Course Career:

SEARCH

Select the appropriate term.

The default is to search for open classes. If you change this to search for all classes, you will need to fill in at least one additional criterion.

Click **Search**.

You can enter part or all of a word in the course title.

Tip:
Find **Lower Division** classes by searching for course numbers "Less Than or Equal to 99" or find **Upper Division** classes by searching for course numbers "Greater Than or Equal to 100."

Find graduate courses by choosing Graduate from the Course Career dropdown menu.

Class Search Results Options

The search results page shows primary classes (lectures, seminars, graded labs etc.).

The search criteria and number of results are shown.

To change the order of the columns, click the heading for a column and drag and drop it to move it left or right.

To change which columns are displayed, click **Settings**. The window shown on the left will pop up. Remove the check marks next to any columns you do not want to have included in your search results and click **Apply**.

AMS 11A - 01 LEC 19038	Math Methd for Econ	● Open	90	52	0

Description

Introduction to mathematical tools and reasoning, with applications to economics. Topics are drawn from differential calculus in one variable and include limits, continuity, differentiation, elasticity, Taylor polynomials, and optimization.

Enrollment Requirements

Students who have already taken Mathematics 11A and 19A should not take this course. Prerequisite(s): score of 31 or higher on Math Placement Exam. Students who do not place into precalculus should enroll in Mathematics 2.

Class Notes

Also offered as ECON 11A.
