements while offering exploration in the field of music. Courses in the 11, 80, and 81 series cover a wide array of topics that may interest students. Non-majors are also able to enroll in all performing ensembles. Students should check out music.ucsc.edu for further information regarding preparation and auditions, and contact the Music Department if they have further questions.

Undergraduate Program

The Bachelor of Arts (B.A.) degree integrates performance, theory, composition, history, and literature. The Bachelor of Music (B.M.) degree is designed for exceptionally talented students who intend to pursue a career in performance. Acceptance to the B.M. program is by audition during fall quarter; students must audition prior to their senior year.

Detailed information about the music majors and minors may be obtained from the Music Department web site and undergraduate adviser.

MUSIC B.A.

Information and Policies

The music program at UC Santa Cruz integrates music performance, theory, composition, history, and literature. It offers the bachelor of arts (B.A.) and the bachelor of music (B.M.) degrees, with a wide variety of possibilities for students wishing to major or minor in music, and for all students who wish to increase their musical abilities and understanding. The Music Department supports an unusually diverse curriculum for a department of its size. By a choice of electives, the student can emphasize aspects of music beyond the basic core courses required for the major or minor. Students may obtain preparation for graduate or professional work in the following broad areas:

- A. Performance (including orchestral and chamber music instruments, piano and early keyboard instruments, and choral and vocal studies)
- B. Composition and Theory (including instrumental, vocal, electronic, and computer techniques)
- C. Musicology and Early Music Performance
- D. Ethnomusicology

E. Jazz

Advanced students may also enroll in some graduate-level courses and/or undertake research projects, fieldwork, or student-taught seminars in association with faculty.

Introduction

Academic Advising for the Program

General information about the music degrees is available on the department website. Students are also strongly encouraged to consult early with the Music Department adviser to create an academic plan for the major or a minor far in advance of declaration, as early as the summer before beginning at the university.

Transfer students should consult the Transfer Information and Policy section.

Please contact the department adviser by emailing music@ucsc.edu or calling (831) 459-2292. Slug Success is also available to make an appointment.

Getting Started in the Major

It is essential that students begin the MUSC 30 sequence, ensembles, and applied instruction in fall of their second year or as early as possible to make satisfactory progress toward their degree objectives.

The core curriculum placement exam is for placement of students, including transferring or re-entering students, into the appropriate music core course (MUSC 15, MUSC 30A, MUSC 30B, MUSC 30C or MUSC 130). It includes written sections in the areas of theory and musicianship that emphasize aural recognition and identification of musical structures (intervals, chords, rhythms, meters, etc.), and brief definition of terms relating to music history. Students may prepare for the exam by honing skills in reading both bass and treble clef and in recognizing of melodic and harmonic structures, and complex rhythmic patterns.

Students with theory background should plan to take the core curricular placement exam to place into MUSC 15 OR MUSC 30A. Students without any theory background or weak aural skills are not required to take the placement exam and are encouraged to enroll in MUSC 13, MUSC 14, or MUSC 15 in their first year. Taking these courses will help prepare students for the core curriculum placement examination. However, admission to MUSC 30A will be based solely on the core curriculum placement exam scores and not on final grades from the Preparatory Theory courses (MUSC 13, MUSC 14, and MUSC 15).

The core curriculum placement exam is held once a year on the Tuesday before instruction begins from 10:00 a.m.-12:30 p.m. in the Music Center Recital Hall. No signup is necessary. Students should bring a pencil. Students can visit the Music Dept. website to view the sample exam.

Program Learning Outcomes

The B.A. and B.M. programs in music are designed to accomplish the following learning outcomes:

1. Attainment of knowledge and understanding of music in an integrated way, through historical and cultural studies, musicianship, theory, composition, and performance. These studies prepare students to pursue a career in some aspect of music, to further develop their skills in graduate study, and/or to maintain music as a central part of their lives.
2. Acquisition of musical competency, including literacy (the use of music notation in reading, performing, composing, analyzing, and hearing music).
3. Developing skills of critical thinking and writing about music by taking courses on past and present musical cultures in European and other heritages.
4. Creating music by performing, composing, and improvising.

Major Qualification Policy and Declaration Process

Major Qualification

In order to declare the music major, students must successfully complete MUSC 30A with a grade of "C" or better. A "Pass" grade is also acceptable since letter grades are not required for lower-division courses. Students also need signature approval by the applied instrument instructor on the primary instrument authorization form.

Transfer students should also see the "Transfer Information and Policy" section below.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student and college of the decision. Appeals should be submitted in person at Music Center 244, or sent to music@ucsc.edu care of the undergraduate adviser.

How to Declare a Major

To declare the music major or minor, all students meet with the academic adviser to begin the declaration process either by making an appointment (via Slug Success), by email to music@ucsc.edu, or by stopping by the department office, Music Center, Room 244 or 248. Students are also required to meet with a faculty adviser (assigned with help from the academic adviser) as part of the declaration process.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply to UC Santa Cruz in this major are not required to complete specific courses for consideration of admission to UCSC.

Transfer students are strongly recommended to take some music theory courses before transfer to UCSC, which

generally enables them to test into MUSC 30A. They should also have completed most general education requirements.

Getting Started at UCSC as a Transfer Student

Transfer students should plan to take the core curricular placement exam to place into MUSC 13, MUSC 14, or MUSC 15 OR MUSC 30A. Students that place into MUSC 13, MUSC 14, or MUSC 15 will be required to take three years to graduate. Students that place into MUSC 30A will be able to graduate within two years.

All transfer students should take the core curriculum placement exam during fall of their first quarter (see below for examination schedule). It is an option for transfer students to take the examination prior to applying to UCSC as a practice guide for future preparation. However, students can also visit the Music Department website to view the sample examination.

Transfer students can also take MUSC 15 during Summer Session at UCSC prior to fall of their arrival. Taking MUSC 15 will help prepare students for the core curriculum placement exam and generally results in students placing into MUSC 30A. However, admission to MUSC 30A will be based solely on the core curriculum placement exam scores and not on the final grades from the preparatory music theory classes (MUSC 13, MUSC 14, and MUSC 15).

The core curriculum placement exam is held once a year on the Tuesday before instruction begins from 10:00 a.m.-12:30 p.m. in the Music Center Recital Hall. No sign-up is necessary. Students should bring a pencil.

All transfer students are strongly encouraged to email music@ucsc.edu to schedule a phone-advising appointment with the undergraduate adviser prior to application.

Letter Grade Policy

All upper-division courses applied toward the music majors must be taken for a letter grade, except MUSC 120 (Composition) and ensembles, which may be taken Pass/No Pass.

Lower-division courses may be taken Pass/No Pass.

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Double majors are possible for the music major. A student can double major with a music B.A. or B.M. degree and a major from another department. Students that plan to double major should meet with the Music Undergraduate Adviser for course planning in fall quarter of their first year.

It is not possible to double major as a music B.A. and a music B.M. However it is possible to major in music with the B.A. or B.M. and additionally add the jazz minor or electronic music minor. A music major with a the Western art music minor would not be possible.

Study Abroad

Honors

Honors in the major are conferred by vote of the music faculty. B.A. or B.M. students can be awarded honors for excellent work in individual areas, including coursework, senior project (thesis or recital), or a capstone course. Excellent work in any two of these areas normally results in honors in the major.

To be considered for highest honors in the major, B.A. students must complete a senior project (not required for the B.A. degree) and B.M. students must complete a capstone course (not required for the B.M. degree). Honors in all three areas—coursework, senior project, and capstone course—normally results in highest honors in the major.

How Music Majors Are Assessed

1. Placement exams at the outset of studies assess students' musical competence, and determine their place in the required lower-division theory and harmony courses.
2. Admission to most performance ensembles is by audition. Assessment is based on successful public performances.
3. A juried "advisory audition" is required for students enrolled in MUSC 30A to give students feedback so that they can work toward meeting the requirements for the proficiency audition at the end of the next fall quarter.
4. A juried "proficiency audition" is required for students enrolled in MUSC 130. All students must exhibit an upper-intermediate or higher level on their major instrument or voice.
5. Auditions for admission to the B.M. program are held at the end of each fall quarter. Students accepted to the program are required to audition twice a year for continuing review and critique. Students in the B.M. program present a Senior Recital which is evaluated by faculty.
6. In required and elective seminars, critical thinking and writing are assessed when students present a major independent project at the end of term.
7. Compositional skills are assessed through the rehearsal and public performance of student works.

Requirements and Planners

Course Requirements

Lower-Division Courses

Take each of the following courses:

MUSC 30A	Theory, Literature, and Musicianship	5
MUSC 30B	Theory, Literature, and	5

MUSC 30C	Musicianship Theory, Literature, and Musicianship	5
----------	---	---

The following course is taken concurrently with the MUSC 30 sequence:

MUSC 60	Fundamental Keyboard Skills	2
---------	-----------------------------	---

(may be waived by instructor approval, or if the student is taking piano lessons from a UCSC instructor)

Foreign Language Requirement

FREN 1, GERM 1, and ITAL 1 are required for B.M. students who wish to concentrate in voice. There are no foreign language requirements for other students in the B.A. or B.M. programs; however, students who are planning to apply for graduate school are strongly advised to study a language pertinent to their research area up to a comparable level 3 at UCSC or be able to pass the level 4 entrance examination.

Upper-Division Courses

Take each of the following courses:

MUSC 101A	History of Western Art Music (Medieval, Renaissance, and Baroque)	5
MUSC 101B	History of Western Art Music	5
MUSC 101C	History of Western Art Music	5
MUSC 130	Harmony and Form in 19th-Century and Early 20th-Century Music	5

One course from the MUSC 105 series, Special Topics in History

MUSC 105A	Music of the United States	5
MUSC 105E	Early Keyboard Music	5
MUSC 105I	Improvisation and Collaborative Practices in the 20th Century	5
MUSC 105M	Solo Song: from Monophony to Monody	5
MUSC 105O	Opera from Peri to Pergolesi	5
MUSC 105Q	The String Quartet from Haydn to the Present	5
MUSC 105R	History of Russian Music	5

One course from the MUSC 150 series, Special Topics in Theory

MUSC 150A	Music Analysis for Performers	5
MUSC 150C	Special Topics in Music Theory: Tonal Counterpoint	5
MUSC 150I	Special Topics in Music Theory: Hindustani Music	5
MUSC 150P	Special Topics in Music Theory: 20th-Century Popular Song	5
MUSC 150S	Focus on Spontaneous Composition	5
MUSC 150T	Post Tonal Analysis	5
MUSC 150X	Theoretical Practices of American Music	5

One course from the MUSC 180 series, Studies in World Musics

MUSC 180A	Studies in World Musics: Asia and the Pacific	5
MUSC 180B	Studies in World Musics: Africa and the Americas	5
MUSC 180C	Studies in World Musics: Central Asia	5
MUSC 180D	Music of Insular Southeast Asia	5

One of the following

- One additional class from the MUSC 150 series
- One addition class from the MUSC 180 series
- One of the courses below:

MUSC 121	Orchestration	5
MUSC 122	Conducting	2
MUSC 124	Intermediate Electronic Sound Synthesis	5

A minimum of six quarters of ensembles

All ensembles are 2 credits each and may be repeated. A minimum of one ensemble per quarter can be counted toward fulfillment of the total six quarter requirement.

If two ensembles in one quarter need to be taken to meet time to degree plans approval can be requested to the department Curriculum Committee by email to music@ucsc.edu.

MUSC 1C	University Concert Choir	2
MUSC 2	University Orchestra	2
MUSC 3	Large Jazz Ensemble	2
MUSC 5A	West Javanese Gamelan Ensemble: Beginning	2
MUSC 5B	West Javanese Gamelan Ensemble: Intermediate	2
MUSC 5C	West Javanese Gamelan Ensemble: Advanced	2
MUSC 8A	Beginning Balinese Gamelan	2
MUSC 8B	Advanced Balinese Gamelan	2
MUSC 9	Wind Ensemble	2
MUSC 10	Eurasian Ensemble	2
MUSC 12	Mariachi Ensemble	2
MUSC 158	South African Music Ensemble	2
MUSC 163	Early Music Ensemble	2
MUSC 164	Jazz Ensembles	2
MUSC 164	Jazz Ensembles	2
MUSC 168	Experimental Music Ensemble	2

A minimum of six quarters of individual lessons.

Six quarters of enrollment in any of the courses listed are acceptable for fulfillment of this requirement.

Students can contact the applied instrument instructor of their primary instrument to arrange an audition prior to the start of the quarter. Applied instrument instructor emails are listed on the department website.

Students should work with the applied instructor of their primary instrument to determine which of the courses listed would be appropriate.

The lessons carry an additional course fee. Concurrent enrollment in an appropriate ensemble is required. Consult the Music Student Handbook for more details.

MUSC 61	Individual Lessons: Half Hour	2
MUSC 62	Individual Lessons: One Hour	3
MUSC 161	Individual Lessons: One Hour	3
MUSC 162	Advanced Individual Lessons: One Hour	5
MUSC 196B	Senior Recital Preparation (with individual lessons)	5

Electives

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in music is satisfied by completing MUSC 101A and MUSC 101C (already a part of the core curriculum and required for the B.A.).

MUSC 101A	History of Western Art Music (Medieval, Renaissance, and Baroque)	5
MUSC 101C	History of Western Art Music	5

Comprehensive Requirement

To fulfill the the comprehensive requirement, students may either take an additional MUSC 105 series course or the following course:

MUSC 120	Seminar in Music Composition	5
----------	------------------------------	---

Planners

B.A.—Four-Year Plan

	Fall	Winter	Spring
1st (fresh)	<u>MUSC 11A</u> (recommended)	<u>MUSC 15</u>	
	<u>MUSC 30A*</u>	<u>MUSC 30B</u>	<u>MUSC 30C</u>

	<u>MUSC 101C</u>	MUSC 105	MUSC 150
	<u>MUSC 121</u>	<u>MUSC 120</u>	MUSC 180
	Individual lessons ¹	Individual lessons ¹	Individual lessons ¹
	Ensemble ²	Ensemble ²	Ensemble ²

* Indicates a performance jury requirement at the end of the quarter.

¹Students fulfill the individual lessons requirement by taking one of the following courses: MUSC 61, MUSC 62, or MUSC 161.

General Education Codes

MUSC 11A will fulfill the IM GE requirement.

²Most, but not all, ensembles satisfy the PR-C or PR-E GE requirement. Students should check to confirm which courses from the ensembles course list satisfy GE codes. .

Students must complete all other GE requirements.

MUSIC B.M.

Information and Policies

The music program at UC Santa Cruz integrates music performance, theory, composition, history, and literature. It offers the bachelor of arts (B.A.) and the bachelor of music (B.M.) degrees, with a wide variety of possibilities for students wishing to major or minor in music, and for all students who wish to increase their musical abilities and understanding. The Music Department supports an unusually diverse curriculum for a department of its size. By a choice of electives, the student can emphasize aspects of music beyond the basic core courses required for the major or minor. Students may obtain preparation for graduate or professional work in the following broad areas:

A. Performance (including orchestral and chamber music instruments, piano and early keyboard instruments, and choral and vocal studies)

B. Composition and Theory (including instrumental, vocal, electronic, and computer techniques)

C. Musicology and Early Music Performance

D. Ethnomusicology

E. Jazz

Advanced students may also enroll in some graduate-level courses and/or undertake research projects, fieldwork, or student-taught seminars in association with faculty.

Introduction

The B.M. degree is for students who aspire to academic excellence and an advanced performance level. The B.M. degree is designed for exceptionally talented performers. It requires considerably more performance credits and slightly fewer courses in theoretical disciplines. B.M. students will major in an instrument or voice.

Once accepted to the B.M. program, students must take two juries per academic year: at the end of both fall and spring quarter, for continuing review and criticism of proficiency at their primary instrument.

If a student fails to participate in continuing B.M. juries, or does not attain, or maintain, an advanced level, and fails to maintain academic excellence, the Bachelor of Music Committee will re-examine the student's continued participation in the B.M. degree in consultation with the applied instructor. In cases in which the B.M. Committee finds the student did not meet these requirements the students will be dismissed from the B.M. program with an option to switch to the B.A. degree.

Time to degree: The determination of a dismissal can be made by the committee as long as a student has three remaining quarters before their expected graduation date. This will ensure enough time to make course changes from a B.M. to B.A. degree. A change to the B.A. degree is 10 to 25 fewer credits to be completed than the B.M. degree.

Students may appeal a dismissal of the B.M. degree by petition to the chair of the Music Department. A letter to the department chair must be submitted within 15 days from the date the notification was mailed. Within 15 days of receipt of

the appeal, the department will notify the student, college, and Office of the Registrar of the decision.

Academic Advising for the Program

General information about the music degrees is available on the department website. Students are also strongly encouraged to consult early with the Music Department adviser to create an academic plan for the major or a minor far in advance of declaration, as early as the summer before beginning at the university.

Transfer students should consult the Transfer Information and Policy section.

Please contact the department adviser by emailing music@ucsc.edu or calling (831) 459-2292. You may also use Slug Success to make an appointment.

Getting Started in the Major

It is essential that students begin the MUSC 30 sequence, ensembles, and applied instruction in fall of their second year or as early as possible to make satisfactory progress toward their degree objectives.

The core curriculum placement exam is for placement of students, including transferring or re-entering students, into the appropriate music core course (MUSC 15, MUSC 30A, MUSC 30B, MUSC 30C, or MUSC 130). It includes written sections in the areas of theory and musicianship that emphasize aural recognition and identification of musical structures (intervals, chords, rhythms, meters, etc.), and brief definition of terms relating to music history. Students may prepare for the exam by honing skills in reading both bass and treble clef and in recognizing of melodic and harmonic structures, and complex rhythmic patterns.

Students with a theory background should plan to take the core curricular placement exam to place into MUSC 15 or MUSC 30A. Students without any theory background or weak aural skills are not required to take the placement exam and are encouraged to enroll in MUSC 13, MUSC 14, or MUSC 15 in their first year. Taking MUSC 13, MUSC 14, or MUSC 15 will help prepare students for the core curriculum placement exam. However, admission to MUSC 30A will be based solely on the core curriculum placement exam scores and not on the final grades of the Preparatory theory courses (MUSC 13, MUSC 14, and MUSC 15).

The core curriculum placement exam is held once a year on the Tuesday before instruction begins from 10AM-12:30 p.m. in the Music Center Recital Hall. No signup is necessary. Students should bring a pencil. Students can visit the Music Department website to view the sample exam.

Program Learning Outcomes

The B.A. and B.M. programs in music are designed to accomplish the following learning outcomes:

1. Attainment of knowledge and understanding of music in an integrated way, through historical and cultural studies, musicianship, theory, composition, and

performance. These studies prepare students to pursue a career in some aspect of music, to further develop their skills in graduate study, and/or to maintain music as a central part of their lives.

2. Acquisition of musical competency, including literacy (the use of music notation in reading, performing, composing, analyzing, and hearing music).
3. Developing skills of critical thinking and writing about music by taking courses on past and present musical cultures in European and other heritages.
4. Creating music by performing, composing, and improvising.

Major Qualification Policy and Declaration Process

Major Qualification

In order to declare the music major, students must successfully complete MUSC 30A with a grade of "C" or better. A "Pass" grade is also acceptable since letter grades are not required for lower-division courses.

Bachelor of music students must also audition in the fall or spring juries as a "B.M. Audition." Applied instructor approval is required to sign-up for this audition. If the B.M. committee determines that the performance level demonstrated is appropriate for the B.M. program, the student can then declare the B.M. major (in addition to passing MUSC 30A). Students can consult with their applied instrument instructor about this potential. If faculty supports this option they can sign up with the undergraduate adviser for the next available jury.

Transfer students should also see the "Transfer Information and Policy" section below.

Appeal Process

Students may appeal a dismissal of the B.M. degree by petition to the chair of the Music Department. A letter to the department chair must be submitted within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student, college, and Office of the Registrar of the decision. Appeals should be submitted in person at Music Center 244, or sent to music@ucsc.edu care of the undergraduate adviser.

If a student is not accepted into the B.M. program via the results of their B.M. audition, they can sign up for the next available jury. Students may audition for the B.M. program a maximum of two times. The latest that they can audition for the B.M. program is in spring quarter of their junior year.

How to Declare a Major

To declare the music major or minor, all students meet with the academic adviser to begin the declaration process either by making an appointment (via Slug Success), by email to music@ucsc.edu, or by stopping by the department office in the Music Center, room 244 or 248. Students are also required

to meet with a faculty adviser (assigned with help from the academic adviser) as part of the declaration process.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific courses for consideration of admission to UC Santa Cruz.

Transfer students are strongly recommended to take some music theory courses before transfer to UCSC, which generally enables them to test into MUSC 30A. They should also have completed most general education requirements. Voice students should have completed one introductory college-level language course each in Italian, French, and German.

Getting Started at UCSC as a Transfer Student

Transfer students should plan to take the core curricular placement exam to place into MUSC 15 or MUSC 30A. Students that place into MUSC 15 will be required to take three years to graduate. Students that place into MUSC 30A will be able to graduate within two years.

All transfer students should take the core curriculum placement exam during fall of their first quarter (see below for exam schedule). It is an option for transfer students to take the exam prior to applying to UCSC as a practice guide for future preparation. However, students can also visit the Music Department website to view the sample exam.

Transfer students can also take MUSC 15 during Summer Session at UCSC prior to fall of their arrival. Taking MUSC 15 will help prepare students for the core curriculum placement exam and generally results in students placing into MUSC 30A. However, admission to MUSC 30A will be based solely on the core curriculum placement exam scores and not on the MUSC 15 grades.

The core curriculum placement exam is held once a year on the Tuesday before instruction begins from 10:00 a.m.-12:30 p.m. in the Music Center Recital Hall. No signup is necessary. Students should bring a pencil.

All transfer students are strongly encouraged to email music@ucsc.edu to schedule a phone-advising appointment with the undergraduate adviser prior to application.

Letter Grade Policy

All upper-division courses applied toward the music majors must be taken for a letter grade.

Lower-division courses may be taken Pass/No Pass.

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Double majors are possible for the music major. A student can double major with a music B.A. or B.M. degree and a major from another department. Students that plan to double major should meet with the Music Department undergraduate adviser for course planning in fall quarter of their first year.

It is not possible to double major as a music B.A. and a music B.M. However, it is possible to major in music with the B.A. or B.M. and additionally add the jazz minor or electronic music minor. A music major with a the Western art music minor would not be possible.

Study Abroad

Honors

Honors in the major are conferred by vote of the music faculty. B.A. or B.M. students can be awarded honors for excellent work in individual areas, including coursework, senior project (thesis or recital), or a capstone course. Excellent work in any two of these areas normally results in honors in the major.

To be considered for highest honors in the major, B.A. students must complete a senior project (not required for the B.A. degree) and B.M. students must complete a capstone course (not required for the B.M. degree). Honors in all three areas—coursework, senior project, and capstone course—normally results in highest honors in the major.

How Music Majors are Assessed

1. Placement exams at the outset of studies assess students' musical competence, and determine their place in the required lower-division theory and harmony courses.
2. Admission to most performance ensembles is by audition. Assessment is based on successful public performances.
3. A juried "advisory audition" is required for students enrolled in MUSC 30A to give students feedback so that they can work toward meeting the requirements for the proficiency audition at the end of the next fall quarter.
4. A juried "proficiency audition" is required for students enrolled in MUSC 130. All students must exhibit an upper-intermediate or higher level on their major instrument or voice.
5. Auditions for admission to the B.M. program are held at the end of each fall quarter. Students accepted to the program are required to audition twice a year for continuing review and critique. Students in the B.M.

program present a Senior Recital which is evaluated by faculty.

6. In required and elective seminars, critical thinking and writing are assessed when students present a major independent project at the end of term.
7. Compositional skills are assessed through the rehearsal and public performance of student works.

Requirements and Planners

Course Requirements

Lower-Division Courses

Take each of the following courses:

MUSC 30A	Theory, Literature, and Musicianship	5
MUSC 30B	Theory, Literature, and Musicianship	5
MUSC 30C	Theory, Literature, and Musicianship	5

The following course is taken concurrently with the MUSC 30 sequence:

MUSC 60	Fundamental Keyboard Skills	2
---------	-----------------------------	---

May be waived by instructor approval, or if the student is taking piano lessons from a UCSC instructor.

Foreign Language Requirement

FREN 1, GERM 1, and ITAL 1 are required for B.M. voice students. High school transcripts or Advanced Placement (AP) examination scores may satisfy this requirement. Students may take these courses during Summer Session or through any other college. The quarter varies for when each class is offered. Students should check with the departments offering these courses to determine when they are regularly offered.

There are no foreign language requirements for other students in the B.A. or B.M. programs; however, students who are planning to apply for graduate school are strongly advised to study a language pertinent to their research area.

Upper-Division Courses

Take each of the following courses:

MUSC 101A	History of Western Art Music (Medieval, Renaissance, and Baroque)	5
MUSC 101B	History of Western Art Music	5
MUSC 101C	History of Western Art Music	5
MUSC 130	Harmony and Form in 19th-Century and Early 20th-Century Music	5

One course from the MUSC 105 series, Special Topics in History

MUSC 105A	Music of the United States	5
MUSC 105E	Early Keyboard Music	5
MUSC 105I	Improvisation and	5

MUSC 105M	Collaborative Practices in the 20th Century Solo Song: from Monophony to Monody	5
MUSC 105O	Opera from Peri to Pergolesi	5
MUSC 105Q	The String Quartet from Haydn to the Present	5
MUSC 105R	History of Russian Music	5

One course from the MUSC 150 series, Special Topics in Theory

MUSC 150A	Music Analysis for Performers	5
MUSC 150C	Special Topics in Music Theory: Tonal Counterpoint	5
MUSC 150I	Special Topics in Music Theory: Hindustani Music	5
MUSC 150P	Special Topics in Music Theory: 20th-Century Popular Song	5
MUSC 150S	Focus on Spontaneous Composition	5
MUSC 150T	Post Tonal Analysis	5
MUSC 150X	Theoretical Practices of American Music	5

One course from the MUSC 180 series, Studies in World Musics

MUSC 180A	Studies in World Musics: Asia and the Pacific	5
MUSC 180B	Studies in World Musics: Africa and the Americas	5
MUSC 180C	Studies in World Musics: Central Asia	5
MUSC 180D	Music of Insular Southeast Asia	5

B.M. students who wish to specialize in jazz

Take all the following three courses instead of one course from the MUSC 180 series:

MUSC 111B	Seminar in Jazz Analysis	5
MUSC 174	Intermediate Jazz Improvisation	5
MUSC 175	Jazz Theory II	5

A minimum of 12 quarters of ensembles

All ensembles are 2 credits each and may be repeated. A maximum of one ensemble per quarter can be counted toward fulfillment of the total 12-quarter requirement.

Transfer students are required to take six quarters of ensembles.

If two ensembles in one quarter need to be taken to meet time to degree plans approval can be requested to the department Curriculum Committee by email to music@ucsc.edu.

MUSC 1C	University Concert Choir	2
MUSC 2	University Orchestra	2
MUSC 3	Large Jazz Ensemble	2
MUSC 5A	West Javanese Gamelan Ensemble: Beginning	2
MUSC 5B	West Javanese Gamelan	2

MUSC 5C	Ensemble: Intermediate West Javanese Gamelan	2
MUSC 8A	Ensemble: Advanced Beginning Balinese Gamelan	2
MUSC 8B	Advanced Balinese Gamelan	2
MUSC 9	Wind Ensemble	2
MUSC 10	Eurasian Ensemble	2
MUSC 12	Mariachi Ensemble	2
MUSC 102	University Orchestra	2
MUSC 103	University Concert Choir	2
MUSC 158	South African Music Ensemble	2
MUSC 163	Early Music Ensemble	2
MUSC 164	Jazz Ensembles	2
MUSC 166	Chamber Singers	2
MUSC 168	Experimental Music Ensemble	2

A minimum of 11 quarters of individual lessons.

Eleven quarters of enrollment in any of the courses listed are acceptable for fulfillment of this requirement.

Transfer students are required to take six quarters of applied instruction.

Students can contact the applied instrument instructor of their primary instrument to arrange an audition prior to the start of the quarter. Applied instrument instructor emails are listed on the department website.

Students should work with the applied instructor of their primary instrument to determine which of the courses listed would be appropriate.

The lessons carry an additional course fee. Concurrent enrollment in an appropriate ensemble is required. Consult the Music Student Handbook for more details.

MUSC 61	Individual Lessons: Half Hour	2
MUSC 62	Individual Lessons: One Hour	3
MUSC 161	Individual Lessons: One Hour	3
MUSC 162	Advanced Individual Lessons: One Hour	5

Demonstration of an advanced level at Continuing B.M. juries each fall and spring quarter

Complete the following course

MUSC 196B	Senior Recital Preparation (with individual lessons)	5
-----------	---	---

Electives

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in music is satisfied by completing MUSC 101A and MUSC 101C (already a part of the core curriculum and required for the B.A. and B.M.).

Comprehensive Requirement

Students fulfill the comprehensive requirement by completing MUSC 196B.

Planners

B.M.—Four-Year Plan

	Fall	Winter	Spring
	<u>MUSC 11A</u> (recommended)	<u>MUSC 15</u>	Language ¹
1st (frosh)	Individual lessons ² Ensemble ³ <u>MUSC 30A*</u>	Individual lessons Ensemble <u>MUSC 30B</u> <u>MUSC 101A</u>	Individual lessons Ensemble <u>MUSC 30C**</u> <u>MUSC 101B</u>
2nd (soph)	Individual lessons Ensemble <u>MUSC 130**</u> <u>MUSC 101C</u>	Individual lessons Ensemble MUSC 105	Individual lessons Ensemble MUSC 150**
3rd (junior)	Individual lessons Ensemble Language	Individual lessons Ensemble Language	Individual lessons Ensemble MUSC 180
4th (senior)	Individual lessons Ensemble	Individual lessons Ensemble	<u>MUSC 196B</u> Ensemble

* Indicates a performance jury requirement at the end of the quarter.

**Following acceptance to the B.M. program via audition (can be done anytime up to the end of the third year), continuing B.M. students complete "Continuing B.M." juries at the end of each fall and spring quarter.

¹Bachelor of music voice majors are required to take FREN 1, GERM 1, and ITAL 1. High School transcripts or AP scores may satisfy this requirement. Students may take these courses during Summer Session or through any other college. The quarter varies for when each class is offered. Students should check with the departments offering these courses to determine when they are regularly offered.

²Students fulfill the individual lessons requirement by taking one of the following courses: MUSC 61, MUSC 62, or MUSC 161.

General Education (GE) Codes

MUSC 11A will fulfill the IM general education requirement.

³Most, but not all, ensembles satisfy the PR-C or PR-E general education requirement. Students should check to confirm which courses from the ensembles course list satisfy GE codes.

Students must complete all other GE requirements.

B.M.—Two-Year Transfer Plan

The two-year plan assumes that the student places into MUSC 30A, and has completed most GE requirements. Voice students are assumed to have completed introductory language courses prior to transfer. Transfer students are required to take six quarters of lessons and ensembles at UCSC

	Fall	Winter	Spring
	<u>MUSC 30A*</u>	<u>MUSC 30B</u> <u>MUSC 101A</u>	<u>MUSC 30C**</u> MUSIC 101B
1st (junior)	Individual lessons ¹ Ensemble ² <u>MUSC 130*</u> <u>MUSC 101C</u>	Individual lessons Ensemble MUSC 105 MUSC 150	Individual lessons Ensemble MUSC 196B MUSC 180
2nd (senior)	Individual lessons Ensemble	Individual lessons	Individual lessons

* Indicates a performance jury requirement at the end of the quarter.

**Following acceptance to the B.M. program via audition (can be done anytime up to the end of the third year), continuing B.M. students complete "Continuing B.M." juries at the end of each fall and spring quarter.

¹Students fulfill the individual lessons requirement by taking one of the following courses: MUSC 61, MUSC 62, or MUSC 161.

Bachelor of Music voice majors are required to take FREN 1, GERM 1, and ITAL 1. High School transcripts or AP scores may satisfy this requirement. Students may take these courses during Summer Session or through any other college. The quarter varies for when each class is offered. Students should check with the departments offering these courses to determine when they are regularly offered.

General Education Codes

²Most, but not all, ensembles satisfy the PR-C or PR-E general education requirement. Students should check to confirm which courses from the ensembles course list satisfy GE codes.

WESTERN ART MUSIC MINOR

The undergraduate minor program in Western art music offers a course of study leading to the minor in music. The goal of this program is to provide a focus for music activities, as well as a background in music theory, history, and performance.

Course Requirements

Lower-Division Courses

Choose one of the following courses:

MUSC 11A	Introduction to Western Classical Music	5
MUSC 11D	Introduction to World Music	5

MUSC 11A formerly Introduction to Western Art Music

Plus all of the following courses:

MUSC 30A	Theory, Literature, and Musicianship	5
MUSC 30B	Theory, Literature, and Musicianship	5
MUSC 30C	Theory, Literature, and Musicianship	5

Plus three quarters of the following lower-division instrumental/voice lesson course:

MUSC 61	Individual Lessons: Half Hour	2
MUSC 62	Individual Lessons: One Hour	3
MUSC 63	Group Instrumental and Vocal Lessons	2

Upper-Division Courses

Six quarters of upper-division ensembles

MUSC 102	University Orchestra	2
MUSC 103	University Concert Choir	2
MUSC 158	South African Music Ensemble	2
MUSC 163	Early Music Ensemble	2
MUSC 164	Jazz Ensembles	2
MUSC 166	Chamber Singers	2

Students can petition to take lower-division ensembles, rather than upper-division ensembles. Petitions can be sent to music@ucsc.edu.

Plus three quarters of the following upper-division instrumental/voice lessons course:

MUSC 161	Individual Lessons: One Hour	3
----------	------------------------------	---

(Fee: \$650 per quarter)

One course from the following list:

MUSC 101A	History of Western Art Music (Medieval, Renaissance, and Baroque)	5
MUSC 101B	History of Western Art Music	5
MUSC 101C	History of Western Art Music	5
MUSC 180A	Studies in World Musics: Asia and the Pacific	5
MUSC 180B	Studies in World Musics: Africa and the Americas	5
MUSC 180C	Studies in World Musics: Central Asia	5
MUSC 180D	Music of Insular Southeast Asia	5

Planner

Two-Year Music Minor Plan

	Fall	Winter	Spring
	MUSC 11A*		
1st	<u>MUSC 61, MUSC 62</u>	<u>MUSC 61, MUSC 62</u>	<u>MUSC 61, MUSC 62</u>

or <u>MUSC 63</u>	or <u>MUSC 63</u>	or <u>MUSC 63</u>
Ensemble	Ensemble	Ensemble
<u>MUSC 30A</u>	<u>MUSC 30B</u>	<u>MUSC 30C</u>
	<u>MUSC 101A**</u>	

2nd

<u>MUSC 161</u>	<u>MUSC 161</u>	<u>MUSC 161</u>
ensemble	ensemble	ensemble

*Satisfies the MUSC 11 requirement; can be replaced with MUSC 11D

**Satisfies upper-division requirement; can be replaced with MUSC 101B or 101C or a MUSC 180 series course.

ELECTRONIC MUSIC MINOR

The electronic music minor focuses on the study of creating music using the tools of modern technology. It is designed to complement the music major or programs in other media by providing instruction in advanced skills of audio production, sound synthesis, and computer-assisted composition.

Course Requirements

Lower-Division Courses

One course from the following:

MUSC 11A	Introduction to Western Classical Music	5
MUSC 11B	Introduction to Jazz	5
MUSC 11D	Introduction to World Music	5
MUSC 80P	Popular Music in the United States	5

Plus all of the following courses:

MUSC 15	Preparatory Musicianship	5
MUSC 80C	History, Literature, and Technology of Electronic Music	5

Upper-Division Courses

Take each of the following courses:

MUSC 123	Electronic Sound Synthesis	5
MUSC 124	Intermediate Electronic Sound Synthesis	5
MUSC 125	Advanced Electronic Sound Synthesis	5

Two quarters of:

MUSC 167	Workshop in Electronic Music	2
MUSC 167R	Recording Workshop	2

One of the following:

MUSC 80L	Artificial Intelligence and Music	5
MUSC 80R	Music in the Digital Age	5
PHYS 80U	Physics and Psychophysics of Music	5
MUSC 80Z	Laptop Music	5
FILM 171A	Sound	5

THEA 114	Sound Design and Engineering for the Theater	5
----------	--	---

Or a similar music course that has a technical focus as approved by the department

One of the following:

PHYS 160	Practical Electronics	5
ECE 101	Introduction to Electronic Circuits	5
ECE 153	Digital Signal Processing	5
ECE 171	Analog Electronics	5
CSE 20	Beginning Programming in Python	5
CSE 5J	Introduction to Programming in Java	5

JAZZ MINOR

Course Requirements

The jazz minor focuses on the study of the history, theory, and performance of jazz. In addition, students may be introduced to musical styles that have had profound influences on this uniquely American art form: folk and popular musics of Africa, Europe, and the United States and Western classical music. The jazz minor is limited to students who have sufficient performance proficiency to pass auditions for entry into the jazz ensembles.

Lower-Division Courses

MUSC 11A	Introduction to Western Classical Music	5
MUSC 15	Preparatory Musicianship	5
MUSC 75	Beginning Improvisational Theory	5

One of the following:

MUSC 11D	Introduction to World Music	5
MUSC 80J	American Folk Music	5
MUSC 80P	Popular Music in the United States	5
MUSC 80Q	A Survey of African Music	5

Upper-Division Courses

MUSC 175	Jazz Theory II	5
MUSC 111B	Seminar in Jazz Analysis	5

Six quarters of ensembles, including at least three quarters of the jazz ensembles

MUSC 3	Large Jazz Ensemble	2
MUSC 164	Jazz Ensembles	2

Plus the following course:

MUSC 174	Intermediate Jazz Improvisation	5
----------	---------------------------------	---

Graduate Program

MUSIC M.A.

Introduction

The Master of Arts (M.A.) degree program in music has emphases in composition, musicology/ethnomusicology, or performance practice, and integrates studies in performance, composition/analysis, and research. In consultation with a faculty adviser, the student pursues a two-year course of studies culminating in a final project that combines an original composition, written thesis, or essay with a related public performance or lecture recital.

Requirements

Course Requirements

A minimum of 60 course credits completed at UC Santa Cruz is required for the degree. All M.A. students are required to complete the following core courses:

MUSC 200	Introduction to Research Methods	5
MUSC 201	History of Music Theory from the Greeks Through Rameau	5
MUSC 202	Tonal and Posttonal Analysis	5
MUSC 252	Current Issues Colloquium	

Students entering the program Fall 2007 and later take MUSC 252 each quarter they are in residence.

Students with an emphasis in composition also complete:

MUSC 219	Techniques in Composition	5
MUSC 220	Graduate Seminar in Music Composition	5

Plus one course in the Music 203 Performance Practice series

MUSC 203A	Performance Practice in the Middle Ages	5
MUSC 203B	Performance Practice in the Renaissance	5
MUSC 203C	Performance Practice in the Baroque	5
MUSC 203D	Performance Practice in the Classic Period	5
MUSC 203E	Performance Practice in the Romantic Period	5
MUSC 203F	Performance Practice in the 20th Century	5
MUSC 203G	Concepts, Issues, and the Practice of Ethnomusicology	5
MUSC 203H	Area Studies in Performance Practice	5

Students with an emphasis in musicology/ethnomusicology or performance practice also complete:

Three courses from the Music 203 Performance Practice series

MUSC 203A	Performance Practice in the Middle Ages	5
MUSC 203B	Performance Practice in the Renaissance	5
MUSC 203C	Performance Practice in the Baroque	5
MUSC 203D	Performance Practice in the Classic Period	5
MUSC 203E	Performance Practice in the Romantic Period	5
MUSC 203F	Performance Practice in the 20th Century	5
MUSC 203G	Concepts, Issues, and the Practice of Ethnomusicology	5
MUSC 203H	Area Studies in Performance Practice	5

MUSC 206D: Music Perception and Cognition meets the requirement for one MUSC 203 course. It is possible, in some cases, to substitute a course from the MUSC 253 or MUSC 254 series for one MUSC 203 course. Students should contact the Graduate Advisor for more information on petitioning the Graduate Committee for course substitutions.

Other Requirements

The final project for the degree includes both performing and scholarly components, which vary according to the degree emphasis.

Students with a composition emphasis submit a thesis composition together with an essay that addresses historical, technical, and/or interpretive issues of the music (MUSC 299); and they complete a full-length recital (MUSC 298) of their compositional work. [MUSC 299 is not required for composition emphasis (essay not thesis).]

Students with a musicology/ethnomusicology emphasis complete a thesis (MUSC 299) and a short performance or lecture-recital related to the thesis (MUSC 298).

Students with a performance practice emphasis complete a full-length recital (MUSC 298) and an accompanying short essay that addresses historical, technical, and/or interpretive aspects of the music performed in the recital. Students in this emphasis whose main area is conducting complete a full-length recital (MUSC 298) and one of the following: a shorter lecture-recital, a short analytical or contextual essay on a different topic, or a collaboration with a graduate student composer or faculty composer on a premiere public performance. Students are encouraged to create a program involving corollary studies such as computer studies, area cultural studies, linguistics, anthropology, theater arts, and visual arts.

Letter Grade Policy

Graduate students must take all core courses for a letter grade. These courses include the following: Music 200, 201, 202, 203A-H, 206A-D, 219, 220, 253A-D, and 254A-M. Graduate students must take all courses for a letter grade with the exception of independent study courses (Music 261, 265, 295, 297, 298, and 299) and the colloquium course (Music 252), which may be taken with the Satisfactory/Unsatisfactory grade option. Grades of C or D do not satisfy any course requirement for a music graduate degree.

Applying for Graduation

Students should contact the Graduate Adviser to confirm that all requirements for the M.A. degree have been met and to complete the Graduate Division "Application for the M.A. Degree" form.

MUSIC D.M.A.

Introduction

The Doctor of Musical Arts (D.M.A.) degree program in music composition focuses on computer-assisted composition and world music composition. Computer-assisted composition includes algorithmic techniques for the generation of musical materials and structures to be realized in the creation of instrumental, vocal, and digitally synthesized music. World music composition addresses a variety of compositional approaches influenced by indigenous world musics, with a focus upon those musics taught by faculty composers, ethnomusicologists, and applied instructors. The D.M.A. program seeks to develop accomplished, active, and articulate composers who have a broad awareness of the diverse styles, cultural influences, media, venues, and technical means available to them in the 21st century.

Advancement to Candidacy

Course Requirements

For students entering with the bachelor's degree, a minimum of 102 credits in coursework at UC Santa Cruz will be required. All students must be in residence for a minimum of nine quarters. Students must enroll in a minimum of 10 credits each quarter until they advance to candidacy. After advancing to candidacy, students remaining in residence must take a minimum of one 5-credit course each quarter.

For students entering with a master's degree from another institution, a minimum of 72 credits in coursework at UC Santa Cruz will be required. All students must be in residence for a minimum of six quarters. Students must enroll in a minimum of 10 credits each quarter until they advance to candidacy. After advancing to candidacy, students remaining in residence must take a minimum of one 5-credit course each quarter. D.M.A. students are expected to complete the degree within a maximum of six calendar years from entrance to the program (leaves of absence are not excluded from this count).

Students entering the D.M.A. program with a bachelor's degree must take the following course:

MUSC 200	Introduction to Research Methods	5
----------	----------------------------------	---

Students entering the D.M.A. with an M.A. degree in a field other than music should consult their adviser about taking MUSC 200, Research Methods.

All students entering the DMA program must take the following courses:

MUSC 202	Tonal and Posttonal Analysis	5
MUSC 219	Techniques in Composition	5
MUSC 220	Graduate Seminar in Music Composition	5
MUSC 206A	World Music Composition	5
MUSC 206B	Computer-Assisted Composition	5

Current Issues Colloquium

Before advancing to candidacy, all DMA students must enroll in MUSC 252, Current Issues Colloquium, each quarter in residence. MUSC 252 may be taken satisfactory/unsatisfactory or for a letter grade.

Five quarters of independent study:

MUSC 297	Independent Study	5
MUSC 298	Graduate Recital	5
MUSC 299	Thesis Research	5

D.M.A. students must take at least five quarters of independent study.

MUSC 297 is taken in preparation for the Qualifying Exams.

MUSC 297 is typically taken the quarter of the Qualifying Recital.

MUSC 299 is usually taken after advancing to candidacy, in preparation for the dissertation.

Elective Requirements

D.M.A. students must take at least two of the following elective courses.

Note that if students elect to take MUSC 267, Workshop in Computer Music and Visualization, to satisfy one elective requirement, two quarters of the course are required.

MUSC 201	History of Music Theory from the Greeks Through Rameau	5
MUSC 267	Workshop in Computer Music and Visualization	2
MUSC 203H	Area Studies in Performance Practice	5
MUSC 203G	Concepts, Issues, and the Practice of Ethnomusicology	5

Foreign Language Requirements

Current skill in reading and comprehension of a relevant foreign language must be demonstrated by:

1. Satisfactory completion of level 3 of a foreign language at UCSC, preferably in the first year of the program; or
2. Submission of an official transcript documenting successful completion of one year of university-level foreign language at another institution (equivalent to level 3 at UCSC); or
3. Passing a foreign language proficiency examination administered by the Music Department in French, Spanish, German, Italian, or Russian. (This test requires translation of a passage of at least 600 words with no resources other than a dictionary to be completed in 1.5 hours.)
4. For languages other than French, Spanish, German, Italian, or Russian, the department may accept completion of an online course as fulfilling the requirement if the student can prove equivalency to a level 3 course at UCSC. The graduate committee will determine whether or not to accept any such course.

With approval of the primary adviser, students whose emphasis is algorithmic composition may complete three quarters or one year of university-level instruction in computer programming in lieu of the foreign language requirement.

Ph.D. students are required to demonstrate proficiency in a foreign language according to the same procedures as the M.A. or D.M.A. In addition, Ph.D. students are required during their first year of enrollment to demonstrate proficiency in a second foreign language relevant to their area of interest.

Knowledge of languages not offered at UCSC must be demonstrated as determined by the Music Department's graduate committee. Graduate Division policy states that the language requirement must be completed prior to taking the qualifying examination.

Teaching Requirement**Pre-Qualifying Requirements****Pre-Qualifying Reviews**

Before the end of the first year of study, all D.M.A. students must present a half recital of their compositions from that year, and submit the scores and recital recording as a portfolio, which faculty will use to assess the student's progress in the program. Faculty may also consider the student's performance in MUSC 200, MUSC 201, and/or MUSC 202. In unusual cases, when progress has been minimal, faculty reserves the right to terminate a student's enrollment in the program. Typically, the half recital is satisfied by a combination of 1) participation in a concert of graduate-student compositions sponsored each April by the Music Department, and 2) participation in a public reading of graduate-student final projects from MUSC 219 and MUSC 220.

The Qualifying Recital

At the end of their second year of study, all students admitted to the D.M.A. program must present a half-recital (35-40 minutes of music) representing their best work since entering the program. The D.M.A. qualifying recital will be evaluated by the student's primary adviser and by a second faculty member (generally a second composer) selected by the student in consultation with the primary adviser.

Dissertation Prospectus

The dissertation prospectus must be submitted 12 months before the scheduled qualifying examination. The prospectus must include a proposal describing the scope and nature of the dissertation composition and the accompanying essay. In addition to defining the parameters of the dissertation itself, the dissertation prospectus will suggest to the student's qualifying examination committee three areas of study to be emphasized in the student's qualifying examination. The three topics must be designed to prepare the student for an informed and successful completion of the dissertation project.

Qualifying Examination

Advancement to candidacy is contingent upon the passing of a written examination and an oral examination normally administered at the end of year three for students entering with a bachelor's degree, and the end of year two or the beginning of year three for students entering with a master's degree from another institution. For the written portion of the examination, the qualifying examination committee provides questions on the three topics assigned as areas of emphasis. The oral examination is administered by the student's qualifying examination committee and may concern any aspect of the assigned topics with an emphasis on those issues addressed in the written portion of the examination. Advancement to candidacy will be granted after successful completion of the written and oral examinations, acceptance of the dissertation reading committee form, satisfactory completion of coursework and the foreign language requirement, and the payment of the necessary fees.

Post-Qualifying Requirements

After advancing to candidacy, students must enroll in at least one quarter of MUSC 299, Thesis Research, in preparation for the dissertation.

Letter Grade Policy

Graduate students must take all core courses for a letter grade. These courses include the following: Music 200, 201, 202, 203A-H, 206A-D, 219, 220, 253A-D, and 254A-M. Grades of C or D do not satisfy any course requirement for a music graduate degree.

Independent study courses (Music 261, 265, 295, 297, 298, and 299) and the colloquium course (Music 252) may be taken with the satisfactory/unsatisfactory grade option.

Dissertation

Dissertation

D.M.A. students must complete a dissertation consisting of a substantial musical composition accompanied by an essay. One to two years of work beyond the qualifying examinations should be sufficient for the completion of the dissertation, except in cases where extended fieldwork is required.

Dissertation Defense

The final examination will be a public oral defense of the dissertation. After an oral presentation by the candidate, the candidate will be questioned by the dissertation committee.

Academic Progress

For more information about maintaining academic good standing, students should consult the Academic Requirements and Standards section of the Division of Graduate Studies Handbook.

Applying for Graduation

For more information on applying for graduation, students should make an appointment with the Graduate Program adviser and consult UCSC's Graduate Division Handbook.

MUSIC PH.D.

Introduction

The Doctor of Philosophy (Ph.D.) degree in music has an emphasis in cross-cultural studies, and aims to provide doctoral students with an integrative framework for music scholarship, emphasizing the ways in which musicology and ethnomusicology interact and complement one another.

In addition to cultural approaches to musical style, the program also encourages the integration of scholarly research with musical performance, emphasizing the manner in which performance serves both rhetorical and symbolic ends within various cultural settings. To this end the concept of "performance practice" plays a significant role in this program, given that the concept of historically or culturally informed performance is applicable to music from the earliest times to the present day in all geographical and cultural regions, and can encompass research activities as diverse as fieldwork, historical editing, and recording, as well as publishing of books and articles on the traditions of composition and performance.

Advancement to Candidacy

Course Requirements

Students entering the Ph.D. program with a bachelor's degree are required to complete the following course:

MUSC 200	Introduction to Research Methods	5
----------	----------------------------------	---

Plus three courses from the MUSC 203 Performance**Practice series:**

MUSC 203A	Performance Practice in the Middle Ages	5
MUSC 203B	Performance Practice in the Renaissance	5
MUSC 203C	Performance Practice in the Baroque	5
MUSC 203D	Performance Practice in the Classic Period	5
MUSC 203E	Performance Practice in the Romantic Period	5
MUSC 203F	Performance Practice in the 20th Century	5
MUSC 203G	Concepts, Issues, and the Practice of Ethnomusicology	5
MUSC 203H	Area Studies in Performance Practice	5

MUSC 206D or a course in the MUSC 254 series may each substitute for one 203 course.

Plus two courses from the MUSC 253 series:

MUSC 253A	Historical Perspectives in Musicology and Ethnomusicology	5
MUSC 253B	Rhythm, Time, and Form	5
MUSC 253C	Music and Discourse	5
MUSC 253D	Issues in the Ethnography of Music	5

Plus three courses from the MUSC 254 series:

MUSC 254C	Performativity and Music	5
MUSC 254D	Organology and Acoustics	5
MUSC 254E	Asian Resonances in 20th-Century American and European Music	5
MUSC 254J	Jazz Historiography	5
MUSC 254K	Music, Gender, and Sexuality	5
MUSC 254L	John Cage: Innovation, Collaboration, and Performance Technologies	5
MUSC 254M	Music in San Francisco, 1850-1950	5
MUSC 254N	Cruising the Postcolony	5
MUSC 254O	Historiography of American Music	5
MUSC 254R	Research Design and Grant Writing for Music Scholars	5

Plus the following course during each quarter of residence:

MUSC 252	Current Issues Colloquium
----------	---------------------------

Students must enroll in MUSC 252, Current Issues Colloquium, until advancing to candidacy.

Elective Requirements

Students entering the Ph.D. program with a bachelor's degree must take three elective graduate seminars, one of which must

be outside of the Music Department. Elective seminars should be selected in consultation with the student's faculty adviser.

Electives in the Music Department might include an additional course from the MUSC 203 Performance Practice series, an additional course from the MUSC 253 series, or an additional course from the MUSC 254 series.

Elective course options also include the following seminars:

MUSC 201	History of Music Theory from the Greeks Through Rameau	5
MUSC 202	Tonal and Posttonal Analysis	5
MUSC 228	Techniques of Modernity and Aesthetic Formations	5

Fourth Quarter Research Paper

Ph.D. students entering the program with a bachelor's degree are required to submit a research paper by the beginning of the fourth quarter in residence, which will be revised that quarter under the supervision of the student's faculty adviser, and will be evaluated at the end of the quarter by the adviser and an additional faculty member. Students whose paper is assessed as unsatisfactory will not be allowed to continue in the Ph.D. program.

Students entering the Ph.D. program with a master's degree are required to complete following courses:**Three courses from the MUSC 203 Performance****Practice series:**

MUSC 203A	Performance Practice in the Middle Ages	5
MUSC 203B	Performance Practice in the Renaissance	5
MUSC 203C	Performance Practice in the Baroque	5
MUSC 203D	Performance Practice in the Classic Period	5
MUSC 203E	Performance Practice in the Romantic Period	5
MUSC 203F	Performance Practice in the 20th Century	5
MUSC 203G	Concepts, Issues, and the Practice of Ethnomusicology	5
MUSC 203H	Area Studies in Performance Practice	5

Two courses from the MUSC 253 series

MUSC 253A	Historical Perspectives in Musicology and Ethnomusicology	5
MUSC 253B	Rhythm, Time, and Form	5
MUSC 253C	Music and Discourse	5
MUSC 253D	Issues in the Ethnography of Music	5

Three courses from the MUSC 254 series

MUSC 254C	Performativity and Music	5
MUSC 254D	Organology and Acoustics	5
MUSC 254E	Asian Resonances in 20th-Century American and European Music	5

MUSC 254J	Jazz Historiography	5
MUSC 254K	Music, Gender, and Sexuality	5
MUSC 254L	John Cage: Innovation, Collaboration, and Performance Technologies	5
MUSC 254M	Music in San Francisco, 1850-1950	5
MUSC 254N	Cruising the Postcolony	5
MUSC 254O	Historiography of American Music	5
MUSC 254R	Research Design and Grant Writing for Music Scholars	5

Plus the following course during each quarter of residence:

MUSC 252 Current Issues Colloquium

Students must enroll in MUSC 252, Current Issues Colloquium, until advancing to candidacy.

Plus the following course:

MUSC 299 Thesis Research 5

Elective Requirement

Students entering the Ph.D. program with a master's degree must take one elective graduate seminar from outside the Music Department. This seminar should be selected in consultation with the student's faculty adviser.

Foreign Language Requirements

Current skill in reading and comprehension of a relevant foreign language must be demonstrated by:

1. Satisfactory completion of level 3 of a foreign language at UCSC, preferably in the first year of the program; or
2. Submission of an official transcript documenting successful completion of one year of university-level foreign language at another institution (equivalent to level 3 at UCSC); or
3. Passing a foreign language proficiency examination administered by the Music Department in French, Spanish, German, Italian, or Russian. (This test requires translation of a passage of at least 600 words with no resources other than a dictionary to be completed in 1.5 hours.)
4. For languages other than French, Spanish, German, Italian, or Russian, the department may accept completion of an online course as fulfilling the requirement if the student can prove equivalency to a level 3 course at UCSC. The graduate committee will determine whether or not to accept any such course.

With approval of the primary adviser, students whose emphasis is algorithmic composition may complete three quarters or one year of university-level instruction in computer programming in lieu of the foreign language requirement.

In addition, Ph.D. students are required during their first year of enrollment to demonstrate proficiency in a second foreign language relevant to their area of interest.

Knowledge of languages not offered at UCSC must be demonstrated as determined by the Music Department's graduate committee. Graduate Division policy states that the language requirement must be completed prior to taking the qualifying examination.

Teaching Requirements

Pre-Qualifying Requirements

Pre-qualifying Reviews

At the end of the first year of study, all students accepted into the Ph.D. program will submit a brief report on work completed during that year. This report will inform a consideration by the music faculty of the student's status in the graduate program. Faculty will offer comments and suggestions to be communicated to the student either directly or through the student's adviser. If progress is minimal, faculty reserves the right to terminate a student's enrollment in the program.

Qualifying Examination

Advancement to candidacy is contingent upon passing both written and oral examinations. The written qualifying examination will test knowledge absorbed through the two years of coursework as well as material in the student's field of concentration. The oral examination will focus on the previously completed written examinations well as the student's developed expertise in her/his chosen specialization. Students must be registered in the quarter in which they take their qualifying examination.

The examinations will normally be administered at the end of year 3 for students entering with a bachelor's degree, and at the end of year 2 for students entering with a master's degree.

Advancement to candidacy will be granted after successful completion of the written and oral examinations, acceptance of the dissertation reading committee form, satisfactory completion of coursework and the foreign-language requirement, and the payment of the necessary fees.

Letter Grade Policy

Graduate students must take all core courses for a letter grade. These courses include the following: Music 200, 201, 202, 203A-H, 206A-D, 219, 220, 253A-D, and 254A-M. Grades of C or D do not satisfy any course requirement for a music graduate degree.

Independent study courses (Music 261, 265, 295, 297, 298, and 299) and the colloquium course (Music 252) may be taken with the Satisfactory/Unsatisfactory grade option.

Non-Terminal Master's Degree

Students who entered the Ph.D. program with a bachelor's degree may apply for the M.A. degree after completion of a minimum of five quarters in residence, evidence of the

completion of the equivalent of one year of a foreign language at UCSC, the fourth-quarter research paper, and the following courses: MUSC 200, one course from the MUSC 203 series, MUSC 252 each quarter in residence, one course each from the MUSC 253 and MUSC 254 seminar series, two elective graduate seminars (one of which may be outside of the Music Department), and MUSC 297.

Dissertation

Dissertation

To satisfy requirements for the degree, a student must complete a dissertation and present a related formal lecture or lecture-recital. The student will develop a dissertation prospectus, which will be due six months after advancement to candidacy. Guidelines for the format and content of the prospectus can be found on the Music Department web site. The dissertation must embody substantial and original scholarly work based on a clearly distinguishable contemporary or historical music-cultural tradition, in any music-culture(s) of the world in which the UCSC program offers expertise. The public lecture or performance must demonstrate the student's grasp of the pertinent music-cultural performance tradition or music-cultural and/or music-historical concepts.

Dissertation Preparation Course Requirements

Students preparing for the dissertation should complete at least one quarter of MUSC 299, Thesis Research, with the faculty adviser.

Dissertation Defense

The final examination will be an oral defense of the dissertation open to the university faculty.

Successful completion of this examination will be determined by a majority vote of the dissertation reading committee.

Additional information about the program, including application and admission, is available from the Division of Graduate Studies and on the department website.

Academic Progress

For more information about maintaining academic good standing, students should consult the Academic Requirements and Standards section of the Division of Graduate Studies Handbook.

Applying for Graduation

For more information on applying for graduation, students should make an appointment with the Graduate Program adviser and consult UCSC's Graduate Division Handbook.

Theater Arts

J106 Theater Arts Center
 (831) 459-2974
 theater@ucsc.edu
 http://theater.ucsc.edu/

PROGRAMS OFFERED

Theater Arts B.A. (p. 77)

Theater Arts Minor (p. 80)

Dance Minor

Theater Arts M.A. (p. 84)

The Theater Arts Department is a diverse group of scholars/artists united by a passionate belief in the value of the performing arts. Based on respect for the classical theater of all cultures, combined with a determination to challenge tradition and fashion, we educate our students in the history, theory, and practice of theater and dance to address fundamental issues by using the tools of body, voice, mind, and imagination. Seeking to attain the highest levels of intellectual and artistic integrity, and with a commitment to cultural diversity, we serve the research mission of UC Santa Cruz, our audiences, and the students who will shape the theater of the future.

Undergraduate Program

The Theater Arts Department combines drama, dance, critical studies, and theater design/technology to offer students an intensive program of theater as a unified field. The program stresses the inter-relation of all disciplines as essential to the successful practice of the theater arts in the 21st century. Graduates of the UCSC program typically pursue careers in professional theater and dance companies, in film and television, and in teaching at all levels—from university to high school to grade school. Many students go on to higher degrees at prestigious national programs. Others engage in careers in arts, administration, dramatic writing, and related fields.

The lower-division curriculum requires a range of practical work in the various concentrations and an interdisciplinary exposure to critical and historical studies. At the upper-division level, students are given the opportunity to focus on one or more areas of interest in limited-enrollment studios. At the same time, they are asked to expand their theoretical perspectives through confrontation with performance theory and focused coursework in critical studies. The impact of digital and new media on theater is also integrated into the curriculum.

A wealth of production opportunities is available to students. This includes major productions directed by faculty or distinguished visiting artists each quarter, productions directed or choreographed by students, and faculty-directed

workshops. Undergraduate students are also given the opportunity to see their own writing, choreography, or developing concepts put into production in department-sponsored productions and annual festivals of student work. Although majors are given preference in studio courses, most courses and productions welcome non-majors as well. Opportunities to study and perform non-Western as well as Euro-American traditions are also a significant part of the program.

The stage and studio spaces available to students of theater arts allow for a breadth of training and performance opportunities. The Theater Arts Center contains a 500-seat thrust stage; a state-of-the-art experimental theater; a 200-seat proscenium theater; acting, directing, design and dance studios; costume, scene, and properties shops; a sound recording room; and a computer lab. Also, located at the base of the campus is our 150-seat Barn Theater.

Library holdings in theater literature and history are extensive, including a large slide collection and dance video archives; journals in current theater, design/technology, and dance; and recordings, films, videotapes, and CD-ROMs.

THEATER ARTS B.A.

Information and Policies

Introduction

Academic Advising for the Program

General information about theater arts and dance degrees is available on the Theater Arts Department website. Students are also strongly encouraged to consult early with the Theater Arts Department adviser to create an academic plan for the major or a minor far in advance of declaration, as early as the summer before beginning at the university. Please use Slug Success to make an appointment. You may also contact the department adviser by emailing theater@ucsc.edu or calling (831) 459-2974.

Transfer students—please also see the How to Declare a Major and the Transfer Information and Policy sections below.

Program Learning Outcomes

Our program stresses dance, design, and drama as essential disciplines in the successful practice of theater arts in the contemporary world.

Graduates from the Theater Arts B.A. program should demonstrate the following:

1. Foundations of Performance. Students should be able to identify and apply basic theatrical techniques in dance, design, and drama.
2. Theatrical histories and theories. Students should be able to recognize and analyze performance works within the general culture and historical period that produced them.

3. Performance experience. Students should be able to translate theater arts concepts into performance, participating in any theatrical endeavor with the rigor, discipline, and imagination necessary to make a meaningful contribution.
4. Research proficiency. Students should be able to formulate personal research questions that expand their knowledge of theater arts, conducting independent research into the history and theory of at least one area of interest.
5. Creative practice. Students should be able to use theatrical practices and performance experiences to conceive, design, realize, and reflect on new performance projects.
6. Appreciation of diversity. Students should be able to recognize and appreciate a wide variety of approaches, cultures, and styles in both past and contemporary performance practice.
7. Communication and critical thinking. Students should be able to use critical vocabularies to communicate clearly about theater arts in written and oral forms.
8. Collaborative skills. Students should be able to work confidently and effectively in groups on a common project.

Major Qualification Policy and Declaration Process

Major Qualification

Transfer students—please see the How to Declare a Major and the Transfer Information and Policy sections below.

To declare the major no later than the major declaration deadline in their sixth term, as required by the university, students who start UC Santa Cruz as frosh must have successfully completed three lower-division courses:

One course from:

THEA 61A	Ancient and Medieval Drama	5
THEA 61B	Drama from the Renaissance to the Modern Age	5
THEA 61C	The Birth of the Modern: Drama and Performance After the Renaissance	5

Plus two courses chosen from:

THEA 10	Introduction to Theater Design and Technology	5
THEA 30	Introduction to Dance Theory and Technique	5
Either this course		
THEA 20	Introductory Studies in Acting	5
or this course		
THEA 21	Acting Studio I: Psychological Realism	5

Either THEA 20 or THEA 21 may be used as one of the three courses taken for declaration eligibility (not both). THEA 20

is a non-audition course designed for students with little or no experience in acting. THEA 21 is geared toward students with some acting experience and is admission-by-audition (auditions are held on the first day of class). Please speak with the department adviser for more information.

Students who start UCSC as frosh are encouraged to complete the three qualification courses as early in their studies as possible so that they may declare the major no later than the end of sophomore year, as required by the university.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student and college of the decision. Students should submit their appeal via email to theater@ucsc.edu.

How to Declare a Major

To declare the theater arts major, minor or dance minor all students meet with the academic adviser to begin the declaration process either by making an appointment (via Slug Success). Students may also drop in for an unscheduled appointment, as available, during regular office open hours: Monday–Friday, 9:30 a.m.-noon or 1-3 p.m. in the department office, Theater Arts Center, room J106. Students are also required to meet with a faculty adviser (assigned by the academic adviser) as part of the declaration process.

Transfer students are encouraged to declare the major as soon as possible and may declare as soon as their first quarter on campus after meeting with the Theater Arts academic adviser. Transfer students may declare the theater arts major even if they have not completed any theater arts courses and must declare a major by the end of their second quarter, as required by the university. Transfer students should also read the notes in the Transfer Information and Policy section.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to pursue the theater arts major are not required to audition, submit a portfolio, or complete specific major preparation courses for consideration of admission to UC Santa Cruz.

While not required for admission, transfer students are recommended to complete general education requirements before coming to UCSC. Students may also complete courses that are articulated to UCSC lower-division Theater Arts courses before coming to UCSC. Please consult with the department adviser for more information.

Getting Started at UCSC as a Transfer Student

Transfer students are strongly advised to consult with the Theater Arts academic adviser prior to enrolling in classes their first quarter.

Transfer students may petition to have equivalent lower-division courses taken at other schools count toward lower-division major or minor requirements and should consult with the Theater Arts academic adviser as early as possible regarding this option.

As stated in the How to Declare a Major section, transfer students can declare the major at any time after coming to UCSC and are encouraged to do so as soon as possible, even if they have not completed any theater arts courses. Transfer students entering as juniors must declare a major by the deadline in their second quarter, as required by the university.

Letter Grade Policy

This program does not have a letter grade policy outside the university's Pass/No Pass limit and minimum grade requirement.

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Study Abroad

Students should consult with their department and college advisers before planning studies outside of UCSC. Some required courses are only offered in certain quarters, for example, therefore careful planning with campus advisers is essential.

Credits earned via a study abroad program, such as the UC Education Abroad Program (EAP), or off-campus programs are considered on a case-by-case basis by the department chair. Please consult with the department adviser about this process.

Requirements and Planners

Course Requirements

The theater arts major requires seven lower-division courses, six credits of course THEA 50, and eight upper-division courses (inclusive of a senior seminar course, THEA 185). Majors may organize their studies around an area of interest in accordance with the requirements outlined below. The following six lower-division courses must be taken by all majors:

Credits earned via a study abroad program, such as the UC Education Abroad Program (EAP), or other off-campus programs are considered on a case-by-case basis by the department chair. Students should consult with their department and college advisers before planning studies outside of UCSC.

Lower-Division Courses

One of the following courses:

THEA 20	Introductory Studies in Acting	5
THEA 21	Acting Studio I: Psychological Realism	5

Plus all of the following courses:

THEA 10	Introduction to Theater Design and Technology	5
THEA 30	Introduction to Dance Theory and Technique	5
THEA 61A	Ancient and Medieval Drama	5
THEA 61B	Drama from the Renaissance to the Modern Age	5
THEA 61C	The Birth of the Modern: Drama and Performance After the Renaissance	5

Plus one lower-division 5-credit elective

Plus the following course (three times):

THEA 50	Fundamentals of Theater Production	2
---------	------------------------------------	---

NOTE: this two-credit course must be taken three times for a total of six credits. Students are highly encouraged to contact the department adviser early to learn about the unique enrollment process for THEA 50, as well as to complete all six units before their last quarter on campus.

Plus one course

One lower-division 5-credit elective course.

Upper-Division Courses

The following eight upper-division courses must be taken to complete the major:

The following course:

THEA 160	Dramatic Theories	5
----------	-------------------	---

Plus two studio courses chosen from:

THEA 103	Design Concept Development	5
THEA 106	Digital Illustration	5
THEA 114	Sound Design and Engineering for the Theater	5
THEA 115A	Design Studio: Scenic Design	5
THEA 115B	Design Studio: Scenic Design B	5
THEA 117	Design Studio: Costume	5
THEA 117A	Advanced Costume Construction	5
THEA 118	Design Studio: Scene Painting	5
THEA 119	Design Studio: Lighting Studio B	5
THEA 120	Voice and Movement for Performers	5
THEA 121	Acting Studio II: Shakespeare	5
THEA 123	Acting and Shakespeare	5
THEA 124	Movement for Performers	5
THEA 126	Acting Studio III	5
THEA 126M	The Meisner Technique: A Practical Exploration	5
THEA 131A	Dance Studio II: Asian or Asian Diasporic Practice	5
THEA 131C	Dance Studio II: Advanced Contemporary Forms and Practices	5

THEA 135	Choreography I	5
THEA 136	Choreography II	5
THEA 141	Play Direction Studio I	5
THEA 142	Play Direction Studio II	5
THEA 152	Advanced Stagecraft	5
THEA 155	Shakespeare to Go	5
THEA 157	Playwriting	5
THEA 159	Advanced Playwriting	5

One of the upper division studio courses may be replaced by a faculty-directed production course listed in the separate section below.

Plus two history/theory/critical studies courses, chosen from:

THEA 100A	Asian Theater/Dance and Global Impacts	5
THEA 100B	Black Theater USA	5
THEA 100C	Courts, Courtesans, Shamans, and Clowns: Asian Drama	5
THEA 100W	Black/African Diasporic World Theater	5
THEA 104	Multimedia Authoring	5
THEA 108	Theater and Interaction Design	5
THEA 113	The History of Design for Theater	5
THEA 116A	History of Clothing and Costume	5
THEA 122	Indian Performance: Rama, Siva, Krishna	5
THEA 161C	Theater and Drama of the Renaissance	5
THEA 161D	Asian Theater: An Anthropological Approach	5
THEA 161H	Shakespeare In Asia	5
THEA 161M	Sexuality, Gender, Drama, and Performance	5
THEA 161P	Theater in the Chicano Power Movement	5
THEA 161Q	Queer Theatrics: Representations and Sensibilities	5
THEA 161R	Theater of American Cultures	5
THEA 161S	American Drama: Politics and Theater	5
THEA 161T	Women in Theater	5
THEA 161U	Performance of Story in Theater and Film	5
THEA 161Y	Modern Ancient Drama	5
THEA 163A	Shakespeare	5
THEA 163E	Chekhov and His Impact	5
THEA 163G	Special Studies in Playwrights: Artaud	5
THEA 163H	Henrik Ibsen and His Impact: Ghosts of the Future	5
THEA 163K	Special Studies in Playwrights: Euripides	5
THEA 164	Issues in Dance History and Theory	5
THEA 165	Dance Modernism	5

4-Year Frosh Planner

THEA 166	Ballet: A History	5
THEA 167	Africanist Aesthetics: Live Dialogues in the Americas and Africa	5

Plus one upper-division elective:

This may be any course listed in the upper-division studio section or the history/theory/critical studies sections above that is not being used to fulfill another requirement.

Plus one faculty-directed theater arts production course:

THEA 137	Studies in Performance (Dance)	5
THEA 137A	Studies in Performance (Dance): Asian	5
THEA 151	Studies in Performance (Drama)	5
THEA 151A	Studies in Performance: African American Theater Arts Troupe	5
THEA 151I	Studies in Performance: Indonesian Dance and Drama	5
THEA 155	Shakespeare to Go	5

Plus this comprehensive requirement course:

THEA 185	Senior Seminar	5
----------	----------------	---

The following courses do NOT satisfy theater arts major requirements:

THEA 55A	Workshop in Performance: Barnstorm	5
THEA 55B	Workshop in Performance: Barnstorm Lab	2
THEA 139	Random: With a Purpose	5
THEA 158	Chautauqua Workshop	5
THEA 190	Group Projects	5
THEA 198	Independent Field Study	5
THEA 199	Tutorial	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement in Theater Arts is met by completion of the required courses:

THEA 160	Dramatic Theories	5
THEA 185	Senior Seminar	5

Comprehensive Requirement

THEA 185	Senior Seminar	5
----------	----------------	---

Planners

Below are planners for frosh and junior transfer students. Please note that **LD = lower division** (courses numbered 1–99), and **UD = upper division** (courses numbered 100–199). Current course offerings can be found on the department website.

	Fall	Winter	Spring
Year 1 (Frosh)	<u>THEA 20</u> or <u>THEA 21</u>	<u>THEA 61B</u> (offered winter qtr only)	<u>THEA 61C</u> (offered spring qtr only)
			<u>THEA 10</u>
Year 2 (Soph)	<u>THEA 61A</u> (offered fall qtr only)	THEA LD Elective	THEA UD Studio
	<u>THEA 30</u>	[Start trying for the required faculty-directed production now or earlier]	
	<u>THEA 50</u> (2-credit)	<u>THEA 50</u> (2-credit)	<u>THEA 50</u> (2-credit)
Year 3 (Jr)	THEA UD Studio	THEA UD History/Theory/Crit Studies	<u>THEA 160</u> (offered spring qtr only; PREREQ FOR 185)
	THEA UD History/Theory/Crit Studies	THEA UD Elective	
Year 4 (Sr)	<u>THEA 185</u> (offered fall qtr only; PREREQ IS 160)		

The specific courses shown in this four-year planner satisfy the TA and IM general education (GE) requirements. Students must satisfy all other GE requirements. Students should consult their college advising office with any questions about GEs.

2-Year Transfer Planner

	Fall	Winter	Spring
Year 1 (Jr)	<u>THEA 61A</u> (offered fall qtr only)	<u>THEA 61B</u> (offered winter qtr only)	<u>THEA 61C</u> (offered spring qtr only)
	<u>THEA 20</u> or <u>THEA 21</u>	<u>THEA 30</u>	<u>THEA 160</u> (offered spring qtr only; prereq for 185)
	<u>THEA 10</u>	[Start trying for the required faculty-directed production]	THEA lower-division elective
		<u>THEA 50</u> (2-credit)	<u>THEA 50</u> (2-credit)
Year 2 (Sr)	<u>THEA 185</u> (offered fall qtr only; prereq is 160)	THEA upper-division History/Theory/Crit Studies	THEA upper-division History/Theory/Crit Studies
	THEA upper-division studio	THEA upper-division studio	THEA upper-division elective
	<u>THEA 50</u> (2-credit)		

In addition to the specific courses shown in this transfer planner, students must complete (or must have completed at another institution) courses satisfying all general education (GE) requirements. Students should consult their college advising office with any questions about GEs.

THEATER ARTS MINOR

Students earn a minor in theater arts by completing eight courses (seven 5-credit courses and one 2-credit course)

comprising a background in the theory and practice of the theater arts as well as a focus on drama, theater design/technology, or dance. The course requirements are listed below. There is no comprehensive requirement for the minor.

DECLARATION OF THE MINOR:

There are no course requirements for declaring the minor, though individual courses may have enrollment prerequisites, and a major must be officially declared before a minor may be declared. **To declare the minor**, first have an Academic Planning Form and Petition for Minor Declaration form completed and signed by your major department adviser. While that plan is current, make an appointment to meet with the Theater Arts adviser to create a plan for and declare the minor—please use Slug Success to make an appointment. You may also contact the department adviser by emailing theater@ucsc.edu or calling (831) 459-2974.

Students are strongly encouraged to consult early with the department adviser to create an academic plan for a minor in Theater Arts. This may be done prior to declaration.

Transfer students may petition to have equivalent lower-division courses taken at other schools count toward lower-division minor requirements and should consult with the Theater Arts academic adviser as early as possible regarding this possibility.

Course Requirements

Lower-Division Courses

Choose one from the following series:

THEA 61A	Ancient and Medieval Drama	5
THEA 61B	Drama from the Renaissance to the Modern Age	5
THEA 61C	The Birth of the Modern: Drama and Performance After the Renaissance	5

Plus one course in the student's area of focus chosen from:

THEA 10	Introduction to Theater Design and Technology	5
THEA 20	Introductory Studies in Acting	5
THEA 21	Acting Studio I: Psychological Realism	5
THEA 30	Introduction to Dance Theory and Technique	5
THEA 40	Introduction to Directing	5

Plus the following fundamentals course:

Students are highly encouraged to contact the department adviser early to learn about the unique enrollment process for THEA 50, as well as to complete this course before their last quarter on campus.

THEA 50	Fundamentals of Theater Production	2
---------	------------------------------------	---

Upper-Division Courses

Three history/theory/critical studies courses chosen from the following:

THEA 100A	Asian Theater/Dance and Global Impacts	5
THEA 100B	Black Theater USA	5
THEA 100C	Courts, Courtesans, Shamans, and Clowns: Asian Drama	5
THEA 100W	Black/African Diasporic World Theater	5
THEA 104	Multimedia Authoring	5
THEA 108	Theater and Interaction Design	5
THEA 113	The History of Design for Theater	5
THEA 116A	History of Clothing and Costume	5
THEA 122	Indian Performance: Rama, Siva, Krishna	5
THEA 161C	Theater and Drama of the Renaissance	5
THEA 161D	Asian Theater: An Anthropological Approach	5
THEA 161H	Shakespeare In Asia	5
THEA 161M	Sexuality, Gender, Drama, and Performance	5
THEA 161P	Theater in the Chicano Power Movement	5
THEA 161Q	Queer Theatrics: Representations and Sensibilities	5
THEA 161R	Theater of American Cultures	5
THEA 161S	American Drama: Politics and Theater	5
THEA 161T	Women in Theater	5
THEA 161U	Performance of Story in Theater and Film	5
THEA 161Y	Modern Ancient Drama	5
THEA 163E	Chekhov and His Impact	5
THEA 163A	Shakespeare	5
THEA 163G	Special Studies in Playwrights: Artaud	5
THEA 163H	Henrik Ibsen and His Impact: Ghosts of the Future	5
THEA 163K	Special Studies in Playwrights: Euripides	5
THEA 164	Issues in Dance History and Theory	5
THEA 165	Dance Modernism	5
THEA 166	Ballet: A History	5
THEA 167	Africanist Aesthetics: Live Dialogues in the Americas and Africa	5

Plus two studio courses (one of which may be a faculty-directed production; see separate section below):

THEA 103	Design Concept Development	5
THEA 106	Digital Illustration	5
THEA 114	Sound Design and Engineering for the Theater	5

THEA 115A	Design Studio: Scenic Design	5
THEA 115B	Design Studio: Scenic Design B	5
THEA 117	Design Studio: Costume	5
THEA 117A	Advanced Costume Construction	5
THEA 118	Design Studio: Scene Painting	5
THEA 119	Design Studio: Lighting Studio B	5
THEA 120	Voice and Movement for Performers	5
THEA 121	Acting Studio II: Shakespeare	5
THEA 123	Acting and Shakespeare	5
THEA 124	Movement for Performers	5
THEA 126	Acting Studio III	5
THEA 126M	The Meisner Technique: A Practical Exploration	5
THEA 131A	Dance Studio II: Asian or Asian Diasporic Practice	5
THEA 131C	Dance Studio II: Advanced Contemporary Forms and Practices	5
THEA 135	Choreography I	5
THEA 136	Choreography II	5
THEA 141	Play Direction Studio I	5
THEA 142	Play Direction Studio II	5
THEA 152	Advanced Stagecraft	5
THEA 155	Shakespeare to Go	5
THEA 157	Playwriting	5
THEA 159	Advanced Playwriting	5

Optional: one faculty-directed theater arts production course which may be used toward an upper-division studio requirement:

THEA 137	Studies in Performance (Dance)	5
THEA 137A	Studies in Performance (Dance): Asian	5
THEA 151	Studies in Performance (Drama)	5
THEA 151A	Studies in Performance: African American Theater Arts Troupe	5
THEA 151I	Studies in Performance: Indonesian Dance and Drama	5
THEA 155	Shakespeare to Go	5

The following do NOT satisfy theater arts minor requirements:

THEA 55A	Workshop in Performance: Barnstorm	5
THEA 55B	Workshop in Performance: Barnstorm Lab	2
THEA 139	Random: With a Purpose	5
THEA 158	Chautauqua Workshop	5
THEA 190	Group Projects	5
THEA 198	Independent Field Study	5
THEA 199	Tutorial	5

DANCE MINOR

Students earn a minor in dance by completing eight courses (seven 5-credit courses and one 2-credit course) comprising a background in the theory and practice of dance. The course requirements are listed below. There is no comprehensive requirement for the minor.

Declaration of the minor:

There are no course requirements for declaring the minor, though individual courses may have enrollment prerequisites, and a major must be officially declared before a minor may be declared. **To declare the minor**, first have an Academic Planning Form and Petition for Minor Declaration form completed and signed by your major department adviser. While that plan is current, make an appointment to meet with the Theater Arts adviser to create a plan for and declare the minor. Please use Slug Success to make an appointment. You may also contact the department adviser by emailing theater@ucsc.edu or calling (831) 459-2974.

Students are strongly encouraged to consult early with the department adviser to create an academic plan for a minor in dance. This may be done prior to declaration.

Transfer students may petition to have equivalent lower-division courses taken at other schools count toward lower-division minor requirements and should consult with the Theater Arts academic adviser as early as possible regarding this possibility.

Course Requirements

Lower-Division Courses

Lower-division courses may be used to fulfill requirements in both the theater arts major and dance minor (but separate upper-division courses must be taken to satisfy major and minor requirements). Consult with the department adviser if planning to pursue both the theater arts major and dance minor.

One course in creative practice, chosen from:

THEA 30	Introduction to Dance Theory and Technique	5
THEA 36	Introduction to Dance Composition	5

Plus one course in cross-cultural techniques, chosen from:

THEA 22	Indonesian Dance and Drama	5
THEA 31A	Dance Studio I: Asian or Asian Diasporic Practice	5
THEA 31B	Dance Studio I: Ballet	5
THEA 31C	Dance Studio I: Contemporary Dance Theory and Technique	5
THEA 37	African Dance	5
THEA 80R	Bollywood Dance and Culture in India and Indian Diaspora	5
THEA 80Z	Indian Dance	5
THEA 80U	Everybody Dance Now	5

The following fundamentals course:

Students are highly encouraged to contact the department adviser early to learn about the unique enrollment process for THEA 50, as well as to complete this course before their last quarter on campus.

THEA 50	Fundamentals of Theater Production	2
---------	------------------------------------	---

Upper-Division Courses**One course in creative practice or cross-cultural techniques, chosen from:**

THEA 131A	Dance Studio II: Asian or Asian Diasporic Practice	5
THEA 131B	Dance Studio II: Ballet	5
THEA 131C	Dance Studio II: Advanced Contemporary Forms and Practices	5
THEA 135	Choreography I	5
THEA 136	Choreography II	5

Plus one course in critical studies, chosen from:

THEA 164	Issues in Dance History and Theory	5
THEA 165	Dance Modernism	5
THEA 166	Ballet: A History	5
THEA 167	Africanist Aesthetics: Live Dialogues in the Americas and Africa	5

Plus three upper-division elective courses, which may be chosen from the following:

THEA 100A	Asian Theater/Dance and Global Impacts	5
THEA 100C	Courts, Courtesans, Shamans, and Clowns: Asian Drama	5
THEA 122	Indian Performance: Rama, Siva, Krishna	5
THEA 124	Movement for Performers	5
THEA 137	Studies in Performance (Dance)	5
THEA 137A	Studies in Performance (Dance): Asian	5
THEA 139	Random: With a Purpose	5
THEA 151I	Studies in Performance: Indonesian Dance and Drama	5
THEA 161D	Asian Theater: An Anthropological Approach	5

Any upper-division course listed in the Creative Practice/Cross-Cultural Techniques or Critical Studies sections may be used as an elective (but not double counted).

A select number of other courses may be used if approved by the department in advance (consult with the department adviser).

The following do NOT satisfy the dance minor requirements:

THEA 55A	Workshop in Performance: Barnstorm	5
THEA 55B	Workshop in Performance:	2

	Barnstorm Lab	
THEA 158	Chautauqua Workshop	5
THEA 190	Group Projects	5
THEA 198	Independent Field Study	5
THEA 199	Tutorial	5

Graduate Program

The Master of Arts degree combines intellectually rigorous coursework with challenging artistic practice. Like our undergraduate curriculum, our graduate program integrates the study of ancient and modern theater texts and practices, and it examines diverse approaches to performance. It encourages collaboration, initiative, and cross-disciplinary thinking.

THEATER ARTS M.A.

Introduction

The Theater Arts Department offers a 12-month Master of Arts (M.A.) in Theater Arts degree, which serves as a bridge from undergraduate work to professional work in a range of performance-related fields. It can also place students in an excellent position to pursue further graduate academic work, such as an M.F.A. or Ph.D.

Requirements

Course Requirements

Students are required to complete 40 credits for the M.A. in Theater Arts.

This includes three graduate seminars for a total of 15 credits:

THEA 290A	Text Analysis	5
THEA 290B	Performance Histories	5
THEA 290C	Performance Analysis	5

These courses are required of all M.A. candidates, regardless of their area of emphasis.

Students must also complete a 10-credit performance research project that includes a professional internship project:

THEA 293	Performance Research Project	10
----------	------------------------------	----

Students may take this course in any quarter in the academic year, though it is advised that the internship portion be completed during the summer before the regular M.A. program begins. This work will be supervised and assessed by a theater arts faculty member.

Students must also complete the following three 5-credit courses:

THEA 294	Future Stages	5
THEA 295	Group Critique	5
THEA 299	Capstone Thesis	5

M.A. students will also have the opportunity to complete an additional 5 credits or more of independent study work in

their area of interest; for example, participation in a department production or an upper-division undergraduate or graduate course in Theater Arts or in another department. These courses must be approved in advance by the graduate committee and graduate director.

There are no teaching requirements for graduate students in the Theater Arts M.A program; however, students are encouraged to act as teaching assistants, as positions are available, at UC Santa Cruz.

For additional information, please visit the department website or contact the Theater Arts Department and the UCSC Graduate Division.

Other Requirements

Applying for Graduation

HUMANITIES DIVISION

500 Humanities 1 Building
 (831) 459-2696
<https://humanities.ucsc.edu/>

What does it mean to be human, to analyze and construct the human experience? These are the fundamental questions that guide and unite the learning, teaching and scholarship conducted in UC Santa Cruz's Humanities Division. The exploration and discussion of this query has culminated in some of humanity's most deeply and widely valued beliefs and teachings about ourselves and the world in which we live.

Departments and programs in the Humanities Division at UC Santa Cruz train students to research the human condition in all of its complexity and diversity to become aware and effective citizens of the world, and to become visionaries and leaders in their chosen careers. The humanities provide a critical framework for thinking about the future through the lens of the past and the present.

Programs in the Humanities at UC Santa Cruz are nationally recognized for their quality faculty in the Humanities are recognized for their dedication to research and teaching. Students in the Humanities have the opportunity to work closely with faculty mentors on research projects that achieve award-winning results.

The following undergraduate majors are offered: applied linguistics and multilingualism, classical studies, critical race and ethnic studies, feminist studies, history, Italian studies, Jewish studies, language studies, linguistics, literature, philosophy, and Spanish studies. In addition, there are minors in classical studies, East Asian studies, history of consciousness, history, Italian studies, Jewish studies, language studies, linguistics, literature, and philosophy.

At the graduate level, the Ph.D. is offered by programs in feminist studies, history, history of consciousness, linguistics, literature, and philosophy. Master's (M.A.) programs are offered in history, linguistics, literature, and philosophy.

The Writing Program offers courses and assessments related to university and campus writing requirements and coordinates with the undergraduate colleges in delivering the college core curriculum.

The Humanities Institute at UC Santa Cruz is a hub for academic research, cross-discipline collaboration, and public engagement. They incubate ideas and foster innovation by funding projects, centers, and research clusters that enable faculty and students to work on some of the biggest problems of our day.

Critical Race and Ethnic Studies

416 Humanities I
(831) 459-2757
<https://cres.ucsc.edu/>

PROGRAMS OFFERED

Critical Race and Ethnic Studies B.A. (p. 87)

Critical Race and Ethnic Studies Designated Emphasis (p. 93)

Undergraduate Program

Launched in 2014-15, Critical Race and Ethnic Studies (CRES) curriculum has been formally organized such that undergraduate students may pursue organized study leading toward a bachelor of arts degree. CRES seek an understanding of “the public” and “the common good” as centrally constituted by racial and ethnic formations. This understanding requires the study of the dynamic power relations resulting from the cultural and institutional productions of the idea of “race” on a local, national, and global scale. Here, “race” is understood as a major ideological framework through which both practices of power and domination and struggles for liberation and self-determination have been articulated and enacted throughout modern history and in the contemporary moment. The study of “race,” as such, is a rigorous project, one which yields critical insights into the social, political, cultural, and economic processes that have defined and shaped the modern era—colonialism and slavery, conquest and displacement, genocide and warfare, migration and creolization, criminalization, imprisonment and disenfranchisement, globalization, and post-9/11 security state policies such as racial profiling. These phenomena orient our attention to particular academic fields with which CRES is necessarily in dialogue. These fields include postcolonial studies, settler colonialism studies, human rights studies, indigenous studies, migration, diaspora and border studies, mixed race studies, legal studies, environmental studies, and science studies.

Faculty from across the UC Santa Cruz campus have contributed significantly to conversations in critical race and ethnic studies for decades, with nationally renowned faculty in anthropology, community studies, feminist studies, film and digital media, history, history of art and visual culture, history of consciousness, Latin American and Latino studies, literature, politics, psychology, social documentation, sociology, and the sciences. In addition to courses specifically offered under the subject of CRES, many courses engaging critical race and ethnic studies are sponsored by these departments across campus.

CRITICAL RACE AND ETHNIC STUDIES B.A.

Information and Policies

Introduction

Critical Race and Ethnic Studies (CRES) majors develop a deep understanding of how race and other modalities of power have structured human life in the past and the present. Students acquire an understanding of the historical production of race and ethnicity in the United States and across the globe. They learn how the contours of race and racism have changed over time and, concomitantly, how individuals and groups have experienced these phenomena in constantly morphing ways. Students examine present-day racial/ethnic ideologies such as multiculturalism, colorblindness, and postracialism as well as contemporary social phenomena such as changing working conditions, new migration patterns, and emergent cultural expressions. Students also explore the ways that race and ethnicity have developed in concert with gender, sexuality, class, indigeneity, citizenship, and other modalities of power and lived identity.

CRES majors make critical use of methods and concepts from different academic disciplines as a means of better understanding historical and contemporary social phenomena and problems. In the process, they learn to recognize both the limits and the value of established knowledge production practices. The configuration of the major allows students flexibility at the upper division to design a course of study that enables a general understanding of a range of issues of intellectual and professional interest and/or a deeper understanding of a key area of focus. Students may craft an elective distribution from several areas of specific research and career interests. Or, they may wish to take a number of elective courses in a particular area to develop expertise in it. For example, they may wish to focus on a social group (e.g., members of the African Diaspora), on a discipline (e.g., history), on a social phenomenon (e.g., social movements), or on a methodological or theoretical orientation (e.g., theories of race, gender and sexuality).

Through their immersion in a program of study that is multidisciplinary, comparative, and transnational in scope, CRES majors develop a critical, situated perspective on the rights, responsibilities, and privileges of being a citizen of the United States or residing in its borders in the 21st century. CRES also helps students develop skills in critical thinking, comparative analysis, the application of social theory, research, communication, and writing so that they can act effectively in an ever-changing, complicated, and culturally diverse world.

Academic Advising for the Program

Email: cres@ucsc.edu

Phone: (831) 459-2757

CRES advising is held in Humanities 1, room 416. Drop in hours are posted on the CRES website. Students can make an

appointment by using the Slug Success application found under Resources in their student portal (MyUCSC).

Transfer students should consult the Transfer Student Information and Policy section for specific requirements.

Getting Started in the Major

Students interested in the CRES major do not need preparation to start in the major, but must be enrolled in or have completed CRES 10 to declare the major. (Please see the section "How to Declare a Major" for details.) All requirements of the major can be completed within two years.

Program Learning Outcomes

Students who complete the CRES major should emerge with the following skills, competencies, and knowledge:

Critical Frameworks

- Demonstrate deep knowledge of historical, contemporary, and intersectional perspectives on race and ethnicity.
- Demonstrate familiarity with different disciplinary methods applied to race and ethnicity.
- Demonstrate a critical perspective on institutional power and knowledge.

Communication

- Demonstrate ability to account for other people's arguments, to formulate one's own arguments, and to locate both arguments in the larger context of the field.
- Demonstrate ability to formulate an argument in alternative media, such as speech, audiovisual, digital, and other forms of non-written communication.
- Demonstrate writing effectively in the interdisciplinary field.

Research

- Demonstrate ability to design and implement a collaborative research project.
- Demonstrate ability to design and implement an independent research project.

Community Collaboration, Engagement, and Activism

- Demonstrate an understanding of the issues, ethics, and methods surrounding activist, collaborative, and community-based research projects.
- Demonstrate an understanding of collaborative knowledge that effectively integrates theoretical and experiential thinking about social justice.

Major Qualification Policy and Declaration Process

Major Qualification

Students must be enrolled in or have completed CRES 10, with a C or better, in order to declare the major. Transfer students should consult the Transfer and Information Policy section below.

Appeal Process

A student may file an appeal with the CRES adviser within 15 days of the denial of major declaration. The CRES program will notify the student and the college of the decision within 15 days of the receipt of the appeal.

How to Declare a Major

Students may declare the major by submitting a proposed Petition for Major/Minor Declaration to the program adviser. The major declaration should include a plan to complete CRES 100 and CRES 101 at the next possible opportunity.

Per campus policy, students must submit their major declaration no later than the third quarter of their sophomore year or, in the case of transfer students, no later than the second quarter of their junior year. CRES welcomes students to declare after this time frame who are pursuing more than one major or who are transferring from another major.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

Getting Started at UCSC as a Transfer Student

Students must be enrolled in or have completed CRES 10, with a C or better, in order to declare the major. Transfer students and students in exceptional circumstances may substitute an equivalent course with the program director's or undergraduate director's approval.

Letter Grade Policy

This program does not have a letter grade policy.

Course Substitution Policy

CRES is an interdisciplinary major that includes courses taught by faculty in other departments (see the Electives section below for a list of approved courses). Students who wish to substitute a course not on the electives list should complete the Petition for Course Credit form available on the CRES website and submit the completed form to CRES advising.

Double Majors and Major/Minor Combinations Policy

The CRES major works very well as a double major with fields of study such as community studies, feminist studies, education, legal studies, literature, politics, and more.

Study Abroad

Honors

CRES awards honors and highest honors in the major. At the end of each quarter, a faculty committee meets to review graduating student files. Students are considered for honors and highest honors based on their cumulative GPA, calculated from grades earned in coursework and the senior exit requirement undertaken for completion of the major. For honors, students must earn a minimum GPA of 3.70 in the relevant courses, while for highest honors, the GPA must be 3.90 or higher. Writing a thesis is not a requirement for receiving honors or highest honors.

Requirements and Planners

Course Requirements

To graduate with a major in CRES, a student is required to complete 10 courses with the approval of the program.

Lower-Division Courses

One lower-division foundation course:

CRES 10	Critical Race and Ethnic Studies: An Introduction	5
---------	---	---

Upper-Division Courses

Two upper-division courses are required for the major:

CRES 100	Comparative Theories of Race and Ethnicity	5
CRES 101	Research Methods and Writing in Critical Race and Ethnic Studies	5

Students may petition to substitute a department-based, community-engagement course or social-movements course for CRES 101.

Electives

Students must complete at least six upper-division electives offered in critical race and ethnic studies (with the CRES designation) or from the lists below. For current offerings, please visit the CRES course page.

- At least two electives must be from the list of designated courses focusing on phenomena outside of the U.S. or on transnational or hemispheric subjects.
- At least two academic divisions must be represented in the elective coursework.

Students are encouraged to supplement their upper-division coursework with language study, internships, and individual or group independent studies. Students may petition to have

up to 10 credits of such activities substituted for upper-division elective requirements, so long as these activities serve, or do not interfere with, the breadth requirements.

Arts

FILM 165B	Race on Screen	5
FILM 165D	Asian Americans and Media	5

Division of the Social Sciences			Disciplinary Communication (DC) Requirement		
ANTH 110O	Postcolonial Britain and France	5	Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in CRES is satisfied by completing one of the following courses:		
ANTH 110P	India and Indian Diaspora through Film	5	CRES 190A	Critical Race Feminisms	5
ANTH 129	Beyond Borders: Other	5	FMST 194Q	Queer Diasporas	5
			FMST 194U	Touring War and Empire	5
			FMST 194V/CRES 190V	Marxism and Feminism	5

Comprehensive Requirement

One of the following courses:

CRES 190A	Critical Race Feminisms	5
FMST 194Q	Queer Diasporas	5
FMST 194U	Touring War and Empire	5
FMST 194V/CRES 190V	Marxism and Feminism	5

Planners

Four-Year Sample Academic Plan For CRES Major (Frosh)

Students must have satisfied the English language and writing requirement (ELWR) and have completed the C1 requirement in order to enroll in CRES 10. Students who place into C2 in their first fall quarter may enroll in CRES 10 in their first fall quarter.

	Fall	Winter	Spring
1st (frosh)			
2nd (soph)	CRES 10	CRES 100	CRES 101 CRES elective
3rd (junior)	CRES elective	CRES elective CRES elective	CRES elective
4th (senior)	CRES elective	CRES 190	

Students must also complete all general education requirements except for ER, which is satisfied by CRES 10.

Two-Year Sample Academic Plan for CRES Major (Transfer Students)

Transfer students should complete their general education (GE) requirements or IGETC before enrolling at UCSC, but this is not a requirement to complete the major within two years of transferring. The CRES major consists of 10 courses, allowing transfer students to complete about two CRES courses per quarter along with additional units to complete the required 180 units for graduation.

Sample Transfer-Students Academic Planner for CRES Major – Fall Admission

	Fall	Winter	Spring

1st (junior)	CRES 10	CRES 100 CRES elective	CRES 101 CRES elective
---------------------	---------	---------------------------	---------------------------

2nd (senior)	CRES elective	CRES elective	CRES 190
	CRES elective	CRES elective	

Graduate Program

Also launched in 2014-2015, the designated emphasis in Critical Race and Ethnic Studies (CRES) is available for doctoral students to pursue alongside their doctoral degree program. To complete the designated emphasis, students must have a faculty adviser from the CRES faculty, complete four relevant courses, and complete a significant piece of scholarly writing in the area of CRES. Students pursuing the designated emphasis are encouraged to serve as a teaching assistant for at least one CRES course, and may be eligible to teach a CRES course of their own design as a graduate student instructor.

CRITICAL RACE AND ETHNIC STUDIES DESIGNATED EMPHASIS

Introduction

Requirements

Graduate students from other departments may obtain a designated emphasis in Critical Race and Ethnic Studies (CRES) by completing the following requirements in addition to the requirements for the doctorate in their home department:

Committee Composition and Departmental Approvals

The student must have a designated graduate adviser from the CRES program principal or affiliated faculty. The student must meet with this CRES adviser to develop a coherent plan for meeting the requirements for the designated emphasis, preferably before the end of the student's first year. This plan must be approved by the CRES program director.

A member of the CRES principal or affiliate faculty (usually the CRES graduate adviser) must serve on the student's qualifying examination committee and on the student's dissertation committee.

Course Requirements

The student must take four relevant graduate seminars taught by CRES program faculty. One relevant graduate seminar

taught by non-program faculty may be counted with the approval of the CRES adviser. The adviser may also approve the substitution of an individual or group independent study addressing a set of readings or focused on research and writing for one of the four required graduate courses. The specific courses used must reflect a coherent plan of study that embodies both breadth and focus.

Current academic year courses recommended for the designated emphasis (DE) are listed on the CRES website, but eligible courses are not limited to this list.

Writing, Research and/or Teaching Requirements

The student must prepare a significant piece of scholarly writing in the area of CRES. This writing may take the form of a substantial seminar paper, a master's essay, or a portion of the doctoral dissertation. The student's CRES adviser will determine whether a particular piece of writing meets this requirement.

Students pursuing the designated emphasis are encouraged to serve as a teaching assistant for at least one CRES core or elective course. CRES faculty are encouraged to appoint CRES designated emphasis students as teaching assistants when possible and appropriate.

Academic Progress

Proposing and Obtaining the Designated Emphasis

Once a plan for meeting the requirements is agreed upon, the student should complete the CRES DE application, obtain the CRES adviser's and program director's signatures, and submit the application to the CRES administrative office. The request for the designated emphasis must originate in the degree-granting department.

Once the requirements have been met, the student submits relevant documentation to the CRES administrative office for final approval by the CRES director. At a minimum, the student should submit copies of the qualifying examination and/or Dissertation Committee Nomination forms and a note from the adviser confirming that the writing sample and proposed courses have been completed. If the proposed courses have changed, an explanation of the changes should be included.

The CRES administrative office will notify the student and the home department of approval for the designated emphasis.

Feminist Studies Ph.D. (p. 99)

Feminist Studies Designated Emphasis (p. 101)

Queer and Sexuality Studies (p. 102)

Undergraduate Program

FEMINIST STUDIES B.A.

Information and Policies

Introduction

Feminist studies is an interdisciplinary field of analysis in the humanities that investigates how relations of gender are embedded in social, political, and cultural formations. The undergraduate program in feminist studies provides students with a unique interdisciplinary and transnational perspective. The department emphasizes theories and practices derived from multiracial and multicultural contexts. Some topics you will find in our curriculum include:

colonialism/postcolonialism; postsocialism; queer and trans theory; visual culture, legal studies; critical race theory; science and technology studies; and social movements.

Feminist studies prepares undergraduates for a variety of careers. The Bachelor of Arts (B.A.) degree in Feminist Studies provides excellent grounding for undergraduates who have career aspirations in, for example, law, health, non-governmental organizations, museum curation, politics, media and film, research institutes, journalism, community organizations, and social services.

Students wishing to pursue doctoral work will also find that interdisciplinary training in feminist studies equips them with theoretical and methodological strengths in most disciplines and applied research fields including American studies, ethnic studies, science studies, anthropology, communications, and legal studies. Specialists in feminist studies are employed as consultants in industry, higher education, and human resources. State and federal government agencies employ people who have special training in understanding gender and race relations. Educational institutions need specialists to develop and administer feminist studies programs, women's centers, and other institutional structures designed specifically to study and assist marginalized peoples, including women.

Academic Advising for the Program

Email: fmst@ucsc.edu
Phone: (831) 459-1478

Feminist Studies advising is held in Humanities 1, Room 415A. Drop in hours are posted on the Feminist Studies website. Students can make an appointment by using the Slug Success application found under Resources in their student portal (MyUCSC).

Transfer students should also consult the Transfer Student Information and Policy section for specific requirements.

Getting Started in the Major

Program Learning Outcomes

Students who complete the feminist studies major should emerge with the following skills, competencies, and knowledge:

Outcome 1: Writing, Reading, and Critical Thought

1. Develop writing skills and proficiency
2. Perform close reading of texts
3. Develop an ability to formulate and defend arguments in writing and oral presentation
4. Develop media literacy with a lens of cross-cultural analysis
5. Develop a critical understanding of inequities, ethics, racial and gender formations, and social justice issues

Outcome 2: Feminist Methods

The lower-division classes focus on “understanding” and the upper-division courses, especially the senior seminars, focus on “application.”

1. Develop an understanding of feminist interdisciplinary methodologies
2. Apply interdisciplinary methodology to research and writing

Major Qualification Policy and Declaration Process

Major Qualification

Undeclared students may declare the feminist studies major at any time. While specific courses are not required in order to declare, students ideally will have completed or be enrolled in FMST 1, Feminist Studies: An Introduction.

Appeal Process

How to Declare a Major

For a single major, complete the Petition for Major Declaration form and sign it. For a double major or major/minor complete both the Major Declaration form and

also an Academic Planning form. Both of these forms must be signed by you and by each departmental adviser.

Familiarize yourself with the content of the Feminist Studies website. Schedule a meeting with the feminist studies adviser during which you will fill out a Feminist Studies Major Requirements worksheet, develop a curriculum plan, and officially declare the major.

If your proposed program exceeds your expected graduation term (EGT), you must visit your college for review and approval of extension of enrollment.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz. However, it is highly recommended to complete the Intersegmental General Education Transfer Curriculum (IGETC).

If you have completed prior college-level coursework in feminist studies, women's studies, or a similar field of study, please contact feminist studies advising as soon as possible and provide a copy of your unofficial transcript and course syllabi so the coursework can be reviewed for potential fulfillment of feminist studies major requirements.

Getting Started at UCSC as a Transfer Student

Transfer students are encouraged to declare the major as soon as possible to be assured entrance into the required core courses. Please see the section 'How to Declare a Major' for more details.

The Feminist Studies Department will consider, upon petition, which UC-transferrable courses from other institutions are acceptable. FMST 1, one feminist studies (FMST) lower-division course, and FMST 100 must be completed before the senior year so that the exit requirement may be completed in the senior year.

FMST 75 Feminist Methodologies 5

Transfer students are strongly encouraged to enroll in FMST 75, Feminist Methodologies, a course designed specifically to aid in the transition to UCSC's feminist studies major for incoming transfer students. FMST 75 is offered every fall. This course will also satisfy the one lower-division core course requirement.

Letter Grade Policy

Letter grades are required for 10 of the 11 courses applied toward the feminist studies major. FMST 100 and the senior comprehensive course(s) (FMST 194 or FMST 195) must be taken for a letter grade.

Course Substitution Policy

Feminist studies is an interdisciplinary major that includes courses taught by affiliated faculty in other departments (see the Courses page of the Feminist Studies website for current year offerings). However, feminist studies majors must take a minimum of five courses at UC Santa Cruz taught directly in the Feminist Studies Department, i.e., courses designated FMST, not including FMST 193, FMST 198, or FMST 199. At most three courses may be transferred to count toward the major, including three Education Abroad Program (EAP) courses or courses from another university.

Double Majors and Major/Minor Combinations Policy

The feminist studies major works very well as a double major with fields of study such as community studies, critical race and ethnic studies, sociology, politics, education, legal studies, literature, psychology, and more.

Study Abroad

As stated in the course substitution policy, a maximum of three courses may be transferred to count toward the major, including courses from an Education Abroad Program (EAP).

Honors

Feminist studies awards honors and highest honors in the major. At the end of each quarter, a faculty committee meets to review graduating students' files. Students are considered for honors and highest honors based on their cumulative GPA, calculated from grades earned in coursework and the senior exit requirement undertaken for completion of the major. For honors, students must earn a minimum GPA of 3.70 in the relevant courses, while for highest honors, the GPA must be 3.90 or higher. Writing a thesis is not a requirement for receiving honors or highest honors.

Requirements and Planners

Course Requirements

Feminist studies majors must complete 11 courses including a senior comprehensive exit requirement in the feminist studies program. The three core courses--FMST 1, one lower-division feminist studies course, and FMST 100--must be taken at UC Santa Cruz absent a petition. A minimum of five feminist studies courses, not including FMST 193, FMST 198, or FMST 199, must be completed for the major.

Lower-Division Courses

Take the following course:

FMST 1 Feminist Studies: An Introduction 5

And one of these courses:

FMST 10	Feminisms of/and the Global South	5	FMST 132	Gender and Postcoloniality	5
FMST 14	Popular Culture in South Asia	5	FMST 133	Science and the Body	5
FMST 16	Media Histories--News and New Media	5	FMST 135	Topics in Science and Sexuality	5
FMST 20	Feminism and Social Justice	5	FMST 139	African American Women's History	5
FMST 21	Religion in American Politics and Culture	5	FMST 145	Racial and Gender Formations in the U.S	5
FMST 30	Feminism and Science	5	FMST 150	Mediating Desire	5
FMST 40	Sexuality and Globalization	5	FMST 175	Gender and Sexualities in Latina/o America	5
FMST 41	Trans Gender Bodies	5	FMST 188	Topics in Feminist Studies	5
FMST 75	Feminist Methodologies	5	FMST 189	Advanced Topics in Feminist Theory	5
Upper-Division Courses			FMST 193	Field Study	5
FMST 100	Feminist Theories	5	FMST 198	Independent Field Study	5
Students are required to complete FMST 100, Feminist Theories, at UCSC absent a petition.			FMST 199	Tutorial	5

Electives

Students are required to complete seven upper-division (100-199), 5-credit electives. One independent study (FMST 199) may count toward the elective requirements. FMST 193 or FMST 198 (internship) may be used to count toward the elective requirements.

Feminist studies is an interdisciplinary major that includes courses taught by affiliated faculty in other departments (see the Courses page of the Feminist Studies website for current year offerings). However, feminist studies majors must take a minimum of five courses at UC Santa Cruz taught directly in the Feminist Studies Department, i.e., courses designated FMST, not including FMST 193, FMST 198, or FMST 199. At most three courses may be transferred to count toward the major, including three Education Abroad Program (EAP) courses or courses from another university.

The Feminist Studies Tentative Curriculum is the definitive list of courses offered during the current academic year that will satisfy major requirements and is comprised of courses offered both from within the Feminist Studies Department but also with approved courses originating from many different departments throughout UCSC.

Please consult feminist studies advising with any questions regarding this requirement.

FMST 102	Feminist Critical Race Studies	5
FMST 112	Women and the Law	5
FMST 115	Gender, Sexuality, and Transnational Migration Across the Americas	5
FMST 120	Transnational Feminisms	5
FMST 123	Feminism and Cultural Production	5
FMST 124	Technology, Science, and Race Across the Americas	5
FMST 125	Race, Sex, and Technology	5
FMST 126	Images, Power, and Politics: Methods in Visual and Textual Analysis	5
FMST 131	The Politics of Matter and the Matter of Politics	5

Approved Electives in Affiliated Departments

For a list of approved electives for the current year, see the Feminist Studies Tentative Curriculum list.

Division of the Humanities

APLX 112	Language and Gender	5
CRES 100	Comparative Theories of Race and Ethnicity	5
CRES 101	Research Methods and Writing in Critical Race and Ethnic Studies	5
HIS 106B	Asian and Asian American History, 1941-Present	5
HIS 109A	Race, Gender, and Power in the Antebellum South	5

	FMST lower-division core		FMST elective
4th (senior)	FMST elective	FMST elective	FMST Senior Exit
	FMST elective	FMST elective	FMST elective

Graduate Program

FEMINIST STUDIES PH.D.

Introduction

The Department of Feminist Studies at the University of California, Santa Cruz welcomed its inaugural class of students who began studies toward a Doctor of Philosophy degree (Ph.D.) in Feminist Studies in Fall 2013. The Ph.D. in feminist studies at UC Santa Cruz is an interdisciplinary program that investigates how relations of gender are embedded in social, political, racial, and cultural formations. The program emphasizes feminist modes of inquiry and provides students with advanced training in feminist methods. It fosters a rethinking of the relationships between knowledge, power, and expertise. Conceived as a collaborative, cross-divisional enterprise, this graduate program draws upon the strengths of a range of feminist scholars and their departments and programs across the university.

Advancement to Candidacy

Students are expected to take the Ph.D. qualifying examination in their third year and no later than their fourth year, by which point they also must fulfill the course requirements and demonstrate proficiency in a second language.

Course Requirements

Ph.D. students will complete most of their coursework during their first two years. Students are required to complete a total of 12 courses: three required courses on *Feminist Theories* (FMST 200), *Feminist Methodologies* (FMST 201), and *Disciplining Knowledge* (FMST 202) and nine electives. Feminist studies requires FMST 200 and FMST 201 to be taken consecutively the fall and winter quarters of the first year, while FMST 202 will be offered in the spring of the second year.

In addition, students must enroll in three 2-credit advising courses (FMST 297F) with their first-year mentor or primary adviser. FMST 290, a 2-credit pedagogy training course, is to be taken prior to and/or in conjunction with the first teaching assistant appointment.

FMST 200	Feminist Theories	5
FMST 201	Topics in Feminist Methodologies	5
FMST 202	Disciplining Knowledge/Graduate Research	5

Elective Courses

Students may take elective courses in feminist studies as well as in other departments. Graduate seminars, independent studies, and directed readings in the Feminist Studies

Department count toward the elective course requirement. Graduate seminars from other departments may also be used to fulfill the elective requirement.

FMST 203	Feminist Pedagogies	5
FMST 207	Topics in Queer/Race Studies	5
FMST 211	Sexuality, Race, and Migration in the Americas	5
FMST 212	Feminist Theory and the Law	5
FMST 214	Topics in Feminist Science Studies	5
FMST 215	Postcolonial and Postsocialist Transactional Analytics	5
FMST 216	Archives/Genders/Histories: An Introduction	5
FMST 222	Religion, Feminism, and Sexual Politics	5
FMST 232	Topics in Postcolonial Studies	5
FMST 243	Feminism, Race, and the Politics of Knowledge	5
FMST 260	Black Feminist Reconstruction	5
FMST 270	Anthropology at Its Interfaces with Feminist, Postcolonial, and Decolonial STS	5

Foreign Language Requirements

Students normally satisfy the language requirement by the end of the second year; the requirement must be satisfied in order to pass the qualifying exam. Fulfillment of the language requirement in feminist studies can be documented in several ways. The documentation should demonstrate current ability to use the language in an appropriate way in scholarship. The language appropriate to research could be oral, gestural, or written, or a combination of these. Depending on the specific language and on the research needs of the student, functional language competence could include the ability to read the scholarly literature or other written material needed in research, the ability to conduct fieldwork in the language, or the ability to produce written work in the language. According to Graduate Division policy, proficiency should be demonstrated **before** the qualifying examination committee can be appointed and at least one month prior to taking the qualifying examination.

Teaching Requirement

Pre-Qualifying Requirements

Qualifying Examination

Advancement to candidacy depends on the general quality of a student's work; demonstration of proficiency in a foreign language relevant to the student's area of work, either by passing a written examination administered by the department or successfully completing a language course approved by the department; success in the qualifying examination, and proposal of an acceptable dissertation topic.

Students should consult their adviser when composing their qualifying examination committee. Per Academic Senate policy, committees must consist of at least four members, one of whom is not a member of the student's department. The chair of the committee must be tenured, and will not be the student's dissertation adviser. The outside member must be a

tenured faculty member, or may be from a non-academic field. The department requires that at least two members of the committee must be members of the Feminist Studies Department. The graduate dean has authority to approve committee nominations and grant authorities.

The qualifying examination focuses on the student's research project and on the fields of scholarship it presupposes. The qualifying examination consists of:

1. Written Portion (75-95 pages total)
 - a. Introduction to the Qualifying Exam (15-20p): This document explains the intellectual trajectory of the student, the development of the student's research questions, and the relationship between the different written components submitted for the exam.
 - b. Qualifying Essay(s) (50-60p): In consultation with the advisor, the student will submit one or two research essays totaling 50-60 pages. Depending on the nature of the student's project and method, as well as the advisor's preferences concerning the exam format, the Qualifying Essay(s) may consist of article- or chapter-length research paper(s), literature review(s), and/or field statement(s) related to the student's primary areas of research.
 - c. Dissertation Prospectus (10-15p): A draft dissertation prospectus is due at the time of exam. A revised prospectus will be due to the committee no later than the end of the quarter following the oral exam. The prospectus outlines the primary research questions, fields of intervention, timeline, and potential claims of the dissertation project.
2. Oral Examination
 - a. The oral examination typically lasts 2.5-3 hours. The student is invited to give a 10-minute introduction to the qualifying essay and research project. Each examiner on the QE Committee will have approximately 20-30 minutes to put questions to the student regarding the written portion of their examination. A general discussion typically follows the round-robin questioning. Upon completion of the questions and discussion, the student is excused and the committee members evaluate the student's performance with the goal of achieving some unanimity. The committee invites the student back to the room to share the group's evaluation, offer advice, and articulate any requirements. The committee will also suggest revisions to the dissertation prospectus, to be completed by the end of the quarter following the oral exam.
 - b. The chair of the committee composes a final report based on the committee's evaluation of the student's performance. After approval by the other committee members, the report is submitted

to the Graduate Division to recommend advancement to candidacy.

Post-Qualifying Requirements

Immediately after the qualifying examination, students will consult their primary adviser to convene a Dissertation Committee. The Dissertation Committee must be composed of at least three members, the majority of whom must be members of the UC Santa Cruz Academic Senate, and at least one of whom is a member in Feminist Studies. Advancement to candidacy will only take place after a committee is approved by the graduate dean.

Award of Masters Degree

The department admits students only for the Ph.D. program. However, in exceptional circumstances, for example, if a student has to leave the program before completing the Ph.D., the Master of Arts (M.A.) degree in Feminist Studies may be conferred. In consultation with the adviser and graduate director, the M.A. requirements are as follows:

1. Completion of nine graduate seminars, including FMST 200, FMST 201, and FMST 202 to the satisfaction of the department. The remaining six seminars are to be selected from the department offerings to reflect the student's particular academic plan, agreed upon by the student and graduate adviser.
2. Successful completion of the qualifying examination, including all written and oral components.
3. Completion of the master's degree cannot be accomplished in less than two full academic years.

Students who wish to petition for the M.A. degree in Feminist Studies must meet all guidelines for the degree established by the Graduate Division and petition for the degree prior to the due date set by the division. Upon successful completion of the qualifying examination, students must submit the completed qualifying examination written materials to the department as the final portfolio of work for the degree.

Dissertation

Dissertation

After advancement to candidacy, expected by the end of the third year, students take courses in the 290 sequence (FMST 299A) until the dissertation is submitted. Successful revision of the dissertation prospectus will be due to the Dissertation Committee no later than the end of the quarter after completion of the oral examination to remain in good academic standing. Students submit the revised prospectus to their committee for approval and transmit the document to the graduate coordinator.

Upon approval of the revised dissertation prospectus, students concentrate on dissertation writing. The current normative time to degree limit is six years, although students should plan dissertation research and writing timelines keeping in mind the funding commitments made by the department at the time of matriculation. Students also have the option of doing

advanced work in a traditional discipline and receiving a Designated Emphasis of this specialization. In such cases, students must satisfy the appropriate department's criteria (see the departmental web site for information). Students are expected to complete at least one year of supervised teaching as part of the degree requirements.

Dissertation Defense

The dissertation defense serves as the final opportunity for the student to receive focused feedback on research and writing, ideally with the goal of developing the dissertation into a book or other major project following completion of the Ph.D. The defense typically lasts two hours and is an occasion for thoughtful, constructive criticism and guidance; it is not an examination. For this reason, the defense will normally be conducted as a closed meeting between the committee and the student, along with a small audience of guests invited by the student and/or adviser. The student may elect to conduct a public defense with permission of the adviser. In such instances, the chair must convene a closed committee discussion at the end of the defense to complete conferral of the Ph.D.

Academic Progress

Normative time to completion of the Ph.D. is six years. Upon advancement to candidacy, students are expected to complete the dissertation within three years to make satisfactory academic progress.

Applying for Graduation

At the end of the dissertation writing process, the student must petition for the degree, format the dissertation according to Graduate Division guidelines, complete an oral dissertation defense with the Dissertation Committee, and obtain signatures of the committee members on the official title page. Once these items are complete, the student may file the dissertation to complete the Ph.D.

FEMINIST STUDIES DESIGNATED EMPHASIS

Introduction

Graduate students may work toward a Doctor of Philosophy (Ph.D.) degree that notes a designated emphasis in feminist studies on the graduation documents. Students wishing to pursue this option should consult with the chair of their respective Ph.D. program and are encouraged to apply in the first or second year of graduate study. The application and an annually updated list of regularly offered, approved graduate courses are available at the Feminist Studies website.

Requirements

The following are required for the designated emphasis:

Committee Composition and Departmental Approvals

The student must have a designated graduate adviser from the feminist studies core faculty who serves on the qualifying examination committee or in some other appropriate capacity.

Course Requirements

The student must take four graduate courses in feminist studies, two of which must be taught directly in the department. Two courses can be selected from among the graduate offerings of any UC Santa Cruz department, as long as they are taught by core or affiliated feminist studies faculty.

FMST 200	Feminist Theories	5
FMST 201	Topics in Feminist Methodologies	5
FMST 202	Disciplining Knowledge/Graduate Research	5
FMST 203	Feminist Pedagogies	5
FMST 207	Topics in Queer/Race Studies	5
FMST 211	Sexuality, Race, and Migration in the Americas	5
FMST 212	Feminist Theory and the Law	5
FMST 214	Topics in Feminist Science Studies	5
FMST 215	Postcolonial and Postsocialist Transactional Analytics	5
FMST 216	Archives/Genders/Histories: An Introduction	5
FMST 222	Religion, Feminism, and Sexual Politics	5
FMST 232	Topics in Postcolonial Studies	5
FMST 243	Feminism, Race, and the Politics of Knowledge	5
FMST 260	Black Feminist Reconstruction	5
FMST 270	Anthropology at Its Interfaces with Feminist, Postcolonial, and Decolonial STS	5

Courses in Other Departments

Courses in other departments that satisfy the DE requirement when taught by affiliated faculty include:

ANTH 231	Intimacy and Affective Labor	5
ANTH 232	Bodies, Knowledge, Practice	5
ANTH 234	Feminist Anthropology	5
ANTH 238	Advanced Topics in Cultural Anthropology	5
ANTH 243	Cultures of Capitalism	5
ANTH 249	Ecological Discourses	5
ANTH 255	Regulating Religion/Sex	5
ANTH 260	Anthropology of Freedom	5
FILM 226	Queer Theory and Global Film and Media	5
FILM 284	Film, Culture, and Modernity	5
HAVC 245	Race and Representation	5
HIS 204A	History of Gender Research Seminar	5
HIS 205	Diaspora and World History	5
HIS 215A	Topics in American History: U.S. Labor and Working Class History	5
HIS 221	Empires and New Nations in the	5

	Americas	
HIS 227	Gender and Colonialism	5
HIS 230B	Engendering China	5
HIS 230C	Readings in 20th-Century China	5
HIS 231	Historicizing the People's Republic of China	5
HIS 243	Transnational Japan	5
HIS 244	Gender and Japanese History	5
LALS 210	Latina Feminisms: Theory and Practice	5
LALS 215	Latina Cultural Studies: Culture, Power, and Coloniality	5
LALS 240	Culture and Politics of Human Rights	5
LALS 242	Globalization, Transnationalism, and Gender in the Americas	5
LIT 230C	Feminist Theories/Historical Perspectives	5
LIT 231A	Studies in Literary and Cultural History	5
LIT 250	Theory and Methods	5
LIT 251	Topics in Cultural Studies	5
MUSC 254K	Music, Gender, and Sexuality	5
POLI 204	Bodies in History	5
PSYC 210	The Experimental Method in Social Psychology	5
PSYC 247	Special Topics in Developmental Psychology	5
PSYC 251	Feminist Theory and Social Psychology	5
PSYC 254	Psychology of Gender	5
PSYC 256	Psychology of Social Class and Economic Justice	5
PSYC 264	Transnational Feminism, Development, and Psychology	5
SOCY 240	Inequality and Identity	5
SOCY 245	Feminist Theory	5
SOCY 249	Feminisms and Cultural Politics	5
SOCY 255	Engaging Cultural Studies	5
SOCY 264	Science, Technology, and Medicine	5

Writing, Research and/or Teaching Requirements

The student must prepare a significant piece of writing in the area of feminist studies. This writing may be a master's essay, qualifying examination essay, or a chapter of the doctoral dissertation.

Queer and Sexuality Studies

415 Humanities 1
 fmst@ucsc.edu
<https://qss.ucsc.edu/>
<https://language.ucsc.edu>

Scholarship pertaining to the critical study of gender and sexuality can be found across a broad range of departments at UCSC. This presence is manifested in a diverse faculty, in course offerings, and in research programs. Courses with queer content can be found across a broad range of departments, programs, and colleges at UCSC.

For more specialization, departments such as Feminist Studies and Literature have sufficient flexibility to allow students to design a course of study within those majors to explore these interests. For students who prefer to take a more self-directed approach, there is the option of designing an individual major.

Research activities are sponsored by the Queer Theory research cluster (a part of the Center for Cultural Studies), the Queer and Sexuality Studies Working Group, and many campus departments and student organizations.

The Lionel Cantú GLBTI Resource Center serves as a clearinghouse for queer activities on the UCSC campus. Each quarter, the center prepares a list of all course offerings with queer content. Information is available at the Lionel Cantú Queer Center website or via e-mail to queer@ucsc.edu.

More information may be obtained from members of the faculty working group: Anjali Arondekar (Feminist Studies), Carla Freccero (Literature, Feminist Studies, History of Consciousness), Irene Gustafson (Film and Digital Media), Marcia Ochoa (Feminist Studies), B. Ruby Rich (Film and Digital Media). Additional faculty contacts: Julie Bettie (Sociology), Benjamin Carson (Music), Sheila Crane (History of Art and Visual Culture), Jody Greene (Literature, Feminist Studies), Herbert Lee (Applied Mathematics and Statistics), Peter Limbrick (Film and Digital Media), Catherine S. Ramírez (Latin American and Latino Studies), Jenny Reardon (Sociology), Lisa Rofel (Anthropology), Danny Scheie (Theater Arts), Daniel Selden (Literature), Elizabeth Stephens (Art).

Please contact Marcia Ochoa (marcia8a@ucsc.edu) or Anne Eickelberg (aeickelb@ucsc.edu) in the department of Feminist Studies in the Humanities Division for information about course offerings and resources.

History Ph.D. (p. 125)

History is the stories humans tell about the past. For professional historians, those stories are based on evidence that is carefully collected and rigorously interpreted. Both the evidence and interpretation are passionately debated in the classroom, in articles and books, and in the public sphere. This makes history a dynamic enterprise. Students of history ask new questions, find new evidence, incorporate more voices, and reconsider old assumptions. Studying history enriches our understanding of the world by deepening our knowledge of the past and by pushing us to ask new questions that provide insight into our own time. Our History Department is committed to helping students learn to think historically, which entails asking not just what happened, but why it happened the way it did.

Thinking historically cultivates the empathy and imagination necessary to understand multiple perspectives on events both past and present.

It is impossible to understand the world we inhabit, including its complex global conflicts, climatic transformations, and fundamental shifts in understandings of individual identity, without history. Yet, as much as history can illuminate the present, its study also requires recognizing that often, “the past is a foreign country,” where words, ideas, and even bodies themselves operate on radically unfamiliar terms. Our department’s strengths in transnational, gender, environmental, cultural, and social history, including critical

race and ethnic studies, enable students to engage in a variety of approaches to studying history.

This training equips students to be engaged citizens and prepares them for a wide range of careers. History majors develop skills in critical reading, effective research, analytical thinking, and clear, persuasive communication. Such skills are the essential foundation for jobs directly connected with the field, like teaching, research, and working in public history venues such as museums, archives, and libraries. These skills are also invaluable to careers in law, business, government, foreign service, management, publishing, journalism, social media, and many other areas. The ability to identify and access salient information, evaluate it critically, and use it to engage in constructive debate is essential for navigating a complex, dynamic, and global world.

In addition to the degree programs and minors, the History department offers elementary instruction in Greek and Latin.

Undergraduate Program

History is the stories humans tell about the past. For professional historians, those stories are based on evidence that is carefully collected and rigorously interpreted. Both the evidence and interpretation are passionately debated in the classroom, in articles and books, and in the public sphere. This makes history a dynamic enterprise. Students of history ask new questions, find new evidence, incorporate more voices, and reconsider old assumptions. Studying history enriches our understanding of the world by deepening our knowledge of the past and by pushing us to ask new questions that provide insight into our own time. Our History Department is committed to helping students learn to think historically, which entails asking not just what happened, but why it happened the way it did.

Thinking historically cultivates the empathy and imagination necessary to understand multiple perspectives on events both past and present.

It is impossible to understand the world we inhabit, including its complex global conflicts, climatic transformations, and fundamental shifts in understandings of individual identity, without history. Yet, as much as history can illuminate the present, its study also requires recognizing that often, “the past is a foreign country,” where words, ideas, and even bodies themselves operate on radically unfamiliar terms. Our department’s strengths in transnational, gender, environmental, cultural, and social history, including critical race and ethnic studies, enable students to engage in a variety of approaches to studying history.

This training equips students to be engaged citizens and prepares them for a wide range of careers. History majors develop skills in critical reading, effective research, analytical thinking, and clear, persuasive communication. Such skills are the essential foundation for jobs directly connected with the field, like teaching, research, and working in public history venues such as museums, archives, and libraries. These skills are also invaluable to careers in law, business, government, foreign service, management, publishing, journalism, social

media, and many other areas. The ability to identify and access salient information, evaluate it critically, and use it to engage in constructive debate is essential for navigating a complex, dynamic, and global world.

GREEK

The History Department offers instruction in elementary ancient Greek. It consists of a two-course sequence, GREE 1 and GREE 2, that begins in the fall quarter only. Students interested in Greek literature should see the course listings under Literature. Those interested in classical studies should see the program description for classical studies.

Campus Language Laboratories and Placement Exams

No placement examination is required for entry into GREE 1. Contact the History Department for more information about these topics.

LATIN

The History Department offers instruction in elementary Latin. It consists of a two-course sequence, LATN 1 and LATN 2, that begins in the fall quarter only. Students interested in Latin literature should see the course listings under Literature. Those interested in classical studies should see the program description for classical studies.

Campus Language Laboratories and Placement Exams

No placement exam is required for entry into LATN 1. Contact the History Department for more information about these topics.

HISTORY B.A.

Information and Policies

Introduction

History is about the past, but it is also about understanding the world we live in today. Our faculty seek to understand and help you understand how the challenges that confront us today like economic inequality, environmental degradation, and racism, developed and changed over time. We also explore the patterns of social movements and political transformation that help us understand how people change the world.

Students often think of studying history as a matter of memorizing names and dates. While having a command of basic facts is important, college-level study of history shifts the focus to learning how to ask illuminating questions about the past. UC Santa Cruz history majors cultivate a broad understanding of human history across time and space and develop deep knowledge of a particular region of the world. At the same time, they learn how to ask transformative questions, develop their ability to answer them through effective research, and convey their ideas clearly and persuasively through strong communication skills.

Students and their parents alike often express the sentiment that history is fascinating, but sometimes raise questions about its practicality as a college major. However, substantial research demonstrates that history majors thrive in their careers, and employers often express a need for the skills that studying history instills. A history major isn't just fascinating; it's a path to success. History majors develop skills in critical reading, effective research, analytical thinking, and clear, persuasive communication. Such skills are the essential foundation for jobs directly connected with the field, like teaching, research, and working in public history venues such as museums, archives, and libraries. These skills are also invaluable to careers in law, business, government, foreign service, management, publishing, journalism, social media, and many other areas. The ability to identify and access salient information, evaluate it critically, and use it to engage in constructive debate is essential for navigating a complex, dynamic, and global world. Visit our website for selected reports on the value of the history major.

Academic Advising for the Program

Academic advising is an important part of your undergraduate education. The History Department undergraduate program coordinator can help you clarify your educational goals, select classes that complement your academic interests and develop an individualized plan of study. The undergraduate program coordinator can also help you identify faculty mentors and enrichment opportunities within and related to your major.

Advising is held in Humanities 1, room 201. Undergraduate advising email contact: historyundergrad@ucsc.edu

Transfer students are encouraged to additionally consult the "Transfer Information and Policy" information included below.

Getting Started in the Major

Four-year students considering the history major are encouraged to enroll in at least one lower-division history course during their first year. They offer a broad sweep of a historical period and give students a sense of how studying history in college differs from studying it in high school. Students are encouraged but not required to take three lower-division history courses, one from each of the three regions of concentration, during the first year. Taking courses from each of the three regions of concentration during the first year helps students decide on a concentration as their area of focus and clarify their educational goals (see the Regions of Concentration section below for more information).

Program Learning Outcomes

Students who complete the history major graduate with the following:

History

Understanding of a basic narrative of historical events in a specific region of the world.

Critical Reading

The ability to distinguish primary and secondary sources.

The ability to evaluate historical ideas, arguments, and points of view.

The ability to evaluate competing interpretations and multiple narratives of the past.

Research and Evidence

The ability to gather and assess primary historical evidence.

The ability to compile a bibliography.

Communication

The ability to present clear and compelling arguments, based on critical analysis of diverse historical sources, and effectively communicate your interpretations in written essays and/or other media.

The ability to develop a research question and complete a well-supported piece of historical writing about it.

Scope and Thematics

Through completion of a combination of courses, become familiar with the history of:

- The pre-modern world
- The modern world
- Transnational or transcultural circulations of ideas, people, and material goods
- One or more national histories
- Regional comparisons

Major Qualification Policy and Declaration Process

Major Qualification

The history major has no qualification. It is advisable to complete at least one lower-division history course (HIS 1 - HIS 99) before declaring, but it is not required. Students who plan on majoring in history are encouraged to declare as soon as possible (see information about declaring below).

Appeal Process

How to Declare a Major

To declare the history major students should:

1. Create a history major academic plan. For planning documents and major planning instructions visit the declaring the history major webpage.
2. Submit your history major plan and a completed UCSC Petition for Major/Minor Declaration to the History Undergraduate Program Coordinator for review and processing.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

Transfer students are advised to complete the Intersegmental General Education Transfer Curriculum (IGETC) or UCSC general education requirements in preparation for transfer to UC Santa Cruz. Transfer course agreements and articulation between the University of California and California community colleges can be found on the ASSIST.ORG website. Prospective transfer students may also wish to consult the UC Transfer Pathway for History.

Transfer students are enthusiastically encouraged to study history at UC Santa Cruz. Transfer students can finish all of the UC Santa Cruz history major requirements within two years, even if they haven't completed any preparatory history coursework prior to transferring. For additional information for transfer history majors please visit this transfer student information page.

Getting Started at UCSC as a Transfer Student

Transfer students are expected to complete HIS 100 within the first two quarters after transferring to UC Santa Cruz. Transfer students are also encouraged to take KRSG 25 during their first quarter of enrollment at UC Santa Cruz or as part of Summer Academy before their first quarter.

Letter Grade Policy

History majors may take up to two of their history major courses pass/no pass, with the exception of Senior Comprehensive Requirement, provided students are in compliance with the university's pass/no pass regulation.

History Senior Check-in

In addition to all coursework, history majors must complete a senior check-in and exit survey in the first quarter of their senior year. Students who do not submit their senior check-in for review may have their graduation date delayed. Please consult the department website for a more detailed description.

Course Substitution Policy

History majors must complete a minimum of five regularly scheduled history courses plus the comprehensive requirement taught by members of the UC Santa Cruz history faculty. Intensive history majors must complete a minimum of eight. Subject to the limits indicated in parentheses, courses from the following categories may also be applied to the history major:

- Courses completed at a California community college or other domestic university (limit of three)
- Education Abroad Program (limit of three)

- UCDC (limit of two)
- UC in Sacramento (limit of two)
- Interdisciplinary Coursework/upper-division courses taken in another UC Santa Cruz department (limit of one).
- Independent and field studies (limit of one).

For information and instructions on how to petition courses from the above categories, visit the History Department webpage on course substitutions.

Double Majors and Major/Minor Combinations Policy

Study Abroad

All history students are encouraged to consider studying abroad. UCEAP offers students an opportunity to study abroad in 46 countries with more than 400 program options. A variety of academic programs are available: language and culture programs facilitate language acquisition; "focus" programs allow students to concentrate on a plan of study applicable to their major. More than half of all EAP programs are in English, and there are traditional semester and yearlong program options. Subject to the limitations described above under "Course Substitution Policy," up to three courses in history completed through EAP may be applied toward major requirements. Consult the History Department website and speak with the undergraduate program coordinator for further details.

Honors

Honors are awarded to the top 10-15 percent of graduating students per quarter; highest honors may be granted to approximately the top five percent. Honors are determined by the Undergraduate Education Committee in consultation with the History Department faculty. The department considers each student's GPA in the history major, supplemented when appropriate by an assessment of work in the senior capstone course or honors thesis preparation. The history major GPA is calculated based upon all history courses attempted at UCSC; grades from courses taken outside of the department will not be calculated into a student's history major GPA, even in cases when the student is allowed to use said courses toward their history major degree requirements. Summer, fall, and winter graduates will be reviewed at the end of each of their respective quarters. Spring graduates will be reviewed using their earned history major GPAs as of the spring announcement of candidacy deadline.

Interdisciplinary Coursework

The History Department encourages its majors to take upper-division courses in disciplines related to history, including sociology, literature, community studies, politics, Latin American and Latino studies, and others. Students may petition to substitute one such appropriate upper-division course for a history elective. At least 50 percent of the readings and written work in these courses must be historical

in nature. For information on steps to petition for credit visit the History Department website on course substitutions.

These courses are subject to the limitations described above under the "Course Substitution Policy" section.

Regions of Concentration

The History Department curriculum and major is broadly organized along three regions of concentration. Requirements related to the regions of concentration are described further below, but the regions of concentration themselves are:

The Americas and Africa

The Americas and Africa caucus invites students to explore the complex history of intercultural encounter, exchange, and conflict that connects South, Central, and North America and the diverse nations of Africa. Courses in this concentration locate these regions within larger global movements of people, goods, and ideas. Major topical themes in the concentration include Indigenous history, African diaspora, immigration, gender, labor, religion, social movements, politics, and critical history of race. Courses in this concentration extend from the colonial era to the modern day and reflect interdisciplinary approaches to historical practice.

Asia and the Pacific

The Asia and Pacific concentration—which encompasses East, South, and Central Asia along with the Pacific and the Indian Ocean—offers students the opportunity to explore gender, class, race, and ethnicity through the examination of premodern and modern empires and nations, their borders and peripheries, and their flows of people, materials, and ideas. Major topics of focus include the early modern and modern eras, Western and Japanese imperialisms, labor and other major social movements, socialist transformations, and cultural, intellectual, and science history.

Europe and the Mediterranean World

The Europe and the Mediterranean World concentration offers students the opportunity to explore the histories of Europe, North Africa, and the Middle East, and connections between these places and the larger world. We look at the continual flow of ideas, people, and material goods across this region, from the earliest states in the ancient world until today. We examine how empires, colonialism, religion, culture, the environment, and social and economic forces, including the development of capitalism and of the nation-state, shaped these interactions in profound ways. Collectively, we trace more than 5,000 years of intersecting histories, examining linkages and conflicts forged by geography, trade, war, migration, imperial aspirations, colonial violence, religious and ethnic minorities, and struggles for liberation.

The caucus includes intensive study of the histories of Europe, Russia, North Africa and the Middle East, as well as imperial, colonial, and transnational histories that trace the changing relations among these places. Major periods and areas of focus include the ancient and medieval worlds, oceanic empires in the early modern period (1450-1800 A.D.),

modern imperialism and colonialism, and decolonization and postcolonial states in the 20th century.

General History Major

Course Requirements

A minimum of 12 unique courses are required for the major, of which no more than four may be lower-division. At least eight of the 12 courses must be upper-division, including the comprehensive requirement.

Distribution requirements. Among the 12 courses required for the major, at least three must meet chronological distribution requirements. One must be set before 600 A.D., and two must be set in periods prior to the year 1800 A.D.

A full list of history courses, which indicates which geographic regions of concentration and chronological distribution requirements courses apply to, is found in the catalog here (p. 128). Students can also consult the department's website for a sortable version of this information.

Region of Concentration (5 Courses, Plus 1 Comprehensive Requirement)

Lower-Division Survey (1 Course)

I. At least one lower-division survey course within their chosen region of concentration. The survey course is one of the four allowed lower-divisions.

Americas/Africa

HIS 10A	United States History to 1877	5
HIS 10B	United States History, 1877 to 1977	5
HIS 11A	Latin America: Colonial Period	5
HIS 11B	Latin America: National Period	5
HIS 30	The Making of Modern Africa	5

Asia/Pacific

HIS 40A	Early Modern East Asia	5
HIS 40B	The Making of Modern East Asia	5
HIS 44	Modern South Asia, 1500 to Present	5

Europe/Mediterranean World

HIS 41	The Making of the Modern Middle East	5
HIS 65A	From the Martyrs to the Vikings: Medieval Europe, 200-1000	5
HIS 70A	Modern European History, 1500-1815	5
HIS 70B	Modern European History, 1815-present	5

Transfer coursework may or may not apply toward the survey course requirement; consult the history undergraduate program coordinator.

Additional Concentration Courses (4 Courses)

Four additional courses in the region of concentration, at least three of which must be upper-division.

Comprehensive Exit Requirement

One comprehensive (exit) requirement: All students must complete either a research/readings seminar (HIS 190 series, HIS 194 series, or HIS 196 series), or a senior thesis (HIS 195A and HIS 195B) in their area of concentration. Detailed information on the comprehensive exit requirement can be found below.

Breadth Requirements (4 Courses)

Two courses from each of the remaining two regions of concentration.

Historical Skills and Methods (1 Course)

Students who enter UCSC as frosh are expected to complete HIS 100 by the end of their second year. Transfer students are expected to complete HIS 100 no later than their second term at UCSC.

HIS 100	Historical Skills and Methods	5
---------	-------------------------------	---

Elective (1 Course)

One upper-division history course from any of the three regions of concentration.

Language Recommendation

Proficiency in a foreign language is strongly recommended for all history students and is essential for those who plan to pursue graduate studies in history. Many Ph.D. programs in history require applicants to read one or two languages besides English. The University of California Education Abroad Program (EAP) is appropriate for history majors as a means to both enhance language skills and take history courses elsewhere.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. History students fulfill the upper-division disciplinary communication (DC) requirement by completing a comprehensive exit requirement in their chosen region of concentration. Students may complete an exit seminar (one quarter: HIS 190 series, HIS 194 series, or HIS 196 series) or a thesis (two quarters: courses HIS 195A and HIS 195B). Please consult the department website for a more detailed description of these courses and refer to the updated DC information in the disciplinary communication chart.

Comprehensive Requirement

A comprehensive requirement in the student's chosen region of concentration can be fulfilled by completing an exit seminar (one quarter: HIS 190 series, HIS 194 series, or HIS 196 series) or a thesis (two quarters: courses HIS 195A and HIS 195B). Please consult the department website for a more detailed description of these courses.

Research Sub-Fields

Students often choose to satisfy the history major course requirements listed above according to some general theme of special interest to them: religion, social movements, science and environment, and gender, to name a few. Faculty and staff advisers will assist the students who choose this option with their course selection.

Planners

Each of these planners indicate only one of the many possibly pathways through the major. Individual student plans will vary. For assistance developing your history major plan, meet with the undergraduate program coordinator.

Sample Four Year Plan

	Fall	Winter	Spring
1st (frosh)	Lower-division survey, concentration	Lower-division breadth area No. 1	Lower-division breadth area No. 2
2nd (soph)	Lower-division concentration	<u>HIS 100</u>	Upper-division breadth area No. 1
3rd (junior)	Upper-division concentration	Upper-division breadth area No. 2	Upper-division concentration
4th (senior)	Upper-division concentration	Exit seminar, concentration	Upper-division elective (any)

In addition to the courses above, students will need to take courses that satisfy the Math and Formal Reasoning (MF) and Composition (C) General Education requirements, along with any other general education requirements that are not satisfied by the classes they have chosen for the major. Most lower division history courses satisfy the Cross-Cultural Analysis (CC) or Ethnicity and Race (ER) General Education requirements. HIS 100 satisfies the Textual Analysis and Interpretation (TA) General Education requirement.

Sample Three Year Plan

This plan is appropriate for students admitted to UCSC as freshman who are considering the 3+3 B.A./J.D. Program or the Three Year Accelerated Pathways program.

	Fall	Winter	Spring
1st Year	Lower-division survey, concentration	Lower-division breadth area No. 1	Lower-division breadth area No. 2
2nd Year	Lower-division concentration	<u>HIS 100</u> Upper-division concentration	Upper-division breadth area No. 1 Upper-division concentration
3rd Year	Upper-division concentration	Exit seminar, concentration	Upper-division breadth area No. 2 Upper-division elective (any)

Sample Transfer Plan

	Fall	Winter	Spring
Pre-Transfer	Lower-division concentration	Lower-division breadth area No. 1	Lower-division breadth area No. 2
1st (junior)	<u>HIS 100</u> Upper-division concentration	Lower-division concentration Upper-division breadth area No. 1	Upper-division concentration Upper-division breadth area No. 2
2nd (senior)	Upper-division concentration	Exit seminar, concentration	Upper-division elective (any)

This planner assumes that a student has completed most of their general education requirements before coming to UCSC. Students from California community colleges are advised to complete the Intersegmental General Education Transfer Curriculum (IGETC) in preparation for transfer to UC Santa Cruz.

Intensive History Major

The intensive major track offers history majors a pathway to enrich their study of history, refine their skills in writing and research, and receive a designation on their transcripts that signals their ambition and accomplishment to potential employers and graduate schools. All history majors are eligible to declare the intensive track, including junior transfers. If a student attempts but does not complete the intensive track they may still graduate with a standard history degree, provided the appropriate major coursework has been completed.

Course Requirements

A minimum of 15 unique courses, of which no more than four can be lower division courses, plus one year or equivalent of language study.

Distribution requirements. Among the 15 courses required for the major, at least three must meet chronological distribution requirements. One must be set before 600 A.D., and two must be set in periods prior to the year 1800 A.D.

Advanced Research Requirement. Three of the 15 courses required for the intensive major must require advanced historical research. Advanced research and reading seminars (HIS 190 series, HIS 194 series, or HIS 196 series), the senior thesis (HIS 195A and HIS 195B) and/or independent studies (HIS 199) conducted under faculty supervisor may satisfy this requirement. At least one seminar or senior thesis must be completed in the student's chosen region of concentration to ensure the U.C. Santa Cruz comprehensive exit and disciplinary communication (DC) requirement is satisfied.

A full list of history courses, which indicates which geographic regions of concentration and chronological distribution requirements courses apply to, is found in the catalog here. (p. 128) Students can also consult the department's website for a sortable version of this information.

Region of Concentration (5 Courses, Plus 1 Comprehensive Requirement)

Lower-Division Survey (1 Course)

I. At least one lower-division survey course within their chosen region of concentration. The survey course is one of the four allowed lower-divisions.

Americas Africa

HIS 10A	United States History to 1877	5
HIS 10B	United States History, 1877 to 1977	5
HIS 11A	Latin America: Colonial Period	5
HIS 11B	Latin America: National Period	5
HIS 30	The Making of Modern Africa	5

Asia Pacific

HIS 40A	Early Modern East Asia	5
HIS 40B	The Making of Modern East	5

HIS 44	Asia Modern South Asia, 1500 to Present	5
--------	--	---

Europe Mediterranean

HIS 41	The Making of the Modern Middle East	5
HIS 65A	From the Martyrs to the Vikings: Medieval Europe, 200-1000	5
HIS 70A	Modern European History, 1500-1815	5
HIS 70B	Modern European History, 1815-present	5

Transfer coursework may or may not apply toward the survey course requirement; consult the history undergraduate program coordinator.

Additional Concentration Courses (4 Courses)

Four additional courses in the region of concentration, at least three of which must be upper-division.

Comprehensive Exit Requirement

One comprehensive (exit) requirement: All students must complete either a research/readings seminar (HIS 190 series, HIS 194 series, or HIS 196 series), or a senior thesis (HIS 195A and HIS 195B) in their area of concentration. Detailed information on the comprehensive exit requirement can be found below.

Breadth Requirements (4 Courses)

Two courses from each of the remaining two regions of concentration.

Historical Skills and Methods (1 Course)

Students who enter UCSC as frosh are expected to complete HIS 100 by the end of their second year. Transfer students are expected to complete HIS 100 no later than their second term at UCSC.

HIS 100	Historical Skills and Methods	5
---------	-------------------------------	---

Electives (4 Courses)

Four upper-division history courses from any of the three regions of concentration.

Language Requirement

Intensive majors must pursue training in a second language by completing three quarters of college level language study in a single, non-English modern or ancient language (e.g. SPAN 1-SPAN 3, ITAL 2-ITAL 4, etc.). Students with prior training in a second language are advised to complete a language placement exam to determine the appropriate level of language course instruction. With prior approval by the undergraduate director, the language training requirement may be satisfied by at least one quarter study abroad with foreign language instruction. Students do not necessarily need to pursue a language related to their region of concentration,

but are encouraged to do so when possible. After consultation with the undergraduate director, students can petition for alternative ways by which to satisfy this requirement.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major’s upper-division disciplinary communication (DC) requirement. History students fulfill the upper-division disciplinary communication (DC) requirement by completing a comprehensive exit requirement in their chosen region of concentration. Students may complete an exit seminar (one quarter: HIS 190 series, HIS 194 series, or HIS 196 series) or a thesis (two quarters: courses HIS 195A and HIS 195B). Please consult the department website for a more detailed description of these courses and refer to the updated DC information in the disciplinary communication chart.

Comprehensive Requirement

A comprehensive requirement in the student’s chosen region of concentration can be fulfilled by completing an exit seminar (one quarter: HIS 190 series, HIS 194 series, or HIS 196 series) or a thesis (two quarters: courses HIS 195A and HIS 195B). Please consult the department website for a more detailed description of these courses.

Advanced Research Requirement

Three of the 15 courses required for the intensive major must require advanced historical research. Advanced research and reading seminars (HIS 190 series, HIS 194 series, or HIS 196 series), the senior thesis (HIS 195A and HIS 195B) and/or independent studies (HIS 199) conducted under faculty supervisor may satisfy this requirement. At least one seminar or senior thesis must be completed in the student’s chosen region of concentration to ensure the UC Santa Cruz comprehensive exit and disciplinary communication (DC) requirement is satisfied.

Research Sub-Fields

Students often choose to satisfy the history major course requirements listed above according to some general theme of special interest to them: religion, social movements, science and environment, and gender, to name a few. Faculty and staff advisers will assist the students who choose this option with their course selection.

Planners

Each of these planners indicates only one of the many possibly pathways through the major. Individual student plans will vary. For assistance developing your history major plan, meet with the undergraduate program coordinator.

Sample Intensive Major Four-Year Plan

	Fall	Winter	Spring
1st (freshman)	Lower-division survey, concentration	Lower-division breadth area No. 1	Lower-division breadth area No. 2

	Language 1	Language 2	Language 3
2nd (soph)	Lower-division concentration	<u>HIS 100</u>	Upper-division breadth area No. 1
3rd (junior)	Upper-division concentration	Upper-division breadth area No. 2 Upper-division concentration	Upper-division concentration
4th (senior)	Exit seminar, concentration	Research course Upper-division elective (any)	Research course Upper-division elective (any)

In addition to the courses above, students will need to take courses that satisfy the Math and Formal Reasoning (MF) and Composition (C) General Education requirements, along with any other General Education requirements that are not satisfied by the classes they have chosen for the major. Most lower-division history courses satisfy the Cross-Cultural Analysis (CC) or Ethnicity and Race (ER) General Education requirements. HIS 100 satisfies the Textual Analysis and Interpretation (TA) General Education requirement.

Sample Intensive Major Transfer Plan

	Fall	Winter	Spring
Pre-Transfer	Lower-division concentration	Lower-division breadth area No. 1	Lower-division breadth area No. 2
1st (junior)	<u>HIS 100</u> Upper-division concentration Language 1	Lower-division concentration Upper-division breadth area No. 1 Language 2	Upper-division concentration Upper-division breadth area No. 2 Language 3
2nd (senior)	Upper-division concentration Exit seminar, concentration	Research course Upper-division elective (any)	Research course Upper-division elective (any)

This planner assumes that a student has completed most of their general education requirements before coming to UCSC. Students from California community colleges are advised to complete the Intersegmental General Education Transfer Curriculum (IGETC) in preparation for transfer to UC Santa Cruz.

HISTORY MINOR

Students whose major area of study is not history may nonetheless find that a minor in history makes an invaluable contribution to their studies.

Course Requirements

Eight history courses are required, five of which must be upper-division. There are no distribution requirements and there is no comprehensive requirement for the minor.

Lower-Division Courses

Three lower-division (HIS 1–HIS 99) and/or upper-division (HIS 100–HIS 199) history courses.

Upper-Division Courses

Five upper-division (HIS 100–HIS 199) history courses.

CLASSICAL STUDIES B.A.

Information and Policies

Introduction

Classical studies at UC Santa Cruz combines features of traditional programs, such as solid grounding in the ancient languages, with innovative, interdisciplinary approaches. While the core of the program is focused on courses in the ancient Greek and Latin languages, the program also encompasses courses in history, the history of art and visual culture, literature, philosophy, politics, and theater arts, from the Bronze Age through the Early Christian era. Recent offerings have included everything from introductory surveys in classical mythology and Greek and Roman history, to advanced courses in women and gender in Ancient Egypt and modern ancient drama. Students are encouraged to study the literary and material artifacts of Greece and Rome within the larger context of ancient Mediterranean and Near Eastern cultures.

The classical studies program provides the nurturing atmosphere and personal attention associated with a small liberal arts college, in the context of a large university. We offer students an opportunity to work in small classes with a distinguished and dedicated teaching faculty and excellent fellow students. Public lectures, guest speakers, and frequent social events bring students and faculty together and strengthen the program.

Classical studies students have the opportunity to give close, sustained attention to an area of study, from an almost unlimited variety of perspectives. For example, students with an interest in contemporary philosophy and political theory might want to concentrate in Greek, taking upper-division

courses in Greek, history, philosophy, and politics. Students with an interest in European literature might want to concentrate in Latin, taking upper-division courses in Latin, history, and literature in translation. Students planning on pursuing a classics degree at the Ph.D. level should concentrate most of their coursework in the Greek and Latin languages themselves.

Classical studies is an excellent preparation for further study in a wide variety of graduate and professional programs including history, art history, comparative literature, English, philosophy, law, education, and publishing.

Academic Advising for the Program

The Classical Studies program is administered by the Department of History. Students in this program receive advising support from the history undergraduate program coordinator.

Transfer students are encouraged to additionally consult the "Transfer Information and Policy" information included below.

Getting Started in the Major

GREE 1 and LATN 1 are only offered in the fall quarter. Students seeking their degree in four years should complete the introductory sequence in elementary ancient Greek or Latin language no later than their second year. Transfer students should complete the introductory sequence during their first two quarters of enrollment at UCSC.

Students with prior knowledge of ancient Greek or Latin are advised to consult with the classical studies faculty to determine if they have satisfied any of the elementary language course requirements.

Program Learning Outcomes

Students who complete the classical studies major graduate with the following knowledge and skills:

Language

Competence in one or more ancient languages. At present offerings include Greek and Latin (full curriculum offered yearly). Majors have also taken Biblical Hebrew and Hieroglyphics (offered less often).

Interdisciplinary Exposure

Familiarity with one or more of the disciplinary approaches represented by the faculty in the program, as well as other relevant approaches in the division and the university. Courses at present credited for the major include (but are not limited to) offerings in: history, literature, philosophy, archaeology, art history, and theater arts. For the skills and outcomes fostered by these disciplines see the reports of the relevant departments.

Collaboration

Provide constructive and effective critiques of each other's work.

Complete a shared research project.

Research, Critical Reading, Writing

Gather and engage critically with primary sources.

Evaluate competing interpretations and multiple narratives.

Compile a bibliography.

Present clear and compelling arguments, based on critical analysis of diverse historical sources, and effectively communicate your interpretations in written essays and/or other media.

Scope and Thematics

Through completion of a combination of courses, become familiar with the ancient cultures of:

- the western Mediterranean.
- the eastern Mediterranean.
- the Near East.

Comparative study: whether of diverse ancient cultures or of ancient and later cultures

Reception: ancient culture as understood by later traditions

Major Qualification Policy and Declaration Process

Major Qualification

While classical studies does not have an official qualification policy, it should be noted that the major requires the successful completion of upper-division coursework in ancient Greek and/or Latin language literature. Students who are unable to successfully complete the introductory sequence in elementary ancient Greek or Latin language (or equivalent) will not be able to advance to the upper-division coursework required for this major.

Other Programs That May Be of Interest

Since classical studies is an interdisciplinary field of study, many of the courses in this major are offered by other UCSC departments. Students with an interest in the ancient world who would prefer to take courses in English are encouraged to consider the following majors and programs: history, history of art and visual culture, literature, philosophy, and politics.

Appeal Process

How to Declare a Major

Students are permitted to declare the classical studies major at any time but encouraged to do so only after they have successfully completed the lower-division sequence in elementary ancient Greek or Latin language (or equivalent):

1. Fill out a Classical Studies Major Planning Worksheet. Include classical studies courses you've completed, are currently taking, and plan on taking in the future.

2. Meet with the classical studies academic advising coordinator to review and discuss your proposed plan of study. Obtain their signature on your worksheet.

3. Submit your approved Classical Studies Major Planning Worksheet and a completed UCSC Petition for Major/Minor Declaration to the history undergraduate program coordinator for processing.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

Transfer students from California Community Colleges are encouraged to complete the Intersegmental General Education Transfer Curriculum (IGETC) or UCSC general education requirements in preparation for transfer to UC Santa Cruz.

Some background in history and in literary analysis and interpretation is desirable, but not essential. Since this is an interdisciplinary major, preparatory work in art history, history, literature, philosophy, or politics, depending on the student's interests, may also be useful.

Getting Started at UCSC as a Transfer Student

Transfer students entering at the junior level can readily complete the classical studies major within two years, provided that they complete GREE 1 or LATN 1 during their first quarter of enrollment at UCSC. These courses are only offered in the fall quarter.

GREE 1	Elementary Ancient Greek	5
LATN 1	Elementary Latin	5

Letter Grade Policy

Students are allowed to complete up to two of their classical studies major or minor requirements for pass/no pass.

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Study Abroad

We actively encourage our students to expand their horizons in interdisciplinary and international settings by taking advantage of the University of California Education Abroad Program (EAP). A quarter or year abroad may be seamlessly integrated into any classical studies student's academic plan; up to three of the major or minor elective requirements may be completed abroad.

Honors

All students who announce candidacy during the academic year are reviewed for honors or highest honors in the major. The classical studies faculty advisers determine honors based

upon courses applied toward the classical studies major. Performance in courses taken elsewhere and being transferred toward the major will be considered when applicable. The minimum standard applied is excellence in most courses for honors, and excellence in all courses for highest honors. Summer, fall, and winter graduates will be reviewed at the end of each of their respective quarters. Spring graduates will be reviewed as of the spring announcement of candidacy deadline.

Requirements and Planners

Course Requirements

The classical studies major requires three lower-division courses (including two elementary language courses), nine upper-division courses, and an additional two-credit upper-division seminar, CLST 197F, which is taken in the same quarter that the senior comprehensive examination is given (see Comprehensive Requirement section below for more information). These must include the following:

Lower-Division Courses

The lower-division sequence in elementary ancient Greek or Latin language (or equivalent):

Either these courses

GREE 1	Elementary Ancient Greek	5
GREE 2	Elementary Ancient Greek	5

or these courses

LATN 1	Elementary Latin	5
LATN 2	Elementary Latin	5

Classical Studies Survey

One lower-division survey of ancient history or literature in translation:

HIS 50	Pyramids and Papyrus: the History of Ancient Egypt	5
HIS 60	Medical and Scientific Terminology	5
HIS 61	Classical Mythology	5
HIS 62A	Classical World: Greece	5
HIS 62B	Classical World: Rome	5
HIS 63	Women in the Ancient World	5
HAVC 50	Ancient Mediterranean Visual Cultures	5
HAVC 51	Greek Eyes: Visual Culture and Power in the Ancient Greek World	5
HAVC 55	Unclothed: The Naked Body from Antiquity to the Present	5
LIT 61M	Approaches to Classical Myth	5
LIT 61S	Sacred Texts	5
LIT 61X	Tragedy: Learning Through Suffering	5
LIT 80W	Captive Minds: The Literature of Pre-modern Slavery	5
THEA 61A	Ancient and Medieval Drama	5

Upper-Division Courses

Three upper-division courses in Greek (LIT 184A-LIT 184Z) and/or Latin literature (LIT 186A-LIT 186Z):

LIT 184A	Introduction to Greek Literature	5
LIT 184B	Greek Drama	5
LIT 184C	Greek Poetry	5
LIT 184D	Prose Authors	5
LIT 184E	Special Topics in Greek Literature	5
LIT 186A	Introduction to Latin Literature	5
LIT 186B	Roman Poetry	5
LIT 186C	Prose Authors	5
LIT 186D	Special Topics in Latin Literature	5

Electives

Six additional classical studies upper-division courses:

CLST 199	Tutorial	5
HIS 159A	Cleopatra to Constantine: Greek and Roman Egypt	5
HIS 159B	Women and Gender in Ancient Egypt	5
HIS 159C	Temple and City: The Egyptian New Kingdom and the City of Thebes	5
HIS 159D	When Cities Were New: the Rise of Urbanism in the Ancient Near East and Mediterranean	5
HIS 160A	Athenian Democracy	5
HIS 160C	Topics in Greek History	5
HIS 161B	Topics in Roman History	5
HIS 161C	Age of Augustus	5
HIS 163B	Genesis: A History	5
HIS 194S	Special Topics in Ancient Egyptian History	5
HIS 196D	City of Rome	5
HIS 196R	Social World of Roman Palestine	5
HIS 196S	Special Topics in Ancient History	5
HAVC 135F	Art of the Book in Western Europe 500-1600	5
HAVC 151	Greek Myths Antiquity to the Present	5
HAVC 152	Roman Eyes: Visual Culture and Power in the Ancient Roman World	5
HAVC 154	Byzantine Visual Culture: Politics and Religion in the Empire of Constantinople, 330-1453 A. C	5
HAVC 155	Constructing Cleopatra: Power, Sexuality, and Femininity Across the Ages	5
LIT 130A	Ancient Literature in Cross-Cultural Perspective	5
LIT 184A	Introduction to Greek Literature	5

LIT 184B	Greek Drama	5
LIT 184C	Greek Poetry	5
LIT 184D	Prose Authors	5
LIT 184E	Special Topics in Greek Literature	5
LIT 186A	Introduction to Latin Literature	5
LIT 186B	Roman Poetry	5
LIT 186C	Prose Authors	5
LIT 186D	Special Topics in Latin Literature	5
LIT 181A	Biblical Hebrew, Part 1	5
LIT 181B	Biblical Hebrew, Part 2	5
LIT 181D	Reading Egyptian Hieroglyphs, Part 1	5
LIT 181E	Reading Egyptian Hieroglyphs, Part 2	5
LIT 181F	Reading Egyptian Hieroglyphs, Part 3	5
PHIL 100A	Ancient Greek Philosophy	5
PHIL 118	Stoic Ethics	5
POLI 105A	Ancient Political Thought	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in classical studies is satisfied by completing two upper-division courses in Greek literature or Latin literature from the following list:

Greek Literature:

LIT 184B	Greek Drama	5
LIT 184C	Greek Poetry	5
LIT 184D	Prose Authors	5
LIT 184E	Special Topics in Greek Literature	5

Latin Literature:

LIT 186B	Roman Poetry	5
LIT 186C	Prose Authors	5
LIT 186D	Special Topics in Latin Literature	5

Comprehensive Requirement

Classical studies majors are required to pass a senior comprehensive examination. Each student shall identify a minimum of two classical studies faculty members to serve on the examination committee, one of which shall be designated as the committee chair. Please consult the classical studies website for a more detailed description of this requirement.

Enrollment in a 2-credit comprehensive examination preparatory course, CLST 197F, is required in the same quarter that the senior comprehensive examination will be given. The preparatory course will be taken with the chair of the student's examination committee.

CLST 197F	Senior Comprehensive Examination Preparation	2
-----------	--	---

Planners

Sample Four-Year Plan

	Fall	Winter	Spring
1st (frosh)	GREE 1 or LATN 1	GREE 2 or LATN 2	LIT 184A or LIT 186A
	CLST lower-division survey		
2nd (soph)	LIT 184-series/LIT 186-series	LIT 184-series/LIT 186-series	Upper-division elective
3rd (junior)	Upper-division elective	Upper-division elective	Upper-division elective
4th (senior)	Upper-division elective	Upper-division elective	CLST 197F (2 credits)

In addition to the specific courses shown above, a student must complete courses satisfying all of UCSC's General Education requirements. Individual student plans will vary, and some general education requirements may be satisfied within the classical studies major requirements depending on each student's individual course selection.

Sample Transfer Plan

	Fall	Winter	Spring
1st (junior)	GREE 1 or LATN 1	GREE 2 or LATN 2	LIT 184A or LIT 186A
	CLST lower-division survey	Upper-division elective	Upper-division elective
	Upper-division elective		
2nd (senior)	LIT 184-series/LIT 186-series	LIT 184-series/LIT 186-series	Upper-division elective
	Upper-division elective	Upper-division elective	CLST 197F (2 credits)

This planner assumes that a student has completed most of their general education requirements before coming to UCSC. Students from California community colleges are advised to complete the Intersegmental General Education Transfer Curriculum (IGETC) in preparation for transfer to UC Santa Cruz.

CLASSICAL STUDIES MINOR

Course Requirements

Lower-Division Courses

A minor in classical studies requires the lower-division sequence in elementary Greek or Latin language (or equivalent):

Either these courses

GREE 1	Elementary Ancient Greek	5
GREE 2	Elementary Ancient Greek	5

or these courses

LATN 1	Elementary Latin	5
LATN 2	Elementary Latin	5

Students with prior knowledge of ancient Greek or Latin are advised to consult with the classical studies faculty to determine if they have satisfied any of the elementary language course requirements.

Upper-Division Courses

Choose one of the following courses:

LIT 184A	Introduction to Greek Literature	5
LIT 186A	Introduction to Latin Literature	5

Reading proficiency in ancient Greek or Latin required for these courses. LIT 184A should be taken after GREE 2, and LIT 186A should be taken after LATN 2.

Plus any four of the upper-division courses listed below

CLST 199	Tutorial	5
HIS 159A	Cleopatra to Constantine: Greek and Roman Egypt	5
HIS 159B	Women and Gender in Ancient Egypt	5
HIS 159C	Temple and City: The Egyptian New Kingdom and the City of Thebes	5
HIS 159D	When Cities Were New: the Rise of Urbanism in the Ancient Near East and Mediterranean	5
HIS 160A	Athenian Democracy	5
HIS 160C	Topics in Greek History	5
HIS 161B	Topics in Roman History	5
HIS 161C	Age of Augustus	5
HIS 163B	Genesis: A History	5

HIS 194S	Special Topics in Ancient Egyptian History	5
HIS 196D	City of Rome	5
HIS 196R	Social World of Roman Palestine	5
HIS 196S	Special Topics in Ancient History	5
HAVC 135F	Art of the Book in Western Europe 500-1600	5
HAVC 151	Greek Myths Antiquity to the Present	5
HAVC 152	Roman Eyes: Visual Culture and Power in the Ancient Roman World	5
HAVC 154	Byzantine Visual Culture: Politics and Religion in the Empire of Constantinople, 330-1453 A. C.	5
HAVC 155	Constructing Cleopatra: Power, Sexuality, and Femininity Across the Ages	5
LIT 130A	Ancient Literature in Cross-Cultural Perspective	5
LIT 184A	Introduction to Greek Literature	5
LIT 184B	Greek Drama	5
LIT 184C	Greek Poetry	5
LIT 184D	Prose Authors	5
LIT 184E	Special Topics in Greek Literature	5
LIT 186A	Introduction to Latin Literature	5
LIT 186B	Roman Poetry	5
LIT 186C	Prose Authors	5
LIT 186D	Special Topics in Latin Literature	5
LIT 181A	Biblical Hebrew, Part 1	5
LIT 181B	Biblical Hebrew, Part 2	5
LIT 181D	Reading Egyptian Hieroglyphs, Part 1	5
LIT 181E	Reading Egyptian Hieroglyphs, Part 2	5
LIT 181F	Reading Egyptian Hieroglyphs, Part 3	5
PHIL 100A	Ancient Greek Philosophy	5
PHIL 118	Stoic Ethics	5
POLI 105A	Ancient Political Thought	5

EAST ASIAN STUDIES MINOR

East Asian studies addresses the three societies of China, Japan, and Korea in northeast Asia. We recognize that they compose a meaningful regional designation that contains a diverse range of peoples, languages, and cultures. Linked by centuries of common use of the Chinese writing system, a shared textual canon, general principles of statecraft, and the continual circulation of people and goods, the three societies nevertheless also possess distinctive languages, histories, and social identities, making it necessary to explore each society in its own right.

In recognition of this diversity within the common bonds, East Asian studies at UC Santa Cruz encourages students to explore East Asia in both depth and breadth. Building first upon developing language skills in Chinese or Japanese, students also begin their studies in one of two historical surveys—HIS 40A or HIS 40B—which explore the broad regional forces that contextualize each society’s particular trajectory. From these foundations, students are encouraged to investigate a broad range of questions pertinent to each society in classes across the university, including anthropology, economics, education, feminist studies, film and digital media, history, history of art and visual culture, languages, linguistics, literature, music, politics, sociology, and theater arts.

The East Asian studies minor is administered by the Department of History. For additional information on curriculum and advising, visit the East Asian studies website.

STUDY ABROAD

Because the minor is designed to support the integration of language training with exploration of East Asian societies, we strongly endorse participation in one of the many education abroad programs available for UC students in East Asia where language skills acquired at the university are put to practical use in daily life and research. At present, there are UC Education Abroad Programs in China, Japan, Hong Kong, Korea, and Taiwan. Students who complete Chinese or Japanese language courses while studying abroad are expected to complete a language placement exam upon their return to UCSC. Instructions for the placement exam can be found on the Languages and Applied Linguistics website. For more information about study abroad, see the UC Education Abroad Program (UCEAP) and UCSC Study Abroad websites.

Course Requirements

The East Asian studies minor requires a minimum of six courses, five of which must be upper-division (minimum of 25 upper-division credits). Additional lower-division coursework in Chinese or Japanese language may be needed in order to gain the proficiency necessary to take the upper-division Chinese or Japanese language courses required for this minor (see below).

