Block Enrollment

Building on the fundamentals in the Enrollment Request training, Block Enrollment allows users to add, drop, swap, and change grading basis *en masse*. Whenever possible it is recommended students submit enrollment requests themselves, however in certain, unique situations, it may be required for a staff member to submit enrollment requests.

This training manual documents the process by which one submits a block enrollment request. If you have questions please email T'chad Sanger (cpsanger@ucsc.edu).