Lower-Division Courses

Language

All East Asian studies minors are expected to gain proficiency in Chinese or Japanese language. Students without prior knowledge of Chinese or Japanese should enroll in beginning Chinese (CHIN 1) or Japanese (JAPN 1) no later than fall quarter of their second year. Students with prior knowledge of Chinese or Japanese are required to complete a language placement exam to determine which course of Chinese or Japanese language instruction best suits their skill level. Instructions for the placement exam may be found on the Languages and Applied Linguistics website. Students may

also pursue study abroad opportunities as a way of acquiring Chinese or Japanese language instruction.

Either these

courses		
CHIN 1	First-Year Chinese	5
CHIN 2	First-Year Chinese	5
CHIN 3	First-Year Chinese	5
CHIN 4	Second-Year Chinese	5
CHIN 5	Second-Year Chinese	5
CHIN 6	Second-Year Chinese	5
or these		
courses		
CHIN 4H	Accelerated Chinese for Heritage Speakers	5
CHIN 5H	Accelerated Chinese for Heritage Speakers	5
CHIN 6	Second-Year Chinese	5
or these		
courses		
JAPN 1	First-Year Japanese	5
JAPN 2	First-Year Japanese	5
JAPN 3	First-Year Japanese	5
JAPN 4	Second-Year Japanese	5
JAPN 5	Second-Year Japanese	5
JAPN 6	Second-Year Japanese	5

Core Courses

Choose one of the following courses:

HIS 40A	Early Modern East Asia	5
HIS 40B	The Making of Modern East Asia	5

Upper-Division Courses

Upper-Division Chinese or Japanese Language

All East Asian studies minors are required to complete two upper-division courses in Chinese language instruction or two upper-division courses in Japanese language instruction. Additional upper-division courses in Chinese or Japanese language may be applied to the upper-division electives requirements (see below).

Chinese Language Courses

CHIN 103	Advanced Chinese: Language and Society	5
CHIN 104	Advanced Chinese: Readings in Literature	5
CHIN 105	Advanced Chinese: Readings in History	5
CHIN 107	Introduction to Classical Chinese Prose	5
CHIN 108	Introduction to Classical Chinese Poetry	5

Japanese Language Courses

JAPN 103	Advanced Japanese	5
JAPN 104	Advanced Japanese	5
JAPN 105	Advanced Japanese	5
JAPN 109	Japanese Language, Culture, and Society	5

Upper-Division Electives

Three additional upper-division courses from the East Asian studies curriculum, one of which may be a topically appropriate individual study: CHIN 199, HIS 199, JAPN 199, LIT 199, etc.

ANTH 130C	Politics and Culture in China	5	HIS 194A	in Modern Japan and Korea Gender, Class, and Sex in Shanghai	5
ANTH 130G	Asian Americans in Ethnography and Film	5	HIS 194B	Okinawan History	5
CHIN 103	Advanced Chinese: Language and Society	5	HIS 194E	Women in Japanese History	5
CHIN 104	Advanced Chinese: Readings in Literature	5	HIS 194F	Jewish Shanghai	5
CHIN 105	Advanced Chinese: Readings in History	5	HIS 194G	China Since the Cultural Revolution: Histories of the Present	5
CHIN 107	Introduction to Classical Chinese Prose	5	HIS 194H	Gender, Family, and State in China: 1600-Present	5
CHIN 108	Introduction to Classical Chinese Poetry	5	HIS 194I	U.S. Bases and Social Movements in Asia	5
CHIN 199	Tutorial	5	HIS 194M	Literati, Samurai, and Yangban: Comparative History of State and Elite in East Asia, 1600- 1900	5
ECON 126	Why Economies Succeed or Fail: Lessons from Western and Japanese History	5	HIS 194U	The Cold War and East Asia	5
ECON 149	The Economies of East and Southeast Asia	5	HIS 194Y	Memories of WWII in the U.S. and Japan	5
EDUC 170	East Asian Schooling and Immigration	5	HIS 194Z	Historical Memory and Historical Narration in China	5
HAVC 122A	Sacred Geography of China	5	JAPN 103	Advanced Japanese	5
HAVC 122B	Constructing Lives in China: Biographies and Portraits	5	JAPN 104	Advanced Japanese	5
HAVC 122C	Writing in China	5	JAPN 105	Advanced Japanese	5

JEWISH STUDIES B.A.**Information and Policies**

Introduction

The interdisciplinary program in Jewish studies introduces students to the study of classical, medieval, and modern Jewish cultures and to the range of disciplines that bear upon the field.

The Jewish studies major and minor offer students the chance to gain knowledge and skills in a variety of contexts in various aspects of Jewish culture, with special reference (though not limited) to modern issues. The major and minor will help them prepare to move successfully into graduate programs in a variety of disciplines, especially in humanities, social sciences, and pre-professional programs, and will provide students with a grounding in materials fundamental to a liberal arts education. This program connects with a range of disciplines and programs on the UCSC campus that explore the meanings of modernity; at the same time, this program will help students develop analytical tools, methodological versatility, and critical literacy.

Note that modernity here is not defined as Europe or North America; the Jewish studies program intends to speak to modernity as a global phenomenon, dealing with sites where Jews lived. In the 19th and 20th centuries Jews were widely spread across the globe and often played active and influential roles in their communities. These include such places as China, India, Latin America, North Africa, the Middle East, as well as Europe, and North America.

Academic Advising for the Program

The Jewish studies program is administered by the Department of History. Students in this program receive advising support from the history undergraduate program coordinator.

Transfer students are encouraged to consult the "Transfer Information and Policy" information included below.

Getting Started in the Major

Program Learning Outcomes

Jewish History and Culture

Identify and interpret major events, figures, and topics in Jewish history and culture.

Holocaust

Demonstrate thorough knowledge of the Holocaust as a historical phenomenon.

Develop a nuanced understanding of the cultural dimensions of the Holocaust through an analysis of literature, films, art, and/or music.

Jewish Languages

Develop basic competency in Hebrew (modern or Biblical) or Yiddish.

Critical Analysis

Distinguish between primary and secondary sources.

Evaluate competing interpretations and multiple narratives of the past.

Analyze Jewish cultural sources, including literary texts, films, and music within a broader, cross-cultural context.

Effective Communication

Present clear and compelling arguments, based on critical analysis of diverse literary, historical, film, and/or musical sources, and effectively communicate interpretations in written essays and/or other media.

Scope

Classical Period.

Modern Period.

Major Qualification Policy and Declaration Process

Major Qualification

Undeclared students may declare the Jewish studies major at any time. While specific courses are not required in order to declare, students will have ideally completed some or all of the lower-division requirements.

Appeal Process

How to Declare a Major

1. Fill out a Jewish Studies Major Planning Worksheet. Include Jewish studies courses you've completed, are currently taking, and plan on taking in the future.
2. Meet with a Jewish studies faculty adviser to review and discuss your proposed plan of study. Obtain their signature on your worksheet.
3. Submit your approved Jewish Studies Major Planning Worksheet and a completed UCSC Petition for Major/Minor Declaration to the history undergraduate program coordinator for processing.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

Transfer students entering at the junior level can readily finish all of the Jewish Studies major requirements within two years, even if they haven't completed any preparatory coursework prior to transferring. Some background in history and in literary analysis and interpretation is desirable, but not essential. Since this is an interdisciplinary major, preparatory work in art history, philosophy, or politics, depending on the student's interests, may also be useful.

Transfer students are encouraged to complete the Intersegmental General Education Transfer Curriculum (IGETC) or UCSC general education requirements in preparation for transfer to UC Santa Cruz.

Getting Started at UCSC as a Transfer Student

Transfer students are advised to complete the lower-division Jewish studies course requirements, including the language requirement, by the end of their first year. The upper-division courses required for this major may be taken simultaneously with the required lower-division courses. Please refer to the sample academic plan provided below.

Transfer students may declare the Jewish studies major during their first quarter of enrollment at UCSC.

Letter Grade Policy

Students are allowed to complete up to two of their Jewish studies major or minor requirements for pass/no pass, with the exception of their comprehensive requirement.

Course Substitution Policy

Jewish studies majors must take a minimum of five regularly scheduled Jewish studies courses plus the comprehensive/disciplinary communications (DC) requirement from members of the UCSC Jewish studies faculty. Subject to the limits indicated, courses from the following categories may be applied to the Jewish studies major:

- Courses transfer from a California Community College or other domestic university (limit of three)
- Education Abroad Program (limit of three)
- Related courses not currently on the pre-approved Jewish studies course list (limit of two)
- Independent and field studies (limit of one)

Double Majors and Major/Minor Combinations Policy

Study Abroad

The program in Jewish studies encourages students to take advantage of the UC Education Abroad Program (EAP). The University of California has developed educational opportunities abroad in conjunction with the Jerusalem Study Center at The Hebrew University of Jerusalem. Subject to the limitations described in the "Course Substitution Policy" section, up to three courses from EAP may be applied toward the Jewish studies major requirements.

Honors

All students who announce candidacy during the academic year are reviewed for honors or highest honors in the major. The Jewish studies faculty advisers determine honors based upon courses applied toward the Jewish studies major. Performance in courses taken elsewhere and being transferred toward the major will be considered when applicable. The minimum standard applied is excellence in most courses for honors, and excellence in all courses for highest honors. Summer, fall, and winter graduates will be reviewed at the end of each of their respective quarters. Spring graduates will

be reviewed as of the spring announcement of candidacy deadline.

Requirements and Planners

Course Requirements

The Jewish studies major requires a minimum of 11 courses, including the comprehensive requirement, and an additional three language courses (or equivalent).

In consultation with a faculty adviser, students will plan a program of study to fulfill the following distribution of courses:

Lower-Division Courses

Language Requirement

Three quarters of lower-division instruction (or equivalent) in a Jewish language in any combination of the student's choosing:

HEBR 1	First-Year Hebrew	5
HEBR 2	First-Year Hebrew	5
HEBR 3	First-Year Hebrew	5
HEBR 4	Second-Year Hebrew	5
HEBR 80	Introduction to Biblical Hebrew	5
YIDD 1	First-Year Yiddish	5
YIDD 2	First-Year Yiddish	5
YIDD 3	First-Year Yiddish	5

Students with prior knowledge of Hebrew or Yiddish are advised to complete a language placement exam to determine if they have satisfied any of the elementary language course requirements. Instructions for the placement exam can be found on the Languages and Applied Linguistics website.

Lower-Division Core Courses (choose one of the following courses):

HIS 74	Introduction to Jewish History and Cultures	5
HIS 74A	Introduction to Middle Eastern and North African Jewish History: Ancient to Early Modern	5
HIS 74B	Introduction to Middle Eastern and North African Jewish History, 1500-2000	5
LIT 61J	Introduction to Jewish Literature and Culture	5

Plus one of the following courses:

HIS 75	Film and the Holocaust	5
HIS 76	The Holocaust	5

Upper-Division Courses

Four upper-division Jewish studies core courses:

HIS 155	History of Modern Israel	5
HIS 163B	Genesis: A History	5
HIS 172A	German History	5
HIS 172B	German Film, 1919-1945	5
HIS 178E	Modern Jewish Intellectual	5

	History	
HIS 185I	Latin American Jewish History in the Modern Period	5
HIS 185J	The Modern Jewish Experience	5
HIS 185K	Jewish Life in Eastern Mediterranean Port Cities	5
HIS 185L	Where Civilizations Met--Jews, Judaism, and the Iberian Peninsula	5
HIS 185M	Zionism: An Intellectual History	5
HIS 185O	The Holocaust and the Arab World	5
HIS 194F	Jewish Shanghai	5
HAVC 135E	Jewish Identity and Visual Representation	5
JWST 185N	The Holocaust in a Digital World	5
LGST 114	Jews, Anti-Semitism, and the American Legal System	5
LGST 115	Law and the Holocaust	5
LIT 118A	Hebrew Bible	5
LIT 164A	Jewish Travel Narratives	5
LIT 164B	Hebrew Poetry	5
LIT 164C	Global Jewish Writing	5
LIT 164D	Jewish Diaspora, Ethnicity, and Urban Life	5
LIT 164G	Literature and the Holocaust	5
LIT 164H	Jewish Writers and the European City	5
LIT 164J	Jewish Writers and the American City	5
LIT 181A	Biblical Hebrew, Part 1	5
LIT 181B	Biblical Hebrew, Part 2	5
PHIL 148	The Holocaust and Philosophy	5

Electives

Four additional Jewish studies courses of the student's choice, three of which must be upper-division.

The following courses are electives only. Students may satisfy their Jewish studies elective requirements by taking additional language, lower-division core, and upper-division core courses from the Jewish studies curriculum.

HIS 2A	The World to 1500	5
HIS 2B	The World Since 1500	5
HIS 70A	Modern European History, 1500-1815	5
HIS 70B	Modern European History, 1815-present	5
HIS 167A	The First World War	5
HIS 167B	The Second World War in Europe	5
HIS 172C	History of German Film, 1945 to Present	5
HIS 172D	Hitler and the Third Reich	5
HIS 176	Eastern Europe, 1848-2000	5
HIS 178A	European Intellectual History: The Enlightenment	5
HIS 178B	European Intellectual History: The 19th Century	5

HIS 178C	European Intellectual History, 1870-1970	5
HIS 184B	Racism and Antiracism in Europe: From 1870 to the Present	5
JWST 199	Tutorial	5
LIT 112I	Kafka in Translation	5
MUSC 80I	Music of Modern Israel	5
MUSC 81P	History of Jewish Music	5
MUSC 80T	Mizrach: Jewish Music in the Lands of Islam	5
MUSC 80Y	Music, Anti-Semitism, and the Holocaust	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in Jewish studies is satisfied by completing an exit seminar or thesis:

Choose an exit seminar (one quarter--choose one of the following courses):

HIS 194L	Exile, Diaspora, and Displacement: Jewish Lives from North Africa to the Middle East	5
HIS 194V	Fascism and Anti-Fascism: The Global Spanish Civil War	5
HIS 196G	Topics in Modern Germany and Europe	5
HIS 196M	Shtetl: Eastern European Jewish Life	5
HIS 196N	Eastern European Jewish Social History	5
HIS 196P	Hitler and Stalin	5
HIS 196R	Social World of Roman Palestine	5
LIT 190Y	Topics in Jewish Literature and Culture	5

Or a thesis (two quarters--all of the following courses):

JWST 195A	Thesis Research	5
JWST 195B	Thesis Writing	5

Comprehensive Requirement

Students may satisfy the Jewish studies comprehensive exit requirement by completing an approved exit seminar or senior thesis:

Choose an exit seminar (one quarter--choose one of the following courses):

HIS 194L	Exile, Diaspora, and Displacement: Jewish Lives from North Africa to the Middle East	5
HIS 194V	Fascism and Anti-Fascism: The Global Spanish Civil War	5
HIS 196G	Topics in Modern Germany and Europe	5

HIS 196M	Shtetl: Eastern European Jewish Life	5
HIS 196N	Eastern European Jewish Social History	5
HIS 196P	Hitler and Stalin	5
HIS 196R	Social World of Roman Palestine	5
LIT 190Y	Topics in Jewish Literature and Culture	5

Or a thesis (two quarters--all of the following courses):

JWST 195A	Thesis Research	5
JWST 195B	Thesis Writing	5

Distribution Requirements

Of the courses required for the major, at least three must also meet the following distribution requirements:

Classical Chronological Distribution Requirement

One of the following courses:

HEBR 80	Introduction to Biblical Hebrew	5
HIS 74A	Introduction to Middle Eastern and North African Jewish History: Ancient to Early Modern	5
HIS 163B	Genesis: A History	5
HIS 196R	Social World of Roman Palestine	5
LIT 118A	Hebrew Bible	5
LIT 181A	Biblical Hebrew, Part 1	5
LIT 181B	Biblical Hebrew, Part 2	5

Modern Chronological Distribution Requirement

One of the following courses:

HIS 155	History of Modern Israel	5
HIS 167A	The First World War	5
HIS 167B	The Second World War in Europe	5
HIS 172A	German History	5
HIS 172B	German Film, 1919-1945	5
HIS 172D	Hitler and the Third Reich	5
HIS 178E	Modern Jewish Intellectual History	5
HIS 185I	Latin American Jewish History in the Modern Period	5
HIS 185J	The Modern Jewish Experience	5
HIS 185K	Jewish Life in Eastern Mediterranean Port Cities	5
HIS 196G	Topics in Modern Germany and Europe	5
HIS 196M	Shtetl: Eastern European Jewish Life	5
HIS 196N	Eastern European Jewish Social History	5
HAVC 135E	Jewish Identity and Visual Representation	5
LGST 114	Jews, Anti-Semitism, and the American Legal System	5

LIT 112I	Kafka in Translation	5
LIT 164A	Jewish Travel Narratives	5
LIT 164B	Hebrew Poetry	5
LIT 164C	Global Jewish Writing	5
LIT 164D	Jewish Diaspora, Ethnicity, and Urban Life	5
LIT 164H	Jewish Writers and the European City	5
LIT 164J	Jewish Writers and the American City	5
MUSC 80I	Music of Modern Israel	5
MUSC 80P	Popular Music in the United States	5

Holocaust Distribution Requirement

One of the following courses:

HIS 75	Film and the Holocaust	5
HIS 76	The Holocaust	5
HIS 185O	The Holocaust and the Arab World	5
HIS 196P	Hitler and Stalin	5
JWST 185N	The Holocaust in a Digital World	5
LGST 115	Law and the Holocaust	5
LIT 164G	Literature and the Holocaust	5
MUSC 80P	Popular Music in the United States	5
PHIL 148	The Holocaust and Philosophy	5

Planners

Sample Four Year Plan

	Fall	Winter	Spring
	Language 1	Language 2	Language 3
1st (frosh)	<u>HIS 74, 74A, 74B, 77, or LIT 61J</u>		<u>HIS 75 or HIS 76</u>
2nd (soph)	Upper division core course 1	Upper division core course 2	Upper division core course 3
3rd (junior)	Upper division core course 4	Additional core or elective 1	Upper division additional core or elective 2
4th (senior)	Upper division additional core or elective 3	Upper division additional core or elective 4	Exit seminar or thesis (DC)

In addition to the specific courses shown in these planners, a student must complete courses satisfying all of UCSC's general

education requirements. Individual student plans will vary, and some general education requirements may be satisfied by Jewish studies major requirements depending on each student's individual course selection.

Sample Transfer Plan

	Fall	Winter	Spring
	Language 1	Language 2	Language 3
1st (junior)	<u>HIS 74</u> , 74A, 74B, 77, or <u>LIT</u> <u>61J</u>	Upper division core course	<u>HIS 75</u> or <u>HIS 76</u>
		Additional core or elective 1	Upper division core course 2
	Upper division core course 3	Upper division core course 4	Upper division additional core or elective 4
2nd (senior)	Upper division additional core or elective 2	Upper division additional core or elective 3	Exit seminar or thesis (DC)

This planner assumes that a student has completed most of their general education requirements before coming to UCSC. Students from California community colleges are advised to complete the Intersegmental General Education Transfer Curriculum (IGETC) in preparation for transfer to UC Santa Cruz.

These are sample plans. Actual student plans will vary according to annual course offerings and student's unique academic goals. Editable versions of these plans are available on the Jewish Studies website.

JEWISH STUDIES MINOR

Students whose major area of interest is not Jewish studies may nonetheless find that a minor in Jewish studies makes an invaluable contribution to their studies. This introduction to Jewish studies is helpful for students who plan to do graduate work in Jewish studies, whether through traditional academic disciplines or in Jewish studies programs, and also for students who plan to attend rabbinical schools or to find work with Jewish communities. For others with an interest in Jewish topics, but without such plans, a minor in Jewish studies offers intellectual enrichment and a focus within the student's chosen field.

Course Requirements

The minor requires a minimum of eight courses. A minimum of 5 upper-division courses must be completed within the Jewish studies minor course requirements. In consultation with a faculty adviser, students will plan a program of study to fulfill the following distribution of courses:

Lower-Division Courses

One of the following Jewish studies core courses:
HIS 74 Introduction to Jewish History

5

HIS 74A	and Cultures Introduction to Middle Eastern and North African Jewish History: Ancient to Early Modern	5
HIS 74B	Introduction to Middle Eastern and North African Jewish History, 1500-2000	5
HIS 75	Film and the Holocaust	5
HIS 76	The Holocaust	5
LIT 61J	Introduction to Jewish Literature and Culture	5

Upper-Division Courses

Three upper-division Jewish studies core courses:

HIS 155	History of Modern Israel	5
HIS 163B	Genesis: A History	5
HIS 172A	German History	5
HIS 172B	German Film, 1919-1945	5
HIS 178E	Modern Jewish Intellectual History	5
HIS 185I	Latin American Jewish History in the Modern Period	5
HIS 185J	The Modern Jewish Experience	5
HIS 185K	Jewish Life in Eastern Mediterranean Port Cities	5
HIS 185L	Where Civilizations Met--Jews, Judaism, and the Iberian Peninsula	5
HIS 185M	Zionism: An Intellectual History	5
HIS 185O	The Holocaust and the Arab World	5
HIS 194F	Jewish Shanghai	5
HAVC 135E	Jewish Identity and Visual Representation	5
JWST 185N	The Holocaust in a Digital World	5
LGST 114	Jews, Anti-Semitism, and the American Legal System	5
LGST 115	Law and the Holocaust	5
LIT 118A	Hebrew Bible	5
LIT 164A	Jewish Travel Narratives	5
LIT 164B	Hebrew Poetry	5
LIT 164C	Global Jewish Writing	5
LIT 164D	Jewish Diaspora, Ethnicity, and Urban Life	5
LIT 164G	Literature and the Holocaust	5
LIT 164H	Jewish Writers and the European City	5
LIT 164J	Jewish Writers and the American City	5
LIT 181A	Biblical Hebrew, Part 1	5
LIT 181B	Biblical Hebrew, Part 2	5
PHIL 148	The Holocaust and Philosophy	5

Electives

Four additional core or elective courses from the Jewish studies curriculum, two of which must be upper-division.

The following courses are electives only. Students may satisfy their Jewish studies elective requirements by taking additional lower-division core and/or upper-division core courses from the Jewish studies curriculum. Jewish studies minors may also apply lower-division Hebrew or Yiddish language courses to their elective requirements.

HIS 2A	The World to 1500	5
HIS 2B	The World Since 1500	5
HIS 70A	Modern European History, 1500-1815	5
HIS 70B	Modern European History, 1815-present	5
HIS 167A	The First World War	5
HIS 167B	The Second World War in Europe	5
HIS 172C	History of German Film, 1945 to Present	5
HIS 172D	Hitler and the Third Reich	5
HIS 176	Eastern Europe, 1848-2000	5
HIS 178A	European Intellectual History: The Enlightenment	5
HIS 178B	European Intellectual History: The 19th Century	5
HIS 178C	European Intellectual History, 1870-1970	5
HIS 184B	Racism and Antiracism in Europe: From 1870 to the Present	5
JWST 199	Tutorial	5
LIT 112I	Kafka in Translation	5
MUSC 80I	Music of Modern Israel	5
MUSC 81P	History of Jewish Music	5
MUSC 80T	Mizrach: Jewish Music in the Lands of Islam	5
MUSC 80Y	Music, Anti-Semitism, and the Holocaust	5

Graduate Program

The Ph.D. program in history at UC Santa Cruz emphasizes an interdisciplinary and cross-cultural approach to historical studies. The History Department offers a rigorous program of instruction and independent work that trains students in the techniques of original historical research and equips them to teach university-level courses in history. The department only admits those highly motivated students who are most qualified to pursue advanced studies in history. The department also only admits those applicants who can best benefit from the specific strengths of our faculty. Just as the work of most professional historians centers around research and teaching, training in these areas constitutes the two essential poles of the graduate program in history.

HISTORY M.A.

Introduction

The Department of History offers an M.A. degree in history for those individuals who are interested in postgraduate work, but who are not planning to complete a Ph.D. It is a degree program that can fulfill in-service education requirements for

current teachers as well as for future teachers earning a single-subject credential in social studies. Part-time enrollment is allowed.

Each student will be required to choose one of three areas of specialization (U.S., Europe, East Asia). To complete the degree, each student must pass a total of 12 courses of 5 credits each and two courses of 2 credits each. Students are required to produce a substantial research essay (average word count of 8000-1000) grounded in original research in primary historical documents. There is no language requirement.

Detailed information for prospective graduate students, including procedures for applications and admission to graduate studies, examinations and requirements is available from the Division of Graduate Studies.

Applications

The deadline for applications to the History Program is December 10 of each year. Admission information and application material are available online.

Requirements

The M.A. degree is awarded after two years in residence, provided that the following requirements have been met:

- Completion of 12 five-unit courses and two 2-credit Proseminars
- Removal of all Incomplete notations on record
- Approval of an M.A. essay

Course Requirements

HIS 200	Methods and Theories of History	5
HIS 201	Directed Research Colloquium	5
HIS 202	Practicing World History	5

HIS 200: year 1, fall quarter

HIS 201: year 2, winter quarter

HIS 202: year 1, spring quarter

One research seminar during the first four quarters:

HIS 204A	History of Gender Research Seminar	5
HIS 204C	Colonialism, Nationalism and Race Research Seminar	5
HIS 204E	Transnationalism, Borderlands, and History	5

Three Promseminars of 2 credits each including:

HIS 280A	History Graduate Proseminar: Teaching Pedagogy	2
HIS 280B	History Graduate Proseminar: Research Presentations and Grant Writing	2
HIS 280C	History Graduate Proseminar: Job Market	2

HIS 280A: year 1

HIS 280B: year 1

HIS 280C: year 2

Six area of concentration electives of 5 credits each, two of which may be taken outside the History Department.

Courses taken must be graduate seminars, upper-division undergraduate courses, and independent study courses (maximum of two).

Reading seminars in the area of specialization:

U.S.:

HIS 210A	Readings in U.S. History	5
HIS 210B	Readings in U.S. History	5

Europe:

HIS 251A	Readings in Modern European History: Environment and Technology	5
HIS 251B	Readings in Modern European History: Empire	5

East Asia:

HIS 230A	Readings in Late Imperial China	5
HIS 230B	Engendering China	5
HIS 230C	Readings in 20th-Century China	5
HIS 242	Readings in Modern Japan	5
HIS 243	Transnational Japan	5
HIS 244	Gender and Japanese History	5

Further details about the graduate program are available from the Department of History website.

Other Requirements

Applying for Graduation

The final essay (hard copy and pdf copy) must be submitted to the graduate program coordinator by the spring quarter deadline. A completed Application for the Master's Degree must be filed with the graduate coordinator with the submission of your final essay.

Essay Review and Evaluation

The Graduate Committee evaluates the master's essays and makes recommendations to the graduate director on the awarding of the M.A. degree. Applicants are notified of the committee's decision in June.

HISTORY PH.D.

Introduction

The Ph.D. program in history at UC Santa Cruz emphasizes an interdisciplinary and cross-cultural approach to historical studies. We offer a rigorous program of instruction and independent work that trains students in the techniques of original historical research and equips them to teach university-level courses in history. We only admit those highly motivated students who are most qualified to pursue advanced studies in history. We also only admit those applicants who can best benefit from the specific strengths of our faculty.

Just as the work of most professional historians centers around research and teaching, training in these areas constitutes the two essential poles of the graduate program in history.

Each student will be required to choose one of three areas of concentration (U.S., Europe, East Asia) and each student also prepares a second teaching field different from their primary field.

Detailed information for prospective graduate students, including procedures for applications and admission to graduate studies, examinations and requirements is available from the Division of Graduate Studies.

Applications

The deadline for applications to the History program in Dec. 10 of each year. Admission information and application material are available online.

Advancement to Candidacy

Course Requirements

Until they pass the qualifying examination and are formally advanced to candidacy for the Ph.D. degree, students must be in residence at UCSC and are expected to complete a minimum of 10 credits each quarter to maintain normal academic progress. Completion of a minimum of 10 courses of 5 credits each and three proseminars of 2 credits each (HIS 280A, HIS 280B, and HIS 280C) is required for advancement to candidacy. Courses taken are graduate seminars, independent study courses, and most upper-division undergraduate courses.

Course Requirements

HIS 200	Methods and Theories of History	5
HIS 201	Directed Research Colloquium	5
HIS 202	Practicing World History	5

HIS 200: year 1, fall quarter

HIS 201: year 2, winter quarter

HIS 202: year 1

One research seminar during the first four quarters:

HIS 204A	History of Gender Research Seminar	5
HIS 204C	Colonialism, Nationalism and Race Research Seminar	5
HIS 204E	Transnationalism, Borderlands, and History	5

Three Promseminars of 2 credits each including:

HIS 280A	History Graduate Proseminar: Teaching Pedagogy	2
HIS 280B	History Graduate Proseminar: Research Presentations and Grant Writing	2
HIS 280C	History Graduate Proseminar: Job Market	2

HIS 280A: year 1

HIS 280B: year 1

HIS 280C: year 2

Second teaching field:

Each Ph.D student also prepares a second teaching field different from the primary field and may choose among East Asian, European, gender and sexuality, Latin America, Middle East and North Africa (MENA), U.S., and world history.

Outside courses:

Two graduate courses outside the History Department are required and may be from two different departments.

Reading seminars in the area of concentration:

Graduate students in East Asian history specialize in either modern Chinese or modern Japanese history, but all students in the East Asian program will be prepared to teach both. The core curriculum for East Asian history consists of three China reading seminars (HIS 230A, HIS 230B, HIS 230C) and three Japan reading seminars (HIS 242, HIS 243, HIS 244) taught in sequence over three years, covering such topics as foundational historiographies, gender, social movements, and transnational circulation of people, commodities, and ideas. Over the course of the three years to the qualifying examination, China students will be expected to take all three China seminars and at least two of the three Japan seminars. Japan students will be expected to take all three Japan seminars and at least two of the three China seminars. Additional coursework in research methods as well as occasional independent studies will also be available, and students are encouraged to take classes that have a wide range of faculty in other departments across the campus.

----------	---	---

East Asia:

HIS 230A	Readings in Late Imperial China	5
HIS 230B	Engendering China	5
HIS 230C	Readings in 20th-Century China	5
HIS 242	Readings in Modern Japan	5
HIS 243	Transnational Japan	5
HIS 244	Gender and Japanese History	5

Foreign Language Requirements

Foreign language preparation may be required for admission, depending on field of concentration.

Students with a primary teaching field in U.S. history are expected to demonstrate a reading competency in at least one foreign language prior to taking the Ph.D. qualifying examination. Students in East Asia and European teaching fields must demonstrate a reading competency in at least two foreign languages prior to taking the Ph.D. qualifying examination; competency in one of the languages must be demonstrated by the end of the sixth quarter of enrollment. Usually, competency will be demonstrated by passing a reading examination administered by a member of the history faculty. Students who believe that they have already demonstrated competency through previous coursework or through their performance on a standardized test should petition the graduate director to waive this language requirement.

Teaching Requirement**Research and Teaching**

In preparing graduate students for research and teaching at the university level, the department offers training in three geographically and chronologically defined fields: U.S. history, European history since 1500, and East Asian history since 1600. U.S., European, and East Asian history are defined as primary teaching fields; each graduate student is required to choose one. Students of U.S. history may incorporate Latin American history in their coursework. Every year the faculty in each field offer introductory readings seminars and classes on more specific topics. Each Ph.D student also prepares a second teaching field different from the primary field and may choose among East Asian, European, gender and sexuality, Latin America, Middle East and North Africa (MENA), U.S., and world history.

Pre-Qualifying Requirements**Coursework**

Students must successfully complete all required courses.

The M.A. Essay

Students are required to produce a substantial research essay grounded in original research in primary historical documents.

A successful essay will reflect a general understanding of the field of inquiry along with a critical grasp of the scholarship that currently defines the field; deep knowledge of the specific subject under investigation; the application of appropriate analytical models; and a well-supported interpretation of the materials explored. This essay could (but need not) be a segment of a larger project; but it must be a complete, self-contained essay in and of itself.

Students enroll in HIS 201, Directed Research Colloquium, the winter quarter of their second year. The final essay (hard copy and pdf copy) must be submitted to the graduate program coordinator by the spring quarter deadline.

Qualifying Examination Dossier Requirements

The QE dossier includes four parts, each of which should be prepared in consultation with the student's primary academic adviser and with the advice of the examiners. The examination will focus on the dossier. All examiners, including the examiner from outside the department, will participate in all segments of the examination.

The dossier includes:

1. An essay reviewing the state of the scholarship in the student's primary field of concentration. This essay should reflect the student's general, broad competence in his or her field as well as a mastery of the theoretical issues and historiographic debates in four to five areas that represent their primary area of expertise. The essay may reflect the thematic focus of a research field as well as work completed in an outside field (literature, anthropology, etc.).
2. One syllabus, possibly two syllabi (the number to be decided in discussion with the student's primary adviser), that demonstrates the student's preparation to teach across the breadth of their primary field at the introductory level. The syllabus should be annotated to show how each class session would be prepared: principal sources for lectures, principal questions for discussion, reasons for assigning particular readings, etc.
3. A syllabus (annotated in the same fashion as described in section number 2 above) in the student's second teaching field, accompanied by a brief (three- to five-page) statement of principal issues. The exact content of these items will be decided in consultation with the examiner in the secondary teaching field.
4. A prospectus that includes an evaluative survey of the literature relevant to the student's proposed research topic, a detailed discussion of the archival resources, and a consideration of the theoretical issues to be engaged.

Note:

- Although no specific segment of the dossier focuses upon the coursework completed outside the History Department, it is expected that this work will be

incorporated into different sections of the portfolio, particularly the research prospectus.

- Complete bibliographies must be appended to each piece of the QE dossier.

Qualifying Examination

The qualifying examination (QE) emphasizes field mastery, integration of material from different fields, and focused preparation for dissertation research. The QE is a three-hour meeting during which a student presents and discusses a dossier that has been submitted to the student's committee at least three weeks in advance. The examination is taken by the spring quarter of the third year. Prior to taking the QE, all incomplete notations (I) must be cleared from the student's record. Additionally, the student must be registered the quarter the examination is taken.

The four examination fields are designed in consultation with the student's QE committee members. Students prepare for the examination through regularly offered courses and independent readings courses sponsored by the examiners. Students are required to take at least two courses in each of the four fields. The fields are as follows:

- **Primary Field of Concentration.** One of three fields: U.S. history; European history 1500 to the present; East Asian history 1600 to the present.
- **Area of Concentration.** This is a subfield of the primary field of concentration with a focus on the student's specific area of research interests.
- **Second Teaching Field.** Chosen from the above list of primary fields, with the addition of world history, or, where appropriate, a comparative, thematic field such as gender, colonialism, Latin American, or African history.
- **Outside Field.** One field outside history, such as anthropology, feminist studies, history of art and visual culture, Latin American and Latino studies, literature, philosophy, politics, sociology, or history of consciousness. Students select a field of topical, thematic, or methodological relevance to their dissertation. The student's faculty adviser must approve the outside field.

The four examination fields must be defined and preliminary reading lists (see below) filed with the department no later than the student's eighth quarter of residency.

A pass or fail will be given after the examination based on the student's knowledge and research preparation as demonstrated by his or her dossier. In order to pass the QE, all areas must receive passing marks from each member of the committee. Immediately following the exam, the QE committee chair will complete and submit to the History Department the Report on Qualifying Examination form. If a student does not pass the QE the first time, they may retake only those sections not passed. No one will be permitted to take the QE more than twice.

M.A. Degree

The master of arts (M.A.) degree is awarded to all Ph.D. students after two years in residence, successful completion of 12 courses of 5 credits each and three proseminars of 2 credits each, demonstrated competency in one foreign language (for those in primary teaching fields other than U.S. history), removal of all Incomplete notations (I) on record, and approval of a M.A. essay (average word count of 8000-10000, excluding footnotes and bibliography) grounded in original research in primary historical documents.

Dissertation

The dissertation represents an extensive, book-length project grounded in research in original historical documents. A successful dissertation will reflect a broad and deep understanding of the field of inquiry, a mastery of the scholarship that currently defines the field, detailed knowledge of the subject of study growing out of dedicated research, and the incorporation (and explicit rejection of) appropriate interpretive models.

Academic Progress

Evaluation of Academic Progress

Each spring, the History Department reviews the academic progress of all continuing students. All first-year students are required to meet with the Graduate Committee to discuss academic goals and progress.

Time to Degree

During your time in the graduate program, you will become familiar with the terms "normative time" or "timely progress." It is important to progress within expected timetables as it affects many aspects of financial support as well as good academic standing. (See the Graduate Division Graduate Student Handbook.

Applying for Graduation

Degree Application

By the end of the first week of the quarter you intend to finish, an Application for Doctor of Philosophy Degree form, which requires dissertation adviser(s) and graduate director signatures, must be filed with the Graduate Division,

Dissertation Completion

The dissertation should be submitted to the dissertation reading committee before the end of the fifth week of the quarter in which the degree is to be conferred. As a courtesy to the committee, students should provide a hard copy draft unless the committee is willing to accept an electronic copy.

A copy of the **signed** title page along with a PDF of the dissertation must be filed with graduate program coordinator and one copy must be filed online with the Graduate Division by the deadline in the quarter in which the degree is to be conferred (see Academic and Administrative Calendar.

HISTORY COURSE LIST

Course List

Catalog of Course Requirements

The following is a summary list of undergraduate history courses and how they may be applied to the history major requirements starting Fall 2018. Questions about this list or how to apply courses to the history major should be directed to the history undergraduate program coordinator. The information on this list is subject to change. Last updated: 2/19/19.

History of Consciousness

315 Humanities 1
(831) 459-4324
<https://histcon.ucsc.edu/>

PROGRAMS OFFERED

History of Consciousness Minor (p. 129)

History of Consciousness Ph.D. (p. 130)

History of Consciousness Designated Emphasis (p. 131)

OTHER PROGRAMS OF INTEREST

Critical Race and Ethnic Studies B.A. (p. 87)

Feminist Studies B.A. (p. 95)

History of Consciousness is an interdisciplinary graduate and undergraduate minor program centered in the humanities, with links to the social sciences and the arts. It is concerned with forms of expression and social action as they are manifested in specific historical, cultural, and political contexts. The program stresses flexibility and originality. Interest is focused on problems rather than disciplines. Although students are prepared to teach in particular fields, the emphasis is on questions that span a number of different approaches.

History of consciousness fosters problem-driven research vital to new forms of knowledge and intelligibility and to meet the challenges of imagining new modes of scholarship for the arts, social sciences, and humanities. The department emphasizes a variety of topics in its seminars and research pursuits. These areas of research include studies at the intersection of race, sexuality, and gender; global capitalism and cultural processes; psychoanalytic and semiotic theories of the image; science and technology studies; theories and histories of religion; social movements; and literary studies and poetics. Seminars are regularly offered in these and other areas of ongoing faculty research.

History of consciousness facilitates its expansive intellectual and pedagogical mission by maintaining strong cooperative relations with affiliated faculty from other campus programs who offer seminars and participate in advising, qualifying examinations, and dissertation committees. The formal list of affiliated faculty is a non-exhaustive indication of advising possibilities beyond the program's core faculty. Campus research organizations, such as the UCSC Center for Cultural Studies, the Humanities Institute, Critical Race and Ethnic Studies, the Science and Justice Working Group, and the

Research Center for the Americas, also provide venues for collaborative work.

Undergraduate Program

The history of consciousness minor is available for students who wish to gain an understanding of major ideas, trends and figures in the history of knowledge using an interdisciplinary approach. Topics include: modernity; the history of philosophy; capitalism; the foundations of critical theory; categories and concepts of difference; critical race theory; queer theory; gender and sexuality studies; visual culture; and the foundations of modern intellectual thought. Courses provide students with critical theoretical tools for understanding philosophy, history, race, sexuality, affect, politics, economics and other fields of inquiry. They offer foundational knowledge that serves undergraduates in many other majors in the social sciences, arts, and humanities.

HISTORY OF CONSCIOUSNESS MINOR

The history of consciousness minor is available for students who wish to gain an understanding of major ideas, trends and figures in the history of knowledge using an interdisciplinary approach. Topics include: modernity; the history of philosophy; capitalism; the foundations of critical theory; categories and concepts of difference; critical race theory; queer theory; gender and sexuality studies; visual culture; and the foundations of modern intellectual thought. Courses provide students with critical theoretical tools for understanding philosophy, history, race, sexuality, affect, politics, economics and other fields of inquiry. They offer foundational knowledge that serves undergraduates in many other majors in the social sciences, arts, and humanities.

Course Requirements

Lower-Division Courses

Students are required to take one, 5-credit lower-division history of consciousness course, preferably HISC 1, Introduction to the History of Consciousness (topics will vary depending on the instructor).

HISC 1	Introduction to History of Consciousness	5
--------	---	---

Upper-Division Courses

Students are required to take five, 5-credit upper-division History of Consciousness courses. Students may, with permission of the instructor, petition the department to substitute a 5-credit graduate seminar for one of the required upper-division courses. In addition, students may petition to substitute an upper-division course offered by affiliated faculty in other departments. Students must complete all requirements for the minor with a grade of P, C (2.0), or better.

Graduate Program

Over more than 50 years of existence, the history of consciousness graduate program has become widely recognized as a leader of interdisciplinary scholarship. Program graduates are influential scholars at prominent universities, and their dissertations have been published by important trade and academic presses. Graduates currently find academic employment in a wide range of disciplines, including literature, feminist studies, science studies, anthropology, sociology, American studies, cultural studies, ethnic studies, communications, the study of religion, and philosophy. In addition, history of consciousness graduates work as filmmakers, museum researchers, free-lance writers, postdoctoral researchers, and academic administrators.

Since the curriculum concentrates on theoretical and methodological issues and is concerned with the integration of disciplines, candidates for admission are expected to have a relatively clear idea of the project they wish to pursue. Experience of advanced work in one or more fields is preferred, but not required.

Students also have the option of doing advanced work in a traditional discipline and receiving a designated emphasis in that specialization. In such cases, students must satisfy the appropriate department's criteria (see departmental websites for information).

HISTORY OF CONSCIOUSNESS PH.D.

Introduction

Detailed information for prospective graduate students, including procedures for application and admission to graduate studies, examinations, and requirements for the doctor of philosophy degree, is available from the Division of Graduate Studies and on the department website.

Applications

The deadline for applications to the History of Consciousness (HISC) program is Dec. 10 of each year. Admissions information and application materials are available online. Applications are invited from students with backgrounds and interests in the humanities, arts, and social sciences and are especially encouraged from individuals with a clear idea of the project they wish to undertake. Strong preference is given to applicants working in areas for which the faculty resources in history of consciousness are appropriate and available. Graduate Record Examination (GRE) scores are optional but highly recommended. A writing sample is required of no more than 10 pages. Admission is for the fall quarter only.

It is important to note that in light of California's elimination of affirmative action as an admissions criterion, the History of Consciousness Department reaffirms its commitment to the principles of affirmative action. These principles mean a commitment to diversity, equal opportunity, and outreach to underrepresented communities. Further, this commitment underlines our understanding that the very fabric and quality

of our scholarship depends on the representation and interplay of diverse experience and perspectives. So defined, affirmative action is reflected in every aspect of the history of consciousness program, including scholarship, teaching, admissions, hiring, and the process of departmental governance.

Advancement to Candidacy

Course Requirements

The common requirements are:

- HISC 203A, Approaches, to be taken in fall quarter of the first year;
- HISC 240, Pedagogy of Teaching/Teaching Assistant Training, to be taken in the fall of the first year;
- HISC 203B, the writing-intensive version of Approaches, to be taken in spring quarter of the first year;
- A minimum of five history of consciousness graduate seminars during the first two years;
- HISC 291, a two-credit advising course, each quarter; Students register for a minimum of two courses (5 credits each) plus HISC 291 (2 credits) per quarter until after Advancement to Candidacy, at which time they may register for one course per quarter (normally HISC 299A) plus the 2-credit HISC 291 in order to qualify for full-time enrollment. With the exception of HISC 203A, HISC 203B, HISC 240 and the five required history of consciousness seminars, courses taken to fulfill the university enrollment requirements may include not only history of consciousness seminars but also independent study courses with specific faculty and graduate seminars offered in other departments.

HISC 203A	Approaches to History of Consciousness	5
HISC 203B	Approaches to History of Consciousness	5
HISC 240	Basic Principles of University-Level Pedagogy	2
HISC 291	Advising	2

Minimum of five HISC grad seminars

A minimum of five history of consciousness graduate seminars during the first two years

Foreign Language Requirements

Students must demonstrate a proficiency in a language other than English (as demonstrated by an undergraduate degree in the language, taking a translation examination, completing coursework, or petitioning for exemption).

Teaching Requirement

Students must complete three quarters of supervised teaching experience.

Pre-Qualifying Requirements

Qualifying Examination

The qualifying examination includes a written and oral component. The written component consists of a qualifying

essay (normally drafts of one to two chapters of the proposed dissertation) that demonstrates the candidate's ability to do extended, dissertation-level research, analysis, and writing on an original topic. The written component also includes a dissertation prospectus. The oral examination focuses on the student's qualifying essay, dissertation prospectus, and relevant fields of scholarship.

Post-Qualifying Requirements

Advancement to Candidacy

Students are encouraged to advance to candidacy in their third year. In order to remain within normative time they must advance by the end of their fourth year in the program. In order to advance to candidacy, students must complete their coursework; demonstrate proficiency in a second language (by taking a translation examination, completing coursework, or petitioning for exemption), be in good academic standing, and complete and pass the written and oral portion of the qualifying examination.

Dissertation

Dissertation

After advancement to candidacy, students concentrate on dissertation writing. The current normative time to degree limit of seven years means that a student usually has a minimum of three years after advancement to candidacy for completion of the dissertation. Students register for one course per quarter (normally HISC 299A) plus the 2-credit HISC 291 which qualifies as full-time enrollment.

HISC 299A Thesis Research 5

HISC 291 Advising 2

Dissertation Defense

Academic Progress

In order to remain within normative progress, students must advance by the end of their fourth year in the program.

A student who has been advanced to candidacy for more than nine quarters is not considered to be making satisfactory progress.

For a complete list of Academic Requirements and Standards, visit the Graduate Division website.

Applying for Graduation

For information on how to apply for graduation, visit the Graduate Division website.

HISTORY OF CONSCIOUSNESS DESIGNATED EMPHASIS

Introduction

To receive a designated emphasis in history of consciousness, graduate students from other departments must complete the

requirements in addition to degree requirements for the doctorate in their home department.

Guidelines and application forms are available in the History of Consciousness Department office.

Requirements

Committee Composition and Departmental Approvals

The student must have a faculty graduate adviser from core or affiliate faculty in history of consciousness, who serves both on the qualifying examination committee and the dissertation reading committee.

To obtain the designated emphasis in History of Consciousness:

1. The request for a designated emphasis must originate in the degree-granting department.
2. Student should complete an application, obtain the history of consciousness adviser's signature and submit with supporting documentation (copies of the QE and Dissertation Committee Nomination forms) to the History of Consciousness Department office.
3. The History of Consciousness Department will notify the student and the home department of approval for the designated emphasis.

Course Requirements

The student must take four graduate courses in history of consciousness. With the approval of the history of consciousness adviser, one of the four required graduate courses may be an independent study.

Writing, Research and/or Teaching Requirements

Languages and Applied Linguistics

Department of Languages and Applied Linguistics
218 Cowell College
(831) 459-2054
<https://language.ucsc.edu>

PROGRAMS OFFERED

Applied Linguistics and Multilingualism B.A. (p. 136)

Spanish Studies B.A. (p. 140)

OTHER PROGRAMS OF INTEREST

Language Studies B.A. (p. 151)

Linguistics B.A. (p. 146)

Language is an intellectual tool basic to all disciplines. In today's communities, multicultural and global, learning a second language is not a refinement but a necessity—the key to understanding and communicating with others near and far. The goal of the Department of Languages and Applied Linguistics at UCSC is to allow students to achieve a substantial level of proficiency in languages other than English. Since such proficiency always includes cultural as well as linguistic comprehension, our courses examine the complex relationship between language and culture.

The Department of Languages and Applied Linguistics offers rigorous training by professional instructors. Most courses are taught in the target language from the very beginning. Currently, we offer courses in Arabic, Chinese, French, German, Hebrew, Italian, Japanese, Persian, Portuguese, Punjabi, Russian, Spanish, Spanish for Heritage speakers, and Yiddish.

Students with previous language preparation who wish to continue in that language take a placement examination to determine the course level appropriate for them. Each language's placement examination format is described in the quarterly Schedule of Classes, along with the date, time, and location of the examination.

Our upper-division courses further expand students' understanding of language in its social contexts, focusing on linguistic, historical, literary, sociological and cultural issues, among others.

Students may also use language courses for the following majors and minors that have a language requirement: classical studies, East Asian studies, German studies, global economics, human biology, Italian studies, Jewish studies,

Latin American and Latino studies, linguistics, language studies, and literature.

Students of language who are interested in theater have the opportunity to participate in the annual International Playhouse, which presents highly successful programs every spring. To date, pieces have been performed in Chinese, French, German, Hebrew, Italian, Japanese, Latin, Portuguese, Punjabi, Russian, and Spanish.

Study abroad is an important component of language study at UCSC. Language students have various opportunities to study abroad, for a summer, quarter, semester, or year. Students may choose to study abroad through the Office of International Education (OIE), through the UCSC Summer Abroad Program, or through affiliate programs around the globe. OIE offers programs in Argentina, Australia, Barbados, Botswana, Brazil, Canada, Chile, China, Costa Rica, Denmark, Egypt, France, Germany, Ghana, Hong Kong, India, Ireland, Israel, Italy, Japan, Korea, Mexico, Netherlands, New Zealand, Russia, Singapore, South Africa, Spain, Sweden, Taiwan, Tanzania, Thailand, Turkey, United Kingdom, and Vietnam. There are programs available for students of all levels of language ability, including Language and Culture programs for beginner or intermediate speakers, to full immersion programs for students with advanced language skills. For a list of current programs and requirements, visit their website.

Language Placement Exams

Information about this topic can be found under Department of Languages and Applied Linguistics.

Undergraduate Program

The department houses two vibrant majors, in applied linguistics and multilingualism, and in Spanish studies. The applied linguistics and multilingualism major is designed for students who wish to pursue the study of a particular language, and at the same time, gain an in-depth understanding of language use in bilingual and multilingual settings. Applied linguistics courses are taught in English and cover topics such as language and gender, second-language teaching, bilingualism, discourse analysis, and intercultural communication. Spanish studies is an interdisciplinary major that promotes advanced linguistic proficiency in Spanish as well as a broad understanding of the historical and cultural developments of the Spanish-speaking world.

PLACEMENT EXAMS

Information about this topic can be found under Department of Languages and Applied Linguistics.

ACADEMIC ENGLISH

The Department of Languages and Applied Linguistics offers a series of courses in Academic English (ACEN) designed specifically for students whose native language is not English, and who would benefit academically by improving their English language skills. The main objective of these courses is to raise the linguistic, academic, and cultural competence of international students who are currently pursuing various majors at UCSC. The ACEN courses help students develop and refine their knowledge of English usage, advanced grammar, vocabulary and idiomatic expressions, while at the same time developing their listening, oral communication, and academic reading and writing skills. The specific content of each course varies per quarter, and thus, none of the courses are prerequisites to the others.

ARABIC

Students interested in acquiring proficiency in Modern Standard Arabic can enroll in language courses from beginning to intermediate levels (ARBC 1-ARBC 6). The curriculum aims to build a solid foundation in speaking, listening, reading, and writing, as well as imparting an understanding of culture and society in the modern Arabic-speaking world.

Study abroad

Students may apply to spend time in Jordan or Morocco; see the Office of International Education (OIE) for information about current programs.

CHINESE

Students interested in learning Chinese may enroll in language courses from beginning to advanced levels and should do so early in their careers at UCSC. Only those with no prior experience with the language may enroll in CHIN 1, which is only offered fall quarter. Heritage learners and those with prior instruction are required to take a placement exam. Students interested in combining their language study with their major focus may choose from a major or minor in language studies or linguistics, a minor in East Asian studies through the History Department, an individual major in East Asian studies through their college, or a global economics major.

The sequence of lower-division courses CHIN 1–CHIN 6 is aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing skills. Instruction takes place mostly in Chinese from the second half of the first quarter. Upper-level courses include CHIN 103, Language and Society; CHIN 104, Readings in Chinese Literature; CHIN 105, Readings in Chinese History; CHIN 107, Introduction to Classical Chinese Prose; and CHIN 108, Introduction to Classical Poetry.

Study Abroad

Students may apply to study intensive Chinese language at universities—in Taipei, Hong Kong, or Beijing—for periods ranging from a summer up to a full year through the Office of International Education (OIE). Courses taken abroad can, with approval of an adviser, be applied to major requirements. For a list of current programs and requirements, visit the Global Engagement website. For information on credit applied to a major, please contact the appropriate department.

FRENCH

Students interested in acquiring proficiency in French can enroll in language courses from beginning to advanced levels. In addition, students may select from among the following programs: a major in language studies, a major in literature with an emphasis in French literature, or a major in global economics.

Lower-division FREN 1–FREN 6 are taught entirely in French and prepare students for advanced study either on campus or abroad. They are designed to help students develop proficiency in aural comprehension, speaking, reading, and writing skills, and to introduce student to French and Francophone cultures. Upper-division courses, also taught in French, are offered on topics such as French phonetics, advanced grammar and composition, French civilization, French linguistics, history of the French language, and French for professions.

Study Abroad

The Office of International Education (OIE) offers both semester and one-year programs in many regions of France, including Bordeaux, Lyon, Grenoble, Toulouse, and Paris. With the approval of an adviser, some French courses taken abroad may be applied to major requirements. For a list of current programs and requirements, visit their web site, <http://oie.ucsc.edu>.

GERMAN

Students interested in acquiring proficiency in German can enroll in language courses from beginning to advanced levels. In addition, students may select from among the following programs: a major in applied linguistics, a major or minor in language studies, a major in literature with an emphasis in German literature, or a major in global economics.

The sequence of lower-division courses GERM 1–GERM 6 is aimed at helping students to develop listening and reading comprehension, as well as speaking, reading, and writing skills. Another sequence of lower-division courses, equivalent to levels 1, 2, and 3, consists of courses GERM 1A and GERM 1B, which offer accelerated German language instruction. GERM 1A and GERM 1B are taught sequentially, winter and spring quarters. The German language sequence

also includes a course on German Media (GERM 119); successful completion of GERM 5 is a prerequisite for this course. Instruction takes place almost exclusively in German.

Study Abroad

The Office of International (OIE) offers study abroad opportunities in Berlin and Munich. Students may spend a summer semester or a full academic year in Berlin or a summer in Munich. The semester and full-year programs are at the Freie Universität, the Humboldt Universität and the Technische Universität. Both the Freie Universität and the Technische Universität also offer summer programs. The summer program at the Freie Universität is self-designed. Students may choose their own curriculum from a variety of available courses (in English or German). The summer program at the Technische Universität is designed for science and engineering majors. Students concentrate on a single engineering course (in English), with visits to relevant companies and research facilities in Berlin. The summer program in Munich (in English) is designed for science, engineering, and environmental studies majors and concentrates on sustainability and green technology, with visits to relevant companies and research facilities. Language requirements for admission to these programs range from little or no German required (summer programs in Berlin and Munich and the FU-BEST program in Berlin) to two years of college-level German required (regular course of study in Berlin). Academic and professional internship opportunities are also available to all students on study abroad in programs Germany.

Students may apply to any of these programs at any point in their student career. For the year-long programs, students generally apply in their sophomore year for a junior year abroad. As an exception, some students apply in their junior year for a senior year abroad; such students must sometimes spend an additional quarter at UCSC in order to satisfy all requirements for their major. Courses taken abroad can, with approval of an adviser, be applied to major requirements.

For a list of current programs and requirements, visit the Education Abroad website. Also, visit the UCSC Office of International Education website. For information on credit applied to a major, contact the appropriate department.

HEBREW

Students interested in acquiring proficiency in modern Hebrew can enroll in language courses from beginning to intermediate levels. In addition, credits from these courses may be counted toward the major or minor in Jewish studies. Lower-division courses are aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing. Attention is also given to developing an understanding of the culture, history, and religion that have been expressed through the Hebrew language from antiquity until today. Students interested in learning the basic lexicon and grammatical structures of biblical Hebrew can enroll in HEBR 80. HEBR 1, HEBR 2, and HEBR 3 (or equivalency)

are required for the major in Jewish studies, and other Hebrew courses are encouraged. In addition, credits from modern or biblical Hebrew courses may be counted toward the minor in Jewish studies.

ITALIAN

Students interested in acquiring proficiency in Italian can enroll in language courses from beginning to advanced levels. In addition, students may select from among the following programs: a major or minor in Italian studies, a major or minor in language studies, a major in literature with an emphasis in Italian literature, a major in global economics

The sequence of lower-division courses ITAL 1–ITAL 6 is aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing. ITAL 1A and ITAL 1B offer lower-division intensive Italian language instruction equivalent to levels 1, 2, 3. The ITAL 1, ITAL 2, ITAL 3 sequence starts once a year in the fall quarter, while the ITAL 1A-ITAL 1B sequence starts once a year in the winter quarter. Classes are taught in Italian from the beginning level.

Study Abroad

The Office of International Education (OIE) sponsors programs of study in Italy. For a list of current programs and requirements, visit their website.

JAPANESE

Students interested in acquiring proficiency in Japanese can enroll in language courses from beginning to advanced levels. Instruction takes place mostly in Japanese from the second half of the first quarter. The curriculum aims to build a solid foundation in all four aspects of linguistic skills (speaking, listening, reading, and writing) as well as sociolinguistic competence and cultural knowledge.

Students may use Japanese courses for the following majors and minors: a major in language studies; a major in linguistics; an East Asian minor; a major in global economics; or a major in literature.

Study Abroad

The Office of International Education (OIE) has information on study in Japan. There are study abroad—programs at many universities, including Doshisha, Hitotsubashi, ICU, Keio, Meiji Gakuin, Osaka, Tsuru, and Waseda. Courses taken abroad can, with approval of an adviser, be applied to major requirements. For a list of current programs and requirements, visit their website. For information on credit applied to a major, contact the appropriate department.

PERSIAN

Students interested in acquiring proficiency in Persian (Farsi) can enroll in beginning language courses (PERS 1–PERS 3), courses available to both heritage and non-heritage speakers. The curriculum aims to build a solid foundation in speaking, listening, reading, and writing, as well as imparting an understanding of Persian culture.

PORTUGUESE

Students interested in acquiring proficiency in Portuguese may choose to enroll in either of two accelerated introductory tracks which comprise First-Year Portuguese: PORT 1A–PORT 1B are designed as a two-quarter sequence for students who have no previous experience with the Romance languages; PORT 60A–PORT 60B are designed as a two-quarter sequence for students who have a strong background in the Romance languages (typically Spanish) or some previous rudimentary knowledge of Portuguese. A Second-Year Portuguese sequence, also accelerated (PORT 65A–PORT 65B), follows the first-year sequence, and is offered over two quarters. The completion of this sequence fulfills the two-year language requirement for study abroad programs. The program is aimed at enabling students to gain proficiency in listening comprehension, speaking, reading, and writing. Instruction takes place in Portuguese from the beginning and draws heavily on Brazilian culture through popular music and cinema.

Study Abroad

Students may apply to spend time either in Rio de Janeiro, Brazil or in Salvador (Bahia) through the Office of International Education (OIE). Courses taken abroad can, with approval of an adviser, be applied to major requirements. For a list of current programs and requirements, visit their website. For information on credit applied to a major, contact the appropriate department

PUNJABI

Students interested in acquiring proficiency in Punjabi can enroll in PUNJ 1A and PUNJ 1B, courses for both heritage and non-heritage learners. Lower-division language courses are aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing. Attention is also given to developing an understanding of the culture that has been expressed through the Punjabi language. This program is part of Sikh and Punjabi studies at UCSC.

RUSSIAN

The Department of Languages and Applied Linguistics offers beginning and intermediate level courses in Russian that provide a comprehensive introduction to the language and develop basic communicative skills (speaking, listening,

reading, and writing) within the framework of contemporary Russian culture. RUSS 1 is offered fall quarter; RUSS 2, winter quarter; and RUSS 3, spring quarter.

SPANISH AND SPANISH FOR HERITAGE SPEAKERS

Students interested in acquiring proficiency in Spanish can enroll in a wide range of Spanish language or Spanish for Heritage speakers (SPHS) courses, from beginning to advanced levels. The language and culture sequence of lower-division courses (SPAN 1–SPAN 6 as well as SPHS 4–SPHS 6) and upper-division series (SPAN 114, SPHS 115, SPAN 140, SPAN 156 and SPAN 150–SPAN 154 courses) are aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing as well as meta-linguistic and cultural competence. Students are strongly encouraged to finish year-long sequences without interruption and, if possible, to study in Spanish-speaking countries. Students can pursue a major in Spanish Studies or select from among several programs that require some coursework in Spanish, including: a major or minor in language studies, a major in literature with an emphasis in Spanish/Latin American/Latino literatures, a major in Latin American and Latino studies, or a major in global economics.

Spanish

Students interested in taking Spanish classes are required to take the placement examination to enroll in the appropriate level. Students finishing a first year of instruction in Spanish (SPAN 1–SPAN 2–SPAN 3) are encouraged to continue on to second-year (intermediate-level) by taking SPAN 4, SPAN 5, and SPAN 6. First-year students also have the option of enrolling in the accelerated sequence (SPAN 1A and SPAN 1B), which is equivalent to three quarters of language study.

Declared human biology majors have priority enrollment in SPAN 5M, Medical Spanish, but others may enroll if there is space availability. Students are also encouraged to continue with the third-year SPAN 114, SPHS 115, SPAN 140, and the SPAN 156 and SPAN 150–SPAN 154 series in which a wide variety of topics are covered. For more information on the courses offered in Spanish, please see the course descriptions.

Spanish for Heritage Speakers

SPHS has been developed for heritage speakers who, although raised in Spanish-speaking communities or households, are not yet fully proficient in Spanish. SPHS courses take into account the experiences and influences of bilingual and bicultural upbringing.

SPHS students are encouraged to attend a group tutoring session once a week in addition to the regular class meetings. Some lower-division and all upper-division courses can fulfill requirements for several majors or departments, such as American studies, education, global economics, language studies, and Latin American and Latino studies.

Heritage speakers who are planning to continue with the Spanish Studies major are strongly encouraged to take the SPHS 4–SPHS 5–SPHS 6 sequence of courses. Keep in mind that this is a sequence which starts in the fall.

Study Abroad

The Office of International Education (OIE) offers programs ranging one quarter or one academic year in Buenos Aires; Argentina, Santiago, Chile; San Jose and Monteverde, Costa Rica; Morelia and Monterrey, Mexico, and Cordoba, Madrid, Alcala, Barcelona, and Granada, Spain. Generally, students must have completed Spanish 6 or SPHS 6 by the end of the sophomore year to qualify for a junior year abroad. Courses taken abroad can, with approval of an adviser, be applied to major requirements. For more information, see the OIE website. For information on credit applied to a particular major, contact the appropriate department.

YIDDISH

Students interested in acquiring proficiency in Yiddish can enroll in beginning language courses. In addition, some credit from these courses may be counted toward the major or minor in Jewish studies; consult with the Jewish studies program. Lower-division courses are aimed at enabling students to gain proficiency in aural comprehension, speaking, reading, and writing. Attention is also given to developing an understanding of the culture that has been expressed through the Yiddish language.

APPLIED LINGUISTICS AND MULTILINGUALISM B.A.

Information and Policies

Introduction

Applied linguistics is an interdisciplinary field that seeks to understand how languages are learned (first and second language acquisition), how more than one language is represented and accessed in the mind of the individual (bilingualism), the ways in which language and society intersect (sociolinguistics), how people from different cultural and linguistic backgrounds interact (intercultural communication), and the methods and principles of language teaching (pedagogy).

The major in applied linguistics and multilingualism is designed for students who wish to pursue the study of a particular language (e.g., Chinese, French, German, Italian, Japanese, or Spanish), and at the same time, gain an in-depth understanding of language use in bilingual and multilingual

settings. Coursework for the major presupposes some familiarity with theoretical linguistics, and thus majors are required to take three foundational courses offered in the Linguistics Department (LING 50; LING 101; LING 111 or LING 112). Since applied linguistics is integrally connected to other disciplines such as cognitive and developmental psychology, education, anthropology, and sociology, students have the option of taking some elective courses in these areas. Finally, majors are encouraged to pursue the study of more than one language in order to reflect on and enhance their understanding of the process of second language acquisition.

Academic Advising for the Program

218 Cowell College
831-459-2054
languages@ucsc.edu

The earlier you declare your major in your academic career the better you will be able to plan your courses and the fulfillment of the requirements. If you declare your major early you will receive more guidance, useful advice and close follow-up.

The Department of Languages and Applied Linguistics provides extensive orientation for the undergraduate major in Applied linguistics and multilingualism. It is very important you plan the prerequisite and requisite courses in the appropriate sequence so as to complete your studies in the expected time.

Orientation is provided in two ways: quarterly large-group informational sessions, and small group or individual meetings with a faculty and/or staff adviser.

Transfer students: please also consult the Transfer Information and Policy section.

Getting Started in the Major

Program Learning Outcomes

Graduates from the applied linguistics and multilingualism studies bachelor of arts program should be able to demonstrate:

- **Proficiency in a second language.** Students who successfully complete the applied linguistics major will reach an Intermediate-high level of proficiency in their second language (L2) as described in the scale of the American Council of Teachers of Foreign Languages (ACTFL). Speakers who complete additional course work through study abroad (an aspect of the major that is very much encouraged) may reach the advanced level in their L2.
- **Understanding contexts and processes of (second) language acquisition.** Students will develop an in-depth understanding of processes of and issues relating to the acquisition of more than one language, bilingualism and multilingualism, including social, psycholinguistic and metalinguistic aspects of these processes.

- **Understanding the role and use of language in society.** Students will gain an in-depth understanding of social aspects of bilingualism and multilingualism, and issues of language in social contexts. Students will also develop an understanding of how different disciplines work together to make sense of human communication in multilingual contexts.
- **Research skills.** Students will develop the receptive and productive skills necessary for becoming members of this community of practice. Specifically, they will develop the disciplinary skills to summarize, interpret and critique both quantitative and qualitative research studies in applied linguistics. Through this process, students will develop the ability to engage in independent reading of scientific texts and research articles, to design basic research projects as well as to collect, analyze and write about applied linguistic data.

Major Qualification Policy and Declaration Process

Major Qualification

To declare the major, students must have completed Level 4 of a non-English language (e.g., CHIN 4, FREN 4, ITAL 4, JAPN 4, PORT 65A) with a grade of B- or better, or place into Level 5 or higher via placement exam.

Transfer students: please also consult the Transfer Information and Policy section.

CHIN 4	Second-Year Chinese	5
FREN 4	Second-Year French	5
GERM 4	Second-Year German	5
ITAL 4	Second-Year Italian	5
JAPN 4	Second-Year Japanese	5
PORT 65A	Accelerated Intermediate Portuguese	5
SPAN 4	Second-Year Spanish	5
SPHS 4	Spanish for Heritage Speakers	5

Appeal Process

Students notified that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 working days from the date of notification. Within 15 working days of receipt of the student's appeal, the department will notify the student and their college of its decision regarding the appeal.

How to Declare a Major

Students must meet major qualification requirements prior to declaring the major.

To declare the major, students must first meet with the faculty adviser and then with the academic adviser. Please contact languages@ucsc.edu for further information.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

Transfer students are strongly advised to complete courses that will satisfy the campus general education requirements or the Intersegmental General Education Transfer Curriculum (IGETC). In addition, transfer students are strongly advised to complete two years of language study in accredited two and four year institutions. While two years of prior language study is strongly is strongly advised, transfer students should be able to complete the applied linguistics and multilingualism major in normative time as long as they place into language Level 4 (Level 5 for students entering UC Santa Cruz in the winter term) upon arrival at UCSC.

Getting Started at UCSC as a Transfer Student

Transfer students may declare at any time after completing Level 4 of a non-English language with a grade of B- or better, following the process in "How to Declare a Major." Transfer students who place into Level 5 or higher of their language when they enter UCSC can declare the major immediately.

Transfer students should consult an academic advisor at languages@ucsc.edu as soon as possible to learn about language placement tests and other information about the major.

Letter Grade Policy

All courses used to satisfy any of the major requirements may be taken for a Pass /No Pass or letter grade, except the Level 4 course in the student's chosen language which must be taken for a letter grade.

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Study Abroad

The Office of International Education (OIE) sponsors programs of study. Students who wish to major in applied linguistics and multilingualism are strongly encouraged to study abroad. For a list of current programs and requirements, visit their website.

Students who participate in EAP may petition to apply up to three courses (up to 15 upper-division credits) from EAP toward the major.

Honors

Students who wish to be considered for honors should meet the deadline posted by the Office of the Registrar for declaring the intent to graduate. Determination of honors is

based on the student's grades for all courses relevant to the major and other factors relevant to an assessment of academic excellence, such as research papers of professional quality. Generally, honors in the major are awarded only to students with a GPA of 3.75 or higher in relevant coursework. Only those students whose performance in coursework is excellent will qualify. Highest honors are awarded only to students whose performance in relevant coursework is outstanding (GPA of 3.90 and above) and who have completed an outstanding original research paper.

Requirements and Planners

Course Requirements

There are a total of 60 credits (50 upper-division and 10 lower-division) required for the applied linguistics and multilingualism major. See below for a breakdown of the credit requirements.

Lower-Division Courses

All of the following courses:

APLX 80	Introduction to Applied Linguistics	5
LING 50	Introduction to Linguistics	5

Language Study: Completion of Level 6 is Required

CHIN 6	Second-Year Chinese	5
FREN 6	Second-Year French	5
GERM 6	Second-Year German	5
ITAL 6	Second-Year Italian	5
JAPN 6	Second-Year Japanese	5
PORT 65B	Accelerated Intermediate Portuguese	5
SPAN 6	Second-Year Spanish	5
SPHS 6	Spanish for Heritage Speakers	5

These courses have Level 1 to Level 5 language prerequisites that have to be completed or placed out of.

Upper-Division Courses

All of the following courses:

APLX 101	Second-Language Acquisition	5
LING 101	Phonology I	5

and one of the following courses:

LING 111	Syntactic Structures	5
LING 112	Syntax I	5

Advanced Language Proficiency Courses

(10 credits total)

Students must take a minimum of two upper-division, 5-credit courses in the student's target language (Arabic, Chinese, French, German, Italian, Japanese, Portuguese, or Spanish). The complete Advanced Language Proficiency course list is posted on the department's web page. Courses used to fulfill the advanced language proficiency requirement cannot be counted toward the APLX electives. Students may petition to have other 5-credit, upper-division courses offered in the

student's target language count toward the advanced language proficiency requirement.

Although languages and applied linguistics does not currently offer upper-division coursework in Portuguese, students who have completed the two-year sequence in this language (or demonstrate equivalent proficiency) have the option to, and are welcome to, complete approved upper-division coursework in Portuguese through the UC Education Abroad Program (EAP) in order to satisfy the upper-division language requirement for the major in applied linguistics and multilingualism. The department wants to accommodate students having studied Portuguese, and satisfaction of the upper-division courses via EAP is one option to do so. However, participation in EAP is not a requirement: if students are unable to participate in EAP for any reason, they are able to choose to fulfill the upper-division language requirement in the applied linguistics and multilingualism major by studying a language that the Languages and Applied Linguistics Department offers at the upper-division level.

CHIN 103	Advanced Chinese: Language and Society	5
CHIN 104	Advanced Chinese: Readings in Literature	5
CHIN 105	Advanced Chinese: Readings in History	5
CHIN 107	Introduction to Classical Chinese Prose	5
CHIN 108	Introduction to Classical Chinese Poetry	5
FREN 108	French Cinema	5
FREN 111	Stylistics	5
FREN 114	French Phonetics	5
FREN 120	French Linguistics	5
FREN 121	History of the French Language	5
FREN 125A	French Civilization: 19th Century	5
FREN 125B	French Civilization: 20th Century	5
FREN 130	French for Professions	5
FREN 136	La Francophonie	5
GERM 119	German Media	5
ITAL 100	Advanced Italian Composition and Conversation	5
JAPN 103	Advanced Japanese	5
JAPN 104	Advanced Japanese	5
JAPN 105	Advanced Japanese	5
JAPN 109	Japanese Language, Culture, and Society	5
SPAN 114	Advanced Conversation and Composition	5
SPAN 140	Sounds of Spanish	5
SPAN 150	Topics in Hispanic Linguistics: Introduction to Hispanic Linguistics	5
SPAN 151	Topics in Hispanic Linguistics: Varieties of Spanish	5
SPAN 152	Topics in Hispanic Linguistics: Spanish in the U.S.	5
SPAN 153	Topics in Hispanic Linguistics: Spanish as a Second Language	5

SPAN 154	Topics in Hispanic Linguistics: Spanish Pragmatics	5
SPAN 156A	The Language of Latin America Cinema	5
SPAN 156E	Spanish Culture	5
SPAN 156F	El Humor en Espanol	5
SPAN 156J	Contemporary Central America	5
SPAN 156K	Spanish Discourse Analysis	5
SPHS 115	El ensayo lectura, analisis y redaccion	5
LALS 171	Brazil in Black and White	5

Electives

(20 credits total)

Four upper-division (5-credit) electives from the following list are required, at least three of which must be APLX courses. Additional courses can be considered, pending approval by the APLX faculty director. Courses used to fulfill the advanced language proficiency requirement cannot be counted toward the APLX electives.

ANTH 139	Language and Culture	5
ANTH 143	Performance and Power	5
APLX 102	Bilingualism	5
APLX 103	Second Language Speech	5
APLX 112	Language and Gender	5
APLX 113	Inter-Cultural Communication	5
APLX 116	Discourse Analysis: Language Use and Context	5
APLX 115	Language and Power	5
APLX 122	Linguistic Diversity & Social Justice	5
APLX 135	Second Language Teaching	5
EDUC 141	Bilingualism and Schooling	5
FREN 111	Stylistics	5
FREN 114	French Phonetics	5
FREN 120	French Linguistics	5
LING 117	Pragmatics	5
LING 154	Language and Social Identity	5
LING 155	Language and Cognition	5
LING 157	Psycholinguistics and Linguistic Theory	5
LING 181	Structure of Romance Languages	5
LING 183	Structure of French	5
LIT 101	Theory and Interpretation	5
LIT 102	Translation Theory	5
SOCY 142	Language and Social Interaction	5
SOCY 143	Conversation Analysis	5
SPAN 140	Sounds of Spanish	5
SPAN 150	Topics in Hispanic Linguistics: Introduction to Hispanic Linguistics	5
SPAN 151	Topics in Hispanic Linguistics: Varieties of Spanish	5
SPAN 152	Topics in Hispanic Linguistics: Spanish in the U.S.	5
SPAN 153	Topics in Hispanic Linguistics: Spanish as a Second Language	5
SPAN 154	Topics in Hispanic Linguistics: Spanish Pragmatics	5

SPAN 156K	Spanish Discourse Analysis	5
-----------	----------------------------	---

Disciplinary Communication (DC) Requirement

The Disciplinary Communication requirement (DC) is satisfied by successfully completing:

APLX 190	Research Seminar in Applied Linguistics	5
----------	--	---

Comprehensive Requirement

(5 credits total)

In their senior year, applied linguistics and multilingualism majors must satisfy the senior exit requirement with:

APLX 190	Research Seminar in Applied Linguistics	5
----------	--	---

Planners

Four-Year Planner

Year	Fall	Winter	Spring
1st (frosh)	Language 1	Language 2	Language 3
2nd (soph)	Language 4	Language 5	Language 6
3rd (junior)	APLX 80 LING 50	APLX 101 LING 101	LING 111 or LING 112 APLX elective
4th (senior)	Adv Language course APLX elective	Adv Language course APLX elective	APLX 190- capstone Non-APLX elective

In addition to the specific courses shown in the planner, students must complete the ER, SR, IM, TA, PE, and PR general education requirements. Some electives may satisfy some of these requirements.

Transfer Planner

Year	Fall	Winter	Spring
1st (junior)	APLX 80 LING 50 Language 4	APLX 101 LING 101 Language 5	LING 111 or LING 112 APLX elective Language 6
2nd	Adv	Adv	APLX 190-

(senior)	Language course	Language course	capstone
	APLX elective	APLX elective	Non-APLX elective

This planner assumes that a student has completed most general education requirements before coming to UCSC, and places into Level 4 or higher of the language they are studying when they enter UCSC.

SPANISH STUDIES B.A.

Information and Policies

Introduction

The interdisciplinary major in Spanish Studies is designed to offer students advanced linguistic proficiency in Spanish as well as a broad understanding of the historical and cultural developments of the Spanish-speaking world.

The Spanish Studies major at UCSC combines the strengths of language and applied linguistics with those of literary and cultural studies. The sequence of courses first exposes students to the academic registers of Spanish, a critical component for both heritage speakers and second language learners. Students then develop academic literacy in the language while gaining familiarity with the methods of analysis in different fields. The configuration of the major affords students flexibility in following their particular interests by choosing one of two tracks: (1) literature and culture or (2) language and linguistics.

These pathways within the major prepare students for a range of career possibilities that involve working with the Spanish-speaking public in a variety of professions (e.g., law, business, public service). Students may also pursue further training in teaching Spanish as a second language at the high school or university level.

Academic Advising for the Program

218 Cowell College
831-459-2054
languages@ucsc.edu

The earlier you declare your major in your academic career the better you will be able to plan your courses and the fulfillment of the requirements. If you declare your major early you will receive more guidance, useful advice and close follow-up.

The Department of Languages and Applied Linguistics provides extensive orientation for the undergraduate major in Spanish studies. It is very important you plan the prerequisite and requisite courses in the appropriate sequence so as to complete your studies in the expected time.

Orientation is provided in two ways: quarterly large-group informational sessions, and small group or individual meetings with a faculty and/or staff adviser.

Transfer students: please also consult the Transfer Information and Policy section.

Getting Started in the Major

Program Learning Outcomes

Graduates from the Spanish studies B.A. program should be able to demonstrate:

- **Advanced-level oral proficiency in Spanish.** Students will have the ability to use all the major timeframes (past, present, and future) in their speech and will be able to produce connected discourse of paragraph length. They will be able to satisfy the demands of work and/or school situations in Spanish with both accuracy and fluency.
- **Academic language and literacy skills in Spanish.** Students will be able to read and understand a wide range of authentic texts (e.g., academic articles, journalistic texts) in Spanish, including those with historical, sociological, and literary content. Students will be able to clearly explain their ideas in writing, demonstrating the ability to summarize, interpret, and substantiate an opinion or argument.
- **Metalinguistic awareness.** Students will be able to describe the main features of the Spanish language (e.g., the sound system, the structure of sentences) and will be able to identify the main regional varieties of Spanish. Students will be able to articulate some of the main differences between English and Spanish using precise terminology.
- **Critical analysis.** Students will be able to comment with critical insight on a range of topics and cultural productions (e.g., literary texts, film, music) of the U.S., Latin America, and Spain. They will be able to read closely in order to evaluate historical ideas, arguments, and points of view.
- **Cultural and historical competency.** Students will be able to compare and contrast multiple interpretations of the same phenomena in different cultures. Students will be able to recognize and reflect on the social, cultural, economic, and political changes that connect Latin America, Spain, and U.S. and Latina/o communities.

Major Qualification Policy and Declaration Process

Major Qualification

To declare the major in Spanish studies, students must have completed SPAN 4 or SPHS 4 at UC Santa Cruz with a grade of C or better or demonstration of proficiency at this level, or place into Level 5 or higher via placement exam.

Transfer students: please also consult the Transfer Information and Policy section.

SPAN 4	Second-Year Spanish	5
SPHS 4	Spanish for Heritage Speakers	5

Appeal Process

Students notified that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 working days from the date of notification. Within 15 working days of receipt of the student's appeal, the department will notify the student and their college of its decision regarding the appeal.

How to Declare a Major

Students must meet major qualification requirements prior to declaring the major.

To declare the major, students must first meet with the faculty adviser and then with the academic adviser. Please contact languages@ucsc.edu for further information.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

Transfer students are strongly advised to complete courses that will satisfy the campus general education requirements or the Intersegmental General Education Transfer Curriculum (IGETC). In addition, transfer students are strongly encouraged to complete two years of Spanish language study at an accredited two- or four-year institution. While two years of prior Spanish language study is strongly advised, transfer students should be able to complete the Spanish studies major in normative time as long as they place into Spanish language Level 4 (Level 5 for students entering UC Santa Cruz in the winter term) upon arrival at UCSC.

Getting Started at UCSC as a Transfer Student

Transfer students may declare at any time after completing SPAN 4 or SPHS 4 with a grade of C or better, following the process in "How to Declare a Major." Transfer students who place into Spanish Level 5 or higher when they enter UCSC can declare the major immediately.

Transfer students should consult an academic adviser at languages@ucsc.edu as soon as possible to learn about language placement tests and other information about the major.

Letter Grade Policy

All courses used to satisfy any of the major requirements may be taken for a Pass/No Pass or letter grade.

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Study Abroad

Spanish studies encourages students to take advantage of the UC Education Abroad Program (UCEAP). Some programs do not require prior language study while others have language prerequisites. Many of these programs provide students with the language skills needed to participate in regular university courses taught in the language of the host country. UCEAP opportunities in Spanish include Argentina, Chile, Mexico, Spain, and Costa Rica.

Students who participate in UCEAP may petition to apply up to five courses (up to 25 upper-division credits) from UCEAP toward the major.

Honors

Requirements and Planners

Course Requirements

There are a total of 45 upper-division credits required for the Spanish studies major. See Program Major Requirements below for a breakdown of the credit requirements.

Lower-Division Courses

Either six courses in the regular track

SPAN 1	First-Year Spanish	5
SPAN 2	First-Year Spanish	5
SPAN 3	First-Year Spanish	5
SPAN 4	Second-Year Spanish	5
SPAN 5	Second-Year Spanish	5
SPAN 6	Second-Year Spanish	5

Or three courses in the Spanish for Heritage Speakers (SPHS) track

SPHS 4	Spanish for Heritage Speakers	5
SPHS 5	Spanish for Heritage Speakers	5
SPHS 6	Spanish for Heritage Speakers	5

Or equivalent proficiency

Plus the following course:

LING 50	Introduction to Linguistics	5
---------	-----------------------------	---

Plus one of the following courses:

HIS 11A	Latin America: Colonial Period	5
HIS 11B	Latin America: National Period	5
HIS 12	Introduction to Latino American History	5

Upper-Division Courses

Four required Spanish studies core courses (20 credits total):

Literature: (5 credits)

Choose one of the following courses:

LIT 189A	De la conquista a Sor Juana	5
----------	-----------------------------	---

LIT 189B	El Siglo XIX en America Latina: cultura, política y sociedad	5	LIT 188G	Literaturay vida en Don Quijote y otros textos cervantinos	5
Spanish Studies: (5 credits)			LIT 188H	Erotismo y Mistica	5
LIT 189C	Introducción a Spanish Studies	5	LIT 188I	La novela picaresca	5
Linguistics: (5 credits)			LIT 188M	Literatura peninsular: siglos XIX y XX	5
SPAN 150	Topics in Hispanic Linguistics: Introduction to Hispanic Linguistics	5	LIT 189F	Literaturas Latinas en los Estados Unidos: en inglés, español y Spanglish	5
Spanish Language: (5 credits)			LIT 189G	Cine y Literatura	5
Choose one of the following courses:			LIT 189H	La Globalizacion en/del Cine Latin/o Americano	5
SPAN 114	Advanced Conversation and Composition	5	LIT 189L	Poesía latinoamericana	5
SPHS 115	El ensayo lectura, analisis y redaccion	5	LIT 189M	Prosa contemporánea hispanoamericana	5
*LIT 189C (formerly Spanish Literature 105)/SPAN 105 and SPAN 150 must be taken prior to enrollment in or in conjunction with concentration courses.			LIT 189N	Latinoamericano testimonio	5
Choice of Concentrations			LIT 189O	El Cuento Hispanoamericano: Variedades esteticas de la literatura breve en America Latina	5
Languages and Linguistics Track			LIT 189Q	Ficción y marginalidad	5
Three courses from the following list that are not used as an elective or capstone:			LIT 189S	La cultura popular en la narrativa latinoamericana	5
SPAN 140	Sounds of Spanish	5	LIT 189T	Historia de la lectura y los lectores: Recepcion y consumo cultural en el mundo Latino Americano	5
SPAN 151	Topics in Hispanic Linguistics: Varieties of Spanish	5	LIT 189U	Modernidad y literatura: El Boom de la novela latinoamericana	5
SPAN 152	Topics in Hispanic Linguistics: Spanish in the U.S.	5	LIT 189V	Andean Indigenismo	5
SPAN 153	Topics in Hispanic Linguistics: Spanish as a Second Language	5	LIT 189X	Estudios mediaticos	5
SPAN 154	Topics in Hispanic Linguistics: Spanish Pragmatics	5	Electives		
SPAN 156A	The Language of Latin America Cinema	5	Electives (one upper-division course, 5 credits total): Choose from related 5-credit courses in Anthropology, Education, Feminist Studies, History, History of Art and Visual Culture, Latin American and Latino Studies, Linguistics, Sociology (see Elective Courses below), or any upper-division Spanish Literature and Culture or Spanish Language and Linguistics concentration courses not taken for concentration credit or capstone requirement.		
SPAN 156E	Spanish Culture	5	ANTH 130L	Ethnographies of Latin America	5
SPAN 156F	El Humor en Espanol	5	ANTH 130M	Inside Mexico	5
SPAN 156J	Contemporary Central America	5	ANTH 176B	Meso-American Archaeology	5
SPAN 156K	Spanish Discourse Analysis	5	FMST 115	Gender, Sexuality, and Transnational Migration Across the Americas	5
SPAN 156M	Mexico and the Southwest	5	FMST 175	Gender and Sexualities in Latina/o America	5
Other 5-credit Spanish-language courses numbered SPAN 100-SPAN 189, SPAN 199 (except SPAN 150, SPAN 114, SPHS 115, and LIT 189C/SPAN 105, formerly Spanish Literature 105/SPAN 105) may be accepted with the permission of the Spanish studies director (or faculty adviser).			HAVC 143C	Latin American Modern Architecture	5
Literature and Culture Track			HAVC 160A	Indigenous American Visual Culture Before 1550: Mexico	5
Any three 5-credit literature courses numbered LIT 188-LIT 189, LIT 199. The courses LIT 189C (formerly Spanish Literature 105), LIT 189A (formerly Spanish Literature 102A), and LIT 189B (formerly Spanish Literature 102B) may not be taken as a concentration or elective course if used as a core course.			HAVC 160B	Indigenous American Visual Culture Before 1550: The Andes	5
LIT 188B	Literatura peninsular: de los orígenes al siglo XVIII	5	HAVC 162A	Advanced Studies in Early Indigenous American Visual Culture: The Ancient Maya	5
LIT 188E	Teatro del Siglo de Oro español	5	HAVC 163	The Native in Colonial Spanish America	5

HAVC 162B	Advanced Studies in Early Indigenous American Visual Culture: The Inka	5
HAVC 191B	The Virgin of Guadalupe: Images and Symbolism in Spain, Mexico, and the U.S	5
LALS 100	Concepts and Theories in Latin American and Latina/o Studies	5
LALS 100B	Cultural Theory in the Americas	5
LALS 115	Mexico-United States Migration	5
LALS 122	Media and Nationalism	5
LALS 127	Genero, Nacion Y Modernidad En El Cine	5
LALS 130	Expresiones cuirs de Género y Sexualidad en el cine Latinoamericano	5
LALS 144	Mexicana/Chicana Histories	5

Disciplinary Communication (DC) Requirement

The Disciplinary Communication requirement (DC requirement) is satisfied by successfully completing one of the following courses:

SPAN 114	Advanced Conversation and Composition	5
SPHS 115	El ensayo lectura, analisis y redaccion	5

Comprehensive Requirement

In their senior year, Spanish studies majors must satisfy the senior exit requirement as described below:

Successful completion of a senior capstone course (a designated upper-division course taught in Spanish, 5 credits total). The senior capstone should be in the student's chosen concentration: language and linguistics, or literature and culture. Students must have senior standing and have completed at least three out of four core courses. The capstone requirement is in addition to the three upper-division concentration courses; the same course cannot be used for both.

Languages and Linguistics Capstone Courses

SPAN 151	Topics in Hispanic Linguistics: Varieties of Spanish	5
SPAN 152	Topics in Hispanic Linguistics: Spanish in the U.S.	5
SPAN 153	Topics in Hispanic Linguistics: Spanish as a Second Language	5
SPAN 154	Topics in Hispanic Linguistics: Spanish Pragmatics	5

Literature and Culture Capstone Course

LIT 190X	Temas de la literatura y cultura espanolas y latinoamericanas	5

Computer Science B.A. (p. 398)

Linguistics is an exact and structured discipline that examines human language. It has connections to many other fields in the humanities (philosophy, literature), the social sciences (anthropology, psychology, sociology), the natural sciences (biology, neuroscience, acoustics), computer science, computer engineering, and artificial intelligence.

The central areas of linguistics investigate the knowledge that speakers of a language have about its structure. Syntax is concerned with the rules that combine words into larger units of phrases and sentences. Semantics is the study of the meanings of linguistic units and how they are combined to form the meanings of sentences. Phonetics deals with the physical properties of language sounds. Phonology investigates the sound systems of particular languages and across languages. Morphology investigates the ways in which words are formed from prefixes, roots, and suffixes. Pragmatics is the study of language use. Psycholinguistics is concerned with the cognitive mechanisms by which language is put to use in producing and perceiving speech.

The faculty in the Linguistics Department have primary research and teaching interests in one or more of these areas. Other perspectives on language study represented include computational and corpus linguistics, sociolinguistics, the study of poetic language, and the study of language change.

The programs offered by the Linguistics Department are designed to acquaint students with the central aspects of linguistic structure and the methodologies and perspectives of the field. The department offers two undergraduate majors, linguistics and language studies, and a graduate program in theoretical linguistics. The linguistics major leads to a bachelor of arts (B.A.) degree in linguistics; the language studies major leads to a B.A. degree in language studies (see Language Studies). The graduate program leads to the master of arts (M.A.) and doctor of philosophy (Ph.D.) degrees in linguistics.

The department also offers a combined B.A./M.A. pathway which makes it possible for certain well-qualified, highly motivated students to complete the requirements for both degrees in five years rather than the usual six.

Courses for Nonmajors

LING 50, Introduction to Linguistics, an introduction to the major areas, problems, and techniques of modern linguistics. (Gen Ed: SI)

LING 53, Semantics 1, introduction to the logical foundations of natural language semantics. A basic literacy course in the language of logical representation. (Gen Ed: MF)

LING 80C, Language, Society and Culture, the study of language from a sociological perspective. Multilingualism, language change and variation, pidgins and creoles, the origin and diversification of dialects. (Gen Ed: CC)

LING 80D, Language and Mind, a critical overview of the research program initiated by Noam Chomsky and its implications for theories of the human mind and brain. (Gen Ed: PE-H)

LING 80K, Invented Languages, explores invented languages, including Elvish and Klingon, as well as lesser-known ones that tackle ethical, social, or cognitive concerns. (Gen Ed: TA)

LING 80M, Language and Indigeneity in Mesoamerica, explores indigenous experiences in Mesoamerica, focusing on the role of language in the formation of indigenous identities, both historically and in contemporary society. (Gen Ed: ER)

LING 80V, Structure of the English Vocabulary, explores the historical origin and development of word elements, as well as their sound, meaning, and function in the contemporary language.

Undergraduate Program

LINGUISTICS B.A.

Information and Policies

Introduction

Linguistics is an exact and structured discipline that examines human language. It has connections to many other fields in the humanities (philosophy, literature), the social sciences (anthropology, psychology, sociology), the natural sciences (biology, neuroscience, acoustics), computer science, computer engineering, and artificial intelligence.

The central areas of linguistics investigate the knowledge that speakers of a language have about its structure. Syntax is concerned with the rules that combine words into larger units of phrases and sentences. Semantics is the study of the meanings of linguistic units and how they are combined to form the meanings of sentences. Phonetics deals with the physical properties of language sounds. Phonology investigates the sound systems of particular languages and across languages. Morphology investigates the ways in which words are formed from prefixes, roots, and suffixes. Pragmatics is the study of language use. Psycholinguistics is concerned with the cognitive mechanisms by which language is put to use in producing and perceiving speech.

Academic Advising for the Program

241 Stevenson College
(831) 459-4988
ling@ucsc.edu

Undergraduate Adviser

The undergraduate adviser can advise you about requirements for the major, about prerequisites, and about many other aspects of your academic progress. During the academic year, there are regular drop-in office hours available at current advising schedule.

If none of the drop-in office hours work for you, email the undergraduate adviser at ling@ucsc.edu for an appointment.

Transfer students, please also refer to **Transfer Information and Policy**.

Peer Advisers

During the academic year, the department has a peer advising program to provide an additional advising resource for undergraduate majors. The peer advisers are advanced students in the major who volunteer their time and expertise to provide guidance and advice to other students. They hold regular office hours and provide one-on-one advising in the

Linguistics Department office at Stevenson College (STEV 245). Peer advisers do not have signature authority on forms (i.e., Declaration of Major Petitions and study abroad planning forms). Students must see the undergraduate adviser for any forms requiring a department signature. We encourage any prospective and current linguistics majors to stop by during the peer advisers' office hours if they have questions about the linguistics program.

Faculty

You should feel free to meet with any faculty member for advising, but it may make sense to speak with the undergraduate adviser first, to find out which faculty member might be best placed to advise you about your interests or concerns. You can find the current office hours for all faculty members in the faculty directory. For issues specifically related to the undergraduate program, you can turn to the Undergraduate Program director.

Getting Started in the Major

Here are four tips to keep in mind when embarking on your major in linguistics:

- Meet with a peer adviser to create your academic plan and get questions answered about your major.
- Determine how many language courses you need in order to fulfill your language competency requirement, as specified in the **Requirements and Planners** section. Begin any necessary language instruction as soon as possible. Visit the Languages and Applied Linguistics Department to find out about language placement and course offerings. Many language placement exams take place once a year, before classes start in September. You may opt to satisfy the mathematics/computer science requirement instead.
- Take at least one introductory linguistics course in your first year, and plan to take at least syntax and phonology in your second year. (Junior transfers: take all of these courses in your first year.) If linguistics is not for you, you should find this out early, in order to consider a change in your plans.
- Plan to complete the bulk of your general education requirements early on. The sophomore, junior, and senior years can fill up quickly with major requirements (especially if you are planning to study abroad). Also, as general education courses are often lower-division courses, it can be frustrating to have to take them in the final quarters of your career, when you would like to take more advanced courses.

Program Learning Outcomes

The program learning outcomes for the linguistics major are the following: (1) capacity for rigorous analytical thinking (e.g., in forming and testing hypotheses), (2) ability to write clearly and articulately, (3) understanding of the general

properties of language, and (4) active command of linguistic theory and linguistic investigation.

Major Qualification Policy and Declaration Process

Major Qualification

The Linguistics Department has adopted a major qualification policy for linguistics majors that is intended to encourage students to take their performance in the gateway courses seriously and to help them lay a solid foundation for further course work in the major.

Transfer students, please also refer to **Transfer Information and Policy**.

In order to declare the linguistics major, a student must pass each of the following two gateway courses, with a grade of C+ or better:

LING 50	Introduction to Linguistics	5
LING 53	Semantics I	5

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal the decision within 15 days from the date the notification was mailed. They should do this by submitting a formal letter, addressed to the department's undergraduate program director, to the Linguistics Department office (Stevenson 241 or 243). This letter should explain any extenuating circumstances that influenced performance in the gateway courses. Within 15 days of receipt of the appeal, the department will notify the student, the student's college, and the Office of the Registrar of the decision.

How to Declare a Major

You should formally declare your major as early as possible in your academic career. Doing so will mean you get helpful advising. It will require you to plan out all the courses of the major. This means you will know you have time to meet all the necessary requirements for linguistics before you graduate.

Once you have successfully completed the two gateway courses, please meet with the department adviser or a peer adviser, to complete or update your academic plan. If you are declaring a second major, please first complete an academic planning form with the adviser for your declared major.

To declare the major, you must attend one of the department's Declaration and Orientation Meetings. These sessions are held in the first month of each quarter. Invitations to sign up for a declaration session are sent out by the first week of the quarter to all proposed majors through the Slug Success system. If you have completed the gateway courses, and you do not receive an invitation by Week 2, please contact the department advisor for assistance. Please sign up well in advance, as these meetings tend to fill quickly.

The campus undergraduate advising website has further helpful information about declaring a major.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

While not required for selection, transfer students are strongly encouraged to complete as much preparation as possible in the foreign language of their choosing. Transfer students admitted to UC Santa Cruz for the winter term who do not place into Level 2 or higher in a language placement test when they enter UCSC may not be able to complete the major in a timely manner. Bear in mind that placement exams, and the resulting credit for the major, are only available for languages taught at UCSC.

Transfer students who wish to graduate in two years should have completed general education requirements before entering UCSC.

Getting Started at UCSC as a Transfer Student

Consult with the undergraduate adviser before enrolling for your first term, to create a two-year plan. Some required courses are only offered once a year, and careful planning is essential. Plan to take LING 50 and LING 53 in your first quarter, along with a language course. If you expect to test out of level 5 in your chosen language, or plan to complete the **Mathematics/Computer Science competency requirement**, you need not enroll in a language course. Transfer students can declare the major after completing LING 50 and LING 53 with a C+ or better.

Letter Grade Policy

The two qualifying courses for the major, LING 50 and LING 53, must be completed with a grade of C+ or better. Once you qualify, there is no requirement that courses for the major be taken for a letter grade. There is a campuswide requirement that you need to be aware of and to keep track of (no more than 25 percent of all of your UCSC courses can be taken on a Pass/No Pass basis). Further information about campus letter grade policy is available at the website of the Office of the Registrar.

Course Substitution Policy

Students may petition the department to have elective courses offered through other institutions or other UC programs applied toward the major requirements. At most three such courses can be applied toward the major. These courses must be upper-division and clearly fit into a coherent program of study in linguistics. The list of approved courses from other UCSC departments is given below:

ANTH 139	Language and Culture	5
APLX 101	Second-Language Acquisition	5
APLX 102	Bilingualism	5
APLX 112	Language and Gender	5
APLX 113	Inter-Cultural Communication	5
APLX 115	Language and Power	5
APLX 116	Discourse Analysis: Language Use and Context	5

APLX 135	Second Language Teaching	5
CSE 103	Computational Models	5
CSE 110A	Fundamentals of Compiler Design I	5
CSE 140	Artificial Intelligence	5
CSE 143	Introduction to Natural Language Processing	5
FREN 114	French Phonetics	5
FREN 120	French Linguistics	5
FREN 121	History of the French Language	5
LIT 102	Translation Theory	5
PHIL 117	Non-Classical Logic	5
PHIL 119	Intermediate Logic	5
PHIL 123	Philosophy of Language	5
PSYC 119F	Language Development	5
PSYC 125	The Psychology of Language	5
SOCY 143	Conversation Analysis	5
SPAN 140	Sounds of Spanish	5
SPAN 150	Topics in Hispanic Linguistics: Introduction to Hispanic Linguistics	5
SPAN 151	Topics in Hispanic Linguistics: Varieties of Spanish	5
SPAN 153	Topics in Hispanic Linguistics: Spanish as a Second Language	5

Double Majors and Major/Minor Combinations Policy

A student may **not** double major or major/minor in linguistics and language studies, as there is too much overlap between the two programs.

Study Abroad

Students majoring in linguistics should consider studying abroad in the course of their degree program. Studying abroad is a good way to cultivate and enhance your language skills, as well as to gain rich life experiences. Linguistics students have various opportunities to study abroad, for a summer, quarter, semester, or year. There are programs available for students of all levels of language ability, from language and culture programs for beginning or intermediate speakers, to full immersion programs for students with advanced language skills.

Study abroad does require careful planning, especially for those who wish to pursue a year-long program, or who wish to study abroad during the senior year. Meeting with your major adviser early and often throughout the Study Abroad planning process is encouraged. Before being approved for UC Education Abroad Program (EAP), you must declare your major. Also, majors must complete LING 101, and either LING 111 or LING 112, before they leave for any EAP programs that take place during the academic year. The department does not place any restrictions on summer study abroad.

If you plan to study abroad during your senior year, and do not plan to return to UCSC before graduating, your plan will be approved only when all major requirements have been completed prior to departure, and/or when it is clear that any remaining requirements can be satisfactorily completed

abroad. Please consult with the department adviser before the end of your sophomore year if you are considering this option.

Most importantly: Students who wish to have a study-abroad course count toward the major must bring back syllabi, completed papers, and course evaluations to the department, so that the department can make a decision about whether the course satisfies a major requirement. Ideally, students should have courses pre-approved for the major before they go abroad. Students can visit the UCSC Campus Credit Abroad database to find pre-approved courses. A maximum of three outside courses may be used toward the major.

Students who are interested in studying abroad should contact the Study Abroad Office (105 Classroom Unit, 459-2858). Study Abroad staff can provide detailed information concerning EAP selection criteria and application procedures. <https://studyabroad.ucsc.edu/>

Honors

Students who wish to be considered for honors should meet the deadline posted by the Office of the Registrar for declaring the intent to graduate. Determination of honors is based on the student's grades for all courses relevant to the major and other factors relevant to an assessment of academic excellence, such as research papers of professional quality. Generally, honors in the major are awarded only to the top 10 percent of those graduating in the major. Only those students whose performance in coursework is excellent will qualify. Highest honors are rarely awarded, and then only to students whose performance in coursework is outstanding and who have completed an outstanding senior thesis.

Preparation for the UCSC Master's Degree

Every year, UC Santa Cruz undergraduates in the final year of their linguistics major can apply to be admitted into the graduate program to pursue the M.A. in theoretical linguistics. Interested students should discuss the possibility with one or more faculty members and formally apply online to the graduate program during the fall quarter of the senior year. For up-to-date information about the application process, consult the Linguistics Department's website; and see the graduate coordinator. The combined B.A./M.A. program provides another pathway to the M.A. program.

Information About Linguistics Courses

The 80-level courses have no prerequisites, although most will fulfill a general education requirement. They do not fulfill any requirements for the major. They are intended to introduce the concepts of linguistics through their relation to other areas of general interest.

LING 50, Introduction to Linguistics, introduces the subfields of the discipline. LING 53, Semantics I; LING 101, Phonology 1; and LING 111, Syntactic Structures or LING 112, Syntax 1, serve as entry courses to the specialized upper-division sequences. Upper-division courses generally have at least two of these courses as a prerequisite.

A variety of upper-division elective courses are offered each quarter. For a list of the current offerings, please see the department website.

To enroll in the graduate (200-level) courses, undergraduates need special permission from the instructor. Permission is usually granted only to especially motivated undergraduates who have completed all the named requirements for the major with excellent performance.

Requirements and Planners

Course Requirements

Lower-Division Courses

LING 50	Introduction to Linguistics	5
LING 53	Semantics I	5

Foreign-Language/Mathematics Competency Requirement:

Linguistics majors are required to demonstrate either foreign-language or mathematics competency as follows:

Students must successfully complete five quarters of language study at UC Santa Cruz or demonstrate an equivalent level of competence through a recognized language test or evidence of credit from another institution. In cases where five quarters of instruction for a language are not offered at UCSC, students may opt to complete (or demonstrate equivalent level of competence for) three quarters of one language and three quarters of a second language. For Latin or Greek, three of the designated courses will be equivalent to all five levels.

Or

Alternatively, students with a strong formal background can choose to satisfy the mathematics/computer science competency requirement by demonstrating sufficient preparation in mathematics for advanced formal work in linguistics. This requirement is satisfied by passing **two** courses chosen from the following list:

CSE 5J	Introduction to Programming in Java	5
CSE 10	Introduction to Computer Science	5
CSE 11	Intermediate Programming	5
CSE 14	Introduction to Programming (Accelerated)	5
CSE 15	Introduction to Data Structures	5
CSE 16	Applied Discrete Mathematics	5
CSE 20	Beginning Programming in Python	5
CSE 140	Artificial Intelligence	5
MATH 100	Introduction to Proof and Problem Solving	5
MATH 160	Mathematical Logic I	5
MATH 161	Mathematical Logic II	5
PHIL 9	Introduction to Logic	5
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5

STAT 131	Introduction to Probability Theory	5
----------	------------------------------------	---

Any course which has one of the courses listed above as a prerequisite may also be used toward the mathematics/computer science competency requirement.

Upper-Division Courses

Students in the linguistics major are required to complete a total of 10 upper-division courses in linguistics and related disciplines, including five named courses in linguistics:

LING 101	Phonology I	5
LING 102	Phonology II	5
LING 113	Syntax II	5
LING 116	Semantics II	5

Plus one of the following courses:

LING 111	Syntactic Structures	5
LING 112	Syntax I	5

Electives

The major requires five upper-division elective courses in linguistics. Upper-division linguistics electives include any upper-division course offered by the Linguistics Department (except courses LING 101, LING 102, LING 111, LING 112, LING 113, and LING 116). See **Course Substitution Policy** in the Information and Policies section of the catalog for information on substituting courses outside the department to meet this requirement.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in linguistics is satisfied by completing:

LING 101	Phonology I	5
----------	-------------	---

Plus one of the following courses:

LING 111	Syntactic Structures	5
LING 112	Syntax I	5

Comprehensive Requirement

Senior exit requirement: In their senior year, linguistics majors must satisfy the senior exit requirement in one of two ways:

Option 1. Successful completion of a capstone course—an appropriate upper-division linguistics course. In order to satisfy the senior exit requirement, students must have senior standing and must have completed LING 53, Semantics I; LING 101, Phonology I; **and** either LING 111, Syntactic Structures; or LING 112, Syntax I. Under these conditions, any upper-division linguistics elective course will satisfy the senior exit requirement. Upper-division linguistics electives include any upper-division course offered by the Linguistics Department (except courses LING 101, LING 102, LING 111, LING 112, LING 113, and LING 116). This course can be one of the five linguistics electives required for the major.

Option 2. Senior thesis supervised by a faculty member. The proposal for a senior thesis must be submitted for approval by

the department faculty at least three quarters prior to the quarter of graduation.

Students enroll in the following course:
 LING 195 Senior Thesis 5

Planners

The following planner is a recommended academic plan for **four-year students** who wish to pursue the linguistics major.

Four-Year Linguistics Students

Year	Fall	Winter	Spring
2nd (soph)	LING 50	LING 53	LING 101
3rd (junior)	LING 112 or LING 111	LING 116	LING 113
	Foreign language level 1	LING 1XX upper-div elective	LING 1XX upper-div elective
		Foreign language level 2	Foreign language level 3
4th (senior)	LING 102	LING 1XX upper div elective	
	LING 1XX upper-div elective	LING 1XX upper-div elective	
	Foreign language level 4	Foreign language level 5	

In addition to the specific courses shown in these planners, a student must complete courses satisfying the general education requirements.

The following planner is a recommended academic plan for **junior transfer students** who wish to pursue the linguistics major.

Linguistics Transfer Students

Year	Fall	Winter	Spring
3rd (junior)	LING 50	LING 112 or LING 111	LING 101
	LING 53	"Outside" 1XX* Upper-div elective	LING 113
	Foreign language	Foreign language	Foreign language

	level 1	level 2	level 3
4th (senior)	LING 102	LING 116	LING 1XX upper-div elective
	LING 1XX upper-div elective	LING 1XX upper-div elective	LING 1XX upper-div elective
	Foreign language level 4	Foreign language level 5	

* "Outside" 1XX—in lieu of a standard linguistics elective, an approved substitution elective may be selected in order to graduate within two academic years.

This planner assumes that a student has completed any required general education courses—including UCSC or community college general education requirements—before coming to UCSC.

Additional planning templates are available on the department website.

LINGUISTICS MINOR

Course Requirements

Lower-Division Courses

LING 50	Introduction to Linguistics	5
LING 53	Semantics I	5

Upper-Division Courses

LING 101	Phonology I	5
----------	-------------	---

Plus one of the following upper-division courses:

LING 111	Syntactic Structures	5
LING 112	Syntax I	5

And four upper-division elective courses in linguistics

Upper-division linguistics electives include any upper-division course offered by the Linguistics Department (except courses LING 101, LING 111 and LING 112). There is no foreign language/mathematics competency requirement for the minor.

Course Substitution Policy

Students may petition the department to have elective courses offered through other institutions or other University of California programs applied toward the minor requirements. At most two such courses can be applied toward the minor. These courses must be upper-division and clearly fit into a coherent program of study in linguistics. A list of approved outside courses from other UCSC departments is available on the department website. The list may also be found in the Course Substitution Policy (p. 147) section of the Linguistics B.A. program statement.

LANGUAGE STUDIES B.A.

Information and Policies

Introduction

Language studies is an interdisciplinary major offered by the Linguistics Department. It is designed to equip students with advanced competence in a foreign language and, at the same time, provide them with an understanding of the general nature of human language—its structure and use. The major also provides an opportunity to explore the culture or cultures connected with the language of concentration. The context electives may include courses in art, history, literature or politics. Currently, majors may choose a concentration in Chinese, French, German, Italian, Japanese, or Spanish. Interested students should contact the Linguistics Department office early in their college career to obtain essential information about requirements. The requirements for the major may also be found in the Requirements and Planners (p. 154) section.

Students interested in spending a portion of a year or a full year studying abroad should review the UCSC Study Abroad website. A senior year abroad is approved only when all of the language proficiency requirements have been satisfied and when it is clear that any remaining courses can be satisfactorily completed abroad. Courses taken abroad may be used to satisfy major requirements only if approved by the undergraduate program director or a designated adviser. A maximum of three outside courses may be used toward the major.

Academic Advising for the Program

241 Stevenson College
(831) 459-4988
ling@ucsc.edu

Undergraduate Adviser

The undergraduate adviser can advise you about requirements for the major, about prerequisites, and about many other aspects of your academic progress. During the academic year, there are regular drop-in office hours available at current advising schedule.

If none of the drop-in office hours work for you, email the undergraduate adviser at ling@ucsc.edu for an appointment.

Transfer students, please also refer to Transfer Information and Policy.

Peer Advisers

During the academic year, the department has a peer advising program to provide an additional advising resource for undergraduate majors. The peer advisers are advanced students in linguistics or language studies who volunteer their time and expertise to provide guidance and advice to other students. They hold regular office hours and provide one-on-one advising in the Linguistics Department office at

Stevenson College (245 Stevenson). Peer advisers do not have signature authority on forms (i.e., Declaration of Major Petitions and study abroad planning forms). Students must see the undergraduate adviser for any forms requiring a department signature. We encourage any prospective and current language studies majors to stop by during the peer advisers' office hours if they have questions about the program.

Faculty

You should feel free to meet with any faculty member for advising, but it may make sense to speak with the undergraduate adviser first, to find out which faculty member might be best placed to advise you about your interests or concerns. You can find the current office hours for all faculty members in the faculty directory. For issues specifically related to the undergraduate program, you can turn to the Undergraduate Program director.

Getting Started in the Major

Here are a few tips to keep in mind when embarking on your major in language studies:

- Meet with a peer adviser to create your academic plan and get questions answered about your major.
- Determine how many language courses you need and begin any necessary language instruction as soon as possible. Visit the Languages and Applied Linguistics Department to find out about language placement and course offerings. Many language placement exams take place once a year, before classes start in September.
- Prospective students should declare the major as early as possible so that they can complete the language, linguistics, and context requirements within the allowed period of enrollment. Major requirements are specified in the Requirements and Planners section.
- Students who wish to include a study abroad experience in their course of study will have to coordinate their choice of time abroad with the scheduling of UC Santa Cruz courses. Transfer students who have not made significant progress with the language requirements before entering UCSC may find it difficult to include a time abroad before completion of graduation requirements.
- Plan to complete the bulk of your general education requirements early on. The sophomore, junior, and senior years can fill up quickly with major requirements (especially if you are planning to study abroad). Also, as general education courses are often lower-division courses, it can be frustrating to have to take them in the final quarters of your career, when you would like to take more advanced courses.

Program Learning Outcomes

The program learning outcomes for this major are the following: (1) ability to write clearly and articulately; (2)

understanding of the general properties of language; (3) exposure to linguistic theory and linguistic investigation; and (4) proficiency in a language other than English.

Major Qualification Policy and Declaration Process

Major Qualification

The Linguistics Department has adopted a major qualification policy for language studies majors that is intended to encourage students to take their performance in the gateway courses seriously and to help them lay a solid foundation for further coursework in the major.

Transfer students, please also refer to Transfer Information and Policy. (p. 152)

In order to declare the language studies major, a student must pass each of the following two gateway courses with a grade of C+ or better:

LING 50	Introduction to Linguistics	5
LING 53	Semantics I	5

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal the decision within 15 days from the date the notification was mailed. They should do this by submitting a formal letter, addressed to the department's undergraduate program director, to the Linguistics Department office (Stevenson 241 or 243). This letter should explain any extenuating circumstances that influenced performance in the gateway courses. Within 15 days of receipt of the appeal, the department will notify the student, the student's college, and the Office of the Registrar of the decision.

How to Declare a Major

You should formally declare your major as early as possible in your academic career. Doing so will mean you get helpful advising. It will require you to plan out all the courses of the major. This means you will know you have time to meet all the necessary requirements for language studies before you graduate.

Once you have successfully completed the two gateway courses, please meet with the department adviser or a peer adviser, to complete or update your academic plan. If you are declaring a second major, please first complete an academic planning form with the adviser for your declared major.

To declare the major, you must attend one of the department's Declaration and Orientation Meetings. These sessions are held in the first month of each quarter. Invitations to sign up for a declaration session are sent out by the first week of the quarter to all proposed majors through the Slug Success system. If you have completed the gateway courses, and you do not receive an invitation by Week 2, please contact the department adviser for assistance. Please sign up well in advance, as these meetings tend to fill quickly.

The campus undergraduate advising website has further helpful information about declaring a major.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

While not required for selection, transfer students are strongly encouraged to complete as much preparation as possible in the foreign language of their choosing, and to complete general education requirements. Students pursuing the concentration in Japanese or Chinese should place into Level 4 (Level 5 for students entering in the winter term) or higher when they enter UCSC, if they wish to complete the major in two years. Students in other languages may be able to complete the major in two years if they have completed general education requirements. Transfer students admitted to UC Santa Cruz for the winter term who do not place into Level 2 or higher in a language placement test when they enter UCSC may not be able to complete the major in a timely manner.

Getting Started at UCSC as a Transfer Student

Consult with the undergraduate adviser before enrolling for your first term, to create a two-year plan. Some required courses are only offered once a year, and careful planning is essential. Plan to take LING 50 and LING 53 in your first quarter, along with a language course. Visit the Languages and Applied Linguistics Department to find out about language placement and course offerings. Many language placement exams take place once a year, before classes start in September. Transfer students can declare the major after completing LING 50 and LING 53 with a C+ or better.

Letter Grade Policy

The two qualifying courses for the major, LING 50 and LING 53, must be completed with a grade of C+ or better. Once you qualify, there is no requirement that courses for the major be taken for a letter grade. There is a campuswide requirement that you need to be aware of and to keep track of (no more than 25 percent of all of your UC Santa Cruz courses can be taken on a Pass/No Pass basis). Further information about campus letter grade policy is available at the website of the Office of the Registrar.

Course Substitution Policy

Students may petition the department to have elective courses offered through other institutions or other UC programs applied toward the major requirements. At most three such courses can be applied toward the major. These courses must be upper-division and clearly fit into a coherent program of study. Because language studies majors routinely take classes from other UCSC departments to fulfill their context requirements, these are not considered course substitutions. However, students may substitute an outside class for one of the two required upper-division linguistics electives. A list of these approved outside courses from other UCSC departments is available below.

Outside Courses

ANTH 139	Language and Culture	5
APLX 101	Second-Language Acquisition	5
APLX 102	Bilingualism	5
APLX 112	Language and Gender	5
APLX 113	Inter-Cultural Communication	5
APLX 115	Language and Power	5
APLX 116	Discourse Analysis: Language Use and Context	5
APLX 135	Second Language Teaching	5
CSE 103	Computational Models	5
CSE 110A	Fundamentals of Compiler Design I	5
CSE 140	Artificial Intelligence	5
CSE 143	Introduction to Natural Language Processing	5
CSE 245	Computational Models of Discourse and Dialogue	5
FREN 114	French Phonetics	5
FREN 120	French Linguistics	5
FREN 121	History of the French Language	5
LIT 102	Translation Theory	5
PHIL 117	Non-Classical Logic	5
PHIL 119	Intermediate Logic	5
PHIL 123	Philosophy of Language	5
SOCY 143	Conversation Analysis	5
SPAN 140	Sounds of Spanish	5
SPAN 150	Topics in Hispanic Linguistics: Introduction to Hispanic Linguistics	5
SPAN 151	Topics in Hispanic Linguistics: Varieties of Spanish	5
SPAN 152	Topics in Hispanic Linguistics: Spanish in the U.S.	5
SPAN 153	Topics in Hispanic Linguistics: Spanish as a Second Language	5

Double Majors and Major/Minor Combinations Policy

A student may **not** double major or major/minor in linguistics and language studies, as there is too much overlap between the two programs.

Study Abroad

Students majoring in language studies often spend at least one quarter studying abroad in the course of their degree program. Studying abroad is a good way to cultivate and enhance your language skills, as well as to gain rich life experiences. There are programs available for students of all levels of language ability, from language and culture programs for beginning or intermediate speakers, to full immersion programs for students with advanced language skills.

Study abroad does require careful planning, especially for those who wish to pursue a yearlong program, or who wish to study abroad during the senior year. Meeting with your major adviser early and often throughout the Study Abroad planning process will help to mitigate lengthening time to degree. Before being approved for UC Education Abroad Program

(EAP), you must declare your major. Also, majors must complete Linguistics 101, and either 111 or 112, before they leave for any EAP programs during the academic year. The department does not place any restrictions on summer study abroad.

If you plan to study abroad during your senior year, and do not plan to return to UC Santa Cruz before graduating, your plan will be approved only when all major requirements have been completed prior to departure, and/or when it is clear that any remaining requirements can be satisfactorily completed abroad. Please consult with the department adviser before the end of your sophomore year if you are considering this option.

Language studies majors can satisfy certain major requirements in the course of study abroad; for instance, some of the context elective course requirements. No more than three elective course requirements can be satisfied abroad. Students can also make progress in the language component of the language studies major while studying abroad; in order to determine the level of proficiency achieved, they must take a placement exam upon return. Whether a given course requirement in linguistics can be satisfied abroad depends on the course and the study site.

Most importantly: Students who wish to have a study-abroad course count toward the major must bring back syllabi, completed papers, and course evaluations to the department, so that the department can make a decision about whether the course satisfies a major requirement. Ideally, students should have courses pre-approved for the major before they go abroad. Students can visit the UCSC Campus Credit Abroad database to find pre-approved courses. Remember that a maximum of three outside courses may be used toward the major.

Students who are interested in studying abroad should contact the Study Abroad Office (105 Classroom Unit, 459-2858). Study Abroad staff can provide detailed information concerning EAP selection criteria and application procedures.

Honors

Students who wish to be considered for honors should meet the deadline posted by the Office of the Registrar for declaring the intent to graduate. Determination of honors is based on the student's grades for all courses relevant to the major and other factors relevant to an assessment of academic excellence, such as research papers of professional quality. Generally, honors in the major are awarded only to the top 10 percent of those graduating in the major. Only those students whose performance in coursework is excellent will qualify. Highest honors are rarely awarded, and then only to students whose performance in coursework is outstanding and who have completed an outstanding senior thesis.

Preparation for the UCSC Master's Degree

Every year, UC Santa Cruz undergraduates in the final year of their language studies major can apply to be admitted into the graduate program to pursue the M.A. in theoretical linguistics. Interested students should discuss the possibility with one or more faculty members and formally apply online to the

graduate program during the fall quarter of the senior year. For up-to-date information about the application process, consult the Linguistics Department's website; and see the graduate coordinator. The combined B.A./M.A. program provides another pathway to the M.A. program.

Information About Linguistics Courses

The 80-level courses have no prerequisites, although most will fulfill a general education requirement. They do not fulfill any requirements for the major. They are intended to introduce the concepts of linguistics through their relation to other areas of general interest.

LING 50, Introduction to Linguistics, introduces the subfields of the discipline. LING 53, Semantics I; LING 101, Phonology I; and LING 111, Syntactic Structures or LING 112, Syntax I, serve as entry courses to the specialized upper-division sequences. Upper-division courses generally have at least two of these courses as a prerequisite.

A variety of upper-division elective courses are offered each quarter. For a list of the current offerings, please see the department website.

To enroll in the graduate (200-level) courses, undergraduates need special permission from the instructor. Permission is usually granted only to especially motivated undergraduates who have completed all the named requirements for the major with excellent performance.

Requirements and Planners

Course Requirements

Language studies majors must satisfy course requirements in languages and linguistics, and complete elective coursework in linguistics and/or the cultural context of the language of concentration.

Lower-Division

Lower-Division Language Requirements

Language studies majors must achieve a level equivalent to six quarters in the language of concentration.

Lower-Division Linguistics Requirements

LING 50	Introduction to Linguistics	5
LING 53	Semantics I	5

Upper-Division

Upper-Division Language Requirements

One advanced language course after level 6 is required for students concentrating in French, German, Italian, or Spanish. Majors in Chinese and Japanese must take two advanced language courses after level 6, the second of which (and any subsequent) counts toward the cultural context course requirement.

Upper-Division Linguistics Requirements

LING 101	Phonology I	5
----------	-------------	---

One of the following upper-division courses:

LING 111	Syntactic Structures	5
LING 112	Syntax I	5

Plus two additional upper-division linguistics courses:

Upper-division linguistics electives for the language studies major include any upper-division course offered by the Linguistics Department (except courses LING 101, LING 111 and LING 112). See Course Substitution Policy in the Information and Policies section for information on substituting courses outside the department to meet this requirement. Only one such substitution may be made.

Electives

The major also requires five upper-division elective courses in linguistics or the cultural context of the language of concentration. Linguistics elective courses include any upper-division course offered by the Linguistics Department (except LING 101, LING 111, and LING 112). Cultural context courses are to be selected from among those approved by the department, and include disciplines such as literature, history, and politics. A list of approved cultural context courses (p. 159) is available, and a list of those available within the current or upcoming quarters is also available on the Linguistics Department's Language Studies Major Requirements website.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in language studies is satisfied by completing:

LING 101	Phonology I	5
----------	-------------	---

Plus one of the following courses:

LING 111	Syntactic Structures	5
LING 112	Syntax I	5

Comprehensive Requirement

Senior exit requirement. In their senior year, language studies majors must satisfy the senior exit requirement in one of two ways:

Option 1. Successful completion of a capstone course. In order to satisfy the senior exit requirement, students must have senior standing and must have completed LING 53, Semantics I; LING 101, Phonology I; **and** either LING 111, Syntactic Structures; or LING 112, Syntax I. Under these conditions, any upper-division linguistics elective course will satisfy the senior exit requirement; upper-division linguistics electives include any upper-division course offered by the Linguistics Department (except LING 101, LING 102, LING 111, LING 112, LING 113, and LING 116) This course can be one of the two linguistics electives required for the major.

Option 2. Senior thesis supervised by a faculty member. The proposal for a senior thesis must be submitted for the approval of the department faculty at least three quarters prior to the quarter of graduation. Students enroll in LING 195, Senior Thesis, with the approval of the faculty adviser. The senior

thesis is an original investigation of the major language in some relevant way, such as the linguistic structure or history of the language or its historical, literary, cultural, sociological, ethnographic, or political context.

Planners

The following is a recommended academic plan for four-year students who wish to pursue the language studies major.

Four-Year Linguistics Students

Year	Fall	Winter	Spring
2nd (soph)	<u>LING 50</u>	<u>LING 53</u>	<u>LING 101</u>
	<u>LING 112</u> or <u>LING 111</u>	<u>LING 116</u>	<u>LING 113</u>
3rd (junior)	Foreign language level 1	LING 1XX upper-div elective Foreign language level 2	LING 1XX upper-div elective Foreign language level 3
	<u>LING 102</u>	LING 1XX upper div elective	
4th (senior)	LING 1XX upper-div elective	LING 1XX upper-div elective	
	Foreign language level 4	Foreign language level 5	

In addition to the specific courses shown in these planners, a student must complete courses satisfying the general education requirements.

The following planner is a recommended academic plan for **junior transfer students** who wish to pursue the linguistics major.

Linguistics Transfer Students

Year	Fall	Winter	Spring
3rd (junior)	<u>LING 50</u>	<u>LING 112</u> or <u>LING 111</u>	<u>LING 101</u>
	<u>LING 53</u>	"Outside" 1XX* Upper-div elective	<u>LING 113</u>
4th (senior)	Foreign language level 1	Foreign language level 2	Foreign language level 3
	<u>LING 102</u>	<u>LING 116</u>	LING 1XX upper-div elective

LING 1XX upper-div elective	LING 1XX upper-div elective	LING 1XX upper-div elective
Foreign language level 4	Foreign language level 5	

Note: this major planner presumes that the student enters UC Santa Cruz having already completed three quarters of foreign language or having equivalent proficiency. The second upper-division foreign language course is required only for students with a concentration in Chinese or Japanese. This planner also assumes that a student has completed any required GE courses — including UCSC or community college GE requirements— before coming to UCSC.

Additional planning templates are available on the department website.

LANGUAGE STUDIES MINOR

Course Requirements

Lower-Division Courses

The minor requires completion of six quarters of language study, or demonstration of an equivalent level of ability, and the following:

LING 50	Introduction to Linguistics	5
---------	-----------------------------	---

Upper-Division Courses

The upper-division requirements for the minor are comprised of two required linguistics courses, one advanced language course, and two electives, as follows:

Two linguistics courses:

LING 101	Phonology I	5
----------	-------------	---

Plus one of the following courses:

LING 111	Syntactic Structures	5
LING 112	Syntax I	5

One advanced language course after level 6.

Two upper-division electives in linguistics or in the cultural context of the language of concentration.

Linguistics elective courses include any upper-division course offered by the Linguistics Department (except LING 101, LING 111, and LING 112). Cultural context courses are to be selected from among those approved by the department, and include disciplines such as literature, history, and politics, subject to departmental approval. These cultural context courses are related to the language of concentration.

A master list of approved cultural context courses (p. 159) and a list of those available within the current or upcoming quarter are available via these links, as well as links on the Linguistics Department's Language Studies Major Requirements webpage.

Course Substitution Policy

Students may petition the department to have elective courses offered through other institutions or other UC programs applied toward the minor requirements. At most two such courses can be applied toward the minor. These courses must be upper-division and clearly fit into a coherent program of study. Because language studies minors routinely take classes from other UCSC departments to fulfill their context requirements, these are not considered course substitutions. However, students may substitute an outside class for an upper-division linguistics elective. A list of these approved outside courses from other UCSC departments is available on the department website. The list may also be found in the Course Substitution Policy (p. 147) section of the Linguistics B.A. program statement.

Contiguous Bachelor's/Master's Pathway

The B.A./M.A. pathway in linguistics is a demanding, selective option that allows students who are well prepared and well motivated to complete the requirements for both degrees in five years rather than the usual six.

Admission to the pathway has two stages. In the first stage, interested students first consult with the undergraduate program director and one or more faculty members, and then apply to be admitted to the pathway by the sixth week of the first quarter of their junior year. Transfer students should consult with the undergraduate program director if they are contemplating this pathway. In order to be accepted at this first stage, students must have demonstrated excellence in at least three courses that are named requirements for the linguistics major.

Students accepted at this initial stage are assigned a faculty mentor who monitors their progress closely.

At the second stage of the admission procedure, students apply in their senior year to be admitted to the M.A. program through UCSC's normal graduate admissions process. If accepted, ideally they complete all course requirements and complete and defend the M.A. thesis by the end of the fifth year.

Students in the B.A./M.A. pathway take a number of graduate courses in their senior year which are selected in close consultation with the faculty mentor. Performance in these courses forms a central part of the ongoing evaluation process. If a student's performance does not meet the standards set for the pathway, the student completes the B.A. at the end of the senior year and does not proceed to the M.A.

Graduate courses required for the M.A. are taken partly in the senior year and partly in the fifth year. The M.A. thesis is written in the fifth year. Thus, by the end of the fifth year, students in the pathway will have fulfilled the requirements for both the B.A. and the M.A. degrees. Students who need additional time may remain in the pathway until the M.A. thesis is completed and defended. Students admitted into the B.A./M.A. pathway must complete a minimum of 35 credits

as an M.A. student, regardless of the number of graduate courses completed as an undergraduate.

Graduate Program

LINGUISTICS M.A.

Introduction

For information on applying and admissions, please consult the Linguistics Department website.

Introduction

The M.A. degree involves a two-year course of study. It may be completed in one year by students who have a B.A. in linguistics from UC Santa Cruz and who have taken a number of the core graduate courses during their undergraduate career; [the combined B.A./M.A. program](#) provides another pathway to the M.A. program.

Every year, UC Santa Cruz undergraduates in the final year of their linguistics or language studies major can apply to be admitted into the graduate program to pursue the M.A. in theoretical linguistics. Interested students should discuss the possibility with one or more faculty members and formally apply online to the graduate program during the fall quarter of the senior year. For up-to-date information about the application process, consult the [Linguistics Department's website](#); and see the [graduate coordinator](#).

For up-to-date information about the application process, consult the [Linguistics Department's website](#); and see the [graduate coordinator](#).

Requirements

Course Requirements

The following courses must be taken by all students.

LING 211	Phonology A	5
LING 221	Syntax A	5
LING 231	Semantics A	5

All students are required to take two additional core courses drawn from the following list:

LING 212	Phonology B	5
LING 222	Syntax B	5
LING 232	Semantics B	5

Students must take the third core course from the above list of 'B' courses, or one course from the following list:

LING 214	Phonetics	5
LING 257	Psycholinguistics and Linguistic Theory	5
LING 280	Proseminar in Experimental Linguistics	5
LING 282	Field Methods	5

Electives

Additionally students must take **three electives** that form a coherent plan of study, as determined by the student's adviser in consultation with the student. These electives are typically drawn from graduate courses offered by Linguistics and other related disciplines and independent study courses with Linguistics faculty.

Other Requirements

Foreign Language Requirements

Reading competence in one foreign language, to be demonstrated by examination at the end of your first year.

Course Unit Requirement

The nine required courses must be taken as 5-credit courses. For any of the courses above, satisfactory completion (grade of P or A- or higher) prior to entry to the M.A. program will count toward course requirements for the M.A. degree. Pursuant to UC Santa Cruz Graduate Division policy, students must complete a minimum of 35 credits within the Linguistics Department graduate curriculum as an M.A. student.

Master's Thesis

Students in the master's program complete a master's thesis in linguistics. This thesis often grows out of a promising term paper written by the student, and is read by a committee composed of three faculty members in linguistics. Preparation for research projects should begin far in advance. In general, a good goal for those working on their M.A. thesis is to approach a possible thesis chair by the end of their first academic year.

Applying for Graduation

See the Graduate Student Handbook for administrative requirements.

See the Academic and Administrative Calendar for Announcement of Candidacy dates.

Note: The completed master's thesis, and cover sheet, should be submitted to the Graduate Division and a pdf copy of the thesis, and cover sheet, should be submitted to the graduate coordinator.

LINGUISTICS PH.D.

Introduction

The graduate program in linguistics at UCSC is a small, focused program in linguistic theory leading to Doctor of

Philosophy (Ph.D.) or Master of Arts (M.A.) degrees. The research interests of faculty and students draw mostly on the framework of generative grammar, with a primary focus on theoretical and experimental approaches to morphology, phonetics, phonology, pragmatics, psycholinguistics, semantics, and syntax. Research strengths also include the study of various languages, computational methods, and field methods.

While committed to training in theoretical depth, the program makes possible an unusual breadth of theoretical and experimental understanding. Research in syntax focuses on ways in which generative theory and language-particular analysis inform one another. Faculty expertise covers principles and parameters theory, minimalism, and experimental syntax. Research in phonetics and phonology is pursued in various current frameworks, including optimality theory and dispersion theory. The issues covered range from phonetics and the phonetics-phonology interface to prosodic theory, prosodic morphology, and the syntax-phonology interface. Research in semantics applies formal, model-theoretic techniques to illuminate the interface between syntactic structure and interpretation and the role of semantic competence in the pragmatics of utterance interpretation. Experimental research in these areas reaches out to a broad range of issues in psycholinguistics and cognitive science.

The faculty have expertise in a diverse range of languages, including Chamorro, German, Hebrew, Hindi, Hungarian, Irish, Japanese, Kaqchikel Mayan, Uspanteko Mayan, Latin, Northern Paiute, Persian, Polish, Romanian, Russian, Spanish, Turkish, and Zapotec.

From the beginning of their studies, students are engaged in original research and critical evaluation, since the program aims to provide sophisticated training as a foundation for a career in academic research and teaching. The program begins with a sequence of foundation courses in phonetics, phonology, syntax, semantics, and psycholinguistics, addressing both formal and experimental approaches. Subsequent coursework emphasizes depth; it is increasingly centered around the doctoral student's independent research, culminating in the completion of a dissertation.

For information on applying and admissions, please consult the Linguistics Department website.

Undergraduate Preparation

Applications are invited from students who have completed an undergraduate linguistics major or who have demonstrated excellence in some related discipline (psychology, mathematics, computer science, anthropology) and have the equivalent of a minor in linguistics. A student applying for admission to this program should, at a minimum, have a good foundation in at least one of the following: phonetics, phonology, psycholinguistics, morphology, semantics, or syntax. Students entering the program with a deficiency in

one or more areas may need to take appropriate undergraduate courses at UCSC during the first year of graduate study.

To apply, please consult the Linguistics Department website.

Advancement to Candidacy

Course Requirements

A minimum of 65 credits of graduate-level work.

All students are required to take the following eight core courses:

LING 211	Phonology A	5
LING 212	Phonology B	5
LING 214	Phonetics	5
LING 221	Syntax A	5
LING 222	Syntax B	5
LING 231	Semantics A	5
LING 232	Semantics B	5
LING 257	Psycholinguistics and Linguistic Theory	5

Plus one of the following courses:

LING 280	Proseminar in Experimental Linguistics	5
LING 282	Field Methods	5

Each student must also take four seminars.

One of these must be LING 290 (Research Seminar) and the remaining three seminars or proseminars must form a coherent program of study, as determined by the student's adviser in consultation with the student.

The 13 required courses must be taken as 5-credit courses.

Foreign Language Requirements

Reading competence in one foreign language, to be demonstrated by examination at the end of the first year of study.

Teaching Requirement

Pre-Qualifying Requirements

Two qualifying papers (QP), each in a distinct area, must be separately and orally defended by the end of the third year as part of the requirements for advancement to candidacy.

Qualifying Examination

After a student successfully defends the two qualifying papers, they proceed to prepare for the qualifying exam (QE) in order to advance to candidacy. The function of the qualifying exam is to determine whether the student has achieved sufficient competence in a chosen subfield to be able to proceed to dissertation research. The QE is based on a substantial research paper written by the student and presented to the committee at least two weeks in advance of the exam. The topic of this paper is decided by the QE chair in consultation with the student. In most cases, it will be a revised version of one of the QPs that the student has successfully defended. Whether or not the paper originated as

a QP, it must be in the subfield in which the student plans to pursue dissertation research.

Post-Qualifying Requirements

Dissertation Prospectus

The dissertation prospectus lays out the direction of research that the student plans to pursue in the dissertation. It relates the student's planned research to previous relevant research and to the larger questions with which the field is engaged. This milestone can be satisfied by the QE paper at the discretion of the faculty adviser.

Dissertation

Dissertation

The final requirement for the Ph.D. degree is the completion of a dissertation representing a significant contribution in some central area of linguistic research.

Dissertation Defense

Once a student has completed the dissertation, they defend it at a public dissertation defense that is generally attended by graduate students and faculty in linguistics. The candidate first presents the results of the dissertation and then responds to questions, first from committee members, and then, time permitting, from the audience. Afterwards, the committee confers privately and decides either to accept the dissertation, reject it, or accept it provisionally, pending specific revisions. Following the defense, the candidate will revise the dissertation according to the committee's recommendations and then submit the final copy to the Graduate Division and graduate coordinator. See the Graduate Handbook for administrative requirements.

A copy of the completed dissertation, formatted according to UC Santa Cruz specifications, should be electronically submitted to the Graduate Division office (see Dissertation and Thesis Submission Guidelines) and an original, signed cover sheet should be submitted to the Graduate Division office as well. In addition, a pdf copy of the dissertation and physical copy of the cover sheet should be submitted to the graduate coordinator.

Academic Progress

The Linguistics Department faculty meet at the end of spring quarter each year to ensure that all graduate students are making timely progress in the program. Students may receive letters from the faculty based on this discussion.

To remain in good academic standing, a student must make timely progress toward degree completion and satisfactorily meet the following standards of scholarship established by the Graduate Council. Please see the Graduate Division handbook for details about 'Academic Good Standing' and 'Time to Degree.'

Applying for Graduation

See the Graduate Handbook for administrative requirements.

See the Academic and Administrative Calendar for Announcement of Candidacy dates.

NOTE: The completed dissertation, and cover sheet, should be submitted to the Graduate Division and a pdf copy of the dissertation, and cover sheet, should be submitted to the graduate coordinator.

The study of literature at UCSC is organized as an interdisciplinary field coordinated through a single Department of Literature, rather than through separate departments of English, modern languages, and classics. This structure fosters innovative and comparative approaches to literature among both faculty and students. Courses in the major encompass traditional literary history and

interpretation, cross-cultural inquiry and current theoretical debates, and new media.

The Literature Department also sponsors the Italian Studies major.

Undergraduate Program

Literature majors at UCSC are trained in critical reading, writing, and thinking, as well as in literary interpretation. These skills have wide applicability, and offer avenues into related disciplines such as history, philosophy, psychology, sociology, anthropology, politics, and the history of art and visual culture. Literature majors enter a wide variety of careers ranging from law and journalism to management, government, international studies, publishing, technical writing, and teaching at all levels. The literature major may also lead to careers in fields such as digital storytelling and electronic media; film, television, and video; theater, performance, and the visual arts.

The Literature Department faculty requires that all literature majors have basic proficiency in a second language. Proficiency in more than one language enhances understanding of any literature and culture. Graduate programs in literature and other humanities disciplines generally require competence in at least one language other than English.

COURSES FOR NON-MAJORS

The Literature Department invites students from all disciplines to take courses in the LIT 60/LIT 61 and LIT 80/LIT 81 series.

LITERATURE B.A.

Information and Policies

Introduction

The study of literature at UC Santa Cruz is organized as an interdisciplinary field coordinated through a single Department of Literature, rather than through separate departments of English, modern languages, and classics. This structure fosters innovative and comparative approaches to literature among both faculty and students. Courses in the major encompass traditional literary history and interpretation, cross-cultural inquiry and current theoretical debates, and new media.

Literature majors at UCSC are trained in critical reading, writing, and thinking, as well as in literary interpretation. These skills have wide applicability, and offer avenues into related disciplines such as history, philosophy, psychology, sociology, anthropology, politics, and the history of art and visual culture. Literature majors enter a wide variety of careers ranging from law and journalism to management, government, international studies, publishing, technical

writing, and teaching at all levels. The literature major may also lead to careers in fields such as digital storytelling and electronic media; film, television, and video; and theater, performance, and the visual arts.

The Literature Department faculty requires that all literature majors have basic proficiency in a second language. Proficiency in more than one language enhances understanding of any literature and culture. Graduate programs in literature and other humanities disciplines generally require competence in at least one language other than English.

Academic Advising for the Program

Faculty advisers are available in the Literature Department office throughout each academic term; students may make appointments in advance to meet with them. Staff advisers are available by appointment and on a drop-in basis. Students are encouraged to consult with an adviser once per quarter.

Transfer students should also consult the section Transfer Information and Policies.

Advisers for the literature program are available at litdept@ucsc.edu, (831) 459-4778, or by visiting the Literature Department office in Humanities 1, room 303.

Getting Started in the Major

All students considering a literature major or minor should consult with staff and/or faculty advisers at the Literature Department office as early as possible, and declare the major or minor before the end of their sophomore year. Transfer students are urged to declare their major or minor during their first quarter at UCSC, and should also consult the section Transfer Information and Policy.

Program Learning Outcomes

Following is a summary of the program learning outcomes for the Literature B.A.:

Students who complete the literature major should emerge with the following knowledge and skills:

1. A capacity for critical analysis of texts that is attentive to:
 - the formal structures, genres, and rhetorical strategies of different kinds of writing, public discourse, and media;
 - the historical and social contexts of such texts;
 - the role cultural and linguistic difference play in the interpretation of texts read in translation and in a language not one's own.
2. Effective written communication that demonstrates the following abilities:
 - to evaluate multiple interpretations of texts;
 - to write effective argumentative prose;
3. Experience reading a variety of texts:
 - from a breadth of world cultures and traditions;
 - from different historical periods, including the pre-modern;
 - originally written in languages other than English.

Major Qualification Policy and Declaration Process

Major Qualification

Students must complete LIT 1 or its transfer equivalent in order to declare the Literature major or minor.

Transfer students should also consult the section Transfer Information and Policy.

Appeal Process

Students notified that they are not eligible to declare the literature major may appeal this decision by submitting a letter to the department chair within 15 working days from the date of notification. Within 15 working days of receipt of the student's appeal, the department will notify the student and their college of its decision regarding the appeal.

How to Declare a Major

Students must complete LIT 1 or its transfer equivalent in order to declare the literature major. In order to declare the major, students meet with a department adviser to complete and submit a Proposed Study Plan and Declaration of Major/Minor petition. All students considering a major should consult with a department adviser as early as possible to make an academic plan.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply to UC Santa Cruz in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz.

Students transferring from California community colleges may use an articulated equivalent of LIT 1 to satisfy the LIT 1 course requirement. Students transferring from other colleges may petition to use an introduction to literature course to satisfy the LIT 1 course requirement. Another literature course may be applied toward the LIT 60/LIT 61 or the LIT 80/LIT 81 course requirement.

Transfer students planning to major in literature are strongly recommended to complete the equivalent of one year of college-level study of a language other than English before entering UCSC.

Getting Started at UCSC as a Transfer Student

Transfer students may declare the literature major or minor after completing LIT 1 or its transfer equivalent, and are urged to declare the major during their first quarter at UCSC.

For information about declaring the literature major or minor, please see the section How to Declare a Major.

A student may receive credit toward the lower-division requirements of the major or minor for up to two courses taken at other institutions.

Students who attend another campus of the University of California may petition to apply a maximum of three upper-division courses toward the literature major, or two upper-division courses toward the literature minor.

Students may not use upper-division coursework taken at non-UC colleges or universities to satisfy upper-division literature major or minor credit.

Letter Grade Policy

Letter grades are required for 75 percent of the upper-division courses applied toward the literature major. The senior seminar or senior thesis must be taken for a letter grade.

Course Substitution Policy

Students who participate in a UC Education Abroad Program and/or attend another campus of the University of California may petition to apply a combined maximum of three upper-division courses toward the literature major, or two upper-division courses toward the literature minor.

Students may petition to receive literature elective credit for a maximum of one upper-division course taken in another department at UCSC. In order to petition for a course from another department to substitute for a literature elective, students should submit a current course syllabus to the literature undergraduate program coordinator. Courses accepted from other departments may not be used to satisfy the literature major's critical approaches or distribution requirements.

Double Majors and Major/Minor Combinations Policy

Study Abroad

The University of California's Education Abroad Program (EAP) operates study centers in countries throughout the world, all associated with host institutions of high academic standing. EAP serves over 1500 upper-division students from the nine UC campuses every year. Students who participate in a UC Education Abroad Program may petition to apply up to three upper-division courses from EAP toward the literature major, or two upper-division courses toward the literature minor.

Honors

Honors in the literature major are awarded to graduating seniors who have earned a 3.70 to 3.89 grade-point average in

their upper-division literature courses. Highest honors in the literature major are awarded to graduating seniors who have earned a 3.90 or higher grade-point average in their upper-division literature courses. Honors are not awarded in the minor.

Creative Writing Courses

Any qualified student may take creative writing courses for credit toward graduation. Only students accepted into the creative writing concentration, however, may use Literature/Creative Writing courses LIT 179A, LIT 179B, LIT 190V, LIT 190W, and LIT 195C to satisfy major requirements.

Senior Checklist

Three quarters before anticipated graduation, all literature majors must complete a checklist in collaboration with a department adviser. The purpose of the checklist is to confirm progress toward graduation and the satisfaction of all major requirements. Completion and approval of a senior checklist are required for graduation.

Credit for Repeated Courses

Courses that vary significantly in material or methodology from one presentation to the next may be repeated for credit and are so designated in the course description in the UCSC General Catalog.

Individual Study Credit for the Major

Students may apply a maximum of two of the following courses—LIT 195 (Senior Essay), LIT 198 (Group Tutorial), and/or LIT 199 (Tutorial)—for satisfaction of literature major requirements. LIT 195 may be used only once for satisfaction of literature major requirements.

Intensive Literature Major Option

The intensive literature major requires students to complete upper-division literature coursework in a second language. The intensive literature major is especially useful for students who plan to apply to graduate programs in literature and other humanities disciplines; those programs typically require students to do academic work in at least two languages. In order to satisfy an intensive literature major, students complete all of the requirements for a general literature, language literature, or creative writing concentration (including the critical approaches and distribution requirements); students must also complete at least two additional upper-division courses in a second-language literature studied in the original language, for a total of 14 courses (12 upper-division courses and two lower-division courses).

Two years of college-level language study (or comparable ability) are needed before a student is prepared to enter an upper-division language-literature course. In select languages (Greek, Latin, Middle Egyptian hieroglyphics, Sanskrit), less time is needed for this purpose.

General Literature Concentration

Course Requirements

The general literature concentration of the Literature major requires: (1) basic proficiency in a second language; and (2) 12 courses in literature.

- Basic language proficiency: One year (three quarters or equivalent) of college-level study of a non-English language or demonstrated reading ability at this level.
- The 12 required courses must include two lower-division and 10 upper-division courses.

Lower-Division Requirements

• Basic language proficiency: One year (three quarters or equivalent) of college-level study of a non-English language or demonstrated reading ability at this level.

Lower-division courses are introductions to critical reading and writing. Students should complete their lower-division coursework before beginning upper-division work.

- Two lower-division courses are required:

LIT 1	Literary Interpretation	5
-------	-------------------------	---

Plus

One LIT 60/LIT 61-series course

or

One LIT 80/LIT 81 course

LIT 1 is a writing-intensive course.

LIT 60/LIT 61-series courses focus on categories, methodologies, and problems of literary study.

LIT 80/LIT 81-series courses focus on topical, thematic, and comparative studies of literary and filmic texts.

LIT 60/LIT 61 and LIT 80/LIT 81 courses are also recommended for non-majors.

Upper-Division Courses

Ten upper-division courses are required:

LIT 101	Theory and Interpretation	5
LIT 102	Translation Theory	5

Students must successfully complete the language proficiency requirement before enrolling in LIT 102.

Students may substitute one upper-division non-English literature course studied in the original language for LIT 102.

Plus

- Eight additional upper-division literature courses.

These eight courses must between them fulfill the critical approaches and distribution requirements specified below. Some courses may be used to fulfill more than one distribution requirement, as specified below.

Upper-division courses provide detailed treatment of literary and theoretical problems, themes, and periods. Students are strongly encouraged to take courses across chronological periods and national boundaries, and to balance small seminars with lecture courses.

Critical Approaches Requirements

- Six courses, one satisfying each of the six critical approaches to the study of literature.

While most upper-division courses have two critical approaches designations, no single course may be used to satisfy more than one critical approaches requirement.

Canons: The study of influential authors or works, and their critical afterlives: what books get read, which are forgotten, and how is that decided?

Genres: The study of fiction, poetry, drama, epic, testimonio, etc. across time and space: what happens when we classify together works of similar form?

Geographies: The study of local, regional, national, transnational, or global contexts: how do we use notions of place to group texts together?

Histories: The study of texts through socially or aesthetically defined periods or movements: how do historical pressures affect literature's possibilities?

Media: The study of the written word as one medium among others: what can we learn from the analysis of visual, performative, sonic, filmic, and other media?

Power and Subjectivities: The study of human and other subjects as individuals and in collective groups: who has the power to speak, write, and read under different social conditions?

The course descriptions in the General Catalog specify the critical approaches satisfied by each course.

These courses may also satisfy distribution requirements (below).

A list of annual course offerings indicating critical approaches and distribution codes for each course is available in the department office and on the Literature Department website.

Distribution Requirements

- Two upper-division courses on literature written before 1750.
- One upper-division course on non-Western literature or literature in a global perspective.
- One upper-division course on poetry and poetics (may not be a creative writing course).
- A senior seminar (a course in the LIT 190 series) or a senior thesis (LIT 195), which satisfies the campus comprehensive requirement (see below).

The course descriptions in the General Catalog specify the distribution requirements satisfied by each course.

Each of these courses may also satisfy a critical approaches requirement (above). Some courses satisfy more than one distribution requirement.

A list of annual course offerings indicating critical approaches and distribution codes for each course is available in the department office and on the Literature Department website.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major’s upper-division disciplinary communication (DC) requirement. Literature majors must satisfy the disciplinary communication requirement by passing:

LIT 101 Theory and Interpretation 5

Comprehensive Requirement

Students must successfully complete LIT 101 before taking any comprehensive requirement.

Seniors must select one of the following options to satisfy the campus exit requirement:

Senior seminar.

The senior seminar (courses in the LIT 190 series) may be counted as one of the required upper-division courses. Several senior seminars are offered each quarter; extensive writing is required in all seminars.

Senior thesis.

Students who wish to propose a senior thesis (30–40 pages) must apply to a Literature Department faculty sponsor at least two quarters before the projected date of graduation. The application must include a proposed subject, a brief outline, a bibliography, and a sample of previous written work. Only those students who have received written permission from a faculty supervisor may complete a thesis to satisfy the senior exit requirement.

A student whose application has been approved may receive course credit toward the major for one independent study (LIT 195A or LIT 195B), and may count LIT 195A or LIT 195B as one of the upper-division courses required for the major.

Planners

---------------------	---	---------------------------------	---

Language Literature Concentration

The language literature concentration examines literature within the frameworks of particular languages or national and regional traditions, and requires that texts be read in the original language. Enrollment in upper-division language literature courses normally requires completion of two years of college-level language coursework, or the equivalent.

Course Requirements

The language literature concentration of the literature major requires: (1) completion of two years of college-level language coursework, or the equivalent; and (2) 12 courses in literature.

- The 12 required courses must include two lower-division and 10 upper-division courses.

Lower-Division Requirements

- Language proficiency: Two years (six quarters or equivalent) of college level study of a non-English language or demonstrated reading ability at this level.

Lower-division courses are introductions to critical reading and writing. Students should complete their lower-division coursework before beginning upper-division work.

- Two lower-division courses are required:

LIT 1	Literary Interpretation	5
-------	-------------------------	---

Plus

One LIT 60/61 course

or

One LIT 80/81 course

LIT 1 is a writing-intensive course.

LIT 60/LIT 61-series courses focus on categories, methodologies, and problems of literary study.

LIT 80/LIT 81-series courses focus on topical, thematic, and comparative studies of literary and filmic texts.

LIT 60/LIT 61 and LIT 80/LIT 81 courses are also recommended for non-majors.

Upper-Division Courses

Ten upper-division courses are required:

LIT 101	Theory and Interpretation	5
LIT 102	Translation Theory	5

Students must successfully complete the language proficiency requirement before enrolling in LIT 102.

Students may substitute one upper-division non-English literature course studied in the original language for LIT 102.

Plus

- Eight additional upper-division literature courses.

These eight courses must between them fulfill the requirements specified below. Some courses may be used to fulfill more than one requirement, as specified below.

Upper-division courses provide detailed treatment of literary and theoretical problems, themes, and periods. Students are strongly encouraged to take courses across chronological periods and national boundaries, and to balance small seminars with lecture courses.

Critical Approaches Requirements

- Six courses, one satisfying each of the six critical approaches to the study of Literature.

While most upper-division courses have two critical approaches designations, no single course may be used to satisfy more than one critical approaches requirement.

Canons: The study of influential authors or works, and their critical afterlives: what books get read, which are forgotten, and how is that decided?

Genres: The study of fiction, poetry, drama, epic, testimonio, etc. across time and space: what happens when we classify together works of similar form?

Geographies: The study of local, regional, national, transnational, or global contexts: how do we use notions of place to group texts together?

Histories: The study of texts through socially or aesthetically defined periods or movements: how do historical pressures affect literature's possibilities?

Media: The study of the written word as one medium among others: what can we learn from the analysis of visual, performative, sonic, filmic, and other media?

Power and Subjectivities: The study of human and other subjects as individuals and in collective groups: who has the power to speak, write, and read under different social conditions?

The course descriptions in the General Catalog specify the critical approaches satisfied by each course.

These courses may also satisfy distribution requirements (below).

A list of annual course offerings indicating critical approaches and distribution codes for each course is available in the department office and on the Literature Department website.

Language Literature Concentration Requirements

- Five courses in a single language literature.

French Literature (courses in the LIT 182 series)

The study of French and Francophone literatures, languages, and cultural practices of France, Africa, and the Caribbean.

German Literature (courses in the LIT 183 series)

The study of the literature, language, and cultural practices of the German-speaking areas of central Europe including Germany, Austria, and Switzerland.

Greek and/or Latin Literature (courses in the LIT 184 and LIT 186 series)

The study of the literature, languages, and cultural practices of ancient Greece and Rome. Students may choose to concentrate in Greek or Latin or both.

Italian Literature (courses in the LIT 185 series)

The study of Italian literature, language, and cultural practices from the Middle Ages to the present.

Spanish/Latin American/Latino Literatures (courses in the LIT 188-LIT 189 series, LIT 190X)

The study of literatures, language, and cultural practices of Spain, Latin America, and Latino populations in the United States.

Each of these courses may also satisfy one of the critical approaches requirements, and/or one or more distribution requirements (see below).

Distribution Requirements

- Two upper-division courses on literature written before 1750.
- One upper-division course on non-Western literature or literature in a global perspective.
- One upper-division course on poetry and poetics (may not be a creative writing course).
- A senior seminar (a course in the LIT 190 series) or a senior thesis (LIT 195), which satisfies the campus comprehensive requirement (see below).

The course descriptions in the General Catalog specify the distribution requirements satisfied by each course.

Each of these courses may also satisfy a critical approaches requirement (above). Some courses satisfy more than one distribution requirement.

A list of annual course offerings indicating critical approaches and distribution codes for each course is available in the department office and on the Literature Department website.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major’s upper-division disciplinary communication (DC) requirement. Literature majors must satisfy the disciplinary communication requirement by passing:

LIT 101 Theory and Interpretation 5

Comprehensive Requirement

Students must successfully complete LIT 101 before taking any comprehensive requirement.

Seniors must select one of the following options to satisfy the campus exit requirement:

Senior seminar.

The senior seminar (courses in the LIT 190 series) may be counted as one of the required upper-division courses. Several senior seminars are offered each quarter; extensive writing is required in all seminars.

Senior thesis.

Students who wish to propose a senior thesis (30–40 pages) must apply to a Literature Department faculty sponsor at least two quarters before the projected date of graduation. The application must include a proposed subject, a brief outline, a bibliography, and a sample of previous written work. Only those students who have received written permission from a faculty supervisor may complete a thesis to satisfy the senior exit requirement.

A student whose application has been approved may receive course credit toward the major for one independent study (LIT 195A or LIT 195B), and may count LIT 195A or LIT 195B as one of the upper-division courses required for the major.

Planners

Four-Year Major Planner

1st (frosh)	LIT 60/LIT 61 or LIT 80/LIT 81	LIT 60/LIT 61 or LIT 80/LIT 81 (optional)	LIT 1
	Language Level 1	Language Level 2	Language Level 3
2nd (soph)	Upper-division LIT course (Canons critical approach, pre-1750 and poetry distribution requirements)	LIT 101	Upper-division LIT course (Power and Subjectivities critical approach, global distribution requirements)
	Language Level 4	Language Level 5	Language Level 6

4th (senior)	Upper-division LIT Language course (Histories critical approach,	Upper-division LIT Language course (Genres critical approach,	Upper-division LIT course (pre-1750 and global distribution requirements			

Creative Writing Concentration

The Literature Department offers a sequence of creative writing workshops from introductory through advanced levels. Admission to the creative writing concentration is selective. Interested students are required to take one lower-division creative writing workshop at UCSC (LIT 90, LIT 90X, LIT 91A or LIT 91B) before applying to the concentration; however, students are strongly encouraged to complete two lower-division workshops (at least one at UCSC) before applying. To apply for admission to the creative writing concentration, students should submit a completed application form (available at the Literature Department office and online). Once accepted into the concentration, students are required to declare (or redeclare) the major in literature, with a concentration in creative writing.

In addition to the critical approaches and distribution requirements required for all literature majors, students in the creative writing concentration must complete four of their eight upper-division literature courses in creative writing, including a senior project seminar.

Course Requirements

Lower-Division Requirements

- Basic language proficiency: One year (three quarters or equivalent) of college-level study of a non-English language or demonstrated reading ability at this level.

Lower-division courses are introductions to critical reading and writing. Students should complete their lower-division coursework before beginning upper-division work.

- Three lower-division courses are required:
LIT 1 Literary Interpretation

Plus

One LIT 60/LIT 61 course **or** one LIT 80/LIT 81 course

Plus at least one of the following

LIT 90	Introduction to Creative Writing	5
LIT 90X	Introduccion a la Escritura Creativa/Introduction to Creative Writing	5
LIT 91A	Intermediate Fiction/Prose	5

LIT 91B	Writing Intermediate Poetry Writing	5
---------	--	---

An additional course from among LIT 90, LIT 90X, LIT 91A and LIT 91B is strongly encouraged.

LIT 1 is a writing-intensive course.

LIT 60/LIT 61-series courses focus on categories, methodologies, and problems of literary study.

LIT 80/LIT 81-series courses focus on topical, thematic, and comparative studies of literary and filmic texts.

LIT 60/LIT 61 and LIT 80/LIT 81 courses are also recommended for non-majors.

Upper-Division Courses

Ten upper-division literature courses are required:

LIT 101	Theory and Interpretation	5
LIT 102	Translation Theory	5

Students must successfully complete the language proficiency requirement before enrolling in LIT 102.

Students may substitute one upper-division non-English literature course studied in the original language for LIT 102.

Plus

- Eight additional upper-division courses.

These eight courses must between them fulfill the creative writing workshop, critical approaches, and distribution requirements specified below. Some courses may be used to fulfill more than one distribution requirement, as specified below.

Upper-division courses provide detailed treatment of literary and theoretical problems, themes, and periods. Students are strongly encouraged to take courses across chronological periods and national boundaries, and to balance small seminars with lecture courses.

Critical Approaches Requirements

Six courses, one satisfying each of the six critical approaches to the study of literature. While most upper-division courses have two critical approaches designations, no single course may be used to satisfy more than one critical approaches requirement.

Canons: The study of influential authors or works, and their critical afterlives: what books get read, which are forgotten, and how is that decided?

Genres: The study of fiction, poetry, drama, epic, testimonio, etc. across time and space: what happens when we classify together works of similar form?

Geographies: The study of local, regional, national, transnational, or global contexts: how do we use notions of place to group texts together?

Histories: The study of texts through socially or aesthetically defined periods or movements: how do historical pressures affect literature's possibilities?

Media: The study of the written word as one medium among others: what can we learn from the analysis of visual, performative, sonic, filmic, and other media?

Power and Subjectivities: The study of human and other subjects as individuals and in collective groups: who has the power to speak, write, and read under different social conditions?

Students in the creative writing concentration will fulfill the genres critical approaches requirement through an upper-division creative writing workshop (LIT 179A, LIT 179B, or LIT 179C); they will fulfill the Media Critical Approaches requirement through the creative writing senior project seminar (LIT 190V or LIT 190W) if they choose the Senior Seminar option to fulfill the comprehensive requirement.

The course descriptions in the General Catalog specify the critical approaches satisfied by each course.

These courses may also satisfy distribution requirements (below).

A list of annual course offerings indicating critical approaches and distribution codes for each course is available in the department office and on the Literature Department website.

Advanced Creative Writing Workshops

Three advanced writing workshops, as follows:

Fiction/Prose students: Any combination of three iterations of LIT 179A and/or LIT 179C

Poetry students: Any combination of three iterations of LIT 179B and/or LIT 179C

LIT 179A, LIT 179B, and LIT 179C satisfy the Genre component of the critical approaches requirements.

Distribution Requirements

- Two upper-division courses on literature written before 1750.
- One upper-division course on non-Western literature or literature in a global perspective.
- One upper-division course on poetry and poetics (may not be a creative writing course).
- A creative project senior seminar (LIT 190V [Fiction] or LIT 190W [Poetry]) or a senior thesis (LIT 195C), which satisfies the campus comprehensive requirement (see below).

The course descriptions in the General Catalog specify the distribution requirements satisfied by each course.

Each of these courses may also satisfy a critical approaches requirement (above). Some courses satisfy more than one distribution requirement.

A list of annual course offerings indicating critical approaches and distribution codes for each course is available in the department office and on the Literature Department website.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. Literature majors must satisfy the disciplinary communication requirement by passing:

LIT 101 Theory and Interpretation 5

distribution requirement)

LIT 90 or LIT 90X LIT 91A or LIT 91B*

Language Level 1 Language Level 2 Language Level 3

Comprehensive Requirement

Students must successfully complete LIT 101 before taking any comprehensive requirement.

Seniors must select one of the following options to satisfy the campus exit requirement:

3rd (junior)

Upper-division LIT course (Geographies critical approach, global distribution requirement)

LIT 102 LIT 179A, LIT 179B, or LIT 179C (Genres critical approach)

Senior seminar

The senior seminar may be counted as one of the required upper-division courses. Extensive writing is required in all seminars. Creative writing senior seminars are offered only during spring quarter.

LIT 190V Fiction Senior Seminar 5
LIT 190W Poetry Senior Seminar 5

Upper-division LIT course (Canons critical approach, pre-1750 and poetry distribution requirements)

Senior essay

Students who wish to propose a creative writing senior essay (30–40 pages) must apply to a Literature Department faculty sponsor at least two quarters before the projected date of graduation. The application must include a proposed subject, a brief outline, a bibliography, and a sample of previous written work. Only those students who have received written permission from a faculty supervisor may complete a senior essay to satisfy the senior exit requirement.

4th (senior)

LIT 179A, LIT 179B, or LIT 179C

LIT 179A, LIT 179B, or LIT 179C

LIT 190V or LIT 190W (Media critical approach, senior seminar)

A student whose application has been approved may receive course credit toward the major for one independent study (LIT 195C), and may count LIT 195C as one of the required upper-division courses for the major.

Note: LIT 195C does not satisfy the Media Critical Approaches requirement.

LIT 195C Senior Essay 5

*Not required for the major, but strongly recommended before applying for admission to the Creative Writing concentration.

Planners

Four-Year Major Planner

1st (frosh) LIT 60/LIT 61 or LIT 80/LIT 81 LIT 60/LIT 61 or LIT 80/LIT 81 (optional) LIT 1

2nd (soph) Upper-division LIT course (Histories critical approach, pre-1750 LIT 101 Upper-division LIT course (Power and Subjectivities critical approach)

Courses required for the major fulfill the TA general education requirement. Other requirements may be fulfilled depending on the choice of electives. The MF, SI and SR requirements are never fulfilled.

	Upper-division LIT course (Histories critical approach, pre-1750 distribution requirement)					
Transfer Student Planner #2 (for transfer students who have completed no literature requirements, language coursework, or creative writing course at the time of transfer, but have completed general education requirements)						
3rd (junior)	LIT 1	LIT 60/61 or LIT 80/81	LIT 101			
	LIT 90	LIT 91A or LIT 91B*	LIT 179A, LIT 179B, or LIT 179C (Genres critical approach)			
	Language Level 1	Language Level 2	Language Level 3			
4th (senior)	Upper-division LIT course (Histories critical approach, pre-1750 distribution)	LIT 102	Upper-division LIT course (Geographies critical approach, global distribution)			

*Not required for the major, but strongly recommended before applying for admission to the Creative Writing concentration.

LITERATURE MINOR

Students who minor in literature take courses that examine a variety of literary texts and cultural artifacts from around the world, produced from pre-antiquity through the present. The literature minor requires a total of seven literature courses; literature minors do not have to satisfy certain major requirements, such as second-language proficiency, distribution or critical approach requirements, or a senior seminar.

Students must complete LIT 1 or its equivalent prior to declaring the minor. In order to declare the minor, students meet with a department adviser to complete and submit a Proposed Study Plan and Declaration of Major/Minor petition. All students considering a minor should consult with a department adviser as early as possible to make an academic plan.

Course Requirements

The minor in literature requires seven courses.

Lower-Division Courses

Two lower-division courses are required:

LIT 1 Literary Interpretation 5

LIT 1: This is a writing-intensive course.

Plus

One LIT 60/LIT 61-series course: categories, methodologies, and problems of literary study, or one LIT 80/LIT 81-series course: topical, thematic, and comparative studies of literary and filmic texts. LIT 60/LIT 61 and LIT 80/LIT 81 courses are recommended for both literature minors and non-majors.

Upper-Division Courses

Five upper-division courses are required:

LIT 101 Theory and Interpretation 5

Plus

Four other upper-division literature courses (except creative writing courses). The literature minor does not require second-language proficiency or a senior seminar.

ITALIAN STUDIES B.A.**Information and Policies****Introduction**

Students interested in an interdisciplinary approach to Italian culture through the combined study of language, literature, history, art history, and other subjects may pursue a major in Italian studies. Guidelines for completion of the major are available in the Literature Department office, located in Humanities 1, room 303, and may also be obtained by writing to litdept@ucsc.edu or calling (831) 459-4778. The Italian studies program is administered by the Literature Department.

Academic Advising for the Program

Students should meet with an adviser for Italian Studies program for assistance in making a plan for completion of the Italian studies major requirements.

Advisers for the Italian Studies program are available in the Literature Department office, located in Humanities 1, room 303, and may also be contacted at litdept@ucsc.edu or (831) 459-4778.

Transfer students should also consult the Transfer Information and Policy section of the program statement.

Getting Started in the Major**Program Learning Outcomes**

Following is a summary of the program learning outcomes for the Italian studies Bachelor of Arts (B.A.).

Students who complete the major should be able to demonstrate:

1. **Oral and written communication:** listening, speaking, and writing competency in Italian sufficient to engage in meaningful conversation at the intermediate-high to advanced-mid level, according to the American Council on the Teaching of Foreign Languages (ACTFL).
2. **Textual comprehension and analysis:** ability to understand and appreciate Italian texts in a variety of registers and different areas of knowledge at the advanced level as described by ACTFL.
3. **Critical analysis:** ability to comment with critical insight on a range of topics in Italian history and contemporary culture.
4. **Cultural competency:** ability to demonstrate knowledge of historical and contemporary aspects of Italian culture with reference to study in several disciplines.
5. **Global engagement:** ability to recognize and reflect in an informed way on cultural differences as well as shared values between Italian culture and their own native cultures.
6. **Knowledge building:** ability to conduct research in both Italian and English on topics pertinent to Italian history and culture.

Major Qualification Policy and Declaration Process**Major Qualification**

Undeclared students may declare the major at any time. While specific courses are not required in order to declare, students will have ideally completed some or all of the lower-division language requirements.

Appeal Process**How to Declare a Major**

Declaring a major or minor in Italian studies is a three-step process:

1. Print a petition for the major or minor and fill it out to the best of your ability. Be sure to indicate your expected graduation term (EGT) on the petition. Your EGT is visible in your student advising summary or on your My.UCSC student portal.
2. Meet with the Italian studies program director in order to discuss your plans and fill out a major or minor checklist.
3. Meet with an Italian studies staff adviser in order to review and complete your declaration form. In order to schedule an appointment with a staff adviser, email litdept@ucsc.edu, call (831) 459-4778, or come to the Literature Department office (Humanities 1, room 303).

Transfer Information and Policy**Transfer Admission Screening Policy**

Students planning to apply in the Italian studies major are not required to complete specific courses for consideration of admission to UC Santa Cruz.

Transfer students are advised to complete two years of Italian language study before enrolling at UCSC. It is also recommended that students complete courses satisfying campus general education requirements or the Intersegmental General Education Transfer Curriculum (IGETC) before coming to UCSC.

Getting Started at UCSC as a Transfer Student

Transfer students take a language placement test when they come to UC Santa Cruz. If a student joining UCSC is determined (through the placement test) to have completed the equivalent of UCSC's ITAL 1, ITAL 2 and ITAL 3, they can complete the major in two years as shown in the planners for the major (Transfer Plan A). This requires completion of at least one year of Italian language in community college

unless a transfer student is a heritage speaker or has studied Italian extensively at the high school level. If a transfer student is determined to have completed the equivalent of ITAL 6, they can follow Transfer Plan B, which is more flexible. Students entering UCSC in winter quarter should have completed the equivalent of UCSC's ITAL 1-ITAL 4.

Students who have not completed Italian language study before coming to UC Santa Cruz should contact the staff adviser for the program after coming to UCSC to plan their program. For instance, a transfer student entering UCSC in the fall quarter can complete ITAL 1, ITAL 2 and ITAL 3 and the five courses taught in English that are required for the major in their first year, followed by intensive Italian in the summer term (e.g., Mills College hosts the Middlebury intensive language program; some fellowship aid is possible), allowing them to take the five required courses taught in Italian during their second year. A transfer student entering UCSC in the winter quarter could take a two-quarter intensive Italian course in winter and spring that is the equivalent of ITAL 1, ITAL 2, and ITAL 3.

Letter Grade Policy

This program does not have a letter grade policy.

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Study Abroad

There are several options for study in Italy through the UC Education Abroad Program (UCEAP), either for a year (Bologna, Milan), for an intensive semester or quarter (Bologna, Florence, Milan, Rome), or for the summer (Florence, Rome). Students may also divide their time between Italy and Spain for one semester or one quarter. Please see UC study abroad programs for information.

Honors

Honors in the Italian studies major are awarded to graduating seniors who have earned a 3.70 to 3.89 grade point average in their upper-division Italian studies courses. Highest honors in the Italian studies major are awarded to graduating seniors who have earned a 3.90 or higher grade point average in their upper-division Italian Studies courses. Honors are not awarded in the minor.

Requirements and Planners

Course Requirements

Lower-Division Courses

Lower-division Italian language sequence (ITAL 1-ITAL 6), or equivalent.

ITAL 1	First-Year Italian	5
ITAL 2	First-Year Italian	5
ITAL 3	First-Year Italian	5
ITAL 4	Second-Year Italian	5
ITAL 5	Second-Year Italian	5

ITAL 6	Second-Year Italian	5
--------	---------------------	---

Upper-Division Courses

10 Courses

10 five-credit courses (one may be lower-division), including the following:

ITAL 106	Italian Culture Through Film	5
----------	------------------------------	---

Plus the following nine courses:

Two courses in Italian literature (completed at UCSC)

One course in Italian history (completed at UCSC)

One course in History of Art and Visual Culture (completed at UCSC)

The five remaining courses for the major should be selected from the Italian studies course lists; a maximum of two may feature Italy in a European or global context. Up to five elective courses may be approved from UCEAP's study abroad in Italy.

A course featuring the work of Dante is recommended.

A minimum of five courses must be taught substantially in Italian. These include ITAL 100, ITAL 106, and LIT 185A-LIT 185S.

With prior approval of the Italian studies program director, and guidelines set by the course instructor, one history or literature course taught in English may be modified so that the individual student does substantial work in Italian readings.

Consult the Italian studies course lists for each of the above categories.

Students may also consult departmental websites to view available courses:

Literature Department

History Department

History of Art and Visual Culture (HAVC) Department

Languages and Applied Linguistics Department

Electives

Disciplinary Communication (DC) Requirement

The disciplinary communication (DC) requirement and the comprehensive requirement are the same in Italian studies. See Comprehensive Requirement for details.

Comprehensive Requirement

The disciplinary communication (DC) requirement and the comprehensive requirement are the same in Italian studies.

Majors are required to write a senior essay focused on Italian literature, history, or visual culture, and may do so by completing an Italian studies-focused senior seminar (HIS

196C, HIS 196D, HIS 196Y, or LIT 190C) which will count as one of the 10 upper-division course requirements.

As an alternative to an Italian studies-focused senior seminar, students may take LIT 185Z (a one-credit course), in conjunction with an upper-division course in Italian literature, history, or history of art and visual culture, in which they write a senior essay focused on Italian literature, history, or visual culture. Please refer to the updated information.

HIS 196C	Modern Italian Culture	5
HIS 196D	City of Rome	5
HIS 196Y	Saints and Holiness in Medieval Europe	5
LIT 185Z	Italian Studies Writing in the Discipline	1

elective*

Italian-related upper-division elective

*Upper-division courses substantially taught in Italian

Courses required for the major satisfy the CC general education requirement. Depending on the choice of electives, students may also satisfy the ER, IM and TA general education requirements. Students must fulfill all general education requirements not completed within their Italian studies coursework.

Planners

Please plan your individual program with the Italian studies director. Please note that the 10 courses beyond ITAL 1-ITAL 6 may be taken in any order, except for the comprehensive/DC requirement, which should be taken later in a student's career. Thus, the planners below are intended as general guidelines and can be modified according to current course offerings and the interests of the individual student. Students who study in the Education Abroad Program should also consult with the director beforehand.

Frosh Major Planner

Year	Fall	Winter	Spring
1st (frosh)	ITAL 1	ITAL 2	ITAL 3
2nd (soph)	ITAL 4	ITAL 5 Italian-related HIS upper-division course	ITAL 6 Italian-related HAVC upper-division course
3rd (junior)	ITAL 100*	Upper-division Italian LIT course*	ITAL 106* Italian-related upper-division elective
4th (senior)	Italian-related upper-division	LIT 185Z and Italian-related DC seminar course	Upper-division Italian LIT course*

Transfer Major Planner A (First-year Italian Completed, Fall Admission)

Year	Fall	Winter	Spring

	Italian-related upper-division elective*	LIT 185Z and Italian-related DC seminar course	

*Upper-division courses substantially taught in Italian

This planner assumes that a student has completed general education requirements, in addition to Italian language coursework, before coming to UCSC.

ITALIAN STUDIES MINOR

Declaring a major or minor in Italian studies is a three-step process:

- Print a petition for the major or minor and fill it out to the best of your ability. Be sure to indicate your expected graduation term (EGT) on the petition. Your EGT is visible in your student advising summary or on your My.UCSC student portal.
- Meet with the Italian studies program director in order to discuss your plans and fill out a major or minor checklist.
- Meet with with an Italian studies staff adviser in order to review and complete your declaration form. In order to schedule an appointment with a staff adviser, email litdept@ucsc.edu, call (831) 459-4778, or come to the Literature Department office (Humanities 1, room 303).

Course Requirements

Lower-Division Courses

Each student must complete the lower-division language sequence (ITAL 1–ITAL 6), or equivalent.

ITAL 1	First-Year Italian	5
ITAL 2	First-Year Italian	5
ITAL 3	First-Year Italian	5
ITAL 4	Second-Year Italian	5
ITAL 5	Second-Year Italian	5
ITAL 6	Second-Year Italian	5

Upper-Division Courses

Students must complete five upper-division courses in Italian studies, as follows:

ITAL 106	Italian Culture Through Film	5
----------	------------------------------	---

Plus:

- Two Italian literature courses

- One course in Italian history
- One course in Italian art history.

A course featuring the work of Dante is recommended. Three of the five upper-division courses must be completed at UCSC; three must be taught substantially in Italian. A maximum of two courses may be transferred from EAP.

Students can consult Italian Studies course offerings for each of the above categories.

Students may also consult departmental websites to view available courses.

Graduate Program

LITERATURE M.A.

Introduction

The Master's Degree in Literature. A separate master of arts degree program is intended for students whose aim is to deepen and expand their literary/critical training and to prepare for entry into a Ph.D. program, usually at another institution. Priority for admission is given to students interested in underrepresented areas of study within the Literature Department's offerings, such as the non-English language literatures and, more broadly, critical theory.

The M.A. program requirements may not be completed in less than one year; the maximum time to obtain a degree is two years.

Requirements

Course Requirements

- LIT 200, Proseminar, to be taken in fall quarter of the first year;
- Seven additional courses leading to the definition of an area of concentration. Up to two of these may be taken in other departments. One may be an independent study course;
- LIT 291F, a two-credit advising course, each quarter;
- A thesis (written in conjunction with LIT 299A or LIT 299B, Thesis Research). Typically, a thesis will range in length from 35–50 pages, plus a bibliography.

LIT 200	Proseminar	5
LIT 291F	Advising	2
LIT 299A	Thesis Research	5
LIT 299B	Thesis Research	10

Other Requirements

Admissions and Financial Aid

The Literature Department does not provide financial support to students pursuing the M.A. degree. Admission to the M.A. program does not constitute admission to the Ph.D. program. Students may not automatically transfer from the M.A.

program into the Ph.D. program, but must reapply. Further information and application materials are available from the Division of Graduate Studies and on the department website.

Applying for Graduation

LITERATURE PH.D.

Introduction

The UC Santa Cruz doctoral program in literature offers an innovative multilingual and multidisciplinary approach to literary studies, involving the use of more than one language literature. The program is relatively small, and students work closely with faculty throughout their graduate careers. They are encouraged to take advantage of the rich array of intellectual and cultural events, research clusters, and lectures offered on campus.

The doctoral program combines critical and independent thought with global perspectives. Working across linguistic, national, and period boundaries, students blend critical approaches, literary traditions, and/or cultural archives in comparative and interdisciplinary projects.

A creative/critical writing concentration within the Ph.D. program is available, for which students apply during the admissions process. For the creative/critical concentration, applicants submit additional creative writing samples of poetry, prose fiction, creative non-fiction or hybrid/cross genre. Entering students in the creative/critical concentration complete all the requirements for the literature Ph.D. with the addition of a creative/critical degree component in the form of coursework, original creative work with a critical introduction and, if desired, work in poetics, translation, form and/or critical writing focused on creative practices.

Admitted students may apply for a designated emphasis on the literature doctoral diploma in programs and departments such as Critical Race and Ethnic Studies, Education, Feminist Studies, History of Consciousness, Latin American and Latino Studies, Philosophy, Politics, Sociology, and the History of Art and Visual Culture. Applications and requirements are available at the respective department offices.

Advancement to Candidacy

Course Requirements

- LIT 200, Proseminar, to be taken in fall quarter of the first year;
- LIT 201, Pedagogy of Teaching/Teaching Assistant Training, to be taken prior to or in conjunction with the first teaching assistant appointment;
- Twelve additional courses leading to the definition of an area of concentration. At least two of these must be in a second-language literature; at least one must focus on pre-modern literature and culture. A minimum of six courses must be regularly scheduled Literature seminars;*
- LIT 291F, a two-credit advising course, each quarter.

*Revised: 07/29/19

LIT 200	Proseminar	5
LIT 201	The Pedagogy of Literature	2
LIT 291F	Advising	2

Foreign Language Requirements

The program requires significant literary work in two languages. All students are required to complete a minimum of two graduate courses in a second-language literature in which 50 percent or more of the reading is done in the original language. The second literature must serve as a component of the qualifying examination.

Students are required to complete the Literature Department's intensive three-week Graduate Summer Language Program or its equivalent.

Teaching Requirements

Students must complete at least three quarters of supervised teaching experience.

Pre-Qualifying Requirements

Qualifying Examination

A qualifying examination consists of three components: 1. a portfolio with a field statement and comprehensive bibliography, a topic statement, a paper of publishable quality, and a dissertation sketch; 2. translation examination; and 3. oral examination. The qualifying examination must be taken by the first quarter of the fourth year.

Post-Qualifying Requirements

Students must submit a prospectus outlining and defining the dissertation project. The prospectus identifies the research problem, methodologies, and case studies, with chapter outlines, footnotes, and bibliography, and must be submitted within a quarter following the qualifying examination, but no later than the end of the fourth year.

Non-Terminal Master's Degree

A master of arts (M.A.) degree is conferred upon request to doctor of philosophy (Ph.D.) candidates who have successfully completed the literature Ph.D. qualifying examination or who have completed the coursework required for the doctorate (teaching assistant training and supervised teaching experience exempted) and elect to write a master's thesis under the supervision of a faculty adviser.

Dissertation

The dissertation is a substantial piece of original research in the field of literature, akin to a monograph. There are additional requirements for the Creative-Critical Ph.D. concentration.

The dissertation committee is composed of three members, with the dissertation adviser acting as chair. The majority of the membership of a dissertation committee shall be members of the Santa Cruz Division of the Academic Senate.

Detailed instructions for the preparation of the dissertation are available on the Graduate Division website.

Dissertation Defense

Academic Progress

To maintain satisfactory academic progress and eligibility for fellowships and other benefits, students must:

- Complete required coursework in the first two to three years;
- Satisfy the department's second-language requirement;
- Pass the qualifying examination (QE) during the third year or fall quarter of the fourth year;
- Complete a dissertation prospectus and advance to candidacy by the end of the fourth year;
- Complete the dissertation by the end of the seventh year.

Applying for Graduation

For information on how to apply for graduation, visit the Graduate Division website.

Further Information

Additional detailed information for prospective graduate students, including procedures for application and admission to graduate studies, examinations, and requirements for the doctor of philosophy degree, is available from the Division of Graduate Studies and on the department website.

LITERATURE DESIGNATED EMPHASIS

Introduction

Graduate students in other programs may obtain a designated emphasis in literature on the Ph.D. degree by completing the following requirements:

Committee Composition and Departmental Approvals

The student must have a faculty graduate adviser from Literature, who serves both on the qualifying examination committee and the dissertation reading committee.

Course Requirements

The student must take four graduate courses in literature. With the approval of the literature adviser, one of the four required graduate courses may be an independent study.

Writing, Research and/or Teaching Requirements

The student must prepare a significant piece of writing in the area of literature, such as a substantial seminar paper or a chapter of the doctoral dissertation. The adviser from

Literature, in consultation with the student, determines whether a particular piece of writing meets this requirement.

Designated Emphasis Application

When the above requirements have been fulfilled, the formal steps to obtain the Designated Emphasis in Literature are:

- The student should complete Designated Emphasis Application form, obtain the literature adviser's signature and submit the application with supporting documentation (copies of the Qualifying Examination and Dissertation Committee Nomination forms) to the Literature Department graduate program coordinator.
- The Literature Department will notify the student and the home department of approval for the designated emphasis.

Undergraduate Program

PHILOSOPHY B.A.

Information and Policies

Introduction

Philosophy investigates fundamental questions about the most basic facets of human thought and life. These questions examine knowledge and belief (epistemology), the nature of reality (metaphysics), and morality and aesthetics (value theory). Such inquiries can be studied by looking at answers that contemporary philosophers propose, by investigating the principles that other disciplines use to legitimate claims, or by learning how, historically, philosophers approached these issues. In this respect, “philosophy” names not only a historically defined subject matter, but also inquiry into any of the fundamental determinants of rational thought. Thus, students of philosophy can pursue a broad range of topics of the greatest historical, intellectual, social, political, and personal interest.

The department offers courses that relate these traditional philosophical questions to contemporary work in literature and the social and natural sciences. In addition, the department offers several courses that make a careful study of the classic texts in philosophy, ancient and modern. Moreover, the curriculum covers all the dominant contemporary schools of philosophy in the Anglo-American and European traditions.

The study of philosophy enables students to expand their abilities in critical thinking and reasoning as well as to improve their skills in verbal and written communication. Students may major or minor in philosophy.

Philosophy prepares students for many careers as well as for most professional schools, including law, education, business, and non-profit management. Students who wish to go to graduate school in philosophy are encouraged to study logic at

both the introductory and intermediate levels and any languages that are necessary for advanced scholarship in the different historical eras of philosophy.

Academic Advising for the Program

For undergraduate advising, please contact philadvi@ucsc.edu. For transfer students, please also consult the Transfer Information and Policy section and contact the undergraduate adviser with any questions.

Getting Started in the Major

Program Learning Outcomes

Students who complete the philosophy major should emerge with the following knowledge and skills:

- an ability to argue cogently for a philosophical point and to analyze and criticize the arguments of others;
- a familiarity with the central concepts and key debates in the core areas of contemporary philosophical thought, including ethics, metaphysics, and epistemology;
- a familiarity with the works of the major figures in the history of philosophy; and
- a familiarity with formal logic, including the ability to carry out proofs within symbolic formal systems.

Major Qualification Policy and Declaration Process

Major Qualification

Undeclared students may declare the major once they have enrolled in at least one lower-division philosophy course. Students of any year can declare the major. While specific courses are not required in order to declare, students will have ideally completed some or all of the lower-division requirements. There is no GPA requirement to declare the philosophy major. Students should contact philadvi@ucsc.edu in order to declare.

Appeal Process

How to Declare a Major

In order to officially declare, students must schedule a meeting with the undergraduate adviser and complete an Academic Plan and Petition for Major/Minor Declaration form. Students should contact philadvi@ucsc.edu in order to declare.

Transfer Information and Policy

Transfer Admission and Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz. Although this is not required for admission, students are recommended to complete courses in the following areas:

- Introduction to Symbolic Logic
- Ancient Philosophy
- Modern Philosophy
- Ethical Theory
- Philosophy of Mind or Epistemology

Students may petition to substitute courses taken at other institutions, or take courses articulated on assist.org. Please note that logic classes offered at community colleges will often not fulfill the department's logic requirement (i.e., PHIL 9). However, most students should be able to satisfy their second required lower-division introductory course before transferring in.

Transfer students wishing to major in philosophy are encouraged to consult with the Philosophy Department undergraduate advisor as soon as possible.

Getting Started at UCSC as a Transfer Student

Students can declare the major once they are enrolled in or have taken one philosophy course. To declare the major, please contact the undergraduate advisor and complete an Academic Plan and Petition for Major/Minor Declaration form.

Letter Grade Policy

This program does not have a letter grade policy.

Course Substitution Policy

For majors, students are allowed to substitute two upper-division courses for their required philosophy courses. Lower-division courses completed elsewhere may also be considered. Substitution requests are to be made via petition to and are subject to approval by the undergraduate program director. Students must have received a B or higher to transfer a course for credit.

Double Majors and Major/Minor Combinations Policy

Study Abroad)

Honors

Students who do superior work in an advanced seminar can be awarded a notation of Honors in the narrative evaluation for that course. In addition to Honors in an advanced seminar, graduating seniors with a distinguished record of achievement in their philosophy courses may be awarded Honors or Highest Honors in the philosophy major.

Graduation with Honors in Philosophy requires at least a 3.7 average in all philosophy courses taken at UC Santa Cruz. Graduation with Highest Honors in Philosophy requires at least a 3.9 average in all philosophy courses taken at UCSC. Students with an average between 3.8 and 3.9 may be awarded Highest Honors by vote of the Philosophy Department.

Program Planning Notes

When a faculty member thinks that a student has done exceptional work that could be carried to a more advanced level, the student may be given the option of writing a senior essay (PHIL 195A). Normally, the senior essay is completed in one quarter; in unusual circumstances, it can be continued for a second quarter (PHIL 195B), but only if the writing requirements for PHIL 195A are completed successfully and on time. The senior essay, like individual studies more generally, does not count toward the 11 courses required for the major.

After undergraduates have taken the requisite lower-division courses, they have a wide range of upper-division courses from which to choose. Those who are considering advanced study are encouraged to consult regularly with any member of the philosophy faculty about the courses that would best prepare them for graduate work. Preparation for graduate work ought to begin before senior year. The Philosophy Department sponsors workshops in the spring and fall quarter for students contemplating graduate school in philosophy.

Requirements and Planners

Course Requirements

Eleven courses are required: two at the lower-division level, two in the history of philosophy sequence (PHIL 100A, PHIL 100B, PHIL 100C), six additional upper-division courses (including one advanced seminar), and an elective course which may be from any level. Courses must be satisfied in the following sequence: Before being eligible to enroll in any course in the history sequence ((PHIL 100A, PHIL 100B, PHIL 100C), a student must have completed two lower-division courses (one of these may be PHIL 8 or PHIL 9, but not both); Before being eligible to enroll in any philosophy course above Philosophy 100C, students must have taken PHIL 9 and at least one of the required history of philosophy courses (i.e., either PHIL 100A, PHIL 100B, or PHIL 100C).

The 11 required courses must meet the following distribution requirements:

Lower-Division Courses

The following course:

PHIL 9	Introduction to Logic	5
--------	-----------------------	---

Plus

At least one other course numbered below PHIL 100A, with the exception of PHIL 8 (PHIL 8 may satisfy the elective course).

Transfer students should check Assist.org for articulation agreements.

Upper-Division Courses

History of philosophy

Two of the following courses:		
PHIL 100A	Ancient Greek Philosophy	5

PHIL 100B	The Rationalists	5
PHIL 100C	The Empiricists	5

(all three strongly recommended for students who anticipate graduate work in philosophy). Taking any two from the sequence PHIL 100A, PHIL 100B, and PHIL 100C will satisfy the Disciplinary Communication (DC) requirement.

Plus

Five courses numbered PHIL 100A or above, at least one in value theory and two in metaphysics and/or epistemology.

Note that the two courses counted toward fulfilling the history of philosophy requirement cannot be counted among these five additional courses.

Courses satisfying the value theory requirement:

PHIL 118	Stoic Ethics	5
PHIL 124	Other Minds	5
PHIL 140	History of Ethics	5
PHIL 142	Advanced Ethics	5
PHIL 143	Applied Ethics: Ethics Bowl	5
PHIL 144	Topics in Social and Political Philosophy	5
PHIL 147	Topics in Feminist Philosophy	5
PHIL 148	The Holocaust and Philosophy	5
PHIL 152	Aesthetics	5
PHIL 153	Philosophy of Race	5

Courses satisfying the metaphysics and epistemology requirement:

PHIL 114	Probability and Confirmation	5
PHIL 115	Formal Methods in Philosophy	5
PHIL 121	Epistemology	5
PHIL 122	Metaphysics	5
PHIL 125	Philosophy of Science	5
PHIL 126	Philosophy of Social Sciences	5
PHIL 127	Philosophy of Biology	5
PHIL 133	Philosophy of Mind	5
PHIL 135	Philosophy of Psychology	5
PHIL 171	Faith and Reason	5

PHIL 195A, PHIL 195B, and PHIL 199 also cannot be counted among these five courses. All upper-division courses must be completed at UCSC unless a petition for an exception is approved by the undergraduate program director. A maximum of two course substitutions may be approved; any upper-division courses from other institutions must have earned a grade B or higher.

Senior Seminar

One advanced seminar numbered:		
PHIL 190	Senior Seminar	5

Electives

An 11th course which may be from any level.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The

DC requirement in philosophy is met by completing any two from the sequence:

PHIL 100A	Ancient Greek Philosophy	5
PHIL 100B	The Rationalists	5
PHIL 100C	The Empiricists	5

Comprehensive Requirement

In the fourth year, students satisfy the comprehensive (exit) requirement by taking the following course. This advanced seminar meets the standards of the senior-year level of achievement in philosophy.

PHIL 190	Senior Seminar	5
----------	----------------	---

Planners

Courses must be satisfied in the following sequence. Before being eligible to enroll in any course in the history sequence (PHIL 100A-PHIL 100-PHIL 100C), a student must have completed two lower-division courses (one of these may be PHIL 8 or PHIL 9, but not both). Before being eligible to enroll in any philosophy course above PHIL 100C, students must have taken PHIL 9 and at least one of the required history of philosophy courses (i.e., either PHIL 100A, PHIL 100B, or PHIL 100C). In addition to the specific courses shown in these planners, a student must complete courses satisfying the general education requirements.

Four-Year Major Planner

	Fall	Winter	Spring
1st (frosh)	PHIL 11	PHIL 9	PHIL 100C
2nd (soph)	PHIL 100A	PHIL 100B (elective)	PHIL 1XX (M&E)
3rd (junior)	PHIL 1XX (Value)	PHIL 1XX (elective)	PHIL 1XX (M&E)
4th (senior)	PHIL 1XX (elective)		PHIL 190

PHIL 9 satisfies the MF general education requirement and PHIL 11 satisfies the TA general education requirement (Other lower-division courses may satisfy different GE requirements). Students must complete all other GE requirements.

Two-Year Transfer Major Planner

	Fall	Winter	Spring
1st (junior)	PHIL 11 or PHIL 22 (if needed) PHIL 9	PHIL 100B	PHIL 100C PHIL 1XX (M&E)
2nd (senior)	PHIL 100A (elective) PHIL 1XX (Value)	PHIL 1XX (elective) PHIL 1XX (M&E)	PHIL 1XX PHIL 190

Before transferring, students should complete as many of their general education as possible and their lower-division introductory philosophy course.

PHILOSOPHY MINOR

Course Requirements

Students must have taken or currently be enrolled in at least one lower-division philosophy course in order to declare the minor. Students declare by contacting the undergraduate adviser, who will develop an individual academic plan and complete a Petition for Major/Minor Declaration form. Students should contact philadvi@ucsc.edu in order to declare.

A minor in philosophy consists of nine of the 11 courses required for the major, and will meet the following distribution requirements:

Lower-Division Courses

The following course:

PHIL 9	Introduction to Logic	5
--------	-----------------------	---

Plus

One other course numbered below PHIL 100A, with the exception of PHIL 8 (PHIL 8 may satisfy the elective course)

Transfer students should check Assist.org for articulation agreements.

Upper-Division Courses

History of Philosophy

Two of following courses:

PHIL 100A	Ancient Greek Philosophy	5
PHIL 100B	The Rationalists	5
PHIL 100C	The Empiricists	5

Plus

Four additional upper-division courses. At least one in value theory and two in metaphysics and/or epistemology (see

Philosophy B.A. course requirements for a list of courses that satisfy this requirement).

Elective

The final course may be lower- or upper-division.

Course Substitution Policy

One upper-division course substitution may be considered. Lower-division courses completed elsewhere may also be considered. Substitution requests are to be made via petition to and are subject to approval by the undergraduate program director. There is no senior exit requirement for the minor.

For the sequence in which courses must be taken, see Major Requirements.

Contiguous Bachelor's/Master's Pathway

The B.A./M.A. pathway is an option that allows students to complete the requirements for both degrees in five years, rather than the usual six.

Interested students with a GPA of at least 3.5 will be asked to indicate their intention to participate in the program no later than the seventh week of the spring quarter of their junior year (spring quarter advising week). Intentions to participate should be directed to the undergraduate staff adviser. Subject to instructor consent, students may then enroll in two graduate philosophy seminars in their senior year.

Actual admission to this program requires that students apply to the M.A. program through the standard graduate admissions process as specified on the UCSC's Graduate Division's website. If a student is then admitted, up to two graduate philosophy seminars taken in their senior year will count as credit toward their graduate degree. Students matriculating through the B.A./M.A. pathway will be required to take the remaining seven courses required for the M.A., as well as to write and defend their M.A. paper, in the fifth year. Those needing additional time may continue in the pathway in accordance with normative time expectations for the stand-alone master's program.

Graduate Program

The department's graduate program profile emerges from its distinctive approach to the study of philosophy, including an interest in the history of philosophy as an indispensable background to the main areas of contemporary concern in the discipline. More specifically, the department's characteristic and compelling strength lies in its attitude towards the two current traditions in philosophy—the so-called analytic and continental traditions. While analytically trained, the majority of the faculty has research or teaching interests in some major 19th and 20th century European figures, including, among others, Hegel, Nietzsche, Husserl, Heidegger, and Foucault.

Among the faculty's main contemporary interests are those topics commonly pursued in any high-ranking research and teaching program, including for example research and teaching interests in philosophy of science, philosophy of biology, metaphysics, philosophy of mind, logic, epistemology, philosophy of language, philosophy of religion, moral philosophy, and aesthetics. The faculty's research and teaching in these areas is informed by leading historical figures, including especially Kant, Aristotle, Hume, Wittgenstein and—again, uniquely for such a small department—leading figures from the Middle Ages and late antiquity (including medieval Islamic figures).

Graduate students are therefore able to take advantage of a wide range of courses in the history of philosophy, including ancient, early modern, Kant, 19th-century, and the history of 20th-century philosophy (analytic, continental, and combined).

Both the Master of Arts (M.A.) and the Doctor of Philosophy (Ph.D.) programs encourage interaction with other fields.

Relationship of the M.A. and Ph.D. Programs

Students in the M.A. and Ph.D. programs will be in the same classes and work on the same course distribution requirements. Enrollment in the M.A. program confers no advantage for admission to the Ph.D. program.

Applications and Admissions

Application materials are available online. Further information regarding the program may be requested from the Department of Philosophy at (831) 459-4578, fax: (831) 459-2650 or visit the department website.

PHILOSOPHY M.A.

Introduction

The M.A. program is host to talented students from diverse academic backgrounds. The program is open not only to applicants who majored in philosophy as undergraduates, but also to applicants from other disciplines, who have a significant background in philosophy and who now want to study philosophy more intensively. The program is designed to be completed in one to two years.

Preparation for the Master's Degree

Students can apply to be admitted into the graduate program to pursue the M.A. in philosophy. Interested students should

discuss the possibility with one or more faculty members and formally apply online to the graduate program during fall quarter. For up-to-date information about the application process, consult the department's website and contact the graduate adviser.

Requirements

Course Requirements

Requirements in the First Year

During their first year, all graduate students are expected to fulfill a set of breadth requirements. These requirements are designed to provide both a common experience on which students can build their individual projects and a shared framework within which they can exchange ideas. Every graduate student in philosophy is required to complete six courses in their first year. These six core courses will constitute the bare minimum of courses required for the M.A. or Ph.D.

This minimal core set of courses will consist of (i) three graduate seminars, designated by the department each year as mandatory for every first year student, and (ii) three electives (any three graduate seminars in philosophy). Of the three required seminars, one will be in metaphysics/epistemology, one in the history of philosophy, and one in moral philosophy.

No courses labeled PHIL 294 or higher will satisfy any of these minimum core requirements. This restriction is redundant for PHIL 299 (since that course is open only to students who have advanced to candidacy). The point of this restriction is to limit the use of independent studies, reading groups or student seminars for graduate seminar credit.

During their first year of study all students must pass a logic competency examination with a grade of B or better. This examination will cover material typically taught in a first course in formal logic.

To facilitate the professionalization of students in the exchange and development of academic knowledge and skills, all first- and second-year doctoral students will be required to enroll in:

PHIL 280	Graduate Colloquia Course	2
PHIL 281	The Pedagogy of Philosophy	2

PHIL 280, Graduate Colloquia Course, provides preparation for and requires attendance at all department-sponsored colloquia and works-in-progress presentations each quarter.

PHIL 281, The Pedagogy of Philosophy, provides training in university-level teaching in general and in the pedagogy of philosophy specifically. It meets during the fall quarter only.

For further details, see the department's web page or consult with the department's graduate adviser.

Courses

A minimum of nine graduate courses. Up to two courses may be taken from the offerings of other departments, and up to two courses may be independent studies.

Other Requirements

By the end of the second year of study and the completion of 45 credits, M.A. students will submit a master's paper, which will normally be defended before a committee of two faculty.

Applying for Graduation

Students apply to graduate by contacting the department graduate adviser and completing the relevant forms from Graduate Division.

PHILOSOPHY PH.D.

Introduction

The Ph.D. program provides students with closely monitored training in philosophy. The program is designed to be completed in six years or less. Graduate work in philosophy can lead to careers both inside and outside academia. Because most doctoral students will be preparing for a career that involves teaching philosophy, they are encouraged to be teaching assistants for at least three quarters.

Advancement to Candidacy

Course Requirements

Requirements in the First Year

During their first year, all graduate students are expected to fulfill a set of breadth requirements. These requirements are designed to provide both a common experience on which students can build their individual projects and a shared framework within which they can exchange ideas. Six courses, to be completed in the first year, are required of every graduate student in philosophy. These six core courses will constitute the bare minimum required for the M.A. or Ph.D.

This minimal core set of courses will consist of (i) three graduate seminars, designated by the department each year as mandatory for every first year student, and (ii) three electives (any three graduate seminars in philosophy). Of the three required seminars, one will be in metaphysics/epistemology, one in the history of philosophy, and one in moral philosophy.

No courses labeled PHIL 294 or higher will satisfy any of these minimum core requirements. This restriction is redundant for PHIL 299 (since that course is open only to students who have advanced to candidacy). The point of this restriction is to limit the use of independent studies, reading groups or student seminars for graduate seminar credit.

During their first year of study all students must pass a logic competency examination with a grade of B or better. This examination will cover material typically taught in a first course in formal logic.

To facilitate the professionalization of students in the exchange and development of academic knowledge and skills, all first- and second-year doctoral students will be required to enroll in:

PHIL 280 Graduate Colloquia Course 2

PHIL 281 The Pedagogy of Philosophy 2

PHIL 280, Graduate Colloquia Course, provides preparation for and requires attendance at all department-sponsored colloquia and works-in-progress presentations each quarter.

PHIL 281, The Pedagogy of Philosophy, provides training in university-level teaching in general and in the pedagogy of philosophy specifically. It meets during the fall quarter only.

For further details, see the graduate program statement on the department's web page or consult with the department's graduate adviser.

A minimum of 12 graduate courses

Up to two courses may be taken from the offerings of other departments, and up to two courses may be independent studies.

Foreign Language Requirements

The foreign language will be individually determined based on the relevance of such linguistic skills to the research interests of the student. Proficiency can be demonstrated either by passing a written examination administered by the department or by successfully completing a language course approved by the graduate committee.

Teaching Requirement

Pre-Qualifying Requirements

Qualifying Examination

Qualifying examination and Research Seminar

The qualifying examination, normally taken during the third year of enrollment, is centered on a qualifying essay that demonstrates the candidate's ability to do extended, dissertation-level research and analysis relevant to the proposed thesis topic and dissertation plan. The examination focuses on the student's research project and on the fields of scholarship it presupposes.

Near the end of the required coursework, doctoral students will develop a research project resulting in a substantial paper. The paper is required to enroll in the research seminar, PHIL 270, which must be completed during or before winter quarter of the third year. The seminar will allow students to make substantial progress on a qualifying essay and cultivate their ability to assess and provide critical feedback on another author's philosophical work. PHIL 270 is only offered in winter quarter, and will normally be taken in the third year, though with permission of the instructor, it may be taken earlier than the third year. It is optional for M.A. students.

Post-Qualifying Requirements

Dissertation

Dissertation

Prospectus

Within one year of passing the qualifying examination (usually during the fourth year) doctoral students will submit and defend a dissertation prospectus, consisting of some written foundation and a plan for completion of the dissertation. The committee for the prospectus defense is normally the dissertation committee.

The prospectus will be submitted at least one month prior to the defense. It will normally consist of:

1. A detailed outline or table of contents of the entire dissertation
2. A bibliography indicating knowledge of the scope of the relevant literature
3. A paper that would be suitable as a chapter of the dissertation and that (a) clearly shows the potential for developing the rest of the dissertation, or (b) lays out the central problem which the dissertation will address.

Dissertation

The final requirement for the Ph.D. degree is a dissertation representing a contribution to philosophical research. Students submit their dissertation committee to the department for approval once they complete their qualifying exam. They may change their committee at a later time pending department approval.

Dissertation Defense

Academic Progress

Applying for Graduation

Students apply to graduate by contacting the department graduate adviser and completing the relevant paperwork from graduate division.

PHILOSOPHY DESIGNATED EMPHASIS

Introduction

Requirements

To receive a designated emphasis in philosophy, graduate students from other departments must complete the following requirements in addition to degree requirements for the doctorate in their home department.

Guidelines and application forms are available in the Philosophy Department office.

Committee Composition and Departmental Approvals

A Philosophy Department faculty member is to be consulted about the intention to pursue a philosophy designated emphasis. This adviser is required to serve on both the qualifying examination committee and the dissertation reading committee.

Course Requirements

Students must complete four graduate courses in philosophy selected in consultation with the philosophy faculty adviser. One of the four may be an independent study approved by the philosophy faculty adviser.

Writing, Research and/or Teaching Requirements

Students must submit a significant piece of writing that demonstrates competency in the field. The writing could take the form of a seminar paper or dissertation chapter. The essay must meet the approval of the philosophy adviser.

Academic Progress

Writing Program

209 Humanities 1
(831) 459-2431
<https://writing.ucsc.edu>

PROGRAMS OFFERED

Academic Literacy Curriculum (p. 188)

Multilingual Curriculum (p. 188)

The Writing Program offers lower-division general education composition courses, upper-division peer tutoring courses, and graduate-level pedagogy courses. In collaboration with the colleges, the Writing Program administers the Academic Literacy Curriculum. The Writing Program also houses the Don Rothman Endowed Award in First-Year Writing, which honors outstanding first-year writers and recognizes the pedagogical inspirations of their teachers.

Lower-Division Courses

The Writing Program's lower-division courses are designed to help students become confident writers, learners, and researchers who communicate effectively in a variety of writing situations and disciplinary fields. These courses teach students how to develop analytical, reflective, and flexible writing practices to meet the expectations of academic, professional, and civic audiences.

Specifically, the program offers courses that satisfy:

- General Education Composition (C) Requirement
- Writing 2, Rhetoric and Inquiry (F, W, S)
Prerequisite(s): College 1 and satisfaction of the Entry-Level Writing Requirement; or College 80A, 80D, or 80F and satisfaction of the C1 requirement
- Writing 2H, Rhetoric and Inquiry Honors (W, S)
Prerequisite(s): College 1 and satisfaction of the Entry-Level Writing Requirement. Enrollment is restricted to College Scholars or students with an AWPE score of 10-12
- Systemwide Entry-Level Writing Requirement (ELWR)
Writing 1, Introduction to Composition (W, S)
Prerequisite(s): College 1 and Writing 26; or College 1 and AWPE score of 2-6 or AWPE for Multilingual Students (AWPE-MLS) score of 6
- Writing 1E, Introduction to Composition for Multilingual Students (W, S)
Prerequisite(s): College 1 and Writing 26; or College 1 and AWPE score of 2-6 or AWPE for Multilingual

Students (AWPE-MLS) score of 6 For more information regarding undergraduate campus requirements and course offerings, please visit the Writing Program's website.

The Writing Program also offers the Multilingual Curriculum for linguistically diverse students. These courses are designed to strengthen students' use of English for purposeful, authentic, and culturally appropriate communication—necessary for successful language acquisition. These courses prepare students for subsequent writing requirements, including the systemwide Entry-Level Writing Requirement (ELWR) and the campus's General Education Composition (C) Requirement.

Based on students' scores on the Analytical Writing Placement Exam for Multilingual Students (AWPE-MLS), they may place into the following courses:

- WRIT 25, Writing about Place (F, W)
Prerequisite(s): AWPE-MLS score of 2 or 3
- WRIT 26, Writing about Language (F, W, S)
Prerequisite(s): Writing 25 or AWPE-MLS score of 4 or 5

*Upon completion of WRIT 26, multilingual students are highly encouraged to take WRIT 1E, which carries the same outcomes at WRIT 1 but is taught by trained faculty with expertise in language acquisition.

Upper-Division Writing Courses

The Writing Program offers courses for undergraduates interested in serving as peer tutors for lower-division writing students striving to satisfy the Entry-Level Writing Requirement. By exploring theory and research on writing pedagogies, tutors gain insight into composing processes, meeting the academic needs of diverse learners, and providing responsive assistance in one-to-one tutoring settings.

- WRIT 159: Grammar for Tutors and Teachers (3 credits, S)
Prerequisite(s): Writing 169, or by instructor permission
- WRIT 169: Theory and Practice of Tutoring Writing (3 credits, W)
Prerequisite(s): Instructor determination at first class meeting

Graduate-Level Writing Courses

The Writing Program supports graduate education by offering pedagogical training for graduate students from all disciplines in the theory and practice of teaching composition courses,

with an emphasis on course and assignment design that foregrounds disability studies and inclusive teaching. This course is designed for students who would like to serve as graduate student instructors in the Writing Program or enhance their own pedagogical development as teaching assistants in other departments.

- WRIT 203, Teaching Writing (F, W)

Note: Courses in creative writing are offered through the Literature Department.

Academic Literacy Curriculum

The Academic Literacy Curriculum (ALC) is an articulated sequence of courses jointly administered by the colleges and the Writing Program (p. 187). This curriculum is designed to help first-year students cultivate the foundational proficiencies in critical reading, writing, critical thinking, and research they will need throughout their university career.

All first-year students begin the ALC by taking College 1, Academic Literacy and Ethos, in fall quarter. College 1 course learning outcomes are organized through the acronym ACMES: Analysis, Critical thinking, Metacognition and Engagement with others. This course teaches students strategies for critical reading and critical thinking important to the study of academic discourse through themes that are unique to each college.

After the successful completion of College 1, students who have completed the Entry-Level Writing Requirement (ELWR) will enroll in WRIT 2, Rhetoric and Inquiry, to satisfy the campus's Composition (C) General Education Requirement. This course provides students with conceptual and procedural knowledge about writing, with a special focus on writing from research, composing in multiple genres, and transferring knowledge about writing to new contexts. College 1 is a prerequisite for WRIT 2.

The Writing Program also offers sections of WRIT 2 Honors for students in the College Scholars Program or who scored 10-12 on the Analytical Writing Placement Exam. This course carries the same outcomes as Writing 2 but provides an in-depth focus on conducting sustained scholarly inquiry about one topic throughout the quarter.

Academic Literacy Curriculum Core Course Sequence

AWPE Score	Fall	Winter
8-12	College 1	WRIT 2
10-12 or College Scholars Program	College 1	WRIT 2 or WRITE 2H

Together, College 1 and WRIT 2 help students transition to university-level discourse and develop confidence and competency in the basic skills necessary to success in any discipline on campus. As a linked sequence of classes, with

articulation of academic vocabulary and pedagogical practices between the Colleges and the Writing Program, the ALC is the foundation of the First-Year Experience, with the higher aim of fostering a sense of belonging and the ability to think, at a metacognitive level, about the education students will receive at the university.

PATHWAYS FOR ELWR-REQUIRED STUDENTS

Students who have not satisfied ELWR before matriculation have various pathways for satisfying ELWR and completing the ALC requirements. These pathways, outlined in the table below, are based on students' Analytical Writing Placement Exam (AWPE) scores and placement in the Multilingual Curriculum (AWPE-MLS).

ELWR Student Pathways for the Academic Literacy Curriculum

AWPE Score	Fall	Winter	Spring	Fall 2
2-6, 6 MLS	College 1	WRIT 1	WRIT 2	
4 or 5 MLS	College 1 WRIT 26*	WRIT 1 & WRIT 1E	WRIT 2	
2 or 3 MLS	College 1 WRIT 25*	WRIT 26*	WRIT 1 & WRIT 1E	WRIT 2

*Indicates courses in the Multilingual Curriculum.

For more information regarding undergraduate writing requirements for ELWR students, please visit this website.

For a full list of Writing Program course descriptions, please visit this page.

Multilingual Curriculum

209 Humanities 1
(831) 459-2431
<https://writing.ucsc.edu>

The **Multilingual Curriculum (MLC)** is a series of courses that provide linguistically diverse students targeted instruction in writing, reading, and speaking. These courses are designed to strengthen students' use of English for purposeful, authentic, and culturally appropriate communication, necessary for successful language acquisition.

In these courses, MLC students learn conceptual knowledge about writing and language that reinforces important

components of College 1 in the Academic Literacy Curriculum <insert link>, specifically community building through cross-cultural exchanges and developing metacognitive awareness of one's own learning. Through project-based learning, students build their proficiencies in academic reading and writing while also creating multimodal and collaborative projects written for authentic audiences. The MLC is administered by the Writing Program.

For more information regarding undergraduate campus requirements, please visit the Writing Program's website.

For a full list of Writing Program course descriptions, please visit the Course List on the Writing Program website.

For specific information on advising, please email writingprogram@ucsc.edu.

MULTILINGUAL CURRICULUM PLACEMENT

Prior to the start of fall quarter, students who have not satisfied the systemwide Entry-Level Writing Requirement (ELWR) by other methods will take the University of California's Analytical Writing Placement Exam (AWPE). Student who receive the indicator "AWPE for Multilingual Students" (AWPE-MLS) will be placed into a class appropriate for their language needs.

1. **AWPE-MLS 2 or 3:** WRIT 25, Writing about Place (F, W)
2. **AWPE-MLS 4 or 5:** WRIT 26, Writing about Language (F, W, S)

SATISFYING THE ENTRY-LEVEL WRITING REQUIREMENT

MLC courses must be taken in the fall quarter concurrently with College 1, both of which are required for students to satisfy the systemwide Entry-Level Writing Requirement (ELWR). After completing Writing 26, students take Writing 1 or 1E, the final course required for ELWR satisfaction. Multilingual students are highly encouraged to take Writing 1E, which carries the same outcomes as Writing 1 but is taught by trained faculty with expertise in language acquisition.

MLC Pathways for ELWR Satisfaction

AWPE-MLS Score	Fall	Winter	Spring
2 or 3	College 1 WRIT 25	WRIT 26	WRIT 1 or WRITE 1E
4 or 5	College 1 WRIT 26	WRIT 1 or WRITE 1E	

PHYSICAL AND BIOLOGICAL SCIENCES DIVISION

204 Natural Sciences 2 Annex
(831) 459-2931
<https://ucsc.edu/science>

A broad range of majors is offered through the physical and biological sciences. The intellectual rigor of these majors ensures that our graduates are well prepared for further studies in graduate and professional schools, as well as careers in scientific research, environmental research, medicine, law, engineering, technology, and business.

The Division of Physical and Biological Sciences' interdisciplinary framework provides students with the opportunity to attend classes and pursue research that ranges from the study of atoms to the examination of distant galaxies. From abstract number theory to the development of new chemical compounds, from evolution to plate tectonics, we provide students not only with the skills to explore and discover the world but also to define and improve it.

Departments and programs affiliated with the Division of Physical and Biological Sciences include the Departments of Astronomy and Astrophysics; Chemistry and Biochemistry; Earth and Planetary Sciences; Ecology and Evolutionary Biology; Microbiology and Environmental Toxicology; Mathematics; Molecular, Cell, and Developmental Biology; Ocean Sciences; Physics; and the programs of Coastal Science and Policy, and Science Communication. More information about our undergraduate and graduate programs can be found on our website.

Astronomy and Astrophysics

Astronomy Department Office
269 Interdisciplinary Sciences Building
(831) 459-3081
<http://www.astro.ucsc.edu>

PROGRAMS OFFERED

Astronomy and Astrophysics Ph.D. (p. 192)

Astrophysics Minor (p. 191)

OTHER PROGRAMS OF INTEREST

Astrophysics B.S. (p. 327)

Astronomy and astrophysics has the universe as its domain. Galaxies, stars, planets, and an ever-increasing variety of phenomena observed from ground- and space-based observatories are among the objects of study. Areas of special interest at UCSC include cosmology, the formation and evolution of planets, stars, and galaxies, high-energy astrophysics, active galaxies, supernovae and nucleosynthesis, black holes, exoplanets, interstellar medium, intergalactic medium, solar system dynamics. Research areas include observations across a broad range of wavelengths, with a focus on the visible and infrared, the creation of new instruments and telescope technology including adaptive optics, and theory and simulation, using state-of-the-art computing resources. Astronomers use concepts from and contribute to the development of many other scientific disciplines, including optics, mechanics, relativity, atomic and nuclear physics, applied mathematics, chemistry, geology, and meteorology. The interdisciplinary nature of astronomy, including its historical and philosophical elements, makes its study valuable to those planning careers in a variety of fields.

The Department of Astronomy and Astrophysics offers an undergraduate curriculum focused on a diverse set of general education classes, intended for the broad undergraduate community. The department also offers an astrophysics minor as well as additional upper-division classes focusing on computational methods and in astrophysics.

The graduate program is intended for those with a deep interest in the subject. Students are trained in the latest techniques in computation, data analysis, and instrumentation, which have wide utility in academia and industry. The interests of the faculty embrace a wide range of theoretical, observational, and instrumentation aspects of astronomy. Current research and course offerings include our stellar structure and evolution, solar system and other planetary systems, stellar spectroscopy, the interstellar medium, galactic structure, cosmology, general relativity, gravitational

radiation, the origin of the elements, optical and infrared astronomy, high-energy astrophysics, and advanced astronomical instrumentation.

Graduate students have access to state-of-the-art instrument development and data reduction technology, the UCO/Lick Observatory computer network, and an on-campus supercomputer dedicated to astrophysical computation. Graduate students may conduct supervised research using selected telescopic facilities of the Lick Observatory on Mount Hamilton, 55 miles from Santa Cruz. The 10-meter Keck Telescope in Hawaii, the world's largest, is administered from the UCSC campus and is used for frontier research by UC astronomers.

Undergraduate Program

Courses for non-majors

Instruction in astronomy for undergraduates at UC Santa Cruz is designed to meet the needs of several groups of students.

ASTR 1, ASTR 2, ASTR 3, ASTR 4, ASTR 5, ASTR 6, ASTR 7, and ASTR 8 provide a general survey of the universe as now understood from historical and modern observations, and are offered for those not specializing in a scientific discipline. ASTR 1 is a non-mathematical introduction to the universe. ASTR 1 and ASTR 6 on exploring our solar system in the space age, satisfy the scientific inquiry (SI) general education (GE) requirement. ASTR 2 through ASTR 5 and ASTR 7 provide an introduction, with the use of basic mathematics, to a diverse array of modern astronomy, covering planets, stars, the formation of the universe, and black holes, and satisfy the mathematical and formal reasons (MF) general education requirement. ASTR 8 explores the universe with astronomical data and satisfies the statistical reasoning (SR) GE.

ASTROPHYSICS MINOR

For undergraduate students having a particular interest in the subject, a minor in astronomy and astrophysics is offered. Most students who minor in astronomy and astrophysics are majors in another science, though majors in other fields are also possible.

Course Requirements

Lower-Division Courses

Calculus:

Choose one of the following options:

Either these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science,	5

or these courses	Engineering, and Mathematics	
MATH 20A	Honors Calculus	5
MATH 20B	Honors Calculus	5

Advanced Calculus:

MATH 23A	Vector Calculus	5
----------	-----------------	---

Physics:

Choose one of the following options:

Either these courses

PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1
PHYS 5B	Introduction to Physics II	5
PHYS 5M	Introduction to Physics Laboratory	1
PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory	1
PHYS 5D	Introduction to Physics IV	5
or these courses		
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics Laboratory	1
PHYS 6C	Introductory Physics III	5
PHYS 6N	Introductory Physics Laboratory	1
PHYS 5D	Introduction to Physics IV	5

Upper-Division Courses**Modern Physics:**

PHYS 102	Modern Physics	5
----------	----------------	---

Four upper-division astronomy electives chosen from the following:

ASTR 111	Order-of-Magnitude Astrophysics	5
ASTR 112	Physics of Stars	5
ASTR 113	Introduction to Cosmology	5
ASTR 117	High Energy Astrophysics	5
ASTR 118	Physics of Planetary Systems	5
ASTR 119	Introduction to Scientific Computing	5
PHYS 129	Nuclear and Particle Astrophysics	5
PHYS 133	Intermediate Laboratory	5
ASTR 136	Advanced Astronomy Laboratory	5
PHYS 171	General Relativity, Black Holes, and Cosmology	5
EART 160	Planetary Science	5
EART 162	Planetary Interiors	5
EART 163	Planetary Surfaces	5

EART 164	Planetary Atmospheres	5
AM 107	Introduction to Fluid Dynamics	5

Graduate Program

ASTRONOMY AND ASTROPHYSICS, PH.D.

Introduction

The Astronomy and Astrophysics graduate program is intended for those with a deep interest in the subject. Students are trained in the latest techniques in computation, data analysis, and instrumentation, which have wide utility in academia and in industry. The interests of the faculty embrace a wide range of both theoretical, observational, and instrumentation aspects of astronomy. Current research and course offerings include our stellar structure and evolution, solar system and other planetary systems, stellar spectroscopy, the interstellar medium, galactic structure, cosmology, general relativity, gravitational radiation, the origin of the elements, optical and infrared astronomy, high-energy astrophysics, and advanced astronomical instrumentation.

Graduate students have access to state-of-the-art instrument development and data reduction technology, the UCO/Lick Observatory computer network, and an on-campus supercomputer dedicated to astrophysical computation. Graduate students may conduct supervised research using selected telescopic facilities of the Lick Observatory on Mount Hamilton, 55 miles from Santa Cruz. The 10-meter Keck Telescope in Hawaii, the world's largest, is administered from the UCSC campus and is used for frontier research by UC astronomers.

Advancement to Candidacy**Course Requirements****Preparation for Graduate Work in Astrophysics**

The UC Santa Cruz graduate program in astronomy and astrophysics is predominantly designed for Ph.D. students seeking a professional career in research and teaching, but with flexibility for students to prepare for careers outside of academia. In view of the thorough preparation in mathematics and physics required for graduate study, most entering astronomy graduate students major in physics or astrophysics as undergraduates.

The suggested minimum requirements for admission to graduate standing at UC Santa Cruz include the following undergraduate courses:

Basic physics.

Mechanics, wave motion, sound, light, electricity and magnetism, thermodynamics, atomic physics, and quantum mechanics.

PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5

PHYS 5D Introduction to Physics IV 5

Basic mathematics.

Calculus

MATH 19A Calculus for Science, Engineering, and Mathematics 5
 MATH 19B Calculus for Science, Engineering, and Mathematics 5
 MATH 23A Vector Calculus 5
 MATH 23B Vector Calculus 5

or equivalent.

And Statistics

STAT 5 Statistics 5

Intermediate-level physics.

PHYS 105 Mechanics 5
 PHYS 110A Electricity, Magnetism, and Optics 5
 PHYS 110B Electricity, Magnetism, and Optics 5
 PHYS 116A Mathematical Methods in Physics 5
 PHYS 116B Mathematical Methods in Physics 5
 PHYS 116C Mathematical Methods in Physics 5
 PHYS 129 Nuclear and Particle Astrophysics 5
 PHYS 139A Quantum Mechanics I 5
 PHYS 139B Quantum Mechanics II 5

Intermediate-level mathematics.

MATH 21 Linear Algebra 5
 MATH 103A Complex Analysis 5
 MATH 106 Systems of Ordinary Differential Equations 5
 MATH 107 Partial Differential Equations 5

Graduate Program Requirements

The graduate curriculum consists of eight astronomy and astrophysics courses, including six required core courses and a choice of two elective courses. Students must additionally satisfy three equivalent educational requirements in the form of additional elective courses, research projects, independent study, or reading seminars. These requirements are detailed below.

Six courses are specifically required:

ASTR 202 Astrophysics I 5
 ASTR 204 Astrophysics II 5
 ASTR 205 Introduction to Astronomical Research and Teaching 5
 ASTR 220A Stars and Planets I 5
 ASTR 233 Galaxies and Cosmology I 5
 ASTR 257 Observational Astronomy 5

Electives

Choose two over the first two years

ASTR 222 Stars and Planets II 5
 ASTR 225 High-Energy Astrophysics 5
 ASTR 230 Diffuse Matter in Space 5
 ASTR 234 Statistical Techniques in Astronomy 5
 ASTR 240A Galaxies and Cosmology II 5
 ASTR 260 Instrumentation for Astronomy 5
 ASTR 289 Adaptive Optics and Its Application 5

Equivalent Educational Requirements

Choose three over the first two years

Equivalent educational requirements (EER) may take one of several forms, and three pre-approved options are listed below. Other EERs may be approved by the department. Students must complete three EERs during their first two years.

EER Option 1: Additional Elective Courses (5 credit course = 1 EER)

PHYS 224 Particle Astrophysics and Cosmology 5
 PHYS 226 General Relativity 5
 EART 262 Planetary Interiors 5
 EART 265 Order of Magnitude Estimation 5
 EART 264 Planetary Atmospheres 5
 AM 275 Magnetohydrodynamics 5
 STAT 206 Applied Bayesian Statistics 5
 AM 212A Applied Mathematical Methods I 5
 AM 214 Applied Dynamical Systems 5
 AM 217 Introduction to Fluid Dynamics 5
 PHYS 210 Classical Mechanics 5
 PHYS 215 Introduction to Non-Relativistic Quantum Mechanics 5
 PHYS 216 Advanced Topics in Non-Relativistic Quantum Mechanics 5
 PHYS 217 Quantum Field Theory I 5
 PHYS 218 Quantum Field Theory II 5

EER Option 2: Parallel Research Project

One quarter equals one EER.

A parallel research project is scientific research conducted in parallel to a student's thesis research, with faculty other than their primary adviser and in an area outside their primary research field. These projects will be designed to broaden the knowledge and skills of the student while increasing collaborative connections within the department, and may lead to publishable results. Each quarter students may choose from a department provided list of faculty who have available research projects designed to be completed in approximately 10 weeks. The evaluation methodology of the course will be a review by the designated faculty member of the completed research project and a write-up of the results. This option may only be taken twice in satisfaction of EERs, and may only be taken once per quarter. This option may not be taken in the fall quarter of year one. The student registers for Astronomy 297 for 5 credits when taking this option.

EER Option 3: Reading Seminar

One quarter equals one EER.

A reading seminar is an independent study of the scientific literature or related subject matter, guided by a faculty member. Each quarter students may choose from a department-provided list of faculty who will supervise the seminar and select the course material. The goal is to broaden the knowledge of the students in a field where they do not plan to conduct active research, and a reading seminar in a student's area of research will not qualify for an EER. Students will be required to meet with the faculty member over a 10-week period to discuss the papers. The evaluation methodology for the course will be an oral exam of the material, administered by the faculty member leading the seminar. The student registers for ASTR 293 for 5 credits when taking this option.

Additional Selective Coursework

Students are encouraged to leverage their opportunities for taking additional courses during their P.h.D studies at UC Santa Cruz. If students desire to supplement the coursework required for the astronomy and astrophysics degree with additional domain classes in other departments or with classes likely to advance their career goals, they can take more courses throughout their graduate career. Students should consult with their Ph.D. adviser and the graduate adviser to identify appropriate additional courses.

Additional Degree Requirements

In addition to the curriculum described above, students must fulfill the following requirements:

Students must meet at least quarterly with an assigned adviser.

Each student must also be a teaching assistant for at least two quarters. See the teaching educational requirement.

By the time of the annual board review, which occurs in July at the end of their second academic year, students must:

- Complete one quarter of master's project research with a primary UC Santa Cruz adviser and give a department talk on that work.
- Maintain a 3.0 GPA average in the six required core courses, in which students must register for an assigned grade.
- Submit one lead-author paper to a refereed journal that is based on research conducted at UC Santa Cruz. By the time of the board review, second-year students are expected to either (1) have submitted a paper for publication to a refereed journal; or (2) submit to the board review a complete first draft of such a paper and a detailed plan for completion. If the student pursues option (2), they are expected to submit the paper for publication by the first day of the fall quarter, and provide the electronic submission acknowledgement for the paper to the chair of the graduate advising

committee. If the student does not complete this requirement, they will meet with their adviser, the graduate advising committee chair, and the department chair before the first faculty meeting of the fall quarter, in order to discuss the status of the paper. The faculty at that meeting will then make a recommendation whether the student should be granted an extension to the next board review, and the full faculty will then vote on whether to grant an extension.

After passing the board review based on the above-mentioned requirements and the qualifying examination, students pursue independent research leading to the doctoral dissertation.

Foreign Language Requirements

Teaching Requirements

During their Ph.D. studies, graduate students in UC Santa Cruz astronomy and astrophysics will gain formative experience teaching undergraduate students, usually through teaching assistantships (TAs) in collaboration with department faculty.

- Students will serve as an official TA for at least two academic year quarters during their Ph.D. studies. One quarter must be during the first two years of Ph.D. studies. The remainder of this teaching educational requirement must be satisfied before receiving a doctorate degree.
- The teaching education requirement applies to all students, including those with external fellowships or other forms of support.
- The department may require students to serve as a TA for more than two quarters as a condition of the student's financial support during their Ph.D. studies.

Pre-Qualifying Requirements

Qualifying Examination

By the end of the third year, students must complete a qualifying examination that presents and defends a proposed thesis topic.

Post-Qualifying Requirements

Degree Timeline and Funding

The department has established five years as the normative time to degree. Normative time is the elapsed calendar time, in years, that, under normal circumstances and excluding department-approved leaves, will be needed to complete all requirements for the Ph.D.

We expect funding in the form of graduate student researcher positions or teaching assistantships to be available for our Ph.D. students for five years, provided the student makes sufficient progress toward a degree. A one-year extension may be granted if funding is available. Funding support will not, in general, be provided beyond six years. Exceptions for extension beyond six years will be granted only for

exceptional extenuating circumstances, and will be decided upon by the department chair, associate chair, and the department graduate advising committee.

Dissertation

Dissertation

After passing the board review based on the above-mentioned requirements and the qualifying examination, students pursue independent research leading to the doctoral dissertation.

Dissertation Defense

Upon completion of the Ph.D. dissertation, students must pass an oral dissertation defense. A completed draft of the thesis must be submitted to the dissertation committee at least two weeks before the date of the defense, and the defense itself must occur at least two weeks before the campus deadline for thesis submissions in that quarter. Exceptions to this policy will be granted only under exceptional circumstances and must be approved by the department chair, associate chair, and the department graduate advising committee.

Academic Progress

The department has established five years as the normative time to degree. Normative time is the elapsed calendar time, in years, that, under normal circumstances and excluding department-approved leaves, will be needed to complete all requirements for the Ph.D.

We expect funding in the form of graduate student researcher positions or teaching assistantships to be available for our PhD students for five years, provided the student makes sufficient progress towards a degree. A one-year extension may be granted if funding is available. Funding support will not, in general, be provided beyond six years. Exceptions for extension beyond six years will be granted only for exceptional extenuating circumstances, and will be decided upon by the department chair, associate chair, and the department graduate advising committee.

Applying for Graduation

Chemistry and Biochemistry

(831) 459-4125
<https://www.chemistry.ucsc.edu/>

PROGRAMS OFFERED

Chemistry B.A. (p. 197)

Chemistry B.S. (p. 202)

Biochemistry and Molecular Biology B.S. (p. 210)

Chemistry Minor (p. 214)

Chemistry M.S. (p. 215)

Chemistry Ph.D. (p. 216)

OTHER PROGRAMS OF INTEREST

Science Education B.S. (p. 335)

(p. 334)Chemistry is central to modern science. Ultimately, most phenomena in biology, medicine, materials, engineering, geology, and the environmental sciences can be described in terms of the chemical and physical behavior of atoms and molecules. Because of the wide appeal and utility of chemistry, UC Santa Cruz offers comprehensive lower-division courses in introductory and organic chemistry, differing in emphasis and style, to meet diverse needs.

Students should also note the numerous upper-division course offerings and select those most suitable to their academic interests. The curriculum in chemistry exposes the student to the principal areas of modern chemistry, including organic, inorganic, physical, materials, analytical, and biochemistry. The curriculum is designed to meet the needs of students who plan to graduate with a bachelor of arts (B.A.) or bachelor of science (B.S.) degree, as well as those who wish to pursue an advanced degree. The UCSC chemistry B.A. or B.S. graduate is well prepared to pursue a career in chemistry or related field.

Research in chemistry at UCSC is closely interwoven with graduate and undergraduate education. The chemistry and biochemistry research program is highly active at the graduate level, and faculty also encourage undergraduates to become involved in research. Research leads to academic credit in Senior Thesis (CHEM 195A, CHEM 195B, CHEM 195C) or Senior Research (CHEM 199). There are also opportunities for interdisciplinary research combining chemistry with a wide range of sciences, for example, biology, physics,

geology, ocean sciences, microbiology and environmental toxicology. At UCSC, it is not uncommon for students to become co-authors of original work published in research journals.

Chemistry and biochemistry faculty and approximately 100 graduate students and 15-20 postdoctoral fellows are housed in the Physical Sciences Building near the Science and Engineering Library. The department maintains and constantly expands cutting-edge facilities that enable scientists to carry out their research such as the Chemical Screening Center, Macromolecular Structure Function Core Facility, Mass Spectrometry, NMR Facility, and X-Ray Facility.

The Science and Engineering Library has an excellent collection of current journals and reference works, as well as access to earlier volumes of all the major journals. Many of these are subscribed to online. Additional source material can be readily and rapidly obtained on interlibrary loan.

Undergraduate Program

A degree in chemistry opens the door to a wide variety of academic careers. Some UC Santa Cruz graduates are working as industry researchers in electronic materials, biotechnology, medicinal chemistry, pharmacy, or laser technology. Others have entered government service as research chemists in the Food and Drug Administration, the Environmental Protection Agency, DOD, DOE or law enforcement crime laboratories. Fields such as patent law, commercial development, and scientific writing are open to graduates. Many chemistry majors go on to university graduate programs across the nation to prepare for careers in academia, government, or industry. The degree in chemistry also provides a strong disciplinary background in preparation for a career in the important and much needed area of science teaching in high school. A major in chemistry is also an excellent beginning for one of the many opportunities in the health sciences.

The UCSC Chemistry and Biochemistry Department offers both B.S. and B.A. degree programs. The B.S. degree should be the choice if a student is interested in getting a job in industry immediately after receiving his or her college degree. The B.S. program also provides a good background for graduate work in chemistry. The B.A. program has fewer requirements and should be considered by students who wish to take more science courses outside of chemistry to enter an interdisciplinary area. Examples might be chemical oceanography, geochemistry, chemical physics, environmental chemistry, or health sciences. The B.A. might also be a good choice for students who wish to become high school teachers. For either degree, the courses stress the fundamentals of chemistry and allow students to pursue independent research.

A minor in chemistry is also offered for those who wish to have a strong complementary program in chemistry while majoring in another area of study.

CHEMISTRY B.A.

Information and Policies

The requirements for the bachelor of arts (B.A.) in chemistry have been kept to a minimum so that students may tailor their program to their own purposes, for example, to pursue a double major, to complete major requirements late in their college career, or to concentrate on a specific branch of chemistry. The minimum requirements (including prerequisites) constitute 54 percent of a student's total undergraduate program; consequently, there is ample time to explore and discover other interests within the university. To plan wisely, students are advised to refer to each course description for a detailed listing of prerequisites. Students who decide they want a professional career in chemistry are advised to meet with the chemistry undergraduate faculty adviser.

Introduction

Academic Advising for the Program

The chemistry and biochemistry adviser provides counsel to undergraduate majors. Students are encouraged to seek out advising and assistance in planning their academic career to ensure completion of their major in a timely manner. For assistance, please contact Chemistry Advising at chemistryadvising@ucsc.edu or visit our department website. Transfer students should also consult the Transfer Information and Policy Section.

Getting Started in the Major

High School Preparation

Prospective chemistry majors should have a solid foundation in high school mathematics; familiarity with algebra, logarithms, trigonometry, and analytic geometry is particularly required. Students taking chemistry at UCSC begin with CHEM 1A or CHEM 1B, both of which require a strong background in high school chemistry.

Prerequisites

In order to determine what preparation may be needed to succeed in the general chemistry sequence, CHEM 1A, CHEM 1B, and CHEM 1C, students are encouraged to take the Chemistry Self-Assessment Examination.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop over the course of their studies.

The program learning outcomes clearly communicate the faculty's expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes.

Students graduating with a B.S. or B.A. in chemistry or a B.S. in biochemistry and molecular biology should be able to:

- demonstrate mastery of a broad set of chemical knowledge concerning the fundamentals in the basic areas of the discipline (organic, inorganic, analytical, physical, and biochemistry);
- solve area-specific problems by identifying the essential parts of a problem, formulating a strategy for solving the problem, applying appropriate techniques to arrive at a solution, testing the correctness of the solution, and interpreting their results;
- use modern library search tools (such as SciFinder, PubMed, or Web of Science) to locate and retrieve scientific information about a topic, chemical, chemical technique, or an issue relating to chemistry;
- know and follow the proper procedures and regulations for safe handling and use of chemicals;
- understand the objective of their chemical experiments, properly carry out the experiments, and appropriately record and analyze the results;
- use computers in data acquisition and processing, and use available software as a tool in data analysis;
- use standard laboratory equipment, modern instrumentation, and classical techniques to carry out experiments;
- communicate the concepts and results of their laboratory experiments through effective writing and/or oral communication using the discipline standards for reporting and citation; and
- collaborate effectively as part of a team to solve problems, debate different points of view, and interact productively with a diverse group of team members.

Major Qualification Policy and Declaration Process

Major Qualification

Students must complete the following qualification courses, or their equivalents, each with a grade of C (2.0) or better and with a cumulative grade point average (GPA) of 2.50 or greater in these six required courses:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1C	General Chemistry	5

Plus one of the following options:

Either these courses		
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
or these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

And one of the following options:

MATH 22	Introduction to Calculus of Several Variables	5
or this course		
MATH 23A	Vector Calculus	5
or this course		
AM 30	Multivariate Calculus for Engineers	5

Determining qualification for the major

When determining qualification to declare the major:

- All courses must be taken for a letter grade.
- For courses required to qualify for the major that have been satisfied with AP credit based on an AP examination score of 5 (for CHEM 1A), and an AP Calculus BC examination score of 4 or 5 (for MATH 11A or MATH 19A), students may substitute a grade of A for each course when calculating their cumulative GPA.
- Students with two or more grades of NP, C-, D+, D, D-, or F in courses required to qualify for the major are not eligible to declare.

Transfer students should also consult the Transfer Information and Policy Section.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal by submitting a letter to the chemistry adviser, chemistryadvising@ucsc.edu within 15 days from the date the notification was sent. Within 15 days of receipt of the appeal, the department will notify the student and their affiliated college of the decision. For more information about the appeal process, see the Appeal Process at this website.

How to Declare a Major

You may declare a major as early as you would like, if you have decided which major to pursue and have satisfied prerequisites or qualification requirements (if any) for the major.

Students who enter UC Santa Cruz as frosh are required to be formally declared in a major before enrolling in their third year (or equivalent). Upper-division transfer students are required to be declared in a major by the deadline in their second term at UCSC.

Each major/minor advising office has a process for declaring. To initiate the process to declare, please complete the online declaration petition located on the Chemistry and Biochemistry Department website. For assistance, please contact Chemistry Advising at chemistryadvising@ucsc.edu.

Students enrolled in their final qualification policy course at the major declaration deadline may submit the petition, but will not be declared until satisfactory grades have been posted.

Transfer Information and Policy**Transfer Admission Screening Policy**

The Chemistry and Biochemistry Department welcomes applications from transfer students who are prepared to enter as junior-level chemistry majors. To be considered for admission to UCSC as a chemistry B.A. or B.S. major, transfer students must pass equivalents of the following courses with a cumulative GPA of 2.50 or higher:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1C	General Chemistry	5
MATH 22	Introduction to Calculus of Several Variables	5

Plus one of the following options:

Either these courses		
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
or these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

For more information on qualifying for the major as a transfer applicant, see the Transfer Students webpage.

In addition to the required transfer admissions courses, we strongly recommend that all transfer students complete equivalents of the following preparatory courses prior to transfer:

CHEM 8A	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8B	Organic Chemistry	5
CHEM 8M	Organic Chemistry Laboratory	2
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics Laboratory	1

Getting Started at UCSC as a Transfer Student

Transfer students are highly encouraged to meet with the chemistry academic adviser in their first quarter. For assistance with advising, please contact Chemistry Advising at chemistryadvising@ucsc.edu. More information specific to transfer students may also be found at our department website.

Students who have satisfied the screening requirements can declare their major any time after coming to UC Santa Cruz but are required to be declared in a major by the applicable deadline; in their second term at UCSC for students entering at the junior level.

Letter Grade Policy

For all students entering UCSC in fall 2001 and later, all courses used to satisfy degree requirements in any of the chemistry and biochemistry majors must be taken for a letter grade.

Course Substitution Policy

At least half of the upper-division courses (CHEM 100–CHEM 199) required for any chemistry major must be taken through the chemistry program at UCSC, not as transfer credits from another department or institution. Transfer students are advised to contact the department undergraduate adviser before enrolling in any upper-division courses at other institutions to verify articulation. For more information on transferring courses to UCSC, please consult the Transfer Preparation website.

CHEM 199, Independent Study Course, may not be taken more than once per quarter and may be repeated no more than three times during an undergraduate career.

Double Majors and Major/Minor Combinations Policy

Study Abroad

Honors

Honors in the chemistry major requires a 3.5 or higher GPA in all chemistry courses; highest honors requires a 3.8 or higher GPA in all chemistry courses for the major. Students may also receive honors for a senior research thesis.

Materials Fee

Chemistry students should be aware of the materials fee required for some courses. The fee is billed to the student's account for specific laboratory materials purchased by the Chemistry and Biochemistry Department through the university. Fees generally range from \$18 to \$75 per course. Students may incur additional expense for individual supplies.

Program for Students of the Health Sciences

Students intending to enter medical, dental, or another health science professional school can satisfy entrance requirements with a major program in chemistry supplemented with further courses, especially in biology, as specified by the admissions requirements of the school where they intend to apply. Students are urged to contact the Career Center for assistance with the application process.

Requirements and Planners

Course Requirements

Lower-Division Courses

General Chemistry:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1M	General Chemistry Laboratory	2
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2

Calculus:

Choose one of the following options:

Either these courses		
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
or these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

A student may combine the MATH 11 series with the MATH 19 series to complete this portion of the major requirement(s). For example, a student can take and complete MATH 19A and then take and complete MATH 11B.

Multivariable Calculus:

Either this course		
MATH 22	Introduction to Calculus of Several Variables	5
or these courses		
MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5
or this course		
AM 30	Multivariate Calculus for Engineers	5

Physics:

Choose one of the following options:

Either these courses		
PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1
PHYS 5B	Introduction to Physics II	5
PHYS 5M	Introduction to Physics Laboratory	1
PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory	1
or these courses		
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 6B	Introductory Physics II	5

PHYS 6M	Introductory Physics Laboratory	1
PHYS 6C	Introductory Physics III	5
PHYS 6N	Introductory Physics Laboratory	1

A student may combine the PHYS 5 series with the PHYS 6 series to complete this portion of the major requirement(s). For example, a student can take and complete PHYS 5A and 5L and then take and complete PHYS 6B and 6M and PHYS 6C and 6N.

Organic Chemistry:

CHEM 8A	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8B	Organic Chemistry	5
CHEM 8M	Organic Chemistry Laboratory	2

Upper-Division Courses

Intermediate Organic Chemistry:

CHEM 110	Intermediate Organic Chemistry with Emphasis on Synthesis and Analytical Methods	5
CHEM 110L	Intermediate Organic Chemistry Laboratory	2

Inorganic Chemistry:

CHEM 151A	Chemistry of Metals	5
CHEM 151L	Inorganic Chemistry Laboratory	2

Physical Chemistry:

CHEM 163A	Quantum Mechanics and Basic Spectroscopy	5
CHEM 163B	Chemical Thermodynamics	5
CHEM 164	Physical Chemistry Laboratory	5

One of the following laboratory courses:

CHEM 146A	Advanced Laboratory in Organic Chemistry	3
CHEM 146B	Advanced Laboratory in Inorganic Chemistry	3
CHEM 146C	Advanced Laboratory in Physical Chemistry	3

Students currently conducting senior thesis research are strongly encouraged to choose an advanced laboratory in the CHEM 146 series that is outside their research area.

Electives

At least one from the following:

BIOC 100A	Biochemistry and Molecular Biology	5
CHEM 103	Biochemistry	5
CHEM 122	Principles of Instrumental Analysis	5
CHEM 143	Organic Chemical Structure and Reactions	5
CHEM 144	Catalysis In Organic Synthesis Using Metals and Metalloids	5

CHEM 151B	Based Reagents Chemistry of the Main Group Elements	5
CHEM 156C	Materials Chemistry	5
CHEM 163C	Statistical Thermodynamics and Kinetics	5
CHEM 169	Chemistry and Biology of Drug Design and Discovery	5
METX 101	Sources and Fates of Pollutants	5
METX 102	Cell and Molecular Toxicology	5
OCEA 120	Aquatic Chemistry: Principles and Applications	5
OCEA 121	Aqueous Geochemistry	5
PHYS 180	Biophysics	5

Students may also satisfy the elective requirement by completing a chemistry graduate course with permission of the instructor and department. Please consult with the department undergraduate adviser prior to enrolling.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement for the bachelor of arts degree in chemistry is satisfied by completing:

CHEM 151L	Inorganic Chemistry Laboratory	2
-----------	--------------------------------	---

Plus one of the following courses:

CHEM 146A	Advanced Laboratory in Organic Chemistry	3
CHEM 146B	Advanced Laboratory in Inorganic Chemistry	3
CHEM 146C	Advanced Laboratory in Physical Chemistry	3

Comprehensive Requirement

The comprehensive requirement is a part of all UCSC degrees. In the Department of Chemistry and Biochemistry, there are two options for satisfying this requirement:

Senior thesis:

A senior research project based on original experimental or theoretical research.

CHEM 195A	Senior Research	5
CHEM 195B	Senior Research	5
CHEM 195C	Senior Thesis	5

At the conclusion of the project, the student submits a formal research paper to the faculty sponsor for review and a revision process. Students arrange for a faculty sponsor by consulting with a relevant faculty member within the chemistry and biochemistry or the biochemistry and molecular biology major programs. In some cases, faculty outside these major programs (for example, in biology, ocean sciences, microbiology and environmental toxicology, or Earth sciences) may be an appropriate sponsor. Students who select a sponsor outside the chemistry or the biochemistry and molecular biology major programs should have the title and

description of the proposed thesis reviewed by the Department of Chemistry and Biochemistry undergraduate faculty adviser. Students, usually working in the laboratory of the faculty sponsor, acquire experimental and/or theoretical research experience and skills in the laboratory as well as instruction in the writing of a research paper. Students are expected to make satisfactory academic progress and be in good academic standing while they take CHEM 195 courses. Students who achieve excellence in both research and thesis may be awarded honors in the thesis upon graduation. Students are encouraged to apply for research funding opportunities on campus and external to the campus at the Undergraduate Research Opportunities website.

Senior essay:

An essay based on literature research.
CHEM 194 Senior Essay

5

Students find a faculty sponsor and agree in advance on an appropriate topic of interest and a format. The student submits a draft essay to the sponsor for the revision process. Students arrange for a faculty sponsor by consulting with a relevant faculty member within the chemistry and biochemistry major program. In some cases, faculty outside these major programs (for example, in biology, ocean sciences, microbiology and environmental toxicology, or Earth sciences) may be an appropriate sponsor. Students who select a sponsor outside the chemistry and biochemistry major program should have the title and description of the proposed essay reviewed by the Department of Chemistry and Biochemistry undergraduate faculty sponsor. Students acquire experience and skills in scientific literature research as well as in the writing of a research paper.

Planners

This is the ideal academic plan for chemistry B.A. majors. If needed, the plan can be arranged differently.

	Fall	Winter	Spring
1st (frosh)	MATH 19A or MATH 11A CHEM 1A	MATH 19B or MATH 11B CHEM 1B & CHEM 1M	CHEM 1C & CHEM 1N
2nd (soph)	CHEM 8A & CHEM 8L PHYS 6A & PHYS 6L	CHEM 8B & CHEM 8M MATH 22	CHEM 110 & CHEM 110L PHYS 6B & PHYS 6M
3rd (junior)	CHEM 163A PHYS 6C & PHYS 6N	CHEM 163B CHEM 164	CHEM elective

4th (senior)	Senior essay or CHEM 146 Lab	CHEM 151A & CHEM 151L	Senior essay or CHEM 146 Lab
---------------------	------------------------------------	--------------------------------	------------------------------------

Two of the required general education requirements will be fulfilled by the major requirements listed in the above planner (MF & SI). In addition to the specific courses shown in these planners, a student will also need to complete courses satisfying the following general education requirements: Cross- Cultural Analysis, Ethnicity & Race, Interpreting Arts & Media, Statistical Reasoning, Textual Analysis & Interpretation, Perspectives, and Practice

Sample Transfer Two-Year Planner

For students who have transferred in with the recommended courses. **Note:** Failure to do so may require additional time to degree. Please refer to the following academic planners that detail student plans with only the minimum transfer requirements completed.

	Fall	Winter	Spring
1st (junior)	CHEM 163A PHYS 6C & PHYS 6N	CHEM 163B CHEM 164	CHEM 110 & CHEM 110L
2nd (senior)	CHEM 146	CHEM 151A & CHEM 151L	CHEM elective Senior essay

*Recommended Courses:

- General chemistry (full sequence with lab) CHEM 1A, CHEM 1B & CHEM 1M and CHEM 1C & CHEM 1N
- Organic chemistry (full sequence with lab) CHEM 8A & CHEM 8L, CHEM 8B & CHEM 8M
- Calculus-based physics PHYS 6A & PHYS 6M, PHYS 6B & PHYS 6M
- Single variable calculus (full sequence) MATH 11A, MATH 11B
- Multivariable calculus (one semester course) MATH 22

CHEMISTRY B.S.

Information and Policies

Introduction

The bachelor of science major program is designed for students who intend to pursue a professional career in chemistry. It is rigorous and broadly based, appropriate for that purpose.

Academic Advising for the Program

The chemistry and biochemistry adviser provides counsel to undergraduate majors. Students are encouraged to seek out advising and assistance in planning their academic career to ensure completion of their major in a timely manner. For assistance, please contact Chemistry Advising at chemistryadvising@ucsc.edu or visit our department website. Transfer students should also consult the **Transfer Information and Policy Section**.

Getting Started in the Major

High School Preparation

Prospective chemistry majors should have a solid foundation in high school mathematics; familiarity with algebra, logarithms, trigonometry, and analytic geometry is particularly required. Students taking chemistry at UCSC begin with CHEM 1A or CHEM 1B, both of which require a strong background in high school chemistry.

Prerequisites

In order to determine what preparation may be needed to succeed in the general chemistry sequence, CHEM 1A, CHEM 1B, and CHEM 1C, students are encouraged to take the Chemistry Self-Assessment Examination.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop over the course of their studies.

The program learning outcomes clearly communicate the faculty's expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes.

Students graduating with a B.S. or B.A. in chemistry or a B.S. in biochemistry and molecular biology should be able to:

- demonstrate mastery of a broad set of chemical knowledge concerning the fundamentals in the basic areas of the discipline (organic, inorganic, analytical, physical, and biochemistry);
- solve area-specific problems by identifying the essential parts of a problem, formulating a strategy for solving the problem, applying appropriate techniques to arrive at a solution, testing the correctness of the solution, and interpreting their results;

- use modern library search tools (such as SciFinder, PubMed, or Web of Science) to locate and retrieve scientific information about a topic, chemical, chemical technique, or an issue relating to chemistry;
- know and follow the proper procedures and regulations for safe handling and use of chemicals;
- understand the objective of their chemical experiments, properly carry out the experiments, and appropriately record and analyze the results;
- use computers in data acquisition and processing, and use available software as a tool in data analysis;
- use standard laboratory equipment, modern instrumentation, and classical techniques to carry out experiments;
- communicate the concepts and results of their laboratory experiments through effective writing and/or oral communication using the discipline standards for reporting and citation; and
- collaborate effectively as part of a team to solve problems, debate different points of view, and interact productively with a diverse group of team members.

Major Qualification Policy and Declaration Process

Major Qualification

Students must complete the following six qualification courses, or their equivalents, each with a grade of C (2.0) or better and with a cumulative grade point average (GPA) of 2.50 or greater in these six required courses::

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1C	General Chemistry	5

Plus one of the following options:

Either these courses		
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
or these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

And one of the following options:

Either this course		
MATH 22	Introduction to Calculus of Several Variables	5
or this course		
MATH 23A	Vector Calculus	5
or this course		
AM 30	Multivariate Calculus for Engineers	5

Determining qualification for the major

When determining qualification to declare the major:

- All courses must be taken for a letter grade.
- For courses required to qualify for the major that have been satisfied with advanced placement (AP) credit based on an AP examination score (See Admissions AP Chart), students may substitute a grade of A for each course when calculating their GPA.
- Students with two or more grades of NP, C-, D+, D, D-, or F in courses required to qualify for the major are not eligible to declare.

Transfer students should also consult the **Transfer Information and Policy Section**.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal by submitting a letter to the chemistry adviser, chemistryadvising@ucsc.edu, within 15 days from the date the notification was sent. Within 15 days of receipt of the appeal, the department will notify the student and their affiliated college of the decision. For more information about the appeal process, see the Appeal Process at this website.

How to Declare a Major

You may declare a major as early as you would like, if you have decided which major to pursue and have satisfied prerequisites or qualification requirements (if any) for the major.

Students who enter UC Santa Cruz as frosh are required to be formally declared in a major before enrolling in their third year (or equivalent). Upper-division transfer students are required to be declared in a major by the deadline in their second term at UCSC.

Each major/minor advising office has a process for declaring. To initiate the process to declare, please complete the online declaration petition located on the Department of Chemistry website. For assistance, please contact chemistry advising at chemistryadvising@ucsc.edu.

Students enrolled in their final qualification policy course at the major declaration deadline may submit the petition, but will not be declared until satisfactory grades have been posted.

Transfer Information and Policy

Transfer Admission Screening Policy

The Chemistry and Biochemistry Department welcomes applications from transfer students who are prepared to enter as junior-level chemistry majors. To be considered for admission to UCSC as a chemistry B.A. or B.S. major, transfer students must pass equivalents of the following courses with a cumulative GPA of 2.50 or higher:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1C	General Chemistry	5
MATH 22	Introduction to Calculus of Several Variables	5

Plus one of the following options:

Either these courses		
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
or these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

For more information on qualifying for the major as a transfer applicant, see the Transfer Students webpage.

In addition to the required transfer admissions courses, we strongly recommend that all transfer students complete equivalents of the following preparatory courses prior to transfer:

CHEM 8A	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8B	Organic Chemistry	5
CHEM 8M	Organic Chemistry Laboratory	2
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics Laboratory	1

Getting Started at UCSC as a Transfer Student

Transfer students are highly encouraged to meet with the chemistry academic adviser in their first quarter. For assistance with advising, please contact chemistry advising at chemistryadvising@ucsc.edu. More information specific to transfer students may also be found at our department website.

Students who have satisfied the screening requirements can declare their major any time after coming to UCSC but are required to be declared in a major by the applicable deadline; in their second term at UCSC for students entering at the junior level.

Letter Grade Policy

For all students entering UCSC in fall 2001 and later, all courses used to satisfy degree requirements in any of the chemistry and biochemistry majors, must be taken for a letter grade.

Course Substitution Policy

At least half of the upper-division courses (CHEM 100–CHEM 199) required for any chemistry major must be taken through the chemistry program at UCSC, not as transfer credits from another department or institution. Transfer students are advised to contact the department undergraduate adviser before enrolling in any upper-division courses at other institutions to verify articulation. For more information on transferring courses to UCSC, please consult the Transfer Preparation website.

CHEM 199, Senior Research: Independent Research in the Lab, may not be taken more than once per quarter and may be repeated no more than three times during an undergraduate career.

Double Majors and Major/Minor Combinations Policy

Study Abroad

Honors

Honors in the chemistry major requires a 3.5 or higher GPA in all chemistry courses; highest honors requires a 3.8 or higher GPA in all chemistry courses for the major. Students may also receive honors for a senior research thesis.

Materials Fee

Chemistry students should be aware of the materials fee required for some courses. The fee is billed to the student's account for specific laboratory materials purchased by the Chemistry and Biochemistry Department through the university. Fees generally range from \$18 to \$75 per course. Students may incur additional expense for individual supplies.

Program for Students of the Health Sciences

Students intending to enter medical, dental, or another health science professional school can satisfy entrance requirements with a major program in chemistry supplemented with further courses, especially in biology, as specified by the admissions requirements of the school where they intend to apply. Students are urged to contact the Career Center for assistance with the application process.

American Chemical Society Certification

The American Chemical Society (ACS) recognizes certain undergraduate programs, including those of UCSC, to be of such quality as to entitle graduates to become ACS members immediately upon graduation. Graduates must be individually certified to the ACS by the Chemistry and Biochemistry Department chair if they have satisfactorily completed an approved program of study. ACS certification standards are rigorous; a graduate who has met them carries a distinction that is well recognized in the profession. Broadly speaking, ACS certification requirements are satisfied by completing CHEM 122 as an elective and graduating with a Chemistry B.S. (biochemistry concentration excluded). A year of study

in a major modern foreign language is recommended. More information is available from the Chemistry and Biochemistry undergraduate adviser.

General B.S. Degree

Course Requirements

The Bachelor of Science (B.S.) major program is designed for students who intend to pursue a professional career in chemistry. It is rigorous and broadly based. The course requirements for the B.S. major are as follows; please refer to each course description for a detailed listing of prerequisites.

Lower-Division Courses

General Chemistry:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1M	General Chemistry Laboratory	2
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2

Calculus:

Choose one of the following options:

Either these courses		
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
or these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

A student may combine the MATH 11 series with the MATH 19 series to complete this portion of the major requirement(s). For example, a student can take and complete MATH 19A and then take and complete MATH 11B.

Multivariable Calculus:

Choose one of the following options:

Either this course		
MATH 22	Introduction to Calculus of Several Variables	5
or these courses		
MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5
or this course		
AM 30	Multivariate Calculus for Engineers	5

Advanced Mathematics:

Choose one of the following courses:

AM 10	Mathematical Methods for Engineers I	5
MATH 21	Linear Algebra	5
MATH 24	Ordinary Differential Equations	5

Physics:

Choose one of the following options:

Either these courses

PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1
PHYS 5B	Introduction to Physics II	5
PHYS 5M	Introduction to Physics Laboratory	1
PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory	1

or these courses

PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics Laboratory	1
PHYS 6C	Introductory Physics III	5
PHYS 6N	Introductory Physics Laboratory	1

A student may combine the PHYS 5 series with the PHYS 6 series to complete this portion of the major requirement(s). For example, a student can take and complete PHYS 5A and 5L and then take and complete PHYS 6B and 6M and PHYS 6C and 6N.

Organic Chemistry:

CHEM 8A	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8B	Organic Chemistry	5
CHEM 8M	Organic Chemistry Laboratory	2

Upper-Division Courses**Intermediate Organic Chemistry:**

CHEM 110	Intermediate Organic Chemistry with Emphasis on Synthesis and Analytical Methods	5
CHEM 110L	Intermediate Organic Chemistry Laboratory	2

Inorganic Chemistry:

CHEM 151A	Chemistry of Metals	5
CHEM 151L	Inorganic Chemistry Laboratory	2

Biochemistry:

CHEM 103	Biochemistry	5
----------	--------------	---

Physical Chemistry:

CHEM 163A	Quantum Mechanics and Basic Spectroscopy	5
CHEM 163B	Chemical Thermodynamics	5
CHEM 163C	Statistical Thermodynamics and Kinetics	5
CHEM 164	Physical Chemistry Laboratory	5

One of the following laboratory courses:

CHEM 146A	Advanced Laboratory in Organic Chemistry	3
CHEM 146B	Advanced Laboratory in Inorganic Chemistry	3
CHEM 146C	Advanced Laboratory in Physical Chemistry	3

Students currently conducting senior thesis research are strongly encouraged to choose an advanced laboratory in the CHEM 146 series that is outside their research area.

Electives

At least two from the following list:

CHEM 122	Principles of Instrumental Analysis	5
CHEM 143	Organic Chemical Structure and Reactions	5
CHEM 144	Catalysis In Organic Synthesis Using Metals and Metalloids Based Reagents	5
CHEM 151B	Chemistry of the Main Group Elements	5
CHEM 156C	Materials Chemistry	5
CHEM 169	Chemistry and Biology of Drug Design and Discovery	5
CHEM 171	Chemical Biology	5
BIOC 100C	Biochemistry and Molecular Biology	5
METX 101	Sources and Fates of Pollutants	5
METX 102	Cell and Molecular Toxicology	5
OCEA 120	Aquatic Chemistry: Principles and Applications	5
OCEA 121	Aqueous Geochemistry	5
PHYS 180	Biophysics	5

CHEM 122: To receive certification from the American Chemical Society, you must complete CHEM 122.

BIOC 100A, BIOC 100B, BIOC 100C: Students who plan to do advanced work in biochemistry and molecular biology should take the Biochemistry and Molecular Biology (BIOC) 100 series. Completing the series will fulfill the requirement of CHEM 103 (Biochemistry) plus fulfill one elective. CHEM 103 is equivalent to BIOC 100A and BIOC 100B. Students can enroll into BIOC 100C once CHEM 103 is successfully completed.

Students may also satisfy the elective requirement by completing a Chemistry Graduate Course with permission of the instructor and department. Please consult with the department undergraduate adviser prior to enrolling.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement for the Bachelor of Science (B.S.) degree in chemistry is satisfied by completing:

CHEM 151L	Inorganic Chemistry Laboratory	2
-----------	--------------------------------	---

Plus one of the following courses:

CHEM 146A	Advanced Laboratory in Organic Chemistry	3
CHEM 146B	Advanced Laboratory in Inorganic Chemistry	3
CHEM 146C	Advanced Laboratory in Physical Chemistry	3

Comprehensive Requirement

The comprehensive requirement is a part of all UCSC degrees. In the Department of Chemistry and Biochemistry, there are two options for satisfying this requirement:

Senior thesis:

A senior research project based on original experimental or theoretical research.

CHEM 195A	Senior Research	5
CHEM 195B	Senior Research	5
CHEM 195C	Senior Thesis	5

At the conclusion of the project, the student submits a formal research paper to the faculty sponsor for review and a revision process. Students arrange for a faculty sponsor by consulting with a relevant faculty member within the chemistry and biochemistry or the biochemistry and molecular biology major programs. In some cases, faculty outside these major programs (for example, in biology, ocean sciences, microbiology and environmental toxicology, or Earth sciences) may be an appropriate sponsor. Students who select a sponsor outside the chemistry or the biochemistry and molecular biology major programs should have the title and description of the proposed thesis reviewed by the Department of Chemistry and Biochemistry undergraduate faculty adviser. Students, usually working in the laboratory of the faculty sponsor, acquire experimental and/or theoretical research experience and skills in the laboratory as well as instruction in the writing of a research paper. Students are expected to make satisfactory academic progress and be in good academic standing while they take CHEM 195 courses. Students who achieve excellence in both research and thesis may be awarded honors in the thesis upon graduation. Students are encouraged to apply for research funding opportunities on campus and external to the campus at the Undergraduate Research Opportunities website.

Senior essay:

An essay based on literature research.

CHEM 194	Senior Essay	5
----------	--------------	---

Students find a faculty sponsor and agree in advance on an appropriate topic of interest and a format. The student submits a draft essay to the sponsor for the revision process. Students

arrange for a faculty sponsor by consulting with a relevant faculty member within the chemistry and biochemistry major program. In some cases, faculty outside these major programs (for example, in biology, ocean sciences, microbiology and environmental toxicology, or Earth sciences) may be an appropriate sponsor. Students who select a sponsor outside the chemistry and biochemistry major program should have the title and description of the proposed essay reviewed by the Department of Chemistry and Biochemistry undergraduate faculty sponsor. Students acquire experience and skills in scientific literature research as well as in the writing of a research paper.

Planners

This is the ideal academic plan for those pursuing the chemistry B.S. major. If needed, this plan can be arranged differently.

Sample Four-Year Planner

	Fall	Winter	Spring
1st (frosh)	MATH 11 or MATH 19A CHEM 1A	MATH 11B or MATH 19B CHEM 1B & CHEM 1M	CHEM 1C & CHEM 1N MATH 21
2nd (soph)	CHEM 8A & CHEM 8L PHYS 6A & PHYS 6L	CHEM 8B & CHEM 8M MATH 22	CHEM 110 & CHEM 110L PHYS 6B & PHYS 6M
3rd (junior)	CHEM 163A PHYS 6C & PHYS 6N	CHEM 163B CHEM 164	CHEM 163C CHEM 103
4th (senior)	CHEM 146 CHEM elective Senior Essay or Thesis	CHEM 151A & CHEM 151L	CHEM elective

*CHEM 194, Senior Essay or Thesis: The Senior Essay; or CHEM 195A-CHEM 195B-CHEM 195C, Senior Thesis,

should be completed to satisfy the senior comprehensive requirement.

** CHEM 146A is offered in fall quarter; CHEM 146B or CHEM 146C is offered in spring.

Two of the required general education requirements will be fulfilled by the major requirements listed in the above planner (MF and SI). In addition to the specific courses shown in these planners, a student will also need to complete courses satisfying the following general education requirements: Cross- Cultural Analysis, Ethnicity & Race, Interpreting Arts & Media, Statistical Reasoning, Textual Analysis & Interpretation, Perspectives, and Practice

Sample Transfer Two-Year Planner

For students who have transferred in with the recommended courses. **Note:** Failure to do so may require additional time to degree. Please refer to the following academic planners that detail student plans with only the minimum transfer requirements completed.

	Fall	Winter	Spring
1st (junior)	CHEM 163A	CHEM 163B	CHEM 163C
	PHYS 6C & PHYS 6N	CHEM 164	CHEM 110 & CHEM 110L

	Fall	Winter	Spring
2nd (senior)	CHEM 146	CHEM 151A & CHEM 151L	CHEM elective
	CHEM elective	MATH 21	CHEM 103
	Senior Thesis or Essay		

*Recommended Courses

- General chemistry (full sequence with lab) CHEM 1A, 1B/CHEM 1M and 1C/CHEM 1N
- Organic chemistry (full sequence with lab) CHEM 8A/CHEM 8L, CHEM 8B/CHEM 8M
- Calculus-based physics PHYS 6A/CHEM 6L, PHYS 6B/PHYS 6M
- Single variable calculus (full sequence) MATH 11A, MATH 11B
- Multivariable calculus (one semester course) MATH 22

Biochemistry Concentration

The biochemistry concentration is designed for students who intend to pursue a career in biochemistry or in a related field

such as biotechnology, and it provides an exceptionally rigorous chemistry emphasis.

Course Requirements

Lower-Division Courses

General Chemistry:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1M	General Chemistry Laboratory	2
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2

Calculus:

Choose one of the following options:

Either these courses

MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5

or these courses

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

A student may combine the MATH 11 series with the MATH 19 series to complete this portion of the major requirement(s). For example, a student can take and complete MATH 19A and then take and complete MATH 11B.

Multivariable Calculus:

Either this course

MATH 22	Introduction to Calculus of Several Variables	5
---------	---	---

or these courses

MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5

or this course

AM 30	Multivariate Calculus for Engineers	5
-------	-------------------------------------	---

Advanced Mathematics:

Choose one of the following courses:

AM 10	Mathematical Methods for Engineers I	5
MATH 21	Linear Algebra	5
MATH 24	Ordinary Differential Equations	5

Introductory Biology:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5

Physics:

Choose one of the following options:

Either these courses

PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1
PHYS 5B	Introduction to Physics II	5
PHYS 5M	Introduction to Physics Laboratory	1
PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory	1
or these courses		
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics Laboratory	1
PHYS 6C	Introductory Physics III	5
PHYS 6N	Introductory Physics Laboratory	1

A student may combine the PHYS 5 series with the PHYS 6 series to complete this portion of the major requirement(s). For example, a student can take and complete PHYS 5A and 5L and then take and complete PHYS 6B and 6M and PHYS 6C and 6N.

Organic Chemistry:

CHEM 8A	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8B	Organic Chemistry	5
CHEM 8M	Organic Chemistry Laboratory	2

Upper-Division Courses

Intermediate Organic Chemistry:

CHEM 110	Intermediate Organic Chemistry with Emphasis on Synthesis and Analytical Methods	5
CHEM 110L	Intermediate Organic Chemistry Laboratory	2

Inorganic Chemistry:

CHEM 151A	Chemistry of Metals	5
CHEM 151L	Inorganic Chemistry Laboratory	2

Biochemistry:

BIOC 100A	Biochemistry and Molecular Biology	5
BIOC 100B	Biochemistry and Molecular Biology	5
BIOC 100C	Biochemistry and Molecular Biology	5
BIOC 110L	Advanced Biochemistry Laboratory	5

Physical Chemistry:

CHEM 163A	Quantum Mechanics and Basic Spectroscopy	5
CHEM 163B	Chemical Thermodynamics	5

CHEM 163C	Statistical Thermodynamics and Kinetics	5
-----------	---	---

Electives

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) Requirement. The DC Requirement in chemistry with a biochemistry concentration is satisfied by completing

CHEM 151L	Inorganic Chemistry Laboratory	2
BIOC 110L	Advanced Biochemistry Laboratory	5

Comprehensive Requirement

The comprehensive requirement is a part of all UCSC degrees. In the Department of Chemistry and Biochemistry, there are two options for satisfying this requirement:

Senior thesis:

A senior research project based on original experimental or theoretical research.

CHEM 195A	Senior Research	5
CHEM 195B	Senior Research	5
CHEM 195C	Senior Thesis	5

At the conclusion of the project, the student submits a formal research paper to the faculty sponsor for review and a revision process. Students arrange for a faculty sponsor by consulting with a relevant faculty member within the chemistry and biochemistry or the biochemistry and molecular biology major programs. In some cases, faculty outside these major programs (for example, in biology, ocean sciences, microbiology and environmental toxicology, or Earth sciences) may be an appropriate sponsor. Students who select a sponsor outside the chemistry or the biochemistry and molecular biology major programs should have the title and description of the proposed thesis reviewed by the Department of Chemistry and Biochemistry undergraduate faculty adviser. Students, usually working in the laboratory of the faculty sponsor, acquire experimental and/or theoretical research experience and skills in the laboratory as well as instruction in the writing of a research paper. Students are expected to make satisfactory academic progress and be in good academic standing while they take CHEM 195 courses. Students who achieve excellence in both research and thesis may be awarded honors in the thesis upon graduation. Students are encouraged to apply for research funding opportunities on campus and external to the campus at the Undergraduate Research Opportunities website.

Senior essay:

An essay based on literature research.

CHEM 194	Senior Essay	5
----------	--------------	---

Students find a faculty sponsor and agree in advance on an appropriate topic of interest and a format. The student submits a draft essay to the sponsor for the revision process. Students arrange for a faculty sponsor by consulting with a relevant

faculty member within the chemistry and biochemistry major program. In some cases, faculty outside these major programs (for example, in biology, ocean sciences, microbiology and environmental toxicology, or Earth sciences) may be an appropriate sponsor. Students who select a sponsor outside the chemistry and biochemistry major program should have the title and description of the proposed essay reviewed by the Department of Chemistry and Biochemistry undergraduate faculty sponsor. Students acquire experience and skills in scientific literature research as well as in the writing of a research paper.

Planners

This is the most general academic plan for this major. If needed, the plan can be rearranged.

	Fall	Winter	Spring
1st (frosh)	MATH 11 or MATH 19A CHEM 1A	MATH 11B or MATH 19B CHEM 1B & CHEM 1M	BIOL 20A CHEM 1C & CHEM 1N
2nd (soph)	CHEM 8A & CHEM 8L BIOE 20B	CHEM 8B & CHEM 8M MATH 22	CHEM 110 & CHEM 110L MATH 21
3rd (junior)	BIOC 100A PHYS 6A & PHYS 6L	BIOC 100B PHYS 6B & PHYS 6M	BIOC 100C PHYS 6C & PHYS 6N
4th (senior)*	CHEM 163A Senior Essay or Thesis	CHEM 163B CHEM 151A & CHEM 151L	CHEM 163C BIOC 110L

*CHEM 194, Senior Essay or Thesis: The Senior Essay; or CHEM 195A-CHEM 195B-CHEM 195C, Senior Thesis, should be completed to satisfy the senior comprehensive requirement.

Two of the required general education requirements will be fulfilled by the major requirements listed in the above planner (MF & SI). In addition to the specific courses shown in these planners, a student will also need to complete courses satisfying the following general education requirements: Cross- Cultural Analysis, Ethnicity & Race, Interpreting Arts & Media, Statistical Reasoning, Textual Analysis & Interpretation, Perspectives, and Practice

Sample Transfer Two-Year Planner

For students who have transferred in with the recommended *UC Transfer Pathway courses. **Note:** Failure to do so may require additional time to degree. Please refer to the following academic planners that detail student plans with only the minimum transfer requirements completed.

	Fall	Winter	Spring
1st (junior)	BIOC 100A	BIOC 100B	BIOC 100C CHEM 110 & CHEM 110L
2nd (senior)	CHEM 163A	CHEM 163B CHEM 151A & CHEM 151L	CHEM 163C BIOC 110L

*UC Transfer Pathway courses

- General chemistry (full sequence with lab) CHEM 1A, 1B/CHEM 1M and 1C/CHEM 1N
- Organic chemistry (full sequence with lab) CHEM 8A/CHEM 8L, CHEM 8B/CHEM 8M
- Calculus-based physics (full sequence with lab) PHYS 6A/PHYS 6L, PHYS 6B/M, PHYS 6C/PHYS 6N
- Single variable calculus (full sequence) MATH 11A, MATH 11B
- Multivariable calculus (one semester course) MATH 22
- Differential equations (one course) MATH 24 or Post-Transfer: Linear algebra (one course) MATH 21

Environmental Chemistry Concentration

As of the 2019-2020 academic year, the environmental concentration has been discontinued. We encourage students who may have an interest in environmental chemistry to possibly pursue a B.S. in Environmental Sciences. This relatively new major will teach undergraduates how to apply fundamental concepts of chemistry, physics, and math to environmental problems. If you would like to learn more about this new major, please contact the Earth and Planetary Sciences adviser.

For those continuing students who were declared prior to 2019-2020, please refer to the degree requirements published at the time of entering UCSC or subsequent catalog(s). Please contact the Chemistry and Biochemistry Undergraduate adviser for further information or questions on completing your degree.

BIOCHEMISTRY AND MOLECULAR BIOLOGY B.S.

Information and Policies

Introduction

Research at the macromolecular, molecular, and atomic levels is revolutionizing our understanding of the fundamental processes of life. Students interested in joining this search are best prepared by undertaking coursework in biology, chemistry, physics, mathematics, and computer science. The undergraduate major in Biochemistry and Molecular Biology (BMB) is offered by faculty who are actively engaged in research on biological systems.

Students who declare the BMB major earn a bachelor of science (B.S.) degree. The BMB major constitutes an integrated curriculum of basic instruction in biology, chemistry, mathematics, and physics, followed by the opportunity to pursue advanced study in specialized areas of interest. In modern, well-equipped laboratories, distinguished faculty are engaged in frontline research at UCSC. The Department of Chemistry and Biochemistry and the Department of Molecular, Cell, and Developmental Biology each host a very active seminar series in which internationally recognized scientists present their current research findings. Advanced BMB undergraduates are encouraged to attend.

The BMB program features close faculty-student interaction, stimulating learning environments, and opportunities for independent research and study. Students majoring in BMB are encouraged to become involved in research under the guidance of a faculty sponsor. Many students participating in this aspect of the program have made important contributions to the scientific literature.

Given the wide scope and interdisciplinary nature of this program, a considerable degree of flexibility has been incorporated into the major. All prospective majors should see the BMB academic adviser in the Chemistry and Biochemistry Department Office as early as possible. Junior transfer students or others with questions should consult the program website. A double major of BMB with the biological sciences majors or chemistry is not permitted. No minor is offered.

Academic Advising for the Program

The chemistry and biochemistry adviser provides counsel to undergraduate majors. Students are encouraged to seek out advising and assistance in planning their academic career to ensure completion of their major in a timely manner. For assistance please contact Chemistry Advising at chemistryadvising@ucsc.edu or visit our department website. Transfer students should also consult the **Transfer Information and Policy Section**.

Getting Started in the Major

Prospective majors should have a solid foundation in high school mathematics; familiarity with algebra, logarithms, trigonometry, and analytic geometry is particularly required.

Students taking chemistry at UC Santa Cruz begin with CHEM 1A or CHEM 1B, both of which require a strong background in high school chemistry.

Prerequisites

In order to determine what preparation may be needed to succeed in the general chemistry sequence, CHEM 1A, CHEM 1B, and CHEM 1C, students are encouraged to take the Chemistry Self-Assessment Examination.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop over the course of their studies. The program learning outcomes clearly communicate the faculty's expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes.

Students graduating with a B.S. in biochemistry and molecular biology should be able to:

- demonstrate mastery of a broad set of chemical knowledge concerning the fundamentals in the basic areas of the discipline (organic, inorganic, analytical, physical, and biochemistry);
- solve area-specific problems by identifying the essential parts of a problem, formulating a strategy for solving the problem, applying appropriate techniques to arrive at a solution, testing the correctness of the solution, and interpreting their results;
- use modern library search tools (such as SciFinder, PubMed, or Web of Science) to locate and retrieve scientific information about a topic, chemical, chemical technique, or an issue relating to chemistry;
- know and follow the proper procedures and regulations for safe handling and use of chemicals;
- understand the objective of their chemical experiments, properly carry out the experiments, and appropriately record and analyze the results;
- use computers in data acquisition and processing, and use available software as a tool in data analysis;
- use standard laboratory equipment, modern instrumentation, and classical techniques to carry out experiments;
- communicate the concepts and results of their laboratory experiments through effective writing and/or oral communication using the discipline standards for reporting and citation; and
- collaborate effectively as part of a team to solve problems, debate different points of view, and interact productively with a diverse group of team members.

Major Qualification Policy and Declaration Process

Major Qualification

Students must complete the following qualification courses, or their equivalents, each with a grade of C (2.0) or better and with a cumulative grade point average (GPA) of 2.50 or greater in these five required courses:

CHEM 1B	General Chemistry	5
CHEM 1C	General Chemistry	5
CHEM 8A	Organic Chemistry	5
BIOL 20A	Cell and Molecular Biology	5

Note that since CHEM 1A is prerequisite for CHEM 1C, students must also complete CHEM 1A with a grade of C or better. Transfer students must have a full year of general chemistry.

Plus one of the following options:

Either this course		
MATH 11A	Calculus with Applications	5
or this course		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

When calculating GPA to determine qualification:

- All courses must be taken for a letter grade, see Letter Grade Policy.
- For courses required to qualify for the major that have been satisfied with Advanced Placement credit based on an AP examination score (See Admissions AP Chart), students may substitute a grade of A for each course when calculating their GPA.
- Students with two or more grades of NP, C-, D+, D, D-, or F in courses required to qualify for the major are not eligible to declare.

Transfer students should also consult the **Transfer Information and Policy Section**.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal by submitting a letter to the chemistry adviser within 15 days from the date the notification was sent. Within 15 days of receipt of the appeal, the department will notify the student and their affiliated college of the decision. For more information about the appeal process, see the Appeal Process at at this website.

How to Declare a Major

You may declare a major as early as you would like, if you have decided which major to pursue and have satisfied prerequisites or qualification requirements (if any) for the major.

Students who enter UC Santa Cruz as frosh are required to be formally declared in a major before enrolling in their third year (or equivalent). Upper-division transfer students are

required to be declared in a major by the deadline in their second term at UCSC.

Each major/minor advising office has a process for declaring. To initiate the process to declare, please complete the online declaration petition located on the Department of Chemistry website. For assistance, please contact chemistry advising at chemistryadvising@ucsc.edu.

Students enrolled in their final qualification policy course at the major declaration deadline may submit the petition, but will not be declared until satisfactory grades have been posted.

Transfer Information and Policy

Transfer Admission Screening Policy

The Biochemistry and Molecular Biology program welcomes applications from transfer students who are prepared to enter the program at the junior level. To be considered for admission to UCSC as a biochemistry and molecular biology major, transfer students must pass equivalents of the following courses with a cumulative GPA of 2.50 or higher:

CHEM 1B	General Chemistry	5
CHEM 1C	General Chemistry	5
CHEM 8A	Organic Chemistry	5
BIOL 20A	Cell and Molecular Biology	5

Plus one of the following options:

Either this course		
MATH 11A	Calculus with Applications	5
or this course		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

In addition to the required transfer admissions courses, **we strongly recommend** that all transfer students complete the equivalent of CHEM 8B, prior to transfer, to be able to take BIOC 100A in the fall. Students entering at the junior level who wish to graduate in two years after coming to UC Santa Cruz should also complete the equivalents of the following preparatory courses prior to transfer:

- BIOE 20B, Development and Physiology
- MATH 11B, Calculus with Applications or MATH 19B, Calculus for Science, Engineering, and Mathematics
- CHEM 8L and CHEM 8M, Organic Chemistry with Laboratory
- MATH 22, Introduction to Calculus of Several Variables

The biochemistry major also requires one year of calculus-based physics with lab and one term of statistics before graduation from UCSC. You can complete these courses at your community college if your schedule allows, but you can also complete them after transfer without negatively affecting your competitiveness for admission to UCSC.

Students who complete **only the minimal introductory coursework** prior to transfer may take longer to complete their degree. More information on transfer pathways for chemistry at the University of California may be found here.

Students planning to transfer to UCSC as a biochemistry and molecular biology major from a California community college should reference assist.org to determine which courses are equivalent to these required courses.

California community college students who are prepared for their major and achieve a certain GPA may be eligible for a transfer admissions guarantee (TAG); more information here.

Getting Started at UCSC as a Transfer Student

Transfer students are highly encouraged to meet with the chemistry academic adviser in their first quarter. For assistance with advising, please contact Chemistry Advising at chemistryadvising@ucsc.edu. More information specific to transfer students may also be found at our department website.

Students who have satisfied the screening requirements can declare their major any time after coming to U Santa CruzC but are required to be declared in a major by the applicable deadline; in their second term at UCSC for students entering at the junior level.

Letter Grade Policy

For all students entering UCSC in fall 2001 and later, all courses used to satisfy any of the major requirements must be taken for a letter grade.

Course Substitution Policy

At least half of the upper-division courses (numbered 100–199) required for any biochemistry and molecular biology major must be taken through the chemistry or biology programs at UCSC, not as transfer credits from another department or institution. Students are advised to contact the Chemistry and Biochemistry Department undergraduate adviser before enrolling in numerous upper-division courses at other institutions. For more information on transferring courses to UCSC, please consult the Chemistry and Biochemistry Department website.

Double Majors and Major/Minor Combinations Policy

A double major of BMB with the biological sciences majors or chemistry is not permitted. No minor is offered.

Study Abroad

Honors

Honors in the majors are awarded to graduating students whose academic performance demonstrates excellence at a GPA of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

Program Planning Notes

Students who do not begin the lower-division requirements during their first year and who do not complete the organic chemistry requirements by the end of their second year will have difficulty completing the program within four years. The BMB academic adviser works closely with students interested in pursuing the major to ensure that they begin the program immediately and follow the appropriate steps toward completion.

It is strongly recommended that students avail themselves of the opportunities to obtain firsthand research experience through either independent study or senior thesis research.

A number of graduate courses in Biochemistry and Molecular Biology are offered by the molecular, cell, and developmental biology (MCDB), and chemistry and biochemistry departments. Advanced undergraduates possessing the necessary prerequisites may take one or more of these courses with the consent of the instructor.

Materials Fee

Biochemistry and Molecular Biology students should be aware of the materials fee required for some laboratory courses. The fee is billed to the student's account for specific laboratory materials purchased through the university. Fees generally range from \$18 to \$75 per course. Students may incur additional expenses purchasing individual supplies.

Requirements and Planners (Or Concentrations)

Course Requirements

Lower-Division Courses

General Chemistry

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1M	General Chemistry Laboratory	2
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2

Calculus

Either these courses		
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
or these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Multivariable Calculus

Either this course		
MATH 22	Introduction to Calculus of Several Variables	5
or these courses		

MATH 23A	Vector Calculus AND	5
MATH 23B or this course	Vector Calculus	5
AM 30	Multivariate Calculus for Engineers	5

A student may combine the MATH 11 series and MATH 19 series to complete this portion of the major requirement(s). For example, a student can take and complete MATH 19A and then take and complete MATH 11B.

Statistics

Either this course

STAT 5	Statistics	5
or these courses		
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Intro Biology

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOL 20L	Experimental Biology Laboratory	2

Organic Chemistry

CHEM 8A	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8B	Organic Chemistry	5
CHEM 8M	Organic Chemistry Laboratory	2

Physics

Either these courses

PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1
PHYS 5B	Introduction to Physics II	5
PHYS 5M	Introduction to Physics Laboratory	1
PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory	1
or these courses		
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics Laboratory	1
PHYS 6C	Introductory Physics III	5
PHYS 6N	Introductory Physics Laboratory	1

A student may combine the PHYS 5 series with the PHYS 6 series to complete this portion of the major requirement(s). For example, a student can take and complete PHYS 5A and 5L and then take and complete PHYS 6B and 6M and PHYS 6C and 6N.

Upper-Division Courses

Biochemistry and Molecular Biology

BIOC 100A	Biochemistry and Molecular Biology	5
BIOC 100B	Biochemistry and Molecular Biology	5
BIOC 100C	Biochemistry and Molecular Biology AND	5

Either this course

BIOL 101L	Molecular Biology Laboratory	2
BIOL 102L	Toxic RNA Laboratory I	5

Genetics

BIOL 105	Genetics	5
----------	----------	---

Cell Biology

BIOL 110	Cell Biology	5
----------	--------------	---

Eukaryotic Molecular Biology

BIOL 115	Eukaryotic Molecular Biology	5
----------	------------------------------	---

Physical Chemistry

CHEM 163A	Quantum Mechanics and Basic Spectroscopy	5
CHEM 163B	Chemical Thermodynamics	5

Senior Exit Lab

One of the following laboratory courses (also satisfies the Disciplinary Communication (DC) and Comprehensive Requirement):

BIOC 110L	Advanced Biochemistry Laboratory	5
BIOL 100L	Biochemistry Laboratory	5
BIOL 103L	Toxic RNA Laboratory III	5
BIOL 105L	Eukaryotic Genetics Laboratory	5
BIOL 109L	Yeast Molecular Genetics Laboratory	5
BIOL 110L	Cell Biology Laboratory	5
BIOL 115L	Eukaryotic Molecular Biology Laboratory	5
BIOL 121L	Environmental Phage Biology Laboratory	5
BIOL 186L	Undergraduate Research in MCD Biology	5
METX 119L	Microbiology Laboratory	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in Biochemistry and Molecular Biology is

satisfied by completing one of the Senior Exit Labs listed in the previous section.

The DC requirement must be satisfied at UC Santa Cruz and may not be transferred from another institution.

Comprehensive Requirement

Students must satisfy the comprehensive requirement by receiving a passing letter grade in any of the Senior Exit Labs listed in the previous section. In addition, students are encouraged to complete a senior thesis or a senior essay (see Chemistry and Biochemistry (p. 200) for more information).

Planners

This is the ideal academic plan for those pursuing the biochemistry and molecular biology B.S. major. If needed, this plan can be arranged differently.

Sample Four-Year Planner

	Fall	Winter	Spring
1st (frosh)	MATH 11A or MATH 19A	MATH 11B or MATH 19B	BIOL 20A
	CHEM 1A	CHEM 1B & CHEM 1M	CHEM 1C & CHEM 1N
2nd (soph)	BIOE 20B	MATH 22	BIOL 105
	CHEM 8A & CHEM 8L	CHEM 8B & CHEM 8M	STAT 5 or STAT 7 & STAT 7L
		BIOL 20L	
3rd (junior)	BIOC 100A	BIOC 100B	BIOC 100C
	PHYS 6A & PHYS 6L	PHYS 6B & PHYS 6M	BIOL 101L
4th (senior)	CHEM 163A	CHEM 163B	BIOL 110
	PHYS 6C & PHYS 6N	Senior exit lab	BIOL 115

Three of the required general education requirements will be fulfilled by the major requirements listed in the above planner (MF, SI & SR). In addition to the specific courses shown in these planners, a student will also need to complete courses satisfying the following general education requirements: Cross- Cultural Analysis, Ethnicity & Race, Interpreting Arts & Media, Textual Analysis & Interpretation, Perspectives, and Practice.

Sample Transfer Two-Year Planner

For students who have transferred in with the recommended *UC Transfer Pathway courses. **Note:** Failure to do so may require additional time to degree. Please refer to the following academic planners that detail student plans with only the minimum transfer requirements completed.

Sample Transfer Two-Year Planner

	Fall	Winter	Spring
1st (junior)	BIOC 100A	BIOC 100B	BIOC 100C
	PHYS 6A & PHYS 6L	PHYS 6B & PHYS 6M	BIOL 101L
	STAT 5 or STAT 7 & STAT 7L		BIOL 105
2nd (senior)	CHEM 163A	CHEM 163B	BIOL 110
	PHYS 6C & PHYS 6N	Senior exit lab	BIOL 115

*UC Transfer Pathway courses

- General biology with lab (full introductory sequence) BIOL 20A, BIOE 20B, BIOL 20L
- General chemistry with lab (one-year sequence) CHEM 1A, 1B & CHEM 1M, CHEM 1C & CHEM 1N
- Calculus for STEM majors (one-year sequence) MATH 11A & MATH 1B, MATH 22
- Organic chemistry with lab (one-year sequence) CHEM 8A & CHEM 1L, CHEM 8B & CHEM 8M

CHEMISTRY MINOR

For all students entering UC Santa Cruz in fall 2014 and later, all courses used to satisfy degree requirements in the chemistry and biochemistry minor must be taken for a letter grade.

For assistance please contact chemistry advising at chemistryadvising@ucsc.edu or visit our department website.

Course Requirements

Lower-Division Courses

Chemistry		
CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1M	General Chemistry Laboratory	2
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2
CHEM 8A	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2

CHEM 8B	Organic Chemistry	5
CHEM 8M	Organic Chemistry Laboratory	2

Calculus

One of the following options

Either these courses

MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5

or these courses

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Plus one of the following options

Either this course

MATH 22	Introduction to Calculus of Several Variables	5
---------	---	---

or these courses

MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5
	OR	
AM 30	Multivariate Calculus for Engineers	5

Physics

PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1

PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics Laboratory	1

PHYS 6C	Introductory Physics III	5
PHYS 6N	Introductory Physics Laboratory	1
	OR	

PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1

PHYS 5B	Introduction to Physics II	5
PHYS 5M	Introduction to Physics Laboratory	1

PHYS 5C	Introduction to Physics III	5
PHYS 5M	Introduction to Physics Laboratory	1

Upper-Division Courses

CHEM 110	Intermediate Organic Chemistry with Emphasis on Synthesis and Analytical Methods	5
CHEM 110L	Intermediate Organic Chemistry Laboratory	2
CHEM 163A	Quantum Mechanics and Basic Spectroscopy	5
CHEM 163B	Chemical Thermodynamics	5

Plus **two** chemistry upper-division electives. The Department of Chemistry and Biochemistry may approve appropriate substitutions for one of the upper-division electives from other departments to satisfy this requirement as long as the credits are not used to satisfy minimum credits of any another major.

Graduate Program

The Department of Chemistry and Biochemistry offers three graduate degrees: the Doctor of Philosophy (Ph.D.), a thesis Master of Science (M.S.), and a coursework M.S. The Ph.D. and thesis M.S. programs are designed to help students develop into independent scholars while pursuing the excitement of scientific research in a personal, supportive environment. Both the Ph.D. and the research M.S. programs prepare students for careers in academia, industry, government laboratories, and other settings requiring an advanced education in chemistry and related disciplines. The coursework M.S. does not require research and is suited to future teachers and others wishing to update or broaden their chemical expertise. Approximately 100 graduate students are currently enrolled in the graduate program.

The Department of Chemistry and Biochemistry invites well-known researchers from outside UC Santa Cruz to share and discuss their current research. Visiting speakers from other universities and government or industrial research labs expose students to advances at the frontiers of chemical research, offering the opportunity for personal contact with leading scientists. All Ph.D. and thesis M.S. students are required to enroll in the CHEM 291, Research Seminar, until they have advanced to candidacy.

Teaching assistantships provide both financial support and the opportunity to put into practice the required pedagogical training offered in CHEM 296 (presentation techniques, discussion strategies, laboratory teaching skills, laboratory safety procedures, and time management). Doctoral students may also be supported as graduate-student researchers.

CHEMISTRY M.S.

Introduction

Note: Applications for the Research Thesis path master's degree are not being accepted at this time.

The Department of Chemistry and Biochemistry offers a **coursework path** to the master's degree in which a student may earn the M.S. degree after approximately one year of coursework and a capstone seminar. This program serves the needs of such diverse groups as teachers on sabbaticals, technicians from industry and re-entry students. The coursework M.S. does not require research and is suited to future teachers and others wishing to update or broaden their chemical expertise. The degree can be finished in one year if the student is well prepared for attainment exams. No financial aid is available for this program, although student loans may be available based from the FAFSA (Free Application for Federal Student Aid) program.

Prerequisites: A bachelor of arts (B.A.) or bachelor of science (B.S.) degree in chemistry or biochemistry. Applicants with a bachelor's degree in another discipline must have taken all or most of the courses required for a B.A. or B.S. in chemistry or biochemistry at UC Santa Cruz.

Requirements

Course Requirements

Nine courses are required. Of these, at least seven must be lecture courses offered by the Department of Chemistry and Biochemistry. The remaining two courses may be lecture courses, seminars or independent study.

Of the seven Chemistry and Biochemistry lecture courses, at least four must be graduate level (200), but up to three may be advanced undergraduate level (100), excluding CHEM 109-CHEM 110. Courses used to satisfy attainment deficiencies (CHEM 163A-CHEM 163C, CHEM 151A, CHEM 103, and CHEM 143) do not count.

The seven lecture courses must include representatives from at least three of the chemistry subdisciplines: biochemistry, inorganic, organic, and physical.

For a further description of courses available, please visit the Graduate Student Handbook.

Other Requirements

A solid foundation in undergraduate chemistry is essential to a student's progress in graduate studies and research. For this reason, all graduate degree candidates are required to take **entrance (attainment) exams** to confirm their preparation in the fields of biochemistry, inorganic, organic and/or physical chemistry.

Students must satisfy the attainment requirement in three of four subdisciplines of their choosing.

Capstone Requirement

The candidate is required to present a passing literature seminar on a topic of their choosing, demonstrating the ability to read and critically analyze research data, to organize data into a coherent presentation, and to communicate the information in a clear and logical manner.

Applying for Graduation

M.S. students must complete the Application for the Master's Degree form by the appropriate quarter's deadline listed in the current Academic calendar.

The form can be found on the Graduate Division website or can be provided by the Chemistry Department. The form should be turned in to the graduate adviser and program coordinator for review and submission to the Graduate Division.

CHEMISTRY PH.D.

Introduction

Within the Ph.D. program students have the flexibility to design a course of study focused on personal research interests, and at the same time are expected to maintain the high intellectual standards associated with the doctoral degree. Research options include biochemistry, physical chemistry, biophysical chemistry, inorganic chemistry, bioinorganic chemistry, materials chemistry, physical-organic chemistry, and bioorganic chemistry. Some research groups are interdisciplinary and are involved in two or more of these areas.

The Program in Biomedical Sciences and Engineering fosters interdisciplinary research between the Chemistry and Biochemistry Department and the Departments of Molecular, Cell and Development Biology; Microbiology and Environmental Toxicology; and Biomolecular Science and Engineering. First-year students can do research rotations with over sixty faculty members, who come primarily from the Departments of Molecular, Cell, and Developmental Biology, Biomolecular Engineering, Chemistry and Biochemistry, and Microbiology and Environmental Toxicology.

Advancement to Candidacy

Course Requirements

Graduate students are expected to acquire an in-depth understanding of their area of specialization through a core curriculum that prepares them for advanced study and research. **The course requirement is 15 credits of core courses (three courses) and 10 credits (two courses) of electives.** Electives may be either at the graduate level (200 series) or at the advanced undergraduate level (100 series). Twenty of the 25 credits (four 5-credit courses) must be chemistry and biochemistry courses. The remaining 5 credits may be in chemistry and biochemistry or in a related discipline such as Molecular, Cell, and Developmental (MCD) biology, microbiology and environmental toxicology, physics, math, biomolecular engineering, electrical engineering, etc. Eligible electives do not include CHEM 163A/CHEM 163B/CHEM 163C, CHEM 109, CHEM 110, CHEM 100L, CHEM 143 or CHEM 151A, but can include CHEM 151B and CHEM 169. Undergraduate courses taken to satisfy attainment exam deficiencies cannot be counted. The lecture course requirement must be met before advancing to candidacy. Students may take more than the required five courses at any time depending on their interests or research.

Please refer to the Graduate Student Handbook for the current core and elective curriculum by area of specialization.

Pre-Qualifying Requirements

- Graduate students must choose their research adviser and join a lab in spring quarter (by May 1) of the first year. Ph.D. students choose two additional faculty members to complete their research committee.
- The Department of Chemistry and Biochemistry requires that all Ph.D. students give a literature seminar in their fourth, fifth or sixth quarter. Physical, inorganic and biochemistry students present a second-year

seminar on a topic of current interest in published research outside the candidate's own research area. Organic students present a second-year seminar on a topic of current interest within the candidate's own research area with the understanding that their actual Ph.D. research may be different and will be subject to the approval of their principal investigator.

Teaching Requirement

The focus on high quality undergraduate education is one of the most outstanding features of the UC Santa Cruz campus. Teaching is a job that is taken very seriously and many graduate students and faculty come to UCSC because they want to be in an atmosphere where both teaching and research are important. Therefore, we require that each chemistry graduate student serve as a teaching assistant for a **minimum of three quarters**.

Qualifying Examination

By the end of the seventh quarter (typically fall of the third year), pass the Ph.D. oral qualifying examination before an examining committee consisting of three research committee members plus one outside member approved by the graduate dean. The Ph.D. candidate presents (a) a summary of current research results and future directions, and (b) an original research proposal on a chemistry or biochemistry topic unrelated or partially related to the candidate's current thesis research. The latter must be approved by committee prior to the oral examination.

Dissertation

Dissertation

When the dissertation reading committee agrees that the research is ready to be submitted, the student writes the dissertation according to the guidelines prescribed by the University Library and the Graduate Division.

The dissertation, completed in the format specified by the Graduate Council and approved by the dissertation committee, must be submitted to the Graduate Division no later than the last day of the term in which the degree is to be awarded

Academic Progress

The academic progress of each continuing graduate student shall be reviewed annually by the student's department or committee of studies by the end of the spring term. Students will receive a notice with the committee findings and details of expected requirements for the following year.

Advanced students must meet with their dissertation reading committee at least once a year to report progress in an updated prospectus and get advice and guidance for the coming year.

The fourth-year review gives the student an opportunity to focus and plan their research and to begin shaping the final product—the research dissertation. With this goal in mind, the student presents their research progress to the committee, obtains feedback and receives guidance on future directions.

Progress discussions and reviews are held in fall quarter of the fifth year and the sixth year, if necessary, until the dissertation is submitted. The format is the same as described above for the fourth-year review.

Dissertation Defense

The dissertation seminar, a presentation open to the public, should be scheduled at least one week prior to submitting the dissertation. Students must submit the doctoral thesis to the dissertation reading committee for tentative approval at least one month before presenting a defense seminar. The faculty, through the dissertation reading committee chair, makes the final departmental decision regarding the awarding of the Ph.D. degree. The decision is subject to the approval of the graduate dean.

Applying for Graduation

Students close to completing their degree must file an application for the Ph.D. degree early in the quarter in which they wish to graduate (see the Academic and Administrative Calendar for deadline). The application is your official notification to the graduate dean of your intent to graduate. This form is available on the Graduate Division's web site.

Normative Time to Degree

The department has established five years and one quarter normative time to degree. Extensions may be granted in the 17th and 18th quarters if funding is available. Ph.D. candidates are expected to complete research and write the dissertation within nine quarters after advancing to candidacy following a successful Ph.D. oral qualifying examination. Financial support is not available after 18 quarters in the graduate program.

Ph.D. Program in Biomedical Sciences and Engineering (PBSE) Chemical Biology Biochemistry and Biophysics (CB3)

The Department of Chemistry and Biochemistry participates in the graduate Program in Biomedical Science and Engineering (PBSE) through its administration of the Chemical Biology, Biochemistry and Biophysics (CB3) training track. Sixty-one faculty members, who come primarily from the Departments of Molecular, Cell, and Developmental Biology; Biomolecular Engineering; Chemistry and Biochemistry; and Microbiology and Environmental Toxicology offer an unusual breadth of expertise and exceptional opportunities in interdisciplinary graduate research training. When students apply to the PBSE they indicate interest in one of four training tracks:

- Biomolecular engineering and bioinformatics (BMEB)
- Chemical biology, biochemistry and biophysics (CB3)
- Microbial biology and pathogenesis (MICRO)
- Molecular, cell and developmental biology (MCD)

The Ph.D. track in chemical biology, biochemistry and biophysics (CB3) provides students with the opportunity to

carry out cutting-edge research at the interface between biology and chemistry. The training program emphasizes analysis of molecular structure and mechanism as well as the use of organic chemistry to address biological questions. Interdisciplinary research is encouraged and supported by a diverse group of faculty.

After successful completion of all of the Ph.D. requirements, students in this track will be awarded a Ph.D. degree in chemistry from the Department of Chemistry and Biochemistry.

CB3 first-year students participate in three, seven-week laboratory rotations, while undertaking rigorous coursework that emphasizes critical evaluation of scientific models and experimental results. The program provides the flexibility to craft an individual curriculum that specifically suits the needs of the student's research interests. Second-year students take oral qualifying examinations and initiate independent research projects that ultimately lead to their dissertation. Advanced graduate students work under the direct supervision of faculty members in a highly interactive, collaborative research environment. All students participate in a variety of seminars, advanced special-topics courses, and research group meetings designed to provide continuing learning opportunities.

Laboratory Rotations

First-year students do three, seven-week rotations during fall and winter quarters in the laboratory of three PBSE-affiliated faculty members. Performance in each rotation is graded as satisfactory/unsatisfactory. At the end of each rotation period, students will present on their project either with a short talk or poster presentation.

Teaching Assistant

Serve as a TA for a minimum of two quarters. Students must meet this requirement before advancing to candidacy.

Oral Qualifying Examination

Pass the Ph.D. oral qualifying examination before an examining committee by the end of the student's sixth quarter. Students must demonstrate an expertise in the area of discipline that has been specified for the examination and be able to produce an acceptable plan for their dissertation.

Upon passing that examination, the Dissertation Reading Committee (DRC) is formed. The committee comprises the adviser plus two members of the CB3 track.

Third-Year Talk

Students present a public seminar that is based on their dissertation research in the spring quarter of their third year.

Advance to Candidacy

After successfully completing the third year talk and all other requirements have been completed, the student will advance to candidacy.

All students must meet with their dissertation advisory committee each year until completion of the thesis.

Dissertation

The final requirement for the Ph.D. degree is acceptance of the student's dissertation under the rules of the Academic Senate. A three-member dissertation advisory committee (DRC), headed by the student's research adviser, evaluates the dissertation for the department.

Students are required to give a public talk before their final submission on the principal results of their research.

Required Coursework

In addition to the courses listed below, CB3 Ph.D. students are required to take at least three additional graduate-level lecture courses by the end of the third year. A list of approved elective courses is available on the PBSE-CB3 website.

Students also enroll in Chemistry 291 (weekly research seminars) until they advance to candidacy.

CHEM 200A	Advanced Biochemistry: Biophysical Methods	5
CHEM 200B	Advanced Biochemistry: Macromolecular Structure and Function	5
CHEM 271	Chemical Biology	5

COASTAL SCIENCE AND POLICY M.S.

Introduction

Students in the University of California, Santa Cruz's Coastal Science and Policy Program (CSP) will develop a range of skills, interdisciplinary knowledge, and transdisciplinary approaches pertinent to creating real-world solutions to current and emerging concerns for coastal sustainability. At the core of the program, students will take courses focused on understanding and applying concepts of sustainability that include environmental, social, economic and legal dimensions. In addition, students will participate in communication, technical, and leadership skill development workshops and seminars. With this backbone, students will participate in solutions-based courses, a summer placement, and a capstone project executed in one-on-one collaboration with partners in business, governmental agencies and non-governmental organizations. With this combination of focused courses, skill set development, and practical experience, graduates will be well prepared and highly competitive for the diverse job opportunities in the growing fields of coastal science and policy. Although the focus of most material will be coastal or marine, the principles and practices learned by

the students will be applicable in any geographical location or sector.

The program will focus on practical training to provide integrated solutions to social and ecological challenges via three interconnected nodes that leverage UCSC's existing leadership in coastal sustainability:

- Conserving biodiversity, ecosystem processes, and human well-being,
- Mitigating hazards to nature and society, and fostering societal adaptation, and
- Maintaining security of marine, terrestrial, and freshwater food, water, and energy systems.

Preparation for Graduate Work in Coastal Science and Policy

Students admitted to the Master of Science (M.S.) in Coastal Science and Policy program will have completed a bachelor's degree at a four-year university in a field relevant to coastal sustainability. Relevant fields are diverse and include the natural sciences (e.g., biology, earth sciences, chemistry, oceanography), social sciences (e.g., economics or business, human ecology, political science, sociology), interdisciplinary programs (e.g., environmental studies and sciences) and engineering. Specific additional requirements prior to admission, regardless of undergraduate major and/or minors, include at least one course each in writing, and statistics, as well as at least one course each in at least two of three emphasis areas: biological sciences, physical sciences, and the social sciences, including policy and economics. We anticipate that competitive applicants to the program will have additional experience, through some combination of coursework, internships, jobs and research, in the environmental field.

Requirements

Course Requirements

The master's degree in coastal science and policy is a Plan II (capstone project) degree.

Core Courses

The M.S. program will include a core set of three foundational and six developmental courses.

Foundational Courses

CSP 200	Natural Sciences for Coastal Sustainability	5
CSP 210	Social Sciences for Coastal Sustainability	5
CSP 220	Economics for Coastal Sustainability	5

Developmental Courses

These courses cut across multiple disciplines and will be taught by core faculty, partner practitioner-scientists, and specialist trainers.

CSP 230	Integrated Problem-Based
---------	--------------------------

	Discussion	
BIOE 286	Experimental Design and Data Analysis	5
ENVS 240	Public Policy and Conservation	5
ENVS 250	Coastal Governance	5
CSP 244	Adaptation and Planning	5
BIOE 262	Facilitating Change in Coastal Science Policy	5

The core sequence serves many objectives, including creating and maintaining a strong program community, teaching core skills and topics, preparing for and building on the summer internship training, linking new and returning trainees, and generating a lively, ongoing set of intellectual conversations to explore, define, and pursue transformative contributions to conservation and sustainability science. In order to assure a strong interdisciplinary approach, courses will be taught by natural and social science faculty. In addition, all coursework will be solutions-based.

Elective Course

M.S. students will also take one additional elective course their first year. The elective will be drawn from courses currently offered across the UCSC campus. The selection of an elective course will be made in consultation with the student's faculty adviser, with the goal of broadening disciplinary knowledge. For example, incoming students with an undergraduate degree in the natural sciences (e.g., ecology) may be expected to take a graduate or upper-division undergraduate social sciences course (e.g., politics, economics).

Other Requirements

Summer Placement

During the summer at the end of their first year, M.S. students will be required to participate in an intensive summer placement program. This placement will consist of working within a partner agency, nongovernmental organization, or industry to provide trainees with practical awareness in the conservation and sustainability science field and give them firsthand immersion in the processes involved in implementing scientific knowledge and innovations as components of solutions to the complex challenge of domestic or international coastal sustainability. Placement projects will be required to include:

1. A real concern of the institutional partner,
2. Research, solutions development, and implementation, and
3. Strong interdisciplinary elements.

A faculty adviser will oversee the placement. It is the intention that, in collaboration with institutional partners and CSP advisers, students' capstone projects will emerge from, or be heavily informed by this summer placement experience.

Capstone Project

In the second year students will develop and implement a capstone project by enrolling in and fulfilling the requirements for CSP 290, Coastal Science and Policy Capstone Project (10 credits/quarter). This project will be developed in collaboration with institutional partners and CSP faculty and is intended to: a) address a real concern of the institutional partner, and b) include research, solutions development, and implementation, and be strongly interdisciplinary in nature. A faculty adviser team consisting of a socio-economic faculty and natural science faculty will oversee the capstone project. In the final quarter (spring, year 2) students will provide a written and oral presentation of the project to CSP students, faculty and institutional partners. The final presentations will be required to address both the socio-economic and natural science elements of the selected project.

CSP 290A	Coastal Science and Policy Capstone Project	10
CSP 290B	Coastal Science and Policy Capstone Project	10
CSP 290C	Coastal Science and Policy Capstone Project	10

Capstone Project Seminar

Each quarter of the second year, students will enroll in CSP 291, Coastal Science and Policy Capstone Seminar (2 credits/quarter). This seminar will serve as a forum, led by an interdisciplinary team of social/natural science faculty, for students to discuss current topics and approaches in sustainability science as well as an opportunity for students to present issues, topics, and proposals relevant to their capstone projects. Students enrolled in this course will provide oral and written peer review of other students' projects and presentations.

Planners

	Fall	Winter	Spring
1st Year	CSP 200	BIOE 286 & BIOE 286L (7 credits)	CSP 244
	CSP 210	ENVS 240	BIOE 262
	CSP 220	ENVS 250	Elective
	CSP 230		
2nd Year	CSP 290A (10 credits)	CSP 290B (10 credits)	CSP 290C (10 credits)
	CSP 291 (2 credits)	CSP 291 (2 credits)	CSP 291 (2 credits)

Applying for Graduation**COASTAL SCIENCE AND POLICY
DESIGNATED EMPHASIS****Introduction**

The goal of the Coastal Science and Policy (CSP) program is to train future leaders in the science and policy of coastal sustainability in order to propel sustainable use of coastal resources and conservation of coastal biodiversity, ecosystems, socio-economic integrity, and ecological services. A CSP designated emphasis (DE) will serve Ph.D. students who desire to strengthen their ability to directly connect their science to actionable solutions, doing so in collaboration with practitioner organizations.

Preparation for Designated Emphasis in Coastal Science and Policy

To receive a designated emphasis in Coastal Science and Policy, graduate students must complete the following requirements in addition to the degree requirements for the doctorate in their home department:

Requirements**Committee Composition and Departmental Approvals**

The student must have a designated emphasis adviser from the CSP core or affiliated faculty. The designated emphasis adviser commits to serving on the Ph.D. qualifying exam committee (typically as the outside member), and the dissertation reading committee.

Once a designated faculty adviser has been identified, students should file the Application for Designated Emphasis in CSP with the CSP graduate program administrator and adviser. The student must meet with this DE adviser to develop a coherent plan for meeting the requirements for the designated emphasis, preferably before the end of the student's first year. This plan must be approved by the CSP program director.

Course Requirements

Students are required to complete at least three CSP courses including two required courses (CSP 244 and CSP 245 [BIO 262]). Courses taken to fulfill program requirements within the home department will not count toward the designated emphasis program's required coursework.

CSP 244	Adaptation and Planning	5
BIOE 262	Facilitating Change in Coastal Science Policy	5

Additional Courses

Take at least one additional CSP course (minimum of five additional units) from the list below:

CSP 200	Natural Sciences for Coastal	5
---------	------------------------------	---

CSP 210	Sustainability Social Sciences for Coastal Sustainability	5
CSP 220	Economics for Coastal Sustainability	5
BIOE 286	Experimental Design and Data Analysis	5
BIOE 286L	Experimental Design and Data Analysis Lab	2
ENVS 240	Public Policy and Conservation	5
ENVS 250	Coastal Governance	5

Writing, Research and/or Teaching Requirements

As part of the CSP designated emphasis, students must work closely with a non-academic practitioner (from a government, private industry, or non-profit entity) on one interdisciplinary dissertation chapter in order to gain direct training in linking their research to a practical, scalable solution on a coastal sustainability issue.

Students should involve the partner in the conceptual design and execution of the project.

The CSP program, via core courses, workshops, and mentoring by CSP faculty, provides substantial guidance on how to collaborate with partners in a manner that fits well with the dissertation research process. This requirement ensures that the student's work will bring their knowledge to action that addresses real-world challenges and implements new, cutting-edge solutions.

Earth and Planetary Sciences

OTHER PROGRAMS OF INTEREST

Environmental Studies B.A. (p. **Error! Bookmark not defined.**)

Environmental Studies/Earth Science B.A. (p. 518)

Chemistry B.S. (p. 202)

Ecology and Evolutionary Biology B.S. (p. 253)

Science Education B.S. (p. 334)

The Earth and Planetary Sciences Department teaches and conducts research in a wide array of topics. We seek to answer questions such as:

How did the Earth form? How has it evolved since then? What makes up the interior of the Earth? How were Earth's ocean and atmosphere generated, and how have they changed through time?

What is the history of life on Earth? What are the causes and effects of past mass extinctions?

How do mountain ranges form? What causes earthquakes? What causes island chains to form? What controls the evolution of glaciers? How do we prevent coastal erosion? How well can we predict tsunamis?

What has Earth's climate been like in the past? How will climate change in the future? What changes are likely in Earth's atmospheric properties?

What controls the supply and quality of our freshwater resources?

How are other planets in our solar system different from Earth? How did they evolve to their present state? How have the impacts of asteroids on Earth and other planets affected their evolution?

A variety of methods and tools are used to help us address these questions. Geologists examine rocks and geologic formations in order to understand the processes that control their formation and evolution. Geochemists and mineralogists examine the chemical and mineral composition of rocks, sediments, and fossils using a variety of sophisticated analytical instruments. Geophysicists use seismometers to not only record earthquakes, but also to learn about the deeper parts of the Earth, which are studied in tandem using high-pressure experiments. Environmental scientists collect samples of the atmosphere, rivers, lakes, and the oceans, sometimes requiring the use of aircraft and ships. Spacecraft have visited and explored all of the planets in our solar system. Space-based satellites have provided a massive amount of data about Earth over the past few decades. Scientists from all disciplines use computer models to help them understand these complex systems.

The Department of Earth and Planetary Sciences offers a number of degrees that teach undergraduate and graduate students the knowledge and skills necessary to address these and many other questions. Along with the standard Earth sciences major, we offer degrees with concentrations in environmental geology, geology, ocean sciences, and planetary sciences. We also offer combined majors with environmental studies and anthropology. A minor in Earth sciences is also available. We offer courses across a wide range of topics, allowing students to tailor the curriculum to their interests. Courses are comprised of not only classroom lectures, but frequently field trips, laboratories, and computer exercises are involved. Many related courses are offered by other departments such as Ocean Sciences, Microbiology and Environmental Toxicology, Environmental Studies, Biological Sciences, Chemistry and Biochemistry, and Astronomy and Astrophysics. The university capstone requirement is often fulfilled by attending the departmental field camp, or by completing a senior research thesis, but other choices are also possible.

Graduates of our department continue on to a variety of careers, such as:

- Business and industry
- Geological and environmental consulting
- Governmental agencies at the federal, state, and local level
- Non-profit organizations
- Research at universities, governmental research institutions, or other scientific agencies
- Graduate/professional school in areas such as science, engineering, teaching, law, public health, business

For more information about the people in the department, their areas of interest, departmental facilities, contact e-mails

and phone numbers, and how to apply to join our department as an undergraduate or graduate student, please see our website.

Undergraduate Program

Classes suitable for non majors: EART 1, EART 2, EART 5, EART 8, EART 10, EART 12, EART 20, EART 30.

EARTH SCIENCES B.S.

Information and Policies

Introduction

The bachelor of science (B.S.) program is designed for students who intend to pursue professional careers in Earth and planetary sciences, engineering, policy, law, teaching, or business or who otherwise desire the broad, quantitative training available at UC Santa Cruz. In addition to providing comprehensive preparation in the basic physical sciences, and particular breadth and depth in Earth and planetary sciences, the curriculum is structured to prepare students for the competitive graduate school and career marketplace.

The core of the major includes calculus, physics, chemistry, and a group of comprehensive Earth and planetary sciences courses. For the standard B.S., students then select at least six additional courses from a diverse list of upper-division electives, with at least two that involve significant laboratory or field data acquisition and analysis. These electives, often in combination with additional upper-division courses from this and related departments, provide the student with expertise in one or more subdisciplines within Earth sciences.

Elective distributions can be designed to emphasize earthquake and faulting studies, Earth surface processes, Earth system sciences, geologic hazards, geology, crustal and deep-Earth geophysics, marine geophysics, and water resources. Four formal concentrations, all with specific course requirements and leading to an Earth and planetary sciences B.S., are available: geology, environmental geology, ocean sciences, and planetary sciences. A senior comprehensive experience (senior thesis, geologic field camp, or intensive capstone course) is required of all majors.

Academic Advising for the Program

A student who wants to become an Earth sciences major should contact the Earth and Planetary Sciences Department undergraduate staff adviser, epsadvising@ucsc.edu, as soon as possible. Students will submit a declaration of major petition, and are required to meet with the undergraduate adviser to plan their program in detail. Relevant courses taken at UC Santa Cruz or other institutions may be substituted for degree requirements by approved petition. Please see the undergraduate adviser for the substitution petition form and more information about this process. Transfer students should consult the Transfer Information and Policy section for more detailed information about academic advising.

Getting Started in the Major

Welcome! Now that you are a registered freshman, the following information is your guide to getting started in your Earth sciences major.

All freshmen are required to complete summer orientation, for more information visit Campus Orientation Programs. As a reference, we provide an online freshmen orientation that includes everything you need to know to get started on your Earth science major. If you have already attended orientation and simply need a refresher on getting enrolled, see our Freshmen Enrollment Guide.

Students with advanced placement credit must provide Admissions an official copy of your test score. You can verify your Advanced Placement (AP) examinations credit in your MyUCSC portal. For information on how your AP credit applies to your enrollment and your major, see our advanced placement credit page. If you have taken a college-level course that you would like credit for, you must send an official transcript to Admissions. If you wish to have that same course applied toward your major requirements, send an unofficial copy of your transcripts to epsadvising@ucsc.edu.

If you have already been admitted to UC Santa Cruz as a transfer student, our transfer orientation provides instructions on how to transfer your coursework to UC Santa Cruz, the advising and support available, and how to enroll. Our online transfer orientation provides all the critical information you need to transition to UC Santa Cruz and begin your major coursework.

Program Learning Outcomes

Students graduating with a B.S. in Earth and planetary sciences (all concentrations) should be able to:

1. understand the processes governing the properties and evolution of Earth's interior and surface;
2. identify rocks and minerals, and describe their connection to geologic processes;
3. utilize algebraic mathematical tools to quantitatively address questions in the geosciences; and
4. write in a clear, organized, and logical fashion using disciplinary standards for reporting and citation.

Major Qualification Policy and Declaration Process

Major Qualification

Transfer students should consult the Transfer and Information Policy section for information about major qualification.

To qualify for the Earth sciences B.S. (including all concentrations within the major), a student must complete (with a minimum grade of C) one of the following introductory courses in physical geology:

EART 5	California Geology	5
EART 10	Geologic Principles	5
EART 20	Environmental Geology	5

Transfer students may take an approved substitution for one of the above courses and should consult ASSIST.org for equivalencies.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal by submitting a letter to the Earth and Planetary Sciences adviser, epsadvising@ucsc.edu, within 15 days from the date the notification was sent. Within 15 days of receipt of the appeal, the department will notify the student and their affiliated college of the decision.

How to Declare a Major

Students who qualify start the declaration process by scheduling an appointment with the department staff adviser. You must consult with the department's undergraduate staff adviser to discuss options for the degree and coursework priorities before you start the process of officially declaring your major.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific courses for consideration of admission to UC Santa Cruz.

The Earth and Planetary Sciences Department welcomes applications from transfer students who are prepared to enter as Earth Sciences majors. Students should reference assist.org to determine course equivalencies.

Transfer students planning to major in Earth and planetary sciences are recommended to complete equivalents to as many of the the following lower-division pre-requisite courses (including the associated laboratory components) as possible:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1M	General Chemistry Laboratory	2
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2

Plus one of the following options:

Either these courses		
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
or these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Plus all of the following courses:

PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics Laboratory	1

Plus one of the following options:

Either these courses		
EART 5	California Geology	5
EART 5L	California Geology Laboratory	1
or these courses		
EART 10	Geologic Principles	5
EART 10L	Geologic Principles Laboratory	1
or these courses		
EART 20	Environmental Geology	5
EART 20L	Environmental Geology Laboratory	1

Transfer students planning on attending UC Santa Cruz to pursue an Earth and Planetary Sciences major should contact the undergraduate adviser for transfer preparation information and reference assist.org to determine which courses are equivalent to these courses. Having completed as much of this coursework as possible prior to transferring allows students greater flexibility in scheduling and completing their major.

Getting Started at UCSC as a Transfer Student

Whether you are planning for your future transfer or are already admitted to UC Santa Cruz, we aim to provide our transfer students the information and support needed to successfully complete a science degree at UCSC.

Once you have submitted your intent to register at UC Santa Cruz, here is a step-by-step guide to transferring your coursework and enrolling:

1. **Confirm you are a proposed Earth sciences major.** If you are not sure of your status, log on to your MyUCSC portal to view your proposed major. If your major is proposed Earth sciences you are all set. If the proposed major listed is not Earth Sciences, you will need to meet with the adviser for Earth Sciences.
2. **Once your courses have been articulated, you will receive an email from our office.** This email will include information on how your coursework articulated, suggestions for Fall enrollment, and invite you to make an appointment to talk with your major adviser.
3. **Make an appointment to talk to an adviser.** Your confirmation email will include instructions for scheduling an advising appointment. Appointments are available either by phone or in person.
4. **Participate in Transfer Orientation and Welcome Week.** Transfer Orientation provides instructions on how to transfer your coursework to UCSC, the advising and support available, and how to enroll. Our online transfer orientation provides all the critical information you need to transition to UCSC and begin your major coursework.
The department also hosts a transfer student welcome in the fall that provides new transfer students an opportunity to meet other transfer students, familiarize

themselves with the campus and the available resources. Welcome Week includes presentations on the Earth sciences majors, including an overview of the field courses offered and an introduction on how to get involved in undergraduate research.

- Declaring the Earth Sciences major.** In order to declare the Earth sciences major transfer students must complete EART 5, or EART 10 or EART 20 or an approved equivalent course (with a C or better) and meet with the Earth and Planetary Sciences Department adviser by the declaration deadline.

Letter Grade Policy

All courses used to satisfy requirements for any of the Earth and planetary science majors must be taken for a letter grade with the exception of the following courses, which may be taken Pass/No Pass: EART 195 Senior Thesis, EART 198 Internship, EART 199 Tutorial. Combined majors (Earth sciences/anthropology and Earth sciences/environmental studies) are currently exempt from this policy.

Course Substitution Policy

Relevant courses taken at UC Santa Cruz or other institutions may be substituted for degree requirements by approved petition. Please see the undergraduate adviser for the substitution petition form and more information about this process.

Double Majors and Major/Minor Combinations Policy

Study Abroad

Honors

Honors in the major (all concentrations) and in the combined major with anthropology are determined by a review of grades (typically 3.50 or above) at the time a student applies for graduation. A faculty committee makes the decision based on the quality of all coursework, but especially in the courses required for the major. Extra coursework or independent study as well as more intensive or rigorous coursework and the quality of a capstone project may also be taken into consideration. Honors in the combined major with environmental studies are evaluated by the Environmental Studies Department. Highest honors may also be awarded in exceptional cases when a student's overall grade point average (GPA) is above 3.75 and performance in the senior capstone requirement is equally outstanding. The department reserves the right to withhold honors and highest honors based on other criteria, such as an incident of academic dishonesty.

Honors on the senior thesis are determined independently of major honors, and must be approved by two faculty readers.

Standard Earth Sciences Major

Course Requirements

Lower-Division Courses

All of the following courses:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1M	General Chemistry Laboratory	2
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2

Plus one of the following options:

Either these courses		
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
or these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
or these courses		
AM 15A	Case-Study Calculus I	5
AM 15B	Case-Study Calculus II	5

Plus one of the following courses:

MATH 22	Introduction to Calculus of Several Variables	5
MATH 23A	Vector Calculus	5
EART 111	Mathematics in the Earth Sciences	5

Plus all of the following courses:

PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics Laboratory	1

Plus one of the following options:

Either these courses		
EART 5	California Geology	5
EART 5L	California Geology Laboratory	1
or these courses		
EART 10	Geologic Principles	5
EART 10L	Geologic Principles Laboratory	1
or these courses		
EART 20	Environmental Geology	5
EART 20L	Environmental Geology Laboratory	1

Upper-Division Courses

All of the following courses:

EART 110A	Evolution of the Earth	5
EART 110L	Evolution of the Earth	2

	Laboratory	
EART 110B	Earth as a Chemical System	5
EART 110M	Earth as a Chemical System Laboratory	2
EART 110C	The Dynamic Earth	5
EART 110N	The Dynamic Earth Laboratory	2

Two field/laboratory/data analysis

Lecture/lab combinations count as one course. The following courses satisfy this requirement:

EART 107	Remote Sensing of the Environment	5
EART 109	Elements of Field Geology	5
EART 109L	Field Geology Laboratory	2
EART 116	Hydrology	5
EART 119	Introductory Computer Programming for Geoscientists	5
EART 120	Sedimentology and Stratigraphy	5
EART 120L	Sedimentology and Stratigraphy Laboratory	2
EART 125	Statistics and Data Analysis in the Geosciences	5
EART 130	Igneous and Metamorphic Petrology	5
EART 130L	Igneous and Metamorphic Petrology Laboratory	2
EART 135L	Practical Geochemistry	5
EART 140	Geomorphology	5
EART 140L	Geomorphology Laboratory	2
EART 142	Engineering Geology for Environmental Scientists	5
EART 146	Groundwater	5
EART 148	Glaciology	5
EART 150	Structural Geology	5
EART 150L	Structural Geology Laboratory	2
EART 189A	Geographic Information Systems with Applications in Earth Sciences	5
EART 189B	Summer Field Study	5
EART 191C	Practical Geophysics	5

Courses used to satisfy the senior comprehensive requirement cannot be used to satisfy this requirement.

Electives

At least four additional upper-division elective courses from Earth sciences or ocean sciences offerings must be completed. Students are encouraged to take more than the minimum number of elective courses and may craft an elective distribution from many areas of specific research and career interests.

EART 198 may not be used to satisfy this requirement.

Lecture/lab combinations count as one course.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) general education requirement. Students in the Earth Sciences B.S. major must

complete a minimum of two (2) courses from the list of courses that in combination satisfies the DC general education requirement. Courses taken to satisfy the DC requirement may also satisfy upper-division elective or senior comprehensive requirements. Consult one of the Earth and planetary sciences advisers for the most up-to-date list of scheduled classes.

Currently the list (subject to change) consists of:

EART 100	Vertebrate Paleontology	5
EART 101	Invertebrate Paleobiology	5
EART 102	Marine Geology	5
EART 104	Geologic Hazards	5
EART 109	Elements of Field Geology	5
EART 120	Sedimentology and Stratigraphy	5
EART 140	Geomorphology	5
EART 146	Groundwater	5
EART 148	Glaciology	5
EART 150	Structural Geology	5
EART 160	Planetary Science	5
EART 189B	Summer Field Study	5
EART 191A	Climate Change Science and Policy	5
EART 195	Senior Thesis	5

Comprehensive Requirement

All students must satisfy the senior comprehensive requirement. The intent of this requirement is to synthesize knowledge and skills from a student's undergraduate career. Therefore, prior to completing an activity to satisfy the senior comprehensive requirement, students should have already completed EART 110A, one of EART 110B or EART 110C, and three other upper-division courses that fulfill major requirements. Students should consult an adviser if they have any questions about the timing of their proposed comprehensive requirement activity.

Note: Courses used to satisfy the senior comprehensive requirement cannot be used to satisfy the upper-division elective requirement or the field/laboratory/data analysis requirement.

To satisfy the comprehensive requirement, each student in these majors must complete one of the following options:

Satisfactory completion of Summer Field

EART 189A	Geographic Information Systems with Applications in Earth Sciences	5
EART 189B	Summer Field Study	5

Satisfactory completion of a senior thesis

A senior thesis must include a significant element of independent research or original work and can only be undertaken after an agreement is obtained from a faculty member to supervise it. It is recommended that students allocate three quarters for the thesis process.

Students may take EART 199, Independent Study, as part of performing the research for their senior thesis. It is required that each student enroll in and pass EART 195: Senior Thesis, in the academic quarter during which they complete their thesis.

EART 195 Senior Thesis 5

Satisfactory completion of one of the following capstone course offerings:

EART 191A Climate Change Science and Policy 5
 EART 191B Planetary Capstone 5
 EART 191C Practical Geophysics 5

Capstone course offerings vary year to year. If you are interested in completing a capstone course please contact the Earth sciences adviser.

Other Options

Other options such as external field research experiences or internships may be suitable by permission of the faculty adviser.

Please meet with an adviser if you have an idea to propose.

Planners

Students planning a professional career in the Earth and planetary sciences should take more than the minimum number of courses required for the major if possible. Four-year students have ample flexibility to take additional electives if they begin with the required courses in their second year. Junior transfers also have flexibility if they have taken most of their preparatory courses in calculus, chemistry, and physics before entry. Further advice can be obtained from the undergraduate adviser and from faculty members.

Sample Four-Year Planner

Year	Fall	Winter	Spring
1st (frosh)	CHEM 1A	MATH 11A or MATH 19A	EART 10 & EART 10L
		CHEM 1B & CHEM 1M	MATH 11B or MATH 19B
			CHEM 1C & CHEM 1N
2nd (soph)	EART 110A & EART 110L*	EART 110B & EART 110M*	PHYS 6B & PHYS 6M
	MATH 23A or EART 111	PHYS 6A & PHYS 6L	
3rd (junior)	EART elective	EART elective	EART 110C & EART 110N EART elective

4th (senior)	EART elective	EART elective	EART 189A* or senior thesis
	(sr thesis only) EART 199†	(sr thesis only) EART 199†	(EART 195)†
	EART elective		

In addition to the specific courses shown in these planners, a student must complete courses satisfying the CC, ER, IM, SR, and TA general education requirements.

*Students who wish to complete their capstone with EART 189A and EART 189B should be aware that the following courses are prerequisites: EART 109 and EART 109L, EART 110A and EART 110L, and EART 110B and EART 110M. Students must also complete EART 189B in summer to fulfill the summer field capstone.

†Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require at least two or three quarters for completion.

Sample Transfer (Two-Year) Planner

This planner assumes that students have completed all lower-division requirements, other than PHYS 6A and PHYS 6L, PHYS 6B and PHYS 6M, and advanced math.

Year	Fall	Winter	Spring
1st (junior)	EART 111	PHYS 6A & PHYS 6L	PHYS 6B & PHYS 6M
	EART 110A & EART 110L	EART 110B & EART 110M	EART 110C & EART 110N
2nd (senior)	EART elective	EART elective	EART elective
	EART elective	EART elective	EART elective
	(Sr thesis only) EART 199†	(Sr thesis only) EART 199†	EART 189A* or senior thesis (EART 195)†

*Students who wish to complete their capstone with EART 189A and EART 189B should be aware that the following courses are prerequisites: EART 109 and EART 109L, EART 110A and EART 110L, and EART 110B and EART 110M. Students must also complete EART 189B in summer to fulfill the summer field capstone.

†Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require at least two or three quarters for completion.

Geology Concentration

Course Requirements

Lower-Division Courses

All of the following courses:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1M	General Chemistry Laboratory	2
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2

Plus one of the following options:

Either these courses

MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5

or these courses

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
----------	--	---

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
----------	--	---

or these courses

AM 15A	Case-Study Calculus I	5
AM 15B	Case-Study Calculus II	5

Plus one of the following courses:

MATH 22	Introduction to Calculus of Several Variables	5
---------	---	---

MATH 23A	Vector Calculus	5
----------	-----------------	---

EART 111	Mathematics in the Earth Sciences	5
----------	-----------------------------------	---

Plus all of the following courses:

PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1

PHYS 6B	Introductory Physics II	5
---------	-------------------------	---

PHYS 6M	Introductory Physics Laboratory	1
---------	---------------------------------	---

Plus one of the following options:

Either these courses

EART 5	California Geology	5
EART 5L	California Geology Laboratory	1

or these courses

EART 10	Geologic Principles	5
EART 10L	Geologic Principles Laboratory	1

or these courses

EART 20	Environmental Geology	5
EART 20L	Environmental Geology	1

Laboratory

Upper-Division Courses

All of the following courses:

EART 109	Elements of Field Geology	5
EART 109L	Field Geology Laboratory	2
EART 110A	Evolution of the Earth	5
EART 110L	Evolution of the Earth Laboratory	2
EART 110B	Earth as a Chemical System	5
EART 110M	Earth as a Chemical System Laboratory	2
EART 110C	The Dynamic Earth	5
EART 110N	The Dynamic Earth Laboratory	2

Two of the following:

Where the lab course follows a lecture course the pair of courses counts as a single course.

EART 120	Sedimentology and Stratigraphy	5
EART 120L	Sedimentology and Stratigraphy Laboratory	2

EART 130	Igneous and Metamorphic Petrology	5
----------	-----------------------------------	---

EART 130L	Igneous and Metamorphic Petrology Laboratory	2
-----------	--	---

EART 140	Geomorphology	5
----------	---------------	---

EART 140L	Geomorphology Laboratory	2
-----------	--------------------------	---

EART 150	Structural Geology	5
----------	--------------------	---

EART 150L	Structural Geology Laboratory	2
-----------	-------------------------------	---

Electives

At least three additional upper-division elective courses (5+ credits each) from Earth sciences or ocean sciences offerings must be completed. EART 198 may not be used to satisfy this requirement. Students are encouraged to take more than the minimum number of elective courses and may craft an elective distribution from many areas of specific research and career interests.

Lecture/lab combinations count as one course.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) general education requirement. Students in the Earth Sciences B.S. major must complete a minimum of two (2) courses from the list of courses that in combination satisfies the DC general education requirement. Courses taken to satisfy the DC requirement may also satisfy upper-division elective or senior comprehensive requirements. Consult one of the Earth and planetary sciences advisers for the most up-to-date list of scheduled classes. Currently the list (subject to change) consists of:

EART 100	Vertebrate Paleontology	5
EART 101	Invertebrate Paleobiology	5
EART 102	Marine Geology	5
EART 104	Geologic Hazards	5
EART 109	Elements of Field Geology	5
EART 120	Sedimentology and Stratigraphy	5

EART 140	Geomorphology	5					
EART 146	Groundwater	5					& CHEM 1N
EART 148	Glaciology	5					
EART 150	Structural Geology	5	2nd (soph)	EART 110A & EART 100L	EART 110B & EART 110M	EART 109 & EART 109L	
EART 160	Planetary Science	5					
EART 189B	Summer Field Study	5					
EART 191A	Climate Change Science and Policy	5		MATH 23A or EART 111	PHYS 6A & PHYS 6L	PHYS 6B & PHYS 6M	
EART 195	Senior Thesis	5					

Comprehensive Requirement

All students must satisfy the senior comprehensive requirement.

The intent of this requirement is to synthesize knowledge and skills from a student's undergraduate career and to provide the instructional hours in the field needed to prepare students for the California professional geologist licensing requirements. Therefore, prior to completing an activity to satisfy the senior comprehensive requirement, students should have already completed EART 110A, one of EART 110B or EART 110C, and three other upper-division courses that fulfill major requirements. Students should consult an adviser if they have any questions about the timing of their proposed comprehensive requirement activity.

Note: Courses used to satisfy the senior comprehensive requirement **cannot** also be used to fulfill the upper-division elective requirement.

To do so, each student in the geology concentration must complete:

Satisfactory completion of Summer Field

EART 189A	Geographic Information Systems with Applications in Earth Sciences	5					EART 120 & EART 120L or EART 130 & EART 130L or elective
EART 189B	Summer Field Study	5					EART 120 & EART 120L or EART 130 & EART 130L or elective

Planners

Students planning a professional career in the Earth and planetary sciences should take more than the minimum number of courses required for the major if possible. Four-year students have ample flexibility to take additional electives if they begin with the required courses in their second year. Junior transfers also have flexibility if they have taken most of their preparatory courses in calculus, chemistry, and physics before entry. Further advice can be obtained from the undergraduate adviser and from faculty members.

Sample Four-Year Planner

Year	Fall	Winter	Spring
1st (frosh)	CHEM 1A	MATH 11A or MATH 19A	EART 10 & EART 10L
		CHEM 1B & CHEM 1M	MATH 11B or MATH 19B
			CHEM 1C

3rd (junior)

EART 140 & EART 140L or elective

EART 110C & EART 110N
EART 120 & EART 120L or EART 130 & EART 130L or elective

4th (senior)

EART 150 & EART 150L or elective

EART 140 & EART 140L or elective

EART 189A*

EART 120 & EART 120L or EART 130 & EART 130L or elective

* Students must also complete EART 189B in summer to fulfill the summer field capstone.

Sample Two-Year Planner

This planner assumes that students have completed all lower-division requirements other PHYS 6A and PHYS 6L, PHYS 6B and PHYS 6M, and advanced math.

Year	Fall	Winter	Spring
1st (junior)	EART 111	PHYS 6A & PHYS 6L	PHYS 6B & PHYS 6M
	EART 110A & EART 110L	EART 110B & EART 110M	EART 109 & EART 109L
2nd (senior)	EART 150 & EART 150L or elective	EART 140 & EART 140L or elective	EART 120 & EART 120L or EART

		130 & EART 130L or elective
EART elective	EART elective	EART 110C & EART 110N EART 189A*

*Students must also complete EART 189B in summer to fulfill the summer field capstone.

Environmental Geology Concentration

The environmental geology concentration is designed to provide quantitative preparation for career pathways involving interdisciplinary study of the environment with a geological emphasis. Additional biology and environmental studies courses are required for this concentration along with other distributions of upper-division requirements and electives.

Course Requirements

Lower-Division Courses

Choose one of the following options:

Either these courses

EART 20	Environmental Geology	5
EART 20L	Environmental Geology Laboratory	1

or these courses

EART 10	Geologic Principles	5
EART 10L	Geologic Principles Laboratory	1

or these courses

EART 5	California Geology	5
EART 5L	California Geology Laboratory	1

All of the following courses:

Where the lab course follows a lecture course the pair of courses counts as a single course.

ENVS 25	Environmental Policy and Economics	5
BIOE 20C	Ecology and Evolution	5
CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1M	General Chemistry Laboratory	2
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics Laboratory	1

Plus one of the following options:

Either these courses

MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5

or these courses

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

or these courses

AM 15A	Case-Study Calculus I	5
AM 15B	Case-Study Calculus II	5

Upper-Division Courses

All of the following courses:

EART 110A	Evolution of the Earth	5
EART 110L	Evolution of the Earth Laboratory	2
EART 110B	Earth as a Chemical System	5
EART 110M	Earth as a Chemical System Laboratory	2

Electives

At least four elective courses from upper-division Earth sciences, environmental sciences or ocean sciences offerings must be completed.

Students are encouraged to take more than the minimum number of elective courses and may craft an elective distribution from many areas of specific research and career interests.

EART 198 may not be used to satisfy this requirement.

Lecture/lab combinations count as one course.

Environmental electives

At least two upper-division electives from upper-division biology, chemistry, Earth and planetary sciences, environmental studies, environmental toxicology, or ocean sciences courses with an environmental focus must be completed.

EART 198 may not be used to satisfy this requirement.

Lecture/lab combinations count as one course.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) general education requirement. Students in the Earth Sciences B.S. major must complete a minimum of two (2) courses from the list of courses that in combination satisfies the DC general education requirement. Courses taken to satisfy the DC requirement may also satisfy upper-division elective or senior comprehensive requirements. Consult one of the Earth and planetary sciences

advisers for the most up-to-date list of scheduled classes.

Currently the list (subject to change) consists of:

EART 100	Vertebrate Paleontology	5
EART 101	Invertebrate Paleobiology	5
EART 102	Marine Geology	5
EART 104	Geologic Hazards	5
EART 109	Elements of Field Geology	5
EART 120	Sedimentology and Stratigraphy	5
EART 140	Geomorphology	5
EART 146	Groundwater	5
EART 148	Glaciology	5
EART 150	Structural Geology	5
EART 160	Planetary Science	5
EART 189B	Summer Field Study	5
EART 191A	Climate Change Science and Policy	5
EART 195	Senior Thesis	5

Comprehensive Requirement

All students must satisfy the senior comprehensive requirement. The intent of this requirement is to synthesize knowledge and skills from a student's undergraduate career. Therefore, prior to completing an activity to satisfy the senior comprehensive requirement, students should have already completed EART 110A, one of EART 110B or EART 110C, and three other upper-division courses that fulfill major requirements. Students should consult an adviser if they have any questions about the timing of their proposed comprehensive requirement activity.

Note: Courses used to satisfy the senior comprehensive requirement **cannot** also be used to fulfill the upper-division elective requirement.

To satisfy the comprehensive requirement, each student in these majors must complete one of the following options:

Satisfactory completion of Summer Field

EART 189A	Geographic Information Systems with Applications in Earth Sciences	5
EART 189B	Summer Field Study	5

Satisfactory completion of a senior thesis

A senior thesis must include a significant element of independent research or original work and can only be undertaken after an agreement is obtained from a faculty member to supervise it. It is recommended that students allocate three quarters for the thesis process.

Students may take EART 199: Independent Study, as part of performing the research for their senior thesis. It is required that each student enroll in and pass EART 195: Senior Thesis, in the academic quarter during which they complete their thesis.

Satisfactory completion of one of the following capstone course offerings:

EART 191A	Climate Change Science and Policy	5
EART 191B	Planetary Capstone	5

EART 191C	Practical Geophysics	5
-----------	----------------------	---

Capstone course offerings vary year to year. If you are interested in completing a capstone course please contact the Earth sciences adviser.

Other options

Other options such as external field research experiences or internships may be suitable by permission of the faculty adviser.

Please meet with an adviser if you have an idea to propose.

Planners

Sample Four-Year Planner

Year	Fall	Winter	Spring
1st (frosh)	CHEM 1A	EART 20 & EART 20L	MATH 11B or MATH 19B
		MATH 11A or MATH 19A	CHEM 1C & CHEM 1N
		CHEM 1B & CHEM 1M	
2nd (soph)	EART 110A & EART 110L	EART 110B & EART 110M	
	PHYS 6A & PHYS 6L	PHYS 6B & PHYS 6M	
3rd (junior)	BIOE 20C	EART elective	EART elective
	EART elective	ENVS 25	
4th (senior)	EART elective	EART elective	EART elective
	(Sr thesis only) EART 199†	(Sr thesis only) EART 199†	Senior thesis (EART 195)† or EART 189A*

*Students who wish to complete their capstone with EART 189A and EART 189B should be aware that the following courses are prerequisites: EART 109 and EART 109L, EART 110A and EART 110L, and EART 110B and EART 110M. Students must also complete EART 189B in summer to fulfill the summer field capstone.

† Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require two or three quarters for completion.

Sample Two-Year Planner

This planner assumes that students have completed all lower-division requirements other PHYS 6A and PHYS 6L, PHYS 6B and PHYS 6M, and ENVS 25.

Year	Fall	Winter	Spring
1st (junior)	PHYS 6A & PHYS 6L	PHYS 6B & PHYS 6M	EART elective
	EART 110A & EART 110L	EART 110B & EART 110M	EART elective
2nd (senior)	EART elective	EART elective	EART elective
	EART elective	ENVS 25	EART 189A* or senior thesis (EART 195)†
	(Sr thesis only) EART 199†	(Sr thesis only) EART 199†	

*Students who wish to complete their capstone with EART 189A and EART 189B should be aware that the following courses are prerequisites: EART 109 and EART 109L, EART 110A and EART 110L, and EART 110B and EART 110M. Students must also complete EART 189B in summer to fulfill the summer field capstone.

† Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require at least two or three quarters for completion.

Ocean Sciences Concentration

The ocean sciences concentration is intended to provide quantitative preparation for career pathways that include oceanography and biogeochemistry. Additional biology and chemistry courses are required for this concentration along with other distributions of upper-division requirements and electives.

Course Requirements

Lower-Division Courses

Choose one of the following options:

Either these courses

EART 5	California Geology	5
EART 5L	California Geology Laboratory	1
or these courses		
EART 10	Geologic Principles	5
EART 10L	Geologic Principles Laboratory	1
or these courses		
EART 20	Environmental Geology	5
EART 20L	Environmental Geology Laboratory	1

Plus all of the following courses:

Where the lab course follows a lecture course the pair of courses counts as a single course.

BIOE 20C	Ecology and Evolution	5
CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1M	General Chemistry Laboratory	2
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics Laboratory	1

Plus one of the following options:

Either these courses

MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
or these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
or these courses		
AM 15A	Case-Study Calculus I	5
AM 15B	Case-Study Calculus II	5

Plus one of the following courses:

MATH 22	Introduction to Calculus of Several Variables	5
MATH 23A	Vector Calculus	5
EART 111	Mathematics in the Earth Sciences	5

Upper-Division Courses

All of the following courses:

EART 110A	Evolution of the Earth	5
EART 110L	Evolution of the Earth Laboratory	2
EART 110B	Earth as a Chemical System	5
EART 110M	Earth as a Chemical System Laboratory	2
EART 110C	The Dynamic Earth	5

EART 110N The Dynamic Earth Laboratory 2

Plus one of the following courses:

OCEA 101 The Marine Environment 5
OCEA 102 Oceans and Climate: Past, Present, and Future 5

Electives

At least four elective courses from upper-division Earth sciences or ocean sciences offerings must be completed.

Students are encouraged to take more than the minimum number of elective courses and may craft an elective distribution from many areas of specific research and career interests.

EART 198 may not be used to satisfy this requirement.

Lecture/lab combinations count as one course.

Choosing from the following list is recommended, but not mandatory:

EART 101 Invertebrate Paleobiology 5
EART 101L Invertebrate Paleobiology Laboratory 1
EART 102 Marine Geology 5
EART 105 Coastal Geology 5
EART 107 Remote Sensing of the Environment 5
EART 109 Elements of Field Geology 5
EART 109L Field Geology Laboratory 2
EART 111 Mathematics in the Earth Sciences 5
EART 116 Hydrology 5
EART 119 Introductory Computer Programming for Geoscientists 5
EART 120 Sedimentology and Stratigraphy 5
EART 120L Sedimentology and Stratigraphy Laboratory 2
EART 121 The Atmosphere 5
EART 128 Isotopes: Fundamentals and Applications in Earth and Marine Sciences 5
EART 130 Igneous and Metamorphic Petrology 5
EART 130L Igneous and Metamorphic Petrology Laboratory 2
EART 148 Glaciology 5
EART 172 Geophysical Fluid Dynamics 5
OCEA 100 Physical Oceanography 5
OCEA 101 The Marine Environment 5
OCEA 102 Oceans and Climate: Past, Present, and Future 5
OCEA 111 Climate Dynamics 5
OCEA 118 Marine Microbial Ecology 5
OCEA 120 Aquatic Chemistry: Principles and Applications 5
OCEA 121 Aqueous Geochemistry 5
OCEA 122 Chemical Oceanography 5
OCEA 124 Aquatic Organic Geochemistry 5

OCEA 130 Biological Oceanography 5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) general education requirement. Students in the Earth Sciences B.S. major must complete a minimum of two (2) courses from the list of courses that in combination satisfies the DC general education requirement. Courses taken to satisfy the DC requirement may also satisfy upper-division elective or senior comprehensive requirements. Consult one of the Earth and planetary sciences advisers for the most up-to-date list of scheduled classes.

Currently the list (subject to change) consists of:

EART 100 Vertebrate Paleontology 5
EART 101 Invertebrate Paleobiology 5
EART 102 Marine Geology 5
EART 104 Geologic Hazards 5
EART 109 Elements of Field Geology 5
EART 120 Sedimentology and Stratigraphy 5
EART 140 Geomorphology 5
EART 146 Groundwater 5
EART 148 Glaciology 5
EART 150 Structural Geology 5
EART 160 Planetary Science 5
EART 189B Summer Field Study 5
EART 191A Climate Change Science and Policy 5
EART 195 Senior Thesis 5

Comprehensive Requirement

All students must satisfy the senior comprehensive requirement. The intent of this requirement is to synthesize knowledge and skills from a student's undergraduate career. Therefore, prior to completing an activity to satisfy the senior comprehensive requirement, students should have already completed EART 110A, one of EART 110B or EART 110C, and three other upper-division courses that fulfill major requirements. Students should consult an adviser if they have any questions about the timing of their proposed comprehensive requirement activity.

Note: Courses used to satisfy the senior comprehensive requirement **cannot** also be used to fulfill the upper-division elective requirement.

To satisfy the comprehensive requirement, each student in these majors must complete one of the following options:

Satisfactory completion of Summer Field

EART 189A Geographic Information Systems with Applications in Earth Sciences 5
EART 189B Summer Field Study 5

Satisfactory completion of a senior thesis

A senior thesis must include a significant element of independent research or original work and can only be undertaken after an agreement is obtained from a faculty member to supervise it. It is recommended that students allocate three quarters for the thesis process.

ENVIRONMENTAL SCIENCES B.S.

Information and Policies

Introduction

The UC Santa Cruz environmental sciences (ESCI) major is an interdepartmental, undergraduate-only program. The purpose of the ESCI major is to educate students interested in environmental science problems and issues, with a focus on issues within the physical sciences (as opposed to focusing on biological sciences). The major specializes primarily on the following areas:

- Hydrosphere: water resources, water quality, aquatic chemistry, physical oceanography, chemical oceanography, glaciology
- Pollution and transport: environmental toxicology, environmental transport/fluid mechanics, environmental monitoring
- Global scale environment: climate, climate dynamics, global cycles of water, carbon and nutrients, remote sensing of the environment
- Atmosphere: meteorology, air quality, atmospheric chemistry

The core faculty of the major are primarily from two departments, Earth and Planetary Sciences and Ocean Sciences. Faculty from other departments such as Microbiology and Environmental Toxicology and Environmental Studies may also be involved.

Graduates of the ESCI major are expected to continue on to a variety of careers, such as:

- Business and industry
- Environmental consulting
- Governmental agencies at the federal, state, and local level
- Non-profit organizations
- Research at universities, governmental research institutions, or other scientific agencies
- Graduate/professional school in areas such as science, engineering, teaching, law, public health, business

For more information about the affiliated faculty and staff for the major, including areas of interest and facilities, contact e-mails and phone numbers, and how to declare this major, please see our web site.

Academic Advising for the Program

A student who wants to become an ESCI major should contact the environmental sciences undergraduate staff adviser, epsadvising@ucsc.edu, as soon as possible. Students will submit a declaration of major petition, and are required to

meet with the undergraduate adviser to plan their program in detail. Transfer students should consult the Transfer Information and Policy section for more detailed information about academic advising.

Getting Started in the Major

The bachelor of science (B.S.) program is designed for students who intend to pursue professional careers in environmental sciences, engineering, policy, law, teaching, or business or who otherwise desire the broad, quantitative training available at UC Santa Cruz. In addition to providing comprehensive preparation in the basic physical sciences, and particular breadth and depth in environmental sciences, the curriculum is structured to prepare students for the competitive graduate school and career marketplace.

The core of the major includes calculus, physics, chemistry, and core foundational upper-division environmental sciences courses. Students also select at least five additional courses from a diverse list of upper-division electives. These electives provide the student with expertise in one or more subdisciplines within environmental sciences. A senior comprehensive experience is required of all majors, and may be fulfilled in two ways, either completion of an intensive senior seminar course or a senior thesis.

Program Learning Outcomes

The ESCI major has three broad program learning outcomes, each with three specific learning outcomes:

PLO 1: Disciplinary Knowledge Goals

- **Reservoirs:** Understand and describe the properties of the various environmental “reservoirs”, which represent different, interacting physical regimes. For example, a global model might have the atmosphere, oceans, plants and soils as four primary interacting reservoirs.
- **Processes:** Understand and describe the processes governing the properties and evolution of Earth’s physical environment, i.e., the properties and evolution of reservoirs and their interactions.
- **Application:** Apply the knowledge of reservoirs and processes to explain, analyze and predict phenomena within the environmental sciences.

PLO 2: Quantitative Reasoning Goals

- **Calculation:** Utilize mathematical tools (e.g. algebra, calculus) to address questions in the environmental sciences.
- **Visualization:** Interpret and produce visual representations of data in the environmental sciences (e.g. graphs and charts) that conform to disciplinary standards.
- **Analysis:** Use quantitative analysis as the basis for drawing insights and conclusions, while expressing the appropriate assumptions and qualifications.

PLO 3: Written Communication Goals

- **Mechanics:** Write sentences with correct grammar, punctuation and spelling.
- **Conventions:** Accurately utilize the formatting, stylistic, citation and bibliographic conventions of environmental sciences in the written document.
- **Organization:** Construct paragraphs, sections and an overall document that flows logically and persuasively argues a thesis.

Major Qualification Policy and Declaration Process

Major Qualification

Transfer students should consult the Transfer and Information Policy section for information about major qualification.

To qualify for the environmental sciences major, a student must complete (with a minimum grade of C) the following introductory courses:

CHEM 1A	General Chemistry	5
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1

Once a student has passed all of these required courses (or equivalent), they are eligible to declare the environmental sciences major.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal by submitting a letter to the environmental sciences adviser, epsadvising@ucsc.edu, within 15 days from the date the notification was sent. Within 15 days of receipt of the appeal, the department will notify the student and their affiliated college of the decision.

How to Declare a Major

Students who qualify start the declaration process by scheduling an appointment with the department staff adviser. You must consult with the department’s undergraduate staff adviser to discuss options for the degree and coursework priorities before you start the process of officially declaring your major.

Transfer Information and Policy

Transfer Admission Screening Policy

The Environmental Sciences program welcomes applications from prospective transfer students. Students should reference assist.org to determine course equivalencies. To be considered for admission to UC Santa Cruz as an environmental sciences major, transfer students must pass equivalents of the following courses with a cumulative GPA of 2.00 or higher:

CHEM 1A	General Chemistry	5
CHEM 1C	General Chemistry	5

CHEM 1N	General Chemistry Laboratory	2
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1

Transfer students planning on attending UC Santa Cruz to pursue an environmental sciences major should contact the undergraduate adviser for transfer preparation information and reference assist.org to determine which courses are equivalent to these required courses. Having this coursework completed prior to transferring allows students greater flexibility in scheduling and completing their major.

In addition, we strongly recommend that all transfer students complete equivalents of the following preparatory course prior to transfer:

PHYS 6B and PHYS 6M, Introductory Physics II with Laboratory

Getting Started at UCSC as a Transfer Student

Whether you are planning for your future transfer or are already admitted to UC Santa Cruz, we aim to provide our transfer students the information and support needed to successfully complete a science degree at UC Santa Cruz.

If you are planning on transferring to UC Santa Cruz to pursue an environmental sciences major, our Transfer Preparation information provides a list of the coursework you should complete prior to transfer. Completing coursework prior to transfer allows you more time and flexibility to take advantage of the educational opportunities our programs provide and can reduce the cost of your education. For more information please visit Transfer Preparation.

For information regarding applying for admission to UC Santa Cruz as a transfer student, visit the UCSC Admissions web site.

Once you have submitted your intent to register at UC Santa Cruz, here is a step-by-step guide to transferring your coursework and getting enrolled:

- 1. Confirm you are a proposed environmental sciences major.**

If you are not sure of your status, log on to your MyUCSC portal to view your proposed major. If your major is proposed environmental sciences you are all set. If the proposed major listed is not environmental sciences, you will need to meet with the adviser for environmental sciences to determine if you are eligible for the major.

- 2. Once your courses have been articulated, you will receive an email from our office.**

This email will include information on how your coursework articulated, suggestions for fall enrollment, and invite you to make an appointment to talk with your major adviser.

- 3. Make an appointment to talk to an adviser.**

Your confirmation email will include instructions for scheduling an advising appointment. Appointments are available either by phone or in person.

- 4. Participate in Transfer Orientation and Welcome Week.**

Transfer Orientation provides instructions on how to transfer your coursework to UC Santa Cruz, the advising and support available, and how to enroll. Our online transfer orientation provides all the critical information you need to transition to UC Santa Cruz and begin your major coursework. The department also hosts a transfer student welcome in the fall that provides new transfer students an opportunity to meet other transfer students, familiarize themselves with the campus and the available resources. Welcome Week includes presentations on the environmental sciences major, including an overview of the field courses offered and an introduction on how to get involved in undergraduate research.

- 5. Declaring the environmental sciences major.**

In order to declare the environmental sciences major transfer students entering at the junior level must complete CHEM 1A, CHEM 1C and CHEM 1N, MATH 11A, MATH 11B, and PHYS 6A and PHYS 6L or an approved equivalent course (with a C or better) by the end of their first quarter at UC Santa Cruz and meet with the Environmental Sciences adviser by the declaration deadline.

Letter Grade Policy

All courses used to satisfy requirements for the environmental sciences major must be taken for a letter grade, with the exception of the following courses, which may be taken pass/no pass: ESCI 195 Senior Thesis, EART 198 Earth Sciences Internship, and EART 199 Tutorial.

Course Substitution Policy

Relevant courses taken at UC Santa Cruz or other institutions may be substituted for degree requirements by approved petition. Please see the undergraduate adviser for the substitution petition form and more information about this process.

Double Majors and Major/Minor Combinations Policy

Study Abroad

Honors

Honors in the major are determined by a review of grades (typically 3.50 or above) at the time a student applies for graduation. A faculty committee makes the decision based on the quality of all coursework, but especially in the courses required for the major. Extra coursework or independent study as well as more intensive or rigorous coursework and the quality of a capstone project may also be taken into consideration. Highest honors may also be awarded in

exceptional cases when a student's overall grade point average (GPA) is above 3.75 and performance in the senior capstone requirement is equally outstanding. The program reserves the right to withhold honors and highest honors based on other criteria, such as an incident of academic dishonesty.

Honors in the senior thesis are determined independently of major honors, and must be approved by two faculty readers.

Requirements and Planners

Course Requirements

Lower-Division Courses

All of the following courses:

CHEM 1A	General Chemistry	5
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2

Plus one of the following options:

Either these courses

MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5

or these courses

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

or these courses

AM 15A	Case-Study Calculus I	5
AM 15B	Case-Study Calculus II	5

Plus all of the following courses:

EART 20	Environmental Geology	5
EART 20L	Environmental Geology Laboratory	1
ENVS 25	Environmental Policy and Economics	5
ESCI 30	Biological Principles of Environmental Sciences	5
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics Laboratory	1

* ESCI 30 students who were formerly proposed or declared majors in biology, biochemistry, bioengineering, or other related majors may have other options to fulfill this requirement. Please inquire with the adviser.

Upper-Division Courses

All of the following courses:

ESCI 100A	Introduction to Environmental Sciences	5
ESCI 100B	Introduction to Environmental Processes	5

ESCI 160	Data Analysis in the Environmental Sciences	5
----------	---	---

At least five elective courses.

At least five elective courses from upper-division Earth sciences, environmental sciences or ocean sciences offerings must be completed.

NOTE: Lecture/lab combinations count as one course.

Courses from other departments may also be considered for upper-division elective credit by permission of a faculty adviser. Please consult with an adviser for more details.

Students are encouraged to take more than the minimum number of elective courses and may craft an elective distribution from many areas of specific research and career interests.

Disciplinary Communication (DC) Requirement

Students fulfill the disciplinary communication (DC) requirement through successful completion of either (1) one of the environmental sciences senior capstone seminars (ESCI 191) or (2) a senior thesis based on original research performed by the student (completion of ESCI 195: Senior Thesis is required).

ESCI 191	Capstone Seminar	5
	OR	
ESCI 195	Senior Thesis	5

Comprehensive Requirement

All students must satisfy the senior comprehensive requirement. The intent of this requirement is to synthesize knowledge and skills from a student's undergraduate career. Students should consult an adviser if they have any questions about the timing of their proposed comprehensive requirement activity.

Other capstones will not be considered unless they also satisfy the DC requirement.

Courses that are used to satisfy the capstone may not also count toward fulfilling the upper-division elective requirement.

Satisfactory completion of one of the following capstone course offerings:

Senior Thesis

ESCI 195	Senior Thesis	5
----------	---------------	---

ESCI 195 requires original research performed by the student. Approval from a faculty sponsor is required prior to embarking on a senior thesis. Completion of the senior thesis is necessary to pass ESCI 195.

ESCI 195 also satisfies the DC requirement.

Capstone Seminar

ESCI 191	Capstone Seminar	5
----------	------------------	---

Enrollment in ESCI 191 is limited to environmental science majors with senior standing.

ESCI 191 also satisfies the DC requirement.

Planners

Students planning a professional career in environmental sciences should take more than the minimum number of courses required for the major, if possible. Four-year students have ample flexibility to take additional electives if they begin with the required courses in their second year. Junior transfers also have flexibility if they have taken most of their lower-division preparatory courses before entry. Further advice can be obtained from the undergraduate adviser and from faculty members.

Sample Four-Year Planner

Note: CHEM 1A, CHEM 1B and CHEM 1M, CHEM 1C and CHEM 1N, and MATH 11A and MATH 11B are offered every quarter. PHYS 6A and PHYS 6L are offered every quarter, but PHYS 6B and PHYS 6M are not offered in fall.

Year	Fall	Winter	Spring
1st (fresh)	CHEM 1A	MATH 11A CHEM 1C & CHEM 1N	EART 20 & EART 20L MATH 11B
2nd (soph)	ESCI 30 PHYS 6A & PHYS 6L	ESCI 100A PHYS 6B & PHYS 6M	ESCI 100B Upper- division lective
3rd (junior)	ESCI 160	ENVS 25 Upper- division elective	Upper- division elective
4th (senior)	Upper- division elective	Upper- division elective	ESCI 191 or ESCI 195†

In addition to the specific courses shown in these planners, a student must complete courses satisfying the CC, ER, IM, SR, TA, PE, and PR general education requirements.

†Students expecting to write a senior thesis (course 195) for their comprehensive requirement should contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require at least three quarters for completion.

Sample Transfer (Two-Year) Planner

This planner assumes that students have completed all lower-division requirements other than ESCI 30, ENVS 25, and EART 20 and EART 20L.

Year	Fall	Winter	Spring
3rd (junior)	ESCI 30 ESCI 160	ENVS 25 ESCI 100A	ESCI 100B EART 20 & EART 20L
4th (senior)	Upper- division elective Upper- division elective	Upper- division elective Upper- division elective	ESCI 191 or ESCI 195† Upper-division elective

†Students expecting to write a senior thesis (course 195) for their comprehensive requirement should contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require at least three quarters for completion.

EARTH SCIENCES/ANTHROPOLOGY COMBINED MAJOR B.A.

Information and Policies

Introduction

The Earth sciences/anthropology combined major is intended for students with interests in Earth sciences and the laboratory-based aspect of anthropology. These include anthropology students interested in archaeology or paleoanthropology who desire more intensive training in natural sciences and Earth sciences students interested in paleobiology or archaeology. The combined major provides a rigorous training in both anthropology and Earth sciences and will permit students to enter graduate programs in Earth sciences, archaeology, or paleoanthropology. The combined major has a significantly different set of cognate science and required lower- and upper-division courses than the standard major; therefore, students are advised to plan carefully and to contact academic advisers in the Earth and Planetary Sciences and Anthropology departments early if they have questions.

Academic Advising for the Program

A student who wants to become an Earth sciences/anthropology combined major should contact the Earth and Planetary Sciences Department undergraduate staff adviser, epsadvising@ucsc.edu, as soon as possible. Students will submit a declaration of major petition, and are required to meet with the undergraduate adviser to plan their program in detail. Transfer students should consult the Transfer Information and Policy section for more detailed information about academic advising.

Getting Started in the Major

Welcome! Now that you are a registered freshman, the following information is your guide to getting started in your Earth sciences major.

All freshmen are required to complete online orientation; for more information visit Campus Orientation Programs. As a reference, we provide an online freshmen orientation that includes everything you need to know to get started on your Earth science major. If you have already completed orientation and simply need a refresher on getting enrolled, see our Freshmen Enrollment Guide.

Students with advanced placement credit must provide Admissions an official copy of your test score. You can verify your AP credit in your MyUCSC portal. For information on how your AP credit applies to your enrollment and your major, see our advanced placement credit page. If you have taken a college-level course that you would like credit for, you must send an official transcript to Admissions. If you wish to have that same course applied toward your major requirements, send an unofficial copy of your transcripts to epsadvising@ucsc.edu.

If you have already been admitted to UC Santa Cruz as a transfer student, our transfer orientation provides instructions on how to transfer your coursework to UC Santa Cruz, the advising and support available, and how to enroll. Our online transfer orientation provides all the critical information you need to transition to UC Santa Cruz and begin your major coursework.

Program Learning Outcomes

Students graduating with a B.A. in Earth sciences/anthropology should be able to:

1. understand the processes governing the properties and evolution of Earth's interior and surface;
2. identify rocks and minerals, and describe their connection to geologic processes;
3. utilize algebraic mathematical tools to quantitatively address questions in the geosciences; and
4. write in a clear, organized, and logical fashion using disciplinary standards for reporting and citation.

Major Qualification Policy and Declaration Process

Major Qualification

Transfer students should consult the Transfer and Information Policy section for information about major qualification.

To qualify for the combined Earth sciences and anthropology major, a student must complete (with a minimum grade of C) one of the following introductory courses in physical geology:

EART 5	California Geology	5
EART 10	Geologic Principles	5
EART 20	Environmental Geology	5

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal by submitting a letter to the Earth and Planetary Sciences adviser, epsadvising@ucsc.edu, within 15 days from the date the notification was sent. Within 15 days of receipt of the appeal, the department will notify the student and their affiliated college of the decision.

How to Declare a Major

Students who qualify start the declaration process by scheduling an appointment with the department staff adviser. You must consult with the department's undergraduate staff adviser to discuss options for the degree and coursework priorities before you start the process of officially declaring your major.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific courses for consideration of admission to UC Santa Cruz.

The Earth and Planetary Sciences Department welcomes applications from prospective transfer students who are prepared for the major. Students should reference assist.org to determine course equivalencies. Transfer students planning to major in Earth and planetary sciences combined with anthropology are recommended to complete equivalents to as many of the the following lower-division prerequisite courses (including the associated laboratory components) as possible:

One of the following options:

Either these courses		
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
or these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

All of the following courses:

ANTH 1	Introduction to Biological Anthropology	5
ANTH 2	Introduction to Cultural Anthropology	5
ANTH 3	Introduction to Archaeology	5

Plus one of the following options:

EART 5	California Geology	5
EART 5L	California Geology Laboratory	1
OR		
EART 10	Geologic Principles	5
EART 10L	Geologic Principles Laboratory	1
OR		
EART 20	Environmental Geology	5
EART 20L	Environmental Geology	1

Laboratory

Five lower-division science courses (plus laboratories) chosen from the following:

Where the lab course follows a lecture course the pair of courses counts as a single course.

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5
CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1M	General Chemistry Laboratory	2
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics Laboratory	1

Transfer students planning on attending UC Santa Cruz to pursue an Earth Sciences/Anthropology combined major should contact the undergraduate adviser for transfer preparation information and reference assist.org to determine which courses are equivalent to these courses. Having completed as much of this coursework as possible prior to transferring allows students greater flexibility in scheduling and completing their major.

Getting Started at UCSC as a Transfer Student

Whether you are planning for your future transfer or are already admitted to UC Santa Cruz, we aim to provide our transfer students the information and support needed to successfully complete a science degree at UC Santa Cruz.

Once you have submitted your intent to register at UC Santa Cruz, here is a step-by-step guide to transferring your coursework and getting enrolled:

1. Confirm you are a proposed Earth sciences/anthropology major.

If you are not sure of your status, log on to your MyUCSC portal to view your proposed major. If your major is proposed Earth sciences/anthropology you are all set. If the proposed major listed is not Earth sciences/anthropology, you will need to meet with the adviser for Earth sciences.

2. Once your courses have been articulated, you will receive an email from our office.

This email will include information on how your coursework articulated, suggestions for fall enrollment, and invite you to make an appointment to talk with your major adviser.

3. Make an appointment to talk to an adviser.

Your confirmation email will include instructions for scheduling an advising appointment. Appointments are available either by phone or in person.

4. Participate in Transfer Orientation and Welcome Week.

Transfer orientation provides instructions on how to transfer your coursework to UC Santa Cruz, the advising and support available, and how to enroll. Our online transfer orientation provides all the critical information you need to transition to UC Santa Cruz and begin your major coursework.

The department also hosts a transfer student welcome in the fall that provides new transfer students an opportunity to meet other transfer students, familiarize themselves with the campus and the available resources. Welcome Week includes presentations on the Earth sciences majors, including an overview of the field courses offered and an introduction on how to get involved in undergraduate research.

5. Declaring the Earth Sciences/Anthropology combined major.

In order to declare the Earth sciences/anthropology combined major transfer students must complete EART 5, or EART 10 or EART 20 or an approved equivalent course (with a C or better) and meet with the Earth and Planetary Sciences Department adviser by the declaration deadline.

Welcome, we look forward to meeting you!

Letter Grade Policy

This program, Earth sciences/anthropology, does not have a letter grade policy. Students must adhere to the campus letter grade policy.

Course Substitution Policy

Relevant courses taken at UC Santa Cruz or other institutions may be substituted for degree requirements by approved petition. Please see the undergraduate adviser for the substitution petition form and more information about this process.

Double Majors and Major/Minor Combinations Policy**Study Abroad****Honors**

Honors in the major (all concentrations) and in the combined major with anthropology are determined by a review of grades (typically 3.50 or above) at the time a student applies for graduation. A faculty committee makes the decision based on the quality of all coursework, but especially in the courses required for the major. Extra coursework or independent study as well as more intensive or rigorous coursework and the quality of a capstone project may also be taken into consideration. Highest honors may also be awarded in exceptional cases when a student's overall grade point average (GPA) is above 3.75 and performance in the senior capstone requirement is equally outstanding. The department reserves the right to withhold honors and highest honors based on other criteria, such as an incident of academic dishonesty.

Honors on the senior thesis are determined independently of major honors, and must be approved by two faculty readers.

Keys to Success in the Major**Requirements and Planners****Course Requirements****Lower-Division Courses****All of the following courses:**

ANTH 1	Introduction to Biological Anthropology	5
ANTH 2	Introduction to Cultural Anthropology	5
ANTH 3	Introduction to Archaeology	5

Plus one of the following options:

Either these courses

EART 5	California Geology	5
EART 5L	California Geology Laboratory	1

or these courses

EART 10	Geologic Principles	5
EART 10L	Geologic Principles Laboratory	1

or these courses

EART 20	Environmental Geology	5
EART 20L	Environmental Geology Laboratory	1

Plus one of the following options:

MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
OR		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Five lower-division science courses (plus laboratories) chosen from the following:

Where the lab course follows a lecture course the pair of courses counts as a single course.

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5
CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1M	General Chemistry Laboratory	2
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics Laboratory	1

Upper-Division Courses

EART 110A	Evolution of the Earth	5
EART 110L	Evolution of the Earth Laboratory	2

Electives

At least three upper-division elective courses from upper-division Earth sciences offerings must be completed. EART 198 may not be used to satisfy this requirement.

Any four upper-division elective courses between five and seven units listed under the Anthropology Department's biological, medical, environmental anthropology and archeology course subdivisions (see program statement for the anthropology B.A.).

Disciplinary Communication (DC) Requirement

At least two courses that are part of the DC requirement must be completed as part of the required upper-division courses.

Earth Sciences courses that are part of the DC curriculum are:

EART 100	Vertebrate Paleontology	5
EART 101	Invertebrate Paleobiology	5
EART 102	Marine Geology	5
EART 104	Geologic Hazards	5
EART 109	Elements of Field Geology	5
EART 120	Sedimentology and Stratigraphy	5
EART 140	Geomorphology	5
EART 146	Groundwater	5
EART 148	Glaciology	5
EART 150	Structural Geology	5
EART 160	Planetary Science	5
EART 189B	Summer Field Study	5
EART 191A	Climate Change Science and Policy	5
EART 195	Senior Thesis	5

EART 189B formerly EART 188A

Anthropology courses that are part of the DC curriculum are:

ANTH 100	History and Theory of Biological Anthropology	5
ANTH 170	History of Archaeological Theory	5
ANTH 194B	Chimpanzees: Biology, Behavior, and Evolution	5
ANTH 194L	Archaeology of the African Diaspora	5
ANTH 194Y	Archaeologies of Space and Landscape	5

Courses may simultaneously satisfy both the DC requirement and the upper-division Earth sciences or anthropology elective requirement.

Comprehensive Requirement

One of the following:

Satisfactory completion of Anthropology 194-series (any senior seminar in physical anthropology or archaeology).

Satisfactory completion of EART 189A and EART 189B*, Geographic Information Systems with Applications in Earth sciences and Summer Field Internship.

Satisfactory completion of a senior thesis (EART 195) with faculty readers from both departments, which must include a significant element of independent research or original work and can only be undertaken after agreement is obtained from faculty members to supervise it (at least three quarters in advance of completion).

Satisfactory completion of a 5-credit internship (EART 198) under the guidance of an on-site supervisor, with coordination and prior approval of the Earth and Planetary Science Department's internship director. The project must include a comprehensive final written report.

* EART 189A and EART 189B have as prerequisites EART 109 and EART 109L, EART 110A and EART 110L, and EART 110B and EART 110M.

Note: Courses used to satisfy the senior comprehensive requirement **cannot** also be used to fulfill the upper-division elective requirement.

Planners

Sample Four-Year Planner

Year	Fall	Winter	Spring
1st (frosh)	<u>ANTH 1</u>	<u>ANTH 2</u>	<u>ANTH 3</u> <u>EART 10 & EART 10L</u>
2nd (soph)	<u>MATH 11A</u> or <u>MATH 19A</u> ANTH elective	<u>MATH 11B</u> or <u>MATH 19B</u> CHEM, PHYS or BIO	CHEM, PHYS or BIO CHEM, PHYS or BIO
3rd (junior)	<u>EART 110A & EART 110L</u> CHEM, PHYS or BIO	EART elective CHEM, PHYS or BIO	ANTH elective EART elective
4th (senior)	ANTH elective Sr comp	EART elective Sr comp	ANTH elective Sr comp

In addition to the specific courses shown in these planners, a student must complete courses satisfying the CC, ER, IM, SR, and TA general education requirements.

Sample Two-Year Planner

This planner assumes that students have completed all lower-division requirements except ANTH 1 and EART 5 and EART 5L, or EART 10 and EART 10L, or EART 20 and EART 20L.

Year	Fall	Winter	Spring
1st	<u>ANTH 1</u>	EART elective	EART elective

(junior)	<u>EART 5 & EART 5L</u>	ANTH elective	ANTH elective
		ANTH elective	ANTH 194+ or ANTH 196+ or <u>EART 189A*</u> or sr thesis (EART 195)†
2nd (senior)	<u>EART 110A & EART 110L*</u> (Sr thesis only) <u>EART 199†</u>	EART elective (Sr thesis only) <u>EART 199†</u>	

*Students who wish to complete their capstone with EART 189A and EART 189B should be aware that the following courses are prerequisites: EART 109 & EART 109L, EART 110A & EART 110L, and EART 110B & EART 110M. Students must also complete EART 189B in summer to fulfill the summer field capstone.

+Satisfactory completion of ANTH 194 or ANTH 196-series (any senior seminar in physical anthropology or archaeology) fulfills the capstone.

†Students expecting to write a senior thesis for their comprehensive requirement are required to contact the department at least three quarters before graduation to identify the intended project and faculty adviser. Senior theses usually require at least two or three quarters for completion.

EARTH SCIENCES MINOR

Course Requirements

Students can earn a minor in Earth sciences by taking the following courses:

Lower-Division Courses

Choose one of the following options:
Either these courses

EART 5	California Geology	5
EART 5L	California Geology Laboratory	1
or these courses		
EART 10	Geologic Principles	5
EART 10L	Geologic Principles Laboratory	1
or these courses		
EART 20	Environmental Geology	5
EART 20L	Environmental Geology Laboratory	1

Upper-Division Courses

Five upper-division Earth or ocean sciences courses.

Courses offering fewer than 5 credits (such as EART 190 or 2-credit laboratories and independent studies) may not be counted toward the minor requirements, although additional coursework is always encouraged.

NOTE: Lecture and lab combinations count as a single course

Graduate Program

The graduate program in the Earth and Planetary Sciences Department is designed to prepare students for research, industry, consulting, teaching, and numerous other career paths, including business and law. The aim is to develop habits of critical analysis and thorough documentation; skills in quantitative field, computational, and/or laboratory research; and proficiency in one or more fields of research. The fundamental requirements for admission to the program are substantial evidence of superior scholarship, dedication and determination to do quality work, and aptitude for original research. Preparation in the basic sciences equivalent to the requirements for the Earth sciences bachelor's degree at UCSC is expected and, for non-undergraduate Earth sciences majors, achieving breadth of knowledge across the Earth and planetary sciences is expected. Excellent scholars from other disciplines, including chemistry, physics, engineering, biology, or astronomy are both eligible and encouraged to apply. Gaps in knowledge can be made up through coursework.

UCSC awards both the Master of Science (M.S.) and the Doctor of Philosophy (Ph.D.) degrees. The M.S. degree may be the terminal degree for some seeking careers in industry, government, and teaching at the secondary level. It may also be an initial step toward the Ph.D. degree, in which the student gains knowledge and confidence in carrying out and completing a more complex scientific project.

EARTH SCIENCES M.S.

Introduction

Details regarding admission to graduate standing, financial aid, examinations, and the requirements for the Master of Science and Doctor of Philosophy degrees are available from the Earth and Planetary Sciences Department graduate studies webpage. Additional details can be found at the UC Santa Cruz Division of Graduate Studies.

Requirements

Course Requirements

Plan 1 Thesis M.S. Track.

In their first year, all thesis-track graduate students register for:

EART 203	Introductory Teaching Seminar	1
EART 204	Earth and Planetary Sciences Foundations	5
EART 206	Great Papers in the Earth Sciences	5

And, in consultation with the graduate advising committee, choose at least one subject course focusing on specific Earth and planetary sciences content and one course focusing on quantitative analysis (from a list in the EPS Graduate Handbook).

In subsequent years, all students participate in:

EART 293 Graduate Research Seminar

1

Other course requirements are tailored to the individual student's academic background, professional experience, and plans for research. Master's degree students must take a minimum of 35 quarter units of graduate and upper-division undergraduate courses (at least 20 of which are graduate-level and not including EART 297, Independent Research) including the courses mentioned above.

Plan 2 Coursework M.S. Track.

The coursework M.S. track is a professional program designed to allow students to increase their breadth, quantitative depth, or emphasis on a particular specialty; to provide the student with a stronger background toward competition for jobs or an enhancement of skills for current employment (e.g., K-14 teaching); and to allow students from other disciplines (e.g., biology, physics, chemistry, mathematics, environmental studies) to acquire advanced training in Earth and planetary sciences. Prior to the first quarter of study, students meet with their faculty adviser to develop a study plan of at least nine 5-credit courses, and a statement of objectives. Of these courses, only one can be from the EART 280-EART 290 series, and at least 20 credits must come from graduate courses numbered EART 200-EART 279. One of the nine courses can be an independent study involving a focused research project. It is expected that the course plan will comprise a minimum of 45 quarter credits at the graduate-level and quantitative, upper-division, undergraduate-level elective courses. The course plan must be approved by the graduate representative.

Pre-Qualifying Requirements

Prospective students are required to take the Graduate Record Examination (GRE) General Test and have the scores sent electronically to the UC Santa Cruz Division of Graduate Studies.

Foreign Language Requirements

There is no foreign-language requirement other than demonstrated proficiency in English. Applicants from countries where English is not the primary language must take either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) test.

Teaching Experience

It is recommended that all thesis-track graduate students attain some teaching experience while at UC Santa Cruz.

Other Requirements

Applying for Graduation

EARTH SCIENCES PH.D.

Introduction

Details regarding admission to graduate standing, financial aid, examinations, and the requirements for the Master of Science and Doctor of Philosophy degrees are available from the Earth and Planetary Sciences Department graduate studies webpage. Additional details can be found at the UC Santa Cruz Division of Graduate Studies.

Advancement to Candidacy

Course Requirements

Thesis Ph.D. Track

In their first year, all thesis-track graduate students register for:

EART 203	Introductory Teaching Seminar	1
EART 204	Earth and Planetary Sciences Foundations	5
EART 206	Great Papers in the Earth Sciences	5

And, in consultation with the graduate advising committee, choose at least one subject course focusing on specific Earth and planetary sciences content and one course focusing on quantitative analysis (from a list in the EPS Graduate Handbook).

In subsequent years, all students participate in:

EART 293	Graduate Research Seminar	1
----------	---------------------------	---

Other course requirements are tailored to the individual student's academic background, professional experience, and plans for research. No specific number of course credits is required for the Ph.D., but ordinarily students put more of their effort into coursework during the first year of graduate study.

Foreign Language Requirements

There is no foreign-language requirement other than demonstrated proficiency in English. Applicants from countries where English is not the primary language must take either the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) test.

Teaching Requirement

It is recommended that all thesis-track graduate students attain some teaching experience while at UC Santa Cruz.

Pre-Qualifying Requirements

Prospective students are required to take the Graduate Record Examination (GRE) General Test and have the scores sent electronically to the UC Santa Cruz Division of Graduate Studies.

Qualifying Examination

To qualify for candidacy in the Ph.D. program, each student must pass an oral examination in his or her area of specialization by the end of their third year of graduate study (second year if entering with a master's degree), although

students are strongly encouraged to take the examination earlier. The examination is based on a research proposal presenting one or more specific questions to be researched by the student in the course of completing their Ph.D. thesis. Students are expected to have in-depth knowledge of fields relevant to the proposal, including familiarity with the professional literature.

Post-Qualifying Requirements

Dissertation

Dissertation

The Ph.D. dissertation is a scholarly contribution to knowledge that embodies the results of original and creative effort by the student. Students are urged to prepare their dissertations for publication in peer-reviewed professional journals.

Dissertation Defense

A public oral defense of the thesis is required prior to completion of the Ph.D.

Academic Progress

Before the start of fall quarter, each first-year thesis track student must meet with their faculty adviser to determine a customized course list designed to improve breadth and enable research goals. Immediately afterwards, a meeting is scheduled with the graduate program director to finalize and approve this initial discussion with a written study plan. Yearly academic review meetings will then reassess the student's progress in completing these courses and independent research, initially with the primary adviser but eventually with a reading committee.

Applying for Graduation

Ecology and Evolutionary Biology

Ecology and Evolutionary Biology M.A. (p. 274)

Ecology and Evolutionary Biology Ph.D. (p. 274)

Ecology and Evolutionary Biology Designated Emphasis (p. 275)

OTHER PROGRAMS OF INTEREST

Science Education B.S. (p. 334)

Environmental Studies/Biology Combined Major B.A. (p. 513)

Undergraduate Program

The Department of Ecology and Evolutionary Biology (EEB) is devoted to the study of ecological and evolutionary processes across marine, terrestrial, and freshwater environments. The past 30 years have seen several revolutions in our understanding of how the biological world works. Advances in both analytical and genetic methods have given us a far more sophisticated understanding of the complexities of ecological and evolutionary processes in the natural world. Biologists at UC Santa Cruz have played and will continue to play an important part in these advances, and the campus programs offer unique educational opportunities in biology that feature small class sizes, field studies, and extensive faculty-student interactions.

Class offerings and student research opportunities leverage the varied natural environments in the Monterey Bay region, throughout the western US, and in more distant locations such as Africa, Europe, Mexico, Tahiti, Australia, and East Asia. This emphasis on field and laboratory studies is the hallmark of our undergraduate majors. Within this context they address not only basic ecological and evolutionary processes, but also the application of this knowledge to advance environmental, conservation and sustainability science.

An outstanding group of faculty, each with a vigorous, internationally recognized research program, is available to teach courses in their specialties as well as core courses for the major. Areas of research strength within the department include plant biology, animal behavior, physiology, evolution, ecology, and marine biology. UC Santa Cruz is unique in the UC system in providing exceptional opportunities for undergraduate research, allowing students to interact one-on-one with faculty and other researchers in a laboratory or field setting.

Students may plan a program that leads to one of several bachelor of arts (B.A.) and bachelor of science (B.S.) degrees. Students may choose from the following major options:

Biology B.A.

Ecology and Evolution B.S.

Marine Biology B.S.

Plant Sciences B.S.

Environmental Studies/Biology combined major B.A. (administered by the Environmental Studies Department).

Advanced undergraduates, with the guidance of faculty mentors, have access to extensive departmental laboratories, including state-of-the-art genetics, physiology, and marine science facilities, for independent research. Fieldwork draws on a remarkable variety of terrestrial habitats, as well as ready access to Monterey Bay and the open Pacific. Terrestrial studies are supported by the UC Santa Cruz reserve on campus, an arboretum, greenhouse facility, and vehicles to transport students to field sites off campus. Freshwater studies have access to a number of coastal tributaries and laboratory facilities at Long Marine Laboratory. Marine studies are supported by the Long Marine Laboratory with running seawater facilities, a boating program, and an AAUS accredited SCUBA diving program for underwater classes and research. Año Nuevo Island, north of Santa Cruz, is the site of extensive behavioral studies of marine mammals. In addition to coursework, there is an array of opportunities for directed independent study that enables majors to enhance their upper-division programs to reflect and strengthen their own interests and goals in the sciences.

BIOLOGY B.A.

Information and Policies

Introduction

The general biology bachelor of arts major permits flexibility, but demands careful attention to a student's own interests and plans. Each student should select courses on the basis of up-to-date information in consultation with a biology faculty adviser whose interests reflect the student's interests.

Academic Advising for the Program

Academic advising is available at the EEB undergraduate advising office and via email at eebadvising@ucsc.edu. The undergraduate webpages contain advice and information pertinent to students' most frequently voiced questions. Each student should review the information posted on the website;

for further assistance, contact an EEB undergraduate adviser at eebadvising@ucsc.edu. Transfer students should also review the Transfer Information and Policy Section.

Getting Started in the Major

Prerequisites

The introductory biology sequence is prerequisite to virtually all upper-division biology courses. BIOL 20A (offered by the Molecular, Cell, and Developmental Biology Department) has a prerequisite of CHEM 1A. Therefore, it is essential for students to start chemistry as soon as possible. Students who have not taken CHEM 1A may begin the introductory sequence with BIOE 20C. The entire introductory biology sequence should be taken the first and second year, concurrently with or following the general chemistry sequence. We also strongly recommend completing the lower-division physics requirements early in your academic career.

An online mathematics placement is required to enroll in a mathematics course. Students are expected to take this examination and are encouraged to work in the learning modules until they place into calculus. For more information see the mathematics placement website.

Advanced placement (AP) course equivalencies can be used to fulfill prerequisites.

Program Learning Outcomes

The undergraduate curriculum offered by the Department of Ecology and Evolutionary Biology (EEB) is designed to ensure that all students declared in any EEB sponsored major will achieve the following seven program learning outcomes.

1. Students will demonstrate broad-based knowledge of the fundamentals of ecology, behavior, evolution and physiology and the relationships among these disciplines.
2. Students will demonstrate skills in the observation and experimental study of organisms, using both field-based and laboratory-based approaches.
3. Students will demonstrate skills in identifying, accessing, comprehending and synthesizing scientific information, including interpretation of the primary scientific literature. This includes understanding key questions and hypotheses, interpreting results and conclusions, and evaluating quality through critique.
4. Students will demonstrate the ability to conceive and execute independent scientific research, including developing their own questions and hypotheses, designing an appropriate theoretical or empirical/experimental approach, executing that approach, and analyzing and interpreting data.
5. Students will demonstrate an ability to understand and apply fundamental quantitative skills, including models and statistical analyses, so as to properly interpret published research and apply such skills in their own research.

6. Students will demonstrate the ability to communicate original scientific work in the form of a scientific paper, as well as in oral or poster presentations.
7. Students will exhibit strong teamwork and problem solving skills. They will demonstrate the ability to make arguments from evidence and work together to find optimal solutions.

Major Qualification Policy and Declaration Process

Major Qualification

All courses must be taken for a letter grade. The following qualification courses, or their equivalents, must be completed with a grade of C (2.0) or better:

All of the following courses:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5

Students with one grade of NP, C-, D+, D, D-, or F in one of the qualification courses are eligible to declare after successfully repeating the same or an equivalent course with a grade of C (2.0) or better.

Students with two or more grades of NP, C-, D+, D, D-, or F in the qualification courses are not eligible to declare.

Students with AP credit for any of the qualification course(s) are eligible to declare after successfully completing the remaining qualification courses.

Consult with an EEB undergraduate adviser when requesting to declare the major after the campus declaration deadline. Transfer students should also review the Transfer Information and Policy Section. For information on qualifying for the environmental studies/biology combined major, please see Environmental Studies in this catalog.

Appeal Process

Students who are not eligible to declare the major may appeal this decision after they have successfully completed the qualification courses by submitting an appeal letter to EEB undergraduate advising. Within 15 days of receipt of the appeal, the department will notify the student and college of the decision. For more information about the appeal process, see the appeal process website.

How to Declare a Major

Students may submit a petition to declare after successful completion of the qualification policy courses. Students who are enrolled in their final qualification policy course(s) may submit the petition, but will not be declared until grades have been posted. Information on major declaration can be found here. Additional questions may be directed to eebadvising@ucsc.edu.

Transfer Information and Policy

Transfer Admission Screening Policy

To be considered for admission to UC Santa Cruz as a proposed major in biology (B.A.), transfer students must pass equivalents of the following preparatory courses with a C (2.0) or better prior to transfer:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5
CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5

More information on qualifying for the major as a transfer applicant is here.

Getting Started at UCSC as a Transfer Student

Transfer students who satisfy the major screening requirements may declare the major at any time after matriculation only after their official transcripts have been posted to their MyUCSC student portal by the UCSC Office of Admissions.

Beginning in late June and early July (for fall transfer students) EEB Advising will review admitted students' reported transfer course work and determine how it applies to their major's requirements.

EEB Advising will contact admitted students via email. The email will include information on how students' transfer coursework fulfills major requirements. We will suggest courses for students' fall enrollment, and invite you to make an appointment to talk with EEB Undergraduate Advising or direct questions to eebadvising@ucsc.edu. Transfer students may also expect to receive regular email messages from EEB Advising in June, July, and August with additional information about the major.

Letter Grade Policy

All courses used to satisfy any major requirement must be taken for a letter grade.

Course Substitution Policy

To discuss the process for a course substitution, contact an EEB undergraduate adviser.

At least half of the upper-division courses (numbered BIOE 100–BIOE 179) required for each major must be taken in EEB at UC Santa Cruz not as transfer credits from another department or institution.

Transfer students are advised to contact an EEB undergraduate adviser before enrolling in numerous upper-division courses at other institutions. For more information on transferring courses to UC Santa Cruz, please consult the Transfer Student website. Additional information for transfer students is provided above in the "Transfer Students" section.

Only one upper-division course requirement may be met with a research-based independent study or graduate-level UC Santa Cruz biology course.

Double Majors and Major/Minor Combinations Policy

Students interested in pursuing multiple majors within the biological sciences may not declare any combination of Biology (B.A., B.S., or minor), Ecology and Evolution B.S., Marine Biology B.S., Plant Sciences B.S., or Environmental Studies/Biology B.A. combined major.

Study Abroad

The UC Education Abroad Program (UCEAP) offers qualified students unique opportunities to broaden their educational horizons. The EEB Department encourages interested students to participate. It is possible to satisfy major requirements abroad and graduate on time; consult with an EEB undergraduate adviser early in the planning process.

Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

There are excellent programs in Costa Rica, Australia, New Zealand, the United Kingdom, Denmark, and Germany, among others. The Costa Rica Tropical Biology Program is of note to students interested in tropical biology and ecology. Held spring and fall quarters at the Monteverde research station, this program gives students experience with hands-on field research and offers a homestay program. The University of Queensland (Australia) offers an intensive, full-semester marine science program, which includes stays at research stations on the Great Barrier Reef and in sheltered mangrove and seagrass habitats near Brisbane.

Students interested in study abroad need to get an early start on their introductory requirements, including chemistry, mathematics, and biology and must declare their major prior to going abroad. Visit the UCEAP office as soon as possible to begin planning and seek advice and approval for your UCEAP plan from an EEB undergraduate adviser prior to participation in UCEAP.

Honors

Honors in the biological sciences majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

Requirements and Planners

Course Requirements

Lower-Division Courses

Introductory Biology:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5

General Chemistry:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5

Statistics:

Choose one of the following options:

Either this course

STAT 5	Statistics	5
--------	------------	---

or these courses

STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
--------	--	---

STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2
---------	---	---

Physics:

Choose one of the following courses:

PHYS 1	Physics for Everyone	5
--------	----------------------	---

PHYS 6A	Introductory Physics I	5
---------	------------------------	---

PHYS 7A	Elementary Physics I	5
---------	----------------------	---

Upper-Division Courses

A total of eight upper-division biology courses, including electives, as follows:

Three core courses:

BIOL 105	Genetics	5
----------	----------	---

BIOE 107	Ecology	5
----------	---------	---

BIOE 109	Evolution	5
----------	-----------	---

One of the following anatomy or physiology courses:

BIOE 131	Animal Physiology	5
----------	-------------------	---

BIOE 131L	Animal Physiology Laboratory	2
-----------	------------------------------	---

BIOE 133	Exercise Physiology	5
----------	---------------------	---

BIOE 133L	Exercise Physiology Laboratory	2
-----------	--------------------------------	---

BIOE 134	Comparative Vertebrate Anatomy	5
----------	--------------------------------	---

BIOE 134L	Comparative Vertebrate Anatomy Laboratory	2
-----------	---	---

BIOE 135	Plant Physiology	5
----------	------------------	---

BIOE 135L	Plant Physiology Laboratory	2
-----------	-----------------------------	---

BIOL 130	Human Physiology	5
----------	------------------	---

BIOL 130L	Human Physiology Laboratory	2
-----------	-----------------------------	---

METX 135	Functional Anatomy	5
----------	--------------------	---

METX 135L	Functional Anatomy Lab	2
-----------	------------------------	---

BIOE 137	Molecular Ecology	5
----------	-------------------	---

BIOE 141L	Behavioral Ecology Field Course	5
-----------	---------------------------------	---

BIOE 145	Plant Ecology	5
----------	---------------	---

BIOE 145L	Field Methods in Plant Ecology	5
-----------	--------------------------------	---

BIOE 150L	Ecological Field Methods Laboratory	5
-----------	-------------------------------------	---

BIOE 151B	Ecology and Conservation in Practice Supercourse:	5
-----------	---	---

BIOE 151C	Ecological Field Methods Laboratory	5
-----------	-------------------------------------	---

BIOE 153C	Disciplinary Communication for Biologists	5
-----------	---	---

BIOE 158L	Marine Ecology Laboratory	5
-----------	---------------------------	---

BIOE 159A	Marine Ecology Field Quarter: Marine Ecology with Laboratory	5
-----------	--	---

BIOE 161L	Kelp Forest Ecology Laboratory	5
-----------	--------------------------------	---

BIOE 171	Disciplinary Communication for Biologists	5
----------	---	---

BIOE 172	Population Genetics	5
----------	---------------------	---

BIOL 100	Biochemistry	5
----------	--------------	---

BIOL 101	Molecular Biology	5
----------	-------------------	---

BIOL 101L	Molecular Biology Laboratory	2
-----------	------------------------------	---

BIOL 110	Cell Biology	5
----------	--------------	---

BIOL 110L	Cell Biology Laboratory	5
-----------	-------------------------	---

BIOL 111	Immunology	5
----------	------------	---

BIOL 115	Eukaryotic Molecular Biology	5
----------	------------------------------	---

BIOL 120	Developmental Biology	5
----------	-----------------------	---

BIOL 125	Introduction to Neuroscience	5
----------	------------------------------	---

METX 119	Microbiology	5
----------	--------------	---

METX 119L	Microbiology Laboratory	5
-----------	-------------------------	---

Note: Lecture/lab combinations count as a single course.

Some of these electives may have prerequisites that do not satisfy major or minor requirements.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement for the biology bachelor of arts degree is satisfied by completing two of the following Ecology and Evolutionary Biology courses:

BIOE 108	Marine Ecology	5
----------	----------------	---

BIOE 114	Herpetology	5
----------	-------------	---

BIOE 114L	Field Methods in Herpetological Research	2
-----------	--	---

BIOE 117	Systematic Botany of Flowering Plants	5
----------	---------------------------------------	---

BIOE 120	Marine Botany	5
----------	---------------	---

BIOE 120L	Marine Botany Laboratory	2
-----------	--------------------------	---

BIOE 122	Invertebrate Zoology	5
----------	----------------------	---

BIOE 122L	Invertebrate Zoology Laboratory	2
-----------	---------------------------------	---

BIOE 127	Ichthyology	5
----------	-------------	---

BIOE 127L	Ichthyology Laboratory	2
-----------	------------------------	---

BIOE 128L	Large Marine Vertebrates Field Course	5
-----------	---------------------------------------	---

BIOE 129	Biology of Marine Mammals	5
----------	---------------------------	---

BIOE 129L	Biology of Marine Mammals Laboratory	2
-----------	--------------------------------------	---

BIOE 137	Molecular Ecology	5
----------	-------------------	---

BIOE 141L	Behavioral Ecology Field Course	5
-----------	---------------------------------	---

BIOE 145	Plant Ecology	5
----------	---------------	---

BIOE 145L	Field Methods in Plant Ecology	5
-----------	--------------------------------	---

BIOE 150L	Ecological Field Methods Laboratory	5
-----------	-------------------------------------	---

BIOE 151B	Ecology and Conservation in Practice Supercourse:	5
-----------	---	---

BIOE 151C	Ecological Field Methods Laboratory	5
-----------	-------------------------------------	---

BIOE 153C	Disciplinary Communication for Biologists	5
-----------	---	---

BIOE 158L	Marine Ecology Laboratory	5
-----------	---------------------------	---

BIOE 159A	Marine Ecology Field Quarter: Marine Ecology with Laboratory	5
-----------	--	---

BIOE 161L	Kelp Forest Ecology Laboratory	5
-----------	--------------------------------	---

BIOE 171	Disciplinary Communication for Biologists	5
----------	---	---

BIOE 172	Population Genetics	5
----------	---------------------	---

BIOE 172L Population Genetics Laboratory 2

Note: Lecture and 2-credit lab combinations count as a single course.

Comprehensive Requirement

All majors in the biological sciences require completion of a comprehensive requirement. This requirement can be satisfied in one of the following ways:

- receiving a passing grade in an independent research course, or field/laboratory course listed below;
- completing a senior thesis;
- achieving a graduate record examination (GRE) score at or above the 50th percentile on the biology subject test or the biochemistry, cell, and molecular biology subject test. Reports of GRE scores must be submitted to the EEB undergraduate advising office before the last day of the graduating quarter;
- obtaining a medical college admission test (MCAT) score at or above the 50th percentile on the biological sciences section. Reports of MCAT scores must be submitted to the EEB undergraduate advising office before the last day of the graduating quarter.

Comprehensive courses offered by Ecology and Evolutionary Biology

BIOE 112L	Ornithology Field Studies	2
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 117L	Systematic Botany of Flowering Plants Laboratory	2
BIOE 120L	Marine Botany Laboratory	2
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 124L	Mammalogy Laboratory	2

3rd (junior)	BIOL 105	BIOE 107 BIOE 109	Anatomy/Physiology STAT 5 or STAT 7 & STAT 7L
4th (senior)	Biology elective* Biology elective*	Biology elective* PHYS 1	Biology elective*

*Electives must be chosen to satisfy the Disciplinary Communication and Comprehensive requirements.

Transfer student sample planner

For information on the general biology minor, see biology B.S. and minor (p. 315).

ECOLOGY AND EVOLUTION B.S.

Information and Policies

Introduction

The ecology and evolution major provides students with interdisciplinary skills necessary for understanding and solving complex problems in ecology, evolution, behavior, and physiology. While some of these disciplines focus on molecular or chemical mechanisms, they all address questions on larger spatial and temporal scales that can be applied to important environmental problems, including genetic and ecological aspects of conservation biology and biodiversity.

Students majoring in ecology and evolution will receive a B.S. degree based on an integrated series of courses providing breadth in fundamental areas of biology and allied sciences that enhance understanding of evolutionary and ecological processes. The capstone of this curriculum is a suite of field courses providing students unique opportunities to learn and conduct research in a host of ecological systems. Students are encouraged to take field courses in their areas of specialization. Other opportunities include participation in research projects with faculty sponsors and the intensive Education Abroad Programs (UCEAP) in Costa Rica (tropical biology) and Australia (marine sciences).

Academic Advising for the Program

Academic advising is available at the Department of Ecology and Evolutionary Biology (EEB) undergraduate advising office and via email at eebadvising@ucsc.edu. The undergraduate webpages contain advice and information pertinent to students' most frequently voiced questions. Each student should review the information posted on the website; for further assistance, contact an EEB undergraduate adviser at eebadvising@ucsc.edu. Transfer students should also review the Transfer Information and Policy Section.

Getting Started in the Major

Prerequisites

The introductory biology sequence is prerequisite to virtually all upper-division biology courses. BIOL 20A (offered by the Molecular, Cell, and Developmental Biology Department) has a prerequisite of CHEM 1A. Therefore, it is essential for students to start chemistry as soon as possible. Students who have not taken CHEM 1A may begin the introductory sequence with BIOE 20C. The entire introductory biology sequence should be taken the first and second year, concurrently with or following the general chemistry sequence. We also strongly recommend completing the lower-division physics requirements early in your academic career.

An online mathematics placement is required to enroll in a mathematics course. Students are expected to take this examination and are encouraged to work in the learning modules until they place into calculus. For more information see the mathematics placement website.

Advanced placement (AP) course equivalencies can be used to fulfill prerequisites.

Program Learning Outcomes

The undergraduate curriculum offered by EEB is designed to ensure that all students declared in any EEB-sponsored major will achieve the following seven program learning outcomes:

1. Students will demonstrate broad-based knowledge of the fundamentals of ecology, behavior, evolution and physiology and the relationships among these disciplines.
2. Students will demonstrate skills in the observation and experimental study of organisms, using both field-based and laboratory-based approaches.
3. Students will demonstrate skills in identifying, accessing, comprehending and synthesizing scientific information, including interpretation of the primary scientific literature. This includes understanding key questions and hypotheses, interpreting results and conclusions, and evaluating quality through critique.
4. Students will demonstrate the ability to conceive and execute independent scientific research, including developing their own questions and hypotheses, designing an appropriate theoretical or empirical/experimental approach, executing that approach, and analyzing and interpreting data.
5. Students will demonstrate an ability to understand and apply fundamental quantitative skills, including models and statistical analyses, so as to properly interpret published research and apply such skills in their own research.
6. Students will demonstrate the ability to communicate original scientific work in the form of a scientific paper, as well as in oral or poster presentations.
7. Students will exhibit strong teamwork and problem solving skills. They will demonstrate the ability to make arguments from evidence and work together to find optimal solutions.

Major Qualification Policy and Declaration Process

Major Qualification

All courses must be taken for a letter grade. The following qualification courses, or their equivalents, must be completed with a grade of C (2.0) or better:

All of the following courses:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5

And one of the following courses:

MATH 11A	Calculus with Applications	5
----------	----------------------------	---

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
----------	--	---

Students with one grade of NP, C-, D+, D, D-, or F in one of the qualification courses are eligible to declare after successfully repeating the same or an equivalent course with a grade of C (2.0) or better.

Students with two or more grades of NP, C-, D+, D, D-, or F in the qualification courses are not eligible to declare. Mathematics courses will not be included in this calculation.

Students with AP credit for any of the qualification course(s) are eligible to declare after successfully completing the remaining qualification courses.

Consult with an EEB undergraduate adviser when requesting to declare the major after the campus declaration deadline. Transfer students should also review the Transfer Information and Policy Section.

For information on qualifying for the environmental studies/biology combined major, please see Environmental Studies in this catalog.

Appeal Process

Students who are not eligible to declare the major may appeal this decision after they have successfully completed the qualification courses by submitting an appeal letter to EEB undergraduate advising. Within 15 days of receipt of the appeal, the department will notify the student and college of the decision. For more information about the appeal process, see the appeal process website.

How to Declare a Major

Students may submit a petition to declare after successful completion of the qualification policy courses. Students who have reached their major declaration deadline and are enrolled in their final qualification policy course(s) may submit the petition, but will not be declared until grades have been posted. Information on major declaration can be found here. Additional questions may be directed to eebadvising@ucsc.edu.

Transfer Information and Policy

Transfer Admission Screening Policy

To be considered for admission to UC Santa Cruz as a proposed major in ecology and evolution (B.S.), marine biology, or plant sciences, transfer students must pass equivalents of the following preparatory courses with a C (2.0) or better prior to transfer:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5
CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5

Plus, one of the following calculus courses:

MATH 11A	Calculus with Applications	5
MATH 19A	Calculus for Science,	5

Engineering, and Mathematics

More information on qualifying for the major as a transfer applicant is here.

While it is not required for UC Santa Cruz admission, transfer students are strongly encouraged to complete equivalents of the complete general chemistry series, a second quarter of calculus, and the physics series (PHYS 6A/PHYS 6L, plus PHYS 6B or PHYS 6C) prior to transfer. Students who transfer without having completed this additional recommended introductory coursework may require more than two years to complete the major requirements. Additional transfer preparation information is here.

Getting Started at UCSC as a Transfer Student

Transfer students who satisfy the major screening requirements may declare the major at any time after matriculation only after their official transcripts have been posted to their MyUCSC student portal by the UCSC Office of Admissions.

Beginning in late June and early July (for fall transfer students) EEB advising will review admitted students' reported transfer course work and determine how it applies to their major's requirements.

EEB advising will contact admitted students via email. The email will include information on how students' transfer coursework fulfills major requirements. We will suggest courses for students' fall enrollment, and invite you to make an appointment to talk with EEB Undergraduate Advising or direct questions to eebadvising@ucsc.edu. Transfer students may also expect to receive regular email messages from EEB advising in June, July, and August with additional information about the major.

Letter Grade Policy

All courses used to satisfy any major requirement must be taken for a letter grade.

Course Substitution Policy

To discuss the process for a course substitution, contact an EEB undergraduate adviser.

At least half of the upper-division courses (numbered BIOE 100–BIOE 179) required for each major must be taken in EEB at UC Santa Cruz not as transfer credits from another department or institution.

Transfer students are advised to contact an EEB undergraduate adviser before enrolling in numerous upper-division courses at other institutions. For more information on transferring courses to UC Santa Cruz, please consult the Transfer Student website. Additional information for transfer students is provided above in the “Transfer Students” section.

Only one upper-division course requirement may be met with a research-based independent study or graduate-level UC Santa Cruz biology course.

Double Majors and Major/Minor Combinations

Policy

Students interested in pursuing multiple majors within the biological sciences may not declare any combination of Biology (B.A., B.S., or minor), Ecology and Evolution B.S., Marine Biology B.S., Plant Sciences B.S., or Environmental Studies/Biology B.A. combined major.

Study Abroad

The UC Education Abroad Program (UCEAP) offers qualified students unique opportunities to broaden their educational horizons. The EEB Department encourages interested students to participate. It is possible to satisfy major requirements abroad and graduate on time; consult with an EEB undergraduate adviser early in the planning process.

Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

There are excellent programs in Costa Rica, Australia, New Zealand, the United Kingdom, Denmark, and Germany, among others. The Costa Rica Tropical Biology Program is of note to students interested in tropical biology and ecology. Held spring and fall quarters at the Monteverde research station, this program gives students experience with hands-on field research and offers a homestay program. The University of Queensland (Australia) offers an intensive, full-semester marine science program, which includes stays at research stations on the Great Barrier Reef and in sheltered mangrove and seagrass habitats near Brisbane.

Students interested in study abroad need to get an early start on their introductory requirements, including chemistry, mathematics, and biology and must declare their major prior to going abroad. Visit the UCEAP office as soon as possible to begin planning and seek advice and approval for your UCEAP plan from an EEB undergraduate adviser prior to participation in UCEAP.

Honors

Honors in the biological sciences majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

Requirements and Planners

Course Requirements

Lower-Division Courses

Introductory Biology:

BIOE 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5

General Chemistry:

CHEM 1A	General Chemistry	5
---------	-------------------	---

CHEM 1B	General Chemistry	5

or these courses

PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1

PHYS 6C	Introductory Physics III	5
---------	--------------------------	---

PHYS 7A, PHYS 6L, PHYS 7B: recommended

Upper-Division Courses

A total of 11 upper-division courses, including relevant electives; two must include laboratory or fieldwork. Courses appearing in more than one category can fulfill only one requirement.

Three upper-division core courses:

BIOL 105	Genetics	5
BIOE 107	Ecology	5
BIOE 109	Evolution	5

One of the following physiology courses:

NOTE: Lecture/lab combinations count as one course.

BIOE 131	Animal Physiology	5
BIOE 131L	Animal Physiology Laboratory	2
BIOE 133	Exercise Physiology	5
BIOE 133L	Exercise Physiology Laboratory	2
BIOE 134	Comparative Vertebrate Anatomy	5
BIOE 134L	Comparative Vertebrate Anatomy Laboratory	2
BIOE 135	Plant Physiology	5
BIOE 135L	Plant Physiology Laboratory	2

BIOE 131/BIOE 131L: lab optional

One of the following organism courses:

NOTE: Lecture/lab combinations count as one course.

BIOE 112	Ornithology	5
BIOE 112L	Ornithology Field Studies	2
BIOE 114	Herpetology	5
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 117	Systematic Botany of Flowering Plants	5
BIOE 117L	Systematic Botany of Flowering Plants Laboratory	2
BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2
BIOE 122	Invertebrate Zoology	5
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 124	Mammalogy	5
BIOE 124L	Mammalogy Laboratory	2
BIOE 127	Ichthyology	5
BIOE 127L	Ichthyology Laboratory	2
BIOE 129	Biology of Marine Mammals	5
BIOE 129L	Biology of Marine Mammals Laboratory	2
METX 119	Microbiology	5
METX 119L	Microbiology Laboratory	5

BIOE 129/BIOE 129L: lab required

METX 119/METX 119L: both lecture and laboratory required

Electives**Three topical electives chosen from the following:**

NOTE: Lecture and 2-credit lab combinations count as one course.

BIOE 108	Marine Ecology	5
BIOE 112	Ornithology	5
BIOE 112L	Ornithology Field Studies	2
BIOE 114	Herpetology	5
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 117	Systematic Botany of Flowering Plants	5
BIOE 117L	Systematic Botany of	2

Economics

ECON 166A	Game Theory and Applications I	5
ECON 166B	Game Theory and Applications II	5

Environmental Studies (enrollment by permission of instructor)

ENVS 104A	Introduction to Environmental Field Methods	5
ENVS 104L	Field Methods Laboratory	2
ENVS 107A	Natural History Field Quarter	5
ENVS 107B	Natural History Field Quarter	5
ENVS 107C	Natural History Field Quarter	5
ENVS 108	General Entomology	5
ENVS 115A	Geographic Information Systems and Environmental Applications	5
ENVS 115L	Exercises in Geographic Information Systems	2
ENVS 120	Conservation Biology	5
ENVS 122	Tropical Ecology and Conservation	5
ENVS 123	Animal Ecology and Conservation	5
ENVS 129	Integrated Pest Management	5
ENVS 130A	Agroecology and Sustainable Agriculture	5
ENVS 130L	Agroecology and Sustainable Agriculture Laboratory	2
ENVS 130B	Justice and Sustainability in Agriculture	5
ENVS 131	Insect Ecology	5
ENVS 160	Restoration Ecology	5
ENVS 161A	Soils and Plant Nutrition	5
ENVS 162	Plant Physiological Ecology	5
ENVS 163	Plant Disease Ecology	5

OCEA 130	Biological Oceanography	5

Psychology

PSYC 123	Cognitive Neuroscience	5
----------	------------------------	---

Some of these electives may have prerequisites that do not satisfy major or minor requirements.

One of the following may also be used as an upper-division general elective:

Biological Sciences-EEB

Any 5 credits of undergraduate research from:

BIOE 183W	Undergraduate Research in EEB--Writing	2
BIOE 183L	Undergraduate Research in EEB	3
BIOE 193	Independent Research in EEB	5
BIOE 193F	Independent Research in EEB	2
BIOE 195	Senior Thesis	5

or

Environmental Studies

ENVS 183	Environmental Studies Internship	5
----------	----------------------------------	---

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in ecology and evolution is satisfied by completing two of the following ecology and evolutionary biology courses:

NOTE: Lecture and 2-credit lab combinations count as a single course.

BIOE 108	Marine Ecology	5
BIOE 114	Herpetology	5
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 117	Systematic Botany of Flowering Plants	5
BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2
BIOE 122	Invertebrate Zoology	5
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 127	Ichthyology	5
BIOE 127L	Ichthyology Laboratory	2
BIOE 128L	Large Marine Vertebrates Field Course	5
BIOE 129	Biology of Marine Mammals	5
BIOE 129L	Biology of Marine Mammals Laboratory	2
BIOE 137	Molecular Ecology	5
BIOE 141L	Behavioral Ecology Field Course	5
BIOE 145	Plant Ecology	5
BIOE 145L	Field Methods in Plant Ecology	5
BIOE 150L	Ecological Field Methods Laboratory	5
BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
BIOE 153C	Disciplinary Communication for Biologists	5
BIOE 158L	Marine Ecology Laboratory	5
BIOE 159A	Marine Ecology Field Quarter: Marine Ecology with Laboratory	5
BIOE 161L	Kelp Forest Ecology Laboratory	5
BIOE 171	Disciplinary Communication for Biologists	5

BIOE 172	Population Genetics	5
BIOE 172L	Population Genetics Laboratory	2

For 2-credit laboratory courses taken concurrently with 5-credit lectures, both courses must be passed to receive one half of the DC requirement.

Comprehensive Requirement

All majors in the biological sciences require completion of a comprehensive requirement. This requirement can be satisfied in one of the following ways:

- receiving a passing grade in an independent research course, or field/laboratory course listed below;
- completing a senior thesis;
- achieving a graduate record examination (GRE) score at or above the 50th percentile on the biology subject test or the biochemistry, cell, and molecular biology subject test. Reports of GRE scores must be submitted to the EEB undergraduate advising office before the last day of the graduating quarter;
- obtaining a medical college admission test (MCAT) score at or above the 50th percentile on the biological sciences section. Reports of MCAT scores must be submitted to the EEB undergraduate advising office before the last day of the graduating quarter.

Comprehensive courses offered by Ecology and Evolutionary Biology

NOTE: Lab courses may have associated prerequisite or corequisite lecture courses.

BIOE 112L	Ornithology Field Studies	2
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 117L	Systematic Botany of Flowering Plants Laboratory	2
BIOE 120L	Marine Botany Laboratory	2
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 124L	Mammalogy Laboratory	2
BIOE 127L	Ichthyology Laboratory	2
BIOE 128L	Large Marine Vertebrates Field Course	5
BIOE 129L	Biology of Marine Mammals Laboratory	2
BIOE 131L	Animal Physiology Laboratory	2
BIOE 133L	Exercise Physiology Laboratory	2
BIOE 134L	Comparative Vertebrate Anatomy Laboratory	2
BIOE 135L	Plant Physiology Laboratory	2

BIOE 161L	Kelp Forest Ecology Laboratory	5
BIOE 163L	Ecology of Reefs, Mangroves, and Seagrasses Laboratory	2
BIOE 172L	Population Genetics Laboratory	2
BIOE 183W	Undergraduate Research in EEB--Writing	2

Comprehensive courses offered by Molecular, Cell and Developmental Biology

BIOL 100L	Biochemistry Laboratory	5
BIOL 105L	Eukaryotic Genetics Laboratory	5
BIOL 109L	Yeast Molecular Genetics Laboratory	5
BIOL 110L	Cell Biology Laboratory	5
BIOL 115L	Eukaryotic Molecular Biology Laboratory	5
BIOL 120L	Development Laboratory	5
BIOL 121L	Environmental Phage Biology Laboratory	5
BIOL 178L	Protocols in Stem Cell Biology	5
BIOL 186L	Undergraduate Research in MCD Biology	5
BIOL 186R	Undergraduate Research in MCD Biology	5
BIOL 189	Health Sciences Internship	3

Comprehensive courses offered in other departments

BIOC 110L	Advanced Biochemistry Laboratory	5
METX 119L	Microbiology Laboratory	5

Planners

In addition to the specific courses shown in these planners, a student must complete courses satisfying the IM, TA, PE, PR, CC, ER and C campus general education requirements.

Sample Frosh Planner

1st (frosh)	BIOE 20C	MATH 11A or MATH 19A	MATH 11B or MATH 19B
		CHEM 1A	CHEM 1B

2nd (soph)	BIOL 20A	BIOE 20B	STAT 7 & STAT 7L
	CHEM 1C & CHEM 1N	PHYS 6A & PHYS 6L	PHYS 6B or 6C

3rd (junior)	BIOL 105	Physiology core	BIOE 109
	BIOE 107	*ECEV topical elective	Organismal core

4th (senior)	*ECEV topical elective	*ECEV topical elective	EEB general elective
	EEB general elective	EEB general elective	

*ECEV = Ecology and Evolution B.S.

Electives must be chosen to satisfy the Disciplinary Communication and Comprehensive requirements.

Additional Frosh sample planners may be found on the EEB website.

Sample Transfer Planner

For students who transferred in after completing the transfer screening courses and:

- MATH 11B
- CHEM 1C & CHEM 1N
- PHYS 6A & PHYS 6L, and PHYS 6B or PHYS 6C

	Fall	Winter	Spring
3rd (junior)	BIOL 105	BIOE 107	BIOE 109
	*ECEV topical	*ECEV topical	EEB general elective

elective elective

STAT 7 &
STAT 7L

4th (senior)	Organismal core	*ECEV topical elective	Physiology core
	EEB general elective	EEB general elective	

*ECEV = Ecology and Evolution B.S.

Electives must be chosen to satisfy the Disciplinary Communication and Comprehensive requirements.

Additional Transfer student sample planners may be found on the EEB website.

MARINE BIOLOGY B.S.**Information and Policies****Introduction**

The marine biology B.S. is offered by the Department of Ecology and Evolutionary Biology (EEB), located on UC Santa Cruz's Coastal Science Campus (CSC). CSC is situated on Monterey Bay and its great diversity of coastal marine ecosystems; nature reserves; and state, federal, and private marine research institutions and resource management agencies. These resources, combined with on-campus computing and analytical facilities and the Long Marine Laboratory, make an exceptional campus for the study of marine biology and its application to coastal conservation and management. Descriptions of nearby environments, institutions, and facilities are available through the Ecology and Evolutionary Biology (EEB) Department website.

The marine biology major is designed to introduce students to marine organisms and the biological and physical processes that affect these organisms, their populations, and their coastal and oceanic ecosystems. The emphasis is on basic principles that help in understanding the processes that shape life in marine environments. The marine biology major is a demanding program that offers a B.S. degree and requires several more courses than the general biology B.A. major.

Academic Advising for the Program

Academic advising is available at the EEB undergraduate advising office. The undergraduate webpages contain advice and information pertinent to students' most frequently voiced questions. Each student should review the information posted on the website; for further assistance, contact an EEB undergraduate adviser. EEB undergraduate adviser at eebadvising@ucsc.edu. Transfer students should also review the Transfer Information and Policy Section.

Getting Started in the Major

Prerequisites

The introductory biology sequence is prerequisite to virtually all upper-division biology courses. BIOL 20A (offered by the Molecular, Cell, and Developmental Biology Department) has a prerequisite of CHEM 1A. Therefore, it is essential for students to start chemistry as soon as possible. Students who have not taken CHEM 1A may begin the introductory sequence with BIOE 20C. The entire introductory biology sequence should be taken the first and second year, concurrently with or following the general chemistry sequence. We also strongly recommend completing the lower-division physics requirements early in your academic career.

An online mathematics placement is required to enroll in a mathematics course. Students are expected to take this examination and are encouraged to work in the learning modules until they place into calculus. For more information see the mathematics placement website.

Advanced placement (AP) course equivalencies can be used to fulfill prerequisites.

Program Learning Outcomes

The undergraduate curriculum offered by the Department of Ecology and Evolutionary Biology (EEB) is designed to ensure that all students declared in any EEB sponsored major will achieve the following seven program learning outcomes.

1. Students will demonstrate broad-based knowledge of the fundamentals of ecology, behavior, evolution and physiology and the relationships among these disciplines.
2. Students will demonstrate skills in the observation and experimental study of organisms, using both field-based and laboratory-based approaches.
3. Students will demonstrate skills in identifying, accessing, comprehending and synthesizing scientific information, including interpretation of the primary scientific literature. This includes understanding key questions and hypotheses, interpreting results and conclusions, and evaluating quality through critique.
4. Students will demonstrate the ability to conceive and execute independent scientific research, including developing their own questions and hypotheses, designing an appropriate theoretical or empirical/experimental approach, executing that approach, and analyzing and interpreting data.
5. Students will demonstrate an ability to understand and apply fundamental quantitative skills, including models and statistical analyses, so as to properly interpret published research and apply such skills in their own research.
6. Students will demonstrate the ability to communicate original scientific work in the form of a scientific paper, as well as in oral or poster presentations.

7. Students will exhibit strong teamwork and problem solving skills. They will demonstrate the ability to make arguments from evidence and work together to find optimal solutions.

Major Qualification Policy and Declaration Process

Major Qualification

All courses must be taken for a letter grade. The following qualification courses, or their equivalents, must be completed with a grade of C (2.0) or better:

All of the following courses:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5

And one of the following courses:

MATH 11A	Calculus with Applications	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

Students with one grade of NP, C-, D+, D, D-, or F in one of the qualification courses are eligible to declare after successfully repeating the same or an equivalent course with a grade of C (2.0) or better.

Students with two or more grades of NP, C-, D+, D, D-, or F in the qualification courses are not eligible to declare. Mathematics courses will not be included in this calculation.

Students with AP credit for any of the qualification course(s) are eligible to declare after successfully completing the remaining qualification courses.

Consult with an EEB undergraduate adviser when requesting to declare the major after the campus declaration deadline. Transfer students should also review the Transfer Information and Policy Section.

For information on qualifying for the environmental studies/biology combined major, please see environmental studies in this catalog.

Appeal Process

Students who are not eligible to declare the major may appeal this decision after they have successfully completed the qualification courses by submitting an appeal letter to EEB undergraduate advising. Within 15 days of receipt of the appeal, the department will notify the student and college of the decision. For more information about the appeal process, see the appeal process website.

How to Declare a Major

Students may submit a petition to declare after successful completion of the qualification policy courses. Students who are enrolled in their final qualification policy course(s) may submit the petition, but will not be declared until grades have been posted. Information on major declaration can be found

here. Additional questions may be directed to eebadvising@ucsc.edu.

Transfer Information and Policy

Transfer Admission Screening Policy

To be considered for admission to UC Santa Cruz as a proposed major in ecology and evolution (B.S.), marine biology, or plant sciences, transfer students must pass equivalents of the following preparatory courses with a C (2.0) or better prior to transfer:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5
CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5

Plus, one of the following calculus courses:

MATH 11A	Calculus with Applications	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

More information on qualifying for the major as a transfer applicant is here.

While it is not required for UC Santa Cruz admission, transfer students are strongly encouraged to complete equivalents of the complete general chemistry series, a second quarter of calculus, and the physics series (PHYS 6A/PHYS 6L, plus PHYS 6B or PHYS 6C) prior to transfer. Students who transfer without having completed this additional recommended introductory coursework may require more than two years to complete the major requirements. Additional transfer preparation information is here.

Getting Started at UCSC as a Transfer Student

Transfer students who satisfy the major screening requirements may declare the major at any time after matriculation only after their official transcripts have been posted to their MyUCSC student portal by the UCSC Office of Admissions.

Beginning in late June and early July (for fall transfer students) EEB advising will review admitted students' reported transfer course work and determine how it applies to their major's requirements. EEB advising will contact admitted students via email. The email will include information on how students' transfer coursework fulfills major requirements. We will suggest courses for students' Fall enrollment, and invite you to make an appointment to talk with EEB undergraduate advising or direct questions to eebadvising@ucsc.edu. Transfer students may also expect to receive regular email messages from EEB advising in June, July, and August with additional information about the major.

Letter Grade Policy

All courses used to satisfy any major requirement must be taken for a letter grade.

Course Substitution Policy

To discuss the process for a course substitution, contact an EEB undergraduate adviser.

At least half of the upper-division courses (numbered BIOE 100–BIOE 179) required for each major must be taken in EEB at UC Santa Cruz not as transfer credits from another department or institution.

Transfer students are advised to contact an EEB undergraduate adviser before enrolling in numerous upper-division courses at other institutions. For more information on transferring courses to UC Santa Cruz, please consult the transfer student website. Additional information for transfer students is provided above in the "Transfer Students" section.

Only one upper-division course requirement may be met with a research-based independent study or graduate-level UC Santa Cruz biology course.

Double Majors and Major/Minor Combinations Policy

Students interested in pursuing multiple majors within the biological sciences may not declare any combination of biology (B.A., B.S., or minor), ecology and evolution B.S., marine biology B.S., plant sciences B.S., or environmental studies/biology B.A. combined major.

Study Abroad

The UC Education Abroad Program (UCEAP) offers qualified students unique opportunities to broaden their educational horizons. The EEB Department encourages interested students to participate. It is possible to satisfy major requirements abroad and graduate on time; consult with an EEB undergraduate adviser early in the planning process.

Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

There are excellent programs in Costa Rica, Australia, New Zealand, the United Kingdom, Denmark, and Germany, among others. The Costa Rica Tropical Biology Program is of note to students interested in tropical biology and ecology. Held spring and fall quarters at the Monteverde research station, this program gives students experience with hands-on field research and offers a homestay program. The University of Queensland (Australia) offers an intensive, full-semester marine science program, which includes stays at research stations on the Great Barrier Reef and in sheltered mangrove and seagrass habitats near Brisbane.

Students interested in study abroad need to get an early start on their introductory requirements, including chemistry, mathematics, and biology and must declare their major prior to going abroad. Visit the UCEAP office as soon as possible to begin planning and seek advice and approval for your

UCEAP plan from an EEB undergraduate adviser prior to participation in UCEAP.

Honors

Honors in the biological sciences majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

BIOL 105	Genetics	5
BIOE 109	Evolution	5

One ecology course:

BIOE 107	Ecology	5
BIOE 108	Marine Ecology	5

One marine-environment course:

OCEA 101	The Marine Environment	5
OCEA 130	Biological Oceanography	5

One marine course:

NOTE: Lecture/lab combinations count as one course

BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2
BIOE 122	Invertebrate Zoology	5
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 127	Ichthyology	5
BIOE 127L	Ichthyology Laboratory	2
BIOE 129	Biology of Marine Mammals	5
BIOE 129L	Biology of Marine Mammals Laboratory	2

BIOE 129/BIOE 129L: lab optional

Electives

Three topical electives chosen from the following:

NOTE: Lecture and 2-credit lab combinations count as one course.

BIOE 108	Marine Ecology	5
BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2
BIOE 122	Invertebrate Zoology	5
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 127	Ichthyology	5
BIOE 127L	Ichthyology Laboratory	2
BIOE 128L	Large Marine Vertebrates Field Course	5
BIOE 129	Biology of Marine Mammals	5
BIOE 129L	Biology of Marine Mammals Laboratory	2

	Laboratory			Field Methods	
BIOE 155	Freshwater Ecology	5	ENVS 104L	Field Methods Laboratory	2
BIOE 155L	Freshwater Ecology Laboratory	5	ENVS 107A	Natural History Field Quarter	5
BIOE 158L	Marine Ecology Laboratory	5	ENVS 107B	Natural History Field Quarter	5
BIOE 159A	Marine Ecology Field Quarter: Marine Ecology with Laboratory	5	ENVS 107C	Natural History Field Quarter	5
			ENVS 108	General Entomology	5
BIOE 159B	Marine Ecology Field Quarter: Ichthyology with Laboratory	5	ENVS 115A	Geographic Information Systems and Environmental Applications	5
BIOE 159C	Marine Ecology Field Quarter: Methods in Field Ecology	5	ENVS 115L	Exercises in Geographic Information Systems	2
BIOE 159D	Marine Ecology Field Quarter: Methods in Field Ecology Laboratory	5	ENVS 120	Conservation Biology	5
BIOE 161	Kelp Forest Ecology	5	ENVS 122	Tropical Ecology and Conservation	5
BIOE 161L	Kelp Forest Ecology Laboratory	5	ENVS 123	Animal Ecology and Conservation	5
BIOE 163	Ecology of Reefs, Mangroves, and Seagrasses	5	ENVS 129	Integrated Pest Management	5
BIOE 163L	Ecology of Reefs, Mangroves, and Seagrasses Laboratory	2	ENVS 130A	Agroecology and Sustainable Agriculture	5
BIOE 165	Marine Conservation Biology	5	ENVS 130L	Agroecology and Sustainable Agriculture Laboratory	2

OCEA 130	Biological Oceanography	5	ENVS 161A	Soils and Plant Nutrition	5
			ENVS 162	Plant Physiological Ecology	5
			ENVS 163	Plant Disease Ecology	5
			ENVS 167	Freshwater and Wetland Ecology	5
			ENVS 168	Biogeochemistry and the Global Environment	5

Three general electives chosen from the following:

NOTE: Lecture/lab combinations count as one course

Biological Sciences-EEB

Any upper-division BIOE course numbered BIOE 100-BIOE 179 of 5 or more credits

Biological Sciences-MCDB

BIOL 100	Biochemistry	5
BIOL 101	Molecular Biology	5
BIOL 101L	Molecular Biology Laboratory	2
BIOL 110	Cell Biology	5
BIOL 115	Eukaryotic Molecular Biology	5
BIOL 120	Developmental Biology	5

Earth and Planetary Sciences

EART 100	Vertebrate Paleontology	5
EART 100L	Vertebrate Paleontology Laboratory	2
EART 101	Invertebrate Paleobiology	5
EART 101L	Invertebrate Paleobiology Laboratory	1
EART 102	Marine Geology	5
EART 105	Coastal Geology	5

Economics

ECON 166A	Game Theory and Applications I	5
ECON 166B	Game Theory and Applications II	5

Environmental Studies (enrollment by permission of instructor)

ENVS 104A	Introduction to Environmental	5
-----------	-------------------------------	---

	Field Methods	
	Field Methods Laboratory	2
	Natural History Field Quarter	5
	Natural History Field Quarter	5
	Natural History Field Quarter	5
	General Entomology	5
	Geographic Information Systems and Environmental Applications	5
	Exercises in Geographic Information Systems	2
	Conservation Biology	5
	Tropical Ecology and Conservation	5
	Animal Ecology and Conservation	5
	Integrated Pest Management	5
	Agroecology and Sustainable Agriculture	5
	Agroecology and Sustainable Agriculture Laboratory	2
	Justice and Sustainability in Agriculture	5
	Insect Ecology	5
	Restoration Ecology	5
	Soils and Plant Nutrition	5
	Plant Physiological Ecology	5
	Plant Disease Ecology	5
	Freshwater and Wetland Ecology	5
	Biogeochemistry and the Global Environment	5

Microbiology and Environmental Toxicology

METX 119	Microbiology	5
METX 119L	Microbiology Laboratory	5

Ocean Sciences

OCEA 118	Marine Microbial Ecology	5
OCEA 130	Biological Oceanography	5

Psychology

PSYC 123	Cognitive Neuroscience	5
----------	------------------------	---

Some of these electives may have prerequisites that do not satisfy major or minor requirements.

One of the following may also be used as an upper-division general elective:**Biological Sciences-EEB**

Any 5 credits of undergraduate research		
BIOE 183W	Undergraduate Research in EEB--Writing	2
BIOE 183L	Undergraduate Research in EEB	3
BIOE 193	Independent Research in EEB	5
BIOE 193F	Independent Research in EEB	2
BIOE 195	Senior Thesis	5

or

Environmental Studies

ENVS 183	Environmental Studies Internship	5
----------	----------------------------------	---

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) Requirement. The DC requirement in marine biology is satisfied by completing two of the following ecology and evolutionary biology courses:

NOTE: Lecture and 2-credit lab combinations count as a single course.

BIOE 108	Marine Ecology	5
BIOE 114	Herpetology	5
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 117	Systematic Botany of Flowering Plants	5
BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2
BIOE 122	Invertebrate Zoology	5
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 127	Ichthyology	5
BIOE 127L	Ichthyology Laboratory	2
BIOE 128L	Large Marine Vertebrates Field Course	5
BIOE 129	Biology of Marine Mammals	5
BIOE 129L	Biology of Marine Mammals Laboratory	2
BIOE 137	Molecular Ecology	5
BIOE 141L	Behavioral Ecology Field Course	5
BIOE 145	Plant Ecology	5
BIOE 145L	Field Methods in Plant Ecology	5
BIOE 150L	Ecological Field Methods Laboratory	5
BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
BIOE 153C	Disciplinary Communication for Biologists	5
BIOE 158L	Marine Ecology Laboratory	5
BIOE 159A	Marine Ecology Field Quarter: Marine Ecology with Laboratory	5
BIOE 161L	Kelp Forest Ecology Laboratory	5
BIOE 171	Disciplinary Communication for Biologists	5
BIOE 172	Population Genetics	5
BIOE 172L	Population Genetics Laboratory	2

For 2-credit laboratory courses taken concurrently with 5-credit lectures, both courses must be passed to receive one half of the DC requirement.

Comprehensive Requirement

All majors in the biological sciences require completion of a comprehensive requirement. This requirement can be satisfied in one of the following ways:

- receiving a passing grade in an independent research course, or field/laboratory course listed below;
- completing a senior thesis;
- achieving a graduate record examination (GRE) score at or above the 50th percentile on the biology subject test or the biochemistry, cell, and molecular biology subject test. Reports of GRE scores must be submitted to the EEB undergraduate advising office before the last day of the graduating quarter;
- obtaining a medical college admission test (MCAT) score at or above the 50th percentile on the biological sciences section. Reports of MCAT scores must be submitted to the EEB undergraduate advising office before the last day of the graduating quarter.

Comprehensive courses offered by Ecology and Evolutionary Biology

NOTE: Lab courses may have associated prerequisite or corequisite lecture courses.

BIOE 112L	Ornithology Field Studies	2
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 117L	Systematic Botany of Flowering Plants Laboratory	2
BIOE 120L	Marine Botany Laboratory	2
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 124L	Mammalogy Laboratory	2
BIOE 127L	Ichthyology Laboratory	2
BIOE 128L	Large Marine Vertebrates Field Course	5

*MABI = Marine Biology B.S.

Electives must be chosen to satisfy the Disciplinary Communication and Comprehensive requirements.

Additional Transfer sample planners may be found on the EEB website.

PLANT SCIENCES B.S.

Information and Policies

Introduction

UC Santa Cruz has a strong program in the plant sciences (sometimes called botany). Resources that support the plant sciences major include state-of-the-art greenhouse facilities, natural ecosystems on the campus from coastal wetlands to redwood forests, the collections of the UCSC Arboretum, and the Center for Agroecology and Sustainable Food Systems (including the UC Santa Cruz Farm and Garden).

The plant sciences major is designed for students with an interest in plant biology and its associated curricular fields such as plant ecology, plant physiology, plant pathology, plant genetics, soils, and applied plant sciences. After completion of the core courses, students can proceed in one of several directions depending on their interests. For example, a more in-depth study of physiology and evolution courses can serve as preparation for work in biotechnology or plant breeding; further studies in plant ecology, tropical ecology, or restoration ecology can lead to careers in resource ecology and management or biodiversity exploration; upper-division training in agroecology can lead to careers in agriculture or food systems. There are many opportunities for internships both on the UC Santa Cruz campus and in the greater community.

Academic Advising for the Program

Academic advising is available at the ecology and evolutionary biology (EEB) undergraduate advising office and via email at eebadvising@ucsc.edu. The undergraduate webpages contain advice and information pertinent to students' most frequently voiced questions. Each student should review the information posted on the website; for further assistance, contact an EEB undergraduate adviser at eebadvising@ucsc.edu. Transfer students should also review the Transfer Information and Policy Section.

Getting Started in the Major

Prerequisites

The introductory biology sequence is prerequisite to virtually all upper-division biology courses. BIOL 20A (offered by the Molecular, Cell, and Developmental Biology Department) has a prerequisite of CHEM 1A. Therefore, it is essential for

students to start chemistry as soon as possible. Students who have not taken CHEM 1A may begin the introductory sequence with BIOE 20C. The entire introductory biology sequence should be taken the first and second year, concurrently with or following the general chemistry sequence. We also strongly recommend completing the lower-division physics requirements early in your academic career.

An online mathematics placement is required to enroll in a mathematics course. Students are expected to take this examination and are encouraged to work in the learning modules until they place into calculus. For more information see the mathematics placement website.

Advanced placement (AP) course equivalencies can be used to fulfill prerequisites.

Program Learning Outcomes

The undergraduate curriculum offered by the Department of Ecology and Evolutionary Biology (EEB) is designed to ensure that all students declared in any EEB sponsored major will achieve the following seven program learning outcomes.

1. Students will demonstrate broad-based knowledge of the fundamentals of ecology, behavior, evolution and physiology and the relationships among these disciplines.
2. Students will demonstrate skills in the observation and experimental study of organisms, using both field-based and laboratory-based approaches.
3. Students will demonstrate skills in identifying, accessing, comprehending and synthesizing scientific information, including interpretation of the primary scientific literature. This includes understanding key questions and hypotheses, interpreting results and conclusions, and evaluating quality through critique.
4. Students will demonstrate the ability to conceive and execute independent scientific research, including developing their own questions and hypotheses, designing an appropriate theoretical or empirical/experimental approach, executing that approach, and analyzing and interpreting data.
5. Students will demonstrate an ability to understand and apply fundamental quantitative skills, including models and statistical analyses, so as to properly interpret published research and apply such skills in their own research.
6. Students will demonstrate the ability to communicate original scientific work in the form of a scientific paper, as well as in oral or poster presentations.
7. Students will exhibit strong teamwork and problem solving skills. They will demonstrate the ability to make arguments from evidence and work together to find optimal solutions.

Major Qualification Policy and Declaration Process

Major Qualification

All courses must be taken for a letter grade. The following qualification courses, or their equivalents, must be completed with a grade of C (2.0) or better:

All of the following courses:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5

And one of the following courses:

MATH 11A	Calculus with Applications	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

Students with one grade of NP, C-, D+, D, D-, or F in one of the qualification courses are eligible to declare after successfully repeating the same or an equivalent course with a grade of C (2.0) or better.

Students with two or more grades of NP, C-, D+, D, D-, or F in the qualification courses are not eligible to declare. Mathematics courses will not be included in this calculation.

Students with AP credit for any of the qualification course(s) are eligible to declare after successfully completing the remaining qualification courses.

Consult with an EEB undergraduate adviser when requesting to declare the major after the campus declaration deadline. Transfer students should also review the Transfer Information and Policy Section.

For information on qualifying for the Environmental Studies/Biology combined major, please see Environmental Studies in this catalog.

Appeal Process

Students who are not eligible to declare the major may appeal this decision after they have successfully completed the qualification courses by submitting an appeal letter to EEB undergraduate advising. Within 15 days of receipt of the appeal, the department will notify the student and college of the decision. For more information about the appeal process, see the appeal process website.

How to Declare a Major

Students may submit a petition to declare after successful completion of the qualification policy courses. Students who have reached their major declaration deadline and are enrolled in their final qualification policy course(s) may submit the petition, but will not be declared until grades have been posted. Information on major declaration can be found here. Additional questions may be directed to eebadvising@ucsc.edu.

Transfer Information and Policy

Transfer Admission Screening Policy

To be considered for admission to UC Santa Cruz as a proposed major in ecology and evolution (B.S.), marine biology, or plant sciences, transfer students must pass equivalents of the following preparatory courses with a C (2.0) or better prior to transfer:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5
CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5

Plus, one of the following calculus courses:

MATH 11A	Calculus with Applications	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

More information on qualifying for the major as a transfer applicant is here.

While it is not required for UC Santa Cruz admission, transfer students are strongly encouraged to complete equivalents of the complete general chemistry series, a second quarter of calculus, and the physics series (PHYS 6A/PHYS 6L, plus PHYS 6B or PHYS 6C) prior to transfer. Students who transfer without having completed this additional recommended introductory coursework may require more than two years to complete the major requirements. Additional transfer preparation information is here.

Getting Started at UCSC as a Transfer Student

Transfer students who satisfy the major screening requirements may declare the major at any time after matriculation only after their official transcripts have been posted to their MyUCSC student portal by the UCSC Office of Admissions.

Beginning in late June and early July (for fall transfer students) EEB advising will review admitted students' reported transfer course work and determine how it applies to their major's requirements.

EEB advising will contact admitted students via email. The email will include information on how students' transfer coursework fulfills major requirements. We will suggest courses for students' fall enrollment, and invite you to make an appointment to talk with EEB undergraduate advising or direct questions to eebadvising@ucsc.edu. Transfer students may also expect to receive regular email messages from EEB advising in June, July, and August with additional information about the major.

Letter Grade Policy

All courses used to satisfy any major requirement must be taken for a letter grade.

Course Substitution Policy

To discuss the process for a course substitution, contact an EEB undergraduate adviser.

At least half of the upper-division courses (numbered BIOE 100–BIOE 179) required for each major must be taken in EEB at UC Santa Cruz not as transfer credits from another department or institution.

Transfer students are advised to contact an EEB undergraduate adviser before enrolling in numerous upper-division courses at other institutions. For more information on transferring courses to UCSC, please consult the Transfer Student website. Additional information for transfer students is provided above in the “Transfer Students” section.

Only one upper-division course requirement may be met with a research-based independent study or graduate-level UCSC biology course.

Double Majors and Major/Minor Combinations Policy

Students interested in pursuing multiple majors within the biological sciences may not declare any combination of Biology (B.A., B.S., or minor), Ecology and Evolution B.S., Marine Biology B.S., Plant Sciences B.S., or Environmental Studies/Biology B.A. combined major.

Study Abroad

The UC Education Abroad Program (UCEAP) offers qualified students unique opportunities to broaden their educational horizons. The EEB Department encourages interested students to participate. It is possible to satisfy major requirements abroad and graduate on time; consult with an EEB undergraduate adviser early in the planning process.

Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

There are excellent programs in Costa Rica, Australia, New Zealand, the United Kingdom, Denmark, and Germany, among others. The Costa Rica Tropical Biology Program is of note to students interested in tropical biology and ecology. Held spring and fall quarters at the Monteverde research station, this program gives students experience with hands-on field research and offers a homestay program. The University of Queensland (Australia) offers an intensive, full-semester marine science program, which includes stays at research stations on the Great Barrier Reef and in sheltered mangrove and seagrass habitats near Brisbane.

Students interested in study abroad need to get an early start on their introductory requirements, including chemistry, mathematics, and biology and must declare their major prior to going abroad. Visit the UCEAP office as soon as possible to begin planning and seek advice and approval for your

UCEAP plan from an EEB undergraduate adviser prior to participation in UCEAP.

Honors

Honors in the biological sciences majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

Requirements and Planners

Course Requirements

Lower-Division Courses

Introductory Biology:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5

General Chemistry:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2

Calculus:

Choose one of the following options:

Either these courses		
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
or these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Biostatistics:

STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Physics:

Choose one of the following options:

Either these courses		
PHYS 7A	Elementary Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 7B	Elementary Physics II	5
or these courses		
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics	1

PHYS 6B	Laboratory Introductory Physics II	5
or these courses		
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 6C	Introductory Physics III	5

PHYS 7A, PHYS 6L, PHYS 7B: recommended

Upper-Division Courses

A total of 11 upper-division courses, including relevant electives; two must include laboratory or fieldwork. Courses appearing in more than one category can fulfill only one requirement.

Three core courses:

BIOE 105	Genetics	5
BIOE 107	Ecology	5
BIOE 109	Evolution	5

One plant physiology course from the following:

NOTE: Lecture/lab combinations count as one course

BIOE 135	Plant Physiology	5
BIOE 135L	Plant Physiology Laboratory	2
ENVS 162	Plant Physiological Ecology	5

One botany course from the following:

NOTE: Lecture/lab combinations count as one course

BIOE 117	Systematic Botany of Flowering Plants	5
BIOE 117L	Systematic Botany of Flowering Plants Laboratory	2
BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2

Electives

Three topical electives chosen from the following:

NOTE: Lecture and 2-credit lab combinations count as one course.

Biological Sciences-EEB

BIOE 117	Systematic Botany of Flowering Plants	5
BIOE 117L	Systematic Botany of Flowering Plants Laboratory	2
BIOE 118	Plants and Society: the Biology of Food, Shelter, and Medicine	5
BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2
BIOE 125	Ecosystems of California	5
BIOE 135	Plant Physiology	5
BIOE 135L	Plant Physiology Laboratory	2
BIOE 137	Molecular Ecology	5
BIOE 137L	Molecular Ecology Laboratory	2
BIOE 145	Plant Ecology	5
BIOE 145L	Field Methods in Plant Ecology	5
BIOE 148A	Quantitative Ecology	5

BIOE 148B	Quantitative Methods in Ecology and Evolution	5
BIOE 149	Disease Ecology	5
BIOE 151A	Ecology and Conservation in Practice Supercourse: Ecological Field Methods	5
BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
BIOE 151C	Ecology and Conservation in Practice Supercourse: Functions and Processes of Terrestrial Ecosystems	5
BIOE 151D	Ecology and Conservation in Practice Supercourse: Conservation in Practice	4
BIOE 153A	Introduction to Arctic Ecology	5
BIOE 153B	Arctic Ecology	5
BIOE 153C	Disciplinary Communication for Biologists	5
BIOE 161	Kelp Forest Ecology	5
BIOE 161L	Kelp Forest Ecology Laboratory	5

Biological Sciences-MCDB

BIOL 100	Biochemistry	5
BIOL 101	Molecular Biology	5
BIOL 101L	Molecular Biology Laboratory	2
BIOL 110	Cell Biology	5
BIOL 115	Eukaryotic Molecular Biology	5

Environmental Studies (enrollment by permission of instructor)

ENVS 104A	Introduction to Environmental Field Methods	5
ENVS 104L	Field Methods Laboratory	2
ENVS 129	Integrated Pest Management	5
ENVS 130A	Agroecology and Sustainable Agriculture	5
ENVS 130L	Agroecology and Sustainable Agriculture Laboratory	2
ENVS 130B	Justice and Sustainability in Agriculture	5
ENVS 131	Insect Ecology	5
ENVS 160	Restoration Ecology	5
ENVS 161A	Soils and Plant Nutrition	5
ENVS 162	Plant Physiological Ecology	5
ENVS 163	Plant Disease Ecology	5

Science Communication

SCIC 160	Introduction to Science Writing	5
----------	------------------------------------	---

Three general electives chosen from the following:

NOTE: Lecture/lab combinations count as one course.

Biological Sciences-EEB

Any upper-division BIOE course numbered BIOE 100-BIOE 179 of 5 or more credits

Biological Sciences-MCDB

BIOL 100	Biochemistry	5
BIOL 101	Molecular Biology	5
BIOL 101L	Molecular Biology Laboratory	2
BIOL 110	Cell Biology	5
BIOL 115	Eukaryotic Molecular Biology	5
BIOL 120	Developmental Biology	5

Earth and Planetary Sciences

EART 100	Vertebrate Paleontology	5
EART 100L	Vertebrate Paleontology Laboratory	2
EART 101	Invertebrate Paleobiology	5
EART 101L	Invertebrate Paleobiology Laboratory	1
EART 102	Marine Geology	5
EART 105	Coastal Geology	5

Economics

ECON 166A	Game Theory and Applications I	5
ECON 166B	Game Theory and Applications II	5

Environmental Studies (enrollment by permission of instructor)

ENVS 104A	Introduction to Environmental Field Methods	5
ENVS 104L	Field Methods Laboratory	2
ENVS 107A	Natural History Field Quarter	5
ENVS 107B	Natural History Field Quarter	5
ENVS 107C	Natural History Field Quarter	5
ENVS 108	General Entomology	5
ENVS 115A	Geographic Information Systems and Environmental Applications	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in plant sciences is satisfied by completing two of the following ecology and evolutionary biology courses:

NOTE: Lecture and 2-credit lab combinations count as a single course.

BIOE 108	Marine Ecology	5
BIOE 114	Herpetology	5
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 117	Systematic Botany of Flowering Plants	5
BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2
BIOE 122	Invertebrate Zoology	5
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 127	Ichthyology	5
BIOE 127L	Ichthyology Laboratory	2
BIOE 128L	Large Marine Vertebrates Field Course	5
BIOE 129	Biology of Marine Mammals	5
BIOE 129L	Biology of Marine Mammals Laboratory	2
BIOE 137	Molecular Ecology	5
BIOE 141L	Behavioral Ecology Field Course	5
BIOE 145	Plant Ecology	5
BIOE 145L	Field Methods in Plant Ecology	5
BIOE 150L	Ecological Field Methods	5

BIOE 151B	Laboratory Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5	BIOE 131L	Laboratory Animal Physiology Laboratory	2

			BIOE 151A	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
			BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
			BIOE 151C	Ecology and Conservation in Practice Supercourse: Functions and Processes of Terrestrial Ecosystems	5
			BIOE 151D	Ecology and Conservation in Practice Supercourse: Conservation in Practice	4
			BIOE 153A	Introduction to Arctic Ecology	5
			BIOE 153B	Arctic Ecology	5
			BIOE 153C	Disciplinary Communication for Biologists	5
			BIOE 155L	Freshwater Ecology Laboratory	5
			BIOE 158L	Marine Ecology Laboratory	5
			BIOE 159A	Marine Ecology Field Quarter: Marine Ecology with Laboratory	5
			BIOE 159B	Marine Ecology Field Quarter: Ichthyology with Laboratory	5
			BIOE 159C	Marine Ecology Field Quarter: Methods in Field Ecology	5
			BIOE 159D	Marine Ecology Field Quarter: Methods in Field Ecology Laboratory	5
			BIOE 161L	Kelp Forest Ecology Laboratory	5
			BIOE 163L	Ecology of Reefs, Mangroves, and Seagrasses Laboratory	2
			BIOE 172L	Population Genetics Laboratory	2
			BIOE 183W	Undergraduate Research in EEB--Writing	2

For 2-credit laboratory courses taken concurrently with 5-credit lectures, both courses must be passed to receive one half of the DC requirement.

Comprehensive Requirement

All majors in the biological sciences require completion of a comprehensive requirement. This requirement can be satisfied in one of the following ways:

- Receiving a passing grade in an independent research course, or field/laboratory course listed below.
- Completing a senior thesis.
- Achieving a graduate record examination (GRE) score at or above the 50th percentile on the biology subject test or the biochemistry, cell, and molecular biology subject test. Reports of GRE scores must be submitted to the EEB undergraduate advising office before the last day of the graduating quarter.
- Obtaining a medical college admission test (MCAT) score at or above the 50th percentile on the biological sciences section. Reports of MCAT scores must be submitted to the EEB undergraduate advising office before the last day of the graduating quarter.

Comprehensive courses offered by Ecology and Evolutionary Biology

NOTE: Lab courses may have associated prerequisite or corequisite lecture courses.

Planners

In addition to the specific courses shown in these planners, a student must complete courses satisfying the IM, TA, PE, PR, CC, ER and C campus general education requirements.

Sample Frosh Planner

1st (frosh)	BIOE 20C	MATH 11A or MATH 19A	MATH 11B or MATH 19B
		CHEM 1A	CHEM 1B
2nd (soph)	BIOL 20A	BIOE 20B	BIOL 105
	CHEM 1C & CHEM 1N	STAT 7 & STAT 7L	PHYS 6A & PHYS 6L
3rd (junior)	BIOE 109	BIOE 107	EEB general elective
	PHYS 6C	*PLNT topical elective	Botany & lab
4th (senior)	EEB general elective	*PLNT topical elective	EEB general elective
	Plant physiology	*PLNT topical elective	

*PLNT = Plant Sciences BS

Electives must be chosen to satisfy the Disciplinary Communication and Comprehensive requirements.

Additional Frosh sample planners may be found on the EEB website.

Sample Transfer Planner

For students who transferred in after completing the transfer screening courses and:

- MATH 11B
- CHEM 1C/N
- PHYS 6A/L, and 6B or 6C

	Fall	Winter	Spring
3rd (junior)	BIOL 105 *PLNT topical elective STAT 7 & STAT 7L	BIOE 107 *PLNT topical elective	BIOE 109 *PLNT topical elective
4th (senior)	EEB general elective Plant physiology	Botany & lab EEB general elective	EEB general elective

*PLNT = Plant Sciences B.S.

Electives must be chosen to satisfy the Disciplinary Communication and Comprehensive requirements.

Additional sample Transfer student sample planners may be found on the EEB website.

Graduate Program

The ecology and evolutionary biology (EEB) graduate program at UC Santa Cruz reflects the remarkable local and global diversity of species and environments studied by the EEB faculty and students. The vision of the EEB graduate program is to provide a nurturing, creative, and intellectual environment conducive to the development of world-class scientists. The EEB graduate program encourages close working relations between students and faculty in an informal atmosphere advantageous to rapid learning and professional growth. Interdisciplinary collaborations with oceanographers, geologists, mathematicians, environmental and conservation biologists, toxicologists, and others enable students to explore the conceptual connections between related fields as they acquire mastery in their areas of specialization.

The graduate program in EEB at UC Santa Cruz is one of the premier EEB programs in the country. UCSC graduate students in EEB regularly win prestigious research fellowships and awards for their presentations at international meetings in addition to publishing their work in the best journals of their fields. Students take advantage of local field sites and state-of-the-art departmental laboratories, more than two-thirds of the EEB faculty also participate in field studies throughout the world, especially in Africa, Latin America, Antarctica, the Arctic, and around the Pacific Rim. Research

in EEB comprises four core areas: ecology, evolutionary biology, physiology, and behavior.

ECOLOGY AND EVOLUTIONARY BIOLOGY M.A.

Introduction

All curricular requirements are aimed at preparing students for timely and successful completion of a master thesis. The master of arts (M.A.) curriculum in Ecology and Evolutionary Biology (EEB) includes two stages: 1) required coursework, 2) the research, writing, and defense of the master thesis.

Requirements

Course Requirements

M.A. students must take BIOE 200A, BIOE 200B, BIOE 279, and two quarters of BIOE 293 (or one quarter of BIOE 293 and one quarter of BIOE 295) within their first two years. Biology 281, 294, and 297 (Independent Study) must be taken every quarter the student is in residence. All students must be enrolled in at least 15 credits per quarter, unless on approved part-time status. No more than 15 credits from upper-division undergraduate courses may be used as part the student's coursework.

Core Courses

BIOE 200A	Scientific Skills	5
BIOE 200B	Advanced Organismal Biology	5
BIOE 279	Evolutionary Ecology	5
BIOE 293	Readings in Ecology and Evolution	2

BIOE 293: must be taken twice

BIOE 295: may substitute for BIOE 293 once

The following courses must be taken every quarter the student is in residence.

BIOE 281	Graduate Seminar
BIOE 294	Ecology, Evolutionary Biology Seminar
BIOE 297	Independent Study

Elective Courses

BIOE 208	Marine Ecology	5
BIOE 245	Plant Ecology	5
BIOE 245L	Field Methods in Plant Ecology Laboratory	5
BIOE 247	Community Ecology	5
BIOE 248A	Quantitative Ecology	5
BIOE 248B	Quantitative Methods in Ecology and Evolution	5
BIOE 258L	Experimental Marine Ecology	5
BIOE 262	Facilitating Change in Coastal Science Policy	5
BIOE 271	Disciplinary Communication for Biologists	5
BIOE 272	Population Genetics	5
BIOE 272L	Population Genetics Laboratory	2

BIOE 286	Experimental Design and Data Analysis	5
BIOE 286L	Experimental Design and Data Analysis Lab	2
BIOE 295	Advanced Ecology and Evolutionary Biology Seminar	

Other Requirements

The master research project is identified by students and requires approval from the students' masters reading committee in the fall of the second year. The master thesis manuscript is submitted to the students' masters reading committee, defended in a closed oral examination, and presented in a departmental seminar by the end of the second year.

Deadlines at each stage must be confirmed with the graduate program coordinator.

Academic Progress

Normative time to degree for the M.A. program is two years. Academic progress is formally reviewed in the spring quarter of each academic year.

Applying for Graduation

Information on applying for graduation may be found on the EEB Graduate Program website. Deadlines should always be confirmed with the graduate program coordinator.

ECOLOGY AND EVOLUTIONARY BIOLOGY PH.D.

Introduction

All curricular requirements are aimed at preparing students for timely and successful completion of a doctoral dissertation. The Ph.D. curriculum in Ecology and Evolutionary Biology (EEB) includes six stages: 1) required coursework, 2) the comprehensive examination, 3) the qualifying examination, 4) two quarters of teaching experience, 5) submission of at least one paper for publication, 6) the research, writing, and defense of the dissertation.

Advancement to Candidacy

Course Requirements

Core Courses

Ph.D. students must take BIOE 200A and BIOE 200B in the fall of the first year, and BIOE 279 in the winter of the first year. Two quarters of BIOE 293 are taken in the winter and spring of the first year. In addition, two quarters of BIOE 295 or two additional quarters of BIOE 293 should be completed by the end of the second year.

BIOE 200A	Scientific Skills	5
BIOE 200B	Advanced Organismal Biology	5
BIOE 279	Evolutionary Ecology	5
BIOE 293	Readings in Ecology and	2

BIOE 295	Evolution Advanced Ecology and Evolutionary Biology Seminar
----------	---

BIOE 295: may be substituted with additional BIOE 293

The following courses must be taken every quarter the student is in residence.

All students must be enrolled in at least 15 credits per quarter, unless on approved part-time status.

BIOE 281	Graduate Seminar AND
BIOE 294	Ecology, Evolutionary Biology Seminar AND

Either this course

BIOE 297 Independent Study

or this course

BIOE 299 Thesis Research

BIOE 297 or BIOE 299 is required, not both. BIOE 297 is taken until the student advances to candidacy. BIOE 299 is taken after the student advances to candidacy.

Elective Courses

BIOE 208	Marine Ecology	5
BIOE 245	Plant Ecology	5
BIOE 245L	Field Methods in Plant Ecology Laboratory	5
BIOE 247	Community Ecology	5
BIOE 248A	Quantitative Ecology	5
BIOE 248B	Quantitative Methods in Ecology and Evolution	5
BIOE 258L	Experimental Marine Ecology	5
BIOE 262	Facilitating Change in Coastal Science Policy	5
BIOE 271	Disciplinary Communication for Biologists	5
BIOE 272	Population Genetics	5
BIOE 272L	Population Genetics Laboratory	2

Foreign Language Requirements

Teaching Requirement

Each Ph.D. student should expect to complete at least two quarters as a teaching assistant during their graduate career.

Pre-Qualifying Requirements

The comprehensive examination is completed in the fall of the second year. This is a two-part examination, written and oral, the goal of which is to examine the student's breadth and depth of knowledge of evolution, ecology, organismal biology (including physiology and behavior), and general biology. In both the written and oral examinations, the expected level of knowledge of basic biology ranges from introductory level in fields most removed from the student's focus area to a more substantial and advanced level in fields closer to the student's focus area.

Qualifying Examination

The qualifying examination follows the comprehensive examination and is completed no later than the third year. The goal of this two-part examination is to establish the student's proposed dissertation project. Students submit a dissertation research proposal to their qualifying exam committee and defend it in an oral examination. The proposal should be submitted no less than ten days before the oral defense. The proposal defense must be completed by the spring quarter of the third year and be followed by a departmental seminar on the student's research proposal. Students advance to candidacy after having completed all required coursework, the comprehensive examination, and the qualifying examination.

Post-Qualifying Requirements

At least one chapter of the dissertation must be submitted to a refereed journal for publication as a final program requirement before receipt of the Ph.D.

Dissertation

Dissertation

Within EEB, a dissertation usually contains three or four chapters that comprise original research, each of which is substantial enough to be published in a scientific journal, plus a short introduction and a conclusion/synthesis. The conclusion synthesizes the results of the dissertation as a whole, reflects on how novel insights come from the whole body of work, and may point the reader toward future research directions.

Dissertation Defense

The dissertation is defended in a closed oral examination and then presented in a departmental seminar.

Academic Progress

Normative time to degree is six years, though it is possible to complete the program in less time. Academic progress is formally reviewed in the spring quarter of each academic year.

Applying for Graduation

Information for applying for graduation may be found on the EEB Graduate Program website. Deadlines should always be confirmed with the Graduate Program coordinator.

**ECOLOGY AND EVOLUTIONARY
BIOLOGY DESIGNATED
EMPHASIS**

Introduction

Requirements

To receive a designated emphasis in ecology and evolutionary biology (EEB), graduate students must complete the

following requirements in addition to the degree requirements for the doctorate in their home department:

Committee Composition and Departmental Approvals

1. Identify a designated faculty adviser from among the faculty of the EEB department, who commits to serve on the qualifying examination committee and on the Ph.D. dissertation reading committee.
2. Once a designated faculty adviser has been identified, file intent to complete the designated emphasis in EEB with the EEB department graduate program coordinator.

Course Requirements

Students are required to complete at least 20 credits of EEB coursework. Courses taken to fulfill program requirements within the home department will not count toward the designated emphasis program's required coursework.

Take the following EEB core courses (required for all EEB graduate students):

BIOE 200A	Scientific Skills	5
BIOE 200B	Advanced Organismal Biology	5
BIOE 279	Evolutionary Ecology	5

Enroll in the following course and attend all EEB Department seminars for one quarter:

BIOE 294	Ecology, Evolutionary Biology Seminar
----------	---------------------------------------

Enroll in the following course corresponding to their EEB faculty adviser and attend their laboratory group seminars for one quarter:

BIOE 281	Graduate Seminar
----------	------------------

Take at least two other EEB graduate courses.

BIOE 208	Marine Ecology	5
BIOE 245	Plant Ecology	5
BIOE 245L	Field Methods in Plant Ecology Laboratory	5
BIOE 247	Community Ecology	5
BIOE 248A	Quantitative Ecology	5
BIOE 248B	Quantitative Methods in Ecology and Evolution	5
BIOE 258L	Experimental Marine Ecology	5
BIOE 262	Facilitating Change in Coastal Science Policy	5
BIOE 271	Disciplinary Communication for Biologists	5
BIOE 272	Population Genetics	5
BIOE 272L	Population Genetics Laboratory	2
BIOE 286	Experimental Design and Data Analysis	5
BIOE 286L	Experimental Design and Data Analysis Lab	2
BIOE 293	Readings in Ecology and Evolution	2
BIOE 295	Advanced Ecology and Evolutionary Biology Seminar

Undergraduate Program

Mathematics is both a fundamental discipline and an essential tool for students of biology, chemistry, computer engineering, computer science, Earth sciences, economics, electrical engineering, information systems management, physics, and psychology. Researchers in all these areas are constantly developing new ways of applying mathematics to their fields. A strong mathematics background is vital to the advanced study of many disciplines including the physical and biological sciences, engineering and the social sciences.

The UC Santa Cruz mathematics program offers a wide variety of undergraduate mathematics courses:

- Students interested in studying mathematics are strongly encouraged to take algebra, geometry, and trigonometry before entering the university. Students needing mathematics courses for their intended major are strongly encouraged to consider their options, and take the necessary steps for mathematics assessment and placement as early as possible. Progress in some majors could be delayed if the calculus series is not begun upon arrival at UCSC. Students concerned about their ability to place into courses above MATH 3 should consider taking MATH 2 or its equivalent prior to entering UCSC.
- Lower-division courses with numbers in the range MATH 11A through MATH 24 (calculus, linear algebra, vector calculus, and differential equations) prepare students for further study in mathematics, the physical and biological sciences, engineering, or quantitative areas of the social sciences. Science and engineering majors take some or all of these courses as part of their undergraduate studies.

- Upper-division courses, with numbers in the range MATH 100-MATH 199, are intended for majors in mathematics and closely related disciplines. Some of these courses provide students with a solid foundation in key areas of mathematics such as algebra, analysis, geometry, and number theory, whereas others introduce students to more specialized areas of mathematics. Calculus, linear algebra, vector calculus, and proof and problem solving are prerequisite to most of these advanced courses.

All students should review the requirements for their major or intended major and possibly consult with the department sponsoring their major (or expected major) before deciding which mathematics courses to take. More information on what courses are intended for the various types of students may be found here at the Mathematics Department website.

ENROLLMENT REQUIREMENTS

Students who plan to take a mathematics course at UC Santa Cruz must first demonstrate sufficient preparation for that course by completing mathematics placement, the College Entrance Examination Board Advanced Placement (AP) calculus examination, the International Baccalaureate (IB) Mathematics Examination, or by passing the appropriate prerequisite course.

Students who have passed MATH 2 may enroll in MATH 3. Students who have passed MATH 3 may enroll in course MATH 11A or MATH 19A. Students who have passed a precalculus course at a college or university may enroll in course MATH 11A or MATH 19A, but they must first verify eligibility of the course (on Assist.org) and course completion with the mathematics adviser.

UC SANTA CRUZ MATHEMATICS PLACEMENT

The mathematics placement process assesses student readiness for their first UC Santa Cruz mathematics class. Students whose areas of study require precalculus or calculus courses are strongly advised to complete placement and any required courses early in their academic careers. Students intending to take one or more mathematics courses at UCSC should begin the placement process as early as possible to fully benefit from the process.

Students completing placement by assessing using ALEKS PPL should familiarize themselves with the assessment instructions and guidelines, course eligibility cut-offs, and score posting schedule.

ADVANCED

PLACEMENT (AP) CALCULUS EXAMINATIONS

Students completing placement requirements by using their scores from the College Board Advanced Placement Calculus Exam should refer to the Admissions Office for assistance in deciding which course to enroll.

INTERNATIONAL BACCALAUREATE (IB) EXAMINATION IN MATHEMATICS

Students completing placement requirements by using their scores from the International Baccalaureate Exam should refer to the Admissions Office for assistance in deciding which course to enroll.

MATHEMATICS B.A.

Information and Policies

Introduction

The mathematics program provides an excellent liberal arts background from which to pursue a variety of career opportunities. UCSC graduates with degrees in mathematics hold teaching posts at all levels, as well as positions in law, government, civil service, insurance, software development, business, banking, actuarial science, forensics, and other professions where skills in logic, numerical analysis, and computing are required. In particular, students of mathematics are trained in the art of problem-solving, an essential skill in all professions.

Within the major, there are three concentrations leading to the Bachelor of Arts (B.A.) in mathematics: pure mathematics, computational mathematics, and mathematics education.

Pure Mathematics

Students in the pure mathematics track often go on to graduate study in mathematics; the pathway emphasizes the importance of a well-rounded, in-depth mathematical education, and includes advanced coursework in algebra, analysis, and geometry.

Computational Mathematics

Students in the computational mathematics track explore applications of mathematics in other fields and gain experience in mathematical modeling of real-world phenomena using ordinary and partial differential equations,

approximation and optimization techniques, programming, or game theory.

Mathematics Education

Students in the mathematics education track prepare for a career in K–12 mathematics education; students acquire in-depth knowledge of subjects covered at an introductory level in the classroom, including number theory, classical geometry, and the history of mathematics, and gain experience in teaching mathematics.

These programs are designed to give students a strong background for graduate study, for work in industry or government, or for teaching. Each concentration requires nine or ten courses, one of which must be a senior thesis or senior seminar. Please read the pure mathematics, computational mathematics, and mathematics education program descriptions below for specific information about course requirements. A minor in mathematics is also offered.

Academic Advising for the Program

The undergraduate adviser may be contacted via email at mathadvising@ucsc.edu. The adviser provides information about requirements, prerequisites, policies and procedures, learning support, scholarships, and special opportunities for undergraduate research. In addition, the adviser assists with the drafting of study plans, as well as certifying degrees and minors. Students are urged to stay informed and involved with their major, as well as to seek advice should problems arise.

The Mathematics Department website is a critical resource for students. Here you will find a link to the undergraduate program; the materials at that link constitute the undergraduate handbook. Students should visit this first to seek answers to their questions, because it hosts a wealth of information. Each student in the major is encouraged to regularly review the materials posted to stay current with requirements, course curriculum, and departmental policy. Transfer students should consult the Transfer Information and Policy section.

Getting Started in the Major

It should be emphasized that the nature of mathematics changes dramatically between lower-division and upper-division courses. Students often find that the material becomes far more abstract and theoretical. In addition, the role of computation in assignments diminishes and a greater weight is placed on deductive reasoning and the integral role of mathematical proofs. The Mathematics Department recommends that students interested in a mathematics major enroll in MATH 100 as early as prerequisites allow in order to decide whether they are interested in upper-division mathematics courses. It is strongly recommended that only students who earn grades of B- or better in MATH 100 consider applying to the major in mathematics. Students with a grade less than B in MATH 100 are urged to take MATH 101.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities and attitudes that students are expected to develop over the course of their studies. The program learning outcomes clearly communicate the faculty's expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes.

Mathematics Undergraduate Student Learning Objectives

The mathematics program promotes mathematical skills and knowledge for their intrinsic beauty, effectiveness in developing proficiency in analytical reasoning, and utility in modeling and solving real world problems. To responsibly live within and participate in the transformation of a rapidly changing, complex, and interdependent society, toward a sustainable and socially just society, students must develop and unceasingly exercise their analytical abilities. Students who have learned to logically question assertions, recognize patterns, and can distinguish the essential from the irrelevant aspects of problems can think deeply and precisely. Students equipped with these skills will be in a position to help solve the "big" problems of our time such as climate change.

Students majoring in mathematics attain proficiency in:

Critical thinking. The ability to identify, reflect upon, evaluate, integrate, and apply different types of information and knowledge to form independent judgments including analytical and logical thinking and the habit of drawing conclusions based on quantitative information.

Problem solving. The ability to assess and interpret complex situations, choose among several potentially appropriate mathematical methods of solution, persist in the face of difficulty, and present full and cogent solutions that include appropriate justification for their reasoning.

Effective communication. The ability to communicate and interact effectively with different audiences, collaborate intellectually and creatively in diverse contexts, and appreciate ambiguity and nuance, while emphasizing the importance of clarity and precision in communication and reasoning.

Students acquire and enhance these abilities in mathematical contexts, but the acquired habits of rigorous thought and creative problem solving are invaluable in all aspects of life. These skills are acquired through experience in the context of studying specific mathematical topics and exploring problems chosen to challenge students' abilities, spurring them on to acquire new techniques and to abandon familiar but restrictive habits of thought. The overarching objectives can be realized in terms of more focused, appraisable objectives specific to mathematics described on the Mathematics Department website.

Curriculum Matrix

All of the key objectives are addressed to some extent in all courses. For example, the ability to formulate precise mathematical statements and to reason logically are essential

skills that are progressively developed throughout the curriculum. However, some skills are more heavily emphasized and utilized in some courses than in others. Some courses are specifically intended to help students move to a new level of proficiency with a particular portfolio of skills, while others are accessible only to students who have already reached a given level; the latter courses make heavy use of particular skills, and thus enhance and reinforce the student's mastery of them, but the skills themselves are not the primary focus of such courses. Some connections between the key objectives, main subject-specific areas, and courses are indicated in the tables of lower- and upper-division mathematics courses at the Mathematics Department's website.

Major Qualification Policy and Declaration Process

While enrolled in or after finishing the final required qualification courses a student should follow the directions to apply on the Mathematics Department Major Declaration webpage.

Major Qualification

Admission to the mathematics major (all concentrations) is contingent on students successfully passing the following introductory courses or their equivalents:

Choose one of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Plus all of the following courses:

MATH 21	Linear Algebra	5
MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5
MATH 100	Introduction to Proof and Problem Solving	5

Students may only declare once they have passed all introductory courses or their equivalent courses with a grade of C or better. Students who receive two grades of NP, C-, D+, D, D-, or F in the introductory courses are not eligible to declare in the major.

Appeal Process

Students who are not eligible to declare may submit an appeal to the department's undergraduate vice chair. Students are strongly encouraged to file an appeal as soon as a student is no longer qualified to declare. The mathematics adviser will subsequently notify the student, and their college, of the decision, no later than 15 business days after the submission of the appeal. An appeal decision may be in the form of an approval, denial or conditional approval. For students who have not completed all of the major qualification courses,

conditional approvals are based on subsequent performance in the remainder of the qualification courses.

How to Declare a Major

See the Mathematics Department website for directions on How to Declare the Major.

Transfer Information and Policy

Transfer Admissions Screening Policy

The Mathematics Department welcomes applications from transfer students who have completed the necessary coursework to transfer to our program.

To be considered for admission to UCSC as a participant in any of the mathematics majors, transfer students must pass **equivalents** of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 21	Linear Algebra	5
MATH 23A	Vector Calculus	5

The above major preparation courses are highly recommended, and will be required beginning with applications to transfer in Fall 2020. More information about qualifying for the major as a transfer applicant is at the admissions website.

Students planning to transfer to UC Santa Cruz from a California community college should reference the assist website to determine which courses are equivalent to these required courses.

To obtain equivalency for MATH 23A, transfer students will have taken a course that may also be equivalent to MATH 23B. Students are encouraged to contact the undergraduate adviser to determine if this applies to their situation.

Getting Started at UCSC as a Transfer Student

While enrolled in or after finishing the final required qualification courses, a student should follow the directions to apply to declare the major on the Mathematics Department Major Declaration webpage.

Letter Grade Policy

There are no restrictions on grading options for Mathematics Department courses. Please see the UCSC-wide policies on grading options.

Course Substitution Policy

The Mathematics Department undergraduate vice chair reviews requests for course substitutions. Email mathadvising@ucsc.edu to request a course substitution review.

Double Majors and Major/Minor Combinations Policy

Study Abroad

Honors

Honors in the Mathematics Department are awarded to graduating students whose academic performance in the major demonstrates excellence at a GPA of 3.5 or above. Highest honors are determined by a cumulative review of student performance in mathematics courses. They are awarded to students who excel in challenging courses and in their capstone projects.

Pure Mathematics Concentration

This concentration is intended for students who desire a comprehensive understanding of mathematics, including those considering graduate studies in the physical sciences.

Course Requirements

Lower-Division Courses

Choose one of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Plus all of the following courses:

MATH 21	Linear Algebra	5
MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5
MATH 24	Ordinary Differential Equations	5

Upper-Division Courses

All of the following courses:

MATH 100	Introduction to Proof and Problem Solving	5
MATH 103A	Complex Analysis	5
MATH 105A	Real Analysis	5
MATH 117	Advanced Linear Algebra	5

Plus one of the following courses:

MATH 111A	Algebra	5
MATH 111T	Algebra	5

Plus one of the following courses:

MATH 121A	Differential Geometry	5
MATH 124	Introduction to Topology	5
MATH 128A	Classical Geometry: Euclidean and Non-Euclidean	5
MATH 129	Algebraic Geometry	5

Plus one of the following courses:

MATH 194	Senior Seminar	5
----------	----------------	---

MATH 195 Senior Thesis 5

Electives

The remaining three courses are selected by the student from among any mathematics course numbered above 100 (excluding Mathematics 188 and Mathematics 189) and Applied Mathematics (AM) or Statistics (STAT) 100 or above. Only one of the three courses can be from the AM or STAT series.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in mathematics is satisfied by

MATH 100 Introduction to Proof and Problem Solving 5

Plus one of the following courses:

MATH 194 Senior Seminar 5
MATH 195 Senior Thesis 5

Comprehensive Requirement

The comprehensive exit requirement in mathematics is satisfied by one of the following courses:

MATH 194 Senior Seminar 5
MATH 195 Senior Thesis 5

Planners

Pure Mathematics B.A.: Sample Freshmen Academic Plan

	Fall	Winter	Spring
1st (frosh)	MATH 19A or MATH 20A	MATH 19B or MATH 20B	MATH 21 MATH 23A
2nd (soph)	MATH 23B MATH 100	MATH 103A	Elective
3rd (junior)	MATH 24	MATH 105A	Elective MATH 128A
4th (senior)	MATH 117	MATH 111A	MATH 194 or MATH 195 Elective

This course plan satisfies the MF general education requirement. Students must satisfy all other general education requirements.

Pure Mathematics B.A.: Sample Transfer Academic Plan

For students who have completed MATH 19A, MATH 19B, MATH 21, and MATH 23A equivalents.

	Fall	Winter	Spring
1st (junior)	MATH 23B MATH 100	MATH 103A Elective	MATH 121A Elective
2nd (senior)	MATH 24	MATH 105A	MATH 194 or MATH 195
	MATH 111A	Elective	MATH 117

Computational Mathematics Concentration

This concentration is intended to prepare students for technical careers in industry or government while providing a solid mathematical background.

Course Requirements

Lower-Division Courses

Choose one of the following courses:

MATH 19A Calculus for Science, Engineering, and Mathematics 5
MATH 20A Honors Calculus 5

Plus one of the following courses:

MATH 19B Calculus for Science, Engineering, and Mathematics 5
MATH 20B Honors Calculus 5

Plus all of the following courses:

MATH 21 Linear Algebra 5
MATH 23A Vector Calculus 5
MATH 23B Vector Calculus 5
MATH 24 Ordinary Differential Equations 5

Upper-Division Courses

All of the following courses:

MATH 100 Introduction to Proof and Problem Solving 5

Plus one of the following courses:

MATH 103A Complex Analysis 5
MATH 105A Real Analysis 5

Plus one of the following courses:

MATH 106 Systems of Ordinary Differential Equations 5

MATH 107 Partial Differential Equations 5

Plus the following course:

MATH 110 Introduction to Number Theory 5

Plus one of the following courses:

MATH 111A Algebra 5

MATH 111T Algebra 5

MATH 117 Advanced Linear Algebra 5

Plus one of the following options:

Either these courses

MATH 148 Numerical Analysis 5

MATH 148L Numerical Analysis Laboratory 1

or this course

MATH 145 Introductory Chaos Theory 5

or this course

AM 114 Introduction to Dynamical Systems 5

or this course

AM 147 Computational Methods and Applications 5

Plus one of the following courses:

MATH 194 Senior Seminar 5

MATH 195 Senior Thesis 5

Electives

Two courses selected from the following:

AM 100 or above

STAT 100 or above

BME 110 Computational Biology Tools 5

CSE 101 Algorithms and Abstract Data Types 5

CSE 102 Introduction to Analysis of Algorithms 5

CSE 103 Computational Models 5

CSE 104 Computability and Computational Complexity 5

CSE 106 Applied Graph Theory and Algorithms 5

CSE 107 Probability and Statistics for Engineers 5

CSE 110A Fundamentals of Compiler Design I 5

CSE 111 Advanced Programming 5

CSE 112 Comparative Programming Languages 5

CSE 142 Machine Learning 5

EART 172 Geophysical Fluid Dynamics 5

ECE 103 Signals and Systems 5

ECE 135 Electromagnetic Fields and Waves 5

ECE 130 Introduction to Optoelectronics and Photonics 5

ECE 141 Feedback Control Systems 5

ECE 151 Communications Systems 5

ECE 153 Digital Signal Processing 5

ECON 113 Introduction to Econometrics 5

MATH 115 Graph Theory 5

MATH 116 Combinatorics 5

MATH 120 Coding Theory 5

MATH 134 Cryptography 5

MATH 145 Introductory Chaos Theory 5

MATH 148 Numerical Analysis 5

MATH 152 Programming for Mathematics 5

MATH 160 Mathematical Logic I 5

PHYS 115 Computational Physics 5

Some of these courses have prerequisites within their departments. Students are encouraged to plan their computational electives early, so that all prerequisites can be satisfied in a timely manner. Other upper-division courses with heavy emphasis on computational mathematics may occasionally be accepted by the mathematics undergraduate vice chair.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in mathematics is satisfied by

MATH 100 Introduction to Proof and Problem Solving 5

Plus one of the following courses:

MATH 194 Senior Seminar 5

MATH 195 Senior Thesis 5

Comprehensive Requirement

The comprehensive exit requirement in mathematics is satisfied by one of the following courses:

MATH 194 Senior Seminar 5

MATH 195 Senior Thesis 5

Planners

Computational Mathematics B.A.: Sample Freshmen Academic Plan

	Fall	Winter	Spring
1st (frosh)	MATH 19A or MATH 20A	MATH 19B or MATH 20B	MATH 21
			MATH 23A
2nd (soph)	MATH 23B	MATH 110	MATH 145 & MATH 145L or MATH 148
	MATH 100		
3rd (junior)	MATH 24	MATH 106	Elective
	Elective		

4th (senior)	MATH 111A or MATH 117	MATH 103A or MATH 105A	MATH 194 or MATH 195
	Elective		

This course plan satisfies the MF general education requirement. Students must satisfy all other general education requirements.

Computational Mathematics B.A.: Sample Transfer Academic Plan

For students who have completed MATH 19A, MATH 19B, MATH 21 and MATH 23A equivalents.

	Fall	Winter	Spring
1st (junior)	MATH 23B	MATH 103A or MATH 105A	MATH 145 & MATH 145L or MATH 148 & MATH 148L

MATH 188	Supervised Teaching	5
or these courses		
EDUC 50B	CAL Teach 1: Mathematics	2
EDUC 100B	Cal Teach 2: Mathematics	2

Plus one of the following courses:

MATH 194	Senior Seminar	5
MATH 195	Senior Thesis	5

UCSC students can pursue a degree in mathematics while preparing to teach at the secondary level. In California, students seeking a single-subject credential (for secondary teaching) in mathematics are required to take the CSET, a series of examinations that must be passed in order to enter a teaching-credential program (formerly The National Teachers Examination). Students who complete the mathematics education track, plus three additional specified courses, qualify for the California Single Subject Program, exempting themselves from the CSET. Both the Mathematics Department undergraduate adviser, the Mathematics Department's website and the Education Department advising office have more information about the additional required courses for the Subject Matter Program.

Electives

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in mathematics is satisfied by

MATH 100 Introduction to Proof and Problem Solving 5

MATH 100 MATH 181 STAT 5

This course plan satisfies the MF, TA and SR general education requirements. Students must satisfy all other general education requirements.

Mathematics Education B.A.: Sample Transfer Academic Plan

For students who have completed MATH 19A, MATH 19B, MATH 21 and MATH 23A equivalents.

	Fall	Winter	Spring
1st (junior)	MATH 23B	MATH 103A or MATH 105A	MATH 110

MATHEMATICS MINOR

Course Requirements

The minor is intended for students who are interested in mathematics and want a strong mathematical foundation for studying in areas that rely heavily on analytical skills. Students are required to complete at least eight courses as follows:

Lower-Division Courses

Choose one of the following courses:

MATH 19A Calculus for Science, Engineering, and Mathematics 5
 MATH 20A Honors Calculus 5

Plus one of the following courses:

MATH 19B Calculus for Science, Engineering, and Mathematics 5
 MATH 20B Honors Calculus 5

Plus all of the following courses:

MATH 21 Linear Algebra 5
 MATH 23A Vector Calculus 5
 MATH 23B Vector Calculus 5

Upper-Division Courses

MATH 100 Introduction to Proof and Problem Solving 5

The remaining four courses are selected by the student from among any mathematics course numbered above MATH 100 (excluding MATH 188 and MATH 189), any Applied Mathematics (AM) or Statistics (STAT) course numbered AM 100 or STAT 100 or above, or, subject to approval of the undergraduate vice chair, a course from another department. Only one of the four courses can be from the AM or STAT series or another outside department. Under exceptional circumstances, MATH 100 may be substituted by another upper-division mathematics course. The undergraduate vice chair will review requests on an individual basis.

No senior seminar or thesis is required.

Contiguous Bachelor's/Master's Pathway

The 4+1 pathway into the mathematics master's program is an option that allows undergraduates at UC Santa Cruz to:

- Take two required graduate courses during their undergraduate degree in preparation to finish the master's degree in just one additional year.
- Apply to the mathematics master's program through a streamlined application process.

Undergraduate students currently enrolled in the mathematics B.A. have the opportunity, any time after the start of their junior year until December 1st of their senior year, to apply to be admitted to the 4+1 contiguous pathway leading to the mathematics master's degree. Qualified undergraduates from other undergraduate majors may also apply to the pathway and their applications will be considered on a case-by-case basis.

The requirements for admission into the 4+1 pathway are:

1. A GPA in the major of 3.5 or more;
2. to have taken MATH 105B or MATH 111B; and
3. to have taken, to be currently enrolled, or have the plan to enroll by fall of the senior year in one of the required graduate courses.

Interested students should set up a meeting with the mathematics undergraduate adviser to discuss their curriculum plan and complete the application forms. The deadline for application to the pathway is December 1st of their senior year, although students are encouraged to apply earlier.

Students in the pathway who apply through the streamlined application process to the master's program are not guaranteed admission. The Mathematics Department expects to admit students who have passed two of the required graduate courses and have maintained a GPA in the major of 3.5 or more. Once accepted into the master's program, students from the pathway will follow the same requirements as any other students in the two-year track with expected graduation in the fifth year.

Graduate Program

The Mathematics Department offers programs leading to the Master of Arts (M.A.) and Doctor of Philosophy (Ph.D.) degrees. Students admitted to the Ph.D. program may receive a master's degree en route to the Ph.D.; students admitted to the M.A. program may apply to the department to transfer to the Ph.D. program upon passing the required preliminary examinations at the Ph.D. level.

The Mathematics Department at UC Santa Cruz is small but dynamic, with an ongoing commitment to both research and teaching. The department has leading research programs in

several actively developing areas on the frontiers of pure and applied mathematics, interacting strongly with theoretical physics and mechanics. The current areas of research include:

- Vertex operator algebras, higher genus conformal field theory, modular forms, quasi-Hopf algebras, infinite-dimensional Lie algebras, mathematical physics
- Representations of Lie and p-adic groups, applications to number theory, Bessel functions, Rankin-Selberg integrals, Gelfand-Graev models
- Algebra, group theory, finite groups and their representations, conjectures of Alperin, Dade and Broué, Mackey functors, modular representation theory, fusion systems, blocks of finite groups, bisets, biset functors, Burnside rings, representations of algebras, ring theory, module theory
- Algebraic topology, elliptic cohomology, quantum field theory, automorphic forms, string topology, topology of Lie groups, loop spaces
- Symplectic geometry and topology, Floer homology, Poisson Lie groups
- Dynamical systems, celestial mechanics, geometric mechanics, bifurcation theory, control theory
- Fluid and continuum mechanics, the Navier-Stokes equation, long time behavior of solutions of PDEs.
- Geometric integration schemes, numerical methods on manifolds Algebraic geometry
- Differential geometry, nonlinear analysis, harmonic maps, Ginzburg-Landau problem.
- General relativity, Einstein's equations, positive mass conjecture, Teichmüller theory
- Galois and incidence geometry
- Algebraic number theory, elliptic curves, L-functions, p-adic L-functions, special values of L-functions, Gross-Stark conjecture, Heegner points
- Graph theory, expander graphs, prime number distribution
- Functional analysis, random matrix theory, spectral gap, operator theory, Banach algebras, harmonic analysis, Wiener-Hopf factorization, statistical physics

PREPARATION FOR GRADUATE WORK

In order to be prepared for the master's or Ph.D. program, it is recommended to have a B.A. or B.S. in mathematics. Having taken more than the bare minimum of required upper-division classes in the mathematics major will be most helpful.

ADMISSION TO THE GRADUATE PROGRAM

Applications to the graduate program can be submitted through the Graduate Division. The deadline is usually during the first half of January. Admission is decided by a faculty committee and is based on a combination of factors including: GRE scores (in particular the GRE Math Subject Score), letters of recommendation, GPA, and classes taken.

FINANCIAL SUPPORT

The Mathematics Department is strongly committed to the financial support of graduate students who are making good progress toward either the master's or the Ph.D. degree. For the purpose of financial support, a student's progress is measured against the degree programs and timetables.

A teaching assistantship (TA) is the most common form of financial support for graduate students in good academic standing. TA appointments are usually made at 50 percent time (an assigned workload of approximately 220 hours for the quarter). Teaching assistants are under the supervision of the faculty member responsible for the course.

All students are strongly urged to complete a Free Application for Financial Student Aid (FAFSA) each year by the start of fall quarter to determine eligibility for need-based awards. Students are also encouraged to apply for support from the Financial Aid Office as well as from the Mathematics Department.

No need-based fellowship can be awarded to a student who does not have a current FAFSA on file. Students facing special financial hardship are urged to make this known to the department in a timely manner.

The Mathematics Department will do everything in its power to ensure that all students in good standing are granted sufficient financial aid to continue their study of mathematics.

RELATIONSHIP OF MASTER'S AND DOCTORAL PROGRAMS

Students in the master's and doctoral program take the same classes in the core sequences and the same preliminary examinations. Ph.D. and master's students have the same passing requirements in the core classes. However, the preliminary examination requirements for Ph.D. and master's students are different and are outlined below.

MATHEMATICS M.A.

Introduction

The objectives of the mathematics M.A. program give students advanced fundamental knowledge in the areas of algebra, analysis, and geometry in order to prepare them for admission in top Ph.D. programs, for work in industry, or for a teaching career at community colleges. Students will possess the ability to solve problems and communicate solutions and concepts clearly and in rigorous mathematical language.

Master's students are expected to complete their degree within two years. Students admitted to the M.A. program may apply to the Mathematics Department to transfer to the Ph.D. program upon passing the required preliminary examinations at the Ph.D. level.

Requirements

Course Requirements

The following course:

MATH 288A	Pedagogy of Mathematics	2
-----------	-------------------------	---

Students are required to complete four of the following courses from the three core sequences:

MATH 200	Algebra I	5
MATH 201	Algebra II	5
MATH 202	Algebra III	5
MATH 204	Analysis I	5
MATH 205	Analysis II	5
MATH 206	Analysis III	5
MATH 208	Manifolds I	5
MATH 209	Manifolds II	5
MATH 210	Manifolds III	5

Students are also required to complete five additional courses in mathematics

Courses in a related subject may be substituted by approval from the graduate vice chair. Sample courses include:

MATH 203	Algebra IV	5
MATH 207	Complex Analysis	5
MATH 211	Algebraic Topology	5
MATH 212	Differential Geometry	5
MATH 213A	Partial Differential Equations I	5
MATH 213B	Partial Differential Equations II	5
MATH 214	Theory of Finite Groups	5
MATH 215	Operator Theory	5
MATH 216	Advanced Analysis	5
MATH 217	Advanced Elliptic Partial Differential Equations	5
MATH 218	Advanced Parabolic and Hyperbolic Partial Differential Equations	5
MATH 219	Nonlinear Functional Analysis	5
MATH 220A	Representation Theory I	5
MATH 220B	Representation Theory II	5
MATH 222A	Algebraic Number Theory	5
MATH 222B	Algebraic Number Theory	5

MATH 223A	Algebraic Geometry I	5
MATH 223B	Algebraic Geometry II	5

MATH 225B	Infinite Dimensional Lie Algebras	5
MATH 226A	Infinite Dimensional Lie Algebras and Quantum Field Theory I	5
MATH 226B	Infinite Dimensional Lie Algebras and Quantum Field Theory II	5
MATH 227	Lie Groups	5
MATH 228	Lie Incidence Geometries	5
MATH 229	Kac-Moody Algebras	5
MATH 232	Morse Theory	5
MATH 233	Random Matrix Theory	5
MATH 234	Riemann Surfaces	5
MATH 235	Dynamical Systems Theory	5
MATH 238	Elliptic Functions and Modular Forms	5
MATH 239	Homological Algebra	5
MATH 240A	Representations of Finite Groups I	5
MATH 240B	Representations of Finite Groups II	5
MATH 246	Representations of Algebras	5
MATH 248	Symplectic Geometry	5
MATH 249A	Mechanics I	5
MATH 249B	Mechanics II	5
MATH 249C	Mechanics III	5
MATH 252	Fluid Mechanics	5
MATH 254	Geometric Analysis	5
MATH 256	Algebraic Curves	5
MATH 260	Combinatorics	5
MATH 280	Topics in Analysis	5
MATH 281	Topics in Algebra	5
MATH 282	Topics in Geometry	5
MATH 283	Topics in Combinatorial Theory	5
MATH 284	Topics in Dynamics	5
MATH 285	Topics in Partial Differential Equations	5
MATH 286	Topics in Number Theory	5
MATH 287	Topics in Topology	5

Other Requirements

Additional requirements for the M.A. degree are dependent on the student's chosen track: the thesis track or the comprehensive examination track.

Thesis Track

Students are required to complete a master's thesis. A master's thesis does not have to consist of original research results. At the minimum, it should show mastery of a specific subject area that goes beyond the knowledge taught in the core sequences in algebra, analysis, or geometry. This track is recommended for students that want to transfer into a top Ph.D. program.

The student, in consultation with the graduate vice chair, is responsible for selecting a master's thesis reading committee. The majority of the membership of a thesis reading committee shall be members of the Santa Cruz Division of the Academic Senate. The Graduate Division must approve the committee.

The Nominations for Master's Thesis Reading Committee Form must be completed and submitted by the end of the second week of the quarter in which the degree will be granted. The form can be found on the Graduate Division website or can be provided by the Mathematics Department. The form should be turned in to the graduate adviser and program coordinator for review and submission to the Graduate Division.

More information about thesis submission can be found at the Graduate Division website.

Comprehensive Examination Track

Students are required to obtain a second-level pass on one of three written preliminary examinations: algebra, analysis, or geometry. A second-level pass signifies that the student has a very good understanding of the basic concepts, but not necessarily enough to conduct independent research.

Applying for Graduation

M.A. students must complete the Application for the Master's Degree form by the appropriate quarter's deadline listed in the current Academic calendar.

The application can be found on the Graduate Division website or can be provided by the Mathematics Department. The application should be turned in to the graduate adviser and program coordinator for review and submission to the Graduate Division.

MATHEMATICS PH.D.

Introduction

The objectives of the mathematics Ph.D. program are to prepare students for a career in academia, industry, or teaching. At the end of their studies, students will possess the ability to solve problems and communicate solutions in rigorous mathematical language, to communicate mathematical concepts effectively, and to conduct independent research.

Entering graduate students are advised initially by an assigned faculty mentor. Within the first two years, and typically after passing the preliminary examinations, the student selects a Ph.D. adviser in the area of the student's research interest.

Each graduate student is expected to consult with their adviser to formulate a plan of study and research. The student's adviser ultimately will be the student's thesis adviser.

Ph.D. students are expected to obtain their Ph.D. degree within six years. Students admitted to the Ph.D. program may receive a master's degree en route to the Ph.D.

Advancement to Candidacy

Course Requirements

A three-course sequence in each of the three fields of algebra, analysis, and geometry-topology (manifolds) will be offered each year. Preliminary examinations will be given for each core sequence at the beginning, middle, and end of each academic year.

First-level passage of a preliminary examination satisfies the core sequence requirement for that field. Ph.D. students are required to complete the full core sequence in the field associated with the preliminary examination in which they do not achieve a first-level pass. The core sequences are as follows:

MATH 200	Algebra I	5
MATH 201	Algebra II	5
MATH 202	Algebra III	5
MATH 204	Analysis I	5
MATH 205	Analysis II	5
MATH 206	Analysis III	5
MATH 208	Manifolds I	5
MATH 209	Manifolds II	5
MATH 210	Manifolds III	5

The following course:

MATH 288A	Pedagogy of Mathematics	2
-----------	-------------------------	---

Students are also required to complete six additional courses in mathematics.

No more than three courses may be independent study or thesis research courses. Sample courses include:

MATH 203	Algebra IV	5
MATH 207	Complex Analysis	5
MATH 211	Algebraic Topology	5
MATH 212	Differential Geometry	5
MATH 213A	Partial Differential Equations I	5
MATH 213B	Partial Differential Equations II	5
MATH 214	Theory of Finite Groups	5
MATH 215	Operator Theory	5
MATH 216	Advanced Analysis	5
MATH 217	Advanced Elliptic Partial Differential Equations	5
MATH 218	Advanced Parabolic and Hyperbolic Partial Differential Equations	5
MATH 219	Nonlinear Functional Analysis	5
MATH 220A	Representation Theory I	5
MATH 220B	Representation Theory II	5
MATH 222A	Algebraic Number Theory	5
MATH 222B	Algebraic Number Theory	5

MATH 248	Symplectic Geometry	5
MATH 249A	Mechanics I	5
MATH 249B	Mechanics II	5
MATH 249C	Mechanics III	5
MATH 252	Fluid Mechanics	5
MATH 254	Geometric Analysis	5
MATH 256	Algebraic Curves	5
MATH 260	Combinatorics	5
MATH 280	Topics in Analysis	5
MATH 281	Topics in Algebra	5
MATH 282	Topics in Geometry	5
MATH 283	Topics in Combinatorial Theory	5
MATH 284	Topics in Dynamics	5
MATH 285	Topics in Partial Differential Equations	5
MATH 286	Topics in Number Theory	5
MATH 287	Topics in Topology	5

Foreign Language Requirements

The foreign language requirement must be satisfied before taking the oral qualifying examination. Graduate students in the Ph.D. program are required to demonstrate knowledge of French, German, or Russian, sufficient to read the mathematical literature in the language. Any member of the mathematics faculty may administer a foreign language examination.

The examination can be either oral or written. It typically requires translation of a text in one of the three foreign languages into English.

The Report on Language Requirement Form must be filled out by the student and the faculty member administering the examination. The form can be found on the Graduate Division website or can be provided by the Mathematics Department. The form should be turned in to the graduate adviser and program coordinator for review and submission to the Graduate Division.

Teaching Requirement

Ph.D. students must complete a minimum of three quarters as a teaching assistant (TA). All TAs are required to participate in the department's teaching assistant training program.

TA appointments are usually made at 50 percent time (an assigned workload of approximately 220 hours per quarter). TAs are under the supervision of the faculty member responsible for the course. TAs are covered by a collective bargaining agreement between the University of California and the United Auto Workers (UAW).

Instructors and their TA(s) will meet at the beginning of the quarter to complete the Notification of TA Duties form in order to identify the agreed upon tasks. The performance of these tasks will form the basis of the end-of-quarter performance evaluation and will use the following criteria: quality of work; accuracy and attention to detail; interaction with students, peers, and instructor; knowledge of subject; and dependability. The specific allocation of TA duties is subject to change, depending on enrollments and the number of teaching assistantships in the department allocation. The general duties vary, depending on the course assigned and level of the course.

Pre-Qualifying Requirements

Preliminary Examinations

Preliminary examinations are given for each core sequence in the fields of algebra, analysis, and geometry-topology at the beginning, middle, and end of each academic year. The exams will be designed and graded by a committee of three members.

A first-level pass signifies that the student has the basic knowledge to start research with a thesis adviser in this particular area. A second-level pass signifies that the student has a very good understanding of the basic concepts, but not necessarily enough to conduct independent research.

Ph.D. students must obtain a first-level pass on at least one of the three written preliminary examinations and a second-level pass on at least one other. Students must complete the full three-course sequence in the field associated with the preliminary examination in which they did not achieve a first-level pass. Students may take the preliminary examinations as often as they wish.

Ph.D. students should complete the preliminary examinations and core sequence requirements by the end of their second year in order to make satisfactory progress. If a graduate student does not fulfill these requirements by the end of their second year, they may be placed on academic probation, depending on their progress in the program. If a graduate student has not fulfilled these requirements by the end of their third year, they are subject to dismissal from the program.

Topics for the preliminary examinations include:

- Algebra
 - Linear algebra

- Group theory
- Ring and module theory
- Field theory
- Galois theory
- Analysis
 - Basic analysis
 - General topology
 - Metric spaces
 - Measure and integration
 - Complex analysis
 - Functional analysis
- Geometry-topology (manifolds)
 - Manifold and tangent bundle
 - Differential forms and integration on manifolds
 - Fundamental group and covering space
 - (Co)homology
 - Differential geometry

Qualifying Examination

Oral Qualifying Examination

All graduate students in the Ph.D. program are required to take an oral examination, called the oral qualifying examination, for advancement to candidacy for the Ph.D. degree. Students typically complete this examination between their 7th and 12th quarter in residence.

Students will demonstrate that they have a sufficient understanding of their Ph.D. thesis problem. Any student who has not passed their oral exam by the end of the fourth year may be subject to academic probation or dismissal from the program.

The Report on Qualifying Examination Form must be filled out by the qualifying examination committee immediately following the examination. The form can be found on the Graduate Division website or can be provided by the Mathematics Department. The form should be turned in to the graduate adviser and program coordinator for review and submission to the Graduate Division. The student may request to see a copy of the report.

If the student fails the examination, a re-examination can be given within the next three months. The membership of the examining committee usually remains fixed.

Qualifying Examination Committee Composition

The examining committee consists of the student's faculty adviser, at least two other faculty members from the Mathematics Department, and at least one outside tenured

faculty member from either another discipline at UCSC or another academic institution (involved in research and graduate education of the same or different discipline). The student, in consultation with the student's faculty adviser, selects the committee. The chair of the committee must be someone other than the student's faculty adviser.

The Graduate Division must approve the committee. The Committee Nomination of Ph.D. Qualifying Examination Form must be completed and submitted at least one month prior to the requested exam date. The form can be found on the Graduate Division website or can be provided by the Mathematics Department. The form should be turned in to the graduate adviser and program coordinator for review and submission to the Graduate Division.

The committee decides on the topics for the examination, which should be broad enough to encompass a substantial body of knowledge in the area of the student's interest. The written list of topics to be included in the examination, along with a short bibliography, is prepared by the student. A copy is given to each committee member and a copy is put into the student's permanent records.

Post-Qualifying Requirements

Dissertation Reading Committee Composition

A Ph.D. student, in consultation with the graduate vice chair, is responsible for selecting a dissertation reading committee. The committee consists of the student's adviser and at least two other members of the mathematics faculty. In special circumstances, a committee member may be chosen from another department and/or from another institution. The student's adviser is the chair of the committee.

The Graduate Division must approve the committee. The Nominations for Dissertation Reading Committee Form must be completed and submitted prior to advancement to candidacy. The form can be found on the Graduate Division website or can be provided by the Mathematics Department. The form should be turned in to the graduate adviser and program coordinator for review and submission to the Graduate Division.

A new form must be submitted for approval if changes to the dissertation reading committee must be made.

Advancement to Candidacy

To make satisfactory progress, a Ph.D. student should advance to candidacy by the end of their fourth year. A Ph.D. student who has not advanced to candidacy by the end of the fourth year will be placed on academic probation or be subject to dismissal from the program.

Students must complete the following in order to advance to candidacy:

1. Complete the preliminary examinations and core sequences in accordance with the requirements outlined above;
2. Satisfy the language requirement;

3. Pass the qualifying examination;
4. Have a dissertation reading committee approved by the Mathematics Department and the Graduate Division;
5. Have no incomplete grades (I) on their record.

An advancement to candidacy fee will be billed to the student's account. The student will be officially advanced the following term after all of these requirements are met.

Dissertation

Dissertation

Each graduate student in the Ph.D. program is required to write a Ph.D. dissertation or thesis on a research topic in mathematics. The Ph.D. dissertation should contain original research results that are publishable in a peer-reviewed journal. All members of the student's dissertation committee must read and approve the dissertation.

More information about dissertation submission can be found at the Graduate Division website.

Dissertation Defense

After the dissertation has been approved, the student has an option of making a public oral presentation of the mathematical results contained in the dissertation—the "thesis defense." A recommendation by the dissertation committee will be made to the Mathematics Department and to the Graduate Council on the granting of the Ph.D. degree.

Academic Progress

Ph.D. students are expected to adhere to the below degree timetable:

1. Preliminary examinations and course sequence requirements
Completed by the end of the student's 2nd year
2. Language examination
Completed by the end of the student's 3rd year
3. Oral qualifying examination (and advancement to candidacy)
Completed no later than student's 12th quarter
4. Dissertation defense
Completed no later than the end of the 6th year

Annual meetings with the graduate vice chair and the graduate adviser and program coordinator are conducted with each student on a one-on-one basis. These meetings serve to notify the student of their current progress within the program and outline expectations for the continuation of normative progress toward the Ph.D. degree.

Applying for Graduation

Ph.D. students must complete the Application for the Doctor of Philosophy degree form by the appropriate quarter's deadline listed in the current Academic and Administrative Calendar.

The form can be found on the Graduate Division website or can be provided by the Mathematics Department. The form should be turned in to the graduate adviser and program coordinator for review and submission to the Graduate Division.

Microbiology and Environmental Toxicology

430 Physical Sciences Building
Telephone (831) 459-4719
FAX (831) 459-3524
<https://www.metx.ucsc.edu>

PROGRAMS OFFERED

Contiguous Bachelor's/Master's Pathway (p. 291)

Microbiology and Environmental Toxicology M.S. (p. 292)

Microbiology and Environmental Toxicology Ph.D. (p. 293)

OTHER PROGRAMS OF INTEREST

Microbial Biology and Pathogenesis Track within the Program in Biomedical Sciences and Engineering (PBSE)

The Microbiology and Environmental Toxicology Department (METX) offers undergraduate and graduate courses in microbiology and environmental toxicology, both within the department and through affiliated departments. The curriculum provides a strong foundation in fundamental and applied toxicology and microbiology to achieve the breadth and depth of perspective required for this interdisciplinary science. Research interests of students and faculty in METX span the fields of biology, microbiology, chemistry, Earth sciences, ocean sciences, environmental studies, and human health.

Undergraduate Program

The METX Department only awards graduate degrees, although it does offer a select number of undergraduate courses to prepare and attract promising undergraduates for advanced studies in microbiology and environmental toxicology or health-related disciplines. Students interested in microbiology and environmental health should major in a field such as biology; marine biology; molecular, cell, and developmental biology; biochemistry; chemistry; Earth sciences; engineering; or environmental studies while taking microbiology and environmental toxicology electives.

In addition, the program provides unique opportunities for exceptional undergraduates to conduct research in microbiology and environmental toxicology. These opportunities are limited to students who have demonstrated their potential in undergraduate courses in the basic sciences and environmental health. With department approval, these undergraduates may also take graduate courses in microbiology and environmental toxicology, that coursework may be applied toward a graduate degree in microbiology and environmental toxicology if the student is accepted into the program.

Contiguous Bachelor's/Masters Pathway

METX offers a fifth-year Plan I (thesis) M.S. degree path when earned contiguous with an appropriate Bachelor of Science (B.S.) degree at UCSC. The fifth-year M.S. path provides highly motivated undergraduate majors the opportunity to earn separate B.S. and M.S. degrees in five years. The path provides the additional level of preparation and experience that students need to pursue careers in industry, government, or to increase their competitiveness for top Ph.D. programs. Students apply to be accepted into the fifth-year M.S. path in consultation with their faculty or undergraduate adviser, no later than the end of the spring quarter of the junior year.

To be accepted to the path, students will need to prepare an application and plan for their fifth-year BS/MS, providing evidence of solid academic performance in general and in their undergraduate major. The application should be submitted no later than end spring quarter of the junior year, and should include:

- A one-page personal statement describing a) the student's motivation and academic preparation for entering the path; b) the student's goals for the fifth-year path, including the area of concentration; c) the name of a faculty member willing to serve as their thesis adviser (if appropriate); and d) future professional goals.
- Copy of unofficial transcripts establishing the GPA requirements in the undergraduate major and overall. Applicants should possess a GPA in courses of their undergraduate major (biology, chemistry, etc.) of 3.2 or above, and an overall GPA of 3.0 or above.
- A letter of recommendation from the METX faculty member attesting to the student's promise for a M.S. degree in METX.
- A coursework plan that will enable them to complete both the requirements for the B.S. in their undergraduate department and M.S. in METX in five years, including demonstrating sufficient coursework capacity to complete at least one to two METX graduate courses in their final undergraduate year.

If accepted into the fifth-year B.S./M.S. path, students will go through the regular METX M.S. application process early in their senior year. The criteria for admission to the METX M.S. program will be the same as for all METX M.S. program applicants.

Graduate Program

Graduate training in the METX Department prepares students to solve important problems in the field of environmental health by providing stimulating coursework, extensive scientific presentation training, and for the research-oriented Ph.D. and M.S. degrees, in-depth research that culminates in a thesis. There is no other program in the world that educates students to appreciate the interplay between microbes, chemical toxins, and health and provides the training students require to work effectively in a complex world. Graduate training in the METX department prepares students to become leaders in the field, following career paths in academia, teaching, industry, and government. Doctor of Philosophy (Ph.D.) students typically finish in four to six years. The research-oriented Master of Science (M.S.) students typically finish in two years, while the coursework/capstone M.S. students can finish in one year.

MICROBIOLOGY AND ENVIRONMENTAL TOXICOLOGY M.S.

Introduction

The Microbiology and Environmental Toxicology Department offers a master of science (M.S.) degree in microbiology and environmental toxicology (METX). The METX M.S. degree can be attained through Plan I thesis (coursework and thesis, minimum 40 credits) or Plan II (coursework and capstone project, minimum 40 credits). In addition, METX offers a fifth-year Plan I (thesis) M.S. degree path when earned contiguous with an appropriate bachelor of science (B.S.) degree at UC Santa Cruz. The METX M.S. degree combines core courses and electives to provide interdisciplinary training in microbiology, toxicology, and environmental health sciences. Graduates from the program are exceptionally prepared to take research or management positions in organizations concerned with microbial and environmental health-related sciences. Graduates may also pursue fields in education or enter doctoral programs in biological and environmental health sciences or related fields.

Requirements

Course Requirements

Plan I (coursework, research, and thesis) M.S. degree

Prospective students who are interested in research careers, or gaining research experience prior to entering a doctoral program, may consider the thesis M.S. degree (Plan I).

Required core courses (2):

METX 200 Interdisciplinary Approaches in 5

Environmental Toxicology

One course from the following (1):

METX 205	Scientific Grant Writing	5
METX 245A	Scientific Communication in Microbiology and Environmental Toxicology A	5

Two courses from the following:

METX 201	Sources and Fates of Pollutants	5
METX 202	Cell and Molecular Toxicology	5
METX 206A	Advanced Microbiology	5
METX 210	Molecular and Cellular Basis of Bacterial Pathogenesis	5
METX 238	Pathogenesis: Molecular Mechanisms of Disease	5
METX 250	Environmental Microbiology	5
METX 270	Drug Action and Development	5

At least one additional approved graduate-level METX course or from another department.

Any additional courses as recommended by your first year Advising Committee.

Each quarter, students must enroll in at least the following:

METX 292	Introductory Graduate Seminar
METX 297	Independent Study

Each quarter, students must enroll in the lab meeting associated with their primary instructor (1):

METX 281C	Topics in Environmental Microbiology	2
METX 281M	Topics in Molecular Toxicology	2
METX 281O	Topics in Bacterial Pathogenesis	2
METX 281S	Cellular and Organismal Responses to Toxicants	2
METX 281V	Topics in Bacterial Pathogenesis and Innate Immunity	2
METX 281Y	Biofilms: Processes and Regulation	2

Plan II (Coursework and Capstone) M.S. Degree

The Plan II coursework M.S. degree may be of interest to students interested in interdisciplinary graduate training in microbiology and environmental health-related fields, but with career goals other than research, such as government service, non-profit NGOs, and private sector biotech and environmental health companies.

Required core course:

METX 200	Interdisciplinary Approaches in Environmental Toxicology	5
----------	--	---

Two courses from the following:

METX 201	Sources and Fates of Pollutants	5
METX 202	Cell and Molecular Toxicology	5
METX 206A	Advanced Microbiology	5

METX 210	Molecular and Cellular Basis of Bacterial Pathogenesis	5
----------	--	---

One course from the following:

METX 238	Pathogenesis: Molecular Mechanisms of Disease	5
BIOL 217	Influence of Environment and Experience on Brain Development	5

At least one additional approved graduate-level METX course or from another department.

At least one additional approved general elective METX course or from another department.

Each quarter, students must enroll in the following course:

METX 292	Introductory Graduate Seminar
----------	-------------------------------

Winter and Spring Quarter Capstone Courses

Both of the following courses:

METX 245A	Scientific Communication in Microbiology and Environmental Toxicology A	5
METX 245B	Scientific Communication in Microbiology and Environmental Toxicology B	5

Other Requirements**Plan I (coursework, research, and thesis) M.S. degree****Literature review**

Under direction of the student's adviser, write a literature review of the current state of the field of the proposed dissertation research. The written review will be handed in to the student's adviser at the end of the summer of the first year.

Department seminars

Give a 20-minute departmental seminar in the first academic year and one 50-minute departmental seminar on thesis work during the spring of the second year.

Master's comprehensive examination

The master's comprehensive exam is a presentation and defense of the student's master's research proposal, including relevant background knowledge. The examination will not be specifically course-based, but will draw on knowledge from courses. This examination is taken in the fall quarter of the second year.

Thesis

Students are required to submit a thesis for fulfillment of the degree requirements. The thesis should be submitted to the student's master's reading committee one month before the due date.

Plan II (coursework and capstone) M.S. degree**Capstone Writing Project:**

Plan II M.S. students will also complete a capstone writing project (METX 245A and METX 245B) to be completed under the guidance/mentorship of a faculty member in the department. As an example, capstone projects may include a scientific research proposal or a substantial review article.

Applying for Graduation**MICROBIOLOGY AND ENVIRONMENTAL TOXICOLOGY PH.D.****Introduction**

Key components of our graduate training include:

- Interdisciplinary core course that teaches critical thinking and how to approach complex problems in environmental health: METX 200: Interdisciplinary Approaches to Problems at the Interface of Microbiology and Environmental Toxicology.
- Core course devoted to grant-writing and scientific-writing skills: METX 205: Scientific Grant Writing.
- Personalized class plan for the remaining three courses to fit the student's background and research goals. Possible courses include METX 201: Sources and Fates of Pollutants; METX 202: Cell and Molecular Toxicology; METX 206A: Advanced Microbiology; METX 210: Molecular and Cellular Basis of Bacterial Pathogenesis; METX 238: Pathogenesis: Molecular Mechanisms of Disease; METX 250: Environmental Microbiology; and METX 270: Frontiers in Drug Action and Discovery. Courses in other departments include OCEA 220: Chemical Oceanography; and BIOL 200B: Advanced Molecular Genetics.
- Speaking presentation skills training through coursework and yearly departmental presentations. Scientific writing and literature mastery through the writing of a literature review in the first year. Weekly seminars expose students to the breadth of our fields and provide students with opportunities to interact closely with speakers and form connections and collaborations.
- Qualifying examinations designed to perfect the student's ability to craft and defend research plans.
- For Ph.D. and Plan I (research thesis) M.S. students, extensive laboratory research training that starts immediately upon entering the program and culminates in the student's Ph.D. dissertation or master's thesis.

Sample Pathways

Pathways within the microbiology and environmental toxicology graduate program focus on interdisciplinary approaches to addressing problems in environmental and

public health. We offer several defined training pathways, and also support students who want to create their own.

Metals in the Environment

Research includes investigating the concentration, speciation, and isotopic composition of contaminant metals and metalloids in the environment, how organisms are exposed to metals as potential toxicants, and how these metals cause toxicity.

Microbiology

Microbiology provides research training on molecular genetic analysis of both non-pathogenic and pathogenic microbes. Students study host-pathogen interactions, ecology and evolution of pathogenic microorganisms, adaptation of pathogenic and non-pathogenic microorganisms to environmental stresses, and mechanisms of microbial biotransformation of pollutants and toxic metals.

Cellular and Organismal Toxicology

This pathway provides training in the biochemical, molecular, cellular, and physiological processes that are impacted by exposures to contaminants such as toxic metals. Research includes exposure pathways and toxicity of contaminants and pathogens within humans, with emphasis on the molecular and cellular mechanisms underlying toxicity.

Microbial Biology and Pathogenesis Track within the Program in Biomedical Sciences and Engineering (PBSE)

The METX Department also admits students through the PBSE program Microbial Biology and Pathogenesis (MICRO) Ph.D. track. The PBSE track is a rotation-based graduate umbrella program. This training program emphasizes the application of diverse approaches, including biochemistry, genetics, genomics, ecology, and imaging to address questions at the forefront of microbial biology.

Interdisciplinary research is encouraged and supported by a diverse group of faculty from the METX Department as well as from the Departments of Biomolecular Engineering; Ocean Sciences; Molecular, Cell, and Developmental Biology; Evolutionary and Ecology Biology; and Chemistry and Biochemistry.

Advancement to Candidacy

The student advances to candidacy after completing all coursework, completing the literature review, giving the third-year seminar and passing the Ph.D. qualifying examination parts I and II.

Course Requirements

Required core courses (2):

METX 200	Interdisciplinary Approaches in Environmental Toxicology	5
METX 205	Scientific Grant Writing	5

Two courses from the following:

METX 201	Sources and Fates of Pollutants	5
METX 202	Cell and Molecular Toxicology	5
METX 206A	Advanced Microbiology	5

METX 210	Molecular and Cellular Basis of Bacterial Pathogenesis	5
METX 238	Pathogenesis: Molecular Mechanisms of Disease	5
METX 250	Environmental Microbiology	5
METX 270	Drug Action and Development	5

At least one additional approved graduate-level METX course or from another department.

Any additional courses as recommended by your first-year advising committee.

Each quarter, students must enroll in at least the following:

METX 292	Introductory Graduate Seminar
METX 297	Independent Study

Plus a topical seminar from the METX 281 series

METX 281A	Topics in Environmental Toxicology	5
METX 281C	Topics in Environmental Microbiology	2
METX 281M	Topics in Molecular Toxicology	2
METX 281O	Topics in Bacterial Pathogenesis	2
METX 281S	Cellular and Organismal Responses to Toxicants	2
METX 281V	Topics in Bacterial Pathogenesis and Innate Immunity	2
METX 281Y	Biofilms: Processes and Regulation	2

Foreign Language Requirements

Teaching Requirement

Doctoral students are required to work as teaching assistants (TA) for at least one quarter. Priority for TA positions is given to first-year doctoral students, then to current doctoral students who have not yet worked as a teaching assistant. Fulfilling this requirement may happen pre- or post-candidacy.

Pre-Qualifying Requirements

Qualifying Examination

Ph.D. qualifying examination (QE1—microbiology and environmental toxicology internal). Part I of the qualifying examination consists of two portions: preparation and defense of an independent research proposal prepared by the student, and knowledge of material presented in the microbiology and environmental toxicology core courses taken by the student. The student must complete QE1 no later than spring quarter of the second year.

Third-year seminar and thesis proposal. The student will present a 50-minute seminar on their dissertation research proposal no later than the end of fall quarter in the third year.

Ph.D. qualifying examination (QE2). Present and defend a dissertation research proposal to the student's Ph.D. qualifying examination (QE) committee. The student must complete QE2 no later than fall quarter of the third year.

Post-Qualifying Requirements

Literature Review

Under direction of the student's adviser, write a literature review of the current state of the field of the proposed dissertation research. The written review will be handed in to the student's adviser at the end of the summer of the first year.

Department Seminar

Give a 20-minute departmental seminar each academic year, and one 50-minute departmental seminar during the fall quarter of the third year.

Dissertation

Dissertation and Defense

The student must submit their doctoral dissertation to the dissertation committee for tentative approval at least one month before presenting a formal, public doctoral research seminar.

Academic Progress

Applying for Graduation

Molecular, Cell, and Developmental Biology

Molecular, Cell, and Developmental Biology M.S. (p. 316)

Molecular, Cell, and Developmental Biology Ph.D. (p. 317)

OTHER PROGRAMS OF INTEREST

Science Education B.S. (p. 334)

Biochemistry and Molecular Biology B.S. (p. 210)

This is an extraordinary time to be involved in biomedical research. New technologies are rapidly changing our understanding of the molecular and cellular basis of life, with dramatic implications for how we treat human disease. Members of the Department of Molecular, Cell, and Developmental Biology, along with affiliated faculty in the departments of Biomolecular Engineering, Chemistry and Biochemistry, Microbiology and Environmental Toxicology, and Physics, are participating in an extraordinary revolution in biomedical science. A broad spectrum of cutting-edge research tools are being employed to tackle problems in key areas that include: the structural and functional role of RNA in regulation of gene expression; chromatin biology and epigenetic control of genes; the cell biology of the cytoskeleton and the cell cycle; decisions controlling embryogenesis and organ development; and developmental neurobiology. The insights generated by this basic research enable new strategies for treatments of aging disorders, birth defects, neurological diseases, cancer and other human ailments. The department offers a spectrum of courses that reflect the exciting new developments and directions in these fields, and trains students to participate in these exciting fields.

Undergraduate Program

Students may plan a program that leads to one of several Bachelor of Science (B.S.) degrees. Students may choose from the following major options:

Biology B.S.

Human biology B.S.

Molecular, cell, and developmental biology B.S.

Neuroscience B.S.

Students may choose from one minor option:

Biology minor

Advanced undergraduates, with the guidance of faculty mentors, have access to extensive departmental laboratory facilities for independent research. Many students take advantage of the numerous opportunities with local physicians, health care providers and biotech companies to gain experience in a real world setting. This array of opportunities for directed independent study enables biological science majors to enhance their upper-division programs to reflect and strengthen their own interests and goals.

BIOLOGY B.S.

Information and Policies

Introduction

Biology has entered into an exciting new era in which phenomena that once seemed insoluble mysteries—such as embryonic development, the functions of the brain, and the dynamics of ecosystems—are now yielding their secrets as the technology to study them becomes more and more sophisticated. From molecular biology, with its potential to revolutionize medicine and agriculture, to ecology, with its lessons for the sustainable management of the environment, biologists are fully engaged in meeting the challenges of the future, helping to improve the quality of human life and to preserve habitats and biodiversity. Thus, it is no surprise that biology is at the heart of many of today's most pressing intellectual and social concerns. The Biology B.S. degree program gives students a rigorous education in modern biology, while allowing a student the opportunity to select from a wide array of upper-division elective courses offered by the departments of Molecular, Cell, and Developmental Biology and Ecology and Evolutionary Biology. With proper advance planning, a student with virtually any degree can prepare a competitive application for medical school or health care professional school. Check the Health Careers webpage for more information on how you can academically prepare for a career in health care. Additional information is available at the UCSC Career Center.

Academic Advising for the Program

Students should take full advantage of academic advising and should keep in frequent contact with the advisers to stay informed about late announcements of courses, changes in scheduling, and opportunities for special study. Transfer students should also consult the Transfer Information and Policy Section. For additional advice and information:

MCD Advising
142 Jack Baskin Engineering
mcdadvising@ucsc.edu

Getting Started in the Major

Prerequisites

Due to the demanding nature of the major, students must begin their science coursework as early as possible. CHEM 1A, CHEM 1B and CHEM 1C, and BIOL 20A, BIOE 20B, and BIOL 20L must be taken during the first and second years in order for students to qualify for admission to MCD biology-sponsored majors, including the biology B.S., human biology B.S., molecular, cell and developmental biology B.S. and neuroscience B.S. majors. Students are strongly encouraged to take STAT 5 or STAT 7/STAT 7L and begin, if not complete, other requirements including calculus. For an overview of prerequisites and getting started in the major, please visit our biology B.S. site.

An online mathematics placement examination is required to enroll in a math course. Biological science majors are expected to take this examination and are encouraged to work in the learning modules until they place into calculus. For more information see the mathematics placement website.

Program Learning Outcomes

Students who successfully complete the Biology major will be able to:

- Demonstrate knowledge of how biochemistry, genetics and molecular biology are used to elucidate both the function of cells and their organization into tissues,
- Recognize that biology has a basis in chemistry, physics, and mathematics,
- Describe how scientific method is used to explain natural phenomena,
- Use effective oral and written language skills to communicate scientific data and ideas,
- Understand safe laboratory practices and perform basic molecular biology techniques
- Generate hypotheses, evaluate data, and design experiments to investigate a scientific problem, and
- Present broad knowledge in biochemistry, genetics, evolutionary biology, cell biology, developmental biology, physiology and ecology.

Major Qualification Policy and Declaration Process

Major Qualification

The Department of Molecular Cell and Developmental Biology has a qualification policy that applies to the biology B.S., molecular, cell and developmental biology B.S., and neuroscience B.S. majors.

To qualify for any of these majors, students must pass (with a grade of C or better) the following courses or their equivalents:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1C	General Chemistry	5
BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOL 20L	Experimental Biology Laboratory	2

All qualification courses must be completed by the campus major declaration deadline.

Students with two or more grades of NP, C-, D+, D, D-, or F in the policy courses are not qualified to declare.

When assessing qualification:

- All courses must be taken for a letter grade, see Letter Grade Policy.
- Students with AP credit for BIOL 20A, BIOE 20B, and/or CHEM 1A, need only pass the remaining qualification policy courses.
- Students with grades of I or IP in any of the policy courses will not be eligible to declare until a grade has been assigned.
- Every student who satisfies the major qualification requirements and who petitions to declare the major by the campus major declaration deadline (i.e., before enrolling in their 3rd year or the equivalent) will be admitted to the major. Students enrolled in their final qualification policy course at the major declaration deadline may submit the petition, but will not be declared until satisfactory grades have been posted. Students who satisfy the major admission requirements, but who petition to declare the major after the campus major declaration deadline will be considered on a case-by-case basis for admission to the major; admission is not guaranteed.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the Molecular Cell and Developmental Biology faculty adviser within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student and their college of the decision. See our appeal process for more information.

How to Declare a Major

You may declare a major as early as you would like, if you have decided which major to pursue and have satisfied prerequisites or qualification requirements (if any) for the major. Students who enter UC Santa Cruz as frosh are required to be formally declared in a major before enrolling in their third year (or equivalent). Upper-division transfer students must complete the major qualification courses before entering UCSC.

Each major/minor advising office has a process for declaring. To initiate the process to declare, please complete the online declaration petition located on the Department of MCD Biology website. For assistance, please contact MCD biology advising at mcdadvising@ucsc.edu.

Transfer Information and Policy

Transfer Admission Screening Policy

MCD Biology encourages applications from transfer students in the biological sciences. In fall 2012 the department established a Major Qualification Policy that limits access to the program to those students who have successfully completed a subset of foundational coursework. Transfer students are held to similar criteria when being assessed for admission to UC Santa Cruz as an MCD-sponsored major. See qualifying for the major as a transfer applicant for more information.

To be considered for admission as a proposed major in biology B.S., transfer students must complete courses equivalent to CHEM 1A, CHEM 1B, CHEM 1C, BIOL 20A, and BIOE 20B with a grade of C or better in each course prior to transfer.

In addition to the required coursework for admission, students should complete courses equivalent to the lower-division calculus (MATH 11A or 19A and MATH 11B or 19B; statistics (STAT 5 or STAT 7 and STAT 7L and organic chemistry (CHEM 8A, CHEM 8B and CHEM 8L) requirements. Students who transfer without having completed these recommended courses may have difficulty enrolling in courses and may require more than two years to complete their MCD-sponsored degree. Students are also encouraged to complete all general education requirements prior to transfer. Please see our preparing to transfer as an MCD major for more complete information.

Getting Started at UCSC as a Transfer Student

Transfer students who have met the major qualification requirements are encouraged to declare the major immediately upon arrival. Students who are proposed in a different major and have advanced standing when they come to UC Santa Cruz require permission from the department to change into the major. Admission to the major is not guaranteed.

Transfer students should complete the required courses in genetics (BIOL 105), biochemistry (BIOL 100) and molecular biology (BIOL 101 and BIOL 101L) by the end of their first year at UCSC since they are prerequisites for the majority of other required courses.

Letter Grade Policy

All courses that are taken to satisfy any major requirement must be taken for a letter grade.

Course Substitution Policy

At least half of the upper-division courses (numbered Biology 100–Biology 190) required for the major must be taken through the biological sciences program at UC Santa Cruz, not as transfer credits from another department or institution. If a student plans to transfer to UCSC from another institution, the student is advised to contact a MCD Biology Department adviser at UC Santa Cruz before enrolling in upper-division courses at the student's institution or any institution other than UCSC. This advising will help students understand the limitation of transferring upper-division courses from other institutions to UCSC. For more information on transferring courses to UC Santa Cruz, please consult the undergraduate website.

Once matriculated, a student must receive permission from the department to satisfy the BIOL 20A, BIOL 100, BIOL 105, BIOL 101 or BIOL 110 requirements with courses taken at other institutions. Students who wish to receive credit toward the major for these or other courses taken either at UCSC or at another institution should contact a department adviser.

Double Majors and Major/Minor Combinations Policy

Students interested in pursuing multiple majors within the biological sciences may NOT declare the following combination of majors:

- Biology (B.A., B.S., or minor) AND any other biological sciences major

Should a student choose to double major, they must qualify for and complete the disciplinary communication and comprehensive requirements for each of the majors.

Study Abroad

The UC Education Abroad Program (EAP) offers qualified students unique opportunities to broaden their educational horizons. The MCDB Department encourages interested students to participate. Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

Students interested in study abroad need to get an early start on their basic science requirements, including chemistry, mathematics, and introductory biology and must declare their major prior to applying to go abroad. Visit the EAP office as soon as possible to begin planning; you must seek advice about your EAP plan for major courses at UC Santa Cruz from a department adviser and/or faculty adviser and receive their approval for your plans.

Honors

Honors in the majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

Medical and Professional School Admission

Medical and professional school admissions requirements vary; students should verify that their coursework will satisfy the admissions requirements of the programs to which they plan to apply.

Requirements and Planners**Course Requirements****Lower-Division Courses****All of the following courses:**

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5
BIOL 20L	Experimental Biology Laboratory	2
CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2
CHEM 8A	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8B	Organic Chemistry	5

BIOL 20L is waived for junior transfer students

Plus one of the following options:

Either these courses		
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
or these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Plus one of the following options:

Either this course		
STAT 5	Statistics	5
or these courses		
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5

Plus one of the following options:

Either these courses		
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 6B	Introductory Physics II	5
or these courses		
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 6C	Introductory Physics III	5
or these courses		
PHYS 7A	Elementary Physics I	5
PHYS 7B	Elementary Physics II	5
PHYS 6L	Introductory Physics Laboratory	1

Note: PHYS 7A/PHYS 7B and PHYS 6L may not satisfy the physics prerequisite for admission to all medical schools; be sure to check the requirements at all schools where you wish to apply.

Upper-Division Courses**Choose one of the following options:**

Either these courses		
BIOL 100	Biochemistry	5
BIOL 101	Molecular Biology	5
or these courses		
BIOC 100A	Biochemistry and Molecular Biology	5
BIOC 100B	Biochemistry and Molecular Biology	5
BIOC 100C	Biochemistry and Molecular Biology	5

Students who complete the BIOC 100A/BIOC 100B/BIOC 100C sequence can use BIOC 100C to satisfy an upper-division elective.

Plus one of the following courses:**Plus all of the following courses:**

BIOL 105	Genetics	5
BIOL 110	Cell Biology	5
BIOE 107	Ecology	5
BIOE 109	Evolution	5

Laboratory requirement:

Students must complete two upper-division courses that include regular laboratory or fieldwork:

Choose one of the following courses:

BIOL 101L	Molecular Biology Laboratory	2
BIOL 102L	Toxic RNA Laboratory I	5

Plus one additional laboratory or field course (any upper-division BIOE or BIOL course identified with an "L").

If the additional laboratory course is BIOL 103L, BIOL 105L, BIOL 109L, BIOL 115L, BIOL 120L or BIOL 121L, it will also satisfy the disciplinary communication requirement.

Electives

Students must complete three additional upper-division electives (5-7 credits each) chosen from below:

Note: Some of the following courses fulfill the DC requirement.

Note: Lecture/lab combinations count as one course.

Students must complete three additional upper-division electives (5-7 credits each) chosen from below:

BIOL 111A	Immunology I	5
BIOL 114	Cancer Cell Biology	5
BIOL 115	Eukaryotic Molecular Biology	5
BIOL 120	Developmental Biology	5
BIOL 125	Introduction to Neuroscience	5
BIOL 130	Human Physiology	5
BIOL 140	The RNA World	5
BIOC 100C	Biochemistry and Molecular Biology	5
BIOE 108	Marine Ecology	5
BIOE 112	Ornithology	5
BIOE 112L	Ornithology Field Studies	2
BIOE 114	Herpetology	5
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 117	Systematic Botany of Flowering Plants	5
BIOE 117L	Systematic Botany of Flowering Plants Laboratory	2
BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2
BIOE 122	Invertebrate Zoology	5
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 124	Mammalogy	5
BIOE 124L	Mammalogy Laboratory	2
BIOE 127	Ichthyology	5
BIOE 127L	Ichthyology Laboratory	2
BIOE 129	Biology of Marine Mammals	5
BIOE 129L	Biology of Marine Mammals Laboratory	2
BIOE 131	Animal Physiology	5
BIOE 133	Exercise Physiology	5
BIOE 133L	Exercise Physiology Laboratory	2
BIOE 134	Comparative Vertebrate Anatomy	5
BIOE 134L	Comparative Vertebrate Anatomy Laboratory	2
BIOE 135	Plant Physiology	5
BIOE 135L	Plant Physiology Laboratory	2
BIOE 137	Molecular Ecology	5
BIOE 137L	Molecular Ecology Laboratory	2

BIOE 140	Behavioral Ecology	5
BIOE 145	Plant Ecology	5
BIOE 147	Community Ecology	5
BIOE 148A	Quantitative Ecology	5
BIOE 149	Disease Ecology	5
BIOE 155	Freshwater Ecology	5
BIOE 161	Kelp Forest Ecology	5
BIOE 163	Ecology of Reefs, Mangroves, and Seagrasses	5
BIOE 163L	Ecology of Reefs, Mangroves, and Seagrasses Laboratory	2
BIOE 165	Marine Conservation Biology	5
BIOE 172	Population Genetics	5
BIOE 172L	Population Genetics Laboratory	2
METX 119	Microbiology	5
METX 135	Functional Anatomy	5
METX 135L	Functional Anatomy Lab	2

Disciplinary Communication (DC) Requirement

The DC requirement in the biology B.S. degree can be satisfied either by completing two BIOE lab courses or by completing one 5-credit BIOL lab.

For the BIOE option, choose two Ecology and Evolutionary Biology courses from this group:

Note: Lecture/lab combinations count as one course.

BIOE 108	Marine Ecology	5
BIOE 114	Herpetology	5
BIOE 114L	Field Methods in Herpetological Research	2
BIOE 117	Systematic Botany of Flowering Plants	5
BIOE 120	Marine Botany	5
BIOE 120L	Marine Botany Laboratory	2
BIOE 122	Invertebrate Zoology	5
BIOE 122L	Invertebrate Zoology Laboratory	2
BIOE 127	Ichthyology	5
BIOE 127L	Ichthyology Laboratory	2
BIOE 128L	Large Marine Vertebrates Field Course	5
BIOE 129	Biology of Marine Mammals	5
BIOE 129L	Biology of Marine Mammals Laboratory	2
BIOE 137	Molecular Ecology	5
BIOE 141L	Behavioral Ecology Field Course	5
BIOE 145	Plant Ecology	5
BIOE 145L	Field Methods in Plant Ecology	5
BIOE 150L	Ecological Field Methods Laboratory	5
BIOE 151B	Ecology and Conservation in Practice Supercourse: Ecological Field Methods Laboratory	5
BIOE 153C	Disciplinary Communication for Biologists	5
BIOE 158L	Marine Ecology Laboratory	5
BIOE 159A	Marine Ecology Field Quarter: Marine Ecology with	5

	Laboratory	
BIOE 161L	Kelp Forest Ecology Laboratory	5
BIOE 171	Disciplinary Communication for Biologists	5
BIOE 172	Population Genetics	5
BIOE 172L	Population Genetics Laboratory	2

For 2-credit BIOE lab courses taken concurrently with 5-credit lectures, both courses must be passed to receive one half of the DC requirement.

4th (senior)	PHYS 6A & PHYS 6L	STAT 5 OR STAT 7 & STAT 7L	Laboratory
	UD elective	PHYS 6B OR PHYS 6C	

For the BIOL option, choose one course from this group:

BIOL 103L	Toxic RNA Laboratory III	5
BIOL 105L	Eukaryotic Genetics Laboratory	5
BIOL 109L	Yeast Molecular Genetics Laboratory	5
BIOL 115L	Eukaryotic Molecular Biology Laboratory	5
BIOL 120L	Development Laboratory	5
BIOL 121L	Environmental Phage Biology Laboratory	5

The following general education requirements will be fulfilled by the major requirements listed in the above planner: MR, SI, and SR. In addition to the GE requirements satisfied by the above courses, a student will also need to complete courses satisfying the CC, ER, IM, TA, PE, and PR general education requirements.

Sample Biology B.S. Transfer Two-Year Planner

Additional transfer students sample planners

Comprehensive Requirement

All majors have a comprehensive requirement. For the Biology B.S., this requirement is satisfied via the completion of the above laboratory requirement.

Planners

Sample Biology B.S. Frosh Four-Year Planner

Additional freshmen sample planners

	Fall	Winter	Spring
1st (frosh)	CHEM 1A	CHEM 1B	CHEM 1C & CHEM 1N
	MATH 11A	MATH 11B	BIOL 20A
2nd (soph)	BIOE 20B & BIOL 20L	BIOL 100	BIOL 101 & BIOL 101L
	CHEM 8A & CHEM 8L	CHEM 8B	BIOL 105
3rd (junior)	BIOL 110	UD elective	UD elective
	BIOE 20C	BIOE 107	BIOE 109

	Fall	Winter	Spring
3rd (junior)	BIOL 100	BIOL 105	BIOL 101 & BIOL 101L
	PHYS 6A & PHYS 6L	PHYS 6B or PHYS 6C	BIOE 107
4th(senior)	BIOL 110	UD elective	UD elective
	BIOE 109	Laboratory	UD elective

This planner assumes that a student has completed all UC Transfer Pathway courses:

- General biology with lab (full introductory sequence) BIOL 20A, BIOE 20B, BIOL 20L, BIOE 20C
- General chemistry with lab (one-year sequence) CHEM 1A, CHEM 1B & CHEM 1M and CHEM 1C & CHEM 1N
- Calculus for STEM majors (one-year sequence) MATH 11A and 11B
- Organic chemistry (full sequence with lab) CHEM 8A & CHEM 8L and CHEM 8B

HUMAN BIOLOGY B.S.

Information and Policies

Introduction

The B.S. major in human biology is designed for students interested in careers in healthcare or biomedical research. Medical and professional school admissions requirements vary; students should verify that their coursework will satisfy the admissions requirements of the programs to which they plan to apply. Students are required to take introductory biology and laboratory (BIOL 20L), genetics, biochemistry, molecular biology, cell biology, human physiology with laboratory and additional courses directly relevant to human health. As a unique feature of this program, students must also fulfill Spanish-language and health-care internship requirements. With proper advance planning, a student with virtually any degree can prepare a competitive application for medical school or health care professional school. Check our Health Careers webpage for more information on how you can academically prepare for a career in health care. Additional information is available at the UCSC Career Center.

Academic Advising for the Program

Students should take full advantage of academic advising and should keep in frequent contact with the advisers to stay informed about late announcements of courses, changes in scheduling, and opportunities for special study. Transfer students should also consult the Transfer Information and Policy Section. For additional advice and information:

MCD Advising
142 Jack Baskin Engineering
mcdadvising@ucsc.edu

Getting Started in the Major

Prerequisites

Due to the demanding nature of the major, students must begin their science coursework as early as possible. CHEM 1A, CHEM 1B and CHEM 1C, and BIOL 20A, BIOE 20B, and BIOL 20L must be taken during the first and second years in order for students to qualify for admission to MCD biology-sponsored majors, biology B.S., molecular, cell and developmental biology B.S. and neuroscience B.S. majors. Students are strongly encouraged to take STAT 5 or STAT 7/STAT 7L and begin, if not complete, other requirements including calculus. For an overview of prerequisites and getting started in the major, please visit our Human Biology B.S. site.

An online mathematics placement examination is required to enroll in a math course. Biological science majors are expected to take this examination and are encouraged to work in the learning modules until they place into calculus. For more information see the mathematics placement website.

Students intending to major in human biology should take the Spanish placement examination, offered by the language program, to determine the level at which they should begin the Spanish sequence.

Program Learning Outcomes

Students who successfully complete the human biology major will be able to:

- Demonstrate knowledge of how biochemistry, genetics and molecular biology are used to elucidate both the function of cells and their organization into tissues;
- Recognize that biology has a basis in chemistry, physics, and mathematics;
- Describe how scientific method is used to explain natural phenomena;
- Use effective oral and written language skills to communicate scientific data and ideas;
- Understand safe laboratory practices, perform basic molecular biology techniques, generate hypotheses and evaluate data;
- Achieve fluency in Spanish and an understanding of how cultural differences can affect health care delivery;
- Refine a career-related and/or postgraduate goal through internship experience; and
- Present advanced knowledge in the specialized field of human physiology.

Major Qualification Policy and Declaration Process

Major Qualification

The Department of Molecular Cell and Developmental Biology has a separate qualification policy that applies to the human biology B.S. major.

To qualify for the human biology major, students must pass the following courses or their equivalents with a grade of C+ or better in each course:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1C	General Chemistry	5
BIOL 20A	Cell and Molecular Biology	5
BIOL 20L	Experimental Biology Laboratory	2
BIOE 20B	Development and Physiology	5

All qualification courses must be completed by the campus major declaration deadline.

Students with two or more grades of NP, C-, D+, D, D-, or F in the policy courses are not qualified to declare.

When assessing qualification:

- All courses must be taken for a letter grade, see Letter Grade Policy.
- Students with AP credit for BIOL 20A, BIOE 20B, and/or CHEM 1A, need only pass the remaining qualification policy courses with grades of C+ or better.

- Students with grades of I or IP in any of the policy courses will not be eligible to declare until a grade has been assigned.
- Every student who satisfies the major qualification requirements and who petitions to declare the major by the campus major declaration deadline (i.e. before enrolling in their 3rd year or the equivalent) will be admitted to the major. Students enrolled in their final qualification policy course at the major declaration deadline may submit the petition, but will not be declared until satisfactory grades have been posted. Students who satisfy the major admission requirements, but who petition to declare the major after the campus major declaration deadline will be considered on a case-by-case basis for admission to the major; admission is not guaranteed.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the Molecular Cell and Developmental Biology faculty adviser within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student and their college of the decision. See our appeal process for more information.

How to Declare a Major

You may declare a major as early as you would like, if you have decided which major to pursue and have satisfied prerequisites or qualification requirements (if any) for the major. Students who enter UCSC as frosh are required to be formally declared in a major before enrolling in their third year (or equivalent). Upper division transfer students must complete the major qualification courses before entering UCSC.

Each major/minor advising office has a process for declaring. To initiate the process to declare, please complete the online declaration petition located on the Department of MCD Biology website. For assistance, please contact MCD Biology Advising at mcdadvising@ucsc.edu.

Transfer Information and Policy

Transfer and Admission Screening Policy

MCD Biology encourages applications from transfer students in the biological sciences. In fall 2012 the department established a Major Qualification Policy that limits access to the program to those students who have successfully completed a subset of foundational coursework. Transfer students are held to similar criteria when being assessed for admission to UC Santa Cruz as an MCD-sponsored major. See qualifying for the major as a transfer applicant for more information.

To be considered for admission as a proposed major in human biology B.S., transfer students must complete courses equivalent to CHEM 1A, CHEM 1B, CHEM 1C, BIOL 20A,

and BIOE 20B with a grade of C+ or better in each course prior to transfer.

In addition to the required coursework for admission, students should complete courses equivalent to the lower-division calculus (MATH 11A or 19A and MATH 11B or 19B; statistics (STAT 5 or STAT 7 and STAT 7L and organic chemistry (CHEM 8A, CHEM 8B and CHEM 8L) requirements. Students who transfer without having completed these recommended courses may have difficulty enrolling in courses and may require more than two years to complete their MCD-sponsored degree. Students are also encouraged to complete all general education requirements prior to transfer. Please see our preparing to transfer as an MCD major for more complete information.

Getting Started at UCSC as a Transfer Student

Transfer students who have met the major qualification requirements are encouraged to declare the major immediately upon arrival. Students who are proposed in a different major and have advanced standing when they come to UC Santa Cruz require permission from the department to change into the major. Admission to the major is not guaranteed.

Transfer students should complete the required courses in genetics (BIOL 105), biochemistry (BIOL 100) and molecular biology (BIOL 101) by the end of their first year at UCSC since they are prerequisites for the majority of other required courses.

Transfer students should take the Spanish placement exam upon arrival. We encourage transfer students to complete the required Spanish courses (including SPAN 5M) before the fall of their second year.

Letter Grade Policy

All courses that are taken to satisfy any major requirement must be taken for a letter grade.

Course Substitution Policy

At least half of the upper-division courses (numbered Biology 100–Biology 190) required for the major must be taken through the biological sciences program at UC Santa Cruz, not as transfer credits from another department or institution. If a student plans to transfer to UCSC from another institution, the student is advised to contact a MCD Biology Department adviser at UC Santa Cruz before enrolling in upper-division courses at the student's institution or any institution other than UCSC. This advising will help students understand the limitation of transferring upper-division courses from other institutions to UCSC. For more information on transferring courses to UC Santa Cruz, please consult the undergraduate website.

Once matriculated, a student must receive permission from the department to satisfy the BIOL 20A, BIOL 100, BIOL 105, BIOL 101 or BIOL 110 requirements with courses taken at other institutions. Students who wish to receive credit toward the major for these or other courses taken either at UCSC or at another institution should contact a department adviser.

Double Majors and Major/Minor Combinations Policy

Students interested in pursuing multiple majors within the biological sciences may NOT declare the following combination of majors:

- Biology (B.A., B.S., or minor) AND any other biological sciences major
- Any combination of the following: Human Biology; Molecular, Cell and Developmental Biology; Neuroscience; or Biochemistry and Molecular Biology

Should a student choose to double major, they must qualify for and complete the Disciplinary Communication and comprehensive requirements for each of the majors.

Study Abroad

The UC Education Abroad Program (EAP) offers qualified students unique opportunities to broaden their educational horizons. The MCDB Department encourages interested students to participate. Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

Students interested in study abroad need to get an early start on their basic science requirements, including chemistry, mathematics, and introductory biology and must declare their major prior to applying to go abroad. Visit the EAP office as soon as possible to begin planning; you must seek advice about your EAP plan for major courses at UC Santa Cruz from a department adviser and/or faculty adviser and receive their approval for your plans.

Honors

Honors in the majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

Medical and Professional School Admission

Medical and professional school admissions requirements vary; students should verify that their coursework will satisfy the admissions requirements of the programs to which they plan to apply.

Requirements and Planners

Course Requirements

Lower-Division Courses

All of the following courses:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOL 20L	Experimental Biology Laboratory	2

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1M	General Chemistry Laboratory	2
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2
CHEM 8A	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8B	Organic Chemistry	5
CHEM 8M	Organic Chemistry Laboratory	2

BIOL 20L is waived for junior transfer students.

Note: CHEM 109 is also recommended for pre-med students.

Plus one of the following options:

Either these courses

MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5

or these courses

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Plus one of the following options:

Either this course

STAT 5	Statistics	5
--------	------------	---

or these courses

STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Plus one of the following options:

Either these courses

PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1

PHYS 6B	Introductory Physics II	5
---------	-------------------------	---

or these courses

PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1

PHYS 6C	Introductory Physics III	5
---------	--------------------------	---

or these courses

PHYS 7A	Elementary Physics I	5
PHYS 7B	Elementary Physics II	5
PHYS 6L	Introductory Physics Laboratory	1

Note: PHYS 7A/PHYS 7B and PHYS 6L may not satisfy the physics prerequisite for admission to all medical schools; be sure to check the requirements at all schools where you wish to apply.

Language Requirement:

SPAN 1-SPAN 4 or the equivalent and one quarter of Spanish for health-care workers (SPAN 5M).

Upper-Division Courses**Choose one of the following options:**

Either these courses

BIOL 100	Biochemistry	5
BIOL 101	Molecular Biology	5

or these courses

BIOC 100A	Biochemistry and Molecular Biology	5
BIOC 100B	Biochemistry and Molecular Biology	5
BIOC 100C	Biochemistry and Molecular Biology	5

Students who complete the BIOC 100A/BIOC 100B/BIOC 100C sequence can use BIOC 100C to satisfy an upper-division elective.

Plus all of the following courses:

BIOL 105	Genetics	5
BIOL 110	Cell Biology	5
BIOL 130	Human Physiology	5
BIOL 130L	Human Physiology Laboratory	2

Internship Requirement:

BIOL 189	Health Sciences Internship	3
BIOL 189W	Disciplinary Communication: Human Biology	2

The student must participate in a community health-care service activity approved by the health sciences internship coordinator. Credit may be earned over multiple quarters.

Electives

Two upper-division electives chosen from the following (only one of which may be a 3-credit course: BIOL 112, 116 or 117).

BIOC 100C	Biochemistry and Molecular Biology	5
BIOL 133	Exercise Physiology	5
BIOE 133L	Exercise Physiology Laboratory	2
BIOL 111A	Immunology I	5
BIOL 111B	Immunology II	5
BIOL 112	Virology	3
BIOL 114	Cancer Cell Biology	5
BIOL 115	Eukaryotic Molecular Biology	5
BIOL 116	Advanced Topics in Cell Biology	3
BIOL 117	Global Health and Neglected Diseases	3
BIOL 120	Developmental Biology	5
BIOL 125	Introduction to Neuroscience	5
BIOL 126	Advanced Molecular Neuroscience	5
BIOL 127	Mechanisms of	5

	Neurodegenerative Disease	
BIOL 128	Developmental Neurobiology	5
BIOL 140	The RNA World	5
BIOL 188	A Life in Medicine	3
BME 130	Genomes	5
BME 178	Stem Cell Biology	5
CMMU 163	Health Care Inequalities	5
METX 119	Microbiology	5
METX 135	Functional Anatomy	5
METX 135L	Functional Anatomy Lab	2
PHYS 180	Biophysics	5

Note: Lecture/lab combinations count as one course.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in human biology is satisfied by completing the following courses:

BIOL 130L	Human Physiology Laboratory	2
BIOL 189	Health Sciences Internship	3
BIOL 189W	Disciplinary Communication: Human Biology	2

Comprehensive Requirement

All majors have a comprehensive requirement. For the Human Biology B.S., this requirement can be satisfied by receiving a passing grade in the Health Sciences Internship, BIOL 189.

Planners**Sample Human Biology B.S. Frosh Four-Year Planner**

Frosh sample planners.

	Fall	Winter	Spring
1st (frosh)	CHEM 1A	CHEM 1B & CHEM 1M	CHEM 1C & CHEM 1N
	MATH 11A	MATH 11B	BIOL 20A
2nd (soph)	BIOE 20B	BIOL 100	BIOL 101
	BIOL 20L	CHEM 8B & CHEM 8M	BIOL 105
	CHEM 8A & CHEM 8L		
3rd (junior)	BIOL 110	BIOL 130 & BIOL 130L	PHYS 6A & PHYS 6L

	SPAN 1	SPAN 2	SPAN 3
	STAT 5 or STAT 7 & STAT 7L		UD elective
4th (senior)	Upper- division elective	PHYS 6B OR PHYS 6C	BIOL 189
	SPAN 4	SPAN 5M	BIOL 189W

The following general education requirements will be fulfilled by the major requirements listed in the above planner: MR, SI, SR, CC. In addition to the GE requirements satisfied by the above courses, a student will also need to complete courses satisfying the ER, IM, TA, PE, and PR general education requirements.

Sample Human Biology B.S. Transfer Two-Year Planner

Transfer students sample planners.

	Fall	Winter	Spring
3rd (junior)	BIOL 100	BIOL 105	BIOL 101
	PHYS 6A & PHYS 6L	PHYS 6B or PHYS 6C	SPAN 3
	SPAN 1	SPAN 2	
4th (senior)	BIOL 110	BIOL 130 & BIOL 130L	Upper- division elective
	Upper- division elective	SPAN 5M	BIOL 189
	SPAN 4		BIOL 189W

This planner assumes that a student has completed all UC Transfer Pathway courses:

- General biology with lab (full introductory sequence) BIOL 20A, BIOE 20B, BIOL 20L
- General chemistry with lab (one-year sequence) CHEM 1A, CHEM 1B & CHEM 1M and CHEM 1C & CHEM 1N

- Calculus for STEM majors (one-year sequence) MATH 11A and MATH 11B

- Organic chemistry (full sequence with lab) CHEM 8A & CHEM 8L and CHEM 8B & CHEM 8M

MOLECULAR, CELL, AND DEVELOPMENTAL BIOLOGY B.S.

Information and Policies

Introduction

The molecular, cell, and developmental (MCD) biology major is designed to prepare students for rigorous graduate programs in biomedical research, medical and other healthcare professional programs, for careers in the biotechnology industry. This major is more structured than the general biology major and requires that students pay careful attention to the prerequisites required for upper-division biology courses. With proper advance planning, a student with virtually any degree can prepare a competitive application for medical school or healthcare professional school. Check our Health Careers webpage for more information on how you can academically prepare for a career in healthcare. Additional information is available at the UC Santa Cruz Career Center.

Academic Advising for the Program

Students should take full advantage of academic advising and should keep in frequent contact with the advisers to stay informed about late announcements of courses, changes in scheduling, and opportunities for special study. Transfer students should also consult the Transfer Information and Policy Section. For additional advice and information:

MCD Advising
142 Jack Baskin Engineering
mcdadvising@ucsc.edu

Getting Started in the Major

Prerequisites

Due to the demanding nature of the majors, students must begin their science coursework as early as possible. CHEM 1A, CHEM 1B and CHEM 1C, and BIOL 20A, BIOE 20B, and BIOL 20L must be taken during the first and second years in order for students to qualify for admission to MCD biology-sponsored majors, including the biology B.S., human biology B.S., molecular, cell and developmental biology B.S. and neuroscience B.S. majors. Students are strongly encouraged to take STAT 5 or STAT 7/STAT 7L and begin, if not complete, other requirements including calculus. For an overview of prerequisites and getting started in the major, please visit our MCD Biology B.S. website.

An online mathematics placement examination is required to enroll in a math course. Biological science majors are expected to take this examination and are encouraged to work in the learning modules until they place into calculus. For more information see the mathematics placement website.

Program Learning Outcomes

Students who successfully complete the MCD major will be able to:

- Demonstrate knowledge of how biochemistry, genetics and molecular biology are used to elucidate both the function of cells and their organization into tissues;
- Recognize that biology has a basis in chemistry, physics, and mathematics;
- Describe how scientific method is used to explain natural phenomena;
- Use effective oral and written language skills to communicate scientific data and ideas;
- Understand safe laboratory practices and perform basic molecular biology techniques;
- Generate hypotheses, evaluate data, and design experiments to investigate a scientific problem; and
- Present advanced knowledge in the specialized fields of molecular and cell biology.

Major Qualification Policy and Declaration Process

Major Qualification

The Department of Molecular Cell and Developmental Biology has a qualification policy that applies to the biology B.S., molecular, cell and developmental biology B.S., and neuroscience B.S. majors.

To qualify for any of these majors, students must pass (with a grade of C or better) the following courses or their equivalents:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1C	General Chemistry	5
BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOL 20L	Experimental Biology Laboratory	2

All qualification courses must be completed by the campus major declaration deadline.

Students with two or more grades of NP, C-, D+, D, D-, or F in the policy courses are not qualified to declare.

When assessing qualification:

- All courses must be taken for a letter grade, see Letter Grade Policy.
- Students with AP credit for BIOL 20A, BIOE 20B, and/or CHEM 1A, need only pass the remaining qualification policy courses.
- Students with grades of I or IP in any of the policy courses will not be eligible to declare until a grade has been assigned.

- Every student who satisfies the major qualification requirements and who petitions to declare the major by the campus major declaration deadline (i.e., before enrolling in their 3rd year or the equivalent) will be admitted to the major. Students enrolled in their final qualification policy course at the major declaration deadline may submit the petition, but will not be declared until satisfactory grades have been posted. Students who satisfy the major admission requirements, but who petition to declare the major after the campus major declaration deadline will be considered on a case-by-case basis for admission to the major; admission is not guaranteed.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the Molecular Cell and Developmental Biology faculty adviser within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student and their college of the decision. See our appeal process for more information.

How to Declare a Major

You may declare a major as early as you would like, if you have decided which major to pursue and have satisfied prerequisites or qualification requirements (if any) for the major. Students who enter UCSC as frosh are required to be formally declared in a major before enrolling in their third year (or equivalent). Upper-division transfer students must complete the major qualification courses before entering UCSC.

Each major/minor advising office has a process for declaring. To initiate the process to declare, please complete the online declaration petition located on the Department of MCD Biology website. For assistance, please contact MCD biology advising at mcdadvising@ucsc.edu.

Transfer Information and Policy

Transfer Admission Screening Policy

MCD Biology encourages applications from transfer students in the biological sciences. In fall 2012 the department established a Major Qualification Policy that limits access to the program to those students who have successfully completed a subset of foundational coursework. Transfer students are held to similar criteria when being assessed for admission to UC Santa Cruz as an MCD-sponsored major. See qualifying for the major as a transfer applicant for more information.

To be considered for admission as a proposed major in molecular, cell, and developmental biology B.S., transfer students must complete courses equivalent to CHEM 1A, CHEM 1B, CHEM 1C, BIOL 20A, and BIOE 20B with a grade of C or better in each course.

In addition to the required coursework for admission, students should complete courses equivalent to the lower-division calculus (MATH 11A or 19A and MATH 11B or

19B; statistics (STAT 5 or STAT 7 and STAT 7L and organic chemistry (CHEM 8A, CHEM 8B and CHEM 8L) requirements. Students who transfer without having completed these recommended courses may have difficulty enrolling in courses and may require more than two years to complete their MCD-sponsored degree. Students are also encouraged to complete all general education requirements prior to transfer. Please see our preparing to transfer as an MCD major for more complete information.

Getting Started at UCSC as a Transfer Student

Transfer students who have met the major qualification requirements are encouraged to declare the major immediately upon arrival. Students who are proposed in a different major and have advanced standing when they come to UC Santa Cruz require permission from the department to change into the major. Admission to the major is not guaranteed.

Transfer students should complete the required courses in genetics (BIOL 105), biochemistry (BIOL 100) and molecular biology (BIOL 101 and BIOL 101L) by the end of their first year at UCSC since they are prerequisites for the majority of other required courses.

Letter Grade Policy

All courses that are taken to satisfy any major requirement must be taken for a letter grade.

Course Substitution Policy

At least half of the upper-division courses (numbered BIOL 100–BIOL 190) required for the major must be taken through the biological sciences program at UC Santa Cruz, not as transfer credits from another department or institution. If a student plans to transfer to UC Santa Cruz from another institution, the student is advised to contact a MCD Biology Department adviser at UC Santa Cruz before enrolling in upper-division courses at the student's institution or any institution other than UCSC. This advising will help students understand the limitation of transferring upper-division courses from other institutions to UCSC. For more information on transferring courses to UC Santa Cruz, please consult the undergraduate website.

Once matriculated, a student must receive permission from the department to satisfy the BIOL 20A, BIOL 100, BIOL 105, BIOL 101 or BIOL 110 requirements with courses taken at other institutions. Students who wish to receive credit toward the major for these or other courses taken either at UC Santa Cruz or at another institution should contact a department adviser.

Double Majors and Major/Minor Combinations Policy

Students interested in pursuing multiple majors within the biological sciences may NOT declare the following combination of majors:

- Biology (B.A., B.S., or minor) AND any other biological sciences major

- Any combination of the following: Human Biology; Molecular, Cell and Developmental Biology; Neuroscience; or Biochemistry and Molecular Biology

Should a student choose to double major, they must qualify for and complete the disciplinary communication and comprehensive requirements for each of the majors.

Study Abroad

The UC Education Abroad Program (EAP) offers qualified students unique opportunities to broaden their educational horizons. The MCDDB Department encourages interested students to participate. Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

Students interested in study abroad need to get an early start on their basic science requirements, including chemistry, mathematics, and introductory biology and must declare their major prior to applying to go abroad. Visit the EAP office as soon as possible to begin planning; you must seek advice about your EAP plan for major courses at UC Santa Cruz from a department adviser and/or faculty adviser and receive their approval for your plans.

Honors

Honors in the majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

Medical and Professional School Admission

Medical and professional school admissions requirements vary; students should verify that their coursework will satisfy the admissions requirements of the programs to which they plan to apply.

Requirements and Planners

Course Requirements

Lower-Division Courses

All of the following courses:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOL 20L	Experimental Biology Laboratory	2
BIOE 20C	Ecology and Evolution	5
CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2
CHEM 8A	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8B	Organic Chemistry	5

BIOL 20L is waived for junior transfer students

Plus one of the following options:

Either these courses			
MATH 11A	Calculus with Applications	5	
MATH 11B	Calculus with Applications	5	
or these courses			
MATH 19A	Calculus for Science, Engineering, and Mathematics	5	
MATH 19B	Calculus for Science, Engineering, and Mathematics	5	

Plus one of the following options:

Either this course			
STAT 5	Statistics	5	
or these courses			
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5	
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2	

Plus one of the following options:

Either these courses			
PHYS 6A	Introductory Physics I	5	
PHYS 6L	Introductory Physics Laboratory	1	
PHYS 6B	Introductory Physics II	5	
or these courses			
PHYS 6A	Introductory Physics I	5	
PHYS 6L	Introductory Physics Laboratory	1	
PHYS 6C	Introductory Physics III	5	
or these courses			
PHYS 7A	Elementary Physics I	5	
PHYS 7B	Elementary Physics II	5	
PHYS 6L	Introductory Physics Laboratory	1	

Note: PHYS 7A/PHYS 7B and PHYS 6L may not satisfy the physics prerequisite for admission to all medical schools; be sure to check the requirements at all schools where you wish to apply.

Upper-Division Courses**Choose one of the following options:**

Either these courses			
BIOL 100	Biochemistry	5	
BIOL 101	Molecular Biology	5	
or these courses			
BIOC 100A	Biochemistry and Molecular Biology	5	
BIOC 100B	Biochemistry and Molecular	5	

BIOC 100C	Biology Biochemistry and Molecular Biology	5
-----------	--	---

Students who complete the BIOC 100A/BIOC 100B/BIOC 100C sequence can use BIOC 100C to satisfy an upper-division elective.

Plus one of the following courses:

BIOL 101L	Molecular Biology Laboratory	2
BIOL 102L	Toxic RNA Laboratory I	5

Plus all of the following courses:

BIOL 105	Genetics	5
BIOL 110	Cell Biology	5

Electives

At least three elective courses from the following list (only one of which may be a 3-credit course: BIOL 112, 116 or 117):

BIOL 111A	Immunology I	5
BIOL 111B	Immunology II	5
BIOL 112	Virology	3
BIOL 114	Cancer Cell Biology	5
BIOL 115	Eukaryotic Molecular Biology	5
BIOL 116	Advanced Topics in Cell Biology	3
BIOL 117	Global Health and Neglected Diseases	3
BIOL 120	Developmental Biology	5
BIOL 125	Introduction to Neuroscience	5
BIOL 126	Advanced Molecular Neuroscience	5
BIOL 127	Mechanisms of Neurodegenerative Disease	5
BIOL 128	Developmental Neurobiology	5
BIOL 130	Human Physiology	5
BIOL 140	The RNA World	5
BIOC 100C	Biochemistry and Molecular Biology	5
BIOE 109	Evolution	5
BIOE 135	Plant Physiology	5
BIOE 135L	Plant Physiology Laboratory	2
BME 110	Computational Biology Tools	5
BME 130	Genomes	5
BME 160	Research Programming in the Life Sciences	6
BME 178	Stem Cell Biology	5
METX 119	Microbiology	5
PHYS 180	Biophysics	5

One of the following laboratory courses:

BIOL 100L	Biochemistry Laboratory	5
BIOL 103L	Toxic RNA Laboratory III	5
BIOL 105L	Eukaryotic Genetics Laboratory	5
BIOL 109L	Yeast Molecular Genetics Laboratory	5
BIOL 115L	Eukaryotic Molecular Biology Laboratory	5

BIOL 120L	Development Laboratory	5
BIOL 121L	Environmental Phage Biology Laboratory	5
BIOL 186L	Undergraduate Research in MCD Biology	5
METX 119L	Microbiology Laboratory	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in molecular, cell, and developmental biology is satisfied by completing one of the following courses:

BIOL 100L	Biochemistry Laboratory	5
BIOL 103L	Toxic RNA Laboratory III	5
BIOL 105L	Eukaryotic Genetics Laboratory	5
BIOL 109L	Yeast Molecular Genetics Laboratory	5
BIOL 115L	Eukaryotic Molecular Biology Laboratory	5
BIOL 120L	Development Laboratory	5
BIOL 121L	Environmental Phage Biology Laboratory	5
BIOL 186L	Undergraduate Research in MCD Biology	5
METX 119L	Microbiology Laboratory	5

2nd (soph)

BIOE 20B	BIOL 100	BIOL 101
BIOL 20L	CHEM 8B	BIOL 101L
CHEM 8A & CHEM 8L		BIOL 105

3rd (jr)

BIOL 110	Upper-division elective	Upper-division elective
STAT 5 OR STAT 7 & STAT 7L	PHYS 6A & PHYS 6L	PHYS 6B OR PHYS 6C

4th (sr)

Upper-division elective	Lab
BIOE 20C	

Comprehensive Requirement

All majors have a comprehensive requirement. For the MCD Biology B.S., this requirement can be satisfied by receiving a passing grade in an independent research laboratory:

Choose one of the following courses:

BIOL 100L	Biochemistry Laboratory	5
BIOL 103L	Toxic RNA Laboratory III	5
BIOL 105L	Eukaryotic Genetics Laboratory	5
BIOL 109L	Yeast Molecular Genetics Laboratory	5
BIOL 115L	Eukaryotic Molecular Biology Laboratory	5
BIOL 120L	Development Laboratory	5
BIOL 121L	Environmental Phage Biology Laboratory	5
BIOL 186L	Undergraduate Research in MCD Biology	5
METX 119L	Microbiology Laboratory	5

The following general education requirements will be fulfilled by the major requirements listed in the above planner: MR, SI, and SR. In addition to the general education requirements satisfied by the above courses, a student will also need to complete courses satisfying the CC, ER, IM, TA, PE, and PR general education requirements.

Sample Transfer Two-Year Planner

MCD Biology B.S. Transfer student sample planners.

	Fall	Winter	Spring
3rd (jr)	BIOL 100	BIOL 105	BIOL 101
	PHYS 6A & PHYS 6L	PHYS 6B or PHYS 6C	BIOL 101L

MCD Biology B.S. Frosh sample planners.

	Fall	Winter	Spring
1st (frosh)	CHEM 1A	CHEM 1B	CHEM 1C & CHEM 1N
	MATH 11A	MATH 11B	BIOL 20A

Upper-division elective	Lab
-------------------------	-----

This planner assumes that a student has completed all UC Transfer Pathway courses

- General biology with lab (full introductory sequence) BIOL 20A, BIOE 20B, BIOL 20L, BIOE 20C
- General chemistry with lab (one-year sequence) CHEM 1A, 1B & CHEM 1M and 1C & CHEM 1N
- Calculus for STEM majors (one-year sequence) MATH 11A and 11B
- Organic chemistry (full sequence with lab) CHEM 8A & CHEM 8L and CHEM 8B

NEUROSCIENCE B.S.

Information and Policies

Introduction

Neuroscience, the study of the nervous system and behavior of animals, is a frontier area in biology, touching psychology on the one hand and computer science on the other. The neuroscience major provides students with rigorous preparation for graduate studies and research in the field of neuroscience. With proper advance planning, a student with virtually any degree can prepare a competitive application for medical school or health care professional school. Check our Health Careers webpage for more information on how you can academically prepare for a career in healthcare. Additional information is available at the UC Santa Cruz Career Center.

Academic Advising for the Program

Students should take full advantage of academic advising and should keep in frequent contact with the advisers to stay informed about late announcements of courses, changes in scheduling, and opportunities for special study. Transfer students should also consult the Transfer Information and Policy Section. For additional advice and information:

MCD Advising
142 Jack Baskin Engineering
mcdadvising@ucsc.edu

Getting Started in the Major

Prerequisites

Due to the demanding nature of the major, students must begin their science coursework as early as possible. CHEM 1A, CHEM 1B and CHEM 1C, and BIOL 20A, BIOE 20B, and BIOL 20L must be taken during the first and second years in order for students to qualify for admission to MCD Biology-sponsored majors, including the biology bachelor of science (B.S.), human biology B.S., molecular, cell and developmental biology B.S. and neuroscience B.S. majors. Students are strongly encouraged to take STAT 5 or STAT 7/STAT 7L and begin, if not complete, other requirements including calculus. For an overview of prerequisites and getting started in the major, please visit our Neuroscience B.S. site.

An online mathematics placement examination is required to enroll in a math course. Biological science majors are expected to take this examination and are encouraged to work in the learning modules until they place into calculus. For more information see the mathematics placement website.

Program Learning Outcomes

Students who successfully complete the Neuroscience major will be able to:

- Demonstrate knowledge of how biochemistry, genetics and molecular biology are used to elucidate both the function of cells and their organization into tissues.
- Recognize that biology has a basis in chemistry, physics, and mathematics.
- Describe how scientific method is used to explain natural phenomena.
- Use effective oral and written language skills to communicate scientific data and ideas.
- Understand safe laboratory practices and perform basic molecular biology techniques.
- Generate hypotheses, evaluate data, and design experiments to investigate a scientific problem.
- Present advanced knowledge in the specialized field of neuroscience.

Major Qualification Policy and Declaration Process

Major Qualification

The Department of Molecular Cell and Developmental Biology has a qualification policy that applies to the biology B.S., molecular, cell and developmental biology B.S., and neuroscience B.S. majors.

To qualify for any of these majors, students must pass (with a grade of C or better) the following courses or their equivalents:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1C	General Chemistry	5
BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOL 20L	Experimental Biology Laboratory	2

All qualification courses must be completed by the campus major declaration deadline.

Students with two or more grades of NP, C-, D+, D, D-, or F in the policy courses are not qualified to declare.

When assessing qualification:

- All courses must be taken for a letter grade, see Letter Grade Policy.

- Students with AP credit for BIOL 20A, BIOE 20B, and/or CHEM 1A, need only pass the remaining qualification policy courses.
- Students with grades of I or IP in any of the policy courses will not be eligible to declare until a grade has been assigned.
- Every student who satisfies the major qualification requirements and who petitions to declare the major by the campus major declaration deadline (i.e., before enrolling in their 3rd year or the equivalent) will be admitted to the major. Students enrolled in their final qualification policy course at the major declaration deadline may submit the petition, but will not be declared until satisfactory grades have been posted. Students who satisfy the major admission requirements, but who petition to declare the major after the campus major declaration deadline will be considered on a case-by-case basis for admission to the major; admission is not guaranteed.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the Molecular Cell and Developmental Biology faculty adviser within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student and their college of the decision. See our appeal process for more information.

How to Declare a Major

You may declare a major as early as you would like, if you have decided which major to pursue and have satisfied prerequisites or qualification requirements (if any) for the major. Students who enter UC Santa Cruz as frosh are required to be formally declared in a major before enrolling in their third year (or equivalent). Upper-division transfer students must complete the major qualification courses before entering UCSC.

Each major/minor advising office has a process for declaring. To initiate the process to declare, please complete the online declaration petition located on the Department of MCD Biology website. For assistance, please contact MCD Biology Advising at mcdadvising@ucsc.edu.

Transfer Information and Policy

Transfer Admission Screening Policy

MCD Biology encourages applications from transfer students in the biological sciences. In fall 2012 the department established a Major Qualification Policy that limits access to the program to those students who have successfully completed a subset of foundational coursework. Transfer students are held to similar criteria when being assessed for admission to UC Santa Cruz as an MCD-sponsored major. See qualifying for the major as a transfer applicant for more information.

To be considered for admission as a proposed major in neuroscience B.S., transfer students must complete courses equivalent to CHEM 1A, CHEM 1B, CHEM 1C, BIOL 20A, and BIOE 20B with a grade of C or better in each course.

In addition to the required coursework for admission, students should complete courses equivalent to the lower-division calculus (MATH 11A or 19A and MATH 11B or 19B); statistics (STAT 5 or STAT 7 and STAT 7L); and organic chemistry (CHEM 8A, CHEM 8B and CHEM 8L) requirements. Students who transfer without having completed these recommended courses may have difficulty enrolling in courses and may require more than two years to complete their MCD-sponsored degree. Students are also encouraged to complete all general education requirements prior to transfer. Please see our preparing to transfer as an MCD major for more complete information.

Getting Started at UCSC as a Transfer Student

Transfer students who have met the major qualification requirements are encouraged to declare the major immediately upon arrival. Students who are proposed in a different major and have advanced standing when they come to UC Santa Cruz require permission from the department to change into the major. Admission to the major is not guaranteed.

Transfer students should complete the required courses in genetics (BIOL 105), biochemistry (BIOL 100) and molecular biology (BIOL 101 and BIOL 101L) by the end of their first year at UCSC since they are prerequisites for the majority of other required courses.

Letter Grade Policy

All courses that are taken to satisfy any major requirement must be taken for a letter grade.

Course Substitution Policy

At least half of the upper-division courses (numbered BIOL 100–BIOL 190) required for the major must be taken through the biological sciences program at UC Santa Cruz, not as transfer credits from another department or institution. If a student plans to transfer to UCSC from another institution, the student is advised to contact a MCD Biology Department adviser at UC Santa Cruz before enrolling in upper-division courses at the student's institution or any institution other than UCSC. This advising will help students understand the limitation of transferring upper-division courses from other institutions to UCSC. For more information on transferring courses to UC Santa Cruz, please consult the undergraduate website.

Once matriculated, a student must receive permission from the department to satisfy the BIOL 20A, BIOL 100, BIOL 105, BIOL 101 or BIOL 110 requirements with courses taken at other institutions. Students who wish to receive credit toward the major for these or other courses taken either at UC Santa Cruz or at another institution should contact a department adviser.

Double Majors and Major/Minor Combinations Policy

Students interested in pursuing multiple majors within the biological sciences may NOT declare the following combination of majors:

- Biology (B.A., B.S., or minor) AND any other biological sciences major
- Any combination of the following: Human Biology; Molecular, Cell and Developmental Biology; Neuroscience; or Biochemistry and Molecular Biology

Should a student choose to double major, they must qualify for and complete the disciplinary communication and comprehensive requirements for each of the majors.

Study Abroad

The UC Education Abroad Program (EAP) offers qualified students unique opportunities to broaden their educational horizons. The MCDB Department encourages interested students to participate. Many programs are in English-speaking countries or use English for advanced courses. Many programs offer small classes, extensive laboratories, and/or field research experience.

Students interested in study abroad need to get an early start on their basic science requirements, including chemistry, mathematics, and introductory biology and must declare their major prior to applying to go abroad. Visit the EAP office as soon as possible to begin planning; you must seek advice about your EAP plan for major courses at UC Santa Cruz from a department adviser and/or faculty adviser and receive their approval for your plans.

Honors

Honors in the majors are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above.

Medical and Professional School Admission

Medical and professional school admissions requirements vary; students should verify that their coursework will satisfy the admissions requirements of the programs to which they plan to apply.

Requirements and Planners

Course Requirements

Lower-Division Courses

All of the following courses:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOL 20L	Experimental Biology Laboratory	2

BIOE 20C	Ecology and Evolution	5
CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2
CHEM 8A	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8B	Organic Chemistry	5

BIOL 20L is waived for junior transfer students

Plus one of the following options:

Either these courses		
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
or these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Plus one of the following options:

Either this course		
STAT 5	Statistics	5
or these courses		
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Plus one of the following options:

Either these courses		
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 6C	Introductory Physics III	5
or these courses		
PHYS 7A	Elementary Physics I	5
PHYS 7B	Elementary Physics II	5
PHYS 6L	Introductory Physics Laboratory	1

Note: PHYS 7A/PHYS 7B and PHYS 6L may not satisfy the physics prerequisite for admission to all medical schools; be sure to check the requirements at all schools where you wish to apply.

Upper-Division Courses

Choose one of the following options:

Either these courses		
BIOL 100	Biochemistry	5
BIOL 101	Molecular Biology	5
or these		

courses

BIOC 100A	Biochemistry and Molecular Biology	5
BIOC 100B	Biochemistry and Molecular Biology	5
BIOC 100C	Biochemistry and Molecular Biology	5

Students who complete the BIOC 100A/BIOC 100B/BIOC 100C sequence can use BIOC 100C to satisfy an upper-division elective.

Plus one of the following courses:

BIOL 101L	Molecular Biology Laboratory	2
BIOL 102L	Toxic RNA Laboratory I	5

Plus all of the following courses:

BIOL 105	Genetics	5
BIOL 110	Cell Biology	5
BIOL 125	Introduction to Neuroscience	5
BIOL 126	Advanced Molecular Neuroscience	5

Electives

Students must complete three additional upper-division electives (5-7 credits each) chosen from the courses below. Two of the following electives (only one of which may be a 3-credit course: BIOL 112, BIOL 116 or BIOL 117):

Two of the following electives (only one of which may be a 3-credit course: BIOL 116 or BIOL 117):

NOTE: Lecture/lab combinations count as one course.

BIOE 131	Animal Physiology	5
BIOE 131L	Animal Physiology Laboratory	2
BIOL 111A	Immunology I	5
BIOL 111B	Immunology II	5
BIOL 112	Virology	3
BIOL 114	Cancer Cell Biology	5
BIOL 115	Eukaryotic Molecular Biology	5
BIOL 116	Advanced Topics in Cell Biology	3
BIOL 117	Global Health and Neglected Diseases	3
BIOL 120	Developmental Biology	5
BIOL 127	Mechanisms of Neurodegenerative Disease	5
BIOL 128	Developmental Neurobiology	5
BIOL 130	Human Physiology	5
BIOL 140	The RNA World	5
BIOC 100C	Biochemistry and Molecular Biology	5
BME 110	Computational Biology Tools	5
BME 130	Genomes	5
BME 160	Research Programming in the Life Sciences	6
BME 178	Stem Cell Biology	5
PHYS 180	Biophysics	5
PSYC 121	Perception	5
PSYC 123	Cognitive Neuroscience	5

One of the following laboratory electives:

BIOL 100L	Biochemistry Laboratory	5
BIOL 103L	Toxic RNA Laboratory III	5
BIOL 105L	Eukaryotic Genetics Laboratory	5
BIOL 109L	Yeast Molecular Genetics Laboratory	5
BIOL 115L	Eukaryotic Molecular Biology Laboratory	5
BIOL 120L	Development Laboratory	5
BIOL 121L	Environmental Phage Biology Laboratory	5
BIOL 186L	Undergraduate Research in MCD Biology	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in neuroscience is satisfied by completing one of the following:

BIOL 100L	Biochemistry Laboratory	5
BIOL 103L	Toxic RNA Laboratory III	5
BIOL 105L	Eukaryotic Genetics Laboratory	5
BIOL 109L	Yeast Molecular Genetics Laboratory	5
BIOL 115L	Eukaryotic Molecular Biology Laboratory	5
BIOL 120L	Development Laboratory	5
BIOL 121L	Environmental Phage Biology Laboratory	5
BIOL 186L	Undergraduate Research in MCD Biology	5

Comprehensive Requirement

All majors require a comprehensive requirement. For the neuroscience B.S., this requirement can be satisfied by receiving a passing grade in one of the following laboratory courses.

BIOL 100L	Biochemistry Laboratory	5
BIOL 103L	Toxic RNA Laboratory III	5
BIOL 105L	Eukaryotic Genetics Laboratory	5
BIOL 109L	Yeast Molecular Genetics Laboratory	5
BIOL 115L	Eukaryotic Molecular Biology Laboratory	5
BIOL 120L	Development Laboratory	5
BIOL 121L	Environmental Phage Biology Laboratory	5
BIOL 186L	Undergraduate Research in MCD Biology	5

Planners

Sample Frosh Four-Year Planner

Neuroscience B.S. frosh sample planners

	Fall	Winter	Spring
1st (frosh)	CHEM 1A	CHEM 1B	CHEM 1C & CHEM 1N

	MATH 11A	MATH 11B	BIOL 20A	125	126
2nd (soph)	BIOE 20B	BIOL 100	BIOL 101		
	BIOL 20L	CHEM 8B	BIOL 101L		
	CHEM 8A & CHEM 8L		BIOL 105		
3rd (junior)	BIOL 110	Upper-division elective	BIOL 125		
	STAT 5 OR STAT 7 & STAT 7L	PHYS 6A & PHYS 6L	PHYS 6B OR PHYS 6C		
4th (senior)	Upper-division elective	Lab	BIOL 126		
	BIOE 20C				

The following general education requirements will be fulfilled by the major requirements listed in the above planner: MR, SI, and SR. In addition to the GE requirements satisfied by the above courses, a student will also need to complete courses satisfying the CC, ER, IM, TA, PE, and PR general education requirements.

Sample Transfer Two-Year Planner

Neuroscience B.S. transfer students sample planners

NEUROSCIENCE BS	Fall	Winter	Spring
3rd (junior)	BIOL 100	BIOL 105	BIOL 101
	PHYS 6A & PHYS 6L	PHYS 6B or PHYS 6C	BIOL 101L
4th (senior)	BIOL 110	Upper-division elective	Upper-division elective
	BIOL	Lab	BIOL

This planner assumes that a student has completed all UC Transfer Pathway courses:

- General biology with lab (full introductory sequence) BIOL 20A, BIOE 20B, BIOL 20L, BIOE 20C
- General chemistry with lab (one-year sequence) CHEM 1A, CHEM 1B & CHEM 1M and CHEM 1C & CHEM 1N
- Calculus for STEM majors (one-year sequence) MATH 11A and MATH 11B
- Organic chemistry (full sequence with lab) CHEM 8A & CHEM 8L and CHEM 8B

BIOLOGY MINOR

The biology minor is designed to incorporate elements of both the ecology and evolutionary biology discipline and the molecular, cell and developmental biology discipline.

Course Requirements

Lower-Division Courses

All of the following courses:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOL 20L	Experimental Biology Laboratory	2
BIOE 20C	Ecology and Evolution	5
CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1C	General Chemistry	5
CHEM 8A	Organic Chemistry	5

Upper-Division Courses

All of the following courses:

BIOL 100	Biochemistry	5
BIOL 105	Genetics	5
BIOE 107	Ecology	5
BIOE 109	Evolution	5

Students must complete one upper-division biology elective (5-7 credits) chosen from Biological Sciences-EEB courses (BIOE) or Biological Sciences-MCDB courses (BIOL) numbered 100-181.

There is no senior comprehensive requirement for the biology minor. Please contact Molecular, Cell, and Developmental Biology undergraduate advisers for further information.

Graduate Program

The program in Molecular, Cell, and Developmental (MCD) biology (courses BIOL) leads to either the doctor of

philosophy (Ph.D.) or the Master of Arts (M.A.) and is designed to prepare students for careers in research, teaching, and biotechnology. Current research in MCD biology focuses on such topics as the structure and function of RNA, gene expression, chromatin structure, epigenetics, cell signaling, cell division, development, nerve cell function, and stem cell biology.

MOLECULAR, CELL AND DEVELOPMENTAL BIOLOGY M.S.

Introduction

Students apply to the master's degree program through the same portal as for the Ph.D. degree program. While the M.S. is research intensive, master's students do not do research rotations; they must identify a research adviser prior to the training period. Students are required to participate in laboratory research meetings and departmental seminar series every quarter.

Requirements

Course Requirements

Complete the graduate core course:

BIOL 200A Critical Analysis of Scientific Literature 5

BIOL 200A to be completed in the first year

The following course:

BIOL 289 Practice of Science 5

Enroll in the following seminar series each quarter:

BIOL 291 Molecular, Cellular, and Developmental Biology Seminar 2

BIOL 292 MCD Seminar

Complete two approved advanced electives (list below). The two electives may be completed in either the first or second year

Approved Graduate Electives

(M.S. students complete two)

NOTE: Lecture/lab combinations count as one course. For BME 163 and BME 263, only one of these courses will be counted toward fulfillment of the electives.

BIOL 200B Advanced Molecular Biology 5

BIOL 200C Advanced Cell Biology 5

BIOL 200D Developmental Biology 5

BIOL 201 RNA Processing 5

BIOL 203 Ribosomes and Translation 5

BIOL 204 Chromatin 5

BIOL 205 Epigenetics 5

BIOL 206 Introduction to Stem Cell Biology 5

BIOL 206L Current Protocols in Stem Cell Biology 5

BIOL 215 Applied Statistics for

	Molecular, Cell, and Developmental Biology	
BIOL 208	Cellular Signaling Mechanisms	5
BIOL 214	Advances in Cancer Biology	5
BIOL 217	Influence of Environment and Experience on Brain Development	5
BIOL 226	Advanced Molecular Neuroscience	5
BIOL 228	Developmental Neurobiology	5
BIOL 290	Career Planning	2
BME 110	Computational Biology Tools	5
BME 130	Genomes	5
BME 163	Applied Visualization and Analysis of Scientific Data	5
BME 160	Research Programming in the Life Sciences	6
BME 263	Applied Visualization and Analysis of Scientific Data	5
BME 205	Bioinformatics Models and Algorithms	5
BME 229	Protein and Cell Engineering	5
BME 237	Applied RNA Bioinformatics	5
CHEM 200A	Advanced Biochemistry: Biophysical Methods	5
CHEM 200B	Advanced Biochemistry: Macromolecular Structure and Function	5
CHEM 200C	Advanced Biochemistry: Enzyme Mechanisms and Kinetics	5
CHEM 230	Grant Writing in Biomedical Research	5
ECE 215	Models of Robotic Manipulation	5
ECE 293	Advanced Topics in Electrical and Computer Engineering	5
METX 202	Cell and Molecular Toxicology	5
METX 206A	Advanced Microbiology	5
METX 210	Molecular and Cellular Basis of Bacterial Pathogenesis	5
METX 238	Pathogenesis: Molecular Mechanisms of Disease	5
	PDP, Training in teaching offered by the Institute for Scientist and Engineer Educators (ISEE)	
STAT 108	Linear Regression	5
STAT 202	Linear Models in SAS	5
STAT 205B	Intermediate Classical Inference	5
STAT 266A	Data Visualization and Statistical Programming in R	3

* Students who have had no or very little education in statistics should audit or take AMS 7 (5 credits) and perhaps also AMS 7L (2 credits) to learn basic statistical methodologies, before taking one of the graduate level courses.

** Students who take BIOL 290, Career Planning, take CHEM 230, Grant Writing, and/or participate in the Professional Development Program (PDP) may count only

one of those as an advanced graduate elective.

*** Students may only count either EE 264 or EE 293 toward their advanced graduate electives.

Other Requirements

Write a master's thesis based on original research. (A scholarly dissertation of the literature and progress on research project. A peer-reviewed publication is not required for graduation.)

Present a thesis defense in a departmental seminar. The student will present their research project in a public venue such as a departmental seminar or one of the research clubs (RNA club, chromatin club, neuro club etc.).

Applying for Graduation

MOLECULAR, CELL AND DEVELOPMENTAL BIOLOGY PH.D.

Introduction

The program in Molecular, Cell, and Developmental (MCD) biology (courses BIOL) leads to the doctor of philosophy (Ph.D.) and is designed to prepare students for careers in research, teaching, and biotechnology. Current research in MCD biology focuses on such topics as the structure and function of RNA, gene expression, chromatin structure, epigenetics, cell signaling, cell division, development, nerve cell function, and stem cell biology.

Advancement to Candidacy

Course Requirements

Ph.D. students complete the graduate core courses, BIOL 200A, BIOL 200B, BIOL 200C, and BIOL 200D in the first year. Students are required to participate in laboratory research meetings and departmental seminar series (BIOL 291/BIOL 292) every quarter. First-year Ph.D. students complete three six-week laboratory rotations. Students choose their rotation laboratories in consultation with the Graduate Advisory Committee. The laboratory rotations give students a chance to learn about the diverse fields and methods of inquiry and to interact with members of the department. At the end of each rotation, students present a short talk or present a poster to the department on their rotation project. At the end of winter quarter, students consult with rotation faculty to identify a permanent thesis laboratory.

Ph.D. students must take an ethics course (BIOL 289) and two approved advanced graduate electives, in addition to the core courses.

Complete the graduate core courses:

BIOL 200A	Critical Analysis of Scientific Literature	5
BIOL 200B	Advanced Molecular Biology	5
BIOL 200C	Advanced Cell Biology	5
BIOL 200D	Developmental Biology	5

The following course:

BIOL 289	Practice of Science	5
----------	---------------------	---

Enroll in the following seminar series each quarter:

BIOL 291	Molecular, Cellular, and Developmental Biology Seminar	2
BIOL 292	MCD Seminar	

Complete two advanced graduate elective courses (see the list below)

Approved Graduate Electives

(Ph.D. students complete two)

NOTE: Lecture and lab combinations count as a single course. For BME 163 and BME 263, only one of these courses will be counted toward fulfillment of the electives.

BIOL 201	RNA Processing	5
BIOL 203	Ribosomes and Translation	5
BIOL 204	Chromatin	5
BIOL 205	Epigenetics	5
BIOL 206	Introduction to Stem Cell Biology	5
BIOL 206L	Current Protocols in Stem Cell Biology	5
BIOL 208	Cellular Signaling Mechanisms	5
BIOL 214	Advances in Cancer Biology	5
BIOL 215	Applied Statistics for Molecular, Cell, and Developmental Biology	5
BIOL 217	Influence of Environment and Experience on Brain Development	5
BIOL 226	Advanced Molecular Neuroscience	5
BIOL 228	Developmental Neurobiology	5
BIOL 290	Career Planning	2
BME 110	Computational Biology Tools	5
BME 130	Genomes	5
BME 160	Research Programming in the Life Sciences	6
BME 163	Applied Visualization and Analysis of Scientific Data	5
BME 205	Bioinformatics Models and Algorithms	5
BME 229	Protein and Cell Engineering	5
BME 237	Applied RNA Bioinformatics	5
BME 263	Applied Visualization and Analysis of Scientific Data	5
CHEM 200A	Advanced Biochemistry: Biophysical Methods	5
CHEM 200B	Advanced Biochemistry: Macromolecular Structure and Function	5
CHEM 200C	Advanced Biochemistry: Enzyme Mechanisms and Kinetics	5
CHEM 230	Grant Writing in Biomedical Research	5
ECE 215	Models of Robotic	5

ECE 293	Manipulation Advanced Topics in Electrical and Computer Engineering	5
METX 202	Cell and Molecular Toxicology	5
METX 210	Molecular and Cellular Basis of Bacterial Pathogenesis	5
METX 206A	Advanced Microbiology	5
METX 238	Pathogenesis: Molecular Mechanisms of Disease PDP, Training in teaching offered by the Institute for Scientist and Engineer Educators (ISEE)	5
STAT 108	Linear Regression	5
STAT 202	Linear Models in SAS	5
STAT 205B	Intermediate Classical Inference	5
STAT 266A	Data Visualization and Statistical Programming in R	3

* Students who have had no or very little statistics should audit or take STAT 7 (5 credits) and perhaps also STAT 7L (2 credits) to learn the basics, before taking one of the graduate level courses.

** Students who take Bio 290: Career Planning, take Chem 230: Grant Writing, and/or participate in the professional development program (PDP) may count only one of those as an advanced graduate elective.

*** Students may only count either EE 264 or EE 293 toward their advanced graduate electives.

Foreign Language Requirements

Teaching Requirement

Complete two quarters of service as a teaching assistant.

Pre-Qualifying Requirements

Qualifying Examination

Complete an oral and written qualifying examination

Second-year Ph.D. students are required to submit a written proposal on their thesis research. The oral component of the qualifying examination, taken in spring quarter of the second year, is an oral examination on the proposal. The examining committee is comprised of three internal reviewers and one external reviewer.

Post-Qualifying Requirements

Advancement to Candidacy

Advancement to candidacy occurs by the end of the third year (nine quarters). Students must give a full research seminar (45-50-minute talk followed by questions) in an MCD seminar slot. This should be attended and evaluated by the Thesis Advisory Committee. A passing evaluation requires demonstration of a good understanding of their project and background knowledge, and a clear presentation of their questions or hypotheses, tests of those, and progress to date. A passing evaluation leads to advancement to candidacy.

Students have an additional three years (nine quarters) to complete their degree within normative time.

Dissertation

Dissertation

Meet yearly with a thesis committee after the qualifying examination

Complete thesis research resulting in peer-reviewed publications and a dissertation on original and significant work

Once the qualifying examination is passed and prior to her/his department seminar, a student, with her/his faculty adviser, selects a thesis committee to help guide the student's thesis research. This committee monitors the student's progress and ultimately approves the final draft of the student's dissertation. The student must meet with the thesis committee at least once a year after passing the qualifying examination.

Dissertation Defense

Present the thesis defense in a departmental seminar.

Academic Progress

Applying for Graduation

Ocean Sciences

A312 Earth and Marine Sciences Building
(831) 459-4730
<https://oceansci.ucsc.edu/>

PROGRAMS OFFERED

Ocean Sciences M.S. Plan 1 and Plan 2 (p. 319)

Ocean Sciences Ph.D. (p. 321)

OTHER PROGRAMS OF INTEREST

Environmental Sciences B.S. (p. 237)
(p. 319)

Ecology and Evolution B.S. (p. 253)

Marine Biology B.S. (p. 260)

Earth Sciences B.S. (p. 223)

The Ocean Sciences Department includes faculty, students, and staff involved in oceanography and other marine sciences and offers undergraduate and graduate courses in these disciplines. Through faculty sponsors, students have access to a wide variety of research facilities and equipment, including on-campus analytical chemistry, geology, and molecular biology laboratories for marine research; computing and imaging facilities; an onshore marine laboratory two miles from campus (Long Marine Laboratory), with aquariums and holding tanks that are supplied with running sea water; and a unique field station on Año Nuevo Island Reserve (19 miles north of Santa Cruz), especially suited for studies on pinnipeds and marine birds. The department supports collaborative studies utilizing the innovative technologies of the nearby Monterey Bay Aquarium Research Institute (MBARI), the Naval Postgraduate School, Stanford University's Hopkins Marine Station, California State University (CSU) Moss Landing Laboratory, and other facilities. Students may also work at other University of California facilities, including the Bodega Marine Laboratories and Scripps Institute of Oceanography.

In addition to research and instructional activities along the California coast, interests of the core faculty and their students include biological, chemical, and physical oceanography; sediment, marine, organic, and trace metal biogeochemistry; marine plankton, phytoplankton ecology, paleoceanography, aquatic microbial ecology, ecological modeling, and remote sensing (satellite oceanography); numeric modeling of coastal and basin-scale dynamics; and midwater ecology, climatology, among others.

Ocean Sciences Department affiliated faculty in other departments represent a deep resource of research interests and methodologies including those pertaining to coral reef

and kelp forest ecology, plate tectonics and continental margins, marine mammal behavior and physiology, and natural products from marine organisms. Student research projects have included participation in major scientific expeditions to various marine environments ranging from Polar Regions to the tropics.

Undergraduate Program

While offering a range of undergraduate courses, the Ocean Sciences Department presently only confers graduate degrees (Master of Science—M.S. or Doctor of Philosophy—Ph.D.) However, the undergraduate major in environmental science includes required and elective courses in ocean sciences. In addition, the undergraduate major in marine biology, sponsored by the biological sciences departments, includes required and elective courses in ocean sciences, and includes an ocean sciences concentration in Earth sciences for undergraduates. Students interested in ocean sciences should major in a discipline such as biology, marine biology, chemistry, Earth sciences, physics, or mathematics and take ocean sciences-related electives. Students with a bachelor's degree in one of these disciplines or equivalent coursework may apply directly for admission to the graduate program through the Division of Graduate Studies.

Graduate Program

The graduate programs in ocean sciences are designed to prepare students for careers in research, teaching, and other environmentally related endeavors. The fundamental requirement for admission to the program is substantial evidence of superior scholarship and aptitude for original research. Preparation for admission to the graduate program in ocean sciences should comprise an undergraduate degree in the discipline of one of the program specialty areas (e.g., biology or marine biology, geology or earth sciences, chemistry, or physical science) or an equivalent background. If a student does not have a degree in one of these areas, the student must demonstrate to their sponsor that they have taken the classes necessary to do their research.

The prerequisites for entering either the master's or the Ph.D. programs are a minimum of two quarters or two semesters in each of the following: a calculus series; chemistry, biology, and physics. In addition, one course in each of the following is required: earth sciences or geological principles; and statistics or biostatistics.

Details regarding admission, graduate standing, financial aid, examinations, and the requirements for the master of science and doctor of philosophy degrees are available from the Division of Graduate Studies.

OCEAN SCIENCES M.S.

Introduction

The Ocean Sciences Department offers a master of science (M.S.) degree in ocean sciences. The ocean sciences M.S. degree can be attained through plan I: thesis (coursework and

thesis, minimum 44 credits), or plan II: examination (coursework and written examination, minimum 42 credits). The degree combines core courses and electives to provide depth and breadth in the ocean sciences. Graduates from the program are exceptionally prepared to take research or management positions in organizations concerned with the marine environment, to become educators, or to enter doctoral programs in ocean sciences or related fields. The thesis M.S. degree is preparation for research careers.

Whereas the doctoral program has an oceanographic orientation, the ocean sciences master's program is even broader and has traditionally attracted many students in marine biology and ecology. As with the doctoral program, students are encouraged to select a course of study and a research program that draws on the expertise of the core ocean sciences faculty and any of the affiliated faculty in other departments. Customized programs of study that combine related disciplines are supported in the master's program.

Requirements

Course Requirements

To introduce students to the breadth and depth of the field of ocean sciences, students will be required to complete the following:

Plan I: M.S. (thesis) requirements:

OCEA 200 (Physical Oceanography) and any two of the remaining three core courses. Students are expected to complete all three of these courses in the first year of the program, and they should be taken in the order listed below. Students are also encouraged to take the fourth core course, in which case it can count as an elective.

The four core ocean sciences courses are expected to be completed in the first year.

OCEA 200	Physical Oceanography	5
OCEA 220	Chemical Oceanography	5
OCEA 230	Biological Oceanography	5
OCEA 280	Marine Geology	5

Two graduate-level or upper-division electives

A minimum of two graduate-level or upper-division elective courses to provide depth in the chosen area of emphasis. They are chosen in consultation with the student's adviser and the department's graduate advising committee. A maximum of one course may be a graduate-level seminar (OCEA 290); at least one course must be graduate or upper-division undergraduate lecture courses.

Minimum of three courses in independent studies courses

A minimum of three courses in independent studies under the direction of an adviser, is required. Each quarter a student should take 15 credits of classes. Students beyond their first year will usually take 10 or 15 credits of Independent Studies each quarter.

OCEA 297 Independent Study

The following course is taken prior to or concurrent with being a teaching assistant.

OCEA 296 Teaching in Ocean Sciences 2

This course is generally offered during the fall quarter each year.

Attendance in the following course is required each quarter of enrollment.

OCEA 292 Seminar

Plan II: M.S. (examination) requirements:

Completion of the four core ocean sciences courses is required.

The four core ocean sciences courses are required to be completed.

OCEA 200	Physical Oceanography	5
OCEA 220	Chemical Oceanography	5
OCEA 230	Biological Oceanography	5
OCEA 280	Marine Geology	5

Complete one course in data analysis (5 credits)

OCEA 260 Introductory Data Analysis in 5
the Ocean and Earth Sciences

Three graduate-level or upper-division elective courses

A minimum of three graduate-level or upper-division elective courses is required to provide depth in the chosen area of emphasis or supporting disciplines. These courses are selected in consultation with the student's adviser and the department's graduate advising committee. A maximum of one course may be a graduate-level seminar (OCEA 290), and at least two courses must be graduate or upper-division undergraduate lecture courses.

Attendance in the following course is required each quarter of enrollment.

OCEA 292 Seminar

Other Requirements for Plan I: M.S. (thesis)

Plan I M.S. students must complete an M.S. thesis and must make a public presentation of their thesis before the deadline in which all degree requirements are to be completed within the term of receiving the degree. In addition, the M.S. thesis satisfying all format and content requirements must be submitted to the Graduate Division before the deadline in which all degree requirements are to be completed within the term of receiving the degree.

Other Requirements for Plan II: M.S. (examination)

Plan II M.S. students must take and pass a written comprehensive exam that covers the material from the core courses.

Applying for Graduation

Once requirements for degree have been met, including approval from their academic adviser and the Ocean Sciences Department, M.S. students may apply for the degree by the deadline for the quarter in which they would like to receive their degree. Deadlines are published in the Academic and Administrative Calendar each year.

OCEAN SCIENCES PH.D.

Introduction

The program leading to a doctorate in ocean sciences is designed around a core training in oceanography for all students, supplemented and focused by advanced training in oceanography and in the traditional disciplines—biology, chemistry, Earth sciences, and physics—as chosen by the student and his or her advisers. The core training is provided through courses in ocean sciences; a subset of which is taken by all students in the first two years and reinforced by the student's seminars throughout the program. Preparation also includes upper-division/graduate courses in ocean sciences and in the specialty discipline, graduate seminars, independent study research credits, participation in a departmental student seminar series, and a minimum requirement of two quarters as a teaching assistant. There is no formal language requirement.

A scheduling meeting in the first quarter of enrollment is used to map out the course program in the first year. The course program is determined by a faculty advisory committee in consultation with the student and courses are drawn from ocean sciences and other science departments (e.g., biology, chemistry, Earth and planetary sciences, physics). A departmental oral examination covering material from the core courses is usually taken at the beginning of a student's second year in the program and must be completed successfully within two years of entering the program. The purpose of this examination is to ensure that the doctoral student candidate has acquired sufficient fundamental knowledge of oceanography to proceed toward the doctoral degree.

A qualifying examination requiring a written research proposal to be defended orally in front of the student's qualifying examination committee is normally taken during the third or fourth year of the program. A dissertation, demonstrating original thought and research, must be written, presented in an open seminar, and defended to the student's dissertation reading committee. Students are strongly encouraged to prepare their dissertation in a form suitable for publication.

Sample Pathways

The pathways within the ocean sciences Ph.D. program are differentiated from related degrees in the traditional disciplines by their focus on global-scale problems and interactions, a focus on the ocean, and their inherently interdisciplinary approach. Interdisciplinary projects across and between pathways are encouraged, as are interactions with faculty in related departments.

Biological Oceanography

This area of study involves the interactions of organisms with their chemical and physical environments. It includes research on the physiology and ecology of organisms, but differs from marine biology in its focus on the oceanographic setting of the organism in relationship to, for example, biogeochemical cycling and the effects of ocean currents on distributions of organisms. The focus is mainly on small oceanic life-forms (plankton and bacteria, molecular ecology) and their roles in the biogeochemical cycles of marine systems.

Chemical Oceanography

Chemical interactions of trace metals and radionuclides in the sea are the focus of this area of study. Research includes development of analytical techniques, measurement of trace species in seawater, and investigation of the effects and interactions of trace elements on biological processes using analytical and isotopic approaches.

Geological Oceanography

Paleoceanography, paleoclimatology, and sediment geochemistry are the focus in this pathway. Research areas include the history of global geochemical cycles and composition of the ocean on various timescales, the fate and diagenesis of materials in sediments and their contribution to the paleoceanographic record, understanding ocean and climate history by the use of records of stable isotopes and trace elements, and paleoclimate modeling.

Physical Oceanography

The physics and dynamics of the ocean and atmosphere are the main aspects of this program. Research includes observational, computational, theoretical, and experimental physical oceanography, geophysical fluid dynamics, ocean acoustics, dynamical meteorology, climate, and global change.

Advancement to Candidacy

Course Requirements

To introduce students to the breadth and depth of the field of ocean sciences, students will be required to complete the following.

The four core ocean sciences courses are expected to be completed in the first year of the program prior to taking the departmental oral examination:

OCEA 200	Physical Oceanography	5
OCEA 220	Chemical Oceanography	5
OCEA 230	Biological Oceanography	5
OCEA 280	Marine Geology	5

Three Graduate-Level or Upper-Division Elective courses:

A minimum of three graduate-level or upper-division elective courses is required to provide depth in the chosen area of emphasis or supporting disciplines. These courses are selected in consultation with the student's adviser and the department's graduate advising committee. A maximum of one course may

be a graduate-level seminar (OCEA 290), and at least two courses must be graduate or upper-division undergraduate lecture courses.

Attendance in the following course is required each quarter of enrollment:

OCEA 292 Seminar

The following course is taken prior to, or concurrent with, being a teaching assistant:

Generally offered during the fall quarter each year.

OCEA 296 Teaching in Ocean Sciences 2

Independent Studies or Thesis Research:

A minimum of three courses in independent studies (OCEA 297, before advancing to candidacy), or thesis research (OCEA 299, after advancing to candidacy) under the direction of an adviser. Students beyond their first year will usually take 10 or 15 credits of independent study or thesis research each quarter.

OCEA 297 Independent Study

OCEA 299 Independent Study

Foreign Language Requirements

Teaching Requirement

Teaching experience is satisfied by two quarters of teaching assistant experience in ocean sciences or related departments.

Pre-Qualifying Requirements

Ph.D. students must pass a Department Examination typically taken at the end of their first year, or beginning of their second year. The purpose of this exam is to ensure that the Ph.D. student has acquired sufficient fundamental knowledge of oceanography, and developed a suitable research plan, before developing their thesis proposal and before taking their Qualifying Examination.

Qualifying Examination

Ph.D. students must pass a departmental qualifying examination to advance to candidacy. Students will submit a written research proposal to their qualifying examination committee, then defend this proposal orally before the committee.

Post-Qualifying Requirements

Dissertation

Dissertation

The Ph.D. dissertation, demonstrating original thought and research, must be written, presented in an open seminar, and defended to the student's dissertation reading committee. It is intended to help guide and evaluate the student's program, study, and progress. The Ph.D. dissertation, satisfying all format and content requirements, must be submitted to the Graduate Division before the deadline in which all degree

requirements are to be completed within the term of receiving the degree.

Dissertation Defense

The Ph.D. dissertation defense is composed of two parts: one part is the open presentation of the dissertation; the second part is a meeting, following the presentation, with the dissertation reading committee to determine completion of degree requirements. The Ph.D. dissertation defense must be presented before the deadline in which all degree requirements are to be completed within the term of receiving the degree.

Academic Progress

Ph.D. students meet with a member of the Ocean Sciences Department's advisory committee once each fall and spring. In addition, during the spring quarter each year, beginning with the second year and continuing until degree completion, students must meet with their committee members and provide an annual academic progress report to the department.

Applying for Graduation

Once requirements for degree have been met, including approval from their academic adviser and the Ocean Sciences Department, Ph.D. students may apply for the degree by the deadline for the quarter in which they would like to receive their degree. Deadlines are published in the Academic and Administrative Calendar each year.

Astrophysics Minor (p. 191)

Astronomy and Astrophysics Ph.D. (p. 192)

Physics seeks to discover the fundamental regularities or “laws” that govern our universe and to apply these laws to explain the behavior of fundamental and complex systems. The same underlying principles describe the behavior of atoms, lasers, living cells, and galaxies. Physics is, therefore, at the base of all modern science and technology, and this fundamental nature can be appreciated even at an elementary level.

The Physics Department offers majors in physics, physics (astrophysics), and applied physics. These programs prepare students for graduate work in physics, astrophysics, and astronomy, and for engineering and other technical positions in industry. With appropriate courses in other disciplines, these majors provide excellent preparation for advanced study in technical subjects such as biology, chemistry, engineering, geophysics, and the philosophy of science. The applied physics major is excellent preparation for positions in industry directly upon graduation.

Faculty work with students in both formal and informal settings. All undergraduate physics majors have the opportunity to work individually with a faculty member in completing the senior thesis requirement for the major.

The main areas of physics research at UCSC are the study of fundamental particles and interactions (high-energy physics), the study of condensed matter physics, materials physics, astrophysics/cosmology, and biophysics.

Efforts in high-energy physics are aided by the presence of an organized research unit, the Santa Cruz Institute for Particle Physics (SCIPP). The SCIPP experimentalists play significant roles in experiments at some of the major accelerator laboratories in the world, including the SLAC National Accelerator Laboratory at Stanford University and the European Council for Nuclear Research (CERN) near Geneva, Switzerland. SCIPP experimentalists have also played an important role in creating the major satellite for gamma-ray astronomy (the Fermi Gamma-ray Space Telescope), are involved in the Dark Energy Survey, and conduct a thriving particle astrophysics program detecting TeV gamma rays as part of the UC VERITAS collaboration. SCIPP theorists are active in the phenomenology of high-energy particle interactions, including dark matter models, the theory of strong and electroweak interactions, electroweak symmetry breaking and Higgs bosons, theories of supersymmetry, superstrings, and gravity. SCIPP also maintains a vigorous program in particle astrophysics, including research in high-energy astrophysics, dark matter, formation of galaxies and large-scale structure in the universe, and theories of cosmology and the very early universe. SCIPP is also home to a research program in experimental biophysics, exploiting instrumentation technologies developed in other areas of physics for the study of functional organization and development of neural systems in a variety of living organisms. In addition, there is closely related research in biomedical applications such as retinal prosthesis.

The presence of the strong astrophysics group from the Astronomy and Astrophysics Department at UCSC provides a

healthy symbiosis in this area. Note that the Astronomy and Astrophysics Department does not offer an undergraduate major but does participate in teaching and mentoring Physics Department astrophysics majors. UCSC is the headquarters for the University of California Observatories, which includes the Lick Observatory near San Jose and the Keck Observatory in Hawaii. These provide additional opportunities for collaboration between researchers in physics and astronomy.

Condensed matter and materials physics research at UCSC covers a range of topics including the behavior of exotic many-electron systems (for example, superconductors) and quantum materials (such as topological insulators and Weyl semimetals); magnetic phase transitions; magnetic and magnetoelectric surfaces, interfaces, and thin films; two-dimensional materials and heterostructures; complex systems (proteins, DNA, and polymers); biophysics; and the development of new electronic devices using novel materials. The experimental program includes optical, magnetometry, magnetotransport, X-ray, and specific heat measurement techniques, as well as thin film growth and characterization facilities at UCSC. X-ray and synchrotron radiation scattering and spectroscopy measurements are available at the Lawrence Berkeley National Laboratory Advanced Light Source and at the Stanford Synchrotron Radiation Light-source, while neutron scattering measurements are performed at the NIST Center for Neutron Research and the Oak Ridge Spallation Neutron Source. Undergraduate students are actively involved in several condensed matter physics laboratories during the academic year and summer months.

Undergraduate Program

UNDERGRADUATE MAJORS

The physics, physics (astrophysics), and applied physics major programs provide a comprehensive coverage of the field and the background necessary for graduate school or industrial careers. Students earn a bachelor of science (B.S.) degree. The UC Santa Cruz physics, physics (astrophysics), and applied physics programs begin with a four-quarter presentation of the introductory concepts of the subject, Introduction to Physics, PHYS 5A, PHYS 5B, PHYS 5C, and PHYS 5D. Note that the applied physics program also requires completion of a general chemistry course. In order for a student to finish the UCSC physics program in four years, it is important to start the Introduction to Physics sequence at the beginning of the first year. Students who complete a major sponsored by the Physics Department cannot complete a second major sponsored by the Physics Department or a physics minor.

This introductory sequence is followed by a course that provides an introduction to quantum physics and its applications, Modern Physics, PHYS 102. The programs continue with a three-quarter sequence in mathematical methods of physics, PHYS 116A, PHYS 116B, and PHYS 116C, designed to provide the mathematics preparation

necessary for most of the upper-division physics courses required for the majors. Included in the upper-division programs are two intensive laboratory courses designed to illustrate both historical experiments that were important in the development of physics, astrophysics, and applied physics, and modern experimental methods. Advanced and especially motivated students may enroll in some graduate courses with the approval of the instructor and department chair.

The senior thesis, required of all physics, physics (astrophysics), and applied physics majors at UCSC, provides the opportunity for students to apply their skills to problems of interest to them, either theoretical or experimental, usually with technical advice from a faculty member. The senior thesis may be based on the student's original research or participation in a faculty member's research project or a review of some particular area of physics, under the supervision of a faculty member. The senior thesis is a distinctive part of the UCSC physics major program and entails a substantial investment of both student and faculty time. The learning experience involved in the thesis, as well as the thesis itself, has proven extremely valuable to students in enhancing employment opportunities upon graduation or in gaining admission to graduate school.

The department is also the administrative home of the science education major, which is a collaboration between several departments in the Physical and Biological Sciences Division and the Department of Education. This major is designed for a career in teaching in California high schools by preparing students for the California Subject Examination for Teachers. (Students interested in a high school teaching career will have to fulfill additional requirements after the degree, such as earning a teaching credential.)

COURSES FOR NON-MAJORS

The department offers the three-quarter sequence--PHYS 6A, PHYS 6B and PHYS 6C--that covers introductory physics at a level suitable for many majors. A two-quarter sequence--PHYS 7A and PHYS 7B--is tailored for students in the life sciences. A one-quarter overview of physics (PHYS 1) and a course on the physics underpinning music (PHYS 80U) are also offered by the department.

PHYSICS B.S.

Information and Policies

Introduction

Academic Advising for the Program

The department undergraduate adviser (physicsadvising@ucsc.edu) works closely with students interested in pursuing the major to ensure that they begin the program immediately and follow the appropriate steps toward its completion.

Getting Started in the Major

Students begin the major with PHYS 5A, after having completed MATH 19A or equivalent. To enroll in PHYS 5A, students must be in a proposed major that requires the Physics 5 series. (Students who take PHYS 6A instead of PHYS 5A, and do very well in it, may contact the department chair for permission to enter the major.) Students are strongly encouraged to begin their major coursework in their first quarter. Those who start later should consult the department undergraduate adviser and the Alternatives webpage. Students who do not begin the lower-division requirements during their first year will have difficulty completing the program within four years.

High school students coming directly to UC Santa Cruz should emphasize their mathematics preparation with the expectation that they will take calculus, MATH 19A, before their second quarter at UC Santa Cruz in order to take the Physics 5 series in time. Students who come to UC Santa Cruz with credit for MATH 19A will be able to start the Physics 5 series in the first quarter. The courses in the PHYS 5 and PHYS 6 series are offered multiple times per year.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop over the course of their studies. The program learning outcomes communicate the faculty's expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes.

- Students will demonstrate proficiency in mathematics and the mathematical concepts needed for a proper understanding of physics.
- Students will demonstrate knowledge of classical and quantum mechanics, statistical mechanics, and electromagnetism.
- Students will show that they have learned laboratory skills, enabling them to take measurements in a physics laboratory and analyze the measurements to draw valid conclusions.
- Students will communicate effectively, both orally and in writing, and will demonstrate that they can think critically and work independently while doing their senior thesis.

Major Qualification Policy and Declaration Process

Major Qualification

To qualify to declare the physics major, students must achieve a cumulative grade point average (GPA) of 2.70 or greater in the following courses, or their equivalents:

PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5

When determining qualification to declare the major:

- All courses must be taken for a letter grade.
- If PHYS 5A is satisfied with AP credit based on an AP examination score of 5, students may substitute a grade of A for PHYS 5A when calculating their cumulative GPA.
- Students with two or more grades of NP, C-, D+, D, D-, or F in the major qualification policy courses are not eligible to declare even if the courses are retaken and the grades replaced.

Students who achieve a GPA of 2.66 or higher (but less than 2.70) in the three courses may declare the major if they receive a B or better in PHYS 5D.

Appeals

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair by the later date of either 15 days from the date the notification was sent, or one week after the start of instruction during the quarter after the final relevant grade was received (generally in PHYS 5C or PHYS 5D). They also must arrange to meet with their faculty mentor. Within 15 days of receipt of the appeal, after consulting with the faculty mentor, the department chair will either finalize the denial of admission or specify further conditions for admission, and will notify the student and their college of the decision. For more information about the appeal process, see Appeal Process.

How to Declare a Major

Students may submit a petition to declare after completing the qualification policy courses. All students are required to review their academic plan with their assigned faculty mentor prior to declaring the major. For instructions on petitioning to declare, go to Declaring Your Major.

Transfer Information and Policy

Transfer Admission Screening Policy

The Physics Department welcomes applications from community college students who have completed the necessary coursework to transfer to our program.

To be considered for admission to UC Santa Cruz in the physics major, transfer students must pass **equivalents** of the following courses with a cumulative GPA of 2.7 or higher:

PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5

In addition, transfer students must achieve a minimum grade of C (2.0) in courses articulated to

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 23A	Vector Calculus	5

Although not required for admission, transfer students are strongly encouraged to complete all general education requirements before coming to UC Santa Cruz, without which they may not be able to graduate in two years. Students are also recommended to complete the equivalent of PHYS 5D.

Students planning to transfer to UC Santa Cruz from a California community college should reference <http://assist.org/> to determine which courses are equivalent to these required courses.

California community college students who are prepared for their major and achieve a certain GPA may be eligible for a transfer admissions guarantee (TAG); for more information, visit TAG.

Getting Started at UCSC as a Transfer Student

Transfer students admitted to UC Santa Cruz in the physics major who have satisfied the above screening requirements may declare the major immediately upon arrival at UC Santa Cruz. They should contact the undergraduate adviser to draw up an academic plan. Students who are proposed in a different major (other than physics (astrophysics) or applied physics) and have advanced standing when they come to UC Santa Cruz require permission from the department to change into the major.

Letter Grade Policy

All courses used to satisfy the physics major requirements must be taken for a letter grade, except the programming requirement.

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Students who complete a major sponsored by the Physics Department cannot complete a second major sponsored by the Physics Department or a physics minor.

Study Abroad

Honors

The department awards "honors" (3.5 grade point average or better) and "highest honors" (3.8 grade point average or better) to top graduating students each year. The department also awards "honors" for outstanding work on the senior thesis, made upon the recommendation of the senior thesis supervisor and the thesis technical adviser.

Timely Graduation and Alternative Plans

- In order to graduate in time, it is extremely important that students start their senior thesis as early as possible, by the end of the junior year for four-year students and by the beginning of the second year for transfer students. PHYS 182 is a course that teaches students effective writing in physics for the senior thesis, but it is not the point at which the thesis should

be started. For further information about the senior thesis, see Senior Thesis.

- Students who join a major program of the Physics Department with some of the required courses completed, or have room in their program for additional courses, should consult with the Physics Department undergraduate adviser.
- Students who fall behind the planners should consult the Physics Department undergraduate adviser and Alternatives.
- All the transfer major planners assume that the Intersegmental General Education Transfer Curriculum (IGETC) has been completed in community college, or has been partially completed and can be finished while at UC Santa Cruz (including summers).

Requirements and Planners

Course Requirements

Lower-Division Courses

Choose one of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Plus all of the following courses:

MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5
PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1
PHYS 5B	Introduction to Physics II	5
PHYS 5M	Introduction to Physics Laboratory	1
PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory	1
PHYS 5D	Introduction to Physics IV	5

Plus one of the following courses or equivalent:

ASTR 119	Introduction to Scientific Computing	5
PHYS 115	Computational Physics	5
CSE 5J	Introduction to Programming in Java	5
CSE 20	Beginning Programming in Python	5

Upper-Division Courses

All of the following courses:

PHYS 102	Modern Physics	5
PHYS 116A	Mathematical Methods in Physics	5
PHYS 116B	Mathematical Methods in Physics	5
PHYS 116C	Mathematical Methods in Physics	5
PHYS 105	Mechanics	5
PHYS 110A	Electricity, Magnetism, and Optics	5
PHYS 110B	Electricity, Magnetism, and Optics	5
PHYS 112	Thermodynamics and Statistical Mechanics	5
PHYS 133	Intermediate Laboratory	5
PHYS 134	Physics Advanced Laboratory	5
PHYS 139A	Quantum Mechanics I	5

MATH 21 and MATH 24 can substitute for PHYS 116A.

PHYS 116C is waived for students who are pursuing a dual major in physics and a mathematics B.A., and take MATH 107 in the year 2017 or later.

Programming Requirement

Students in the physics B.S. major have to satisfy a computer programming requirement by taking one of the courses listed in the major requirements given above. Of these courses, ASTR 119/EART 119 teaches programming and simple applications. PHYS 115 does not teach programming; it assumes basic programming ability in Python, C++ or a similar language and discusses numerical techniques relevant to physics. The other courses listed teach programming. Students may also satisfy the computer programming requirement by demonstrating their knowledge of programming to a faculty member designated by the Physics Department. For instructions on how to demonstrate your programming skills, go to Completing the Major.

Electives

Two courses, each 5 credits or more, chosen from upper-division elective courses offered by the Physics Department or ASTR 111 - ASTR 118. In some cases, with the approval of the department, one of the elective requirements may be satisfied by an upper-division science or engineering course.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy the upper-division disciplinary communication (DC) requirement. Students in the physics major satisfy the DC requirement by completing the senior thesis and the following course:

PHYS 182	Scientific Communication for Physicists	5
----------	---	---

Comprehensive Requirement

The comprehensive requirement is satisfied by the submission and approval of a thesis, and the following course:

PHYS 182	Scientific Communication for Physicists	5
----------	---	---

Information and Policies

Introduction

Academic Advising for the Program

The department undergraduate adviser (physicsadvising@ucsc.edu) works closely with students interested in pursuing the major to ensure that they begin the program immediately and follow the appropriate steps toward its completion.

Getting Started in the Major

Students begin the major with PHYS 5A, after having completed MATH 19A or equivalent. To enroll in PHYS 5A, students must be in a proposed major that requires the Physics 5 series. (Students who take PHYS 6A instead of PHYS 5A, and do very well in it, may contact the department chair for permission to enter the major.) Students are strongly encouraged to begin their major coursework in their first quarter. Those who start later should consult the department undergraduate adviser and Alternatives. Students who do not begin the lower-division requirements during their first year will have difficulty completing the program within four years.

High school students coming directly to UC Santa Cruz should emphasize their mathematics preparation with the expectation that they will take calculus, MATH 19A, before their second quarter at UC Santa Cruz in order to take the Physics 5 series in time. Students who come to UC Santa Cruz with credit for MATH 19A will be able to start the Physics 5 series in the first quarter. The courses in the PHYS 5 and PHYS 6 series are offered multiple times per year.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop over the course of their studies. The program learning outcomes communicate the faculty's expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes.

- Students will demonstrate proficiency in mathematics and the mathematical concepts needed for a proper understanding of physics.
- Students will demonstrate knowledge of classical and quantum mechanics, statistical mechanics, and electromagnetism.
- Students will show that they have learned laboratory skills, enabling them to take measurements in a physics laboratory and analyze the measurements to draw valid conclusions.
- Students will communicate effectively, both orally and in writing, and will demonstrate that they can think critically and work independently while doing their senior thesis.
- Students will demonstrate a basic understanding of various aspects of astronomy.

Major Qualification Policy and Declaration Process

Major Qualification

To qualify to declare the physics (astrophysics) major, students must achieve a cumulative grade point average (GPA) of 2.70 or greater in the following courses, or their equivalents:

PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5

When determining qualification to declare the major:

- All courses must be taken for a letter grade.
- If PHYS 5A is satisfied with AP credit based on an AP examination score of 5, students may substitute a grade of A for PHYS 5A when calculating their cumulative GPA.
- Students with two or more grades of NP, C-, D+, D, D-, or F in the major qualification policy courses are not eligible to declare even if the courses are retaken and the grades replaced.

Students who achieve a GPA of 2.66 or higher (but less than 2.70) in the three courses may declare the major if they receive a B or better in PHYS 5D.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to

the department chair by the later date of either 15 days from the date the notification was sent, or one week after the start of instruction during the quarter after the final relevant grade was received (generally in PHYS 5C or PHYS 5D). They also must arrange to meet with their faculty mentor. Within 15 days of receipt of the appeal, after consulting with the faculty mentor, the department chair will either finalize the denial of admission or specify further conditions for admission, and will notify the student and their college of the decision. For more information about the appeal process, see Appeal Process.

How to Declare a Major

Students may submit a petition to declare after completing the qualification policy courses. All students are required to review their academic plan with their assigned faculty mentor prior to declaring the major. For instructions on petitioning to declare, see Declaring Your Major.

Transfer Information and Policy

Transfer Admission Screening Policy

The Physics Department welcomes applications from community college students who have completed the necessary coursework to transfer to our program.

To be considered for admission to UC Santa Cruz as a participant in the physics (astrophysics) major, transfer students must pass **equivalents** of the following courses with a cumulative GPA of 2.7 or higher:

PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5

In addition, transfer students must achieve a minimum grade of C (2.0) in courses articulated to

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 23A	Vector Calculus	5

Although not required for admission, transfer students are strongly encouraged to complete all general education requirements and the equivalent of PHYS 5D before coming to UC Santa Cruz, without which they may not be able to graduate in two years.

Students planning to transfer to UC Santa Cruz from a California community college should reference <http://assist.org/> to determine which courses are equivalent to these required courses.

California community college students who are prepared for their major and achieve a certain GPA may be eligible for a transfer admissions guarantee (TAG); for more information, visit TAG.

Getting Started as a UCSC Transfer Student

Transfer students admitted to UC Santa Cruz in the physics (astrophysics) major who have satisfied the above screening

requirements may declare the major immediately upon arrival at UC Santa Cruz. They should contact the undergraduate adviser to draw up an academic plan. Students who are proposed in a different major (other than physics or applied physics) and have advanced standing when they come to UC Santa Cruz require permission from the department to change into the major.

Letter Grade Policy

All courses used to satisfy the physics (astrophysics) major requirements must be taken for a letter grade, except the programming requirement.

Double Majors and Major/Minor Combinations Policy

Students who complete a major sponsored by the Physics Department cannot complete a second major sponsored by the Physics Department or a physics minor.

Study Abroad

Honors

The department awards "honors" (3.5 grade point average or better) and "highest honors"(3.8 grade point average or better) to top graduating students each year. The department also awards "honors" for outstanding work on the senior thesis, made upon the recommendation of the senior thesis supervisor and the thesis technical adviser.

Timely Graduation and Alternative Plans

- In order to graduate in time, it is extremely important that students start their senior thesis as early as possible, by the end of the junior year for 4-year students and by the beginning of the second year for transfer students. PHYS 182 is a course that teaches students effective writing in physics for the senior thesis, but it is not the point at which the thesis should be started. For further information about the senior thesis, see Senior Thesis.
- Students who join a major program of the Physics Department with some of the required courses completed, or have room in their program for additional courses, should consult with the Physics Department undergraduate adviser.
- Students who fall behind the planners should consult the Physics Department undergraduate adviser and Alternatives.
- All the transfer major planners assume that IGETC has been completed in community college, or has been partially completed and can be finished while at UC Santa Cruz (including summers).

Requirements and Planners

Course Requirements

Lower-Division Courses

Choose one of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Plus all of the following courses:

MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5
PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1
PHYS 5B	Introduction to Physics II	5
PHYS 5M	Introduction to Physics Laboratory	1
PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory	1
PHYS 5D	Introduction to Physics IV	5

Plus one of the following courses or equivalent:

ASTR 119	Introduction to Scientific Computing	5
CSE 5J	Introduction to Programming in Java	5
CSE 20	Beginning Programming in Python	5
PHYS 115	Computational Physics	5

ASTR 119 recommended

Upper-Division Courses

All of the following courses:

PHYS 102	Modern Physics	5
PHYS 116A	Mathematical Methods in Physics	5
PHYS 116B	Mathematical Methods in Physics	5
PHYS 116C	Mathematical Methods in Physics	5
PHYS 105	Mechanics	5
PHYS 110A	Electricity, Magnetism, and Optics	5
PHYS 110B	Electricity, Magnetism, and Optics	5
PHYS 112	Thermodynamics and Statistical Mechanics	5
PHYS 133	Intermediate Laboratory	5
PHYS 139A	Quantum Mechanics I	5

MATH 21 and MATH 24 can substitute for PHYS 116A.

PHYS 116C is waived for students who are pursuing a dual major in physics (astrophysics) and mathematics B.A., and take MATH 107 in the year 2017 or later.

Plus one of the following options:

Either this course

PHYS 135 Astrophysics Advanced Laboratory 5

or these courses

PHYS 135A Astrophysics Advanced Laboratory 3

PHYS 135B Astrophysics Advanced Laboratory 2

or this course

ASTR 136 Advanced Astronomy Laboratory 5

Capacity in the lab courses is limited, and they should be taken as early as possible.

Programming Requirement

Students in the physics (astrophysics) B.S. major have to satisfy a computer programming requirement by taking one of the courses listed in the major requirements given above. Of these courses, ASTR 119 and EART 119 teach programming and simple applications. PHYS 115 does not teach programming; it assumes basic programming ability in Python, C++ or a similar language and discusses numerical techniques relevant to physics. The other courses listed teach programming. Students may also satisfy the computer programming requirement by demonstrating their knowledge of programming to a faculty member designated by the Physics Department. For instructions on how to demonstrate your programming skills, go to Completing the Major.

Electives

Complete three courses, each 5 credits or more, chosen from the following:

ASTR 111	Order-of-Magnitude Astrophysics	5
ASTR 112	Physics of Stars	5
ASTR 113	Introduction to Cosmology	5
ASTR 117	High Energy Astrophysics	5
ASTR 118	Physics of Planetary Systems	5
ASTR 257	Observational Astronomy	5
PHYS 171	General Relativity, Black Holes, and Cosmology	5
PHYS 129	Nuclear and Particle Astrophysics	5
EART 160	Planetary Science	5
EART 162	Planetary Interiors	5
EART 163	Planetary Surfaces	5
EART 164	Planetary Atmospheres	5
AM 107	Introduction to Fluid Dynamics	5

Disciplinary Communication (DC) Requirement

Students of every major must satisfy the upper-division disciplinary communication (DC) requirement. Students in

the physics (astrophysics) major, satisfy the DC requirement by completing the senior thesis and the following course:

PHYS 182 Scientific Communication for Physicists 5

Comprehensive Requirement

The comprehensive requirement is satisfied by the submission and approval of a thesis, and the following course:

PHYS 182 Scientific Communication for Physicists 5

Planners

Physics (Astrophysics) B.S.: Freshman Academic Plan

	Fall	Winter	Spring
	<u>MATH 19A</u> (or <u>MATH 20A</u>)	<u>MATH 19B</u> (or <u>MATH 20B</u>)	<u>MATH 23A</u>

APPLIED PHYSICS B.S.

Information and Policies

Introduction

Academic Advising for the Program

The department undergraduate adviser (physicsadvising@ucsc.edu) works closely with students interested in pursuing the major to ensure that they begin the program immediately and follow the appropriate steps toward its completion.

Getting Started in the Major

Students begin the major with PHYS 5A, after having completed MATH 19A or equivalent. To enroll in PHYS 5A, students must be in a proposed major that requires the Physics 5 series. (Students who take PHYS 6A instead of PHYS 5A, and do very well in it, may contact the department chair for permission to enter the major.) Students are strongly encouraged to begin their major coursework in their first quarter. Those who start later should consult the department

undergraduate adviser and Alternatives. Students who do not begin the lower-division requirements during their first year will have difficulty completing the program within four years.

High school students coming directly to UC Santa Cruz should emphasize their mathematics preparation with the expectation that they will take calculus, MATH 19A, before their second quarter at UC Santa Cruz in order to take the Physics 5 series in time. Students who come to UC Santa Cruz with credit for MATH 19A will be able to start the Physics 5 series in the first quarter. The courses in the PHYS 5 and PHYS 6 series are offered multiple times per year.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop over the course of their studies. The program learning outcomes communicate the faculty's expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes.

- Students will demonstrate proficiency in mathematics and the mathematical concepts needed for a proper understanding of physics.
- Students will demonstrate knowledge of classical and quantum mechanics, statistical mechanics, and electromagnetism.
- Students will show that they have learned laboratory skills, enabling them to take measurements in a physics laboratory and analyze the measurements to draw valid conclusions.
- Students will communicate effectively, both orally and in writing, and will demonstrate that they can think critically and work independently while doing their senior thesis.

Major Qualification Policy and Declaration Process

Major Qualification

To qualify to declare the Applied Physics major, students must achieve a cumulative grade point average (GPA) of 2.70 or greater in the following courses, or their equivalents:

PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5

When determining qualification to declare the major:

- All courses must be taken for a letter grade.
- If PHYS 5A is satisfied with AP credit based on an AP examination score of 5, students may substitute a grade of A for PHYS 5A when calculating their cumulative GPA.
- Students with two or more grades of NP, C-, D+, D, D-, or F in the major qualification policy courses are not eligible to declare even if the courses are retaken and the grades replaced.

Students who achieve a GPA of 2.66 or higher (but less than 2.70) in the three courses may declare the major if they receive a B or better in PHYS 5D.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair by the later date of either 15 days from the date the notification was sent, or one week after the start of instruction during the quarter after the final relevant grade was received (generally in PHYS 5C or PHYS 5D). They also must arrange to meet with their faculty mentor. Within 15 days of receipt of the appeal, after consulting with the faculty mentor, the department chair will either finalize the denial of admission or specify further conditions for admission, and will notify the student and their college of the decision. For more information about the appeal process, see Appeal Process.

How to Declare a Major

Students may submit a petition to declare after completing the qualification policy courses. All students are required to review their academic plan with their assigned faculty mentor prior to declaring the major. For instructions on petitioning to declare, go to Declaring Your Major.

Transfer Information and Policy

Transfer Admission Screening Policy

The Physics Department welcomes applications from community college students who have completed the necessary coursework to transfer to our program.

To be considered for admission to UC Santa Cruz as a participant in the applied physics major, transfer students must pass **equivalents** of the following courses with a cumulative GPA of 2.7 or higher:

PHYS 5A	Introduction to Physics I	5
PHYS 5B	Introduction to Physics II	5
PHYS 5C	Introduction to Physics III	5

In addition, transfer students must achieve a minimum grade of C (2.0) in courses articulated to

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 23A	Vector Calculus	5

Although not required for admission, transfer students are strongly encouraged to complete all general education requirements and the equivalent of PHYS 5D before coming to UC Santa Cruz, without which they may not be able to graduate in two years.

Students planning to transfer to UC Santa Cruz from a California community college should reference <http://assist.org/> to determine which courses are equivalent to these required courses.

California community college students who are prepared for their major and achieve a certain GPA may be eligible for a transfer admissions guarantee (TAG); for more information, visit TAG.

Getting Started as a University Student

Transfer students admitted to UC Santa Cruz in the applied physics major who have satisfied the above screening requirements may declare the major immediately upon arrival at UC Santa Cruz. They should contact the undergraduate adviser to draw up an academic plan. Students who are proposed in a different major (other than physics (astrophysics) or applied physics) and have advanced standing when they come UC Santa Cruz require permission from the department to change into the major.

Letter Grade Policy

All courses used to satisfy any of the applied physics major requirements must be taken for a letter grade, except the programming requirement and chemistry.

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Students who complete a major sponsored by the Physics Department cannot complete a second major sponsored by the Physics Department or a physics minor.

Study Abroad

Honors

The department awards "honors" (3.5 grade point average or better) and "highest honors" (3.8 grade point average or better) to top graduating students each year. The department also awards "honors" for outstanding work on the senior thesis, made upon the recommendation of the senior thesis supervisor and the thesis technical adviser.

Timely Graduation and Alternative Plans

- In order to graduate in time, it is extremely important that students start their senior thesis as early as possible, by the end of the junior year for 4-year students and by the beginning of the second year for transfer students. PHYS 182 is a course that teaches students effective writing in physics for the senior thesis, but it is not the point at which the thesis should be started. For further information about the senior thesis, see Senior Thesis.
- Students who join a major program of the Physics Department with some of the required courses completed, or have room in their program for additional courses, should consult with the Physics Department undergraduate adviser.

- Students who fall behind the planners should consult the Physics Department undergraduate adviser and Alternatives.
- All the transfer major planners assume that Intersegmental General Education Transfer Curriculum (IGETC) has been completed in community college, or has been partially completed and can be finished while at UC Santa Cruz (including summers).

Requirements and Planners

Course Requirements

Lower-Division Courses

Choose one of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Plus all of the following courses:

MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5
PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1
PHYS 5B	Introduction to Physics II	5
PHYS 5M	Introduction to Physics Laboratory	1
PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory	1
PHYS 5D	Introduction to Physics IV	5

Plus one of the following courses:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5

Plus one of the following courses or equivalent:

CSE 5J	Introduction to Programming in Java	5
CSE 20	Beginning Programming in Python	5
ASTR 119	Introduction to Scientific Computing	5
PHYS 115	Computational Physics	5

Upper-Division Courses

All of the following courses:

PHYS 102	Modern Physics	5
PHYS 116A	Mathematical Methods in Physics	5
PHYS 116B	Mathematical Methods in Physics	5
PHYS 116C	Mathematical Methods in	5

	Physics	
PHYS 105	Mechanics	5
PHYS 110A	Electricity, Magnetism, and Optics	5
PHYS 110B	Electricity, Magnetism, and Optics	5
PHYS 112	Thermodynamics and Statistical Mechanics	5
PHYS 133	Intermediate Laboratory	5
PHYS 134	Physics Advanced Laboratory	5

Students may take ECE 135/ECE 135L instead of PHYS 110A and PHYS 110B, and PHYS 160 instead of PHYS 134. This is not recommended for students who wish to pursue graduate studies in physics.

PHYS 133 is offered all three terms. PHYS 134 (for physics B.S. and applied physics B.S. majors) is offered in the winter and spring terms. Capacity in the lab courses is limited, and they should be taken as early as possible.

MATH 21 and MATH 24 can substitute for PHYS 116A.

PHYS 116C is waived for students who are pursuing a dual major in applied physics and a mathematics B.A., and take MATH 107 in the year 2017 or later.

Programming Requirement

Students in the applied physics B.S. major have to satisfy a computer programming requirement by taking one of the courses listed in the major requirements given above. Of these courses, ASTR 119/EART 119 teaches programming and simple applications. PHYS 115 does not teach programming; it assumes basic programming ability in Python, C++ or a similar language and discusses numerical techniques relevant to physics. The other courses listed teach programming. Students may also satisfy the computer programming requirement by demonstrating their knowledge of programming to a faculty member designated by the Physics Department. For instructions on how to demonstrate your programming skills, go to Completing the Major.

Electives

Complete three courses, each 5 credits or more, chosen from the following:

PHYS 115	Computational Physics	5
PHYS 120	Polymer Physics	5
PHYS 139A	Quantum Mechanics I	5
PHYS 139B	Quantum Mechanics II	5
PHYS 150	Quantum Computing	5
PHYS 155	Solid State Physics	5
PHYS 156	Applications of Solid State Physics	5
PHYS 160	Practical Electronics	5
PHYS 180	Biophysics	5
AM 107	Introduction to Fluid Dynamics	5
AM 114	Introduction to Dynamical Systems	5
ASTR 111	Order-of-Magnitude Astrophysics	5
CHEM 122	Principles of Instrumental	5

CHEM 146C	Analysis Advanced Laboratory in Physical Chemistry	3
CHEM 163B	Chemical Thermodynamics	5
CHEM 164	Physical Chemistry Laboratory	5
EART 121	The Atmosphere	5
EART 160	Planetary Science	5
EART 172	Geophysical Fluid Dynamics	5
ECE 101	Introduction to Electronic Circuits	5
ECE 102	Properties of Materials	5
ECE 130	Introduction to Optoelectronics and Photonics	5
ECE 136	Engineering Electromagnetics	5
ECE 115	Introduction to Solid Mechanics	5
ECE 118	Introduction to Mechatronics	5

Or other courses with approval of the undergraduate faculty adviser.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy the upper-division disciplinary communication (DC) requirement. Students in the applied physics major satisfy the DC requirement by completing the senior thesis and the following course:

PHYS 182	Scientific Communication for Physicists	5
----------	--	---

Comprehensive Requirement

The comprehensive requirement is satisfied by the submission and approval of a thesis, and the following course:

PHYS 182	Scientific Communication for Physicists	5
----------	--	---

Planners

Year

SCIENCE EDUCATION B.S.

Information and Policies

Introduction

Science seeks to explore and understand the structure and behavior of the natural world through observable physical evidence. The physical sciences, life sciences, and Earth and space sciences each focus on distinct aspects of the natural world. The physical sciences examine and explain matter, motion, energy, and waves. The life sciences examine and explain individual life forms, from molecules to organisms; the interaction of organisms and the physical work within ecosystems; heredity; and biological evolution. The Earth and space sciences help us understand how Earth fits into the universe, the integrated physical and biological systems that influence Earth, and how human activity influences Earth. Although the emphasis and core ideas in these three disciplines are distinct, they all draw on many of the same concepts, such as patterns, scale, cycles and conservation of energy and matter, and many of the same scientific practices, including observation, data analysis and interpretation, and evidence-based argumentation.

Twenty-first century science educators must be able to help their students develop and apply a scientific perspective to a wide range of information. The science education major is designed to prepare future secondary science teachers with a broad background across the sciences—the physical sciences, life sciences, Earth sciences, and space sciences—with advanced specialization in two fields of science (chosen from physics, chemistry, biology, and Earth sciences). The major also integrates education coursework and middle and high school classroom internships designed to develop skills and knowledge relevant to teaching K-12 students in the state of California. Thus the major provides specialized science content preparation, educational theory, and educational practice to produce strong candidates for teacher certification programs.

Cal Teach is one home base for all students in this major, no matter the choices for specialization. Cal Teach provides the required sequence of middle and high school-based internships and associated courses, informally known as CaT1, CaT2, and CaT3, in partnership with schools throughout Santa Cruz County. CaT interns visit an assigned middle or high school science class twice a week (2-3 hours total/week) to observe and support instruction. Each internship placement depends on school schedules and the intern's schedule, interests, and academic preparation. Over the sequence of three internships, each science education major will be exposed to a variety of student ages (e.g., middle school, early high school, late high school), school characteristics (size, student demographics), courses (e.g., 7th grade science, 9th grade integrated science, college prep biology), and host teachers. The CaT seminar courses provide the framework for science education majors to develop

classroom-management strategies, practice communicating scientific concepts for non-specialists (children), and design lessons to teach the science standards currently used in K-12 education. Cal Teach students get to know one another through the small CaT courses that support the internships, and they have use of a student lounge, access to advising for teaching careers, opportunities for professional development, and financial support for expenses specific to prospective science teachers.

Science education majors are also encouraged to gain experience in laboratory and/or field research, and to pursue upper-division coursework emphasizing their own particular areas of scientific interest. Faculty instructors of introductory coursework and Cal Teach staff can provide guidance in selecting upper-division courses and pursuing lab research opportunities. Departmental advising is provided by the Physics Department.

The science education major provides a broad introduction to the major fields of science, specialized coursework in two selected fields, and educational theory and practical work designed for future science teachers. The program is designed to prepare outstanding candidates to enter teaching credential programs after completion. Students earn a Bachelor of Science (B.S.) degree. They do not earn a teaching credential. Most students elect to complete this after graduation. Details of how to prepare for admission to a teaching credential program are available on the department's Careers in K-12 School Teaching page.

There are six combinations of specialization possible: physics/chemistry, physics/biology, physics/Earth and planetary sciences, chemistry/biology, chemistry/Earth and planetary sciences, and biology/Earth and planetary sciences. All six pathways include a set of core courses in science and mathematics, a sequence of three Cal Teach seminar courses with required school-based internships, and two upper-division education courses. In addition, the student has to take courses in each of the two specializations chosen.

Academic Advising for the Program

Academic advising for the major is provided by the Physics Department undergraduate adviser, physicsadvising@ucsc.edu. Transfer students should also consult the Transfer Information and Policy section of this program statement. Students should contact calteach@ucsc.edu as early as possible to be set up to enroll in the Cal Teach internship courses, which are required for the major.

Getting Started in the Major

Because of the broad based nature of the major, with introductory courses in physics, chemistry and mathematics, there is considerable flexibility in what courses are taken in the first two years, as long as enough courses required for the major are completed. However, it is simplest to follow the appropriate major planner given below; students should consult with the physics undergraduate adviser if they want to do something different.

Students should complete at least two courses in the calculus sequence (MATH 11A and MATH 11B or MATH 19A and MATH 19B) in the first year; MATH 19A and MATH 19B are required for students who choose physics as one of their specializations.

Program Learning Outcomes

Learning outcomes summarize the most important knowledge, skills, abilities, and attitudes that students are expected to develop over the course of their studies. The program learning outcomes communicate the faculty's expectations to students, provide a framework for faculty evaluation of the curriculum based on empirical data, and help improve and measure the impact of implemented changes:

- Students will demonstrate knowledge and an understanding of scientific connections across the broad spectrum of the sciences.
- Students will demonstrate advanced knowledge in two areas of specialization.
- Students will show that they have learned laboratory skills in multiple scientific fields, enabling them to take measurements in a laboratory and in the field and analyze the measurements to draw valid conclusions.
- Students will communicate scientific concepts effectively and accurately, both orally and in writing, for both college-level and secondary audiences
- Students will apply strategies to address a diversity of K-12 learners' needs.

Major Qualification Policy and Declaration Process

Major Qualification

Students must complete at least six courses from the lower-division course requirements before they can declare the major. (Lecture/lab combinations count as one course.)

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair by the later date of either 15 days from the date the notification was sent, or one week after the start of instruction during the quarter after the final relevant grade was received (generally in PHYS 5C or PHYS 5D). They also must arrange to meet with their faculty mentor. Within 15 days of receipt of the appeal, after consulting with the faculty mentor, the department chair will either finalize the denial of admission or specify further conditions for admission, and will notify the student and their college of the decision. For more information about the appeal process, see the Appeal Process website.

How to Declare a Major

Students who qualify for the major may submit a petition to declare at any time before enrolling for their third year (or equivalent). Junior transfer students must declare no later than their second term of residency. Students should meet with the

Physics Department undergraduate adviser and prepare an academic plan when they declare the major.

Transfer Information and Policy

Transfer Admission Screening Policy

For students entering UC Santa Cruz in Fall 2021 and later, to be considered for admission to UCSC in the science education major, transfer students must have completed at least six of the lower-division course requirements for the major below with a minimum grade of C (2.0) in each course.

Although not required for admission, transfer students are strongly recommended to have completed the articulated equivalents of a minimum of 10 of the courses required for the major (in the pathway they wish to pursue) before coming to UCSC in order to graduate in a timely manner.

ASTR 2	Overview of the Universe	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5
BIOL 20A	Cell and Molecular Biology	5

PHYS 6C	Introductory Physics III	5
PHYS 6N	Introductory Physics Laboratory	1
STAT 5	Statistics	5

Lecture/lab combinations count as one course.

Either MATH 11A or MATH 19A.

Either MATH 11B or MATH 19B.

Either PHYS 5A and PHYS 5L or PHYS 6A and 6L.

Either PHYS 5B and PHYS 5M or PHYS 6B and 6M.

Either PHYS 5C and PHYS 5N or PHYS 6C and 6N.

Getting Started at UCSC as a Transfer Student

Transfer students admitted to UC Santa Cruz in this major may declare the major at any time after coming to UCSC. Contact physadvn@ucsc.edu for details. Students should also contact calteach@ucsc.edu as soon as possible after coming to UCSC to be set up to enroll in the Cal Teach internship courses, which are required for the major.

Letter Grade Policy

All courses used to satisfy any of the major requirements must be taken for a letter grade.

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Study Abroad

Honors

Honors in the major are awarded to graduating students whose academic performance demonstrates excellence at a grade point average (GPA) of 3.5 or above in the courses used to satisfy major requirements. Highest honors are awarded to those students whose performance demonstrates the highest level of excellence and results in a GPA of 3.8 or above in the courses used to satisfy major requirements. The program faculty reserve the right to withhold honors and highest honors based on other criteria such as an incident of academic dishonesty.

Requirements and Planners

Course Requirements

Lower-Division Courses

Choose one of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 11A	Calculus with Applications	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 11B	Calculus with Applications	5

Plus the following course:

MATH 22	Introduction to Calculus of Several Variables	5
---------	---	---

MATH 22 is waived for a student who chooses their electives from chemistry and biology or from Earth sciences and biology.

Plus one of the following options:

Either these courses		
PHYS 5A	Introduction to Physics I	5

PHYS 5L	Introduction to Physics Laboratory	1
PHYS 5B	Introduction to Physics II	5
PHYS 5M	Introduction to Physics Laboratory	1
PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory	1
or these courses		
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics Laboratory	1
PHYS 6C	Introductory Physics III	5
PHYS 6N	Introductory Physics Laboratory	1

Plus all of the following courses:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1M	General Chemistry Laboratory	2
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2

Plus one of the following options:

Either these courses		
EART 5	California Geology	5
EART 5L	California Geology Laboratory	1
or these courses		
EART 10	Geologic Principles	5
EART 10L	Geologic Principles Laboratory	1
or these courses		
EART 20	Environmental Geology	5
EART 20L	Environmental Geology Laboratory	1

Plus all of the following courses:

BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
BIOE 20C	Ecology and Evolution	5
ASTR 2	Overview of the Universe	5

Plus one of the following options:

Either this course		
STAT 5	Statistics	5
or these courses		
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Plus the following course:

EDUC 50C	CAL Teach 1: Science	2
----------	----------------------	---

A student who has passed the California Subject Examinations for Teachers (CSET) General Science Examination will have the lower-division courses in the two fields that they are not specializing in (see the sections on "Electives" below) waived.

Upper-Division Courses**All of the following courses:**

EART 110A	Evolution of the Earth	5
EART 110L	Evolution of the Earth Laboratory	2

Plus one of the following courses:

EDUC 100A	Cal Teach 2: Science and Mathematics	2
EDUC 100C	Cal Teach 2: Science	2

Plus all of the following courses:

EDUC 185L	Introduction to Teaching: Cal Teach 3	3
EDUC 185C	Introduction to Teaching Science	5

Plus one of the following courses:

EDUC 177	Teaching Culturally and Linguistically Diverse Students Math and Science	5
EDUC 128	Immigrants and Education	5
EDUC 140	Language, Diversity, and Learning	5
EDUC 181	Race, Class, and Culture in Education	5

EDUC 50C, EDUC 100A, EDUC 100C and EDUC 185LT are Cal Teach internship courses (see "Program Description"). The first course in this sequence is offered in the fall and winter terms. Students must apply to enroll in these courses before the priority application deadlines in early May (for fall) and early November (for winter). See the application website for details, or contact calteach@ucsc.edu

Electives

All the courses from any two of the following fields must be completed:

Field 1: Physics

PHYS 5D	Introduction to Physics IV	5
PHYS 102	Modern Physics	5
PHYS 133	Intermediate Laboratory	5

Field 2: Chemistry

CHEM 8A	Organic Chemistry	5
CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8B	Organic Chemistry	5
CHEM 8M	Organic Chemistry Laboratory	2

And one additional 5-credit, upper-division chemistry course (CHEM 163B is strongly recommended for students in chemistry/physics; CHEM 103 for students in

chemistry/biology; CHEM 163A for students in chemistry/Earth sciences)

Field 3: Biology

BIOL 105	Genetics	5
BIOE 107	Ecology	5
BIOE 109	Evolution	5

Field 4: Earth Sciences

EART 110B	Earth as a Chemical System	5
OCEA 90	Fundamentals of Climate	5

(or alternative, as listed with the student study plans below), and one additional 5-credit, upper-division EART course

Disciplinary Communication (DC) Requirement

The disciplinary communication requirement for this major is fulfilled by completing:

Choose one of the following courses:

EDUC 100A	Cal Teach 2: Science and Mathematics	2
EDUC 100C	Cal Teach 2: Science	2

Plus the following course:

EDUC 185L	Introduction to Teaching: Cal Teach 3	3
-----------	---------------------------------------	---

Comprehensive Requirement

The senior capstone requirement for this major is fulfilled by completing:

EDUC 185C	Introduction to Teaching Science	5
-----------	----------------------------------	---

Planners

Note: The planners for the Science Education B.A. were revised on 08/01/19 from a previous group of 12 planners down to two planners, which are designed flexibly to accommodate all six possible pathways through the major.

Four-Year Planner

There are several alternatives to this planner. However, changes to an individual plan must take into account various prerequisites, both within the sequence of courses in a single discipline and between disciplines. Consult with an adviser before attempting an alternative path.

	Fall	Winter	Spring
1st (frosh)	MATH 11A [#]	MATH 11B	STAT 5
	CHEM 1A	CHEM 1B & CHEM 1M	CHEM 1C & CHEM 1N
2nd (soph)	PHYS 6A & PHYS 6L [#]	PHYS 6B & PHYS 6M	PHYS 6C & PHYS 6N
	BIOL 20A	BIOE 20B	

			BIOE 20C
	EART 5 & EART 5L	EDUC 50C**	EDUC 100C
3rd (junior)	ASTR 2	MATH 22*	EDUC 185C
	EART 110A & EART 110L	EDUC diversity course	Field A course
	Field A course	Field A course	
4th (senior)	Field B course	Field B course	Field B course
			EDUC 185L

In addition to the specific courses shown in these planners, a student must complete courses satisfying the CC, IM and TA general education requirements.

#Students choosing physics as one of their fields of specialization must take MATH 19A and 19B instead of MATH 11A and 11B, and the Physics 5 series of courses instead of Physics 6.

*MATH 22 is a prerequisite for CHEM 163A (recommended for chemistry + Earth sciences) and CHEM 163B (recommended for chemistry + physics). MATH 22 is required for this major only if a student chooses physics as one of their fields or chooses the combination chemistry + Earth sciences. Consult your adviser with questions.

**See advance enrollment requirements and process in the Lower-Division Courses section above.

Field A and B refer to the two subject areas a student chooses for specialization. Courses in each field are:

1. Physics: PHYS 5D (fall), PHYS 102 (winter), PHYS 133 (spring)
2. Earth sciences: OCEA 90 (fall), EART 110B & EART 110M (winter), Earth science upper-division elective (spring).
3. Biology: BIOL 105 (fall), BIOE 107 (winter), BIOE 109 (spring)
4. Chemistry (three options):

- a. CHEM 163A (fall), CHEM 8A & CHEM 8L (winter), CHEM 8B & CHEM 8M (spring) for chemistry with Earth sciences
- b. CHEM 8A & CHEM 8L (fall), CHEM 163B (winter), CHEM 8B & CHEM 8M (spring) for chemistry with physics
- c. CHEM 8A & CHEM 8L (fall), CHEM 8B & CHEM 8M (winter), CHEM 103 (spring) for chemistry with biology

Transfer Planner

	Fall	Winter	Spring
1st (junior)	EART 5 & EART 5L	EDUC 50C**	EDUC 100C
	ASTR 2	MATH 22	Field A course
	Field A course	Field A course	EDUC 185C
2nd (senior)	Breadth course 1	Breadth course 2	Breadth course 3
	EART 110A & EART 110L	EDUC diversity course	EDUC 185L
	Field B course	Field B course	Field B course

*MATH 22 is a prerequisite for CHEM 163A (recommended for chemistry + Earth sciences) and CHEM 163B (recommended for chemistry + physics). A student who has completed the equivalent at their community college will not need to complete this course at UCSC. MATH 22 is required for this major only if a student chooses physics as one of their fields or chooses the combination chemistry + Earth sciences. Consult your adviser with questions.

**See advance enrollment requirements and process in the Lower-Division Courses section above.

This planner assumes that the student has completed all general education requirements, and nine courses out of the 12 breadth requirements in physics, chemistry, biology and mathematics & statistics. The remaining three "breadth courses" can be taken in the three slots shown.

Elective courses for each field are described below the four-year planner. If courses in Field A cannot be taken in the junior year, they can be exchanged with the breadth courses shown in the senior year.

PHYSICS MINOR

Course Requirements

Lower-Division Courses

Choose one of the following options:

Either these courses

PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1
PHYS 5B	Introduction to Physics II	5
PHYS 5M	Introduction to Physics Laboratory	1
PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory	1

or these courses

PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 6B	Introductory Physics II	5
PHYS 6M	Introductory Physics Laboratory	1
PHYS 6C	Introductory Physics III	5
PHYS 6N	Introductory Physics Laboratory	1

PHYS 6A/PHYS 6L, PHYS 6B/PHYS 6M, PHYS 6C/PHYS 6N with minimum GPA of 3.5

Plus the following course:

PHYS 5D	Introduction to Physics IV	5
---------	----------------------------	---

Plus one of the following courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

Plus one of the following courses:

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Math 20B can only be taken if a student has taken Math 20A instead of Math 19A.

Plus all of the following courses:

MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5

Upper-Division Courses

All of the following courses:

PHYS 102	Modern Physics	5
PHYS 133	Intermediate Laboratory	5

Plus three elective courses

These can be any physics upper-division courses, or courses from the following list:

AM 107	Introduction to Fluid Dynamics	5
AM 114	Introduction to Dynamical Systems	5
ASTR 111	Order-of-Magnitude Astrophysics	5
ASTR 112	Physics of Stars	5
ASTR 113	Introduction to Cosmology	5
ASTR 117	High Energy Astrophysics	5
ASTR 118	Physics of Planetary Systems	5
EART 121	The Atmosphere	5
EART 160	Planetary Science	5
EART 172	Geophysical Fluid Dynamics	5
ECE 101	Introduction to Electronic Circuits	5
ECE 102	Properties of Materials	5
ECE 103	Signals and Systems	5
ECE 130	Introduction to Optoelectronics and Photonics	5
ECE 136	Engineering Electromagnetics	5
ECE 141	Feedback Control Systems	5
ECE 171	Analog Electronics	5
ECE 172	Advanced Analog Circuits	5
ECE 178	Device Electronics	5
MATH 130	Celestial Mechanics	5

The elective courses cannot be offered by the department that sponsors the student's major. Other courses may be taken as electives with the approval of the Physics Department undergraduate faculty adviser.

Students who complete a major sponsored by the Physics Department cannot complete a second major sponsored by the Physics Department or the Physics Minor.

Contiguous Bachelor's/Master's Pathway

CONCENTRATION AREAS FOR THE B.S./M.S. PATHWAY

Materials and Device Physics

This concentration prepares students who are interested in pursuing industrial jobs in the areas of materials science, semiconductors, and optoelectronic devices.

Elective courses include CHEM 261, CHEM 269, ECE 201, ECE 218, ECE 218L, ECE 223, ECE 231, PHYS 231, PHYS 232, PHYS 233, PHYS 242.

Energy and the Environment

This concentration prepares students who are interested in pursuing industrial or government jobs in the areas of sustainable-energy technologies, environmental and climate change and scientific policy related to these areas.

Elective courses include CHEM 268, CHEM 269, EART 220, EART 254, EART 272, EART 280D, ECON 250, ECON 259B, ENVS 271, PHYS 233, PHYS 242.

Computational Physics

This concentration prepares students who are interested in pursuing industrial or government jobs in the areas related to using computational methods to solve applied problems as well as computer-based visualization methods for data presentation. Students interested in computational methods in biology could also consider the concentration in medical biophysics.

Elective courses include AM 215, BME 205, CHEM 265, ECE 215, CSE 210A, CSE 204, CSE 202, CSE 240, CSE 261, PHYS 242.

Medical Bio-Physics

This concentration prepares students who are interested in pursuing industrial and hospital jobs in the areas of medical technology, biomolecular engineering, and biophysics.

Elective courses include AM 215, BME 205, BME 215, CHEM 200A, CHEM 255, BIOL 200B, PHYS 180.

Graduate Program

The Physics Department offers graduate programs leading to the Master of Science (M.S.) and/or the Doctor of Philosophy (Ph.D.) degrees. Each student has a faculty adviser who helps to determine which courses are most appropriate, taking into account the student's background and interests. The student-faculty ratio is low so that M.S. and Ph.D. students can work closely with faculty and pursue programs that fit their individual needs. Research is currently conducted in theoretical and experimental particle physics, theoretical and experimental condensed matter physics (including materials physics and biophysics), and in theoretical and experimental/observational high-energy astrophysics (including cosmology).

Students may obtain a master's degree through coursework (eight physics graduate courses) and submission of an

approved thesis. The thesis requirement may be waived by passing four sections of the written Ph.D. qualifying examination. Master's candidates are encouraged to write a research thesis and may do so in any of the research fields in the program, thereby developing laboratory and computational skills in areas such as electronics design, computer simulation and visualization, cryogenics, X-ray scattering, complex novel materials and devices, or materials science. Each M.S. student is assigned a faculty adviser who helps to design a coursework plan suited to the interests of the student.

Physics students and faculty use a number of UCSC research facilities described at the beginning of this section and elsewhere in this catalog, including facilities of the Santa Cruz Institute for Particle Physics (SCIPP) and the UC Observatories (headquartered at UCSC). There is strong interaction with other disciplines, especially astronomy and astrophysics, biology, chemistry, Earth sciences, electrical engineering, and mathematics. Proximity to the SLAC National Accelerator Laboratory and the Stanford Synchrotron Radiation Laboratory provides additional local research opportunities. UCSC faculty and graduate students also participate in research programs at CERN in Geneva, Los Alamos, Oak Ridge National Laboratory, NASA Ames, NREL, Lucent, Xerox, IBM, Bell Labs, and other national and international laboratories.

Application materials and brochures describing the physics M.S. and Ph.D. graduate programs in more detail may be obtained by visiting the Physics Department website or by contacting the Division of Graduate Studies.

PHYSICS M.S.

Introduction

The Physics Department welcomes students interested in the master's degree. Master's candidates can perform research in any of the areas covered by the department. They develop laboratory and computational skills which are of value in many fields. These include electronics design, computer simulation and visualization, cryogenics, X-ray scattering, complex novel materials and devices, materials science and biophysics. Each M.S. student is assigned a faculty adviser who helps to design a coursework plan suited to the interests of the student.

Physics students and faculty use a number of UC Santa Cruz research facilities described at the beginning of this section and elsewhere in this catalog, including facilities of the Santa Cruz Institute for Particle Physics (SCIPP) and the UC Observatories (headquartered at UC Santa Cruz). There is strong interaction with other disciplines, especially astronomy and astrophysics, biology, chemistry, Earth sciences, electrical engineering, and mathematics. Proximity to the SLAC National Accelerator Laboratory and the Stanford Synchrotron Radiation Laboratory provides additional local research opportunities. UC Santa Cruz faculty and graduate students also participate in research programs at CERN in Geneva, Los Alamos, Oak Ridge National Laboratory, NASA

Ames, NREL, Lucent, Xerox, IBM, Bell Labs, and other national and international laboratories.

Application materials and brochures describing the physics M.S. and Ph.D. graduate programs in more detail may be obtained by visiting the Physics Department website or by contacting the Division of Graduate Studies.

Students pursuing the Ph.D. degree can apply for a master's degree upon successful completion of the requirements for a master's degree.

Requirements

Course Requirements

The following courses are required for M.S. students:

PHYS 202	Introduction to Teaching in Physics	1
PHYS 210	Classical Mechanics	5
PHYS 212	Electromagnetism I	5
PHYS 214	Electromagnetism II	5
PHYS 215	Introduction to Non-Relativistic Quantum Mechanics	5
PHYS 216	Advanced Topics in Non-Relativistic Quantum Mechanics	5
PHYS 219	Statistical Physics	5

Choose two of the following courses:

PHYS 217	Quantum Field Theory I	5
PHYS 218	Quantum Field Theory II	5
PHYS 220	Theory of Many-Body Physics	5
PHYS 221A	Introduction to Particle Physics I	5
PHYS 221B	Introduction to Particle Physics II	5
PHYS 222	Quantum Field Theory III	5
PHYS 224	Particle Astrophysics and Cosmology	5
PHYS 226	General Relativity	5
PHYS 231	Introduction to Condensed Matter Physics	5
PHYS 232	Condensed Matter Physics	5
PHYS 233	Advanced Condensed Matter Physics	5
PHYS 234	Soft Condensed Matter Physics	5
PHYS 240	Polymer Physics	5
PHYS 242	Computational Physics	5
PHYS 251	Group Theory and Modern Physics	5
PHYS 290	Special Topics	5

With approval from the graduate committee chair, courses from outside of physics may be used as electives toward the M.S. degree.

M.S. Thesis Requirement

Students may obtain a master's degree through coursework (nine physics graduate courses) and submission of an approved thesis. The thesis requirement may be waived by passing four sections of the written pre-qualifying examination. Master's candidates are encouraged

to write a research thesis and may do so in any of the research fields in the program, thereby developing laboratory and computational skills in areas such as electronics design, computer simulation and visualization, cryogenics, X-ray scattering, complex novel materials and devices, or materials science. Each M.S. student is assigned a faculty adviser who helps to design a coursework plan suited to the interests of the student.

Other Requirements

Applying for Graduation

Students must apply for graduation in order to receive their M.S. degree. The form can be found here and should be submitted to the Graduate Division.

PHYSICS PH.D.

Introduction

The Physics Department welcomes students interested in the Ph.D. degree. Doctoral candidates can perform research in any of the areas covered by the department, including experimental and theoretical astrophysics, biophysics, condensed matter physics and materials science, cosmology, and particle physics theory and experiment. Each doctoral student is assigned a faculty adviser who helps to design a research project suited to the interests of the student.

Advancement to Candidacy

The following sections are meant to define all that is necessary to advance to candidacy for the Ph.D. degree.

Course Requirements

Core courses

In the first year of study, Ph.D. students are expected to take two core graduate-level courses per quarter from the following list of courses required for the Ph.D. degree:

PHYS 210	Classical Mechanics	5
PHYS 212	Electromagnetism I	5
PHYS 214	Electromagnetism II	5
PHYS 215	Introduction to Non-Relativistic Quantum Mechanics	5
PHYS 216	Advanced Topics in Non-Relativistic Quantum Mechanics	5
PHYS 219	Statistical Physics	5

One or more of these first-year courses can be waived if students have taken equivalent graduate-level courses at their undergraduate institution. However, this requires that the course covers the material in the first-year courses syllabi, that the students obtained a satisfactory grade, and that the student passes the associated written qualifying examination.

First-year students are also required to take the following two courses:

PHYS 205	Introduction to Research in Physics	2
PHYS 202	Introduction to Teaching in	1

Physics

First- and second-year students are required to take the following course every quarter:

PHYS 292 Seminar

Second-year students take advanced graduate classes in their areas of research interest, within or outside the Physics Department, and are strongly encouraged to start pursuing independent research.

Pre-Qualifying Requirements

All students in the Ph.D. program must pass a qualifying examination consisting of five written tests in the areas of mathematical methods for physics, classical mechanics, quantum mechanics, statistical mechanics, and electricity and magnetism. Students have a first opportunity to take these five tests at the beginning of their first year. Once a student passes an examination in any one of the five areas they do not need to take an exam in that area again. If necessary, each student has a second opportunity to pass the written tests at the beginning of the second year. Students with at most one or two failed tests have a third opportunity to pass their remaining tests at the beginning of the winter quarter of their second year. Students who fail any of the remaining tests at this third and last attempt, and students who have not passed three or more of the five written tests after two attempts can either transfer to the terminal M.S. program (the M.S. degree is automatically awarded to students who passed at least four of the five sections, and it requires an additional written research thesis for those who only passed three of the five sections), or appeal to the Graduate Committee to continue on the Ph.D. route. In this latter case, the Graduate Committee considers whether there is evidence of likely success in the Ph.D. program. The committee evaluates and reviews the student's progress toward candidacy, including performance in courses and progress in research, and recommends possible remedial coursework or an oral examination, or recommends that the student transfer to the terminal M.S. route.

Qualifying Examination

After identifying an appropriate research project with their faculty adviser, students form an Oral Qualifying Examination Committee.

At a time determined in consultation with their adviser, the student takes the Oral Qualifying Examination. The student presents their research progress, outlines a path to successful completion of their dissertation work, and answers questions both about their research program and about the research area generally. The graduate adviser and/or the Graduate Committee can provide guidance as to the procedures for selection of committee membership, the format of the examination, and required reporting.

Post-Qualifying Requirements

Dissertation

Dissertation

Students complete a dissertation under the supervision of their research adviser. When the student and adviser agree that the thesis is nearing completion or is complete, the thesis is examined by the student's dissertation reading committee (typically composed of the same members as the Oral Qualifying Examination Committee).

Dissertation Defense

A public dissertation defense is required. Students should work with their committee to confirm a defense date and time. The Physics Department can assist with providing a room for the defense and with publicizing the event. Students should have a final or nearly final draft of their dissertation and provide it to their committee prior to the defense. We suggest at least one month prior, but this is at the committee's discretion. The graduate adviser and/or the Graduate Committee can provide guidance as to the procedures for selection of committee membership, the format of the examination, and required reporting.

Academic Progress

Annual evaluation ordinarily is the joint responsibility of the graduate coordinator and the assigned faculty adviser or the chair of the student's doctoral committee. An evaluation should include a brief review of the student's work to date, with particular attention to the period since the last report, describing the student's progress toward the degree, pointing out any areas in which improvement is recommended or required, and establishing academic objectives for the following period.

The results of annual reviews are committed to writing and signed by the supervisor and another faculty member. This is to ensure evaluation and consent by more than one individual faculty member, who may also be a principal source of financial and other support. Before a doctoral student has advanced to candidacy, the second signer may be the graduate coordinator; after advancement, a second thesis committee member must also sign. The annual evaluations are distributed to the student and kept in the student's file in the department office. They form the basis for decisions about continued financial support, academic probation and/or dismissal, extensions of financial aid beyond normative time, and other matters.

Normative time to degree for the program is five years.

Applying for Graduation

Students should apply for the Ph.D. at the beginning of the term in which they will complete all degree requirements. The necessary form is called Application for the Ph.D Degree and can be found here.

Science Communication

Kresge Annex A

<https://scicom.ucsc.edu>

PROGRAMS OFFERED

Science Communication M.S. (p. 344)

Graduate Program

SCIENCE COMMUNICATION M.S.

Introduction

The Science Communication (SCIC) Master's program is a graduate program comprised of one track: science writing. Students combine a background in scientific research with a desire to communicate science to the general public. The program focuses on the practice of conceiving, reporting, writing, and editing articles on scientific, medical, environmental, and technological subjects for newspapers and magazines, online news outlets, universities and federal agencies, and special publications directed at general readers. The program in science writing offers intensive training in news, features, multimedia storytelling, profiles and essays, and investigative reporting. Graduates receive a Master of Science (M.S.) in science writing. For more information about our graduation rates and other information, please visit our website.

Requirements

Course Requirements

The program accepts 10 students per year. Enrollment in science writing classes is strictly limited to students enrolled in the program. The program consists of one academic year of full-time study, beginning in fall quarter, followed by a full-time summer internship lasting a minimum of 10 weeks. Science Notes, the UCSC online science magazine, is produced annually by the graduate students. Please see the current issue and an archive of past issues on our website.

The program consists of a required sequence of six courses covering the main skills of professional journalism:

SCIC 201A	Reporting and Writing Science News	5
SCIC 201B	The Science Feature	5
SCIC 201C	Profile and Essay Writing	5
SCIC 201D	Policy and Investigative Reporting	5
SCIC 201E	Multimedia Science News	5
SCIC 202	Writing and Editing Workshop	5

Assignments in each course are overseen by practicing journalists and editors, and many course projects are

published regionally and nationally. In addition, students must complete at least two part-time writing and reporting internships during the academic year at media organizations and news offices, through formal arrangements overseen by the Science Communication Program. The six required courses, plus two course-equivalent internships constitute the eight courses (40 credits) required during the academic year. The final requirement is a full-time professional internship in science journalism or public outreach at a venue approved by the program director, for a minimum of 10 weeks. A total of 40 credits are required for the degree.

Other Requirements

Admission to the Science Communication Graduate Program

Students who have an intimate acquaintance with the theory and practice of science, an aptitude for writing, and a strong desire to communicate science to the general public are ideal candidates for the program. All applicants must have a prior degree in science or engineering (B.S./B.A., M.S., or Ph.D.) to be eligible. Other admission requirements are: full-time research experience of at least six months duration; official Graduate Record Exam (GRE) General Test scores; and at least three references from faculty or supervisors familiar with the applicant's research and communications skills. Applications and instructions can be found online through the UCSC Graduate Division website.

Further Information

Details about the Science Communication M.S. program may be obtained from the Science Communication Program office, our website, or by sending e-mail to scicom@ucsc.edu.

Professor Alexander Wolf, Dean

The Baskin School of Engineering has a high-technology focus incorporating programs and curricula that educate students to meet the changing demands of society and a high-technology global marketplace. The school offers a stimulating academic environment that provides a foundation for professional growth as well as a lifetime of learning. The Baskin School's programs and courses prepare students for the human aspects, as well as the technical challenges, of careers in engineering, computer science, and bioinformatics. The Baskin School of Engineering includes the Department of Applied Mathematics, the Department of Biomolecular Engineering, the Department of Computational Media, the Department of Computer Science and Engineering, the Department of Electrical and Computer Engineering, and the Department of Statistics.

GRADUATE STUDY

The Baskin School of Engineering offers 16 graduate programs designed to prepare students for advanced study and research in major areas of biomolecular, computer, and electrical engineering, as well as computer science and statistics and applied mathematics:

- Applied Mathematics M.S. and Ph.D.
- Biomolecular Engineering and Bioinformatics M.S. and Ph.D.
- Computer Engineering M.S.
- Computational Media M.S. and Ph.D.
- Computer Science and Engineering M.S. and Ph.D.
- Games and Playable Media M.S.
- Electrical and Computer Engineering M.S. and Ph.D.
- Scientific Computing and Applied Mathematics M.S.

- Serious Games M.S.
- Statistical Science M.S. and Ph.D.

These programs are described in subsequent sections. The aim of these programs is to develop professionals who can address the complex scientific and technological problems of today and tomorrow.

Graduate Student Affairs Office

The Baskin School of Engineering Graduate Student Affairs/Advising Office offers general advising for prospective and current students in the School of Engineering graduate programs. The office handles general advising, financial support processing, and degree certifications. Graduate students obtain and submit all paperwork requiring departmental approval to the Graduate Student Affairs office. Students may obtain additional information and assistance on the School of Engineering Graduate Student Affairs website.

UNDERGRADUATE STUDY

The School of Engineering offers seven undergraduate Bachelor of Science (B.S.), two Bachelor of Arts (B.A.) and three contiguous B.S./M.S. degree programs in the following majors:

- Biomolecular Engineering and Bioinformatics B.S. or contiguous B.S./M.S.*
- Computer Engineering B.S. or combined B.S./M.S.
- Computer Science B.A. and B.S. or combined B.S./M.S.
- Computer Science: Computer Game Design B.S.
- Electrical Engineering B.S.
- Network and Digital Technology B.A.
- Robotics Engineering B.S.
- Technology and Information Management B.S.
- *The contiguous B.S./M.S. is only available from the bioinformatics concentration in the B.S.

Biomolecular Engineering and Bioinformatics. The biomolecular engineering and bioinformatics major includes the biomolecular engineering (BME) and bioinformatics (BINF) concentrations. The BME concentration is designed for students interested in protein engineering, stem cell engineering, and synthetic biology. The emphasis is on designing biomolecules (DNA, RNA, proteins) and cells for particular functions, and the underlying sciences are biochemistry and cell biology. The BINF concentration

combines mathematics, science, and engineering to explore and understand biological data from high-throughput experiments, such as genome sequencing, gene-expression chips, and proteomics experiments. The program builds upon the research and academic strengths of the faculty in the Biomolecular Engineering Department.

Computer Engineering. The computer engineering curriculum focuses on making digital systems that work. It overlaps with computer science on one end (software systems) and with electrical engineering on the other (digital hardware). The emphasis of our program is on design rather than analysis—on making things work, rather than on explaining the abstract theory of computation or electronics. The program's emphasis on problem solving provides both excellent training for future engineers and a strong foundation for graduate study. The combined B.S./M.S. program provides an opportunity for outstanding undergraduates to begin advanced study and earn both degrees in five years.

Computer Science. The computer science curriculum has options that include topics in hardware and software, giving students a solid grounding in both theoretical and practical aspects of computer technology and computer usage. The bachelor of arts focus is designed to give students a solid grounding in both theoretical and practical topics in computer science, computer engineering, and mathematics while leaving flexibility for a broad program of study, including many courses outside of science and engineering. The bachelor of science curriculum has a stronger concentration in the sciences, with more courses in computer science and computer engineering. Students become proficient in many areas, with a good academic foundation for various careers in the software industry, as well as preparation for graduate school.

Computer Science: Computer Game Design. The computer game design curriculum is a four-year interdisciplinary program that focuses on the technical, dramatic, and artistic elements of computer games. The program provides a rigorous education in computer science, in concert with a broad introduction to those aspects of art, music, narrative, digital media, and computer engineering most relevant to games. An intensive year-long game design studio sequence permits students to create substantial video games as part of a multi-student team. Students receive proficiency in many aspects of computer science, a good academic foundation for careers in the computer game industry or information technology industry, or for the pursuit of graduate studies in computer science, or computer game design.

Electrical Engineering. The electrical engineering curriculum provides a balance of engineering science and design and allows students to specialize in both the traditional topics and the latest subjects in electrical engineering. Students may concentrate their electives in the areas of electronics and optics, communications, or signals and systems. The major is designed to attract motivated students who, upon graduation, will be sought by employers in the high-tech industry. The electrical engineering program is accredited by The Engineering Accreditation Commission of ABET.

Network and Digital Technology. The network and digital technology B.A. program provides students with in-depth knowledge of the underlying structure and function of network and computer technology and the design processes which make these technologies function. The program, through its flexible requirements, is especially tailored to students who wish to combine technology with other fields, such as through a double major or a minor, or who, through the choice of electives, wish to concentrate on the digital design or computer networks aspects of computer engineering in preparation for future employment. The network and digital technology B.A. program is offered by the Computer Science and Engineering Department.

Robotics Engineering. The robotics engineering program prepares graduates for rewarding careers at the interfaces between electrical, computer, and mechanical engineering. UCSC robotics engineering graduates will have a thorough grounding in the principles and practices of robotics and control, and the scientific and mathematical principles upon which they are built; graduates will be prepared for further education (both formal and informal) and for productive employment in industry.

Technology and Information Management. The technology and information management (TIM) curriculum is multidisciplinary and focuses on the fusion of information systems, technology, and business management for two purposes: the use of information systems to solve business problems and the management of technology, which includes new product development and enterprise management. Students must learn the mathematics, science, and technical fundamentals of computer science and engineering as well as understand the environment in which information technology (IT) solutions will be applied—through economics, business, and management of technology courses. It is a rigorous, challenging major for those students wanting to pursue careers in information systems management and the management of technology.

Undergraduate Minors

Undergraduate students may choose from the following nine minor options:

Applied Mathematics. The applied mathematics minor is available to students who wish to develop 1) proficiency in modeling real-life problems using mathematics and 2) knowledge of standard, practical analytical and numerical methods for the solution of these models. This minor could be combined with a major in any of the physical, biological, mathematical, or engineering sciences as preparation for a graduate degree in that field or in applied mathematics.

Assistive Technology. The guiding principle of the assistive technology minor is robotic assistance for people with movement disabilities, which can include such concepts as motorized prostheses, exosuits, motorized wheelchairs, or follow-me luggage.

Bioelectronics and Biophotonics. The bioelectronics and biophotonics minor is primarily focused on electronics and photonics from devices to systems required for interfacing biology with electronics from sensors to actuators and diagnostics.

Bioinformatics. The bioinformatics minor is intended primarily for bioinformatics tool users who are majoring in a biological or chemical specialty. The bioinformatics minor is also appropriate for computer science or computer engineering majors who are considering graduate work in bioinformatics.

Computer Engineering. The computer engineering minor provides a solid foundation in digital hardware, electronics, and computer software, as well as the prerequisite material in mathematics and physics. The minor is well-suited to students who wish to take part in the design of computer and embedded systems in any discipline.

Computer Science. The computer science minor is available for students whose primary interest is in another area, and are interested in the applications of computer science in other areas of study, from art and music to business and science.

Electrical Engineering. The electrical engineering minor provides a solid foundation in the core areas of electronic circuits and signals and systems, as well as the prerequisite material in mathematics and physics. Concentration of upper-division electives in either of the major tracks constitutes substantial and focused work in the discipline of electrical engineering. This minor is particularly suitable for students with majors in applied physics or any School of Engineering major.

Statistics. The statistics minor is available for students who wish to gain a quantitative understanding of how to a) measure uncertainty, and b) make good decisions on the basis of incomplete or imperfect information and apply these skills to their interests in another field. This minor could also be combined with a major in mathematics as preparation for a graduate degree in statistics or biostatistics.

Technology and Information Management. The technology and information management minor provides undergraduates in the School of Engineering as well in other programs and divisions in the university, such as economics and business management economics, the physical and biological sciences, and arts, the opportunity to expand the breadth of their knowledge and training to include the management of information systems and the management of technology.

Undergraduate Advising Office

The Baskin School of Engineering undergraduate advising office offers general advising for prospective and declared undergraduates majoring in School of Engineering programs. The office handles major declarations, transfer credits, course substitutions, articulations, and degree certifications.

Undergraduate students obtain and submit all paperwork requiring departmental approval to the undergraduate advising office. Students may obtain additional information and assistance on the School of Engineering undergraduate advising website.

ADMISSION TO SCHOOL OF ENGINEERING MAJORS

High School Preparation for Engineering Students

It is recommended that high school students intending to apply to a School of Engineering major have completed four years of mathematics (through advanced algebra and trigonometry) and three years of science in high school. Comparable college mathematics and science courses completed at other institutions also serve to properly prepare students for these majors.

College Board Advanced Placement Credit

Prospective students are encouraged to take the College Board Advanced Placement (AP) and International Baccalaureate (IB) Examinations as acceptable scores on these examinations may satisfy both university or major degree requirements. Prospective engineering students should consider taking examinations in computer science, mathematics, economics, chemistry, physics, or biology. Students must provide official examination scores to the UCSC Office of Admissions to be granted credit toward course prerequisites or degree requirements. The following AP and IBH scores are accepted for course credit requirements as follows:

CEEB AP Exam	Score	UCSC Course Credit	Physics: C Mechanics	4 or 5	Physics 6A
Biology	5	Biology 20A, Cell and Molecular Biology; and Biology 20B, Development and Physiology		5	Physics 5A
Chemistry	5	Chemistry 1A, General Chemistry	Physics: C Electricity and Magnetism	4,5	Physics 6C
Computer Science: Exam A	3	Computer Science and Engineering 10, Introduction to Computer Science		5	Physics 5C
	4 or 5	Computer Science and Engineering 20, Beginning Programming in Python	Statistics	4,5	Statistics 5
Economics: Microeconomics	4 or 5	Economics 1, Introductory Microeconomics			
Economics: Macroeconomics	4 or 5	Economics 2, Introductory Macroeconomics			
Mathematics: Calculus AB	3	Mathematics 3 or AM 3, Precalculus			
Mathematics: Calculus AB	4 or 5	Mathematics 3 or AM 3, Precalculus Mathematics 11A, Calculus with Applications Mathematics 19A, Calculus for Science, Engineering and Math			
Mathematics: Calculus BC	3	Mathematics 3 or AM 3, Precalculus Mathematics 11A/B, Calculus with Applications Mathematics 19A, Calculus for Science, Engineering and Math			
Mathematics: Calculus BC	4 or 5	Mathematics 3 or AM 3, Precalculus Mathematics 11A, Calculus with Applications; and Mathematics 3 or AM 3, Precalculus Mathematics 11B, Calculus with Applications Mathematics 19A, Calculus for Science, Engineering and Math; and Mathematics 19B Calculus for Science, Engineering and Math			

International Baccalaureate Credit

IBH Exam	Score	UCSC Course Credit
Computer Science	5	Computer Science and Engineering 20, Beginning Programming in Python
Computer Science	6 or 7	Computer Science and Engineering 20, Beginning Programming in Python

Students may check with the Office of Admissions for details about other AP and IBH examinations that also satisfy university requirements.

Admission as First-Year Students

Students interested in pursuing a School of Engineering major should indicate the major as their first or second choice on the UC application for admissions. Most School of Engineering programs require that students be listed as a proposed major in order to be admitted. The proposed major status is also required to enroll in many BSOE major courses.

Computer Science

Students interested in pursuing a computer science B.S. or B.A. **must** indicate the major on their University of California application for admission. Students who do not indicate this on their application will **NOT** be allowed to declare the computer science major. Students must be admitted as proposed computer science majors in order to declare the major.

Proposed Engineering Major Status

A proposed engineering major status carries several benefits including being connected to advising, receiving pertinent communication, and priority access to enrolling in some required major courses. The School of Engineering majors require students to be listed as a proposed major in one of the following majors in order to declare: biomolecular engineering and bioinformatics, computer engineering, computer science: computer game design, computer science (B.A. and B.S.), technology and information management, electrical engineering or robotics.

Students who are interested in computer science who are **NOT** listed as proposed computer science majors will not be allowed to migrate into the major. Students must properly list computer science as their proposed major.

Students pursuing network and digital technology are not required to be proposed in any BSOE majors in order to declare network and digital technology.

Students in their fourth quarter or beyond who would like to become a proposed major, or students who are proposed and would like to retain their proposed status, must have passed MATH 19A or MATH 20A, and two additional BSOE classes from the following list within their first three quarters: CHEM 1A, CHEM 1B, CSE 12, CSE 13E or CSE 13S, CSE 16, CSE 30, MATH 19B, MATH 20B, PHYS 5A, PHYS 5C, CSE 50, or CSE 58.

Students who are in an engineering proposed major and who do not meet these criteria will be removed from their proposed major. Students who want to change to an engineering proposed major must also meet these criteria. Students that do not meet these criteria can appeal this decision within 15 days of notification. Within 15 days of receipt of the appeal, the student will receive the appeal decision. More information about the appeals process can be found on the Undergraduate Advising website.

Declaring a School of Engineering Major

Students interested in declaring a School of Engineering major can do so by following the major qualification criteria for that major as specified in the corresponding program statement and can also be found on the BSOE Undergraduate Advising Major Qualification Requirements page. Major declaration must be completed by the sixth quarter of study at UCSC, including students declaring a BSOE major as their second major. Students can declare earlier, once major qualification requirements are met. The School of Engineering major declaration process can be found on the BSOE Undergraduate Advising Declare Your Major page.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision within 15 days of notification by following the steps on the BSOE Undergraduate Advising Major Declaration Appeal site. Within 15 days of receipt of the appeal, the student will receive the appeal decision.

If you have further questions concerning the appeal process, please contact the Undergraduate Advising Office at (831) 459-5840 or email advising@soe.ucsc.edu.

Junior Transfer Acceptance to Majors

The School of Engineering strongly encourages applications from transfer students. Due to the prerequisite structure for upper-division courses, prospective transfer students should have completed as many of the lower-division major requirements as possible to complete the degree within a reasonable time. Students must plan carefully because many courses must be taken sequentially.

Students are encouraged to follow the new UC Transfer Pathways. Any student who finishes the UC Transfer Pathways courses for computer science will more than satisfy the admission requirements for transfer to computer science, computer engineering, robotics, and network and digital technology. Any student who finishes the UC Transfer Pathways courses for electrical engineering will more than satisfy the admission requirements for electrical engineering, computer engineering, and robotics. Note that each department will have different GPA requirements for these courses.

Completion of mathematics and engineering courses is essential for transfer students; those applying to selective majors should carefully verify the admission requirements for their major.

Students who apply as transfer students with junior status (90 quarter credits or more of transfer credit) who wish to earn a degree from the School of Engineering must indicate a School of Engineering major as their first choice on their UC application.

Acceptance into the major is based on the student's academic college record and preparation for the major. Applicants are encouraged to take and excel in as many courses that are equivalent to the department's lower-division major requirements as possible. For many School of Engineering majors, this includes completion of a year of calculus (accepted as equivalent to Mathematics 19A-B), linear algebra, differential equations, a year of calculus-based physics courses (accepted as equivalent to Physics 5A, 5B, 5C), and two programming courses are strongly recommended.

Letter Grade Policy

Starting fall 2014, all students admitted to a School of Engineering major, or seeking admission to a major, must take all courses required for that major for a letter grade.

Ethics Requirement

Graduates of the Baskin School of Engineering are expected to become professionals with the highest ethical standards. Knowledge and practice of professional ethics is a requirement for the degree. Examples of professional society codes of ethics are available here and here. Students of the Baskin School of Engineering are also expected to adhere to high ethical standards while pursuing their undergraduate studies.

Substitutions for Courses Taken at UCSC

Undergraduate engineering students who wish to substitute a major course with a course from UC Santa Cruz must first consult the School of Engineering Undergraduate Advising Office. The advising office requires a Petition for Course Substitution be approved before credit for an alternate course can be applied to any School of Engineering major requirement.

Petition forms are available at the undergraduate advising office and online.

Petitions and procedures for approval must be obtained from and submitted to the Undergraduate Advising Office.

Course Equivalencies and Substitutions Taken at an Outside Institution

Once enrolled in the School of Engineering continuing students must have permission to take courses at another institution to apply toward their School of Engineering major or minor requirements.

Community Colleges

Once enrolled in the School of Engineering students who wish to take a course at a California community college must first check Assist.org to see if the course is equivalent at UC Santa Cruz. If the course is not listed on Assist.org, students must submit a course substitution petition to the BSOE Undergraduate Advising Office to have it reviewed for equivalency. Courses that need to be reviewed must be accompanied by a course description and syllabus. It is very helpful if students can provide further evidence of course content, such as examples of programming assignments, homework, or examinations. To guarantee equivalency, departments may sometimes require a grade of B or better.

If the course is approved for equivalency or was on Assist.org, then the student must also receive approval by their major department to take the class at the community college **PRIOR** to taking it. Forms and procedures for approval can be obtained from and submitted to the BSOE Undergraduate Advising Office.

Four-Year Institutions and the UC Education Abroad Program (UCEAP)

Students who intend to take a course at a four-year institution or UC Education Abroad, must submit a Course Substitution Petition to the BSOE Undergraduate Advising Office to have the course reviewed for equivalency. Courses that need to be reviewed must be accompanied by a course description and syllabus. It is very helpful if students can provide further evidence of course content, such as examples of programming assignments, homework, or examinations. To guarantee equivalency, departments may sometimes require a grade of B or better.

If the course is approved for equivalency, then the student must also receive approval by their major department **PRIOR** to taking the class. Forms and procedures for approval can be obtained from and submitted to the BSOE Undergraduate Advising Office.

Personal Computer Requirement

The Baskin School of Engineering (BSOE) requires that all BSOE students own a laptop. A MAC or PC from the last several years is generally acceptable. The exact minimum specifications appear on the Undergraduate Advising website.

SCHOOL-WIDE INFORMATION AND POLICIES

Computing Facilities

The Baskin School of Engineering houses research facilities and teaching laboratories in the Baskin Engineering Building for courses in programming, software design, circuits, electronics, graphics, digital design, and computer and system architecture. Emphasis in these laboratories is on state-of-the-art equipment, including personal computers, engineering workstations, a 1000-processor Linux cluster, logic analyzers, microprocessor development systems, a wireless network for mobile computers, and network support at 100MB/sec. All Unix computers and workstations and most personal computers on campus are networked together, allowing students to access the School of Engineering and the Information Technology Services (ITS) facilities from any computer account on campus. For a more complete description of the computing facilities on campus, see the ITS website.

Prerequisites

Because of the sequential nature of the School of Engineering curricula, most courses have prerequisites, which are listed in the course descriptions. Students should carefully review these descriptions in the catalog and the quarterly Schedule of Classes. Students must have passed all prerequisites of a course for which they are enrolling. Pre-enrolled students who then fail a prerequisite are no longer eligible to be enrolled in the course and will be dropped.

Students who have transferable course work from another institution that appears to satisfy a UCSC course prerequisite, but is not listed in current articulation agreements, should promptly consult with the School of Engineering's staff advisers for guidance. Students will be asked to present records from the other institution to document the course equivalency. Until such evidence has been verified by the department, students attempting to enroll in a course using a prerequisite course that was not completed at UCSC will be informed that they have not satisfied the course prerequisite. (See the Course Substitutions section.)

Permission Numbers

Students not meeting the regular prerequisite requirements for courses sponsored by the Baskin School of Engineering may petition the course instructor to receive a permission number to enroll. The instructor may ask a student to demonstrate the ability and/or potential to succeed in the course or may request additional information to formulate a decision. If no

instructor has been assigned to the course, please contact the Undergraduate Advising Office for direction.

Materials Fee

Students should be aware that some laboratory courses require each student to purchase miscellaneous parts or a material kit for completion of the laboratory work. Some laboratory courses may include consumable (one-time use) parts and materials that are distributed to the entire class. Some laboratory kits include parts that the student will assemble into a project and keep. Please refer to the Baskin Engineering Laboratory Support web page for specific course material-fee amounts.

Miscellaneous Fees

Miscellaneous breakage or loss of equipment fees are assessed to address the cost of damaged laboratory equipment and loss of laboratory materials due to abuse or negligence. This fee is only charged if a student breaks or loses laboratory equipment or materials and is not a mandatory fee charged to all students taking the course. Please refer to the Baskin Engineering Laboratory Support web page for more information.

Applied Mathematics

Baskin School of Engineering

(831) 459-2158

<https://www.soe.ucsc.edu>

PROGRAMS OFFERED

Applied Mathematics Minor (p. 352)

Contiguous Bachelor's/Master's Pathway (p. 353)

Applied Mathematics M.S. (p. 354)

Applied Mathematics Ph.D. (p. 355)

Scientific Computing and Applied Mathematics M.S. (p. 357)

Scientific Computing Designated Emphasis (p. 358)

Applied mathematics is a discipline devoted to the use of mathematical methods and reasoning to solve real-world problems of a scientific or decision-making nature in a wide variety of subjects, principally (but not exclusively) in engineering, medicine, the physical and biological sciences, and the social sciences.

The Applied Mathematics Department at UC Santa Cruz offers master's and doctoral programs in Applied Mathematics, and a master's program in Scientific Computing and Applied Mathematics (SciCAM). The goal of these programs is to help students develop into independent scholars who are prepared for productive careers in research, teaching, and industry. The department also offers a designated emphasis in scientific computing, and an undergraduate minor in applied mathematics.

Additional information on these programs can be found on the department's website.

Undergraduate Program

APPLIED MATHEMATICS MINOR

The applied mathematics minor is available for students who wish to develop (1) proficiency in modeling real-life problems using mathematics and (2) knowledge of standard, practical analytical and numerical methods for the solution of these models. This minor could be combined with a major in any of the physical, biological, mathematical, or engineering sciences as preparation for a graduate degree in that field or in applied mathematics.

Students are required to take the following courses:

Course Requirements

Lower-Division Courses

Basic calculus sequence:
Either these

courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5
or these		
courses		
MATH 20A	Honors Calculus	5
MATH 20B	Honors Calculus	5
MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5

Upper-Division Courses

Complete one of the following sequences:

Either these

courses		
AM 10	Mathematical Methods for Engineers I	5
AM 20	Mathematical Methods for Engineers II	5
or these		
courses		
MATH 21	Linear Algebra	5
MATH 24	Ordinary Differential Equations	5
or these		
courses		
PHYS 116A	Mathematical Methods in Physics	5
PHYS 116B	Mathematical Methods in Physics	5

Note: Students who complete MATH 21 and MATH 24 or PHYS 116A and PHYS 116B, are strongly recommended to complete the MATLAB self-paced tutorial.

Plus one course from each of the following categories:

Probability Theory

CSE 107	Probability and Statistics for Engineers	5
STAT 131	Introduction to Probability Theory	5

Dynamical Systems:

AM 114	Introduction to Dynamical Systems	5
AM 214	Applied Dynamical Systems	5

Introduction to Numerical Methods:

AM 147	Computational Methods and Applications	5
PHYS 115	Computational Physics	5

Partial Differential Equations:

AM 212A	Applied Mathematical Methods I	5
PHYS 116C	Mathematical Methods in Physics	5
MATH 107	Partial Differential Equations	5

Plus one applied-mathematics elective from the following list:

Applied Mathematics elective:		
AM 107	Introduction to Fluid Dynamics	5
AM 115	Stochastic Modeling in Biology	5
AM 198	Independent Study or Research	5
AM 212B	Applied Mathematical Methods II	5
AM 213A	Numerical Linear Algebra	5
AM 213B	Numerical Methods for the Solution of Differential Equations	5
AM 215	Stochastic Modeling in Biology	5
AM 216	Stochastic Differential Equations	5
AM 217	Introduction to Fluid Dynamics	5
AM 231	Nonlinear Control Theory	5
AM 232	Applied Optimal Control	5
AM 250	An Introduction to High Performance Computing	5
ECE 103	Signals and Systems	5
ECE 115	Introduction to Solid Mechanics	5
ECE 141	Feedback Control Systems	5
MATH 103A	Complex Analysis	5
MATH 117	Advanced Linear Algebra	5
MATH 121A	Differential Geometry	5
PHYS 105	Mechanics	5
PHYS 139A	Quantum Mechanics I	5
PHYS 139B	Quantum Mechanics II	5
PHYS 171	General Relativity, Black Holes, and Cosmology	5
STAT 132	Classical and Bayesian Inference	5

Students may also propose other electives which use applied mathematical methods, subject to approval by the department.

Contiguous Bachelor's/Master's Pathway

4+1 CONTIGUOUS PATHWAY LEADING TO THE SCICAM M.S. DEGREE PROGRAM

The 4+1 pathway into the SciCAM M.S. program is an option that allows undergraduates at UC Santa Cruz to (1) take the SciCAM foundational courses during their undergraduate degree in preparation to join the 1-year track of the SciCAM

program, and (2) apply to SciCAM through a streamlined application process. Undergraduate students currently enrolled in approved programs (currently, the B.A. in mathematics, or the B.S. in computer science, the B.S. in robotics engineering, the B.S. in physics, the B.S. in applied physics and the B.S. in physics [astrophysics]) have the opportunity, any time between the start of their junior year and the end of the fall quarter of their senior year, to join the 4+1 contiguous pathway leading to the SciCAM degree program. Qualified undergraduates from other undergraduate majors may also apply to the pathway and their applications will be considered on a case by case basis.

The requirements for admission into the 4+1 pathway are (1) a GPA in the major of 3.5 or more, and (2) to have taken, or to have a plan to take, at least two of the three SciCAM foundational courses before the end of their senior year. Note that some of the foundational courses are waived depending on the student's major. Interested students should set up a meeting with the SciCAM adviser to discuss their curriculum plan and fill the application forms. The ultimate deadline for application to the pathway is the end of the fall quarter of the senior year, although students are encouraged to apply significantly earlier, ideally at the same time as their major declaration.

Students in the pathway who apply to SciCAM through the streamlined application process are not guaranteed admission, although we do expect to admit anyone who has passed all the foundational courses and has maintained a GPA in the major of 3.5 or more. Once accepted into the SciCAM program, students from the pathway will follow the same requirements as any other students in the one-year track with anticipated graduation in June of their 5th year for Plan II (comprehensive exam track) students, and the end of the summer of their fifth year for Plan I (thesis track) students.

Relationship of SciCAM Masters program and AM Doctoral Program

Students in the SciCAM M.S. program interested in an academic career will be strongly encouraged to apply to the AM Ph.D. program. Applications are reviewed in the standard academic cycle, so that students interested in applying to the AM Ph.D. program are encouraged to discuss this option with the graduate director in the fall of each year.

Transfer Credit

Up to three UCSC courses fulfilling the degree requirements of the SciCAM degree may be taken before beginning the graduate program. However, students will still need to take courses totaling 35 credits as graduate students to satisfy

university requirements. Note that this limit does not apply to the foundational requirements, which may all be taken prior to the start of the SciCAM program without penalty.

Up to one course from other institutions may be applied to the M.S. degree course requirements. Petitions should be submitted along with the transcript from the other institution or UCSC Extension. For courses taken at other institutions, copies of the syllabi, exams, and other course work should accompany the petition. Such petitions are not considered until the completion of at least one quarter at UCSC.

Review of Progress

Each year, the faculty reviews the progress of every student in all programs and tracks. Students not making adequate progress toward completion of degree requirements are subject to dismissal from the program (see the Graduate Handbook for the policy on satisfactory academic progress).

Graduate Program

The Department of Applied Mathematics offers master's and doctoral programs in applied mathematics, as well as a master's program in scientific computing and applied mathematics, and a designated emphasis in scientific computing.

The goal of the Applied Mathematics graduate program is to help students develop into independent scholars who are prepared for productive careers in research, teaching, and industry. The Master of Science (M.S.) degree may be used as a terminal degree or as the first step toward the associated Doctor of Philosophy degree (Ph.D.).

The goal of the SciCAM M.S. program is primarily to prepare students interested in scientific computing for productive careers in industry. However, it also serves as excellent preparation for students who prefer to pursue an academic career and wish to transfer into a Ph.D. program later, either in scientific computing/applied mathematics, or in a field related to their undergraduate degree.

APPLIED MATHEMATICS M.S.

Introduction

Requirements

Course Requirements

All applied mathematics M.S. students must complete the core courses listed below.

Core Courses

All applied mathematics M.S. students must complete the following core courses:

AM 211	Foundations of Applied Mathematics	5
AM 212A	Applied Mathematical Methods	5

	I	
AM 213A	Numerical Linear Algebra	5
AM 213B	Numerical Methods for the Solution of Differential Equations	5
AM 214	Applied Dynamical Systems	5
AM 280B	Seminar in Applied Mathematical Modeling	2

Electives

In addition to these 27 credits, master of science (M.S.) students must complete three additional 5-credit courses, including a first-year elective (see below), for a total requirement of 42 credits. All elective courses must be approved by the student's official adviser.

First-year electives are designed to prepare students for their ultimate research emphasis within applied mathematics. They must be taken during the first year, and must be selected from the following list:

AM 129	Foundations of Scientific Computing for Scientists and Engineers	5
AM 209	Foundations of Scientific Computing	5
AM 216	Stochastic Differential Equations	5
AM 217	Introduction to Fluid Dynamics	5
AM 227	Waves and Instabilities in Fluids	5
AM 229	Convex Optimization	5
AM 230	Numerical Optimization	5
AM 231	Nonlinear Control Theory	5
AM 232	Applied Optimal Control	5
AM 238	Fundamentals of Uncertainty Quantification in Computational Science and Engineering	5
AM 250	An Introduction to High Performance Computing	5
AM 260	Computational Fluid Dynamics	5
AM 275	Magnetohydrodynamics	5
STAT 203	Introduction to Probability Theory	5

Students cannot receive credit for both AM 129 and AM 209.

M.S. students will be allowed to substitute one elective course for an independent study course with their required research project (see capstone requirement).

M.S. Project Requirements

A capstone project is required for the M.S. degree.

For the M.S. degree, students will conduct a capstone research project. Students must submit a proposal to the potential faculty sponsor. If the proposal is accepted, the faculty member will become the sponsor and will supervise the research and writing of the project. The project will involve the solution of a problem or problems from the selected area of application. When the project is completed and written, it will be submitted to and must be accepted by a committee of two individuals, consisting of the faculty adviser and one additional reader. Additional readers will be chosen

appropriately from within the Applied Mathematics Department or outside of it. Either the adviser or the additional reader must be from within the Applied Mathematics Department.

Relationship of Master's and Doctoral Programs

The M.S. and Ph.D. programs are freestanding and independent, so that students can be admitted to either. Students completing the M.S. program may proceed into the Ph.D. program (provided they pass the pre-qualifying examination), and students in the Ph.D. program can receive a non-terminal M.S. degree upon completion of M.S. requirements, including the capstone research project.

Transfer Credit

Up to three School of Engineering courses fulfilling the degree requirements of the M.S. degree may be taken before beginning the graduate program through the concurrent enrollment program. Courses from other institutions may not be applied to the M.S. degree course requirements.

Petitions should be submitted along with the transcript from the UC Santa Cruz Extension. Such petitions are not considered until the completion of at least one quarter at UCSC. At most, a total of three courses may be transferred from concurrent enrollment.

Students who complete an M.S. degree in applied mathematics at UCSC and continue on to a Ph.D. program in applied mathematics at UCSC can transfer all applicable courses taken during the M.S. to the Ph.D. program, provided that such students meet the minimum residency requirement for Ph.D. programs, as specified by the UCSC Graduate Division.

Foreign Language Requirements

Applicants whose native language is not English must take the TOEFL or IELTS exam and submit an official score report with the admission application. For admission purposes, the minimum passing score for the TOEFL exam must be 570 on the paper-based, 230 on the computer-based, or 89 on the internet-based test. The minimum passing score for the IELTS exam is 7. If you have received a degree from an English-speaking institution or have lived in the United States for more than four years, you are eligible for a TOEFL exemption.

To be considered for teaching assistant support you must have scored a minimum of 26 on the spoken portion of the Internet-based TOEFL or an overall 8 on the IELTS. International students may also participate in the Graduate Preparation Program (GPP) prior to starting the graduate program. Successful completion of the GPP satisfies the English-language requirement for teaching assistants.

Applying for Graduation

All candidates for a degree must submit an Application for Master's Degree to the Graduate Student Affairs Office by the date stated in the Academic and Administrative Calendar for the quarter they wish to receive the degree. The deadline for

degree applications is typically in the second week of the quarter. A student is required to be registered during the quarter in which the degree is conferred. For more information about applying for graduation, visit the Baskin School of Engineering Graduate Studies website.

Review of Progress

Each year, the faculty reviews the progress of every student in all programs and tracks. Students not making adequate progress toward completion of degree requirements are subject to dismissal from the program (see the Graduate Handbook for the policy on satisfactory academic progress). Also, please refer to specific guidelines on the annual student reviews.

APPLIED MATHEMATICS PH.D.

Introduction

Advancement to Candidacy

Course Requirements

Required Core Courses

All applied math Ph.D. students must complete the following core courses:

AM 211	Foundations of Applied Mathematics	5
AM 212A	Applied Mathematical Methods I	5
AM 213A	Numerical Linear Algebra	5
AM 213B	Numerical Methods for the Solution of Differential Equations	5
AM 214	Applied Dynamical Systems	5
AM 280B	Seminar in Applied Mathematical Modeling	2

Electives

In addition to these 31 credits, doctor of philosophy (Ph.D.) students must complete five additional 5-credit courses, including a first-year elective (see below), for a total requirement of 56 credits. All elective courses must be approved by the student's official adviser.

First-year electives are designed to prepare students for their ultimate research emphasis within applied mathematics. These electives can be selected from any 5-credit graduate AM courses (level 200 and above).

Ph.D. students who already have an M.S. degree (or equivalent) will be allowed to substitute up to two elective courses with corresponding numbers of credits of independent study (i.e., 5 or 10), during which they conduct research with their adviser toward their advancement to candidacy.

Transfer Credit

Up to three School of Engineering courses fulfilling the degree requirements of the Ph.D. degree may be taken before

beginning the graduate program through the concurrent enrollment program. Ph.D. students who have previously earned a master's degree in a related field at another institution may substitute courses from their previous university with approval of the adviser and the graduate committee. Courses from other institutions may not be applied to the M.S. degree course requirements. Petitions should be submitted along with the transcript from the other institution or UCSC Extension. For courses taken at other institutions, copies of the syllabi, exams, and other course work should accompany the petition. Such petitions are not considered until the completion of at least one quarter at UCSC. At most, a total of three courses may be transferred from concurrent enrollment and other institutions.

Students who complete the M.S. degree in Applied Mathematics or the M.S. degree in Scientific Computing and Applied Mathematics at UCSC and continue on to the Ph.D. program in Applied Mathematics at UCSC can transfer all applicable courses taken during the M.S. to the Ph.D. program, provided that such students meet the minimum residency requirement for Ph.D. programs, as specified by the UCSC Graduate Division.

Foreign Language Requirements

Applicants whose native language is not English must take the TOEFL or IELTS exam and submit an official score report with the admission application. For admission purposes, the minimum passing score for the TOEFL exam must be 570 on the paper-based, 230 on the computer-based, or 89 on the internet-based test. The minimum passing score for the IELTS exam is 7. If you have received a degree from an English-speaking institution or have lived in the United States for more than four years, you are eligible for a TOEFL exemption.

To be considered for teaching assistant support you must have scored a minimum of 26 on the spoken portion of the Internet-based TOEFL or an overall 8 on the IELTS. International students may also participate in the Graduate Preparation Program (GPP) prior to starting the graduate program. Successful completion of the GPP satisfies the English-language requirement for teaching assistants.

Teaching Requirement

Ph.D. students will be required to serve as teaching assistants for at least two quarters during their graduate study. Certain exceptions may be permitted for those with extensive prior teaching experience, for those who are not allowed to be employed due to visa regulations, or for other reasons approved by the graduate director.

Pre-Qualifying Requirements

At the end of the first year, all Ph.D. students will take a pre-qualifying examination covering the (non-seminar) core courses. This examination will have two parts: an in-class written examination, followed by a take-home project. Ph.D. students who do not pass this examination will be allowed to retake it before the start of the following fall quarter; if they fail the second examination they will not be allowed to

continue in the Ph.D. program, but will have the option to continue into the M.S. program and exit with the M.S. as the terminal degree.

Qualifying Examination

Ph.D. students must complete the oral proposal defense, through which they advance to candidacy, by the end of the spring quarter of their third year. The proposal defense is a public seminar followed by an oral qualifying examination given by the qualifying committee. The student's oral presentation must be approximately 45 minutes in length. Applied mathematics students will also be required to submit a substantial written document describing their research to date as well as their Ph.D. proposal ahead of time to the qualifying examination committee.

Upon successful completion of the qualifying examination, a dissertation reading committee will be formed, consisting of the dissertation supervisor and at least two additional readers appointed by the graduate director upon recommendation of the dissertation supervisor. At least one of these additional readers must be in the Applied Mathematics Department. The committee is subject to the approval of the Graduate Division.

Students will advance to candidacy after they have completed all course requirements (including removal of all incomplete grades), passed the pre-qualifying examination and the qualifying examination, nominated their dissertation reading committee, and paid the advancement to candidacy fee. Under normal progress, a student will advance to candidacy by the end of the spring quarter of her/his third year. A student who has not advanced to candidacy by the start of the fourth year will be subject to academic probation.

Post-Qualifying Requirements

Relationship of Master's and Doctoral Programs

The M.S. and Ph.D. programs are freestanding and independent, so that students can be admitted to either. Students completing the M.S. program may proceed into the Ph.D. program (provided they pass the pre-qualifying examination), and students in the Ph.D. program can receive a non-terminal M.S. degree upon completion of M.S. requirements, including the capstone research project. Each Ph.D. student will be required to have knowledge of applied mathematics equivalent to that required for the M.S. degree. In addition, Ph.D. candidates will be required to complete coursework beyond the M.S. level.

Dissertation

Dissertation

A dissertation is required for the Ph.D. degree. The dissertation will consist of a minimum of three chapters composed of material suitable for submission and publication in major professional journals in applied mathematics (or related subject areas of application).

Dissertation Defense

The completed dissertation will be submitted to the reading committee at least one month before the dissertation defense, which consists of a public presentation of the research followed by a private examination by the reading committee. Successful completion of the dissertation defense is the final requirement for the Ph.D. degree.

Academic Progress

Each year, the faculty reviews the progress of every student in the graduate programs. Students not making adequate progress toward completion of degree requirements are subject to dismissal from the program (see the Graduate Handbook for the policy on satisfactory academic progress). Also, please refer to specific guidelines on the annual student reviews.

Applying for Graduation

All candidates for a degree must submit an Application for Doctor of Philosophy Degree to the Graduate Advising Office by the date stated in the Academic and Administrative Calendar for the quarter you wish to receive the degree. Failure to declare candidacy by the deadline means that you cannot be considered a candidate until the next term.

A student is required to be registered or on Filing Fee Status, whichever is applicable, during the quarter in which the degree is conferred. Students should consult the department adviser to determine which option fits their situation. For more information about applying for graduation, visit the Baskin School of Engineering Graduate Studies website.

SCIENTIFIC COMPUTING AND APPLIED MATHEMATICS M.S.

Introduction

Requirements

Course Requirements

Core Courses

All SciCAM M.S. students are required to take the core courses listed below.

AM 212A Applied Mathematical Methods I
 AM 213A Numerical Linear Algebra
 AM 213B Numerical Methods for the Solution of Differential Equations
 AM 214 Applied Dynamical Systems
 AM 250 An Introduction to High Performance Computing

Foundational Requirements

Students in the SciCAM program must also demonstrate mastery in the foundations of scientific computing and applied mathematics, either by producing evidence through undergraduate transcripts, or by taking some or all of the following foundational courses upon entry to the M.S. program:

AM 129 or AM 209 Foundations of Scientific Computing
 AM 147 Computational Methods and Applications
 AM 211 Foundations of Applied Mathematics

Electives

Any 5-credit AM graduate course (200 and above) not already listed as a core course may be counted as electives. Elective courses outside of AM must be approved by the SciCAM graduate director. Note that some upper-division electives are allowed, bearing in mind that no more than a total of 15 credits of upper-division courses may be used to satisfy the degree requirements.

Other Requirements

Students in the SciCAM program may pursue a Plan I (thesis capstone) or a Plan II (comprehensive examination capstone) curriculum.

Candidates for a Plan I capstone must complete one elective and take a minimum of two quarters of independent study to write a thesis.

The thesis requirements are as follows. Students must submit a thesis proposal to the potential faculty sponsor after completion of all core courses. If the proposal is accepted, the faculty member will become the sponsor and will supervise the research and writing of the thesis project. The project will involve the solution of a problem or problems from the selected area of application. The thesis must consist of at least 30 pages and no more than 60 pages of printed written work and accompanying pertinent figures, consisting of a coherent introduction and presentation of the current state of the field, a clear presentation of the questions raised, of the methodology used to solve them, and a discussion of the results obtained. The thesis will be read by at least two faculty from the AM Department, one of whom must be the student's adviser. The student will then be required to give a short (20-minute) public oral presentation of their thesis, which will be evaluated by the reading committee. The reading committee will assess the quality of both written work and oral presentation in making their recommendation for awarding the M.S. degree to the student.

Candidates for a Plan II capstone must complete three electives and pass the SciCAM comprehensive examination.

The exam takes place in June at the end of the academic year. Students may only take this exam following completion of the last core course. The exam will take the form of a take-home project covering all core and foundational courses. Passing the comprehensive examination fulfills the capstone requirement. A student will have two attempts to pass the exam.

Accelerated One-Year Program Plan

The expected time to completion of the SciCAM degree program is two years. However, AM also offers a one-year accelerated track for interested students who can demonstrate sufficient proficiency in the foundational subjects. Information on the minimum requirements to join the accelerated track can be found on the program website.

Requests to join the accelerated track must be made to the graduate director by email no later than Aug. 31 of each year.

Transfer Credit

Up to three UCSC courses fulfilling the degree requirements of the SciCAM degree may be taken before beginning the graduate program, either as part of their undergraduate education or through concurrent enrollment. However, students will still need to take courses totalling 35 credits as graduate students to satisfy university requirements. Note that this limit does not apply to the foundational requirements, which may all be taken prior to the start of the SciCAM program without penalty.

Up to one course from other institutions may be applied to the M.S. degree course requirements. Petitions should be submitted along with the transcript from the other institution or UCSC Extension. For courses taken at other institutions, copies of the syllabi, exams, and other course work should accompany the petition. Such petitions are not considered until the completion of at least one quarter at UCSC.

Relationship of SciCAM Masters Program and AM Doctoral Program

Students in the SciCAM M.S. program interested in an academic career will be strongly encouraged to apply to the Applied Mathematics Ph.D. program. Applications are reviewed in the standard academic cycle. Students interested in applying to the Applied Mathematics Ph.D. program are encouraged to discuss this option with the graduate director in the fall of each year.

Review of Progress

Each year, the faculty review the progress of every student in all graduate programs. Students not making adequate progress toward completion of degree requirements are subject to dismissal from the program (see the Graduate Handbook for the policy on satisfactory academic progress). Also, please refer to specific guidelines on the annual student reviews.

Foreign Language Requirements

Applicants whose native language is not English must take the TOEFL or IELTS exam and submit an official score report with the admission application. For admission purposes, the minimum passing score for the TOEFL exam must be 570 on the paper-based, 230 on the computer-based, or 89 on the internet-based test. The minimum passing score for the IELTS exam is 7. If you have received a degree from an English-speaking institution or have lived in the United States for more than four years, you are eligible for a TOEFL exemption.

To be considered for teaching assistant support you must have scored a minimum of 26 on the spoken portion of the internet-based TOEFL or an overall 8 on the IELTS. International students may also participate in the Graduate Preparation Program (GPP) prior to starting the graduate program. Successful completion of the GPP satisfies the English-language requirement for teaching assistants.

Applying for Graduation

All candidates for a degree must submit an Application for Master's Degree to the Graduate Student Affairs Office by the date stated in the Academic and Administrative Calendar for the quarter they wish to receive the degree. The deadline for degree applications is typically in the second week of the quarter. A student is required to be registered or on filing fee during the quarter in which the degree is conferred. For more information about applying for graduation, visit the Baskin School of Engineering Graduate Studies website.

SCIENTIFIC COMPUTING DESIGNATED EMPHASIS

Introduction

Students from another degree program who meet certain requirements can have the designated emphasis of "Scientific Computing" annotated to their degree title. For example, a M.S. or Ph.D. student in physics who meets the requirements would get a certification that reads "M.S. Physics with an emphasis in Scientific Computing" or "Ph.D. Physics with an emphasis in Scientific Computing".

Requirements

Committee Composition and Departmental Approvals

Upon electing to pursue a designated emphasis (DE) in scientific computing, students must choose a DE faculty adviser in the Department of Applied Mathematics. A list of eligible DE advisers is maintained online. The student must organize a preliminary meeting with the DE adviser, and agree on a plan for completion of the requirements. Once this plan has been designed, the student and the adviser must complete the DE application form available online. The completed application form should then be signed by the Applied Mathematics graduate director, and filed in the Baskin School of Engineering Graduate Student Affairs Office. This should ideally be done before the student's advancement to candidacy (for Ph.D. students), and no later than three months before the planned date for the oral presentation completion requirement.

Course Requirements

Students declaring a designated emphasis in Scientific Computing must complete the courses listed below.

AM 213A Numerical Linear Algebra
 AM 213B Numerical Methods for the Solution of Differential Equations
 AM 250 Introduction to High Performance Computing

Electives

In addition to the three courses listed above, students must take one of the approved electives listed below.

AM 230 Numerical Optimization
 AM 260 Computational Fluid Dynamics

CSE 201 Analysis of Algorithms
CSE 242 Machine Learning
ASTR 235 Numerical Techniques

or petition the graduate director to consider adding a different elective to this list.

Writing, Research and/or Teaching Requirements

Writing requirements: a substantial and original written body of work related to scientific computing, associated with substantial code development or substantial modification of existing code, or development of significant computational tools for data analysis. The write-up could take the form of a paper (at least submitted), or an M.S., M.A. or Ph.D. thesis chapter, for instance.

Oral presentation requirement: a presentation of no less than 30 minutes during which the student must demonstrate mastery of the scientific computing component of the submitted written piece of work. This presentation could be the student's qualifying exam, or the Ph.D. defense, or a separate presentation. The DE adviser must be invited to attend this presentation.

Review of Progress

Applying for Graduation

All candidates for a degree must submit an Application for the Master's Degree or an Application for the Doctorate in Philosophy Degree to the appropriate office in their primary department by the date stated in the Academic and Administrative Calendar for the quarter they wish to receive the degree. Students who have completed a designated emphasis should be sure to note the designated emphasis on the degree application. The deadline for degree applications is typically in the second week of the quarter. A student is required to be registered or on filing fee during the quarter in which the degree is conferred.

Biomolecular Engineering

Baskin School of Engineering
335 Baskin Engineering Building
(831) 459-2158
<https://www.soe.ucsc.edu/departments/biomolecular-engineering>

PROGRAMS OFFERED

Biomolecular Engineering and Bioinformatics B.S. (p. 360)

Bioinformatics Minor (p. 368)

Contiguous Bachelor's/Master's Pathway (p. 368)

Biomolecular Engineering and Bioinformatics M.S. (p. 369)

Biomolecular Engineering and Bioinformatics Ph.D (p. 370).

The Department of Biomolecular Engineering is an interdisciplinary department that combines expertise from biology, mathematics, chemistry, computer science, and engineering to train students and develop technologies to address major problems at the forefront of biomedical and bio-industrial research. Students trained in the Department of Biomolecular Engineering can look forward to careers in academia, the information and biotechnology industries, public health, or medical sciences.

The department offers a bachelor of science (B.S.) degree in biomolecular engineering and bioinformatics, a minor in bioinformatics, and graduate master of science (M.S.) and doctor of philosophy (Ph.D.) degrees in biomolecular engineering and bioinformatics. The department co-sponsors the Program in Biomedical Science and Engineering (PBSE), a doctoral training program, with the departments of MCD Biology, Chemistry and Biochemistry, and Microbiology and Environmental Toxicology.

Departmental faculty advise undergraduate and graduate researchers enrolled in the bioinformatics, bioengineering, and related degree programs. Members of the Department of Biomolecular Engineering actively collaborate with faculty from other Baskin School of Engineering departments, such as Applied Mathematics and Statistics, Computer Engineering, Computer Science, and Electrical Engineering; and with the Physical and Biological Sciences departments of MCD Biology, Chemistry and Biochemistry, Microbiology and Environmental Toxicology, Ecology and Evolutionary Biology, and Ocean Sciences.

Undergraduate Program

COURSES FOR

NONMAJORS

BME 5, Introduction to Biotechnology, presents a broad overview of the impact of biotechnology on the diagnosis and treatment of disease.

BME 18, Scientific Principles of Life, covers the principles of life as it exists on this planet and how they generalize. Discusses Darwinian evolution, genomes, scientific theories of life (mechanistic, thermodynamic, information theoretic), and future of life (Internet, machine learning and adaptation, artificial intelligence, genome editing, fully artificial life).

BME 80G, Bioethics in the Twenty-First Century: Science, Business, and Society, is particularly appropriate to all students interested in the societal issues surrounding the revolutions in bioinformatics and biotechnology.

BME 80H, The Human Genome, covers principles of human inheritance and techniques used in gene analysis and discusses the evolutionary, social, ethical, and legal issues associated with knowledge of the human genome.

BME 110, Computational Biology Tools, provides an introduction to the tools and techniques of bioinformatics from a user's view. It is intended for biologists and biochemists who need to use bioinformatics tools, but are not primarily interested in building new bioinformatics tools.

BME 130, Genomes, teaches the principles of genome-scale analysis to answer biological questions.

BME 160, Programming for Biologists and Biochemists, provides an introductory programming class using Python to analyze, transform, and publish biological data.

BME 163, Applied Visualization and Analysis of Scientific Data, extends this life-science data focus with an emphasis on understanding and presenting that data.

BIOMOLECULAR ENGINEERING AND BIOINFORMATICS B.S.

Information and Policies

Introduction

The biomolecular engineering and bioinformatics major includes the biomolecular engineering (BME) and bioinformatics (BINF) concentrations. The BME concentration is designed for students interested in protein engineering, stem cell engineering, and synthetic biology. The emphasis is on designing biomolecules (DNA, RNA, proteins) and cells for particular functions, and the underlying sciences are biochemistry and cell biology.

The BINF concentration combines mathematics, science, and engineering to explore and understand biological data from high-throughput experiments, such as genome sequencing, gene-expression chips, and proteomics experiments. The program builds upon the research and academic strengths of the faculty in the Biomolecular Engineering Department.

In both concentrations, students participate in a capstone experience. Options for the senior capstone experience include

- **Senior Design**—a three-quarter group project intended to prepare students for work in industry,
- a summer full-time synthetic biology project based on the **iGEM** competition,
- A three-quarter **Senior thesis**,
- or an **Advanced bioinformatics** course series. The last option is the required capstone for students participating in the bioinformatics concentrations.

All capstone options involve working closely with faculty and other researchers at UCSC, analyzing ideas, developing technologies, and discovering new approaches. Application areas include biomolecular sensors and systems, nano-electronic implants, assistive technologies for the elderly and disabled, bioinformatics, microfluidics, nanoscale biotechnology, environmental monitoring, and other areas at the junction between engineering and the life sciences.

More information about bioengineering research and undergraduate research opportunities can be found at Undergraduate Research Opportunities, the Genomics Institute, the Program in Biomedical Sciences and Engineering, the STEM Maximizing Access to Research Careers (MARC) program, and the STEM diversity programs.

The program has course requirements in mathematics, science, and engineering. Students interested in Biomolecular Engineering and Bioinformatics as a major should contact the School of Engineering advising office (advising@soe.ucsc.edu) before enrolling in any courses at UCSC. Early advising is particularly important before choosing calculus and physics courses.

Biomolecular engineering and bioinformatics students may continue their research and studies at UCSC in any of several graduate programs. Information may be found at the Division of Graduate Studies website.

The immense growth of biological information stored in computerized databases has led to a critical need for people who can understand the languages, tools, and techniques of statistics, science, and engineering. A classically trained scientist may be unfamiliar with the statistical and algorithmic knowledge required in this field. A classically trained engineer may be unfamiliar with the chemistry and biology required in the field. Thus, this major strives for a balance of the two: an engineer focused on the problems of the underlying science or, conversely, a scientist focused on the use of engineering tools for analysis and discovery.

Academic Advising for the Program

The Baskin School of Engineering Undergraduate Advising office offers general advising for prospective and declared undergraduates majoring in School of Engineering programs. The office handles major declarations, transfer credits, course substitutions, articulations, and degree certifications.

Undergraduate students obtain and submit all paperwork requiring departmental approval to the undergraduate advising office. Transfer students should also refer to the Transfer Information and Policy section.

Baskin Engineering Building, Room 225
advising@soe.ucsc.edu
 (831) 459-5840

Getting Started in the Major

Students applying for admission as first-year students proposing to take the biomolecular engineering and bioinformatics major should have completed four years of high school mathematics (through advanced algebra and trigonometry) and three years of science, including one year of chemistry and one year of biology. Comparable college mathematics and science courses completed at other institutions may be accepted in place of high school preparation. Students without this preparation may be required to take additional courses to prepare themselves for the program.

Program Learning Outcomes

A biomolecular engineering and bioinformatics student completing the program should:

- have a broad knowledge of science and engineering disciplines including biology, chemistry, mathematics, statistics, and computer science; those completing the BINF concentration will also have a detailed knowledge of mathematics, statistics, and science; and, those completing the BME concentration will have broader knowledge in biology and chemistry;
- be able to apply their knowledge to identify, formulate, and solve engineering design problems;
- be able to find and use information from a variety of sources, including books, journal articles, online encyclopedias, and manufacturer data sheets;
- be able to design and conduct experiments, as well as to analyze and interpret data;
- be able to communicate problems, experiments, and design solutions in writing, orally, and as posters; and
- be able to apply ethical reasoning to make decisions about engineering methods and solutions in a global, economic, environmental, and societal context.

Major Qualification Policy and Declaration Process

Major Qualification

In order to be admitted into the Bioinformatics major students must be listed as a proposed major within the School of Engineering. Please refer to the School of Engineering's "Proposed Engineering Major Status" and its "Declaring a School of Engineering Major" sections in the catalog and the Undergraduate Affairs website for more information.

In addition to being listed as a proposed School of Engineering major, students must have completed at least 50 credits with a GPA of 2.8 or better in courses required for the major. Students with two or more grades of NP, C-, D+, D, D-, or F in these courses are not qualified to declare.

Students wishing to declare the biomolecular engineering and bioinformatics major after the sixth quarter must appeal, must already have a declared major in which they have completed at least one major requirement course and be making reasonable progress, and must have completed 10 more credits of required courses in the biomolecular engineering and bioinformatics major for each additional quarter.

Transfer students should refer to the Transfer Information and Policy section.

Appeal Process

Students who are informed that they are not eligible to declare may appeal this decision by submitting a letter to the undergraduate director within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the Undergraduate Advising office will notify the student, the college, and the Office of the Registrar of the decision.

If you have further questions concerning the appeal process, please contact the Undergraduate Advising office at (831) 459-5840 or email advising@soe.ucsc.edu.

More information regarding the appeal process can be found here: <https://undergrad.soe.ucsc.edu/appeal-your-major>

How to Declare a Major

Instructions for declaring a major in the Baskin School of Engineering are at <https://undergrad.soe.ucsc.edu/declare-your-major>.

Transfer Information and Policy

Transfer Admission Screening Policy

Transfer students need to complete the equivalents of eight courses from the following list with a GPA in those courses of 2.8 or better:

CSE 13S	Computer Systems and C Programming	7
CSE 16	Applied Discrete Mathematics	5
CSE 182	Introduction to Database Management Systems	5
BME 80G	Bioethics in the 21st Century: Science, Business, and Society	5
CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1C	General Chemistry	5
CHEM 8A	Organic Chemistry	5
CHEM 8B	Organic Chemistry	5
BIOE 20B	Development and Physiology	5
BIOL 20A	Cell and Molecular Biology	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science,	5

	Engineering, and Mathematics	
PHYS 5A	Introduction to Physics I	5
BME 21L	Introduction to Basic Laboratory Techniques	5

CSE 13S, CSE 16 and CSE 182 are only relevant for the bioinformatics concentration in the major; BIOE 20B, BME 21L and PHYS 5A are only relevant for the biomolecular engineering concentration in the major.

Transfer students with an articulated ethics course may count it, even if it is not bioethics and the course is not articulated to BME 80G. Although not required for admission, transfer students are strongly recommended to complete at least ten courses from the above list if they wish to graduate in two years. Students with fewer than 10 transferable courses may find it difficult to complete the major in only two more years.

Getting Started at UCSC as a Transfer Student

Transfer students should declare their major in their first quarter at UCSC. Instructions for declaring a major in the Baskin School of Engineering are at <https://undergrad.soe.ucsc.edu/declare-your-major>.

Letter Grade Policy

The Baskin School of Engineering requires letter grades for all courses in an engineering major.

Course Substitution Policy

Please refer to the Undergraduate Affairs course substitution website for Baskin School of Engineering policies about taking courses at other institutions after enrolling at UCSC.

Double Majors and Major/Minor Combinations Policy

Double majors with other biology-related majors are permitted for the bioinformatics concentration, but not for the biomolecular engineering concentration.

The BMEB major cannot be combined with a bioinformatics minor.

Study Abroad

Students are encouraged to investigate studying for short periods of time (a summer or a quarter) at other institutions, to broaden their education.

The BME Department has established an exchange program with Danish Technical University (DTU), which makes study there for one semester relatively easy, particularly for the bioinformatics concentration. Proposed plans of study should still be cleared with the undergraduate director.

Other exchange programs are also being developed.

Honors

Biomolecular engineering and bioinformatics majors are considered for "Honors in the Major" and "Highest Honors in the Major" based on their GPA and on results of

undergraduate research. Students with a GPA of 3.7 or higher receive "Highest Honors in the Major." Students with a GPA of 3.3 or higher, but lower than 3.7, receive "Honors in the Major." Students with particularly significant accomplishments in undergraduate research may receive honors or highest honors with a lower GPA. Students who have been found guilty of academic misconduct are not eligible for either honors or highest honors.

Because of the enormous breadth of requirements, biomolecular engineering and bioinformatics majors are urged to take honors courses or sections whenever possible to get as much as possible out of the courses they take in each field.

Biomolecular Engineering Concentration

The biomolecular engineering concentration focuses on wet-lab work, but with a modern appreciation for the statistics and computational tools needed for high-throughput experimentation.

Course Requirements

Biomolecular engineering concentration majors must complete the following courses:

Lower-Division Courses

Biology

All of the following courses:

BIOL 20A	Cell and Molecular Biology	5
BOIE 20B	Development and Physiology	5

Biology laboratory course

Either of the following courses:

BIOL 20L	Experimental Biology Laboratory	2
BME 21L	Introduction to Basic Laboratory Techniques	5

BME 21L is strongly preferred.

Biomolecular Engineering

All of the following courses:

BME 51A	Applied Electronics for Bioengineers Part 1	5
BME 51B	Applied Electronics for Bioengineers Part 2	5
BME 80G	Bioethics in the 21st Century: Science, Business, and Society	5

Chemistry

All of the following courses:

CHEM 1A	General Chemistry	5
CHEM 1B	General Chemistry	5
CHEM 1M	General Chemistry Laboratory	2
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2
CHEM 8A	Organic Chemistry	5
CHEM 8B	Organic Chemistry	5

Laboratory courses

One of the following options:

Either these courses

BME 22L	Foundations of Design and Experimentation in Molecular Biology, Part I	2
BME 23L	Foundations of Design and Experimentation in Molecular Biology, Part II	2

or these courses

CHEM 8L	Organic Chemistry Laboratory	2
CHEM 8M	Organic Chemistry Laboratory	2

BME 22L and BME 23L strongly preferred

Mathematics

Choose one of the following options:

Either these courses

MATH 20A	Honors Calculus	5
MATH 20B	Honors Calculus	5

or these courses

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

MATH 19A and MATH 19B are the recommended sequence. Credit for one or both can be granted with adequate performance on the College Entrance Examination Board (CEEB) calculus AB or BC Advanced Placement examination.

Physics

Choose one of the following options:

Either these courses

PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1

or these courses

PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1

PHYS 5A and PHYS 5L are strongly recommended.

Upper-Division Courses

Statistics

All of the following courses:

STAT 131	Introduction to Probability Theory	5
STAT 132	Classical and Bayesian Inference	5

Students may petition to substitute STAT 206 for STAT 132.

Biochemistry and Molecular Biology

All of the following courses:

BIOC 100A	Biochemistry and Molecular Biology	5
BIOC 100B	Biochemistry and Molecular Biology	5

Biomolecular Engineering

Choose one of the following courses:

BME 105	Genetics in the Genomics Era	5
BIOL 105	Genetics	5

BME 105 is strongly recommended.

Plus all of the following courses:

BME 110	Computational Biology Tools	5
BME 160	Research Programming in the Life Sciences	6
BME 163	Applied Visualization and Analysis of Scientific Data	5

Plus one of the following design-elective courses:

BME 128	Protein Engineering	5
BME 140	Bioinstrumentation	5
BME 177	Engineering Stem Cells	5

Technical Writing (one of the following courses)

BME 185	Technical Writing for Biomolecular Engineers	5
CSE 185E	Technical Writing for Computer Engineers	5

BME 185 is recommended, as CSE 185E has additional prerequisites.

Electives

One of the following (courses satisfying this elective cannot be used to satisfy other requirements of the major):

BIOL 115	Eukaryotic Molecular Biology	5
METX 119	Microbiology	5
BIOC 100C	Biochemistry and Molecular Biology	5
BME 122H	Extreme Environmental Virology	5
BME 128	Protein Engineering	5
BME 128L	Protein Engineering Laboratory	2
BME 130	Genomes	5
BME 132	Evolutionary Genomics	5
BME 140	Bioinstrumentation	5
BME 177	Engineering Stem Cells	5
BME 178	Stem Cell Biology	5

or any 5-credit biomolecular engineering graduate course

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. Biomolecular engineering and bioinformatics majors satisfy

the DC requirement by completing one of the following courses:

BME 185	Technical Writing for Biomolecular Engineers	5
CSE 185E	Technical Writing for Computer Engineers	5

BME 185 is recommended, as CSE 185E has additional prerequisites.

Comprehensive Requirement

All biomolecular engineering concentration students must complete a senior capstone project as a group project, as a series of Advanced Bioinformatics courses, or as an individual senior thesis doing research in a faculty laboratory.

Note that the Technical Writing requirement is a prerequisite for all the capstone options, including the senior thesis.

Students pursuing the senior thesis option must write a two-page thesis proposal and seek approval of their project from the undergraduate director in the quarter preceding the independent study courses, typically spring quarter of the third year. Students are responsible for ensuring that they meet the prerequisites for whichever capstone they choose.

To complete the senior capstone requirement, Biomolecular Engineering concentrations students must complete one of the following:

Either these courses		
BME 129A	Project Design and Implementation in Biomolecular Engineering I	5
BME 129B	Project Design and Implementation in Biomolecular Engineering II	5
BME 129C	Project Design and Implementation in Biomolecular Engineering III	5

or these courses

BME 180	Professional Practice in Bioengineering	2
BME 188A	Synthetic Biology--Mentored Research A	5
BME 188B	Synthetic Biology--Mentored Research B	5

or these courses

BME 205	Bioinformatics Models and Algorithms	5
BME 230A	Introduction to Computational Genomics and Systems Biology	5

or these courses

BME 193	Field Study	5
BME 123T	Senior Thesis Writing	5

or these courses

BME 195	Senior Thesis Research	5
BME 123T	Senior Thesis Writing	5

or these courses

BME 198	Individual Study or Research	5
BME 123T	Senior Thesis Writing	5

The thesis option consists of 12 credits of Independent Study (BME 198), Field Study (BME 193), or Senior Thesis Research (BME 195) in biomolecular engineering; and BME 123T, Senior Thesis Presentation, 5 credits.

Students pursuing the senior thesis option must write a two-page thesis proposal and seek approval of their project from the undergraduate director in the quarter preceding the independent study courses, typically spring quarter of the third year.

Students spend three or more quarters working on their thesis projects. Thesis students must enroll in BME 123T, Senior Thesis Presentation, before completing their thesis.

Planners

Every biomolecular engineering and bioinformatics major must have a faculty adviser, assigned by the Baskin School of Engineering undergraduate advising office, and with that adviser must formulate a program of proposed coursework that meets the major requirements.

As in all engineering and science programs, it is recommended that students spread their general education requirements out over all 12 quarters. Delaying a general education requirement is safer than delaying a major requirement.

Four-year plans require individual design to fit in the desired electives. It is recommended that students reserve the summer after the junior year for undergraduate research.

Curriculum charts for the major are available here.

Sample Plan: Biomolecular Engineering Concentration

Year	Fall	Winter	Spring
1st (frosh)	CHEM 1A	MATH 19A	MATH 19B
		CHEM 1B & CHEM 1M	CHEM 1C & CHEM 1N BME 21L
2nd (soph)	PHYS 5A & PHYS 5L BME 22L	BME 51A BME 23L	BME 51B BME 105
	CHEM 8A BIOL 20A	CHEM 8B BIOE 20B	
3rd (junior)	BIOC 100A BME 110	BIOC 100B BME 160	Design elective BME 163

BME 185

4th (senior)	BME 129A STAT 131 BME 80G	BME 129B STAT 132	BME 129C Elective
---------------------	---------------------------------	----------------------	----------------------

Students who can take Organic Chemistry (CHEM 8A and CHEM 8B, or transferable equivalents) in summer after their first year can take BIOC 100A in their second year and be ready to join a research lab a year earlier. Here is an alternative plan for students who do organic chemistry in summer.

Sample Plan: Biomolecular Engineering Concentration (CHEM 8A & CHEM 8B In summer after first year)

Year	Fall	Winter	Spring
1st (frosh)	CHEM 1A	MATH 19A	BIOL 20A
		CHEM 1B & CHEM 1M	CHEM 1C & CHEM 1N BME 21L
2nd (soph)	BIOE 20B	PHYS 5A & PHYS 5L	MATH 19B
	BME 22L	BME 23L	BME 105
	BIOC 100A	BIOC 100B	
3rd (junior)	BME 185	BME 51A	BME 51B
	BME 110	BME 160	BME 163
	BME 80G		Design elective
4th (senior)	BME 129A	BME 129B	BME 129C
	STAT 131	STAT 132	Elective

General education requirements:

CC, ER, and IM are not met by any courses in the program.

MF, SI, SR and PE are met by required courses.

TA can be met by several electives: BME 122H, BME 132, BME 177, or BME 178.

PR-E can be met by some capstone options: BME 129C or BME 180.

C is not met by courses in the program, but is a prerequisite for the required BME 185 or CSE 185E course.

Transfer planner

Year	Fall	Winter	Spring
1st (junior)	BIOC 100A	BIOC 100B	BME 105
	BME 185	BME 110	BME 163
		BME 160	Design elective
	BME 22L	BME 23L	
2nd (senior)	BME 129A	BME 129B	BME 129C
	STAT 131	STAT 132	Elective
	BME 80G	BME 51A	BME 51B

This transfer planner assumes that a student has completed the equivalent of CHEM 1A, CHEM 1B, CHEM 1M, CHEM 1C, CHEM 1N, CHEM 8A, CHEM 8B, MATH 19A, MATH 19B, PHYS 5A, PHYS 5L, BIOL 20A, BIOE 20B, and BME 21L before coming to UCSC. Students are also expected to have completed all the general education requirements, expect those covered by the required courses.

Bioinformatics Concentration

The bioinformatics concentration focuses on dry-lab (computational) techniques.

Bioinformatics concentration majors must complete the following courses:

Course Requirements

Lower-Division Courses

Biology

The following course:

BIOL 20A	Cell and Molecular Biology	5
----------	----------------------------	---

Biomolecular Engineering

The following course:

BME 80G	Bioethics in the 21st Century: Science, Business, and Society	5
---------	---	---

Chemistry

All of the following courses:

CHEM 1A	General Chemistry	5
---------	-------------------	---

CHEM 1B	General Chemistry	5
CHEM 1M	General Chemistry Laboratory	2
CHEM 1C	General Chemistry	5
CHEM 1N	General Chemistry Laboratory	2
CHEM 8A	Organic Chemistry	5
CHEM 8B	Organic Chemistry	5

Computer Science and Engineering

All the following courses

CSE 16	Applied Discrete Mathematics	5
CSE 13S	Computer Systems and C Programming	7

Note: BME 160 needs to be before CSE 13S.

Mathematics

Choose one of the following options:

Either these courses

MATH 20A	Honors Calculus	5
MATH 20B	Honors Calculus	5

or these courses

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

MATH 19A and MATH 19B are the recommended sequence. Credit for one or both can be granted with adequate performance on the College Entrance Examination Board (CEEB) calculus AB or BC Advanced Placement examination.

Upper-Division Courses

Statistics

All of the following courses:

STAT 131	Introduction to Probability Theory	5
STAT 132	Classical and Bayesian Inference	5

Students may petition to substitute STAT 206 for STAT 132.

Biochemistry and Molecular Biology

BIOC 100A	Biochemistry and Molecular Biology	5
-----------	------------------------------------	---

Biomolecular Engineering

Plus one of the following courses:

BME 105	Genetics in the Genomics Era	5
BIOL 105	Genetics	5

BME 105 is strongly recommended.

Plus all of the following courses:

BME 110	Computational Biology Tools	5
BME 160	Research Programming in the	6

BME 163	Life Sciences Applied Visualization and Analysis of Scientific Data	5
---------	---	---

Technical Writing

Choose one of the following courses:

BME 185	Technical Writing for Biomolecular Engineers	5
CSE 185E	Technical Writing for Computer Engineers	5

CSE 185E is recommended, as BME 185 has additional wet-lab prerequisites.

Electives

One of the following (courses satisfying an elective cannot be used to satisfy other requirements of the major):

BME 122H	Extreme Environmental Virology	5
BME 128	Protein Engineering	5
BME 128L	Protein Engineering Laboratory	2
BME 130	Genomes	5
BME 132	Evolutionary Genomics	5
BME 140	Bioinstrumentation	5
BME 177	Engineering Stem Cells	5
BME 178	Stem Cell Biology	5
CSE 142	Machine Learning or any 5-credit biomolecular engineering graduate course	5

BME 230B is strongly recommended as the elective. CSE 142 has additional prerequisites.

Database management

The following course is required:

CSE 182	Introduction to Database Management Systems	5
---------	--	---

CSE 180 may be substituted for CMPS 182, but additional prerequisites would be required.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. Biomolecular engineering and bioinformatics majors satisfy the DC requirement by completing one of the following courses:

BME 185	Technical Writing for Biomolecular Engineers	5
CSE 185E	Technical Writing for Computer Engineers	5

CSE 185E is recommended, as BME 185 has additional wet-lab prerequisites.

Comprehensive Requirement

The senior capstone is fulfilled by completing all of the following courses:

BME 205	Bioinformatics Models and Algorithms	5
---------	---	---

BME 230A	Introduction to Computational Genomics and Systems Biology	5
----------	---	---

Planners

Every biomolecular engineering and bioinformatics major must have a faculty adviser, assigned by the Baskin School of Engineering undergraduate advising office, and with that adviser must formulate a program of proposed coursework that meets the major requirements.

As in all engineering and science programs, it is recommended that students spread their general education requirements out over all 12 quarters. Delaying a general education requirement is safer than delaying a major requirement.

Four-year plans require individual design to fit in the desired electives. It is recommended that students reserve the summer after the junior year for undergraduate research.

Curriculum charts for the major are available here.

Sample Plan: Bioinformatics Concentration

Year	Fall	Winter	Spring
1st (frsh)		MATH 19A	MATH 19B
	CHEM 1A	CHEM 1B & CHEM 1M	CHEM 1C & CHEM 1N
2nd (soph)	CHEM 8A	CHEM 8B	BIOL 20A
	BME 80G	BME 160	BME 105
		CSE 16	CSE 13S
3rd (junior)	BIOC 100A	CSE 185E	CSE 182
	STAT 131	STAT 132	BME 163
	BME 110		
4th (senior)	BME 205	BME 230A	BME 230B

General education requirements:

CC, ER, IM, and PR-E are not met by any courses in the program.

MF, PE-T, SI, and SR are met by required courses.

TA can be met by several electives: BME 122H, BME 132, BME 177, or BME 178.

C is not met by courses in the program, but is a prerequisite for the required BME 185 or CSE 185E course.

Transfer planner

Year	Fall	Winter	Spring
3rd (junior)	BIOC 100A	BME 110	BME 105
		BME 160	BME 163
	STAT 131	STAT 132	CSE 185E
4th (senior)	BME 205	BME 230A	BME 230B
	BME 80G		CSE 182

This transfer planner assumes that a student has completed the equivalent of CHEM 1A, CHEM 1B, CHEM 1M, CHEM 1C, CHEM 1N, CHEM 8A, CHEM 8B, MATH 19A, MATH 19B, BIOL 20A, CSE 16, and CSE 13S before coming to UCSC. Students are expected to have completed all but four of the general education requirements.

BIOINFORMATICS MINOR

The bioinformatics minor is intended primarily for bioinformatics tool users who are majoring in a biological or chemical specialty. The bioinformatics minor is also appropriate for computer science or computer engineering majors who are considering graduate work in bioinformatics. The bioinformatics minor cannot be combined with the biomolecular engineering and bioinformatics major.

Course Requirements

A bioinformatics minor consists of the following 11 courses:

Lower-Division Courses

Biology

All of the following courses:

BIOL 20A	Cell and Molecular Biology	5
----------	----------------------------	---

Chemistry

The following course:

CHEM 1A	General Chemistry	5
---------	-------------------	---

Single-Variable Calculus

Choose one of the following options:

Either these courses

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
----------	--	---

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
----------	--	---

or these courses

MATH 11A	Calculus with Applications	5
----------	----------------------------	---

MATH 11B	Calculus with Applications	5
----------	----------------------------	---

or these

MATH 20A	Honors Calculus	5
MATH 20B	Honors Calculus	5

MATH 19A, MATH 19B: preferred

Bioethics

Choose one of the following courses:

BME 80G	Bioethics in the 21st Century: Science, Business, and Society	5
BME 18	Scientific Principles of Life	5

Upper-Division Courses

Genetics

Choose one of the following courses:

BME 105	Genetics in the Genomics Era	5
BIOL 105	Genetics	5

BME 105: strongly recommended

Programming

All of the following courses:

BME 160	Research Programming in the Life Sciences	6
BME 163	Applied Visualization and Analysis of Scientific Data	5

Statistics

All of the following courses:

STAT 131	Introduction to Probability Theory	5
STAT 132	Classical and Bayesian Inference	5

Bioinformatics

The following course:

BME 110	Computational Biology Tools	5
---------	-----------------------------	---

Contiguous Bachelors Masters Pathway

Because the bioinformatics concentration of the Biomolecular Engineering and Bioinformatics (BME) B.S. provides excellent preparation for a graduate program in bioinformatics, we offer a contiguous B.S./M.S. degree pathway that allows those students to complete the M.S. (or Ph.D.) somewhat sooner than students with a less-tailored preparation.

The current B.S. and M.S. requirements have three courses in common:

BME 80G, Bioethics in the 21st Century*
 BME 205, Bioinformatics Models and Algorithms*
 BME 230A, Intro to Computational Genomics and Systems Biology*

*These courses must be passed with a grade of B- or better to meet the M.S. requirements.

In accordance with UCSC Graduate Council guidelines for contiguous five-year bachelor's/master's programs, students are required to complete 35 credits during the master's phase of the program. Since Biomolecular Engineering 205 and Biomolecular Engineering 230A are taken in the undergraduate phase, the credits cannot be counted toward the overall credits required by the M.S. degree.

Classes should be chosen in consultation with the BME Graduate Advising Committee. Per UCSC Graduate Council policy, up to 15 credits may be upper-division undergraduate courses not already counted toward the B.S. Typically, these courses are selected to address specific interests, cover topics specific for the capstone project, or address specific deficiencies of each student.

Biomolecular engineering graduate courses suitable for fulfilling the 35-credit requirement include, but are not limited to, BME 215, Applied Gene Technology; BME 230B, Advanced Computational Genomics and Systems Biology; BME 232, Evolutionary Genomics.

The combined B.S./M.S. degree pathway does not make any changes to the undergraduate program nor the graduate program, except that students must pass the overlapping courses listed above for a grade of B- or better.

To apply for the combined pathway, students apply to the M.S. program through the normal graduate admission process in the fall of their senior year. If admitted into the graduate program, they are automatically included in the combined B.S./M.S. pathway.

Graduate Program

The Department of Biomolecular Engineering offers interdisciplinary M.S. and Ph.D. degrees in biomolecular engineering and bioinformatics and accepts students from a wide-variety of backgrounds. A typical cohort includes incoming students from molecular biology, genetics, computer science, engineering, and mathematics. The unifying theme of our research training program is using quantitative approaches to addressing fundamental questions in biology and biomedical science. The Ph.D. program prepares students to lead independent research programs in academic or industry settings. The M.S. program is designed to prepare students for careers in contemporary biomedical research settings in the biotechnology industry.

Program coursework is designed to provide the technical skills in programming and other technical skills required for independent and advanced scientific discovery. Incoming students undertake rigorous core coursework, conduct laboratory rotations (Ph.D. only), and are exposed to a rich environment of regular seminars and group meetings. Students interact closely with biomolecular engineering and bioinformatics faculty members while undertaking their dissertation research (Ph.D.) or capstone projects (M.S.), and have first-hand access to state-of-the-art computation tools

and laboratory facilities throughout their training, including cluster computing and high-throughput sequencing facilities.

BIOMOLECULAR ENGINEERING AND BIOINFORMATICS M.S.

Introduction

The unifying theme of our research training program is using quantitative approaches to addressing fundamental questions in biology and biomedical science. The master of science (M.S.) program is designed to prepare students for careers in contemporary biomedical research settings in the biotechnology industry.

Program coursework is designed to provide the technical skills in programming and other technical skills required for independent and advanced scientific discovery. Incoming students undertake rigorous core coursework and are exposed to a rich environment of regular seminars and group meetings. Students interact closely with biomolecular engineering and bioinformatics faculty members while undertaking capstone projects (M.S.), and have firsthand access to state-of-the-art computation tools and laboratory facilities throughout their training, including cluster computing and high-throughput sequencing facilities.

Requirements

Course Requirements

M.S. students must complete a total of at least 41 credits as described below.

Core courses (5-credit) six are required

The following course:

BME 205	Bioinformatics Models and Algorithms	5
---------	--------------------------------------	---

Plus one of the following courses:

BME 230A	Introduction to Computational Genomics and Systems Biology	5
BME 229	Protein and Cell Engineering	5

Graduate-Level Quantitative Science Course

Suitable courses for quantitative science and biomolecular engineering graduate electives are to be selected in consultation with the Biomolecular Engineering Graduate Advising Committee, the student, and the student's faculty mentor.

Ethics Course:

Choose one of the following courses:		
BME 80G	Bioethics in the 21st Century: Science, Business, and Society	5
SOCY 268A	Science and Justice: Experiments in Collaboration	5

BME 80G can be taken to meet the ethics requirement, however, the credits will not be counted toward the overall

credit requirement for the M.S. or Ph.D. since it is a lower-division course.

Two Electives

Two Biomolecular Engineering graduate-level, 5-credit courses to be selected in consultation with faculty adviser

Transfer Limitations

Up to two courses may be transferred from other graduate institutions with the approval of the faculty adviser and the graduate director.

Seminars

A minimum of three seminar courses, including at least one quarter of the 2-credit Biomolecular Engineering seminar:

BME 280B	Seminar on Bioinformatics and Bioengineering	2
----------	--	---

Research Experience

One quarter of independent study from the following courses:

BME 297A	Independent Study or Research	5
BME 297B	Independent Study or Research	10
BME 297C	Independent Study or Research	15
BME 297F	Independent Study or Research	2

Other Requirements

Bootcamp activity

Entering graduate cohorts are strongly encouraged to participate in the hands-on “bootcamp” just before the start of the fall quarter. Bootcamp activities include program orientation, laboratory safety training, teaching assistant (TA) training, fellowship advice, cohort building activities, practical advice for navigating graduate school, and a hands-on research project.

Master's Capstone Requirement

M.S. students must complete a one-quarter research project with written report to fulfill the capstone requirement. In consultation with the faculty adviser, the student forms a Master's capstone reading committee of at least two faculty members (including the adviser), each of whom is provided a copy of the project report. The final project report must be signed by the reading committee before the award of the Master of Science Degree.

Further Study Outside the Department

No further courses are required. However, with faculty guidance students often choose to take upper-division undergraduate courses or graduate courses outside the department to make up for deficiencies in background areas of particular importance.

With consent of the graduate director, variations in the composition of the required courses may be approved.

Adequate Progress

Graduate students receiving two or more U (unsatisfactory) grades or grades below B- in courses relevant to the program are not making adequate progress and will be placed on academic probation for the next three quarters of registered enrollment.

Graduate students who fail (unsatisfactory or lower than B-) a relevant course while on probation may be dismissed from the program. Students may appeal their dismissal. Graduate students who fail a relevant course after being removed from probation are immediately returned to academic probation.

Graduate students experiencing circumstances that may adversely affect their academic performance should consult with their adviser and the graduate director.

Applying for Graduation

BIOMOLECULAR ENGINEERING AND BIOINFORMATICS PH.D.

Introduction

Program coursework is designed to provide the technical skills in programming and other technical skills required for independent and advanced scientific discovery. Incoming students undertake rigorous core coursework, conduct laboratory rotations, and are exposed to a rich environment of regular seminars and group meetings. Students interact closely with biomolecular engineering and bioinformatics faculty members while undertaking their dissertation research, and have firsthand access to state-of-the-art computation tools and laboratory facilities throughout their training, including cluster computing and high-throughput sequencing facilities.

Advancement to Candidacy

Course Requirements

Ph.D. students must complete a total of at least 55 credits as described below.

Core Courses (5-credit) six are required

The following course:

BME 205	Bioinformatics Models and Algorithms	5
---------	--------------------------------------	---

Plus one of the following courses:

BME 230A	Introduction to Computational Genomics and Systems Biology	5
BME 229	Protein and Cell Engineering	5

Graduate-Level Quantitative Science Course

Suitable courses for quantitative science and biomolecular engineering graduate electives are to be selected in consultation with the Biomolecular Engineering Graduate Advising Committee, the student, and the student's faculty mentor.

Ethics Course:

Choose one of the following courses:

BME 80G	Bioethics in the 21st Century: Science, Business, and Society	5
SOCY 268A	Science and Justice: Experiments in Collaboration	5

BME 80G can be taken to meet the ethics requirement, however, the credits will not be counted toward the overall credit requirement for the M.S. or Ph.D. since it is a lower-division course.

Two Electives

Two Biomolecular Engineering graduate-level, 5-credit courses to be selected in consultation with faculty adviser

Seminars

A minimum of six seminar courses, including at least two quarters of the 2-credit Biomolecular Engineering seminar:

BME 280B	Seminar on Bioinformatics and Bioengineering	2
----------	---	---

Before and after advancement, full-time Ph.D. students are required to enroll in at least one seminar course each quarter (e.g., BME 280 or BME 281), and must present the results of their ongoing research at least once each year. Because the intent of the seminar requirement is to ensure breadth of knowledge, laboratory group meetings (Biomolecular Engineering BME 281 courses) do not count for the seminar requirement.

Research Experience

Three research laboratory rotations (BME 296 - must enroll in fall and winter quarters of their first year) with different supervisors. Laboratory rotations for Ph.D. students are generally completed in the first two quarters (three 7-week rotations). One of the laboratory rotations must be with a faculty supervisor who does wet-lab research, though the students rotation project may be purely computational.

BME 296	Research in Bioinformatics	5
---------	----------------------------	---

Bootcamp activity

Entering graduate cohorts are strongly encouraged to participate in the hands-on “bootcamp” just before the start of the fall quarter. Bootcamp activities include program orientation, laboratory safety training, teaching assistant (TA) training, fellowship advice, cohort building activities, practical advice for navigating graduate school, and a hands-on research project. Biomolecular Engineering 201, Scientific Writing, 3 credits (Ph.D. only). Typically taken as a second-year Ph.D. student in winter quarter.

Transfer Limitations

Up to two courses may be transferred from other graduate institutions with the approval of the faculty adviser and the graduate director.

Further Study Outside the Department

No further courses are required. However, with faculty guidance students often choose to take upper-division undergraduate courses or graduate courses outside the department to make up for deficiencies in background areas of particular importance.

With consent of the graduate director, variations in the composition of the required courses may be approved.

Foreign Language Requirements**Teaching Requirement****Pre-Qualifying Requirements****Qualifying Examination**

Ph.D. students must select a faculty research adviser by the end of the first year. A qualifying examination committee is then formed in the second year, which consists of the adviser and three additional members, and which is approved by the graduate director and the campus graduate dean. At least two of the four must be members of the Department of Biomolecular Engineering. The student must submit a written dissertation proposal to all members of the committee and the graduate program adviser one month in advance of the examination. The dissertation proposal is publicly and formally presented in an oral qualifying examination given by the qualifying committee.

Ph.D. students are required to pass the qualifying examination and advance to candidacy by the end of their second year.

Post-Qualifying Requirements**Dissertation****Dissertation**

Ph.D. candidates will submit the completed dissertation to a reading committee at least one month prior to the dissertation defense. The reading committee, formed upon advancement to candidacy, consists of the dissertation supervisor and two readers appointed by the graduate director upon the recommendation of the dissertation supervisor. At least one of the three must be a member of the Department of Biomolecular Engineering.

Dissertation Defense

The candidate will present their research in a public seminar. The seminar will be followed by a defense of the dissertation to the reading committee and attending faculty, who will then decide whether the dissertation is acceptable or requires revision.

Academic Progress

Graduate students receiving two or more U (unsatisfactory) grades or grades below B- in courses relevant to the program are not making adequate progress and will be placed on academic probation for the next three quarters of registered enrollment.

Graduate students who fail (unsatisfactory or lower than B-) a relevant course while on probation may be dismissed from the program. Students may appeal their dismissal. Graduate students who fail a relevant course after being removed from probation are immediately returned to academic probation.

Graduate students experiencing circumstances that may adversely affect their academic performance should consult with their adviser and the graduate director.

Applying for Graduation

Computational Media

Baskin School of Engineering
(831) 459-2158
<https://www.soe.ucsc.edu/>

PROGRAMS OFFERED

Computer Science: Computer Game Design B.S. (p. 373)

Computational Media M.S. (p. 378)

Computational Media Ph.D. (p. 380)

Computational Media Designated Emphasis (p. 390)

Games and Playable Media M.S. (p. 385)

Serious Games M.S. (p. 388)

OTHER PROGRAMS OF INTEREST

Art and Design: Games and Playable Media B.A. (p. 18)

Digital Arts and New Media M.F.A. (p. 24)
(p. 42)

Film and Digital Media Ph.D. (p. 42)

Computational media includes the creation, enhancement, and study of media forms for which computational processes enable deeply interactive and generative experiences, as well as the use of computation to understand and assist creation of media broadly. The department emphasizes the construction of technologies that make possible novel media experiences and tools, while simultaneously embracing and engaging in theoretical and practical approaches from the arts, humanities, and social sciences. The Computational Media (CMPM) Department offers courses on a wide range of topics, many of which integrate technical subject matter with design-oriented, theoretical, and historical topics. The Computational Media Department administers an undergraduate bachelor of science (B.S.) degree in computer game design, a master of science (M.S.) degree in games and playable media, as well as a master of science (M.S.), a doctor of philosophy (Ph.D.), and a designated emphasis in computational media. Besides offering instructional courses, the department engages in a substantial research program in which both advanced undergraduates and graduate students participate.

Undergraduate Program

COMPUTER SCIENCE: COMPUTER GAME DESIGN B.S.

Information and Policies

Introduction

The goal of this degree is to provide students a deep understanding of the technical aspects of computer game engineering and a broad background in the artistic, systemic, and production elements of game design and development. The core of the degree program is a strong grounding in computer science and computer engineering, preceded by a foundation in mathematics. Classes also develop skills in areas such as visual communication and team-oriented game production, while developing knowledge of topics such as game history, play experiences, game systems, and social and ethical issues. In their upper-division courses, students gain depth by taking electives in computational media and computer science and engineering, with options such as Game AI, Game Graphics and Real-Time Rendering, Mobile Applications, and Interactive Storytelling. A two-course interdisciplinary Game Development Experience (usually taken at the end of the sophomore year) and a yearlong interdisciplinary capstone Game Design Studio class allow students to develop substantial computer games and integrate materials from the rest of the program.

Academic Advising for the Program

The Baskin School of Engineering (BSOE) Undergraduate Advising Office is located in the Baskin Engineering Building, Room 225. It can be contacted by email at advising@soe.ucsc.edu or at the Undergraduate Advising website.

Transfer students to the program should consult the Transfer Students section of the Baskin Engineering Undergraduate Affairs page.

Getting Started in the Major

It is recommended that high school students intending to apply to the major have completed four years of mathematics (through advanced algebra and trigonometry) as well as any available courses in computer science, arts, and media (especially interactive media). Comparable college mathematics, arts, and media courses completed at other institutions also serve to properly prepare a student for the major.

Program Learning Outcomes

Recipients of a B.S. degree in Computer Game Design at UC Santa Cruz are expected to have the following skills and experiences:

1. Demonstrate mastery of computer science in the following core knowledge areas: algorithms, data structures, complexity, and software engineering and development.
2. Apply system-level perspective by thinking at multiple levels of detail and abstraction and by recognizing the context in which a computer system may function, including its interactions with people and the physical world.

3. Apply problem-solving skills and the knowledge of computer science to solve real problems.	CSE 12L	Assembly Language Computer Systems and Assembly Language Laboratory	2
4. Recognize and take into account the social, legal, ethical, and cultural issues in the discipline of computer games.	CSE 30	Programming Abstractions: Python	7
5. Demonstrate written and oral communication skills regarding technical material about computer science and computer games, broadly conceived.	CSE 13E or these courses	Embedded Systems and C Programming	7
6. Design and build a technical system that achieves an artistic goal for audience experience, employing sound computer science techniques.	CSE 12 CSE 12L	Computer Systems and Assembly Language Computer Systems and Assembly Language Laboratory	5 2
7. Demonstrate the ability to collaboratively plan, organize, and execute complex, team-oriented projects, using appropriate communication and coordination techniques.	CSE 30 CSE 13S	Programming Abstractions: Python Computer Systems and C Programming	7 7

Major Qualification Policy and Declaration Process

Major Qualification

In order to be admitted into the Computer Science: Computer Game Design major, students must be listed as a proposed major within the School of Engineering. Please refer to <https://undergrad.soe.ucsc.edu/prepare-declare-bsoe-major>.

Transfers to the program should consult the Transfer Students section of the Baskin Engineering Undergraduate Affairs page.

In addition to being listed as a proposed School of Engineering major, admission to the Computer Science: Computer Game Design major is based on the following criteria:

Students with no prior programming will take CSE 20 before CSE 30 and CSE 12 & CSE 12L. Students with a prior programming course, Advanced Placement (AP) examination credit, or clearing the "Test-out" bar will start with CSE 30, and CSE 12 & CSE 12L.

Students have to complete all the foundation courses when they declare their major:

Students are required to take:

CSE 16	Applied Discrete Mathematics	5
--------	------------------------------	---

And one of the following calculus courses:

Either these courses	MATH 19A	Calculus for Science, Engineering, and Mathematics	5
-------------------------	----------	---	---

or these courses	MATH 20A	Honors Calculus	5
---------------------	----------	-----------------	---

And a core programming sequence to include one of the following group of classes:

Either these courses	CSE 12	Computer Systems and	5
-------------------------	--------	----------------------	---

A GPA of 2.80 must be obtained in the foundation courses attempted at UCSC.

Declaration of the major can happen no sooner than the student's second quarter, and no later than the campus deadline.

At most one unsuccessful attempt (grade C-, D+, D, D-, F, or NP) for a foundation course is permitted.

Appeal Process

Denials of admission to the major may be appealed by submitting a letter to the School of Engineering Undergraduate Advising office, addressed to the computational media undergraduate director within 15 days from the date the notification was mailed. The appeal letter must describe why the prior performance is not an accurate reflection of the student's potential. Within 15 days of receipt of the appeal, the Undergraduate Advising office will notify the student and their college of the decision.

How to Declare a Major

There are five steps to declaring a BSOE major. For a detailed guide to this process, please consult Baskin Engineering's Declare Your Major website.

Transfer Information and Policy

Transfer Admission Screening Policy

To be considered for admission to the computer science: game design major, incoming transfer students should complete CSE 16, MATH 19A and MATH 19B, and CSE 30, as well as *one* of the following courses:

CSE 13E
CSE 13S
CSE 12 & CSE 12L

A GPA of 2.8 must be obtained in these courses.

Transfer students entering UCSC in Fall 2021 or earlier may use MATH 19A and MATH 19B; and CSE 14, CSE 15, and

CSE 16 as their qualification courses. A GPA of 2.8 must be obtained in these courses.

Transfer students should have completed as many general education requirements as possible. If transfer students are admitted for the winter quarter of their junior year, they must have completed ARTG 80G and ARTG 80H before coming to UCSC.

Transfer students should also have completed the equivalents of all but one course from CSE 20, AM 10 or MATH 21, CSE 13E or CSE 13S and CSE 12 & CSE 12L, as well as all general education requirements if they wish to graduate in two years.

To the extent possible, it is recommended that transfer students take the equivalents of additional major required courses beyond the core programming, computer systems, and mathematics courses. If students have access to courses that develop a foundation in building and understanding games and other forms of interactive media, these are valuable to take—and in some cases may be substituted for CMPM 80K: Foundations of Video Game Design once they enter the program. Transfer students who are planning a course substitution for CMPM 80K should refer to the School of Engineering portion of the catalog (subheading Course Substitutions).

Getting Started at UCSC as a Transfer Student

Transfer students may declare the major at any time after coming to UCSC by following the steps in 'How to Declare a Major.'

Please note that most major courses have a strong theoretical component to prepare the student for designing, as opposed to simply using, technical and game systems. Often, courses taken at other institutions which emphasize applications of current programming languages and authoring tools do not count toward the major at UCSC. For specifics on the BSOE's transfer student policies, please see Baskin Engineering's Transfer Students website.

Letter Grade Policy

The Baskin School of Engineering requires letter grades for all courses in an engineering major.

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Study Abroad

Honors

Students must obtain a GPA of 3.8 or higher in the courses in the major to be considered for the distinction of "Highest Honors in the Major." Students must obtain a GPA of 3.5 or higher in the courses in the major to be considered for the distinction of "Honors in the Major." The School of Engineering reserves the right to withhold honors based on other criteria, such as an incident of academic dishonesty.

School of Engineering Policies

Please refer to the School of Engineering section of the catalog (subheading: Admission to School of Engineering Majors) for additional policies that apply to all School of Engineering programs. These policies include admission to the major and the need for students to obtain preapproval before taking courses elsewhere.

Requirements and Planners

Course Requirements

The curriculum has 24-26 courses (depending on core programming sequence taken). Fourteen of the courses are upper-division. Several of the required courses and electives are also general education courses. Please consult with the schedule of classes or the General Catalog for more information.

Course requirements are divided into five conceptual areas and may not be credited in more than one area:

Lower-Division Courses

Upper-Division Courses

Mathematics

Choose one of the following options:

Either these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
or these courses		
MATH 20A	Honors Calculus	5
MATH 20B	Honors Calculus	5

Credit for one or both MATH 19A/MATH 19B may be granted with adequate performance on the CEEB calculus AB or BC Advanced Placement examinations.

Plus one of the following courses:

MATH 21	Linear Algebra	5
AM 10	Mathematical Methods for Engineers I	5

Plus the following course:

CSE 16	Applied Discrete Mathematics	5
--------	------------------------------	---

Computational Foundations

Choose one of the following options:

Either this course		
CSE 13E	Embedded Systems and C Programming	7
or this course		
CSE 13S	Computer Systems and C	7

Programming

CSE 12 & CSE 12L are prerequisites for these courses.

Plus all of the following courses:

CSE 20	Beginning Programming in Python	5
CSE 12	Computer Systems and Assembly Language	5
CSE 12L	Computer Systems and Assembly Language Laboratory	2
CSE 30	Programming Abstractions: Python	7
CSE 101	Algorithms and Abstract Data Types	5
CSE 111	Advanced Programming	5

Students with no prior programming will take CSE 20 before CSE 30 and CSE 12 & CSE 12L. Students with a prior programming course, AP credit, or clearing the “Test-out” bar will start with CSE 30 and CSE 12 & CSE 12L.

Games and Playable Media Foundations

Complete all of the following courses:

ARTG 80G	Visual Communication and Interaction Design	5
ARTG 80H	Critical History of Digital Games	5
FILM 80V	Video Games as Visual Culture	5

Game Design and Development

Complete all of the following courses.

CMPM 80K	Foundations of Video Game Design	5
ARTG 120	Game Design Experience	5
CMPM 120	Game Development Experience	5
CMPM 170	Game Design Studio I	5
CMPM 171	Game Design Studio II	7
CMPM 172	Game Design Studio III	7
CMPM 176	Game Systems	5

Computer Game Engineering

Complete five courses from the following list. The majority of these computer game engineering electives are technical practice electives which focus on the development and analysis of computational systems (the “programming” part of game creation). No more than two of the five can be from CMPM 150, CMPM 177, CSE 103, CSE 104 or ECON 166A. These five courses focus on other skills useful in computer game development, such as design, production, and mathematical analysis.

NOTE: Lecture/lab combinations count as one course

CMPM 121	Game Technologies	5
CMPM 131	User Experience for Interactive Media	5
CMPM 146	Game AI	5
CMPM 147	Generative Design	5
CMPM 148	Interactive Storytelling	5
CMPM 150	Creating Digital Audio	5

CMPM 151	Algorithmic Music for Games	5
CMPM 163	Game Graphics and Real-Time Rendering	5
CMPM 164	Game Engines	5
CMPM 177	Creative Strategies for Designing Interactive Media	5
CMPM 178	Human-Centered Design Research	5
CMPM 179	Game Design Practicum	5
CSE 102	Introduction to Analysis of Algorithms	5
CSE 103	Computational Models	5
CSE 104	Computability and Computational Complexity	5
CSE 110A	Fundamentals of Compiler Design I	5
CSE 110B	Fundamentals of Compiler Design II	5
CSE 112	Comparative Programming Languages	5
CSE 113	Parallel and Concurrent Programming	5
CSE 115A	Introduction to Software Engineering	5
CSE 115B	Software Design Project	5
CSE 115C	Software Design Project II	5
CSE 118	Mobile Applications	5
CSE 119	Software for Society	5
CSE 120	Computer Architecture	5
CSE 131	Introduction to Operating Systems	5
CSE 132	Computer Security	5
CSE 138	Distributed Systems	5
CSE 139	Data Storage Systems	5
CSE 140	Artificial Intelligence	5
CSE 142	Machine Learning	5
CSE 143	Introduction to Natural Language Processing	5
CSE 150	Introduction to Computer Networks	5
CSE 160	Introduction to Computer Graphics	5
CSE 161	Introduction to Data Visualization	5
CSE 162	Advanced Computer Graphics and Animation	5
CSE 163	Data Programming for Visualization	5
CSE 180	Database Systems I	5
CSE 181	Database Systems II	5
CSE 183	Web Applications	5
CSE 184	Data Wrangling and Web Scraping	5
ECE 118	Introduction to Mechatronics	5
ECON 166A	Game Theory and Applications I	5

CMPM 179 may be repeated for credit, but only the first offering counts toward the computer game engineering requirement.

Electives

Disciplinary Communication (DC) Requirement

Students must satisfy the major's upper-division disciplinary communication (DC) requirement by completing the first course in the game design studio sequence:

CMPM 170 Game Design Studio I 5

Comprehensive Requirement

Students satisfy the senior comprehensive requirement by receiving a passing grade in all three courses of the game design studio sequence: CMPM 170, CMPM 171, and CMPM 172.

Planners

The following are three sample academic plans that students can use to plan their sequence of courses in the major. The first two plans are suggested guidelines for students who begin their studies in their frosh year. Such students, if they plan carefully, will have several openings free to take other breadth courses they find interesting.

Plan one is for a student entering UCSC in their frosh year who is prepared to go directly into MATH 19A/MATH 20A and CSE 30.

Plan two is for a student entering UCSC their frosh year who needs to take preparatory courses prior to MATH 19A or CSE 30 to ensure a successful outcome in those courses.

Plan three is for a junior transfer student who has completed their mathematics, computational foundations, and general education requirements.

Plan One

	Fall	Winter	Spring
Year 1	ARTG 80H	CMPM 80K	CSE 12 & CSE 12L
	MATH 19A	MATH 19B or MATH 20B	
		CSE 30	
Year 2	ARTG 80G	FILM 80V	CMPM 120
	MATH 21 or AM 10		ARTG 120
	CSE 13E or CSE 13S	CSE 16	CSE 101
Year 3	CSE 111	Game Engineering 1	Game Engineering 3
	CMPM 176	Game Engineering 2	Game Engineering 4
Year 4	CMPM 170	CMPM 171	CMPM 172

4 Game Engineering 5

Plan Two

	Fall	Winter	Spring
Year 1	CSE 20	CMPM 80K	CSE 12 & CSE 12L
	MATH 3	CSE 30	MATH 19B
		MATH 19A	
Year 2	ARTG 80G	FILM 80V	CMPM 120
	CSE 13E or CSE 13S	MATH 21 or AM 10	ARTG 120
	ARTG 80H	CSE 16	CSE 101
Year 3	CSE 111	Game Engineering 1	Game Engineering 3
	CMPM 176	Game Engineering 2	Game Engineering 4
Year 4	CMPM 170	CMPM 171	CMPM 172
	Game Engineering 5		

In addition to the specific courses shown in the four-year planner, a student must complete courses satisfying the CC, ER, SR, SI, and TA general education requirements.

Plan Three

	Fall	Winter	Spring
Year 1 (Jr)	ARTG 80H	CMPM 80K	CSE 111
	ARTG 80G	FILM 80V	CMPM 120
	[OPEN]*	CSE 101	ARTG 120
Year 2 (Sr)	CMPM 170	CMPM 171	CMPM 172
	CMPM 176	Game Engineering 2	Game Engineering 4
	Game Engineering 1	Game Engineering 3	Game Engineering 5

*This planner assumes that, in addition to the minimum requirements for transfer students to be admitted to UCSC, students should also have completed the equivalents of all but one course from CSE 20, AM 10 or MATH 21, CSE 13E or CSE 13S, and CSE 12 & CSE 12L, as well as all general education requirements if they wish to graduate in two

years. This slot in the planner is for any of those courses that the student may not have completed.

Graduate Program

COMPUTATIONAL MEDIA M.S.

Introduction

The goal of the M.S. in Computational Media (CM) is to help students build on existing strengths and move into new areas of computational media work. The design of the degree ensures, first, that students have a meaningful foundation in the key areas needed for undertaking interdisciplinary CM work. This may require some additional development in one or more areas (e.g., a sequence of computer programming classes). In addition, the M.S. coursework includes both broad and topical classes that help students understand the different ways that innovative work in CM connects the knowledge and methods of the different disciplines that contribute to it. Finally, the M.S. also includes a student-defined thesis, in which they demonstrate their ability to apply their foundational and integrative knowledge while developing novel work through supervised research. The M.S. is appropriate for students continuing in a variety of directions, including pursuing a terminal degree and performing innovative media creation.

M.S. students must complete a minimum of 35 quarter credits of graduate and upper-division courses, including 15 credits of core courses, 10 credits of topical courses, CMPM 204 (5 credits), and at least 2 credits of supervised research. No more than 15 credits may be upper-division undergraduate courses.

Requirements

Course Requirements

Core Courses (15 Credits)

CMPM 201	Introduction to Computational Media	5
CMPM 202	Computation Media Research	5
CMPM 203	Computational Media Methods	5

Topics Courses (10 Credits)

M.S. students are required to take 10 credits of CM topics courses. This category includes all 5-credit CMPM graduate classes, as long as they are not already counted in another category (e.g., it cannot include core courses), in addition to courses available in other departments. Current topics courses are listed below.

Current Topics Courses

CMPM 235	User Evaluation of Technology	5
CMPM 244	Artificial Intelligence in Games	5
CMPM 248	Interactive Storytelling	5
CMPM 265	Generative Methods	5
CMPM 290A	Topics in Computational Media	5
CMPM 290J	Playable Media	5
CMPM 290K	Social and Emotional Approaches to Human	5

	Computer Interaction	
CMPM 290P	Topics in Computational Cinematography	5
CSE 265	Human-Computer Interaction	5
DANM 250A	Collaborative Research Project Group: Art and Science	5
DANM 250B	Collaborative Research Project Group: Socially Engaged Art	5
DANM 250C	Collaborative Research Project Group: Performance and Embodiment	5
FILM 234	Toward an Ethics of New Media	5
FILM 230	Expanded Documentary	5
DANM 250E	Collaborative Research Project Group: Experimental Play	5
FILM 228	Moving Image Archives and the Frontiers of Information	5
GAME 232	Advanced Game Technologies	5
GAME 238	Computer Graphics for Games	5
GAME 250	Foundations of Serious Games	5
GAME 290A	Advanced Topics in Games	5
GAME 251	Games User Research	5
CSE 245	Computational Models of Discourse and Dialogue	5
CSE 260	Computer Graphics	5
CSE 261	Advanced Visualization	5
CSE 263	Data Driven Discovery and Visualization	5
CSE 290L	Topics in Crowdsourcing and Collaboration	5

DANM 250A, DANM 250B, DANM 250C, DANM 250E: can be repeated

Other Requirements

There are three additional program requirements, though students may have completed the necessary work for one or more before admission.

First, all M.S. students must demonstrate an understanding of media creation in a CM context, and must do so by the end of their second year in the program. This can be completed by any of:

- The Computer Science: Computer Game Design B.S. game studio sequence (CMPM 170, CMPM 171, CMPM 172) before graduate enrollment.
- The Art and Design: Games and Playable Media B.A. game studio sequence (ARTG 170, ARTG 171, ARTG 172) before graduate enrollment.
- A Digital Arts and New Media (DANM) project group sequence (three DANM 250 courses in same area, in sequence) during or before computational media M.S./Ph.D. graduate enrollment.
- The Games and Playable Media M.S. project sequence (GAME 270, GAME 271, GAME 272) before computational media M.S./Ph.D. graduate enrollment (due to Professional Degree Supplemental Tuition

(PDST) and cohort model, these cannot be taken by students in other programs).

- At least three graduate or upper-division undergraduate courses from a list of offerings at UCSC that require programming knowledge and are focused on defining and developing CM-related projects (e.g., CMPM 148) during or before CM graduate enrollment. See the media creation courses list below.
- Petition to CM graduate director, presenting evidence of equivalent coursework at another institution and/or equivalent CM project experience in another context.

Second, all M.S. students must demonstrate an understanding of computer programming sufficient to carry out CM research, and must do so by the end of their second year in the program. This can be completed by:

- Taking a series of courses that integrate media and programming knowledge (e.g., GAME 235, GAME 236, and CMPM 120).
- Taking core programming (e.g., CSE 30 and CSE 101) and advanced programming (e.g., CSE 111) at UCSC or another institution.
- Petition to CM graduate director, presenting evidence of programming knowledge developed in another context.

Third, all M.S. students are expected to have an understanding of interpretive and critical methods sufficient to carry out CM research. Students who lack such a background are strongly encouraged to take a series of courses in this area, consulting with their adviser regarding which courses would be most appropriate. A recommended sequence is:

- HISC 1: Introduction to the History of Consciousness. If this is not possible, take an 80-level course that integrates introductory interpretive content (e.g., FILM 080V: Video Games as Visual Culture).
- Take two more graduate or upper-division undergraduate courses that focus on interpretive practices. The CM department offers courses that integrate this with CM knowledge, such as some offerings of CMPM 290A (e.g., Media Constellations) and CMPM 176: Game Systems. Other programs also offer courses that make this integration, such as DANM 201: Recent Methods and Approaches to Digital Arts and Culture and DANM 202: Dialogues and Questions in Digital Arts and Culture. Courses that do not make this integration, but that are connected to the student's research area, are also acceptable.

Note: In extraordinary circumstances the graduate director can reduce the number of required courses based on a petition presenting past accomplishments, for example, reducing the number of required topics courses by one for each substantial past research publication or system accepted from the petition.

Current Media Creation Courses

CMPM 146 Game AI

5

CMPM 147	Generative Design	5
CMPM 148	Interactive Storytelling	5
CMPM 150	Creating Digital Audio	5
CMPM 151	Algorithmic Music for Games	5
CMPM 163	Game Graphics and Real-Time Rendering	5
CMPM 164	Game Engines	5
CMPM 179	Game Design Practicum	5
CMPM 244	Artificial Intelligence in Games	5
CMPM 248	Interactive Storytelling	5
CMPM 265	Generative Methods	5
CMPM 290J	Playable Media	5
CSE 163	Data Programming for Visualization	5
GAME 210	Game Art Intensive	5
GAME 215	Audio Direction	5
CSE 160	Introduction to Computer Graphics	5
CSE 161	Introduction to Data Visualization	5
CSE 183	Web Applications	5
CSE 245	Computational Models of Discourse and Dialogue	5
CSE 260	Computer Graphics	5
CSE 263	Data Driven Discovery and Visualization	5
CSE 261	Advanced Visualization	5

M.S. Thesis (7-10 credits)

The M.S. is either a written thesis or a project (with a written report of the project) in lieu of a thesis. It is a substantial undertaking within the CM field, which may emphasize technical, media-creation, or interpretive aspects—or may emphasize more than one area equally. It is reviewed by a committee of at least two faculty that must include at least one member of the CM department and draw half or more of its members from the UCSC academic senate. M.S. students are required to take CMPM 204 (Computational Media Project Definition), in which their written thesis or project topic is developed, as well as CMPM 299, an independent study with the faculty adviser for their written thesis or project.

CMPM 204	Computational Media Project Definition	5
CMPM 299	Thesis Research	

Lower-Division Courses

Students who are considering enrolling in lower-division courses in order to fulfill additional degree requirements (e.g., CSE 30, HISC 1) may wish to consult with the course instructor and their adviser about instead taking an independent study or directed study (with the course instructor, their adviser, or a third faculty member) that subsumes the work of the course and adds additional content to bring it up to a graduate level. Graduate students must be enrolled in some combination of at least 10 credits of courses or independent studies that are either graduate or upper-division undergraduate courses in order to be considered full-time enrolled.

Transfer Credit

Up to 10 credits transferred from equivalent courses in previous graduate work at UCSC or elsewhere can be applied toward the M.S. course requirements. This can satisfy the topics requirement, but is not to exceed the three-course overall limit on transfers from outside institutions. A Course Substitution/Waiver form can be found on the Jack Baskin School of Engineering (BSOE) Graduate Advising website.

Planners

M.S. in One Year (Student with technical CM B.S. degree)

This is a sample program for a student who has completed a bachelor's degree with significant technical content and a focus on some form of computational media (such as computer games). The B.S. in Computer Science: Computer Game Design at UCSC is such a degree. Such students will have already satisfied the requirement for understanding media creation in a CM context (e.g., by taking the CPM 170, CPM 171, and CPM 172 sequence at UCSC) and the requirement for demonstrating an understanding of computer programming (e.g., by taking a core programming sequence and CSE 111 at UCSC). This program is for a student who wants to complete the M.S. degree in one year.

Fall	Winter	Spring
CPM 201	CPM 202	CPM 203
Topics course	Topics course	CPM 299 (2–5 credits)
CPM 204	Elective/independent study (optional)	Elective/independent study (optional) (M.S. thesis approved)

M.S. in Five Quarters (Student requiring technical and interpretive foundation work)

This is a sample program for a student who has graduated from a digital media program or other undergraduate degree that provides experience in media creation in a CM context, but not an understanding of computer programming or interpretive practices. (CPM 202 is moved to the second year, to reflect the need for computer programming knowledge before taking this course.)

	Fall	Winter	Spring
	CPM 201	HISC 1	CPM 203
Year 1	Topics course	Topics course	Interpretive graduate/upper-division course
	CPM 235	CPM 236	CPM 120
	CPM 204	CPM 202	
	Interpretive graduate/upper-division course	CPM 299 (2-5 credits)	
Year 2		Elective/Independent Study (optional)	
	Elective/Independent Study (optional)	(M.S. thesis approved)	

Applying for Graduation

Students planning to graduate should refer to the Baskin School of Engineering Graduate Studies website.

COMPUTATIONAL MEDIA PH.D.

Introduction

The Ph.D. in computational media is designed for those who are already actively working in computational media and want to develop new knowledge that will change what is possible and how we understand it. The Ph.D. program includes all the course requirements of the M.S., with the exception of those related to the M.S. thesis. Ph.D. students have a number of additional requirements, as well. First, they must take additional topics courses, building understanding of a broader set of CM approaches. Second, they must pass both a first-year exam and a comprehensive exam, setting clear milestones for the development of expert-level knowledge in CM. Third, they must engage in substantial independent research that contributes to the development of the field, working closely with CM research faculty. Fourth, they must propose, complete, and defend a significant and novel dissertation project. The Ph.D. is appropriate for those who aim to lead future CM research efforts, within the academy, industry, government, non-profit, and other contexts.

Advancement to Candidacy

Course Requirements

Ph.D. students will complete 15 credits of core courses, 20 credits of topics courses, and 12 credits of courses involved in preparation for the comprehensive examination.

Core Courses (15 Credits)

CPM 201	Introduction to Computational Media	5
CPM 202	Computation Media Research	5
CPM 203	Computational Media Methods	5

Topics Courses (20 Credits)

Ph.D. students are required to take 20 credits of CM topics courses. The courses may be any combination of these types (as long as not already counted in another category):

- 5-credit CPM graduate classes.
- Classes in other subject codes that cover the theory and/or practice of a CM area, as listed in the “topics courses.”
- Up to 10 credits transferred from equivalent courses in previous graduate work at UCSC or elsewhere (not to exceed three course overall limit on transfers from outside institutions, between this and other requirements).

Current Topics Courses

CPM 235	User Evaluation of Technology	5
CPM 244	Artificial Intelligence in Games	5
CPM 248	Interactive Storytelling	5
CPM 265	Generative Methods	5

CMPM 290A	Topics in Computational Media	5
CMPM 290J	Playable Media	5
CMPM 290K	Social and Emotional Approaches to Human Computer Interaction	5
CMPM 290P	Topics in Computational Cinematography	5
DANM 250A	Collaborative Research Project Group: Art and Science	5
DANM 250B	Collaborative Research Project Group: Socially Engaged Art	5
DANM 250C	Collaborative Research Project Group: Performance and Embodiment	5
DANM 250E	Collaborative Research Project Group: Experimental Play	5
FILM 228	Moving Image Archives and the Frontiers of Information	5
FILM 230	Expanded Documentary	5
FILM 234	Toward an Ethics of New Media	5
GAME 232	Advanced Game Technologies	5
GAME 238	Computer Graphics for Games	5
GAME 250	Foundations of Serious Games	5
GAME 290A	Advanced Topics in Games	5
GAME 251	Games User Research	5
CSE 245	Computational Models of Discourse and Dialogue	5
CSE 260	Computer Graphics	5
CSE 261	Advanced Visualization	5
CSE 263	Data Driven Discovery and Visualization	5
CSE 265	Human-Computer Interaction	5
CSE 290L	Topics in Crowdsourcing and Collaboration	5

DANM 250A, DANM 250B, DANM 250C, DANM 250E: can be repeated

Exam Courses (12 Credits)

CMPM 206	Computational Media Research Preparation	2
CMPM 297B	Independent Study or Research	10

CMPM 206: Teaches skills for gathering literature and preparing portfolio for Comprehensive Exam, taken the same quarter as exam. 2 credits.

CMPM 297B: Research in preparation for the Comprehensive Exam, usually taken with the student's adviser the same quarter as CMPM 206. 10 credits.

Additional Requirements

There are three additional program requirements, though students may have completed the necessary work for one or more before admission.

First, all Ph.D. students must demonstrate an understanding of media creation in a CM context, and must do so by the end of their second year in the program—and before the comprehensive exam. This can be completed by any of:

- The Computer Science: Computer Game Design B.S. game studio sequence (CMPM 170, CMPM 171, CMPM 172) before graduate enrollment.
- The Art and Design: Games and Playable Media B.A. game studio sequence (ARTG 170, ARTG 171, ARTG 172) before graduate enrollment.
- A DANM project group sequence (three DANM 250 courses in same area, in sequence) during or before CM M.S./Ph.D. graduate enrollment.
- The Games and Playable Media M.S. project sequence (GAME 270, GAME 271, GAME 272) before CM MS/PhD graduate enrollment (due to PDST and cohort model, these cannot be taken by students in other programs).
- At least three graduate or upper-division undergraduate courses from a list of offerings at UCSC that require programming knowledge and are focused on defining and developing CM-related projects (e.g., CMPM 148) during or before CM graduate enrollment. See the list of media creation courses.
- Petition to CM graduate director, presenting evidence of equivalent coursework at another institution and/or equivalent CM project experience in another context.

Second, all Ph.D. students must demonstrate an understanding of computer programming sufficient to carry out CM research, and must do so by the end of their second year in the program—and before the comprehensive exam. This can be completed by:

- Taking a series of courses that integrate media and programming knowledge (e.g., GAME 235, GAME 236, and CMPM 120).
- Taking core programming (e.g., CSE 30 and CSE 101) and advanced programming (e.g., CSE 111) at UCSC or another institution.
- Petition to CM graduate director, presenting evidence of programming knowledge developed in another context.

Third, all Ph.D. students are expected to have an understanding of interpretive and critical methods sufficient to carry out CM research. Students who lack such a background are strongly encouraged to take a series of courses in this area, consulting with their adviser regarding which courses would be most appropriate. A recommended sequence is:

- HISC 1: Introduction to the History of Consciousness. If this is not possible, take an 80-level course that integrates introductory interpretive content (e.g., FILM 080V: Video Games as Visual Culture).
- Take two more graduate or upper-division undergraduate courses that focus on interpretive practices. The CM department offers courses that integrate this with CM knowledge, such as some offerings of CMPM 290A (e.g., Media Constellations)

and CMPM 176: Game Systems. Other programs also offer courses that make this integration, such as DANM 201: Recent Methods and Approaches to Digital Arts and Culture and DANM 202: Dialogues and Questions in Digital Arts and Culture. Courses that do not make this integration, but that are connected to the student's research area, are also acceptable.

Note: In extraordinary circumstances the Graduate Director can reduce the number of required courses based on a petition presenting past accomplishments. For example, reducing the number of required topics courses by one for each substantial past research publication or system accepted from the petition.

Current Media Creation Courses

CMPM 146	Game AI	5
CMPM 147	Generative Design	5
CMPM 148	Interactive Storytelling	5
CMPM 150	Creating Digital Audio	5
CMPM 151	Algorithmic Music for Games	5
CMPM 163	Game Graphics and Real-Time Rendering	5
CMPM 164	Game Engines	5
CMPM 179	Game Design Practicum	5
CMPM 244	Artificial Intelligence in Games	5
CMPM 248	Interactive Storytelling	5
CMPM 265	Generative Methods	5
CMPM 290J	Playable Media	5
GAME 210	Game Art Intensive	5
GAME 215	Audio Direction	5
CSE 160	Introduction to Computer Graphics	5
CSE 260	Computer Graphics	5
CSE 161	Introduction to Data Visualization	5
CSE 163	Data Programming for Visualization	5
CSE 183	Web Applications	5
CSE 245	Computational Models of Discourse and Dialogue	5
CSE 261	Advanced Visualization	5
CSE 263	Data Driven Discovery and Visualization	5

Lower-Division Courses

Students who are considering enrolling in lower-division courses in order to fulfill additional degree requirements (e.g., CSE 30, HISC 1) may wish to consult with the course instructor and their adviser about instead taking an independent study or directed study (with the course instructor, their adviser, or a third faculty member) that subsumes the work of the course and adds additional content to bring it up to a graduate level. Graduate students must be enrolled in some combination of at least 10 credits of courses or independent studies that are either graduate or upper-division undergraduate courses in order to be considered full-time enrolled.

Foreign Language Requirements

Teaching Requirement

Pre-Qualifying Requirements

The Ph.D. requires two examinations before the qualifying examination.

First-Year Examination

The Ph.D. first-year exam measures students' understanding of, and ability to synthesize and apply, core computational media knowledge (history, theory, research approaches, and evaluation methods). This is the material covered in the CM core courses. The first-year exam must be taken the spring of the year in which students finish their core coursework—which should be the first year, unless students need additional foundation work before taking one of the core courses, in which case it may be the second year.

There are three possible outcomes of the first-year exam:

- Pass at Ph.D. level
- Pass at M.S. level
- Fail

Students who pass at the Ph.D. level are done with the exam. Students who pass at the M.S. level may elect to leave the program with an M.S., upon completion of all M.S. requirements. Both students who pass at the M.S. level and students who fail have the option to take the exam again, in the immediately following summer offering (unless granted an exception to take it the following academic year). Students who take the exam again may not decrease their outcome (e.g., a student who passes at the M.S. level in spring, then fails in summer, retains the option of completing the M.S.). Students may only take the exam twice. Students are recommended for dismissal from the program immediately if they either (a) fail twice or (b) fail once and elect not to take the exam again.

In extraordinary circumstances the graduate director may give a student the option of taking the first-year exam without having taken the core coursework (CMPM 201, CMPM 202, and CMPM 203) during any quarter. Those who pass may complete the degree without taking the core courses.

Ph.D. Comprehensive Examination

The Ph.D. comprehensive exam measures students' preparation to perform independent CM research. It must be taken (for the first time) no later than the end of a student's third year in the program (the ninth quarter, excluding summer quarters). Before taking the exam, students must have completed the requirements for understanding media creation and computer programming, as well as demonstrated an understanding of interpretive practices (as outlined above). Students enroll in CMPM 206 (a two-unit course, usually offered by the CM grad director each quarter) and a 10-unit independent study (CMPM 297B, usually with their adviser), and take an exam evaluated by adviser and graduate director

(with another faculty member stepping in if adviser is graduate director). The exam itself includes:

- Reading a significant body of material in two or three depth areas of CM—from a list developed by student, adviser, and course instructor—integrating it, and writing one or more essays about it.
- A portfolio review of CM projects, with (a) a detailed written description of the computational system-building goals and process of at least one project led (in this aspect) by the student and (b) a detailed written description of the media-making goals and process of at least one project led (in this aspect) by the student. The projects may be from during or before enrollment in program, and the written descriptions may be of the same or different projects.

There are three possible outcomes of the comprehensive exam:

- Pass at Ph.D. level
- Pass at M.S. level
- Fail

As with the first-year exam, students who pass the comprehensive exam at the Ph.D. level are done with the exam. Students who pass at the M.S. level may elect to leave the program with an M.S., upon completion of all M.S. requirements. Both students who pass at the M.S. level and students who fail have the option to take the exam again, in a future quarter, not later than the middle of their fourth year in the program (the 11th quarter, excluding summer quarters). Students who take the exam again may not decrease their outcome (e.g., a student who passes at the M.S. level in spring, then fails the following fall, retains the option of completing the M.S.). Students may only take the exam twice. Students are recommended for dismissal from the program immediately if they either (a) fail twice or (b) fail once and elect not to take the exam again.

Qualifying Examination

Qualifying Examination and Advancement to Candidacy

The Ph.D. qualifying examination measures students' preparation to begin Ph.D. research. It must be taken (for the first time) no later than the end of a student's fourth year in the program (the 12th quarter, excluding summer quarters). It has two parts: first, a detailed written description of a proposed dissertation project, distributed to the committee before the oral examination; second, an oral presentation of the project, followed by questioning from the committee.

The committee policy for the CM Ph.D. follows that of UC Santa Cruz. Specifically: The qualifying examination committee shall consist of at least four examiners, one of whom is not a member of the student's department. The department shall submit to the Office of the Graduate Dean at least one month before the proposed examination a list of four qualified persons who are willing to serve on the examination committee, and who meet the following conditions:

- The chair of the examination committee must be a tenured faculty member.
- The student's thesis adviser cannot chair the examination committee.
- The outside member must be (a) a tenured faculty member from a different discipline on the University of California, Santa Cruz, campus, (b) a tenured faculty member of the same or different discipline from another academic institution involved in research and graduate education, or (c) a qualified person outside of academia with significant research experience (as determined by the Graduate Division).

After passing the qualifying examination, students advance to candidacy. Students who do not pass the examination may take it again, but must do so no later than the end of their fifth year in the program. Students may only take the examination twice. Students are recommended for dismissal from the program immediately if they either (a) fail twice or (b) fail once and elect not to take the examination again.

Post-Qualifying Requirements

Planners

Ph.D., Not Seeking M.S. Degree (Students with Technical CM M.S. Degree)

This is a sample program for a student who has completed a master's degree with significant technical content and a focus on some form of computational media (such as computer games). The M.S. in Games and Playable Media at UC Santa Cruz (offered in Silicon Valley) is such a degree. Such students will have already satisfied the requirement for understanding media creation in a CM context (e.g., by taking the CMPM 270, CMPM 271, and CMPM 272 sequence at UCSC) and the requirement for demonstrating an understanding of computer programming (such master's degrees generally only accept students who know how to program). This program is for a student who wants to complete the Ph.D. without getting a second M.S. in the process.

	Fall	Winter	Spring
Year 1	CMPM 201 Topics course Topics course	CMPM 202 Topics course CMPM 297	CMPM 203 Topics course CMPM 297 (First-year exam)
Year 2	CMPM 206 (2 credits) CMPM 297B (10 credits)	CMPM 297C (15 credits)	CMPM 297B (10 credits) CMPM 297A (5 credits)

	(Passes comps)		(Passes QE/advancement)	Year 4	CMPM 299 (15 credits)	CMPM 299 (15 credits)	CMPM 299 (15 credits)
Year 3	CMPM 299 (15 credits)	CMPM 299 (15 credits)	CMPM 299 (15 credits)				
				Year 5	CMPM 299 (15 credits)	CMPM 299 (15 credits)	CMPM 299 (15 credits)
Year 4	CMPM 299 (15 credits)	CMPM 299 (15 credits)	CMPM 299 (15 credits)				(Dissertation defense)
			(Dissertation defense)				

Ph.D., Seeking M.S. Degree (Students with Non-technical Master’s Degree)

This is a sample program for a student who has completed a master’s degree with significant arts content and a focus on some form of computational media (such as digital art). The M.F.A. in Digital Art and New Media at UC Santa Cruz is such a degree. Such students will have already satisfied the requirement for understanding media creation in a CM context (e.g., by taking one of the DANM 250 sequences at UCSC) but not necessarily the requirement for demonstrating an understanding of computer programming (such master’s degrees generally focus on the strength of the student’s arts portfolio, rather than technical skills). This program is for a student who wants to complete the Ph.D. while getting an M.S. in the process.

	Fall	Winter	Spring
Year 1	CMPM 201	Topics course	CMPM 203
	Topics course	CMPM 236	Topics course
	CMPM 235		CMPM 120
Year 2	CMPM 297B (10 credits)	CMPM 202	CMPM 297C (15 credits)
	Topics course	CMPM 297B (10 credits)	(First-year exam)
Year 3	CMPM 206	CMPM 297C (15 credits)	CMPM 297B (10 credits)
	CMPM 297B (10 credits)		CMPM 297A (5 credits)
	(Passes comps)		(Passes QE/advancement)

Ph.D., Also Seeking M.S. Degree (Students with Technical Non-CM B.S.)

This is a sample program for a student who has completed a bachelor’s degree with significant technical content but little focus on any form of computational media. The B.S. in computer science at UC Santa Cruz is such a degree. Such students will have already satisfied the requirement for demonstrating an understanding of computer programming (e.g., by taking a core programming sequence and CSE 111 at UCSC) though students strongly focused on theoretical computer science may need to take an advanced programming course. This program is for a student who wants to complete the M.S. degree on the way to the Ph.D.

			(Dissertation
			defense)

Transfer Credit

Up to 10 credits transferred from equivalent courses in previous graduate work at UCSC or elsewhere can be applied toward the Ph.D. course requirements. This can partially satisfy the topics requirement, but is not to exceed the three-course overall limit on transfers from outside institutions. A Course Substitution/Waiver form can be found on the BSOE Graduate Advising webpage.

Dissertation

Dissertation

The Ph.D. dissertation is a significant contribution to the CM field. It may emphasize technical, media-creation, or interpretive aspects, but must have a significant secondary contribution from at least one of the other areas—and may also emphasize areas equally. It requires an oral defense before a faculty committee, as well as a final dissertation document reviewed by that committee (distributed to the committee before the defense, and revised after the defense in response to committee comments). The committee must include at least two members of the CM Department.

Dissertation Defense

Academic Progress

As noted above, in order to remain in good academic standing, students must:

- Take the first-year exam (for the first time) the spring of the year they finish the core coursework, which should be the first year unless students need additional foundation work, in which case it may be the second year. Students who fail have the option to take the exam again, in the immediately following summer offering (unless granted an exception to take it the following academic year). Students may only take the exam twice. Students are recommended for dismissal from the program immediately if they either (a) fail twice or (b) fail once and elect not to take the exam again.
- Take the comprehensive exam (for the first time) no later than the end of a student's third year in the program (the ninth quarter, excluding summer quarters). Students who fail have the option to take the exam again, in a future quarter, not later than the middle of their fourth year in the program (the 11th

quarter, excluding summer quarters). Students may only take the exam twice. Students are recommended for dismissal from the program immediately if they either (a) fail twice or (b) fail once and elect not to take the exam again.

- Take the qualifying exam (for the first time) no later than the end of a student's fourth year in the program (the 12th quarter, excluding summer quarters). Students who do not pass the examination may take it again, but must do so no later than the end of their fifth year in the program. Students may only take the examination twice. Students are recommended for dismissal from the program immediately if they either (a) fail twice or (b) fail once and elect not to take the examination again.

In addition, because the primary work in the Ph.D. is independent research under the supervision of a faculty adviser, students are expected to be working with a research adviser at all times. This adviser must either be a voting member of the Computational Media Department faculty or another UCSC faculty member granted adviser status by the department in the student's case (either at the time of the student's admission or at a later point). Any student who ends a term without a faculty adviser will be issued a warning. If a student ends two academic quarters without an adviser they will be recommended for dismissal from the program immediately, unless granted an exception.

Applying for Graduation

Students planning to graduate should refer to the Baskin School of Engineering Graduate Studies website.

GAMES AND PLAYABLE MEDIA M.S.

Introduction

The goal of the M.S. in games and playable media is to prepare students to make professional contributions to the creation of games and other forms of media that invite and structure play. The degree is offered through the UC Santa Cruz location in Silicon Valley, enabling connection and collaboration with local industry. The curriculum includes deep engagement with game creation as well as a focus on professional development. Students can also take advantage of the opportunities for coursework and collaboration offered by its "sister" degree in serious games (also offered in Silicon Valley), as well as strong course offerings in games and related technologies on the Santa Cruz campus, and the potential for connections with the department's field-leading research groups. The M.S. in games and playable media is a five-quarter program that spans one and two-thirds academic years. Students are expected to complete coursework in five academic quarters, without leaves of absence.

Requirements

Course Requirements

Each student is required to take 60 credits. Required courses are as follows:

All of the following courses:

GAME 200	Game Design Systems	5
GAME 221	Professional Development for Game Makers I	2

Plus one of the following options:

Either this course

GAME 230	Fundamentals of Game Engineering	5
----------	----------------------------------	---

or these courses

GAME 235	Game Development I	5
GAME 236	Game Development II	5

Students who lack sufficient technical preparation to enter course Games and Playable Media GAME 230, Fundamentals of Game Engineering, must take both GAME 235, Game Development I, and GAME 236, Game Development II. Assessment of technical preparation will be performed based on completed coursework prior to entry into the program, discussion with the student, and, at the program's discretion, use of a technical assessment examination.

Plus all of the following courses:

GAME 231	Game Technologies	5
GAME 270	Games and Playable Media Studio I	5
GAME 271	Games and Playable Media Studio II	5
GAME 272	Games and Playable Media Studio III	5
GAME 280A	Games Proseminar	2

Three courses from the electives list below, 15 credits (5 credits each)

GAME 210	Game Art Intensive	5
GAME 215	Audio Direction	5
GAME 232	Advanced Game Technologies	5
GAME 238	Computer Graphics for Games	5
GAME 250	Foundations of Serious Games	5
GAME 290A	Advanced Topics in Games	5
CMPM 201	Introduction to Computational Media	5
CMPM 202	Computation Media Research	5
CMPM 203	Computational Media Methods	5
CMPM 235	User Evaluation of Technology	5
CMPM 244	Artificial Intelligence in Games	5
CMPM 248	Interactive Storytelling	5
CMPM 265	Generative Methods	5
DANM 201	Recent Methods and Approaches to Digital Arts and Culture	5
DANM 202	Dialogues and Questions in Digital Arts and Culture	5
DANM 219	Introduction to Electronics for	5

DANM 241B	Artmaking Modern Art: Cubism to Pop	5
DANM 250D		
DANM 250E	Collaborative Research Project Group: Experimental Play	5
DANM 254I	Empirical Approaches to Art Information	5
DANM 281	Special Topics in Digital Arts and New Media	5
MUSC 206B	Computer-Assisted Composition	5

A maximum of five credits of Computational Media 297 (Independent Study or Research) can be used to meet degree requirements.

Other Requirements

Project

Completion of a master's project is required for the master's degree. These are generally collaborative projects, created together with other students in the Games and Playable Media M.S. program. Projects are typically completed by students during GAME 272, Games and Playable Media Studio III. Students are evaluated based both on their individual contributions to the project and on the overall success of the project as a whole. Each project will be demonstrated via a public presentation, and this demonstration comprises part of the final project evaluation.

Evaluation of projects is performed by a committee consisting of at least three people, comprised of at least the games and playable media vice chair and will contain other members of the games and playable media program faculty, or members of the games and playable media program advisory committee, or other instructors in the games and playable media program. A majority of the committee's voting members are members of the UC Santa Cruz academic senate.

Planners

There are two primary paths through the first year of the degree. Students with less technical background take GAME 235, GAME 236, and GAME 231 in their first year, while those with more technical background take GAME 230 and GAME 231 in their first year.

The sample programs include summer internships or sponsored projects. These are not required, and do not bear academic credit. They are, however, strongly suggested.

Sample program with more technical background

Quarter 1	GAME 230, Fundamentals of Game Engineering (5 credits)
	GAME 200, Game Design Systems (5 credits)
	GAME 280A, Games Proseminar (2 credits)
Quarter 2	Elective 1 (5 credits)
	Elective 2 (5 credits)

	GAME 280A, Games Proseminar (2 credits)
Quarter 3	GAME 231, Game Technologies (5 credits) GAME 270, Games and Playable Media Studio I (5 credits)
	GAME 221, Professional Development for Game Makers I (2 credits)
Summer	Internship or Sponsored Project
Quarter 4	GAME 271, Games and Playable Media Studio II Elective 3 (5 credits)
	GAME 280A, Games Proseminar (2 credits)
Quarter 5	GAME 272, Games and Playable Media Studio III (5 credits) Elective 4 (5 credits)
	GAME 280A, Games Proseminar (2 credits)

Sample program with less technical background

Quarter 1	GAME 235, Development I (5 credits) GAME 200, Game Design Systems (5 credits) GAME 280A, Games Proseminar (2 credits)
Quarter 2	GAME 236, Game Development II (5 credits) Elective 1 (5 credits) GAME 280A, Games Proseminar (2 credits)
Quarter 3	GAME 231, Game Technologies (5 credits) GAME 270, Games and Playable Media Studio I (5 credits) GAME 221, Professional Development for Game Makers I (2 credits)
Summer	Internship or Sponsored Project
Quarter 4	GAME 271, Games and Playable Media Studio II Elective 2 (5 credits)

GAME 280A, Games Proseminar (2 credits)

Quarter
5
GAME 272, Games and Playable Media Studio III (5 credits)

Elective 3 (5 credits)

GAME 280A, Games Proseminar (2 credits)

Transfer Credit

Up to three School of Engineering courses fulfilling the degree requirements of the M.S. degree may be taken before beginning the graduate program through the concurrent enrollment program. The game art, game writing, and game sound requirements of the M.S. program may also be satisfied through courses from other institutions or prior UCSC coursework. Petitions should be submitted along with the transcript from the other institution. For courses taken at other institutions, copies of the syllabi, examinations, and other coursework should accompany the petition. Such petitions are not considered until the completion of at least one quarter at UCSC.

At most, a total of three courses may be transferred from concurrent enrollment and other institutions.

Review of Progress

On an ongoing basis, the faculty reviews the progress of every student remaining on track to complete the degree in five consecutive academic quarters. Students not making adequate progress toward completion of degree requirements (see the Graduate Handbook for policy on satisfactory academic progress) are subject to dismissal from the program. Students with academic deficiencies may be required to take additional courses. Full-time students with no academic deficiencies are normally expected to complete the degree requirements at the rate of at least two courses per quarter, and move forward through the course sequences together with their cohort, remaining on track to complete the degree in a single four-quarter year.

Students receiving two or more unsatisfactory grades (U or grade below B) in the School of Engineering (SoE) courses, or who receive an unsatisfactory grade (U or grade below B) in a course in the Games and Playable Media Studio sequence, are not making adequate progress and will be placed on academic probation for the following quarter of registered enrollment. Withdrawing or taking a leave of absence does not count as enrollment. Part-time enrollment is counted as a half quarter of enrollment. Students who are on academic probation or are not enrolled full time are no longer guaranteed any previously committed funding. Should students receive an unsatisfactory grade (U or below B) in a School of Engineering course while on probation, the Computational Media Department may request the graduate dean to dismiss that student from the graduate program. If after being removed from probation, the student again receives an unsatisfactory grade (U or below B) in a School of

Engineering course, he or she will return immediately to academic probation.

Graduate students experiencing circumstances or difficulties that impact their academic performance should contact their adviser and the graduate director immediately. Students may appeal their dismissal.

Applying for Graduation

SERIOUS GAMES M.S.

Introduction

The goal of the master of science (M.S.) degree in serious games is to prepare students to make professional contributions to the creation of games and related forms of media in areas such as learning, wellness, social connectedness, citizen science, issue advocacy, and infusing playfulness into everyday activities. The degree is offered through the UC Santa Cruz location in Silicon Valley, enabling connection and collaboration with local industry. The curriculum covers six key areas for serious games professionals—game design, game technology, eliciting and integrating subject matter knowledge, designing and conducting efficacy measurements, effective teamwork, and career planning—all within the context of the serious games field. Students can also take advantage of the opportunities for coursework and collaboration offered by its “sister” degree in games and playable media (also offered in Silicon Valley), as well as strong course offerings in games and related technologies on the Santa Cruz campus, and the potential for connections with the department’s field-leading research groups. The M.S. in serious games is a five-quarter program that begins in fall quarter and encourages student internships during summer. Students are expected to complete coursework in five academic quarters, without leaves of absence.

Requirements

Course Requirements

Students are required to complete at least 50 credits for the M.S., and more credits are recommended for students without full preparation before beginning the degree, as discussed in the “Sample programs” section, below. The required courses are:

All of the following courses:

GAME 200	Game Design Systems	5
GAME 250	Foundations of Serious Games	5
GAME 251	Games User Research	5
GAME 255	Serious Games Studio I	5
GAME 256	Serious Games Studio II	5
GAME 257	Serious Games Studio III	5

Plus one of the following options:

Either this course		
GAME 230	Fundamentals of Game Engineering	5

or these

courses		
GAME 235	Game Development I	5
GAME 236	Game Development II	5

Students who lack sufficient technical preparation to enroll in GAME 230, Fundamentals of Game Engineering, must take both GAME 235, Game Development I, and GAME 236, Game Development II. Assessment of technical preparation will be performed based on completed coursework prior to entry into the program, discussion with the student, and, at the program’s discretion, use of a technical assessment examination.

Plus these two-credit courses:

GAME 221	Professional Development for Game Makers I	2
GAME 280A	Games Proseminar	2

GAME 280A should be taken four times during the degree program, while GAME 221 should be taken once.

One course from the elective list below.

Students are required to take one elective, and the recommended number is two. These electives may be of two types: computational media electives and subject matter electives. Students are expected to take at least one computational media elective.

Computational media electives are offered at the Silicon Valley or Santa Cruz campus of UC Santa Cruz and focus on games, or related forms of computational media, or related topics in computing and culture. The current offerings in this category are listed below. Subject matter electives are taken to deepen a student’s understanding of the specific subject matter on which they may develop a game, or may already be developing a game. These may be drawn from across the graduate and upper-division undergraduate curriculum at UC Santa Cruz, given that the potential subject areas for serious games are vast.

CMPM 201	Introduction to Computational Media	5
CMPM 202	Computation Media Research	5
CMPM 203	Computational Media Methods	5
CMPM 235	User Evaluation of Technology	5
CMPM 244	Artificial Intelligence in Games	5
CMPM 248	Interactive Storytelling	5
CMPM 265	Generative Methods	5
DANM 201	Recent Methods and Approaches to Digital Arts and Culture	5
DANM 202	Dialogues and Questions in Digital Arts and Culture	5
DANM 219	Introduction to Electronics for Artmaking	5
DANM 241B	Modern Art: Cubism to Pop	5
DANM 250E	Collaborative Research Project Group: Experimental Play	5
DANM 254I	Empirical Approaches to Art Information	5
DANM 281	Special Topics in Digital Arts and New Media	5

GAME 210	Game Art Intensive	5
GAME 215	Audio Direction	5
GAME 232	Advanced Game Technologies	5
GAME 238	Computer Graphics for Games	5
GAME 290A	Advanced Topics in Games	5
CSE 201	Analysis of Algorithms	5
CSE 210A	Programming Languages	5

Other Requirements

Project

Completion of a master's project is required for the master's degree. These are generally collaborative projects, created together with other students in the serious games M.S. program. Students typically work together in the ideation and rapid prototyping course (GAME 255, first year, spring quarter) to develop ideas that are “pitched” as projects for the rest of the capstone sequence (GAME 256 and GAME 257, second year, fall and winter quarters). The capstone sequence is completed through interdisciplinary teamwork, which is also how the professional field is organized. Students are evaluated based both on their individual contributions to the project and on the overall success of the project as a whole. Each project will be demonstrated via a public presentation, and this demonstration constitutes part of the final project evaluation.

Evaluation of projects is performed by a committee consisting of at least three people, comprised of at least the serious games vice chair and another core serious games faculty member, and which may contain members of the serious games or games and playable media program faculty, or members of the program advisory boards, or other instructors in the programs. A majority of the committee's voting members are members of the UC Santa Cruz academic senate.

Planners

There are two primary paths through the first year of the degree. Students with less technical background take GAME 235, GAME 236, and GAME 231 in their first year, while those with more technical background take GAME 230 and GAME 231 in their first year.

The sample programs include summer internships or sponsored projects. These are not required, and do not bear academic credit. They are, however, strongly suggested.

Sample program with more technical background

Fall Year 1	GAME 230, Fundamentals of Game Engineering (5 credits)
	GAME 200, Game Design Systems (5 credits)
	GAME 280A, Games Proseminar (2 credits)
Winter Year 1	Elective 1 (5 credits)
	GAME 250, Foundations of Serious Games (5 credits)
	GAME 280A, Games Proseminar (2 credits)
Spring	GAME 231, Game Technologies (5 credits)

Year 1	GAME 255, Serious Games Studio I (5 credits)
	GAME 221, Professional Development for Game Makers I (2 credits)
Summer	Internship or Sponsored Project
Fall Year 2	GAME 251, Games User Research (5 credits)
	GAME 256, Serious Games Studio II (5 credits)
	GAME 280A, Games Proseminar (2 credits)
Winter Year 2	Elective 2 (5 credits)
	GAME 257, Serious Games Studio III (5 credits)
	GAME 280A, Games Proseminar (2 credits)

Sample program with less technical background

Fall Year 1	GAME 235, Game Development I (5 credits)
	GAME 200, Game Design Systems (5 credits)
	GAME 280A, Games Proseminar (2 credits)
Winter Year 1	GAME 236, Game Development II (5 credits)
	GAME 250, Foundations of Serious Games (5 credits)
	GAME 280A, Games Proseminar (2 credits)
Spring Year 1	GAME 231, Game Technologies (5 credits)
	GAME 255, Serious Games Studio I (5 credits)
	GAME 221, Professional Development for Game Makers I (2 credits)
Summer	Internship or Sponsored Project
Fall Year 2	GAME 251, Games User Research (5 credits)
	GAME 256, Serious Games Studio II (5 credits)
	GAME 280A, Games Proseminar (2 credits)
Winter Year 2	Elective (5 credits)
	GAME 257, Serious Games Studio III (5 credits)
	GAME 280A, Games Proseminar (2 credits)

[To the Catalog Editor: Please make this a separate catch-all section]

Transfer Credit

Up to three School of Engineering courses fulfilling the degree requirements of the M.S. degree may be taken before beginning the graduate program through the concurrent enrollment program. The elective requirement of the M.S. program may also be satisfied through courses from other institutions or prior UCSC coursework. Petitions should be submitted along with the transcript from the other institution. For courses taken at other institutions, copies of the syllabi, examinations, and other coursework should accompany the petition. Such petitions are not considered until the completion of at least one quarter at UCSC.

At most, a total of three courses may be transferred from concurrent enrollment and other institutions.

[To the Catalog Editor: Please make this a separate catch-all section]

Review of Progress

On an ongoing basis, the faculty reviews the progress of every student. Students not making adequate progress toward completion of degree requirements (see the Graduate Handbook for policy on satisfactory academic progress) are subject to dismissal from the program. Students with academic deficiencies may be required to take additional courses. Full-time students with no academic deficiencies are normally expected to complete the degree requirements at the rate of at least two five-credit courses per quarter, and move forward through the course sequences together with their cohort, remaining on track to complete the degree in five academic quarters.

Students receiving two or more unsatisfactory grades (U or grade below B) in the School of Engineering (SoE) courses, or who receive an unsatisfactory grade (U or grade below B) in a course in the Serious Games Studio sequence, are not making adequate progress and will be placed on academic probation for the following quarter of registered enrollment. Withdrawing or taking a leave of absence does not count as enrollment. Part-time enrollment is counted as a half quarter of enrollment. Students who are on academic probation or are not enrolled full time are no longer guaranteed any previously committed funding. Should students receive an unsatisfactory grade (U or below B) in a School of Engineering course while on probation, the Computational Media Department may request the graduate dean to dismiss that student from the graduate program. If after being removed from probation, the student again receives an unsatisfactory grade (U or below B) in a School of Engineering course, he or she will return immediately to academic probation.

Graduate students experiencing circumstances or difficulties that impact their academic performance should contact their adviser and the graduate director immediately. Students may appeal their dismissal.

Applying for Graduation

Students planning to graduate should refer to the Baskin School of Engineering Graduate Studies website.

DESIGNATED EMPHASIS IN

COMPUTATIONAL MEDIA

Introduction

The graduate designated emphasis (DE) leading to the degree notation “with an emphasis in Computational Media” provides specialization in the theory, principles, and practices of the field of computational media. This DE is administered by the Department of Computational Media. Students wishing to complete an M.F.A. or Ph.D. degree with an emphasis in this area must satisfy the degree requirements of a primary program as well as of the DE. The DE is most suitable for students pursuing degrees in computer science and engineering, digital art and new media, film and digital media, literature, and psychology. However, students from any area may work in this interdisciplinary field as long as they meet all requirements, including progress, within the primary degree program. It is intended for students in terminal degree programs (e.g., Ph.D., M.F.A.) rather than non-terminal master’s or certificate programs.

Requirements

Committee Composition and Departmental Approvals

The student’s M.F.A. thesis or capstone, Ph.D. qualifying exam, or Ph.D. dissertation committee must include one member of the Computational Media (CM) Department faculty.

Both the student’s CM adviser and the department’s graduate director must sign the student’s “Application for the Designated Emphasis in Computational Media” form, when the student’s DE is proposed. The graduate director signs this form again when the DE is completed, and may approve exceptions either at the time of proposal or completion.

Course Requirements

All students must complete CMPM 201 (Introduction to Computational Media) and two additional 5-credit graduate courses offered or crosslisted by the CM department and/or faculty with (non-zero percentage) appointments in the department. One of the additional courses may be fulfilled through a graduate independent study (of 5 credits or greater) with a CM faculty member, with approval of the CM graduate director.

Writing, Research and/or Teaching Requirements

The student must complete a significant piece of computational media writing. Examples include a student’s M.F.A. thesis (or substantial section of one) or a Ph.D. dissertation chapter—but other pieces of writing are also acceptable, at the discretion of the CM graduate director, including conference and journal publications.

PROGRAMS OFFERED

- Computer Engineering B.S. (p. 404)
- Computer Science B.S. (p. 393)
- Computer Science B.A. (p. 398)
- Network and Digital Technology B.A. (p. 411)
- Technology and Information Management B.S. (p. 416)
- Computer Engineering Minor (p. 410)
- Computer Science Minor (p. 403)
- Technology and Information Management Minor (p. 420)
- Computer Engineering Bachelor's/Master's Contiguous Pathway (p. 421)
- Computer Science and Engineering Bachelor's/Master's Contiguous Pathway (p. 421)
- Computer Engineering M.S. (p. 426)
- Computer Science and Engineering M.S. (p. 422)
- Computer Engineering Ph.D. (p. 428)
- Computer Science and Engineering Ph.D. (p. 424)
- Human Language Media and Modeling Designated Emphasis (p. 427)

OTHER PROGRAMS OF INTEREST

- Computer Science: Computer Game Design B.S. (p. 373)
- Robotics Engineering B.S. (p. 432)

Computer scientists and engineers study the design and architecture of digital systems, their properties, and their application. The science and engineering of computing systems includes a variety of disciplines from the mathematical study of computation to the design of architectures leveraging advanced technologies, as well as expertise in the many different levels of abstraction in between, and the realization of a vast array of applications and information technologies. These systems are now present in

almost every human endeavor, in the form of embedded systems to cloud-scale computation, from personal devices to society-scale networks and systems, from data science to the everyday systems they automate.

Computing is the field that is most strongly influencing the societal, industrial, and technological advances of this century, bringing a revolution spanning from what humans can do (via information technology, data science, e-commerce, and more) to how they communicate (the web, social networks, mobile devices, and virtual/augmented reality). Indeed, as of January 2019, the three largest companies worldwide by market capitalization are all information technology companies. The rapid and targeted communication afforded by these systems have affected our culture and politics. Computing, from hardware to algorithms and networking, is responsible for an increasing share of the value even of products that once were purely mechanical systems, such as automobiles.

Computing spans multiple areas that are continually evolving, spurred by both technological and theoretical advances; the current areas can be roughly categorized as follows:

- *Design and architecture*, or how computing systems are built: from VLSI/CAD, to architectures and parallel systems.
- *Systems*, or how the architectures can be organized: operating systems, storage, networking, and databases, the languages used to program them, and the techniques used to ensure their secure operation.
- *Theory*, concerning the abstract properties of computing systems, spanning from the theory of computation to algorithms, from the foundations of programming languages and concurrency to the theory of databases and distributed systems.
- *Data science*, or how to computationally understand information about the world, including artificial intelligence and machine learning, natural language processing and vision.
- *Applications*, or how computing systems can be used and what the implications of their use are, from web to mobile systems, from vision to assistive technologies, from fairness and privacy issues to the societal implications of computing, to the incentive structures that make collaboration and communication possible.

Computing at UC Santa Cruz has already attained a very high level of international recognition. The Computer Science and Engineering Department's organization, as a single cohesive department, facilitates new projects and courses that span multiple areas. As a broad department, it benefits from a wider and more prepared graduate student cohort, and the close coordination of degrees with course offerings that provide engineering majors with more streamlined and cutting-edge degree programs. With its proximity to Silicon Valley and its outstanding research, UCSC is a leader in computing research and education.

The Computer Science and Engineering Department offers five undergraduate degree programs, three undergraduate minors, and graduate master's and doctoral degree programs.

Two additional programs in the Baskin School of Engineering share the same introductory programming courses as the Computer Science and Engineering Department's computing majors. The Computational Media Department offers a degree that focuses on computer game design by providing students with artistic, systems, and management perspectives for developing computer games. The Electrical and Computer Engineering Department offers a degree in robotics that builds on courses in computer engineering and electrical engineering, combined with mechanical engineering, that focuses on building and controlling robotic devices.

Undergraduate Program

The Computer Science and Engineering Department at UC Santa Cruz offers five undergraduate degrees and three related minors:

The **bachelor of science (B.S.) in computer engineering** prepares graduates for a rewarding career in engineering. UCSC computer engineering graduates will gain a thorough grounding in the principles and practices of computer engineering and the scientific and mathematical principles upon which they are built; they will be prepared for further education (both formal and informal) and for productive employment in industry. Because computer engineering is so broad, the B.S. in computer engineering offers five specialized concentrations for completing the program: systems programming, computer systems, robotics and control, networks, and digital hardware.

The **bachelor of science (B.S.) in computer science** is appropriate for students desiring a strong concentration in the core areas of computer science—algorithms, programming languages, and systems—with more courses in computer science, computer engineering, and computational media; this program also allows for a few electives outside of science and engineering.

The **bachelor of arts (B.A.) in computer science** is designed to give students a solid grounding in both theoretical and practical topics in computer science, computer engineering, and mathematics while leaving flexibility for a broad program of study, including some courses outside of science and engineering, or even for a double major in another discipline.

The **bachelor of arts (B.A.) in network and digital technology** provides students with in-depth knowledge of the underlying structure and function of network and computer technology and the design processes that make those technologies function. The program is tailored to students who wish to combine technology with other fields or have a general focus on digital design or computer networks. The B.A. in network and digital technology is not an engineering degree, but B.A. graduates will be prepared to work with technology development in other capacities, or join the computer network workforce.

The **bachelor of science (B.S.) in technology and information management** is a rigorous, challenging major for those students wanting to pursue careers in the management of information and technology. Students will receive a thorough grounding in the fundamental principles and practices of technology (in particular, computer science and computer engineering) and management, and the scientific, mathematics, and economics principles upon which they are built. In particular, they will become proficient in the following areas: strategy, planning, innovation, entrepreneurship, information technology, software design, product development, and supply-chain management.

At UCSC, students in computing majors are first **introduced to programming** using the Python programming language in CSE 20, Beginning Programming in Python. The core programming sequence, courses CSE 13S, Computer Systems and C Programming, (or CSE 13E Embedded Systems and C Programming), and CSE 30, Programming Abstractions: Python, expose students to more advanced concepts in C and Python. CSE 12 and CSE 12L, Computer Systems and Assembly Language & Laboratory, is taken prior to CSE 13S or CSE 13E to provide the underpinnings of computer organization necessary for mastering the C programming language. Students with a prior programming course, AP credit, or clearing the "Test-out" bar will start with CSE 30 and CSE 12 and CSE 12L.

Many computer engineering and computer science students continue their education through the M.S. degree. The Department of Computer Science and Engineering offers **combined B.S./M.S. pathways in both computer engineering and computer science** that enable eligible undergraduates to move without interruption to the graduate program. Interested students should contact their adviser for more details.

COURSES FOR NON-MAJORS

The Department of Computer Science and Engineering offers course CSE 3, Personal Computer Concepts: Software and Hardware, providing students an introductory course on the design and use of computers from an engineering viewpoint. Other courses of interest to non-majors include CSE 20, Beginning Programming in Python and CSE 12 & CSE 12L, Computing Systems and Assembly Language & Laboratory, an introductory course on computer systems, system software, and machine-level programming; CSE 80N, Introduction to Networking and the Internet, an introduction to technological services of the Internet; and CSE 80A, Universal Access: Disability, Technology, and Society.

Computer Engineering B.S. (p. 404)

Computer Science B.S. (p. 393)

Computer Science B.A. (p. 398)

Network and Digital Technology B.A. (p. 411)

Technology and Information Management B.S. (p. 416)

Computer Engineering Minor (p. 410)

Computer Science Minor (p. 403)

Technology and Information Management Minor (p. 420)

COMPUTER SCIENCE B.S.

Information and Policies

Introduction

The bachelor of science (B.S.) program is appropriate for students desiring a strong concentration in the core areas of computer science—algorithms, programming languages, and systems—with more courses in computer science, computer engineering, and computational media; this program also allows for a few electives outside of science and engineering.

Applications of computer science are found in many other areas of study, from art, music, and linguistics to social sciences, economics, business, digital, and social media, environmental and life sciences, and sciences. Thus, interdisciplinary activities are encouraged. For those students whose primary interest is in another area, a minor in computer science is offered.

Academic Advising for the Program

The Baskin School of Engineering undergraduate advising office offers general advising for prospective and declared undergraduates majoring in School of Engineering programs. The office handles major declarations, transfer credits, course substitutions, articulations, and degree certifications. Undergraduate students obtain and submit all paperwork requiring departmental approval to the undergraduate advising office. Transfer students should also refer to the Transfer Information and Policy section.

Baskin Engineering Building, Room 225
advising@soe.ucsc.edu
(831) 459-5840

Getting Started in the Major

It is recommended that high school students intending to apply to the computer science major have completed four years of mathematics (through advanced algebra and trigonometry) and three years of science in high school. Comparable college mathematics and science courses completed at other institutions also serve to properly prepare a student for the computer science major.

Program Learning Outcomes

Recipients of a Bachelor of Science degree in Computer Science at UC Santa Cruz are expected to have the following skills and experiences:

1. Demonstrate mastery of computer science in the following core knowledge areas:

- Algorithms, data structures, and complexity
- Programming languages
- Software engineering and development
- Computer systems

2. Apply system-level perspective by thinking at multiple levels of detail and abstraction and by recognizing the context in which a computer system may function, including its interactions with people and the physical world.
3. Apply problem-solving skills and the knowledge of computer science to solve real problems.
4. Understand how technological advances impact society and the social, legal, ethical and cultural ramifications of computer technology and their usage.
5. Write about and orally communicate technical material about computer science and computer systems, broadly conceived.

Major Qualification Policy and Declaration Process

Major Qualification

For all students, it is necessary to be listed as proposed computer science majors within the School of Engineering before being able to declare the major. Additionally, students must satisfy the following three criteria to be able to declare the major:

Declare

Students must declare CS (Computer Science B.S. or Computer Science B.A.) as their major between student's second to sixth quarter.

Foundation courses

Students must have completed the following foundation courses when they declare their major:

Either this course

CSE 13S	Computer Systems and C Programming	7
---------	------------------------------------	---

or this course

CSE 13E	Embedded Systems and C Programming	7
---------	------------------------------------	---

13S recommended

And these courses

CSE 12	Computer Systems and Assembly Language	5
--------	--	---

CSE 12L	Computer Systems and Assembly Language Laboratory	2
---------	---	---

CSE 30	Programming Abstractions: Python	7
--------	----------------------------------	---

Plus one of the following

MATH 19A	Calculus for Science,	5
----------	-----------------------	---

MATH 20A	Engineering, and Mathematics Honors Calculus	5
Plus one of the following		
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Students must have a cumulative GPA of at least 2.80 in the foundation courses attempted at UCSC, with at most one unsuccessful attempt (grade C-, D+, D, D-, F, or NP) permitted in a foundation course.

Cumulative GPA

Students must also have a cumulative GPA of at least 2.80 in the foundation courses attempted at UC Santa Cruz, with at most one unsuccessful attempt (grade C-, D+, D, D-, F, or NP) permitted in a foundation course.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the undergraduate director through the Baskin School of Engineering undergraduate advising office within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student, college, and Office of the Registrar of the decision.

How to Declare a Major

Students interested in pursuing computer science must indicate computer science as a proposed major on their application for admission to UC Santa Cruz. Students admitted to UCSC in fall 2018 or later will be able to declare a computer science major only if they have been admitted to UCSC as proposed computer science majors.

For more instructions about how to declare a major in the Baskin School of Engineering, please refer to the department's website on declaring your major.

Transfer Information and Policy

Transfer Admission Screening Policy

Prior to admission, transfer students must have completed the following five courses or their articulated equivalents. (Students entering UCSC by fall 2020 and students who have catalog rights to follow the 2018-19 General Catalog may follow the screening requirements published in that catalog.)

Lecture/lab combinations count as one course; CSE 12 and CSE 12L count as one course.

This course

CSE 30	Programming Abstractions: Python	7
--------	-------------------------------------	---

Plus one of the following

CSE 13E	Embedded Systems and C Programming	7
CSE 13S	Computer Systems and C Programming	7

Plus one of the following options

Either these courses		
CSE 12	Computer Systems and Assembly Language	5
CSE 12L	Computer Systems and Assembly Language Laboratory	2
or this course		
CSE 16	Applied Discrete Mathematics	5

Plus one of the following

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

Plus one of the following

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20B	Honors Calculus	5

Minimum GPA

With a minimum GPA of 2.8. A student lacking one of these five courses may be admitted if they have completed CSE 16, and CSE 12 and CSE 12L, or the articulated alternative.

Furthermore, transfer students entering in the fall must have completed at least three of these courses by the end of the fall term of the previous academic year and have a minimum 2.80 GPA over all completed foundation courses at that time.

Transfer students are strongly recommended to complete CSE 16 as part of their screening courses, and to complete one course out of MATH 21, AM 10, MATH 23A or AM 30, and most general education requirements prior to arriving at UC Santa Cruz.

Transfer students admitted for the winter term must satisfy the major preparation criteria for transfer students admitted for the fall term and, additionally, must have successfully completed at least two additional courses that are required for the proposed degree, prior to admission. It is highly recommended that these courses should be AM 10 (or MATH 21) and AM 30 (or MATH 23A).

Most courses in the computer science program at UC Santa Cruz have a strong theoretical component to prepare the student for designing, as opposed to simply using, computer systems. Often, courses taken at other institutions which emphasize applications of current languages and computers do not count toward the computer science major at UCSC.

At UCSC, computer science students are first introduced to programming using the programming language Python. The core programming sequence—courses CSE 30 and CSE 13S (or CSE 13E)—exposes students to both Python and C. Many upper-division courses that involve programming use the C and C++ programming languages.

Transfer students who are not familiar with both an object-oriented language and C may need to take a remedial course. Students familiar with C++ and Unix should find the transition to Python and C relatively simple.

Getting Started at UCSC as a Transfer Student

Transfer students should declare their major in their first quarter at UCSC. Instructions for declaring a major in the Baskin School of Engineering are on the department's major declaration page.

Letter Grade Policy

All students admitted to a School of Engineering major, or seeking admission to a major, must take all courses required for that major for a letter grade. This policy includes courses required for these degrees that are sponsored by other departments.

Course Substitution Policy

Undergraduate engineering students who wish to substitute a major course with a course from UC Santa Cruz must first consult the School of Engineering Undergraduate Advising Office. The advising office requires a Petition for Course Substitution be approved before credit for an alternate course can be applied to any School of Engineering major requirement.

Petition forms are available at the Undergraduate Advising Office and online.

Petitions and procedures for approval must be obtained from and submitted to the Undergraduate Advising Office.

Double Majors and Major/Minor Combinations Policy

Students may not receive both the computer science B.A. and computer science B.S. degrees.

Study Abroad

Honors

Students must obtain a GPA of 3.8 or higher in the courses in the major to be considered for the distinction of "Highest Honors in the Major." Students must obtain a GPA of 3.5 or higher in the courses in the major to be considered for the distinction of "Honors in the Major." The School of Engineering reserves the right to withhold honors based on other criteria, such as an incident of academic dishonesty.

Requirements and Planners

Course Requirements

This program is designed for students who wish to maximize exposure to computer science concepts and methods by taking a large selection of upper-division computer science courses, as well as courses in the sciences and mathematics. A minimum of 20 courses must be completed for the B.S. in computer science.

Lower-Division Courses

Computer Science and Engineering

All of the following

CSE 12	Computer Systems and Assembly Language	5
CSE 12L	Computer Systems and Assembly Language Laboratory	2
CSE 16	Applied Discrete Mathematics	5
CSE 20	Beginning Programming in Python	5
CSE 30	Programming Abstractions: Python	7

Students with no prior programming will take CSE 20 before CSE 30, and CSE 12 & CSE 12L. Students with a prior programming course, AP credit, or clearing the "Test-out" bar will start with CSE 30, and CSE 12 and CSE 12L.

Plus one of the following courses

CSE 13S	Computer Systems and C Programming	7
CSE 13E	Embedded Systems and C Programming	7

CSE 13S recommended

Mathematics

Plus one of the following options:

Either these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

or these

courses		
MATH 20A	Honors Calculus	5
MATH 20B	Honors Calculus	5

Applied Mathematics

One of these courses

AM 10	Mathematical Methods for Engineers I	5
MATH 21	Linear Algebra	5

Plus one of these courses

AM 30	Multivariate Calculus for Engineers	5
MATH 23A	Vector Calculus	5

Upper-Division Courses

Computer Science and Engineering

The following courses:

CSE 101	Algorithms and Abstract Data Types	5
CSE 102	Introduction to Analysis of Algorithms	5
CSE 103	Computational Models	5

CSE 120 Computer Architecture 5

Plus one of the following

CSE 112 Comparative Programming Languages 5

CSE 114 Functional Programming 5

CSE 116 Introduction to Functional Programming 5

Plus one of the following

CSE 130 Principles of Computer Systems Design 5

CSE 131 Introduction to Operating Systems 5

Statistics

One of the following:

STAT 131 Introduction to Probability Theory 5

CSE 107 Probability and Statistics for Engineers 5

Electives

Five courses must be completed from the list below . At least one course must be a computer science and engineering course. At most two courses can be from applied mathematics, statistics or mathematics, of which at most one may be substituted with two physics classes, chosen from the following list of class pairs: PHYS 6A and PHYS 6C, PHYS 6A and PHYS 6B, PHYS 5A and PHYS 5C, PHYS 5A and PHYS 5B. Any laboratories required or recommended by the Physics Department associated with these classes are not part of the computer science B.S. major requirements.

List of B.S. electives:

- Any CSE course with a number below 170, or between 180 and 189.

- Any course from the following list:

AM 114 Introduction to Dynamical Systems 5

AM 147 Computational Methods and Applications 5

CMPM 120 Game Development Experience 5

CMPM 131 User Experience for Interactive Media 5

CMPM 146 Game AI 5

CMPM 163 Game Graphics and Real-Time Rendering 5

CMPM 164 Game Engines 5

CMPM 164L Game Engines Lab 2

CMPM 171 Game Design Studio II 7

CMPM 172 Game Design Studio III 7

CSE 195 Senior Thesis Research 5

MATH 110 Introduction to Number Theory 5

MATH 115 Graph Theory 5

MATH 116 Combinatorics 5

MATH 117 Advanced Linear Algebra 5

MATH 118 Advanced Number Theory 5

MATH 134 Cryptography 5

MATH 145 Introductory Chaos Theory 5

MATH 145L Introductory Chaos Laboratory 1

MATH 148 Numerical Analysis 5

MATH 160 Mathematical Logic I 5

MATH 161 Mathematical Logic II 5

STAT 132 Classical and Bayesian Inference 5

Lecture/lab combinations count as one course.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement.

The DC requirement in computer science B.S. is satisfied by completing one of the following options:

Either one of these courses

CSE 115A Introduction to Software Engineering 5

CSE 185E Technical Writing for Computer Engineers 5

CSE 185S Technical Writing and Communication in Computer Science 5

CSE 195 or these Senior Thesis Research 5

CSE 104 Computability and Computational Complexity 5

CSE 104W Computability and Computational Complexity 2

or these courses

CSE 180 Database Systems I 5

CSE 180W Database Systems 2

These courses may also fulfill one of the upper-division electives if they appear in the list of electives.

Comprehensive Requirement

In addition to the above requirements, students must satisfy one of the following two exit requirements: pass one of the capstone courses (see Capstone Courses below); or successfully complete a senior thesis. A passed capstone course also counts toward satisfying the minimum number of upper-division electives requirement.

Capstone Courses

Students may choose from one of the following capstone courses to satisfy their exit requirement (lecture/lab combinations count as one course):

CSE 110B Fundamentals of Compiler Design II 5

CSE 115C Software Design Project II 5

CSE 118 Mobile Applications 5

CSE 121 Microprocessor System Design 5

CSE 121L Microprocessor System Design Laboratory 2

CSE 138 Distributed Systems 5

CSE 140	Artificial Intelligence	5
CSE 143	Introduction to Natural Language Processing	5
CSE 144	Applied Machine Learning	5
CSE 156	Network Programming	5
CSE 156L	Network Programming Laboratory	2
CSE 160	Introduction to Computer Graphics	5
CSE 160L	Introduction to Computer Graphics Laboratory	2
CSE 161	Introduction to Data Visualization	5
CSE 161L	Data Visualization Laboratory	2
CSE 162	Advanced Computer Graphics and Animation	5
CSE 162L	Advanced Computer Graphics and Animation Laboratory	2
CSE 163	Data Programming for Visualization	5
CSE 168	Introduction to Augmented Reality and Virtual Reality	7
CSE 181	Database Systems II	5
CSE 183	Web Applications	5
CSE 184	Data Wrangling and Web Scraping	5
CMPM 172	Game Design Studio III	7
ECE 118	Introduction to Mechatronics	5
ECE 118L	Introduction to Mechatronics Laboratory	2

Students taking one of the capstone courses will enroll normally. Students need to pass the capstone course to pass the exit requirement. No course may be attempted more than twice without prior approval from the chair of the department offering the course. Withdrawals count as an attempted class for this purpose.

Senior Thesis

The senior thesis consists of a self-contained project within the broad scope of computer science, but one that is not available in the regular course offerings. A student wishing to complete a senior thesis must successfully complete a minimum of 5 credits in CSE 195, Senior Thesis Research. The supervision of a senior thesis student is always at the discretion of the faculty member.

The student first submits a written thesis proposal and obtains approval of a faculty sponsor. Then the student submits a written draft and makes an oral presentation to a faculty examining committee. After receiving feedback from the examining committee, the student submits one or more additional drafts, until the final draft is approved by the examining committee. The total amount of writing shall be consistent with the campus Disciplinary Communication requirement. A passing grade in CSE 195 is earned when the final thesis is approved.

CSE 195	Senior Thesis Research	5
---------	------------------------	---

Planners

The following are three sample academic plans: (1) a four-year plan for the B.S. major for first-year students with programming experience; (2) an alternative first-year plan for students without programming experience; and (3) a two-year plan for the B.A. major for transfer students that have completed all general education requirements.

Students completing the courses in the planners will have satisfied the MF and SR general education requirement.

Four-Year Plan for Students with Programming Experience

	Fall	Winter	Spring
1st (frosh)	CSE 30	CSE 12 & CSE 12L	CSE 16
	MATH 19A	MATH 19B	AM 30
2nd (soph)	CSE 13S	CSE 101	CSE 120
	AM 10	CSE 107	
3rd (junior)	CSE 130	CSE 102	CSE 103
	Elective	Elective	
4th (senior)	Elective	CSE 114	Capstone elective
	DC elective		

First-Year Plan for Students Without Programming Experience

	Fall	Winter	Spring
1st (frosh)	CSE 20	CSE 30	CSE 12 & CSE 12L
	MATH 3	MATH 19A	MATH 19B
2nd (soph)	CSE 13S	AM 30	CSE 101
	AM 10	CSE 16	CSE 107
3rd (junior)	CSE 102	CSE 103	CSE 120

	Elective	Elective	DC-elective
4th (senior)	CSE 112 Elective	CSE 130	Capstone elective

Undergraduate students obtain and submit all paperwork requiring departmental approval to the undergraduate advising office. Transfer students should also refer to the Transfer Information and Policy section.

Baskin Engineering Building, Room 225
advising@soe.ucsc.edu
(831) 459-5840

Getting Started in the Major

It is recommended that high school students intending to apply to the computer science major have completed four years of mathematics (through advanced algebra and trigonometry) and three years of science in high school. Comparable college mathematics and science courses completed at other institutions also serve to properly prepare a student for the computer science major.

Two-Year Degree Planner for Transfer Students

	Fall	Winter	Spring
1st (junior)	CSE 12 & CSE 12L CSE 101 AM 30	CSE 102 CSE 120 CSE 107	CSE 130 CSE 103 DC elective
2nd (senior)	CSE 114 Elective	Elective Capstone elective	Elective Elective

Note: One elective must be drawn from the DC course list and one from the capstone course list. Also, the above plan assumes having taken one of MATH 21, MATH 23A, or AMS 10 and most general education requirements prior to arriving at UCSC as well as courses equivalent to CSE 16 and CSE 30 and CSE 13S (or CSE 14/CSE 15L and CSE 15/CSE 15L).

Curriculum charts for all BSOE majors are available at the department's Major Curriculum Charts page.

COMPUTER SCIENCE B.A.

Information and Policies

Introduction

The bachelor of arts (B.A.) program at UC Santa Cruz is designed to give students a solid grounding in both theoretical and practical topics in computer science, computer engineering, and mathematics while leaving flexibility for a broad program of study, including some courses outside of science and engineering, or even for a double major in another discipline.

Academic Advising for the Program

The Baskin School of Engineering undergraduate advising office offers general advising for prospective and declared undergraduates majoring in School of Engineering programs. The office handles major declarations, transfer credits, course substitutions, articulations, and degree certifications.

Program Learning Outcomes

Recipients of a Bachelor of Science or a Bachelor of Arts degree in Computer Science at UC Santa Cruz are expected to have the following skills and experiences:

1. Demonstrate mastery of computer science in the following core knowledge areas:
 - Algorithms, data structures, and complexity
 - Programming languages
 - Software engineering and development
 - Computer systems
2. Apply system-level perspective by thinking at multiple levels of detail and abstraction and by recognizing the context in which a computer system may function, including its interactions with people and the physical world.
3. Apply problem-solving skills and the knowledge of computer science to solve real problems.
4. Understand how technological advances impact society and the social, legal, ethical and cultural ramifications of computer technology and their usage.
5. Write about and orally communicate technical material about computer science and computer systems, broadly conceived.

Major Qualification Policy and Declaration Process

Major Qualification

For all students, it is necessary to be listed as proposed computer science majors within the School of Engineering before being able to declare the major. Additionally, students must satisfy the following three criteria to be able to declare the major:

Declare

Students must declare CS (Computer Science B.S. or Computer Science B.A.) as their major between student's second to sixth quarter.

Foundation courses

Students must have completed the following foundation courses when they declare their major:

Either this course

CSE 13S	Computer Systems and C Programming	7
---------	------------------------------------	---

or this course

CSE 13E	Embedded Systems and C Programming	7
---------	------------------------------------	---

13S recommended

And these courses

CSE 12	Computer Systems and Assembly Language	5
--------	--	---

CSE 12L	Computer Systems and Assembly Language Laboratory	2
---------	---	---

CSE 30	Programming Abstractions: Python	7
--------	----------------------------------	---

Plus one of the following

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
----------	--	---

MATH 20A	Honors Calculus	5
----------	-----------------	---

Plus one of the following

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
----------	--	---

MATH 20B	Honors Calculus	5
----------	-----------------	---

Cumulative GPA

Students must also have a cumulative GPA of at least 2.80 in the foundation courses attempted at UC Santa Cruz, with at most one unsuccessful attempt (grade C-, D+, D, D-, F, or NP) permitted in a foundation course.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the undergraduate director through the Baskin School of Engineering undergraduate advising office within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student, college, and Office of the Registrar of the decision.

How to Declare a Major

Students interested in pursuing computer science must indicate computer science as a proposed major on their application for admission to UC Santa Cruz. Students admitted to UCSC in fall 2018 or later will be able to declare a computer science major only if they have been admitted to UCSC as proposed computer science majors.

For more instructions about how to declare a major in the Baskin School of Engineering, please refer to the department's website on declaring your major.

Transfer Information and Policy

Transfer Admission Screening Policy

Prior to admission, transfer students must have completed the following five courses or their articulated equivalents. (Students entering UCSC by fall 2020 and students who have catalog rights to follow the 2018-19 General Catalog may follow the screening requirements published in that catalog.)

Lecture/lab combinations count as one course; CSE 12 and CSE 12L count as one course.

This course

CSE 30	Programming Abstractions: Python	7
--------	----------------------------------	---

Plus one of the following

CSE 13E	Embedded Systems and C Programming	7
---------	------------------------------------	---

CSE 13S	Computer Systems and C Programming	7
---------	------------------------------------	---

Plus one of the following options

Either these courses

CSE 12	Computer Systems and Assembly Language	5
--------	--	---

CSE 12L	Computer Systems and Assembly Language Laboratory	2
---------	---	---

or this course

CSE 16	Applied Discrete Mathematics	5
--------	------------------------------	---

Plus one of the following

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
----------	--	---

MATH 20A	Honors Calculus	5
----------	-----------------	---

Plus one of the following

MATH 19B	Calculus for Science, Engineering, and Mathematics	5
----------	--	---

MATH 20B	Honors Calculus	5
----------	-----------------	---

Minimum GPA

With a minimum GPA of 2.8. A student lacking one of these five courses may be admitted if they have completed CSE 16, and CSE 12 and CSE 12L, or the articulated alternative.

Furthermore, transfer students entering in the fall must have completed at least three of these courses by the end of the fall term of the previous academic year and have a minimum 2.80 GPA over all completed foundation courses at that time.

Transfer students admitted for the winter term must satisfy the major preparation criteria for transfer students admitted for the fall term and, additionally, must have successfully completed at least two additional courses that are required for the proposed degree, prior to admission. It is highly

recommended that these courses should be AM 10 (or MATH 21) and AM 30 (or MATH 23A).

Most courses in the computer science program at UC Santa Cruz have a strong theoretical component to prepare the student for designing, as opposed to simply using, computer systems. Often, courses taken at other institutions which emphasize applications of current languages and computers do not count toward the computer science major at UCSC.

At UCSC, computer science students are first introduced to programming using the programming language Python. The core programming sequence—courses CSE 30 and CSE 13S (or CSE 13E)—exposes students to both Python and C. Many upper-division courses that involve programming use the C and C++ programming languages.

Transfer students who are not familiar with both Python and C may need to take a remedial course. Students familiar with C++ and Unix should find the transition to Python and C relatively simple.

Getting Started at UCSC as a Transfer Student

Transfer students should declare their major in their first quarter at UCSC. Instructions for declaring a major in the Baskin School of Engineering are on the department's major declaration page.

Letter Grade Policy

All students admitted to a School of Engineering major, or seeking admission to a major, must take all courses required for that major for a letter grade. This policy includes courses required for these degrees that are sponsored by other departments.

Course Substitution Policy

Undergraduate engineering students who wish to substitute a major course with a course from UC Santa Cruz must first consult the School of Engineering Undergraduate Advising Office. The advising office requires a Petition for Course Substitution be approved before credit for an alternate course can be applied to any School of Engineering major requirement.

Petition forms are available at the Undergraduate Advising Office and online.

Petitions and procedures for approval must be obtained from and submitted to the Undergraduate Advising Office.

Double Majors and Major/Minor Combinations Policy

Students may not receive both the computer science B.A. and computer science B.S. degrees.

Study Abroad

Honors

Students must obtain a GPA of 3.8 or higher in the courses in the major to be considered for the distinction of "Highest Honors in the Major." Students must obtain a GPA of 3.5 or higher in the courses in the major to be considered for the distinction of "Honors in the Major." The School of Engineering reserves the right to withhold honors based on other criteria, such as an incident of academic dishonesty.

Requirements and Planners

Course Requirements

The aim of this program is to expose students to a rigorous curriculum in computer science while maintaining sufficient flexibility so that students can take courses outside computer science, pursue a minor in another discipline, or complete a double major. Every student must complete a minimum of 16 courses—eight lower-division and eight upper-division. Out of these, the eight lower-division courses and the first upper-division course are required preparatory courses for every student. Once these preparatory courses are completed, students tailor their own program by choosing seven upper-division elective courses.

Lower-Division Courses

Computer Science and Engineering

One of the following courses

CSE 13S	Computer Systems and C Programming	7
CSE 13E	Embedded Systems and C Programming	7

CSE 13S recommended

Plus all of the following

CSE 12	Computer Systems and Assembly Language	5
CSE 12L	Computer Systems and Assembly Language Laboratory	2
CSE 16	Applied Discrete Mathematics	5
CSE 20	Beginning Programming in Python	5
CSE 30	Programming Abstractions: Python	7

Students with no prior programming will take CSE 20 before CSE 30, and CSE 12 & CSE 12L. Students with a prior programming course, AP credit, or clearing the "Test-out" bar will start with CSE 30, and CSE 12 and CSE 12L.

Plus one of the following options

Either these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

or these

courses		
MATH 20A	Honors Calculus	5
MATH 20B	Honors Calculus	5

Plus one of the following

AM 10	Mathematical Methods for Engineers I	5
MATH 21	Linear Algebra	5

Upper-Division Courses**The following course**

CSE 101	Algorithms and Abstract Data Types	5
---------	------------------------------------	---

Plus three of the following

CSE 102	Introduction to Analysis of Algorithms	5
CSE 103	Computational Models	5
CSE 110A	Fundamentals of Compiler Design I	5
CSE 112	Comparative Programming Languages	5
CSE 115A	Introduction to Software Engineering	5
CSE 120	Computer Architecture	5
CSE 130	Principles of Computer Systems Design	5
CSE 131	Introduction to Operating Systems	5
CSE 132	Computer Security	5
CSE 138	Distributed Systems	5
CSE 140	Artificial Intelligence	5
CSE 142	Machine Learning	5
CSE 143	Introduction to Natural Language Processing	5
CSE 160	Introduction to Computer Graphics	5
CSE 160L	Introduction to Computer Graphics Laboratory	2
CSE 180	Database Systems I	5

Students can only take one of either CSE 130 or CSE 131.

CSE 160 and CSE 160L lecture/lab combination counts as one course.

Electives

Four courses from the list of B.A. electives below, including two upper-division computer science and engineering courses numbered below 170, or numbered between 180 and 189, or CSE 195.

For other courses, computational media, and Applied Mathematics and Statistics courses are strongly recommended.

List of BA electives

1. Any 5-credit upper-division course offered by the Baskin School of Engineering

2. Or any 5-credit upper-division course offered by the Division of Physical and Biological Sciences except those numbered 190 and above (mathematics, physics, chemistry and biology courses strongly recommended)

3. Any course from the following list:

ART 120	Intermedia	5
ART 121	Intermedia II	5
ARTG 118	Digital Drawing/Painting for Game Design	5
ECON 100M	Intermediate Microeconomics, Math Intensive	5
ECON 100N	Intermediate Macroeconomics, Math Intensive	5
ECON 101	Managerial Economics	5
ENVS 115A	Geographic Information Systems and Environmental Applications	5
ENVS 115L	Exercises in Geographic Information Systems	2
FILM 170A	Fundamentals of Digital Media Production	5
LING 112	Syntax I	5
LING 113	Syntax II	5
LING 118	Semantics III	5
LING 125	Foundations of Linguistic Theory	5
MUSC 123	Electronic Sound Synthesis	5
MUSC 124	Intermediate Electronic Sound Synthesis	5
MUSC 125	Advanced Electronic Sound Synthesis	5

Lecture/lab combinations count as one course.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement.

The DC requirement in computer science B.S. is satisfied by completing one of the following options:

Either one of these courses		
CSE 115A	Introduction to Software Engineering	5
CSE 185E	Technical Writing for Computer Engineers	5
CSE 185S	Technical Writing and Communication in Computer Science	5
CSE 195 or these courses	Senior Thesis Research	5
CSE 104	Computability and Computational Complexity	5
CSE 104W	Computability and Computational Complexity	2
or these courses		
CSE 180	Database Systems I	5
CSE 180W	Database Systems	2

These courses may also fulfill one of the upper-division electives listed above.

Comprehensive Requirement

In addition to the above B.A. requirements, students in the computer science majors must satisfy one of the following two exit requirements: pass one of the capstone courses (see Capstone Courses below); or successfully complete a senior thesis. A passed capstone course also counts toward satisfying the minimum number of upper-division electives requirement.

Capstone Courses

Students may choose from one of the following capstone courses to satisfy their exit requirement (lecture/lab combinations count as one course.):

CSE 110B	Fundamentals of Compiler Design II	5
CSE 115C	Software Design Project II	5
CSE 118	Mobile Applications	5
CSE 121	Microprocessor System Design	5
CSE 121L	Microprocessor System Design Laboratory	2
CSE 138	Distributed Systems	5
CSE 140	Artificial Intelligence	5
CSE 143	Introduction to Natural Language Processing	5
CSE 144	Applied Machine Learning	5
CSE 156	Network Programming	5
CSE 156L	Network Programming Laboratory	2
CSE 160	Introduction to Computer Graphics	5
CSE 160L	Introduction to Computer Graphics Laboratory	2
CSE 161	Introduction to Data Visualization	5
CSE 161L	Data Visualization Laboratory	2
CSE 162	Advanced Computer Graphics and Animation	5
CSE 162L	Advanced Computer Graphics and Animation Laboratory	2
CSE 163	Data Programming for Visualization	5
CSE 168	Introduction to Augmented Reality and Virtual Reality	7
CSE 181	Database Systems II	5
CSE 183	Web Applications	5
CSE 184	Data Wrangling and Web Scraping	5
CMPM 172	Game Design Studio III	7
ECE 118	Introduction to Mechatronics	5
ECE 118L	Introduction to Mechatronics Laboratory	2

Students taking one of the capstone courses will enroll normally. Students need to pass the capstone course to pass the exit requirement. No course may be attempted more than twice without prior approval from the chair of the department offering the course. Withdrawals count as an attempted class for this purpose.

Senior Thesis

The senior thesis consists of a self-contained project within the broad scope of computer science, but one that is not available in the regular course offerings. A student wishing to complete a senior thesis must successfully complete a minimum of 5 credits in CSE 195, Senior Thesis Research. The supervision of a senior thesis student is always at the discretion of the faculty member.

The student first submits a written thesis proposal and obtains approval of a faculty sponsor. Then the student submits a written draft and makes an oral presentation to a faculty examining committee. After receiving feedback from the examining committee, the student submits one or more additional drafts, until the final draft is approved by the examining committee. The total amount of writing shall be consistent with the campus Disciplinary Communication requirement. A passing grade in CSE 195 is earned when the final thesis is approved.

CSE 195 Senior Thesis Research 5

Planners

The following are three sample academic plans: (1) a four-year plan for the B.A. major for first-year students with programming experience; (2) an alternative first-year plan for students without programming experience; and (3) a two-year plan for the B.A. major for transfer students.

Students completing the courses in the planners will have satisfied the MF general education requirement.

Four-Year Plan for Students with Programming Experience

	Fall	Winter	Spring
1st (frosh)	CSE 30	CSE 12 & CSE 12L	CSE 16
	MATH 19A	MATH 19B	
2nd (soph)	CSE 13S	AM 10	CSE 101
3rd (junior)	Breadth list 1	Breadth list 2	Breadth list 3
	Elective list 1	Elective list 3	
4th (senior)	Elective list 3 (DC)		Elective list 4 (capstone)

First-Year Plan for Students Without Programming Experience

	Fall	Winter	Spring
1st (frosh)	CSE 20 MATH 3	CSE 30 MATH 19A	CSE 12 & CSE 12L MATH 19B
2nd (soph)	CSE 13S	AM 10 CSE 16	CSE 101
3rd (junior)	Breadth list 1 Elective list 1	Breadth list 2 Elective list 2	Breadth list 3
4th (senior)	Elective list 3 (DC)		Elective list 4 (capstone)

Two-Year Degree Planner for Transfer Students

	Fall	Winter	Spring
1st (junior)	CSE 12 & CSE 12L AM 10 or MATH 21	CSE 101	Breadth list 1
2nd (senior)	Breadth list 2 Elective list 1	Breadth list 3 Elective list 2	Elective list 3 (DC) Elective list (capstone)

Note: One elective must be drawn from the DC course list and one from the capstone course.

Curriculum charts for all BSOE majors are available at the department's Major Curriculum Charts page.

COMPUTER SCIENCE MINOR**Course Requirements**

Thirteen courses are required for the computer science minor.

Lower-Division Courses**One of the following options**

Either these courses		
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
or these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
or these courses		
MATH 20A	Honors Calculus	5
MATH 20B	Honors Calculus	5

Plus one of the following

AM 10	Mathematical Methods for Engineers I	5
MATH 21	Linear Algebra	5

Plus both of the following

CSE 12	Computer Systems and Assembly Language	5
CSE 12L	Computer Systems and Assembly Language Laboratory	2

Plus one of the following

CSE 13E	Embedded Systems and C Programming	7
CSE 13S	Computer Systems and C Programming	7

Plus all of the following

CSE 16	Applied Discrete Mathematics	5
CSE 20	Beginning Programming in Python	5
CSE 30	Programming Abstractions: Python	7

Students with no prior programming will take CSE 20 before CSE 30, and CSE 12 and CSE 12L. Students with a prior programming course, AP credit, or clearing the "Test-out" bar will start with CSE 30, and CSE 12 and CSE 12L.

Upper-Division Courses**The following course**

CSE 101	Algorithms and Abstract Data Types	5
---------	------------------------------------	---

Plus two upper-division computer science and engineering courses from the following list

CSE 102	Introduction to Analysis of Algorithms	5
CSE 103	Computational Models	5
CSE 110A	Fundamentals of Compiler Design I	5
CSE 112	Comparative Programming Languages	5

CSE 115A	Introduction to Software Engineering	5
CSE 120	Computer Architecture	5
CSE 130	Principles of Computer Systems Design	5
CSE 131	Introduction to Operating Systems	5
CSE 132	Computer Security	5
CSE 138	Distributed Systems	5
CSE 140	Artificial Intelligence	5
CSE 142	Machine Learning	5
CSE 143	Introduction to Natural Language Processing	5
CSE 160	Introduction to Computer Graphics	5
CSE 160L	Introduction to Computer Graphics Laboratory	2
CSE 180	Database Systems I	5

Either CSE 130 or CSE 131, but not both, can be counted toward this requirement.

Students choosing CSE 160 must also take CSE 160L, and the combination counts as one course.

Plus two additional upper-division courses

Two additional upper-division 5-credit computer science and engineering courses and their associated labs, numbered below 190

COMPUTER ENGINEERING B.S.

Information and Policies

Introduction

The following concentrations are specializations for the computer engineering student. Students must complete all of the courses listed within their selected concentration. The five concentration differ by only 5 specialized courses; the remaining courses are the same.

Systems Programming Concentration

The systems programming concentration focuses on software systems: courses include operating systems, compilers, software engineering, and advanced programming. Students finishing this concentration are very well prepared for building large software systems of all types. This concentration is the closest one to a computer science major—the main differences are that it does not require computer science theory courses, but because of the core computer engineering requirements, includes more hardware and electronics than a computer science bachelor's degree.

Computer Systems Concentration

The computer systems concentration provides a balance between software and hardware design. Students are prepared for a large variety of different design tasks, especially those requiring the integration of hardware and software systems, but may need further training for any particular specialization.

Robotics and Control Concentration

This concentration covers the hardware, software, sensing, and control aspects of autonomous and embedded systems. Students receive training in the theory, design, and realization of complex systems such as mobile robots. The concentration emphasizes integration of embedded software with hardware systems that interact with the environment.

Networks Concentration

The networks concentration focuses on communication between computers, covering both network hardware and protocols. Students finishing this concentration are well prepared for the design of wired and wireless network systems.

Digital Hardware Concentration

The digital hardware concentration focuses on hardware design and includes more electronics than the other concentrations. Students finishing this concentration are well prepared for building hardware systems. This concentration is the closest one to an electronics major; the main differences are that it does not require as much electronics theory or analog electronic design, but because of the core computer engineering requirements, requires more software skills.

Academic Advising for the Program

The Baskin School of Engineering undergraduate advising office offers general advising for prospective and declared undergraduates majoring in School of Engineering programs. The office handles major declarations, transfer credits, course substitutions, articulations, and degree certifications. Undergraduate students obtain and submit all paperwork requiring departmental approval to the undergraduate advising office. Transfer students should also refer to the Transfer Information and Policy section.

Baskin Engineering Building, Room 225
advising@soe.ucsc.edu
(831) 459-5840

Every major and minor must have a computer engineering faculty adviser, assigned by the Baskin School of Engineering undergraduate advising office, and with that adviser must formulate a program of proposed coursework that meets the major or minor requirements. Additional information can be found on the SOE webpages.

Getting Started in the Major

Program Learning Outcomes

For the Computer Engineering B.S. degree, the program learning outcomes are:

- an ability to apply knowledge of mathematics, science, and engineering;
- an ability to design a system, component, or process to meet desired needs within realistic constraints;

- an ability to function effectively on teams that establish goals, plan tasks, meet deadlines, and analyze risk and uncertainty;
- an ability to communicate effectively; and
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Major Qualification Policy and Declaration Process

Major Qualification

In order to be admitted into the computer engineering major students must be listed as a proposed major within the School of Engineering. Students in the engineering and computing cluster must propose a School of Engineering major before they can declare. Please refer to the School of Engineering's "Proposed Engineering Major Status" and its "Declaring a School of Engineering Major" sections in the catalog for more information.

In addition to being listed as a proposed School of Engineering major, declaration of the computer engineering major in the first six quarters of enrollment at UC Santa Cruz is based on performance in the CE Major Qualification Courses:

Students in their first six quarters who have completed at least 36 credits in the CE Major Qualification Courses listed below will be admitted to the computer engineering major if:

1. their cumulative GPA is at least 2.8 in all of the CE Major Qualification Courses attempted; and
2. they have no more than 7 credits resulting in grades of C-, D+, D, D-, F or NP among all of the CE Major Qualification Courses attempted.

CE Major Qualification Courses

All of the following:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Plus one of the following

AM 30	Multivariate Calculus for Engineers	5
MATH 23A	Vector Calculus	5

Whichever is completed first

Plus one of the following

AM 10	Mathematical Methods for Engineers I	5
MATH 21	Linear Algebra	5

Whichever is completed first

Plus all of the following

AM 20	Mathematical Methods for Engineers II	5
CSE 12	Computer Systems and	5

CSE 12L	Assembly Language Computer Systems and Assembly Language Laboratory	2
---------	---	---

Plus one of the following

CSE 13E	Embedded Systems and C Programming	7
CSE 13S	Computer Systems and C Programming	7

Plus all of the following

CSE 16	Applied Discrete Mathematics	5
CSE 30	Programming Abstractions: Python	7
PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1
PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory	1

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the undergraduate director through the Baskin School of Engineering undergraduate advising office within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student, college, and Office of the Registrar of the decision.

How to Declare a Major

For instructions about how to declare a major in the Baskin School of Engineering, please refer to the department's website.

Transfer Information and Policy

Transfer Admission Screening Policy

Students should complete at least six of the following

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
AM 10	Mathematical Methods for Engineers I	5
MATH 21	Linear Algebra	5
AM 20	Mathematical Methods for Engineers II	5
AM 30	Multivariate Calculus for Engineers	5
MATH 23A	Vector Calculus	5
CSE 12	Computer Systems and Assembly Language	5
CSE 12L	Computer Systems and Assembly Language Laboratory	2
CSE 13E	Embedded Systems and C Programming	7
CSE 13S	Computer Systems and C Programming	7

CSE 16	Applied Discrete Mathematics	5
CSE 30	Programming Abstractions: Python	7
PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1
PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory	1

Lecture/lab combinations count as one course.

CSE 13E and CSE 13S are alternatives; only one or the other, whichever is completed first, can count toward the six courses.

AM 30 and MATH 23A are alternatives; only one or the other, whichever is completed first, can count toward the six courses.

AM 10 and MATH 21 are alternatives; only one or the other, whichever is completed first, can count toward the six courses.

Cumulative GPA

Their cumulative GPA should be at least 2.8 in all of the courses attempted.

Prospective transfer students entering UC Santa Cruz by Fall 2020 and students who have catalog rights to follow the 2018-19 General Catalog may follow the screening requirements published in that catalog.

Transfer students who wish to graduate in two years are strongly recommended to complete all lower division major requirements and most General Education requirements before coming to UC Santa Cruz.

Getting Started at UCSC as a Transfer Student

Transfer students should declare their major in their first quarter at UC Santa Cruz. Instructions for declaring a major in the Baskin School of Engineering are on the department's website.

Letter Grade Policy

All students admitted to a School of Engineering major, or seeking admission to a major, must take all courses required for that major for a letter grade. This policy includes courses required for these degrees that are sponsored by other departments.

Course Substitution Policy

Undergraduate engineering students who wish to substitute a major course with a course from UC Santa Cruz must first consult the School of Engineering Undergraduate Advising Office. The advising office requires a Petition for Course Substitution be approved before credit for an alternate course can be applied to any School of Engineering major requirement.

Petition forms are available at the undergraduate advising office and online.

Petitions and procedures for approval must be obtained from and submitted to the Undergraduate Advising Office.

Double Majors and Major/Minor Combinations Policy

Students completing the computer engineering major cannot also receive the computer engineering minor or the Network and Digital Technology B.A. degree.

Students completing the Robotics Engineering B.S. can receive the Computer Engineering B.S. as well only by completing a concentration other than robotics and control.

Study Abroad

Honors

Majors are considered for "Honors in the Major" and "Highest Honors in the Major" based on their GPA and on results of undergraduate research and other significant contributions to the School of Engineering. Students with a GPA of 3.70, in most cases, receive highest honors. Students with a GPA of 3.30, in most cases, receive honors. Students with particularly significant accomplishments in undergraduate research or contributions to the School of Engineering may be considered with a lower GPA. Computer engineering juniors and seniors may also be eligible for election to the UC Santa Cruz chapter of Tau Beta Pi, the national engineering honor society founded in 1885.

Materials Fee and Miscellaneous Fees

Please see the section on fees under the School of Engineering.

Requirements and Planners

Course Requirements (all concentrations)

All students in the computer engineering major take the same core courses, which give the fundamentals of programming and hardware design, supported by the physics and mathematics necessary to understand them. Students must complete all of the courses listed within their selected concentration, and they must complete the capstone sequence. The senior comprehensive requirement for computer engineering majors is satisfied by completion of the capstone course and the exit requirement.

Lower-Division Courses

All of the following

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Plus one of the following

AM 30	Multivariate Calculus for Engineers	5
-------	--	---

MATH 23A Vector Calculus 5

Plus one of the following

AM 10 Mathematical Methods for Engineers I 5

MATH 21 Linear Algebra 5

Plus all of the following

AM 20 Mathematical Methods for Engineers II 5

CSE 12 Computer Systems and Assembly Language 5

CSE 12L Computer Systems and Assembly Language Laboratory 2

Plus one of the following

CSE 13E Embedded Systems and C Programming 7

CSE 13S Computer Systems and C Programming 7

Plus all of the following

CSE 16 Applied Discrete Mathematics 5

CSE 20 Beginning Programming in Python 5

CSE 30 Programming Abstractions: Python 7

PHYS 5A Introduction to Physics I 5

PHYS 5L Introduction to Physics Laboratory 1

PHYS 5C Introduction to Physics III 5

PHYS 5N Introduction to Physics Laboratory 1

Students with no prior programming will take CSE 20 before CSE 30 and the lecture-lab combination of CSE 12 and CSE 12L. Students with a prior programming course, AP credit, or clearing the "Test-out" bar will start with CSE 30, and the lecture-lab combination of CSE 12 and CSE 12L.

Plus one of the following options

Either these courses

PHYS 5B Introduction to Physics II 5

PHYS 5M Introduction to Physics Laboratory 1

or this course

ECE 9 Introduction to Statics, Dynamics, and Biomechanics 5

Upper-Division Courses

Core requirements:

CSE 100 Logic Design 5

CSE 100L Logic Design Laboratory 2

CSE 101 Algorithms and Abstract Data Types 5

CSE 107 Probability and Statistics for Engineers 5

CSE 120 Computer Architecture 5

CSE 121 Microprocessor System Design 5

CSE 121L Microprocessor System Design Laboratory 2

CSE 185E Technical Writing for Computer Engineers 5

ECE 101 Introduction to Electronic Circuits 5

ECE 101L Introduction to Electronic Circuits Laboratory 2

ECE 103 Signals and Systems 5

ECE 103L Signals and Systems Laboratory 2

Electives

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in computer engineering is satisfied by one of the following:

CSE 185E Technical Writing for Computer Engineers 5

CSE 195 Senior Thesis Research 5

Comprehensive Requirement

Capstone Requirement

All computer engineering students complete one of the following capstone sequences:

One of the following courses

CSE 123A Engineering Design Project I 5

CSE 123B Engineering Design Project II 7

Or all of the following courses

CSE 129A Capstone Project I 2

CSE 129B Capstone Project II 5

CSE 129C Capstone Project III 5

Or the following course

CSE 195 Senior Thesis Research 5

CSE 195 also requires the submission of an approved senior thesis.

Or all of the following courses

CSE 115A Introduction to Software Engineering 5

CSE 115B Software Design Project 5

CSE 115C Software Design Project II 5

Or the following courses

ECE 118 Introduction to Mechatronics 5

ECE 118L Introduction to Mechatronics Laboratory 2

ECE 118 and ECE 118L are allowed only if they are not taken as concentration courses.

Exit Requirement

Students are required to complete an exit survey and attend an exit interview. Portfolios of the students work will be collected from our courses for program evaluation. The portfolios will be reviewed by the computer engineering undergraduate committee and will include two project reports:

CSE 121 and 121L and either the senior capstone report (CSE 115C, or CSE 129A and CSE 129B and CSE 129C, or CSE 123A and CSE 123B, or ECE 118) or the student's senior thesis.

Concentration Courses

Computer Systems Concentration Requirements

All students in the computer engineering major take the same core courses, which give the fundamentals of programming and hardware design, supported by the physics and mathematics necessary to understand them. Students must complete all of the courses listed within their selected concentration, and they must complete the capstone sequence. The senior comprehensive requirement for computer engineering majors is satisfied by completion of the capstone course and the exit requirement.

One of the following

CSE 125	Logic Design with Verilog	5
CSE 125L	Logic Design with Verilog Laboratory	2
CSE 122	Introduction to VLSI Digital System Design	5

CSE 125/CSE 125L lecture/lab combination counts as a single course.

CSE 222A, Advanced VLSI Digital System Design, may be substituted for CSE 122 with department approval.

Plus one of the following

CSE 111	Advanced Programming	5
CSE 115A	Introduction to Software Engineering	5
CSE 134	Embedded Operating Systems	5

Plus one of the following

CSE 130	Principles of Computer Systems Design	5
CSE 131	Introduction to Operating Systems	5

Plus one upper-division or graduate elective

From the approved elective list (p. 430) or the department's approved list of electives for the computer engineering major

Digital Hardware Concentration Requirements

All students in the computer engineering major take the same core courses, which give the fundamentals of programming and hardware design, supported by the physics and mathematics necessary to understand them. Students must complete all of the courses listed within their selected concentration, and they must complete the capstone sequence. The senior comprehensive requirement for computer engineering majors is satisfied by completion of the capstone course and the exit requirement.

All of the following

CSE 125	Logic Design with Verilog	5
---------	---------------------------	---

CSE 125L	Logic Design with Verilog Laboratory	2
----------	--------------------------------------	---

Plus one of the following options

Either these courses		
ECE 171	Analog Electronics	5
ECE 171L	Analog Electronics Laboratory	2
or this course		
CSE 122	Introduction to VLSI Digital System Design	5

CSE 222A, Advanced VLSI Digital System Design, may be substituted for CSE 122 with department approval.

Plus one of the following

CSE 122	Introduction to VLSI Digital System Design	5
CSE 220	Computer Architecture	5
ECE 171	Analog Electronics	5
ECE 171L	Analog Electronics Laboratory	2
ECE 173	High-Speed Digital Design	5
ECE 173L	High-Speed Digital Design Laboratory	2

Lecture/lab combinations count as one course.

Note that CSE 122 or ECE 171 and 171L cannot be used again here.

Plus one upper-division or graduate elective

From the approved elective list (p. 430) or the department's approved list of electives for the computer engineering major

Networks Concentration Requirements

All students in the computer engineering major take the same core courses, which give the fundamentals of programming and hardware design, supported by the physics and mathematics necessary to understand them. Students must complete all of the courses listed within their selected concentration, and they must complete the capstone sequence. The senior comprehensive requirement for computer engineering majors is satisfied by completion of the capstone course and the exit requirement.

All of the following

CSE 150	Introduction to Computer Networks	5
CSE 150L	Introduction to Computer Networks Laboratory	2
CSE 156	Network Programming	5
CSE 156L	Network Programming Laboratory	2

Plus one of the following

CSE 130	Principles of Computer Systems Design	5
CSE 131	Introduction to Operating Systems	5

Plus one of the following options

Either the lecture/lab combination of CSE 151 and CSE 151L, or one upper-division or graduate elective from the approved elective list (p. 430) or the department's approved list of electives for the computer engineering major

Robotics and Control Concentration Requirements

All students in the computer engineering major take the same core courses, which give the fundamentals of programming and hardware design, supported by the physics and mathematics necessary to understand them. Students must complete all of the courses listed within their selected concentration, and they must complete the capstone sequence. The senior comprehensive requirement for computer engineering majors is satisfied by completion of the capstone course and the exit requirement.

Any two of the following

ECE 118	Introduction to Mechatronics	5
ECE 118L	Introduction to Mechatronics Laboratory	2
ECE 167	Sensing and Sensor Technologies	5
ECE 167L	Sensing and Sensor Technologies Lab	2
ECE 141	Feedback Control Systems	5

Lecture/lab combinations count as one course.

Plus one course from the following options

Students may fulfill this requirement by taking the third course from above that was not taken (ECE 118 and ECE 118L, or ECE 167 and ECE 167L, or ECE 141) or by taking any course from the approved elective list (p. 431) or the department's approved list of electives for the robotics and control concentration.

Plus one upper-division or graduate elective

From the approved elective list (p. 430) or the department's approved list of electives for the computer engineering major

System Programming Concentration Requirements

All students in the computer engineering major take the same core courses, which give the fundamentals of programming and hardware design, supported by the physics and mathematics necessary to understand them. Students must complete all of the courses listed within their selected concentration, and they must complete the capstone sequence. The senior comprehensive requirement for computer engineering majors is satisfied by completion of the capstone course and the exit requirement.

One of the following

CSE 130	Principles of Computer Systems Design	5
CSE 131	Introduction to Operating Systems	5

Plus one of the following

CSE 111	Advanced Programming	5
CSE 115A	Introduction to Software Engineering	5
CSE 134	Embedded Operating Systems	5

Plus all of the following

CSE 150	Introduction to Computer Networks	5
CSE 150L	Introduction to Computer Networks Laboratory	2

Plus one of the following options

Either the lecture/lab combination of CSE 151 and CSE 151L, or one upper-division or graduate elective from the approved elective list (p. 430) or the department's approved list of electives for the computer engineering major

Plus one of the following

CSE 113	Parallel and Concurrent Programming	5
CSE 156	Network Programming	5
CSE 156L	Network Programming Laboratory	2
CSE 110A	Fundamentals of Compiler Design I	5

CSE 156 and CSE 156L lecture/lab combination count as one course.

Planners

Below are two sample academic plans for students majoring in computer engineering. Since the plans for the third and fourth years will vary according to the concentration and capstone selected, placeholders for these courses have been indicated with "concentration course" and "capstone course." As part of the major declaration process students prepare a four-year plan based on a concentration and this may affect the placement of other courses as well. Careful planning at the time of declaration is required to complete the degree within four years. Entering frosh who have little programming experience, are strongly advised to take a programming course in the fall quarter. Students completing the courses in the four-year planners will have satisfied the MF, PR-E, SI, and SR General Education requirements.

Plan One for Entering Frosh

	Fall	Winter	Spring
1st (frosh)	MATH 19A	MATH 19B	AM 30
	CSE 12 & CSE 12L	PHYS 5A & PHYS 5L	CSE 30
		CSE 13S	
2nd (soph)	AM 10	AM 20	CSE 120
	PHYS 5C & PHYS 5N	CSE 100 & CSE 100L	CSE 101

	CSE 16		PHYS 5B & PHYS 5M
3rd (junior)	ECE 101 & ECE 101L	CSE 107	CSE 185E
)	Concentration course	Concentration course	CSE 121 & CSE 121L
			Concentration course
4th (senior)	Capstone course	Capstone course	Capstone course
)	ECE 103 & ECE 103L	Concentration course	Concentration course

Plan Two for Entering Frosh

	Fall	Winter	Spring
1st (frosh)	MATH 3	MATH 19A	MATH 19B
	CSE 20	CSE 12 & CSE 12L	CSE 30
2nd (soph)	PHYS 5A & PHYS 5L	PHYS 5C & PHYS 5N	PHYS 5B & PHYS 5M
	CSE 13S	CSE 16	AM 30
	AM 10	AM 20	CSE 101
3rd (junior)	ECE 101 & ECE 101L	CSE 107	CSE 185E
)	CSE 120	CSE 100 & CSE 100L	ECE 103 & ECE 103L
		Concentration course	Concentration course
4th (senior)	Capstone course	Capstone course	Capstone course
)	CSE 121 & CSE 121L	Concentration course	Concentration course
	Concentration course		

Below is a sample academic plan for students transferring to UC Santa Cruz in computer engineering for their junior year. It assumes that all lower-division and General Education course requirements have been satisfied. Since the plans for the third and fourth years vary according to the concentration and capstone selected, placeholders for these courses have been indicated with “concentration course” and “capstone course.” As part of the major declaration process students

prepare a plan based on a concentration and this may affect the placement of other courses as well. Careful planning at the time of declaration is required to complete the degree within two years.

Plan for Junior Transfers

	Fall	Winter	Spring
3rd (junior)	ECE 101 & ECE 101L	CSE 107	CSE 120
)	CSE 101	CSE 100 & CSE 100L	CSE 121 & CSE 121L
	CSE 185E	Concentration course	Concentration course
4th (senior)	Capstone course	Capstone course	Capstone course
)	ECE 103 & ECE 103L	Concentration course	Concentration course
	Concentration course		

Curriculum charts for all BSOE majors are available on the department's website.

COMPUTER ENGINEERING MINOR

Course Requirements

Lower-Division Courses

Both of the following			
CSE 12	Computer Systems and Assembly Language	5	
CSE 12L	Computer Systems and Assembly Language Laboratory	2	
Plus one of the following			
CSE 13E	Embedded Systems and C Programming	7	
CSE 13S	Computer Systems and C Programming	7	
Plus all of the following			
CSE 16	Applied Discrete Mathematics	5	
CSE 20	Beginning Programming in Python	5	
CSE 30	Programming Abstractions: Python	7	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5	
MATH 19B	Calculus for Science, Engineering, and Mathematics	5	

Students with no prior programming will take CSE 20 before CSE 30, and CSE 12 & CSE 12L. Students with a prior programming course, AP credit, or clearing the “Test-out” bar will start with CSE 30, and CSE 12 and CSE 12L.

Plus one of the following

AM 20	Mathematical Methods for Engineers II	5
MATH 24	Ordinary Differential Equations	5

AM 20 and MATH 24 both require one additional mathematics course as a prerequisite.

Plus one of the following lecture/lab combinations

Either these courses

PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1

or these courses

PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1

Plus one of the following lecture/lab combinations

Either these courses

PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory	1

or these courses

PHYS 6C	Introductory Physics III	5
PHYS 6N	Introductory Physics Laboratory	1

Upper-Division Courses**All of the following**

CSE 100	Logic Design	5
CSE 100L	Logic Design Laboratory	2
CSE 120	Computer Architecture	5

Plus one of the following lecture/lab combinations

Either these courses

CSE 121	Microprocessor System Design	5
CSE 121L	Microprocessor System Design Laboratory	2

or these courses

ECE 118	Introduction to Mechatronics	5
ECE 118L	Introduction to Mechatronics Laboratory	2

Plus all of the following

CSE 101	Algorithms and Abstract Data Types	5
ECE 101	Introduction to Electronic Circuits	5
ECE 101L	Introduction to Electronic Circuits Laboratory	2

NETWORK AND DIGITAL**TECHNOLOGY B.A.****Information and Policies****Introduction**

The UC Santa Cruz B.A. in network and digital technology provides students with in-depth knowledge of the underlying structure and function of network and computer technology and the design processes that make those technologies function. The program is tailored to students who wish to combine technology with other fields or have a general focus on digital design or computer networks. The B.A. in network and digital technology is not an engineering degree, but B.A. graduates will be prepared to work with technology development in other capacities, or join the computer network workforce. Students interested in graduate study should pursue a B.S. program.

Academic Advising for the Program

The Baskin School of Engineering undergraduate advising office offers general advising for prospective and declared undergraduates majoring in School of Engineering programs. The office handles major declarations, transfer credits, course substitutions, articulations, and degree certifications. Undergraduate students obtain and submit all paperwork requiring departmental approval to the undergraduate advising office. Transfer students should also refer to the Transfer Information and Policy section.

Baskin Engineering Building, Room 225
advising@soe.ucsc.edu
(831) 459-5840

Getting Started in the Major**Program Learning Outcomes**

For the Network and Digital Technology B.A. degree the program learning outcomes are:

- an ability to apply knowledge of mathematics, science, and engineering;
- an ability to design a system, component, or process;
- an ability to communicate effectively; and
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Major Qualification Policy and Declaration Process**Major Qualification**

Declaration of the network and digital technology major is based on performance in the following lower-division courses and associated labs required for the major. Students in their first six quarters who have completed at least 36 credits in these courses with a cumulative GPA of at least 2.30 or greater will be admitted to the network and digital technology major.

All of the following

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Plus one of the following

AM 30	Multivariate Calculus for Engineers	5
MATH 23A	Vector Calculus	5

Whichever is completed first

Plus one of the following

AM 10	Mathematical Methods for Engineers I	5
MATH 21	Linear Algebra	5

Whichever is completed first

Plus one of the following

AM 20	Mathematical Methods for Engineers II	5
MATH 24	Ordinary Differential Equations	5

Whichever is completed first

Plus all of the following

CSE 12	Computer Systems and Assembly Language	5
CSE 12L	Computer Systems and Assembly Language Laboratory	2

Plus one of the following

CSE 13E	Embedded Systems and C Programming	7
CSE 13S	Computer Systems and C Programming	7

Plus all of the following

CSE 16	Applied Discrete Mathematics	5
CSE 30	Programming Abstractions: Python	7

Plus one of the following lecture/lab options

Either these courses

PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1

or these courses

PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1

Plus one of the following lecture/lab combinations

Either these courses

PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics	1

Laboratory

or these courses		
PHYS 6C	Introductory Physics III	5
PHYS 6N	Introductory Physics Laboratory	1

Cumulative GPA

Students seeking to change their current major to network and digital technology after their sixth quarter must have completed the courses listed above with a cumulative GPA of at least 2.30.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the undergraduate director through the Baskin School of Engineering undergraduate advising office within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student, college, and Office of the Registrar of the decision.

How to Declare a Major

For instructions about how to declare a major in the Baskin School of Engineering, please refer to the department's website.

Transfer Information and Policy**Transfer Admission Screening Policy****Students should complete at least six courses from the following list**

Lecture/lab combinations count as one course.

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
AM 10	Mathematical Methods for Engineers I	5
MATH 21	Linear Algebra	5
AM 20	Mathematical Methods for Engineers II	5
MATH 24	Ordinary Differential Equations	5
AM 30	Multivariate Calculus for Engineers	5
MATH 23A	Vector Calculus	5
CSE 12	Computer Systems and Assembly Language	5
CSE 12L	Computer Systems and Assembly Language Laboratory	2
CSE 13E	Embedded Systems and C Programming	7
CSE 13S	Computer Systems and C Programming	7
CSE 16	Applied Discrete Mathematics	5
CSE 30	Programming Abstractions:	7

	Python	
PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1
PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory	1
PHYS 6C	Introductory Physics III	5
PHYS 6N	Introductory Physics Laboratory	1

AM 30 and MATH 23A are alternatives; only one or the other, whichever is completed first, can count toward the six courses.

AM 10 and MATH 21 are alternatives; only one or the other, whichever is completed first can count toward the six courses.

AM 20 and MATH 24 are alternatives; only one or the other, whichever is completed first can count toward the six courses.

CSE 13E and CSE 13S are alternatives; only one or the other, whichever is completed first, can count toward the six courses.

PHYS 5A and 5L are alternatives to PHYS 6A and 6L; only one or the other can count toward the six courses.

PHYS 5C and 5N are alternatives to PHYS 6C and 6N; only one or the other can count toward the six courses.

The cumulative GPA should be at least 2.3 in all of the courses attempted from the list above regardless of whether the course is one of the six used to qualify.

Students entering UC Santa Cruz by fall 2020 and students who have catalog rights to follow the 2018-19 catalog may follow the screening requirements published in that catalog.

Students who wish to graduate in two years are strongly recommended to complete eight courses from the above list before coming to UC Santa Cruz.

Getting Started at UCSC as a Transfer Student

Transfer students should declare their major in their first quarter at UC Santa Cruz. Instructions for declaring a major in the Baskin School of Engineering are on the department's major declaration page.

Letter Grade Policy

All students admitted to a School of Engineering major, or seeking admission to a major, must take all courses required for that major for a letter grade. This policy includes courses required for these degrees that are sponsored by other departments.

Course Substitution Policy

Undergraduate engineering students who wish to substitute a major course with a course from UC Santa Cruz must first consult the School of Engineering Undergraduate Advising Office. The advising office requires a Petition for Course Substitution be approved before credit for an alternate course can be applied to any School of Engineering major requirement.

Petition forms are available at the Undergraduate Advising Office and online.

Petitions and procedures for approval must be obtained from and submitted to the Undergraduate Advising Office.

Double Majors and Major/Minor Combinations Policy

Students completing the Network and Digital technology B.A. cannot also receive the computer engineering minor.

Students completing the Robotics Engineering B.S. or the Computer Engineering B.S. cannot receive the Network and Digital Technology B.A. degree.

Study Abroad

Honors

Majors are considered for "Honors in the Major" and "Highest Honors in the Major" based on their GPA and on results of undergraduate research and other significant contributions to the School of Engineering. Students with a GPA of 3.70, in most cases, receive highest honors. Students with a GPA of 3.30, in most cases, receive honors. Students with particularly significant accomplishments in undergraduate research or contributions to the School of Engineering may be considered with a lower GPA.

School of Engineering Policies

Please refer to the School of Engineering section of the catalog for additional policies that apply to all School of Engineering programs.

Materials Fee and Miscellaneous Fees

Please see the section on fees under the School of Engineering.

Requirements and Planners

Course Requirements

All students in the network and digital technology major must take the following courses. The senior comprehensive requirement is satisfied by completion of the capstone course and the portfolio exit requirement.

Lower-Division Courses

Students who may have originally pursued another major should discuss with the Baskin School of Engineering undergraduate advising office whether or not already

completed coursework may be substituted for one or more lower division-requirements.

One of the following

AM 10	Mathematical Methods for Engineers I	5
MATH 21	Linear Algebra	5

Plus one of the following

AM 20	Mathematical Methods for Engineers II	5
MATH 24	Ordinary Differential Equations	5

Plus one of the following

AM 30	Multivariate Calculus for Engineers	5
MATH 23A	Vector Calculus	5

Plus both of the following

CSE 12	Computer Systems and Assembly Language	5
CSE 12L	Computer Systems and Assembly Language Laboratory	2

Plus one of the following

CSE 13E	Embedded Systems and C Programming	7
CSE 13S	Computer Systems and C Programming	7

Plus all of the following

CSE 16	Applied Discrete Mathematics	5
CSE 20	Beginning Programming in Python	5
CSE 30	Programming Abstractions: Python	7
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Students with no prior programming will take CSE 20 before CSE 30 and CSE 12/CSE 12L. Students with a prior programming course, AP credit, or clearing the “Test-out” bar will start with CSE 30 and CSE 12/CSE 12L.

Plus one of the following lecture/lab combinations

Either these courses

PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1

or these courses

PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1

Plus one of the following lecture/lab combinations

Either these courses

PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory	1
or these courses		
PHYS 6C	Introductory Physics III	5
PHYS 6N	Introductory Physics Laboratory	1

Upper-Division Courses

All of the following

CSE 100	Logic Design	5
CSE 100L	Logic Design Laboratory	2
CSE 150	Introduction to Computer Networks	5
CSE 150L	Introduction to Computer Networks Laboratory	2
CSE 185E	Technical Writing for Computer Engineers	5

Plus one of the following options

Either this course

CSE 101	Algorithms and Abstract Data Types	5
---------	------------------------------------	---

or these courses

ECE 101	Introduction to Electronic Circuits	5
ECE 101L	Introduction to Electronic Circuits Laboratory	2

Electives

Three additional 5-credit, upper-division electives, and associated laboratories, from the approved list (p. 428) or the department's approved list of electives.

Digital Technology Focus

Students wishing to focus on digital technology should consider including among their courses the following (lecture-lab combinations are counted as one course):

CSE 120	Computer Architecture	5
CSE 121	Microprocessor System Design	5
CSE 121L	Microprocessor System Design Laboratory	2
CSE 125	Logic Design with Verilog	5
CSE 125L	Logic Design with Verilog Laboratory	2
ECE 101	Introduction to Electronic Circuits	5
ECE 101L	Introduction to Electronic Circuits Laboratory	2
ECE 118	Introduction to Mechatronics	5
ECE 118L	Introduction to Mechatronics Laboratory	2

Network Technology Focus

Students wishing to focus on network technology should consider including among their courses the following (lecture-lab combinations are counted as one course):

CSE 101	Algorithms and Abstract Data Types	5
CSE 130	Principles of Computer Systems Design	5
CSE 131	Introduction to Operating Systems	5
CSE 151	Advanced Computer Networks	5
CSE 151L	Advanced Computer Networks Laboratory	2
CSE 156	Network Programming	5
CSE 156L	Network Programming Laboratory	2

Students can only take either CSE 130 or CSE 131.

Adviser

In all cases, students should discuss their interests and elective choices with their faculty adviser.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. The DC requirement in network and digital technology is satisfied by completing CSE 185E, Technical Writing for Computer Engineers.

CSE 185E	Technical Writing for Computer Engineers	5
----------	--	---

Comprehensive Requirement

One of the following courses must be completed. This course cannot be counted as one of the three required electives. Lecture/lab combinations count as one course.

CSE 115A	Introduction to Software Engineering	5
CSE 121	Microprocessor System Design	5
CSE 121L	Microprocessor System Design Laboratory	2
CSE 125	Logic Design with Verilog	5
CSE 125L	Logic Design with Verilog Laboratory	2
CSE 156	Network Programming	5
CSE 156L	Network Programming Laboratory	2
ECE 118	Introduction to Mechatronics	5
ECE 118L	Introduction to Mechatronics Laboratory	2

In addition, students are required to submit a portfolio and complete the exit survey. Students whose submissions are deemed inadequate, either in presentation or in content, may be required to revise and rewrite the portfolio or to complete an additional project course. The portfolios must be turned in electronically by the last day of the quarter of graduation. The online form can be found on the Computer Science and Engineering Department web pages. The portfolios will be

reviewed quarterly by the computer science and engineering undergraduate committee and must include the project report of the student's capstone course.

Planners

The following are two sample academic plans: (1) a four-year plan for first-year students with no prior programming experience, and (2) a two-year plan for transfer students that have completed all lower-division major requirements except AM 30, CSE 12 and CSE 12L, CSE 13E or CSE 13S, and CSE 30. Students completing the courses in the four-year planner will have satisfied the MF and SI General Education requirements.

Four-Year Major Planner for Network and Digital Technology

	Fall	Winter	Spring
1st (frosh)	MATH 3	MATH 19A	MATH 19B
	CSE 20	CSE 12 & CSE 12L	CSE 13E
2nd (soph)	CSE 16	PHYS 5A & PHYS 5L	AM 20
	AM 10	AM 30	PHYS 5C & PHYS 5N
3rd (jr)	ECE 101 & ECE 101L	CSE 100 & CSE 100L	CSE 150 & CSE 150L

	Elective		

Curriculum charts for all BSOE majors are available at the department's website.

TECHNOLOGY AND INFORMATION MANAGEMENT B.S.

Information and Policies

Introduction

Technology and Information Management (TIM) is a rigorous, challenging major for those students wanting to pursue careers in the management of information and technology. TIM students will receive a thorough grounding in the fundamental principles and practices of technology (in particular, computer science and computer engineering) and management, and the scientific, mathematics, and economics principles upon which they are built. In particular, they will become proficient in the following areas: strategy, planning, innovation, entrepreneurship, information technology, software design, product development, and supply-chain management.

The essence of the technology and information management major at UCSC is the integration of fundamental intellectual content from the disciplines of computer science, computer engineering, business management economics, and finance. TIM students learn how to apply the fundamentals of these diverse disciplines to solving problems that require the integration of management and technology, e.g., developing information technology systems to manage all activities and operations in a firm, e-commerce, managing and commercializing a new technology, and starting a new high-technology company.

To graduate with a B.S. in technology and information management, students normally complete 23 or 24 required courses (with four laboratories, totaling 120-125 quarter credits) plus three elective courses (15 quarter credits) for the technology and information management major program. Honors students are likely to find the rigorous management and leadership elements of the new program of significant interest. Industrial interactions and projects are key features of this major.

Academic Advising for the Program

The Baskin School of Engineering undergraduate advising office offers general advising for prospective and declared undergraduates majoring in School of Engineering programs. The office handles major declarations, transfer credits, course substitutions, articulations, and degree certifications. Undergraduate students obtain and submit all paperwork requiring departmental approval to the undergraduate advising office. Transfer students should also refer to the Transfer Information and Policy section.

Baskin Engineering Building, Room 225
advising@soe.ucsc.edu
(831) 459-5840

Getting Started in the Major

The technology and information management major is intended for students with an interest in both technology and business. It is recommended that students intending to declare this major have completed four years of mathematics (through advanced algebra and trigonometry) and three years of science in high school. Completion of business-oriented computer literacy and basic programming courses is of benefit to students entering this major. Completion of any economics and/or business-related courses in high school is also beneficial, but the faculty realizes that these courses may not be available at many high schools. Completion of comparable college courses at other institutions serves to strengthen the preparation of a student for the technology and information management major.

Program Learning Outcomes

Students graduating from the TIM program will acquire the following:

1. Students will learn how to apply knowledge of engineering, economics, and mathematics to analyze complex problems in the management of technology and information science.
2. Students will develop a broad, interdisciplinary knowledge of problems in the management of technology and information science, and skills to address them.
3. Students will develop depth of expertise in the management of technology and information science.
4. Students will be able to collaborate and communicate effectively with individuals who have diverse ideas, expertise, and skill levels within the fields of management of technology and information science.

Major Qualification Policy and Declaration Process

Major Qualification

In order to be admitted into the technology and information management major students must be listed as a proposed major within the School of Engineering. Students in the engineering and computing cluster must propose a School of Engineering major before they can declare. Please refer to the School of Engineering's "Proposed Engineering Major Status" and its "Declaring a School of Engineering Major" sections in the catalog for more information.

In addition, to be admitted to the TIM major after a student has entered UCSC, students need to complete a total of six courses chosen from the following:

Mathematics

At least one of the following:

	One of these courses:	
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5

or one of these courses			
MATH 19B	Calculus for Science, Engineering, and Mathematics	5	
MATH 20B	Honors Calculus	5	
or one of these courses			
MATH 22	Introduction to Calculus of Several Variables	5	
MATH 23A	Vector Calculus	5	
AM 30	Multivariate Calculus for Engineers	5	
or this course			
CSE 16	Applied Discrete Mathematics	5	

Engineering

At least one course from the following:

CSE 12	Computer Systems and Assembly Language	5	
CSE 12L	Computer Systems and Assembly Language Laboratory	2	
CSE 13S	Computer Systems and C Programming	7	
CSE 30	Programming Abstractions: Python	7	

Lecture/lab combinations count as one course.

Students with no prior programming will take CSE 20 before CSE 30 and CSE 12/L.

Economics and Technology and Information Management

At least one additional course must be chosen from the following:

ECON 1	Introductory Microeconomics: Resource Allocation and Market Structure	5	
ECON 2	Introductory Macroeconomics: Aggregate Economic Activity	5	
ECON 10A	Economics of Accounting	5	
CSE 50	Business Information Systems	5	

Three additional courses

At least three additional courses must be chosen from the following:

CSE 12	Computer Systems and Assembly Language	5	
CSE 12L	Computer Systems and Assembly Language Laboratory	2	
CSE 13S	Computer Systems and C Programming	7	
CSE 30	Programming Abstractions: Python	7	
CSE 16	Applied Discrete Mathematics	5	
CSE 50	Business Information Systems	5	
ECON 1	Introductory Microeconomics: Resource Allocation and Market Structure	5	
ECON 2	Introductory Macroeconomics:	5	

ECON 10A	Aggregate Economic Activity	5	
MATH 19A	Economics of Accounting	5	
MATH 19B	Calculus for Science, Engineering, and Mathematics	5	
MATH 20A	Calculus for Science, Engineering, and Mathematics	5	
MATH 20B	Honors Calculus	5	
MATH 22	Honors Calculus	5	
MATH 23A	Introduction to Calculus of Several Variables	5	
AM 30	Vector Calculus	5	
AM 30	Multivariate Calculus for Engineers	5	

Lecture/lab combinations count as one course.

Only one course from each of the following sets can be counted:

MATH 19A and MATH 20A

MATH 19B and MATH 20B

MATH 22 and MATH 23A and AM 30

Eligibility to declare the major

In addition, students who have passed six qualifying courses and who have received more than one grade of NP, C-, D+, D, D-, or F in the qualifying courses are not eligible to declare the major.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the undergraduate director through the Baskin School of Engineering undergraduate advising office within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student, college, and Office of the Registrar of the decision.

How to Declare a Major

For instructions about how to declare a major in the Baskin School of Engineering, please refer to the department's major declaration page for information.

Transfer Information and Policy

Transfer Admission Screening Policy

Transfer students must have completed at least six of the lower-division courses from the list below. In addition, a minimum 2.0 GPA is required in each of those six courses. All lower-division requirements completed will be counted toward the GPA. (Students entering UCSC by Fall 2020 and students who have catalog rights to follow the 2018-19 General Catalog may follow the screening requirements published in that catalog.)

Students who wish to graduate in two years are strongly recommended to complete all screening courses except CSE 50, CSE 12 and CSE 12L, and CSE 13S, as well as most

general education requirements, before coming to UC Santa Cruz.

Students should consult assist.org to determine which courses at other institutions in California are transferable to UC Santa Cruz.

CSE 12	Computer Systems and Assembly Language	5
CSE 12L	Computer Systems and Assembly Language Laboratory	2
CSE 13S	Computer Systems and C Programming	7
CSE 30	Programming Abstractions: Python	7
CSE 16	Applied Discrete Mathematics	5
CSE 50	Business Information Systems	5
ECON 1	Introductory Microeconomics: Resource Allocation and Market Structure	5
ECON 2	Introductory Macroeconomics: Aggregate Economic Activity	5
ECON 10A	Economics of Accounting	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 20A	Honors Calculus	5
MATH 20B	Honors Calculus	5
MATH 22	Introduction to Calculus of Several Variables	5
MATH 23A	Vector Calculus	5
AM 30	Multivariate Calculus for Engineers	5

Lecture/lab combinations count as one course.

Only one course from each of the following sets can be counted:

MATH 19A and MATH 20A

MATH 19B and MATH 20B

MATH 22 and MATH 23A and AM 30

Getting Started at UCSC as a Transfer Student

Transfer students should declare their major in their first quarter at UC Santa Cruz. Instructions for declaring a major in the Baskin School of Engineering are on the department's website.

Letter Grade Policy

All students admitted to a School of Engineering major, or seeking admission to a major, must take all courses required for that major for a letter grade. This policy includes courses required for these degrees that are sponsored by other departments.

School of Engineering Policies

Please refer to the School of Engineering section of the catalog for additional policies that apply to all School of

Engineering programs. These policies include admission to the major and the need for UC Santa Cruz students to obtain pre-approval before taking courses elsewhere.

Course Substitution Policy

Undergraduate engineering students who wish to substitute a major course with a course from UC Santa Cruz must first consult the School of Engineering Undergraduate Advising Office. The advising office requires a Petition for Course Substitution be approved before credit for an alternate course can be applied to any School of Engineering major requirement.

Petition forms are available at the undergraduate advising office and online.

Petitions and procedures for approval must be obtained from and submitted to the Undergraduate Advising Office.

Double Majors and Major/Minor Combinations Policy

Study Abroad

Honors

The TIM program awards honors to students whose academic performance is excellent. Students with a GPA 3.5 or higher but lower than 3.7 will be awarded honors. Students with a GPA of 3.7 or higher will be awarded highest honors. Students who have been found guilty of academic misconduct are not eligible for either honors or highest honors.

Requirements and Planners

Course Requirements

Lower-Division Courses

Statistics

STAT 5	Statistics	5
--------	------------	---

Mathematics

One of the following options

Either these courses

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

or these courses

MATH 20A	Honors Calculus	5
MATH 20B	Honors Calculus	5

Plus one of the following

AM 30	Multivariate Calculus for Engineers	5
MATH 22	Introduction to Calculus of Several Variables	5
MATH 23A	Vector Calculus	5

Plus one of the following options

Either these courses

AM 10 Mathematical Methods for Engineers I 5

AM 20 Mathematical Methods for Engineers II 5

or these courses

MATH 21 Linear Algebra 5

MATH 24 Ordinary Differential Equations 5

Economics**All of the following**

ECON 1 Introductory Microeconomics: Resource Allocation and Market Structure 5

ECON 2 Introductory Macroeconomics: Aggregate Economic Activity 5

ECON 10A Economics of Accounting 5

Computer Science and Engineering**All of the following**

CSE 12 Computer Systems and Assembly Language 5

CSE 12L Computer Systems and Assembly Language Laboratory 2

CSE 13S Computer Systems and C Programming 7

CSE 16 Applied Discrete Mathematics 5

CSE 20 Beginning Programming in Python 5

CSE 30 Programming Abstractions: Python 7

Students with no prior programming will take CSE 20 before CSE 30, CSE 12, and CSE 12L. Students with a prior programming course, AP credit, or clearing the "Test-out" bar will start with CSE 30, CSE 12, and CSE 12L.

Plus these courses

CSE 50 Business Information Systems 5

CSE 58 Systems Analysis and Design 5

Upper-Division Courses**Computer Science and Engineering**

All of the following:

CSE 150 Introduction to Computer Networks 5

CSE 150L Introduction to Computer Networks Laboratory 2

CSE 170 Management of Technology Seminar 2

CSE 171A Introduction to Management of Technology I 5

CSE 171B Introduction to Management of Technology II 5

CSE 175 Business Strategy and

CSE 182 Information Systems
Introduction to Database Management Systems 5

Economics**One of the following courses**

ECON 100A Intermediate Microeconomics 5

ECON 100M Intermediate Microeconomics, Math Intensive 5

Plus the following

ECON 113 Introduction to Econometrics 5

Electives**Two 5-credit School of Engineering courses**

Students select two upper-division School of Engineering electives on the basis of their particular interests. These electives may be any 5-credit upper-division or graduate School of Engineering courses, with the following limitations:

- Either STAT 131 or CSE 107, but not both;
- At most, one independent or field-study course (CSE 193, CSE 195, CSE 198, CSE 199) with prior approval from the department to be used as an elective.

Plus

One 5-credit, upper-division economics course

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in technology and information management is satisfied by completing CSE 175.

CSE 175 Business Strategy and Information Systems 5

Comprehensive Requirement

Students complete three project-intensive courses, CSE 175, CSE 171A, and CSE 171B, which constitute the comprehensive requirements for the technology and information management major, based on the dual aspects (technology of management and management of technology) of the program. CSE 175 deals with the technology of management, and CSE 171A, and CSE 171B are a sequence that deal with the management of technology. All three courses involve a substantial amount of critical thinking and writing within the context of comprehensive projects.

CSE 175 requires that students understand and use a structured methodology to evaluate the competitive use of information systems within an enterprise. This is accomplished by a team project as well as by an individual project that involves researching and writing a comprehensive analytical term paper using a methodology taught as part of this course.

CSE 171A requires that students understand and apply structured methodologies for the development, management,

and commercialization of technologies and products. Students will work in teams on a comprehensive term project in the development, commercialization, and management of high-tech products in the domains of computers, networks, semiconductors, mechatronics, and biotechnology.

CSE 171B requires that students understand and apply structured methodologies and tools for designing, developing, and managing the supply chain for high-tech products. Students will continue the comprehensive team project from CSE 171A to design, develop, and manage the supply chain for the products developed in CSE 171A.

CSE 175	Business Strategy and Information Systems	5
CSE 171A	Introduction to Management of Technology I	5
CSE 171B	Introduction to Management of Technology II	5

Planners

The following are two sample academic plans for students pursuing the technology and information management major. Plan One is for first-year students, and Plan Two is designed for transfer students that have completed all general education requirements. Students completing the courses in the four-year planner will have satisfied the MF, PE and SR General Education requirements.

Four-Year Major Planner

	Fall	Winter	Spring
1st (frosh)	MATH 19A	MATH 19B	ECON 2
	ECON 1	CSE 20	CSE 30
			STAT 5

CSE 150L	Introduction to Computer Networks Laboratory	2
CSE 180	Database Systems I	5
CSE 182	Introduction to Database Management Systems	5
ECON 100A	Intermediate Microeconomics	5
ECON 100M	Intermediate Microeconomics, Math Intensive	5
ECON 100B	Intermediate Macroeconomics	5
ECON 100N	Intermediate Macroeconomics, Math Intensive	5

Lecture/lab combinations count as one course.

Either CSE 180 or CSE 182

Either ECON 100A or ECON 100M

Either ECON 100B or ECON 100N

Contiguous Bachelor's/Master's Pathway: Computer Engineering

The Department of Computer Science and Engineering offers a computer engineering bachelor's/master's pathway.

Undergraduate students in computer engineering, robotics engineering, electrical engineering, and computer science can apply to the pathway in order to earn a B.S. degree in their own major together with an M.S. degree in computer engineering. Depending on the student's progress, the B.S./M.S. pathway can be completed in five years.

The B.S./M.S. pathway offers a competitive edge to students who are completing their undergraduate degree at UC Santa Cruz, by enabling those with advanced preparation to move directly from the undergraduate to the graduate program. The

pathway assists qualified enrolled students with a simplified graduate application process that does not require students to take the graduate record examination (GRE), and makes it possible to complete an M.S. degree with just seven courses beyond the B.S. program in either of the allowed majors.

The pathway prepares students for leadership positions in industry, and is also attractive for undergraduate students planning to pursue a Ph.D. degree targeting research careers in industry or academia. The School of Engineering has many opportunities for undergraduate research, and B.S./M.S. students can continue their undergraduate research projects with the same research group. Upon advancement to graduate standing, B.S./M.S. students are eligible for financial support as graduate research assistants and teaching assistants.

Particularly motivated B.S./M.S. students can complete the entire pathway in 14 quarters (or fewer with Advanced Placement credit); however, advance planning is essential. Interested students should contact the department and their faculty adviser early in their college career—no later than the start of their junior year. B.S./M.S. students retain undergraduate status until the completion of all undergraduate requirements, but may begin graduate coursework in advance of graduate standing.

ADMISSION TO THE B.S./M.S. PATHWAY

The undergraduate degree requirements are the same as those for other computer engineering, robotics engineering, electrical engineering, and computer science majors; however, the B.S./M.S. pathway capitalizes on graduate-level courses that may apply toward both degree requirements. B.S./M.S. candidates may use (at most) two graduate courses taken as undergraduates toward both the M.S. degree and B.S. degree electives. At the time graduate status is achieved, no more than three graduate courses taken as an undergraduate may count toward the nine courses required for the M.S. degree. Furthermore, B.S./M.S. students may not apply undergraduate courses toward the M.S. degree.

Admission to the B.S./M.S. pathway is by formal application, but is very simple. Undergraduate applicants seeking admission to the pathway can apply at any time starting in the first quarter of junior standing, and no graduate record examination (GRE) is required to apply. To qualify, applicants must have a 3.0 GPA when they apply to the B.S./M.S. pathway, and must maintain a 3.0 GPA or higher until the completion of their undergraduate requirements.

Students who cannot meet the B.S./M.S. application requirements or who are not admitted into the pathway are encouraged to apply for admission to the standard M.S. or Ph.D. program during their senior year.

Additional information about this pathway can be found on the department's website.

Contiguous

Bachelor's/Master's Pathway: Computer Science and Engineering

The Department of Computer Science and Engineering offers a combined bachelor's degree and master of science degree path. Undergraduate students in computer science can apply to the path in order to earn a B.S. degree or a B.A. degree together with an M.S. degree in computer science and engineering. It is expected that the combined path can be completed in five years.

The five-year bachelor's/master's path offers a competitive edge to students who are completing their undergraduate degree at UC Santa Cruz, by enabling those with advanced preparation to move directly from the undergraduate to the graduate program. The path assists qualified enrolled students with a simplified graduate application process that does not require students to take the graduate record examination (GRE) if they have an overall GPA of 3.5 or above by the end of their junior year standing, and makes it possible to complete an M.S. degree with just nine courses beyond the bachelor's degree.

The path prepares students for leadership positions in industry. The School of Engineering has many opportunities for undergraduate and graduate research. Upon advancement to graduate standing, students are eligible for financial support as graduate research assistants and teaching assistants.

Particularly motivated students can complete both the bachelor's and the master's degrees in 15 quarters. However, advance planning is essential. Interested students should contact the Graduate Student Affairs Office and their faculty adviser early in their college career—no later than the end of their junior year. Students in this path retain undergraduate status until the completion of all undergraduate requirements, but may begin graduate coursework in advance of graduate standing.

ADMISSION TO THE CONTIGUOUS FIVE- YEAR BACHELOR'S/MASTER'S S PATH

The undergraduate degree requirements are the same as those for all computer science majors. Admission to the five-year contiguous path is gained by formally applying to the Computer Science and Engineering Masters program. The application deadline is usually in December or early January. UC Santa Cruz undergraduate students majoring in computer science may have the graduate record examination (GRE) waived if their overall GPA is 3.5 or above after their third

quarter of junior year standing. Contact the graduate advising office for more information.

Graduate Program

The Department of Computer Science and Engineering offers a doctorate (Ph.D.) and two master of science (M.S.) degree programs. Graduate students in these programs establish a solid foundation in algorithms, architectures, programming languages, and then proceed to a thorough study of recent developments in their selected area of specialization. The normative time for the Ph.D. program is five years for a full-time student.

Students admitted to the Ph.D. program are generally supported in the form of a combination of fellowship, teaching assistantship, and/or graduate research assistantships.

The normative time for M.S. thesis track programs is two years for a full-time student and anywhere from one year to four quarters for the M.S. project track programs.

This M.S. thesis track is for students interested in advanced studies and carrying out independent research as well as those contemplating pursuit of a Ph.D. degree.

Programs Offered

Human Language Media and Modeling Designated Emphasis (p. 427)

COMPUTER SCIENCE AND ENGINEERING M.S.

Introduction

The Computer Science and Engineering Department offers a master of science (M.S.) degree program. An M.S. student can graduate by pursuing either a thesis capstone (Plan I) or a comprehensive capstone (Plan II) curriculum. The normative time for graduation with the thesis capstone curriculum is two years for a full-time student. This option is appropriate for students interested in advanced studies and in carrying out independent research, as well as for those students contemplating pursuit of a Ph.D. degree. The normative time for graduation with the comprehensive capstone curriculum is one year for a full-time student. This option is appropriate for students interested in advanced studies to better prepare themselves in the information technology workforce. Students in the M.S. programs are not guaranteed any form of financial support from the department. It is the student's responsibility

to ensure that they have sufficient funds for completing the M.S. degree program. Most M.S. students manage their finances by working as interns at companies in the Bay Area during the summer months.

Requirements

Course Requirements

Each student is required to take 43 credits as follows:

1. A core requirement must be met by taking CSE 200: Research and Teaching in Computer Science and Engineering and any two out of the following three courses: CSE 201: Analysis of Algorithms; CSE 210A: Programming Languages; and CSE 220: Computer Architecture. In addition, students must take 5 credits of CSE 299, Thesis Research.
2. One course each from three different breadth categories for a total of three courses (15 credits)—see the Breadth Requirements webpage.
3. Students in the Thesis capstone curriculum can use 5 credits of CSE 297, Independent Study or Research, toward the 43 credits requirement.
4. All remaining courses must be regular, 5-credit graduate courses (not seminars). Courses that do not count towards the 43 credits requirement include all courses numbered CSE 200 and CSE 296, and all courses in the CSE 280, CSE 297, and CSE 299 series.
5. At most 10 credits can be from courses taught by departments other than CSE.
6. Upper-division undergraduate UCSC CSE courses may be taken to strengthen a student's preparation for graduate studies. At most, 5 credits of UCSC upper-division undergraduate CSEe courses may be counted toward the 43 credits requirement.
7. With the exception of CSE 200, CSE 296, and all courses in the CSE 280, CSE 297, and CSE 299 series, all graduate courses and upper-division courses must be taken for letter grade. Only courses with a letter grade of B- or higher can be counted toward the M.S. degree requirements.
8. Undergraduates who are in their senior year at UCSC and are taking CSE upper-division courses or CSE graduate courses that are beyond their undergraduate degree requirements can count those courses as part of their M.S. degree should they apply to the CSE M.S. program.

Courses from other institutions may be substituted for equivalent courses at UCSC (with the approval of the Graduate Director) but may not count toward the 43-credit requirement. For example, a student may substitute an equivalent course for CSE 201 to satisfy the core requirement but may not count that course toward the 43-credit requirement. As another example, a student may substitute an equivalent graduate course for CSE 260 and count that for the

breadth requirement, but may not count that course toward the 43-credit requirement.

Each student must complete CSE 200 in their first year.

Other Requirements

Students in the comprehensive capstone curriculum must complete an M.S. project, while students in the thesis capstone curriculum must complete an M.S. thesis.

Thesis Capstone Curriculum

A student opting for the thesis capstone curriculum submits a written proposal to a faculty member, usually by the third academic quarter. By accepting the proposal, the faculty member becomes the thesis adviser. In consultation with the adviser, the student forms a master's thesis reading committee with at least two additional faculty members, each of whom is provided a copy of the proposal. The student presents an expository talk on the thesis research, and the final thesis must be accepted by the reading committee before the M.S. degree is awarded.

Comprehensive Capstone Curriculum

The M.S. project is an individual or a team-based project supervised by a faculty adviser and approved by a reading committee composed of the faculty adviser and a ladder rank faculty member from the Baskin School of Engineering, teaching professor, or lecturer. In situations when a lecturer is on the reading committee, an extra senate faculty member must be added so that senate faculty forms a majority of the reading committee.

A team is made up of up to five members. Projects can either be proposed by the team or the team may bid on projects proposed by faculty members. It is also possible to have industry- or government-sponsored projects, in which case, the industry/government supervisor can be invited to be an optional third member on the reading committee. In situations where multiple teams are bidding on a project, the project sponsor decides on which team will work on the project.

Project lifetimes are on the order of one to two quarters. Over the course of the project, teams may be required to meet milestones, e.g., design and specification, implementation plan, checkpoints, etc., at a schedule arranged by the faculty adviser. For effective team management, member participation, and evaluation, strategies such as 360-degree reviews may be employed.

The final project must be accepted by the reading committee before the M.S. degree is conferred.

Concentrations

M.S. students are offered the option to receive a concentration. Concentrations denote areas of specialized curriculum, training, and research within a given department or degree-granting program. The concentration is an informal annotation; no notation of it appears on the student's transcript or diploma. However the student will have the right to note the concentration in their curriculum vitae using the

words “a degree in XXX with a concentration in YYY.” The department may refer to the student's degree with the concentration noted, and writers of letters of reference may note the concentration when referring to the student's degree.

There are four possible concentrations available to CSE M.S. students:

- Artificial Intelligence
- Hardware Systems
- Software Systems
- Theory

In order to receive a concentration annotation, a M.S. student must satisfy three requirements:

1. Take two courses in the list of concentration-specific required courses.
2. Take one course in the list of concentration-specific elective courses.
3. Choose a faculty member in the concentration-specific list of affiliate faculty as project/thesis adviser.

The required and elective courses and the affiliated faculty for each concentration are available here.

Students normally request to receive a concentration annotation at the time they request to be assigned an adviser.

Transfer Credit

Up to three School of Engineering courses fulfilling the degree requirements of the M.S. degree may be taken before beginning the graduate program through the concurrent enrollment program.

Courses from other institutions may not be applied to the M.S. degree course requirements. They may be used to meet core requirements. For example, an equivalent computer architecture class taken elsewhere may be used in lieu of CSE 220. However, the student will need to replace it with 5 credits of another graduate elective course.

Petitions should be submitted along with the transcript from the other institution or UCSC extension. For courses taken at other institutions, copies of the syllabi, exams, and other coursework should accompany the petition. Such petitions are not considered until the completion of at least one quarter at UC Santa Cruz.

At most, a total of three courses may be transferred from concurrent enrollment and other institutions.

Academic Progress

Each year, the faculty reviews the progress of every student. Students not making adequate progress toward completion of degree requirements (see the Graduate Student Handbook for policy on satisfactory academic progress) are subject to dismissal from the program. Students with academic deficiencies may be required to take additional courses. Full-

time students with no academic deficiencies are normally expected to complete the degree requirements at the rate of at least two courses per quarter. Full-time CSE students must complete CSE 201, CSE 220,* and CSE 210A within two years and normally must complete all course requirements within two years for the M.S.

Students receiving two or more unsatisfactory grades (U or letter grade below B-) in the School of Engineering (SoE) courses are not making adequate progress and will be recommended for academic probation for the following three quarters of registered enrollment. Withdrawing or taking a leave of absence does not count as enrollment. Part-time enrollment is counted as a half quarter of enrollment.

Should any CSE graduate student fail a School of Engineering course while on probation, the CSE Department may request the graduate dean to dismiss that student from the graduate program. If after being removed from probation, the student again fails a School of Engineering course, they will return immediately to academic probation.

Graduate students experiencing circumstances or difficulties that impact their academic performance should contact their faculty adviser and the graduate director immediately. Students may appeal their dismissal.

*Revised 09/27/19. Was previously incorrectly listed as CSE 226.

Applying for Graduation

COMPUTER SCIENCE AND ENGINEERING PH.D.

Introduction

The Computer Science and Engineering Department offers a doctorate (Ph.D.) degree program. The normative time for the Ph.D. program is five years for a full-time student. Students admitted to the Ph.D. program come with financial support in the form of a combination of fellowship, teaching assistantship, and/or graduate research assistantships.

Advancement to Candidacy

Course Requirements

Each student is required to take 58 credits as follows:

- A core requirement must be met by taking CSE 200, CSE 201, CSE 210A, and CSE 220.
- One course each from three different breadth categories for a total of three courses (15 credits)—see the Breadth Requirements webpage.
- Up to 10 credits of the CSE 297 series, Independent Study or Research; or the CSE 299 series, Thesis Research.
- All remaining courses must be regular, 5-credit graduate courses (not seminars). Courses that do not count toward the 58-credit requirement include all

courses numbered CSE 200 and CSE 296, and all courses in the CSE 280, CSE 297, and CSE 299.

- At most 10 credits can be from courses taught by departments other than CSE. The student must obtain their adviser's authorization to take a course from outside of the Baskin School of Engineering.
- Undergraduate courses do not count toward the 58-credit requirement.

Courses used to satisfy the core requirement must be taken for letter grade. All other courses must be taken for letter grade, except for courses numbered CSE 200, CSE 296, and all courses in the CSE 280, CSE 297, and CSE 299, and for up to two other regular courses (10 credits).

Foreign Language Requirements

Teaching Requirements

Each student is required to complete at least one quarter of teaching assistantship. This requirement can be met after advancement to candidacy. Certain exceptions may be permitted for those with extensive prior teaching experience or those who are not allowed to be employed due to visa regulations.

Pre-Qualifying Requirements

Qualifying Examination

A successful qualifying examination involves a student writing a research prospectus, a public oral presentation of the proposed research, evaluation of research prospectus and oral presentation by a qualifying examination committee that is approved by the Graduate Division, and an appointment of a reading committee for the dissertation (which may differ from the qualifying examination committee).

Post-Qualifying Requirements

To continue in the Ph.D. program, students must advance to candidacy by the end of their third year. Students are advanced to candidacy after they have completed the course requirements, passed the qualifying examination, cleared all incompletes from their records, have an appointed dissertation reading committee, and paid the filing fee.

Transfer Credit

Up to three courses (15 credits) can be transferred from another institution with approval by the CSE graduate director.

Petitions should be submitted along with the transcript from the other institution or UCSC extension. For courses taken at other institutions, copies of the syllabi, exams, and other coursework should accompany the petition. Such petitions are not considered until the completion of at least one quarter at UCSC.

Dissertation

Dissertation

Each student writes a Ph.D. dissertation which must be submitted to the reading committee at least one month prior to the dissertation defense. The dissertation must show the results of in-depth research, be an original contribution of significant knowledge, and include material worthy of publication. Where appropriate, research internships with companies, government laboratories, or elsewhere are recognized (and may be required) as an integral part of the research leading to the dissertation.

Dissertation Defense

The candidate presents their research results in a public seminar sponsored by the dissertation supervisor. The seminar is followed by a defense of the dissertation to the public and the reading committee. The latter then decides whether the dissertation is acceptable or requires revision. Successful completion of the dissertation fulfills the final academic requirement for the Ph.D. degree.

Academic Progress

Each year, the faculty reviews the progress of every student. Students not making adequate progress toward completion of degree requirements (see the Graduate Student Handbook for policy on satisfactory academic progress) are subject to dismissal from the program. Students with academic deficiencies may be required to take additional courses. Full-time students with no academic deficiencies are normally expected to complete the degree requirements at the rate of at least two courses per quarter. Full-time CSE students must complete CSE 201, CSE 220, and CSE 210A within two years and normally must complete all course requirements within three years.

Ph.D. students who have not advanced to candidacy by the end of their third year (nine quarters) will be recommended for academic probation, and may be subject to dismissal from the program if not advanced to candidacy by the end of their fourth year (12 quarters).

Students receiving two or more unsatisfactory grades (U or letter grade below B-) in the School of Engineering (SoE) courses are not making adequate progress and will be recommended for academic probation for the following three quarters of registered enrollment. Withdrawing or taking a leave of absence does not count as enrollment. Part-time enrollment is counted as a half quarter of enrollment.

Should any CSE graduate student fail a School of Engineering course while on probation, the CSE Department may request the graduate dean to dismiss that student from the graduate program. If after being removed from probation, the student again fails a School of Engineering course, he or she will return immediately to academic probation.

Graduate students experiencing circumstances or difficulties that impact their academic performance should contact their faculty adviser and the graduate director immediately. Students may appeal their dismissal.

Applying for Graduation

COMPUTER ENGINEERING M.S.

Introduction

The graduate program in computer engineering accepts students for the M.S. degree. Graduate students in this program establish a solid foundation in computer algorithms and architectures and then proceed to a thorough study of recent developments in their selected area of specialization. This provides the basis for the M.S. degree project or thesis work. The major areas of research concentration in computer engineering at UC Santa Cruz are computer networks; embedded and autonomous systems; computer systems design; robotics and control, mobile and pervasive computing; and computer-aided design; and sensing and interaction.

The computer engineering program benefits from a close relationship with other graduate programs in the School of Engineering and UC Santa Cruz as a whole. It maintains strong ties to local industry in the Silicon Valley and Monterey Bay areas. Graduates of the program are prepared for careers in academia and research as well as for positions in industrial research and development.

While in the program, most graduate students are supported as research assistants on faculty-sponsored projects or as teaching assistants for undergraduate courses."

Requirements

Base Requirement

In their first year, graduate students must show proficiency in three fundamental subjects: 1) computer algorithms and data structures; 2) computer architecture; and 3) one of the following three subjects—logic design, circuits, or software systems. Proficiency can be demonstrated by either completing one of the associated undergraduate courses, by establishing that an equivalent undergraduate course has been completed elsewhere, or by passing the final examination (or project when deemed appropriate by the responsible faculty) of an associated course. Students should obtain a computer engineering base requirement worksheet for the list of associated courses and instructions on fulfilling this requirement.

All graduate students must meet the base requirement by the end of the spring quarter of their first year in the program.

Course Requirements

Project Track

Each M.S. student is required to complete a total of at least 48 credits. At least half of the credits from the graduate-level courses must be computer engineering graduate courses as listed in this site. The coursework must include:

Completion of base requirement as described above

Core Requirements (CSE 200 to be taken in fall quarter of the first year):

CSE 200	Research and Teaching in Computer Science and Engineering	3
CSE 201	Analysis of Algorithms	5
CSE 220	Computer Architecture	5
CSE 296	Masters Project	2

Research credits

Up to 10 credits of the CSE 297 series, Independent Study or Research; or the CSE 299 series, Thesis Research:

CSE 297A	Individual Study or Research	5
CSE 297B	Individual Study or Research	10
CSE 297C	Individual Study or Research	15
CSE 297F	Independent Study or Research	2
CSE 299A	Thesis Research	5
CSE 299C	Thesis Research	15
CSE 299F	Thesis Research	2

Graduate courses in related disciplines

Up to 10 credits of either graduate courses (not seminars) in related disciplines outside the School of Engineering (requires adviser and computer engineering graduate director approval) or upper-division undergraduate courses when necessary to strengthen the student's preparation for graduate studies (requires adviser approval).

Graduate courses from within the School of Engineering

All remaining courses must be regular 5-credit graduate courses from within the School of Engineering (with adviser and grad director approval); courses that do not count include all courses numbered CSE 200 and CSE 296, and all courses in the CSE 280, CSE 297, and CSE 299.

Thesis Track

Each M.S. student is required to complete a total of at least 48 credits. At least half of the credits from the graduate-level courses must be computer engineering graduate courses as listed in this site. The coursework must include:

Completion of base requirement as described above

Core Requirements (CSE 200 to be taken in fall quarter of the first year):

CSE 200	Research and Teaching in Computer Science and Engineering	3
CSE 201	Analysis of Algorithms	5
CSE 220	Computer Architecture	5

Research credits

Up to 10 credits of the CSE 297 series, Independent Study or Research; or the CSE 299 series, Thesis Research:

CSE 297A	Individual Study or Research	5
CSE 297B	Individual Study or Research	10

CSE 297C	Individual Study or Research	15
CSE 297F	Independent Study or Research	2
CSE 299A	Thesis Research	5
CSE 299C	Thesis Research	15
CSE 299F	Thesis Research	2

Graduate courses in related disciplines

Up to 10 credits of either graduate courses (not seminars) in related disciplines outside the School of Engineering (requires adviser and computer engineering graduate director approval) or upper-division undergraduate courses when necessary to strengthen the student's preparation for graduate studies (requires adviser approval).

Graduate courses from within the School of Engineering

All remaining courses must be regular 5-credit graduate courses from within the School of Engineering (with adviser and graduate director approval); courses that do not count include all courses numbered CSE 200 and CSE 296, and all courses in the CSE 280, CSE 297, and CSE 299.

Other Requirements

Thesis Track

Completion of a master's thesis is required for award of the master's degree. To fulfill this requirement, the student must submit a written proposal to a faculty member, usually by the third academic quarter. By accepting the proposal, the faculty member becomes the thesis adviser for the proposed thesis. In consultation with the adviser, the student must form a master's thesis reading committee with at least two additional faculty members, each of whom is provided a copy of the proposal. It is recommended that the student give an expository talk on the thesis research. The approved reading committee must accept the final thesis before the Master of Science degree can be awarded.

Project Track

Completion of a master's project is required to satisfy the master's degree capstone requirement. The master's project is the culmination of the student's academic experience and builds upon the knowledge acquired during the program. In consultation with the adviser, the student forms a master's project reading committee of at least two faculty members, each of whom is provided a copy of the project report. The final project must be accepted by the review committee before the award of the master of science degree.

Transfer Credit

Academic Progress

Each year, the program faculty reviews the progress of every student in the graduate program. Students not making adequate progress toward completion of degree requirements (see the UC Santa Cruz Graduate Handbook for policy on satisfactory academic progress) are subject to dismissal from

the program. Students with academic deficiencies may be required to take additional courses. Full-time students with no academic deficiencies are normally expected to complete the degree requirements at the rate of at least two courses per quarter. Full-time students must complete CSE 201 and CSE 220 within two years and normally must complete all course requirements within two years for the M.S.

Students receiving two or more grades of U (Unsatisfactory) or below B in School of Engineering courses are not making adequate progress and will be placed on academic probation for the following three quarters of registered enrollment. Withdrawing or taking a leave of absence does not count as enrollment. Part-time enrollment is counted as a half of a quarter of enrollment.

Should any computer engineering graduate student fail a School of Engineering course while on probation, the program faculty may request the graduate dean to dismiss that student from the graduate program. If, after being removed from probation, the student again fails a School of Engineering course, he or she will return immediately to academic probation.

Graduate students experiencing circumstances or difficulties that impact their academic performance should contact their adviser and the graduate director immediately. Students may appeal their dismissal.

Letter Grade Policy

Letter grading is required for all courses applied toward the computer engineering master's degree with an exception for up to 10 credits of the student's choice and the following courses: Research and Training in Computer Science and Engineering (CSE 200), Master's Project (CSE 296), Independent Study or Research (CSE 297), Thesis Research (CSE 299), and seminar courses (CSE 280 series). This policy includes courses used for this degree that are sponsored by other departments. To ensure they will receive a letter grade, students should check that they have selected the letter grade option no later than the 15th day of instruction each quarter for each class in which they are enrolled.

Applying for Graduation

HUMAN LANGUAGE MEDIA AND MODELING DESIGNATED EMPHASIS

Introduction

The graduate designated emphasis (DE) leading to the degree notation "with an emphasis in Human-Language Media and Modeling" (HLMM) is a collaboration of faculty from the Departments of Computer Science and Engineering, Computational Media, and Linguistics. This DE is administered by the Department of Computer Science and Engineering. Students wishing to complete a master's thesis or doctoral dissertation in this area must satisfy the degree requirements of a primary program as well as of the DE. The DE is most suitable for students pursuing degrees in

linguistics, computational media, computer science and engineering, and psychology. However, students from any area may work in this interdisciplinary field as long as they meet all requirements, including progress, within the primary degree program.

The current HLMM DE faculty are:

- Pranav Anand, Linguistics
- Jeffrey Flanigan, Computer Science and Engineering
- Jean E. Fox Tree, Psychology
- Marilyn Walker, Computer Science and Engineering
- Yi Zhang, Computer Science and Engineering

Requirements

All students must demonstrate an understanding of human-language media and modeling, through prior work and the completion of a set of HLMM electives or courses.

Committee Composition and Departmental Approvals

The student's M.S. project or Ph.D. qualifying exam, or Ph.D. committee must include one member of the HLMM faculty.

Course Requirements

All students must complete three five-unit graduate core courses from the approved list of courses and one two-unit seminar course and provide evidence of having attended 6 related seminars or invited talks.

List of Approved Courses

Three 5-credit courses plus two, 2-credit seminars are required, chosen from the list of approved courses, which is initially:

CMPM 235	User Evaluation of Technology	5
CSE 240	Artificial Intelligence	5
CMPM 244	Artificial Intelligence in Games	5
CSE 245	Computational Models of Discourse and Dialogue	5
CMPM 248	Interactive Storytelling	5
CMPM 265	Generative Methods	5
CMPM 290J	Playable Media	5
CSE 290K	Advanced Topics in Natural Language Processing	5
CMPM 290P	Topics in Computational Cinematography	5
CMPM 280X	Expressive AI	2
CMPM 280W	Seminar in Digital Media	2
CSE 280Z	Seminar in Natural Language Processing and Dialogue	2

The following course numberings are no longer current, but these previous numberings can fulfill the designated emphasis requirement: CMPS 244, CMPS 248, CMPS 265, CMPS 290J, CMPS 290P, CMPS 280W, CMPM 280Z and CMPE 235.

Writing, Research and/or Teaching Requirements

The student's master's project, dissertation or thesis must demonstrate knowledge of, and orientation to, research issues related to HLMM.

Proficiency Requirements

All students must demonstrate an understanding of Human-Language Media and Modeling, through prior work and the completion of a set of HLMM electives or courses.

Academic Progress

COMPUTER ENGINEERING PH.D.

The computer engineering Ph.D. program is suspended for the 2019-20 academic year.

NETWORK AND DIGITAL TECHNOLOGY ELECTIVES COURSE LIST

Network and Digital Technology Electives

Network and Digital Technology Electives Course List

DIGITAL TECHNOLOGY FOCUS

- CSE 120 Computer Architecture (formerly CMPE 110)
- CSE 121/L Microprocessor System Design (formerly CMPE 121/L)*
- CSE 125/L Logic Design with Verilog (formerly CMPE 125/L)*
- ECE 101/L Introduction to Electronic Circuits (can be used for elective only if CSE 101 is completed) (formerly EE 101/L)
- ECE 118/L Introduction to Mechatronics (formerly CMPE 118/L)

NETWORK TECHNOLOGY FOCUS

- CSE 101 Abstract Data Types (can be used for elective only if ECE 101/L is completed) (formerly CMPS 101)
- CSE 130 Principles of Computer Systems Design or CSE 131 Introduction to Operating Systems (formerly CMPE 105 or CMPS 111)#

- CSE 151/L Advanced Computer Networks (formerly CMPE 151/L)
- CSE 156/L Network Programming (formerly CMPE 156/L)*

Students can only take either CSE 130 or CSE 131

*These courses are only allowed to be used as electives if not being used for a Capstone.

CAPSTONE COURSES

- CSE 115A Introduction to Software Engineering (formerly CMPS 115)
- CSE 121/L Microprocessor System Design (formerly CMPE 121/L)
- CSE 125/L Logic Design with Verilog (formerly CMPE 125/L)
- ECE 118/L Introduction to Mechatronics (formerly CMPE 118/L)
- CSE 156/L Network Programming (formerly CMPE 156/L)

OTHER APPROVED ELECTIVES

- AM 114 Dynamical Systems (formerly AMS 114)
- AM 147 Computational Methods and Applications (formerly AMS 147)
- AM 231 Nonlinear Control Theory (formerly AMS 231)
- CMPM 146 Game AI
- CSE 102 Analysis of Algorithms (formerly CMPS 102)
- CSE 103 Computational Models (formerly CMPS 130)
- CSE 107 Probability and Statistics for Engineers (formerly CMPE 107)
- CSE 110A Compiler Design I (formerly CMPS 104A)
- CSE 110B Compiler Design II (formerly CMPS 104B)
- CSE 111 Advanced Programming (formerly CMPS 109)
- CSE 112 Comparative Programming Languages (formerly CMPS 112)
- CSE 113 Parallel Programming (formerly CMPS 113)
- CSE 118 Mobile Applications (formerly CMPS 121)
- CSE 132 Computer Security (formerly CMPS 122)

Robotics and Technology Electives

Requirements List with Courses

- AM 114 Introduction to Dynamical Systems (formerly AMS 114)
- ECE 115 Solid Mechanics (no longer offered) (formerly CMPE 115)
- ECE 145 Estimation and Introduction to Control of Stochastic Processes (formerly CMPE 145)
- ECE 153 Digital Signal Processing (formerly CMPE 153)
- ECE 215 Models of Robotic Manipulation (formerly CMPE 215)
- ECE 216 Bio-Inspired Locomotion (formerly CMPE 216)
- ECE 240 Intro to Linear Dynamical Systems (formerly CMPE 240)
- ECE 242 Applied Feedback Control (formerly CMPE 242)
- ECE 244 Digital Control (formerly CMPE 244)

Electrical and Computer Engineering

Baskin School of Engineering
(831) 459-2158

PROGRAMS OFFERED

Electrical Engineering B.S. (p. **Error! Bookmark not defined.**)

Robotics Engineering B.S. (p. 432)

Electrical Engineering Minor (p. 437)

Assistive Technology Minor (p. 438)

Bioelectronics and Biophotonics Minor (p. 439)

Electrical and Computer Engineering M.S. (p. 440)

Electrical and Computer Engineering Ph.D. (p. 442)

Robotics and Control Designated Emphasis (p. 444)

The Electrical and Computer Engineering Department at UC Santa Cruz aims to achieve engineering discoveries that benefit humankind through a combination of curiosity, open-mindedness, and inclusiveness. We aim to provide undergraduate and graduate students with inspiration and quality education, believing that rigor, creativity, and excitement should be part of the Electrical and Computer Engineering curriculum. Our Electrical Engineering undergraduate program is ABET accredited.

Undergraduate Program

The Electrical and Computer Engineering Department's undergraduate program offers bachelor of science degrees for students majoring in electrical engineering and robotics engineering. The electrical engineering B.S. degree is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>. Minors are also offered in electrical engineering, bioelectronics and biophotonics, and assistive technology.

The department emphasizes teaching excellence, opportunities for students to engage in research with our faculty, and preparation for industrial professional practice through yearlong interdisciplinary team-based capstone projects. Students primarily intending to pursue graduate study research can choose the thesis option instead of the capstone sequence.

For more details, visit the Electrical and Computer Engineering Department website and the department's program statements in the catalog.

ROBOTICS ENGINEERING B.S.

Information and Policies

Introduction

Academic Advising for the Program

The Baskin School of Engineering Undergraduate Advising office offers general advising for prospective and declared undergraduates majoring in School of Engineering programs. The office handles major declarations, transfer credits, course substitutions, articulations, and degree certifications.

Transfer students should also refer to the Transfer Information and Policy section.

Baskin Engineering Building, Room 225
advising@soe.ucsc.edu
(831) 459-5840

Getting Started in the Major

Program Learning Outcomes

For the Robotics Engineering B.S. degree, the PLOs are:

- an ability to apply knowledge of mathematics, science, and engineering;
- an ability to design a system, component, or process to meet desired needs within realistic constraints;
- an ability to function effectively on teams that establish goals, plan tasks, meet deadlines, and analyze risk and uncertainty;
- an ability to communicate effectively; and
- an ability to use the techniques, skills, and modern engineering tools necessary for engineering practice.

Major Qualification Policy and Declaration Process

Major Qualification

In order to be admitted into the robotics engineering major students must be listed as a proposed major within the School of Engineering. Students in the engineering and computing cluster must propose a School of Engineering major before they can declare. Please refer to the School of Engineering's "Proposed Engineering Major Status" and its "Declaring a School of Engineering Major" sections in the catalog or the BSOE Undergraduate Affairs Prepare to Declare page for more information.

Transfer students should also refer to the Transfer Information and Policy.

In addition to being listed as a proposed School of Engineering major, declaration of the robotics engineering

major in the first six quarters of enrollment at UC Santa Cruz is based on performance in the following lower-division courses and associated labs required for the major:

Both of these

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

And one of these (whichever is completed first)

AM 30	Multivariate Calculus for Engineers	5
MATH 23A	Vector Calculus	5

And one of these (whichever is completed first):

AM 10	Mathematical Methods for Engineers I	5
MATH 21	Linear Algebra	5

And all of these:

AM 20	Mathematical Methods for Engineers II	5
ECE 9	Introduction to Statics, Dynamics, and Biomechanics	5
CSE 12	Computer Systems and Assembly Language	5
CSE 12L	Computer Systems and Assembly Language Laboratory	2
CSE 13E	Embedded Systems and C Programming	7
CSE 16	Applied Discrete Mathematics	5
CSE 30	Programming Abstractions: Python	7
PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1
PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory	1

Students in their first six quarters who have completed at least 41 credits in these courses will be admitted to the robotics major if their cumulative GPA is at least 2.8 in all the courses listed above; and they have attempted no more than seven credits resulting in grades of C-, D+, D, D-, F or NP in all of the courses listed above.

Appeal Process

Students who are informed that they are not eligible to declare may appeal this decision by submitting a letter to the undergraduate director within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student, the college, and the Office of the Registrar of the decision.

If you have further questions concerning the appeal process, please contact the Undergraduate Advising Office at (831) 459-5840 or email advising@soe.ucsc.edu.

More information regarding the appeal process can be found on the BSOE Undergraduate Affairs Appeal Your Major page.

How to Declare a Major

Instructions for declaring a major in the Baskin School of Engineering are on the school's Declare Your Major page.

Transfer Information and Policy

Transfer Admission Screening Policy

Students should complete at least seven courses excluding labs from the following list:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 23A	Vector Calculus	5
AM 10	Mathematical Methods for Engineers I	5
MATH 21	Linear Algebra	5
AM 20	Mathematical Methods for Engineers II	5
ECE 9	Introduction to Statics, Dynamics, and Biomechanics	5
CSE 12	Computer Systems and Assembly Language	5
CSE 12L	Computer Systems and Assembly Language Laboratory	2
CSE 13E	Embedded Systems and C Programming	7
CSE 16	Applied Discrete Mathematics	5
CSE 30	Programming Abstractions: Python	7
CSE 15	Introduction to Data Structures	5
CSE 15L	Data Structures Laboratory	2
PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1
PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory	1

AM 10 and MATH 21 are alternatives; only one or the other can count toward the seven courses.

CSE 30 and CSE 15/CSE 15L are alternatives; only one or the other can count toward the seven courses. CSE 15/CSE 15L must be taken by Spring 2020 to count toward the seven courses.

Their cumulative GPA should be at least 2.8 in all of the courses attempted. Prospective transfer students completing the 2019-20 criteria (published in the 2018-19 catalog) and applying for Fall 2020 will also have satisfied major preparation.

To ensure timely graduation, it is recommended (but not required) that all courses accepted as equivalent to lower-division course requirements be taken prior to transfer.

Students should consult assist.org to determine which courses at other institutions in California are transferable to UC Santa Cruz.

Getting Started at UCSC as a Transfer Student

Transfer students should declare their major in their first quarter at UC Santa Cruz. Instructions for declaring a major in the Baskin School of Engineering are on the Declare Your Major page.

Letter Grade Policy

The Electrical and Computer Engineering Department requires letter grading for all courses applied toward the B.S. in robotics engineering. This policy includes courses required for the degree that are sponsored by other departments.

Course Substitution Policy

Please refer to the School of Engineering section of the catalog (p. 345) for the policy regarding course substitution.

Double Majors and Major/Minor Combinations Policy

Students completing this major cannot also receive the computer engineering minor or the network and digital technology B.A. degree. They can only receive the computer engineering B.S. in a concentration other than robotics and control.

Study Abroad

Honors

Majors are considered for “Honors in the Major” and “Highest Honors in the Major” based on their GPA and on results of undergraduate research and other significant contributions to the School of Engineering. Students with a GPA of 3.7 or higher, in most cases, receive highest honors. Students with a GPA of 3.3 or higher but less than 3.7, in most cases, receive honors. Students with particularly significant accomplishments in undergraduate research or contributions to the School of Engineering may be considered with a lower GPA. Robotics engineering juniors and seniors may also be eligible for election to the UC Santa Cruz chapter of Tau Beta Pi, the national engineering honor society founded in 1885.

School of Engineering Policies

Please refer to the School of Engineering section of the catalog (p. 345) for additional policies that apply to all School of Engineering programs.

Materials Fee and Miscellaneous Fees

Please see the section on fees under the School of Engineering (p. 345).

Requirements and Planners

Course Requirements

All students in the robotics engineering major must take the courses listed below. Although not required, it is strongly recommended that students interested in the robotics engineering major take ECE 8, Introduction to Robot Automation, in their first quarter. The senior comprehensive requirement for robotics engineering majors is satisfied by completion of the capstone course and the portfolio exit requirement. Students not making sufficient progress in the major may be recommended to change to another major.

Lower-Division Courses

Students who may have originally pursued another major should discuss with the Baskin School of Engineering Undergraduate Advising office whether or not already completed coursework may be substituted for one or more lower-division requirements.

Either of the following:

AM 10	Mathematical Methods for Engineers I	5
MATH 21	Linear Algebra	5

And all the following:

AM 20	Mathematical Methods for Engineers II	5
CSE 12	Computer Systems and Assembly Language	5
CSE 12L	Computer Systems and Assembly Language Laboratory	2

And one of the following options:

Either this course		
CSE 30	Programming Abstractions: Python	7
or these courses		
CSE 15	Introduction to Data Structures	5
CSE 15L	Data Structures Laboratory	2

If using CSE 15/CSE 15L to meet the requirement, the courses must be completed by Spring 2020.

And either of the following:

MATH 23A	Vector Calculus	5
AM 30	Multivariate Calculus for Engineers	5

And all the following courses:

CSE 13E	Embedded Systems and C Programming	7
CSE 16	Applied Discrete Mathematics	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1
PHYS 5C	Introduction to Physics III	5

PHYS 5N	Introduction to Physics Laboratory	1	CSE 113	Parallel and Concurrent Programming	5
ECE 9	Introduction to Statics, Dynamics, and Biomechanics	5	CSE 122	Introduction to VLSI Digital System Design	5
ECE 10	Fundamentals of Robot Kinematics and Dynamics	5	CSE 125	Logic Design with Verilog	5
			CSE 125L	Logic Design with Verilog Laboratory	2
Upper-Division Courses			CSE 165	Human-Computer Interaction	5
All of the following:			CSE 150	Introduction to Computer Networks	5
CSE 100	Logic Design	5	CSE 150L	Introduction to Computer Networks Laboratory	2
CSE 100L	Logic Design Laboratory	2	CSE 151	Advanced Computer Networks	5
CSE 107	Probability and Statistics for Engineers	5	CSE 151L	Advanced Computer Networks Laboratory	2
CSE 121	Microprocessor System Design	5	ECE 153	Digital Signal Processing	5
CSE 121L	Microprocessor System Design Laboratory	2	CSE 156	Network Programming	5
ECE 141	Feedback Control Systems	5	CSE 156L	Network Programming Laboratory	2
ECE 167	Sensing and Sensor Technologies	5	CSE 167	Mobile Sensing and Interaction	5
ECE 167L	Sensing and Sensor Technologies Lab	2	CSE 106	Applied Graph Theory and Algorithms	5
CSE 101	Algorithms and Abstract Data Types	5	CSE 102	Introduction to Analysis of Algorithms	5
ECE 101	Introduction to Electronic Circuits	5	CSE 110A	Fundamentals of Compiler Design I	5
ECE 101L	Introduction to Electronic Circuits Laboratory	2	CSE 110B	Fundamentals of Compiler Design II	5
ECE 103	Signals and Systems	5	CSE 111	Advanced Programming	5
ECE 103L	Signals and Systems Laboratory	2	CSE 131	Introduction to Operating Systems	5
ECE 118	Introduction to Mechatronics	5	CSE 112	Comparative Programming Languages	5
ECE 118L	Introduction to Mechatronics Laboratory	2	CSE 115A	Introduction to Software Engineering	5
Electives			CSE 118	Mobile Applications	5
Advanced Robotics Elective			CSE 132	Computer Security	5
One of the following:			CSE 138	Distributed Systems	5
ECE 215	Models of Robotic Manipulation	5	CSE 139	Data Storage Systems	5
ECE 216	Bio-Inspired Locomotion	5	CSE 103	Computational Models	5
ECE 240	Introduction to Linear Dynamical Systems	5	CSE 140	Artificial Intelligence	5
ECE 242	Applied Feedback Control	5	CSE 142	Machine Learning	5
ECE 244	Digital Control	5	CSE 160	Introduction to Computer Graphics	5
ECE 245	Estimation and Introduction to Control of Stochastic Processes	5	CSE 160L	Introduction to Computer Graphics Laboratory	2
ECE 246	Hybrid Dynamical Systems	5	CSE 161	Introduction to Data Visualization	5
ECE 249	Introduction to Cyber-physical Systems	5	CSE 161L	Data Visualization Laboratory	2
Upper-Division and Graduate Elective			CSE 180	Database Systems I	5
One course from the following:			CSE 181	Database Systems II	5
AM 114	Introduction to Dynamical Systems	5	CSE 183	Web Applications	5
ECE 145	Estimation and Introduction to Control of Stochastic Processes	5	ECE 130	Introduction to Optoelectronics and Photonics	5
AM 147	Computational Methods and Applications	5	ECE 130L	Introduction to Optoelectronics Laboratory	1
CMPM 146	Game AI	5	ECE 135	Electromagnetic Fields and Waves	5
CSE 120	Computer Architecture	5	ECE 135L	Electromagnetic Fields and Waves Laboratory	2
			ECE 102	Properties of Materials	5

ECE 102L	Properties of Materials Laboratory	2
ECE 151	Communications Systems	5
ECE 152	Introduction to Wireless Communications	5
ECE 153	Digital Signal Processing	5
ECE 171	Analog Electronics	5
ECE 171L	Analog Electronics Laboratory	2
ECE 172	Advanced Analog Circuits	5
ECE 173	High-Speed Digital Design	5
ECE 173L	High-Speed Digital Design Laboratory	2
ECE 175	Energy Generation and Control	5
ECE 175L	Energy Generation and Control Laboratory	2
ECE 193	Field Study	5
ECE 198	Individual Study or Research	5
CSE 276	Optimization Theory and Applications	5

Lecture and required concurrent lab course counts as one course.

Disciplinary Communication (DC) Requirement

Students in all majors must satisfy that major's upper-division Disciplinary Communication (DC) requirement. The DC requirement in robotics is satisfied by completing the senior capstone course sequence:

Either these three courses:

ECE 129A	Capstone Project I	5
ECE 129B	Capstone Project II	5
ECE 129C	Capstone Project III	5

Or these two courses:

ECE 129A	Capstone Project I	5
ECE 195	Senior Thesis Research	5

10 credits for the senior thesis course, ECE 195, must be completed for this option.

Comprehensive Requirement

Capstone Requirement

Students must complete one capstone design course that spans three quarters

ECE 129A	Capstone Project I	5
ECE 129B	Capstone Project II	5
ECE 129C	Capstone Project III	5

or complete the following courses:

ECE 129A	Capstone Project I	5
ECE 195	Senior Thesis Research	5

10 credits for the senior thesis course, ECE 195, must be completed for this option.

Exit Requirement

Students are required to complete an exit survey and attend an exit interview. Portfolios of the students work will be collected from our courses for program evaluation. The

portfolios will be reviewed by the Electrical and Computer Engineering undergraduate committee and will include two project reports: ECE 118/ECE 118L and either the senior capstone report (ECE 129A/ECE 129B/ECE 129C) or the student's senior thesis.

Planners

Four-Year Planner for Robotics Engineering

Below is a sample academic plan for students majoring in robotics engineering. The plan for the third and fourth years will vary according to the electives and capstone selected. As part of the major declaration process students prepare a four-year plan and the selected electives may affect the placement of other courses as well. Careful planning at the time of declaration is required to complete the degree within four years. General education requirements that are not covered in the four-year planner are: CC (Cross-Cultural Analysis), ER (Ethnicity and Race), IM (Interpreting Arts and Media), TA (Textual Analysis), PE (Perspective), and C (Composition).

Year	Fall	Winter	Spring
1st (frosh)	MATH 19A	MATH 19B	MATH 23A
	ECE 8 (optional)	CSE 12 & CSE 12L	CSE 13E
2nd (soph)	PHYS 5A & PHYS 5L	ECE 9	ECE 10
	AM 10	AM 20	CSE 16
	CSE 15 & CSE 15L or CSE 30	PHYS 5C & PHYS 5N	
3rd (junior)	ECE 101 & ECE 101L	CSE 100 & CSE 100L	Elective
	CSE 101	CSE 107	CSE 121 & CSE 121L
			ECE 103 & ECE 103L
4th (senior)	ECE 129A	ECE 129B	ECE 129C
	ECE 141	ECE 167 & ECE 167L	Advanced elective
	ECE 118 & ECE 118L		

Three of the upper-division electives must be taken in the student's concentration.

Plan for Junior Transfers

Below is a sample academic plan for students transferring to UC Santa Cruz in robotics engineering for their junior year. It assumes that all lower-division course requirements have already been satisfied, except possibly ECE 10. The plan for the third and fourth years will vary according to the electives and capstone selected. As part of the major declaration process students prepare a plan and the selected electives may affect the placement of other courses as well. Carefully planning at the time of declaration is required to complete the degree within two years.

This planner assumes that most general education courses have been completed before coming to UCSC.

Year	Fall	Winter	Spring
3rd (junior)	ECE 101 & ECE 101L	CSE 107	CSE 121 & CSE 121L
	CSE 101	CSE 100 & CSE 100L	ECE 103 & ECE 103L
		Elective	
4th (senior)	ECE 129A	ECE 129B	ECE 129C
	ECE 141	ECE 167 & ECE 167L	Advanced elective
	ECE 118 & ECE 118L		

Three of the upper-division electives must be taken in the student's concentration.

Curriculum charts for all BSOE majors are available at the department's Major Curriculum Charts page.

ELECTRICAL ENGINEERING MINOR

The electrical engineering minor provides a solid foundation in the core areas of electronic circuits and signals and systems, as well as the prerequisite material in mathematics and physics. Concentration of upper-division electives in either of the major tracks constitutes substantial and focused work in the discipline of electrical engineering. This minor is particularly suitable for students with majors in applied physics or any School of Engineering major.

Course Requirements

Requirements for the minor in Electrical Engineering are the following:

Lower-Division Courses

Mathematics

All of the following

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5

Plus one of the following courses

MATH 23A	Vector Calculus	5
AM 30	Multivariate Calculus for Engineers	5

Plus one of the following options

Either these courses		
AM 10	Mathematical Methods for Engineers I	5
AM 20	Mathematical Methods for Engineers II	5
or these courses		
MATH 21	Linear Algebra	5
MATH 24	Ordinary Differential Equations	5

Science

One of the following lecture/lab combinations

Either these courses		
PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1
or these courses		
PHYS 6A	Introductory Physics I	5
PHYS 6L	Introductory Physics Laboratory	1

Plus one of the following lecture/lab combinations

Either these courses		
PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory	1
or these courses		
PHYS 6C	Introductory Physics III	5
PHYS 6N	Introductory Physics Laboratory	1

Upper-Division Courses

All of the following courses

ECE 101	Introduction to Electronic Circuits	5
ECE 101L	Introduction to Electronic Circuits Laboratory	2
ECE 103	Signals and Systems	5
ECE 171	Analog Electronics	5

ECE 171L Analog Electronics Laboratory 2

Electives

Plus at least 15 additional credits of upper-division or graduate courses from the lists below. All of the upper-division electives must come from the same concentration.

Electronics/Optics Concentration Courses

Electrical and Computer Engineering

ECE 104	Bioelectronics	5
ECE 118	Introduction to Mechatronics	5
ECE 118L	Introduction to Mechatronics Laboratory	2
ECE 130	Introduction to Optoelectronics and Photonics	5
ECE 130L	Introduction to Optoelectronics Laboratory	1
ECE 230	Optical Fiber Communication	5
ECE 136	Engineering Electromagnetics	5
ECE 141	Feedback Control Systems	5
ECE 241	Introduction to Feedback Control Systems	5
ECE 157	RF Hardware Design	5
ECE 157L	RF Hardware Design Laboratory	2
ECE 167	Sensing and Sensor Technologies	5
ECE 167L	Sensing and Sensor Technologies Lab	2
ECE 172	Advanced Analog Circuits	5
ECE 221	Advanced Analog Integrated Circuits	5
ECE 173	High-Speed Digital Design	5
ECE 173L	High-Speed Digital Design Laboratory	2
ECE 175	Energy Generation and Control	5
ECE 175L	Energy Generation and Control Laboratory	2
ECE 176	Energy Conservation and Control	5
ECE 176L	Energy Conversion and Control Laboratory	2
ECE 177	Power Electronics	5
ECE 177L	Power Electronics Laboratory	2
ECE 178	Device Electronics	5
ECE 180J	Advanced Renewable Energy Sources, Storage, and Smart Grids	5
ECE 201	Introduction to Nanotechnology	5
ECE 203	Nanocharacterization of Materials	5
ECE 231	Optical Electronics	5

Computer Science and Engineering

CSE 121	Microprocessor System Design	5
CSE 121L	Microprocessor System Design Laboratory	2

(ECE 130 and ECE 230, ECE 141 and ECE 241, and ECE 172 and ECE 221 are undergraduate and graduate courses taught in conjunction, and only one can be taken for this program.)

Communications, Signals, Systems, and Controls

Concentration

Electrical and Computer Engineering

ECE 118	Introduction to Mechatronics	5
ECE 118L	Introduction to Mechatronics Laboratory	2
ECE 130	Introduction to Optoelectronics and Photonics	5
ECE 130L	Introduction to Optoelectronics Laboratory	1
ECE 230	Optical Fiber Communication	5
ECE 136	Engineering Electromagnetics	5
ECE 141	Feedback Control Systems	5
ECE 241	Introduction to Feedback Control Systems	5
ECE 152	Introduction to Wireless Communications	5
ECE 252	Wireless Communications	5
ECE 153	Digital Signal Processing	5
ECE 250	Digital Signal Processing	5
ECE 237	Image Processing and Reconstruction	5
ECE 251	Principles of Digital Communications	5
ECE 253	Introduction to Information Theory	5
ECE 255	Error Control Coding	5
ECE 256	Statistical Signal Processing	5

Computer Science and Engineering

CSE 150	Introduction to Computer Networks	5
CSE 150L	Introduction to Computer Networks Laboratory	2

(ECE 130 and ECE 230, ECE 152 and 252, ECE 141 and ECE 241, and ECE 153 and ECE 250 are undergraduate and graduate courses taught in conjunction, and only one can be taken for this program.)

ASSISTIVE TECHNOLOGY MINOR

The assistive technology minor is designed for students interested in helping people with movement disabilities. The emphasis is on designing exoskeletons and robots built on two core cross-disciplinary courses: Mechatronics (ECE118/ECE 118L) and Functional Anatomy (METX 135/METX 135L).

The minor requirements may satisfy the requirements of other majors or minors under the campus policy discussed under Major and Minor Requirements. Because of the large number of courses required, it is most suitable for students in majors already requiring a substantial number of these courses. The minor cannot be combined with the Assistive Technology: Motor concentration of the former bioengineering major or the robotics engineering B.S. major. ECE 121, ECE 141 and ECE 167 cannot also be used to satisfy electrical engineering B.S. electives.

Course Requirements

Requirements for the minor in assistive technology are the following:

Lower-Division Courses

All of the following

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1
PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory	1
CHEM 1A	General Chemistry	5
BIOL 20A	Cell and Molecular Biology	5
BIOE 20B	Development and Physiology	5
CSE 12	Computer Systems and Assembly Language	5
CSE 12L	Computer Systems and Assembly Language Laboratory	2
CSE 13E	Embedded Systems and C Programming	7

Plus one of the following

Either this course

AM 10	Mathematical Methods for Engineers I	5
-------	--------------------------------------	---

or this course

MATH 21	Linear Algebra	5
---------	----------------	---

Plus one of the following

Either this course

AM 20	Mathematical Methods for Engineers II	5
-------	---------------------------------------	---

or this course

MATH 24	Ordinary Differential Equations	5
---------	---------------------------------	---

Upper-Division Courses

All of the following courses

ECE 101	Introduction to Electronic Circuits	5
ECE 101L	Introduction to Electronic Circuits Laboratory	2
ECE 103	Signals and Systems	5
CSE 100	Logic Design	5
CSE 100L	Logic Design Laboratory	2
ECE 118	Introduction to Mechatronics	5
ECE 118L	Introduction to Mechatronics Laboratory	2
METX 135	Functional Anatomy	5
METX 135L	Functional Anatomy Lab	2
ECE 167	Sensing and Sensor Technologies	5
ECE 167L	Sensing and Sensor	2

Technologies Lab

Plus one of the following courses

ECE 121	Microcontroller System Design	7
ECE 141	Feedback Control Systems	5

BIOELECTRONICS AND BIOPHOTONICS MINOR

The bioelectronics and biophotonics minor is designed for students in chemical, biological, environmental sciences, and biomolecular engineering to learn how to interface biological systems with electronics including sensors, actuators, and wireless communications. Introductory chemistry and physiology is desired, but not required.

Course Requirements

Essential courses for the minor in bioelectronics and biophotonics deal with the analog electronics to interface biological systems to sensors and with the signals they produce, both analog and digital, for interfacing to computer systems. The minor requirements may satisfy the requirements of other majors or minors under the campus policy discussed under Major and Minor Requirements. The minor cannot be combined with the bioelectronics concentration of the former bioengineering major or the electrical engineering B.S. or electrical engineering minor.

Requirements for the minor in bioelectronics and biophotonics consist of the following:

Lower-Division Courses

All of the following

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
PHYS 5A	Introduction to Physics I	5
PHYS 5L	Introduction to Physics Laboratory	1
PHYS 5C	Introduction to Physics III	5
PHYS 5N	Introduction to Physics Laboratory	1
CSE 12	Computer Systems and Assembly Language	5
CSE 12L	Computer Systems and Assembly Language Laboratory	2
CSE 13E	Embedded Systems and C Programming	7

Plus one of the following

Either this course

AM 10	Mathematical Methods for Engineers I	5
-------	--------------------------------------	---

or this course

MATH 21	Linear Algebra	5
---------	----------------	---

Plus one of the following

Either this
course

AM 20	Mathematical Methods for Engineers II	5
-------	---------------------------------------	---

or this course

MATH 24	Ordinary Differential Equations	5
---------	---------------------------------	---

Upper-Division Courses**All of the following courses**

CSE 100	Logic Design	5
CSE 100L	Logic Design Laboratory	2
ECE 101	Introduction to Electronic Circuits	5
ECE 101L	Introduction to Electronic Circuits Laboratory	2
ECE 103	Signals and Systems	5
ECE 121	Microcontroller System Design	7
ECE 167	Sensing and Sensor Technologies	5
ECE 167L	Sensing and Sensor Technologies Lab	2

Plus one of the following courses

Either this
course

ECE 104	Bioelectronics	5
---------	----------------	---

or these
courses

ECE 130	Introduction to Optoelectronics and Photonics	5
---------	---	---

ECE 130L	Introduction to Optoelectronics Laboratory	1
----------	--	---

ECE 130/ECE 130L requires PHYS 5B

Graduate Program

The Department of Electrical and Computer Engineering (ECE) at the University of California, Santa Cruz (UCSC) offers master of science (M.S.) and doctor of philosophy (Ph.D.) degree programs and conducts research in the following core areas:

- Electronic Circuits and Energy Systems
- Photonic and Electronic Devices
- Robotics, Control, and Cyber-Physical Systems
- Signals, Image Processing, and Communication Systems

For more information about the core areas and associated graduate courses, the department, and its faculty, please visit the Electrical and Computer Engineering Department website and the respective program statements in the catalog.

ELECTRICAL AND COMPUTER ENGINEERING M.S.

Introduction

The Department of Electrical and Computer Engineering (ECE) at the University of California, Santa Cruz (UCSC) offers master of science (M.S.) and doctor of philosophy (Ph.D.) degree programs and conducts research in the following core areas:

- Electronic Circuits and Energy Systems
- Photonic and Electronic Devices
- Robotics, Control, and Cyber-Physical Systems
- Signals, Image Processing, and Communication Systems

For more information about the core areas and associated graduate courses, the department, and its faculty, please visit the Electrical and Computer Engineering Department website.

Students begin the program with the completion of courses in a core area of interest and then proceed to do research in their area of specialization. The M.S. degree can be completed in one year. M.S. students must complete a master's thesis (Plan I: Thesis), pass the comprehensive examination (Plan II: Comprehensive Examination), or complete a project (Plan II: Project). Part-time study is possible for students working in industry while attending school.

The default track for all admitted students is the comprehensive examination track. Upon enrollment, students are assigned an academic faculty adviser. These advisers will assist in course selection and guidance on program options. Students indicate their core area of study on their admission application. Core areas of study are 1) electronic circuits and energy systems; 2) photonic and electronic devices; 3) robotics, control, and cyber-physical systems; 4) signals, image processing, and communications systems. These core areas determine the broad focus of a student's study (providing depth) while still providing the flexibility needed within the program to allow for breadth and the desire to meet each individual student's goals for study.

At the end of each quarter students will have the opportunity to take the section of the comprehensive examination relevant to the courses offered that quarter that are approved for the core areas. The comprehensive examination will focus on fundamental material related to the subject matter of the course and will be offered, typically, on Friday of final's week. The results of these examination sections, when integrated, will comprehensively test the student's mastery of the curriculum. In order to pass the overall comprehensive examination, a student is required to pass at least three sections of the comprehensive examination in the proposed core area of study. Students may attempt more than one section per quarter.

Requirements

Course Requirements

Thesis Track

Each student is required to take 45 credits, which must consist of:

- At least 15 credits from one of the four core areas defined above.
- At least 20 credits of the total 45 credits must be satisfied through ECE graduate courses*.
- At most 10 credits of independent study (ECE 297, ECE 299) are counted toward the ECE course requirements.
- At most 5 credits of ECE 290 and ECE 291 can be counted toward the ECE course requirements. A combined total of 5 credits from ECE 290 and/or ECE 291 are mandatory.

Total credits required for the M.S. degree is 45.

*The 20 credits of ECE graduate courses can include courses from the core areas only if they are ECE graduate courses. Graduate courses offered by other departments and approved for the core areas are not counted as ECE graduate courses.

Note that each graduate course satisfying the above requirements typically covers 5 credits.

Comprehensive Examination Track

Each student is required to take 45 credits, which must consist of:

- At least 15 credits from one of the four core areas defined above.
- At least 25 credits of the total 45 credits must be satisfied through ECE graduate courses*.
- At most 5 credits of ECE 290 and ECE 291 can be counted toward the ECE course requirements. A combined total of 5 credits from ECE 290 and/or ECE 291 are mandatory.

Total credits required for the M.S. degree is 45.

*The 25 credits of EE graduate courses can include courses from the core areas only if they are ECE graduate courses. Graduate courses offered by other departments and approved for the core areas are not counted as ECE graduate courses.

Note that each graduate course satisfying the above requirements typically covers 5 credits. Independent study credits do not count toward the degree requirements for students in the comprehensive examination track.

Each student in the comprehensive examination track must pass the comprehensive examination. Students may not take the comprehensive exam in the same subject more than twice, and may attempt a maximum of six subjects.

Project Track

Each student is required to take 45 credits, which must consist of:

- At least 15 credits must be satisfied with courses from one of the four core areas defined above.
- At least 25 credits of the total 45 credits must be satisfied through ECE graduate courses*.
- At most 5 credits of independent study (ECE 296, ECE 297, ECE 299) are counted toward the ECE course requirements.
- At most 5 credits of ECE 290 and ECE 291 can be counted toward the ECE course requirements. A combined total of 5 credits from ECE 290 and/or ECE 291 are mandatory.

Total credits required for the M.S. degree is 45.

*The 25 credits of EE graduate courses can include courses from the core areas only if they are ECE graduate courses. Graduate courses offered by other departments and approved for the core areas are not counted as ECE graduate courses.

Note that each graduate course satisfying the above requirements typically covers 5 credits.

Other Requirements

Thesis Track

Completion of a master's thesis is required for the master's degree in this track. To fulfill this requirement, the student submits a written proposal to a faculty member, usually by the third academic quarter. By accepting the proposal, the faculty member becomes the thesis adviser. In consultation with the adviser, the student forms a master's thesis reading committee with at least two additional faculty members, each of whom is provided a copy of the proposal. Upon completion of the thesis work, the student presents an expository talk on the thesis research, and the final thesis must be accepted by the master's thesis reading committee before the award of the master of science degree.

Comprehensive Examination Track

At the end of each quarter students will have the opportunity to take the section of the comprehensive examination relevant to the courses offered that quarter that are approved for the core areas as outlined above. The comprehensive examination will focus on fundamental material related to the subject matter of the course and will be offered, typically, on Friday of final's week. The results of these examination sections, when integrated, will comprehensively test the student's mastery of the curriculum. In order to pass the overall comprehensive examination, a student is required to pass at least three sections of the comprehensive examination in the proposed core area of study. Students may attempt more than one section per quarter.

Note that Plan II: Comprehensive Examination track, is the

default option for all M.S. students. Students can select Plan I: Thesis track, or Plan II: Project, only if they can find a faculty sponsor to supervise the thesis or project.

Project Track

Completion of a project report is required for the master's degree in this track. To fulfill this requirement, the student submits a written proposal to a faculty member, usually by the third academic quarter. By accepting the proposal, the faculty member becomes the project adviser. In consultation with the adviser, the student forms a project reading committee with at least one additional faculty member, each of whom is provided a copy of the proposal. Upon completion of the project, the student submits the report to the project reading committee, and the final project must be accepted by the reading committee before the award of the master of science degree.

Review of Progress

Each year, the faculty reviews the progress of every student. Students not making adequate progress toward completion of degree requirements (see the Graduate Student Handbook for the policy on satisfactory academic progress) are subject to dismissal from the program. Students with academic deficiencies may be required to take additional courses. Full-time students with no academic deficiencies are normally expected to complete the degree course requirements at the rate of at least two courses each quarter. Full-time students must complete all course requirements within two years for the M.S.

Students receiving two or more grades of U (unsatisfactory) or below B- in the School of Engineering courses are not making adequate progress and will be placed on academic probation for the following three quarters of registered enrollment. Withdrawing or taking a leave of absence does not count as enrollment. Part-time enrollment is counted as a half-quarter of enrollment.

If an electrical and computer engineering graduate student fails a School of Engineering course while on probation, the Electrical and Computer Engineering Department may request the graduate dean to dismiss that student from the graduate program. If after being removed from probation, the student again fails a School of Engineering course, he or she will return immediately to academic probation.

Graduate students experiencing circumstances or difficulties that impact their academic performance should contact their adviser and the graduate director immediately. Students may appeal their dismissal to the graduate committee.

Applying for Graduation

ELECTRICAL AND COMPUTER ENGINEERING PH.D.

Introduction

The Department of Electrical and Computer Engineering (ECE) at the University of California, Santa Cruz (UCSC)

offers master of science (M.S.) and doctor of philosophy (Ph.D.) degree programs and conducts research in the following core areas:

- Electronic Circuits and Energy Systems
- Photonic and Electronic Devices
- Robotics, Control, and Cyber-Physical Systems
- Signals, Image Processing, and Communication Systems

For more information about the core areas and associated graduate courses, the department, and its faculty, please visit the Electrical and Computer Engineering Department website.

Students begin the program with the completion of courses in a core area of interest and then proceed to do research in their area of specialization. Ph.D. students are required to take a preliminary exam within their first two years of study. After completing the course requirements, students must pass an oral qualifying exam and write a dissertation. Part-time study is possible for students working in industry while attending school.

Advancement to Candidacy

Course Requirements

Each student is required to take 55 credits which must consist of:

- At least 20 credits in one of the four core areas defined above.
- At least 30 of the total 55 credits must be satisfied through ECE graduate courses.
- At most 10 credits of independent study (ECE 297, ECE 299) will be counted toward ECE course requirements.
- A combined total of 5 credits from ECE 290 and/or ECE 291 are mandatory, but no more than 5 credits from these two courses can be counted toward degree requirements.

Total credits required for the Ph.D. degree is 55.

The 30 credits of ECE graduate courses can include courses from the core areas only if they are ECE graduate courses. Graduate courses offered by other departments and approved for the core areas are not counted as ECE graduate courses.

* For students already holding a Master of Science in Electrical Engineering (M.S.E.E.) or equivalent degree, at most 20 credits of transfer credit may be granted for equivalent coursework performed at the students' M.S. granting institution. Credit transfer is subject to approval by the instructor of the equivalent UCSC course and the electrical and computer engineering graduate director.

Foreign Language Requirements

Teaching Requirements

Pre-Qualifying Requirements

Preliminary Examination

At the end of the first year (i.e., no later than the fall quarter in the following year after their entry), students admitted to the Ph.D. program must satisfy the requirements of the preliminary examination to continue in the Ph.D. program. This examination is as follows:

- Pass the comprehensive exam for the M.S. program in one of the core areas
- Pass one additional section of the M.S. comprehensive examination from a different core area of the comprehensive examination.

Qualifying Examination

This oral examination is a defense of the student's thesis prospectus and a test of the student's knowledge in advanced technical areas of relevance to the dissertation topic. This oral examination consists of a seminar-style talk before the examining committee, where the student describes the thesis prospectus, followed by questions from the committee on the substance of the talk and the areas of presumed expertise of the student. The examination, taken typically in the third year of Ph.D. study, is administered by a Ph.D. qualifying examination committee, consisting of at least four examiners. The composition of the committee must be approved by the graduate director and the dean of graduate studies whereupon the student and the committee are notified.

If the student does not pass the qualifying examination, the student may be asked to complete additional coursework, or other research-related work, before retaking the examination. The student may be allowed to retake the qualifying examination once, and the composition of the examining committee will remain the same for the second try. Students who fail the qualifying examination twice may be dismissed from the Ph.D. program.

Ph.D. students who have not advanced to candidacy by the end of the third year may be recommended for academic probation.

Post-Qualifying Requirements

Advancement to candidacy requires that the student:

- pass the preliminary examination;
- complete all course requirements prior to taking the qualifying examination;
- clear all Incompletes from the student's record;
- pass the qualifying examination; and
- have an appointed Ph.D. dissertation reading committee.

Transfer Credit

For students already holding an M.S.E.E. or equivalent degree, at most 20 credits of transfer credit may be granted for equivalent coursework performed at the student's M.S. granting institution. Credit transfer is subject to approval of the instructor of the equivalent UCSC course and the ECE graduate director.

Non-Terminal Master's Degree

Students not already holding an M.S.E.E. degree, who are studying for the Ph.D. degree, may apply to be granted a M.S. degree when they have fulfilled all the M.S. degree requirements (including submission of an M.S. thesis or project, or passing the comprehensive examination).

Materials Fee

Please see the section on fees under School of Engineering.

Dissertation

Dissertation

After advancement to candidacy, work on the dissertation research progresses until the dissertation is completed. The Ph.D. dissertation must show the results of in-depth research, be an original contribution of significant knowledge to the student's field of study, and include material worthy of publication. The student is strongly advised to submit research work for publication in advance of completing the dissertation so that the latter requirement is clearly satisfied. The Ph.D. dissertation results are presented in both oral and written forms, the oral form being a dissertation defense (see below) and the written form being the Ph.D. dissertation. The student must submit his or her written Ph.D. dissertation to the dissertation reading committee at least one month before the defense.

Dissertation Defense

Each Ph.D. candidate submits the completed dissertation to a Ph.D. dissertation reading committee at least one month prior to the dissertation defense. The appointment of the dissertation reading committee is made immediately after the qualifying examination and is necessary for advancing to candidacy. The candidate presents his or her research results in a public seminar sponsored by the dissertation supervisor. The seminar is followed by a defense of the dissertation to the reading committee (only), who will then decide whether the dissertation is acceptable or requires revision. Successful completion of the dissertation fulfills the final academic requirement for the Ph.D. degree.

Academic Progress

Each year, the faculty reviews the progress of every student. Students not making adequate progress toward completion of degree requirements (see the Graduate Student Handbook for the policy on satisfactory academic progress) are subject to dismissal from the program. Students with academic deficiencies may be required to take additional courses. Full-time students with no academic deficiencies are normally

expected to complete the degree course requirements at the rate of at least two courses each quarter. Full-time students must complete all course requirements within two years for the M.S. and three years for the Ph.D.

Students receiving two or more grades of U (unsatisfactory) or below B- in the School of Engineering courses are not making adequate progress and will be placed on academic probation for the following three quarters of registered enrollment. Withdrawing or taking a leave of absence does not count as enrollment. Part-time enrollment is counted as a half-quarter of enrollment.

If an electrical and computer engineering graduate student fails a School of Engineering course while on probation, the Electrical and Computer Engineering Department may request the graduate dean to dismiss that student from the graduate program. If after being removed from probation, the student again fails a School of Engineering course, he or she will return immediately to academic probation.

Graduate students experiencing circumstances or difficulties that impact their academic performance should contact their adviser and the graduate director immediately. Students may appeal their dismissal to the graduate committee.

Applying for Graduation

ROBOTICS AND CONTROL DESIGNATED EMPHASIS

Introduction

The graduate designated emphasis (DE) leading to the degree notation “with an emphasis in Robotics and Control” is a collaboration of faculty from several Baskin School of Engineering programs and is administered by the Department of Electrical and Computer Engineering. Students wishing to complete a master’s thesis or doctoral dissertation in this area must satisfy the degree requirements of a primary program as well as of the DE. The DE is most suitable for students pursuing degrees in Applied Mathematics, Electrical and Computer Engineering, and Statistics, but students from any area may work in this interdisciplinary field so long as they meet all requirements, including progress, within the primary degree program. A current list of the robotics and control faculty and electives is available at the Electrical and Computer Engineering website.

Requirements

Committee Composition and Departmental Approvals

The student’s M.S. project or Ph.D. qualifying exam, or Ph.D. committee must include one member of the robotics and control faculty.

Course Requirements

The student must complete four five-credit graduate courses and several two-credit seminar courses. All students must complete ECE 241, Introduction to Feedback Control

Systems, and three 5-credit robotics and control graduate electives.

Master’s students must complete two offerings of ECE 280C, Seminar in Control (2 credits).

Doctoral students must complete four offerings of ECE 280C.

ECE 241	Introduction to Feedback Control Systems	5
ECE 280C	Seminar on Control	2

Writing, Research and/or Teaching Requirements

The student’s dissertation or thesis must include a significant section (chapter) related to robotics and control, with content suitable for a conference or journal article. Students pursuing the M.S. project track must complete a project report related to robotics and control, with content suitable for a conference or journal article.

Proficiency Requirements

All students must demonstrate an understanding of Human-Language Media and Modeling (HLMM), through prior work and the completion of a set of HLMM electives or courses.

Academic Progress

Statistics

Baskin School of Engineering
(831) 459-2158
<https://www.soe.ucsc.edu>

PROGRAMS OFFERED

Statistics Minor (p. 445)

Statistical Science M.S. (p. 447)

Statistical Science Ph.D. (p. 449)

Statistics Designated Emphasis (D.E.) (p. 452)

Statistics is a discipline devoted to the use of mathematical methods and reasoning to solve real-world problems of a scientific or decision-making nature in a wide variety of subjects, principally (but not exclusively) in engineering, medicine, the physical and biological sciences, and the social sciences. Statistics, construed broadly, is the study of uncertainty: how to measure it (using ideas and methods in probability theory), and what to do about it (using concepts from statistical inference and decision theory).

The Statistics Department at UC Santa Cruz offers M.S. and Ph.D. programs in statistical science. The goal of these programs is to help students develop into independent scholars who are prepared for productive careers in research, teaching, and industry. The department also offers a designated emphasis in statistics and a minor in statistics.

Additional information on these programs can be found on the department website.

Undergraduate Program

STATISTICS MINOR

The statistics minor is available for students who wish to gain a quantitative understanding of how to (a) measure uncertainty and (b) make good decisions on the basis of incomplete or imperfect information, and to apply these skills to their interests in another field. This minor could also be combined with a major in mathematics as preparation for a graduate degree in statistics or biostatistics.

Course Requirements

Lower-Division Courses

Basic calculus sequence

Either these courses

AM 11A	Mathematical Methods for Economists I	5
AM 11B	Mathematical Methods for Economists II	5

or these

courses		
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
or these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
or these courses		
MATH 20A	Honors Calculus	5
MATH 20B	Honors Calculus	5

Plus one course from each of the following four categories

Statistical concepts

Either this course

STAT 5	Statistics	5
or these courses		
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Computer Programming

Either this course

BME 160	Research Programming in the Life Sciences	6
or one of these courses		
CSE 20	Beginning Programming in Python	5
CSE 30	Programming Abstractions: Python	7
ASTR 119	Introduction to Scientific Computing	5

Linear Algebra

One of the following courses:

AM 10	Mathematical Methods for Engineers I	5
MATH 21	Linear Algebra	5

It is recommended that students also take AM 20 or MATH 24.

Multivariate Calculus

Either this course

MATH 22	Introduction to Calculus of Several Variables	5
or this course		
AM 30	Multivariate Calculus for Engineers	5

or these

courses		
MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5

Upper-Division Courses

One course from the following three categories:

Probability

One of the following courses:

STAT 131	Introduction to Probability Theory	5
STAT 203	Introduction to Probability Theory	5
CSE 107	Probability and Statistics for Engineers	5

Statistical Inference

STAT 132	Classical and Bayesian Inference	5
----------	----------------------------------	---

Computational Methods

AM 147	Computational Methods and Applications	5
--------	--	---

Plus two electives from the following list of courses

STAT 108	Linear Regression	5
STAT 204	Introduction to Statistical Data Analysis	5
STAT 206	Applied Bayesian Statistics	5
STAT 207	Intermediate Bayesian Statistical Modeling	5
STAT 208	Linear Statistical Models	5
BME 205	Bioinformatics Models and Algorithms	5
ECE 145	Estimation and Introduction to Control of Stochastic Processes	5
CSE 142	Machine Learning	5
ECON 104	Is There Truth in Numbers: The Role of Statistics in Economics	5
ECON 113	Introduction to Econometrics	5
ECON 114	Advanced Quantitative Methods	5
ECON 120	Development Economics	5
ECON 161B	Marketing Research	5
ECON 190	Senior Proseminar	5
MATH 105A	Real Analysis	5
MATH 105B	Real Analysis	5
MATH 114	Introduction to Financial Mathematics	5
PSYC 181	Psychological Data Analysis	5

Note: Students planning graduate work in statistics are recommended to choose MATH 23A and MATH 23B, STAT 204, STAT 205, and MATH 105A and Math 105B.

Contiguous Bachelor's/Master's Pathway

The Department of Statistics offers a Statistical Science Bachelor's/Master's pathway. Undergraduate students with majors in computer science, economics, mathematics, and physics can apply to the pathway in order to earn a B.S. degree in their own major together with an M.S. degree in Statistical Science. Depending on the student's progress, the B.S./M.S. pathway can be completed in five years.

ADMISSION PROCESS TO THE CONTIGUOUS PATHWAY

Students must declare their interest in pursuing the B.S./M.S. contiguous pathway no later than their ninth quarter of study at UCSC, and more typically at the end of the sixth or seventh quarter of enrollment. All students who apply to the pathway will be admitted into it, provided they satisfy the requirements. However, approval of an undergraduate student into a five-year bachelor's/master's path does not automatically guarantee admission into the one-year master's program. Students apply for admission into the M.S. program during their senior year using the same procedure and timeline as all other applicants to the program, and they will be considered for the M.S. program along with regular applicants. In addition to all other criteria used to evaluate M.S. applicants, students in the pathway will not be admitted into the M.S. program unless they achieve a grade of at least A- in both STAT 131 and STAT 132. This will be made clear to students admitted into the pathway, as early as possible.

DESCRIPTION OF REQUIREMENTS

Basic requirements: Students pursuing the contiguous pathway are expected to have a strong quantitative background. At the time they apply to the pathways they will be expected to have completed the following coursework:

- Univariate Calculus: MATH 19A + MATH 19B or MATH 20A + MATH 20B
- Multivariate Calculus: MATH 22, or AM 30, or MATH 23A + MATH 23B
- Linear algebra: AM 10 or MATH 21 or PHYS 116A
- Introductory statistics: STAT 5 or STAT 7 or PHYS 133
- Programming: CSE 20 or higher level programming course; or equivalent

To be admitted into the contiguous pathway, students must have completed this series of courses with an average GPA of 3.0 or above.

Advanced requirements: During their junior year (or before, if appropriate), students in the pathway will be expected to take two courses:

- Calculus-based probability: STAT 131
- Introduction to statistical inference: STAT 132

Students must obtain a grade no lower than A- in both courses to remain eligible for the pathway. A grade of A- or higher in STAT 131 will waive the M.S. requirement of taking STAT 203 (Introduction to Probability Theory). Instead of STAT 203, students in the pathway will need to take an additional elective course to satisfy the credit requirements for the M.S. program (see sample plan below).

Students who pass STAT 131 and STAT 132 with a grade of C or higher but lower than A-, although not eligible to continue in the contiguous pathway to the MS, will still have the opportunity to complete a minor in statistics.

Senior year coursework: Students apply for admission into the M.S. program during their senior year using the same procedure and timeline as all other applicants to the program. In addition, during the senior year, students in the pathway will be required to take three graduate-level courses:

- Introduction to Statistical Data Analysis: STAT 204
- Applied Bayesian Statistics: STAT 206
- Intermediate Bayesian Statistical Modeling: STAT 207

Note that all three courses satisfy requirements for the Statistical Science M.S. program and therefore cannot be counted as part of the minimum 40 credits of upper division courses required by the undergraduate major.

Students who are accepted into the M.S. program but fail any of the three senior-year graduate courses will revert to the regular two-year M.S. timeline and will be allowed to retake them.

M.S. year coursework and capstone: Students will complete the remaining required courses (STAT 200, STAT 280B, STAT 205 and STAT 208) and electives (three, one of them in lieu of 203) for the M.S. program, as well as their capstone project, during their fifth year in the program. A student enrolled in the 4+1 contiguous program will complete a total of 45 credits in classroom courses, just like students in the standard M.S. program, with 15 of those credits having been completed as part of their undergraduate degree.

If for any reason a student cannot complete the M.S. requirements during their fifth year, they will revert to the standard M.S. timeline.

SAMPLE UPPER-

DIVISION AND M.S. COURSEWORK BY YEAR

STAT 131 and STAT 132 are requirements to qualify for the program, but do not satisfy any M.S. requirement (except, in the case of STAT 131, waiving the requirement of taking STAT 203). An M.S. elective is required in lieu of STAT 203.

	Fall	Winter	Spring
Jr	STAT 131	STAT 132

Graduate Program

STATISTICAL SCIENCE M.S.

Introduction

Students in the statistical science program learn to develop and use statistical methods to provide a probabilistic assessment of the variability in different data structures. This knowledge is applied to the quantification of the uncertainties inherent in the discoveries, summaries and conclusions that are drawn from the data analysis. The Statistical Science M.S. places emphasis on the application of statistical methods to the solution of relevant scientific, technological and engineering problems, with the goal of preparing students for professional careers

Students will obtain an M.S. in statistical science. More specifically, students will develop background on statistical theory, methods, and computing through the program coursework, with emphasis on novel methods and applications.

Undergraduate preparation for admission

We will accept students with undergraduate degrees in fields that include computer science, engineering, mathematics, natural sciences, physics, and statistics, subject to appropriate course requirements in statistics and mathematics.

Undergraduate preparation in mathematics and statistics should include: single variable and multivariate differential and integral calculus (UC Santa Cruz equivalent AM 11A, AM 11B or MATH 19A, MATH 19B, and MATH 23A, MATH 23B); linear algebra (UCSC equivalent AM 10 or MATH 21); introductory statistics (UCSC equivalent STAT 5 or STAT 7); and introductory calculus-based probability and statistical inference (UCSC equivalent STAT 131 and STAT 132).

Relationship of M.S. and Ph.D. programs

The M.S. and Ph.D. programs are freestanding and independent, so that students can be admitted to either. Students completing the M.S. program may proceed into the Ph.D. program upon successful completion of the pre-qualifying examination, and application to the graduate committee and acceptance. Students in the Ph.D. program have the option of receiving the M.S. degree upon completion of the M.S. program requirements, including the capstone research project. Ph.D. core courses STAT 205B and STAT 206B can be used in place of STAT 205 and STAT 206, respectively, to fulfill the M.S. degree course requirements.

Requirements

Course Requirements

Eight core courses

M.S. students must complete eight core courses: six 5-credit courses listed below; a 3-credit course on research and teaching (STAT 200); and a 2-credit research seminar (STAT 280B). M.S. students must complete two additional 5-credit courses from the approved list of elective courses, bringing the total non-seminar credit requirement to 43 credits. None of the additional elective courses required to satisfy the unit requirements for the M.S. program can be substituted by independent study courses (M.S. Project, Independent Study/Research, or Thesis Research).

Students in the M.S. program must take the following eight core courses:

STAT 200	Research and Teaching in Statistics	3
STAT 203	Introduction to Probability	5

	Theory	
STAT 204	Introduction to Statistical Data Analysis	5
STAT 205	Introduction to Classical Statistical Learning	5
STAT 206	Applied Bayesian Statistics	5
STAT 207	Intermediate Bayesian Statistical Modeling	5
STAT 208	Linear Statistical Models	5
STAT 280B	Seminars in Statistics	2

5-credit core courses

All core courses are 5-credit courses, except for STAT 200 and STAT 280B. STAT 200 is a 3-credit course which covers basic teaching techniques for teaching assistants, and examines research and professional training items, as well as ethical issues relating to research in science and engineering. STAT 280B is a 2-credit seminar course, which involves attending the Statistics Department colloquia and participating in the discussion session after the seminar presentation. The strict requirement for STAT 280B is for students to take it once in their first year in the program. However, students are strongly recommended to take STAT 280B each quarter throughout their graduate studies.

All core courses must be taken for a letter grade (except for STAT 200 and STAT 280B, which are given on a satisfactory/unsatisfactory basis). In order to maintain a full load for graduate standing after their first year, students take additional courses, including independent study courses, from the approved list of elective courses, appropriate to their research interests and selected in consultation with their advisers.

Electives available to MS students include:		
STAT 202	Linear Models in SAS	5
STAT 209	Generalized Linear Models	5
STAT 222	Bayesian Nonparametric Methods	5
STAT 223	Time Series Analysis	5
STAT 224	Bayesian Survival Analysis and Clinical Design	5
STAT 225	Multivariate Statistical Methods	5
STAT 226	Spatial Statistics	5
STAT 229	Advanced Bayesian Computation	5

ECON 211A	Advanced Econometrics I	5
ECON 211B	Advanced Econometrics II	5
ENVS 215A	Geographic Information Systems and Environmental Applications	5
ENVS 215L	Exercises in Geographic Information Systems	2

ENVS 215L is the concurrent lab to ENVS 215A. The lecture/lab combination counts as one course.

Other Requirements

For the M.S. degree, students conduct a capstone research project in their second year (up to three quarters), and in the spring of that year participate in a seminar in which results from their project are presented. Examples of capstone research projects include: review and synthesis of the literature on a topical area of statistical science; application and comparison of different models and/or computational techniques from a particular area of study in statistics; comprehensive analysis of a data set from a particular application area.

Students must submit a proposal to the potential faculty sponsor no later than the end of the fourth academic quarter. If the proposal is accepted, the faculty member becomes the sponsor and supervises the research and writing of the project. When the project is completed and written, it must be submitted to and accepted by a committee of two individuals, consisting of the faculty adviser and one additional reader. The additional reader will be chosen appropriately from within the graduate program faculty or outside of it. Either the adviser or the additional reader must be from within the graduate program faculty.

Normative Time to Degree

The normative time to the M.S. degree (for students enrolled full-time) is two academic years.

Review of Progress

Students will be admitted to the M.S. program, not to the research group of any individual faculty member. However, each student will be matched with a first-year mentor, to ensure that adequate guidance is provided in the crucial first year of graduate school. In the second year, the role of the mentor will be played by the M.S. project adviser. Faculty advisers will be responsible for charting the progress of their students on a regular basis, and for making necessary adjustments to their plan of study and research.

The graduate program faculty will meet in the spring quarter of each academic year to review the performance of all students in the program. Based on the results from the faculty

review, a written report will be provided to each student with an assessment of her/his performance and description of specific program objectives for the following academic year.

Transfer Credit

Up to three School of Engineering courses fulfilling the degree requirements of the M.S. degree may be taken before beginning the graduate program through the concurrent enrollment program. Courses from other institutions may not be applied to the M.S. degree course requirements.

Students who complete the M.S. degree in statistical science and continue onto the Ph.D. program in statistical science can transfer all applicable courses taken during the M.S. to the Ph.D. program, provided that such students meet the minimum residency requirement for Ph.D. programs at UC Santa Cruz, as specified by the UCSC Graduate Division.

Applying for Graduation

All candidates for a degree must submit an Application for Master's Degree to the Graduate Student Affairs office by the date stated in the Academic and Administrative Calendar for the quarter they wish to receive the degree. The deadline for degree applications is typically in the second week of the quarter.

STATISTICAL SCIENCE PH.D.

Introduction

Students in the statistical science program learn to develop and use statistical methods to provide a probabilistic assessment of the variability in different data structures. This knowledge is applied to the quantification of the uncertainties inherent in the discoveries, summaries and conclusions that are drawn from the data analysis. The Ph.D. program provides mastery of fundamental concepts in statistical theory and methods, as well as analytical and computational skills to build modern statistical models, implement them, and effectively communicate their results. Through the process of learning these skills, the students develop the ability to conduct independent research.

Students will obtain a Ph.D. in statistical science. More specifically, students will develop background on statistical theory, methods, and computing through the program coursework, with research emphasis on novel methods and applications.

Undergraduate preparation for admission

We will accept students with undergraduate degrees in fields that include computer science, engineering, mathematics, natural sciences, physics, and statistics, subject to appropriate

course requirements in statistics and mathematics. Undergraduate preparation in mathematics and statistics should include: single variable and multivariate differential and integral calculus (UC Santa Cruz equivalent AM 11A, AM 11B or MATH 19A, MATH 19B, and MATH 23A, MATH 23B); linear algebra (UCSC equivalent AM 10 or MATH 21); introductory statistics (UCSC equivalent STAT 5 or STAT 7); and introductory calculus-based probability and statistical inference (UCSC equivalent STAT 131 and STAT 132).

Relationship of M.S. and Ph.D. programs

The M.S. and Ph.D. programs are freestanding and independent, so that students can be admitted to either. Students completing the M.S. program may proceed into the Ph.D. program upon successful completion of the pre-qualifying examination, and application to the graduate committee and acceptance. Students in the Ph.D. program have the option of receiving the M.S. degree upon completion of the M.S. program requirements, including the capstone research project. Ph.D. core courses STAT 205B and STAT 206B can be used in place of STAT 205 and STAT 206, respectively, to fulfill the M.S. degree course requirements.

Advancement to Candidacy

Course Requirements

Nine core courses

Ph.D. students must complete nine core courses: seven 5-credit courses listed below; a 3-credit course on research and teaching (STAT 200); and a 2-credit research seminar (STAT 280B). Ph.D. students must complete four additional 5-credit courses from the approved list of elective courses, bringing the total non-seminar credit requirements to 58 credits. None of the additional elective courses required to satisfy the credit requirements for the Ph.D. program can be substituted by independent study courses (Independent Study/Research or Thesis Research).

Students in the Ph.D. program must take the following nine core courses:

STAT 200	Research and Teaching in Statistics	3
STAT 203	Introduction to Probability Theory	5
STAT 204	Introduction to Statistical Data Analysis	5
STAT 205B	Intermediate Classical Inference	5
STAT 206B	Intermediate Bayesian Inference	5
STAT 207	Intermediate Bayesian Statistical Modeling	5
STAT 208	Linear Statistical Models	5
STAT 209	Generalized Linear Models	5

STAT 280B	Seminars in Statistics	2
-----------	------------------------	---

5-credit core courses

All core courses are 5-credit courses, except for STAT 200 and STAT 280B. STAT 200 is a 3-credit course which covers basic teaching techniques for teaching assistants, and examines research and professional training items, as well as ethical issues relating to research in science and engineering. STAT 280B is a 2-credit seminar course, which involves attending the Statistics Department colloquia and participating in the discussion session after the seminar presentation. The strict requirement for STAT 280B is for students to take it once in their first year in the program. However, students are strongly recommended to take STAT 280B each quarter throughout their graduate studies.

All core courses must be taken for a letter grade (except for STAT 200 and STAT 280B, which are given on a satisfactory/unsatisfactory basis). In order to maintain a full load for graduate standing after their first year, students take additional courses, including independent study courses, from the approved list of elective courses, appropriate to their research interests and selected in consultation with their advisers.

Electives available to PhD students include:

STAT 202	Linear Models in SAS	5
STAT 209	Generalized Linear Models	5
STAT 222	Bayesian Nonparametric Methods	5
STAT 223	Time Series Analysis	5
STAT 224	Bayesian Survival Analysis and Clinical Design	5
STAT 225	Multivariate Statistical Methods	5
STAT 226	Spatial Statistics	5
STAT 229	Advanced Bayesian Computation	5
STAT 243	Stochastic Processes	5
STAT 244	Bayesian Decision Theory	5
STAT 246	Probability Theory with Markov Chains	5
AM 216	Stochastic Differential Equations	5
AM 230	Numerical Optimization	5
AM 250	An Introduction to High Performance Computing	5
CSE 242	Machine Learning	5
CSE 243	Data Mining	5
CSE 249	Large-Scale Web Analytics and Machine Learning	5
CSE 272	Information Retrieval	5
CSE 277	Random Process Models in Engineering	5
ECE 253	Introduction to Information Theory	5
ECE 256	Statistical Signal Processing	5
ECON 211A	Advanced Econometrics I	5
ECON 211B	Advanced Econometrics II	5
ENVS 215A	Geographic Information Systems and Environmental	5

ENVS 215L	Applications Exercises in Geographic Information Systems	2
MATH 204	Analysis I	5
MATH 205	Analysis II	5
MATH 208	Manifolds I	5

ENVS 215L is the concurrent lab to ENVS 215A. The lecture/lab combination counts as one course.

Foreign Language Requirements

Teaching Requirements

Ph.D. students are required to serve as teaching assistants for at least one quarter during their graduate study. Certain exceptions may be permitted for those with extensive prior teaching experience, for those who are not allowed to be employed due to visa regulations, or for other reasons approved by the director of graduate studies.

Pre-Qualifying Requirements

At the end of the first year, Ph.D. students take a pre-qualifying examination covering six 5-credit core courses: STAT 203, STAT 204, STAT 205B, STAT 206B, STAT 207 and STAT 208. This examination comprises two parts: an in-class written examination, followed by a take-home project involving data analysis. Students who do not pass this examination can retake it before the start of the following fall quarter; if they fail the second examination they are dismissed from the Ph.D. program, but have the option to continue in the M.S. program.

Qualifying Examination

Ph.D. students must complete the qualifying examination (advancement to candidacy) requirement by the end of the spring quarter of their third year. Ph.D. students must select a research adviser by the end of their second year in the program. A written dissertation proposal must be submitted to the adviser, and filed with the Graduate Student Affairs Office. A qualifying examination committee will be formed, consisting of the adviser and at least three additional members, approved by the director of graduate studies and the dean of the Graduate Division. The following conditions must be met for the examination committee:

1. The chair of the qualifying examination committee must be a tenured faculty from within the graduate program faculty. The committee chair can not be the student's adviser or one of her/his co-advisers.
2. For students with a single adviser, or two co-advisers one of which is from outside the graduate program faculty, the committee must include at least two members from within the graduate program faculty other than the adviser or co-adviser. For students with two co-advisers that are both members of the graduate program faculty, the committee must include at least one additional member from within the graduate program faculty.

3. The committee must include at least one member from outside the graduate program faculty, for which the Senate Regulations for committee membership apply. The outside member can be the student's adviser or co-adviser.

The student submits the written dissertation proposal to all members of the committee no less than one month in advance of the qualifying examination. The dissertation proposal is formally presented in a public oral qualifying examination with the committee, followed by a private examination. Students will advance to candidacy after they have completed all course requirements (including removal of any incompletes), passed the qualifying examination, nominated a dissertation reading committee, and paid the advancement to candidacy fee. Under normal progress, a student will advance to candidacy by the end of the spring quarter of her/his third year. A student who has not advanced to candidacy by the start of the fourth year will be subject to academic probation.

Post-Qualifying Requirements

Dissertation

Dissertation

Upon advancement to candidacy, a dissertation reading committee is formed, consisting of the dissertation adviser (co-advisers) who serve as the chair (co-chairs) of the committee, and at least two additional readers. Therefore, the minimum number of dissertation reading committee members is three (four) for students with a single adviser (two co-advisers). For students with a single adviser, or two co-advisers one of which is from outside the graduate program faculty, the committee must include at least two additional readers from within the graduate program faculty. For students with two co-advisers that are both members of the graduate program faculty, the committee must include at least one additional reader from within the graduate program faculty. The committee is subject to the approval of the graduate director and of the Graduate Division. The Ph.D. dissertation should consist of a minimum of three chapters composed of material suitable for publication in major professional journals in statistics and journals in relevant scientific fields where the statistical methodology is applied.

Dissertation Defense

The completed dissertation must be submitted to the reading committee at least one month before the dissertation defense, which consists of a public presentation of the research followed by a private examination by the reading committee. Successful completion of the dissertation defense is the final requirement for the Ph.D. degree.

Academic Progress

Students will be admitted to the Ph.D. program, not to the research group of any individual faculty member. However, each student will be matched with a first-year mentor, to ensure that adequate guidance is provided in the crucial first year of graduate school. In later years, the role of the mentor will be played by the Ph.D. dissertation adviser. Faculty

advisers will be responsible for charting the progress of their students on a regular basis, and for making necessary adjustments to their plan of study and research.

The graduate program faculty will meet in the spring quarter of each academic year to review the performance of all students in the program. Based on the results from the faculty review, a written report will be provided to each student with an assessment of her/his performance and description of specific program objectives for the following academic year.

The normative pre-candidacy period for Ph.D. students (enrolled full-time) is three years and the normative candidacy period is two years, for a total of five years to the Ph.D. degree.

Transfer Credit

Up to three School of Engineering courses fulfilling the degree requirements of the Ph.D. degree may be taken before beginning the graduate program through the concurrent enrollment program. Ph.D. students who have previously earned a M.S. degree in a related field at another institution may substitute courses from their previous university with approval of the adviser and the graduate committee. Petitions should be submitted along with the transcript from the other institution or UC Santa Cruz Extension. For courses taken at other institutions, copies of the syllabi, examinations, and other course work should accompany the petition. Such petitions are not considered until the completion of at least one quarter at UCSC. At most, a total of three courses may be transferred from concurrent enrollment and other institutions.

Applying for Graduation

All candidates for a degree must submit an Application for Doctor of Philosophy Degree to the Graduate Student Affairs office by the date stated in the Academic and Administrative Calendar for the quarter they wish to receive the degree. The deadline for degree applications is typically in the second week of the quarter.

STATISTICS DESIGNATED EMPHASIS

Introduction

Students from a Ph.D. degree program, other than statistical science, who meet the following requirements can have the designated emphasis of "statistics" annotated to their degree title. For example, a Ph.D. student in electrical engineering who meets the requirements would receive a diploma that reads "Ph.D. Electrical Engineering with an emphasis in (Statistics)."

Requirements

Committee Composition and Departmental Approvals

Upon electing to pursue a designated emphasis (DE) in statistics, students must choose a DE faculty adviser in the Statistics Department. A list of eligible DE advisers is

maintained online. The student must organize a preliminary meeting with the DE adviser, and agree on a plan for completion of the requirements. Once this plan has been designated, the student and the DE adviser must complete the Application for a Designated Emphasis in Statistics form. The completed application form should be signed by the student's home department adviser, the DE adviser, and the statistics graduate director, and then filed with the BSOE Graduate Student Affairs Office (bsoe-ga@rt.ucsc.edu). This should be done before the student's advancement to candidacy (for Ph.D. students).

Course Requirements

Both these courses

STAT 203	Introduction to Probability Theory	5
STAT 207	Intermediate Bayesian Statistical Modeling	5

Plus one of these courses

STAT 206	Applied Bayesian Statistics	5
STAT 206B	Intermediate Bayesian Inference	5

Plus one other statistics course from the following list of approved courses

STAT 204	Introduction to Statistical Data Analysis	5
STAT 205	Introduction to Classical Statistical Learning	5
STAT 205B	Intermediate Classical Inference	5
STAT 208	Linear Statistical Models	5
STAT 209	Generalized Linear Models	5
STAT 222	Bayesian Nonparametric Methods	5
STAT 223	Time Series Analysis	5
STAT 225	Multivariate Statistical Methods	5
STAT 226	Spatial Statistics	5
STAT 229	Advanced Bayesian Computation	5
STAT 243	Stochastic Processes	5
STAT 244	Bayesian Decision Theory	5
STAT 246	Probability Theory with Markov Chains	5
STAT 291	Advanced Topics in Bayesian Statistics	3

Either STAT 205 or STAT 205B

Writing, Research and/or Teaching Requirements

SOCIAL SCIENCES DIVISION

460 Humanities and Social Sciences Building
(831) 459-3212
<http://socialsciences.ucsc.edu/>

The Division of Social Sciences focuses on the study of human relationships and society. As global economic and political changes transform the world around us, social scientists help us meet the challenges and opportunities of the 21st century.

Our eight departments offer more than 30 undergraduate and graduate degree programs, including many that are interdisciplinary collaborations. Our faculty members conduct leading-edge research in their fields, frequently working with students in research clusters linking departments to our research centers. We also offer extensive opportunities for experiential learning through field studies.

Our research, teaching, and state-of-the-art facilities provide students with a comprehensive and rigorous education that prepares them for productive careers and further academic pursuits. For more information on the division, see our website.

Anthropology

361 Social Sciences 1 Building
(831) 459- 3320
<https://anthro.ucsc.edu/>

PROGRAMS OFFERED

Anthropology B.A. (p. 454)

Anthropology Minor (p. 459)

Anthropology Ph.D. (p. 460)

Anthropology Designated Emphasis (p. 463)

OTHER PROGRAMS OF INTEREST

Earth Sciences/Anthropology B.A. (p. 241)

Anthropology is the study of people throughout the world and through time. Because it covers a wide range of topics—biological evolution, material remains of the past, and the world that humans create through their ideas and practices in present-day societies—anthropology is an especially integrative discipline. The anthropology program at UC Santa Cruz offers courses that reflect the diversity of the field.

- Cultural anthropology explores the everyday lives, beliefs, activities, and movements of people, objects, and ideas in diverse societies. Cultural anthropology courses examine such topics as race and ethnicity, medicine, health, science, gender, sexuality, environment, religion, law, popular culture, politics, economics, and institutions.
- Archaeology uses the material evidence of human activities to understand past human lives. Archaeology at UCSC focuses on past people's interactions with one another at the local level and within their wider social and ecological contexts. Faculty research areas include the pre-colonial and early post-colonial history of Africa, Mesoamerica, the Caribbean, and western North America.
- Biological anthropology traces the human journey from its beginnings in Africa over five million years ago. Biological anthropology courses look at fossil evidence, evolutionary theory, human variation, and the behavior of primate relatives in order to analyze biological, social, and cultural changes over time. Biological anthropology at UCSC has a methodological emphasis in innovative approaches to human and non-human primate ecology and diversity founded on our expertise in genomics, isotope biochemistry, as well as human osteology.

UCSC students have the opportunity to do independent library and field research in cultural anthropology, archaeology, and biological anthropology. Laboratory courses in archaeology and biological anthropology offer practical experience in the analysis of biological and cultural materials. In cultural anthropology courses, students learn to carry out anthropological research through interviews, participant observation, surveys, the collection of oral histories, analysis of textual, visual, and aural materials, and the interpretation of archival materials.

Because anthropology is concerned with understanding human interaction, it is a useful major for anyone planning a career that involves working with people, especially those from diverse cultures. Some UCSC anthropology graduates are in social work, many are in teaching, and others pursue careers in law, city planning, politics, medicine, public health, cultural resource management, and journalism. Students intending to specialize in anthropology usually go on to graduate school because professional employment in the field almost always demands an advanced degree.

A combined major in Anthropology and Earth and Planetary Sciences, leading to a bachelor of arts (B.A.) degree, is also offered; for that program description, see Earth and Planetary Sciences.

Most anthropology faculty have their offices in Social Sciences 1 Building. Social Sciences 1 also houses laboratories for archaeology and biological anthropology where space is provided for laboratory and individual studies courses and for collections of human and non-human mammalian skeletal material, a variety of archaeological artifacts, and collaborative workspaces for cultural anthropology research.

The Anthropology Society, a campus club, is open to all students interested in anthropology. The Anthropology Colloquium series showcases guest speakers and gives faculty and students an opportunity to discuss new approaches to anthropological questions. Students and faculty interested in archaeology also gather informally at the Archaeology/Biological Anthropology Lunch forum to share information on fieldwork and employment opportunities.

Undergraduate Program

ANTHROPOLOGY B.A.

Information and Policies

Introduction

The anthropology bachelor of arts (B.A.) incorporates the three anthropological subfields of archaeological archaeology, cultural anthropology, and biological anthropology, while providing undergraduates with a solid grounding in theory and methods.

Students do not declare an emphasis or concentration within the anthropology major. All students therefore are general anthropology majors and complete the same requirements.

However, students can choose to take additional courses in a specific area of anthropology while completing the upper-division anthropology electives required for the major, or by choosing to take courses above and beyond what is required for the major.

Academic Advising for the Program

For more information regarding department policies, please consult the undergraduate coordinator at the Anthropology Department office, 361 Social Sciences 1.

All majors, including double majors, must prepare a program of study. This can be done in consultation with faculty or undergraduate coordinator. The Anthropology Department urges students to seek faculty advice early in planning for the major. Faculty hold regular office hours weekly and encourage students to come in to talk about their program, or coursework, and career and professional advising. Students planning to pursue graduate training should plan course schedules in close consultation with faculty advisers. Transfer students should consult the Transfer Information and Policy section of this program statement.

Peer Advisers

The Anthropology Department has instituted a peer adviser program as a supplement to academic advising offered by faculty members. The peer advisers are juniors and seniors who have been trained to help students with questions and general guidance through the anthropology major. Peer advisers hold regularly scheduled office hours in the department office.

Getting Started in the Major

Program Learning Outcomes

A student who graduates with a B.A. in anthropology has the following knowledge and skills.

Core Concepts in Anthropology

The student demonstrates understanding of the core concepts in three primary subfields of anthropology: cultural anthropology, archaeology, and biological anthropology.

Knowledge of Cultural Differences

The student demonstrates knowledge of cultural variation and the diversity of perspectives, practices, and beliefs found within each culture and across cultures.

Integration of Subfields

The student integrates cultural, biological, and archaeological perspectives on human bodies, behavior, materialities, and institutions.

Written Communication

The student demonstrates the ability to write clearly by formulating well-organized arguments that are grounded in supporting evidence while countering evidence that contradicts the student's claims.

Oral Communication

The student is able to organize ideas and information and articulate them effectively.

Research and Analytical Skills

The student demonstrates knowledge of the basic steps involved in scholarly research, including locating and critically evaluating scholarly and other information sources relevant to the chosen topic. The student can recognize and demonstrate a basic understanding of research methods used in the various subfields of anthropology, including—but not limited to— participant observation, thick description, laboratory and field analysis, and interviewing.

Understanding of Long-Term Changes in Human Behavior and Conditions in Deep Time

The student has a grasp of long-term changes in the conditions that have shaped humans and the environments they inhabit.

Major Qualification Policy and Declaration Process

Major Qualification

In order to qualify for the major, students must have received a "C" or better in at least one lower-division anthropology course (ANTH 1, ANTH 2, or ANTH 3) and have either received a "C" or better in a second lower-division anthropology course or be enrolled in a second lower-division anthropology course at the time of declaration. Transfer students should consult the Transfer Information and Policy section of this program statement.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the department chair within 15 days from the date the notification was mailed. Within 15 days of receipt of the appeal, the department will notify the student, college, and Office of the Registrar of the decision.

How to Declare a Major

Step 1: Download a Petition for Major/Minor Declaration and an Academic Planning Form from the UC Santa Cruz Undergraduate Advising Center.

Fill out the petition to the best of your ability. Be sure to indicate your Expected Graduation Term (EGT) on the petition. To view your official EGT go to your MyUCSC Student Center, select "Student Advising Summary," then select the "Degree" tab—your EGT will be listed here.

Step 2: Bring your Petition for Major/Minor Declaration and your Academic Planning Form to the Anthropology Department Office (361 Social Sciences 1) during regular drop-in advising hours. Meet with an anthropology peer adviser or the undergraduate adviser to review your declaration form and discuss your academic plan and major requirements.

Step 3: Meet with the anthropology undergraduate adviser during drop-in advising hours to complete the declaration

process. **You must bring your completed Petition for Major/Minor Declaration and your Academic Planning Form to the undergraduate adviser in order to complete the declaration process. It is very important that you complete this step, as you will not be declared until you do so.**

Recommended: Meet with a permanent anthropology faculty member to discuss your Petition for Major/Minor Declaration and your Academic Planning Form. It is best to meet with an anthropology faculty member during their quarterly office hours or email them to schedule an appointment. The Anthropology Department does not assign faculty advisers—we suggest that you meet with a faculty member whose work coincides with your interests. In addition to reviewing the required declaration paperwork, you should also talk with the faculty member about your intellectual and career interests, graduate school preparation, opportunities for experiential learning (e.g. internships or research), and options for satisfying the senior comprehensive requirement.

If you are a transfer student, you must provide the department with an unofficial copy of your transcript from any institution where you took anthropology courses that you would like to apply to the major requirements. **Please do this as soon as possible as it may effect your enrollment in anthropology courses that have prerequisites.**

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz. Transfer students are strongly encouraged to complete ANTH 1, ANTH 2, and ANTH 3 before transferring to UCSC, however, it is not required for admission.

Getting Started at UCSC as a Transfer Student

Transfer Credit Toward Major/Minor Requirements

Students may transfer courses equivalent to ANTH 1, ANTH 2, and ANTH 3 from California community colleges and universities with existing articulation agreements (www.assist.org).

Students may also petition to transfer courses equivalent to ANTH 1, ANTH 2, and ANTH 3 from other community colleges or from four-year institutions.

Students may petition up to 10 quarter credits (equivalent to two UC Santa Cruz courses) of upper-division transfer credit toward the elective requirements under the following circumstances:

- A student has taken an upper-division anthropology course at another four-year university (including courses taken through study abroad) and wants to petition for the course to count toward the anthropology major or minor elective.

- A student was enrolled in an accredited Field School Program and wants to petition for the course to count toward the anthropology elective requirements.

Prior to Enrolling in Your First Quarter at UCSC

Complete Lower-Division Requirements

Most upper-division courses have one of the following lower-division introductory courses as a prerequisite:

- ANTH 1 Introduction to Biological Anthropology
- ANTH 2 Introduction to Cultural Anthropology
- ANTH 3 Introduction to Archaeology

Confirm Transfer Credit Has Been Processed

After you have been admitted to UCSC and all your final official transcripts from other colleges have been received, the Office of Admissions will evaluate your transfer credit. The evaluation shows which of your past courses are transferable to UCSC and how many credits you have accrued. It also shows which general education requirements you have satisfied, whether you have satisfied the Intersegmental General Education Transfer Curriculum (IGETC), and whether you have satisfied the University of California Entry Level Writing and American History and Institutions requirements. Students access this information through MyUCSC by viewing the Academic Advisement Report from the "more links" drop-down menu in the Academics area of the Student Center. If this information is not available for your first enrollment period, contact a college or major adviser to help you select appropriate classes. It is an excellent idea to keep an unofficial copy of your transcripts from your previous schools. You should take these documents with you to all academic advising appointments.

Confirm Transfer Credit Articulates with UCSC Courses

Courses taken at community colleges or four-year universities may be used to satisfy the lower-division requirements for the major. View the UC Articulation Agreements to determine which California community college courses are equivalent to our ANTH 1, ANTH 2 and ANTH 3. **Please note that courses approved by the Office of Admissions for transfer credit do not necessarily satisfy major requirements. Courses must have an articulation agreement to count automatically toward major requirements.**

If your transfer credit course does not articulate with a UCSC course, you may submit a coursework petition. **Faculty are not appointed during summer, so fall admits will likely need to wait until after the beginning of fall quarter for coursework petitions to be approved.**

Enrolling in Your First Quarter at UCSC

We strongly recommended that transfer students take ANTH 150, Communicating Anthropology, during their first quarter at UCSC. This course is designed to provide transfer students with a transition to UCSC coursework. It emphasizes critical reading and writing skills and is an excellent foundation for

further upper-division coursework. This class fulfills the anthropological theory core requirement.

We also recommend taking only one additional upper-division course in anthropology during your first quarter at UCSC. Most upper-division anthropology courses are offered only on an every-other-year basis. Transfer students are advised to plan accordingly.

“Free Quarter” for Transfer Students with Unarticulated, Lower-Division Courses

Any student who has taken a course analogous to ANTH 1, ANTH 2, or ANTH 3 will be issued a permission code by the undergraduate adviser for courses listing ANTH 1, ANTH 2, or ANTH 3 as a prerequisite (provided the class has not reached maximum enrollment) in their first quarter at UCSC. Students must provide unofficial transcripts as evidence that they have completed courses analogous to ANTH 1, ANTH 2, or ANTH 3.

If the student fails to petition for a course substitution during their first quarter, they must receive instructor permission to enroll in courses with ANTH 1, ANTH 2, or ANTH 3 as prerequisites thereafter until the prerequisite is satisfied either by taking the class or approved course substitution petition.

Major Qualifications

In order to qualify for the major, students must have received a "C" or better in at least one lower-division anthropology course (ANTH 1, ANTH 2, or ANTH 3) and have either received a "C" or better in a second lower-division anthropology course or be enrolled in a second lower-division anthropology course at the time of declaration.

Letter Grade Policy

This program does not have a letter grade policy.

Course Substitution Policy

Courses from California Community Colleges

Courses taken at community colleges or four-year universities may be used to satisfy the lower-division requirements for the major. View the UC Articulation Agreements to determine which California community college courses are equivalent to our ANTH 1, ANTH 2, and ANTH 3.

Courses from Other Four-Year Universities

The Anthropology Department may also accept introductory anthropology courses equivalent to ANTH 1, ANTH 2 and ANTH 3 from other four-year universities but students must petition to have these courses count toward the anthropology major or minor requirements.

You may also apply up to 10 credits (two classes) of upper-division credit toward the major. These credits must be taken at four-year universities, through EAP, or through an approved field study program. The director of undergraduate studies must approve each course. For more information about the approval and waiver process, see the Coursework Petition.

Anthropology courses from other universities that are approved by the Anthropology Department will count toward the elective requirement. Students **must** complete the Anthropology Senior Comprehensive requirement at UCSC—course petitions will not be accepted for this requirement.

Double Majors and Major/Minor Combinations Policy

Study Abroad

Anthropology is a very international discipline: the classes and coursework in this department draw upon studies of many different places and peoples. Most anthropologists work in foreign countries and all engage with scholarship from around the world. Anthropology students are strongly encouraged to make study abroad part of their education and the department is currently developing a plan of study to enable students to conduct independent research abroad with which to write a senior thesis.

For more information on programs and planning, please see the UC Education Abroad Programs and the Conducting Thesis Research While Abroad pages.

Anthropology students who participate in EAP can petition up to two upper-division anthropology courses taken abroad to count toward the anthropology major or minor requirements. When approved, these courses count toward major/minor requirements as upper-division electives.

Note: The Anthropology Department at most will accept up to **two** courses from another university—this includes universities throughout the country and courses taken abroad.

The Anthropology Department **does not** pre-approve EAP courses to count toward the major/minor requirements. Students must petition for EAP courses to count toward requirements after returning from abroad by completing the Coursework Petition Form. It is very important that students save all of their EAP coursework as it may be needed for the course petition. Syllabi that are submitted for course petitions must include detailed information about the course—brief descriptions of courses and syllabi written in languages other than English will not be accepted. It is the student's responsibility to ask for a more detailed course description if the EAP instructor does not provide it.

Only anthropology courses taken through EAP are normally eligible to count toward anthropology major/minor requirements; however, if a university abroad does not have an anthropology department, other related courses may be considered.

Again, **save all EAP coursework**. It is the student's responsibility to retain all relevant course materials for EAP programs. It can often be difficult to contact instructors after an EAP program has ended.

Honors

The Anthropology Department awards honors in the major and highest honors in the major based on a ranked departmental grade point average (GPA) that is calculated using all upper-division courses taken in the major with the exception that only one independent-study course can be used in this calculation. For students who have taken multiple independent-study courses in the department, the independent-study course that has the highest grade is used for the calculation. Approximately 15 percent of the graduating class is considered for honors based on their ranked departmental GPA through the quarter before graduation. The criteria for awarding highest honors in the major are overall superlative performance in the major (top 5 percent of ranked departmental GPA) and general breadth of excellence across the subfields of anthropology. Receiving honors on the senior comprehensive requirement is also considered as a factor in awarding highest honors, but is not always determinative.

Undergraduate Handbook

The Anthropology Undergraduate Handbook outlines information on department procedures and requirements, program planning, independent study, faculty interests, and campus resources for anthropology majors.

Requirements and Planners

Course Requirements

To graduate with an anthropology major, students must successfully complete the following courses:

Lower-Division Courses

ANTH 1	Introduction to Biological Anthropology	5
ANTH 2	Introduction to Cultural Anthropology	5
ANTH 3	Introduction to Archaeology	5

For information on receiving credit for lower-division coursework taken at other institutions, see the section Transfer Credit Toward Major/Minor Requirements.

Upper-Division Courses

Ten upper-division courses

Five core requirements

- one course in anthropological theory
- one course in sociocultural anthropology
- one course in regional specialization
- one course in archaeology
- one course in biological, medical or environmental anthropology

For course offerings, see the section Courses in Anthropology by Category (p. **Error! Bookmark not**

defined.) below. Students may not substitute coursework from another program or institution for core courses.

Four anthropology electives (any additional upper-division anthropology courses)

Two-credit courses do not count toward the 10 upper-division courses required for the major. Only one 5-credit individual studies course (197, 198, or 199) may be counted toward the 10 required upper-division courses. Theory courses can only be counted toward the theory requirement or an upper-division elective. See the section on Transfer Credit Toward Major/Minor Requirements for information on receiving credit for upper-division coursework taken at other institutions to be applied toward electives.

Students who are given permission to take a graduate seminar in anthropology may use the course to satisfy an upper division elective.

Disciplinary Communication (DC) Requirement

Students of every major must satisfy that major's upper-division disciplinary communication (DC) requirement. Anthropology's DC requirement aims especially at cultivating high-level skills in critical and ethnographic writing.

To satisfy the DC requirement students must complete a senior seminar series course or complete an independent senior thesis following the guidelines below.

Senior Seminar

Either a course in the ANTH 194 series or a course in the ANTH 196 series.

Senior Thesis

Either these courses		
ANTH 195A	Senior Thesis Seminar	5
ANTH 195B	Senior Thesis Research	3
ANTH 195C	Senior Thesis Capstone	3
or this course		
ANTH 195S	Senior Thesis	5

Comprehensive Requirement

Students can fulfill the senior comprehensive requirement in anthropology either by passing a senior seminar (ANTH 194/ANTH 196-series course) or by writing an acceptable independent senior thesis (ANTH 195S or ANTH 195A, ANTH 195B and ANTH 195C)

Senior seminars are small, writing-intensive classes focusing on advanced topics in anthropology. The prerequisite for admission to a senior seminar is successful completion of courses ANTH 1, ANTH 2, and ANTH 3; senior seminars are restricted to senior anthropology majors.

Students considering an independent thesis must arrange for the sponsorship and support of a faculty member before beginning research. An independent senior thesis (not written within a senior seminar) should be based on original research and reflect the student's understanding of fundamental

theories and issues in anthropology. The thesis should be comparable in content, style, and length (generally 25–30 pages) to a professional journal article in its subfield. Students who wish to complete the senior comprehensive requirement through and independent thesis will enroll in a section of ANTH 195S supervised by their thesis sponsor or ANTH 195A, ANTH 195B and ANTH 195C series.

The senior comprehensive requirement can be satisfied in one of two ways:

Senior Seminar

Either a course in the ANTH 194 series or a course in the ANTH 196 series.

Senior Thesis

Requires enrollment in one of the following options:

Either this course

ANTH 195S	Senior Thesis	5
or these courses		
ANTH 195A	Senior Thesis Seminar	5
ANTH 195B	Senior Thesis Research	3
ANTH 195C	Senior Thesis Capstone	3

Planners

The following are two sample academic plans: (1) a four-year plan for frosh students as preparation for the anthropology B.A. major and (2) a two-year plan for transfer students for the anthropology B. A. major. ANTH 1 and ANTH 2 satisfy the SI general education requirement, and ANTH 2 satisfies the CC general education requirement.

Four-Year Plan

Year	Fall	Winter	Spring
1st (frosh)	ANTH 1	ANTH 2	ANTH 3
2nd (soph)	Bio/Med/Env	Sociocultural	Archaeology
3rd (junior)	Theory	Regional	Upper-division elective Upper-division elective
4th (senior)	Upper-division elective	Upper-division elective	Senior Seminar*

*Alternatives listed in the section Requirements of the B.A.

Students must complete all other GE requirements, some of which are satisfied by anthropology courses.

Two-Year Plan

Year	Fall	Winter	Spring
3rd (junior)	Theory Upper-division elective	Regional Sociocultural	Archaeology Bio/Med/Env
4th (senior)	Upper-division elective Upper-division elective	Upper-division elective	Senior Seminar*

*Alternatives listed in the section Requirements of the B.A.

It is assumed that a student has completed ANTH 1, ANTH 2, and ANTH 3 before transferring to UCSC.

ANTHROPOLOGY MINOR

The minor in anthropology has a total of 10 courses required: three lower-division and seven upper-division courses. There is no theory course or senior comprehensive requirement for the minor in anthropology.

Course Requirements

Lower-Division Courses

ANTH 1	Introduction to Biological Anthropology	5
ANTH 2	Introduction to Cultural Anthropology	5
ANTH 3	Introduction to Archaeology	5

For information on receiving credit for lower-division coursework taken at other institutions, see the section Transfer Credit Toward Major/Minor Requirements

Upper-Division Courses

- one course in regional specialization
- one course in sociocultural anthropology
- one course in archaeology
- one course in biological, medical, or environmental anthropology

- three anthropology courses from the Courses in Anthropology by Category (p. **Error! Bookmark not defined.**) (no independent study courses)

Graduate Program

ANTHROPOLOGY PH.D.

Introduction

The anthropology doctoral program at UCSC consists of three tracks: cultural anthropology, anthropological archaeology, and biological anthropology.

Although applicants are accepted only for the doctor of philosophy (Ph.D.) program, students may obtain a master of arts (M.A.) degree after fulfilling specific requirements during the first two years.

The theme of emerging worlds—culture and power after progress—unites the research interests of faculty in the cultural anthropology graduate program.

Our concentration on “emerging worlds” and on the construction of anthropological knowledge is especially well suited for drawing together diverse scholars and specialists in challenging and enriching conversations. Rather than reproduce the boundaries among the traditional subfields of anthropology, we explore how recombination of these approaches can elucidate specific anthropological problems.

The Ph.D. program in anthropological archaeology focuses on the pre-colonial and early post-colonial history of Africa, Mesoamerica, the Caribbean, and western North America. It is distinctive in insisting that theories of power, production and exchange, human ecology, gender, ethnicity, and technological practice be explored through rigorous laboratory and field research methods.

The Ph.D. program in biological anthropology has a methodological emphasis in innovative approaches to human and non-human primate ecology and diversity founded on our expertise in genomics and isotope biochemistry, as well as a longstanding expertise in skeletal biology and its application in bioarchaeology and forensic anthropology.

Advancement to Candidacy

Anthropology Ph.D. students are expected to advance to candidacy by the end of their third year in the program in order to maintain satisfactory academic progress.

Course Requirements

Both the department and the university define the major requirements for each stage of study. The first year of the program is geared toward giving students a theoretical foundation so that they may begin to formulate ideas for a research project. All graduate students are expected to be in residence (on campus) during their first year in the program. At the end of the first year, students will submit a portfolio of substantive work to their first-year committee.

Cultural Track Requirements

Students are expected to pass a first-year review and have advanced to Ph.D. candidacy by the end of their third year. In order to advance to candidacy in cultural anthropology, students must complete:

Core Courses

Must be completed in fall/winter of the first year in the program.*

ANTH 200A	Cultural Graduate Core Course	5
ANTH 200B	Cultural Graduate Core Course	5

* ANTH 252, Survey of Cultural Anthropology, is recommended if the student comes from a non-anthropological background.

Ethnographic Writing Requirement

This requirement may be completed by passing Ethnographic Practice, (ANTH 208A) or, upon approval from the department, through an independent research project in which the student engages in research based on participant observation or other ethnographic methodology and in which the student adequately translates that research experience into a written text.

Three Additional Cultural Anthropology Graduate Seminars

Grant Writing (ANTH 228), Colloquia (ANTH 292), Independent Study (ANTH 297/ANTH 299), and tutorials do not count toward this requirement. Tutorials that are taught in conjunction with undergraduate courses do not count toward this requirement.

Note: Not all of these courses are offered each year.

ANTH 208C	Design Anthropology	5
ANTH 219	Religions, States, Secularities	5
ANTH 220	Cartographies of Culture	5
ANTH 224	Anthropology of Secularism	5
ANTH 225	The Anthropology of Things: Sign, Gift, Commodity, Tool	5
ANTH 229	Constructing Regions	5
ANTH 233	Politics of Nature	5
ANTH 234	Feminist Anthropology	5
ANTH 235	Language and Culture	5
ANTH 238	Advanced Topics in Cultural Anthropology	5
ANTH 241	Social Justice	5
ANTH 247	Critical Perspectives on Nutrition	5
ANTH 248	Shadowy Dealings: Anthropology of Finance, Money, and Law	5
ANTH 249	Ecological Discourses	5
ANTH 253	Advanced Cultural Theory	5
ANTH 254	Medicine and Culture	5
ANTH 255	Regulating Religion/Sex	5
ANTH 258	Experimental Cultures	5

ANTH 259	Race in Theory and Ethnography	5
ANTH 262	Documenting Cultures	5
SOCY 268B	Science and Justice Research Seminar	5
ANTH 269	Global History and the Longue Duree	5

Archaeology Track Requirements

Students are expected to pass a first-year review and have advanced to Ph.D. candidacy by the end of their third year. In order to advance to candidacy in archaeology, students must complete:

Two Core Theory Courses

Must be completed during first year in the program.

ANTH 270A	Archaeology Graduate Core Course: History of Archaeological Theory	5
ANTH 270B	Current Directions in Archaeological Theory	5

Two Research Methods/Laboratory Courses

Student may substitute courses in another department with adviser approval.

NOTE: Lecture and Lab combinations count as a single course

ANTH 202A	Skeletal Biology	5
ANTH 280	Advanced Ceramic Analysis	5
ANTH 280L	Advanced Ceramic Analysis Laboratory	2
ANTH 285	Osteology of Mammals, Birds, and Fish	5

Two Courses on the Archaeology of a Geographical, Temporal, or Topical Area

Student may substitute courses in another department with adviser approval.

ANTH 276A	Advanced Topics in North American Archaeology	5
ANTH 276B	Mesoamerican Archaeology	5
ANTH 287	Advanced Topics in Archaeology	5
ANTH 273	Origins of Farming	5
ANTH 274	Origins of Complex Societies	5

Two Additional Graduate Seminars

Students may substitute a graduate seminar in cultural or biological anthropology or in another department with adviser approval. Tutorials that are taught in conjunction with undergraduate courses do not count toward this requirement.

ANTH 225	The Anthropology of Things: Sign, Gift, Commodity, Tool	5
ANTH 279	Feminism and Gender in Archaeology	5
ANTH 282	Household Archaeology	5

One Course in Grant Writing or Research Design

ANTH 228	Grant Writing	5
ANTH 272	Advanced Archaeological Research	5

Quantitative Methods Requirement

Students in the Archaeology PhD track must demonstrate competency in statistical or computational analysis techniques appropriate to their specific dissertation research projects and professional goals. Plans for gaining and demonstrating this competency should be developed as part of the first year review for each student, in consultation with their adviser and first year committee and with the approval of the department. This competency must be demonstrated and approved by the department prior to taking the qualifying exam and advancing to candidacy.

Two Laboratory Apprenticeships

ANTH 298	Advanced Laboratory Apprenticeship	5
----------	------------------------------------	---

Biological Anthropology Track Requirements

Students are expected to pass a first-year review and have advanced to Ph.D. candidacy by the end of their third year. In order to advance to candidacy in biological anthropology, students must complete:

Core Course

Must be completed in Fall/Winter of first year in program.

ANTH 295A	Scientific Method: Biological Anthropology	5
-----------	--	---

Ecology and Evolutionary Theory Requirement

Students in the biological anthropology Ph.D. track must demonstrate competency in ecology and evolutionary theory appropriate to their specific dissertation research projects and professional goals. Plans for gaining and demonstrating this competency should be developed during the first quarter in the program, in consultation with their adviser. This competency must be demonstrated and approved by the department by the end of the first year.

One Advanced Anthropological Methods and Research Course

Students in the biological anthropology Ph.D. track must demonstrate competency in advanced methods in human skeletal biology, forensics and bioarchaeology, molecular analysis (genetics), or stable isotope analysis. Plans for gaining and demonstrating this competency should be developed during the first quarter in the program, in consultation with their adviser. This competency must be demonstrated and approved by the department by the end of the first year.

One Additional Advanced Methods and Research Course

Must be completed by the end of the second year. Student may substitute courses in another department with adviser approval.

One Graduate Seminar in Archaeology or Cultural Anthropology

Tutorials that are taught in conjunction with undergraduate courses do not count toward this requirement.

Must be completed by the end of the second year.

Quantitative or Computational Requirement

Students in the biological anthropology Ph.D. track must demonstrate competency in statistical or computational analysis techniques appropriate to their specific dissertation research projects and professional goals. Plans for gaining and demonstrating this competency should be developed as part of the first-year review for each student, in consultation with their adviser and first-year committee and with the approval of the department. This competency must be demonstrated and approved by the department prior to taking the qualifying examination and advancing to candidacy.

Nine Quarters of Advanced Reading in Biological Anthropology

Students are expected to enroll in ANTH 294R, Advanced Readings in Biological Anthropology, every quarter prior to advancing to candidacy.

ANTH 294R	Advanced Readings in Biological Anthropology	5
-----------	--	---

Two Laboratory Apprenticeships

Students are required to enroll in ANTH 298, Advanced Laboratory Apprenticeship, or equivalent in another department.

ANTH 298	Advanced Laboratory Apprenticeship	5
----------	------------------------------------	---

Six Quarters of Methods in Biological Anthropology

Students are expected to enroll in ANTH 216, Methods in Biological Anthropology, in every quarter prior to advancing to candidacy starting their second year.

ANTH 216	Methods in Biological Anthropology	5
----------	------------------------------------	---

Nine Quarters of Seminar Series

Students are required to attend at least 8 talks per quarter in the Anthropology Colloquia, Arch-BioAnth Lunch Series, EEB Seminar Series, or EPS Seminar Series.

Comprehensive Exam

This must be completed prior to the end of the second year. Students must demonstrate knowledge in Ecological and Evolutionary Theory, expertise in at least two subfields of Biological Anthropology, and sufficient background in either

Archaeology or Cultural Anthropology, especially Medical or Environmental Anthropology. The exam format is a written essay and a two-hour oral exam.

Students may satisfy both the oral and written requirement with a manuscript (worthy of submission to a professional journal) based on a research project undertaken in the second year with adviser approval. They have to be first author of this manuscript in order to satisfy the requirement.

Foreign Language Requirements

The foreign language requirement must be fulfilled before taking the qualifying examination. A qualifying examination cannot be scheduled until the requirement has been met.

It is the responsibility of each graduate student to work with their adviser to identify the language competencies necessary for fieldwork and scholarship and to initiate study toward meeting these needs. To meet the language requirement, competency in one language must be formally demonstrated. Each student's adviser will recommend how this requirement should be met, as well as what additional skills should be sought. Generally accepted ways of meeting the language requirement include:

- Passing a standardized test at a predetermined level
- Taking and passing a translation examination administered by an appropriate member of the UCSC faculty or an outside assessor approved by the adviser
- Taking and passing a series of language courses at a specified advanced level at UCSC or elsewhere, again, to be determined in consultation with the adviser

In some cases, the language in which a relevant scholarly literature exists will be the logical language of examination. In other cases, the language in which fieldwork will be conducted will be the most logical language for examination.

In the case of non-native English speakers who plan to undertake research in their own native language, English can meet the foreign language requirement. In the case of English native speakers who plan to do research in their native language, the requirement should be met by another language relevant to the field research or scholarly resources.

Teaching Requirement

Biological Anthropology Track students must complete two quarters as a teaching assistant.

Pre-Qualifying Requirements

Biological Anthropology track students must present a seminar on proposed research.

Qualifying Examination

The qualifying examination consists of two parts: a written file and a three-hour oral examination with the Qualifying Examination (QE) Committee during which the student presents and discusses the file.

For cultural track students, the file includes:

1. A theoretically focused dissertation research prospectus (approximately 18-25 pages, double-spaced, actual length to be determined by QE committee).
2. Two field statements on two anthropological topics selected and developed in consultation with the QE committee. Field statements typically review fields of literature that have (a) an area/regional focus and (b) a thematic/theoretical focus (approximately 18-25 pages, double-spaced, each; actual length to be determined by QE committee).

For archaeology track students, the file includes:

1. A theoretically-focused dissertation research prospectus (approximately 18-25 pages, double-spaced, actual length to be determined by the QE Committee).
2. Three field statements reviewing literature of 18-25 pages each on (a) a geographic cultural area, (b) a set of research methods, and (c) a theoretical tradition or theme.

For biological anthropology track students, the file includes:

A theoretically-focused dissertation research prospectus (approximately 18-25 pages, double-spaced, actual length to be determined by the QE Committee).

Post-Qualifying Requirements

Residency Requirement

In accordance with Senate Regulation 686, the minimum residence requirement for the Ph.D. degree is six terms, three of which must be spent in residence at the University of California, Santa Cruz campus. Residence is established by the satisfactory completion of one course per term.

Dissertation

Dissertation

Ph.D. candidates must prepare and submit a dissertation that is based on original research and meets the requirements of their dissertation reading committee.

Dissertation Defense

Academic Progress

Good Academic Standing and Probation

A duly registered graduate student is considered to be in good standing so long as the student's department determines that he or she is making satisfactory progress toward a terminal degree. The department and the graduate dean review the academic progress of each continuing graduate student annually.

If the Anthropology Department deems a student's work unsatisfactory, he or she may be placed on probation. A student whose academic progress has been found

unsatisfactory in two successive annual reviews will be subject to dismissal from the university.

Recommended probation for a student states:

1. Reason why (failed X class, etc.)
2. Steps that must be taken to restore satisfactory academic standing
3. The timeline for completion of the required work

The letter to the student will state that the failure to meet any one of the requirements may result in dismissal. No action for dismissal is taken until and unless the department recommends dismissal.

A student who has completed 12 or more quarters of full-time work in the same graduate program without advancing to candidacy for the Ph.D. is not considered to be making satisfactory progress. In such cases, the student will be recommended for dismissal or placed on probation until advancement is achieved. A student advanced to candidacy for more than nine quarters who has yet to complete his or her Ph.D. is not considered to be making satisfactory academic progress. Consult the Graduate Student Handbook for more information about academic progress, probation, dismissal, and the appeal process.

Applying for Graduation

The Application for the Doctor of Philosophy Degree form must be completed with all necessary signatures obtained and submitted to the Division of Graduate Studies. Application deadlines are posted in the Academic and Administrative Calendar.

Students may request an extension for submission of their dissertation until late June with approval of their adviser. To request an extension, contact the Anthropology Graduate Program coordinator.

If the student does not complete all the requirements for the degree, including submission of the dissertation by the deadline date, a new application form must be filed for the quarter in which the student will complete the requirements.

ANTHROPOLOGY DESIGNATED EMPHASIS

Introduction

A designated emphasis (DE) denotes a broadening of training that comes from adding course work, training, and/or research work from an external department, degree-granting program, or cross-departmental grouping of faculty who together offer a designated emphasis.

Requirements

Committee Composition and Departmental Approvals

One member of the student's qualifying examination committee must be a faculty member of the anthropology department. In addition, one member of the anthropology department must serve on the student's doctoral thesis committee.

Course Requirements

The student must take four graduate courses in anthropology, one of which must be a graduate seminar. An independent study with a faculty member of the Anthropology Department may count as only one of the four courses. Grant Writing (ANTH 228) may not be counted toward these requirements. Tutorials that are taught in conjunction with undergraduate courses do not count toward these requirements.

Writing, Research and/or Teaching Requirements

At the time of the qualifying examination, the student must submit to the Anthropology Department a full statement, up to five pages, summarizing the pre-qualifying examination work done in anthropology (courses, papers, research projects, independent studies) and characterizing how that work and the dissertation to follow draw from and contribute to anthropological and ethnographic inquiry. The dissertation research will normally include a fieldwork component.

In the quarter prior to announcing candidacy for graduation, the student must contact the graduate program coordinator to review their progress and confirm that all course and committee requirements have been met for the designated emphasis. In the quarter in which the student announces candidacy for graduation, the faculty member from the anthropology department serving on the student's doctoral thesis committee will evaluate the depth of engagement with anthropology displayed in the doctoral thesis and decide whether the thesis fulfills the requirement to contribute to anthropological and ethnographic inquiry.

Academic Progress

Community Studies

213 Oakes Academic Building
(831) 459-2371
<https://communitystudies.ucsc.edu/>

PROGRAMS OFFERED

Community Studies B.A. (p. 465)

Founded in 1969, community studies is the oldest interdisciplinary program at UCSC. The longstanding hallmarks of community studies are its focus on social justice and its distinctive pedagogy integrating classroom learning and extended field study. Community studies was a national pioneer in the field of experiential education and its civic engagement model has been emulated widely. Community studies was also a pioneer in addressing principles of social justice, specifically inequities arising from race, class and gender dynamics in society at large, and in critically assessing strategies for achieving social change.

Community studies alumni have pursued a wide variety of professional careers in health care, K-12 education, public policy, social work, urban planning, higher education, and law. According to a 2005 alumni survey, almost 100 alumni have founded non-profit social justice organizations and many more have served on non-profit boards and/or in executive director positions. The phrase “we are everywhere” is an apt description of the contribution community studies alumni have made to society over the past half century.

Undergraduate Program

COMMUNITY STUDIES B.A.

Information and Policies

Introduction

Founded in 1969, community studies is the oldest interdisciplinary program at UC Santa Cruz. The longstanding hallmarks of community studies are its focus on social justice and its distinctive pedagogy integrating classroom learning and extended field study. Community studies was a national pioneer in the field of experiential education and its civic engagement model has been emulated widely. Community studies was also a pioneer in addressing principles of social justice, specifically inequities arising from race, class and gender dynamics in society at large, and in critically assessing strategies for achieving social change.

The undergraduate major offers highly motivated and focused students the opportunity to pursue a rigorous course of study combining on- and off-campus learning. On campus, students complete a core curriculum enabling them to identify, analyze, and help construct strategies for social justice movements, nonprofit sector advocacy, public policy making, and social enterprise. The core curriculum works in tandem

with topical coursework that develops expertise in specific domains of social science scholarship related to the student's field studies. Off campus, students commit to spending six months immersed in a setting where they participate in and analyze the social justice work of an organization, with a goal of making a meaningful contribution to the organization's mission. Students work independently but with active guidance from both campus faculty and an on-site supervisor from the field study organization.

The undergraduate core curriculum begins with the development of skills in social analysis and field observation/participation while deepening students' knowledge of specific histories and theoretical perspectives essential to the study of communities and social transformation. Next, through the six-month full-time field study, students engage with specific communities through residence and participation in an organization with a focused social justice mission. This intensive and extended field study immersion is a distinguishing feature of the community studies major. Finally, students return to campus to analyze their field study experience and its relation to their ongoing classroom-based learning. The major culminates with a senior capstone integrating academic coursework, field study analysis, and original writing.

With the guidance of faculty and staff advisers, community studies students choose field placements related to the program's areas of focus in health justice and economic justice. In the past, placements have been arranged with community health clinics, women's and feminist organizations, immigrant-rights centers, media advocacy organizations, homeless resource and support groups, sustainable development projects, queer and transgender organizations, neighborhood or workers' collectives, civil rights groups, community food security programs, legal clinics, community-based cultural organizations, programs for seniors, tenant or labor unions, tenant organizing projects, HIV/AIDS advocacy groups, housing rights advocates, harm-reduction programs, government agencies and the offices of elected officials, and still other organizations committed to and working for social justice. As political, economic, cultural and technological landscapes shift, so do the needs and opportunities for social justice organizing. It is a dynamic world and throughout its history Community Studies has been noteworthy for being attuned and responsive to innovative field study opportunities.

Academic Advising for the Program

213 Oakes Academic Building
(831) 459-2371

To receive advising for the community studies major, students should schedule an appointment via slug success, email or call the program adviser. Full contact information is available on the program webpage. Our office is located on the second floor of the Oakes Academic Building in room 213. The office telephone number is 831-459-2371. Students are encouraged to meet with the program adviser as early as possible to develop an academic plan and take full advantage of all of the opportunities associated with early planning.

Transfer students should also consult the Transfer Information and Policy section.

Getting Started in the Major

Students interested in pursuing the community studies major should communicate with the program advisor to learn about the program's distinctive curriculum and requirements. Completing lower-division general education courses that build an understanding of and engagement with social justice issues is a great way to satisfy university requirements while building a solid foundation for the upper-division coursework required in the community studies major. Completion of the writing requirements before taking the first upper-division topical is strongly encouraged.

Transfer students should consult the Transfer Information and Policy section for specific recommendations to prepare for the major.

Program Learning Outcomes

Community studies identifies eight Program Learning Outcomes (PLOs) that together capture exciting cross currents within the major. The PLOs combine classroom and experiential learning related to the social justice domains of health and economic inequality. They also enumerate expectations for student achievement in social science research and writing and communication skills within a diverse society.

Critical Thinking

Students earning a B.A. in community studies will be able to:

1. demonstrate deep knowledge of the history, causes, and contemporary manifestations of specific social justice issues related to health and economic inequality;
2. deconstruct institutional power residing in private enterprise, government, the media, and/or the non-profit sector;
3. analyze how communities attempt to overcome problems associated with inequality, cultural stigma, prejudice, and discrimination;
4. articulate research questions, methods, and findings appropriate to social science inquiry; and
5. demonstrate analytical writing ability that effectively integrates theoretical and experiential knowledge about social justice.

Community Engagement

Students earning a B.A. in community studies will be able to:

1. identify, analyze, and help to construct strategies for social change through participation in the social justice work of an organization;
2. exhibit ethnographic observation skills by maintaining a regular record of detailed field notes;

3. demonstrate effective communication with the diverse constituencies involved in social justice work.

Major Qualification Policy and Declaration Process

Major Qualification

Students qualify to declare the community studies major by satisfactorily completing CMMU 10, Introduction to Community Activism, and at least one upper division topical course from the approved list of courses. Satisfactory completion is defined by a grade of C or better in both major qualifying courses. Major qualification courses must be taken for a letter grade. Students must declare prior to enrolling in CMMU 102, Preparation for Field Study.

Transfer students should also consult the Transfer and Information Policy Section.

Appeal Process

Students who are informed that they are not eligible to declare the major may appeal this decision by submitting a letter to the community studies program director within 15 days from the date of notification. Within 15 days of receipt of the appeal, the program will notify the student and college of the decision. Students should submit the appeal letter via email or in person to the undergraduate adviser for the Community Studies Program located in Oakes College Academic Building, 2nd floor, Room 213.

How to Declare a Major

As part of the declaration process, students meet with the program director and/or staff adviser to review their academic plan for the major, including discussion of field study possibilities and appropriate courses to meet topical requirements. Students must submit their approved academic plan and declaration petition to the community studies staff adviser. Changes to the student's academic plan must be approved by the program director.

Transfer Information and Policy

Transfer Admission Screening Policy

Students planning to apply to UCSC in this major are not required to complete specific major preparation courses for consideration of admission to UC Santa Cruz. The Community Studies program can easily accommodate students who transfer to UCSC for the fall quarter.

Transfer students will find it helpful to complete courses that satisfy campus general education requirements before arriving at UCSC. Those who plan to major in community studies will find it useful to obtain a background in politics, sociology, psychology, anthropology, or community action and service. Prior to their first quarter at UC Santa Cruz, transfer students should prepare a program of study and once on campus meet with the community studies student advisor in the program office to discuss the focus of their academic plan and field study plans.

Getting Started at UCSC as a Transfer Student

Transfer students are strongly encouraged to participate in the campus orientation program and connect with the community studies program adviser to develop an academic plan prior to their fall course enrollment.

Transfer students qualify to declare the community studies major by satisfactorily completing CMMU 10, Introduction to Community Activism, and one upper-division topical course from the approved list of course. Both of these courses should be completed during the fall quarter. Satisfactory completion is defined by a grade of C or better in both major qualifying courses. Major qualification courses must be taken for a letter grade.

As part of the declaration process, transfer students meet with the program director and/or staff adviser to review their academic plan for the major, including discussion of field study possibilities and appropriate courses to meet topical requirements. Students must submit their approved academic plan and declaration petition to the community studies staff adviser. Changes to the student's academic plan must be approved by the program director.

Letter Grade Policy

Satisfactory completion of all major course requirements is defined by a grade of C or higher. All courses for the major must be taken for a letter grade.

Course Substitution Policy

Double Majors and Major/Minor Combinations Policy

Study Abroad

Participation in EAP and other off-campus programs is strongly encouraged but requires advanced planning. Students considering EAP should schedule a meeting with the community studies adviser to determine the best quarter(s) for participation in such programs.

Honors

Honors in the community studies major are awarded to graduating seniors whose performance, including coursework, field study, and the senior capstone, is judged by a faculty committee to have achieved excellence. Highest honors in the major are reserved for students with consistently outstanding academic performance.

Requirements and Planners

Course Requirements

Satisfactory completion of all major course requirements is defined by a grade of C or higher. All courses in the major must be taken for a letter grade.

Lower-Division Courses

Complete CMMU 10 as early as possible, the course is only offered in the fall quarter and is one of two required courses to declare the major.

CMMU 10	Introduction to Community Activism	5
---------	------------------------------------	---

Upper-Division Courses

Community Studies core curriculum courses are only offered during specific quarters and therefore it is very important to develop an academic plan as early as possible that takes this into account. Below are the required core courses and quarters they are offered:

CMMU 10 fall quarter (lower-division course)

CMMU 101 winter quarter

CMMU 102 spring quarter

CMMU 105A, CMMU 105B, CMMU 105C summer and fall quarters (30 credits total)

CMMU 107 winter quarter

In addition to the core curriculum, students must successfully complete three topical courses to develop expertise in health justice and/or economic justice. Students are required to take all three topical courses prior to their field study (CMMU 105 Full-time field study- 15 credits per quarter, completed in the summer and fall)

CMMU 101	Communities, Social Movements, and the Third Sector	5
CMMU 102	Preparation for Field Studies	5
CMMU 105A	Field Study	5
CMMU 105B	Field Study	5
CMMU 105C	Field Study	5
CMMU 107	Analysis of Field Materials	5

Topical Courses

Students must complete three upper-division courses on topics related to health justice and economic justice from available approved courses listed below. The program director also may approve other courses as appropriate. Topical courses are an essential component of the community studies major because they define the focus of students' overall academic plan and their work on full-time field study. The topical courses also permit students to work across academic disciplines by learning from community studies affiliate faculty. Note that not all topical courses are offered every academic year. Check the program website for current academic year offerings.

Community Studies

CMMU 132	American Cities and Social Change	5
CMMU 133	Making California: Landscapes, People, Politics,	5

Senior Thesis:

Outstanding students may choose to complete a senior thesis, which is comprised of field-study observations, historical and theoretical contextualizations of the field study, and deeper analysis of the social justice issues and histories at the heart of the field study. The thesis also involves post-field-study research; typical length is 40–50 pages, including bibliography. The senior essay completed during CMMU 107 will become the foundation for the thesis, whether as a template to be elaborated or as one or more chapters of the completed thesis. Students electing to write a senior thesis must have a faculty thesis adviser and under direction of the adviser, may enroll in the following courses for variable units in order to complete the thesis.

CMMU 195A	Senior Thesis	5
CMMU 195B	Senior Thesis	5
CMMU 195C	Senior Thesis	5

Student-Directed Seminar (SDS):

The SDS capstone option is reserved for exceptional students. Under the direction of a faculty adviser, the student develops and teaches a CMMU 42 course related to the student’s field study and academic coursework and submits a seminar completion report. Student-directed seminars need advance planning; a proposal for the SDS must be completed before beginning the field study.

Planners

Suggested Major Planning Table

	Fall	Winter	Spring	Summer
1st (frosh)	CMMU 10			
2nd (soph)	Topical course 1	Topical course 2		
3rd (junior)	Topical course 3	CMMU 101	CMMU 102	CMMU 105 (15 credits)
4th (senior)	CMMU 105 (15 credits)	CMMU 107	CMMU 195 (optional)	

If CMMU 10 is not taken in the fall of the first year, it can be taken one year later. Likewise, the topical courses need not be taken in the quarters indicated as long as they are completed before CMMU 105. Finally, students who start the major late can still complete the major as long as they have at least two years, as shown in the transfer planner (below). In addition to the specific courses shown in these planners, a student must complete courses satisfying the UC Santa Cruz general education and degree requirements.

Sample Transfer Planner

	Fall	Winter	Spring	Summer
3rd (junior)	CMMU 10	CMMU 101	CMMU 102	CMMU 105 (15 credits)
	Topical course 1	Topical course 2	Topical course 3	
4th (senior)	CMMU 105 (15 credits)	CMMU 107	CMMU 195 (optional)

Economics B.A. (p. 470)

Business Management Economics B.A. (p. 476)

Global Economics B.A. (p. 482)

Economics/Mathematics Combined B.A. (p. 488)

Economics Minor (p. 476)

Applied Economics and Finance M.S. (p. 494)

Economics Ph.D. (p. 496)

OTHER PROGRAMS OF INTEREST

Environmental studies/Economics B.A. (p. 523)

An understanding of economics is a vital component of a liberal arts education and a necessity for anyone interested in how the economic system actually works. Subject areas include business, environmental policy, economic development, immigration, educational reform, international competitiveness and trade, economic inequality, and transformations in the global economy.

The programs offered by the UC Santa Cruz Economics Department are designed to acquaint students with a broad range of economic issues and with the tools economists use.

Undergraduate Program

The economics curriculum begins at the introductory level; no specific high school preparation is required. All economics majors study a substantial core of economic theory and mathematical and statistical methods, and then choose among a wide variety of upper-division electives.

Economics majors may combine their upper-division elective choices in a variety of ways to achieve specialization in a number of possible areas, including environmental economics, public policy, political economy, international economics, economic development, and quantitative methods.

ECONOMICS B.A.

Information and Policies

Introduction

Economics studies how individuals, firms, governments, and other organizations within our society make choices, and how these choices affect the society's use of its available resources. Economists study a wide range of questions such as: How do individuals make decisions in the face of uncertainty? What are the causes of the Great Recession of 2009? Why do Europeans work fewer hours than Americans? Why have health care and education costs risen so much? What are the consequences of government deficits? Why has the gap between rich and poor in many countries risen? Why have some poor countries grown faster than many rich countries in recent years?

Economics majors study a substantive core of theory and mathematical and statistical methods that aid in addressing these questions. This required core can be combined with electives that emphasize specialized areas such as international economics, finance, public policy, applied microeconomics, law and economics, economic development, quantitative methods, macroeconomics, game theory and behavioral economics. A focus on core theory as well as mathematical and quantitative tools provides a foundation for graduate studies in economics. Selecting a range of electives to sample the broad domain of economics offers an excellent background for students who plan to enter careers in the private sector, in public service, the non-profit sector or to attend law school or other professional schools.

Academic Advising for the Program

The Economics Department office is located at 401 Engineering 2. There are two staff undergraduate advisers, peer advisers (except summer), a field study coordinator, as well as a faculty director for each of the Economics Department's undergraduate programs. Our faculty, staff advisers and peer advisers play an important role in advising on all aspects of the major and assisting you to maximize your educational opportunities. Please check the department website for more information about drop-in hours.

Getting Started in the Major

The economics curriculum begins at the introductory level: no specific high school preparation is required. All majors study a substantial core of economic theory and statistical methods and they then choose among a wide variety of subfields.

Program Learning Outcomes

Program learning outcomes for economics, economics and mathematics, business management economics, and global economics majors:

Critical Thinking Skills: Students are expected to be able to apply economic analysis to everyday problems in real world situations, to understand current events and evaluate specific policy proposals, and to evaluate the role played by assumptions in arguments that reach different conclusions to a specific economic or policy problem.

Quantitative Reasoning Skills: Students are expected to understand how to use empirical evidence to evaluate the

validity of an economic argument, use statistical methodology, interpret statistical results, and conduct appropriate statistical analysis of data.

Problem-Solving Skills: Students are expected to be able to solve problems that have clear solutions and to address problems that do not have clear answers and explain conditions under which these solutions may be correct.

Specialized Knowledge and Application of Skills: Students are expected to develop critical and quantitative thinking skills specific to business and accounting.

Communication Skills: Students are expected to be able to communicate effectively in written, oral, and graphical form about specific issues, and to formulate well-organized written arguments that state assumptions and hypotheses supported by evidence.

Major Qualification Policy and Declaration Process

Major Qualification

The Economics Department administers four undergraduate majors: economics, business management economics, global economics, and economics/mathematics.

(Qualifications for the environmental/economics combined major differ from above; see environmental studies for details.) Students should declare the major as soon as they have completed these requirements.

Students must complete three courses, with combined GPA of 2.8 or higher, to petition for entry to the economics major:

ECON 1	Introductory Microeconomics: Resource Allocation and Market Structure	5
ECON 2	Introductory Macroeconomics: Aggregate Economic Activity	5

And one of the following calculus courses:

AM 11A	Mathematical Methods for Economists I	5
MATH 11A	Calculus with Applications	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

All classes included for major qualification determination must be taken for a letter grade. If students have not taken a letter grade, they must appeal by submitting a letter to the Economics Department.

Students are encouraged to apply to the major as soon as they have satisfactorily completed these three courses. Students who have a combined grade-point average (GPA) of 2.8 or better in Economics 1, 2, and the first calculus course will qualify upon applying. Students receiving a grade of NP, C-, D+, D, D-, or F in one of the courses required for qualification to the major may only declare once they have passed the same or equivalent course with a grade of C or better. Students who receive two grades of NP, C-, D+, D, D-, or F in the qualification courses are not eligible to declare the major.

Equivalent courses may be taken at other universities or community colleges. Students should check on assist.org to determine whether a transfer course is designated as equivalent to Economics 1, 2 or the first required calculus course. Transfer students are strongly encouraged to ask the department to review such courses prior to matriculation at UCSC, since an offer of admission to UCSC does not automatically imply admission to the economics major.

Students can receive course credit for Advanced Placement (AP) examinations in microeconomics (ECON 1), macroeconomics (ECON 2), statistics (STAT 5) and the first calculus class toward major qualification criteria according to the AP chart.

The Economics Department uses the AP score internally to determine whether students meet the 2.8 required GPA to qualify for the major. A score of 5 on the AP exam counts as an "A", a score of 4 counts as a "B" and a score of 3 on the BC calculus counts as a "C".

ECON 11A is also offered as AM 11A.

Please consult with an adviser if you have questions.

Appeal Process

Students who have a grade point average (GPA) lower than 2.8 in ECON 1, ECON 2, and the calculus course are not eligible to declare an economics major. Students who are not eligible to declare the major may appeal this decision by submitting a letter of appeal to the department within 15 days of the denial of the declaration. Within 15 days of the receipt of the appeal, the department will notify the student, college and Office of the Registrar of the decision. Please check the "Appeals" area on the department web site for further information on declaring a major or appealing ineligibility and deadlines.

How to Declare a Major

Students may petition for admission to the major by filling out the Petition for Major/Minor Declaration and the Academic Planning forms and by supplying evidence of their grades in the three pre-major courses. Candidates must meet major qualifications listed above under "Major Qualification" prior to declaring the major.

Declaration sessions are mandatory for those seeking to declare the major/minor. If you cannot attend a workshop, you must meet with an economics peer adviser first before obtaining signatures from a staff adviser. Workshop schedules and drop-in advising hours are available online, on our bulletin board outside the office and in the department office. All students are advised to bring verification of their grades, which can be printed off the student portal, to the declaration of major advising session. Students who do not bring in verification of their grades could have the approval of their petition for major declaration delayed by up to two working days.

Transfer Information and Policy

Transfer Admission Screening Policy

Transfer students may fulfill some of the requirements for the major by completing equivalent courses, with a grade of C or better, at another recognized institution.

Students must take the equivalent of the following three courses prior to petitioning for entry to an economics major: ECON 1 (Introductory Microeconomics), ECON 2 (Introductory Macroeconomics), and one of the following calculus courses: AM 11A/ECON 11A (Mathematical Methods for Economists), or MATH 11A (Calculus with Applications), or MATH 19A (Calculus for Science, Engineering, and Mathematics). Prospective majors must achieve a combined GPA of 2.8 in these three courses to be eligible to declare the major. The admissions office screens transfer applicants for meeting major qualification criteria.

Students should check on assist.org for established articulation agreements with the California community colleges and other institutions. For courses not already articulated through assist.org, transfer students must present their transfer credit summary (available on the student portal) and course syllabi or descriptions to an Economics Department adviser. The department approves courses applicable for economics prerequisites and major requirements.

While it is not required for selection, transfer students are strongly encouraged to have completed courses articulated to lower-division mathematics and statistics major requirement courses prior to transfer to facilitate timely graduation.

Getting Started at UCSC as a Transfer Student

All transfer students must complete the three-course comprehensive requirement and the disciplinary communication requirement at UCSC (explained below). Economics majors must take at least two of their upper-division economics electives at UCSC. Courses taken for credit elsewhere may not be repeated for credit here.

Students who were admitted under a different proposed major and have advanced standing when they come to UCSC require permission from the department to change into the major.

Letter Grade Policy

All classes included for major qualification determination must be taken for a letter grade. If students have not taken a letter grade, they must appeal by submitting a letter to the Economics Department.

The Economics Department allows classes toward major requirements taken for the pass/no pass (P/NP) grade notification. We recommend no more than two courses in the major be taken P/NP. Overall no more than 25 percent of a student's UCSC classes can be taken P/NP.

Course Substitution Policy

For courses not already articulated through assist.org, students must present their transfer credit summary (available on the student portal) and course syllabi or descriptions to an Economics Department adviser. The department approves courses applicable for economics prerequisites and major requirements. The course substitution form can be found on the department website under "Forms for students".

Double Majors and Major/Minor Combinations Policy

Study Abroad

UC Education Abroad Program (UCEAP) is the University of California's official study abroad program and a global leader in international education for over 50 years. All the benefits of home—UC credit, grades, and financial aid—travel with you. Approximately 600 UC Santa Cruz students study abroad on UCEAP every year.

Students can petition UCEAP courses to count toward their major or minor requirements. In addition, there are scholarships available and financial aid can be applied to UCEAP programs. UCEAP provides opportunities in:

- 46 countries around the world
- 420 summer quarter, semester or year-long programs
- Internships, volunteer work, and research programs

Economics at the Autonomous University of Barcelona -- Direct Exchange Program

Located in Spain, the Autonomous University of Barcelona (UAB) is an institution known for its excellent research and teaching. Unlike UCEAP, this direct exchange program through the UC Santa Cruz Economics Department offers the opportunity for students to enroll in three courses that will fulfill economics major requirements and one course outside of economics. Students must take a total of four courses and will receive transfer credit for all courses. Along with enrolling in courses, students may enjoy the renowned architecture, food, and art. This program is open to students who are economics majors in junior or senior class standing and have a 3.0 cumulative GPA or above. Students must also be in good academic standing and 18 years of age or older at the time of departure to Barcelona. Economics courses at UAB may also be taken in Spanish if students have completed two years of university-level Spanish with a minimum GPA of 2.85 in those language courses.

Honors

The Economics Department considers for honors and highest honors students who have completed a major program with superior or exceptional work. Honors decisions are made by the department's honors and scholarship committee.

At the end of each quarter, faculty teaching the upper-division core courses submit to the department a list of students in their respective classes whose performance is at the honors level. At the time of graduation, all students who received an

honors designation in one or more of these courses are reviewed by the department's honor committee. The faculty committee looks for a record of excellence in courses offered towards the major, with a strong performance in the upper-division core (theory and econometrics—ECON 100A/ECON 100M, ECON 100B/ECON 100N, and ECON 113) being a necessary condition for honors. Although a GPA is not computed for the economics courses, in general highest honors are awarded to students who have received a grade of at least an "A" throughout their economics program. Honors are awarded to students who have no more than two courses with grades of less than an "A-." Students who have completed a portion of the major at another institution may be asked to submit a transcript for evaluation.

Students interested in being reviewed for honors may request that the department conduct a review, and such requests are always granted.

In general, honors have been awarded to between 10 and 15 percent of each year's graduating class.

Independent Study

Students are encouraged to petition for independent study on topics of special interest to them. ECON 199, Tutorial, may be used as only one of the upper-division courses required for the major or minor.

Field-Study Program

The Economics Department offers its majors the opportunity to integrate their academic knowledge with career-related work in areas connected to economics or business. The field-study program places students in internships under the supervision of a faculty sponsor and a professional at the workplace. Students can select from a wide variety of field placements such as accounting firms, community non-profits, government agencies, brokerage firms, marketing agencies, banks, and businesses in Santa Cruz and beyond. Students apply for field-study a quarter in advance. Participation in the field-study program requires at least junior standing, completion of courses ECON 100A (or ECON 100M), ECON 100B (or ECON 100N), and ECON 113 as well as good academic standing. Students may earn a maximum of 10 academic credits and complete up to two quarters in a field placement. A 5-credit field study requires 12-14 hours per week spent working on internship duties (a 2-credit field study requires 5-6 hours per week spent on internship duties) and completion of an academic project supervised by a faculty sponsor. Time spent toward the academic requirements set by the faculty sponsor is not included in the 12-14 internship hours spent at the field placement.

Along with the training and supervision by a professional at the workplace, students receive guidance from a faculty sponsor who directs their academic project. Students earn credit through the completion of this project and the job supervisor's evaluation of performance. Economics field-study courses do not satisfy any upper-division requirements for the major and are available as Pass/No Pass only.

Interested students should make an appointment or stop by the Economics Department at 403C Engineering 2; or e-mail econintern@ucsc.edu.

Combined Majors

The Economics Department offers the following combined majors: economics/mathematics and environmental studies/economics. Requirements for these majors may be reviewed under their separate entries in this catalog.

Requirements and Planners

Course Requirements

ECON 1 and ECON 2, ECON 11A, ECON 11B, ECON 100A (or ECON 100M), ECON 100B (or ECON 100N), ECON 113, and STAT 5 or equivalent courses are required for all economics majors and are prerequisites for most upper-division courses. Students are urged to complete these courses as soon as possible. Students who are committed to the major early in their academic career, should plan to complete at least ECON 1, ECON 2, ECON 11A, ECON 11B, and preferably ECON 100A, ECON 100B, and ECON 113 by the end of their sophomore year. Students are also encouraged to choose the letter grade option when taking these courses.

Students who major in economics are required to take the following courses:

Lower-Division Courses

All of the following courses:

ECON 1	Introductory Microeconomics: Resource Allocation and Market Structure	5
ECON 2	Introductory Macroeconomics: Aggregate Economic Activity	5

Plus one of the following mathematics content options:

Either these courses		
AM 11A	Mathematical Methods for Economists I	5
AM 11B	Mathematical Methods for Economists II	5
or these courses		
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
MATH 22	Introduction to Calculus of Several Variables	5
or these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 23A	Vector Calculus	5
or these courses		
MATH 19A	Calculus for Science,	5

MATH 19B	Engineering, and Mathematics Calculus for Science,	5
AM 30	Engineering, and Mathematics Multivariate Calculus for Engineers	5
or these courses		
MATH 11A	Calculus with Applications	5
AM 11B	Mathematical Methods for Economists II	5
or these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
AM 11B	Mathematical Methods for Economists II	5

Mathematics content:

ECON 11A, ECON 11B (also offered as AM 11A and AM 11B): or equivalent courses from transferring institution.

MATH 11A, MATH 11B, MATH 23A may be taken to satisfy the mathematics content only by petition via the Mathematics Department.

Successful completion of one of the mathematics calculus sequences from the list above is required for all economics majors, and must be taken before enrollment in ECON 100A (or ECON 100M), ECON 100B (or ECON 100N), and ECON 113. Students are advised to complete the mathematics courses as early as possible in their academic career.

Students planning to pursue graduate work in economics or business should seriously consider more intensive mathematical training; consult an adviser for guidance.

Plus one of the following statistics content options:

Either this course		
STAT 5	Statistics	5
or these courses		
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Upper-Division Courses**Choose one of the following courses:**

ECON 100A	Intermediate Microeconomics	5
ECON 100M	Intermediate Microeconomics, Math Intensive	5

Plus one of the following courses:

ECON 100B	Intermediate Macroeconomics	5
ECON 100N	Intermediate Macroeconomics, Math Intensive	5

Plus the following course:

ECON 113	Introduction to Econometrics	5
----------	------------------------------	---

Plus one of the following disciplinary communication (DC) courses:

ECON 197	Economic Rhetoric: Using Economic Theory and Empirical Evidence in Arguing Policy	5
ECON 104	Is There Truth in Numbers: The Role of Statistics in Economics	5

Plus four additional upper-division economics courses, two to four of which must be selected from the following economics courses:

NOTE: Lecture/lab combinations count as one course (i.e., 114 and 114L).

ECON 105	Topics in Macroeconomics	5
ECON 114	Advanced Quantitative Methods	5
ECON 114L	Advanced Quantitative Methods Lab	2
ECON 120	Development Economics	5
ECON 121	Economic Growth	5
ECON 125	Economic History of the U.S	5
ECON 126	Why Economies Succeed or Fail: Lessons from Western and Japanese History	5
ECON 128	Poverty and Public Policy	5
ECON 130	Money and Banking	5
ECON 140	International Trade	5
ECON 141	International Finance	5
ECON 142	Advanced Topics in International Economics	5
ECON 143	Policy Issues in the International Economy	5
ECON 148	Latin American Economies	5
ECON 149	The Economies of East and Southeast Asia	5
ECON 150	Public Finance	5
ECON 156	Health Care and Medical Economics	5
ECON 159	The Economics of Organizations	5
ECON 160A	Industrial Organization	5
ECON 160B	Government and Industry	5
ECON 165	Economics as an Experimental Science	5
ECON 166A	Game Theory and Applications I	5
ECON 166B	Game Theory and Applications II	5
ECON 169	Economic Analysis of the Law	5
ECON 170	Environmental Economics	5
ECON 171	Natural Resource Economics	5
ECON 175	Energy Economics	5
ECON 180	Labor Economics	5
ECON 183	Women in the Economy	5
ECON 190	Senior Proseminar	5

Up to two of the four electives may be taken from the following business management economics courses:

ECON 131	International Financial	5
----------	-------------------------	---

ECON 133	Markets Security Markets and Financial Institutions	5
ECON 135	Corporate Finance	5

No more than one of the four electives may be taken from the following business management economics courses:

ECON 101	Managerial Economics	5
ECON 110	Managerial Cost Accounting and Control	5
ECON 111A	Intermediate Accounting I	5
ECON 111B	Intermediate Accounting II	5
ECON 111C	Intermediate Accounting III	5
ECON 112	Auditing and Attestation	5
ECON 115	Introduction to Management Sciences	5
ECON 117A	Income Tax Factors for Individuals	5
ECON 117B	Tax Factors of Business and Investment	5
ECON 119	Advanced Accounting	5
ECON 136	Business Strategy	5
ECON 138	The Economics and Management of Technology and Innovation	5
ECON 139A	The Economics of Electronic Commerce	5
ECON 139B	E-Commerce Strategy	5
ECON 161A	Marketing	5
ECON 161B	Marketing Research	5
ECON 164	Economics and the Telecommunications Industry	5
ECON 188	Management in the Global Economy	5
ECON 194	Advanced Topics in Management	5

ECON 191, ECON 192, ECON 193, and ECON 193F may not be used to meet major requirements. Either ECON 195 or ECON 199 may be used to fill one of the four upper-division elective major requirements.*

*Footnote and course list revised 08/05/19.

Electives

Disciplinary Communication (DC) Requirement

All undergraduate majors must satisfy the campus' disciplinary communication (DC) requirement. The DC requirement in economics is satisfied by completing one of the following courses:

ECON 104	Is There Truth in Numbers: The Role of Statistics in Economics	5
ECON 197	Economic Rhetoric: Using Economic Theory and Empirical Evidence in Arguing Policy	5

Comprehensive Requirement

The comprehensive requirement is satisfied by passing the following intermediate core courses with grades of C or better here at UCSC:

Choose one of the following courses:

ECON 100A	Intermediate Microeconomics	5
ECON 100M	Intermediate Microeconomics, Math Intensive	5

Plus one of the following courses:

ECON 100B	Intermediate Macroeconomics	5
ECON 100N	Intermediate Macroeconomics, Math Intensive	5

Plus the following course:

ECON 113	Introduction to Econometrics	5
----------	------------------------------	---

Students may elect to complete a senior thesis with consent of an instructor in addition to completing the intermediate core courses. This is highly recommended for students interested in a Ph.D. program in economics after graduation.

Planners

Sample Frosh Planner

1st (frosh)	Course	Course	Course
	MATH 3 or AM 3	ECON 1	ECON 2
		AM 11A/ECON 11A	AM 11B/ECON 11B
2nd (soph)	ECON 100A	ECON 100B	ECON 113
		STAT 5 or STAT 7& STAT 7L	
3rd (junior)	ECON elective	ECON elective	ECON elective
		Field Study (Internship) <i>optional</i>	Field Study <i>optional</i>
4th (senior)	ECON elective	ECON 197 or ECON 104	

The courses shown above satisfy the MF, PE, and SR and (if ECON 193 is completed) PR general education requirements. Students must complete all other GE requirements.

Sample Transfer Planner

	Fall	Winter	Spring
3rd (junior)	AM 11B/ECON 11B	ECON 100A	ECON 100B
	ECON elective		ECON elective
4th (senior)	ECON 113	ECON elective	Field Study <i>optional</i>
	ECON elective	ECON 197 or ECON 104 (DC)	Field Study (Internship) <i>optional</i>

This planner assumes that a student has completed IGETC or at least most GE requirements, STAT 5, and major preparation requirements (ECON 1, ECON 2 and at least first calculus course) before coming to UCSC.

ECONOMICS MINOR**Course Requirements**

Students earn a minor in economics by completing the following requirements:

Lower-Division Courses

ECON 1	Introductory Microeconomics: Resource Allocation and Market Structure	5
ECON 2	Introductory Macroeconomics: Aggregate Economic Activity	5
AM 11A	Mathematical Methods for Economists I	5
AM 11B	Mathematical Methods for Economists II	5

ECON 11A, ECON 11B (also offered as AM 11A and AM 11B) or equivalent courses from transferring institution.

Plus one of the following options:

Either this course		
STAT 5	Statistics	5
or these courses		
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Upper-Division Courses**Choose one of the following courses:**

ECON 100A	Intermediate Microeconomics	5
ECON 100M	Intermediate Microeconomics, Math Intensive	5

Plus one of the following courses:

ECON 100B	Intermediate Macroeconomics	5
ECON 100N	Intermediate Macroeconomics, Math Intensive	5

Plus the following course:

ECON 113	Introduction to Econometrics	5
----------	------------------------------	---

Three additional upper-division economics electives.

Courses ECON 191, ECON 192, ECON 193, and ECON 193F may not be used to meet minor requirements.

BUSINESS MANAGEMENT ECONOMICS B.A.**Information and Policies****Introduction**

The business management economics major provides students who are interested in careers in business or management with a foundation in economics and a selection of applied fields related to business management. This course of study prepares students for entrance into the business world or admission to graduate programs—either the master's program in applied economics and finance at UCSC or graduate programs in business and management at other universities.

The program provides a business and management education embedded within a broader economics and liberal arts context and is closely related to the economics and global economics majors and the technology and information management major. The department also offers a series of accounting courses that prepare students interested in certified public accountant (CPA) licensure.

This major has several important elements. First, it combines the strong analytic approach of economics with the technical aspects of management. Second, it recognizes that computing is intrinsic to business and is an essential skill for those who wish to enter this field. Students in this major gain knowledge about using computing as a tool of analysis for economic, statistical, and financial data. Third, the major offers field placements (arranged with the economics advisers) which provide an excellent way to apply students' academic knowledge of economics, business, and management to issues and problems in the real world; they provide marketable skills as well as important job contacts.

Students who are committed to the major early in their academic career should plan to complete ECON 1, ECON 2, ECON 10A, ECON 10B, ECON 11A, ECON 11B and preferably ECON 100A, ECON 100B, and ECON 113 no later than the end of their sophomore year.

Academic Advising for the Program

The Economics Department office is located at 401 Engineering 2. There are two staff undergraduate advisers, peer advisers (except summer), a field study coordinator, as well as a faculty director for each of the Economics Department's undergraduate programs. Our faculty, staff advisers and peer advisers play an important role in advising on all aspects of the major and assisting you to maximize your educational opportunities. Please check the department website for more information about drop-in hours.

Getting Started in the Major

The economics curriculum begins at the introductory level: no specific high school preparation is required. All majors study a substantial core of economic theory and statistical methods and they then choose among a wide variety of subfields.

Program Learning Outcomes

Program learning outcomes for economics, economics and mathematics, business management economics, and global economics majors:

Critical Thinking Skills: Students are expected to be able to apply economic analysis to everyday problems in real world situations, to understand current events and evaluate specific policy proposals, and to evaluate the role played by assumptions in arguments that reach different conclusions to a specific economic or policy problem.

Quantitative Reasoning Skills: Students are expected to understand how to use empirical evidence to evaluate the validity of an economic argument, use statistical methodology, interpret statistical results, and conduct appropriate statistical analysis of data.

Problem-Solving Skills: Students are expected to be able to solve problems that have clear solutions and to address problems that do not have clear answers and explain conditions under which these solutions may be correct.

Specialized Knowledge and Application of Skills: Students are expected to develop critical and quantitative thinking skills specific to business and accounting.

Communication Skills: Students are expected to be able to communicate effectively in written, oral, and graphical form about specific issues, and to formulate well-organized written arguments that state assumptions and hypotheses supported by evidence.

Major Qualification Policy and Declaration Process

Major Qualification

The Economics Department administers four undergraduate majors: economics, business management economics, global economics, and economics/mathematics.

Students must complete three courses, with combined GPA of 2.8 or higher, to petition for entry to the business management economics major:

ECON 1	Introductory Microeconomics:	5
--------	------------------------------	---

	Resource Allocation and Market Structure	
--	--	--

ECON 2	Introductory Macroeconomics: Aggregate Economic Activity	5
--------	--	---

And one of the following calculus courses:

AM 11A	Mathematical Methods for Economists I	5
MATH 11A	Calculus with Applications	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

All classes included for major qualification determination must be taken for a letter grade. If students have not taken a letter grade, they must appeal by submitting a letter to the Economics Department.

Students are encouraged to apply to the major as soon as they have satisfactorily completed these three courses. Students who have a combined grade-point average (GPA) of 2.8 or better in Economics 1, 2, and the first calculus course will qualify upon applying. Students receiving a grade of NP, C-, D+, D, D-, or F in one of the courses required for qualification to the major may only declare once they have passed the same or equivalent course with a grade of C or better. Students who receive two grades of NP, C-, D+, D, D-, or F in the qualification courses are not eligible to declare the major.

Equivalent courses may be taken at other universities or community colleges. Students should check on assist.org to determine whether a transfer course is designated as equivalent to Economics 1, 2 or the first required calculus course. Transfer students are strongly encouraged to ask the department to review such courses prior to matriculation at UCSC, since an offer of admission to UCSC does not automatically imply admission to the economics major.

Students can receive course credit for Advanced Placement (AP) examinations in Micro (ECON 1), Macro (ECON 2), Statistics (STAT 5) and the first calculus class toward major qualification criteria according to the AP chart.

The Economics Department uses the AP score internally to determine whether students meet the 2.8 required GPA to qualify for the major. A score of 5 on the AP exam counts as an "A", a score of 4 counts as a "B" and a score of 3 on the BC calculus counts as a "C".

ECON 11A is also offered as AM 11A.

Please consult with an adviser if you have questions.

Appeal Process

Students who have a GPA lower than 2.8 in ECON 1, ECON 2, and the calculus course are not eligible to declare an economics major. Students who are not eligible to declare the major may appeal this decision by submitting a letter of appeal to the department within 15 days of the denial of the declaration. Within 15 days of the receipt of the appeal, the department will notify the student, college and Office of the Registrar of the decision. Please check the "Appeals" area on the department web site for further information on declaring a major or appealing ineligibility and deadlines.

How to Declare a Major

Students may petition for admission to the major by filling out the Petition for Major/Minor Declaration and the Academic Planning forms and by supplying evidence of their grades in the three pre-major courses. Candidates must meet major qualifications listed above under "Major Qualification" prior to declaring the major.

Declaration sessions are mandatory for those seeking to declare the major/minor. If you cannot attend a workshop, you must meet with an economics peer adviser first before obtaining signatures from a staff adviser. Workshop schedules and drop-in advising hours are available online, on our bulletin board outside the office, and in the department office. All students are advised to bring verification of their grades, which can be printed off the student portal, to the declaration of major advising session. Students who do not bring in verification of their grades could have the approval of their petition for major declaration delayed by up to two working days.

Transfer Information and Policy

Transfer Admission Screening Policy

Transfer students may fulfill some of the requirements for the major by completing equivalent courses, with a grade of C or better, at another recognized institution.

Students must take the equivalent of the following three courses prior to petitioning for entry to an economics major: ECON 1 (Introductory Microeconomics), ECON 2 (Introductory Macroeconomics), and one of the following calculus courses: AM 11A/ECON 11A (Mathematical Methods for Economists), or MATH 11A (Calculus with Applications), or MATH 19A (Calculus for Science, Engineering, and Mathematics). Prospective majors must achieve a combined grade point average (GPA) of 2.8 in these three courses to be eligible to declare the major. The admissions office screens transfer applicants for meeting major qualification criteria.

Students should check on assist.org for established articulation agreements with the California community colleges and other institutions. For courses not already articulated through assist.org, transfer students must present their transfer credit summary (available on the student portal) and course syllabi or descriptions to an Economics Department adviser. The department approves courses applicable for economics prerequisites and major requirements.

While it is not required for selection, junior-level transfer students are strongly encouraged to have completed lower-division mathematics and statistics courses prior to enrolling at UCSC to facilitate graduating in a timely manner.

Getting Started at UCSC as a Transfer Student

All transfer students must complete the three-course senior comprehensive requirement (and the DC requirement as stated previously) at UCSC. Economics majors must take at least two of their upper-division economics electives at UCSC.

Courses taken for credit elsewhere may not be repeated for credit here.

Students who were admitted under a different proposed major and have advanced standing when they come to UCSC require permission from the department to change into the major.

Letter Grade Policy

All classes included for major qualification determination must be taken for a letter grade. If students have not taken a letter grade, they must appeal by submitting a letter to the Economics Department.

The Economics Department allows classes toward major requirements taken for the Pass/No Pass (P/NP) grade notification. We recommend no more than two courses in the major be taken P/NP. Overall no more than 25 percent of a student's UCSC classes can be taken P/NP.

Course Substitution Policy

For courses not already articulated through assist.org, students must present their transfer credit summary (available on the student portal) and course syllabi or descriptions to an Economics Department adviser. The department approves courses applicable for economics prerequisites and major requirements. The course substitution form can be found on the department website under "Forms for students".

Double Majors and Major/Minor Combinations Policy

Study Abroad

UC Education Abroad Program (UCEAP) is the University of California's official study abroad program and a global leader in international education for over 50 years. All the benefits of home—UC credit, grades, and financial aid—travel with you. Approximately 600 UC Santa Cruz students study abroad on UCEAP every year.

Students can petition UCEAP courses to count toward their major or minor requirements. In addition, there are scholarships available and financial aid can be applied to UCEAP programs. UCEAP provides opportunities in:

- 46 countries around the world
- 420 summer quarter, semester or yearlong programs
- Internships, volunteer work, and research programs

Economics at the Autonomous University of Barcelona-- Direct Exchange Program

Located in Spain, the Autonomous University of Barcelona (UAB) is an institution known for its excellent research and teaching. Unlike UCEAP, this direct exchange program through the UC Santa Cruz Economics Department offers the opportunity for students to enroll in three courses that will fulfill economics major requirements and one course outside of economics. Students must take a total of four courses and will receive transfer credit for all courses. Along with enrolling in courses, students may enjoy the renowned architecture, food, and art. This program is open to students

who are economics majors in junior or senior class standing and have a 3.0 cumulative GPA or above. Students must also be in good academic standing and 18 years of age or older at the time of departure to Barcelona. Economics courses at UAB may also be taken in Spanish if students have completed two years of university-level Spanish with a minimum GPA of 2.85 in those language courses.

Honors

The Economics Department considers for honors and highest honors students who have completed a major program with superior or exceptional work. Honors decisions are made by the department's Honors and Scholarship Committee.

At the end of each quarter, faculty teaching the upper-division core courses submit to the department a list of students in their respective classes whose performance is at the honors level. At the time of graduation, all students who received an honors designation in one or more of these courses are reviewed by the department's honor committee. The faculty committee looks for a record of excellence in courses offered towards the major, with a strong performance in the upper-division core (theory and econometrics—ECON 100A/ECON 100M, ECON 100B/ECON 100N, and ECON 113) being a necessary condition for honors. Although a GPA is not computed for the economics courses, in general highest honors are awarded to students who have received a grade of at least an "A" throughout their economics program. Honors are awarded to students who have no more than two courses with grades of less than an "A-." Students who have completed a portion of the major at another institution may be asked to submit a transcript for evaluation.

Students interested in being reviewed for honors may request that the department conduct a review, and such requests are always granted.

In general, honors have been awarded to between 10 and 15 percent of each year's graduating class.

Independent Study

Students are encouraged to petition for independent study on topics of special interest to them. ECON 199, Tutorial, may be used as only one of the upper-division courses required for the major or minor.

Field-Study Program

The Economics Department offers its majors the opportunity to integrate their academic knowledge with career-related work in areas connected to economics or business. The field-study program places students in internships under the supervision of a faculty sponsor and a professional at the workplace. Students can select from a wide variety of field placements such as accounting firms, community non-profits, government agencies, brokerage firms, marketing agencies, banks, and businesses in Santa Cruz and beyond. Students apply for field-study a quarter in advance. Participation in the field-study program requires at least junior standing, completion of courses ECON 100A (or ECON 100M), ECON 100B (or ECON 100N), and ECON 113 as well as good academic standing. Students may earn a maximum of 10

academic credits and complete up to two quarters in a field placement. A 5-credit field study requires 12-14 hours per week spent working on internship duties (a 2-credit field study requires 5-6 hours per week spent on internship duties) and completion of an academic project supervised by a faculty sponsor. Time spent toward the academic requirements set by the faculty sponsor is not included in the 12-14 internship hours spent at the field placement.

Along with the training and supervision by a professional at the workplace, students receive guidance from a faculty sponsor who directs their academic project. Students earn credit through the completion of this project and the job supervisor's evaluation of performance. Economics field-study courses do not satisfy any upper-division requirements for the major and are available as Pass/No Pass only.

Interested students should make an appointment or stop by the Economics Department at 403C Engineering 2; or e-mail econintern@ucsc.edu.

Combined Majors

The Economics Department offers the following combined majors: economics/mathematics and environmental studies/economics. Requirements for these majors may be reviewed under their separate entries in this catalog.

Requirements and Planners

Course Requirements

ECON 1 and ECON 2, ECON 10A, ECON 10B, ECON 11A, ECON 11B, ECON 100A (or ECON 100M), ECON 100B (or ECON 100N), ECON 113, and STAT 5 or equivalent courses are required for all business management economics majors and are prerequisites for most upper-division courses. Students are urged to complete these courses as soon as possible. Students who are committed to the major early in their academic career, should plan to complete at least ECON 1, ECON 2, ECON 11A, ECON 11B, and preferably ECON 100A, ECON 100B, and ECON 113 by the end of their sophomore year. Students are also encouraged to choose the letter grade option when taking these courses.

Students who major in business management economics are required to take the following courses:

Lower-Division Courses

All of the following courses:

ECON 1	Introductory Microeconomics: Resource Allocation and Market Structure	5
ECON 2	Introductory Macroeconomics: Aggregate Economic Activity	5
ECON 10A	Economics of Accounting	5
ECON 10B	Economics of Accounting	5

Plus one of the following mathematics content options:

AM 11A	Mathematical Methods for	5
--------	--------------------------	---

AM 11B	Economists I Mathematical Methods for Economists II	5
or these courses		
MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
MATH 22	Introduction to Calculus of Several Variables	5
or these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 23A	Vector Calculus	5
or these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
AM 30	Multivariate Calculus for Engineers	5
or these courses		
MATH 11A	Calculus with Applications	5
AM 11B	Mathematical Methods for Economists II	5
or these courses		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5
AM 11B	Mathematical Methods for Economists II	5

Mathematics Content

ECON 11A, ECON 11B (also offered as AM 11A and AM 11B): or equivalent courses from transferring institution.

MATH 11A, MATH 11B, MATH 23A may be taken to satisfy the mathematics content only by petition via the Mathematics Department.

Successful completion of one of the mathematics calculus sequences from the list above is required for all economics majors, and must be taken before enrollment in ECON 100A (or ECON 100M), ECON 100B (or ECON 100N), and ECON 113. Students are advised to complete the mathematics courses as early as possible in their academic career.

Students planning to pursue graduate work in economics or business should seriously consider more intensive mathematical training; consult an adviser for guidance.

Plus one of the following statistics content options:

Either this course		
STAT 5	Statistics	5
or these courses		
STAT 7	Statistical Methods for the	5

	Biological, Environmental, and Health Sciences	
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

Computer literacy requirement.

Students must complete a minimum of two courses from the following list (with department approval, a student may substitute other computing courses):

NOTE: Lecture/lab combinations count as one course

Students with no prior programming experience are encouraged to take CSE 5J, CSE 10 or CSE 20.

(CSE 10 is not offered regularly.)

Computer Science and Engineering

CSE 5J	Introduction to Programming in Java	5
CSE 10	Introduction to Computer Science	5
CSE 12	Computer Systems and Assembly Language	5
CSE 12L	Computer Systems and Assembly Language Laboratory	2
CSE 13E	Embedded Systems and C Programming	7
CSE 13S	Computer Systems and C Programming	7
CSE 20	Beginning Programming in Python	5
CSE 30	Programming Abstractions: Python	7
CSE 50	Business Information Systems	5
CSE 58	Systems Analysis and Design	5
CSE 80N	Introduction to Networking and the Internet	5

Upper-Division Courses

Choose one of the following courses:

ECON 100A	Intermediate Microeconomics	5
ECON 100M	Intermediate Microeconomics, Math Intensive	5

Plus one of the following courses:

ECON 100B	Intermediate Macroeconomics	5
ECON 100N	Intermediate Macroeconomics, Math Intensive	5

Plus the following course:

ECON 113	Introduction to Econometrics	5
----------	------------------------------	---

Plus one of the following disciplinary communication (DC) courses:

ECON 197	Economic Rhetoric: Using Economic Theory and Empirical Evidence in Arguing Policy	5
ECON 104	Is There Truth in Numbers:	5

The Role of Statistics in
Economics

Upper-division electives

Students are required to take five additional courses: four in business management and one other economics elective.

Students must choose four business management courses from the following list; at least one of the four must be ECON 101, ECON 133, or ECON 135.

ECON 130, ECON 159, ECON 160A, ECON 160B: Students can use **only one** of these courses as either a business management elective or an economics elective, but the course cannot be counted twice.

ECON 101	Managerial Economics	5
ECON 110	Managerial Cost Accounting and Control	5
ECON 111A	Intermediate Accounting I	5
ECON 111B	Intermediate Accounting II	5
ECON 111C	Intermediate Accounting III	5
ECON 112	Auditing and Attestation	5
ECON 115	Introduction to Management Sciences	5
ECON 117A	Income Tax Factors for Individuals	5
ECON 117B	Tax Factors of Business and Investment	5
ECON 119	Advanced Accounting	5
ECON 130	Money and Banking	5
ECON 131	International Financial Markets	5
ECON 133	Security Markets and Financial Institutions	5
ECON 135	Corporate Finance	5
ECON 136	Business Strategy	5
ECON 138	The Economics and Management of Technology and Innovation	5
ECON 139A	The Economics of Electronic Commerce	5
ECON 139B	E-Commerce Strategy	5
ECON 159	The Economics of Organizations	5
ECON 160A	Industrial Organization	5
ECON 160B	Government and Industry	5
ECON 161A	Marketing	5
ECON 161B	Marketing Research	5
ECON 164	Economics and the Telecommunications Industry	5
ECON 188	Management in the Global Economy	5
ECON 194	Advanced Topics in Management	5

Courses ECON 191, ECON 192, ECON 193, ECON 193F may not be used to meet major requirements. Either course ECON 195 or ECON 199 may be used to fill one of the five elective upper-division major requirements.

Economics Elective (choose one)

ECON 105	Topics in Macroeconomics	5
ECON 114	Advanced Quantitative Methods	5
ECON 114L	Advanced Quantitative Methods	2

ECON 120	Development Economics	5
ECON 121	Economic Growth	5
ECON 125	Economic History of the U.S.	5
ECON 126	Why Economies Succeed or Fail: Lessons from Western and Japanese History	5
ECON 128	Poverty and Public Policy	5
ECON 130	Money and Banking	5
ECON 140	International Trade	5
ECON 141	International Finance	5
ECON 142	Advanced Topics in International Economics	5
ECON 143	Policy Issues in the International Economy	5
ECON 148	Latin American Economies	5
ECON 149	The Economies of East and Southeast Asia	5
ECON 150	Public Finance	5
ECON 156	Health Care and Medical Economics	5
ECON 159	The Economics of Organizations	5
ECON 160A	Industrial Organization	5
ECON 160B	Government and Industry	5
ECON 165	Economics as an Experimental Science	5
ECON 166A	Game Theory and Applications I	5
ECON 166B	Game Theory and Applications II	5
ECON 169	Economic Analysis of the Law	5
ECON 170	Environmental Economics	5
ECON 171	Natural Resource Economics	5
ECON 175	Energy Economics	5
ECON 180	Labor Economics	5
ECON 183	Women in the Economy	5
ECON 190	Senior Proseminar	5

Field-study

One quarter of field study is strongly recommended. Placements and credit for course ECON 193 are arranged through the economics field-study coordinator. See above under field-study program description.

Electives

Disciplinary Communication (DC) Requirement

All undergraduate majors must satisfy the campus' disciplinary communication (DC) requirement. The DC requirement in economics is satisfied by completing one of the following courses:

ECON 104	Is There Truth in Numbers: The Role of Statistics in Economics	5
ECON 197	Economic Rhetoric: Using Economic Theory and Empirical Evidence in Arguing Policy	5

Comprehensive Requirement

The comprehensive requirement is satisfied by passing the following intermediate core courses with grades of C or better here at UCSC:

Field Study internship (optional)

Choose one of the following courses:

ECON 100A	Intermediate Microeconomics	5
ECON 100M	Intermediate Microeconomics, Math Intensive	5

The courses shown above satisfy the MF, PE, and SR and (if ECON 193 is completed) PR general education requirements. Students must complete all other GE requirements.

Plus one of the following courses:

ECON 100B	Intermediate Macroeconomics	5
ECON 100N	Intermediate Macroeconomics, Math Intensive	5

Plus the following course:

ECON 113	Introduction to Econometrics	5
----------	------------------------------	---

Students may elect to complete a senior thesis with consent of an instructor in addition to completing the intermediate core courses.

Sample Transfer Planner

	Fall	Winter	Spring
3rd (junior)	AM 11B/ECON 11B	ECON 100A	ECON 100B
	ECON elective	Computer course	Business Management elective
		ECON 10A	ECON 10B
4th (senior)	ECON 113	Business Management elective	Field Study (optional)
	Business Management elective	ECON 101, 133 or 135 (Business Management elective)	Computer Course
		ECON 197 or ECON 104	

Planners

Sample Frosh Planner

1st (frosh)	Course	Course	Course
	MATH 3 or AM 3	ECON 1	ECON 2
		AM 11A/ECON 11A	AM 11B/ECON 11B
2nd (soph)	ECON 100A	ECON 100B	ECON 113
	ECON 10A	STAT 5 or STAT 7 & STAT 7L	ECON 10B
3rd (junior)	Econ elective	Business Management elective	Business Management elective
		Computer Course	
4th (senior)	Business Management elective	ECON 197 or ECON 104	Field Study (optional)
	Computer course	ECON 101, 133 or 135 (Business Management elective)	

This planner assumes that a student has completed IGETC or at least most GE requirements, STAT 5, and major preparation requirements (ECON 1, ECON 2 and at least first calculus course) before coming to UCSC.

GLOBAL ECONOMICS B.A.

Information and Policies

Introduction

Global economics is an economics major focusing on global issues with an interdisciplinary element. It is designed to prepare students to understand and participate in the global economy; the program aims to deepen the student's knowledge of economics within a culturally and linguistically diverse world. The major is particularly useful to students contemplating careers at home or overseas in international relations, in international business, or with international organizations. Hence the major requires overseas study, regional area study, and second-language proficiency in addition to the basic economics requirements and additional emphasis in international economics.

Academic Advising for the Program

The Economics Department office is located at 401 Engineering 2. There are two staff undergraduate advisers, peer advisers (except summer), a field study coordinator, as well as a faculty director for each of the Economics Department's undergraduate programs. Our faculty, staff advisers and peer advisers play an important role in advising on all aspects of the major and assisting you to maximize your educational opportunities. Please check the department website for more information about drop-in hours.

Getting Started in the Major

The economics curriculum begins at the introductory level: no specific high school preparation is required. All majors study a substantial core of economic theory and statistical methods and they then choose among a wide variety of subfields.

Program Learning Outcomes

Program learning outcomes for economics, economics and mathematics, business management economics, and global economics majors:

Critical Thinking Skills: Students are expected to be able to apply economic analysis to everyday problems in real world situations, to understand current events and evaluate specific policy proposals, and to evaluate the role played by assumptions in arguments that reach different conclusions to a specific economic or policy problem.

Quantitative Reasoning Skills: Students are expected to understand how to use empirical evidence to evaluate the validity of an economic argument, use statistical methodology, interpret statistical results, and conduct appropriate statistical analysis of data.

Problem-Solving Skills: Students are expected to be able to solve problems that have clear solutions and to address problems that do not have clear answers and explain conditions under which these solutions may be correct.

Specialized Knowledge and Application of Skills: Students are expected to develop critical and quantitative thinking skills specific to business and accounting.

Communication Skills: Students are expected to be able to communicate effectively in written, oral, and graphical form about specific issues, and to formulate well-organized written arguments that state assumptions and hypotheses supported by evidence.

Major Qualification Policy and Declaration Process

Major Qualification

The Economics Department administers four undergraduate majors: economics, business management economics, global economics, and economics/mathematics.

(Qualifications for the environmental/economics combined major differ from above; see environmental studies for details.) Students should declare the major or minor as soon as they have completed these requirements.

Students must complete three courses, with combined GPA of 2.8 or higher, to petition for entry to the global economics major:

ECON 1	Introductory Microeconomics: Resource Allocation and Market Structure	5
ECON 2	Introductory Macroeconomics: Aggregate Economic Activity	5

and one of the following calculus courses:

AM 11A	Mathematical Methods for Economists I	5
MATH 11A	Calculus with Applications	5
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

All classes included for major qualification determination must be taken for a letter grade. If students have not taken a letter grade, they must appeal by submitting a letter to the Economics Department.

Students are encouraged to apply to the major as soon as they have satisfactorily completed these three courses. Students who have a combined grade-point average (GPA) of 2.8 or better in ECON 1, ECON 2, and the first calculus course will qualify upon applying. Students receiving a grade of NP, C-, D+, D, D-, or F in one of the courses required for qualification to the major may only declare once they have passed the same or equivalent course with a grade of C or better. Students who receive two grades of NP, C-, D+, D, D-, or F in the qualification courses are not eligible to declare the major.

Equivalent courses may be taken at other universities or community colleges. Students should check on assist.org to determine whether a transfer course is designated as equivalent to Economics 1, 2 or the first required calculus course. Transfer students are strongly encouraged to ask the department to review such courses prior to matriculation at UC Santa Cruz, since an offer of admission to UCSC does not automatically imply admission to the economics major.

Students can receive course credit for Advanced Placement (AP) examinations in microeconomics (ECON 1), macroeconomics (ECON 2), statistics (STAT 5) and the first calculus class toward major qualification criteria according to the AP chart.

The Economics Department uses the AP score internally to determine whether students meet the 2.8 required GPA to qualify for the major. A score of 5 on the AP exam counts as an "A", a score of 4 counts as a "B" and a score of 3 on the BC calculus counts as a "C".

ECON 11A is also offered as AM 11A.

Please consult with an adviser if you have questions.

How to Declare a Major

Students may petition for admission to the major by filling out the Petition for Major/Minor Declaration and the Academic Planning forms and by supplying evidence of their grades in the three pre-major courses. Candidates must meet major

qualifications listed above under "Major Qualification" prior to declaring the major.

Declaration sessions are mandatory for those seeking to declare the major/minor. If you cannot attend a workshop, you must meet with an economics peer adviser first before obtaining signatures from a staff adviser. Workshop schedules and drop-in advising hours are available online (<http://economics.ucsc.edu/academics/undergraduate-program/downloads/declaration-sessions.html>), on our bulletin board outside the office, and in the department office. All students are advised to bring verification of their grades, which can be printed from the student portal, to the declaration of major advising session. Students who do not bring in verification of their grades could have the approval of their petition for major declaration delayed by up to two working days.

Appeal Process

Students who have a GPA lower than 2.8 in ECON 1, ECON 2, and the calculus course are not eligible to declare any of our economics majors. Students who are not eligible to declare the major may appeal this decision by submitting a letter of appeal to the department within 15 days of the denial of the declaration. Within 15 days of the receipt of the appeal, the department will notify the student, college and Office of the Registrar of the decision. Please check the "Appeals" area on the department web site for further information on declaring a major or appealing ineligibility and deadlines.

Transfer Information and Policy

Transfer Admission Screening Policy

Transfer students may fulfill some of the requirements for the major by completing equivalent courses, with a grade of C or better, at another recognized institution.

Students must take the equivalent of the following three courses prior to petitioning for entry to an economics major: ECON 1 (Introductory Microeconomics), ECON 2 (Introductory Macroeconomics), and one of the following calculus courses: AM 11A/ECON 11A (Mathematical Methods for Economists), or MATH 11A (Calculus with Applications), or MATH 19A (Calculus for Science, Engineering, and Mathematics). Prospective majors must achieve a combined GPA of 2.8 in these three courses to be eligible to declare the major. The admissions office screens transfer applicants for meeting major qualification criteria.

Students should check on assist.org for established articulation agreements with the California community colleges and other institutions. For courses not already articulated through assist.org, transfer students must present their transfer credit summary (available on the student portal) and course syllabi or descriptions to an Economics Department adviser. The department approves courses applicable for economics prerequisites and major requirements.

While it is not required for selection, junior-level transfer students are strongly encouraged to have completed two years

of foreign language study prior to enrolling at UCSC to graduate in a timely manner.

Getting Started at UCSC as a Transfer Student

All transfer students must complete the three-course comprehensive requirement (DC) and the disciplinary communication requirement at UCSC (explained below). Global economics majors must take at least two of their upper-division economics electives at UCSC. Courses taken for credit elsewhere may not be repeated for credit here.

Students who were admitted under a different proposed major and have advanced standing when they come to UCSC require permission from the department to change into the major.

Letter Grade Policy

All classes included for major qualification determination must be taken for a letter grade. If students have not taken a letter grade, they must appeal by submitting a letter to the Economics Department.

The Economics Department allows classes toward major requirements taken for the Pass/No Pass (P/NP) grade notification. We recommend no more than two courses in the major be taken P/NP. Overall no more than 25 percent of a student's UCSC classes can be taken P/NP.

Course Substitution Policy

For courses not already articulated through assist.org, students must present their transfer credit summary (available on the student portal) and course syllabi or descriptions to an Economics Department adviser. The department approves courses applicable for economics prerequisites and major requirements. The course substitution form can be found on the department website under "Forms for students".

Double Majors and Major/Minor Combinations Policy

Study Abroad

UC Education Abroad Program (UCEAP) is the University of California's official study abroad program and a global leader in international education for over 50 years. All the benefits of home—UC credit, grades, and financial aid—travel with you. Approximately 600 UC Santa Cruz students study abroad on UCEAP every year.

Students can petition UCEAP courses to count toward their major or minor requirements. In addition, there are scholarships available and financial aid can be applied to UCEAP programs. UCEAP provides opportunities in:

- 46 countries around the world
- 420 summer quarter, semester or yearlong programs
- Internships, volunteer work, and research programs

Economics at the Autonomous University of Barcelona -- Direct Exchange Program
Located in Spain, the Autonomous University of Barcelona

(UAB) is an institution known for its excellent research and teaching. Unlike UCEAP, this direct exchange program through the UC Santa Cruz Economics Department offers the opportunity for students to enroll in three courses that will fulfill economics major requirements and one course outside of economics. Students must take a total of four courses and will receive transfer credit for all courses. Along with enrolling in courses, students may enjoy the renowned architecture, food, and art. This program is open to students who are economics majors in junior or senior class standing and have a 3.0 cumulative GPA or above. Students must also be in good academic standing and 18 years of age or older at the time of departure to Barcelona. Economics courses at UAB may also be taken in Spanish if students have completed two years of university-level Spanish with a minimum GPA of 2.85 in those language courses.

Honors

The Economics Department considers for honors and highest honors students who have completed a major program with superior or exceptional work. Honors decisions are made by the department's honors and scholarship committee.

At the end of each quarter, faculty teaching the upper-division core courses submit to the department a list of students in their respective classes whose performance is at the honors level. At the time of graduation, all students who received an honors designation in one or more of these courses are reviewed by the department's honor committee. The faculty committee looks for a record of excellence in courses offered towards the major, with a strong performance in the upper-division core (theory and econometrics—ECON 100A/ECON 100M, ECON 100B/ECON 100N, and ECON 113) being a necessary condition for honors. Although a GPA is not computed for the economics courses, in general highest honors are awarded to students who have received a grade of at least an "A" throughout their economics program. Honors are awarded to students who have no more than two courses with grades of less than an "A-." Students who have completed a portion of the major at another institution may be asked to submit a transcript for evaluation.

Students interested in being reviewed for honors may request that the department conduct a review, and such requests are always granted.

In general, honors have been awarded to between 10 and 15 percent of each year's graduating class.

Independent Study

Students are encouraged to petition for independent study on topics of special interest to them. ECON 199, Tutorial, may be used as only one of the upper-division courses required for the major or minor.

Field-Study Program

The Economics Department offers its majors the opportunity to integrate their academic knowledge with career-related work in areas connected to economics or business. The field study program places students in internships under the supervision of a faculty sponsor and a professional at the

workplace. Students can select from a wide variety of field placements such as accounting firms, community non-profits, government agencies, brokerage firms, marketing agencies, banks, and businesses in Santa Cruz and beyond. Students apply for field-study a quarter in advance. Participation in the field-study program requires at least junior standing, completion of courses ECON 100A (or ECON 100M), ECON 100B (or ECON 100N), and ECON 113 as well as good academic standing. Students may earn a maximum of 10 academic credits and complete up to two quarters in a field placement. A 5-credit field study requires 12-14 hours per week spent working on internship duties (a 2-credit field study requires 5-6 hours per week spent on internship duties) and completion of an academic project supervised by a faculty sponsor. Time spent toward the academic requirements set by the faculty sponsor is not included in the 12-14 internship hours spent at the field placement.

Along with the training and supervision by a professional at the workplace, students receive guidance from a faculty sponsor who directs their academic project. Students earn credit through the completion of this project and the job supervisor's evaluation of performance. Economics field study courses do not satisfy any upper-division requirements for the major and are available as Pass/No Pass only.

Interested students should make an appointment or stop by the Economics Department at 403C Engineering 2; or email econintern@ucsc.edu.

Combined Majors

The Economics Department offers the following combined majors: economics/mathematics and environmental studies/economics. Requirements for these majors may be reviewed under their separate entries in this catalog.

Requirements and Planners

Course Requirements

ECON 1 and ECON 2, ECON 11A, ECON 11B, ECON 100A (or ECON 100M), ECON 100B (or ECON 100N), ECON 113, and STAT 5 or equivalent courses are required for all economics majors and are prerequisites for most upper-division courses. Students are urged to complete these courses as soon as possible. Students who are committed to the major early in their academic career, should plan to complete at least ECON 1, ECON 2, ECON 11A, ECON 11B, and preferably ECON 100A, ECON 100B, and ECON 113 by the end of their sophomore year. Students are also encouraged to choose the letter grade option when taking these courses.

Students who major in economics are required to take the following courses:

Lower-Division Courses

All of the following courses:

ECON 1	Introductory Microeconomics: Resource Allocation and Market Structure	5
ECON 2	Introductory Macroeconomics: Aggregate Economic Activity	5

Plus one of the following mathematics content options:

Either these courses

AM 11A	Mathematical Methods for Economists I	5
AM 11B	Mathematical Methods for Economists II	5

or these courses

MATH 11A	Calculus with Applications	5
MATH 11B	Calculus with Applications	5
MATH 22	Introduction to Calculus of Several Variables	5

or these courses

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 23A	Vector Calculus	5

or these courses

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
AM 30	Multivariate Calculus for Engineers	5

or these courses

MATH 11A	Calculus with Applications	5
AM 11B	Mathematical Methods for Economists II	5

or these courses

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
AM 11B	Mathematical Methods for Economists II	5

Mathematics Content

ECON 11A, ECON 11B (also offered as AM 11A and AM 11B): or equivalent courses from transferring institution.

MATH 11A, MATH 11B, MATH 23A may be taken to satisfy the mathematics content only by petition via the Mathematics Department.

Successful completion of one of the mathematics calculus sequences from the list above is required for all economics majors, and must be taken before enrollment in ECON 100A (or ECON 100M), ECON 100B (or ECON 100N), and ECON 113. Students are advised to complete the mathematics courses as early as possible in their academic career.

Students planning to pursue graduate work in economics or business should seriously consider more intensive mathematical training; consult an adviser for guidance.

Plus one of the following options:

Either this

course			
STAT 5	Statistics		5
or these courses			
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences		5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory		2

Enrollment in STAT 7 requires concurrent enrollment in STAT 7L (2-credit lab).

Foreign Language Study

The global economics major requires a foreign language since students who plan to work in the larger world must have fluency in a language other than English. This language should be relevant to their regional area of interest. Students can meet this requirement by completing two years of university-level language courses or by demonstrating an equivalent level of competence through a recognized language test.

Upper-Division Courses**Choose one of the following courses:**

ECON 100A	Intermediate Microeconomics	5
ECON 100M	Intermediate Microeconomics, Math Intensive	5

Plus one of the following courses:

ECON 100B	Intermediate Macroeconomics	5
ECON 100N	Intermediate Macroeconomics, Math Intensive	5

Plus the following course:

ECON 113	Introduction to Econometrics	5
----------	------------------------------	---

Plus one of the following disciplinary communication (DC) courses:

ECON 197	Economic Rhetoric: Using Economic Theory and Empirical Evidence in Arguing Policy	5
ECON 104	Is There Truth in Numbers: The Role of Statistics in Economics	5

Students are strongly recommended to complete courses ECON 100A (or ECON 100M), ECON 100B (or ECON 100N), and ECON 113 prior to study abroad and as early as they can. These courses are prerequisites for most electives. In addition, majors must have language study, area study, and overseas study, as described below.

Courses ECON 191, ECON 192, ECON 193, ECON 193F may not be used to meet major requirements. Either course ECON 195 or ECON 199 may be used to fill one of the four elective upper-division major requirements.

Additional upper-division requirements.

Four additional upper-division courses are required.

At least one of the four courses must be selected from List 1 below.

In addition, two more courses must be taken from either List 1 or List 2 below.

The fourth course may be any other upper-division economics course except ECON 191, ECON 192, ECON 193, ECON 193F.

Please see the entire economics course list.

List 1

ECON 120	Development Economics	5
ECON 140	International Trade	5
ECON 141	International Finance	5

List 2

ECON 120	Development Economics	5
ECON 121	Economic Growth	5
ECON 126	Why Economies Succeed or Fail: Lessons from Western and Japanese History	5
ECON 131	International Financial Markets	5
ECON 140	International Trade	5
ECON 141	International Finance	5
ECON 142	Advanced Topics in International Economics	5
ECON 143	Policy Issues in the International Economy	5
ECON 148	Latin American Economies	5
ECON 149	The Economies of East and Southeast Asia	5
ECON 188	Management in the Global Economy	5

Area Study

The major requires students to take two additional courses selected from the offerings of departments other than economics in order to learn about the history, political economy, or culture of some other part of the world. These can be lower- or upper-division courses; the courses should focus on the area of the student's language study and overseas study. The Economics Department provides a list of approved courses (p. 498); substitute courses are welcomed when they are part of the student's overseas program or from other UCSC departments, but must be approved by the adviser for the global economics major.

Study Abroad

All students are required to spend at least one term abroad in an approved course of study in their regional area of concentration; students may also choose a year-long program. Typically, a student will do this through the UC Education Abroad Program (UCEAP). Numerous overseas study sites are available through UCEAP. Students desiring to fulfill their required study abroad through UCEAP must apply directly to the UCEAP office for the selected program and are subject to

the admission requirements determined by UCEAP. In countries and at universities where UCEAP programs are not available, students may make their own arrangements for study with the permission of the director of the program. Students may use the time abroad to further their language study, to meet the area study course requirements, to meet some of the upper-division economics course requirements, or to take courses unrelated to the major. Students who are not accepted to an overseas program or who cannot meet the language or area course requirements are advised to complete the general economics major as an alternative.

Electives**Disciplinary Communication (DC) Requirement**

All undergraduate majors must satisfy the campus' disciplinary communication (DC) requirement. The DC requirement in economics is satisfied by completing one of the following courses:

ECON 104	Is There Truth in Numbers: The Role of Statistics in Economics	5
ECON 197	Economic Rhetoric: Using Economic Theory and Empirical Evidence in Arguing Policy	5

Comprehensive Requirement

The comprehensive requirement is satisfied by passing the following intermediate core courses with grades of C or better here at UCSC:

Choose one of the following courses:

ECON 100A	Intermediate Microeconomics	5
ECON 100M	Intermediate Microeconomics, Math Intensive	5

Plus one of the following courses:

ECON 100B	Intermediate Macroeconomics	5
ECON 100N	Intermediate Macroeconomics, Math Intensive	5

Plus the following course:

ECON 113	Introduction to Econometrics	5
----------	------------------------------	---

Students may elect to complete a senior thesis with consent of an instructor in addition to completing the intermediate core courses.

Planners**Sample Frosh Planner**

	Fall	Winter	Spring
	<u>MATH 3</u> or <u>AM 3</u>	<u>ECON 1</u>	<u>ECON 2</u>
1st (frosh)	Language	<u>AM 11A</u> /ECON 11A	<u>AM 11B</u> /ECON 11B

Academic Advising for the Program

The Economics Department office is located at 401 Engineering 2. There are two staff undergraduate advisers, peer advisers (except summer), a field study coordinator, as well as a faculty director for each of the Economics Department's undergraduate programs. Our faculty, staff advisers and peer advisers play an important role in advising on all aspects of the major and assisting you to maximize your educational opportunities. Please check the department website for more information about drop-in hours.

Getting Started in the Major

The economics curriculum begins at the introductory level: no specific high school preparation is required. All majors study a substantial core of economic theory and statistical methods and they then choose among a wide variety of subfields.

Program Learning Outcomes

Program learning outcomes for economics, economics and mathematics, business management economics, and global economics majors:

Critical Thinking Skills: Students are expected to be able to apply economic analysis to everyday problems in real world situations, to understand current events and evaluate specific policy proposals, and to evaluate the role played by assumptions in arguments that reach different conclusions to a specific economic or policy problem.

Quantitative Reasoning Skills: Students are expected to understand how to use empirical evidence to evaluate the validity of an economic argument, use statistical methodology, interpret statistical results, and conduct appropriate statistical analysis of data.

Problem-Solving Skills: Students are expected to be able to solve problems that have clear solutions and to address problems that do not have clear answers and explain conditions under which these solutions may be correct.

Specialized Knowledge and Application of Skills: Students are expected to develop critical and quantitative thinking skills specific to business and accounting.

Communication Skills: Students are expected to be able to communicate effectively in written, oral, and graphical form about specific issues, and to formulate well-organized written arguments that state assumptions and hypotheses supported by evidence.

Major Qualification Policy and Declaration Process

Major Qualification

The Economics Department administers four undergraduate majors: economics, business management economics, global economics, and economics/mathematics. The qualification requirements for major declaration are the same for all four.

Students must complete three courses, with combined GPA of 2.8 or higher, to petition for entry to the economics/mathematics major:

ECON 1	Introductory Microeconomics: Resource Allocation and Market Structure	5
ECON 2	Introductory Macroeconomics: Aggregate Economic Activity	5
and the following calculus course:		
MATH 19A	Calculus for Science, Engineering, and Mathematics	5

All classes included for major qualification determination must be taken for a letter grade. If students have not taken a letter grade, they must appeal by submitting a letter to the Economics Department.

Students are encouraged to apply to the major as soon as they have satisfactorily completed these three courses. Students who have a combined grade-point average (GPA) of 2.8 or better in Economics 1, 2, and the first calculus course will qualify upon applying. Students receiving a grade of NP, C-, D+, D, D-, or F in one of the courses required for qualification to the major may only declare once they have passed the same or equivalent course with a grade of C or better. Students who receive two grades of NP, C-, D+, D, D-, or F in the qualification courses are not eligible to declare the major.

Equivalent courses may be taken at other universities or community colleges. Students should check on assist.org to determine whether a transfer course is designated as equivalent to Economics 1, 2 or the first required calculus course. Transfer students are strongly encouraged to ask the department to review such courses prior to matriculation at UCSC, since an offer of admission to UCSC does not automatically imply admission to the economics major.

Students can receive course credit for Advanced Placement (AP) examinations in Micro (ECON 1), Macro (ECON 2), Statistics (STAT 5) and the first calculus class toward major qualification criteria according to the AP chart.

The Economics Department uses the AP score internally to determine whether students meet the 2.8 required GPA to qualify for the major. A score of 5 on the AP exam counts as an "A", a score of 4 counts as a "B" and a score of 3 on the BC calculus counts as a "C".

ECON 11A is also offered as AM 11A.

Please consult with an adviser if you have questions.

Appeal Process

Students who have a GPA lower than 2.8 in Economics 1, 2, and the calculus course are not eligible to declare an economics major. Students who are not eligible to declare the major may appeal this decision by submitting a letter of appeal to the department within 15 days of the denial of the declaration. Within 15 days of the receipt of the appeal, the department will notify the student, college and Office of the Registrar of the decision. Please check the "Appeals" area on the department website for further information on declaring a major or appealing ineligibility and deadlines.

How to Declare a Major

Students may petition for admission to the major by filling out the Petition for Major/Minor Declaration and the Academic Planning forms and by supplying evidence of their grades in the three pre-major courses. Candidates must meet major qualifications listed above prior to declaring the major.

Declaration sessions are mandatory for those seeking to declare the major or minor. If you cannot attend a workshop, you must meet with an economics peer adviser first before obtaining signatures from a staff adviser. Workshop schedules and drop-in advising hours are available online, on our bulletin board outside the office, and in the department office. All are advised to bring in verification of their grades, which can be printed off the student portal, to the declaration of major advising session. Students who do not bring in verification of their grades could have the approval of their petition for major declaration delayed by up to two working days.

Transfer Information and Policy

Transfer Admission Screening Policy

Transfer students may fulfill some of the requirements for the major by completing equivalent courses, with a grade of C or better, at another recognized institution.

Students must take the equivalent of the following three courses prior to petitioning for entry to the combined economics/mathematics major: ECON 1 (Introductory Microeconomics), ECON 2 (Introductory Macroeconomics), and MATH 19A (Calculus for Science, Engineering, and Mathematics). Prospective majors must achieve a combined grade point average (GPA) of 2.8 in these three courses to be eligible to declare the major. The Admissions office screens transfer applicants for meeting major qualification criteria.

Students should check on assist.org for established articulation agreements with the California community colleges and other institutions. For courses not already articulated through assist.org, transfer students must present their transfer credit summary (available on the student portal) and course syllabi or descriptions to an Economics Department adviser. The department approves courses applicable for economics prerequisites and major requirements.

While it is not required for selection, junior-level transfer students are strongly encouraged to have completed lower-division mathematics and statistics courses prior to enrolling at UCSC to facilitate graduating in a timely manner.

Getting Started at UCSC as a Transfer Student

All transfer students must complete the three-course senior comprehensive requirement (and the DC requirement as stated previously) at UCSC. Economics/mathematics majors must take at least two of their upper-division economics electives at UCSC. Courses taken for credit elsewhere may not be repeated for credit here.

Students who were admitted under a different proposed major and have advanced standing when they come to UC Santa Cruz require permission from the department to change into the major. Students who have met all lower-division requirements through articulations before transferring will need at least six economics and four to five mathematics upper-division courses at UCSC to complete the major.

Letter Grade Policy

All classes included for major qualification determination must be taken for a letter grade. If students have not taken a letter grade, they must appeal by submitting a letter to the Economics Department.

The Economics Department allows classes toward major requirements taken for the Pass/No Pass (P/NP) grade notification. We recommend no more than two courses in the major be taken P/NP. Overall no more than 25 percent of a student's UCSC classes can be taken P/NP.

Course Substitution Policy

For courses not already articulated through assist.org, students must present their transfer credit summary (available on the student portal) and course syllabi or descriptions to an Economics Department adviser. The department approves courses applicable for economics prerequisites and major requirements. The course substitution form can be found on the department website under "Forms for students".

Double Majors and Major/Minor Combinations Policy

Study Abroad

UC Education Abroad Program (UCEAP) is the University of California's official study abroad program and a global leader in international education for more than 50 years. All the benefits of home—UC credit, grades, and financial aid—travel with you. Approximately 600 UC Santa Cruz students study abroad on UCEAP every year.

Students can petition UCEAP courses to count toward their major or minor requirements. In addition, there are scholarships available and financial aid can be applied to UCEAP programs. UCEAP provides opportunities in:

- 46 countries around the world
- 420 summer quarter, semester or yearlong programs
- Internships, volunteer work, and research programs

Economics at the Autonomous University of Barcelona-- Direct Exchange Program

Located in Spain, the Autonomous University of Barcelona (UAB) is an institution known for its excellent research and teaching. Unlike UCEAP, this direct exchange program through the UC Santa Cruz Economics Department offers the opportunity for students to enroll in three courses that will fulfill economics major requirements and one course outside of economics. Students must take a total of four courses and will receive transfer credit for all courses. Along with

enrolling in courses, students may enjoy the renowned architecture, food, and art. This program is open to students who are economics majors in junior or senior class standing and have a 3.0 cumulative GPA or above. Students must also be in good academic standing and 18 years of age or older at the time of departure to Barcelona. Economics courses at UAB may also be taken in Spanish if students have completed two years of university-level Spanish with a minimum GPA of 2.85 in those language courses.

Honors

The Economics Department considers for honors and highest honors students who have completed a major program with superior or exceptional work. Honors decisions are made by the department's honors and scholarship committee.

At the end of each quarter, faculty teaching the upper-division core courses submit to the department a list of students in their respective classes whose performance is at the honors level. At the time of graduation, all students who received an honors designation in one or more of these courses are reviewed by the department's honor committee. The faculty committee looks for a record of excellence in courses offered towards the major, with a strong performance in the upper-division core (theory and econometrics—ECON 100A/ECON 100M, ECON 100B/ECON 100N, and ECON 113) being a necessary condition for honors. Although a GPA is not computed for the economics courses, in general highest honors are awarded to students who have received a grade of at least an "A" throughout their economics program. Honors are awarded to students who have no more than two courses with grades of less than an "A-." Students who have completed a portion of the major at another institution may be asked to submit a transcript for evaluation.

Students interested in being reviewed for honors may request that the department conduct a review, and such requests are always granted.

In general, honors have been awarded to between 10 and 15 percent of each year's graduating class.

Independent Study

Students are encouraged to petition for independent study on topics of special interest to them. ECON 199, Tutorial, may be used as only one of the upper-division courses required for the major or minor.

Field-Study Program

The Economics Department offers its majors the opportunity to integrate their academic knowledge with career-related work in areas connected to economics or business. The field-study program places students in internships under the supervision of a faculty sponsor and a professional at the workplace. Students can select from a wide variety of field placements such as accounting firms, community non-profits, government agencies, brokerage firms, marketing agencies, banks, and businesses in Santa Cruz and beyond. Students apply for field-study a quarter in advance. Participation in the field study program requires at least junior standing, completion of courses ECON 100A (or ECON 100M), ECON

100B (or ECON 100N), and ECON 113 as well as good academic standing. Students may earn a maximum of 10 academic credits and complete up to two quarters in a field placement. A 5-credit field study requires 12-14 hours per week spent working on internship duties (a 2-credit field-study requires 5-6 hours per week spent on internship duties) and completion of an academic project supervised by a faculty sponsor. Time spent toward the academic requirements set by the faculty sponsor is not included in the 12-14 internship hours spent at the field placement.

Along with the training and supervision by a professional at the workplace, students receive guidance from a faculty sponsor who directs their academic project. Students earn credit through the completion of this project and the job supervisor's evaluation of performance. Economics field-study courses do not satisfy any upper-division requirements for the major and are available as Pass/No Pass only.

Interested students should make an appointment or stop by the Economics Department at 403C Engineering 2; or e-mail econintern@ucsc.edu.

Combined Majors

The Economics Department offers the following combined majors: economics/mathematics and environmental studies/economics. Requirements for these majors may be reviewed under their separate entries in this catalog.

Requirements and Planners

Course Requirements

Lower-Division Courses

Economics Required Courses

All of the following lower-division courses:

ECON 1	Introductory Microeconomics: Resource Allocation and Market Structure	5
ECON 2	Introductory Macroeconomics: Aggregate Economic Activity	5

Mathematics Required Courses

All of the following lower division courses:

MATH 19A	Calculus for Science, Engineering, and Mathematics	5
MATH 19B	Calculus for Science, Engineering, and Mathematics	5
MATH 21	Linear Algebra	5

Plus one of the following options:

Either this course		
MATH 22	Introduction to Calculus of Several Variables	5
or these courses		
MATH 23A	Vector Calculus	5
MATH 23B	Vector Calculus	5

Statistics Course Requirement

Either this course		
STAT 5	Statistics	5
or these courses		
STAT 7	Statistical Methods for the Biological, Environmental, and Health Sciences	5
STAT 7L	Statistical Methods for the Biological, Environmental, and Health Sciences Laboratory	2

MATH 11A, MATH 11B, MATH 23A may be taken to satisfy the mathematics content only by petition via the Mathematics Department.

Successful completion of one of the mathematics calculus sequences from the list above is required for all economics majors, and must be taken before enrollment in ECON 100A (or ECON 100M), ECON 100B (or ECON 100N), and ECON 113. Students are advised to complete the mathematics courses as early as possible in their academic career.

Transfer students interested in the combined economics/mathematics major are encouraged to complete as many lower-division mathematics and statistics courses as they can prior to transferring. The courses need to be equivalent to MATH 19A, MATH 19B, MATH 21 and MATH 22 or MATH 23A and MATH 23B.

Upper-Division Courses

Economics Required Courses

Choose one of the following courses:

ECON 100A	Intermediate Microeconomics	5
ECON 100M	Intermediate Microeconomics, Math Intensive	5

Plus one of the following courses:

ECON 100B	Intermediate Macroeconomics	5
ECON 100N	Intermediate Macroeconomics, Math Intensive	5

Plus the following course:

ECON 113	Introduction to Econometrics	5
----------	------------------------------	---

Mathematics Required Courses

Plus all of the following courses:

MATH 100	Introduction to Proof and Problem Solving	5
MATH 105A	Real Analysis	5

Electives

Economics Elective Courses

(choose three from the following list)

NOTE: Lecture/lab combinations (i.e., ECON 114 and 114L) count as one course.

ECON 101	Managerial Economics	5
----------	----------------------	---

ECON 114	Advanced Quantitative Methods	5
ECON 114L	Advanced Quantitative Methods Lab	2
ECON 115	Introduction to Management Sciences	5
ECON 120	Development Economics	5
ECON 121	Economic Growth	5
ECON 125	Economic History of the U.S	5
ECON 126	Why Economies Succeed or Fail: Lessons from Western and Japanese History	5
ECON 128	Poverty and Public Policy	5
ECON 130	Money and Banking	5
ECON 131	International Financial Markets	5
ECON 133	Security Markets and Financial Institutions	5
ECON 135	Corporate Finance	5
ECON 136	Business Strategy	5
ECON 138	The Economics and Management of Technology and Innovation	5
ECON 139A	The Economics of Electronic Commerce	5
ECON 139B	E-Commerce Strategy	5
ECON 140	International Trade	5
ECON 141	International Finance	5
ECON 142	Advanced Topics in International Economics	5
ECON 148	Latin American Economies	5
ECON 149	The Economies of East and Southeast Asia	5
ECON 150	Public Finance	5
ECON 156	Health Care and Medical Economics	5
ECON 159	The Economics of Organizations	5
ECON 160A	Industrial Organization	5
ECON 160B	Government and Industry	5
ECON 161A	Marketing	5
ECON 164	Economics and the Telecommunications Industry	5
ECON 165	Economics as an Experimental Science	5
ECON 166A	Game Theory and Applications I	5
ECON 166B	Game Theory and Applications II	5
ECON 169	Economic Analysis of the Law	5
ECON 170	Environmental Economics	5
ECON 171	Natural Resource Economics	5
ECON 175	Energy Economics	5
ECON 180	Labor Economics	5
ECON 183	Women in the Economy	5
ECON 188	Management in the Global Economy	5

Mathematics Electives

(choose two from the following list)

NOTE: Lecture/lab combinations (i.e., MATH 145 and 145L) count as one course.

MATH 105B	Real Analysis	5
MATH 106	Systems of Ordinary	5

MATH 107	Differential Equations	5
MATH 114	Partial Differential Equations	5
MATH 117	Introduction to Financial Mathematics	5
MATH 124	Advanced Linear Algebra	5
MATH 145	Introduction to Topology	5
MATH 145L	Introductory Chaos Theory	5
MATH 194	Introductory Chaos Laboratory	1
MATH 195	Senior Seminar	5
AM 114	Senior Thesis	5
STAT 131	Introduction to Dynamical Systems	5
STAT 132	Introduction to Probability Theory	5
AM 147	Classical and Bayesian Inference	5
	Computational Methods and Applications	5

Disciplinary Communication (DC) Requirement

All undergraduate majors must satisfy the campus' disciplinary communication (DC) requirement. The DC requirement in economics is satisfied by completing one of the following courses:

ECON 104	Is There Truth in Numbers: The Role of Statistics in Economics	5
ECON 197	Economic Rhetoric: Using Economic Theory and Empirical Evidence in Arguing Policy	5

Students in the combined economics/mathematics major may also satisfy the DC requirement by completing:

MATH 100	Introduction to Proof and Problem Solving	5
----------	---	---

Plus one of the following courses:

MATH 194	Senior Seminar	5
MATH 195	Senior Thesis	5

Comprehensive Requirement

The comprehensive requirement is satisfied by passing the following intermediate core courses with grades of C or better here at UCSC:

Choose one of the following courses:

ECON 100A	Intermediate Microeconomics	5
ECON 100M	Intermediate Microeconomics, Math Intensive	5

Plus one of the following courses:

ECON 100B	Intermediate Macroeconomics	5
ECON 100N	Intermediate Macroeconomics, Math Intensive	5

Plus the following course:

ECON 113	Introduction to Econometrics	5
----------	------------------------------	---

Students may elect to complete a senior thesis with consent of an instructor in addition to completing the intermediate core courses.

Planners

Sample Frosh Planner

	1st (frosh)	Fall	Winter	Spring
		MATH 19A	MATH 19B	
			ECON 1	ECON 2
	2nd (soph)	MATH 23A	ECON 100A	ECON 100B
		MATH 21	MATH 23B	MATH 100
	3rd (junior)	MATH 105A	ECON 113	Econ elective
		STAT 5 or STAT 7 & STAT 7L	Math elective	Math elective
	4th (senior)	Econ elective	Econ elective	Field Study (optional)
			ECON 197 or ECON 104	
			Field Study internship (optional)	

The courses shown above satisfy the MF, PE, and SR, and (if ECON 193 is completed) PR general education requirements. Students must also complete all other GE requirements.

Sample Transfer Planner One

	Fall	Winter	Spring
3rd (junior)	MATH 19B	MATH 22 or MATH 23A	MATH 23B*
	MATH 21	MATH 100	Math elective
	Econ elective		
4th (senior)	ECON 100A	ECON 113	ECON 100B
	MATH 105A	Econ elective	Econ elective
		Math elective	ECON 197 or ECON 104

*If MATH 23A is taken in the winter term, otherwise ECON 100A

This planner assumes that a student has completed all general education requirements in addition to the following major requirements: ECON 1, ECON 2, MATH 19A and STAT 5.

Sample Transfer Planner Two

	Fall	Winter	Spring
3rd (junior)	ECON 100A	ECON 100B	ECON 113
	MATH 23B	MATH 21	MATH 100
4th (senior)	MATH 105A	Econ elective	Econ elective
	Econ elective	ECON 197 or ECON 104	Math elective
		Math elective	Field Study (optional)

This planner assumes that the student has completed most general education requirements in addition to the following major requirements: ECON 1, ECON 2, MATH 19A, MATH 19B, MATH 23A and STAT 5.

Graduate Program

The Department of Economics offers programs leading to the Ph.D. degree in economics and M.S. degree in applied economics and finance.

The Ph.D. program in economics provides students with training in modern microeconomics, macroeconomics, and econometrics, combined with specialized training in the fields of international finance and international trade and options to pursue specializations in economic development, monetary economics, applied microeconomics, experimental economics and other areas. The core emphasis of the program is on international trade and finance, and the program offers more intensive course work in these areas, as well as greater faculty depth in various aspects of international economics, than do traditional Ph.D. programs in economics that offer international economics as a single subfield. However, the department is also home to a large number of internationally recognized faculty whose work is outside of international and who regularly supervise Ph.D. students. Graduates of the program have conducted research on a wide variety of topics; examples include monetary economics, experimental economics, environmental economics, and economic growth and development as well as international economics.

Past graduates of the Ph.D. program have gone on to successful careers in the academic and research sectors with placements at a diverse range of companies and institutions, including Central Banks, Federal Reserve Board of Governors, Facebook, Microsoft, Amazon, UBER, Middlebury College, Occidental College, IMPAQ International, California State University, University of

Wisconsin, Purdue University, Bank of International Settlements and many more.

The M.S. program in applied economics and finance is designed for students who wish to supplement their undergraduate work in economics with analytical graduate training that prepares them for careers in business, international and domestic banking, consulting firms, government, and nonprofit organizations. The program combines theory with meaningful applications that students are likely to face in their professional careers. The program is more practical than a typical M.A. program and provides more training in economics and statistics than most MBA programs.

Past graduates of this program have gone on to successful careers in the private and public sectors with placements at a diverse range of companies and institutions, including ADM Associates, Inc., Anderson Tax, SoFi, Cisco Systems, Seagate Technology, Google, Sony Computer Entertainment, Plantronics, Wells Fargo, Securities and Exchange Commission, all of the big four accounting firms, McKesson Corp., Pepsi Corp., Visa, Square Trade, the California Franchise Tax Board, Guardian News (UK), Blue Cross, the World Bank, Stanford University, and the Bank of Japan. Other graduates have gone on to earn Ph.D.s in economics.

APPLIED ECONOMICS AND FINANCE M.S.

Introduction

The M.S. program in applied economics and finance is a one-year program that provides analytical graduate training designed to prepare students for careers in business, international and domestic banking, consulting firms, government, and nonprofit organizations. The program combines core training in economic theory with meaningful applications that students are likely to face in their professional careers. The program has a more applied orientation than a typical M.A. program in economics and provides more training in economics, statistics, and econometrics than most M.B.A. programs. The curriculum stresses mastery of core principles in micro and macroeconomics and finance. In addition, each student learns how to solve practical problems and to communicate the results clearly. The emphasis of the program, and perhaps its greatest strength, is exposing students to advanced econometric techniques, statistical software packages (R, Stata, etc.), and large-scale financial and microeconomic datasets throughout their coursework.

International students in the M.S. program are eligible to apply for optional practical training (OPT) through the Office of International Education. Our M.S. program in applied economics and finance is also eligible for the OPT Stem Extension. For more information please visit the International Scholar and Student Services website.

Past graduates of this program have gone on to successful careers in the private and public sectors with placements at a diverse range of companies and institutions, including ADM

Associates, Inc., Anderson Tax, SoFi, Cisco Systems, Seagate Technology, Google, Sony Computer Entertainment, Plantronics, Wells Fargo, Securities and Exchange Commission, all of the big four accounting firms, McKesson Corp., Pepsi Corp., Visa, Square Trade, the California Franchise Tax Board, Guardian News (UK), Blue Cross, the World Bank, Stanford University, and the Bank of Japan. Other graduates have gone on to earn Ph.D.s in economics.

Requirements

Course Requirements

M.S. students are required to take the following classes starting in the fall quarter of the academic year they enroll in the program. Students may also take additional classes if they desire.

Courses and Program Requirements

Fall

ECON 200	Microeconomic Analysis	5
ECON 216	Applied Econometric Analysis I	5
ECON 233	Finance I	5
ECON 294A	Applied Economics and Finance Laboratory	2
ECON 186	Mathematical Methods for Economic Analysis	5

ECON 186 Note: M.S. students are strongly encouraged to enroll in ECON 186, a three-week pre-fall mathematics course, which is highly beneficial to students' success in the program. ECON 186 is offered as an accelerated short course before the start of fall quarter.

Winter

ECON 202	Macroeconomic Analysis	5
ECON 217	Applied Econometric Analysis II	5
ECON 294A	Master's elective Applied Economics and Finance Laboratory	2
ECON 294B	Applied Economics and Finance Seminar	2

Spring

ECON 201	Applications in Microeconomics	5
ECON 236	Financial Engineering	5
ECON 294B	Master's elective Applied Economics and Finance Seminar	2

Electives

Students may satisfy the elective requirements by taking approved courses within the Economics Department or from another discipline. The department has assembled a list of pre-approved master's electives (curricular offerings are subject to change annually). Students will need to file a departmental petition for review and approval of courses that are not on the pre-approved elective list.

Pre-Approved M.S. Electives (please note courses are not offered every quarter or every year)

Economics

ECON 111A	Intermediate Accounting I	5
ECON 111B	Intermediate Accounting II	5
ECON 111C	Intermediate Accounting III	5
ECON 188	Management in the Global Economy	5
ECON 211C	Advanced Econometrics III	5
ECON 220A	Development Economics I	5
ECON 231	International Financial Management	5
ECON 235	Corporate Finance	5
ECON 238	Market Design: Theory and Pragmatics	5
ECON 250A	Applied Microeconomics I	5
ECON 259B	Public Policy Analysis	5

Enrollment in these ECON courses requires permission of instructor: ECON 111A, ECON 111B, ECON 111C, ECON 211C, ECON 220A, ECON 250A.

Applied Mathematics

AM 216	Stochastic Differential Equations	5
--------	-----------------------------------	---

Computer Science and Engineering (CSE)

CSE 20	Beginning Programming in Python	5
CSE 101	Algorithms and Abstract Data Types	5
CSE 102	Introduction to Analysis of Algorithms	5
CSE 182	Introduction to Database Management Systems	5

CSE 20 Note: As it is a lower-division course, CSE 20 does not count toward the 35 credits required by the university to obtain a master's degree. However, since it broadens the skill-set of students in the program, we allow for it as a master's elective to satisfy department requirements. Before enrolling in this course, students should take care to ensure that they will have 35 eligible credits for graduation.

CSE Pre-Approved course electives (require permission of instructor)

CSE 111	Advanced Programming	5
CSE 142	Machine Learning	5
CSE 201	Analysis of Algorithms	5
CSE 202	Combinatorial Algorithms	5
CSE 243	Data Mining	5
CSE 270B	Management of Technology II	5
CSE 271	E-Business Technology and Strategy	5
CSE 272	Information Retrieval	5
CSE 277	Random Process Models in Engineering	5

Enrollment in these computer science and engineering courses requires permission of instructor: CSE 111, 142, 201, 202, 243, 270B, 271, 272, 277.

Environmental Studies

ENVS 140	National Environmental Policy	5
----------	-------------------------------	---

Statistics

STAT 206	Applied Bayesian Statistics	5
STAT 206B	Intermediate Bayesian Inference	5
STAT 207	Intermediate Bayesian Statistical Modeling	5
STAT 208	Linear Statistical Models	5
STAT 226	Spatial Statistics	5

Other Requirements

Students must pass a comprehensive capstone requirement to receive their degree. This capstone requirement consists of a comprehensive examination, which will take place within two weeks of spring graduation. Students who do not pass the June examination may take it again in August at a date scheduled by the department. Further attempts at passing the comprehensive examination will be approved by the master's committee on an appeal-only basis, with appeals only given for extraordinary or extenuating circumstances.

Students may choose an emphasis in their comprehensive exam requirement based on their academic and professional interests, as reflected in their choices. For the 2019-20 cohort, the applied microeconomics and finance exams, respectively, will consist of one section each from the following courses:

Applied Microeconomics

- ECON 200*
- ECON 201*
- ECON 216 or 217
- ECON 259B

Finance

- ECON 231
- ECON 233*
- ECON 235
- ECON 236*

To complete the capstone exam requirement, students must declare an intended emphasis for the capstone from the following three options prior to June 1 of their spring quarter:

1. Applied Microeconomics: Students must pass the applied microeconomics exam in full
2. Finance Emphasis: Students must pass the finance exam in full
3. General Emphasis: Students must pass the core components of both exams (see courses designated by *).

For those students who have specific research interests and have distinguished themselves in their coursework, a faculty-sponsored research project and thesis may replace the

comprehensive examination requirement. This track requires approval of a faculty adviser and the master's degree committee prior to Feb. 1 of the student's initial winter quarter.

Academic Progress

Along with enrolling in the necessary number of units, students are expected to maintain satisfactory academic standing during their time at UCSC. Students not making satisfactory progress will be placed on academic probation, and students will be dismissed from the program if they do not remove their probationary status within one quarter. For example, if a student is placed on probation starting in the winter quarter, they must improve to the extent that their probationary status is removed by the beginning of the spring quarter.

Specifically, a student will be placed on academic probation if they fail any of the non-elective, 5-credit courses in the program. Students will be dismissed from the program if they fail core courses in consecutive quarters within any field in the program. There are two fields in the program: applied economics and finance. The applied economics field includes ECON 200, ECON 216, ECON 217, and ECON 201. The finance field includes ECON 233, ECON 202, and ECON 236.

Note that probation and dismissal can only be formally issued by the Graduate Division (under recommendation from the Economics Department). More details on these procedures, as well as student's right to appeal such decisions, can be found in the Graduate Division Handbook.

Applying for Graduation

By the end of the second week of instruction in the quarter you intend to graduate, you must file an "Application for Degree" form with the Division of Graduate Studies.

ECONOMICS PH.D.**Introduction**

The Ph.D. program in economics provides students with training in modern microeconomics, macroeconomics, and econometrics, combined with specialized training in the fields of international finance, international trade, economic development, monetary economics, applied microeconomics, experimental economics, and other areas.

Advancement to Candidacy**Course Requirements**

First-year Ph.D. students are required to enroll in the following courses:

- ECON 210B*, and the three sequences:
- ECON 204A-ECON 204B-ECON 204C, Advanced Micro Theory I-II-III;

- ECON 205A-ECON 205B-ECON 205C, Advanced Macro Theory I-II-III; and
- ECON 211A-ECON 211B-ECON 211C, Advanced Econometrics I-II-III.

* Scheduled in pre-fall as a three-week math camp that precedes the start of fall quarter. The three sequences are taken during the traditional academic year.

Second-year Ph.D. students are required to complete two field sequences, and take 30 units of coursework in the second year. Only two courses per topic are needed to satisfy one sequence. Students may choose one of the following sequences:

- International Trade I-II (ECON 240A-ECON 240B),
- Advanced International Finance I-II-III (ECON 241A-ECON 241B-ECON 241C),
- Development Economics I-II (ECON 220A-ECON 220B),
- Advanced Methods in Macroeconomics I-II-III (ECON 221A-ECON 221B-ECON 221C),
- Applied Microeconomics I-II-III (ECON 250A-ECON 250B-ECON 250C), and
- Experimental Economics (ECON 238*, ECON 270, ECON 272*);

*Normally offered in alternate years

Students are required to submit a second-year field paper which is **due on Aug. 31**, just before the start of the third year. The department's graduate online handbook details the evaluation procedure for the field papers.

Third-year Ph.D. students must attempt and pass the Oral Qualifying Exam by the end of the fall quarter. In addition, students must enroll in a workshop focused on advanced topics in their field of interest: ECON 274, ECON 275, or ECON 276. In addition, students enroll in ECON 299B, Doctoral Thesis Research (10 units), under their adviser.

Fourth-year Ph.D. students and beyond are focused on their dissertation research and enroll in ECON 299B, Doctoral Thesis Research (10 credits), and a workshop focused on advanced topics in their field of interest: ECON 274, ECON 275, or ECON 276.

All graduate courses must be taken for letter grade with the exception of ECON 210B, ECON 274, ECON 275, ECON 275 and courses numbered ECON 293 and higher. Only courses with a letter grade of B- or higher can be counted toward the degree requirements.

Ph.D. Courses and Program Requirements

First Year

ECON 204A	Advanced Microeconomic Theory I	5
ECON 204B	Advanced Microeconomic	5

ECON 204C	Theory II Advanced Microeconomic Theory III	5
ECON 205A	Advanced Macroeconomic Theory I	5
ECON 205B	Advanced Macroeconomic Theory II	5
ECON 205C	Advanced Macroeconomic Theory III	5
ECON 211A	Advanced Econometrics I	5
ECON 211B	Advanced Econometrics II	5
ECON 211C	Advanced Econometrics III	5
ECON 210B	Mathematical Methods for Economic Analysis	5

At the conclusion of the first year, students are required to take and pass microeconomic and macroeconomic preliminary examinations, which are scheduled end of June with a make up in September.

Second Year

Complete 30 units of coursework and complete two field sequences.

ECON 220A	Development Economics I	5
ECON 220B	Development Economics II	5
ECON 221A	Advanced Methods in Macroeconomics I	5
ECON 221B	Advanced Methods in Macroeconomics II	5
ECON 238	Market Design: Theory and Pragmatics	5
ECON 240A	International Trade I	5
ECON 240B	International Trade II	5
ECON 241A	Advanced International Finance I	5
ECON 241B	Advanced International Finance II	5
ECON 241C	Advanced International Finance III	5
ECON 250A	Applied Microeconomics I	5
ECON 250B	Applied Microeconomics II	5
ECON 270	Advanced Topics in Applied Microeconomics	5
ECON 272	Evolutionary Game Theory	5

Second-year field paper: due on Aug. 31 after the second year.

*Not all field sequences are offered every year or in the same quarter each year.

Third Year

ECON 274	Workshop in Macroeconomics and Monetary Economics	3
ECON 275	Workshop in Applied Microeconomics	3
ECON 276	Workshop in Experimental Economics	3
ECON 299B	Doctoral Thesis Research	10

Qualifying examination (QE) is required during the third year. (See Qualifying Examination (p. 498).)

Fourth Year and Beyond

ECON 274	Workshop in Macroeconomics and Monetary Economics	3
ECON 275	Workshop in Applied Microeconomics	3
ECON 276	Workshop in Experimental Economics	3
ECON 299B	Doctoral Thesis Research	10

Based on university policy, course requirements are satisfied by a letter grade of B- or better or a grade of S (satisfactory). A letter grade of C in a course is not satisfactory for meeting a course requirement for the Ph.D. program.

Foreign Language Requirements**Teaching Requirement****Pre-Qualifying Requirements**

First-year students take two written preliminary examinations; one each in Micro and Macro, in the second week after final exams in June. Students who do not pass either exam may attempt the exam again in September at a date scheduled by the department. Students who fail either exam twice are not allowed to continue in the program.

Second-year students must complete a field paper that consists of original research demonstrating the student's readiness to undertake the Ph.D. in economics. The paper is due on Aug. 31 in the summer after the second year in the program.

Qualifying Examination

Advancement to candidacy for the Ph.D. degree requires completion with satisfactory grades or better of the required coursework, preliminary examinations, the field paper, and the oral examination. The oral examination is taken after all other requirements have been completed. A student cannot advance to candidacy before clearing any incomplete grades from their record. Students are expected to complete the oral qualifying examination (QE) during the fall quarter of their third year.

Post-Qualifying Requirements**Dissertation****Dissertation**

The final requirement for the Ph.D. degree is acceptance of the student's dissertation under the rules of the Academic Senate. A three-member dissertation advisory committee, headed by the student's research adviser, evaluates the dissertation for the department. The dissertation advisory committee must be approved by both the economics Ph.D. committee and the Graduate Division. The committee may require a formal public defense of the dissertation.

Dissertation Defense**Academic Progress**

The main requirements for the program are as follows:

- Students must pass all first year courses.
- Students must pass the micro and macro preliminary exams within the maximum 2 attempts.
- Students must pass the 2nd-year paper, due on Aug. 31st in the summer after the second year.
- Students must pass the oral qualifying exam. This is expected to be completed by the end of the fall quarter of the third year.
- Students must pass a workshop in each quarter in years three and above.

Students who fail to meet any of these requirements within the timeline specified will be placed on academic probation with the Graduate Division. Students who fail to rectify the terms of their probation within the timeline specified in their probation will be dismissed from the program. Note that probation and dismissal can only be formally issued by the Graduate Division (under recommendation from the Economics Department). More detail on these procedures, as well as student's right to appeal such decisions, can be found in the Graduate Division Handbook. The minimum residency requirement for a Ph.D. degree at UC Santa Cruz is six quarters. To receive a graduate degree from UC Santa Cruz, you must be registered at the Santa Cruz campus for at least three of the six quarters. A minimum of one quarter in residence must elapse between advancement to candidacy and awarding of degree.

Applying for Graduation

By the end of the second week of instruction in the quarter you intend to graduate, you must file an "Application for Degree" form with the Division of Graduate Studies.

Science Education B.S. (p. 334)

The purpose of the Education Department's instructional programs is to prepare all students—both undergraduates and graduates—to engage in the analysis and integration of educational theory, research, and practice for an increasingly diverse society. Our commitment is built around four interrelated domains: 1) schools, families, and communities; 2) teacher education and teacher development; 3) language, literacy, and learning; and 4) mathematics and science education. Foundational to our programs is an acknowledgment of the social, cultural, and political contexts in which all aspects of education occur.

The Education Department offers a doctor of philosophy (Ph.D.) program for students who have exemplary academic preparation as well as experience working in educational settings. We offer a master's level/teaching credential (MA/C) teacher-preparation program. And we have two vibrant undergraduate education minor tracks that serve more than 300 undergraduates each year.

Undergraduate Program

The UC Santa Cruz undergraduate courses in education engage students in histories of educational thought and philosophy, the politics and economics of education, multiple approaches to learning theory and teaching pedagogy, and contemporary issues of cultural and linguistic diversity in education.

Because an academic major in teaching is not permitted in the state of California, UC Santa Cruz instead offers two minors in education for students who are considering a career in teaching or who hold a more general interest in educational studies. Please note that the minors in education do not

provide a California Teaching Credential. Additionally, please note that the UC Santa Cruz teaching credential program is a graduate program and coursework taken in the minor cannot be substituted for credential requirements.

Students considering a career in K-12 school teaching should start planning in their junior year. Find out more here.

EDUCATION MINOR (GENERAL)

DECLARING THE MINOR

To officially declare a general minor in education, students must bring a completed Petition for Major/Minor Declaration and UC Santa Cruz Academic Planning Form to the Education Department's undergraduate adviser. Students pursuing a minor in education should meet with the Education Department's undergraduate adviser as early as possible.

To be eligible to declare the general minor in education, students must have:

- Attended an Education Minor Workshop
- Completed or be enrolled in EDUC 60, Introduction to Education
- Successfully declared a major.

For specific instructions about how to declare a minor in education and for the current Drop-in Advising Schedule, please refer to the Education Department's website. For other inquiries, please contact the undergraduate adviser by sending an email to education@ucsc.edu.

Course Requirements

The general minor in education consists of six courses totaling 30 credits:

Lower-Division Courses

EDUC 60	Introduction to Education: Learning, Schooling, and Society	5
---------	---	---

Upper-Division Courses

EDUC 180	Introduction to Teaching	5
----------	--------------------------	---

EDUC 180 includes a 30-hour classroom observation practicum.

For EDUC 180, background checks (Live Scan Fingerprinting), evidence of a negative TB test, and Mandated Reporter training are required of all participants prior to the first day of instruction. The department will contact enrolled students with information about how to complete these items.

Plus, four upper-division elective education courses

Please refer to the Education Department's website for a list of approved upper-division courses (courses numbered EDUC 102-EDUC 187) being offered during the current academic year.

Declared minors have priority enrollment for upper-division education courses. Upper-division electives may be taken before EDUC 180.

SCIENCE, TECHNOLOGY, ENGINEERING, AND MATHEMATICS (STEM) EDUCATION MINOR

The Science, Technology, Engineering, and Mathematics (STEM) education minor specifically serves students in STEM majors who are considering careers in secondary mathematics or science teaching.

Students pursuing the STEM education minor should meet with the Cal Teach staff as early as possible. Entry into EDUC 50 is by application only, and interested students must submit an application to the Cal Teach program (see the Cal Teach website or email calteach@ucsc.edu). Entry into EDUC 100 and EDUC 185L is contingent upon successful completion of previous Cal Teach internships and sufficient university-level science or mathematics coursework.

Course Requirements

The STEM minor in education consists of eight courses, totaling 32 credits and including approximately 75 hours of classroom field placements.

Lower-Division Courses**Choose one of the following courses**

EDUC 50A	CAL Teach 1: Science and Mathematics	2
EDUC 50B	CAL Teach 1: Mathematics	2
EDUC 50C	CAL Teach 1: Science	2

Plus the following course

EDUC 60	Introduction to Education: Learning, Schooling, and Society	5
---------	---	---

Upper-Division Courses**Choose one of the following courses:**

EDUC 100A	Cal Teach 2: Science and Mathematics	2
EDUC 100B	Cal Teach 2: Mathematics	2
EDUC 100C	Cal Teach 2: Science	2

Plus one of the following courses:

EDUC 185B	Introduction to Mathematics Education	5
EDUC 185C	Introduction to Teaching Science	5

Plus the following course:

EDUC 185L	Introduction to Teaching: Cal Teach 3	3
-----------	---------------------------------------	---

Plus one upper-division education course addressing cultural and linguistic diversity:

EDUC 125	Multicultural Children's Literature for Elementary Classrooms	5
EDUC 128	Immigrants and Education	5
EDUC 135	Gender and Education	5
EDUC 140	Language, Diversity, and Learning	5
EDUC 141	Bilingualism and Schooling	5
EDUC 164	Urban Education	5
EDUC 170	East Asian Schooling and Immigration	5
EDUC 171	South and Southeast Asian Schooling and Immigration	5
EDUC 177	Teaching Culturally and Linguistically Diverse Students Math and Science	5
EDUC 181	Race, Class, and Culture in Education	5

Plus two upper-division education courses (courses numbered EDUC 102-EDUC 187).

Please refer to the Education Department's website for a list of approved upper-division courses being offered during the current academic year.

Graduate Program

EDUCATION AND CALIFORNIA TEACHER CREDENTIAL PROGRAM M.A.

Introduction

The master of arts (M.A.) in education and California teaching credential program prepare prospective teachers to work with California's culturally and linguistically diverse student population. Students in this program earn a master's degree and are eligible to apply for a Preliminary California Credential upon completing a 12-month, five-quarter program comprised of two summers and one academic year. Graduates of the program are prepared to teach English language learners enrolled in K–12 public schools. The program also offers the Bilingual Authorization (in Spanish) for primary language instruction or dual language immersion instruction in a K–12 setting.

Please note that we do not offer a stand-alone Master of Arts in Education nor a stand-alone credential program. Additionally, holders of a previously issued California or out-of-state credential are not eligible for admission to the program.

Students who complete the program are eligible to apply for a California Preliminary Multiple Subjects Teaching Credential or a California Preliminary Single Subject Teaching Credential. The Multiple Subjects Teaching Credential authorizes the holder to teach in a K–6, self-contained public school classroom, where all subjects are taught by the same teacher. The Single Subject Teaching Credential authorizes the holder to teach in his/her credential subject area in a 6–12 departmentalized classroom setting within a public school system.

The UCSC single-subject, teacher-credential program offers the following subject areas: mathematics, English, social science, and science. Programs of study are subject to change.

Because program requirements are authorized by statutes and regulated by a state entity, the California Commission on Teacher Credentialing program requirements must be responsive to new legislation and regulatory policies. Admission requirements and programs of study referred to are subject to change to comply with regulatory mandates.

Prerequisite Admission Requirements

All candidates for the M.A./Credential program must have preparation in the following areas:

A course, or equivalent experience, that addresses cultural and linguistic diversity. The following UC Santa Cruz undergraduate education courses are examples of courses that meet this requirement: EDUC 128, Immigrants and Education; EDUC 141, Bilingualism and Schooling; EDUC 164, Urban Education; EDUC 181, Race, Class, and Culture in Education. (Additional education undergraduate courses that satisfy this requirement are listed on the Education Department's website.) Other courses offered outside the Education Department may be acceptable however, outside coursework cannot be preapproved, by the department. When applying to the program note your outside coursework in your statement of purpose along with an explanation as to how your coursework addresses cultural and linguistic diversity.

A documented field experience with children or youth in an educational setting at the general age level which the candidate aspires to teach. Experiences such as directed observation, substitute teaching, school tutoring, work in after-school programs, camp counseling, instructional aide, or the equivalent are acceptable experiences. When applying to the program, please describe your field experience in the designated area of the application titled Statement of Purpose.

Application Selection Criteria

Admission to the program is competitive. Candidates for admission are selected, in part, on the following criteria:

Academic Record

College coursework is evaluated with attention to content and grades or narrative evaluations. The appropriateness of courses taken for the credential sought is also taken into consideration. For the multiple subjects credential, students should have an extensive breadth of courses in the core subject areas taught in elementary school—mathematics, science, social science, and English. For the single subject credential, students should have an extensive body of coursework in the content area.

Statement of Purpose, Writing Sample, Letters of Recommendation, Personal History, and Résumé

Information provided in these documents is used in the selection of candidates. All documents must be submitted by the application deadline.

The **Statement of Purpose** should discuss the following:

- an explanation of why you want to become a teacher
- how your experience has contributed to your motivation and potential to be an educational leader
- a description of your experiences related to youth, cultural and linguistic diversity, and community involvement

Writing Sample:

- a sample of your writing (no more than 10 pages)
- a research-based paper is preferred, for example, a paper written on an educational topic or a paper written in your content area
- alternatively, applicants may choose to write a brief piece specifically for this application

Letters of Recommendation:

- three letters of recommendation are required
- at least one letter should be written by university faculty who can address the applicant's academic merit and subject area expertise, and at least one letter written by someone in the field who has observed the applicant's work with children or youth in the applicable general age-group for the credential you are seeking through the UCSC Credential Program.
- it is recommended that these letters are current and address your qualifications in the following areas:
 - academic performance and subject-area expertise
 - field work with youth
 - experience in culturally and linguistically diverse settings and with student populations who have traditionally been underserved in schools and classrooms

Personal History:

- write a statement (approximately two to five pages) explaining how your personal history has influenced your decision to apply to this graduate program

Résumé:

- a résumé that includes an employment history; any relevant volunteer or community work, especially in schools and/or with children; and experiences in multicultural and multilingual settings
- include information on languages (other than English) in which you have competence

Bilingual Authorization Essay (Bilingual Authorization applicants only):

- candidates must submit an essay in Spanish as described in the online application

Admission Requirements

Testing

All required examinations must be met by the stated deadlines.

California Basic Skills Requirement

All admitted applicants must verify completion of the California Basic Educational Skills requirement and submit a passing-status verification by June 1 in order to enroll in the program. However, applicants are strongly encouraged to complete this requirement prior to applying to the program. Exam registration confirmations and/or exam score reports must be submitted at the time of application via the online application.

Information on the options for completing this requirement can be found in the following California Commission on Teacher Credentialing Information Leaflet c1667.

Subject-Matter Competence

California state law mandates that all teachers provide evidence of their subject-matter knowledge (state requirement and subject to change).

Admitted Multiple Subject applicants must submit verification of having passed the California Subject Examinations for Teachers (CSET): Multiple Subjects Subtests I-III by June 10 prior to enrollment in the program. However, it is highly recommended that documentation of passing CSET scores be submitted with the application. Multiple Subject applicants must pass each section of the CSET; no coursework or "waiver" program can substitute for passing CSET scores.

Deadline to complete this requirement: June 10 of each year prior to enrollment into the program. However, applicants are encouraged to complete this requirement prior to applying to

the program. Exam registration confirmations and/or exam score reports must be submitted at the time of application via the online application.

Additional information can be found at the CSET Registration website.

Single Subject

The California Subject Examinations for Teachers (CSET), or verification of an approved subject matter program from the applicant's undergraduate institution is required. Admitted applicants must submit verification of having passed the CSET examination for their subject (e.g., mathematics), or confirmation of 100 percent completion of an approved subject matter program.

Deadline to complete this requirement: June 10 of each year prior to enrollment into the program. However, applicants are encouraged to complete this requirement prior to applying to the program. Exam registration confirmations and/or exam score reports must be submitted at the time of application via the online application. Additional information can be found at the CSET Registration website.

Certificate of Clearance

In accordance with Education Code Section 44320(b), each credential candidate for an initial credential, prior to admission to any credential program, must have their fingerprints cleared by the Federal Bureau of Investigations and the California Department of Justice and obtain a Certificate of Clearance from the California Commission on Teacher Credentialing.

To comply with this regulation, the UCSC Education Department requires all applicants to provide evidence of obtaining their clearance as part of their application for admission to the credential program. Applicants are required to upload a copy of their Certificate of Clearance within their program application by the January 15 application deadline.

Detailed instructions for obtaining a Certificate of Clearance including the required LiveScan fingerprinting form LS-41 can be found on the commission's website.

NOTE: A U.S. Government-issued social security number or ITIN is required to apply for a Certificate of Clearance and the fingerprinting process.

Applicants who hold a valid (non-expired) Emergency 30-Day Substitute Teaching Permit are not required to reapply for a Certificate of Clearance. Please submit verification of your **valid** Emergency Permit with your program application by the January 15 application deadline.

Out-of-state/international applicants **must** contact the UCSC Education Department for further instructions: education@ucsc.edu.

Applicants should be aware that a criminal conviction on their record may preclude them from obtaining a Certificate of Clearance.

Program and State of California Requirements (Not Required for Initial Admission to the Program)

Many of the program and State of California requirements detailed on the Requirements tab (p. 505) may be met, but are not required prior to enrollment in the program. See the link above for details regarding each of these requirements and how they may be met before admission and enrollment.

Bilingual Authorization Candidates

CSET—Spanish Language and Culture of Emphasis Requirements

- The CSET LOTE (Spanish) Subtest III (CSET test code 147) and CSET LOTE (Spanish) Subtest V (CSET test code 258) (Culture of Emphasis) are required. Admitted applicants must submit verification of having passed the examination **prior** to completing the final quarter of the M.A./Credential program.
- Additional testing information can be found at the CSET Registration website.

Three-page essay in Spanish

Bilingual Program applicants will be required to submit a three-page essay in Spanish with their application to the M.A./Credential Program. The essay should address topical questions listed on the Education M.A. Supplemental Application contained within the online UCSC Graduate School Application.

For further Information

Please contact the department by email to education@ucsc.edu, or view the Education Department's

home pagewhere potential applicants can obtain full details about the programs.

Requirements

Course Requirements

Capstone Requirements

Students will complete a capstone portfolio, which includes a teaching performance assessment and reflective papers. Prompts for these assignments may vary from year to year as they reflect the most current California state credentialing requirements.

Multiple Subject Course Requirements

Take all of the following:

EDUC 200	Beginning Student Teaching	5
EDUC 201	Intermediate Student Teaching	5
EDUC 202A	Advanced Student Teaching	5
EDUC 202B	Advanced Student Teaching	5
EDUC 202C	Advanced Student Teaching	5
EDUC 203	Teaching English Language Development: Foundations, Approaches, and Strategies	5
EDUC 205	Teaching, Learning, and Schooling in a Diverse Society	5
EDUC 207	Social Foundations of Education	5
EDUC 208	Portfolio Development	2
EDUC 210	Health, Safety, and Community	2
EDUC 211	Teaching Special Populations in the General Education Classroom	2
EDUC 213	Child and Adolescent Development for Educators	2
EDUC 214	Contemporary Issues in Education	2
EDUC 217	Topics in Elementary Education: Physical Education	2
EDUC 218	Topics in Elementary Education: Visual Arts	2
EDUC 219	Topics in Elementary Education: Performing Arts	2
EDUC 220	Reading and Language Arts for Elementary Classrooms	5
EDUC 221	Science Learning and Teaching in Elementary Classrooms	5
EDUC 222	Mathematics Learning and Teaching in Elementary Classrooms	5

EDUC 212A, EDUC 212B, EDUC 212C: Bilingual Authorization students only

Single Subject Course Requirements

Take all of the following:

EDUC 200	Beginning Student Teaching	5
EDUC 201	Intermediate Student Teaching	5
EDUC 201A	Intermediate Student Teaching: Single Subject	5

EDUC 202A	Advanced Student Teaching	5
EDUC 202B	Advanced Student Teaching	5
EDUC 202C	Advanced Student Teaching	5
EDUC 204	Methods of English Language Development: Single Subject	5
EDUC 206	Teaching, Learning, and Schooling: Single Subject	5
EDUC 207	Social Foundations of Education	5
EDUC 208	Portfolio Development	2
EDUC 210	Health, Safety, and Community	2
EDUC 211	Teaching Special Populations in the General Education Classroom	2
EDUC 213	Child and Adolescent Development for Educators	2
EDUC 214	Contemporary Issues in Education	2
EDUC 225	Reading Across the Curriculum in Middle School and Secondary	5

EDUC 212A, EDUC 212B, EDUC 212C: Bilingual Authorization students only

Single Subject Credential students enroll in the two methods courses related to their subject area:

EDUC 226	English Teaching: Theory and Curriculum	5
EDUC 227	English Teaching for Secondary Classrooms	5
EDUC 228	Math Education: Research and Practice	5
EDUC 229	Teaching Mathematics in the Secondary Classroom	5
EDUC 230	Science Education: Research and Practice	5
EDUC 231	Teaching Science in the Secondary Classroom	5
EDUC 232	Social Science: Theory and Curriculum	5
EDUC 233	Social Science Teaching for Secondary Classrooms	5

Bilingual Authorization Course Requirements

Take all of the following:

EDUC 212A	Bilingualism and Biliteracy: History, Politics, Theory, and Practice	2
EDUC 212B	Bilingualism and Biliteracy: Language, Literacy and Content Instruction	2
EDUC 212C	Bilingualism and Biliteracy: Community and School Partnerships	2

Other Requirements

Test

Program and State of California Requirements

(Not Required for Initial Admission to the Program)

These requirements may be met prior to or while enrolled in the program, but they must be met to be eligible for a California teaching credential.

U.S. Constitution Requirement

A course on the U.S. Constitution (or completion of an examination offered by the Education Department to enrolled students) is required. UCSC-approved courses that meet this requirement are POLI 20, American Politics; POLI 111/LGST 111, Constitutional Law; POLI 120A, Congress, President, and the Court in American Politics; and HIS 10A, United States History to 1877.

Admitted applicants must submit verification of completing the U.S. Constitution Requirement prior to completing the final quarter of the M.A./Credential program.

Preliminary Technology (Level 1) Requirement

All candidates for their credential must fulfill the requirements for Level 1 technology skills which includes general and specialized skills in the use of computers in educational settings.

UC Santa Cruz students meet this requirement in one of two ways:

- Option 1: Pass the CSET Preliminary Educational Technology Subsets I & II, (CSET test codes 133 & 134). For more information, see the Technology Subsets I & II information on the CSET website.
- Option 2: Pass the UCSC approved course offered through the UCSC Extension Program, XSC209, Technology in Schools, Introduction (online format).

Admitted applicants must submit verification of completing the Level 1 Technology Requirement **prior** to completing the final quarter of the M.A./Credential program.

Reading Instruction Competence Assessment (RICA)

Multiple Subjects candidates are required—prior to completion of the program and in order to be recommended for a preliminary credential—to pass the RICA examination. The RICA measures the knowledge, skills, and abilities essential to offer effective reading instruction to K–12 students. For more information on the RICA examination, see the RICA examination information on the CSET website.

Candidates should not take this examination prior to completing EDUC 220.

Admitted applicants must submit verification of having passed the RICA **prior** to completing the final quarter of the M.A./Credential program.

CPR

A certified cardiopulmonary resuscitation (CPR) course (infant, child, and adult) must be completed and valid upon application for the credential.

Admitted applicants must submit verification of obtaining certification in Infant/Child/Adult CPR prior to completing the final quarter of the M.A./Credential program.

Tuberculosis (TB) Test

All K-12 schools require anyone working with children to be tested for TB. You can get tested through the UCSC Student Health Center (831-459-2500 to make an appointment) or your private doctor. A copy of your official results must be turned into the Education Department before the end of the first summer quarter.

Student Teaching

The successful development of teaching skills in the classrooms is the culmination of a teacher education program. Therefore, candidates must demonstrate, by the end of their program, teaching competence in the classroom. Credentialed public school teachers are responsible for the nurturing of children and youth. Therefore, teaching credential candidates must consistently display conduct befitting the profession. To this end, the candidate must be able to cope with the demands and responsibilities of teaching as outlined below:

- Meet university and program requirements and deadlines (including school expectations during field experiences).
- Plan ahead to anticipate the transportation needs and potential demands of student teaching.
- Be able to adapt to institutional and/or professional expectations and policies.
- Relate appropriately to children, parents, and school staff.
- Demonstrate sensitivity to the social, cultural, and economic context of the school environment.
- Adhere to school expectations for dress, appearance, and personal hygiene.

Candidates whose professional behavior does not meet these minimal standards may be recommended for dismissal from the program.

Beginning Student Teaching, which begins in August during the Summer Bridge between the university summer and fall quarters, constitutes the first classroom observation experience for students in the program, and continues through most of fall quarter. Student teachers are in their classroom placements from 10–14 hours a week depending on the school site schedule. To enroll in this course, students must have a Certificate of Clearance issued and on file with the California Commission on Teacher Credentialing.

Intermediate and advanced student teaching begins late fall and continues through winter and spring, until the end of the academic year in June. Student teachers are placed with

cooperating teachers in local schools throughout Santa Cruz County and beyond. Students are in the classroom placements 14 or more hours a week in winter quarter leading toward full time in the classroom by spring quarter. They gradually assume responsibility for preparation, instruction, and evaluation of the class during this period. Supervisors of teacher education give ongoing and frequent support to students in their classroom placements and in seminars at UCSC. Multiple Subject candidates obtain classroom experience in both primary and intermediate grades. Single Subject candidates obtain classroom experience in middle school/junior high and high school.

Admission to EDUC 201 and EDUC 201A, Intermediate Student Teaching, and EDUC 202A-EDUC 202B-EDUC 202C, Advanced Student Teaching, is based on an assessment of academic performance, experience, leadership, and initiative shown in public school placements and required courses taken earlier in the program. Please note that passing the CSET examination is a requirement for Advanced Student Teaching. Students who have not completed the CSET requirement prior to winter quarter will be asked to take a leave of absence from the program.

Applying for Graduation

EDUCATION PH.D.

Introduction

The goal of the Ph.D. in education is to support graduate students in becoming creative scholars who engage in research focused on the educational needs of students from linguistic and cultural groups that have historically not fared well in our nation's public schools. To achieve this goal, this program provides students with grounding in the varieties of interdisciplinary theorizing, research methods, and applications needed to advance the study of learning and teaching for diverse student populations. The courses and research experiences are closely related to practice in K-12 classrooms and informal settings. Students in this interdisciplinary program apply tools and perspectives from education, anthropology, linguistics, philosophy, psychology, sociology, cognitive science, and cultural historical activity theory. The program integrates theory and practice to examine learning and teaching within the multiple contexts of classroom, school, family, and community. Graduates of this program will be qualified to teach and to conduct the kinds of educational research demanded by tenure-track positions in research and regional universities. Graduates may also work in non-university based institutions that focus on teacher professional development, curriculum development, and related areas of educational research and development.

Together with his or her faculty adviser, each student develops an integrated program of study that includes advanced coursework, seminars, and electives. Students learn through an apprenticeship model in which they develop expertise through active participation in research. Courses may be taken in other departments, when appropriate.

PH.D. ADMISSIONS GUIDELINES

The minimum GPA established by the University of California for admission to graduate school is 3.0. In general, the Ph.D. in education program looks for potential excellence in graduate students, whether this manifests itself in a high GPA, strong letters of recommendation, a high Graduate Record Examination (GRE) score, or a strong Statement of Purpose. Applicants will be evaluated on their individual merits and also with regard to how well their proposed doctoral research can be supported by the existing resources of the program.

Admission Requirements

- Bachelor's degree, or its equivalent, from an accepted university prior to the quarter for which admission is sought
- 3.0 GPA or above
- Official GRE scores taken within the last five years
- Experience working with culturally and linguistically diverse students and/or communities
- Statement of Purpose
- Personal History Statement
- A writing sample, preferably in education or a related field. The sample can be a term paper, a field report, a research proposal, or an essay written especially for the application
- Official transcripts from all colleges/universities attended after high school
- Three current recommendation letters specifying potential for academic or scholarly work
- Current résumé
- Application fee
- International applicants must take the Test of English as a Foreign Language (TOEFL) or the International English Language Testing System (IELTS) test. A minimum score of 550 on the TOEFL (paper), 220 on the TOEFL (computer), or 83 on the Internet-based test is required for admission. For those choosing to take the IELTS, a minimum overall score of 7 is required. The program follows Graduate Division guidelines when considering TOEFL waivers.

Prior to completing your application, we highly recommend a personal (in person or on the phone) interview with at least

one of our faculty members. Please contact an education faculty member whose research interest is similar to your own (for descriptions of faculty research, please visit the Education Department website).

Financial Support

It is each student's responsibility to secure funding for graduate studies. Over the course of students' enrollment in the graduate program, students typically fund their education with some combination of the following: TAships, GSRships, UCSC graduate fellowships, scholarships or fellowships from outside sources, loans, personal savings, family income, and support from other individuals (e.g., extended family members). When possible, first-year students are supported with UCSC graduate fellowships that typically cover part of a student's expenses for the first year only. Beginning in the student's first year, he or she is strongly encouraged to apply for TAships in Education Department courses and in other departments on campus. Students are also encouraged to seek and apply for outside funding from government agencies, private foundations, and industry, and to plan alternative financing should none of these opportunities become available. After advancing to candidacy students can also apply for graduate student instructor positions (GSI-ships.)

Financial support for students includes a variety of fellowships, research assistantships, and teaching assistantships in the Education Department. Students may participate in research projects under the auspices of several interdisciplinary research centers and research projects. In the past, these have included the Chicano/Latino Research Center (CLRC), the Vocabulary Innovations in Education (VINE) project, The Teachers With Computers: Ward Annotations for Vocabulary Education (tecWAVE) project, English Language and Literacy Integration in Subject Areas (ELLISA), Effective Science Teaching for English Language Learners (ESTELL) project, The Center for Collaborative Research for an Equitable California (CCREC), and the Center for Educational Research in the Interest of Underserved Students (CERIUS). Recently, students have participated in research projects with the Center for Research on Equity and Collaborative Evaluation (CRECE) and the History & Civics Project (H&CP).

For Further Information

Contact the doctoral student adviser by sending an email to edphd@ucsc.edu or view the Education Department's home pagewhere potential applicants can obtain full details about the programs.

Advancement to Candidacy

Course Requirements

During the first two years of study, all students are expected to enroll in a set of required courses, including foundational courses, methodology courses, and elective courses. The student and his/her faculty adviser will determine the overall program of study, depending on the student's preparation, interests, and plans. The program encourages interdisciplinary study.

Course Requirements and Sequencing

The following courses constitute the minimum requirements: four foundational courses, five research methods courses, four elective courses, one additional course in any category, a second-year project independent study, and a research apprenticeship. Incoming students consult with their faculty advisers about the current course offerings to determine the order in which they will complete required courses. Students are encouraged to take courses beyond the minimum required; in consultation with their advisers, students will determine the full set of research methods and elective courses they will complete based on their intellectual interests and professional goals. All required courses must be completed prior to advancement to candidacy.

The department typically offers approximately eight doctoral courses during each year. The Education Department annually admits 7-10 Ph.D. students, leaving room for doctoral students from other departments to take courses in education.

Courses required before advancing to candidacy:

EDUC 235	Introduction to Educational Inquiry	5
EDUC 236	Quantitative Research Methods	5
EDUC 237	Qualitative Research Methods	5
EDUC 250	Teaching and Teachers	5
EDUC 255	Intermediate Quantitative Methods	5
EDUC 256	Intermediate Qualitative Analysis	5
EDUC 261	Thinking and Learning	5
EDUC 262	Social and Cultural Context of Education	5
EDUC 272	Language in Education and Society	5

And four electives, two of which must be from the list below:

Choose two of the following:

EDUC 263	Educational Reform	5
EDUC 264	Research on Teacher Development and Teacher Education	5
EDUC 268	Schools, Communities, and Families	5
EDUC 280	Language and Literacy Across Disciplines	5
EDUC 286	Research in STEM Education	5
EDUC 295	Critical Perspectives on Education	5

Plus one additional course from any category

Plus the following courses:

A combination of these courses to equal at least 5 credits:

EDUC 293A	Research Apprenticeship	2
EDUC 293B	Research Apprenticeship	5
EDUC 294	Second-Year Research Project	5

The following may also be counted toward meeting elective requirements:

- M.A. course in Education with additional readings and assignments. (One maximum to count toward the four electives and/or the additional course.)
- Independent Study. (One maximum to count toward the four electives and/or the additional course.)
- Undergraduate upper-division course with additional readings and assignments. (One maximum to count toward the four electives and/or additional course.)

Other Requirements

Students are required to attend the Education Department's colloquium series during their first and second years in the program.

Students are required to complete a second-year project paper (the same project to be approved for the en route M.A.). The final version must be approved by two faculty readers (by the end of year two or by the first day of fall quarter in year three).

Foreign Language Requirements

Teaching Requirement

The education Ph.D. program emphasizes teaching experience, and all students are required to complete one TAship or teaching internship in education prior to advancement to candidacy.

Pre-Qualifying Requirements

Students are required to attend the Education Department's colloquium series during their first and second years in the program.

Students are required to complete a second-year project paper (the same project to be approved for the en route M.A.). The final version must be approved by two faculty readers (by the end of year two or by the first day of fall quarter in year three).

Qualifying Examination

The qualifying examination is intended to assess a student's depth and breadth of knowledge in their areas of concentration and his/her competence to do extended dissertation-level research. Normally taken near the end of the third year of enrollment, the examination consists of both written and oral components. For the written portion, the student prepares three papers, two of which advance a

position based on a review of related research, theoretical framework, or research design/methods; the third is a dissertation prospectus. The student presents and defends their work at the oral examination.

Post-Qualifying Requirements

ADVANCEMENT TO CANDIDACY

To achieve Ph.D. candidacy, students are expected to pass an annual review of their written work, maintain satisfactory academic progress, complete all required courses, attend department colloquia, complete a second-year research project, complete a TAship or teaching internship, pass a qualifying examination (QE), and meet the specific requirements of the Division of Graduate Studies.

Advancement to Candidacy

To achieve Ph.D. candidacy, students are expected to pass an annual review of their written work, maintain satisfactory academic progress, complete all required courses, attend department colloquia, complete a second-year research project, complete a TAship or teaching internship, pass a qualifying examination, and meet the specific requirements of the Division of Graduate Studies.

Requirements for the M.A. Degree

Although applications for a master's degree independent of the Ph.D. program are not accepted, students in the Ph.D. program may obtain a M.A. degree after successfully completing a minimum of six quarters residency, a total of 75 course credits (including four foundational courses, five research methods courses, at least four elective courses, a minimum of two from the Education Electives list, one more course from any category, a 5-credit course for the second-year research project), and an approved and completed second-year research project. Students seeking an M.A. degree must adhere to the guidelines set forth by the Graduate Division.

Dissertation

Dissertation

A dissertation based on substantive original research is required.

Dissertation Defense

After the dissertation has been completed, students must defend the dissertation in an oral examination.

EDUCATION DESIGNATED EMPHASIS

Introduction

The Designated Emphasis in Education enables doctoral students in other departments to pursue interests in education and obtain formal certification of competence in the field of education. Most Education Department Ph.D. courses are offered every other year; the Education Department welcomes D.E. students from other departments to take courses in education. Students should work closely with their education adviser to develop a plan for taking the coursework in a timely fashion.

Education is an institutional field in which scholars from a wide variety of disciplines—including sociology, psychology, politics, economics, mathematics and science—have scholarly interests. A Designated Emphasis in Education enables graduate students from other departments to ground their work in theory and research on important issues in education.

Requirements

The requirements for obtaining a designated emphasis in education are the following:

Committee Composition and Departmental Approvals

Obtain a designated faculty adviser from the faculty in the Education Department. This faculty adviser will be in addition to the faculty adviser from the student's home department. The education faculty adviser must serve on the student's qualifying examination committee and, as appropriate, may also serve on the student's dissertation committee.

Course Requirements

Complete at least five EDUC doctoral courses, and 25 credits, from the following list, with no more than two in research methods. Any requests for substitutions must be approved by the Education Department graduate director.

The Education Department's foundational courses, EDUC 261 and EDUC 262, are offered in successive quarters every other year; and EDUC 263, an elective course, is offered every other year. The department typically offers approximately eight doctoral courses during each year. The Education Department annually admits 7-10 Ph.D. students, leaving room for doctoral students from other departments to take courses in education.

Choose five courses from the following options:

Choose five courses from the following options:

EDUC 235 Introduction to Educational

	Inquiry	
EDUC 236	Quantitative Research Methods	5
EDUC 237	Qualitative Research Methods	5
EDUC 250	Teaching and Teachers	5
EDUC 255	Intermediate Quantitative Methods	5
EDUC 256	Intermediate Qualitative Analysis	5
EDUC 261	Thinking and Learning	5
EDUC 262	Social and Cultural Context of Education	5
EDUC 263	Educational Reform	5
EDUC 264	Research on Teacher Development and Teacher Education	5
EDUC 268	Schools, Communities, and Families	5
EDUC 272	Language in Education and Society	5
EDUC 280	Language and Literacy Across Disciplines	5
EDUC 286	Research in STEM Education	5
EDUC 295	Critical Perspectives on Education	5

With no more than two courses from the following group:

EDUC 235	Introduction to Educational Inquiry	5
EDUC 236	Quantitative Research Methods	5
EDUC 237	Qualitative Research Methods	5
EDUC 255	Intermediate Quantitative Methods	5
EDUC 256	Intermediate Qualitative Analysis	5

And the remainder from this group:

EDUC 250	Teaching and Teachers	5
EDUC 261	Thinking and Learning	5
EDUC 262	Social and Cultural Context of Education	5
EDUC 263	Educational Reform	5
EDUC 264	Research on Teacher Development and Teacher Education	5
EDUC 268	Schools, Communities, and Families	5
EDUC 272	Language in Education and Society	5
EDUC 280	Language and Literacy Across Disciplines	5
EDUC 285	Culture and Learning	5
EDUC 295	Critical Perspectives on Education	5

Writing, Research and/or Teaching Requirements

Prepare a significant piece of writing in some area of education. This writing may take the form of a substantial position paper (QE paper) grounded in the literature of educational research, as determined by the graduate adviser in

education. In the event the education faculty adviser serves on the dissertation committee then the writing may instead be a dissertation chapter.

Academic Progress

For Further Information

Contact the doctoral student adviser by sending an email to edphd@ucsc.edu or view the Education Department's home page where potential applicants can obtain full details about the programs.

Environmental Studies/Biology B.A. (p. 513)

Environmental Studies/Earth Sciences B.A. (p. 518)

Environmental Studies/Economics B.A. (p. 523)

Environmental Studies Ph.D. (p. **Error! Bookmark not defined.**)

Undergraduate Program

The environmental studies major prepares students for meaningful lifetime engagement with the environmental challenges that are facing society. UCSC environmental studies graduates hold leadership positions as legislative and policy analysts, environmental lawyers, environmental managers, city and state planners, educators, restoration ecologists, organic farmers and agroecology specialists, conservation biologists, environmental engineers, museum curators, business consultants, and political advocates. In addition, many graduates go on to obtain professional, master's, or doctoral degrees at the nation's finest institutions.

Students pursue an interdisciplinary curriculum that combines coursework in the natural and social sciences. Introductory courses cover the ecological, political, and economic aspects of historic, current and future environmental issues. The core course, Environmental Studies 100/L, Ecology and Society builds on the skills acquired in the lower-division classes, and encourages students to apply ecological, economic, and political skills toward environmental and ecosystem management. The remaining upper-division elective courses further emphasize the integration of ecological knowledge with an understanding of social institutions and policies. The program emphasizes active, interdisciplinary learning with the overall objective of instilling the necessary skills to conserve biodiversity and integrate the principles of sustainability with respect to management of complex environmental systems. Faculty work on these issues at local, regional, and global levels, providing a unique, proactive, and progressive academic environment for students wishing to pursue a degree program within the Environmental Studies Department.

As a complement to classroom instruction and research, many courses have field components. The Environmental Studies Internship Program helps qualified students find placements with government and educational agencies, community organizations, and private firms. Furthermore, faculty-directed, independent, or field-oriented research courses allow environmental studies students the opportunity to learn more about their specific academic career or personal interests, often while earning academic credit.

In addition to the single environmental studies major, students may choose to pursue one of three combined majors with biology, Earth sciences, or economics. The combined major curricula offer the unique integration of the underlying concepts of environmental studies with a focus on the application of these concepts in a closely related field (or vice versa).

The general environmental studies B.A. major offers four concentrations in addition to the major without a concentration. Below are the concentrations offered in the environmental studies B.A. major.

AGROECOLOGY AND SUSTAINABLE FOOD SYSTEMS CONCENTRATION

The major academic objective of the agroecology and sustainable food systems concentration is to provide students within the environmental studies major with a depth of expertise in agroecology and sustainable agriculture. Students in the agroecology and sustainable food systems concentration will learn about ecological concepts that can be applied to the development of sustainable agricultural systems and will also develop their understanding of social, political, and economic aspects of agriculture. Students will also have access to hands-on experiences, and obtain skills in research, fieldwork, production, and communication in order to achieve multiple sustainability goals in complex, social-ecological food systems.

GEOGRAPHIC INFORMATION SYSTEMS CONCENTRATION

Geographic Information Systems (GIS) is an interdisciplinary field that links ecology, geography, and society to evaluate and facilitate environmental planning, policy, management and conservation. Within environmental studies, GIS addresses complex and interconnected social and ecological problems and fosters more sustainable environmental futures
